SURVEY METHODS

The USDA's National Agricultural Statistics Service (NASS) Pacific Regional Office partners with the California Department of Food and Agriculture, California Table Grape Commission, and Raisin Administrative Committee to conduct an annual acreage survey of California grape growers. The purpose of this survey is to provide annual grape acreage with information on new plantings and removals. It is a continuation of a long series of industry-funded grape acreage surveys.

This report consists of two parts:

- Estimated grape acreage -- bearing, non-bearing, and total.
- Detailed data by variety, and year planted -- as voluntarily reported by grape growers and maintained in our list of grape vineyards.

With perfect information, the estimated grape acreage and the detailed data would be the same. However, this will never be the case for the following reasons:

- A voluntary survey of approximately 8,800 grape growers is unlikely to ever attain 100 percent completeness.
- It is difficult to detect growers who are planting grapes for the first time.
- The detailed data reflects vine removals from 18,000 acres during the past twelve months. Of this number, significant acreage was harvested in 2021 prior to being pulled out. As a result, harvested acreage removed in 2021 is included in the estimated acreage, but excluded from the detailed data.

PROCEDURES

The major source of the grape detailed data was a questionnaire mailed to all grape growers from our list of grape vineyards. The mailing was made in October 2021 to approximately 8,800 grape growers. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. This report includes responses from growers received through the middle of April 2022.

DATA CLARIFICATIONS

Bearing and Non-bearing Acreage: For purposes of this publication, all varieties are considered non-bearing for three years (i.e., acres planted in 2018 would not be bearing until 2021). The only exceptions are the Thompson Seedless variety and all table type grapes in Imperial and Riverside counties, which are of bearing age after one year.

Grafting: Graftings on bearing acres are recorded as planted in the previous year (i.e., Chardonnay grafted in 2021 onto a 1999 variety is recorded as planted in 2020). This assumes that grafted vines will actually bear a full crop in two years as opposed to three years for a newly planted vine.

Varieties: Data are provided for each variety with 50 or more total acres standing in 2021. Acreage for all other varieties are combined in "Other" categories. Care was taken to properly identify each block reported with a recognized varietal name.

Rootstock: Most of the rootstock shown was planted in the past three years. However, some earlier plantings are included. When rootstock was budded over, the year of planting assigned to that block of grapes was the year preceding the budding. For instance, if a 2019 rootstock planting was budded over in 2021, the year of planting assigned to the selected variety was 2020. (See Grafting.) Nursery rootstock is not included.

Period Covered: The primary intent of the 2021 survey was to record removals of grapes and new planting of grapes during 2021. Acreage abandoned in 2021 was excluded from bearing acreage. Planting activity is accounted for on a calendar-year basis.

Grape Crush Districts: Grape acreage data is also published by grape crush districts (Table 12). A map with descriptions of those districts is located on the inside front cover.

RESULTS

California's 2021 grape acreage totaled 881,000 acres. Of the total grape acreage, 829,000 were bearing while 52,000 were non-bearing. The wine-type grape acreage is estimated at 615,000 acres. Of the total acres, 575,000 were bearing and 40,000 were non-bearing. Table-type grape acreage totaled 128,000 acres with 118,000 bearing and 10,000 non-bearing. Acreage of raisin-type grapes totaled 138,000 acres, of which 136,000 were bearing and 2,000 were non-bearing.

The leading wine-type varieties continued to be Chardonnay and Cabernet Sauvignon. Flame Seedless was the leading table-type grape variety. Thompson Seedless continued to be the leading raisin-type variety and was utilized for raisins, fresh market, concentrate, and wine.
