THE INTERNATIONAL GROUP OF COMPANIES

FABER-CASTELL Brazil

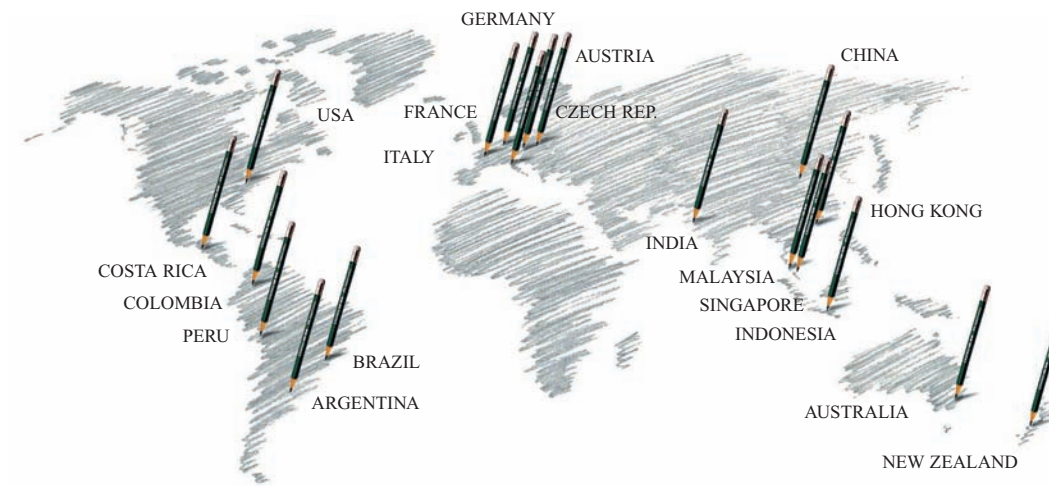

FABER-CASTELL Malaysia

FABER-CASTELL China

FABER-CASTELL manufactures at 15 locations round the world, marketing its products through 19 sales organizations. In summer 2001, a new production site was opened in China, the foundation stone of a larger factory was laid in Malaysia, and a new factory building came into operation in Peru.

A. W. Faber-Castell production sites and sales organizations world-wide

The environment continues to be very important to us. The Forestry Stewardship Council has awarded its sought-after certificate to FABER-CASTELL Brazil for a successful reforestation project. This assures a sustainable supply of timber without damaging natural resources.

TRADITION AND PROGRESS

In 1761, Kaspar Faber manufactured the first “Bleyweißstifte”. In 1840, Lothar von Faber marked the pencils with his name, established the standards for length, diameter and lead hardness and turned his pencils into real quality products and the world’s first branded writing implement. In 1849, the first foreign

branches were opened in New York, London and Paris. In 1898, Baroness Otilie von Faber married Count Alexander zu Castell-Rüdenhausen. The marriage resulted in the famous company name Faber-Castell.

In 1905, the legendary Castell 9000 was created by Count Alexander von Faber-Castell, which with its unmistakable design continues to enjoy great success worldwide. As and from 1928, Count Roland von Faber-Castell

took over management of the company.

He acquired a majority share in Lapis Johann Faber S/A, Brazil, which is today the largest factory for graphite and colour pencils in the world. By establishing international production sites and sales companies, Faber-Castell grew to be the world’s leading producer of wood-cased graphite and colour pencils. In 1978, Count Anton W. von Faber-Castell became head of the company now in its 8th generation. He focusses strongly on new products (including cosmetic pencils) and the expansion of the company’s international activities with the aim of establishing FABER-CASTELL as a true global brand.

THE PERFECT PENCIL IDEA WITH BUILT-IN SHARPENER AND ERASER

Functional and innovative: a superior sharpening knife is integrated into the pencil extender

The functional clip ensures that the extended pencil does not slip out of your pocket

A classic – even today: the pencil extender which also serves as a protective cap for the graphite pencil

Environmentally-friendly water-based paint

A superior, eco-friendly eraser makes small mistakes immediately disappear

Each graphite pencil leaving our house is protected by a special bonding (SV) and thus breakage-resistant

PERFECT PENCIL IDEA CASTELL

SMALL AIDS FOR MAJOR IMPACT

There is a selection of four pencil models for perfect erasing

Of course, our "rectangular classics" also provide optimum erasing results for all needs

The tip of the eraser ensures pinpoint erasing

Our superior sharpeners make sure that pencil tips always retain a good shape

The red, soft eraser lead for graphite and colour pencils, the white rigid eraser lead for ink and Indian ink

PERFECTION ERASER PENCILS

- ideal for pin-point erasing
- red eraser point for graphite and colour pencils as well as carbon copies
- white, hard eraser point for ink, drawing ink, ballpoint pens and typewriters
- available in 4 models

OUR PAST IS OUR FUTURE

On 6th July 2001, in the presence of the President of the Federal Republic of Germany, Johannes Rau, FABER-CASTELL celebrated its 240th anniversary in and around the FABER-CASTELL castle in Stein. More than 2500 employees and guests from the worlds of politics, art and industry came from all over the world, underlining the company's international focus. FABER-CASTELL has again proven that tradition and innovation need not be mutually exclusive, and that the creative powers of FABER-CASTELL continue to be effective. The unique GRIP graphite and coloured pencils with their patented grip zones have been highly successful, and have proven that there is always room for improvements, even in something as apparently simple as a pencil. Shortly after its introduction, the GRIP 2001 pencil had already won four major design prizes and the US magazine Business Week went as far as honouring it as "Product of the Year 2000". The new Jumbo GRIP graphite and coloured pencils were voted "Product of the Year 2002" by the "pbs" German stationers' association, and were nominated for the German Design Prize 2002. These successes and the positive international development of the FABER-CASTELL brand are the result of the consistent application of the company's mission statement, which was formulated 150 years ago. The promise to offer only the best quality in each product segment worldwide remains one of the most important elements in our company philosophy up to the present day. In the 19th century, Lothar von Faber practised social responsibility for his employees, and this is reflected today, for example, in a voluntary social charter, which applies worldwide. FABER-CASTELL has recognised the significance of environmental protection with a reforestation project in Brazil that, unique in the world, will ensure the supply of wood without affecting the natural forests. The project was awarded the highly prized "Forestry Stewardship Council". With its clearly structured range of products to appeal to various target groups, FABER-CASTELL intends to accompany man throughout his life. In this catalogue too, you will find new evidence of the market focus and innovative power behind the global brand of FABER-CASTELL in the form of new products, which combine true consumer benefits with unmistakable design. Products that will secure better margins for you, our partner. I wish you lots of success in your partnership with our company.

Anton W. Faber-Castell
