Subject: **Vermont Yankee Nuclear Power Corporation,
Entergy Nuclear Vermont Yankee, LLC, and
Entergy Nuclear Operations, Inc.
Vermont Yankee Nuclear Power Station
Docket Number 50-271
License Number DPR-28
Transfer of Facility Operating License
and Proposed License Amendments**

This letter is to submit additional pages to Enclosure 2 of the Transfer of Facility Operating License and Proposed License Amendments submitted October 5, 2001. The supplementary pages include page 242 of Entergy Corporation's 1997 10-K and the cover page and pages 95, 96, 101-104, 107, 108, 133-136, 139, 140, 147, 148, E-1, E-10, E-11, E-14-19, E-30 and E-31 of Entergy Corporation's 2000 10-K. These pages were inadvertently omitted from the original document.

Sincerely,

Entergy Nuclear Vermont Yankee, LLC

Michael Kansler
Senior Vice President and
Chief Operating Officer

ENTERGY GULF STATES, INC.
MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS
RESULTS OF OPERATIONS

The LPSC and PUCT rate issues are discussed in Note 2 to the financial statements.

Fuel cost recovery

Entergy Gulf States is allowed to recover certain fuel and purchased power costs through fuel mechanisms included in electric rates that are recorded as fuel cost recovery revenues. The difference between revenues collected and current fuel and purchased power costs is recorded as deferred fuel costs on Entergy Gulf States' financial statements such that these costs generally have no net effect on earnings.

In 2000, fuel cost recovery revenues increased primarily due to increased market prices for fuel and purchased power, resulting in an increased recovery of \$226.7 million in the Louisiana jurisdiction. Fuel cost recovery revenues increased in the Texas jurisdiction by \$82.4 million due to a higher fuel recovery factor that became effective in September 1999 and by \$33.4 million due to a fuel surcharge implemented in January 2000.

In 1999, fuel cost recovery revenues increased due to a higher fuel factor in 1999 and a fuel surcharge implemented in February 1999 in the Texas jurisdiction. This increase was partially offset by reduced fuel recovery in the Louisiana jurisdiction primarily due to lower fuel and purchased power costs in 1999.

Sales volume/weather

In 2000, sales volume increased due to more favorable weather affecting residential and commercial customers, as well as an increase in the number of residential and commercial customers.

Other revenue

In 2000, other revenue increased primarily due to increased unbilled revenues due to the effect of a change in estimate on unbilled revenue, more favorable weather, and increased sales volume.

In 1999, other revenue increased primarily due to a change in estimated unbilled revenues. The estimate more closely aligns the fuel component of unbilled revenues with regulatory treatment.

Sales for resale

In 2000, sales for resale increased primarily due to increased sales volume including sales of energy from the non-regulated piece of River Bend to affiliated companies. Sales for resale also increased due to increased generation, particularly nuclear generation, resulting in more energy available for resale. Nuclear generation was down in 1999 as a result of a nuclear refueling outage.

In 1999, sales for resale increased primarily due to increased sales to associated companies due to higher market prices and outages at affiliate plants in 1999.

Gas and steam operating revenues

Gas operating revenues increased in 2000 due to an increase in the market price for natural gas as well as increased sales volume in the residential and commercial sectors.

ENTERGY GULF STATES, INC.
MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS
RESULTS OF OPERATIONS

In 1999, gas operating revenues decreased primarily due to lower prices of gas purchased for resale as well as decreased usage as a result of warmer winter weather, particularly in the residential and commercial sectors.

In 2000 and in 1999, steam operating revenues decreased primarily due to a new lease arrangement that began in June 1999 for the Louisiana Station generating facility. Under the terms of this new lease, revenues and expenses are now classified as other income. The previous classifications were steam operating revenues and other operation and maintenance expenses.

Expenses

Fuel and purchased power

In 2000, fuel and purchased power expenses increased primarily due to:

- o higher market prices for gas and purchased power;
- o increased nuclear generation; and
- o an adjustment in March 2000 of \$11.5 million to the Texas jurisdiction deferred fuel balance as a result of a fuel reconciliation settlement with the PUCT.

In 1999, fuel and purchased power expenses increased due to:

- o increased gas expenses resulting from a shift to gas generation during the first six months of 1999 because of the reduced availability of Nelson 6 and an extended refueling outage at River Bend;
- o increased purchased power expenses due to higher market prices; and
- o a higher fuel factor and fuel surcharge in the Texas jurisdiction in 1999.

Other operation and maintenance expenses

In 2000, other operation and maintenance expenses increased primarily due to increased expenses of \$12.6 million on outside services employed related to legal and contract services for transition work and increased nuclear plant operations costs of \$5.8 million. These increases were largely offset by decreases in pension and benefits costs of \$7.3 million and decreased environmental reserves of \$5.7 million.

In 1999, other operation and maintenance expenses increased primarily due to increased spending of \$8.4 million for vegetation management, increased miscellaneous customer expenses of \$2.5 million, and due to increased property and environmental reserves of \$4.9 million. These increases were offset primarily by decreases of \$8.8 million for pension and benefits expenses.

Depreciation and amortization

In 2000, depreciation and amortization increased primarily due to a review of plant-in-service dates for consistency with regulatory treatment reducing depreciation expense by \$6.7 million in 1999, as well as additional depreciation expense related to net capital additions in 2000.

ENTERGY LOUISIANA, INC.
MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS
RESULTS OF OPERATIONS

Sales volume/weather

In 2000, sales volume increased primarily due to more favorable weather in the residential and commercial sectors, and increased usage by industrial customers.

In 1999, sales volume decreased primarily due to less favorable weather, partially offset by increased usage by residential and industrial customers.

Other revenue (including unbilled)

In 2000, other revenue decreased primarily due to the effect of a change in estimate on 1999 unbilled revenues, in addition to rent received for electric property in 1999.

In 1999, other revenue increased primarily due to a change in estimated unbilled revenues. The changed estimate more closely aligns the fuel component of unbilled revenues with regulatory treatment.

Sales for resale

In 2000, sales for resale decreased as a result of increased sales to retail customers resulting in less electricity available for resale.

In 1999, sales for resale increased as a result of increased sales to affiliates due to outages at affiliate plants, in addition to favorable unit prices.

Expenses

Fuel and purchased power expenses

In 2000, fuel and purchased power expenses increased due to an increase in the market price of natural gas.

In 1999, fuel and purchased power expenses increased due to:

- o higher natural gas prices;
- o higher purchased power market prices; and
- o a shift in generation from lower priced nuclear fuel to higher priced gas as a result of refueling and other outages at Waterford 3.

Other operation and maintenance expenses

Other operation and maintenance expenses increased in 2000 primarily due to:

- o an increase in expenses from maintenance and planned maintenance outages at Waterford 3 and certain fossil plants of \$17.9 million;
- o an increase of \$11 million in outside services employed for legal services for potential rate actions; and
- o an increase in property insurance reserves of \$5 million primarily due to changes in storm damage reserves effective August 1999.

ENTERGY LOUISIANA, INC.
MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS
RESULTS OF OPERATIONS

The overall increase in other operation and maintenance expenses in 2000 was partially offset by the following:

- o a decrease in injury and damages claims of \$3.5 million;
- o a decrease of \$3 million in benefits expense; and
- o higher nuclear insurance refunds of \$1.8 million.

Nuclear refueling outage expenses

In 1999, nuclear refueling outage expenses decreased as a result of the amortization of higher outage expenses in 1998 due to the extended nuclear refueling outage in 1997.

Depreciation and amortization

In 2000, depreciation and amortization expenses increased primarily due to a review of plant-in-service dates for consistency with regulatory treatment reducing depreciation expense by \$3.4 million in August 1999, as well as depreciation expense related to net capital additions in 2000.

Other regulatory charges (credits)

In 2000, other regulatory credits decreased due to the LPSC-required deferral in 1999 of Year 2000 costs and the amortization of these costs in 2000. The deferred costs are being recovered over a five-year period.

Other

Other income

In 2000, other income increased primarily due to interest recorded on deferred fuel costs.

Interest charges

In 2000 and 1999, interest on long-term debt decreased primarily due to the refinancing and net redemption of \$77 million of long-term debt in 1999. The decrease in 2000 is partially offset by interest expense incurred on the issuance of \$150 million of long-term debt in May 2000.

Income taxes

The effective income tax rates for 2000, 1999, and 1998 were 40.9%, 38.9%, and 37.8%, respectively.

SYSTEM ENERGY RESOURCES, INC.
MANAGEMENT'S FINANCIAL DISCUSSION AND ANALYSIS
RESULTS OF OPERATIONS

Other regulatory charges

In both 2000 and 1999, other regulatory charges increased due to the implementation of the GGART at Entergy Arkansas and Entergy Mississippi, as discussed above.

Other

Other income

Other income increased in 2000 and 1999 as a result of the interest earned on System Energy's advances to the money pool, an inter-company funding arrangement. The money pool is discussed in Note 4 to the financial statements.

Interest charges

Interest on long-term debt decreased in 2000 and 1999 as a result of the retirement and refinancing of higher-cost long-term debt. In 2000, System Energy retired \$75 million of debenture bonds. In 1999, System Energy retired \$160 million of first mortgage bonds and refinanced \$102 million of governmental bonds at an annual interest rate of 5.9%.

Other interest decreased in 2000 primarily due to decreased interest expense recorded on the potential refund of System Energy's proposed rate increase. Other interest increased in 1999 due to interest on the potential refund of System Energy's proposed rate increase.

Income taxes

The effective income tax rates in 2000, 1999, and 1998 were 46.4%, 39.5%, and 42.1%, respectively.

The effective income tax rate for 2000, increased primarily due to increased pre-tax income and the amortization of investment tax credits related to Grand Gulf 2 in 1999.

ENTERGY CORPORATION AND SUBSIDIARIES

NOTES TO FINANCIAL STATEMENTS

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Entergy Corporation, Entergy Arkansas, Entergy Gulf States, Entergy Louisiana, Entergy Mississippi, Entergy New Orleans, and System Energy)

The accompanying consolidated financial statements include the accounts of Entergy Corporation and its direct and indirect subsidiaries, including the domestic utility companies and System Energy, whose separate financial statements are included in this document. The financial statements presented herein result from these companies having registered securities with the SEC.

As required by generally accepted accounting principles, all significant intercompany transactions have been eliminated in the consolidated financial statements. The domestic utility companies and System Energy maintain accounts in accordance with FERC and other regulatory guidelines. Certain previously reported amounts have been reclassified to conform to current classifications, with no effect on net income or shareholders' equity.

Entergy Corporation sold its investments in Entergy London and CitiPower in December 1998. Accordingly, the consolidated statements of income and cash flows for 1998 include amounts for Entergy London and CitiPower through the dates of their respective sales.

Use of Estimates in the Preparation of Financial Statements

The preparation of Entergy Corporation's and its subsidiaries' financial statements, in conformity with generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Adjustments to the reported amounts of assets and liabilities may be necessary in the future to the extent that future estimates or actual results are different from the estimates used.

Revenues and Fuel Costs

Entergy Arkansas, Entergy Louisiana, and Entergy Mississippi generate, transmit, and distribute electricity primarily to retail customers in Arkansas, Louisiana, and Mississippi, respectively. Entergy Gulf States generates, transmits, and distributes electricity primarily to retail customers in Texas and Louisiana. Entergy Gulf States also distributes gas to retail customers in and around Baton Rouge, Louisiana. Entergy New Orleans sells both electricity and gas to retail customers in the City of New Orleans, except for Algiers, where Entergy Louisiana is the electricity supplier.

System Energy's operating revenues are intended to recover operating expenses and capital costs attributable to Grand Gulf 1 from Entergy Arkansas, Entergy Louisiana, Entergy Mississippi, and Entergy New Orleans. Capital costs are computed by allowing a return on System Energy's common equity funds allocable to its net investment in Grand Gulf 1, plus System Energy's effective interest cost for its debt allocable to its investment in Grand Gulf 1. System Energy's proposed rate increase is discussed in Note 2 to the financial statements.

Entergy recognizes revenue from electricity and gas sales when the consumers are billed. The domestic utility companies also accrue estimated revenues for energy delivered since the latest billings on a monthly basis. The monthly estimated unbilled revenue amounts are recorded as revenue and a receivable and are reversed the following month.

The domestic utility companies' rate schedules include either fuel adjustment clauses or fixed fuel factors, both of which allow either current recovery or deferral of fuel costs until such costs are reflected in the related

revenues. Because the fuel adjustment clause mechanism allows monthly adjustments to recover fuel costs, Entergy Louisiana, Entergy New Orleans, and the Louisiana portion of Entergy Gulf States include fuel cost recovery in their unbilled revenue calculations. Fixed fuel factors remain in effect until changed as part of a general rate case, fuel reconciliation, or fixed fuel factor filing. In the case of Entergy Arkansas, the Texas portion of Entergy Gulf States, and Entergy Mississippi, their fuel under-recoveries are treated as regulatory investments in the cash flow statements because those companies are allowed by their regulatory jurisdictions to recover the fuel cost regulatory asset over longer than a twelve month period, and the companies will earn a return on the under-recovered balances.

Utility Plant

Utility plant is stated at original cost. The original cost of utility plant retired or removed, plus the applicable removal costs, less salvage, is charged to accumulated depreciation. Maintenance, repairs, and minor replacement costs are charged to operating expenses. Substantially all of the utility plant is subject to liens from mortgage bond indentures.

With regard to nuclear refueling outage costs, Entergy records the costs in accordance with regulatory treatment and the matching principle. These refueling outage expenses are incurred to prepare the units to operate for the next 18 months without having to be taken off line. Except with respect to the River Bend plant, the costs are deferred during the outage and amortized over the period to the next outage. For the River Bend plant, the costs are accrued in advance and included in the cost of service used to establish retail rates, and are then amortized over the period between outages, which is in accordance with their regulatory treatment.

Utility plant includes the portions of Grand Gulf 1 and Waterford 3 that have been sold and leased back. For financial reporting purposes, these sale and leaseback arrangements are reflected as financing transactions.

Net utility plant by company and functional category, as of December 31, 2000, is shown below (in millions):

	Entergy	Entergy Arkansas	Entergy Gulf States	Entergy Louisiana	Entergy Mississippi	Entergy New Orleans	System Energy
