Product Version: 14.0.1000.103

Supported Applications, Hardware, and Platforms

For any organization or business that prioritizes data security, patch management is the most important aspect. If an organization's assets are not equipped with latest patches of operating systems and other applications, IT may suffer a network breach. Thankfully, this lengthy process can be reduced with the help of automation.

Nemasis is a Vulnerability Management Suite equipped with the ability to provides accurate solutions for vulnerabilities of most operating systems and third party applications. The Nemasis supports following products and many more.

Operating Systems supported

Windows

- Entire Windows OS range

Linux

- Ubuntu
- SUSE
- Fedora
- Red Hat
- Debian
- CentOS

Apple

- MacOS
- iOS
