

# Motorola D1010 series

Digital Cordless Phone with Answer Machine

*Warning* Use only rechargeable batteries.

# Welcome...

## to your new Motorola D1011 Digital Cordless Phone!

- · All handsets fully cordless for locating anywhere within range.
- 100 Name and number phonebook.
- · Copy phonebook entries between other handsets.
- · Answer machine with 12 minutes digital recording time.
- Caller Display shows you who's calling and see details of the last 50 callers in a Calls list.<sup>1</sup>
- Register up to 5 handsets to a single base and register each handset with up to 4 different bases.
- Make internal calls, transfer external calls, hold 3-way conversation between two internal callers and an external caller.
- You must subscribe to your network provider's Caller Display or Call Waiting service for these features to work. A quarterly fee may be payable.

Please note that this equipment is not designed for making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency.

# This User Guide provides you with all the information you need to get the most from your phone.

## Before you make your first call you will need to set up your phone. Follow the simple instructions in 'Getting Started', on the next few pages.

#### IMPORTANT

Only use the telephone line cord supplied.

This equipment is not designed for making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency services.

#### Got everything?

- D1011 handset
- D1011 base
- · Quick start guide
- 2 x AAA NiMH rechargeable batteries
- Mains power adapter for the base
- · Telephone line cord

# If you have purchased a D1011 multiple pack you will also have the following additional items:

- D1011 handset & charger
- 2 x AAA NiMH rechargeable batteries
- · Mains power adaptor for the charger

# 1. Getting started

#### WARNING

Do not place your D1011 in the bathroom or other humid areas.

## Location

You need to place your D1011 base within 2 metres of the mains power socket and telephone socket so that the cables will reach.

Make sure it is at least 1 metre away from other electrical appliances to avoid interference. Your D1011 works by sending radio signals between the handset and base. The strength of the signal depends on where you place the base. Putting it as high as possible ensures the best signal.

#### HANDSET RANGE

The D1011 has a range of 300 metres outdoors when there is a clear line of sight between the base and handset. Any obstruction between the base and handset will reduce the range significantly. With the base indoors and handset either indoors or outdoors, the range will normally be up to 50 metres. Thick stone walls can severely affect the range.

## SIGNAL STRENGTH

The  $\prod_{i=1}^{n}$  icon on your handset indicates when you are in range. When out of range of the base, the screen shows SEARCHING and the  $\prod_{i=1}^{n}$  flashes.

If you are on a call, the line will hang up if the handset moves out of range of the base. Move back within in range. The handset will automatically reconnect to the base.

# Setting up

#### IMPORTANT

The base station must be plugged into the mains power at all times. Do not connect the telephone line cord into the wall socket until the handset is fully charged. Only use the power and telephone cables supplied with the product.

#### WHICH POWER ADAPTOR?

The power adaptor with a clear connector is for the base unit and the power adaptor with a red colour connector is for the charger unit.

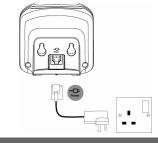

## Connecting up the base

## Connecting the handset and charger (Multi-pack only)

If you have purchased a multiple pack, this process will need to be carried out for all handsets and chargers:

 Plug the mains power cable with the red connector into the socket marked -C on the underside of the charger.

- 2. Insert the 2 x AAA NiMH batteries supplied into the handset. Then slide the compartment cover into place.
- 3. Place the handset on the charger to charge for at least 24 hours. When the handset is fully charged the Im icon will indicate that it is fully charged.
- 4. When the handset is fully charged after 24 hours, plug the telephone line cord from the large base into the telephone wall socket.

#### IMPORTANT

Warning! Use only rechargeable batteries. If non-rechargeable batteries are used WARNING BATT will be displayed and charging will be stopped. Please replace with rechargable batteries.

#### BATTERY LOW WARNING

If the Licon flashes in the display, you will need to recharge the handset before you can use it again.

During charging, the III icon will scroll in the display.

#### BATTERY PERFORMANCE

In ideal conditions, fully charged batteries should give about 10 hours talk time or 100 hours standby time on a single charge.

Note that new batteries do not reach full capacity until they have been in normal use for several days.

To keep your batteries in the best condition, leave the handset off the base for a few hours at a time.

Running the batteries right down at least once a week will help them last as long as possible.

The charge capacity of rechargeable batteries will reduce with time as they wear out, giving the handset less talk/standby time. Eventually they will need to be replaced.

After charging your handset for the first time, subsequent charging time is about 6–8 hours a day. Batteries and handset may become warm during charging. This is normal.

## Date and time

Providing you have subscribed to your network's Caller Display service, the date and time is set automatically for all handsets every time a call is received.

The date and time is recorded with each answer machine message you receive.

If you do not have a Caller Display service you can set the date and time manually.

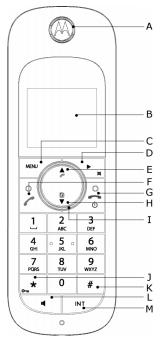

### Set date and time manually

- 1. Press and scroll to CLOCK/ALARM. Press . Display shows DATE & TIME, then press .
- 2. Enter the date using the format DD/MM e.g. 04/ 08 for 4th August.
- 3. Press and enter the time using the 24 hour format HH:MM, e.g. 14:45 for 2.45pm.
- 4. Press to confirm or  $\sqrt{2}$  to return to standby.

#### Your D1011 is now ready for use.

# 2. Getting to know your phone

## Overview of your handset

#### A Earpiece

#### **B** Display

See page 9 for an overview of the display icons.

### C Menu key

Enter the main menu. Select the option displayed on screen. Confirm menu option – 0K is displayed on screen.

#### D Redial / Scroll right / Clear / Mute

Open the redial list. Scroll to the right.

Delete characters on screen when entering names and numbers. Mute / unmute the microphone during a call. Go back to previous menu level – BACK displayed on screen.

#### E Call log / Scroll Up / Volume up

Open the calls log. Scroll up through lists and settings. Increase the earpiece volume during a call.

#### F Talk / Recall

Make or answer a call. Use recall (R) functions.

#### G End / Exit / Switch handset on/off

End a call.

L

When in a menu, go back to standby mode. Press and hold to switch handset off (when in standby) or on.

#### H Phonebook / Scroll Down / Volume down

Open the phonebook. Scroll down through lists and menus. Decrease the earpiece volume.

#### Navigator glow ring

Illuminates when the phone is in use. Flashes to indicate new event, eg. missed call.

#### J \* / Keypad lock

Press and hold to lock/unlock the keypad.

During a call, press and hold to switch from pulse dialling to tone dialling. Dial a star.

# MOTOROLA

#### K #/Ringer off/Pause

Press and hold to switch handset ringer on or off. When dialling or storing a number, press and hold to enter a pause (P). Dial a #

#### L Loudspeaker key

Activate and deactivate the loudspeaker during a call.

#### WARNING

Handsfree activation can suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

M Intercom (at least 2 handsets needed)

In standby mode, use to make an internal call.

During a call, use to transfer an external call to another handset.

## Handset display

#### A Display icons

On when the line is in use. Flashes when there is an incoming call.

Flashes when you have new voicemail messages. Off when you have no voicemail messages.

Phonebook is open.

The alarm clock has been set.

Handsfree mode.

Handset ringer is off.

Answer machine On. Off when answer machine is off. Flashes when you have new messages. Flashes fast when the memory is full

Steady when the handset is registered and within range of the base. Flashes when the handset is out of range or searching for base.

The approximate power levels of your battery are indicated as below:

Battery is almost empty. The battery icon will flash and emit a warning beep every minute during call.

#### B OK displayed

Press the key to select and validate a setting

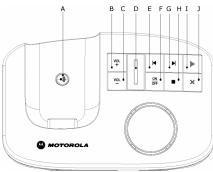

### C ▲ ▼ displayed

Press 🌢 or 🖣 to scroll through the options in a menu, to open the phonebook or calls list when in standby.

#### Back displayed

Press to go back to the previous menu option, to cancel an action or to delete a character

## Overview of the base

#### A Paging key

Paging is a useful way of finding lost handsets.

- **1.** Press (1) on the base.
  - All handsets ring.
- 2. Press (1) again to cancel the paging call or press any key on the handset to stop the paging call.
- B Volume Up
- Volume Down С

#### D LED

Indicates when the answer machine is on or off, and when you have messages.

Status	Action
On	Answer machine on.
Off	Answer machine off.
Long then short flashes	New message(s)
Flashes evenly	Recording
Flashes quickly	Memory Full

- Skip back Е
- Answer machine On/Off F
- Skip forward G
- Stop н
- Play
- Delete J

## Navigating the menus

The basic steps of navigating through the menu and on-screen options.

- **1.** From the standby screen, press The main menu is opened.
- Use the ♣ or ♥ keys to scroll through the menu.
   Soft key options 0K and BACK are displayed. Press <sup>wey</sup> to select 0K and open a sub-menu or validate an option. Press BACK and go back to previous menu level, correct a character

or cancel an action.

4. Press  $2^{-1}$  to return to standby.

If you do not press any button on the handset for 15 seconds the display will automatically return to standby. It will also return to standby when the handset is placed on the base or charger.

## Menu map

# 3. Using the phone

## Calls

## Make a call

- 1. Press
- 2. Dial the telephone number.

## Pre-dial

- 1. Enter the phone number (maximum 24 digits). If you make a mistake press 🔨 .
- **2.** Press  $\frown$  to dial the phone number entered.

## Dial one touch numbers 1 to 9

- 1. Press and hold a key from 1 to 9 until the number is displayed and dialled
  - If no number is stored, you hear a beep.

## Call from the phonebook

- Press ♥. The first entry in the phonebook is displayed.
   Scroll ▲ or ♥ to the entry you want.
- 3. Press 🔨 to dial the number

## TIP

Instead of scrolling to browse the phonebook entries, press the numeric key corresponding to the first letter of the entry you wish to locate. For example, pressing  $\begin{bmatrix} 2\\ ac \end{bmatrix}$  will show the entries starting with A. Pressing  $\begin{bmatrix} 2\\ ac \end{bmatrix}$ again will show the entries starting with B, etc...

## Call from the calls list

### NOTE

You need to subscribe to your network's Caller Line Identification service to be able to see the caller's number in the calls list. See "Calls list" on page 17 for more details.

- 1. Press & to enter CALL LOG menu. You have the options to access CALL LIST or ANSW MACHINE. Press with to enter CALL LIST. The first entry in the call list is displayed.
- 2. Scroll <sup>♠</sup> or <sup>♥</sup> to the entry you want.
- 3. Press  $\swarrow$  to dial the number.

## Answer a call

1. When the phone rings and [ flashes in the display, press \_\_\_\_\_ or press to answer the call via the loudspeaker.

## WARNING

When the phone is ringing, avoid holding the earpiece too close to your ear as it may damage your hearing. Handsfree activation can suddenly increase the volume in the earpiece to a very high level. Make sure the handset is not too close to your ear.

## NOTE

If you have subscribed to your Network's Caller Identity service and assigned a VIP Group to the caller's number, the caller's details are displayed before the phone starts ringing (see "Store an entry" on page 14 and "Group melody" on page 20). You can set your phone to give the default ringtone as soon as the call is received then once the caller's identity is displayed, the assigned ringtone will start. See "First ring" on page 20.

#### TIP

If Auto Pick up mode (see page 21) is on, simply lift up the handset from its base to answer the call. The default setting is On.

#### NOTE

An incoming call has priority over other events. Whenever there is an incoming call, other operations in progress such as phone settings, menu navigation, etc. will be ended.

#### Adjust volume

- 1. During a call, press ♠ or ♥ to adjust the earpiece or loudspeaker volume
  - The level is shown in the handset display.

#### Mute

Mute the microphone so that you can talk to someone else in the room without your caller hearing you.

- 1. During a call, press
  - The microphone is muted.
- 2. Press \_\_\_\_ again to turn the microphone back on.

#### End a call

1. Press 2.

After you hang up, the duration the phone is off-hook is displayed for 5 seconds.

#### NOTE

If auto hang-up is on (see page 21) simply replace the handset on the base to end the call. The default setting is ON.

## Switch handset on/off

- 1. Press and hold interview until the handset switches off.
- **2.** Press and hold 2 again to switch the handset back on.

## Call a second external number

Put an external caller on hold to make a second external call. You can then switch between both callers or hold a 3-way conference call.

- 1. During your call, press . Scroll to INIT 2ND CALL.
- 2. Press
  - Display shows CALLING R
- 3. Enter the second number.
- 4. When your second caller answers, press we to open the option menu:

CONFERENCE – press ref to initiate a 3-way with an external caller and internal caller.

- SWITCH CALLS press  $\square$  to switch between the two callers.
- 5. Press 2 to hang up.

## Intercom

This feature is only available when there are at least 2 registered handsets. It allows you to make internal calls, transfer external calls from one handset to another and use the conference option.

## Call another handset

- **1.** Press .
- If you have two handsets, the other handset is called automatically.

- If more than two handsets are registered to the base, their numbers are displayed, e.g. 2345\*. Enter the number of the handset you want to call or press \* to ring all handsets.
- 2. Press 2 to hang up.

NOTE

If the handset does not belong to D1000/1010 range, this function may not be available.

## Transfer an external call to another handset

- **1.** During an external call, press  $\square \blacksquare$ .
  - Your caller is put on hold.
- 2. Enter the number of the handset you want to call or press 💌 to ring all handsets.
  - If there are only two handsets, the other handset is called automatically.
- 3. When the other handset answers, announce the caller then press
  - ito transfer the call. If the other handset does not answer, press
  - $\square$  to talk to your caller again.

## Three-party conference call\_

- **1.** During an external call, press  $\square \blacksquare$ .
  - Your caller is put on hold.
- 2. Enter the number of the handset you want to call or press x to ring all handsets.
  - If there are only two handsets, the other handset is called automatically.
- 3. When the other handset answers, announce the call then press and hold <sup>INT</sup> to connect both calls. If the other handset does not answer, press <sup>INT</sup> to talk to your caller again.
- 4. Press 2 to hang up.

## Voicemail

If you have subscribed to your network's voicemail service (if available), your D1011 displays **OO** when you have a new message. Depending on your country and network services, the voicemail number may be prestored in your handset for one touch dialling using the <u>1</u> button.

#### NOTE

The voicemail number is pre-stored only if the country where the phone was purchased offers a voicemail service. If the voicemail number is not pre-stored you can add a number, or overwrite the existing stored number. See page 16.

#### Dial your network voicemail service

- 1. Press and hold 1.
  - The number is displayed and dialled. Follow the voice prompts to play, save and delete your messages.

Or

If **QD** is displayed in a call list, press to dial the network voicemail number.

NOTE

You can turn off the  $\Omega \Omega$  icon. When viewing the Calls log, press and hold  $\frac{5}{2}$ .

# 4. Phonebook

The D1011 handset phonebook can store up to 100 names and numbers.

NOTE

Numbers can be up to 24 digits long and names up to 12 characters long. Entries are stored in alphabetical order.

## View and dial phonebook entries

- 1. Press ♥. Display shows the first entry.
- 2. Scroll ♣ or ♥ to the entry you want.

Or

To search alphabetically, press  $\P$  then press the key with the first letter of the name, e.g. if the name begins with N, press  $\frac{6}{5}$  twice.

- The display shows the first entry beginning with N. If required, press
   or <sup>●</sup> to scroll to the exact entry.
- **3.** Press  $\swarrow$  to dial the entry displayed.

## Store an entry

- 1. Press . PHONEBOOK is displayed.
- 2. Press . NEW ENTRY is displayed.
- 3. Press . ENTER NAME is displayed.
- 4. Enter a name and press
- 5. Enter a number. Press Image: to save. Press ♠ or ♥ to select NO GROUP, GROUP A, B or C and press Image: to confirm.
- **6.** Press 2 to return to standby.

### NOTE

You can assign individual contacts to specific groups of your choice. For example, Group A contains phone numbers of all your co-workers. You can also assign a specific ring melody to that group (see "Group melody" on page 20). You can benefit from this feature only if you have subscribed to Caller Line Identification service from your network provider. If it is the case, every time someone from that group calls you, you will hear the designated ringtone for that group.

#### NOTE

Cancel storing an entry by pressing 2 at any time during the process.

### **Entering names**

Use the alphanumeric keypad to enter names in the phonebook.

For instance to enter the name Paul

- P Press Z once
- A Press 2 once
- U Press 🖁 twice
- L Press 5 three times

To enter a space press 1

Press  $\fbox$  to delete a character or press and hold  $\fbox$  to delete all characters.

## Character map

Use the keypad to enter names and characters.

## Enter a pause

If your D1011 is connected to a switchboard, you may need to enter a pause in a stored number. This gives the switchboard time to get an outside line. A Pause is normally stored after the switchboard access code (e.g. 9)

1. When storing a number, press and hold <u>"</u> until the display shows P. You can then continue storing the phone number.

## View an entry

In standby:

- 1. Press 9.
- Enter the first letter of the name to search alphabetically then scroll 
   or 
   <sup>₱</sup> to <u>the exact entry</u>. The name is displayed.
- 3. Press to display the number. If there are more than 12 digits, press again to see the rest of the number.
- **4.** Press 2 to return to standby.

#### During a call:

- 1. Press we twice to open the phonebook menu.
- 2. Enter the first letter of the name you want then scroll ▲ or ♥ if necessary to the exact name. Press to display the number. If there are more than 12 digits, press again to see the rest of the number.
- **3.** Press  $\angle$  to cancel the phonebook display.
- **4.** Press  $2^{-1}$  again to end the call.

## Edit an entry

- 1. Press ₹.
- 3. Edit the name and press to confirm. Use to delete characters.
- 4. Press and edit the number.

- 5. Press to confirm.
- 6. Scroll ♣ or ♥ to select NO GROUP, GROUP A, B or C and press 🔤 to confirm.
- 7. Press 2 to return to standby.

## **Delete an entry**

- 1. Press 9.
- Scroll to the entry you want to delete and press .
   Scroll ♥ to DELETE ENTRY and press .
- 4. Display shows CONFIRM? Press
- **5.** Press  $\angle \exists$  to return to standby.

## **Delete all entries**

- 1. Press with twice.
- 2. Scroll <sup>♥</sup> to DELETE ALL and press <sup>Men</sup>
- 3. Display shows CONFIRM?. Press
- **4.** Press 2 to return to standby.

## Copy phonebook to another handset

- 1. Press with twice.
- 2. Scroll <sup>♥</sup> to PB TRANSFER and press <sup>▶</sup>
- 3. Scroll 🌢 or 🖣 to the number of the handset you want the phonebook copied to. Press

## On the receiving handset:

- 1. TRANS. FROM: HANDSET X (where X is the handset number of the sending handset) is displayed.
  - Press to start the copying process.
- 2. When DONE! is displayed on both handsets, press  $2^{-1}$  to return to standby.

#### NOTE

If an entry with the same name and number is already stored in the receiving handset, it will not be copied across.

## One touch keys

The keys 1 to 9 enable one touch dialling of entries stored in the phonebook.

## Dial a one touch number

- **1.** Press and hold a number key 1 to  $\frac{9}{12}$ .
  - The number is displayed and dialled.
- **2.** Press  $\angle$  to cancel the dialling and return to standby.

## Store a phonebook entry as a one touch number

- 1. Press wice.
- 3. Press 🌢 or 🖣 to select KEY 1 9 and press 🔤 . The current entry, if any, is displayed.
- **4.** Press again to open the options menu.
- 5. Press to ADD an entry from the phonebook.
- 6. Scroll ♠ or ♥ to the entry you want. Press 🔤 to confirm or ∠∋ to return to standby.

## Delete a one touch number

- 1. Press <sup>™</sup> twice then scroll <sup>♠</sup> or <sup>♥</sup> to DIRECT MEM and press <sup>™</sup>.
- 2. Scroll or ♥ to select KEY 1-9.
- 3. Press we to display the current entry. Press again to open the options menu.

- 6. Press  $\angle$  to return to standby.

## 5. Caller display and Calls list

If you have subscribed to Caller Line Identification (CLI), and provided the identity of the caller is not withheld, the number of the caller will be displayed together with the date and time of the call (if provided by the network).

#### NOTE

- If the caller's number is stored in your phonebook along with a name, the name will also be displayed.
- If the telephone number is not available for incoming calls, the handset will display UNAVAILABLE.
- Information about incoming calls will vary by country and network operator. Some operators may charge a subscription for their Caller Line Identification service.

## Calls list

The calls list contains details of missed and received call. Details include the date and time of the call. Entries are displayed in chronological order with the most recent call at the top of the list.

#### NOTE

- · When the calls list is full, a new call replaces the oldest in the list.
- The received and missed calls log holds details of up to 50 calls.
- If you receive more than one call from the same number, only the most recent call is kept in the calls list.

When you have missed calls (incoming calls that you haven't answered) the  $\{ {\bf x} \}$  icon will be displayed in the display on all handsets registered to the base.

If one handset is used to view the calls log, the icon on the other handsets continue to flash (Multipack user only).

#### View the calls list

- 1. Press & to enter CALL LOG option menu, then press 🔤 to enter CALL LIST.
  - The most recent number or name if stored in the phonebook is displayed. New calls are marked with **(R** icon flashing.

 Scroll <sup>♠</sup> or <sup>♥</sup> through the calls log. At the end of the log, you will hear a beep.

Press to see the number. If the number has more than 12 digits, press to see the rest of the number.

**3.** Press 2 to return to standby.

#### NOTE

The ( icon stops flashing once all new calls have been viewed.

#### Dial from the calls list

- 2. Scroll 🚖 or 🛡 to the entry you want.
- 3. Press  $\checkmark$  or  $\checkmark$  to dial.

#### Save a number from the calls list to the phonebook

- **1.** Press **b** then **b**. The most recent call is displayed.
- 2. Scroll <u>or</u> to the number you want.
- 3. Press . SAVE NUMBER is displayed.
- 4. Press . ENTER NAME is displayed. Use the keypad to enter the name.
- 5. Press then the number is displayed, the user can then edit the number if required and must press to save the number (even if has not been edited).
- 7. Press to confirm.
- **8.** Press 2 to return to standby.

## **Room Monitor**

- 1. Switch a handset's room monitor mode setting On and place that handset in the room
- **2.** At a second handset, press  $\square \square$  and enter the number of the handset you are using as a room monitor. You can now hear sounds coming from the room.

#### TIP

To stop room monitoring at any time, press 2.

#### WARNING

This product is not intended for use as a baby safety device and is not a substitute for adult supervision.

## Backlight on/off

- Press , scroll to PERSONAL SET and press .
   Scroll to BACKLIGHT. Press .
- 3. Press ♠ or ♥ to select ON or OFF.
- 4. Press to confirm.

## Keypad lock

Prevent accidental dialling while carrying the handset by locking the keypad.

- 1. Press and hold .\*
  - The display shows KEYS LOCKED.
- 2. To unlock the handset, press and hold 🖃 again.

#### NOTE

While the keypad is locked, you can answer incoming calls as normal.

MOTOROLA

# 8. Advanced settings

This setting is useful to access certain network and PABX/switchboard services

## Recall time

The default D1011 recall time is suitable for your country and network operator. It is unlikely that you should need to change this setting unless advised to do so.

- 1. Press <sup>™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 2. RECALL TIME is displayed. Press
- 3. Press 🌢 or 🖣 to select the setting you want: SHORT, MEDIUM, LONG.
- 4. Press to confirm.
- **5.** Press  $\angle =$  to return to standby.

#### NOTE

The use of your D1011 cannot be guaranteed on all PABX.

## Dial mode

The default D1011 dialling mode is suitable for your country and network operator. It is unlikely that you should need to change this setting unless advised to do so.

- 1. Press <sup>™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 2. Scroll V to DIAL MODE Press
- 3. Press ♠ or ♥ to select TONE or PULSE.
- 4. Press to confirm.
- 5. Press 2 to return to standby.

## Temporarily switch from Pulse to Tone dialling

1. Press and hold .\*

The dial mode will change from Pulse to Tone for the duration of the call.

## Call barring

Prevent certain numbers from being dialled from your D1011. Store up to four specific numbers, each up to 4 digits - for example, international or local prefixes.

Bypass call barring by switching the setting Off or On.

### NOTE

If you switch Call barring on, BARR MODE ON will be displayed on your screen in standby mode.

## Switch call barring on/off

- 1. Press <sup>™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 3. Enter the master PIN (default setting 0000) and press
- MODE is displayed. Press .
   Press ▲ or ♥ to select 0N or 0FF. Press .
- 6. Press 2 to return to standby. You can now set the number (See below).

## Set a number to be barred

- 1. Press <sup>™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 2. Scroll ♥ to CALL BARRING. Press
- 3. Enter the master PIN (default setting 0000) and press
- 4. Scroll <sup>♥</sup> to NUMBER. Press .....
- 5. If necessary, scroll ♣ or ♥ to the next available slot.
- 6. Press *and* enter the number or prefix you want to bar. Press MENU

to confirm.

7. Press 2 to return to standby.

## Easv call

When activated, this feature allows you to dial a number by pressing any key on your handset (except 2). This feature is very useful for access to emergency services.

## Switch easy call on/off

- 1. Press <sup>™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 2. Scroll ♥ to EASY CALL. Press .
- Press to confirm
- 5. Press 2 to return to standby.

#### NOTE

If you switch Easy call on, EASY CALL ON will be displayed on your screen in standby mode.

To switch Easy call off again:

1. Press  $\angle$ .

2. OFF? is displayed. Press to confirm.

#### Set the easy call number

- Press , scroll to ADVANCED SET and press .
   Scroll to EASY CALL. Press .
- 3. Enter the master PIN (Default setting 0000) and press
- 4. Scroll ♥ to NUMBER Press
- 5. Enter the number. Press we to confirm
- 6. Press 2 to return to standby.

#### Dial an easy number

When an easy call number has been stored and the easy call setting switched on, press any key (apart from 2), to dial a number.

#### NOTE

When easy call is switched on, you can still answer any incoming call as normal

## Registration

Up to 5 handsets can be registered to one base station. Additional handsets must be registered to the base before you can use them.

- The instructions described below apply specifically to your D1011 handset. If you wish to register another manufacturer's handset, the instructions may vary. In this case, please refer to the manufacturer of the additional handset
- · The Master PIN is required before you can register or unregister handsets The default PIN is 0000

## Register a handset

At the base:

1. Press and hold the 
<sup>(1)</sup> button on the base station for at least 3 seconds. The base station emits a beep when it is ready to accept registration. You have 90 seconds in which to register a handset.

#### At the handset

- 1. Press <sup>™</sup> and scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 3. If necessary, scroll ♠ or ♥ to display REGIST, BASE and press ..... BASE 1 2 3 4 is displayed and the registered base number is flashing. Enter the number of the base on which you wish to register your handset

If you have only 1 base station, press 1. If you have 2 base stations, press  $\begin{bmatrix} 1 \\ - \end{bmatrix}$  or  $\begin{bmatrix} 2 \\ - \end{bmatrix}$ , etc.

- 4. When the display shows PIN----, enter the base PIN.
  - When the handset registers with the base, it is assigned a handset number.

## Select a base

You can register your D1011 handset with up to 4 bases. Once registered, you can switch between bases, for example, bases at home and at work.

- **1.** Press <sup>™</sup> and scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- 2. Scroll ♥ to REGISTRATION and press .....
- 3. SELECT BASE is displayed. Press
  - The available bases are displayed with the current base number flashing.
- 4. Enter the number of the base you want 1,2,3 or 4 and press
  - When the base is found you hear a beep. If not found, the display shows UNREGISTERED.

## Unregister a handset

- Press and scroll to ADVANCED SET and press .
   Scroll to UNREGISTER and press .

- 3. Enter the 4 digit master PIN and press
  - Display shows the registered handset numbers.
- 4. Scroll ♣ or ♥ to select the handset you want to delete and press MENU
  - UNREGISTERED is displayed on the handset screen.

## PIN

The 4-digit master PIN is used when registering or unregistering a handset and when changing some settings on your D1011. The default setting is 0000. You can change this PIN for more security.

- Press . scroll to ADVANCED SET and press .
   Scroll to PIN. Press .
- 3. Enter the current 4 digit master PIN and press . (Default setting 0000).
- 4. Enter the new PIN and press

#### NOTE

Make a note of your PIN. If you forget your PIN you will need to reset your product.

## Reset

This will reset your D1011 to its default settings.

- Press <sup>mer</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>mer</sup>.
   Scroll <sup>♥</sup> to RESET UNIT. Press <sup>mer</sup>.
- 3. CONFIRM? is displayed. Press

#### NOTE

Entries stored in the phonebook and new answer machine messages are retained

MOTOROLA

## Auto prefix

You can set the D1011 to detect a dialling number and replace it with another number. The number to be detected can be up to 5 digits long. It can be replaced with a number up to 10 digits.

- Press . scroll to ADVANCED SET and press .
   Scroll to PREFIX. Press .
- 3. DETECT DIGIT is displayed. Press
- 4. Enter the number you want to be detected and press
- 5. Scroll to PREFIX NUM. and press
- 6. Enter the number you want it replaced with and press
- 7. Press 2 to return to standby.

## Country

If you move to another country you can set your phone to be compatible with the network settings of that country.

Depending on your country, this option may be displayed as NOT AVAIL or you country may not be displayed.

- Press manual states of the ADVANCED SET and press manual states.
   Scroll to SEL. COUNTRY. Press manual states of the SEL.
- 3. Enter the 4-digit master PIN and press
- Scroll or to display the required country.
   Press to confirm.

## Intrusion

When an external call is taking place, another handset registered to the base can join in, making the call a 3-way conference, just by pressing 1

To enable this. Intrusion must be switched On.

- Press <sup>™™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™™</sup>.
   Scroll <sup>♥</sup> to INTRUSION. Press <sup>™™</sup>.
- 3. Scroll ♣ or ♥ to ON or OFF.
- 4. Press to confirm.
- 5. Press 2 to return to standby.

## ECO mode

To reduce the level of power emissions, you can select low power or ECO mode. When the ECO mode is set to 0N, the base transmission power will be reduced

To turn ECO Mode to 0N or 0FF:

- 1. Press <sup>™</sup>, scroll <sup>♥</sup> to ADVANCED SET and press <sup>™</sup>.
- Scroll ♥ to ECO MODE and press ♥♥♥.
   Press ♣ or ♥ to highlight 0N or 0FF then press ♥♥♥♥ to confirm.
  - A confirmation beep is emitted and the handset display will switch between the handset's name and ECO MODE.

#### NOTE

When Eco Mode is set to 0N, the handset range will be reduced.

MOTOROLA

# 9. Using your Answer machine

Your D1011 answer machine records unanswered calls when it is activated. It can store up to 59 messages within the maximum recording time of 12 minutes. Each message can be up to 3 minutes long. Your personal outgoing messages can be up to 1 minute long.

## D1011 Base Answer Machine Control Keys

1		
	ON	
	OFF	

►

M

х

VOL

Press to turn the answer machine on/off

- Play new messages
- Press to stop playback
- M Skip to the next message during message playback

- DELETE press . The pre-recorded message will be automatically reinstated.
- 5. Press to confirm.

## Answer machine settings

#### Ring delay

Select the duration of rings before your answer machine picks up the call. Choose from 5/10/15/20/25/30 seconds or Toll Saver

#### NOTE

If Toll Saver is selected, then:

- If you have new messages your phone answers after 10 seconds.
- · If there are no new messages it will answer after 20 seconds. So you have the option to hang up, saving the time and cost of a call.
- If the memory is full, it will answer after 30 seconds in Answer Only mode.
- 1. Press <sup>™</sup> scroll <sup>♠</sup> or <sup>♥</sup> to ANSW MACHINE and press <sup>™</sup>.
- 2. Scroll ♥ to ANSW SETTINGS and press .....
- 3. RING DELAY is displayed. Press
- 4. Scroll ♣ or ♥ to select 5/10/15/20/25/30 seconds or TOLL SAVER.
- 5. Press to confirm.

## Remote access

Remote access allows you to operate your answer machine and listen to your messages by calling your D1011 from another phone.

The default setting is on.

- 1. Call your D1011. When you hear your outgoing message, press #.
- 2. Enter your 4 digit PIN. The default code is 0000.
  - You hear a confirmation beep.

#### NOTE

Change this code for increased security, see "PIN" on page 24.

3. After entering your PIN as stated above, use the keypad to operate your D1011 answer machine:

Play messages	2
Play previous message	1
Play next message	3
Delete message playing	6
Switch answer machine on	7
Stop playback	8
Switch answer machine off	9

## Remote Access on/off

- Press www, scroll ♥ to ANSW MACHINE and press www.
   Scroll ♥ to ANSW SETTINGS and press www.
- 3. Scroll <sup>♥</sup> to REMOTE ACC and press <sup>▶</sup>
- 4. Scroll ♣ or ♥ to select ACTIVATED or DEACTIVATED.
- 5. Press to confirm.

## Call screening

Use your handset or base speaker to hear a caller leaving a message. You can then choose to ignore the caller or pick up the call.

The default settings are:

- Handset call screening: Off
- · Base call screening: On.

#### At the handset:

1. If you want to interrupt and take the call press  $\checkmark$  or  $\checkmark$ 

At the base:

- 1. When a caller is leaving a message, press 🔄 or 🖻 to adjust the volume to listen to your caller.
- 2. To interrupt and take the call on the handset, press  $\nvdash$  or  $\frown$ .

## Switch handset call screening on/off

- 1. Press <sup>™</sup>, scroll <sup>♠</sup> or <sup>♥</sup> to ANSW MACHINE and press <sup>™</sup>.
- 2. Scroll ♥ to ANSW SETTINGS and press .....
- 3. Scroll to H\$ SCREENING and press
- 4. Scroll ♣ or ♥ to select ON or OFF.
- 5. Press to confirm

## Switch base station call screening on/off

- 1. Press w, scroll to ANSW MACHINE and press w.
- 2. Scroll ♥ to ANSW SETTINGS and press \_\_\_\_\_
- 4. Press ♣ or ♥ to select 0N or 0FF.
- 5. Press to confirm.

## **Answer Machine language**

You can change the language of the pre-recorded outgoing messages.

- 1. Press . Scroll ♣ or ♥ to ANSW MACHINE and press .
- 3. Scroll to TAM LANGUAGE and press
- 4. Scroll <u>▲ or</u> to select the language.
- 5. Press to confirm.

## Access answer machine menu via the Calls list

When the E is flashing to indicate new messages you can see caller details via ♣ or press ♥ again to go to ANSW MACHINE to play new messages.

- 1. Press 🌢, CALL LIST is displayed.
- 2. Press ♥, ANSW MACHINE is displayed.

MOTOROLA

- 3. Press <u>, PLAY</u> is displayed.
- 4. Press *mathing*, the handset will start the new message playback. Once all messages are played, the handset will return to standby.

#### NOTE

During message playback, press  $2^{-1}$  anytime to return to standby.

## **Memory full**

The memory is full if there is less than 15 seconds of recording time left or if the maximum total of 59 messages has been reached.

When the memory becomes full:

- The LED will flash quickly.
- Hashes quickly on the handset display.
- The machine will automatically switch to Answer Only mode.

If the memory becomes full while a caller is leaving a message, they will hear a beep and the call is ended.

- · Maximum number of 5 handsets has been reached.
- The display shows SEARCHING. You must unregister a handset in order to register a new one.

## Interference

#### Noise interference on your radio or television

Your base or charger may be too close. Move it as far away as possible.

## Answer machine

#### Answer machine does not record messages

- Switch the answer machine on.
- The memory may be full. If so, you will need to delete some messages.
- Answer mode may be set to ANSWER ONLY. Change the mode to ANSWER & REC.

### Cannot access messages remotely

- · Remote access may be switched off.
- If wrong PIN is entered a beep is played. You can enter the PIN once again.

#### Cannot record outgoing message

 The memory may be full. If so, you will need to delete some messages.

#### Answer machine stops automatically

- The memory may be full. If so, you will need to delete some messages.
- The maximum message length is 3 minutes.

# 11. General information

#### IMPORTANT

This equipment is not designed for making emergency telephone call when the power fails. Alternative arrangements should be made for access to emergency services.

This product is intended for connection to analogue public switched telephone networks and private switchboards in United Kingdom.

# Safety and Electromagnetic Interference/Compatibility information

- Only use the power supply suitable for this product range. Using an unauthorised power supply will invalidate your guarantee and may damage the telephone.
- · Use only the approved rechargeable batteries supplied.
- Do not open the handset (except to replace the handset batteries) or the base. This could expose you to high voltages or other risks.
- Radio signal transmitted between the handset and base may cause interference to hearing aids.
- Your product may interfere with other electrical equipment, e.g. TV and radio sets, clock/alarms and computers if placed too close. It is recommended that you place your product at least one metre away from such appliances to minimise any risk of interference.
- All batteries can cause property damage and/or bodily injury such as burns if a conductive material such as jewellery, keys, or beaded chains touch exposed terminals. The conductive material may complete an electrical circuit (short circuit) and become quite hot. Exercise care in handling any charged battery, particularly when placing it inside a pocket, purse, or other container with metal objects.
- Never dispose of batteries in a fire. There is a serious risk of explosion and/or the release of highly toxic chemicals.
- It is recommended that advice from a qualified expert be sought before using this product in the vicinity of emergency/intensive care medical equipment.

#### Medical Devices

• **Pacemakers:** The Advanced Medical Technology Association (AdvaMed) recommends that a minimum separation of 15 cms (6 inches) be maintained between a handheld wireless device and a pacemaker. These recommendations are consistent with those of the U.S. Food and Drug Administration.

#### Persons with pacemakers should:

- ALWAYS keep the handheld wireless device more than 15 cms from their pacemaker when the handheld wireless device is turned ON.

- Not carry the handheld wireless device in the breast pocket.

- Use the ear opposite the pacemaker to minimize the potential for interference.

- Turn the handheld wireless device OFF immediately if you have any reason to suspect that interference is taking place.

#### Hearing Aids

Some digital wireless radios may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

#### Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information.

## Cleaning

- Clean the handset and base (or charger) with a damp (not wet) cloth, or an anti-static wipe.
- Never use household polish as this will damage the product. Never use a dry cloth as this may cause a static shock.

### Environmental

- · Do not expose to direct sunlight.
- The handset may become warm when the batteries are being charged or during prolonged periods of use. This is normal. However, we recommend that to avoid damage you do not place the product on antique/veneered wood.

- Do not stand your product on carpets or other surfaces which generate fibres, or place it in locations preventing the free flow of air over its surfaces.
- Do not submerge any part of your product in water and do not use it in damp or humid conditions, such as bathrooms.
- Do not expose your product to fire, explosive or other hazardous conditions.
- There is a slight chance your phone could be damaged by an electrical storm. We recommend that you unplug the power and telephone line cord during an electrical storm.

## **Product disposal instructions**

#### • European Union (EU) Waste of Electrical and Electronic Equipment (WEEE) directive

The European Union's WEEE directive requires that products sold into EU countries must have the crossed out trashbin label on the product (or the package in some cases). As defined by the WEEE directive, this crossed-out trashbin label means that customers and end-users in EU countries should not dispose of electronic and electrical equipment or accessories in household waste. Customers or end-users in EU countries should contact their local equipment supplier representative or service centre for information about the waste collection system in their country.

 The Waste of Electrical and Electronic Equipment (WEEE) Directive (2002/96/EC) has been put in place to recycle products using best available recovery and recycling techniques to minimize the impact on the environment, treat any hazardous substances and avoid the increasing landfill.

#### Product disposal instructions for residential users

When you have no further use for it, please remove any batteries and dispose of them and the product per your local authority's recycling processes. For more information please contact your local authority or the retailer where the product was purchased.

#### Product disposal instructions for business users

Business users should contact their suppliers and check the terms and conditions of the purchase contract and ensure that this product is not mixed with other commercial waste for disposal.

## Warranty Information

The authorized Motorola dealer or retailer where you purchased your Motorola product will honour a warranty claim and/or provide warranty service.

Please return your cordless telephone to your dealer or retailer to claim your warranty service. Do not return your telephone to Motorola. In order to be eligible to receive warranty service, you must present your receipt of purchase or a comparable substitute proof of purchase bearing the date of purchase. The telephone should also clearly display the serial number. The warranty will not apply if the type or serial numbers on the product have been altered, deleted, removed, or made illegible.

## What Is Not Covered By The Warranty

- Defects or damage resulting from use of the Product in other than its normal and customary manner or by not following the instructions in this user manual.
- · Defects or damage from misuse, accident or neglect.
- Defects of damage from improper testing, operation, maintenance, adjustment, or any alteration or modification of any kind.
- Breakage or damage to aerials unless caused directly by defects in material or workmanship.
- Products disassembled or repaired in such a manner as to adversely affect performance or prevent adequate inspection and testing to verify any warranty claim.
- Defects or damage due to range.
- · Defects or damage due to moisture, liquid or spills.
- All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal use.
- · Products rented on a temporary basis.
- Periodic maintenance and repair or replacement of parts due to normal usage, wear and tear.

# **Technical Information**

#### How many telephones can I have?

All items of telephone equipment have a Ringer Equivalence Number (REN), which is used to calculate the number of items which may be connected to any one telephone line. Your D1011 has a REN of 1. A total REN of 4 is allowed. If the total REN of 4 is exceeded, the telephones may not ring. With different telephone types there is no guarantee of ringing, even when the REN is less than 4.

Any additional handsets and chargers that you register have a REN of 0.

## R&TTE

This product is intended for use within United Kingdom for connection to the public telephone network and compatible switchboards.

This equipment complies with the essential requirements for the Radio Equipment and Telecommunications Terminal Equipment Directive 1999/5/EC including compliance with ICNIRP standard for electromagnetic energy exposure.

## **Declaration of Conformance**

Motorola hereby declares that this product is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

The Declaration of Conformance for this product range is published on the website:

http://www.motorola.com/eu/radios/technicaldocumentation

## Connecting to a switchboard

This product is intended for use within United Kingdom for connection to the public telephone network.

## Inserting a pause

With some switchboards, after dialling the access code you may have to wait for a moment while the switchboard picks up an outside line so you will need to enter a pause in the dialing sequence.

Press and hold *t* to insert a pause (P) before entering the telephone number.

You may also need to enter a pause when storing international numbers or charge card numbers.

#### Recall

You may need to use the recall function if you are connected to a switchboard/PABX (Private Automatic Branch Exchange), contact your PABX supplier for further information.

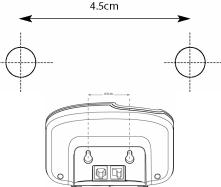

# 12. Wall mounting

#### IMPORTANT

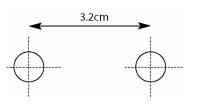

Before you wall-mount your D1011, check that you are not drilling into any hidden wiring or pipes.

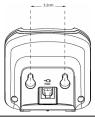

Before you drill, make sure the power and telephone line cables will reach the sockets.

- 1. Use the following templates to mark the drilling locations.
- To wall-mount the base, drill two holes in the wall 4.5cm apart horizontally using an 8mm drill bit.

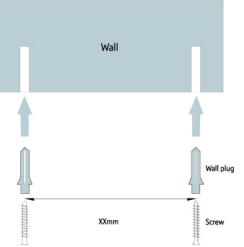

• To wall-mount the charger, drill two holes in the wall 3.2cm apart horizontally using an 8mm drill bit.

2. Insert the wall plugs if necessary, then insert the screws leaving about 5mm protruding from the wall on which to hang the phone.

3. Pull the base/charger out of the stand and slot the holes on the back of the base over the screw heads and gently pull the base/charger down to make sure it is securely in place.
