CELLULOID-BALLS – DELIVERY WHILE STOCK LASTS!

DONIC

DONIC P 40+ ☆☆☆ CELL-FREE

DONIC's new plastic ball, the **DONIC P40+ ☆☆☆** is harder than its predecessor **DONIC 40+ ☆☆☆**. It produces a slightly higher bounce and is immediately recognizable by its distinctive sound. It has a precise and consistent bounce and is absolutely reliable in its playing characteristics.

In addition, the ball is excellent value for money.

DONIC P 40+ ☆☆☆ CELL-FREE

Quantity	12	72	120
Art.-N°	○ 550 241 012	550 241 072	550 242 120

Plastic or Celluloid ball? The „Future“ is with us.

Does your club still play with celluloid balls? If so, now is probably the time for change because the plastic ball is no longer something for the future: The "future" is here. Skilled development work has resulted in improved production and this has given us three distinct advantages:

- There aren't any delivery problems with plastic balls.
- The quality of the plastic ball equals the celluloid ball, it just plays differently.
- We can offer you plastic balls at a cheaper price, and that applies to training as well as competition balls.

DONIC 40+ ☆☆☆ is a new plastic ball, an addition to **DONIC 40+ ☆☆☆**. There is a slight difference in these two products and we recommend that you test both to discover which one suits you best.

You still prefer to play with the celluloid ball? No problem. We continue to produce these in top quality.

3

DONIC 40+ ☆☆☆ CELL-FREE

Production of this valued product continues.

The **DONIC 40+ ☆☆☆** offers an easy transition from celluloid balls. The playing characteristics of this ball are very close to its celluloid predecessor, in playing quality and sound. It has a slightly lower bounce than the new **DONIC P40+ ☆☆☆**.

>> All details in a small box

OUR CLASSIFICATIONS FOR BLADES AND RUBBERS

Every table tennis player has his own individual style of play – as has every blade and rubber. It is now possible to obtain a distinctive match between the two. It has become very easy for a player to find the perfect match of blade and rubbers.

Few players have only one way of playing. There is a distinct basis of play but with other elements. For example, all-round players will take the opportunity to win the point by attacking when possible but attacking players are also sometimes forced into blocking or passive play during certain situations.

Similarly the performance of blades and rubber is not only one-dimensional. There is always a wide range of performance, which we can now illustrate.

From DEF (defensive) - and + graduating through AR (all-round) to OFF (offensive).

After honest analysis, a player can now choose the right equipment to match his game.

Throughout the catalogue you will find boxes which include a short description of blades and rubber sheets. We have illustrated these compact descriptions so that it becomes easier for you to choose your own individual combination of blade and rubber sheets. The first step is to analyse yourself: what type of player are you? A rough distinction would be the following four categories.

DEF

You are a defensive player who prefers to slice the ball.

AR

You are an all round player who uses all TT techniques: chop, block, spin, and smash. You prefer tactical play and exact placement of balls or a speedier game.

OFF – Focal point SPIN

You are a strategic player who uses reversed pimples rubber. The main characteristic of your game is topspin. Playing close to the table or only from a short distance, you try to win your points with spin strategies.

OFF – Focal point SMASH

You prefer speed to spin. The main characteristics of your game are hard blocked balls and smashes with exact placement.

BLADES

Our Compact Description will tell you which blade is suitable for which player type. Having considered the additional information – particularly elasticity, and the speed and control values, you will be in a position to make an informed choice.

CONTROL	SPEED	–	AR	+	–	OFF	+	ELSTICITY
6	10+							stiff

ELASTICITY

Control of the ball is effected when the ball makes contact with the bat. The elastic properties of a blade make you feel this contact. It is down to the individual which type of elasticity is preferred. We outline the five categories of elasticity. If you take these categories into consideration it will help determine your blade choice.

• Elastic

You can really feel the contact between ball and blade, often with a vibration. A good example is the defensive blade Donic DEFPLAY CLASSIC SENSO, which has excellent control.

• Control-elastic

Balanced, distinct contact between blade and ball with no disturbing vibration. Perfect control for all-round strategies, and when combined with spin elastic rubber also for offensive strategies. Example: DONIC APPELGREN ALLPLAY SENSO.

• Speed-elastic

You still clearly feel the contact between the elastic blade and the ball, but this blade is obviously stiffer and faster than a control-elastic blade. Example: DONIC WALDNER SENSO.

• Nearly stiff

The vibration has been reduced to a minimum. You still have good ball contact. These blades are usually very fast. Example: DONIC OVCHAROV TRUE CARBON.

• Stiff

The predominant characteristic is speed. Not always easy to control, but a good example for a solution to this problem is the DONIC PERSSON OFF · World Champion '89

Handles

The choice of handle is purely personal. In our compact description you can see the available handle shapes for each blade. There is no 'best' handle, everyone should choose the handle they find most comfortable. Straight handles are usually held more loosely, while concave and anatomic handles are held relatively firmly. Handles, which have not been lacquered, naturally absorb sweat better.

For the exclusive Donic Dotec blades there are also special handles available for right and left handers.

RUBBER SHEETS

Our compact description will inform you which rubber is suitable for each player type. Having considered all the additional information, specifically the elasticity of the top sheet, the hardness of the sponge, and the control, spin and speed values, you will be able to make the ultimate decision.

CONTROL	SPEED	SPIN	–	AR	+	–	OFF	+	SPONGE HARDNESS
5+	10++	10+							medium +

PIMPLES - IN RUBBERS

The elastic properties of the top sheet determine the control of the ball and the characteristics of your rubber. We therefore outline the following categories according to the characteristics of the top sheet.

• HIGH FRICTION and CONTROL

These rubbers are not fast, but provide high grip. Their control is excellent. Due to the weak elasticity, the grip can only develop its effect on topspin when slow balls are played. Low spin dynamics in fast topspin games.

• STICKY

These rubber sheets offer good control and are very sticky, providing good spin when playing slow balls: i.e. service and first spin.

• CONTROL-ELASTIC

These rubbers develop spin elasticity even at low speed giving you more control and providing more playing fun. Suitable for control orientated players.

• STICKY-ELASTIC

Slightly sticky rubbers with very good spin dynamics and ball control when playing at high speed. Very sophisticated technology.

• OFFENSIVE-ELASTIC

Fast offensive rubbers. Speed is the predominant characteristic rather than spin. Interesting rubbers for fast aggressive players.

• SPIN-ELASTIC

Professional rubbers for today's top table tennis players. They not only have the speed of the offensive elastic rubbers but also the addition of spin characteristics.

The rubber sheet:

European players usually play with pimples-in rubber. Pimpled out rubber for speed players and long pimpled and anti spin rubber for defensive players are encountered less frequently.

The sponge:

Sponges are available in several thicknesses. The thicker the sponge, the more difficult to control, but the more spin for topspin shots and the less spin for chopping. See our points for control, spin and speed in the Compact Description boxes.

Sponge hardness:

Modern rubbers usually have three differing degrees of sponge hardness. We always indicate these in our Compact Description.

• SOFT

Soft sponge provides better ball control. The spin remains the same while speed is slightly reduced.

• MEDIUM

The standard sponge offering a balanced relationship between control, speed and spin.

• HARD

These sponges provide more speed but less ball control.

The right sponge thickness... we recommend

DEF	1.0 to 1.5 mm
AR	1.5 to 2.0 mm
OFF	1.8 to max mm

SPRUCE PRESSING (SP) TECHNOLOGY "MADE IN GERMANY"

Our finest quality, produced by top craftsman in honour of the Swedish legends.

The blade series ▷ World Champion 89 ◁

Top workmanship, made in Germany!

The World Champion 89 blade series is exceptional. It celebrates the 25th anniversary of Sweden winning the World Championships Team title in Dortmund in 1989 (in a historic 5-0 final win against China). DONIC is exclusively producing three blades in Germany, in honour of the legends Jan-Ove Waldner, Jörgen Persson und Mikael Appelgren. Hand crafted and employing the most modern precision and technical know-how, in acknowledgement of the supreme mastery with which the Swedish Superstars played.

1 | Waldner Off · World Champion 89

This is a fast blade but with great feel and ease of control. Designed for players who require a balance between speed and control.

Veneer construction:
3,0 mm Kiri
Carbonfleece- Zylon
0,8 mm Spruce
1,0 mm Spruce

straight, concave
| approx. 85 g | 7 ply | Art.-N° 110 212

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
8	9+							nearly stiff

2 | Persson Off · World Champion 89

The fastest of the WC blades. For players requiring a harder blade with basic high speed.

straight, concave
| approx. 85 g | 7 ply | Art.-N° 110 213

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7	10+							stiff

Veneer construction:
3,0 mm Kiri
0,8 mm Spruce
Carbonfleece- Zylon
1,0 mm Spruce

3 | Appelgren ALL+ · World Champion 89

Perfect light allround blade for all types of players, irrespective of their playing standards.

straight, concave
| approx. 80 g | 7 ply | Art.-N° 110 211

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
9	8							speed-elastic

Veneer construction:

0,55 mm Ayous
Carbonfleece- Zylon
0,8 mm Spruce

DONIC® OVTCHAROV TRUE CARBON

THE THING NEEDED!

NEW

The blade chosen by Dima Ovtcharov presents the perfect combination of speed and feel. As a consequence of the change to plastic balls, the European Champion looked for a solution that would meet his high requirements – a blade to compliment Dima's powerful strokes whilst enabling him to play the short service and return game with precision and accuracy.

The combination of five high quality plies and two specially designed synthetic carbon fiber plies result in a top quality blade. This means that Dima Ovtcharov is able to use the hardness of the blade for his power game, yet retain fine touch when reacting to his opponents' spin.

straight, concave, anatomic | 90 g approx. | 7 plies | Art.-N° 110 265

TO WIN WITH EASE

This **extremely light 75 g blade** guarantees that you can use your whole strength to play your strokes. This blade is processed to the highest quality using the innovative Spruce Pressing technology, therefore the moisture content is drastically reduced. DONIC OVTCHAROV FEAT has qualities which will improve your play: Quality, lightness and feel.

Made in Germany, top-quality craftsmanship – DONIC OVTCHAROV FEAT will make you feel great! Like a winner.

- Spruce Pressing technology, special drying process (cold pressed), moisture content is drastically reduced
- Only selected sawn veneers are used instead of ordinary sliced veneers guaranteeing higher stability
- At **75 g** extremely light weight
- Handle with ergonomic shape, perfectly rounded, 3D-technology

DONIC OVTCHAROV FEAT

 2+8 Carbon ZF
 3+7 Carbon fleece
 4+6 Limba 0,8 mm
 Middle veneer Kiri 2,8 mm

DONIC CREST AR+

Veneer structure: 9-ply
 Outer veneer Limba 0,8 mm
 2+8 Limba 0,8mm
 3+7 Carbon ZF
 4+6 Carbon fleece
 Middle veneer Ayous 2,8 mm

Crest stands for perfection, the absolute top of the range. Conceited? Test it yourself! DONIC CREST is impressive with its fantastic feel! Experience the unique feel of this blade.

Nine perfectly adjusted and precisely processed plies are the secret of these absolute top class offensive blades: Fast, excellent feel, very solid and relatively light despite the nine plies. The extremely thin carbon layers guarantee a much larger sweetspot, the Carbon ZF-plyes create stability, flexibility and la blade that is light to play with.

Excellent playing characteristics, wonderful touch and the ultimate feel!

DONIC CREST OFF is extremely powerful with superb control
DONIC CREST AR+ has excellent control and is quite fast

THE BEST OF CREST

- Unique, extremely thin Carbon- and Carbon ZF fibres. Despite the 9-ply combination, this blade is not that thick and quite light.
- Carbon guarantees a greater sweetspot, Carbon ZF offers stability, flexibility and lightness
- A specially glued perfect veneer combination
- Excellent playing characteristics, ultimate feel and wonderful touch
- Fast with good control

DONIC CREST OFF

Thickness: 5,9 mm | Dimensions: Length 15,5 cm, width 14,6 cm

9+	8							speed elastic

Swedish Feeling OVTCHAROV SENSO V2

Ovtcharov Senso V2 continues DONIC's Senso-Technology's successful tradition and compliments the product range with a 5-ply V2 power allround blade.

Compared to the hard walnut outer ply of the Ovtcharov Senso V1 this blade has a softer mahogany outer ply, which gives the blade a distinctly softer feel when contact is made.

This blade "made in Sweden" has a perfect combination of specially chosen medium-hard plies which ensure a high degree of control

Ovtcharov Senso V2 is a solid blade for the player who especially values control but still requires power and speed when attacking.

straight · concave · anatomic | about 85 g | 5 Plies | Art.-N° 110 226

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9-							nearly stiff

BLADES

8

OVTCHAROV SENSO V1

Blade Technology
made in Sweden

A hard nut to crack for any opponent!

The idea originated in Sweden and has found favour with world stars. A new gluing technology was established during the development of the DONIC Ovtcharov Senso V1 blade.

DONIC's top player Dima Ovtcharov participated in the first tests and was delighted by the fantastic feel and unbelievable power of this blade. The 7-ply blade was developed to meet the challenges the VOC ban presented to players. It is designed for high speed smashes and top-spin. The inner plies are a carefully adjusted combination of medium hard and medium soft veneers.

A revolutionary gluing technology has been applied which results in additional rigidity to each single ply.

straight · concave · anatomic | about 90 g | 7 Plies | Art.-N° 110 225

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6+	10							nearly stiff

Ovtcharov DOTEK OFF | ALL+ | ALL

DIMA OVTCHAROV

Gold medal at European Games in Men's singles 2015

German Open winner 2012, 2014, German Champion 2014

5-ply combination
3,2 mm thick Kiri inner ply
1+5 layers, 0,6 mm Limba
2+4 layers, 1,0 mm Ayous

**DOTEK CBF
TECHNOLOGY**

OVTCHAROV DOTEK BLADES will for the first time incorporate the brand new CBF technology. Vulcanized artificial plies have been carefully glued and put together with top quality plies to ensure extremely good feel and precise return of the ball.

OVTCHAROV OFF is the fastest in this series. It is really fast but has excellent control. Best suited for attackers and allround players with power who like to loop or counter-attack close or away from the table.

| about 80 g | 5 Plies |
| Art.-N°. right hander: 110 269 060 | left hander: 110 269 070

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9							nearly stiff

OVTCHAROV ALL+ is only slightly less powerful and is a little softer than the Off version. This blade has fantastic control but is still quite fast. Suitable for allround players with power and spin who require maximum control when under pressure.

| about 80 g | 5 Plies |
| Art.-N°. right hander: 110 268 060 | left hander: 110 268 070

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
8+	8							nearly stiff

OVTCHAROV ALL is the easiest blade to control from this series. Top control and a particularly good feel guarantee the best possible allround qualities. Especially recommended for allround players who like to block and chop in defensive situations.

| about 80 g | 5 Plies |
| Art.-N°. right hander: 110 267 060 | left hander: 110 267 070

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
9+	7							nearly stiff

DONIC DOTEK

DONIC DOTEK

The Dotec grain is a wood grain developed by DONIC for the specific production of table tennis blades. This wood grain has been produced with particular emphasis on giving a light touch.

What exactly is the DONIC Dotec System?

The DONIC Dotec System is the wood technology without awkward edges. Since the human hand does not have hard edges, DONIC wanted to develop a smooth blade without sharp edges. It was, therefore, important to ensure a completely smooth transition between blade and handle.

The DONIC Dotec system is the technology that provides a blade with a perfectly smooth handle – a joy to grip.

DONIC PERSSON DOTEK OFF

Veneer construction:
0,6 Hinoki
DOTEK
0,6 Koto
5,0 DOTEK-

DOTEK
0,6 Limba
4,5 DOTEK-
Balsa
0,6 Limba
DOTEK
0,6 Limba

In the case of this blade, the Dotec mesh lies directly under the Limba covering ply. The middle layer consists of Limba ply. The core is made out of 4,5 mm Dotec-Balsa.

Playing Characteristics:

The Limba / Balsa combination produced by the DONIC DOTEK Technology, results in a perfect, relatively speedy, all round blade. The touch is amazing when returning the ball.

| about 80 g | 5+2 Plies |

DONIC PERSSON DOTEK OFF

The covering ply is constructed of Japanese Hinoki, supplemented with a middle layer of Koto. A Dotec mesh lies between the Japanese Hinoki and the middle Koto layer. The core consists of 5.0 mm Dotec-Balsa.

Playing Characteristics: The insertion of the legendary Japanese Hinoki wood, in combination with Balsa and Koto plies, has been a unique advance by DONIC Dotec technology. The finished product is an offensive blade for players of every ability, with top speed and fantastic feel in every playing situation.

| about 80 g | 5+2 Plies |

GREAT
Feeling
in Handle!

The handle

The DONIC DOTEK model has a totally different handle to previous bats. The handle is made out of one piece, surrounded by natural cork. There are different versions for right and left handers.

DONIC WALDNER DOTEK CARBON

The carbon layers are placed on top of a 4 mm Balsa core. Covering and middle plies consist of 0,6 mm Limba for each ply.

Playing Characteristics:

The combination of Carbon, Limba, Balsa and Dotec ensure an extraordinary synthesis of speed and control. Despite the enormous potential for speed, quick topspins and smashes, the ball control for touch shots and slower play is remarkable with this blade.

Veneer construction:
0,6 Limba
0,6 Limba
Carbon
4,0 Balsa
Carbon
0,6 Limba
0,6 Limba

In the Appelgren DOTEK Control blade, the DOTEK fibre is placed between a limba cover and an ayous inner ply. The middle core consists of a DOTEK balsa layer. The APPELGREN DOTEK CONTROL blade is the last word in control and accuracy.

DONIC APPELGREN DOTEK CONTROL

This blade is more easily controlled, and has more feel, than the Waldner DOTEK AR. It is ideal for the player who wants more ball control without losing the speed necessary for attacking.

Veneer construction:
1.+ 7. Limba
2.+ 6. DOTEK
3.+ 5. Ayous

11

DONIC WANG XI DOTEK CONTROL PLUS

The outstanding qualities of the DOTEK series – now available with a straight handle and improved control.

Wang Xi, one of the world's best defenders, demands first and foremost that his blades give him the fine touch and precise placement for which his game is known.

These requirements are fulfilled one hundred percent by the DONIC Wang Xi DOTEK Control Plus blade.

This is the first time that the proven DOTEK Technology has used a 3.5 mm DOTEK Kiri middle ply. The combination of Kiri with 0.6 mm thick Limba exterior and the 0.6 mm thick Ayous inner plies give the blade the necessary stiffness for controlled counter-attacking.

The Wang Xi Dotec Control Plus with its excellent playing properties provides not only control but reserves of speed to enable positive all-round players to go on the attack.

Veneer construction:
0,6 Limba
0,6 Ayous
DOTEK
3,5 Kiri
DOTEK
0,6 Ayous
0,6 Limba

This is the ideal blade for players who value control but not at the loss of their attacking play.

This blade is available for the first time with a straight handle, making it easier for defenders to "twiddle" their racket.

in a new DIMENSION

1 | DONIC EPOX CONTROL

DONIC has recently created a comfortable player friendly blade with thin Fineline outer veneers. This Allround blade has a positive influence on the playing characteristics. DONIC EPOX CONTROL offers outstanding controllability without unpleasant vibration. Used with medium to relatively hard DONIC Formula rubbers, this blade is also highly suitable for attacking players.

straight - concave - anatomic | about 85 g | 5 plies | Art-N° 110 271

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
9	7							contr.-elast.

2 | DONIC EPOX POWERALLROUND

One feature of the DONIC EPOX POWERALLROUND blade, which is a fast allround blade, is the well-balanced combination between speed and control. The lightweight speed elastic all-round blade allows its use for all playing strategies in modern table tennis. The Powerallround veneer acquires a relatively high rigidity due to the Epoxy resin gluing, giving the necessary speed for an attacking game.

straight - concave - anatomic | about 85 g | 5 plies | Art-N° 110 272

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
8	8+							speed-elast.

3 | DONIC EPOX OFFENSIV

The controlled offensive version of the DONIC EPOX series with high speed and excellent control, suitable for all offensive strategies and due to its light weight, ideal to play with. Combined with soft to medium hard DONIC FORMULA rubber, the EPOX OFFENSIV blade produces outstanding spin. Its innovative and sophisticated design gives the DONIC EPOX OFFENSIV blade unique characteristics.

straight - concave - anatomic | about 85 g | 5 plies | Art-N° 110 273

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9							nearly stiff

4 | DONIC EPOX TOPSPEED

The fastest of all the EPOX blades with absolute Top Speed. Its hard inner veneers give the EPOX TOPSPEED extremely high rigidity which creates unmatched speed and power for offensive play. Even when playing passive blocks or counter attacks, the EPOX TOPSPEED blade is suitable for all playing variations - most important for today's high speed table tennis.

straight - concave - anatomic | about 90 g | 5 plies | Art-N° 110 274

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6	10+							stiff

The »Fantastic Four«

DONIC EPOX System: Each blade a high quality original

DONIC EPOX series veneers are not glued with a liquid glue, but with a gluing coat of Epoxy resin. The five veneers with epoxy coating are pressed together adding heat for 20 minutes. During this process the epoxy coating liquefies and glues the veneers together.

The middle veneer and two intermediate layers consist of monoblade veneers. Only one-piece veneers are used in this monoblade technique.

Other traditional techniques often use several pieces which are put together.

This means each pressed veneer is only used for one blade resulting in a unique blade of high-quality.

The unique method of gluing the plies of the EPOX-blades with epoxy resin ensures their special rigidity. Depending on the particular ply formation, extra power and speed are achieved. The blade has superior control without unpleasant vibration.

The edges close to the handle are carefully rounded off. This is the main reason why each blade of the DONIC EPOX series is very easy to handle.

Many players hold the handle differently for forehand and backhand shots. Due to the smooth, rounded handle, this presents no problems.

The DONIC FINELINE Covered System: An overall sure thing

The DONIC EPOX blades have an edge protection made of Fineline wood and are manufactured with the DONIC FINELINE technology. This innovative design has a 360° edge protection, which guarantees that DONIC EPOX blades look perfect for a long time. Due to their thin outer veneers, these blades are also very light in weight.

The combination of these refined technologies has created a high-quality product:

A blade series constructed employing up to date techniques, carefully manufactured with a love for detail.

S AND THE FUTURE

THE LEGENDS

1

1 | DONIC OVTCHAROV CARBOSPEED

The quickest model in this blade series.

In its construction it is similar to the Waldner Legend Carbon, but differs slightly because of its somewhat thicker inner ply in combination with a high class Hinoki outer ply. It is a very fast carbon blade with great stiffness. Despite the high speed the blade is great fun to play with. For all out attackers with hard top-spins who prefer to counter-attack.

Veneer construction:
5-ply
(Hinoki, Kiri +
2 Carbon plies)

straight, concave
approx. 85 g | Art-N° 110 227
Chinese penholder

CONTROL	SPEED
6	10++

-	AR	+	-	OFF	+	ELASTICITY
						stiff

2

2 | DONIC WALDNER LEGEND CARBON

A special DONIC development – the blade you must have!

Fast and relatively light offensive blade. Having a larger "sweet spot" ensures premium control. The blade has been designed with great care. The choice of wood plies – Hinoki outer ply in combination with carbon layers and a soft inner ply provide stiffness for good topspin. Especially for close to the table attackers who like to dominate.

Veneer construction:
5-ply
(Hinoki, Kiri +
2 Carbon plies)

straight, concave | approx. 85 g | Art-N° 110 208
Chinese penholder

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6+	10+							stiff

3

3 | DONIC BAUM ESPRIT

The blade of the two times European Finalist, Patrick Baum.

The artificial Aramid-Carbon fibre in combination with high quality wood plies ensure a precise ball return and outstanding offensive quality to the blade. In addition to being very fast, the Baum Esprit ensures maximum ball control in every playing situation. This blade is ideal for attackers who value spin but require sufficient speed from their strokes.

Veneer construction:
7 plies - Koto,
Ayous, Kiri +
2 Aramid-Carbon
plies

straight, concave | approx. 90 g | Art-N° 110 266
Chinese penholder

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7	9+							nearly stiff

4 | DONIC PERSSON SEVEN

A fine attacking blade from DONIC.

Especially developed for modern, dynamic top spinners and has a soft feel when striking the ball. The 7-ply blade has good feel and is very spinny. It also offers excellent control when hard top spins are required. The perfect blade for intelligent attackers who vary their game and require spin, speed and maximum feel.

Veneer construction:
7-ply
(Limba, Ayous,
Abachi combinati-
on)

straight, concave | approx. 90 g | Art-N° 110 244
Chinese penholder

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9							nearly stiff

A Star was »BURN«!

THERMIC BURNED TECHNOLOGY

5-ply
1+5ply: Mahogany
2+4ply: Awan
Centre ply: Kiri

straight, concave, anatomic
Weight: 90 g. approx.
Elasticity: stiff

Art.-N°. 110 283

The DONIC BURN series

The thermic treatment of the veneers makes for extremely high stability comparable to features of high-quality tropical woods. The blades are exposed to a temperature of 200 degrees centigrade for twenty four hours.

This process hardens the wood and removes any humidity.

The resulting playing characteristics of these blades are therefore unique.

DONIC BURN OFF

A stiff blade usually offers less control but this does not happen with DONIC BURN OFF. For a fast blade at 85 – 90 g it is relatively light and has an outstanding sweet spot. It won't be top heavy even with heavy and hard rubbers.

CONTROL	SPEED	-	AR	+	-	OFF	+
6+	10						

DONIC BURN OFF-

The OFF- Version is even more controllable and has better feel than the BURN OFF blade. In harmony with the thinner middle ply it is slightly more elastic and in combination with somewhat softer rubbers imparts slightly more spin than the OFF version.

At a weight of approximately 85 g this is a standard weight for a high quality offensive blade. This beautifully produced high class blade in DONIC's series has a superb sweet spot.

straight, concave, anatomic
Weight: 85 g. approx.
Elasticity: nearly stiff

Art.-N°. 110 282

CONTROL	SPEED	-	AR	+	-	OFF	+
7+	9						

DONIC BURN ALL+

The main priority in producing the Allround Plus Version of the DONIC Burn blade series has been to ensure ease of control and feel. The thinner Kiri centre ply of the DONIC BURN ALL+ offers greater control than the blades in the Offensive series. At 80 g this blade is highly suitable for players who prefer a lighter blade. The DONIC BURN ALL+ blade can also be used with harder attacking rubbers to produce fantastic speed. For an Allround blade this model is relatively stiff and combined with softer rubbers will develop plenty of spin.

straight, concave, anatomic
Weight: 80 g. approx.
Elasticity: speed elastic

Art.-N°. 110 281

CONTROL	SPEED	-	AR	+	-	OFF	+
8+	8						

SENSO CARBON

CARBON, GLASSFIBRE, KEVLAR – HIGH-TECH-material with unexpected possibilities

In space technology, in aircraft construction and even for cars – especially racing cars, e.g. in Formula 1 – the design engineers are using more and more compound materials like carbon, fibreglass and kevlar. The reason: Higher stability at a lower weight. When these high-tech fibres are implemented in table tennis blades, the results are extraordinary advantages:

- low weight
- higher rigidity
- extremely high stability
- enlarged sweet spot
- more speed with almost the same control

The only disadvantage is that blades with carbon layers are inclined to feel relatively stiff and hard. DONIC has tackled this problem and developed carbon blades which are more player friendly. The result is really sensational.

DONIC Waldner Diablo Senso

DONIC Waldner Senso Carbon

A devilishly good blade: 7-ply gluing (5 wood plies, 2 glassfibre plies). For the versatile offensive player and for the aggressive allrounder. Quick, but very good ball control. Depending on the choice of the rubber sheet well suited for all levels. Relatively low weight.

Compared to carbon as well as kevlar models the playing characteristics of the bat do not change dramatically: e.g. blades with carbon layers give a relatively hard and insensitive touch. Glassfibre, however, gives you the same feeling as wood. The advantages of the DONIC SENSO glassfibre blades will certainly convince you.

HIGH-TECH-COMBINATION: SENSO-technology and glassfibre – a built-in chance for victory!

straight - concave - anatomic | about 85 g | 5+2 Plis | ART-N°: 100 202

CONTROL	SPEED	–	AR	+	–	OFF	+	ELASTICITY
8	8+							speed elast.

This model is based on the famous DONIC Allplay, which is one of the best sellers in the world. Due to two additional carbon layers the Waldner Senso Carbon combines the unique characteristics of the high tech component carbon with the undeniably well-proven Swedish all-round construction in a perfect match.

The result is a fantastic playing characteristic providing speed and control in an ideal balance. Supported by the Senso V1 void this blade operates very elastic giving you the essential feedback of the bounce of the ball.

For attack players as well as for aggressive allrounders, the Waldner Senso Carbon is a perfect blade.

straight - concave - anatomic | about 85 g | 5+2 Plis | ART-N°: 100 219

CONTROL	SPEED	–	AR	+	–	OFF	+	ELASTICITY
8+	8+							speed elast.

WALDNER SENSO ULTRA CARBON

The particular feel-typical of Waldner

Jan-Ove Waldner has been to table tennis what Mozart was to music. Waldner was a fan of the standard blade DONIC Waldner Senso Carbon for many years. This legendary blade has, however, been further developed and improved, in collaboration with the greatest table tennis player of all time. DONIC has designed a faster version of the Waldner Senso Carbon blade. The Waldner Senso Ultra Carbon is a light Carbon blade with impressive ball control and feel - ideal for an inspirational player. The increase in speed is due to hard Carbon plies which have been placed around a relatively thin middle veneer. The inner and outer veneers with varied hardness give this blade superb touch.

straight - concave - anatomic | about 85 g | 7 Plies | ART-N°: 110 209

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
8-	9							nearly stiff

PERSSON POWER CARBON

The ideal weapon for aggressive attack players

This model will convince all players relying on speed and aggressivity. Its basis was the successful Persson Powerspeed blade "made in Sweden" up-graded with two additional carbon layers. The result is a hyper fast power blade, which is relatively soft to the ball and sensitive and quite easily controlled due to the Senso V1 void in the handle.

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 100 209

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6	10+							nearly stiff

PERSSON CARBOTEC

- 7-plyes
- 1.+ 7. ply: koto
- 2.+ 6. ply: carbon-glass
- 3.+ 5. ply: tanne
- Centre ply: kiri

Exceptional combination

Players who want to achieve optimum power and the highest speed need the Donic Persson Carbotec named after the 5-times Swedish World Champion. Because of its extreme speed and its stiffness, this carbon-glass blade is the answer for players who want to achieve optimum acceleration without speed glue, but through the blade. The carbon glass fibre blade is more elastic than ordinary carbon fibre blades. Despite the high stiffness, it offers superb feel. When combined with DONIC Formula rubber, the blade produces incomparable speed and spin without loss of control.

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 100 291

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6+	10							stiff

LI PING KITEX

- 7-plyes
- 1.+ 7. ply: kiso-hinoki,
- 2.+ 6. ply: ayous
- 3.+ 5. ply: texalium
- Centre ply: kiri

Kiso-Hinoki/Texalium

The Li Ping KiTex blade consists of high-quality wood plies with two extra texalium inner layers. The high-quality, hard hinoki outer plies, as well as the texalium inner plies, guarantee strength, flexibility, and power. The combination of the soft ayous inner ply and kiri middle layer produce a perfect synthesis between speed and control. If you are an attacker who, like Li Ping, has a varied topspin game, you will enjoy using this blade.

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 110 241

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9+							nearly stiff

WALDNER BLACK DEVIL

CARBON
BALSA

DONIC WALDNER BLACK DEVIL CB

As exuberant as the playing style of the Master is the advanced technology and the revolutionary design of this "weapon". Carbon and Balsa have been combined by DONIC for the first time. The soft Balsa core results in a blade with unbelievably good control, particularly when returning the ball. Incredible power and speed can be achieved with the hard Koto middle plies and carbon fibre of the DONIC Waldner Black Devil CB. The light weight and enlarged sweet spot of the 7-ply high-tech product attains perfection. Waldner's "black devil" will delight all attacking players!

straight - concave - anatomic | about 80 g | 7 Plies | ART-N°: 110 239

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7	10-							nearly stiff

OVTCHAROV SENSO CARBON

Ply structure:
6 layers of wood +
2 carbon layers
Ayous / Ayous
(inner plies),
Anegre, Carbon,
Limba (outer plies)

made in Sweden

A unique ply formation with two separate inner plies

Two carefully glued Ayous plies – treated and glued at high temperature and at top pressure before being cooled before the next stage of production. This forms the core. These plies are surrounded by two carbon plies to give the blade stability and the necessary hardness. The purpose of these procedures is to maximise the "sweet spot". The Senso handle design has been well received for many years and valued for its precise return of the ball.

straight, concave, anatomic | 90 g. approx. | 6+2 plies | Art-N° 110 224

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
8	9							nearly stiff

BAUM CARRERA SENSO

High speed... excellent control

The two times European Finalist Patrick Baum favours DONIC Senso Technology. His hard, relatively thick 7-ply offensive blade compliments his extremely aggressive game - fast topspin from both wings, hard smashes, power flips and dangerous solid backhand blocks. The Baum Carrera blade affords excellent control despite high speed. This is what one would expect from a DONIC Senso blade "Made in Sweden".

straight - concave - anatomic | about 90 g | 7 Plies | ART-N°: 110 235

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
6-	10							stiff

WALDNER DICON

PEN
HOLDER

Direct Control – DICON: The advantage in feeling

Inside the DICON construction we have removed parts of the handles with a milling tool (see sketch).

This construction provides the following surprising advantages:
direct contact between the player's hand and arm and the blade, and more feeling for power and speed of the blade. Transmission of power between player and ball is direct, therefore you have more control of the ball.

straight - concave - anatomic | about 85 g | 5 Plies | ART-N°: 100 222

CONTROL	SPEED	-	AR	+	-	OFF	+	ELASTICITY
7+	9+							nearly stiff

DEFPLAY SENSO

The versatile defensive blade

The demands that are made to defensive players have been increased in recent years. Specially designed for the modern, versatile defensive player, DONIC has developed a valuable help - the DEFPLAY SENSO:

A very special defensive blade

- The world's most successful veneer combination (5 ply allround) is manufactured with two dampening but elastic outer plies. (Gabon and Anegre),
- The vibration and the speed of the blade is reduced by increasing the size of the blade by 3 mm.
- The SENSO technology brings maximum dampening effect with the especially developed V3 void.

The result:

- Unbelievable control for all defensive shots.
- Fantastic acceleration for all offensive shots.
- Pure playing excitement.

straight - concave - anatomic | about 80 g | 5 Plies | ART-N°: 100 212

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
10	5							contr.-elast.

DEFPLAY CLASSIC SENSO

The cream of blades for classical defensive players

As its name indicates, the DEFPLAY CLASSIC Senso has been developed by DONIC blade experts for the classic defensive game. Long range defence, as well as sudden unexpected attacking close to the table, can be successfully undertaken with this model.

Weighing approximately 70 grammes, this blade is a light weight amongst the modern blades despite its larger size.

Two balsa middle plies glued together, give the DEFPLAY CLASSIC Senso fantastic control and a superb feel.

The Koto and Ayous outer plies enable the player to switch to a safe attacking game when under pressure.

straight - concave - anatomic | about 70 g | 6 Plies | ART-N°: 100 211

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
10+	4+							elastic

CAYMAN

Good feel for pimples out players

DONIC developed with the CAYMAN an extremely light and relatively fast all-round blade with high rigidity and excellent control.

This blade is especially suitable for players using pimples out. The hard outer plies are particularly effective when using long or short pimples. Blocking and counter attacking become more dead-ly and more troublesome, especially for long pimped players.

Amazing control, with no lessening of speed, permits the player using this DONIC blade to attack and defend and enjoy his game. This does not only apply to players using pimples.

straight - concave - anatomic | about 70 g | 5 Plies | ART-N°: 100 277

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
8	8-							stiff

ALLIGATOR COMBI

The blade with two different sides

The main feature of the DONIC Alligator Combi blade is the difference in speed between the forehand and backhand playing sides. The AR+/Def+ blade is made of a 5-ply combination which has been carefully crafted to create perfect harmony between the different playing characteristics of each side. The core is made of soft Balsa wood which makes the blade very light and relatively stiff. On the forehand side, two harder and faster veneers are used, whereas for the backhand side somewhat softer and therefore slower veneers are used.

The result is that outstanding power can be achieved when playing topspin shots with the forehand side and fantastic control is guaranteed when playing a defensive game away from the table with the backhand side. The DONIC Alligator Combi is unique in that it complements both defensive play away from the table and attacking strokes and blocks close to the table. Players who use disturbing rubber sheets such as Anti and long pimple rubbers will be especially amazed by the enhanced playing possibilities of this blade.

straight - concave | about 80 g | 5 Plies | ART-N°: 110 249

CONTROL	SPEED	-	DEF	+	-	AR	+	ELASTICITY
FH 8- BH 10-	FH 7+ BH 5+							speed-elast.

Handle the handle - feel the success

senso points on the hand

For many years, one of the World's most successful blade manufacturer's, conducted research in order to increase ball control.

Neurologists have taught us that the reactions of the human hand are more sensitive in some areas, in particular at the ball of the thumb and the middle finger. In these areas the hand has really good feeling for vibrations of a certain frequency.

The Donic technicians have applied this medical knowledge to their blades. They have designed blades where the handle and bat surface are one wood, which is the most important factor in achieving the highest stability.

They also introduced the precisely calculated hollow spaces, which are open at the end.

This ingenious construction transmits the feeling for the ball, starting from the point where the ball comes into contact with the blade, leading it to the 'Senso' points on the hand.

This construction is an enormous step forward in blade technology. Perfect control - perfect feeling.

DONIC SENSO-TECHNOLOGY

- Perfect ball control
- Optimum feedback
- Exact recognition of ball-bat contact
- Handle adapted to the sensory system of the hand
- Considerably reduced weight
- Individual adaption of blade and player when choosing between optimum control or optimum speed

Patented
N° DE 44 29 843

The DONIC SENSO system offers two versions with two totally different hollow spaces:

SENSO V1 provides optimum speed with identical control.

SENSO V2 provides optimum control with identical speed.

DONIC SHOP

1 - DONIC key chain CARBOSPEED
Made of plastic with metal chain and ring, 6 x 3,5 cm
Art.-N° 710 227

3 - DONIC shower slipper All-round for hobby and sport. Preformed anatomical sole made of a soft rubber. Offers very good support and comfort. Size: 38-45
Art.-N° 310 215

4 - DONIC Mini Table Tennis Set Consisting of a small table, net, 2 small bats and 2 table tennis balls. Great fun for the whole family at home. Dimensions: 66x35x13cm Art.-N° 710 295

5 - DONIC Midi table PRO-FUN
Fun table with an integrated net. 125x75x72cm. Weight: about 16kg

Jörgen likes to have everything under control

Once a well known Swedish journalist wrote of the man who always seems humble, friendly, and good tempered: "But what he is really made of, you only realize when he plays table tennis. If it comes to all or nothing, the competitive spirit and steely determination are foremost."

For the last 20 years Jörgen Persson has been one of the world's top players. Already he is one of the best players in table tennis history.

Jörgen Persson – the many times world champion thoroughly tested the prototypes. When the series went into production, he immediately took one of the SENSO blades to play with. We quote Jörgen Persson: "I always feel the ball - no matter if I hit it slowly or fast. SENSO gives you the absolute feeling. It is always difficult to place controlled balls when using a fast blade like the POWERPLAY. The SENSO technology makes things much easier, since you get a prompt feedback from the ball."

DONIC PERSSON POWERPLAY

EXCLUSIVE

DONIC's "Exclusive" blade series at unbeatable value

The specially selected ply combinations provide these competition blades with increased control and smooth playing characteristics.

These blades are available in three speeds to suit different types of players:

► OFFENSIVE:

DONIC PERSSON EXCLUSIVE OFF

This is the fastest of the Exclusive blades. It provides outstanding power for effective fast topspin and hard smashes. In addition, the blade provides first class control with all variations of spin.

It is especially recommended for versatile attackers.

Straight, concave, anatomic | approx. 85 g| 5 plies

CONTROL		SPEED				
7		7+				
-	AR	+	-	OFF	+	ELASTICITY
						nearly stiff

Art. No. 110 232

► ALLROUND PLUS:

DONIC WALDNER EXCLUSIVE AR+

This blade combines excellent control plus speed. It is faster than the Appelgren AR and perfectly combines the power of an offensive blade with the outstanding control of an all-round blade.

Suitable for attacking allrounders who like to vary their topspin in a close-to-the-table game as well as playing away from the table without loss of control.

Straight, concave, anatomic | approx. 85 g| 5 plies

CONTROL		SPEED				
8		6+				
-	AR	+	-	OFF	+	ELASTICITY
						speed-elastic

Art. No. 110 231

► ALLROUND:

DONIC APPELGREN EXCLUSIVE AR

This blade offers superb control. The Appelgren Exclusive AR combines lightness with the unbelievable feel of an allround blade.

This blade is highly recommended for all-round players who value control when blocking but especially wish to incorporate variations of spin into their play.

Straight, concave, anatomic | approx. 80 g| 5 plies

CONTROL		SPEED				
8+		6				
-	DEF	+	-	AR	+	ELASTICITY
						contr.-elastic

Art. No. 110 233

FORMULA DONIC

HIGH SPIN + HIGH SPEED

The SPIN-oriented series

DONIC ACUDA

With ACUDA the focus is on maximising SPIN. This series has a maximum flight arc with the take-off angle from the blade generally the steepest. Of course, these are very taut, direct and fast rubber sheets, depending on the grading S1, S2 and S3 or BLUE P1, P2, P3.

The SPEED-oriented series

DONIC COPPA X

The COPPA series tends to be slightly softer. The COPPA rubber sheets aren't quite so taut and come very close to the classic playing feeling with the emphasis on SPEED. The spin arc is very high and topspin shots can easily be played from all positions, especially from half-distance and far away from the table.

FORMULA DONIC - 3rd Generation

	ACUDA S1 Turbo	Spin-optimized, high precision fast rubber with integrated turbo power! For aggressive acting top players who play close to the table and attach great importance on first ball attack.
	ACUDA BLUE P1 Turbo	A packet of strength for the uncompromising attacker who expects optimum speed and power combined with an easy feel.
	ACUDA BLUE P1	Medium hard, the dynamic attacking version. For all out attackers.
	ACUDA S1	Spin-optimized, high precision fast rubber. For aggressive offensive players who play close to the table and attach great importance on first ball attack.
	COPPA X1 TURBO PLATIN	Speed-optimized, high precision extremely spinny rubber. For offensive players who play with fast counter topspin from half-distance.
	COPPA X1 GOLD	Fast high precision spinny rubber with perfect touch. For offensive players who play with fast topspin from half-distance.
	ACUDA BLUE P2	Medium soft, all-round attacking version, the gold standard version of an all-round rubber. For offensive and power all-round players.
	COPPA X2 PLATIN SOFT	Well balanced rubber offering speed with control. For controlled offensive play, spin, block and smash.
	ACUDA S2	Spin-optimized, soft and fast with perfect control. For power all-rounders and attacking players.
	ACUDA BLUE P3	Super soft, excellent control with satisfying sound. For all-round players. Super soft, excellent control with satisfying sound.
	COPPA X3 SILVER	Very soft with superb control and a unique sound. For all-round players who require good control plus speed.
	ACUDA S3	Spin-optimized, fast combined with perfect sound. For spin and all-round players who require excellent control.

INNOVATIONS IN THE FAST LANE

Our expert rubber sheet developers had exactly forecast that the speed glue ban that was introduced in 2008 would accelerate the rubber development enormously. The completely newly developed rubbers, we call them FORMULA DONIC FD3 (3rd generation), brings table tennis without speed gluing to a totally different level. There is now no reason to bemoan the loss of speed glue. FORMULA DONIC FD3 has it all: speed, sound, feeling and precision leaving nothing more to be desired.

A special feature of all the FORMULA rubber sheets is the exceptionally precise feeling. The rubber sheets respond immediately to the player's action, the ball lands exactly where it is supposed to. With such a wide range of rubbers available, every type of player will find the perfect rubber sheet for their playing style.

The series BLUEFIRE, ACUDA BLUE, ACUDA and COPPA X have been completely redeveloped from top sheet to sponge, with many distinctive advantages, all of them intrinsic and permanently inbuilt. We have classified these series into a simple and clearly arranged system enabling each table tennis player to easily navigate their way and find the rubber they want.

FD 3 – FORMULA DONIC 3rd generation

No more speed gluing. No tuning, no juggling. The era of modern table tennis has started. More fun. Pure fun at the game. Honest victories. The next rubber generation combines everything:

- Lifetime PLUS** The number of possible playing hours will be advanced by about 50%.
- Catapult PLUS** The catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions.
- Tension PLUS** Improved inner tension implies the feeling of even more "speed glue" energy.

THE NEW SOFT ONES: AS SOFT AS NEVER BEFORE

Players who used to like the sound and feeling of soft rubber sheets with speed glue prior to the glue ban can now reignite the joy and sensations with the series of SOFT rubber sheets. The versions Acuda Blue P2 and P3, Acuda S2 and S3, as well as Coppa X2 and X3 all belong to this new series. The softest versions are the P3, S3 and X3 with the loudest sound and slightly less speed, the P2, X2 and S2 are fractionally less soft with slightly less sound but an increase in speed. With all versions, topspin and counter-topspin can be played very easily and with fantastic control.

PLUS for all For all rubbers of the BLUEFIRE, ACUDA BLUE, ACUDA and COPPA series the number of possible playing hours has been extended considerably. Additionally the catapult effect and inner tension have been improved which results in greater precision on returns.

FORMULA DONIC – THE WELL-PROVEN TECHNOLOGY FOR MORE THAN A DECADE

ALWAYS STATE OF THE ART. The complete range for pimple-in players.

DESTO F1 Plus Even more dynamic, faster (optimum speed), with customary flatter ball arc and longer playing life.

DESTO F1 Eliminated the need for speed glue, with the optimised control of the FORMULA rubber.

BARACUDA The rubber sheet with strikingly different characteristics. Considerably more spin and more precision in all playing situations. Extremely high flight curve when playing top spin.

SONEX JP GOLD Very fast, but well balanced in speed, spin and hardness.

BARACUDA Big Slam Noticeable softer and hence more control than Barcauda. Though very fast and well balanced, with great sound.

DESTO F2 This rubber offers great control combined with more attacking qualities.

DESTO F3 The DESTO rubber for all-rounders and offensive players who aim for control.

DESTO F3 Big Slam The rubber with the loudest sound and huge control.

VARIO Big Slam The latest rubber sheet to create a cracking sound. A little slower and with better control than Desto F3 Big Slam.

DESTO F4 Combines the control of classic rubbers with the dynamic of the modern generation of rubbers. For ambitious youngsters and players who want to change to rubbers with inbuilt speed glue effect.

QUATTRO FORMULA The allround rubber with maximum control.

THE BLUE MIRACLE

FD 3 – FORMULA DONIC 3rd generation

No more speed gluing. No tuning, no juggling. The era of modern table tennis has started. More fun. Pure fun at the game. Honest victories. The next rubber generation combines everything:

- Lifetime PLUS** The number of possible playing hours will be advanced by about 50%.
- Catapult PLUS** The catapult effect of the large-pored sponge provides more precision when returning, even in difficult positions.
- Tension PLUS** Improved inner tension implies the feeling of even more "speed glue" energy.

DONIC's Bluefire is a completely rubber development offering outstanding dynamic.

A high-tech generation of rubbers in the proven Formula FD3-technology has been developed as a result of the perfect combination of the large pored blue sponge with an extremely spiny top surface rubber.

The top rubber with its small, long pimples-in structure lends the rubber the best possible flexibility and sensational feeling.

Above all, the Bluefire is unbelievably fast with a characteristic high arc when top-spinning that enables maximum spin and increased speed.

LT MAX ARC

BLUEFIRE M1 TURBO · M1 · M2 · M3

DONIC BLUEFIRE M1 TURBO

High-end rubber on top level. Small changes to the structure of the sponge combined with a new pimple formation ensure that this Turbo has enhanced dynamic and spin qualities.

Characteristics: slightly harder sponge (50°), increased dynamic, top surface rubber offers extra spin, superior version of M1 rubber.

Recommended for: For aggressive attacking players.

Sponge: 1.8 / 2.0 / max

Surface: spin-elastic

Art.-N° 000 297

A REAL CRACKER!

One never forgets that great love. For all those who loved and have never forgotten the sound of the old speed glue times, there is now the new Bluefire Big Slam. This extremely soft blue sponge produces more sound – it really tocks! Added to this is a high grade grippy and spinny top surface rubber of the Bluefire series: The perfect combination.

This rubber is now available in maximum, 2.0 and 1.8 mm thickness and additionally in 1.6 mm.

This gives you even more control – and an earful to your opponent.

Bluefire Big Slam.

BLUEFIRE JP

THE CONTINUATION OF A SUCCESS STORY

Japanese rubber sheet modalities have been incorporated in the latest production of Formula DONIC (FD3 3rd Generation) Technology.

This is a new type of pimpled-in rubber in combination with the proven, dynamic blue sponge but with a somewhat finer pored structure. This lends the rubber sensational feel, with maximum catapult and a very high arc of the ball. The very grippy, taut but elastic top surface rubber produces maximum spin when top-spinning and fantastic control due to increased contact on the bat.

MAX CATAPULT MAX ARC

BLUEFIRE JP 01 TURBO JP 01 - JP 02 - JP 03

DONIC BLUEFIRE JP 01 Turbo High-end rubber on top level.
Small changes to the structure of the sponge combined with a new pimple formation ensure that this Turbo has enhanced dynamic and spin qualities.

Characteristics: Similar sponge hardness to JP 01 (47,5°), open-pored sponge, increased dynamic that is easily controlled, superior version of JP 01

Recommended for: For attackers who value good control.

Sponge: 1.8 / 2.0 / max
Surface: spin-elastic Art.-N° 000 298

FORMULA

S1 TURBO

DONIC ACUDA S1 TURBO

The Turbo version from the Acuda series is effective due to the maximum inbuilt speed glue effect which enhances speed and acceleration.

The DONIC Acuda rubbers became an immediate worldwide success the moment they entered the market. In order to offer unbeatable rubber technology for the top players DONIC included Turbo in the manufacture of its bestseller Acuda S1 series.

DONIC Acuda S1 Turbo is a precision rubber designed for accuracy at high speeds. Despite the rubber being dynamic and fast, it has perfect feel – reminiscent of earlier speed glue days.

Thanks to highly developed technology this advanced rubber from the house of DONIC produces good length when playing fast loops and that despite a characteristic high arc.

DONIC ACUDA S1

ACUDA S1 is a very fast rubber with outstanding spin qualities. Close to or away from the table it is possible to play “loop-loop” as in the days of speed glued rubbers. Despite its medium hard sponge ACUDA S1 is quite easily controllable and has a great feel. You can count on ACUDA S1 even in an awkward situation. This rubber may be fast but ball control is excellent.

DONIC ACUDA S1 TURBO

Characteristics: spinny, accurate top class rubber
 Recommended for: performance orientated attackers

FD 3 – FORMULA DONIC 3rd generation

No more speed gluing. No tuning, no juggling. The era of modern table tennis has started. More fun. Pure fun at the game. Honest victories.

The next rubber generation combines everything:

- Lifetime PLUS** The number of possible playing hours will be advanced by about 50%.
- Catapult PLUS** The catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions.
- Tension PLUS** Improved inner tension implies the feeling of even more "speed glue" energy.

DONIC ACUDA S2

The ideal rubber for attacking players who previously used soft rubbers with speed glue. ACUDA S2 is a fast rubber with a medium soft large pored sponge. This produces fast speeds and has a uniquely loud sound. ACUDA S2 is well suited both for close to the table and away from the table game. It will give an advantage in topspin/topspin duels. This rubber is particularly enjoyable to play with because of its precise feel.

DONIC ACUDA S3

As with the other rubbers from the ACUDA series, ACUDA S3 produces excellent spin. The very soft sponge increases feel and sound, and offers sufficient speed for powerful spin and a positive block game. Playing with DONIC ACUDA S3 will guarantee success and pleasure. It has a unique sound!

DONIC ACUDA S2

Characteristics: spin-optimized, soft and fast, with perfect control.

FORMULA

Maximum speed when top-spinning.

DONIC COPPA X1 Turbo (Platin)

Compared to its predecessors, the COPPA series will produce more spin and a higher arc at maximum speed. COPPA X1 Turbo is especially suitable for topspin away from the table. In common with all the rubbers in the FD3 series COPPA X1 Turbo will ensure that your game is more accurate and less prone to error.

DONIC COPPA X1 (Gold)

The variation of the COPPA X series with a medium hard sponge. Even better ball control and feel with high speed and spin. The precision and control of COPPA X1 is second to none. The ideal rubber for most attacking players.

DONIC COPPA X1 Turbo (Platin)

Characteristics: speed-optimized, high precision extremely spinny rubber
 Recommended for: offensive, fast counter spin, half-distance play

Sponge thickness: 1.8 / 2.0 / max
 Surface: spin-elastic  Art.-N°: 000 291

HIGHSPEED

FD 3 – FORMULA DONIC 3rd generation

No more speed gluing. No tuning, no juggling. The era of modern table tennis has started. More fun. Pure fun at the game. Honest victories. The next rubber generation combines everything:

- Lifetime PLUS** The number of possible playing hours will be advanced by about 50%.
- Catapult PLUS** The catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions.
- Tension PLUS** Improved inner tension implies the feeling of even more "speed glue" energy.

DONIC COPPA X2 (Platin Soft)

The COPPA X2 offers a good balance between attacking and aggressive allround table tennis. Whether one is playing close or away from the table, speed, spin and control come naturally. Speed is of course inbuilt but durability has also been increased. An added bonus is that this rubber is well suited to produce power for a strong back-hand player.

DONIC COPPA X3 (Silver)

This rubber evokes memories from speed glue times! COPPA X3's mega-loud sound and easily controlled speed will provide great pleasure. This rubber offers perfect control and is suitable for an active topspin game from all positions. DONIC COPPA X3 is very easy to play with. Allround players will also find an improvement in their game.

DONIC COPPA X2 (Platin Soft)

Characteristics: Well balanced rubber offering both speed and control.

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
									soft

The rubber with vicious spin

Even more sound and control due to the softer sponge.

The FORMULA DONIC BARACUDA rubber with inbuilt speed glue effect produces fantastic spin. With DONIC BARACUDA the ball leaves the blade in a conspicuously higher arc, giving considerably more spin. The increased rotation of the ball stabilises the flight and increases speed. The results are convincing after only a few hours of training to become familiar with this modern rubber. Accuracy of placement is visibly improved even for top players. DONIC BARACUDA offers that extra margin of safety even in the tightest situation, and not only when engaged in a high risk top spin game.

DONIC BARACUDA's top rubber surface has been newly constructed to minimise abrasion.

The happy result:
more playing hours with a surface that remains intact without noticeable damage.

DESTO F4: THE PERFECT INTRODUCTION TO FORMULA DONIC

Formula F4 is the perfect introduction for ambitious youngsters and players who want to change to rubbers with inbuilt speed glue effect. For those who seek clever placement and variation in their play and not just brute force, DESTO F4 is the right choice. Our rubber provides an introduction to the fascination of FORMULA DONIC (inbuilt speed glue effect) – for the improving ambitious player. The soft sponge, with slightly reduced speed glue effect, combines the control of classic rubbers with the dynamic of the modern generation of rubbers.

For all those who take advantage of their chances, and that at an astonishingly fair price.

DONIC DESTO F1 plus: FIRST CLASS UPDATE

- An update (FD3 Generation) of our best seller and much loved first generation Desto F1 rubber, highly regarded in Asia, with inbuilt speed glue effect.
- Slightly harder sponge
- Even more dynamic, faster (optimum speed), with its customary flatter ball arc and a longer playing life – Lifetime PLUS.

Desto F1 Plus is a further development of the first, much loved, Formula DONIC Desto F1 rubber sheet, with inbuilt speed glue effect. This slightly harder and speed optimised sponge ensures more dynamic, whilst retaining its fine playing qualities of a slightly flatter ball arc, plus an increased playing life (Lifetime PLUS).

Thickness: 1.8 / 2.0 / max
 Top surface: spin-elastic

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
6+	10	10++							medium

Gluing was yesterday. Today there is DESTO F1.

DONIC DESTO F1. A high-tech product for well trained players of ability, who require more speed from their rubber. With qualities of spin and speed previously unknown for unglued rubber sheets. This inbuilt speed gluing effect produces good sound, softness plus speed and spin. This FORMULA rubber is exciting to play with.

DONIC DESTO F1 is the ideal alternative for players who used to use speed glue. Newcomers to NEW FORMULA DONIC technology experience with the DONIC DESTO F1, table tennis from another world.

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
5+	10	10+							medium

The happy medium: DESTO F2

DONIC DESTO F2 is the bridge between F3 and F1, giving great control at high speed. DONIC DESTO F2 is soft, has a good feel and the full sound of speed gluing. It produces far more speed than the traditional spin elastic rubbers, and the F3. It is, however, slower than DESTO F1.

The DONIC DESTO F2 is soft and full of feeling, it has the speed gluing kick and of course, the excitement at play of the FORMULA DONIC technology.

The DONIC DESTO F2 is for the player who in the past has used the traditional spin elasticated rubber, but is searching for more playing fun and more speed and spin. Players who find the DESTO F3 a little too slow, but find the DESTO F1 just a little too fast will discover that the DESTO F2 will give that extra edge to all aspects of their game that they have been searching for.

DESTO F3 BigSlam

generates a loud crack when you hit the ball!

DONIC DESTO F3 BigSlam reproduces the loud sound that you got during the classic times of speed gluing.

The distinctive sound has been firmly and permanently incorporated into the rubber. The BigSlam is somewhat softer, but not significantly slower than its successful sibling DESTO F3. It has the same amazingly simple ball control, but gives the same effect as optimum speed glue. Whether you prefer DESTO F3 or DESTO F3 BigSlam is a matter of taste or, should we say, of sound preference?

DONIC DESTO F3 BigSlam is recommended for players who value sound and outstanding ball control qualities rather than maximum speed.

DONIC COPPA TAGORA

The Donic Coppa Tagora combines all the outstanding playing features of the Coppa and Coppa Tenero.

Tagora has at least the same speed as Coppa and the same outstanding control as Coppa Tenero. The secret is a highly elastic soft sponge from Japan.

Despite the extreme softness (<math><40^\circ</math>) it delivers an unbelievable catapult effect.

The top sheet is designed for maximum grip and spin elasticity. The result, dynamic topspin, powerful shots, aggressive blocks and plenty of touch for short flips. Passive and soft blocks and even balls with under-spin can be easily controlled.

Sponge thickness: 1.5 / 1.8 / 2.0 / max

The classics of DONIC

·Made in Japan·

·since 1985·

Tradition and modernity have got a name when talking about rubbers: DONIC VARIO

For more than 30 years the DONIC Vario rubber sheet series has been at the forefront of the sport table tennis. With the quality seal "Made in Japan" and known as extremely flexible, reliable and durable! Eminently suitable for beginners to top players!

VARIO = VARIATION = VICTORY

DONIC VARIO

Semi hard sponge, high grip, outstanding spin elasticity, high speed, good control. As its name indicates, this rubber is recommendable for all modern playing strategies.

Sponge: 1.2 / 1.5 / 1.8 / 2.0 / max
Surface: spin-elastic  Art.-N° 000 201

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
6+	8	9							medium +

DONIC VARIO SOFT

The pioneer rubber of the SOFT generation. The surface is absolutely identical to the sheet of the normal VARIO, but the sponge is softer. The results are a better control, somewhat less speed and identical spin characteristics.

Sponge: 1.2 / 1.5 / 1.8 / 2.0 / max
Surface: spin-elastic  Art.-N° 000 202

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
7+	7	9							soft +

DONIC VARIO BIG SLAM

·Made in Germany·

With Vario Big Slam, the DONIC team designed a rubber sheet which allows control and all round players with a tendency to an offensive game to advance to a new playing level. Due to its extremely soft 35 degree sponge, you get perfect feeling on the blade. This is the ideal rubber for spin and rotation players who prefer soft rubbers and like to hear a fantastic sound when hitting the ball.

Recommended for: Players who used to play with classical soft to medium rubbers and now want to switch to the perfect feeling of the NEW FORMULA DONIC rubber sheets. The VARIO Big Slam with inbuilt speed glue effect offers, those players in particular, unbelievable sound with excellent control and spin.

Sponge: 1.8 / 2.0 / max
Surface: spin-elastic  Art.-N° 000 204

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
8	8	10+							soft

Variation is the key to success: VARIO – the rubber that delivers it!

Jörgen Persson prefers to play with rubbers that are quite suitable for most table tennis players. Not surprisingly, the SONEX JP GOLD points the way to the future of rubber with built-in speed-glue effect that incorporates speed and spin plus good control.

We recommend DONIC SONEX JP GOLD for:

Ambitious attackers who want a well-balanced rubber that has the effect of speed glue. This new generation of rubber offers a combination of excellent attacking characteristics with a built-in speed-glue effect.

Sponge thickness: 1.8 / 2.0 / max

Surface: spin-elastic ART.-N° 000 266

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE HARDNESS
6-	10	10+							medium -

DONIC QUATTRO FORMULA

Points made by precision

Speed is not the only thing that counts. For many years the best players in the world used speed glue, as this did not only make the rubber sheets faster, but above all softer and at least subjectively, to get better control – although spin and speed have been increased. By adding Formula tuning to our QUATTRO rubber, we have increased the performance, but we have limited the speed to ensure that you can easily keep the rubber under control.

No other rubber has ever provided such a good feeling with relatively high speed.

We recommend DONIC QUATTRO FORMULA rubber for the following players:

Allround players and control players who have been playing with soft, relatively slow rubber and are looking for a rubber with more speed that will provide more playing fun. If you are such a player, QUATTRO Formula will let you experience a new world of table tennis where you just play better. If you have been playing with 2.0 mm, we recommend 1.8 mm for QUATTRO Formula. This will provide more speed than you are used to, while giving you more control.

Sponge Thick: 1.8 / 2.0 / max

Surface: control-elastic ART.-N° 000 274

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE-HARDNESS
8	7+	10+							soft

DONIC TRACTION III

CHINESE KNOW-HOW, EUROPEAN QUALITY

Traction III, sets new goals with three decisive factors:

- A medium hard sponge with the newest MACROCELL Technology, ensuring optimum rebound.
- Grippy and extremely elastic top surface rubber, especially designed to meet the challenges of the new plastic ball.
- The perfect combination of sponge and top surface, its components guaranteed to produce optimum results.

Traction III, a Chinese rubber especially designed for the demands of European players. Designed for topspin players and suitable for both close-to and away from the table game.

BEWARE OF THE SPIKE!

Wang Xi

Masato Shiono

DONIC SPIKE P1

DONIC Spike P1 is a classic defensive pimped rubber designed for the ambitious, technically advanced defender. The ribbed pimped top surface makes possible a vast array of variations of play and extreme backspin. Even when a thinner sponge is used, the defender has the ability to vary the degree of spin up to maximum rotation. This rubber has been developed in close association with **WANG XI**, one of the best German Bundesliga players for many years.

- ▲ **Medium hard sponge**
- ▲ **elastic pimple rubber mixture**
- ▲ **extreme backspin**
- ▲ **especially designed for the classic defender**
- ▲ **good for attacking play**

Sponge Thick: without sponge, 0,3 – 0,6, 1,0 – 1,3
 Surface: long pimples ■ ■ ART.-N° 000 278

CONTROL	SPEED	SPIN	TROUBLE EFFECT	-	DEF	+	-	AR	+	SPONGE-HARDNESS
7	3	3-10	8		+	+				medium

DONIC SPIKE P2

This long pimped rubber owes its unique playing qualities to a combination of an extremely soft sponge and the specially developed long pimped top surface. Spike P2's soft sponge increases control when backspinning close to the table and facilitates surprise attack and variation, which can disturb the opponent. The specially designed structure of the pimples makes it possible for the modern defender to employ all the strokes necessary for top play. This new rubber was developed together with **MASATO SHIONO** from Japan, one of the best defenders in the world.

- ▲ **Unique soft sponge**
- ▲ **Specially structured long pimped to surface rubber**
- ▲ **Best possible control**
- ▲ **Good for defence and backspin close to the table**
- ▲ **Specially designed for the modern defender**
- ▲ **It is possible to block topspin close to the table**

Sponge Thick: without sponge, 0,3 – 0,6, 1,0 – 1,3
 Surface: long pimples ■ ■ ART.-N° 000 279

CONTROL	SPEED	SPIN	TROUBLE EFFECT	-	DEF	+	-	AR	+	SPONGE-HARDNESS
7+	3-	2-9-	8+		+	+				soft

DONIC BAXSTER F1-A

Infinite tension

The DONIC pimple out programme is completed with DONIC BAXSTER F1-A a fast pimple out rubber sheet in FORMULA DONIC technology. The typical softness of the sponge gives a superb feeling for the ball. The BAXSTER F1-A masters ball control in slow rallies, yet gives explosive power for fast strokes. This is the result of the integrated molecular tension of FORMULA DONIC.

Sponge Thick: 1.8 / 2.0

Surface: short pimples ■ ■ ART.-N°: 000 249

CONTROL	SPEED	TROUBLE EFFECT	-	AR	+	-	OFF	+	SPONGE-HARDNESS
5	9+	6+							medium

DONIC BAXSTER LB

Infinite variation

The most striking feature of this latest innovation in the classic series with short pimples from DONIC is its enormous variety. The BAXTER LB offers great advantages, due to its high control for returning serves as well as the possibility of adding rotation and spin by using a good technique, and generating a twist by the flick of the wrist. The BAXSTER LB is the ideal rubber for experienced pimple players who would like to play a more variable and effective game without giving up outstanding control.

Sponge Thick: 1.5 / 1.8 / 2.0

Surface: short pimples ■ ■ ART.-N°: 000 247

CONTROL	SPEED	TROUBLE EFFECT	-	AR	+	-	OFF	+	SPONGE-HARDNESS
8	7	5+							medium -

DONIC ALLIGATOR DEF

Many roads lead to victory

The ideal long pimples rubber for defenders and controlled allrounders who prefer to play a more aggressive game which wins points with variations. Prodigious backspin for a defensive game, variations of spin when pushing, wobble effect when attacking: These options are all possible with the ALLIGATOR DEF. In addition to making an astonishing variety of shots possible, this rubber ensures outstanding control whatever playing technique is used and is relatively simple to play with. ALLIGATOR DEF is not only suitable for technically gifted players, but for all players using long pimples.

DONIC ALLIGATOR DEF: A varied game is the key to success.

Sponge Thick: w/o sponge / 0.5 / 1.0

Surface: long pimples ■ ■ ART.-N° 000 245

CONTROL	SPEED	SPIN	TROUBLE EFFECT	-	DEF	+	-	AR	+	SPONGE-HARDNESS
7-	3	2-9+	9							medium

DONIC PIRANJA TEC

The technical defence rubber.

DONIC introduced their Formula DONIC technology into a long pimples rubber. DONIC PIRANJA FORMULA TEC is soft, very elastic, with excellent gripping qualities. It enables the player to impart far more backspin against topspin than has been possible with other current rubber technology. The pimples are faster because of their inbuilt "speed glue" effect, ensuring more accurate blocking, counter attacking and variations of spin with considerable control. For the technically gifted classic defender.

Sponge Thick: w/o sponge / 1.2

Surface: long pimples ■ ■ ART.-N° 000 242

CONTROL	SPEED	SPIN	TROUBLE EFFECT	-	DEF	+	-	AR	+	SPONGE-HARDNESS
7-	3	2-9+	8							medium -

DONIC AKKADI TAICHI

BLACK IS POWERFUL

The very grippy top surface of the DONIC Akkadi TAICHI ensures maximum spin and rotation to a level never before experienced. Due to its special black sponge the black Akkadi TAICHI is a bit harder and stiffer than the red version. The red Akkadi TAICHI is more elastic and, thanks to its Japanese sponge, produces an even better bounce of the ball. The black version is especially recommended for the forehand. It creates possibilities never dreamt of when serving to open the game and to produce the first top spin in the rally.

Sponge Thick: 1.5 / 1.8 / 2.0

Surface: sticky-elastic ■ ■ ART.-N°: 000 239

CONTROL	SPEED	SPIN	-	AR	+	-	OFF	+	SPONGE-HARDNESS
8-	7	10+							medium +

DONIC ANTI CLASSIC

The flexible partner | The ALLROUNDER |

The elastic Anti-spin top surface and the soft sponge make this the allround classic amongst anti-spin rubbers. The ANTI CLASSIC will bring joy to defenders who play with variety as well as allround players who attack close to the table. The outstanding control will be apparent in all playing situations. Japanese high performance production has given these rubbers outstanding ball control.

Sponge Thick: 1.5 / 2.0

Surface: anti-spin

ART-N° 000 243

CONTROL	SPEED	SPIN	-	DEF	+	-	AR	+	SPONGE-HARDNESS
10+	3	2+							soft

DONIC ALLIGATOR ANTI

Has bite! | The Anti-loop rubber |

The taut anti-spin top surface rubber and the hard sponge ensure that the ball is returned with speed, therefore putting the opponent under pressure. The player is able to use effective variations and can drop the ball short with good touch. The opponent's shots can be returned short or long with this effective weapon. Attack and counter-attack are easily possible with DONIC Anti-loop rubber.

Sponge Thick: 1.0 / 1.5

Surface: anti-spin

DONIC TWINGO

A lot of table tennis for little money!

The right choice for ambitious hobby players and newcomers to match play. A grippy, long lasting top surface combined with a soft sponge, guarantee top rate feel.

Sponge Thick: 1.8

Surface: high friction and control

ART-N° 000 219

CONTROL	SPEED	SPIN	-	DEF	+	-	AR	+	SPONGE-HARDNESS
9+	4-	6-							medium -

1 DONIC BLUE CONTACT

The DONIC Blue Contact Glue has been specially developed to improve the playing effects of large-pored sponges such as the DONIC Bluefire series. The glue's viscous consistency guarantees a strong adhesion but also allows the rubber sheet to be easily detached when changing rubbers without damaging the sponge. In addition, if several layers of the glue are applied, spin and speed playing qualities of the rubber are enhanced.

90 ml bottle in set with accessories

Art.-N° 600 282 000

1 litre polythene screw cap bottle without accessories

Art.-N° 600 283 000

2 DONIC VARIO CLEAN

The DONIC Vario Clean has been developed according to the ITTF regulations. Without any volatile organic compounds (VOC) this water-based glue guarantees that the rubber sheet can be applied without any health risk. Easy handling and fast drying are two more characteristics of this top product.

Application: Apply the glue evenly on blade and rubber sheet using the clip fixture and sponge (included). After approx. 5 minutes apply the rubber to the blade using a pressure roll. If possible, store the glue in a cool place. Made in Germany.

Available: 37ml / 90ml / 500ml refill pack

37ml Art.-N° 600 271

90 ml Art.-N° 600 272

500 ml Art.-N° 600 274

3 DONIC FORMULA FIRST

The DONIC Formula First is the ideal glue to apply all kinds of table tennis rubber sheets to the blade, especially the DONIC Formula rubber sheets with their high tension and speed glue effect. Perfect adhesion is achieved with DONIC Formula First. This water-based glue contains no volatile organic compounds (VOC) and complies with the ITTF regulations for table tennis glue. Made in Germany.

Available: 25 gr bottle with integrated sponge / 500 gr refill bottle

25 gr Art.-N° 600 276

500 gr Art.-N° 600 279

4 DONIC FORMULA WOOD SEALING

Newly developed water-based lacquer without any volatile organic component (VOC) for the sealing of table tennis blades. Available: 25 gr / 100 gr

25 gr Art.-N° 600 296

100 gr Art.-N° 600 297

5 DONIC GLUING FOIL

Gluing foil without any volatile organic component (VOC). Ideal for a first application of rubbers to the blade. Also suitable for pimples out rubber sheets without sponge.

Art.-N° 600 281

TAKE CARE

FORMULA DONIC - Care instructions:

Due to the inbuilt speed glue effect FORMULA DONIC rubber sheets have increased tension which gives faster speed, higher spin and an improved bounce of the ball.

These high performance rubbers are more sensitive to outside influences and are more fragile than the classic rubber sheets, which have not been speed glued (e.g. DONIC Vario series).

The lifespan of each FORMULA DONIC rubber sheet varies, naturally, with the type of player, type of rubber, strain on the rubber and care by the owner. The lifespan, however, is considerably higher than that of the classic speed glued rubber sheet. Compared to an unglued classic rubber you can expect a lifespan of about 60 to 80 per cent.

Please note:

1. FORMULA rubber sheets should not be removed and glued again repeatedly.
2. The regular cleaning of the top sheet with VOC free DONIC cleaners or water is highly recommended.
3. The FORMULA DONIC rubber sheets should be protected against daylight or mechanical destruction by using the DONIC bat wallets.
4. Due to the higher tension of the FORMULA DONIC rubber sheets, the edges can break/crumble more easily. In order to avoid this, please use DONIC edge protection tape.
5. The bat must be protected against cold and heat. Particularly in midsummer and in winter you have to be careful that the bat with FORMULA DONIC rubber sheets is not exposed to very high or low temperatures. These extremes can cause the top sheet to become rough/brittle at low temperature and swell up at high temperature resulting in the life of the rubber being shortened. This means don't leave your bat in your car or in too cold or hot rooms for a long time!

**All rubber cleaners

It is all over now. On a Thursday evening in February 2016, in a sports hall in Sweden in a match for his club BTK Spårvägen against BTK Rekord, the last game of the national league. There in Stockholm where it all began about 45 years ago. Now play is over.

Jan-Ove Waldner has ended his career. The greatest table tennis player of all time has retired, on a small stage, modestly, without a big to-do. In a video on his Facebook page he says unpretentiously "Thursday's game will be my last competitive match".

So departs someone who has won everything possible in the sport and is admired by his fans like nobody else. In sports mad Sweden they are asking themselves whether Jan-Ove Waldner was the greatest Swedish sportsman of all time. Greater than Björn Borg? than Ingemar Stenmark? or Zlatan Ibrahimovic? Votes in the "Expressen" newspaper put "J.O." in second place behind Stenmark!

There are sports stars who outlive their time: Muhammad Ali, Pelé, Michael Jordan, Wayne Gretzky and Jan-Ove Waldner. The stars mentioned are better known than the Swede despite the popularity of table tennis, yet Waldner unquestionably belongs to this league of extraordinary gentlemen in the Pantheon of Sport.

The man with the golden hand

Jan-Ove Waldner will not be remembered as the most successful athlete ever, despite his unbelievable success. He was Olympic Champion, twice World Singles Champion and with his Swedish team tamed the might of China for two decades, steering his country to four World Team Championships. Other sportsmen may have won as many titles but Waldner's legacy lies not only in his undoubted success – there was his style. He was a table tennis player par excellence.

Waldner had a grace of hand. He had an unbelievable feel for the ball, a revelation in the sport. At his creative best he was a genius. With unique hand/eye coordination, his talent was breathtaking.

His ability to solve problems was outstanding. Not for nothing was he known as "the Mozart of table tennis". His feel for placement, spin and rhythm proved legendary, the celluloid ball appeared to obey him. He mastered attacking play as well as lobbing a long way away from the table. His excellent services were difficult for his opponents to read. They found his backhand hit merciless. At the 1992 Olympics his opponents despaired at returning his new sidespin chop-block. For many fans he is a table tennis god, the man with the golden hand. "I feel rather flattered, but isn't it a little exaggerated?"

Thank you for everything Jan-Ove

Waldner was better known in China in the 1990's than Bill Clinton

The 17-year old set out to conquer the table tennis world in 1983. "We will have to keep an eye on this young Swede" commented the present Chinese Chief of Sport, Cai Zhenhua. Since then six generations of Chinese table tennis players have tried to conquer that phenomenon, Jan-Ove Waldner. Hordes of players have been taught to imitate his style. His photo was displayed in the training center in Peking as motivation. He was the sporting scourge of Chinese table tennis power. He commanded more respect in China than anyone else and no-one is more popular. Waldner, who owned a restaurant in Peking named "W", spends any weeks every year travelling in China representing big Swedish companies. In the 1990's, according to polls in China, he was better known than the then U.S. President, Bill Clinton. A few years ago "Lao Wa" (ever young tree), as they call him in view of his long career, was honored by the Chinese post office with a stamp bearing his portrait, the first time a living foreigner has been singled out in this fashion.

Chinese table tennis strategists were able to pierce the magic of all corners. Timo Boll, whom Asians regarded as the "next European star after Waldner", and all the previous stars. They were, however, never really able to decipher the inner spark of Waldner's game. He teased them well into old age, naturally less than before but still with painful results. Surprisingly, he led the old Swedes, with his friend and longtime team mate Jörgen Persson, to the World Team title in 2000. This was the last title up to the present day that China did not win. At the 2004 Olympic games in Athens he sensationally eliminated the top favorite Ma Lin.

Waldner was a table tennis enigma, a veritable maestro. One cannot copy a genius. "I was the last player whom the Chinese really feared."

He was a player – not only at the table. A keen golfer and lover of horseracing – more than was good for him – he once remarked that he had lost quite a lot of money gambling, and even received treatment for that addiction. The legends and stories about Waldner, true, half true and false, outnumber those about any other player. One story has it that Waldner who does not have a driving license ("I failed once and I don't really need one"), was seen dancing on the table wearing a velvet suit. Another tale goes that Waldner suffered a badly broken foot falling down the steps of Stockholm pub whilst in the company of his friends Björn Borg and Thomas Brolin. None of this is important. Waldner never liked to talk about himself. His kingdom was any court that contained a table tennis table.

Tack för allt, Waldi. Thanks for everything.

Towards the end of his career the 50-year-old cultivated the image of a "lazy talent". He did not always appear to be 100% fit. When he reached the Olympic final in 2000, which he lost, he was carrying a kilo or two too many. He enjoyed life to the fullest. That was not always the case, although there were many tales. Even Jan-Ove Waldner had to train, in fact prodigiously. The truth is that he trained obsessively in his youth, with special emphasis on service practice. Perhaps there will never be anyone to equal this "chosen one" of our sport. Waldner and his team mates Persson and Mikael Appelgren had to work extremely hard to become the team of Sweden's golden era.

Waldner played for SV Plüderhausen from 2003-5, where his table tennis magic proved a huge attraction in Remstal. He played for Fulda until 2012. He took part in the 2004 Athens Olympics. He was 38 years old, having slimmed down and returned to form, he once again spread the old magic. As previously mentioned, he sensationally defeated Ma Lin, followed by Timo Boll. At this juncture he profited from pure talent and the hard work previously put in. Although he no longer played at the high level demanded for international competition, he continued to play well for his local club in the top Swedish division.

Now time has run out. It is over.

The Argentinian football star, Diego Maradona, described his scandalous goal against England at the 1986 World Cup as the "Hand of God". In truth it was just a dirty trick. Jan-Ove Waldner has been called many things but it is perhaps HIS, if one may use a religious phrase, that is the true "Hand of God".

Tack för allt, Waldi. Thank you for everything.

TWIN COMPACT

ITTF
Approved

*The official table of the Men's World Cup 2012 in Liverpool, 2013 Verviers, 2014 Düsseldorf, 2015 Halmstad, 2016 Saarbrücken
the 2006 Liebherr World Team Championships in Bremen
and 2007 Liebherr European Championships in Belgrade*

Art.-N° 400 240

Easy handling

Long-lasting construction

25 mm top

Ready to play in minutes

Made in Germany

Compliant with the
DIN EN 14468-1
regulations

The highest quality standard and design.

DONIC introduces the World Champion TC, a new generation of automatic tables with 'Twin Compact technic', which meets the highest requirements for safety, durability, set-up and playing characteristics.

The 25mm playing surface, combined with a perfectly balanced undercarriage, ensures top playing characteristics and true bounce.
A classic finish and the use of top quality solid metals guarantee high stability and a long-playing life.

Safety: A modern set up mechanism constructed in strong metal ensures that the table is easy to use. A broad wheelbase prevents the table from overbalancing. Delivery: In a special box. The table only requires a few minor adjustments before it is ready for play.

Technical specifications:

Complies with Industrial regulations DIN EN 14468 -1, class A for high performance sport, ITTF-approved.

Surface: 25mm playing surface in green or blue
60 x 20 mm galvanised steel tubing
Frame: 80 mm diameter steel tubing welded with
Foldable legs: 60 x 20 mm flat galvanised steel.
The height of the table can be adjusted as required.

Undercarriage: Galvanised steel construction.
Covered mechanical side-drive
Cross stabilisation: 50 x 30 mm

Leg height adjustor: 30 x 15 mm, silver, galvanised metal
Wheels: 4 driving wheels 125 mm with rubber tyres, 2 with brakes
Measures when folded: 1600 x 810 x 1580 mm
Weight: about 150 kgs
Wheelchair friendly
Playback position possible - you can play on your own.

The Benchmark for tt-tables

In the early eighties the DONIC development engineers started to design a revolutionary tt-table and the technology was ready for production by the mid of the eighties. The international presentation of this new generation of tables was celebrated during the World Championships 1987 in New Delhi. The so-called DONIC Delhi table equipped with this SC-technology (SC = Super Compact) was the first automatic table ever used in a World Championships tournament – and it excited all experts that were present. This technology has recently been brought to perfection and modified to include the latest safety standards.

What are the main features of the DONIC SC-technology?

Delivered completely assembled

Completely assembled delivery, (transport secured), simply pull the table out of the special carton – unfold – play. No laborious assembly anymore!

Easy handling

Due to the synchronised folding mechanism, the weight of the tops is well balanced and the table is easy and safe to fold and unfold.

Security construction for space saving

The low centre of gravity gives many advantages with regard to handling, moving, saving storage space and security.

Optimised playing surface

The playing surface is of the highest quality and evenness, and is also durable and scratch resistant

Long-life construction

All parts that are exposed to wear and tear are highly strengthened and designed for decades of use.

Top quality "Made in Germany"

All metal parts are epoxy lacquered and thus permanently protected against corrosion. The SC tables are „made in Germany“ and of the highest manufacturing quality.

Robust steel tubing construction

High-quality steel tubing is used exclusively. Every table can be adjusted to any unevenness of to the floor using the special height adapting feet.

Highest safety standards

The additional security devices of the SC technology (e.g. synchronised folding mechanism, low centre of gravity) – as well as the new developed synchronised fold-unfold device of the DELHI 25 and DELHI SLC – minimise the risk of accident. Without doubt the SC tables meet the European standard DIN EN 14468 with ease.

Wheel chair adapted

DONIC Delhi SLC, DONIC Delhi 25, Waldner SC and Waldner Highschool are wheel chair approved.

DONIC-tables in Super Compact-construction:

- DELHI 25
- DELHI SLC
- WALDNER SC
- WALDNER HIGHSCHOOL

No wonder that the DONIC SC tables have been selected for many International (e.g. German Open, 2001-2004, 2008, 2009, 2013 AND 2017; EC 2009, 2012, 2013) and National Championships (e.g. numerous German Championships) and that thousands of clubs world-wide are happy with this technology.

The Table of the:
 EUROPEAN CHAMPIONSHIPS 2009, 2012, 2013, 2017
 German Open 2001 bis 2004, 2008, 2009, 2013, 2015, 2016
 Austria Open 2007, 2008, 2010, 2011, 2013, 2015, 2016

Art.-N° 400 241

Compliant with the
 DIN EN 14468-1 regulations

Comfortable Handling

Long-lasting construction

25 mm top

Space saving

Completely assembled

Made in Germany

The table classic of the SC-Technology! The DONIC DELHI 25 table has been the benchmark for class and reliability. It has been further improved and modernised. Stronger folding legs and redesigned wheel fittings create a stable base and undercarriage, which also looks good. The silver metallic carriage and frame, with high stability and long lasting qualities, create a contemporary image. The sophisticated locking mechanism automatically ensures safety and stability when playing. To ensure perfect playing characteristics a 25 mm strong top surface has been fitted to the DONIC DELHI 25 table. The table is delivered **completely assembled** in a special box, and is **ready for immediate use**.

Technical data:

ITTF approved. Complies with German Industrial Regulation DIN EN 14468-1, Class A for high performance sport.

Surface:

25 mm green or blue (indoor)

Frame:

50 x 20 mm galvanised steel tubing

Foldable legs:

The weight bearing legs are constructed of galvanised steel tubing welded to 60 x 60 silver galvanised crossbars.

Undercarriage:

The weight bearing leg is of galvanised steel tubing 50 x 50 mm, welded to a 50 x 50 crossbar. Extremely stable wheel fittings also in a silver colour.

Mechanism:

The unique design includes a device to set up the legs. This is made of flat silver galvanised steel 50 x 3 mm.

All parts of the mechanism:

are galvanised
 4 x 125 steering wheels with rubber tyres,
 2 of which have brakes

Wheels:

Low storage dimensions only: 1525 x 1600 x 470 mm (width, height, depth)
 Weight: approx. 135 kg
 Suitable for wheelchair players

The table of the European Youth Championships 2012 in Austria.

Art.-N° 400 242

.....
The ideal table
for TT-clubs

- Comfortable Handling
- Long-lasting construction
- 22 mm top
- Space saving
- Completely assembled
- Made in Germany

Compliant with the
 DIN EN 14468-1 regulations

Stable, Light, Compact (SLC): These are the main characteristics of the DONIC SLC. Advanced technology has been employed by German experts to equip this table with a clever safety system (similar to the Delhi 25), resulting in a table that is easy and safe to use and to store. Good looks have not been neglected. The silver metal frame and carriage underline the outstanding value of the table.
 With its practicality and value for money, the Delhi SLC is the ideal table for clubs or associations searching for top quality. The table is ITTF approved, and can be used at international tournaments.
Delivered completely assembled in a special box, the table is **ready for immediate use**.

Technical data:

ITTF approved. Complies with German Industrial Regulation DIN EN 14468-1, Class A for high performance sport.

Surface: 22 mm green or blue (indoor)
 Frame: 50 x 20 mm galvanised steel tubing
 Foldable legs: Weight bearing leg made of silver galvanised steel tubing 50 x 50 mm. The height of the table is adjustable. galvanised steel construction 50 x 50 mm, diagonally welded crossbars 50 x 30 mm, and solid silver steel galvanised wheel attachments.

Undercarriage: Unique leg height adjuster (flat steel 50 x 3 mm) silver galvanised.
 All metal parts: silver galvanised
 Wheels: 4 x 100 mm steering wheels with rubber tyres, 2 with brakes
 Min. storage dimensions only: 1525 x 1600 x 440 mm (W x H x D)
 Weight: 110 kg approx.

DONIC OUTDOOR ROLLER 1000

Robust, weatherproof hobby table with compact technology for highest requirements. Easy handling due to the safety locking system. The 6 mm weatherproof melamine resin top, firmly glued to a metal undercarriage guarantees a high and authentic bounce of the ball. The 50mm metal frame all around the top improves the stability. Undercarriage 50 x 30 mm powder coated square-type tube. Legs strengthened by metal support at the front. Fixed net & post set as well as storage place for balls. Big 128 mm rubber wheels provide stability and easy manoeuvrability even on uneven ground. Playback position possible – you can play on your own.

Safety Norm: EN 14468 - 1
 Weight: approx. 75 kg
 Storage dimensions: 152,5 x 69,5 x 155cm
 Delivery: partly assembled
 Art.-N° 230 291
 Made in Germany

TABLE TOP ONLY AVAILABLE IN BLUE ! (without bats and balls)

DONIC SKY

Robust, weatherproof, with striking design features. The curved undercarriage is not only extremely strong but also eye-catching. A contemporary metallic appearance in combination with a pleasing blue top surface. Excellent playing characteristics and good looks will give hours of pleasure to every player.

TECHNICAL DATA:

- Constructed from precision steel galvanized tubing, this table can be dismantled into six individual parts. It can also be screwed to the floor if required.
- The table halves are of strong angled steel construction, galvanized, with weatherproof 8 mm melamine resin plates. The top surface can be exchanged. It is, however, extremely stable and weather-proof.
- The net and post set is made of galvanized sheet metal and includes a strong clamp system to hold the net.
- Galvanized frame and edge.
- Table top colour: blue

Art.-No° 230 265

- Weight: approx. 160 kg
- Delivered in sections but quickly and easily assembled.
- Complies with European industrial regulations DIN EN 14468-1 class B for school and club sport
- The undercarriage is guaranteed for 5 years.
- Made in Germany

weather-proof

DONIC World Champion net & post

Designed as a perfect companion to the World Champion TC table. The net and post set selected for the 2006 Liebherr World Team Championships in Bremen. Quality was our main endeavour in producing this outstanding, slim and modern design. The steel plate construction, with additional strengthening, makes this set ideal for every day club use. The standard is of the highest quality "Made in Germany" for great durability – guaranteed!

DONIC offers a three-year warranty!

ITTF approved.

Colour: Metallic silver

class B for school and club sport

Robust weatherproof table in attractive chrome optic

DONIC SCOREBOARD

Plastic support, PVC numbers 0 – 20 and 0 – 5 (sets), Time Out cards. Scores are visible on both sides. Scorer can be folded.

Art.-N° 420 231

DONIC scoreboard SCORER

Detailed construction made of hard plastic for long-term use in clubs. Numbers from 0 – 30. Sets from 0 – 5. Measurements: 42 x 4 x 24cm (folded)

Art. N° 420 212

Number set for „SCORER“
Art.-N° 420 217

DONIC scoreboard MATCH

Functional scoreboard can be displayed in its storing carton. Numbers 0 – 21. Sets 0 – 5. Time out cards. Measurements: 36 x 3 x 23 cm (folded)

Art.-N° 420 213

DONIC Ball basket

Coated metal construction for at least 120 balls. Attaches easily to the table. Ideal for multi-ball training.

Art.-N° 420 263

Delivery without balls

DONIC ball collector BALLBOX

The balls can be easily collected through the latticed bottom of the bucket (also suitable for golf balls). Just push the bucket on the balls.

Art.-N° 420 265

DONIC Matchscorer

for team events, made of PVC with numbers from 0-9 (Home/Guest).

Art.-N° 420 235

TOWEL BOX

Made of strong quality cardboard. Special design for easy folding and unfolding.

Measurements: 80 x 40 x 40 cm

Art.-N° 420 262

Delivery without towel

DONIC SURROUNDS

Epoxy lacquered metal frame, surround cover in green or blue colour, with DONIC printing.

Measurements for single barrier:

length approx. 2.33 m, height 70 cm

Available with DONIC Logo

Art.-N° 420 249

or

without advertising

Art.-N° 420 2449

DONIC umpire table

Can be folded, with handle. Weight: 15 kg

Art.-N° 420 221

The surrounds are well constructed, light but durable. They can be folded and unfolded very quickly.

ROBO-PONG 540®

ANALOGUE

Accessories see next page!

A MODULAR SYSTEM !!!

Starting with a simple robot for leisure players or kids to sophisticated training machines for top players – select the robot suiting you best with the option to up-grade according your needs and your progressing playing skills.

Step 1: DONIC-NEWGY ROBO-PONG 540

Basic model for the first steps in your work with a robot. The affordable solution for hobby players and beginners. With reduced ball frequency as well as reduced spin/speed for the learning of the basic shots. The robot can be placed all over the table. The frequency of the ball and the spin/speed can be adjusted continuously. The integrated bucket contains up to 100 balls. (Without ball catch net, the ball recycling needs to be done manually.)

ROBO-PONG 540 Package includes:

- Ball thrower (No oscillation)
- Ball bucket
- Mini control box
- Cable clip
- Transformer
- Connector cable
- Owner's manual

Art.-Nr° 420 284

ROBO-PONG 1050®

DIGITAL

(delivered without balls)

Accessories see next page!

Step 2: DONIC-NEWGY ROBO-PONG 1050

The affordable alternative to Robo-Pong 2050. Identical in every way except it doesn't have the Recycling Net System. Purchase the inexpensive Ball Catch Net separately for ball capture and manual recycling. Or later on, upgrade to full 2050 capabilities with the Recycling Net Upgrade Kit.

1050's Ball Bucket holds 200 balls for several minutes of non-stop-play. Position robot anywhere on top of the table or mount it in our optional Robo-Caddy to get the variety of angles and trajectories. Robosystem adapted to the plastic balls.

Technical specifications:

	Robo-Pong 1050
Recycling Net	No
Ball Bucket	Yes (holds 200 balls)
Oscillator Positions	21
Head Angle Adjustments	1 – 13
Speed Range	0 – 30
Factory Drills	64
PC Mode (connect to a PC)	Yes
Balls per Minute	1 – 170
Ball Speed	<10 – 120 km/h
Weight (net):	4,5 kg
Shot Selection	Topspin, Backspin, Sidespin, counter, Push, Serve, Lob

Art.-N°. 420 273

Ball Catch Net This well priced product enables easy ball collection when used with the ROBO-PONG 540 and 1050 and in conjunction with serve and multiball practice. Placed at the end and sides of the table it will retrieve almost all balls used in practice. Balls are fed to an exit and will accumulate in a collection box or bucket (not supplied), enabling fast refilling of balls into robot. Collapsible for compact storage the "Catch Net" quickly attaches and removes from table. Colour: black, Art.-N° 420 255

In order to up-grade your ROBO-PONG 540 or 1050 we offer modules that can be mounted very easily:

Upgrade Kit 540 to 1040:

Up-grades your ROBO-PONG 540 to the 1040 machine (analogue model). It contains a more powerful control box including the oscillator function as well as a ball basket.

Art.-Nr° 420 286

Recycling Net Upgrade Kit 1050 to 2050:

Up-grades your ROBO-PONG 1050 to the 2050 machine. It contains the complete ball recycling system with ball catch net and ball collecting trays. With instructional DVD.

Art.-N° 420 277

Digital Upgrade Kit (whitout pic.)

Transforms your analogue Robo-Pong 2040 or 2000 to a digital Robo-Pong 2050. This upgrade kit consists of a 2050 robot body, digital control box and bracket, universal power supply, shielded connector cable, and 2050 Owner's Manual. Cost effective way to bring your older Robo-Pong into the digital

Art.-N°. 420 279

Step 3: DONIC-NEWGY ROBO-PONG 2050 The digital model for competition players and for clubs.

ROBO-PONG
2050®
DIGITAL

- * Robosystem adapted to the plastic balls.
- * it requires only a few minutes to assemble and dismantle.
- * all replacement parts obtainable in the Service Centre

**Always there for you:
Your own personal training partner.
Performance enhanced and now even more versatile.**

Robo-Pong goes digital.

DONIC highly recommends its clever Digital Table Tennis Trainer Robo-Pong 2050 for your every requirement. Digital control provides exact control over speed, delivery and precise placement. The Robo-Pong 2050 in normal mode offers simple manual control over all functions such as speed, spin, placement and delivery between strokes. During training one is able to access 64 exercises and practise like a professional. The cell-phone-like menu system is extremely easy to operate and is available in 6 languages. It is possible to create and store your own exercises when hooked up to your Windows PC.

The perfect partner for all skill levels.

The top player can practice on his foot work and stamina, improve his timing and strokes for more speed and placement.

The up and coming player will be able to fine-tune all the important strokes. Advancement in footwork and stamina will come at a much faster pace.

The beginner and hobby player can learn ball control, coordination and most principal shots. One can set up your own training programme by using the 64 drill variations and enjoy the fun with this amazing table tennis partner.

Art.-Nr° 420 272

The Robot Head:

Can deliver up to 170 balls per minute with a maximum speed of 120 km/h. It can be programmed for topspin, counter hitting, side and backspin. Precise ball placement is achieved with 21 oscillating positions and 30 different speeds.

Digital Control Box:

64 chosen exercises which can be programmed for every playing standard (described in the handbook). You may choose ball speed, interval and placement. Windows Computer suitable for your own set exercises. Set-up and instruction handbook.

Ball collection net system

The surrounding net is simply and quickly assembled and taken down. It collects the balls and guides them back to the robot, enabling training to be continued.

Technical specifications:

Technical specifications:	Robo-Pong 2050
Recycling Net	Yes
Ball Bucket	No
Oscillator Positions	21
Head Angle Adjustments	1 – 13
Speed Range	0 – 30
Factory Drills	64
PC Mode (connect to a PC)	Yes
Balls per Minute	1 – 170
Ball Speed	<10 – 120 km/h
Weight (net):	only 8 kg
Shot Selection	Topspin, Backspin, Sidespin, counter, Push, Serve, Lob

THE ACCESSORIES

ROBO-TOTE-BAG

The ROBO PONG 2050 can be folded up including the net and securely placed into the strong ROBO TOTE-BAG. With the soft carry ROBO-TOTE, the robot can be transported safely to any destination and be set up again to play in minutes.
Size: approx. 85x30x36 cm

Art.n° 420 252

PONG-MASTER

Three targets count your hits electronically and record your points on a display. So you have exciting and challenging games for any age or skill level. It is healthy and a terrific aerobic exercise for the whole family. Especially interesting for side events during tournaments, for exhibitions and for all kind of competitions. Complete set (LED-display, three electronic targets, adapter, cable)

Art.-No. 420 281

Robo-Caddy

Useful accessory which fits all Robo-Pong models. Robo-Caddy gives added versatility to Robo-Pong robots. Easily control the robot's height from the floor, distance from the table, and angle to the table. Provides remarkable simulation of away-from-table shots like loops, lobs, and chops. Robo-Caddy also makes an excellent ball holder for serve practice or multi-ball training.

FORMULA DONIC

bluefire

DONIC's BLUEFIRE Series introduces a completely new rubber technology, ensuring an explosive performance.

The **BLUEFIRE M-Series** perfectly combines a large-pored blue sponge with an extremely spinny top surface. This adds a new Hi-Tech rubber generation to the proven FORMULA DONIC FD3 technology. The top surface rubber with its slender, long pimpled structure, gives Bluefire M rubbers the best possible flexibility and a sensational feel.

Japanese rubber sheet modalities have been incorporated in the latest production of the **BLUEFIRE JP Series**.

This new type of pimpled rubber with the well-known dynamic blue sponge but with somewhat finer pored structure, guarantees this rubber series excellent feel, maximum speed and an optimum high arc of the ball.

In comparison to the M-Series, this rubber is tauter and has greater grip. Despite this the elastic top surface provides a lot of spin and the ball stays on the bat longer, achieving outstanding control when top-spinning.

The CATAPULT-oriented series

DONIC BLUEFIRE

The BLUEFIRE's main characteristics are its unbelievable dynamic and high arc when top-spinning. This results in maximum rotation and further increased catapult effect.

FD 3 – FORMULA DONIC 3rd generation

No more speed gluing. No tuning, no juggling. The era of modern table tennis has started. More fun. Pure fun at the game. Honest victories.

The next rubber generation combines everything:

Lifetime PLUS The number of possible playing hours will be advanced by about 50%.

Catapult PLUS The catapult effect of the new large-pored sponge provides more precision when returning, even in difficult positions.

Tension PLUS Improved inner tension implies the feeling of even more "speed glue" energy.

FORMULA DONIC - 3rd Generation

	BLUEFIRE M1 Turbo	High-end version of the M1 with 50° sponge. The top surface rubber offers extra spin. For aggressive attacking players.
	BLUEFIRE JP 01 Turbo	Increased dynamic that is easily controlled. For attackers who value good control.
	BLUEFIRE M1	Direct, dynamic and extremely spinny. For top players and players who practice a lot and prefer to use harder rubbers.
	BLUEFIRE JP 01	Extremely grippy, taut, though elastic top surface rubber which stays on the blade longer. For close to the table attackers as well as for those who like to play away from the table.
	BLUEFIRE JP 02	This medium-hard open-pored sponge produces a perfect combination of spin, speed and control. Ideally suited for attackers and powerful allround players who require all these qualities in a rubber.
	BLUEFIRE M2	Excellent balance between speed, catapult effect and feel. For players who attach high importance to spin and speed with optimum feeling.
	BLUEFIRE JP 03	Extremely grippy, taut, though elastic top surface rubber combined with a softer sponge. For players who prefer outstanding feeling with maximum control.
	BLUEFIRE BIG SLAM	Extremely soft blue sponge produces more sound. Added to this is a high grade grippy and spinny top surface of the Bluefire series. This gives you even more control.
	BLUEFIRE M3	A soft rubber with attitude! For players that prefer softer rubbers with fantastic control and good speed. Highly recommended for aggressive all-round players.
