# 2012

Celebrating 25 years in business, BOSS AUDIO SYSTEMS, would like to first thank you, our loyal customers. The support and commitment you have shown over the years is sincerely appreciated.

Great products, great prices and great service have been and always will be our commitment to you moving forward to our next 25 years.

For 2012, we continue to offer one of, if not the, broadest product selections of mobile entertainment products in the industry. Whether it's in-dash multimedia or CD/MP3, video, amplifiers, subwoofers, speakers or accessories, BOSS AUDIO SYSTEMS has just what you need.

We pride ourselves on striving to be the best vendor partner in your business and truly thank you for your continued loyalty and support.

AUDIO SYSTEMS

The image shows a Boss Audio Systems in-dash unit installed in a car's dashboard. The unit features a large TFT monitor displaying a glowing, abstract graphic. Below the monitor is a control panel with a digital display showing 'FM: 87.5', several buttons, and a volume knob. The unit is mounted in a dark dashboard with a red leather interior visible in the background.

# IN DASH ELECTRONICS

The world's entertainment center is mobile now; bringing your favorites, from your home to your car or boat, is the new "norm". As a leader in Mobile Entertainment, Boss Audio offers the broadest selection of mobile multimedia and CD/MP3 products in the industry. In-dash, single and double-DIN units with AM/FM/CD/DVD capabilities displayed and controlled on anywhere from a 3.2" to 8" TFT monitor. Motorized and non-motorized, touch screen and non-touch screen, with or without Bluetooth<sup>®</sup>, with or without full iPod<sup>®</sup> control, with or without Navigation, Boss Audio Multimedia and CD/MP3 models cover all your entertainment needs at the most competitive price points.

# DISRUPT AMPLIFIERS

The "new for 2012" DISRUPT Line has arrived. Sleek, low profile, and slim in design, this new series is loaded with power. The Disrupt Series is guaranteed to deliver dependable, high-efficiency Class-D power to any mobile audio system. The DST4000D, DST3000D, and DST2500D digital amplifiers utilize full-range circuitry that maximizes amplifier efficiency while providing the highest quality of sound reproduction. Compact and powerful...everything that today's enthusiast wants!

**DISRUPT**

The IMPACT from BOSS is efficient, powerful, and extremely compact. This unique design results in the smallest chassis ever developed by BOSS engineers. With today's vehicles getting smaller this series offers a flexibility in system design seldom seen in today's market. The three 2 channels, one 4 channel, and 1 mosfet monoblock will fit into spaces previously forbidden.

Why sacrifice performance for convenience when there are Armor car amplifiers? With a slimmer chassis, ARMOR leads the way. No problem - Armor's design packs incredible performance into a slim package. In fact, the feature-rich performance and put-it-anywhere convenience are so hard to find in the automotive environment that the Armor series may be forging its own product category.

The Phantom power Amplifiers have proven to be a BIG hit. This line-up of seventeen power sources is guaranteed to cover any, and all, applications. In selecting a car amplifier you must be able to make choices about your listening environment. Phantom car amplifiers include a full feature line-up that allows you to customize your system and make those choices. Whether your need is power or sound quality The Phantom Series will supply unrivaled results.

Your first view of the RIOT Series may deceive you. The elegant lines are a textbook exercise in minimalist design. From this point on, however, its power and reproductive authenticities will be anything but minimal. Perhaps the only thing more extensive than the features showcased is the enjoyment you'll derive from them. This is only one reason BOSS Audio has led the way in 12 Volt Entertainment for the last quarter of a Century.

## MOSFET MONOBLOCK FEATURES

- MOSFET Power Supply
- Line Level and Speaker Level Inputs
- Variable Gain Control
- Chrome Plated RCA Inputs
- Variable Low Pass Crossover
- Variable Bass Boost (0 to +12dB)
- Power and Protection LEDs

**R5004**  
**2000 WATT MAX POWER**  
**VARIABLE BASS BOOST (0 to +18dB)**

**4-CHANNEL MOSFET BRIDGEABLE  
 POWER AMPLIFIER**  
 Featuring Remote Subwoofer Level Control

## 4 CH MOSFET FEATURES

- MOSFET Power Supply
- Bridgeable
- Line Level and Speaker Level Inputs
- Variable Gain Control
- Chrome Plated RCA Inputs
- Variable Low Pass Crossover
- High Pass Crossover
- Variable Bass Boost (0 to +18dB)
- Power and Protection LEDs

### **BX55**

#### **2/3-WAY ELECTRONIC CROSSOVER**

Featuring Remote Subwoofer Level Control

Inputs: Front, Rear and Subwoofer

Outputs: Front, Rear and Subwoofer

Selectable Crossover Frequencies

Subwoofer: 45Hz–4.2kHz

Low Pass (bandpass): 300Hz–4.6kHz

Rear High Pass: 65Hz–4.5kHz

Front High Pass: 65Hz–4.5kHz

Variable Bass Boost, 0 - +18dB

Slope Rate: 12dB/Octave

Signal-to-Noise Ratio: >110dB

Low Pass Input Selector: Direct or Front/Rear Mix

Remote On/Off Power Control

LED Power Indicator

Subwoofer Phase Switch

Dimensions (W x L x H): 8-3/4" x 6- 1/2" x 1- 1/2"

#### **2/3-WAY ELECTRONIC CROSSOVER**

Featuring Remote Subwoofer Level Control

Inputs: Front, Rear and Subwoofer

Outputs: Front, Rear and Subwoofer

Frequency Multiplier: x1 or x20

Selectable Crossover Frequencies

Low Pass: 32Hz–250Hz

High Pass: 40Hz–400Hz

Variable Bass Boost, 0 - +12dB

Bass Boost Frequency Selector: 25–250Hz

Selectable Crossover Slope: 6dB/Octave or 12dB/Octave

Parallel input switch (feeding multiple channels from one input)

Phase Shift, Stereo/Mono

Signal-to-Noise Ratio: >110dB

Remote Subwoofer Level Control

Low Pass Input Selector:

Direct or Front/Rear Mix

Remote On/Off Power Control

LED Power Indicator

Subwoofer Phase Switch

Dimensions (W x L x H): 7-1/8" x 5-3/4" x 1-1/2"

### **BX35**

#### **3-WAY ELECTRONIC CROSSOVER**

Inputs: Front, Rear and Subwoofer

Outputs: Front, Rear and Subwoofer

Independent Gain Controls for each Channel

Dual Input Selector

Bass Boost On/Off Switch with Frequency

Selector: 40Hz, 80Hz or 120Hz

Frequency Multiplier (x1 or x5) on High Pass Output

Selectable Crossover Frequencies

Subwoofer: 40Hz–400Hz

Rear High Pass: 50Hz–1.5kHz

Front High Pass: 50Hz–7.5kHz

Slope Rate: 12dB/Octave

Signal-to-Noise Ratio: >90dB

Remote On/Off Power Control

LED Power Indicator

Subwoofer Phase & Stereo/Mono Switches

Dimensions (W x L x H): 8-3/4" x 5-3/4" x 1-1/2"

### **BX25**

#### **2-WAY ELECTRONIC CROSSOVER**

Featuring Remote Subwoofer Level Control

Variable Crossover Frequencies

Subwoofer: 35Hz–400Hz

High Pass : 50Hz–1.5kHz

Variable Bass Boost, 0 - +18dB @ 45Hz

Slope Rate: 12 dB/Octave

Signal-to-Noise Ratio: >90dB

Remote Subwoofer Level Control

Phase Inversion Switch for Sub Output

Gold Plated Connectors

LED Power Indicator

Dimensions (W x L x H): 5-3/4" x 6-5/8" x 1-1/2"

# MARINE RECEIVERS, AMPLIFIERS AND LOUDSPEAKERS

When you're out having fun on your boat you don't need to worry about harsh conditions in the marine environment. Boss marine head units have coated circuit boards to seal out moisture. High-tech waterproof materials and special UV-protection coatings for plastic surfaces provide resistance to corrosion from salt water and chlorine. Switches and CD compartments are sealed to keep water out.

Boss Marine Waketower speaker systems are built to deliver superior performance in the toughest conditions. Polypropylene cones and rubber surrounds are impervious to moisture. A blast of salt water will not hurt these speakers. A protective coating is applied to block UV rays, maintaining material integrity and keeping the speakers looking new.

Your car's factory electrical system does not provide the maximum power source needed for Amplifiers. Dimming headlights, distortion, and weak bass are signs your Amp isn't getting enough power. A Boss capacitor quickly releases stored electricity when your Amp needs it most (like during heavy bass notes). Our digital voltage meter let's you know the available power.

# PRODUCT DISPLAYS

**FULL-COMPONENT  
DISPLAY**

**HEADREST COUNTERTOP DISPLAY**

Because an in-store display is the most efficient way to demo product, BOSS engineering has redesigned our display to look better, sound better, and present more audio and video than in previous years. We will custom build each display to your specific product selection.

Our full-component display is set to house four indash receivers/DVD players and an equalizer of your choice.

The upper section of the display is built to house two flip down monitors or headrests. New for 2012 our countertop head rest display will showcase our 7, 8, and 9 inch head rests (with or without DVD).

In the center section, which houses the receivers, EQ, and DVD unit you'll have room to select one pair of speakers, (6x9, 6-1/2, 5 1/4) and for 2012 a pair of 4 inch as well. The bottom section positions the two 12 inch subwoofers, at a studio-monitor angle designed to optimize the listening field at 4 or 5 feet.

In the section below the speakers, you may choose three or four Amplifiers to supply all the audio power needed.

For systems with multiple monitors we use a BV-AM5 to boost the video signal. For radio reception we'll install a MRANT-10 (AM/FM antenna) and an antenna splitter (for the multiple receivers).

Your BOSS in-store display will be delivered with all products installed. To have your display plug-in-ready, a power supply will also be installed at an additional cost.

Please contact your BOSS account manager for additional information concerning our display purchase program.
