AUSTRALIAN MADE

Century batteries are designed and manufactured in Australia to better suit our unique environment. Substantial design enhancements and specialist hard-wearing components deliver what motorists and vehicle owners really want from their battery – longer life and reliability.

Australian conditions create havoc for batteries, attacking critical internal components which can lead to early battery failure.

Unlike some imported batteries designed for softer overseas climates, Century batteries are designed and built here in Australia for local conditions. Incorporating substantial technical enhancements and advanced design features, Century batteries deliver what Australian motorists really want – longer life and superior performance.

THE CENTURY ADVANTAGE

- 1 **Hybrid Plate Group**
Improves strength, reduces plate growth and enhances battery life.
- 2 **Radial Grid Design**
Lower electrical resistance for higher starting power and faster recharge.
- 3 **Longer Life Plates**
Thicker cast construction and paste coating of the positive grid to increase battery life.
- 4 **Centre Lug**
Central position for improved current flow and vibration resistance.
- 5 **Superior Plate Separation**
Advanced envelope separator material providing increased puncture resistance and protection from short circuit.

- 6 **Built-in Water Indicator**
On-the-spot diagnosis of the batteries state of charge.
- 7 **Hinged Vent Cover**
Easy access for maintenance to maximise battery life.
- 8 **Mud Rack Design**
Specialist support racks for plates, minimises short circuit and vibration.

Century Batteries - *Quality guaranteed*

Century batteries are manufactured using processes conforming to TS16949 - the nation's leading Automotive Manufacturing quality assurance accreditation.

Quality Guaranteed

WHY DO BATTERIES FAIL?

Batteries have a finite life, determined by the application and the operating conditions. Battery failure can be attributed to various factors, however the causes of failure fall under two distinct categories: manufacturing and non-manufacturing faults.

MANUFACTURING FAULTS

Typically occur within the first 3 months

- Short Circuits/Dead Cells**
Where one cell will show a dramatically lower Specific Gravity (SG) reading than the other cells.
- Internal Break**
Usually resulting from physical damage to a battery during transportation.

Century's stringent quality assurance and inspection processes demanded by leading vehicle manufacturers ensures genuine manufacturing faults in Century Batteries are negligible.

NON MANUFACTURING FAULTS

These fall outside of Century's strict quality control systems and are more likely to occur the longer the battery is in service. They are often attributed to a problem with the vehicle's electrical system, its operation or the battery application.

- Wear and Tear**
As a battery ages, grid metal corrodes and active material is lost from the plate. Over time this leads to a point where the battery will no longer be able to start a vehicle. High temperature will accelerate the degradation rates.
- Physical Damage**
Incorrect fitment, handling and storage often leads to external damage and subsequent battery failure.
- Incorrect Application**
Fitting a smaller, less powerful battery or a battery designed for another application can lead to early failure.
- Negligence**
Failure to maintain fluid levels exposes internal components and accelerates battery failure.
- Sulphation**
Occurs when the battery is allowed to stand in a discharged state for an extended period of time.
- Over-Charging**
Often caused if the alternator is incorrectly set or the alternator voltage control fails.
- Under-Charging**
Short journeys, stop start driving or faulty alternators will not fully recharge a battery.
- Discharge**
Lights or other accessories left on for extended periods.

PREMIUM INCANDESCENT GLOBES

In response to customer feedback the range of 'Premium' globes has been upgraded. With an increased production quality these globes are designed to give the seller and user peace of mind and eliminate the early failures.

Premium globes are made in Europe to the highest quality standards and increased precision making them ideal for both trade and retail markets. Not only do these globes provide elimination of early failures they also have an increased life of up to 2 times that of a standard Narva incandescent globe.

To assist with merchandising and stock holding the range has been rationalised to only include the truly fast moving part numbers.

The upgraded Narva Premium globe range guarantees increased performance and provides exceptional value for money and peace of mind.

Donaldson Wing Nut

Restriction Indicator Kit

Do not clean a primary or safety filter instead of replacing it.

- Heavy-duty air filtration manufacturers do not recommend any type of cleaning process to be used on their products.
- Once an air filter has been cleaned or washed the Donaldson filter warranty is no longer valid.
- The dirt holding capacity of a filter is reduced 20-40% with each cleaning attempt.
- There is also the real risk of dirt reaching the clean side of the filter if cleaning is attempted.
- The risk of filter damage from washing, tapping, high pressure water, or compressed air cleaning is very real.
- The potential savings from risky attempts at filter cleaning won't come close to offsetting potential damage to engine components.
- Increased engine wear and damage is the result of the ingress of contaminant over time.

Don't remove an air filter from its housing simply to inspect it.

Never hit a filter to try cleaning it.

- Rapping hard enough to knock off dust damages the filter and can place your engine at risk for dust ingestion.
- Deeply embedded dirt is never released by tapping.
- It is always safer to keep operating until you can change to a new filter than to try and tap the dirt out.

MACHINE OILS MP 68-460

Hi-Tec Machine Oils MP are premium industrial, micropitting resistant, extreme pressure gear and bearing oils especially suitable where high loads and/or high temperatures are encountered and where water contaminating influences cannot be avoided. Hi-Tec Machine Oils have excellent anti-friction characteristics for use in bearings, steel gear transmissions and steel phosphobronze gear units.

Available in ISO 68, 100, 150, 220, 320 and 460

PREMIER SAE 30

Hi-Tec Premier SAE 30 is a well proven monograde engine oil for four stroke petrol (lawn mowers) and older normally aspirated diesel engines. It gives improved protection against engine wear, high temperature oxidation deposits to engines of older passenger cars and it is also recommended for veteran and vintage cars where high viscosity, low additive oils are required.

SOLUBLE CUTTING FLUID

Hi-Tec Soluble Cutting Fluid is a premium quality chlorine free, borate-containing soluble cutting oil, providing maximum lubrication & cooling between cutting tools and work surfaces.

It is designed for light to moderate machining operations including boring, milling, drilling, tapping, threading, broaching, turning, reaming and grinding. It provides an excellent surface finish to machined surfaces, long emulsion service life, plus long tool life which is aided by the high oiliness.

COOLANT

LONG LIFE COOLANT GREEN

Hi-Tec Long Life Coolant Green is a general purpose ethylene glycol based antifreeze/coolant concentrate incorporating an advanced formula technology with virtually non-depleting organic acid corrosion inhibitors. It is silicate free for improved pump life and contains no environmentally harmful nitrates, borates, phosphates, amines or nitrites. It is recommended for use in aluminium alloy petrol powered automotive engines, and heavy duty diesel and natural gas mobile and stationary engines.

DD50 COOLANT GREEN

Hi-Tec DD50 Coolant Green is a premixed heavy duty Hybrid technology diesel engine coolant. This low silicate, phosphate and amine free product is recommended for use in automotive, light duty and heavy-duty on-road truck, off-road, farm and marine diesel applications. It provides excellent high temperature aluminum protection and is suitable for use in hard water. It is compatible with both conventional and OAT coolants. It has an extended life of 6 years; 12,000 hours or 1,000,000 km whichever comes first.

HYDRAULIC OILS ISO 32, 46 & 68

Hi-Tec Hydraulic Oils are blended from superior, high quality mineral oils possessing a high viscosity index and low pour point. These oils give a long trouble free service life and will be chemically stable under severe operating conditions. They provide excellent protection against corrosion; resist emulsification, and any formation of unwanted stable foam.

Also available in ISO 10, 22, 100, 150

COMMERCIAL DIESEL OILS

FLEETMASTER™ 15W/40 CI-4

Hi-Tec Fleetmaster™ 15W/40 CI-4 is a heavy duty diesel engine oil for use in multifleet diesel applications in normally aspirated and turbocharged engines. It is especially effective at sustaining engine durability where cooled EGR and other exhaust emission componentry is used. It meets the performance requirements of many American and European OEMs and associations.

FLEETMASTER™ XTREME 15W/40 CK-4

Hi-Tec Fleetmaster™ Xtreme 15W/40 CK-4 is a heavy duty diesel engine oil formulated using the latest synthetic technology base oils for use in severe duty high speed four stroke diesel engines with DPF, cooled EGR and ether exhaust treatment systems, both turbo-charged and normally aspirated. It is designed to offer greater durability and protection due to its increased shear stability and reduction of oxidative thickening, abrasive wear, bore polishing and piston deposits. Fleetmaster Xtreme 15W/40 CK-4 can be used in 2017 model vehicles as well as those requiring Euro VI emission standards.

FLEETMASTER™ SEMI SYN CJ-4 10W/40

Hi-Tec Fleetmaster Semi Syn CJ-4 10W/40 is formulated using the latest technology mineral and synthetic base oils for use in heavy duty diesel engines operating in the harsh Australian conditions. The very high dispersant, anti-wear formulation exceeds the requirements of the API CJ-4 specification. This lubricant is specifically designed to meet the requirements of engines with exhaust treatment systems especially DPF (diesel particulate filters) and cooled EGR (exhaust gas recirculation) using low sulphur fuels.

Field Testing

We go above and beyond, We torture-test our bags to hell and back; we drag, drop, throw, pull-test straps and douse every chemical possible used by tradesmen, to do our best to destroy our product.

Tried and tested, put through the most nail biting moments by challenge testing the roughest and toughest of miners and baggage handlers, to destroy our products. but even they fail miserably. Proving that Field and Portal's robust designs will withstand any test or trauma that comes its way.

We consumed Endless amounts of coffee ,had no crib breaks , lived and breathed our designs until we achieved an innovative, robust product that is superior from the rest .

QUAD DRIVE SPANNERS

SP Tools patented QUAD DRIVE open end offers 4 times the gripping power of a standard ROE spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points.

PATENTED

FLAT DRIVE RING END

SP Tools RING END spanners feature flat drive ring ends, making them the perfect spanner for getting to and loosening those tricky, hard to reach, often worn fasteners by increasing the contact area with the nut or bolt head.

FLAT DRIVE TECHNOLOGY

Perfectly flat spanner head surfaces allow for maximum contact between the spanner and the bolt or nut, maximising grip and enhancing applied torque.

PATENTED

FLAT DRIVE RING END

SP Tools RING END spanners feature flat drive ring ends, making them the perfect spanner for getting to and loosening those tricky, hard to reach, often worn fasteners by increasing the contact area with the nut or bolt head.

FLAT DRIVE TECHNOLOGY

Perfectly flat spanner head surfaces allow for maximum contact between the spanner and the bolt or nut, maximising grip and enhancing applied torque.

- BATTERY ANALYSIS
- BUILT-IN PRINTER
- AUTO SAVING
- ONE CLICK ANALYSIS
- ADJUSTABLE SETTINGS
- CIRCUIT PROTECTION
- POLARITY PROTECTION

FEATURES

- Capacity: 100-2000CCA
- Displays and prints time stamped reports: Effective CCA, battery voltage, percentage of battery health and condition, charge system analysis and starter system analysis.
- Auto-saving function ensures the latest test results are automatically saved for reviewing or to store digitally via USB cable
- Multi-Function testing: Accurately tests battery, alternator charge current, starter function and diode ripple
- Easily adjustable date/time printing mode
- Extremely simple interface provides quick & easy battery analysis
- Circuit protection provides the analyser with reliable protection against short circuiting
- Reverse polarity connection protection ensures reverse connection will not damage the tester or affect the vehicle and battery
- No additional batteries required - unit is powered via test battery

SET INCLUDES

- Premium 12v Battery Analyser
- Thermal Paper Rolls x3
- USB Cable

M

MIG

- Simple to learn
- MIG Wire is fed through the gun to create the weld
- Gas or flux prevents oxidation in the weld
- Weld with or without gas
- Point and pull the trigger
- Great for maintenance, small projects & automotive repairs

METAL TYPES

Mild steel, stainless steel & aluminium

S

STICK

- Easiest process to learn
- Best choice for quick repairs
- Slower than MIG welding
- Forgiving in dirty/rusty environments
- Not recommended for thin sheet metal welding

METAL TYPES

Mild steel, stainless steel & cast iron

T

TIG

- Gives a better weld finish
- Accurate heat control
- Considered the most challenging process to learn
- Good way to weld thin material
- Argon gas is required

METAL TYPES

Mild steel, stainless steel & aluminium
