ABOUT VERBATIM

TECHNOLOGY YOU CAN TRUST

Verbatim is a globally recognised pioneer of the data storage industry. Operating in over 120 countries, Verbatim offers a wide range of reliable and trusted products for digital storage that include Optical Storage Media, USB Drives, Memory Cards, Hard Drives and Solid State Drives (SSDs).

The Verbatim company name, which means "word for word," reflects its commitment to accurate, error-free recording of data. Its mission is to provide people with peace of mind with the products that it sells, and through its unique asset base of people, cultures, technologies, and knowledge.

Number one brand in optical media

EXPANDED OFFERING

In addition to data storage products, Verbatim has a growing range of desktop and mobile accessories to support work at home and on the road as well as everyday leisure pursuits. It is also a leading provider of 3D printing materials – its focus on quality has resulted in a range of tough and reliable filaments that are preferred by 3D printer companies across Europe.

SUREFIRE GAMING

Verbatim is proud to own the specialist gaming brand, SureFire. Designed for PC and console gaming enthusiasts, SureFire products are built to last, easy to use and great value for money to appeal to gamers of all ages and abilities. The range includes external hard drives and SSDs, gaming mice and mice pads, headsets, hubs, and other essential gaming accessories that have been specially designed for high performance gaming. Please visit www.surefire-gaming.com to find out more.

KEY MILESTONES

1969
Verbatim incorporated as Information Terminals Corp. (ITC) April 28, 1969

1974
First 8" diskettes produced

1981
First monthly production of 1 million floppy disks

1985
Aquired by Eastman Kodak

1990
Mitsubishi Chemical acquired Verbatim and invested in the business

A MITSUBISHI KAGAKU MEDIA COMPANY

1993
Introduction of CD-ROM and CD-R disks, CD-R AZO Technology and SRAM cards

1995
Acquisitions of Laser Technologies and Ecotone. CD-R production started at MCI in Singapore

1999
Restructuring and establishment of the MKM/Verbatim Group. DVD-R & DVD-RW launched

2001
DVD+RW production started (first in the market)

Memory Cards launched

2013
VxRGB LED lamps launched

2012
Cleansui Water Filters launched in Europe

SSD Launch

2011
VELVE OLED Lighting launched utilising technology from Mitsubishi Chemical Corp

2010
Launch of LED Lighting business utilising technology from Mitsubishi Chemical Corp

2009
Mitsubishi Kagaku Media Co. Ltd announces acquisition of Freecom B.V - extending global presence and position in external storage market

2008
Blu-ray Dual Layer, SDHC & MicroSDHC, Multimedia HDD, RAID HDD & Colour HDD launched

2007
Verbatim globalises corporate identity. Aquisition of SmartDisk and launch of External HDD Business

2004
Blu-ray BD-R/RE, DVD 16x and DVD+R Double Layer 8.5GB, CD-R 52x LightScribe launched (first in market for all)

2002
DVD+R and CD-R Ultra Speed 24x products launched (first in the market)

Start of sales of USB Drives

2014
Launch of PLA & ABS 3D printing filaments

2015
M-Disc collaboration. Introduction of 1000yr archival media

2016
Operations centralised to new headquarters in Eschborn, Germany.

Optical drives launched

2018
New range of security products introduced

2019
Verbatim celebrates its 50th anniversary

50 YEARS Since 1969
Technology You Can Trust

2020
Acquisition of Verbatim by CMC Magnetics

2021
Launch of specialist gaming brand: SureFire

2022
Eternal backup solution, 3-2-1-Done!

3 - 2 - 1 Done!

2023
Introduction of Portable Monitors

LIFETIME OF DATA STORAGE FORMATS

USB Drives
3-10 years
- Very convenient
- Low cost
- Easy to use

BEST FOR
Temporary storage and physically moving data from one location to another

3-10 years

Memory Cards
3-10 years
- Designed for specific devices

BEST FOR
Capturing images/video. Expanding memory of smartphones or tablets

3-10 years

SSD
3-10 years
- Very fast
- No moving parts

BEST FOR
Adding capacity to SSD ultrabooks/laptops

3-10 years

HDD
5-10 years
- Large capacities available
- Low cost per gigabyte

BEST FOR
Large volume, regular backups such as backing up home and office computers

5-10 years

Optical Media
(M-DISC™, Blu-ray®, DVD, CD)
25-1000+ years
- Very long lasting storage
- Low cost
- Permanent storage - can't be accidentally erased

BEST FOR
Keeping things forever. For photographs, family videos, and important documents - basically things you can't afford to lose

25-1000+ years

Optical media has the advantage that it is the ideal storage media designed for long term archival if it is stored in the right conditions. Whilst hard drives and flash memory products are great for storing and moving large volumes of data, they don't have the same long-term reliability that should be considered for keeping data for five years or more.

What's more, optical media is improving all the time, in both reliability and capacity, making it perfect for cold data storage. Verbatim's current top-of-the-range Blu-ray BDXL discs each store up to 100GB and will last hundreds of years without degradation. In fact, industry standard ISO/IEC 10995 tests gave them a mean lifetime of 1,332 years, with just 5% of discs showing signs of data loss after 667 years. Not only is it the cheapest (portable) storage medium on the market, there is no fear for the optical disc to be hacked or catch a virus due to its offline nature – making it safe and secure to archive important files and documents.

OPTICAL TECHNOLOGY

Core technologies, like our AZO recording layer, SERL and Hard Coat give Verbatim media technological advantages over competing products.

ADVANCED AZO DYE TECHNOLOGY

AZO is patented technology used exclusively by Verbatim. The AZO recording layer provides increased protection and reliability – it not only withstands high laser and rotation speeds, it also strongly resists UV light and maximises performance delivering a high quality recording that lasts for generations.

The recording dye is critical to CD and DVD performance; its molecular structure is designed to absorb the typical wavelength of a drive's laser. The peak absorption wavelength needs to be optimised so that the disc is compatible with a wide range of recording speeds. If the peak is too short, disc sensitivity is reduced, which causes high-speed recording problems; but if the wavelength peak is too long, this reduces the reflectivity of the recording layer and can create read errors.

Wiping with a cloth		
Wiping with steel wool		

ARTIFICIAL FINGERPRINT TEST - NO FINGERPRINT SMUDGING			
	Level 1	Level 2	Level 3
Verbatim Hard Coat			
Competitor A			

To protect discs that are handled repeatedly, Verbatim provides a special Hard Coat layer that protects from fingerprints, dust, scratches, static and water.

The image on the left depicts a disc comparison for typical scratch resistance.
The image on the right shows how Verbatim's Hard Coat reduces fingerprint smudging, an essential feature for high quality recording.

SERL

SERL (Super Eutectic Recording Layer) is a special recording layer on Verbatim's CD-RW and DVD/RW media that ensures noise-free recording time and time again. With conventional rewriteable media, the recording layer deteriorates with every rewrite, meaning a decrease in quality. With Verbatim rewriteable media however, the recording layer is returned to perfect condition on every erasure, leaving a flawless disc for the next recording. SERL also enables this media to enjoy excellent archival stability and high-speed recording. This means users can enjoy perfect, high-speed data storage every time.

BLU-RAY

- High capacity for high definition (HD) video or long-term archiving
- Dual layer (DL) discs with two recording layers for 50GB storage
- BD-R XL – three recording layers for 100GB storage

PROFESSIONAL OPTICAL MEDIA

Verbatim's professional optical media feature tighter specifications than the standards given by the relevant standardisation bodies. Tighter specifications ensure better compatibility with writers and recorders. This results in higher recording quality, thus ensuring longer archival lifetime and better readability. You can recognise Verbatim's professional optical media by the DataLifePlus branding.

- Excellent printer compatibility
- For medical use, DICOM compliant
- 66.7% tighter specifications than standard discs
- AZO dye ensures excellent read and write performance
- High quality photo and sound storage recording quality
- Superior archival stability that lasts for generations

WIDE PRINTABLE

Verbatim printable discs feature a printable surface designed for use with your inkjet printer. These discs allow you to print photos or text across the entire surface of the disc.

WATERPROOF INKJET PRINTABLE

Verbatim waterproof printable discs feature a printable surface designed for use with your inkjet printer. These discs have a coating on them which make the printable surface waterproof. No drips, bleeds or smudges!

THERMAL PRINTABLE

Verbatim Thermal Printable discs offer edge to edge printing of high resolution photos and crystal clear text for your thermal printer. The fast drying surface ensures clear labels every time. Thermal printable diss are compatible with TEAC P55B & C, Rimage Everest 400 & 600 and Rimage Prism Plus series thermal printers.

BACKING-UP AND ARCHIVING

Regular back-ups protect against both accidental or malicious data loss – anything from hardware faults and viruses to human error or theft - as they can be used to restore original data files.

Choosing the right media and back-up procedure depends on many elements:

- The amount of data being saved
- The perceived value of the data
- The levels of accepted risk
- The length of time you need to keep the data for

3-2-1 BACKUP RULE
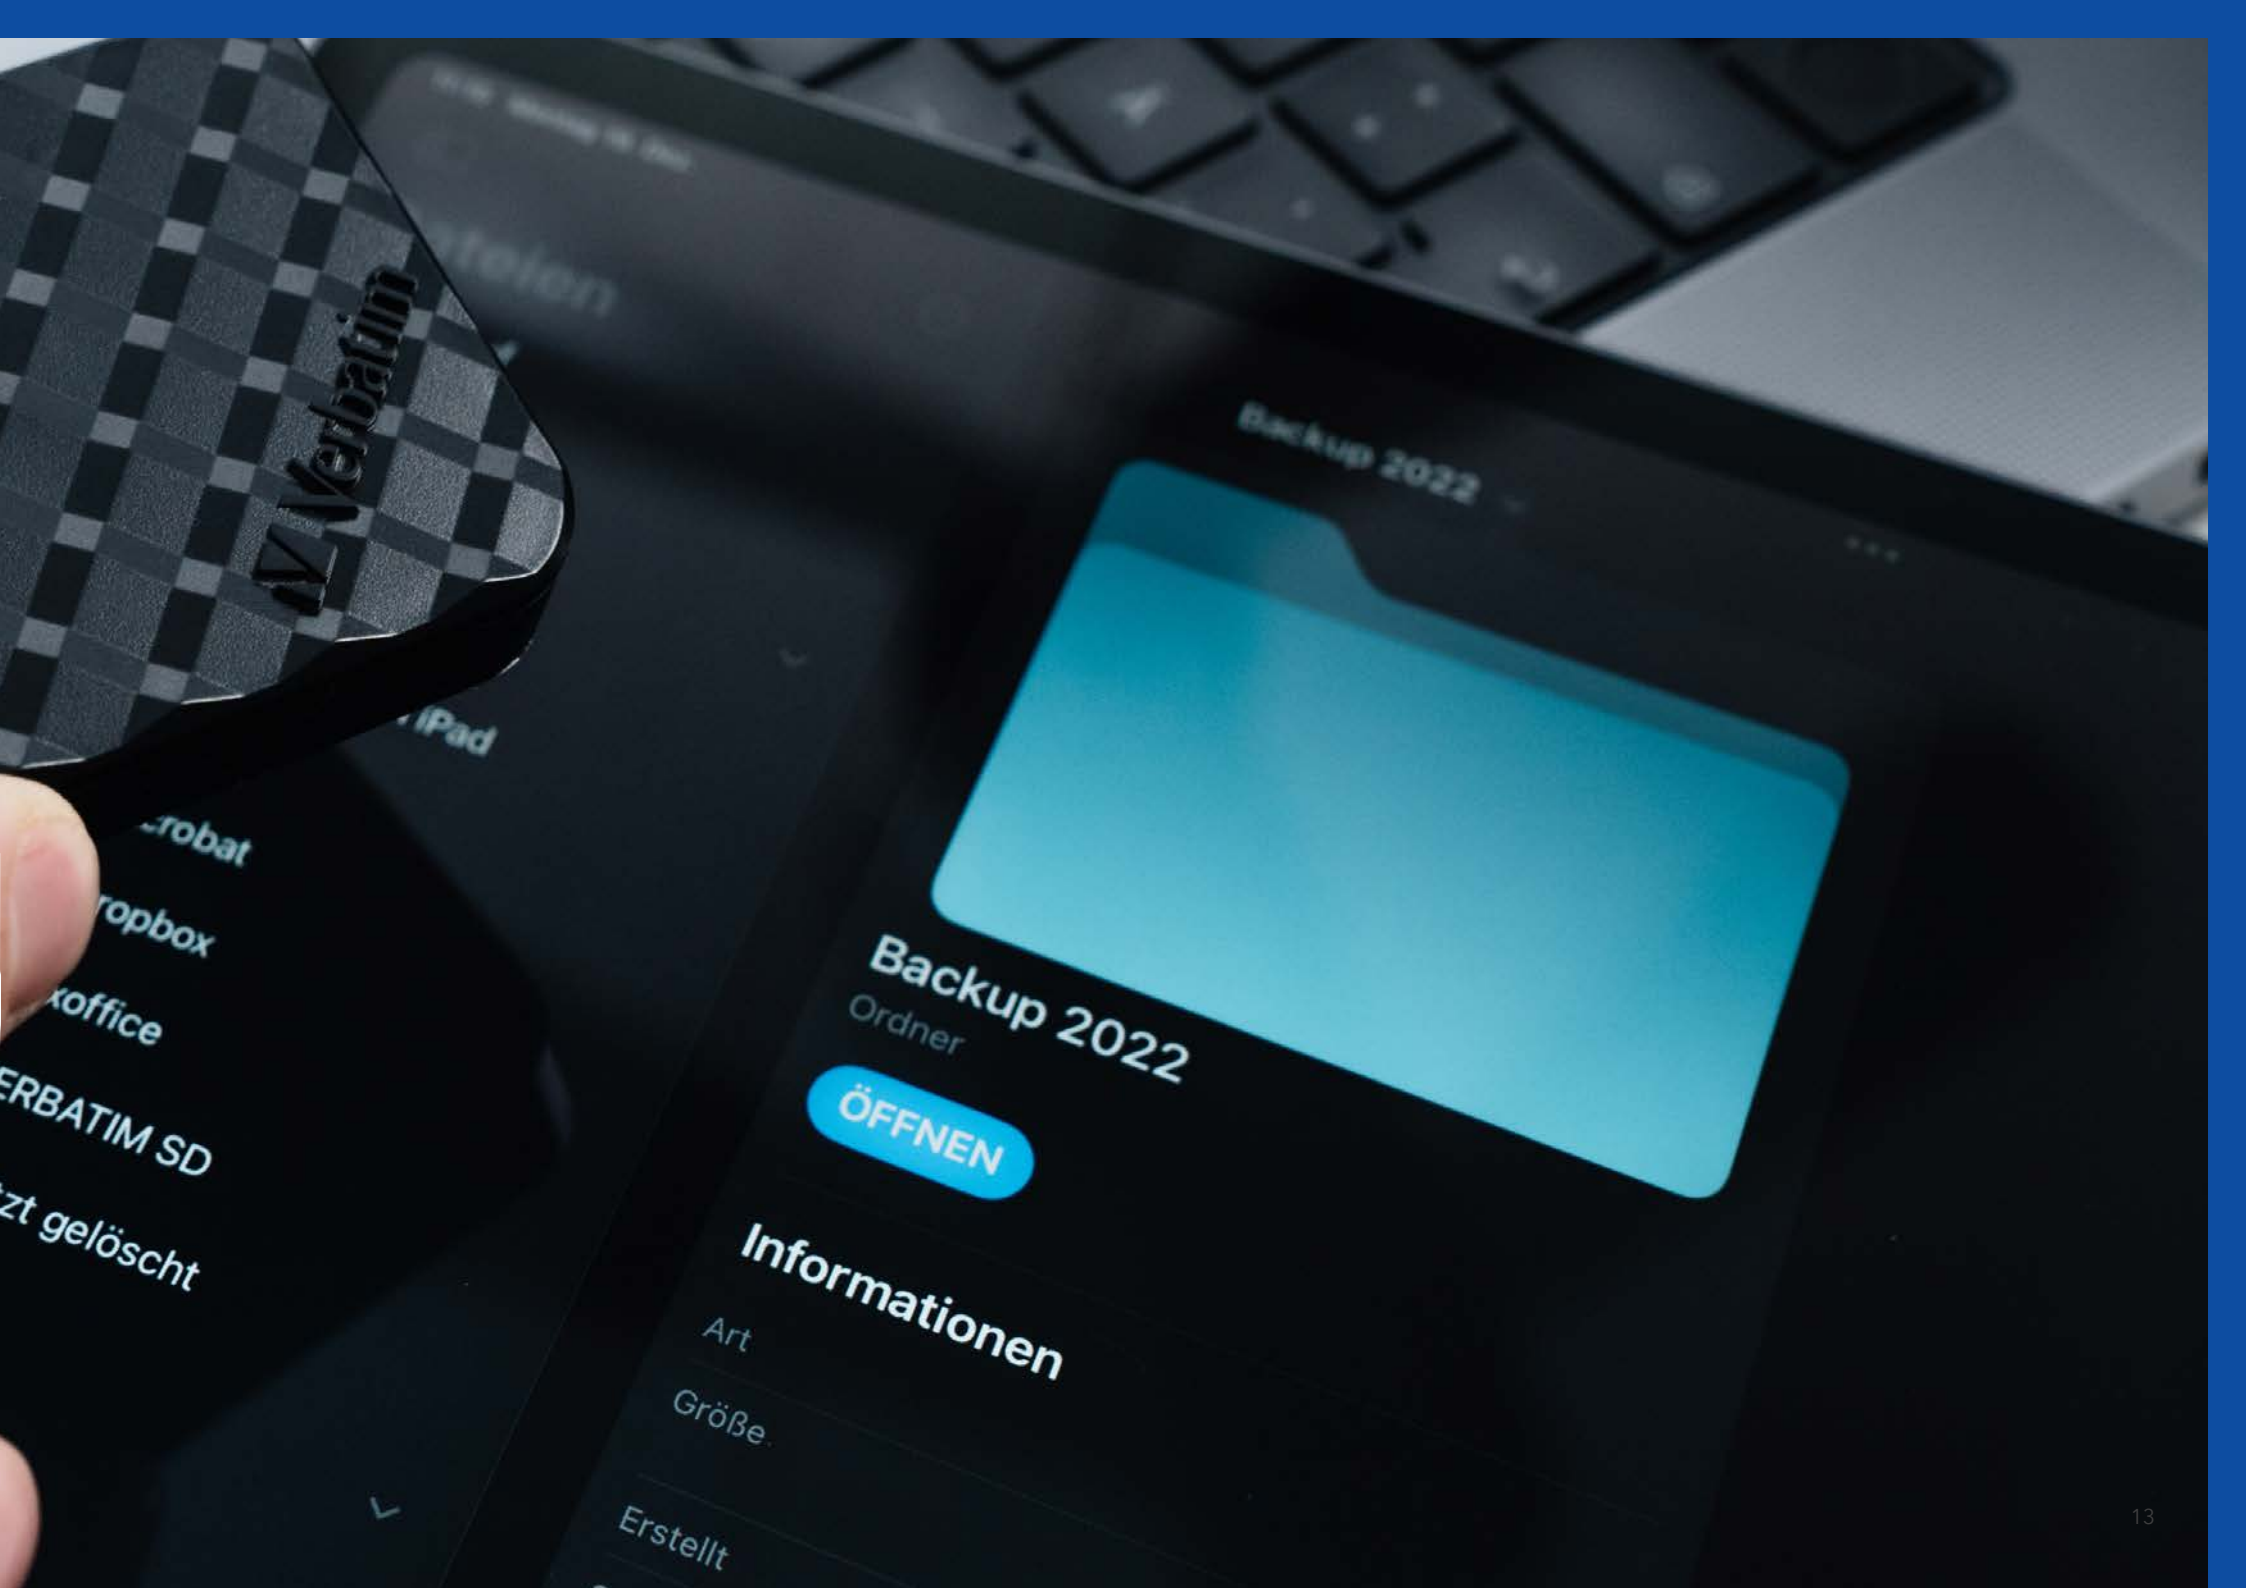

BEST PROTECTION AGAINST ATTACK

ARCHIVE YOUR DATA

To be completely protected, a user or organisation needs to have data backed up and archived offline.

Any device that is attached to an attacked system or network is vulnerable. If your back up HDD is plugged into your laptop when a piece of ransomware software is installed, it will also be encrypted.

Having the most important data archived to optical media can eliminate this risk.

HAVE AT LEAST THREE COPIES OF YOUR DATA	STORE THE COPIES ON AT LEAST TWO DIFFERENT TYPES OF MEDIA	KEEP AT LEAST ONE OFFSITE BACKUP COPY
x3	x2	x1

In addition to your primary data you should also have at least two more backups, which will significantly help reduce the risk of losing data. These could be physical and / or cloud solutions.

It is best practice to keep copies of your data on at least two different storage types, such as internal disk drives AND removable storage media (tapes, external hard drives, USB drives, SD-cards, CD's, DVDs).

It's obvious really; but it's not a good idea to keep your external storage device in the same room as your production storage.

If there is a fire, flood or burglary - you would lose all of your data.

nero Burn&Archive

Verbatim Blu-ray and DVD Writers include Nero Burn & Archive Software:

- CD, DVD, Blu-ray Disc™ burning software for all your videos, photos and precious documents.

- DiscSpan and SmartFit helps you to organise oversized files and archives among many discs - no need to split up files.

- SecurDisc Technology allows password protection to be added for extra security, and an electronic signature so that everyone knows you own the copyright.

- Nero MediaHome Standard brings all your media files together into a single location to help you easily organise and access all your photos, music, and videos. It helps you to burn the right playlist for any occasion; rip or copy your favorite CD; use different filters for the perfect photo; or put together slide shows – including photos, videos, and even film music in the background.

- Burn music videos directly onto audio CDs.

- Convert your audio CDs into the format of your choice - MP3, AAC, FLAC, or APE.

- Various streaming options, including the Nero Streaming Player App, allows you to show your movies, photos, slide shows, and other media files on various devices such as smartphones, tablets and Smart TVs.

- Relevant song titles, band names, and other details are automatically included.

USB DRIVES

USB 3.2 GEN 1

With a wide range of award-winning designs and features, Verbatim's selection of USB drives are perfect for storing and sharing data – safely and securely. The drives include features to satisfy everyone's needs including sliding mechanisms that protect the connector, metal enclosures, AES 256-bit hardware encryption, and USB-C and USB-A form factors.

USB-C® 3.2 Gen 1 Drive

UNDERSTANDING THE USB STANDARDS

What's the difference between USB 3.2 Gen 1, USB 3.1 Gen1 and USB 3.0?

In essence, they are exactly the same.

With the introduction of faster USB speeds, the USB Implementers Forum (the trade group that defines USB standards) was required to reclassify some USB terms.

Maybe the easiest way to show this new naming structure is in this table:

Original name	First re-name	New Current name	Max speed
USB 3.0	USB 3.1 Gen 1	**USB 3.2 Gen 1**	5Gbps
USB 3.1	USB 3.1 Gen 2	**USB 3.2 Gen 2**	10Gbps
USB 3.2	n/a	**USB 3.2 Gen 2x2**	20Gbps

It's helpful to note that USB 3.2 devices are backwards compatible with all existing USB products, meaning that the newer USB products will work with older devices. The only difference is the throughput; two products with different USB capabilities will operate at the lower transfer speed.
TYPE A VS. C

In addition to offering different speeds, USB comes in different physical forms. The common USB Type-A ports are rectangular and require you to plug in your cable with the right side up. The newer USB Type-C ports are smaller, oval-shaped and reversible in that they save you from needing to know which end is up.
USB-C™   USB-A

SECURITY

Keypad Secure USB Drive

- AES 256-bit Hardware Encryption, seamlessly encrypts all data on the drive in real-time
- Built-in keypad for passcode input (up to 12 digits)
- Can be used with TVs (feature not possible with regular encrypted devices)
- LED power / encryption status indicators
- Does not store password in the computer or the system's volatile memory, therefore far more secure than software encryption
- PC and Mac compatible
- Available with either USB 3.2 Gen 1 or USB 3.2 GEN 1 with USB-C™ connection

AES-256 ENCRYPTION

SAFE AND SECURE

Securing data on the move is a prime concern for many businesses.

What if an employee takes customer data home to work on and mislays it? Small storage devices like USB drives or HDDs can be easily lost or stolen – globally more than 2 million are lost each year and studies have shown that over half of dropped USB sticks get plugged in. This leaves your organisation at risk of non-compliance with GDPR.

One easy step to reduce this risk is to use encrypted devices. Encrypting involves scrambling the data in such a way that only someone with the correct code or key can read it.

WHAT IS AES 256-BIT ENCRYPTION?

AES stands for Advanced Encryption Standard. It is a symetric block cypher that is adopted throughout the world to encrypt sensitive data.

256-bit refers to the length of the encryption key used to encrypt a data stream or file. A hacker or cracker will require 2^{256}* different combinations to break a 256-bit encypted message.

AES has never been cracked and is safe against any brute force attacks.

*2^{256} = 115,792,089,237,316,195,423,570,985,008,687 ,907,853,269,984,665,640,564,039,457,584,007,913, 129,639,936

USB 2.0

ToughMAX USB Drive

- Made using KyronMAX™* metal replacement material with a tensile strength ratio that is higher than steel
- Able to withstand seriously punishing conditions and used in the most demanding of applications from fighter jets to mountain bikes
- Resistant to:
    - o Crush forces up to 2,250kg**
    - o Water immersion to 30m depth**
    - o Extreme temperatures from -25°C to 150°C*
- Slim stylish design

FLASH MEMORY CARDS

Verbatim flash memory cards provide high-performance, mobile storage in a full range of formats, including: SDXC®, SDHC®, microSDHC® and microSDXC®. With an incredible combination of high storage capacity, fast data transfer and great capture/playback, our Flash Memory cards are ideal for consumer and business applications.

Pro

- Give Pro level performance to action cameras, HD camcorders, advanced cameras, smartphones and tablets
- UHS Speed Class 3 (U3) rating means you can capture 4k ultra HD and Full HD video then transfer quickly to your computer for viewing and editing
- Water, shock and temperature resistant

SOLID STATE DRIVES

Verbatim's range of Internal and External SSD's feature fast transfer rates and reduced power consumption as well as software encryption to keep data safe. With ultra-high speed specialist SSDs for gaming, to work-horse SSDs for laptop and PC upgrades, and external SSDs for safe and convenient backups; all needs are covered.

OVERVIEW

SSDs work differently to traditional hard drives (HDDs) as there are no moving parts. Whereas HDDs use spinning disk platters to access information, SSDs store data on flash memory chips, much like a smartphone, USB drive, or slimline tablet. Since the drive doesn't have to wait for any platter to spin to where your data is located, all memory chips are accessible at the same time. This makes it much easier for users to access their information at high speed.

When solid state drives first started replacing HDDs, they had to fit into computer chassis or laptop drive bays built for HDDs, so they had to conform to HDD dimensions, typically using the 2.5" chassis. The SSDs also used standard SATA connectors. More recently, a smaller form factor was introduced as Next Generation Form Factor (NGFF), but was later renamed to M.2. The M.2 standard defines a long list of optional board sizes, and the connector supports both SATA and PCIe electrical interfaces.

SSDs are generally more durable and reliable. There are no moving parts to damage and no drive motor to break. So, in addition to being used for internal computer storage, this reliability makes SSDs great for portable, external drives, which may be subject to more rigorous use and handling.

Top 10 Benefits of SSD

1. **Faster loading, less time waiting**
   With no moving parts to spin up to speed, start-up is almost instant, dramatically improving boot-up times.

2. **Faster transfer rates**
   File transfers are lightning quick and can be up to 1/3 faster than traditional Hard Disk Drives (HDD's).

3. **Find your files faster**
   File searches are up to 8x faster than traditional HDD's.

4. **Applications load faster**
   Spend less time waiting for your Adobe Photoshop and Powerpoint applications to open.

5. **Reduced power consumption**
   With no moving parts the SSD uses far less energy which in turn could make your laptop battery last up to 30 minutes longer!

6. **Halve your downtime**
   Normally, your computer or laptops routine maintenance will slow your system down. With an SSD, the time that virus scans and other background maintenance take, is cut by half!

7. **Multi-tasking**
   SSD's make multi-tasking faster. Edit your photos and answer your emails up to 3x faster than HDD's.

8. **Super fast video editing**
   With an SSD you can edit video clips over 30% faster than ever before!

9. **Superior durability**
   The SSD's lack of moving parts make it far more robust and reliable, with increased tolerance to heat, shock and vibration.

10. **Silent operation**
    SSD's are silent, just like a USB Flash Drive. No more distracting hums and whirrs as the drive spins up and down.

TYPES OF SSD
SSDs come in a few different shapes and sizes, and that can affect their performance and adoption.

SATA III: SATA III is the last evolution of an older connection option that works with both HDD and SSD. It was advantageous during the transition from HDD to SSD, as hard drive-compatible motherboards could then work with the new standard. It's still the most common one used in modern SSDs and although slower than other SSD options, can still deliver read / write speeds of up to 560MB/s / 520MB/s* (which is 10 times faster than a hard drive), meaning that they can truly transform the performance and productivity levels of any hard drive-based PC or laptop computer.

PCIe: The Peripheral Component Interconnect Express or PCI Express (PCIe) slot is typically used for graphics cards and add-in cards like USB ports and sound cards. While computers may contain a mix of various types of expansion slots, PCIe is considered the standard internal interface and many computer motherboards today are manufactured only with PCIe slots. A PCIe connection consists of one or more data-transmission lanes connected serially. Each lane consists of two pairs of wires, one for receiving and one for transmitting. You can have one, four, eight or sixteen lanes in a single PCIe slot while more lanes from SATA require more SATA devices. PCIe technology enables interface speeds of up to 1GB/s per client lane (PCIe 3.0), versus today's SATA technology speeds of up to 0.6GB/s (SATA 3.0).

NVMe: Non-Volatile Memory Express (NVMe) is the underlying communications interface that allows almost all PCIe-based SSDs to transfer data to and from the host system. The NVMe interface was designed specifically for SSD technology - it communicates between the storage interface and the System CPU using high-speed PCIe sockets, independent of storage form factor. Input/Output tasks performed using NVMe drivers begin faster, transfer more data, and finish faster than older storage models using older drivers, resulting in the maximum performance by reducing bottlenecks and latency times, allowing the fastest speeds. Verbatim's latest internal SSD (Vi3000) which incorporates NVMe PCIe can deliver sequential read speeds up to 3,100 and write speeds of 2,900MB/s, which is 50 times faster than a regular hard drive.

M.2: The smallest of the SSD designs, M.2 drives can use both SATA or NVMe controllers (so speeds do vary), but in terms of physical size, M.2 drives are much smaller than the 2.5" type. They have a short pin connector and typically lie flat against a motherboard, making them extremely inconspicuous. M.2 SSDs support a variety of interface standards such as PCIe 3.0, SATA 3.0 and USB 3.0 interfaces, compared to mSATA, which only supports SATA interface standards. An M.2 SSD based on the non-volatile memory express (NVMe) specifications can read and write at much faster rates than SATA SSDs - SATA SSDs have a maximum speed of 600 MB per second, while M.2 PCIe cards can hit 4 GB per second.

FORM FACTORS

2.5" SATA

(The 2.5-inch designation actually refers to the size of a typical laptop drive platter, the disc inside the housing that data is actually recorded on.)

M.2 2280
M.2 uses both PCIe and SATA interfaces. The numbers determine the physical size, so in this case 22mm wide and 80mm long.

INTERNAL SSD

Vi7000G PCIe NVMe™ M.2 SSD

- Compatible with PlayStation™ 5
- Lightning-fast speeds of up to 7,400 MB/s* read and 6,700 MB/s *write
- Impressive read IOPS of up to 800,000 and write IOPS of up to 1,000,000 for unmatched performance in demanding applications and games
- PCIe generation 4 technology
- Heat sink and DRAM cache for extreme performance
- Designed for gamers and high-performance users
- Uncompromising performance for lightning-fast boot times and faster application launches

Verbatim hard drives feature Nero Backup software* that allows full system backup and restore functions. Each hard drive also includes Green Button Software, saving power when the drive is not in use as well as the Formatter Software that allows users to easily change the format of the drive from HFS+ to NTFS or FAT32, based on their own requirements. USB Rec&Play** allows your drive to act as a video recorder via USB, recording, playing back and even pausing live TV.

Store 'n' Go USB 3.0 Hard Drive

WIRELESS CAR CHARGERS

FWC-01 Qi Fast Wireless Car Charger

- Wireless charger for Qi enabled phones
- Qi certified
- Three mounting options
- Output: 15W/10W/7.5W/5W self-adaptation
- Automatic open/lock
- 360° rotatable

PART NO	DESCRIPTION
49552	FWC-01 Qi Fast Wireless Car Charger

FWC-02 Qi Fast Wireless Car Charger

- Wireless charger for Qi enabled phones
- Qi certified
- Toughened glass surface with fluorescent Qi indicator
- Three mounting options
- Output: 15W/10W/7.5W/5W self-adaptation
- Automatic open/lock
- 360°rotatable

PART NO	DESCRIPTION
49553	FWC-02 Qi Fast Wireless Car Charger

FWC-03 Pro Qi Fast Wireless Car Charger

- Wireless charger for Qi enabled phones
- Qi certified
- Auto-alignment coil = Smart recognition
- Tempered glass surface
- Automatic open/lock
- Three mounting options: vent holder, suction cup on dashboard, or front window
- Output: 15W/10W/7.5W/5W self-adaptation
- 360°rotatable

PART NO	DESCRIPTION
49554	FWC-03 Pro Qi Fast Wireless Car Charger

CHARGING STANDS

3-in-1 Apple Watch and Dual iPhone Charging Stand

- 3-in-1: Wirelessly charge your Apple Watch and two iPhones (8 or later) or other Qi certified wireless charging enabled devices
- Charge up to three devices simultaneously
- Engineered to charge devices as fast as possible
- Total power output: max. 35W (Apple Watch: 5W, wireless charging: 2 x max. 15W)
- Charging functions feature over-current and over-voltage protection
- MFi certified
- Qi certified

PART NO	DESCRIPTION
49557	3-in-1 Dual Charging Pad - Wireless chaging for your Apple Watch and 2 iPhones

3-in-1 Apple Watch and iPhone Charging Stand

- 3-in-1: Wirelessly charge your Apple Watch, iPhone (8 or later) or other Qi-certified wireless charging enabled device and one device by cable via the QC 3.0 USB-A port
- Charge up to three devices simultaneously
- Engineered to charge devices as fast as possible (actual charging speed is dependent on the device)
- Total power output: max. 44W (Apple Watch: 5W, wireless charging: max. 15W, USB-A QC 3.0: max. 24W)
- Charging functions feature over-current and over-voltage protection
- MFi certified
- Qi certified

PART NO	DESCRIPTION
49556	3-in-1 Charging Stand - Wired and Wireless charging for your Apple Watch and iPhone

2-in-1 Apple Watch and iPhone Charging Stand

- 2-in-1: Wirelessly charge your Apple Watch and iPhone (8 or later) or other Qi-certified wireless charging enabled device
- Engineered to charge devices as fast as possible
- Total power output: max. 20W (Apple Watch: 5W, wireless charging: max. 15W)
- Charging functions feature over-current and over-voltage protection
- MFi certified
- Qi certified

PART NO	DESCRIPTION
49555	2-in-1 Charging Stand - Wireless charging for your Apple Watch and iPhone

MULTIPORT HUBS

USB-C™ Multiport Hubs

- USB-C™ multi-port hub - expand your slimline notebook, Macbook or smartphone into a workstation
- Four USB 3.2 Gen 1 Type-A ports providing options for extra accessories
- USB-C™ connection
- USB SuperSpeed 5Gbps*

USB-C™

PART NO	DESCRIPTION	USB-C™	USB 3.2 GEN 1
49147	USB-C™ Multiport Hub Four port USB 3.2 Gen 1	✓	x 4

USB-C™ Multiport Hubs

- USB-C™ multi-port hubs available with a range of ports
- The ideal solution to expand your notebook or smartphone into a workstation
- USB-C™ connector for power charging
- HDMI interface supports up to 4K** output video from your computer to a 4K monitor
- Up to 5Gbps* - two/three USB 3.0 ports mean plenty of room for extra accessories

PLUGS AND TRAVEL ADAPTERS

UTA-01 Universal Travel Adapter

- World-to-World adapter (suitable for more than 180 countries)
- 2 x USB-A ports
- Supports charging of three devices simultaneously
- Safety shutter function prevents foreign objects being inserted into the socket and to keep children safe
- Compact – its small size makes it convenient to carry

PART NO	DESCRIPTION
49543	UTA-01 Universal Travel Adapter Plug with 2 x USB-A ports

UTA-02 Universal Travel Adapter

- World-to -World adapter (suitable for more than 180 countries)
- Supports PD 20W and QC 3.0
- 1 x USB-C
- 1 x USB-A
- Supports charging of three devices simultaneously
- Safety shutter function prevents foreign objects being inserted into the socket and to keep children safe

PART NO	DESCRIPTION
49544	UTA-02 Universal Travel Adapter Plug with USB-C PD & USB-A QC ports

UTA-03 Universal Travel Adapter

- World-to-World adapter (suitable for more than 180 countries)
- Supports PD 30W and QC 3.0
- 3 x USB-C ports
- 2 x USB-A ports
- Supports charging of six devices simultaneously
- Safety shutter function prevents foreign objects being inserted into the socket and to keep children safe

PART NO	DESCRIPTION
49545	UTA-03 Universal Travel Adapter Plug with USB-C PD & QC, 2 x USB-C & 2 x USB-A ports

WTEU-02 World to Europe Travel Adapter Plug

- World to Europe Adapter – connect devices with the most found plug types (UK, USA/Japan, Australia/China, Italy, Switzerland, Brazil and many more)
- Safe - earthed plug, safety shutter, flame resistant material
- Compact – its small size makes it convenient to carry
- Secure - fits firmly into wall sockets without falling out

PART NO	DESCRIPTION
49549	WTEU-02 World to Europe Travel Adapter Plug

UTA-04 Universal Travel Adapter

- World-to -World adapter (suitable for more than 180 countries)
- Supports PD 61W and QC 3.0
- 2 x USB-C ports
- 3 x USB-A ports
- Supports charging of six devices simultaneously
- Safety shutter function prevents foreign objects being inserted into the socket and to keep children safe

PART NO	DESCRIPTION
49546	UTA-04 Universal Travel Adapter Plug with USB-C PD & QC, USB-C & 3 x USB-A ports

EUPT-01 EU Power Tower

- 15-in-1 European Multiplug Extension Lead
- 11 AC EU outlets, 2 x Type-C ports + 2 x USB-A ports
- Space-saving vertical tower design
- On/off switch on top of tower
- Child-proof safety shutters
- Overload protection with automatic power off

PART NO	DESCRIPTION
49547	EUPT-01 EU Multi Plug Power Tower with 11 AC outlets, 2 x USB-C & 2 x USB-A ports

MICE

8-Button Deluxe Wireless Optical Desktop Mouse

- Blue LED technology - navigate on different types of surfaces
- Windows Start / Windows 8 Home button
- Back / forward buttons for use in a web browser
- Zoom in / out in Windows applications e.g. Word / Excel
- 800 / 1300 / 1600 optional dpi
- Ergonomic design for comfortable use
- Nano wireless receiver - Plug 'n' Stay

PART NO	DESCRIPTION
49041	8-Button Blue LED Wireless Optical Desktop Mouse

Silent Optical Mouse

- Silent technology eliminates excess noise while maintaining the same click feel
- 1000 dpi high definition optical technology
- Ergonomic design and comfort grip for ease-of-use
- Plug into your USB port for immediate use

PART NO	DESCRIPTION
49024	Silent Optical Mouse

GO MINI Optical Travel Mouse

3D PRINTING

Verbatim offers top grade 3D printing filament, manufactured to very tight tolerances, made from the highest quality materials to ensure consistent feeding and stable prints.
PLA

- High performance Polylactic Acid (PLA)
- Partly degradable bio-polymer filament derived from plants. Easy to print
- Main applications: All-purpose material for a wide range of applications including concept modelling and education.
PET-G

- High performance Polyethylene Terephthalate Glycol (PET-G)
- Food package grade pellets used
- Main applications: Concept modelling for mechanics, medical, food containers, transparent objects

ABS

- High performance Acrylonitrile Butadiene Styrene (ABS)
- Highly durable filament with good heat resistance and a smooth finish
- Main applications: Concept modelling for building, electrical, automotive industry etc. Non-critical parts such as enclosures

Tefabloc TPE

- High performance Thermoplastic Polyester Elastomer (TPE)
- Resistant to oil, grease, abrasion and solvents
- Main applications: Flexible items such as window seals, grips, holders, plugs, robot parts and protective components.

PP

- High performance Polypropylene (PP)
- One of the most commonly used plastics in industry
- Main applications: Technical products, automotive, mechanical engineering, prototypes, toys

BVOH

- Butenediol Vinyl Alcohol Co-polymer (BVOH)
- Water dissolvable support material
- Main applications: Support material for filaments, printing project with overhangs or complex objects

QUALITY CONTROL

Verbatim's demanding quality control during the manufacturing process guarantees first-class products. The company delivers products and services that exceed customer expectations by leveraging its technology leadership, marketing expertise, and state-of-the-art distribution capabilities.

GLOBAL NETWORK DISTRIBUTION

In EMEA, our head office is in Eschborn which is close to Frankfurt, Germany, providing an ideally centralised location for the company's activities. It allows for easy access to central resources for the sales and marketing employees who are located close to customers across the different countries in Europe.

EMEA WAREHOUSING AND OPERATION

In Europe, we operate out of our state-of-the-art central warehouse in Wörrstadt Germany, which has excellent rail, road, river and sea access.

TECHNICAL SUPPORT

To maintain and deliver our promise of guaranteed customer satisfaction, we offer free of charge hotline support by email or phone. The hotline provides direct and fast access to the support team to help answer questions about product setup, use and care, repair and maintenance issues.

See www.verbatim.com/support for further details.

BE ON FIRE

You need to be fast. You need to be agile.
Whatever game you play, you need the right kit to win.
Built to last, easy to use, lightning fast -
SureFire will have your back.
