

CPIP Internship Opportunity in Infrastructure Investing with Antin Infrastructure Partners

Antin Infrastructure Partners

14 St. George Street
London. W1S 1FE

1114 Avenue of the Americas
29th Floor, New York 10036

Antin Overview:

Antin is a leading independent private equity firm focused on infrastructure investments. Founded in 2007, the firm invests solely in infrastructure, with a focus on brownfield infrastructure assets across the telecom, energy & environment, transport and social sectors in Europe and North America. Antin has offices in Paris, London, New York and Luxembourg.

We have successfully raised and fully invested a first fund of €1.1 billion ("Fund I"), a second fund of €2.0 billion ("Fund II") and a third fund of €3.6 billion ("Fund III"), and we are currently investing a fourth fund ("Fund IV") of €6.5bn which reached its final close in July 2020. We have also raised over €1.3 billion in co-investment commitments for select investments in Fund II and Fund III. Antin's funds are backed by more than 100 leading institutional investors from Europe, North America, the Middle East, Asia and Australia, including pension funds, insurance companies, asset managers and sovereign wealth funds.

Antin's team of more than 100 experienced professionals aims to create significant value in its investments through active asset management. The team has worked together on the analysis of more than 800 transactions in the infrastructure market since inception, in addition to the nine investments completed by Fund I, six investments completed by Fund II, eight investments completed by Fund III, and three investments completed or signed by Fund IV.

Antin is fully owned by its Managing Partners and Partners. All investment decisions are taken at the Investment Committee by its Managing Partners and Partners.

Internship role:

Interns will support the Investment Team of Antin in tasks related to the management of portfolio companies and with the analysis of new investment opportunities in North America and Europe. The investment process requires both the financial skills of investment banking and the strategic thinking of management consulting. As a result, this internship program is a unique experience to develop a well-rounded business mind.

The streamlined organisation of the Investment Team offers interns the opportunity to be fully part of the team, assume responsibilities and work closely with senior managers of the firm and external advisors.

Date and Length:

Internships are possible anytime during the year for a period up to 6 months in our New York, London or Paris offices. New York has a minimum internship period of 2 months, while London/Paris has a minimum of 3 months. Internships will be considered on a rolling basis. Applicants should specify the periods in which they would be available for a potential internship.

Knowledge and Skills Required:

Experience required:

Antin will consider both undergrad and graduate candidates for internship positions, however, coursework in infrastructure finance and policy, a quantitative background, and previous analytical experience is required.

Skills:

Applicants are expected to demonstrate:

- Strong analytical, quantitative and financial skills
- Strong work ethic and excellent attention to detail
- Proficiency across Excel / PowerPoint / Word
- Ability to prioritize and manage time efficiently
- Strong interpersonal skills and team spirit
- Ability to work independently

Open to all nationalities.
