PLA

PLA = biologisch abbaubare Kunststoffe

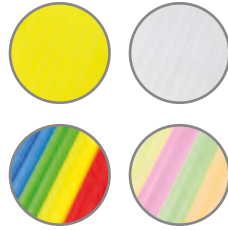

PLA-Trinkhalme sind für Kaltgetränke geeignet, da sie sich ab einer Temperatur von 40°C verformen können.

Wir empfehlen für die PLA-Trinkhalme eine Entsorgung über die „Gelbe Tonne“. Die Kompostierung ist nur in industriellen Kompostieranlagen möglich, nicht aber über den Hauskompost.

PLA = biodegradable plastics

PLA drinking straws can deform at a temperature from 40°C and up and are therefore not suitable for hot drinks.

We recommend the waste disposal via your recyclable plastic waste. A composting is only possible in industrial composting facilities, not at home.
