The Netherlands

**ABSTRACT.** The typification of more than 200 names of grass taxa relevant to the flora of Singapore is reviewed. A total of 52 lectotype designations are made here, including 22 which are posthumously published by the late J.F. Veldkamp. In addition, 13 second-step lectotypes (one by JFV), and two neotypes are designated. An earlier place of publication than generally cited for the combination *Zizania latifolia* is highlighted.

**Keywords.** Gramineae, lectotype, Poaceae, Singapore, typification

### Introduction

In November 2017, Jan Frederik [Jan-Frits or JeF] Veldkamp died at the age of 76 (Baas & Hovenkamp, 2018). For almost 50 years he had been the leading expert on the systematics of the grass family in the Malesian region. One of many projects in which he had agreed to collaborate was the Flora of Singapore, building on the work of Duistermaat (2005). Unfortunately, his death came before the family account for the Flora was completed, leaving a number of typifications for taxa included in the account unresolved. We have investigated these issues and present here a series of typifications. In some cases, lectotypes were indicated by Veldkamp in the unpublished manuscript and where we have found no reason to reject these choices (e.g. earlier typifications found or failure to locate the specimens indicated by Veldkamp) we include them here as lectotypes ‘designated here by Veldkamp’. Veldkamp listed holotypes for many of the names in the manuscript. We have reviewed all such designations, as names validated before 1952 rarely have holotypes (McNeill, 2014), and have concluded that many of these either require lectotypification or have already been previously lectotypified.

When it is not entirely certain whether specimens are duplicates of a holotype or lectotype, but it is likely they are, these are indicated as ‘possible isotype(s)’ or ‘possible isolectotype(s)’. The term ‘fragment’ is used here to indicate that the

specimen is small or limited and probably a piece taken from another type specimen. Under the ICN (Turland et al., 2018) (Art. 8 Ex. 8) these fragments are to be treated as duplicates.

We include the basionyms or replaced synonyms of all names from the draft Flora of Singapore manuscript, either as the current name or as a synonym. The names are listed alphabetically with the accepted name indicated below if it differs from the basionym. Names now treated as synonyms are given in italics, accepted names in bold italics. Synonyms are not extensively cited here. Inclusion of taxa in the list should not be taken as making a definite statement on their presence as native or naturalised species in Singapore.

### List of grass names

1. *Acroceras sparsum* Stapf ex Ridl., Fl. Malay Penins. 5: 229 (1925). – TYPE: Peninsular Malaysia, Selangor, Klang Gates below the ridge near the river, 2 January 1921, H.N. Ridley s.n. (lectotype K [K000290363], designated here).  
= *Acroceras tonkinense* (Balansa) C.E.Hubb. ex Bor, Indian Forest Rec. 1: 78 (1938).
  
2. *Agrostis diandra* Retz., Observ. Bot. 5: 19 (1788). – TYPE: *J. König s.n.* [annot. ‘Cinna diandra N.’] (lectotype LD [LD1215317], designated by Fischer, Bull. Misc. Inform. Kew 1932: 73 (1932); possible isolectotypes BM[2 sheets], C[5 sheets]).  
= *Sporobolus indicus* (L.) R.Br. var. *flaccidus* (Roth) Veldkamp, Blumea 35: 433 (1991).
  
3. *Agrostis elongata* (R.Br.) Roth var. *flaccida* Roth in Roem. & Schult., Syst. Veg. 2: 368 (1817). – TYPE: India orientali, *Roth 80β* (lectotype BM [BM000959534], designated by Baaijens & Veldkamp, Blumea 35: 433 (1991); possible isolectotype LE [Herb. Trinius 1699.1]).  
= *Sporobolus indicus* (L.) R.Br. var. *flaccidus* (Roth) Veldkamp, Blumea 35: 433 (1991).
  
4. *Agrostis fertilis* Steud., Syn. Pl. Glumac. 1: 170 (1854). – TYPE: Japan, *Burger s.n.* (lectotype L [L0050179], designated by Baaijens, Blumea 35: 437 (1991); possible isolectotypes L [L0050181], ? P).  
= *Sporobolus indicus* (L.) R.Br. var. *major* (Buse) Baaijens, Blumea 35: 437 (1991).
  
5. *Agrostis indica* L., Sp. Pl. 1: 63 (1753). – TYPE: [Clayton] 460-B (lectotype LINN [Herb. Linn. 84.36], designated by C.E. Hubbard, Agron. Lusit. 28: [67] (1967)).  
= *Sporobolus indicus* (L.) R.Br., Prodr. 1: 170 (1810).

6. *Agrostis matrella* L., Mant. Pl. Altera 185 (1771). – TYPE: *J.G. König* 56 (lectotype LINN [Herb. Linn. 84.11], designated by Goudswaard, Blumea 26: 171 (1980); possible isolectotypes L [L0050867], LE [Herb. Trinius 396.1]).  
 = *Zoysia matrella* (L.) Merr., Philipp. J. Sci. 7: 230 (1912).

7. *Agrostis maxima* Roxb., Fl. Ind. 1: 319 (1820). – TYPE: *W. Roxburgh* s.n. (lectotype G [G00418718], designated here).  
 = *Thysanolaena latifolia* (Roxb. ex Hornem.) Honda, J. Fac. Sci. Univ. Tokyo, Sect. 3, Bot. 3: 312 (1930).

*Notes.* The lectotype specimen in Geneva has an original ticket in Roxburgh's hand saying *Agrostis diandra* with the epithet crossed out and replaced with *maxima*.

8. *Agrostis procera* Retz., Observ. Bot. 4: 19 (1786). – TYPE: *J.G. König* s.n. (lectotype LD [LD1215977], designated by Fischer, Bull. Misc. Inform. Kew 1932: 71 (1932); isolectotype BRI (fragment), K (fragment) [K000958820]).  
 = *Eriochloa procera* (Retz.) C.E.Hubb., Bull. Misc. Inform. Kew 1930: 256 (1930).

9. *Aira indica* L., Sp. Pl. 1: [1231] (1753). – TYPE: Sri Lanka, Sabaragamuwa Province, Ratnapura District, 11 miles E. of Daniyaya along Highway 17 to Ratnapura, near mile post 62, 22 October 1974, *G. Davidse* 7871 (neotype K [K000245262], designated by Renvoize in Cafferty et al., Taxon 49: 244 (2000); isoneotypes L, MO [MO-1410733]).  
 = *Sacciolepis indica* (L.) Chase, Proc. Biol. Soc. Washington 21: 8 (1908).

10. *Andropogon* L. sect. *Amphilophis* Trin., Mém. Acad. Imp. Sci. St.-Pétersbourg, Sér. 6, Sci. Math. 2: 285 (rank indicated p. 279) (1832). – TYPE: *Andropogon laguroides* DC. [= *Bothriochloa laguroides* (DC.) Herter] (lectotype designated here by Veldkamp).

11. *Andropogon aciculatus* Retz., Observ. Bot. 5: 22. (1789), as ‘aciculatum’. – TYPE: *J.G. König* s.n. (lectotype LD [LD1224666], designated by Veldkamp, Austrobaileya 5: 509 (1999)).  
 = *Chrysopogon aciculatus* (Retz.) Trin., Fund. Agrost. 188 (1820).

12. *Andropogon affinis* J.Presl in C.Presl, Reliq. Haenk. 1: 343 (1830), nom. illeg., non R.Br. (1810). – *Andropogon propinquus* Kunth, Enum. Pl. 1: 502 (1833). – TYPE: *T.P.X. Haenke s.n.* (lectotype PR [sheet no. 612301], designated here; isolectotypes PRC [PRC450151], US (fragment)).

= ***Sorghum propinquum*** (Kunth) Hitchc., Lingnan Sci. J. 7: 249 (1931).

13. *Andropogon amaurus* Buse, Gram. 20 (Feb 1854); Buse in Miq., Pl. Jungh. 3: 360 (Aug 1854). – TYPE: Java, *H. Zollinger* 539 (lectotype L [L0050026], designated by Veldkamp, Blumea 36: 180 (1991); isolectotypes G, K, P[3 sheets]).

= ***Polytrias indica*** (Houtt.) Veldkamp, Blumea 36: 180 (1991).

14. *Andropogon annulatus* Forssk., Fl. Aegypt.-Arab. 173 (1775), as ‘*annulatum*’. – TYPE: Egypt, *P. Forsskål* 127 (lectotype C [C10001661], designated by Blake, Proc. Roy. Soc. Queensland 80: 65 (1969); isolectotype LD).

= ***Dichanthium annulatum*** (Forssk.) Stapf, Fl. Trop. Afr. 9: 178 (1917).

15. *Andropogon barbatus* L., Mant. Pl. Altera 302 (1771), as ‘*barbatum*’, nom. illeg., non L. (1759). – TYPE: *Anon. s.n.* (lectotype LINN [Herb. Linn. 1211.21], designated by Judziewicz, Fl. Guianas, ser. A, Phanerogams 8: 136 (1990)).

= ***Chloris barbata*** Sw., Fl. Ind. Occid. 1: 200 (1797).

16. *Andropogon bladhii* Retz., Observ. Bot. 2: 27 (1781). – TYPE: China, *P.J. Bladh s.n.* (lectotype LD [LD1218006], designated by Blake, Proc. Roy. Soc. Queensland 80: 62 (1969)).

= ***Bothriochloa bladhii*** (Retz.) S.T. Blake, Proc. Roy. Soc. Queensland 80: 62 (1969).

17. *Andropogon brevifolius* Sw., Prodr. 26 (1788). – TYPE: Jamaica, *O. Swartz s.n.* (lectotype M [M-0090295], designated by Hitchcock, Contr. U.S. Natl. Herb. 12: 143 (1908), excluding the portion which is *Andropogon leucostachys*; isolectotypes BM, S).

= ***Schizachyrium brevifolium*** (Sw.) Nees in Mart., Fl. Bras. Enum. Pl. 2: 332 (1829).

*Notes.* Hitchcock (1908) believed that there was no original material of this taxon in the Stockholm Herbarium and effectively selected material in Munich as the type. There is actually an extant Swartz specimen in Stockholm.

18. *Andropogon caricosus* L., Sp. Pl., ed. 2, 2: 1480 (1763), as ‘caricosum’, nom. cons. – CONSERVED TYPE: Peninsula Ind. Orientalis, *Herb. Wight Propr. No. 1687* (holotype K [K001050468]; possible isotype E).

= ***Dichanthium caricosum*** (L.) A.Camus, Bull. Mus. Natl. Hist. Nat. 27: 549 (1921).

19. *Andropogon cerifer* Hack., Fl. Bras. (Martius) 2(3): 281 (1883), as ‘ceriferus’. – TYPE: Brazil, Rio de Janeiro, pr. Piura, *A.F.M. Glaziou 4296* (holotype W [W1904-0010930]; isotype US [US00156603] (fragment)).

= ***Cymbopogon citratus*** (DC.) Stapf, Bull. Misc. Inform. Kew 1906: 322 (1906).

20. *Andropogon citratus* DC., Cat. Pl. Horti Monsp. 78 (1813), as ‘citratum’. – TYPE: Cult. in Horto Monspeliensis (not traced).

= ***Cymbopogon citratus*** (DC.) Stapf, Bull. Misc. Inform. Kew 1906: 322 (1906).

*Notes:* Stapf (1906: 322–335) provided a detailed history of lemon-grass and its taxonomy. He concluded that *Andropogon citratus* DC. was the oldest name available for the species and made the requisite combination in *Cymbopogon*.

21. *Andropogon contortus* L., Sp. Pl. 2: 1045 (1753), as ‘contortum’. – TYPE: [published illustration] ‘Gram. Secalinum, Indicum, spica gracili, tomentoso, aristis longioribus, ad se invicem intortis’, Plukenet, Phytogr. 4: t. 191, f. 5 (1692) (lectotype designated by Cope, Fl. Pakistan 143: 312 (1982)).

= ***Heteropogon contortus*** (L.) P. Beauv. ex Roem. & Schult., Syst. Veg. 2: 836 (1817).

22. *Andropogon crinitus* Thunb. in Murray, Syst. Veg., ed. 14: 903 (1784), as ‘*crinitum*’. – TYPE: Japan, *C.P. Thunberg s.n.* (lectotype UPS-THUNB [Herb. Thunberg 23880] [V-143127], designated here by Veldkamp).

= ***Polygonatherum crinitum*** (Thunb.) Kunth, Enum. Pl. 1: 478 (1833).

23. *Andropogon flexuosus* Nees ex Steud., Syn. Pl. Glumac. 1: 388 (1854). – TYPE: *R. Wight 1704* (lectotype E [E00174955], designated here; isolectotype LE [Herb. Trinius 204.1] (fragment)).

= ***Cymbopogon flexuosus*** (Nees ex Steud.) Will.Watson, Gaz. N. W. Ind. 10: 392 (1882).

*Notes.* In the protologue, Steudel refers to ‘*A. nardus Klein hrbr.*’ As Noltie (2005, p. 278) indicates, a sheet in E is annotated ‘*Andropogon nardus non est Hrb D. Rottler Hb Klein*’ indicating that this specimen came from Klein’s herbarium. This is possibly not the sheet seen by Nees, which may have been among the wartime losses in Berlin,

but it is likely to have the same provenance. As Noltie indicates, Wight's herbarium numbers relate to taxa rather than gatherings, so other *Wight 1704* sheets cannot automatically be assumed to be true duplicates. There is however, a fragment from Nees's herbarium in Herb. Triniius.

24. *Andropogon glaber* Roxb., Fl. Ind. 1: 271 (1820). – TYPE: Bengal, *W. Roxburgh s.n.* (lectotype BM [BM000959769], designated by Simon, Austrobaileya 3: 79 (1989)).

= *Bothriochloa bladhii* (Retz.) S.T. Blake, Proc. Roy. Soc. Queensland 80: 62 (1969).

25. *Andropogon intermedius* R.Br., Prodr. 1: 202 (1810). – TYPE: Australia, Keppel Bay, *R. Brown 6184* (lectotype BM [BM000939608], designated by Blake, Proc. Roy. Soc. Queensland 80: 62 (1969); isolectotypes E, F, K).

= *Bothriochloa bladhii* (Retz.) S.T. Blake, Proc. Roy. Soc. Queensland 80: 62 (1969).

26. *Andropogon malacophyllum* Hochst. ex Steud., Syn. Pl. Glumac. 1: 372 (1854).

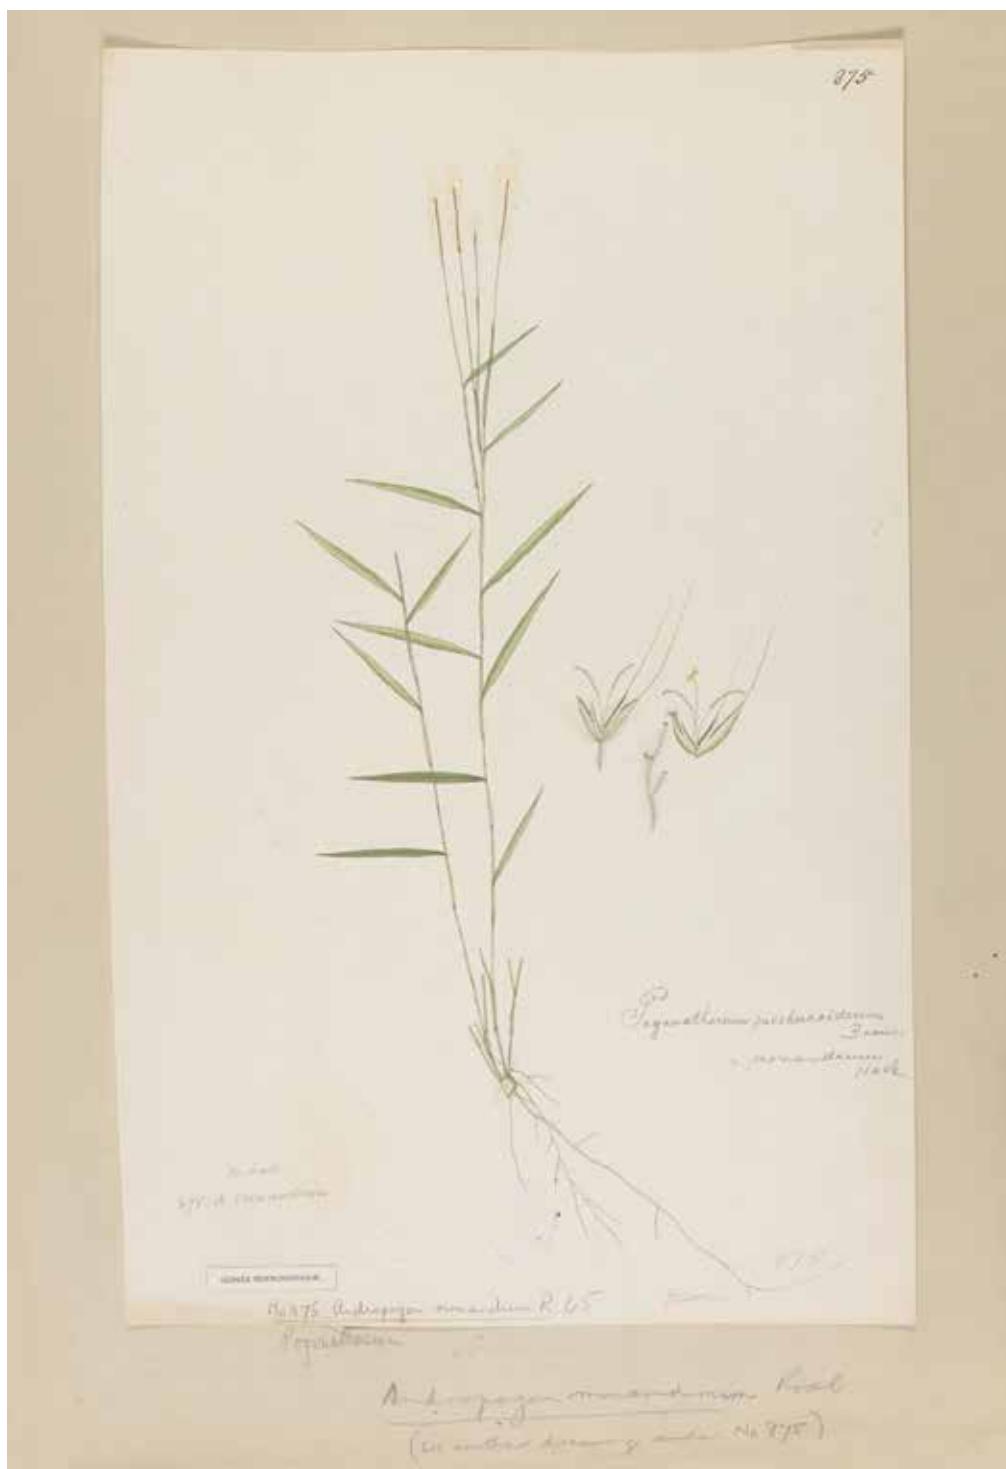

– TYPE: India, Montibus Nilagiri, 1851, *R.F. Hohenacker 917* (lectotype P [P02640887], designated here; isolectotypes CAL, CORD, FI, HAL, JE[2 sheets], K[2 sheets], L, LECB, MPU[2 sheets], S, TUB, W[3 sheets]).

= *Ischaemum ciliare* Retz., Observ. Bot. 6: 36 (1791).

27. *Andropogon martini* Roxb., Fl. Ind. 1: 277 (1820). – TYPE: *W. Roxburgh s.n.* (lectotype BM (lost), designated by Stapf, Bull. Misc. Inform. Kew 1906: 335–336 (1906)); India, Calcutta, Calcutta Botanic Garden, 18 February 1798, *T. Hardwicke s.n.* (neotype BM [BM000959800], designated here).

= *Cymbopogon martini* (Roxb.) Will.Watson, Gaz. N.-W. Ind. 10: 392 (1882).

*Notes.* Stapf (1906, pp. 335–336) reported two specimens of this species in BM, one from Roxburgh labelled *Andropogon martini* in his hand, and another collected by Hardwicke in the Calcutta Botanic Garden (in 1798 not 1789 as stated by Stapf). Stapf clearly referred to the Roxburgh sheet as type, so this represents an effective lectotypification. Unfortunately, this specimen seems now to be lost. While the Hardwicke collection is likely to be from the plants cultivated from the original seeds sent by Claude Martin to Roxburgh, the specimen shows no evidence of having been seen by Roxburgh and so is here designated as neotype rather than as a replacement lectotype. Note that Stapf excluded Roxburgh's drawing 1095 from *A. martini* and there does not appear to be any other original herbarium material available.

**Fig. 1.** Photograph of the lectotype of *Andropogon monandrus* Roxb., *Icones Roxburghianae* 875 in the Kew collection. Reproduced with the kind permission of the Director and the Board of Trustees, Royal Botanic Gardens, Kew.

28. *Andropogon monandrus* Roxb., Fl. Ind. 1: 264 (1820). – TYPE: [unpublished illustration] Icones Roxburghianaæ 875 (lectotype K, designated here).  
 = ***Pogonatherum crinitum*** (Thunb.) Kunth, Enum. Pl. 1: 478 (1833).

*Notes.* In the absence of any original herbarium material, Roxburgh's drawing (Fig. 1) is selected as lectotype.

29. *Andropogon nardus* L., Sp. Pl. 2: 1046 (1753). – TYPE: Herb. Hermann 2: 66, No. 45 (lectotype BM [BM000594628], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 764 (1982)).  
 = ***Cymbopogon nardus*** (L.) Rendle in Hiern, Cat. Afr. Pl. 2: 155 (1899).

30. *Andropogon roxburghii* Nees ex Wight & Arn., Cat. Ind. Pl. (2): 100 (1834). – TYPE: non designatus.  
 = ***Cymbopogon citratus*** (DC.) Stapf, Bull. Misc. Inform. Kew 1906: 322 (1906).

*Notes.* McNeill in Noltie (2005, p. 278) confirmed that the name *Andropogon roxburghii* was validated in Wight's Catalogue by citation of Roxburgh's description of *Andropogon schoenanthus* L. while excluding the Linnaean type. A type for *Andropogon roxburghii* has yet to be selected from among the elements included in *Andropogon schoenanthus* by Roxburgh.

31. *Anthistiria villosa* Poir., Encycl., Suppl. 1: 396 (1810). – TYPE: Commerson s.n. (lectotype P-LA [P00563839], designated by Veldkamp, Blumea 61: 36 (2016)).  
 = ***Themeda villosa*** (Poir.) A.Camus, Fl. Indo-Chine 7: 364 (1922).

32. *Anthoxanthum indicum* L., Sp. Pl. 1: 28 (1753). – TYPE: Herb. Hermann 1: 29, No. 25 (lectotype BM [BM000621332], designated Clayton, Fl. Trop. E. Africa, Gram. (Part 2): 395 (1974)).  
 = ***Perotis indica*** (L.) Kuntze, Revis. Gen. Pl. 2: 787 (1891).

33. *Aristida arundinacea* L., Mant. Pl. Altera 186 (1771). – TYPE: J.G. König s.n. (lectotype LINN [Herb. Linn. 98.8], designated by Hubbard, Fl. Trop. E. Africa, Gram. (Part 1): 133 (1970)).  
 = ***Neyraudia arundinacea*** (L.) Henrard, Meded. Rijks-Herb. 58: 8 (1929).

34. ***Arundo donax*** L., Sp. Pl. 1: 81 (1753). – TYPE: Anon. s.n. (lectotype L [Herb. A. van Royen No. 912.356-93], designated by Renvoize, Regnum Veg. 127: 21 (1993)).

35. *Arundo madagascariensis* Kunth, Révis. Gramin. 2: 273, t. 48 (1830). – TYPE: Madagascar, *L.M.A. du Petit-Thouars s.n.* (lectotype P [P00446272], designated by Hubbard, Fl. Trop. E. Africa, Gram. (Part 1): 133 (1970); isolectotype US (fragment ex B)).

= *Neyraudia arundinacea* (L.) Henrard, Meded. Rijks-Herb. 58: 8 (1929).

36. *Arundo reynaudiana* Kunth, Révis. Gramin. 1: 275, t. 49 (1829). – TYPE: Burma, Pegu, 1829, *A.A. Reynaud s.n.* (lectotype B [B100365260], designated by Conert, Bot. Jahrb. Syst. 78: 240 (1959); isolectotypes L, LE [Herb. Trinius 2252.1] (fragment), P). = *Neyraudia arundinacea* (L.) Henrard var. *zollingeri* (Buse) Henrard, Blumea 3: 439 (1940).

37. *Arundo versicolor* Mill., Gard. Dict. ed. 8 no. 3 (1768). – TYPE: [published illustration] ‘*Arundo laconica versicolor*, Park.’, Morison, Pl. Hist. Univ. 3: sect. 8, tab. 8, fig. 9 (1699) (lectotype designated here).

= *Arundo donax* L., Sp. Pl. 1: 81 (1753) var. *versicolor* (Mill.) Stokes, Bot. Mat. Med. 1: 160 (1812).

*Notes.* Miller did not cite any specimens but did refer to pre-Linnaean publications by Morison and Theophrastus. Morison’s illustration (Fig. 2) is here designated lectotype for the variegated giant reed.

38. *Arundo zollingeri* Buse, Gram. 3 (Feb 1854); Buse in Miq., Pl. Jungh. 3: 343 (Aug 1854). – TYPE: Java, *H. Zollinger* 337 (lectotype L [L0044754], designated here by Veldkamp; isolectotypes G, K, L [L0044753], P).

= *Neyraudia arundinacea* (L.) Henrard var. *zollingeri* (Buse) Henrard, Blumea 3: 439 (1940).

39. *Axonopus affinis* Chase, J. Wash. Acad. Sci. 28: 180 (1938). – TYPE: USA, Mississippi, Waynesboro, 2 October 1896, *T.H. Kearny* 175 (holotype US [US00139602]; isotypes GH, MO, US).

= *Axonopus fissifolius* (Raddi) Kuhlm., Relat. Commiss. Linhas Telegr. Estratég. Matto Grosso Amazonas 5(11): 87 (1922).

40. *Cenchrus echinatus* L., Sp. Pl. 2: 1050 (1753). – TYPE: *Anon. s.n.* (lectotype L [Herb. A. van Royen No. 912.356-116], designated by Veldkamp, Regnum Veg. 127: 31 (1993)).

41. *Cenchrus granularis* L., Mant. Pl. Altera 575 (1771). – TYPE: *Anon. s.n.* (lectotype LINN [Herb. Linn. 1217.12], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 849 (1982)).

= *Mnesithea granularis* (L.) de Koning & Sosef, Blumea 31: 295 (1986).

42. *Cenchrus inflexus* R.Br., Prodr. 195 (1810), nom. illeg., non Poir. (1804). – TYPE: Australia, Arnhem South Bay, 6 February 1803, R. Brown 6140 (lectotype BM [BM000795713], designated by DeLisle, Iowa State Coll. J. Sci. 37: 280 (1963); isolectotypes E, K, P, US (fragment)).

= *Cenchrus brownii* Roem. & Schult., Syst. Veg. 2: 258 (1817).

43. *Cenchrus lappaceus* L., Sp. Pl., ed. 2, 2: 1488 (1763). – TYPE: *Anon. s.n.* (neotype LINN [Herb. Linn. 1212.15], designated by Monod de Froideville, Blumea 19: 59 (1971)).

= *Centotheca lappacea* (L.) Desv., Nouv. Bull. Sci. Soc. Philom. Paris 2: 189 (1810).

44. *Cenchrus parviflorus* Poir. in Lam., Encycl. 6: 52 (1804). – TYPE: Puerto Rico, E.P. Ventenat s.n. [?A. Riedlé leg.] (holotype P-LA [P00564021]; isotype US).

= *Setaria parviflora* (Poir.) Kerguélen, Lejeunia n.s. 120: 161 (1987).

45. ***Cenchrus setosus*** Sw., Prodr. 26 (1788). – TYPE: Jamaica, O.P. Swartz s.n. (lectotype S [S-R-969], designated by Hitchcock, Contr. U.S. Natl. Herb. 12: 143 (1908); possible isolectotypes BM, G, LD, S [2 sheets] SBT).

*Notes.* See notes under *Panicum polystachion* L. explaining why *Cenchrus setosus* is considered the accepted name for this species.

46. *Chloris inflata* Link, Enum. Hort. Berol. Alt. 1: 105 (1821). – TYPE: Germany, hort. bot. Berol. [sem. ex California], J.H.F. Link s.n. (lectotype B [B100248047], designated by Merrill, Enum. Philipp. Fl. Pl. 4: 241 (1926); isolectotype US (fragment)).

= *Chloris barbata* Sw., Fl. Ind. Occid. 1: 200 (1797).

47. ***Coix lacryma-jobi*** L., Sp. Pl. 2: 972 (1753). – TYPE: *Anon. s.n.* (lectotype LINN [Herb. Linn. 1098.1], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 857 (1982)).

**Fig. 2.** Illustration of 'Arundo laconica versicolor', Park. Taken from Robert Morison's *Plantarum Historiae Universalis Oxoniensis pars tertia*, published in 1699. The surrounding figures have been faded using imaging software to avoid confusion.

48. *Coix ma-yuen* Rom.Caill., Bull. Soc. Natl. Acclim. France, sér. 3, 8: 442 (1881), as ‘ma-yu’én’. – TYPE: non designatus.  
= *Coix lacryma-jobi* L. var. *ma-yuen* (Rom.Caill.) Stapf in Hooker, Fl. Brit. India 7: 100 (1896).
49. *Cynodon parviflumis* Ohwi, Bot. Mag. (Tokyo) 55: 538 (1941). – TYPE: Caroline Islands, [Federated States of Micronesia], Yap, 29 March 1938, R. Kanehira & S. Hatusima 4348 (holotype FU; isotype US (fragment)).  
= *Cynodon dactylon* (L.) Pers., Syn. Pl. 1: 85 (1805).
50. *Cynodon tener* J.Presl in C.Presl, Reliq. Haenk. 1: 291 (1830). – TYPE: Philippines, T.P.X. Haenke s.n. (lectotype MO [MO-144078], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 41 (1899); isolectotypes B, BM, HAL, LE [Herb. Trinius 2052.01], PR [sheet no. 495766], PRC, US (fragment), W[2 sheets]).  
= *Eustachys tenera* (J.Presl) A.Camus, Rev. Int. Bot. Appl. Agric. Trop. 5: 208 (1925), as ‘tener’.
51. *Cynosurus aegyptius* L., Sp. Pl. 1: 72 (1753). – TYPE: *Anon. s.n.* (lectotype LINN [Herb. Linn. 91.11], designated by Kit Tan, Fl. Turkey 9: 578 (1985)).  
= *Dactyloctenium aegyptium* (L.) Willd., Enum. Pl. 1029 (1809), as ‘aegyptiacum’.
52. *Cynosurus coracanus* L., Syst. Nat., ed. 10, 2: 875 (1759), as ‘coracan’. – TYPE: [published illustration] Pluk., Phytographia 2: t. 91, f. 5 (1691) (lectotype designated by Phillips, Kew Bull. 27: 254 (1972)).  
= *Eleusine coracana* (L.) Gaertn., Fruct. Sem. Pl. 1: 8, t. 1, f. 11 (1788).
53. *Cynosurus indicus* L., Sp. Pl. 1: 72 (1753). – TYPE: [published illustration] Burman, Thes. Zeyl. t. 47, f. 1. (1737) (lectotype designated by Phillips in Cafferty et al., Taxon 49: 249 (2000)). Sri Lanka, Kandy, 5 miles south of Matele on Kandy road, 16 January 2970, D. Clayton 5330 (epitype K [K000245128], designated by Phillips in Cafferty et al., Taxon 49: 249 (2000); isoepitypes CANB, PDA, US).  
= *Eleusine indica* (L.) Gaertn., Fruct. Sem. Pl. 1: 8 (1788).

54. *Digitaria caespitosa* Ridl., Fl. Malay Penins. 5: 215 (1925). – TYPE: Singapore, Botanic Gardens, November 1920, H.N. Ridley s.n. (lectotype K [K00029074], first step designated by Veldkamp, Blumea 21: 64 (1973), second step designated here to exclude the material at the top of the sheet that Henrard has indicated as belonging to *Digitaria marginata* Link).  
= *Digitaria violascens* Link, Hort. Berol. 1: 229 (1827).

55. *Digitaria didactyla* Willd., Enum. Pl. 91 (1809). – TYPE: Réunion [Insula Borboniae], J.B. Bory de Saint-Vincent s.n. (lectotype B-W [B-W01646010], designated by Henrard, Monogr. Gen. Digitaria 179 (1950); isolectotype BM).

56. *Digitaria elevatovenulosa* Ohwi, Bull. Tokyo Sci. Mus. 18: 6 (1947). – TYPE: Singapore, 20 September 1941, J. Ohwi 6 (lectotype BO, designated by Henrard, Monogr. Gen. Digitaria 818 (1950); isolectotype L [L0044204]).  
= *Digitaria mollicoma* (Kunth) Henrard, Blumea 1: 97 (1934).

57. *Digitaria elevatovenulosa* Ohwi var. *glabra* Ohwi, Bull. Tokyo Sci. Mus. 18: 6 (1947). – TYPE: Java, C.A. Backer 7318 (holotype BO).  
= *Digitaria mollicoma* (Kunth) Henrard, Blumea 1: 97 (1934).

58. *Digitaria fimbriata* Link, Hort. Berol. 1: 226 (1827). – TYPE: Anon. s.n., p.p. (lectotype B [B100272564], designated by Henrard, Monogr. Gen. Digitaria 255 (1950), including part annotated ‘b’ only).  
= *Digitaria ciliaris* (Retz.) Koeler, Descr. Gram. 27 (1802).

59. *Digitaria marginata* Link, Enum. Hort. Berol. Alt. 1: 102 (1821). – TYPE: Anon. s.n., p.p. (lectotype B [B200272564], designated by Henrard, Monogr. Gen. Digitaria 429 (1950), including part annotated ‘a’ only).  
= *Digitaria ciliaris* (Retz.) Koeler, Descr. Gram. 27 (1802).

60. *Digitaria microstachya* Henrard, Monogr. Gen. Digitaria 454, fig. 942 (1950). – TYPE: Peninsular Malaysia, Malacca, Goldmines Clearings, W. Griffith s.n. ex Herb. Lehmann (holotype CGE [05576(CGE)]).  
= *Digitaria setigera* Roth, Syst. Veg. 2: 474 (1817).

61. *Digitaria nuda* Schumach., Beskr. Guin. Pl. 45 (1827). – TYPE: Guinea [Ghana], P. Thonning 367 (lectotype C [C10003772], designated by Henrard, Monogr. Gen. Digitaria 500 (1950); isolectotype L (fragment)).

62. *Digitaria peninsulae* Ohwi, Bull. Tokyo Sci. Mus. 18: 7 (1947). – TYPE: Singapore, 20 September 1941, *J. Ohwi* 5 (lectotype BO, designated by Henrard, Monogr. Gen. Digitaria 538 (1950); isolectotype L [L0044144]).

= *Digitaria didactyla* Willd., Enum. Pl. 91 (1809).

63. *Digitaria pertenuis* Buse, Gram. 41 (Feb 1854); Buse, in Miq., Pl. Jungh. 3: 381 (Aug 1854). – TYPE: Sumatra, Padang, *F.W. Junghuhn s.n.* (lectotype L [L0044278], designated by Veldkamp, Blumea 21: 63 (1973); isolectotype U).

= *Digitaria violascens* Link, Hort. Berol. 1: 229 (1827).

64. *Digitaria propinqua* Gaudich., Voy. Uranie: 410 (1829), nom. illeg., non (R.Br.) P.Beauv. (1812) = *Panicum timorense* Kunth, Enum. Pl. 1: 83 (1833). – TYPE: Timor, *Gaudichaud s.n.* (lectotype P [P00898398], first step designated by Veldkamp, Blumea 21: 35 (1973), second step designated here; possible isolectotypes L, P [P00898396], US (fragm.)).

= *Digitaria radicosa* (J.Presl) Miq., Fl. Ned. Ind. 3: 437 (1857).

65. *Digitaria setigera* Roth, Syst. Veg. 2: 474 (1817). – TYPE: India, *B. Heyne s.n.* (lectotype B [B100272556], designated by Veldkamp, Blumea 21: 37 (1973); isolectotype B [B100272555]).

*Notes.* Veldkamp (1973) cited a Heyne specimen from Roth's herbarium in B as the holotype of *Digitaria setigera*. This is an effective lectotypification as he also referred to the Kew negative 2107 which is a picture of the sheet indicated as lectotype above. Bor (1955) had referred to the two sheets in B as the type.

66. *Digitaria violascens* Link, Hort. Berol. 1: 229 (1827). – TYPE: *J.H.F. Link* 93 (lectotype B [B100185495], designated by Henrard, Monogr. Gen. Digitaria 791 (1950); possible isolectotypes BAA (fragment), LE [Herb. Trinius 10009.3]).

67. *Dimeria glabra* Ridl., J. Fed. Malay States Mus. 10: 156 (1920). – TYPE: Singapore, Holland Road, edge of swampy hollow, 21 January 1919, *I.H. Burkhill SFN* 4647 (lectotype K [K000290039], first step designated by Roberty, Boissiera 9: 398 (1960), second step designated here; isolectotypes G, K).

= *Dimeria ornithopoda* Trin., Fund. Agrost. 167 (1820).

68. *Dimeria ornithopoda* Trin., Fund. Agrost. 167, t. 14 (1820). – TYPE: India orientalis, *Anon. s.n.* (holotype LE [Herb. Trinius 1254.1]).

69. *Dimeria ornithopoda* Trin. subvar. *imperfecta* Hack. in A.DC. & C.DC., Monogr. Phan. 6: 82 (1889). – TYPE: Java, *T. Lobb s.n.* (holotype G).  
 = *Dimeria ornithopoda* Trin., Fund. Agrost. 167 (1820).

70. *Eragrostis* Wolf sect. *Cataclastos* Döll in Mart., Fl. Bras. 2(3): 137, 155 (1878). – TYPE: *Eragrostis ciliaris* (L.) R.Br. (designated here by Veldkamp).

71. *Eragrostis cumingii* Steud., Syn. Pl. Glumac. 1: 266 (1854). – TYPE: Philippines, *H. Cuming 1104* (lectotype P [P00622472], designated by Lazarides, Austral. Syst. Bot. 10: 109 (1997); isolectotypes BRI, CGE, G, E, GOET, K[2 sheets], L, MO, P, W).

72. *Eragrostis malayana* Stapf in Hook.f., Fl. Brit. India 7: 317 (1896). – TYPE: Peninsular Malaysia, Perak, Thaiping, *L. Wray 773* (lectotype K [K000290370], designated by Veldkamp, Blumea 47: 180 (2002)).  
 = *Eragrostis montana* Balansa, J. Bot. (Morot) 4: 168 (1890).

73. *Eragrostis montana* Balansa, J. Bot. (Morot) 4: 168 (1890). – TYPE: Cambodia, Mont de Pursat, 18 June 1875, *A. Godefroy 487* (lectotype L [L0044358], designated here; isolectotype P [P02279651]).

74. *Eriachne pallescens* R.Br., Prodr. 1: 184 (1810). – TYPE: New Holland [Australia], Endeavours River, 1770, *J. Banks & D. Solander s.n.* (lectotype BM [BM000645842], designated by van Eck-Borsboom, Blumea 26: 134, 135 (1980); possible isolectotypes BM[4 sheets]).

75. *Eriachne triseta* Nees ex Steud., Syn. Pl. Glumac. 1: 237 (1854). – TYPE: Sri Lanka [Ceylon], *Macrae s.n.* [R. Wight 2047] (lectotype B [B100272753], designated here; isolectotype LE [Herb. Trinius 1844.1] (fragment)).

*Notes.* The protologue simply refers to Ceylon. A holotype in Paris was referred to by van Eck-Borsboom (1980, p. 136) without locating the specimen. This is presumably based on the assumption that the type was represented in Steudel's herbarium now in P. There is a specimen in Berlin that is annotated with the name in Nees's hand. This is selected as lectotype here.

76. *Eriochloa ramosa* (Retz.) Kuntze var. *involucrata* Hack. ex Merr., Philip. J. Sci. 1, Suppl. 5: 349. (1906). – TYPE: Philippines, Mindoro, Puerta Galera, October 1903, E.D. Merrill 3333 (lectotype W [1916-0020483], designated here by Veldkamp; isolectotypes BM, K, NY, US).

= *Eriochloa procera* (Retz.) C.E.Hubb., Bull. Misc. Inform. Kew 1930: 256 (1930).

77. *Graya elegans* Nees ex Steud., Syn. Pl. Glumac. 1: 119 (1854). – TYPE: Sri Lanka [Ceylon], R. Wight 2033 (lectotype LE [Herb. Trinius 691.1] (fragment), designated here).

= *Sphaerocaryum malaccense* (Trin.) Pilg., Feddes Repert. 45: 2 (1938).

*Notes.* There is a fragment from Herb. Nees in Herb. Trinius which is here designated as lectotype as Nees's specimens seem to have been lost.

78. *Hemigymnia fusca* Ridl., Fl. Malay Penins. 5: 228 (1925). – TYPE: Singapore, Chan Chu Kang, March 1890, H.N. Ridley 1704 (lectotype SING [SING0041601], designated here by Veldkamp; isolectotype K [K000290325]).

= *Ottochloa nodosa* (Kunth) Dandy, J. Bot. 69: 55 (1931).

79. *Holcus bicolor* L., Mant. Pl. Altera 301 (1771). – TYPE: Herb. Clifford 468, Holcus 1 (BM [BM000647533], designated by Poilecot, Boissiera 56: 509 (1999)).

= *Sorghum bicolor* (L.) Moench, Methodus 207 (1794).

80. *Holcus sorghum* L., Sp. Pl. 2: 1047 (1753). – TYPE: Herb. Clifford 468, Holcus 1 (BM [BM000647533], designated by Davidse in Cafferty et al., Taxon 49: 251 (2000)).

= *Sorghum bicolor* (L.) Moench, Methodus 207 (1794).

81. *Hydropyrum latifolium* Griseb. in Ledeb., Fl. Ross. 4: 466 (1853). – TYPE: Russia, Amur, in lacubus inter Schilka et Argun, 1833, N.S. Turczaninov s.n. (lectotype LE, designated by Camus, Rev. Int. Bot. Appl. Agric. Trop. 30: 54 (1950); isolectotypes GOET, K[2 sheets], L, LECB, P, W[2 sheets], US).

= *Zizania latifolia* (Griseb.) Hance ex F.Muell., Proc. Acclim. Soc. Victoria 1: 419 (1872).

*Note.* Ferdinand von Mueller made the combination in *Zizania* for this species considerably earlier than Stapf, who is generally cited as the author of the combination.

82. *Imperata koenigii* (Retz.) P. Beauv. var. *maior* Nees, Fl. Afr. Austr. Ill. 90 (1841). – TYPE: South Africa, Facoskraal, 1900–2000', 10 February 1832, *F.J. Drège* 4253 (lectotype P [P00443973], designated here; isolectotypes K, L, TUB, W[2 sheets]).  
 = *Imperata cylindrica* (L.) P. Beauv., Ess. Agrostogr. 165 (1812).

*Notes.* We presume that Nees's type was destroyed in Berlin, and therefore select as lectotype a sheet in the Paris Herbarium.

83. *Isachne confusa* Ohwi, Bull. Tokyo Sci. Mus. 18: 14 (1947). – TYPE: Indonesia, Banka, Muntok, 18 October 1917, *H.A.B. Bünnemeijer* 1577 (lectotype BO, designated by Jansen, Reinwardtia 2: 282 (1953); isolectotypes B, CAL, L[2 sheets], SING, US).

84. *Isachne schmidtii* Hack., Bot. Tidsskr. 24: 97 (1901). – TYPE: Thailand [Siam], Koh Chang Island, 1889-1900, *J. Schmidt s.n.* (lectotype W [1916-0021689], designated here, or possibly holotype; isolectotype US (fragment)).

85. *Isachne semitalis* Ridl., Fl. Malay Penins. 5: 237 (1925). – TYPE: Singapore, Tanglin, March 1894, *H.N. Ridley* 6110 (lectotype SING [SING0017766], designated here by Veldkamp; isolectotype K [K000290172]).  
 = *Isachne schmidtii* Hack., Bot. Tidsskr. 24: 97 (1901).

86. *Ischaemum apricum* Ridl., Fl. Malay Penins. 5: 203 (1925). – TYPE: Peninsular Malaysia, Penang, Waterfall Gardens, 16 December 1918, *I.H. Burkhill SFN* 4629 (lectotype K [K000290093], first step designated by Roberty, Boissiera 9: 332 (1960), second step designated here; isolectotypes ?G, SING [SING0219195], US).  
 = *Ischaemum ciliare* Retz., Obs. Bot. 6: 36 (1791).

87. *Ischaemum aristatum* L. var. *imbricatum* Hack. in A.DC. & C.DC., Monogr. Phan. 6: 203 (1889). – TYPE: India, Khasia, Churra, June 1850, *J.D. Hooker & T. Thomson s.n.* (lectotype K [K000245675], designated by Traiperm et al., Kew Bull. 67: 78 (2012); isolectotypes L, W).  
 = *Ischaemum barbatum* Retz., Observ. Bot. 6: 35 (1791).

88. *Ischaemum barbatum* Retz., Observ. Bot. 6: 35 (1791). – TYPE: Java, *Anon. s.n.* [?H.P. Wennerberg leg.] (holotype LD [1229226]).

89. *Ischaemum ciliare* Retz., Obs. Bot. 6: 36 (1791). – TYPE: *Anon s.n.* [? P. Osbeck leg.] (holotype LD [1229166]).

90. *Ischaemum commelynifolium* Stapf ex Ridl., Fl. Malay Penins. 5: 202 (1925). – TYPE: Peninsular Malaysia, Kedah, Kedah Peak, June 1893, *H.N. Ridley* 5152 (lectotype K [K000290149], first step designated by Roberty, Boissiera 9: 333 (1960), second step designated here; isolectotypes G, SING).

= *Ischaemum feildingianum* Rendle, J. Bot. 32: 101 (1894).

91. *Ischaemum feildingianum* Rendle, J. Bot. 32: 101 (1894). – TYPE: Peninsular Malaysia, Malacca, Gunong Ledang (Mt Ophir), growing on rock of Padang Batu, November 1892, *J.B. Feilding* s.n. (lectotype BM [BM000959777], first step designated by Roberty, Boissiera 9: 333 (1960), second step designated here; isolectotypes E, G, K, SING).

*Notes.* The collector (and his eponymous epithets) are often misspelled as Fielding.

92. *Ischaemum involutum* G.Forst., Fl. Ins. Austr. 73 (1786). – TYPE: Society Islands, *J.R. Forster* s.n. (lectotype UPS-THUNB [Herb. Thunberg 23948] [V-143195], designated by Nicolson & Fosberg, Regnum Veg. 139: 247 (2004)).

= *Thuarea involuta* (G.Forst.) R.Br. ex Sm. in Rees, Cycl. 35(II, 70) [unpaged] (1817).

93. *Ischaemum laeve* Ridl., J. Straits Branch Roy. Asiat. Soc. 44: 207 (1905). – TYPE: Singapore, Galang, *H.N. Ridley* 9143 (lectotype SING [SING0054936], designated here; isolectotypes G, K).

= *Ischaemum barbatum* Retz., Observ. Bot. 6: 35 (1791).

94. *Ischaemum macrurum* Stapf ex Ridl., Fl. Malay Penins. 5: 203 (1925). – TYPE: Singapore, 27 October 1893, *R.W. Hullett* s.n. (lectotype K [K000290111], designated by Jansen, Reinwardtia 2: 298 (1953)).

= *Ischaemum timorense* Kunth, Révis. Gramin. 369, t. 98 (1830).

*Notes.* Later, Roberty (1960, p. 334) and Traiperm et al. (2012, p. 78) designated *Ridley* 10013 as lectotype, which is to be rejected.

95. *Ischaemum maculatum* Stapf ex Ridl., Fl. Malay Penins. 5: 202 (1925). – TYPE: Peninsular Malaysia, Johore, road to Castlewood, 1898, H.N. Ridley 9170 (lectotype K [K000290178], first step designated by Roberty, Boissiera 9: 334 (1960), second step designated here; isolectotypes G, SING).

= *Ischaemum feildingianum* Rendle, J. Bot. 32: 101 (1894).

96. *Ischaemum magnum* Rendle, J. Bot. 32: 102 (1894). – TYPE: Singapore, Blakan Mati [Pulau Sentosa], October 1892, J.B. Feilding s.n. (lectotype BM [BM000959779], designated by Traiperm et al., Kew Bull. 67: 78 (2012); isolectotypes E, G, K).

= *Ischaemum barbatum* Retz., Observ. Bot. 6: 35 (1791).

97. *Ischaemum muticum* L., Sp. Pl. 2: 1049 (1753). – TYPE: *Anon. s.n.* (lectotype LINN [Herb. Linn. 1214.1], designated by Renvoize in Jarvis et al., List Linn. Gen. Names Types 57 (1993)).

98. *Ischaemum repens* Roxb., Fl. Ind. 1: 325 (1820). – TYPE: [unpublished illustration] Icones Roxburghianaæ 2108 (lectotype K, designated here).

= *Ischaemum muticum* L., Sp. Pl. 1049 (1753).

*Notes.* There seems to be no original material in the form of herbarium specimens available for this name (Forman, 1997) so the Roxburgh drawing in the Kew collection (on same sheet as 2109) is here selected as lectotype (Fig. 3).

99. *Ischaemum rugosum* Salisb., Icon. Stirp. Rar. 1: 1, t. 1 (1791). – TYPE: Locality unknown, *J.G. König s.n.* (lectotype BM [BM000959774], designated by Rendle, J. Bot. 32: 103 (1894)).

100. *Ischaemum secundatum* Walter, Fl. Carol. 249 (1788). – TYPE: USA, South Carolina, Beaufort County, Beaufort, roadbank on U.S. Rt. 21, 27 June 1956, H.E. Ahles 15602 (neotype GH [GH00277001], designated by Ward, J. Bot. Res. Inst. Texas 2(1): 479 (2008); isoneotypes GA, NCU, NY).

= *Stenotaphrum secundatum* (Walter) Kuntze, Revis. Gen. Pl. 2: 794 (1891).

101. *Ischaemum timorense* Kunth, Révis. Gramin. 369, t. 98 (1830). – TYPE: Timor, *Desfontaines s.n.* (not traced).

102. *Lagurus cylindricus* L., Syst. Nat., ed. 2, 2: 878 (1759). – TYPE: *Gérard s.n.* (lectotype LINN [Herb. Linn. 96.2], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 700. (1982)).

= *Imperata cylindrica* (L.) Raeusch., Nomencl. Bot. 3: 10 (1797).

103. *Leersia hexandra* Sw., Prodr. 21 (1788). – TYPE: *O. Swartz s.n.* (lectotype BM, designated by Clayton, Fl. Trop. E. Africa, Gram. (Part 1): 25 (1970); isolectotypes S, SBT).

104. *Lophatherum gracile* Brongn. in Duperr., Voy. Monde, Phan. 50, t. 8 (1831). – TYPE: Amboyna [Ambon], *J.S.C. Dumont d'Urville s.n.* (lectotype P [P00624191], designated here; possible isolectotype P [P00624190]).

105. *Melica latifolia* Roxb. ex Hornem., Hort. Bot. Hafn. Suppl. 117 (1819). – TYPE: India, Colles Garrow [Garrow Hills], *J.O. Voigt s.n.* (neotype C [C10017246], designated here; possible isoneotype C [C10017247]).

= *Thysanolaena latifolia* (Roxb. ex Hornem.) Honda, J. Fac. Sci. Univ. Tokyo, Sect. 3, Bot. 3: 312 (1930).

*Notes.* The specimen in the Copenhagen herbarium that is annotated as holotype of Hornemann's name has 'mis. Voigt' written on the back – likely to mean 'misit Voigt', i.e. Voigt he sent. Voigt probably refers to Johann Otto Voigt who only took up a post at Serampore in 1826 (Stafleu & Cowan, 1986). There is nothing on the specimen to indicate that Roxburgh saw it. It seems unlikely that the specimen represents original material, but in order to maintain continuity and as the specimen is reasonable, it is here selected as a neotype in the absence of any original material.

106. *Milium cimicinum* L., Mant. Pl. Altera 184 (1771). – TYPE: *Anon. s.n.* (neotype LINN [Herb. Linn. 83.2], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 617 (1982)).

= *Alloteropsis cimicina* (L.) Stapf, Fl. Trop. Afr. 9: 487 (1919).

107. *Milium compressum* Sw., Prodr. 24 (1788). – TYPE: Jamaica, *R. Shakespeare s.n.* (lectotype BM [BM000578790], designated by Pohl & Davidse, Fl. Mesoamer. 6: 357 (1991)).

= *Axonopus compressus* (Sw.) P. Beauv., Ess. Agrostogr. 12, 154, 167 (1812).

**Fig. 3.** Photograph of the lectotype of *Ischaemum repens* Roxb., *Icones Roxburghianae* 2108 in the Kew collection. Note that 2109 is drawn on the same sheet, but is excluded from the lectotype. Reproduced with the kind permission of the Director and the Board of Trustees, Royal Botanic Gardens, Kew.

108. *Milium globosum* Thunb. in Murray, Syst. Veg., ed. 14: 109 (1784). – TYPE: Japan, C.P. Thunberg s.n. (lectotype UPS-THUNB [V-002041], designated here).  
 = *Isachne globosa* (Thunb.) Kuntze, Revis. Gen. Pl. 2: 778 (1891).

109. *Milium ramosum* Retz., Observ. Bot. 6 (1791) 22. – TYPE: *Anon.* s.n. (lectotype LD [LD1222805], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 571 (1983)).  
 = *Eriochloa procera* (Retz.) C.E.Hubb., Bull. Misc. Inform. Kew 1930: 256 (1930).

110. *Panicum* L. sect. *Gibbosae* Hook.f., Fl. Brit. India 7: 28, 56 (1896). – TYPE: *Panicum patens* L. [= *Cyrtococcum patens* (L.) A.Camus] (lectotype designated here by Veldkamp).  
 = *Cyrtococcum* Stapf, Fl. Trop. Afr. 9:15 (1917)

111. *Panicum accrescens* Trin., Sp. Gram. 1: 164, t. 88 (1827). – TYPE: [published illustration] Trinius, Sp. Gram. 1: t. 88 (1827) (lectotype designated here by Veldkamp).  
 = *Cyrtococcum accrescens* (Trin.) Stapf, Hooker's Icon. Pl. 31: t. 3096 (1922).

*Notes.* Trinius cited “specimen nepalense” in the protologue but no candidate in the Trinius grass herbarium is available, so Trinius’s plate is here selected as lectotype.

112. *Panicum acutiglumum* Steud., Syn. Pl. Glumac. 1: 66 (1853). – TYPE: Peninsular Malaysia, Malacca, H. Cuming 2287 (lectotype K [K000290317], designated by Gilliland, Gard. Bull. Singapore 20: 314 (1964); isolectotypes A, E, GH, L, MO, P, W[3 sheets]).  
 = *Hymenachne amplexicaulis* (Rudge) Nees in Mart., Fl. Bras. Enum. Pl. 2: 276 (1829).

*Notes.* It seems likely that Cuming’s collection was from Malacca rather than the Philippines.

113. *Panicum amplexicaule* Rudge, Pl. Guian. 1: 21, t. 27 (1805). – TYPE: Guiana [French Guiana], J. Martin s.n. (holotype BM [BM000938736]).  
 = *Hymenachne amplexicaulis* (Rudge) Nees in Mart., Fl. Bras. Enum. Pl. 2: 267 (1829).

*Notes.* Stearn & Williams (1957) provide an account of Rudge and his purchase of Martin’s French Guiana collections as the spoils of war.

114. *Panicum angustum* Trin., Sp. Gram. 3: t. 334 (1835). – TYPE: *N. Wallich s.n.* (lectotype LE [Herb. Trinius 578.1], designated here by Veldkamp).  
 = *Sacciolepis indica* (L.) Chase, Proc. Biol. Soc. Washington 21: 8 (1908).

115. *Panicum arnottianum* Nees ex Steud., Syn. Pl. Glumac. 1: 59 (1853). – TYPE: Ceylon [Sri Lanka], 1829, *J. Macrae s.n.* [R. Wight 36] (lectotype B [B100366169], designated here; probable isolectotype CGE).  
 = *Ottochloa nodosa* (Kunth) Dandy, J. Bot. 69: 55 (1931).

*Notes.* The protologue refers to ‘P. antidotale var. Hb Wight Ceylon, Java’. The sheet in B has a Herb. Wight prop. label that is annotated as ‘Panicum antidotale var.’ Other notes on the sheet seem to indicate that this specimen was in Nees von Esenbeck’s herbarium having been received from John Lindley. There can be little doubt that this sheet represents original material for this name and it is here selected as lectotype. A sheet from Lindley’s herbarium in CGE is also annotated with the name by Nees and is a Macrae collection from Ceylon dated 1829, but does not have any indication of a connection to Robert Wight. It is here considered a probable isolectotype.

116. *Panicum auritum* J.Presl ex Nees in Mart., Fl. Bras. Enum. Pl. 2: 176 (1829). – TYPE: Philippines, *T.P.X. Haenke s.n.* (lectotype MO [MO-156243], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 46 (1899); isolectotypes BM, HAL, LE [Herb. Trinius 592.2], PR [sheet nos. 194822A and B, 194823A and B, 194824A, B and C], W[3 sheets]).

117. *Panicum barbatum* Lam., Tabl. Encycl. 1: 171 (1791). – TYPE: *P. Commerson s.n.* (lectotype P-LA [P00307246], designated by Veldkamp, Blumea 39: 375 (1994); isolectotype US (fragment)).  
 = *Setaria barbata* (Lam.) Kunth, Révis. Gramin. 1: 47 (1829).

118. *Panicum brevifolium* L., Sp. Pl. 1: 59 (1753). – TYPE: India, *Anon. s.n.* (lectotype LINN [Herb. Linn. 80.64], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 496 (1982)).

119. *Panicum burmanni* Retz., Observ. Bot. 3: 10 (1783). – TYPE: *J.G. König s.n.* (lectotype LD [LD1244466], designated by Fischer, Bull. Misc. Inform. Kew 1932: 73 (1932); possible isolectotypes BM[3 sheets], C, LINN, S).  
 = *Oplismenus burmanni* (Retz.) P. Beauv., Ess. Agrostogr. 54, 168, 169, 170 (1812).

*Notes.* The epithet *burmanni*, celebrating Burman as Burmannius, is correct and not to be corrected to *burmannii* or *burmanii*.

120. *Panicum cambogiense* Balansa, J. Bot. (Morot) 4: 142 (1890). – TYPE: Cambodge [Cambodia], 1875, A. Godefroy 62 (lectotype L [L0044815], designated by Veldkamp, Blumea 41: 195 (1996); isolectotypes K [K000290303] (fragment), P). = *Panicum luzonense* J.Presl in C.Presl, Reliq. Haenk. 1: 308 (1830).

121. *Panicum carinatum* J.Presl in C.Presl, Reliq. Haenk. 1: 309 (1830). – TYPE: Philippines, Luzon, T.P.X. Haenke s.n. (lectotype MO [MO-2151007], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 46 (1899); isolectotypes BM, HAL, LE [Herb. Trinius 620.1], PR [sheet nos. 194825A-E, 194826A-C], S (fragment), W[3 sheets]). = *Cyrtococcum accrescens* (Trin.) Stapf, Hooker's Icon. Pl. 31: t. 3096 (1922).

122. *Panicum ciliare* Retz., Observ. Bot. 4: 16 (1786). – TYPE: China, Cant[on], [H.P. Wennerberg s.n.] (lectotype LD [LD1244766], designated by Blake, Proc. Roy. Soc. Queensland 81: 10 (1970)). = *Digitaria ciliaris* (Retz.) Koeler, Descr. Gram. 27 (1802).

123. *Panicum colonum* L., Syst. Nat., ed. 10, 2: 870 (1759). – TYPE: *P. Browne* s.n. (lectotype LINN [Herb. Linn. 80.23], designated by Hitchcock, Contr. U.S. Natl. Herb. 12: 119 (1908)). = *Echinochloa colona* (L.) Link, Hort. Berol. 2: 209 (1833), as ‘colonum’.

124. *Panicum compositum* L., Sp. Pl. 1: 57 (1753). – TYPE: Herb. Hermann vol. 3, fol. 45 (lectotype BM [BM000621970], designated by Hitchcock, U.S.D.A. Bull. 772: 238 (1920)). = *Oplismenus compositus* (L.) P.Beauv., Ess. Agrostogr. 54, 168, 169 (1812).

125. *Panicum concinnum* Nees in Hooker's J. Bot. Kew Gard. Misc. 2: 97 (1850), nom. illeg., non Schrad. (1838). – TYPE: *H. Cuming* 2284 (lectotype CGE [06335(CGE)], designated by Veldkamp, Blumea 41: 203 (1996); isolectotypes E, K, L, MO, P). = *Panicum sarmentosum* Roxb., Fl. Ind. 1: 311 (1820).

126. *Panicum crassiaciculatum* Merr., Philipp. J. Sci. 1, Suppl. 5: 356 (1906). – TYPE: Philippines, Balabac Island, October 1906, E.D. Merrill 5387 (lectotype US [US00604218], designated here by Veldkamp; isolectotype W).  
= *Acroceras munroanum* (Balansa) Henrard, Blumea 3: 445 (1940).

127. *Panicum crus-galli* L., Sp. Pl. 1: 56 (1753), as ‘Crusgalli’. – TYPE: [North America] Anon. s.n. [P. Kalm leg.] (lectotype LINN [Herb. Linn. 80.18], designated by Hitchcock, Contr. U.S. Natl. Herb. 12: 117 (1908)).

= *Echinochloa crus-galli* (L.) P.Beauv., Ess. Agrostogr. 53, 161, 169, t. 11, f. 2 (1812).

128. *Panicum dactylon* L., Sp. Pl. 1: 58 (1753). – TYPE: Sweden, Uppsala, cultivated, Anon. s.n. (lectotype LINN [Herb. Linn. 80.35], designated by Clayton & Harlan, Kew Bull. 24: 186 (1970)).

= *Cynodon dactylon* (L.) Pers., Syn. Pl. 1: 85 (1805).

129. *Panicum dilatatum* Steud., Syn. Pl. Glumac. 1: 39 (1853). – TYPE: India, Courtallam, R. Wight 2340 (lectotype K [K000245353], first step designated by Henrard, Monogr. Gen. Digitaria 241 (1950), second step designated here).

= *Digitaria setigera* Roth, Syst. Veg. 2: 474 (1817).

130. *Panicum glumare* Trin., Gram. Panic. 143 (1826). – TYPE: New Zealand (probably wrongly localised), Anon. s.n. (lectotype LE [Herb. Trinius 727.1], designated by Veldkamp, Blumea 41: 420 (1996)).

= *Urochloa glumaris* (Trin.) Veldkamp, Blumea 41: 420 (1996).

131. *Panicum hirtifolium* Ridl., Mat. Fl. Malay. Penins. 3: 141 (1907). – TYPE: Peninsular Malaysia, Selangor, Semangkok, 1904, H.N. Ridley 12046 (lectotype SING [SING0054931], designated here by Veldkamp; isolectotype K [K000290294]).

= *Panicum brevifolium* L., Sp. Pl. 1: 59 (1753).

132. *Panicum incomtum* Trin., Gram. Panic. 200 (1826). – TYPE: Philippines, Manila, A. von Chamisso s.n. (lectotype LE [Herb. Trinius 760.2], designated here by Veldkamp).

= *Panicum sarmentosum* Roxb., Fl. Ind. 1: 311 (1820).

133. *Panicum italicum* L., Sp. Pl. 1: 56 (1753). – TYPE: *Anon s.n.* (lectotype L (Herb. van Royen) [sheet 912.356-242], designated by Veldkamp in Cafferty et al., Taxon 49: 253 (2000)).  
 = *Setaria italicica* (L.) P.Beauv., Ess. Agrostogr. 51, 170, 178 (1812).
134. *Panicum latifolium* L. var. *majus* Hook.f., Fl. Brit. India 7: 39 (1896). – TYPE: Peninsular Malaysia, Perak, Goping, October 1888, *King's Collector* [H.H. Kunstler] 876 (lectotype K [K000290228], designated here or possibly holotype; isolectotypes CAL, SING).  
 = *Acroceras tonkinense* (Balansa) C.E.Hubb. ex Bor, Indian Forest Rec. 1: 78 (1938).
135. *Panicum laxum* Sw., Prodr. 23 (1788). – TYPE: Jamaica, *O.P. Swartz s.n.* (lectotype S [S-R-3977], designated by Hitchcock, Contr. U.S. Natl. Herb. 12: 143 (1908); possible isolectotypes UPS [2 sheets], US (fragment)).
136. *Panicum luzonense* J.Presl in C.Presl, Reliq. Haenk. 1: 308 (1830). – TYPE: Philippines, Luzon, Sorsogon, *T.P.X. Haenke s.n.* (lectotype PR [sheet no. 612343], designated by Veldkamp, Blumea 41: 195 (1996); isolectotype LE [Herb. Triniius 800.1], W).
137. *Panicum malaccense* Trin., Gram. Panic. 204 (1826). – TYPE: *J.G. Klein 715* (lectotype LE [Herb. Triniius 806.1] (fragment), designated by Prakash & Jain, Fasc. Fl. India 14: 39 (1984); isolectotypes B-W [B-W01737010], HAL (fragment)).  
 = *Sphaerocaryum malaccense* (Trin.) Pilg., Feddes Repert. 45: 2 (1938).
138. *Panicum maximum* Jacq., Icon. Pl. Rar. 1: 2, t. 13 (1781). – TYPE: Guadeloupe, *Anon. s.n.* (lectotype W [W-0011326], designated by Zuloaga, Darwiniana 22: 24 (1979); isolectotype BM).  
 = *Urochloa maxima* (Jacq.) R.D.Webster, Austral. Paniceae 241 (1987).
139. *Panicum meyerianum* Nees, Fl. Afr. Austral. Ill. 32 (1841). – TYPE: CBSP [Capitis Bonae Spei Promontorium = Cape of Good Hope], *J.F. Drège s.n.* (lectotype LE [Herb. Triniius 825.2], designated here by Veldkamp; possible isolectotypes G[3 sheets], HAL, K, P, S, TUB, W).  
 = *Eriochloa meyeriana* (Nees) Pilg. in Engler, Nat. Pflanzenfam., ed. 2, 14e: 56 (1940).

140. *Panicum microbachne* J.Presl in C.Presl, Reliq. Haenk. 1: 298 (1830). – TYPE: Philippines, Luzon, Sorsogon, *T.P.X. Haenke s.n.* (lectotype PR [sheet no. 24357], designated by Reeder, J. Arnold Arbor. 29: 292 (1948), excluding central plant labelled Mexico; isolectotypes BISH, HAL, US (fragment), W).  
= *Digitaria setigera* Roth, Syst. Veg. 2: 474 (1817).

*Notes.* When Reeder designated the lectotype for *Panicum microbachne* he excluded the central plant. It is not clear that this plant is currently labelled as being from Mexico. The specimen was remounted in recent decades (O. Šídá pers. comm.) and this may have led to a different arrangement of plants and labels. The collecting locations of Haenke's specimens are frequently questionable.

141. *Panicum miliiforme* J.Presl, Reliq. Haenk. 1: 300 (1830). – TYPE: Philippines, Luzon, *T.P.X. Haenke s.n.* (lectotype MO [MO-157631], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 47 (1899); isolectotypes HAL, PR [sheet nos. 194810A and B], US (fragment), W[3 sheets]).  
= *Urochloa subquadripala* (Trin.) R.D.Webster, Austral. Paniceae 252 (1987).

142. *Panicum minutulum* Gaudich. in Freyc., Voy. Uranie: 410 (1829). – TYPE: Mariana Islands, *C. Gaudichaud-Beaupré s.n.* (lectotype P [P01934348], first step designated by Fosberg & Sachet, Micronesica 18: 55-56 (1984), second step designated here by Veldkamp; possible isolectotypes B, P [P01934347]).  
= *Isachne minutula* (Gaudich.) Kunth, Rév. Gram. 2: 407, t. 117 (1831).

143. *Panicum multinode* J.Presl in C.Presl, Reliq. Haenk. 1: 303 (1830), nom. illeg., non Lam. (1798). = *Panicum nodosum* Kunth, Enum. Pl. 1: 97 (1833). – TYPE: [Philippines, Luzon, Sorsogon] *T.P.X. Haenke s.n.* (lectotype MO [MO-2114722], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 47 (1899); isolectotypes B, BM, HAL, LE [Herb. Trinius 844.1], PR [sheet nos. 194817A and B, 194818A and B], US (fragment), W[3 sheets]).  
= *Ottochloa nodosa* (Kunth) Dandy, J. Bot. 69: 55 (1931).

144. *Panicum munroanum* Balansa, J. Bot. (Morot) 4: 140 (1890). – TYPE: Sri Lanka, CP 3244 (lectotype K [K000245280], right-hand plant, designated here).  
= *Acroceras munroanum* (Balansa) Henrard, Blumea 3: 445 (1940).

145. *Panicum muticum* Forssk., Fl. Aegypt.-Arab. 20 (1775). – TYPE: Egypt, Rosetta, *P. Forsskål 86* (lectotype C [C10002726], designated by Blake, Proc. Roy. Soc. Queensland 81: 5 (1969); isolectotype BM).  
= *Urochloa mutica* (Forssk.) T.Q.Nguyen, Novosti Sist. Vyssh. Rast. 3: 13 (1966).

146. *Panicum myosuroides* R.Br., Prodr. 1: 189 (1810). – TYPE: New Holland, [Australia], Endeavour River, 1770, *J. Banks & D. Solander s.n.* (lectotype BM [BM000793678], first step designated by Webster, Pan. Austral. 202 (1987), second step designated here; possible isolectotypes BM [BM000793679], CANB [2 sheets]).  
 = *Sacciolepis myosuroides* (R.Br.) Chase ex E.G.Camus & A.Camus, Fl. Indo-Chine 7: 460 (1922).

*Notes.* For the entry under this name in Chase & Niles (1962, p. 551), ““T” = Littora novae hollandiae intra tropicum.” is not a direct reference to the type but one of Robert Brown’s codes for general localities in New Holland [Australia].

147. *Panicum ovalifolium* Poir., Encycl., Suppl. 4: 279 (1816). – TYPE: Guinea, *Anon. s.n.* (holotype P [P00442141]).  
 = *Panicum brevifolium* L., Sp. Pl. 1: 59 (1753).

148. *Panicum pallidefuscum* Schumach., Beskr. Guin. Pl. 58 (1827). – TYPE: Guinea [Ghana], *P. Thonning* 344 (lectotype C [C10004269], designated here; isolectotypes C[4 sheets], K (fragment)).

= *Setaria parviflora* (Poir.) Kerguélen, Lejeunia n.s. 120: 161 (1987).

149. *Panicum palmifolium* J.Koenig, Naturforscher (Halle) 23: 208 (1788), as ‘*palmaefolium*’. – TYPE: *Anon. s.n.* (neotype K [K000245334], designated here).  
 = *Setaria palmifolia* (J.Koenig) Stapf, J. Linn. Soc., Bot. 42: 186 (1914).

*Notes.* Veldkamp (1994, p. 379) referred to the holotype of *Panicum palmifolium* as a Koenig collection in BM. No such specimen has been located. Neither is there a relevant Koenig specimen in the Desfontaines Herbarium in Florence (C. Nepi, pers. comm.), contrary to what is stated in Tropicos [www.tropicos.org]. We here select as neotype a specimen in K which came from J.P. Rottler’s herbarium. This specimen bears a ticket in Rottler’s hand inscribed with Koenig’s name and place of publication. It was annotated by Veldkamp in 2010 as holotype of *Panicum palmifolium*. Conceivably the specimen could have come from or been identified by Koenig, but given the high degree of doubt over this we prefer to designate it as a neotype.

150. *Panicum paludosum* Roxb., Fl. Ind. 1: 310 (1820). – TYPE: *W. Roxburgh s.n.* [EIC 8711[A]] (lectotype K-W [K001131333], designated here).

*Notes.* There are Roxburgh specimens of this species in BM, BR and K. Only the specimen in the Wallich Herbarium bears Roxburgh’s handwritten ticket with the name, so it is selected as the lectotype.

151. *Panicum patens* L., Sp. Pl. 1: 58 (1753). – TYPE: *Anon. s.n.* (lectotype LINN [Herb. Linn. 80.63], designated by Mitra & Jain in Manilal, Bot. Hist. Hort. Malabaricus 151 (1980)).

= *Cyrtococcum patens* (L.) A.Camus, Bull. Mus. Natl. Hist. Nat. 27: 118 (1921).

152. *Panicum pictum* J.Koenig, Naturforscher (Halle) 23: 204 (1788). – TYPE: *J.G. König s.n.* (lectotype LD [1220586], designated here).

= *Echinochloa picta* (J.Koenig) P.W.Michael, Philipp. J. Weed Sci. 5: 18 (1978).

153. *Panicum piligerum* F.Muell. ex Benth., Fl. Austral. 7: 477 (1878). – TYPE: Australia, Victoria River, *F. von Mueller s.n.* (lectotype K [K000958892], first step designated by Hughes, Bull. Misc. Inform. Kew 1923: 315 (1923), second step designated by Veldkamp, Blumea 41: 425 (1996), or possibly holotype; isolectotypes BRI (fragment), MEL).

= *Urochloa piligera* (F.Muell. ex Benth.) R.D.Webster, Austral. Paniceae 246 (1987).

154. *Panicum polystachion* L., Syst. Nat., ed. 10, 2: 870 (1759). – TYPE: [published illustration] Rumphius, Herb. Amb. 6: t. 7, f. 2B (1750) (lectotype designated by Merrill, Interpret. Rumph. Herb. Amb. 91 (1917)).

= *Setaria flava* (Nees) Kunth, Rév. Gram. 1: 46 (1829).

*Notes.* *Panicum polystachion* L. was long used for a species of *Panicum* that was recently transferred to *Cenchrus* and was lectotypified in this sense by van der Zon (1992). However, Merrill had already lectotypified the name to the Rumphius plate cited by Linnaeus which represents *Setaria flava* (Nees) Kunth. The correct name for *Panicum polystachion* auctt. plur. becomes *Cenchrus setosus* Sw.

155. *Panicum pruriens* Fisch. ex Trin., Gram. Panic. 77 (1826). – TYPE: [French Polynesia, Marquesas], Nukahiva, *G.H. von Langsdorff s.n.* (lectotype LE [Herb. Trinius 906.5], designated by Henrard, Monogr. Gen. Digitaria 598 (1950); isolectotype BM).

= *Digitaria setigera* Roth, Syst. Veg. 2: 474 (1817).

156. *Panicum radicosum* J.Presl in C.Presl, Reliq. Haenk. 1: 297 (1830). – TYPE: Philippines, Luzon, Sorsogon, *T.P.X. Haenke s.n.* (lectotype PR [sheet no. 194788], designated by Blake, Proc. Roy. Soc. Queensland 81: 19 (1969)).

= *Digitaria radicosa* (J.Presl) Miq., Fl. Ned. Ind. 3: 437 (1857).

157. *Panicum repens* L., Sp. Pl., ed. 2, 1: 87 (1762). – TYPE: *C. Alströmer* 2a (lectotype LINN [Herb. Linn. 80.47], designated by Hitchcock & Chase, Contr. US Natl. Herb. 15: 85 (1910)).

158. *Panicum reticulatum* Thwaites ex Trimen, J. Bot. 23: 271 (1885), nom. illeg., non Torrey (1852). = *Panicum caesium* Nees ex Hook. f., Fl. Brit. India 7: 48 (1896), nom. illeg., non Nees (1837). = *Panicum cruciabile* Chase, J. Arnold Arbor. 20: 309 (1939). – TYPE: Sri Lanka, CP 3890 (lectotype PDA, designated by Veldkamp, Blumea 41: 195 (1996)).  
= *Panicum luzonense* J.Presl, Reliq. Haenk. 1: 308 (1830).

159. *Panicum ridleyi* Hack., Bot. Tidsskr. 24: 98 (1901). – TYPE: Peninsular Malaysia, Malacca, Pulau Besar, September 1889, H.N. Ridley 61 (lectotype W [1916-0024255], designated here; isolectotype SING).  
= *Acroceras tonkinense* (Balansa) C.E.Hubb. ex Bor, Indian Forest Rec. 1: 78 (1938).

160. *Panicum rubiginosum* Steud., Syn. Pl. Glumac. 1: 50 (1853). – TYPE: Philippines, H. Cuming 551 (lectotype P [P00642103], designated here; isolectotypes BM, CGE, G [3 sheets], K, L, MO, P [2 sheets], W).  
= *Setaria parviflora* (Poir.) Kerguélen, Lejeunia, n.s., 120: 161 (1987).

161. *Panicum sarmentosum* Roxb., Fl. Ind. 1: 311 (1820). – TYPE: *W. Roxburgh* s.n. (lectotype BR [BR0000006883584], designated here).

*Notes.* The Roxburgh specimen in BR seems to be the only original herbarium material available for this name. It bears a label in Roxburgh's hand.

162. *Panicum sphacelatum* Schumach., Beskr. Guin. Pl. 58 (1827). – TYPE: Guinea (Ghana), *P. Thonning* s.n. (lectotype C [C10004281], designated by Hepper, W. Afr. Herb. Isert Thonning 150 (1976); possible isolectotypes C [[C10004288], K]).  
= *Setaria sphacelata* (Schumach.) Stapf & C.E.Hubb., Fl. Trop. Afr. 9: 795 (1930).

163. *Panicum subquadriparum* Trin., Gram. Panic. 145 (1826). – TYPE: Marianas, insula Guahan, *J.F. von Eschscholtz & A. de Chamisso* s.n. (lectotype LE [Herb. Trinius 974.1], left-hand specimen, designated by Veldkamp, Blumea 41: 429 (1996)).  
= *Urochloa subquadripara* (Trin.) R.D.Webster, Austral. Paniceae 252 (1987).

164. *Panicum tenuissimum* Mart. ex Schrank, Denkschr. Bayer. Bot. Ges. Regensb. 2: 26 (1822). – TYPE: Brazil, in sylvis iter Sebastianopolin et Soteropolin, *C.F.P. von Martius* 5495 (lectotype M [M-0104367], first step designated by Renvoize, Grasses Bahia 61 (1984), second step designated here).  
 = *Sporobolus tenuissimus* (Mart. ex Schrank) Kuntze, Revis. Gen. Pl. 3: 369 (1898).

*Notes.* There are two Martius specimens of this taxon in the Munich Herbarium. One has what seems to be an original field ticket numbered 5495 and the other one labelled 5496. The former, which seems to be treated as the ‘holotype’, is here selected as lectotype.

165. *Panicum tonkinense* Balansa, J. Bot. (Morot) 4: 140 (1890). – TYPE: Vietnam, Bois des environs de Tu-Phap, May 1887, *B. Balansa* 1646 (lectotype L [L0043504], designated here by Veldkamp; isolectotypes L[2 sheets], K, P, US).  
 = *Acroceras tonkinense* (Balansa) C.E.Hubb. ex Bor, Indian Forest Rec. 1: 78 (1938).

166. *Panicum trichocladum* Hack. ex K.Schum., Pflanzenw. Ost-Afrikas 2/3C: 102 (1895). – TYPE: Tanzania, Kilimandscharo, July 1887, *H. Meyer* 140 (lectotype B [B 10 0715462], designated by Vorontsova, Candollea 73: 178 (2018); isolectotype US [US00140067]).

167. *Paspalum bincorne* Lam., Tabl. Encycl. 1: 176 (1791). – TYPE: *P. Sonnerat* s.n. (holotype P-LA [P00563991]; isotype US (fragment)).  
 = *Digitaria bicornis* (Lam.) Roem. & Schult., Syst. Veg. 2: 470 (1817).

168. *Paspalum cartilagineum* J.Presl in C.Presl, Reliq. Haenk. 1: 216 (1830). – TYPE: [Philippines, Luzon, Sorsogon] *T.P.X. Haenke* s.n. (lectotype MO [MO-2114871], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 49 (1899); isolectotypes HAL, K (fragment), LE [Herb. Trinius 0529.04-b], US (fragment), W).  
 = *Paspalum scrobiculatum* L. var. *bispicatum* Hack. ex Merr., Fl. Manila 86 (1912).

169. *Paspalum chinense* Nees in Hook. & Arn., Bot. Beechey Voy. (5): 231 (1836), as ‘*Paspalus chinensis*’. – TYPE: China, Macao, Summer 1830, *G.H. Vachell* s.n. (lectotype CGE [06343(CGE)], designated by Henrard, Monogr. Gen. Digitaria 122 (1950)).

- = *Digitaria violascens* Link, Hort. Berol. 1: 229 (1827).

*Notes.* Noltie (2010) showed that this part of the Hooker and Arnott work was published in 1836 rather than 1837 as widely stated.

170. *Paspalum commersonii* Lam., Tabl. Encycl. 1: 175, t. 43 (1791). – TYPE: Isle de France [Mauritius], *P. Commerson s.n.* (lectotype P-JU [P00665168] [Herb. Juss. 2629], first step designated by Clayton, Kew Bull. 30: 101 (1975), second step designated here; isolectotypes L, P-LA [P00563992]).

= *Paspalum scrobiculatum* L. var. *bispicatum* Hack. ex Merr., Fl. Manila: 86 (1912).

*Notes.* The sheet in the Lamarck Herbarium bears two labels. On the lower left there is a field label with ‘Isle de France C.<sup>om</sup>’, and on the right one with ‘Coromandel C.<sup>om</sup>’. If these are separate gatherings from Mauritius and India, the juxtaposing of labels and herbarium material would indicate that the Mauritius specimen consists of a sterile tiller and a section of rhizome. It therefore seems prudent to select the better specimen from the de Jussieu herbarium as the second-step lectotype.

171. *Paspalum conjugatum* P.J.Bergius, Acta Helv. Phys.-Math. 7: 129, t. 8 (1772). – TYPE: Suriname, 4 August 1755, *D. Rolander s.n.* (lectotype SBT [Bergius Herb. 1.2.7.36], designated by de Koning & Sosef, Blumea 30: 290 (1985)).

172. *Paspalum fissifolium* Raddi, Agrostogr. Bras. 26 (1823), as ‘*Paspalus fissifolius*’. – TYPE: *Raddi s.n.* (lectotype PI, designated by Judziewicz, Fl. Guianas, ser. A, Phanerogams 8: 98 (1990); isolectotypes BAA, BM, FI, G, K, US (fragment), W). = *Axonopus fissifolius* (Raddi) Kuhlm., Relat. Commiss. Linhas Telegr. Estratég. Matto Grosso Amazonas 5(11): 87 (1922).

*Notes.* Baldini & Longhi Wagner (2006, p. 473) selected the PI sheet as lectotype but this had already been effectively done by Judziewicz (1990).

173. *Paspalum fuscescens* J.Presl in C.Presl, Reliq. Haenk. 1: 213, 351 (1830). – TYPE: [USA, California, Monte-Rey] *T.P.X. Haenke s.n.* (lectotype MO [MO-440063], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 49 (1899); isolectotypes BM, BR, HAL, L, PR, US (fragment), W).

= *Digitaria fuscescens* (J.Presl) Henrard, Meded. Rijks-Herb. 61: 8 (1930).

174. *Paspalum longiflorum* Retz., Observ. Bot. 4: 15 (1786). – TYPE: *J.G. König s.n.* (lectotype LD, designated by Henrard, Monogr. Gen. Digitaria 410 (1950); isolectotypes BM, K).

= *Digitaria longiflora* (Retz.) Pers., Syn. Pl. 1: 85 (1805).

175. *Paspalum longifolium* Roxb., Fl. Ind. 1: 283 (1820). – TYPE: *W. Roxburgh s.n.* (lectotype BM [BM000959597], designated by de Koning & Sosef, Blumea 30: 297 (1985)).

= *Paspalum sumatrense* Roth in Roem. & Schult., Syst. Veg. 2: 316 (1817).

176. *Paspalum molle* J.Presl in C.Presl, Reliq. Haenk. 1: 213 (1830), nom. illeg., non Poir. (1804). – *Paspalum mollicomum* Kunth, Enum. Pl. 1: 47 (1833). – TYPE: [Philippines, Luzon] *T.P.X. Haenke s.n.* (lectotype MO [MO-2151004], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 50 (1899); isolectotypes B, BM, LE [Herb. Trinius 495.1], PR [197877-B], US (fragment), W).

= *Digitaria mollicoma* (Kunth) Henrard, Blumea 1: 97 (1934).

177. *Paspalum orbiculare* G.Forst., Fl. Ins. Austr. 7 (1786). – TYPE: *Forster s.n.* (syntypes C [C10017146], K [K000215190], UPS).

*Notes.* Nicolson & Fosberg (2004, p. 239) confirm that there is no original material for this name in the Goettingen Herbarium as widely cited.

178. *Paspalum platicaulon* Poir., Tabl. Encycl. 5: 34 (1804). – TYPE: Puerto Rico, *Ledru s.n.* (holotype P-LA [P00564007]).

= *Axonopus compressus* (Sw.) P.Beauv., Ess. Agrostogr. 12, 154, 167 (1812).

179. *Paspalum plicatulum* Michx., Fl. Bor.-Amer. 1: 45 (1803). – TYPE: USA, Hab in Georgiâ, Floridâ, *A. Michaux* 2 (lectotype P-MICH [P00670149], designated by Hitchcock, Contr. U.S. Natl. Herb. 12: 143, 144, 146 (1908); isolectotypes P-JUSS [Herb. Juss. 2636], US (fragment)).

180. *Paspalum scrobiculatum* L., Mant. Pl. Altera 29 (1767). – TYPE: Sweden, Uppsala, cultivated, *Anon. s.n.* (lectotype LINN [Herb. Linn. 79.4], designated by Clayton, Kew Bull. 30: 101 (1975)).

181. *Paspalum scrobiculatum* L. var. *bispicatum* Hack. ex Merr., Fl. Manila 86 (1912). – TYPE: Philippines, Luzon, Province of Rizal, San Pedro Macati, July 1910, *E.D. Merrill* 272 (lectotype W [1916-0041752], designated here).

*Notes.* Merrill did not cite any specimens in the protologue but did give locality information. The type was referred to by de Koning & Sosef (1985, p. 305) as Kneucker Exsiccatum 803 with a holotype in W. This would be correctable to an effective lectotypification if it were original material but de Koning & Sosef cited an

incorrect Kneucker (1915) protologue and also noted they had not seen this sheet. We have not been able to locate it and it is possible this specimen may not have existed. Instead there is a specimen in W which was collected by Merrill and annotated by Hackel and has the locality data from Merrill's protologue. In the absence of evidence that there ever was a Kneucker Exsiccata 803 specimen in W, or that it is original material, the Merrill collection is selected here as lectotype.

182. ***Paspalum sumatrense*** Roth in Roem. & Schult., Syst. Veg. 2: 316 (1817). – TYPE: Sumatra, *B. Heyne s.n.* (lectotype K (fragment) [K000290255], designated here).

*Notes.* Benjamin Heyne collected specimens in Sumatra in 1812 (van Steenis-Kruseman, 1950). He passed the collections, together with many from India, to Albrecht Roth who wrote them up. Unfortunately, Roth's herbarium was largely destroyed in Berlin during the Second World War (Bor, 1955). However, there is a sheet at Kew with a single spikelet taken from Roth's type in 1914 when it was in Oldenburg and a poor photograph. The specimen is here designated lectotype for Roth's name.

183. ***Paspalum vaginatum*** Sw., Prodr. 21 (1788). – TYPE: fl. ind. occ. ex ins. Sti Crucis Am., *O.P. Swartz s.n.* (lectotype S [S-R-4070], first step designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 609 (1982), second step designated by de Koning & Sosef, Blumea 30: 310 (1985); possible isolectotypes S, UPS).

184. ***Pennisetum purpureum*** Schumach., Beskr. Guin. Pl. 44 (1827). – TYPE: Guinea [Ghana], *P. Thonning* 355 (lectotype C [C10004308], designated by Hepper, W. Afr. Herb. Isert Thonning 149 (1976); isolectotype BM).

= ***Cenchrus purpureus*** (Schumach.) Morrone, Ann. Bot. (Oxford) 106: 129 (2010).

185. ***Perotis hordeiformis*** Nees in Hook. & Arnott, Bot. Beechey Voy. (6): 247–248 (1838). – TYPE: N.W. India, *J.F. Royle* 280 (lectotype K [K000245204], designated by Veldkamp & Steenbergen, Austrobaileya 3: 610 (1992); isolectotypes B, LE [Herb. Trinius 390.1], LIV).

= ***Perotis indica*** (L.) Kuntze, Rev. Gen. Pl. 2: 787 (1891).

186. ***Phalaris zizanioides*** L., Mant. Pl. Altera 2: 183 (1771). – TYPE: India, *J.G. König* s.n. (lectotype LINN [Herb. Linn. 78.12], designated by van der Zon, Wageningen Agr. Univ. Pap. 92-1: 409 (1992)).

= ***Chrysopogon zizanioides*** (L.) Roberty, Bull. Inst. Fondam. Afrique Noire, Sér. A, Sci. Nat. 22: 106 (1960).

187. *Pharus urceolatus* Roxb., Fl. Ind. ed. 1832, 3: 611 (1832). – TYPE: *W. Roxburghs.n.* (lectotype BM [BM000959309], designated by Soderstrom et al., Smithsonian Contr. Bot. 65: 3 (1987)).

= *Scrotophloa urceolata* (Roxb.) Judz., Phytologia 56: 300 (1984).

188. *Phleum indicum* Houtt., Nat. Hist. 2, 13: 198, t. 90, f. 2 (1782). – TYPE: *Anon. s.n.* (lectotype G-PREL [G00096222]), designated by Veldkamp in Wijnands et al., Candollea 72: 184 (2017)).

= *Polytrias indica* (Houtt.) Veldkamp, Blumea 36: 180 (1991).

189. *Poa atrovirens* Desf., Fl. Atlant. 1: 73, t. 14 (1798). – TYPE: Algeria, *Desfontaines s.n.* (lectotype LE (right-hand plant only), designated by Jain, J. Indian Bot. Soc. 50: 129 (1971); isolectotypes C, FI, P).

= *Eragrostis atrovirens* (Desf.) Trin. ex Steud., Nomencl. Bot., ed. 2, 1: 562 (1840).

190. *Poa chinensis* L., Sp. Pl. 1: 69 (1753). – TYPE: *Osbeck s.n.* (lectotype LINN [Herb. Linn. 87.32], designated by Phillips, Fl. Trop. E. Africa, Gram. (Part 2): 279 (1974)).

= *Dinebra chinensis* (L.) P.M.Peterson & N.Snow, Ann. Bot. (Oxford) 109: 1326 (2012).

191. *Poa amabilis* L., Sp. Pl. 1: 68 (1753). – TYPE: Hermann vol. 2, fol. 59, no. 46 (lectotype BM [BM000621703], designated by Veldkamp, Taxon 49: 254 (2000)).

= *Eragrostis tenella* (L.) P.Beauv. ex Roem. & Schult., Syst. Veg. 2: 576 (1817).

192. *Poa elegans* Roxb., Fl. Ind. 1: 339 (1820), nom. illeg., non Poir. (1804), nec R.Br. (1810). – *Poa chariis* Schult., Mant. 2: 314 (1824). – TYPE: [unpublished illustration] Icones Roxburghianae 841 (lectotype K, designated here).

= *Eragrostis atrovirens* (Desf.) Trin. ex Steud., Nomencl. Bot., ed. 2, 1: 562 (1840).

*Notes.* No herbarium material directly associated with this name has been discovered. Therefore, Roxburgh's drawing is here selected as lectotype.

193. *Poa gangetica* Roxb., Fl. Ind. 1: 341 (1820). – TYPE: India orientalis, 1813, *W. Roxburgh s.n.* (lectotype BM [BM000578754], designated by Clayton, Fl. Trop. E. Africa, Gram. (Part 2): 217 (1974)).

= *Eragrostis gangetica* (Roxb.) Steud., Syn. Pl. Glumac. 1: 266 (1854).

194. *Poa panicea* Retz., Observ. Bot. 3: 11 (1783). – TYPE: *P.J. Bladh s.n.* (holotype LD [1296347]; isotype BRI (fragment)).

= ***Dinebra panicea*** (Retz.) P.M.Peterson & N.Snow, Ann. Bot. (Oxford) 109: 1326 (2012).

195. *Poa pilosa* L., Sp. Pl. 1: 68 (1753). – TYPE: [published illustration] ‘Gramen paniculis elegantissimus, majus, locustis purpureo-spadiceis, minoribus’, Scheuchzer, Agrostographia: t. 4, f. 3 (1719) (lectotype designated by Koch, Illinois Biol. Monogr. 48: 24 (1974). Italy, Piemonte, Alluvium der Sesia bei Vercelli und an den Wegen zwischen den Reisfeldern von Oldenico unweit Vercelli in Oberitalien, 9–10 August 1902, A. Kneucker Gram. exsicc. XII, No. 344 (epitype B, designated by Scholz in Cafferty et al., Taxon 49: 256 (2000); possible isoepitypes L, W).

= ***Eragrostis pilosa*** (L.) P.Beauv., Ess. Agrostogr. 71, 162, 175 (1812).

*Notes.* Koch (1974) cited the type illustration as ‘Pl. 4 tab. 3; instead of ‘tab. 4 fig. 3’, but we treat the misuse of ‘tabula’ as a correctible error.

196. *Poa polymorpha* R.Br., Prodr. 1: 180 (1810), nom. illeg., non Wibel (1799). – *Poa brownii* Kunth, Révis. Gramin. 112 (1829), as ‘*brownii*’. – TYPE: Australia, Shoalwater Bay, 3 September 1802, R. Brown 6284 (lectotype BM [BM000991612], designated by Lazarides, Austral. Syst. Bot. 10: 101 (1997); isolectotypes E [E00381774], K, US (fragment)).

= ***Eragrostis brownii*** (Kunth) Nees in Wight, Cat. Indian Pl. 105 (1834).

197. *Poa tenella* L., Sp. Pl. 1: 69 (1753). – TYPE: India, *Anon. s.n.* (lectotype LINN [Herb. Linn. 87.33], designated by Mitra & Jain, Bot. Hist. Hort. Malabaricus 151 (1980)).

= ***Eragrostis tenella*** (L.) P.Beauv. ex Roem. & Schult., Syst. Veg. 2: 576 (1817).

198. *Poa tenuifolia* A.Rich., Tent. Fl. Abyss. 2: 425 (1851). – TYPE: Ethiopia, locis incultis vallium prope Adoam, 18 September 1837, G.W.H. Schimper, *Iter Abyssinicum. Sectio prima: plantae Adoënses* 92 (lectotype P [P00439420], first step designated by Phillips, Fl. Ethiopia 7: 122 (1995), second step designated here; isolectotypes B, BR, FR, G[4 sheets], GOET, K, L, MPU, P[2 sheets] [P00439421, P00439422], TUB[2 sheets], US (fragment), W[2 sheets], WAG).

= ***Eragrostis tenuifolia*** (A.Rich.) Hochst. ex Steud., Syn. Pl. Glumac. 1: 268 (1854).

199. *Poa unioloides* Retz., Observ. Bot. 5: 19 (1788). – TYPE: India, *J.G. König s.n.* (lectotype LD [LD1289627], designated by Fischer, Bull. Misc. Inform. Kew 1932: 74 (1932); possible isolectotypes BM[2 sheets], C[3 sheets], LE).

= *Eragrostis unioloides* (Retz.) Nees ex Steud., Syn. Pl. Glumac. 1: 264 (1854).

200. *Poa viscosa* Retz., Observ. Bot. 4: 20 (1786-1787). – TYPE: *J.G. König s.n.* (lectotype LD [LD1289687], designated by Fischer, Bull. Misc. Inform. Kew 1932: 74 (1932); possible isolectotypes C[3 sheets]).

= *Eragrostis tenella* (L.) P.Beauv. ex Roem. & Schult., Syst. Veg. 2: 576 (1817).

201. *Pollinia ciliata* Trin., Mém. Acad. Imp. Sci. St.-Pétersbourg, Sér. 6, Sci. Math. 2: 306 (1832). – TYPE: Nepal, *N. Wallich s.n.* (lectotype LE [Herb. Trinius 54.1], designated here; possible isolectotypes BM, C, CAL, E, G, K, P).

= *Microstegium fasciculatum* (L.) Henrard, Blumea 3: 453 (1940).

*Notes.* Trinius received his specimen from Hornemann in Copenhagen who in turn received it from fellow Dane, Nathaniel Wallich, probably while he was still in India, rather than from the dispersal of the East India Company Herbarium. The grasses were one of the families that were not sorted until after Wallich retired to London in 1846 (de Candolle & Radcliffe-Smith, 1981). Material distributed under number 8815B may include duplicate collections of Trinius's specimen, but this cannot be known for certain.

202. *Pollinia praemorsa* Nees ex Steud., Syn. Pl. Glumac. 1: 409 (1854). – TYPE: *Anon.* (probably Zollinger), 'Java' (not traced).

= *Polytrias indica* (Houtt.) Veldkamp, Blumea 36: 180 (1991).

203. *Rottboellia exaltata* L.f., Suppl. Pl. 114 (1782), nom. illeg., non L.f. (1779). – *Manisuris exaltata* Kuntze, Revis. Gen. Pl. 2: 779 (1891). – TYPE: *C.P. Thunberg s.n.* (lectotype LINN [Herb. Linn. 101.5], designated by Clayton, Kew Bull. 35: 817 (1981)).

= *Rottboellia cochinchinensis* (Lour.) Clayton, Kew Bull. 35: 817 (1981).

204. *Rottboellia glandulosa* Trin., Mém. Acad. Imp. Sci. St.-Pétersbourg, Sér. 6, Sci. Math. 2: 250 (1832). – TYPE: Java, *Anon. s.n.* (holotype LE [Herb. Trinius 113.1]).

= *Mnesithea glandulosa* (Trin.) de Koning & Sosef, Blumea 31: 290 (1986).

205. *Rottboellia repens* G.Forst., Fl. Ins. Austr. 9 (1786), as ‘*Rottboella*’. – TYPE: [unpublished illustration] Forster drawing 20 (lectotype BM, designated by Nicolson & Fosberg, Forsters Bot. 2<sup>nd</sup> Cook Exped. 234 (2004)).

= *Lepturus repens* (G.Forst.) R.Br., Prodr. 207 (1810).

206. *Rottboellia sanguinea* Retz., Observ. Bot. 3: 25 (1783). – TYPE: China, *P.J. Bladh s.n.* (lectotype LD [LD1224426], designated by Clayton & Renvoize, Fl. Trop. E. Africa, Gram. (Part 3): 756 (1982), or possible holotype).

= *Schizachyrium sanguineum* (Retz.) Alston in Trimen, Handb. Fl. Ceylon 6: 334 (1931).

207. *Rottboellia striata* Nees ex Steud. var. *glabrior* Hack. in A.DC. & C.DC., Monogr. Phan. 6: 302 (1889). – TYPE: Singapore, October 1822, *N. Wallich s.n.* [EIC 8876] (lectotype K-W [K001131724], designated here; possible isolectotypes G [G00164612], K-W [K001131726]).

= *Mnesithea glandulosa* (Trin.) de Koning & Sosef, Blumea 31: 290 (1986).

*Notes.* If Hackel had a specimen of this gathering in his collection it is not now present in W. We therefore designate a specimen from the Wallich Herbarium as lectotype as it is a good specimen and bears Wallich’s original collection ticket.

208. *Saccharum alopecurus* Nees, Hooker’s J. Bot. Kew Gard. Misc. 2: 100 (1850).

– *Saccharum negrosense* Steud., Syn. Pl. Glumac. 1: 407 (1854), nom. illeg. (superfl.).

– *Imperata ramosa* Andersson, Öfvers. Förh. Kongl. Svenska Vetensk.-Akad. 12: 158 (1855), nom. illeg. (superfl.) – TYPE: Philippines, Island of Negros, *H. Cuming 1801* (lectotype CGE (ex herb. Lindl.), designated here by Veldkamp; isolectotypes CGE (ex Mus. Henslow), E [E00393731], GOET[2 sheets], K, P, W).

= *Imperata cylindrica* (L.) Raeusch, Nomencl. Bot. 3: 10 (1797).

209. *Saccharum arundinaceum* Retz., Observ. Bot. 4: 14 (1786–1787). – TYPE: India, Pee Carumbo, *J.G. König s.n.* (lectotype LD [LD1227677], designated by Fischer, Bull. Misc. Inform. Kew 1932: 72 (1932); possible isolectotypes C[4 sheets]).

210. *Saccharum confertum* J.Presl in C.Presl, Reliq. Haen. 1: 346 (1830). – TYPE: Philippines, Luzon, Sorsogon, *T.P.X. Haenke s.n.* (lectotype PR [sheet no. 612328], designated here by Veldkamp; isolectotype PR [sheet nos. 612329, 612330], US (fragment)).

= *Imperata conferta* (J.Presl) Ohwi, Bot Mag. (Tokyo) 55: 549 (1941).

211. *Saccharum fuscum* Roxb., Fl. Ind. 1: 241 (1820). – TYPE: *W. Roxburgh s.n.* (lectotype K [K000943446], first step designated by Roberty, Boissiera 9: 367 (1960), second step designated here).

= *Misanthus fuscus* (Roxb.) Benth., J. Linn. Soc., Bot. 19: 65 (1881).

*Notes.* Roberty referred to a Roxburgh gathering as type of *Saccharum fuscum*, but without indicating to which herbarium he was referring. There are Roxburgh specimens of this species in BM, BR and K. Only two sheets bear tickets with the original name in Roxburgh's hand – one from Forsyth's herbarium in K and one from the Roxburgh collection that was sold by the Linnean Society and is now in BR. The former is selected here as the Brussels' specimen is mounted in a somewhat condensed fashion making it more difficult to distinguish features.

212. *Saccharum macilentum* Chauv. ex Steud., Syn. Pl. Glumac. 1: 406 (1854). – TYPE: Ins. Waigiou [Waigeo], *J.S.C. Dumont d'Urville s.n.* (lectotype P[P03639080], designated here).

= *Imperata conferta* (J.Presl) Ohwi, Bot. Mag. (Tokyo) 55: 549 (1941).

*Notes.* The specimen referred to was annotated by Steudel but it is possible that he saw other material collected by Dumont d'Urville in Paris or elsewhere. We therefore designate the specimen as lectotype.

213. *Saccharum paniceum* Lam., Encycl. 1: 595 (1785). – TYPE: *Sonnerat s.n.* (holotype P-LA [IDC microfiche 6207: 686/20]).

= *Pogonatherum crinitum* (Thunb.) Kunth, Enum. Pl. 1: 478 (1833).

214. *Saccharum repens* Willd., Sp. Pl., ed. 4, 1: 322 (1797). – TYPE: Guinea [Ghana], *P.E. Isert s.n.* (lectotype B-W [B-W01499010], designated by Fosberg, Smithson. Contr. Bot. 47: 3 (1981); isolectotypes C, S).

= *Melinis repens* (Willd.) Zizka, Biblioth. Bot. 138: 55 (1988).

215. *Saccharum ridleyi* Hack., Oesterr. Bot. Z. 41: 6 (1891). – TYPE: Peninsular Malaysia, Pahang, Pekan, riverbank, May 1890, *H.N. Ridley 1189* (lectotype W [1916-0034697], designated here by Veldkamp; isolectotypes K, SING, US (fragment)).

= *Misanthus fuscus* (Roxb.) Benth., J. Linn. Soc., Bot. 19: 65 (1881).

216. *Saccharum spicatum* L., Sp. Pl. 1: 54 (1753). – TYPE: [published illustration] ‘Tsjeria-kuren-pullu’, Rheeude, Hort. Malab. 12: t. 62 (1693) (lectotype designated by Clayton, Fl. Trop. E. Africa, Gram. (Part 2): 395 (1974)). *Anon. s.n.* (epitype LINN [Herb. Linn. 77.5], designated by Veldkamp & Steenbergen, Austrobaileya 3 (1992) 610, and corrected here by Veldkamp from lectotype).

= *Perotis indica* (L.) Kuntze, Rev. Gen. Pl. 2: 787 (1891).

217. *Saccharum spontaneum* L., Mant. Pl. Altera 183 (1771). – TYPE: *J.G. König s.n.* (lectotype LINN [Herb. Linn. 77.1], designated by Cope, Fl. Pakistan 143: 263 (1982)).

218. *Sacciolepis turgida* Ridl., Fl. Malay Penins. 5: 231 (1925). – TYPE: Peninsular Malaysia, Johore, Tana Merah Road, 1890, *H.N. Ridley 1708* (lectotype SING [SING0054509], designated here by Veldkamp).

= *Sacciolepis indica* (L.) Chase, Proc. Biol. Soc. Washington 21: 8 (1908).

*Notes.* Gilliland (1964, p. 334), chose a Ridley specimen from Tanglin, Singapore, in K as the lectotype. This specimen cannot be found, so Veldkamp’s replacement designation is made above.

219. *Schizachyrium paradoxum* Buse, Gram. 19 (Feb 1854); Buse, in Miq., Pl. Jungh. 3: 359 (Aug 1854). – TYPE: Indonesia, Sumatra, Padang, *F.W. Junghuhn s.n.* (lectotype L [L0819911], first step designated by Jansen, Reinwardtia 2: 337 (1953), second step designated here; isolectotypes BRI, L [L0050060]).

= *Schizachyrium brevifolium* (Sw.) Nees in Mart., Fl. Bras. Enum. Pl. 2: 332 (1829).

220. *Schizachyrium semiberbe* Nees in Mart., Fl. Bras. Enum. Pl. 2: 336 (1829). – TYPE: Brazil, *F. Sellow s.n.* (lectotype B [B100383436], designated by Judziewicz, Fl. Guianas, ser. A, Phanerogams 8: 579 (1990); isolectotypes BR[2 sheets], HAL, K, LE, MVFA (fragment), P, US, W[2 sheets]).

= *Schizachyrium sanguineum* (Retz.) Alston in Trimen, Handb. Fl. Ceylon 6: 334 (1931).

221. *Setaria splendida* Stapf, Fl. Trop. Afr. 9: 799 (1930). – TYPE: Sudan, Lado District, August 1916, *T. Cartwright 18* (lectotype K [2 sheets] [K000281916 & K000281915], designated by Morrone et al., Syst. Bot. Monogr. 96: 120 (2014)).

= *Setaria sphacelata* (Schumach.) Stapf & C.E.Hubb., Fl. Trop. Afr. 9: 795 (1930).

222. *Sporobolus diandrus* (Retz.) P.Beauv. var. *major* Buse, Gram. 3 (Feb 1854); Buse in Miq., Pl. Jungh. 3: 343 (Aug 1854). – TYPE: Indonesia, Java, Tjibogo, [June], *F.W. Junghuhn s.n.* (lectotype L [L0050184], designated by Baaijens & Veldkamp, Blumea 35: 437 (1991)).

= *Sporobolus indicus* (L.) R.Br. var. *major* (Buse) Baaijens, Blumea 35: 437 (1991).

223. *Stegosia cochinchinensis* Lour., Fl. Cochinch. 51 (1790). – TYPE: *J. Loureiro s.n.* (lectotype BM [BM000513692], designated by Merrill, Trans. Amer. Philos. Soc. 25(2): 71 (1935)).

= *Rottboellia cochinchinensis* (Lour.) Clayton, Kew Bull. 35: 817 (1981).

224. *Stipa arguens* L., Sp. Pl., ed. 2, 1: 117 (1762). – TYPE: *J. Burman s.n.* (lectotype LINN [Herb. Linn. 94.10], designated by Merrill, Interpr. Herb. Amboin. 89 (1917)).

= *Themeda arguens* (L.) Hack. in A.DC. & C.DC., Monogr. Phan. 6: 657 (1889).

225. *Thuarea sarmentosa* Pers., Syn. Pl. 1: 110 (1805). – TYPE: Madagascar, *L.M.A. du Petit-Thouars s.n.* (lectotype P [P02239717], designated here; possible isolectotype P [P02239716]).

= *Thuarea involuta* (G.Forst.) R.Br. ex Sm., Cycl. 35, 2: unpage (1 May 1817).

226. *Tricholaena rosea* Nees in Schauer, Cat. Sem. Hort. Vratisl. 1835: [3] (1836). – TYPE: *Drege 4319* (lectotype B [B100715446], designated here).

= *Melinis repens* (Willd.) Zizka, Biblioth. Bot. 138: 55 (1988).

227. *Urochloa paspaloides* J.Presl in C.Presl, Reliq. Haenk. 1: 318 (1830). – TYPE: [Philippines, Luzon, Sorsogon] *T.P.X. Haenke s.n.* (lectotype MO [MO-157629], designated by Lamson-Scribner, Rep. (Annual) Missouri Bot. Gard. 10: 36, 54 (1899); isolectotypes PR [sheet no. 194792], W[2 sheets]).

= *Urochloa glumaris* (Trin.) Veldkamp, Blumea 41: 420 (1996).

228. *Vilfa berteroana* Trin., Mém. Acad. Imp. Sci. Saint-Pétersbourg, Sér. 6, Sci. Math., Seconde Pt. Sci. Nat. 6(2): 100 (1840). – TYPE: Dominican Republic, Santo Domingo, *C.G. Bertero s.n.* (lectotype LE [Herb. Trinius 1682.1], designated by Baaijens & Veldkamp, Blumea 53: 422 (1991); possible isolectotypes B, MO).

= *Sporobolus indicus* (L.) R.Br., Prodr. 1: 170 (1810).

229. *Zoysia japonica* Steud., Syn. Pl. Glumac. 1: 414 (1854). – TYPE: Japan, *P.F. von Siebold s.n.* (lectotype L [L0050865], designated here by Veldkamp; possible isolectotypes L [L0050866], P [P00745709]).

230. *Zoysia malaccensis* Gand., Bull. Soc. Bot. France 64: 303 (1920). – TYPE: Singapore, *H.N. Ridley s.n.* (lectotype US [US00141793], designated here; isolectotype LY).

= *Zoysia matrella* (L.) Merr., Philipp. J. Sci., C 7: 230 (1912).

231. *Zoysia matrella* (L.) Merr. var. *pacifica* Goudswaard, Blumea 26: 172 (1980). – TYPE: Japan, Ryukyus, Yonakuni [Yonaguni] island, 20–30 October 1959, *S. Hatusima* 24127 (holotype L [L0050871]; isotype FU).

= *Zoysia pacifica* (Goudswaard) M.Hotta & Kuroki, Acta Phytotax. Geobot. 45: 71 (1994).

232. *Zoysia pungens* Willd., Neue Schriften Ges. Naturf. Freunde Berlin 3: 441 (1801). – TYPE: *D. Klein* 3671 (lectotype B-W [B-W01514010], designated by Goudswaard, Blumea 26: 171 (1980); isolectotypes LE [Herb. Triniius 396.1, 4 excl. upper left], S [S-6-6510], US (fragment)).

= *Zoysia matrella* (L.) Merr., Philipp. J. Sci., C 7: 230 (1912).

**ACKNOWLEDGEMENTS.** Peter Hovenkamp (L) is thanked for locating and forwarding to us files left by JeF Veldkamp. The following are acknowledged for their valuable assistance with locating type material: Hans-Joachim Esser (M), Lauren Gardiner (CGE), Bazilah Ibrahim (SING), Laurence Loze (G), Misako Mishima (FU), Chiara Nepi (FI), Ranee Prakash (BM), Otakar Šída (PR), Robert Vogt (B). Henry Noltie (E) is thanked for confirming that a specimen in E is not a Koenig collection, and John McNeill (E) for discussions on lemon-grass nomenclature. The two reviewers are thanked for their comments.
