Introduction

I am happy to welcome you to the 2022 edition of the international studbook for Grevy's zebra (*Equus grevyi*). I would like to thank everybody for their contributions and ongoing cooperation to keep data as updated and complete as possible. This allows population managers to work with the best possible datasets. Some institutions do not report to ZIMS and so I thank them for reporting any updates to me directly for inclusion in the studbook.

Following the COVID pandemic, the situation in Kenya got extremely difficult for Grevy's zebra and people due to an extreme and prolonged drought. As in emergency situations before, the zoo community and many other organisations and individuals came together to support the colleagues in the field to provide for the animals and manage them through this potentially devastating time. You can read more on this and many other conservation actions on the following pages.

At this point I would just like to say: Thank you! for making this work possible.

PLEASE, WOULD ALL REGISTRARS (HOLDERS AND OWNERS) HAVE A QUICK LOOK AT THE INFORMATION FOR THEIR ANIMALS AND INSTITUTIONS AND REPORT ANY MISTAKES AND OMISSIONS TO ME? THOSE WHO ARE NOT ON ZIMS, PLEASE ENTER THE INTERNATIONAL STUDBOOK NUMBERS INTO YOUR RECORDS TO MAKE FUTURE COMMUNICATIONS EASIER? THANK YOU!

Ex situ Population:

The total number of Grevy's zebra in zoological organisations on 31st December 2022 was 178.300.0 (478) in 117 institutions in 24 countries.

Asia	14.9.0 (23); 9 institutions
Europe	85.150.0 (235); 57 institutions
Central America	7.16.0 (23); 3 institutions
North America	70.123.0 (193); 47 institutions
South America	2.2.0 (4); 1 institution

Annual births and deaths during 2022:

World wide 2022

Total births reported: 12.13.1 (26)

Total deaths reported: 11.29.1 (41)

Pic. 2: Grevy's zebra, Marwell © T.Langenhorst

	Europe	Asia	C. America	N. America	S.America
Births reported:	4.8.1 (13)	1.1.0 (2)	0.0.0 (0)	7.4.0 (11)	0.0.0 (0)
Deaths reported:	5.17.1 (23)	1.4.0 (5)	0.0.0. (0)	5.8.0 (13)	0.0.0 (0)

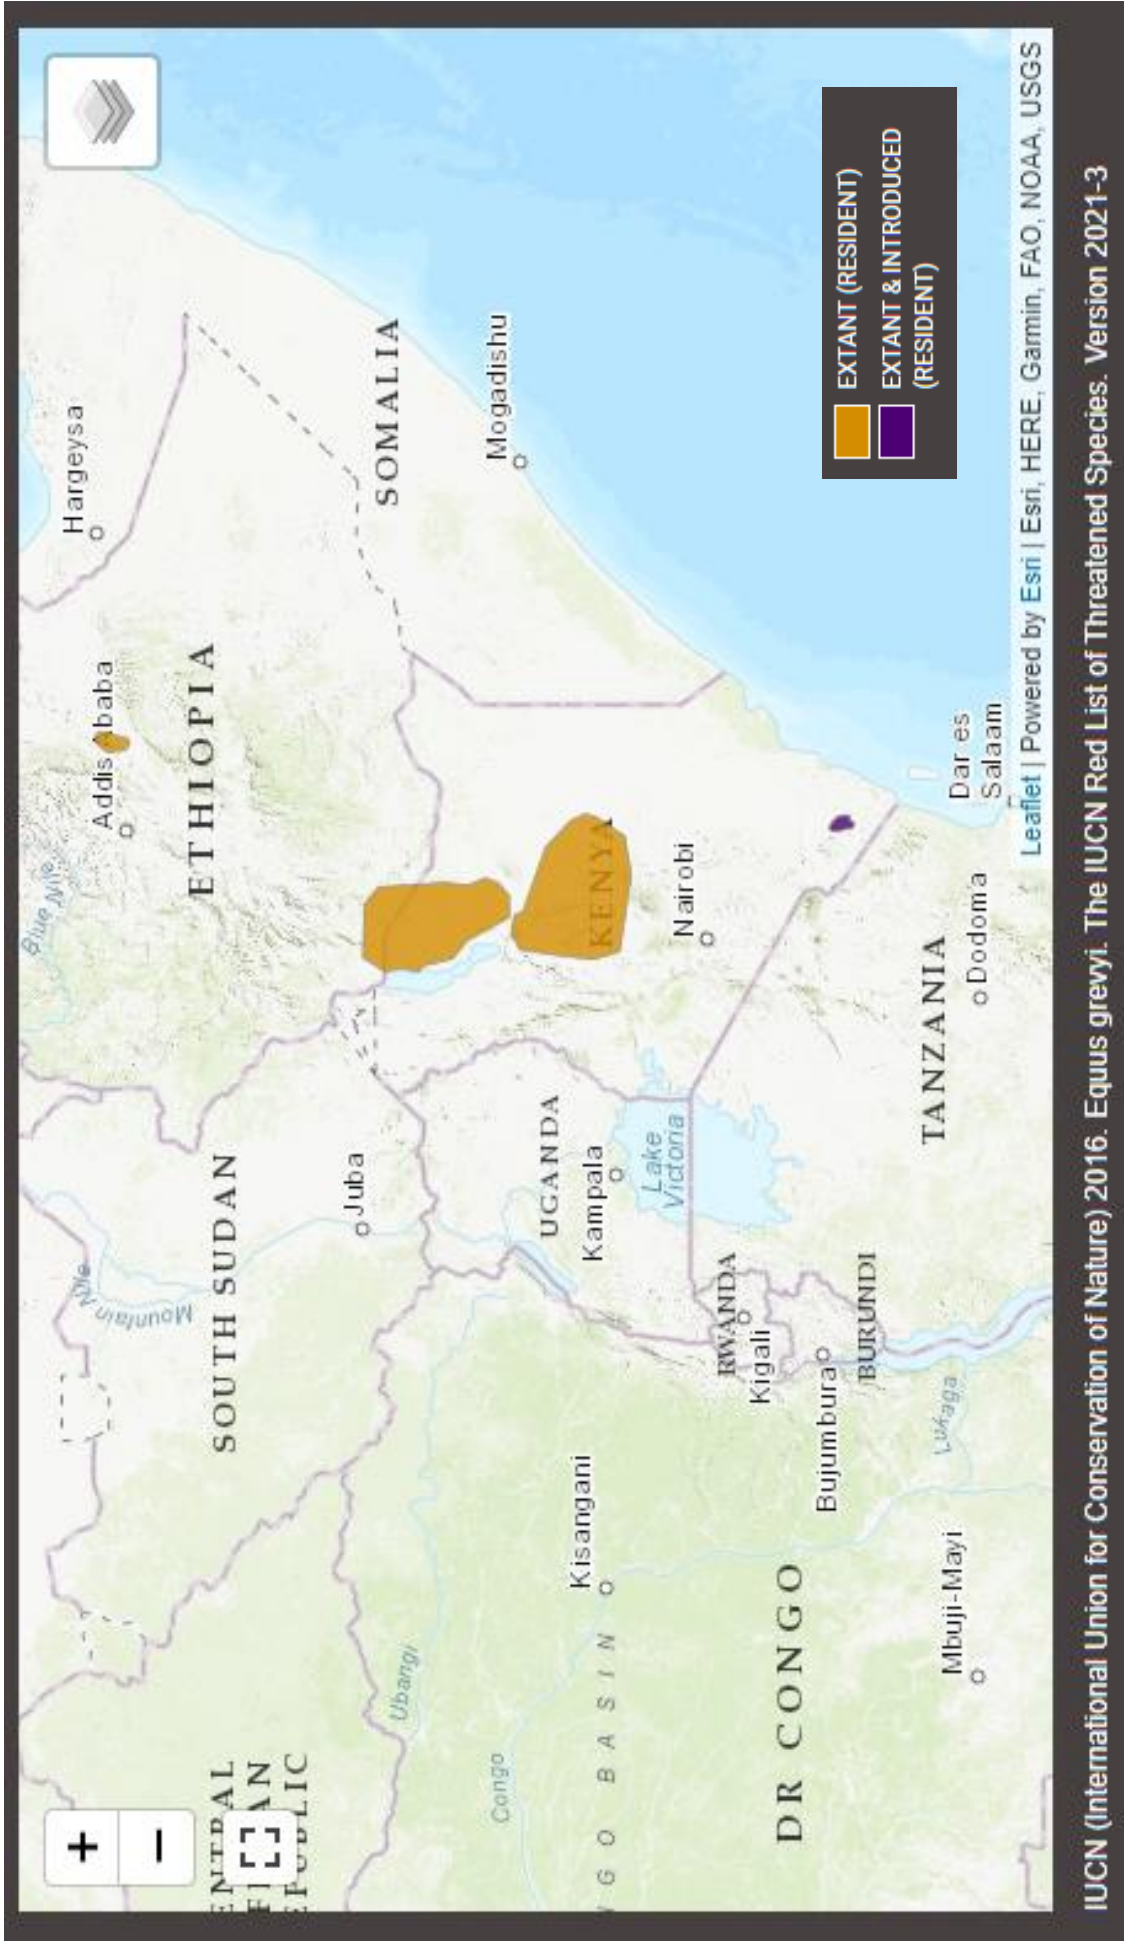

Wild Status:

The IUCN reassessed the majority of equid species in 2016 and The IUCN Red List 2017 lists Grevy's zebra as Endangered A2acd ver 3.1; assessed by Rubenstein, D., Low Mackey, B., Davidson, ZD, Kebede, F. & King, S.R.B. For a distribution map, please see the IUCN map on the following page;

Rubenstein, D., Low Mackey, B., Davidson, ZD, Kebede, F. & King, S.R.B. 2016. *Equus grevyi*. *The IUCN Red List of Threatened Species* 2016: e.T7950A89624491. <https://dx.doi.org/10.2305/IUCN.UK.2016-3.RLTS.T7950A89624491.en>. Downloaded on 21 May 2020.

Grevy's zebra are legally protected in Ethiopia, and since 1977 have been protected by a hunting ban in Kenya. The most recent published figures of a national survey estimated there to be 2812 ± 163 individuals in Kenya (Rubenstein, Parham et al. 2018).

Grevy's Zebra Conservation Activities

Groups and organisations mentioned in this report are:

AWF	African Wildlife Foundation www.awf.org
EWCA	Ethiopian Wildlife Conservation Authority
GZT	Grevy's Zebra Trust www.grevyszebratrust.org
GZTC	Grevy's Zebra Technical Committee; membership includes: GZT, KWS, LWC, MW, NRT, Princeton
KWS	Kenya Wildlife Service www.kws.org
Lewa or LWC	Lewa Wildlife Conservancy www.lewa.org
Marwell	Marwell Wildlife www.marwell.org.uk/conservation
NRT	Northern Rangelands Trust www.nrt-kenya.org
Princeton	University of Princeton/Denver Zoo www.princeton.edu/~equids/people.html
STE	Save the Elephants www.savetheelephants.org

The Grevy's zebra conservation projects are supported, and often made possible by the continued funding and support of the global zoo community, in particular Grevy's zebra holding-institutions in Europe and North America. Grevy's zebra conservation work in 2022 was dominated by the terrible drought Kenya, its wildlife and people suffered. Despite this, other activities continued as you can see in the report below. While The studbook gives only a summary of conservation efforts. For more reports, please visit the websites of Marwell Wildlife (<https://www.marwell.org.uk/wp-content/uploads/2022/10/Grevys-zebra-Conservation-Report-2022.pdf>) and Grevy's Zebra Trust (<http://www.grevyszebratrust.org>).

National Activities - Kenya

National Management and Development of Wildlife Research and Conservation

Grevy's Zebra Recovery and Action Plan (2017-2026)

Grevy's Zebra Technical Committee (GZTC) / Drought Relief and Water Management

Northern Kenya has undergone five consecutive failed rainy seasons (2020-2023), resulting in one of the most severe droughts experienced in Kenya for close to 40 years. As reported last year, GZT and Marwell – with permission from the Kenya Wildlife Service – joined forces to deliver hay to locations frequented by Grevy's zebra, mostly at water points. Marwell was feeding in the far north: Anderi, Kargi, Lonjorin and later Sivicon. GZT established feeding operations in Buffalo Springs, Samburu and Shaba national reserves. Local hay supplies had already run out, so hay was sourced from the Rift Valley and southern Kenya and was delivered by lorry, with 300 bales per lorry.

GZT established three mobile feeding teams, one for each reserve. Each team was made up of one university graduate, one community member from villages bordering the reserves, and one driver, all from northern Kenya. They also engaged a Veterinary Assistant from KWS to specifically focus on Grevy's zebra

monitoring so that observed mortalities could be better understood, and possibly prevented where only basic veterinary interventions were required (Pic.02).

Pic.01: scouts providing hay © GZT

Pic. 02: Vet team aiding weakest Grevys © GZT

In a huge effort, GZT teams were able to feed an average of 500 Grevy's zebra daily for 141 days (Pic 01). Of these, 45% were lactating females and foals, 23% were non-lactating females, 8% were pregnant females, 20% were bachelor males and 4% were territorial males. They distributed 24,000 bales of hay, 600 bales of lucerne (alfalfa grass), 1,200 kgs of lucerne pellets, and 1,930 kgs of nutritional supplements. Their teams drove a total of 34,000 kms to deliver feed to Grevy's zebra herds. As a result, an average body condition score for most Grevy's zebra was maintained, thereby significantly reducing potential mortality. Marwell employed Hay Monitors from the local communities and some of their scouts at their feeding sites to monitor the Grevys, hay usage, and replenish the hay daily. Camera traps were also deployed to monitor nightly activities at the feeding sites, including other wildlife that was benefitting from the hay. Hay was purchased through GZT and delivered to the far northern region. While numbers of individuals were far lower in the north than in the GZT areas, these individuals are crucial as a potential link between the Kenyan and Ethiopian Grevy populations. At the height of the drought, Marwell was feeding 70-80 Grevy's zebra in Anderi; 40 in Lonjorin; 60 in Sivicon and 20-30 in Kargi. They also provided hay to some KWS wardens to feed the Grevys local to their stations. Overall, 2400 bales of hay were delivered.

Marwell received reports of extremely weak Grevy's away from feeding sites (Pic 04). A small team was established to drive into remote areas and look for starving and exhausted Grevys to give hay/water, for example in the desert.

In some areas, GZT and Marwell scouts were patrolling together to find Grevy's zebra that needed immediate help. This was supported by the local KWS warden with a vehicle while Marwell provided the fuel. Some Grevys were so desperate they approached people and livestock, something totally unheard of. Communities suffering terribly from the drought themselves were sharing the little water they had with Grevys, leading to previously unseen sights (Pic 03). Help was coming from KWS wardens, the Milgis Trust, local project workers and the communities themselves. It was heartening to see how everyone pulled together to save these beautiful zebras.

Pic.03 Grevys approaching water in daylight © Marwell

Pic.04: The drought at its worst © Marwell

All these activities cost enormous amounts of money as huge quantities of hay and lucerne were needed as well as fuel, vehicles and people to move it all. Combined with the huge global increase in cost for fuel and food, the situation became unsustainable just for GZT and Marwell alone. GZT contacted Marwell Wildlife for help with an emergency call for donations from the European zoo community. The European *Ex situ* Programme contacted the Grevy's zebra holders. Online donation pages were set up and the zoo community rallied round and donated plenty of funds, securing the feeding efforts in Kenya and potentially helping the core population of Grevy's zebra survive these terrible times.

At the time of writing this, the rains have finally come, and the land, wildlife and people have begun to recover.

We would like to specially mention all those who helped in the hour of the Grevy's zebra most desperate need and have helped to prevent a major disaster for the species:

African Fund for Endangered Wildlife Kenya, Association Francophone des Soigneurs-Animaliers (ASFA), Atua Enkop, Banda School, Bioparc Zoo de Doué la Fontaine, Braeburn School (Nanyuki), Elephant Watch, Ewaso Lions, Fondazione Bioparco di Roma, Foundation for International Aid to Animals, Givskud Zoo – Zootopia, Governors Camp, International Fund for Animal Welfare, Kolmården Foundation, Leiden Conservation Foundation, Maliasil, Marwell Wildlife, Mount Kenya Trust, Mulhouse Zoo, OASYS-Parque Temático del Desierto de Tabernas, Ouwehand Zoo Foundation, Parc Zoologique et Botanique de la Ville de Mulhouse, Safari Collection, Saint Louis Zoo, Stichting Wildlife, Terre de Félines, Touroparc Zoo, West Midland Safari Park Ltd., Wild Elements, Wildlife Conservation Network, Wilhelma-Zoologisch-Botanischer Garten Stuttgart, World Women Work, Zoo de la Palmyre, Zoo du Bassin d'Arcachon, Zoo Dvůr Králové, Zoo Frankfurt, Zoo Leipzig, Zoo Planckendael, Zoologischer Garten Köln, Zoologischer Garten Berlin AG, ZSL Zoological Society London.

Our deepest gratitude also goes to the hundreds of individuals who responded during our time of need and generously donated towards the Grevy's zebra drought response effort. Your amazing support helped us to save as many Grevy's zebra as possible during Kenya's drought crisis. **Ashe Oleng!**

Relief Food Distribution

The prolonged drought also caused huge losses of livelihood, especially amongst livestock production systems, leading to acute food insecurity in the region. As the situation continued deteriorating, many of the pastoralist communities we work closely with began recording high amounts of livestock losses, and subsequently a humanitarian crisis began unfolding.

GZT partnered with the I&M Foundation to feed 500 vulnerable families in Samburu. In addition, the Banda School provided support to an additional 30 families. Food parcels based on published guidance from the Kenya Cash Working Group and considering what was locally available in northern Kenya and practical for storage (Pic 05). The exercise gave the entire team more impetus to put even more effort on longer-term impactful projects that will sustain the communities.

Pic.05: food parcels for the communities © GZT

While the drought and supplemental feeding seemed at times all-consuming for our teams, other conservation work did carry on:

Community-based monitoring, using SMART technology.

Over the last twelve months the 24-scout strong Marwell team patrolled eight stations covering Samburu and Marsabit counties. One patrolled and took Grevy's zebra photos for Stripe ID in an area not monitored before. Number of patrols as well as distance increased over the last two years.

The GZT field team of Grevy's zebra Scouts, Ambassadors and Warriors continued to play a critical role monitoring and protecting Grevy's zebra across their respective regions in Wamba, El Barta and Laisamis. These regions cover an area of 10,000 km² to monitor Grevy's zebra and inform management interventions such as veterinary attention, supplementary feeding or water management.

Marwell and GZT scout teams use SMART (Spatial Monitoring and Reporting Tool) phones to collect and record patrol data. SMART is an open source and freely available software application (<https://smartconservationtools.org>). Data analysis can then produce summaries and infographics like the examples for Marwell in 2022 in Figures 01 and 02 below.

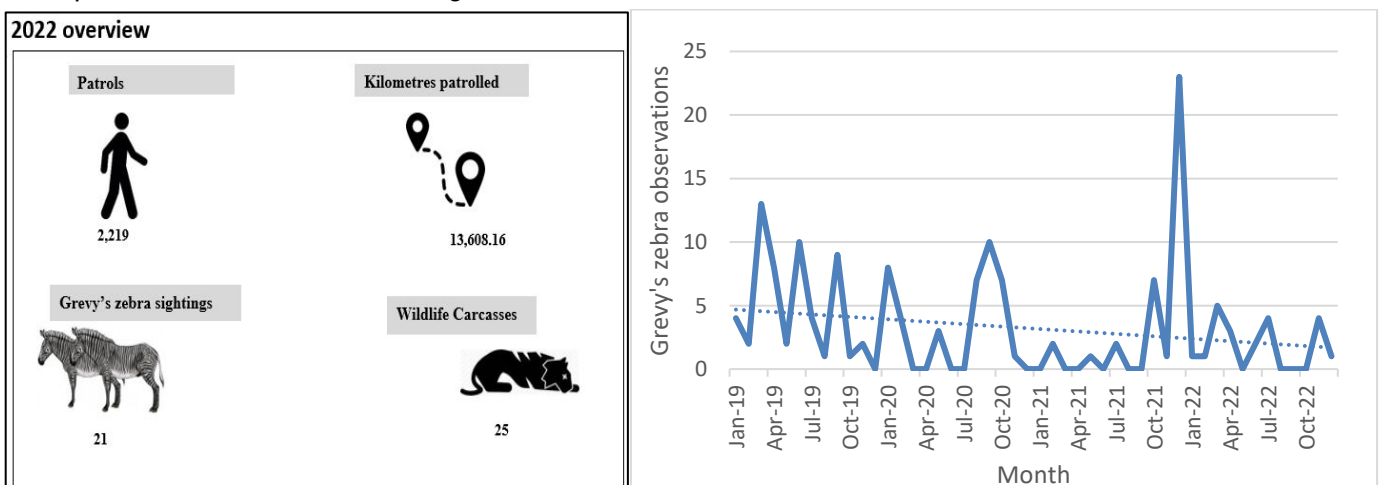

Fig.1 & 2 Summary of scout patrol results © Marwell

GZT Warriors and Ambassadors carried out 1,377 foot patrols (Pic 06), walking 14,201 kms to monitor and protect Grevy's zebra. They had 370 encounters (individuals or herds) with Grevy's zebra and collected data on 1,842 sightings of Grevy's zebra. From these sightings they identified that the combined juvenile and foal breakdown as a percentage of the total population (in their area) was 24.5%.

Pic.06 GZT warriors © GZT

Pic.07: Marwell scouts © Marwell

The whole Marwell scout team (Pic 07) had been issued with the updated technology of SMART Mobile last year and GZT will follow suit in 2023. SMART Mobile, together with SMART Connect improves on patrol efforts and data collection. It allows real-time data transfer to 'connect' scouts and rangers in the field to the home hubs that can analyse the data. This will make it possible to respond to real-time alerts and enable more effective and rapid operational responses.

We are working closely together with our partners to get the most out of this technology. The aim is that GZT, Marwell and potentially Lewa Wildlife Conservancy all use the same SMART functionality and collect the same data in their respective areas allowing easy comparison and merging of data for all areas used by Grevy zebra.

Rangelands Programme

During the drought the GZT rangelands team had to be innovative on how to build hopes for a better future, despite the daunting situation. To maintain the momentum of community engagement, they focused on voluntary land restoration through construction of semi- circular bunds, to control water runoff. A total of 12,580 bunds were constructed in Kalama, Westgate and Meibae community conservancies.

Pic. 08: Semi-circular bund team © GZT

Pic.09: Grassland team © GZT

The team was able to engage a total of 1,425 people through quarterly grazing committee meetings, village-based committee meetings, zonal wet and dry season mobilization meetings, grassland champions and warriors counselling sessions. Meetings built technical capacity on Holistic Land and Livestock Management (HLLM) for the different structures within the conservancy and the different social groups within the community.

A total of 372 people were trained through six workshops on HLLM and restoration. Participants were from grazing committees, village-based committees, grassland champions (Pic.09) and semi-circular bund construction teams (Pic.08).

Community Support

Literacy training and banking (Marwell)

Since most of the scouts are illiterate, the use of the more modern SMART software can be a challenge. Marwell has therefore begun to provide literacy and numeracy training for all of their scouts. Two teachers from the local communities were employed to teach basic reading, writing, and numeracy skills. Initially over a four-day period, using song and dance as well as more conservative methods, the scouts, men and women, some with their babies in arms, took their first steps in the world of literacy (Pics. 10 & 11). Most of them had never held a crayon or pencil before in their life and yet, they wrote on the black board in front of their applauding colleagues. All of them enjoyed the training greatly and asked for it to be repeated. Several more sessions followed and one of the teachers also regularly checks in with the individual scouts. This training is now a regular part of the scouts' year.

Marwell's Field Manager also arranged for a member of a Savings and Credit Cooperative Society (SACCO) to visit the scouts in the field and discuss with them how to open accounts. Unlike standard banks, SACCOs accept people even if they do not earn above a certain threshold. They also provide extra benefits such as loans. The literacy skills and banking knowledge have provided the scouts with new independence in managing their daily lives, including the women.

Pic. 10: lady scout during literacy class © Marwell

Pic.11: Scouts learning new skills © Marwell

Nkirreten Project (GZT - Grevy's Zebra Scout women and their community peers have been trained to make reusable sanitary pads for women and girls in their communities).

The Nkirreten project expanded to two more villages in Westgate Conservancy, for a total of eight women from four villages producing reusable sanitary pads (Pics 12 & 13). In total, 6,721 dignity packs were produced in 2022.

A woman intern from Tanzania was engaged for three months to learn about Nkirreten so that she could go back to her country to implement the same for the girls and women in Tanzania.

620 dignity packs were distributed to women and girls in villages; 800 dignity packs were distributed to schoolgirls from three secondary schools, and 1,969 dignity packs were distributed to schoolgirls in 20 primary schools across Wamba, Laisamis & El Barta regions.

Pic.12: Women learning to sew sanitary pads © GZT

Pic.13: Masia & Naimutie sewing Grevy striped pads © GZT

Cooperation with KWS: During the drought, poaching of wildlife including Grevy's zebra increased drastically in the far north. Further south, wildlife is somewhat protected through the national reserves. The KWS Senior Warden for Maralal County had requested that Marwell and GZT provide a scout each to monitor the zebra groups and report any cases of injuries to Grevy's zebra as well as human-wildlife conflicts that arise. This allowed quick intervention, at times leading to veterinary care of the poached Grevys or prosecution of the poachers (pics 14 & 15).

The KWS wardens are crucial to any wildlife incidents that are reported by our scouts. They are in constant communication with the vet and our office, liaising with us on every matter and lastly providing us with security during our field trips.

Pic.14 & 15: Poached Grevy's zebra and the KWS vet team treating it © Marwell

Conservation Community Outreach:

GZT Warriors and Ambassadors held 107 meetings reaching a total of 2,509 people (Pic 16). Marwell also held quarterly meetings with communities during which they are updated on the scout and conservation work and can bring questions and grievances to the Marwell team as well as the local KWS warden (Pic 17).

Pic.16: GZT community meeting © GZT

Pic.17: Marwell scout meeting © Marwell

In addition to regular conservation sessions in schools, Marwell has begun to take school classes on 2-3 day field trips so that the children can experience wildlife up close, often for the first time in their life (Pics 18 & 19). Schools are chosen based on several factors: The school's academic performance, their commitment to environmental sustainability, the support and active involvement of students and school administration in our outreach work, and their role as pioneers of our programmes. The children are very much enjoying this and usually return home with much enthusiasm for conservation in their own communities. Schools are now approaching us to request trips of this nature and we try to accommodate them where possible.

Pic.18: School during outing to Lewa Conservancy © Marwell

Pic.19: Lonjorin school outdoors © Marwell

Infrastructure & Biodiversity Programme (a joint initiative between GZT and Ewaso Lions)

Meetings were held with the National Land Commission and Kenya Railways Corporation to explore opportunities for early integration of biodiversity data into planning processes for northern Kenya.

GZT and EL participated in the first meeting of the newly established Inter-ministerial Dialogue Platform on Infrastructure and Environment, which brought together government and civil society organisations to chart a way forward for high-level coordination on mitigating the impacts of infrastructure on Kenya's ecosystems.

Next year, GZT and Marwell are planning on collaring Grevy's zebra in areas where a huge infrastructure development (LAPSSET corridor) is threatening to divide and isolate Grevy's zebra

populations. Findings of following and mapping Grevy movements will aide to put mitigation measures into place to maintain connection of the zebra population.

MORE DETAILED REPORTS ON ALL GREVY'S ZEBRA CONSERVATION ACTIVITIES ARE AVAILABLE FROM MARWELL WILDLIFE AND GZT FROM THEIR RESPECTIVE WEBSITES OR YOU CAN CONTACT ME FOR QUESTIONS. I WILL EITHER PROVIDE INFORMATION DIRECTLY OR APPROPRIATE CONTACT DETAILS.

The landscape recovers. Happy Grevy's zebra at long last © Marwell

We would like to acknowledge all those organisations and private individuals who worked for and supported Grevy's zebra conservation in 2022:

Explanations

All animals registered in the studbook have been issued with a unique studbook number. These numbers allow access to specimen information as well as genetic and demographic analysis for population management.

The regularity of contact (or the lack of contact) with holding institutions, is constantly monitored. If no information has been given for an individual for a considerable time and all efforts to receive information from an institution prove to be fruitless, all animals for this holder will be listed as "lost to follow up" and be removed from the published studbook.

Breeder Numbers (see example below): with the advanced options of recording and analysing information in ZIMS, breeder numbers will no longer be issued for new animals as this will only add unnecessary work for the registrars and the studbook keeper.

Studbook numbers have been issued to all animals, even if stillborn or miscarried. Please make sure you report stillbirths and miscarriages (even if you do not enter them in ZIMS though that would be preferable) to the studbook as these data inform the reproductive history and ability and may prove useful for future research projects.

Identification problems:

The problem of identification can occur in those collections where animals are run as a large herd in such a way that the dams of foals are not identifiable. In these cases "MULT" is used to indicate that the individual "Sire" or "Dam" are not known, but the overall group from which the parent animals derive are known.

Death and Post Mortem:

Upon the death of an animal, please provide a copy of the Post Mortem Report or a short statement of the cause of death to the Studbook Keeper at Marwell, so that any trends of diseases or other problems affecting the survival of the Grevys in captivity can be identified.

Studbook Legend

Stud#:	Animal's permanent studbook number. Studbook numbers may not always be assigned chronologically, due to animals being recorded as they become known to the Studbook Keeper.
Sex:	M for male, m for castrated male, F for female, cont if contracepted, neut if neutered, U for unknown sex
Birth Date:	Animal's birth date. A tilde mark, '~', before a date indicates that it is approximate. '??' indicates that the date is unknown.
Sire and Dam:	Studbook numbers for the animal's sire and dam. 'UNK' if unknown. 'MULT' if several candidates have been identified. 'WILD' if the sire or dam was considered to be wildcaught - this animal is a founder.
Location:	The institution holding the animal at the time. If the animal is no longer traceable by the Studbook Keeper, 'lrf' (lost-to-followup) will appear to the right of the last known location.
Date:	The date on which the event occurred. A tilde mark, '~', before a date indicates that it is approximate. '??' indicates that the date is unknown.
Local ID:	The identification assigned by the specimen's location, often its ISIS number, house number, or occasionally house name.
Event:	Capture, Birth, Transfer, Loan, Ownership change, Death or Release
Identifiers:	House Name, Transponder, Tag/Band, Tattoo, Ear Notch
