SURVEY METHODS

The USDA's National Agricultural Statistics Service (NASS) Pacific Regional Office partners with the California Department of Food and Agriculture, California Table Grape Commission, and Raisin Administrative Committee to conduct an annual acreage survey of California grape growers. The purpose of this survey is to provide annual grape acreage with information on new plantings and removals. It is a continuation of a long series of industry-funded grape acreage surveys.

This report consists of two parts:

- Estimated grape acreage -- bearing, non-bearing, and total.
- Detailed data by variety, and year planted -- as voluntarily reported by grape growers and maintained in our list of grape vineyards.

With perfect information, the estimated grape acreage and the detailed data would be the same. However, this will never be the case for the following reasons:

- A voluntary survey of approximately 8,900 grape growers is unlikely to ever attain 100 percent completeness.
- It is difficult to detect growers who are planting grapes for the first time.
- The detailed data reflects vine removals from 30,000 acres during the past twelve months. Of this number, significant acreage was harvested in 2020 prior to being pulled out. As a result, harvested acreage removed in 2020 is included in the estimated acreage, but excluded from the detailed data.

PROCEDURES

The major source of the grape detailed data was a questionnaire mailed to all grape growers from our list of grape vineyards. The mailing was made in October 2020 to approximately 8,900 grape growers. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. A telephone follow-up was then undertaken.

To arrive at the estimated grape acreage, our list of grape vineyards was compared with data provided from the pesticide application data maintained by County Agricultural Commissioners and the Department of Pesticide Regulation.

DATA CLARIFICATIONS

Bearing and Non-bearing Acreage: For purposes of this publication, all varieties are considered non-bearing for three years (i.e., acres planted in 2017 would not be bearing until 2020). The only exceptions are the Thompson Seedless variety and all table type grapes in Imperial and Riverside counties, which are of bearing age after one year.

Grafting: Graftings on bearing acres are recorded as planted in the previous year (i.e., Chardonnay grafted in 2020 onto a 1998 variety is recorded as planted in 2019). This assumes that grafted vines will actually bear a full crop in two years as opposed to three years for a newly planted vine.

Varieties: Data are provided for each variety with 50 or more total acres standing in 2020. Acreage for all other varieties are combined in "Other" categories. Care was taken to properly identify each block reported with a recognized varietal name.

Rootstock: Most of the rootstock shown was planted in the past three years. However, some earlier plantings are included. When rootstock was budded over, the year of planting assigned to that block of grapes was the year preceding the budding. For instance, if a 2018 rootstock planting was budded over in 2020, the year of planting assigned to the selected variety was 2019. (See Grafting.) Nursery rootstock is not included.

Period Covered: The primary intent of the 2020 survey was to record removals of grapes and new planting of grapes during 2020. Acreage abandoned in 2020 was excluded from bearing acreage. Planting activity is accounted for on a calendar-year basis.

Grape Crush Districts: Grape acreage data is also published by grape crush districts (Table 12). A map with descriptions of those districts is located on the inside front cover.

RESULTS

California’s 2020 grape acreage totaled 895,000 acres. Of the total grape acreage, 844,000 were bearing while 51,000 were non-bearing. The wine-type grape acreage is estimated at 620,000 acres. Of the total acres, 580,000 were bearing and 40,000 were non-bearing. Table-type grape acreage totaled 130,000 acres with 122,000 bearing and 8,000 non-bearing. Acreage of raisin-type grapes totaled 145,000 acres, of which 142,000 were bearing and 3,000 were non-bearing.

The leading wine-type varieties continued to be Chardonnay and Cabernet Sauvignon. Flame Seedless was the leading table-type grape variety. Thompson Seedless continued to be the leading raisin-type variety and was utilized for raisins, fresh market, concentrate, and wine.

ESTIMATED GRAPE ACREAGE ¹				
Type	2018	2019	2020	Percent Change
Raisin	156,000	153,000	145,000	- 5.2
Bearing	152,000	149,000	142,000	- 4.7
Non-Bearing	4,000	4,000	3,000	- 25.0
Table	132,000	130,000	130,000	(NC)
Bearing	121,000	121,000	122,000	+ 0.8

* Synonyms for variety names are shown on Page 4.

¹ Totals may not add due to rounding.

² Non-bearing years are 2018, 2019 and 2020. Thompson Seedless and all table grapes begin bearing after one non-bearing year in Riverside and Imperial counties.
