

Appendix B. San Francisco Bay Area Network Species of Special Interest

Included in this list are species with sensitive, rare, threatened, or endangered status, exotic species of interest, and other relevant species recognized by federal, state, and other authorities. Parks where these species may be found have been identified. Data were compiled by park specialists and from several sources (CalEPPC 1999, GOGA 1999, CNPS 2001, Jepson and Murdock 2002, PINN 2003, PORE 2003).

CA Department of Food and Agriculture Status, Pest Ratings of Noxious Weed Species and Noxious Weed Seed: A = Limited distribution within the State. Eradication, quarantine or other holding action at the State county level is required. Quarantine interceptions to be rejected or treated at any point within the State. B = More common distribution within the State. Intensive control or eradication, where feasible, at the county level. C = Generally widespread. Control or eradication, as local conditions warrant, at the discretion of the County Agricultural Commissioner.

CalEPPC = California Exotic Pest Plant Council Status: A-1 = Most Invasive Wildland Pest Plants, Widespread; A-2 = Most Invasive Wildland Pest Plants, Regional; B = Wildland Pest Plants of Lesser Invasiveness; Red Alert = Species with potential to spread explosively, infestations currently restricted; NMI: Need More Information.

PORE / GOGA Exotic Plant Ranking Status: A-1 = Most Invasive Pest Plants: all populations eradicated when possible; A-2 = Most Invasive Pest Plants: widespread within park, large populations contained, or controlled where threatening special status species or rare habitat, or opportunistically removed when in the field for other reasons; B-1 Pest Plants of Lesser Invasiveness: present in small populations, eradicated when possible; B-2 Pest Plants of Lesser Invasiveness: widespread within park, controlled only where threatening special status species or rare habitat, or opportunistically removed when in the field for other reasons; Red Alert: Species with potential to spread explosively, infestations currently restricted; NMI = Need more information.
