## **KAISER ALUMINUM REPORTS RESULTS FOR FIRST QUARTER OF 2002**

HOUSTON, Texas, May 20, 2002 -- Kaiser Aluminum Corporation today reported a net loss of \$64.1 million, or \$.79 per share, for the first quarter of 2002, compared to net income of \$119.6 million, or \$1.50 per share, for the first quarter of 2001. The year-ago period included a number of special items and adjustments (as detailed in a table accompanying this press release); excluding those items, the company had a net loss of \$9.1 million, or \$.12 per share, for the first quarter of 2001.

Net sales in the first quarter of 2002 were \$370.6 million, compared to \$480.3 million in the year-ago period.

Commenting on the company's first-quarter performance, Kaiser President and Chief Executive Officer Jack A. Hockema said, "Excluding non-recurring items and adjustments from both periods, our results were below those of the year-ago quarter due largely to sharply higher costs for pension funding, postretirement medical benefits, and other benefit costs -- and a 50% decline in shipments of flat-rolled products, which reflected weak demand for aerospace and general engineering products. Additional factors in the quarterly operating results were lower realized prices and shipments in our primary aluminum business unit. Partially offsetting these unfavorable factors were improved cost performance at the Gramercy, Louisiana, alumina refinery and the 49%-owned Kaiser Jamaica Bauxite Company; improved results in the Engineered Products segment; and amortization of deferred income from metal hedging contracts closed during the quarter."

"We were pleased to see clear signs of improvement in our Engineered Products and Bauxite & Alumina business units," said Hockema. "Our Engineered Products business unit reported its best segment operating income since the third quarter of 2000; in particular, operating income increased by 18% relative to the year-ago period as a result of reduced energy and overhead costs even though shipments declined modestly. Separately, the Bauxite & Alumina business unit reported a significant reduction in its operating loss in relation to that of the year-ago period due largely to planned reductions in operating costs at Gramercy, which now is consistently operating at just below 100% of its new annual rated capacity of 1.25 million metric tonnes and is steadily progressing toward its efficiency targets."

"The company continues to focus on meeting the needs of its customers and in making continuous improvement in its operational performance," said Hockema. "While our Chapter 11 case proceeds as expected -- with routine Court hearings and committee meetings -- it has had virtually no effect on our operations. Moreover, Kaiser Aluminum's liquidity remains strong. As of April 30, 2002, the company had approximately \$140 million of cash and cash equivalents -- with no borrowings and

only \$41 million of letters of credit outstanding under its Debtor-in-Possession credit facility.”

Kaiser Aluminum Corporation (OTCBB: KLUCQ) is a leading producer of alumina, primary aluminum, and fabricated aluminum products.

**KAISER ALUMINUM SEEKS EXTENSION OF EXCLUSIVITY  
PERIOD FOR PLAN OF REORGANIZATION**

HOUSTON, Texas, June 12, 2002 - Kaiser Aluminum said it has filed a motion with the U.S. Bankruptcy Court for the District of Delaware to extend to December 12, 2002 the exclusivity period for submission of its formal Chapter 11 Plan of Reorganization.

Bankruptcy law generally provides that during the first 120 days after filing, the reorganizing company has the exclusive right to submit a Plan of Reorganization. In complex cases involving large companies, this exclusivity period is usually extended because the process of evaluating the company's options and working with all the stakeholders in the reorganization process requires more time to complete. Exclusivity prevents other stakeholders from filing competing plans for the reorganization that could be disruptive and distracting to the company's work.

"We believe the additional time is necessary in order for us to be methodical and rigorous in the development of this plan," said Jack A. Hockema, Kaiser's President and Chief Executive Officer.

"In the interim, I am pleased to report that the company's day-to-day operations have been largely unaffected by our Chapter 11 case. Our liquidity is strong; we continue to make and sell products; and we continue to maintain 'Best in Class' service for customers of our Fabricated Products businesses."

Kaiser Aluminum Corporation (OTCBB: KLUCQ) is a leading producer of alumina, primary aluminum, and fabricated aluminum products.

**KAISER ALUMINUM FILES VOLUNTARY PETITION UNDER CHAPTER 11  
OF UNITED STATES BANKRUPTCY CODE**

**Company Finalizing \$300 Million Loan Agreement to Fund Ongoing Operations;  
Production, Customer Service Not Impacted by Filing**

HOUSTON, Texas, February 12, 2002 – Kaiser Aluminum Corporation (NYSE:KLU) said today that the company and its operating subsidiary Kaiser Aluminum & Chemical Corporation and certain of its wholly owned subsidiaries have filed voluntary petitions under Chapter 11 of the Federal Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware.

In conjunction with the filing, the company expects to enter into definitive documentation today for \$300 million in Debtor-in-Possession (DIP) financing from Bank of America, subject to court approval. The DIP financing, in combination with the company's current invested cash, should provide sufficient liquidity to meet its ongoing operating needs. Kaiser's production and shipment of bauxite, alumina, primary aluminum products, and fabricated aluminum products will continue without interruption.

Kaiser has been facing significant near-term debt maturities at a time of unusually weak aluminum industry business conditions, depressed prices, and a broad economic slowdown that was further exacerbated by the events of September 11. In addition, the company has become increasingly burdened by asbestos litigation and growing legacy obligations for retiree medical and pension costs. The confluence of these factors has created the prospect of continued operating losses and negative cash flow, resulting in lower credit ratings and an inability to access the capital markets.

In October 2001, Jack A. Hockema, who led the turnaround in Kaiser's fabricated products businesses, was named the company's President and Chief Executive Officer.

"When I came on board as President and CEO, it became evident that Kaiser needed to accelerate the process it was pursuing to establish a sustainable financial and operational framework," said Hockema. "While we have examined many alternatives including, but not limited to, asset sales and debt restructuring, no alternative provided more than a partial or temporary fix. Only a filing provided the time and tools necessary to adequately address these issues.

"The decision to seek protection under Chapter 11 will provide Kaiser with the opportunity to reorganize its financial structure and implement a strategic plan to return to sustained profitability," said Hockema. "The reorganization process will also allow the company to expand on and quicken the pace of its operational improvements."

"Our core businesses are sound. Our fabricated operations have good market positions, 'best-in-class' customer service rankings, and continue to make progress in implementing 'lean sigma' methods. At the same time our commodities businesses are aggressively pursuing performance improvement initiatives," added Hockema.

For well over half a century, Kaiser Aluminum has produced a wide range of products from 'upstream' bauxite, alumina and aluminum to 'downstream' products for the aerospace, ground transportation, and industrial markets. The company will continue to focus its energies on the quality products and superior service for which it is known.

Hockema concluded, "Kaiser employees have been the key to our past success, and their continued loyalty and commitment to the job at hand will ensure that we meet the challenges we face. There will be hard work and tough decisions ahead, but we have weathered difficult times before and will use the reorganization process to implement the financial and operational initiatives that will position us for long-term success."

Although the filing includes certain U.S. subsidiaries through which the company holds an interest in foreign operations, it does not include the operations of the following entities: the 65%-owned Alpart alumina refinery and the 49%-owned Kaiser Jamaica Bauxite Company in Jamaica; the 20%-owned QAL alumina refinery in Australia; the 90%-owned Valco aluminum smelter in Ghana; the 49%-owned Anglesey aluminum smelter in Wales, or the 100%-owned extrusion plant in Ontario, Canada. In this regard,

and in conjunction with expected approval of first-day court motions, Kaiser has taken appropriate steps designed to ensure that its participation in each of these entities, including the funding of certain costs and expenses, will not be impacted by the filings.

For additional information, see the newly established restructuring section of the company's web site ([www.kaiseral.com](http://www.kaiseral.com)) or call the newly established restructuring hotline at 1-888-829-3340 or 1-402-220-0856.

Kaiser Aluminum is a leading producer of alumina, primary aluminum and fabricated aluminum products.

**IN THE UNITED STATES BANKRUPTCY COURT  
FOR THE DISTRICT OF DELAWARE**

In re:

Case No. 02- \_\_\_\_\_ ( )

**Kaiser Aluminum Corporation,  
a Delaware corporation,**

**Chapter 11**

**Debtor.**

**CONSOLIDATED LIST OF CREDITORS  
HOLDING 50 LARGEST UNSECURED CLAIMS**

The debtor in this chapter 11 case and certain affiliated entities (collectively, the "Debtors") each filed a petition in this Court on February 12, 2002 for relief under chapter 11 of the United States Bankruptcy Code, 11 U.S.C. §§ 101-1330. Contemporaneously with the filing of their petitions, the Debtors filed a motion requesting, among other things, authority to file a consolidated list of the 50 largest unsecured creditors (the "Top 50 List") in lieu of separate lists. Following is the Top 50 List, based on the Debtors' books and records as of approximately February 12, 2002. No comprehensive legal and/or factual investigations with regard to possible defenses or counterclaims to the below-listed claims have been completed. The Top 50 List was prepared in accordance with Fed. R. Bankr. P. 1007(d) for filing in the Debtors' chapter 11 cases. The Top 50 List does not include: (i) persons who come within the definition of "insider" set forth in 11 U.S.C. § 101; or (ii) secured creditors, unless the value of the collateral is such that the unsecured deficiency places the creditor among the holders of the 50 largest unsecured claims. The information presented in the Top 50 List shall not constitute an admission by, nor is it binding on, the Debtors. The failure of the Debtor to list the claim as contingent, unliquidated or unknown does not constitute a waiver of the Debtor's right to contest the validity, priority, and/or amount of the claim.

**IN THE UNITED STATES BANKRUPTCY COURT  
FOR THE DISTRICT OF DELAWARE**

In re: :  
: **Jointly Administered**  
**KAISER ALUMINUM CORPORATION,** : **Case No. \_\_\_\_\_**  
**a Delaware corporation, et al.,** :  
: **Chapter 11**  
**Debtors.** :

**AFFIDAVIT OF JOSEPH A. BONN IN SUPPORT OF  
CHAPTER 11 PETITIONS AND REQUESTS FOR FIRST DAY RELIEF**

STATE OF DELAWARE )  
 ) SS:  
COUNTY OF NEW CASTLE )

Joseph A. Bonn, being duly sworn, deposes and states:

1. I am the Executive Vice President of Corporate Development for Kaiser Aluminum Corporation ("KAC"), a corporation organized under the laws of the State of Delaware and one of the debtors and debtors in possession in the above-captioned chapter 11 cases (collectively, the "Debtors"). KAC is the direct parent of Debtor Kaiser Aluminum & Chemical Corporation ("KACC"), a Delaware corporation, and the indirect parent of each of the other Debtors. As described below, the Debtors and their nondebtor subsidiaries, including Kaiser's interest in foreign joint venture affiliates (collectively, the "Kaiser Companies"), together constitute one of the leading international producers and marketers of alumina, primary aluminum and fabricated aluminum products. I have been employed by the Kaiser Companies since 1967 working in line management production positions as well as staff positions in the United States and various foreign locations, having served as business unit manager, plant manager, Vice President of Planning, Chief Administrative Officer and currently, Executive Vice President of Corporate Development. I am familiar with the Debtors' day-to-day operations, business affairs and books and records.

2. The Debtors commenced their respective reorganization cases under chapter 11 of the Bankruptcy Code, 11 U.S.C. §§ 101-1330 (the "Bankruptcy Code"), in the United States Bankruptcy Court for the District of Delaware on February 12, 2002 (the "Petition Date").

3. To enable the Debtors to minimize the adverse effects of the commencement of their chapter 11 cases on their businesses, the Debtors intend to request various types of relief in certain "first day" applications and motions (collectively, the "First Day Pleadings").<sup>1</sup> The First Day Pleadings seek relief, among other things, to: (a) authorize the Debtors to enter into debtor in possession in financing; (b) preserve customer relationships; (c) maintain vendor confidence and employee morale; (d) ensure the continuation of the Debtors' cash management system and other business operations without interruption; (e) continue and maintain the ordinary operations and functioning of its foreign joint venture affiliates; and (f) establish certain administrative procedures to promote a smooth transition to chapter 11. Gaining and maintaining the support of the Debtors' customers, employees and vendors, as well as maintaining, with minimal disruption, the day-to-day operations of the Debtors' businesses, including the operations of nondebtor joint venture affiliates, will be crucial to the Debtors' reorganization efforts.

4. I submit this Affidavit in support of the First Day Pleadings. Any capitalized terms not expressly defined herein have the meanings given to them in the applicable First Day Pleading. Except as otherwise indicated, all statements in this Affidavit are based on my personal knowledge, my review of relevant documents or my opinion based upon my

---

<sup>1</sup> Although the Debtors intend to file each of the First Day Pleadings shortly after commencing their cases, the Debtors anticipate that the Court will not consider certain of the First Day Pleadings until the expiration of an appropriate notice period.

experience and knowledge of the Debtors' operations and financial condition. If I were called upon to testify, I could and would testify to each of the facts set forth herein based on such personal knowledge, review of documents or opinion. I am authorized to submit this Affidavit on behalf of the Debtors. Part I of this Affidavit describes the Debtors' businesses and the circumstances giving rise to the commencement of these chapter 11 cases. Part II of this Affidavit sets forth relevant facts in support of each of the First Day Pleadings.

## I. BACKGROUND

### A. The Debtors' Businesses.

5. The Kaiser Companies have worldwide operations in all principal aspects of the aluminum industry — the mining of bauxite, the refining of bauxite into alumina, the production of primary aluminum from alumina and the manufacture of both fabricated and semi-fabricated aluminum products. These operations are conducted through four business units: Bauxite and Alumina, Primary Aluminum, Flat-Rolled Products and Engineered Products. Each of these business units is discussed below. The integrated multinational production and sales process of the Kaiser Companies is illustrated in a chart annexed hereto as Exhibit A.

6. In fiscal year 2001, the Kaiser Companies, after taking into account the foreign joint ventures, generated net sales exceeding \$1.7 billion and are forecasted to generate net sales of \$1.6 billion in 2002, with the foreign joint ventures expected to generate approximately 40% of the net revenue forecast. As of December 31, 2001, the Kaiser Companies had approximately \$3.3 billion in assets and \$3.1 billion in liabilities on a consolidated basis. The Kaiser Companies currently employ approximately 5,800 full-time and part-time employees. The foreign joint ventures are integral to the business operations and going

concern value of the Kaiser Companies, contributing approximately 60% of the gross profit and producing \$100 million in EBITDA over the next year, even with today's depressed metal prices.

*The Bauxite and Alumina Business Unit*

7. The Bauxite and Alumina business unit is a major producer of alumina and sells significant amounts of its alumina production in domestic and international markets. The business unit's strategy is to sell a substantial portion of the alumina available to it in excess of the Kaiser Companies' internal smelting requirements under multi-year sales contracts with prices linked to the price of primary aluminum. Currently the internal bauxite requirements of the Kaiser Companies is approximately 5.9 million dry metric tons per year, leaving 1.8 million dry metric tons to be sold to third party customers. With respect to the 2.8 million tons of alumina produced by the Kaiser Companies, only 400,000 tons is consumed internally, making the Kaiser Companies the world's second largest seller of alumina to third parties. The business unit's principal customers consist of other aluminum producers, trading intermediaries, which resell raw materials to end-users, and users of chemical grade alumina.

8. The Government of Jamaica has granted the business unit (through Kaiser Bauxite Company ("KBC"), a wholly-owned nondebtor subsidiary of KACC) a mining lease for bauxite mining that will, at a minimum, satisfy the bauxite requirements of the Kaiser Companies' Gramercy, Louisiana alumina refinery, enabling it to produce at its estimated annual capacity of 1,250,000 tons until 2020. Kaiser Jamaica Bauxite Company ("KJBC"), a Jamaican partnership in which KBC owns a 49% interest, mines the bauxite from the land, which is subject to the mining lease, as an agent for KBC. Although the business unit, through KBC, owns 49% of KJBC, it is entitled to, and generally takes and must pay for, all KJBC's estimated annual 4,500,000 tons of bauxite output. The bauxite mined by KJBC that is not refined into alumina at the Kaiser Companies' Gramercy refinery is sold to a third party.

9. The business unit, through Kaiser Jamaica Corporation ("KJC") and Alpart Jamaica Inc. ("AJI"), also owns a 65% interest in Alumina Partners of Jamaica ("Alpart"), a Delaware general partnership that owns an alumina plant located in Jamaica with an estimated annual capacity of 1,450,000 tons. The Government of Jamaica has granted a mining lease to Alpart and has entered into other agreements with Alpart designed to assure that sufficient reserves of bauxite will be available to Alpart to operate its refinery, which it may expand up to a capacity of 2,000,000 tons per year, through 2024. In 1999, Alpart entered into a joint venture with JAMALCO, a separate joint venture between affiliates of Alcoa Inc. and the Government of Jamaica, to consolidate Alpart and JAMALCO's bauxite mining operations in Jamaica, with the objective of optimizing mining operations and minimizing capital costs. The mining joint venture agreement also grants Alpart certain rights to bauxite mined from JAMALCO's reserves. The mining joint venture commenced operations in 2000.

10. In addition, the business unit, through Debtor Kaiser Alumina Australia Corporation ("Kaiser Australia"), owns a 20% interest in Queensland Alumina Limited ("QAL"), a Queensland corporation located in Queensland, Australia. QAL owns one of the largest and most efficient alumina refineries in the world with an estimated annual capacity of 3,650,000 tons. QAL refines bauxite into alumina for the account of its participants under long-term tolling contracts. The participants, including Kaiser Australia, purchase bauxite from another participant under long-term supply contracts. Kaiser Australia has contracted with QAL to take approximately 730,000 tons of alumina per year or pay standby charges. Historically, Kaiser Australia has sold half of its share of QAL's production to third parties and used the remainder to supply the Kaiser Companies' two aluminum smelters located in the State of Washington, both of which are currently curtailed.

### *The Primary Aluminum Business Unit*

11. The Primary Aluminum business unit converts alumina into primary aluminum at two primary aluminum smelters located in the State of Washington (currently curtailed) and at two primary aluminum smelters owned and operated through joint venture arrangements with certain third parties, one in Ghana and the other in Wales, The United Kingdom. The primary aluminum produced at these smelters in excess of the Kaiser Companies' own internal needs is sold primarily to large trading intermediaries and metal brokers, which in turn resell to end users.

12. The State of Washington smelters, located in Mead and Tacoma, have an estimated annual capacity of 200,000 tons and 73,000 tons, respectively. The Ghanaian smelter is owned and operated by Volta Aluminium Company Limited ("Valco"), a Ghanaian corporation. KACC owns a 90% interest in Valco. The smelter, which has an annual estimated capacity of 200,000 tons, processes alumina supplied by KACC and Reynolds Metals Company (now owned by Alcoa Inc.), the other participant, into primary aluminum under tolling contracts that provide for proportionate payments by the participants. The operating level of this entity has been subject to substantial fluctuation over the years due to the availability of hydro-based power on which the smelter is reliant. Substantially all of KACC's primary aluminum received from Valco is sold to Debtor Kaiser Aluminium International, Inc. ("KAII") for resale to third parties. During 2001, the Ghanaian smelter generally operated at approximately 80% of its capacity.

13. The Wales smelter is owned and operated by a wholly-owned subsidiary of Anglesey Aluminium Limited ("Anglesey"), a United Kingdom Corporation. KACC owns a 49% interest in Anglesey. KACC supplies 49% of the smelter's alumina requirements and purchases 49% of the smelter's aluminum output. KACC (through KAII) sells this share of

Anglesey's output to third parties at market prices. The smelter has an annual estimated capacity of 135,000 tons.

*The Flat-Rolled Products Business Unit*

14. The Flat-Rolled Products business unit operates a rolling mill in Trentwood, Washington where heat-treat sheet and plate and other flat-rolled products are manufactured for the aerospace, transportation, industrial and beverage container markets. During 2000, the business unit shifted the product mix of its Trentwood rolling mill toward higher value-added product lines, such as heat-treat sheet and plate and automotive brazing sheet, and away from beverage can body stock, wheel stock and common alloy tread products in an effort to enhance its profitability. The business unit's flat-rolled products are also sold to beverage container manufacturing locations primarily in the western United States and Asian Pacific Rim countries. During 2001, in addition to exiting can body stock production, beverage can lid and tab manufacturing were also de-emphasized to further increase the business unit's focus on higher value-added heat treat product lines.

*The Engineered Products Business Unit*

15. The Engineered Products business unit operates nine soft-alloy and hard-alloy extrusion plants and two engineered components (forgings) plants in the United States and Canada. These facilities manufacture extruded products and forged parts for a variety of industrial markets, including ground transportation, distribution, durable goods, defense, building and construction, electrical and general aviation markets.

16. Soft-alloy extrusion facilities are located in Los Angeles, California; Sherman, Texas; Tulsa, Oklahoma; Richmond, Virginia; and London, Ontario, Canada. Products manufactured at these facilities include rod, bar, tube, shapes and billet. The Tulsa facility is a production facility for standard soft-alloy extrusion products. Hard-alloy extrusion

facilities are located in Newark, Ohio and Jackson, Tennessee and produce rod, bar, screw machine stock, redraw rod, forging stock and billet. The business unit also extrudes seamless tubing in both hard- and soft-alloys at a facility in Richmond, Washington and produces drawn tubes in both hard- and soft-alloys at a facility in Chandler, Arizona. Forging facilities are located in Oxnard, California and Greenwood, South Carolina. Forged parts manufactured at these facilities are sold to the automotive, heavy-duty truck, general aviation, soil, machinery and equipment, and ordnance markets.

**B. The Kaiser Companies' Capital Structure.**

***Prepetition Credit Facility***

17. Pursuant to a Credit Agreement (as amended, the "Credit Agreement"), dated as of February 15, 1994, between KACC, as borrower, KAC, as guarantor, and a syndicate of lenders led by BankAmerica Business Credit, Inc. (in its individual capacity and as administrative agent), as lenders (collectively, the "Bank Group"), KACC obtained a \$250 million senior secured credit facility (the "Prepetition Credit Facility"). Bank of America, N.A., successor to BankAmerica Business Credit, Inc., now serves as administrative agent for the Bank Group under the Prepetition Credit Facility. From time to time prior to the Petition Date, the Debtors and the Bank Group amended the Prepetition Credit Facility. At its largest, the Prepetition Credit Facility was \$325 million, and immediately prior to the Petition Date, it was \$100 million. The Prepetition Credit Facility currently includes a revolving credit facility of up to \$100 million, including a swingline credit facility of up to \$25 million. As of the Petition Date, the Debtors had no borrowings and had approximately \$45 million in letters of credit outstanding under the Prepetition Credit Facility. The Debtors have arranged for the Prepetition Credit Facility to be retired and the letters of credit replaced pursuant to the terms of the Debtors' debtors in possession financing facility.

### ***Industrial Revenue Bonds***

18. KACC has three outstanding issuances of industrial revenue bonds, which KACC issued and sold through state or municipal development boards or authorities (collectively, the "Industrial Revenue Bonds"). Only one issuance of Industrial Revenue Bonds in the amount of \$19 million is secured by a lien on specific equipment, subordinate to the Bank Group's lien under the Prepetition Credit Facility. The remaining issuances of Industrial Revenue Bonds are unsecured obligations. As of the Petition Date, KACC's remaining obligations under the Industrial Revenue Bonds aggregated approximately \$51 million.

### ***9<sup>7</sup>/<sub>8</sub>% Senior Notes Due 2002***

19. On February 17, 1994, KACC issued and sold \$225 million in principal amount of 9<sup>7</sup>/<sub>8</sub>% Senior Notes due on February 15, 2002 (the "9<sup>7</sup>/<sub>8</sub>% Notes"). The 9<sup>7</sup>/<sub>8</sub>% Notes are general unsecured obligations of KACC and rank *pari passu* with the 10<sup>7</sup>/<sub>8</sub>% Series B Senior Notes Due 2006 (the "Series B Notes") and the 10<sup>7</sup>/<sub>8</sub>% Series D Senior Notes Due 2006 (the "Series D Notes"). U.S. Bank Trust National Association ("U.S. Bank") serves as indenture trustee for the 9<sup>7</sup>/<sub>8</sub>% Notes pursuant to an Indenture, dated February 17, 1994, between KACC, as issuer, certain subsidiary guarantors (collectively, the "Subsidiary Guarantors")<sup>2</sup> and First Trust National Association, predecessor trustee to U.S. Bank. Prior to the Petition Date, KACC

<sup>2</sup> The current Subsidiary Guarantors on the 9<sup>7</sup>/<sub>8</sub>% Notes, the Series B Notes and the Series D Notes (as such terms are defined herein) are Akron Holding Corporation; Kaiser Aluminum Corporation; Kaiser Aluminum & Chemical Corporation; Kaiser Aluminum & Chemical Investment, Inc.; Kaiser Aluminium International, Inc.; Kaiser Aluminum Properties, Inc.; Kaiser Aluminum Technical Services, Inc.; Kaiser Finance Corporation; Kaiser Micromill Holdings, LLC; Kaiser Sierra Micromills, LLC; Kaiser Texas Sierra Micromills, LLC; Kaiser Texas Micromill Holdings, LLC; Kaiser Bellwood Corporation; Oxnard Forge Die Company, Inc.; Kaiser Alumina Australia Corporation (all of which are Debtors); and Alpart Jamaica Inc. and Kaiser Jamaica Corporation (both of which are nondebtor affiliates). The Subsidiary Guarantors also guaranteed the 12<sup>3</sup>/<sub>4</sub>% Senior Subordinated Notes described below.

purchased approximately \$52.0 million of the 97/8% Notes, leaving approximately \$173.0 million of the 97/8% Notes outstanding as of the Petition Date.

***12¾% Senior Subordinated Notes Due 2003***

20. On February 1, 1993, KACC issued and sold \$400 million in principal amount of 12¾% Senior Subordinated Notes due on February 1, 2003 (the "12¾% Notes"). The 12¾% Notes are general unsecured obligations of KACC, are subordinate to all obligations under the Prepetition Credit Facility, the 97/8% Notes, the Series B Notes and the Series D Notes. State Street Bank and Trust Company ("State Street") serves as indenture trustee for the 12¾% Notes pursuant to an Indenture, dated February 1, 1993, between KACC, as issuer, the Subsidiary Guarantors and The First National Bank of Boston, predecessor trustee to State Street.

***107/8% Series B Senior Notes Due 2006***

21. On October 23, 1996, KACC issued and sold \$175 million in principal amount of Series B Notes. The Series B Notes are unsecured obligations of KACC and rank *pari passu* with the 97/8% Notes and the Series D Notes. U.S. Bank serves as indenture trustee for the Series B Notes pursuant to an Indenture, dated October 23, 1996, between KACC, as issuer, the Subsidiary Guarantors and First Trust National Association, predecessor trustee to U.S. Bank.

***107/8% Series D Senior Notes Due 2006***

22. On December 23, 1996, KACC issued and sold \$50 million in principal amount of Series D Notes. The Series D Notes are unsecured obligations of KACC and rank *pari passu* with the 97/8% Notes and the Series B Notes. U.S. Bank serves as indenture trustee for the Series D Notes pursuant to an Indenture, dated December 23, 1996, between KACC, as issuer, the Subsidiary Guarantors and First Trust National Association, predecessor trustee to U.S. Bank.

C. Events Preceding the Debtors' Chapter 11 Filings.

*Overleverage*

23. The Debtors' core financial problem is their excessive debt burden. The Debtors are highly leveraged companies with significant near-term debt maturities, including the maturity of the 9 $\frac{7}{8}$ % Notes on February 15, 2002 and the 12 $\frac{3}{4}$ % Notes on February 1, 2003. The Debtors' ability to resolve these near-term maturities has been significantly impaired by liquidity problems brought about by weak industry and economic conditions as well as asbestos liabilities and retiree obligations, each of which is discussed below.

*Weak Industry and Economic Conditions*

24. The deteriorating economy caused a severe contraction in the Debtors' liquidity, as falling metal prices and weak demand in general for aluminum products negatively affected the Debtors' financial performance. The Debtors' liquidity problems were exacerbated in the aftermath of the September 11, 2001 terrorist attacks due to the substantial decline in demand for aerospace products.

*Legacy Issues*

25. Asbestos Claims. Although KACC has not sold any products containing asbestos for more than 20 years, it is a defendant in a number of asbestos-related lawsuits in which the plaintiffs allege that certain of their injuries were caused by, among other things, exposure to asbestos during, and as a result of, their employment or association with KACC or exposure to products containing asbestos produced or sold by KACC. To date, approximately 75% of the asbestos-related defense and settlement costs incurred by the Debtors have been covered by insurance. Nonetheless, asbestos liabilities have continually affected the Debtors' liquidity and cash flows because of the short fall in insurance recoveries. In addition, once the Debtors make a settlement payment, there is usually a delay before the Debtors receive

reimbursement from the applicable insurance company. Further, the continuing pace of new asbestos claims and the year over year increase in the required amounts to settle claims has further strained the Debtors' liquidity. These factors, coupled with the uncertainty associated with these claims and the chapter 11 filings by numerous other companies with asbestos claims, has substantially impaired the Debtors' ability to access the capital markets as a means to refinance their near-term maturities and avoid chapter 11.

26. Retiree Medical and Pension Obligations. Poor stock market performance during 2001 resulted in lower rates of return on investments and, accordingly, a decline in value of the assets held by the Debtors' pension plans. Interest rates have also declined and, accordingly, the value of the plans' liability has increased. The net effect of these two factors has been to create a significant increase in the Debtors' projected future contributions to the pension plans. While expected pension plan contribution requirements for 2002 are not expected to be significantly greater than those in recent years, unless there is a substantial decline in the unfunded amounts due to improved asset values or increased interest rates, the Debtors' post 2002 pension funding obligations are expected to increase significantly.

27. At the same time, the Debtors, like other companies with post retirement medical obligations, experienced a significant increase in healthcare costs for retirees. However, the impact on the Debtors has been particularly severe because the Debtors' recent efficiency initiatives have substantially increased the number of retirees. The Debtors' obligations to retirees — like their debt-maturity, liquidity and asbestos issues — have hampered the Debtors' efforts to restructure their obligations outside of chapter 11 by substantially reducing available cash flow.

### *The Debtors' Attempts to Resolve Their Financial Issues*

28. In September 2001, KACC sold approximately 8.3% of its interest in QAL for total consideration of \$189 million, including approximately \$159 million in cash. The sale temporarily improved the Debtors' liquidity and their ability to refinance or restructure the 9<sup>7</sup>/<sub>8</sub>% Notes, some of which the Debtors purchased on the open market with cash from the sale in anticipation that the 9<sup>7</sup>/<sub>8</sub>% Notes would be retired at their maturity date. Once the Debtors began to compile their fourth quarter 2001 financial results and to receive forecasts from the business units in December 2001 and early January 2002, it became apparent that efforts to retire the 9<sup>7</sup>/<sub>8</sub>% Notes or restructure all the Notes outside of chapter 11 were no longer feasible.

29. In light of these facts, the Board of Directors of KACC determined not to make the February 1, 2002 interest payment due on the 12<sup>3</sup>/<sub>4</sub>% Notes. KACC's Board also determined that the Debtors would be unable to make the February 15, 2002 principal payment due on the 9<sup>7</sup>/<sub>8</sub>% Notes. Given the foregoing combination of circumstances, and to provide the Debtors breathing room to determine an appropriate capital structure, the Debtors concluded that the filing of these chapter 11 cases on February 12, 2002 would be the best alternative for the Debtors to preserve their value for the benefit of stakeholders and, therefore, authorized the Debtors' chapter 11 filings.

## **II. FIRST DAY PLEADINGS**

30. Concurrently with the filing of their chapter 11 cases, the Debtors intend to file a number of First Day Pleadings. The Debtors anticipate that the Court will conduct a hearing on the first day of the Debtors' chapter 11 cases (the "First Day Hearing") at which the Court will hear certain of the First Day Pleadings. The Debtors also anticipate that the Court will consider certain of the First Day Pleadings at a later time. Those First Day Pleadings that the

Debtors anticipate will be heard at the First Day Hearing are described in sections A through D below. The remaining First Day Pleadings are briefly described in section E below.

31. Generally, the First Day Pleadings have been designed to meet the Debtors' goals of: (a) continuing the Debtors' operations in chapter 11 with as little disruption and loss of productivity as possible; (b) maintaining the confidence and support of the Debtors' customers, employees, suppliers and service providers and certain other key constituencies; (c) continue and maintain the ordinary operations and functioning of its foreign joint ventures, (d) obtaining necessary postpetition financing; and (e) establishing procedures for the smooth and efficient administration of these cases. I have reviewed each of the First Day Pleadings, including the exhibits thereto and supporting memoranda, and I believe that the relief sought in each of the First Day Pleadings is tailored to meet the goals described above and, ultimately, will be critical to the Debtors' ability to achieve a successful reorganization.

**A. The Case Administration Motions.**

***Joint Administration***

32. The Debtors will present a motion requesting the entry of an order providing for the joint administration, but not the substantive consolidation, of the Debtors' chapter 11 cases. Such an order is a necessary administrative convenience for the Court, the Office of the Clerk of the Court (the "Clerk's Office") and all parties in interest.

***Request to File Consolidated List of Creditors and  
Consolidated List of 50 Largest Unsecured Creditors***

33. Given the size of the Debtors' chapter 11 cases, the Debtors also will seek authority to (a) file the lists identifying their respective creditors (without claim amounts) and equity security holders on a consolidated basis in the format or formats currently maintained in the ordinary course of the Debtors' businesses in lieu of (i) the matrices otherwise contemplated

by Local Bankruptcy Rule 1007-2 and (ii) any additional disclosures that may be required under Bankruptcy Rule 1007(a)(3); and (b) file a consolidated list of their 50 largest unsecured creditors in lieu of filing separate lists of the largest 20 unsecured creditors for each of the Debtors.

*Appointment of Claims and Noticing Agent*

34. The large number of creditors and other parties in interest involved in the Debtors' chapter 11 cases may impose heavy administrative and other burdens upon the Court and the Clerk's Office. To relieve the Court and the Clerk's Office of these burdens, the Debtors will seek the entry of an order appointing Logan & Company, Inc. as the Debtors' claims and noticing agent in these chapter 11 cases.

**B. Soft Landing Motions.**

*Employee Wages and Benefits*

35. The Debtors' workforce includes approximately 3,100 full and part-time employees and numerous independent contractors (collectively, the "Employees"). The continued and uninterrupted service of the Employees is essential to the Debtors' continuing operations and their ability to reorganize. Any delay in the provision of prepetition compensation, employee benefits, reimbursement of employee business expenses or payments for which employee payroll deductions were made (collectively, the "Prepetition Employment Payments") will substantially impair the Debtors' relationship with the Employees and destroy Employee morale at the very time when the dedication, confidence and cooperation of these Employees is most critical. At this critical early stage, the Debtors simply can not risk the substantial disruption of business operations that would inevitably result from any decline in workforce morale attributable to the Debtors' failure to make Prepetition Employment Payments in the ordinary course of their businesses. Accordingly, the Debtors will seek the entry of an

order authorizing, among other things, the Debtors, in the Debtors' sole discretion, to pay (a) Prepetition Employment Payments to or for the benefit of their Employees and (b) all costs and expenses incident to the Prepetition Employment Payments.

***Workers' Compensation Programs***

36. The Debtors have employees in numerous states. Because the Debtors are required under the laws of most states to maintain workers' compensation coverage, with drastic remedies if the Debtors fail to comply with those laws, the Debtors will seek an order of the court authorizing them to continue their current workers' compensation programs in all applicable states as well as certain former self-insured programs in states where there is an irrevocable letter of credit securing the Debtors' obligation to continue to satisfy outstanding claims. In connection therewith, the Debtors will also request that the order authorize them to pay all prepetition claims and related processing costs.

37. With respect to other former self-insured programs, the Debtors will seek authority to be permitted to waive, in their sole discretion, the protections granted by the automatic stay under section 362 of the Bankruptcy Code to the extent necessary to permit the applicable federal or state workers' compensation agencies to take such actions necessary to pay the workers' compensation claims under those former self-insured programs. To facilitate a smooth transition to this new approach from the former self-insured programs, the Debtors will seek authority to pay, in their sole discretion, the claims that come due under these former self-insured programs, regardless of whether such claims are payable from another source.

***Customer Obligations***

38. As of the Petition Date, the Debtors were in the midst of providing goods and services to their numerous direct customers. As a result, the Debtors have certain outstanding prepetition obligations to customers (collectively, the "Customer Obligations") that

otherwise would be honored in the ordinary course of the Debtors' businesses. Given the critical nature of the Debtors' relationships with their customers and the importance of these relationships to the Debtors' businesses and reorganization efforts, the Debtors will seek the entry of an order authorizing the Debtors, in their sole discretion, to treat all Customer Obligations, and the goods and services they represent, in the ordinary course of the Debtors' businesses in the same manner and on the same terms and conditions as such obligations were treated prior to the Petition Date.

***Warehouse, Freight and Customs Claims***

39. In the ordinary course of their businesses, the Debtors use the services of various third-party warehousemen, freight carriers, related freight service providers and customs brokers, including (a) claims of certain third-party freight and vessel companies and warehouse facilities (collectively, the "Warehouse and Freight-Related Claims") and (b) claims of certain customs brokers and freight forwarders (collectively, the "Customs Claims").

40. If the Debtors do not pay the prepetition amounts owed for the Warehouse and Freight-Related Claims, the applicable service provider may refuse to release or transport goods in their possession. Moreover, the Debtors' failure to pay the Warehouse and Freight-Related Claims may result in the respective service provider asserting a possessory lien under the applicable state law. In addition, the holders of Customs Claims, which facilitate the movement of the Debtors' goods to or from overseas locations, may discontinue their services if the Debtors do not pay such claims.

41. The Debtors' failure to pay the Warehouse and Freight-Related Claims or the Customs Claims therefore would significantly slow, or altogether halt, the transportation of essential goods and raw materials among the Debtors' facilities, disrupting the Debtors' production systems and potentially damaging the Debtors' relationships with their customers.

Accordingly, the Debtors will seek entry of an order authorizing them to pay the undisputed amounts owed by the Debtors on account of outstanding Warehouse and Freight-Related Claims and Customs Claims.

*Critical Vendor and Service Provider Claims*

42. In connection with the operation of the Debtors' businesses, the Debtors regularly obtain goods and services from certain critical vendors and service providers (collectively, the "Critical Vendors"). Many of these Critical Vendors have outstanding claims for goods and services provided to the Debtors prior to the Petition Date (collectively, the "Critical Vendor Claims"). The Critical Vendor Claims include:

- (a) claims of certain businesses that perform essential specialized maintenance, operational and manufacturing services at certain of the Debtors' facilities;
- (b) claims of certain vendors that effectively are the only available source of essential goods and services required to manufacture the Debtors' products; and
- (c) claims of certain vendors that perform essential specialized maintenance, operational and manufacturing services or supply essential goods to the Debtors and for whom the Debtors are a primary or exclusive customer.

The Debtors believe that the payment of the Critical Vendor Claims is essential to (a) ensure that the Debtors continue to receive essential goods and services that are unavailable from other sources and (b) preserve critical relationships with the Debtors' customers. By contrast, failure to pay the Critical Vendor Claims would severely impede the Debtors' ability to (a) obtain essential goods and services, (b) operate their businesses and (c) effectuate a successful reorganization. Accordingly, the Debtors will seek the entry of an order authorizing the Debtors to pay the Critical Vendor Claims in their sole discretion. To maximize the benefits to the Debtors' estates, the Debtors will propose to condition the payment of each Critical Vendor

Claim on such terms, if any, as the Debtors deem necessary in their sole discretion to ensure that the applicable Critical Vendor will continue to supply goods or services to the applicable Debtor after the Petition Date on the terms and in the manner that such goods or services were provided prior to the Petition Date.

#### ***Trust Fund Taxes***

43. In the ordinary course of their businesses, the Debtors collect certain trust fund taxes, such as sales and use taxes (collectively, the "Trust Fund Taxes"), and hold these Trust Fund Taxes for a period of time before remitting them, as required, to the appropriate taxing authorities (collectively, the "Taxing Authorities"). Many state and local Taxing Authorities impose personal liability on the officers and directors of entities responsible for collecting Trust Fund Taxes to the extent that any such taxes are collected but not remitted. Thus, if any prepetition Trust Fund Taxes remain unpaid, the Debtors' officers and directors may be subject to lawsuits, or even criminal prosecution, on account of any such nonpayment during the pendency of these chapter 11 cases. Such lawsuits or proceedings obviously would constitute a significant distraction for officers and directors at a time when they should be focused on the Debtors' efforts to (a) stabilize their postpetition business operations and (b) develop and implement a successful reorganization strategy. Accordingly, the Debtors will seek the entry of an order authorizing them, in their sole discretion, to pay prepetition Trust Fund Taxes.

#### ***Adequate Assurance of Payment for Utilities***

44. The Debtors currently utilize gas, water, electric, telephone and other utility services provided by approximately 80 utility companies (collectively, the "Utility Companies"). Because the Utility Companies provide essential services to the Debtors' manufacturing and other facilities, any interruption in utility services could prove devastating. In

fact, the temporary or permanent discontinuation of utility services at any of the Debtors' facilities could irreparably disrupt the Debtors' business operations and, as a result, fundamentally undermine the Debtors' reorganization efforts. Accordingly, the Debtors will seek the entry of an order determining that (a) the Debtors' history of prompt and full payment for utility services, (b) the Debtors' demonstrable ability to pay future utility bills, (c) the administrative priority status afforded the Utility Companies' postpetition claims and (d) any existing cash security deposits (and other forms of security) held by certain of the Utility Companies together constitute adequate assurance of payment for future utility services, pursuant to section 366(b) of the Bankruptcy Code.

#### *Joint Ventures*

45. The Debtors compete globally with producers of bauxite, alumina, primary aluminum and fabricated aluminum products. Much of the Debtors' bauxite, alumina and primary aluminum is produced at overseas facilities owned through joint venture entities in which the Debtors hold, directly or indirectly, less than a 100% ownership interest (collectively, the "Joint Ventures"). The Joint Ventures, many dating back to the 1960s, enable the Debtors to achieve competitive production cost positions on an international basis and source raw materials either (a) for further processing in facilities owned by the Debtors or in which the Debtors have interests or (b) for sale by the Debtors to third-party customers around the world. The Debtors' direct and indirect interests in the Joint Ventures are responsible for a material portion of the Debtors' generation of earnings and cash flow in the United States. In fact, the Joint Ventures are expected to generate approximately 40% of the Debtors' net revenue forecast for 2002.

46. In the ordinary course of their business, the Debtors, either directly or through certain nondebtor subsidiaries, engage in transactions with the Joint Ventures (collectively, the "Joint Venture Transactions"). The Joint Venture Transactions are governed by

constituent documents, which are different for each Joint Venture. In general, however, the Joint Venture Transactions share the same general structure. The Debtors fund the cash costs of the Joint Ventures for raw materials, labor and other operational costs, as well as capital expenditures, taxes, debt service and working capital in order to continuously source the Debtors' global production and delivery requirements. The obligations of the Debtors and the Joint Ventures generally are unconditional. Failure to take products or make payments generally is a default under the relevant Joint Venture agreements, which, in turn, could enable the Joint Venture partners to claim forfeiture of the Debtors' interests.

47. Because the Debtors engaged in the Joint Venture Transactions on a regular basis prior to the Petition Date and such transactions are common among enterprises like the Debtors and their nondebtor affiliates, the Debtors believe that the Joint Venture Transactions are ordinary course transactions within the meaning of section 363(c)(1) of the Bankruptcy Code and thus do not require the Court's approval. Nonetheless, out of an abundance of caution and because of the significant amounts involved, the Debtors are seeking express authority to engage in such transactions. Continuation of the Joint Venture Transactions is essential (a) for the Joint Ventures to continue operations in some cases and (b) for the Debtors to retain their interests in the Joint Ventures. Accordingly, the Debtors will seek the entry of an order authorizing the Debtors to continue Joint Venture Transactions in the ordinary course of business and pay all prepetition amounts owed in respect of Joint Venture Transactions.

*Confirmation of Administrative Expense Priority*

48. In the ordinary course of the Debtors' businesses, numerous suppliers and service providers (collectively, the "Suppliers") provide the Debtors with goods and services that are integral to the Debtors' ongoing operations. Under the circumstances of the case, the Debtors believe that certain relief is needed to provide necessary assurances to the Suppliers and thereby

permit the Debtors to obtain timely delivery of goods and the uninterrupted provision of services from the Suppliers, including goods and services pursuant to outstanding purchase orders.

Accordingly, the Debtors will seek the entry of an order, among other things, confirming that the Debtors' undisputed obligations to the Suppliers arising from (a) shipments of goods delivered to and accepted by the Debtors following the Petition Date and (b) the provision of services to the Debtors following the Petition Date at the Debtors' request will be entitled to administrative expense priority status under Section 503(b)(1)(a) of the Bankruptcy Code.

**C. The Cash Management Motion.**

49. As affiliated entities, the Debtors utilize an integrated cash management system (the "Cash Management System") in the day-to-day operation of their business. In light of the substantial size and complexity of the Debtors' affairs, a successful reorganization of the Debtors, as well as the preservation and enhancement of the Debtors' respective values as going concerns, cannot be properly achieved if cash management procedures are substantially disrupted. Therefore, it is essential that the Debtors be permitted to continue to consolidate the management of cash and transfer monies from entity to entity as needed, in the amounts necessary to continue business operations and in accordance with their existing cash management procedures.

50. The Debtors have utilized the Cash Management System for several years, and it constitutes a customary and essential business practice. The Cash Management System is similar to those commonly employed by enterprises comparable to the Debtors in size and complexity. The widespread use of such systems, moreover, is attributable to the numerous benefits they provide, including the ability to (a) control and monitor corporate funds, (b) invest idle cash, (c) ensure cash availability and (d) reduce administrative expenses by facilitating the

movement of funds and the development of timely and accurate account balance and presentment information. These controls are especially important for the Debtors, given the significant volume of cash transactions — aggregating more than \$2 billion annually — that is managed through the Cash Management System.

51. In addition, given the Debtors' organizational and financial structure and the number of entities participating in the Cash Management System, it would be difficult and unduly burdensome for the Debtors to establish an entirely new system of accounts and a new cash management and disbursement system for each separate legal entity. Preserving a "business as usual" atmosphere and avoiding the unnecessary distractions that inevitably would be associated with any substantial disruption of the Cash Management System obviously would facilitate the stabilization of postpetition business operations and would assist the Debtors in their reorganization efforts. If the Debtors are not permitted to continue to utilize the Cash Management System, business operations would be severely, and perhaps irreparably, impaired. The Debtors, therefore, will seek the entry of an order approving the use of the Cash Management System, as such system may be modified pursuant to the requirements of the Debtors' proposed debtor in possession financing facility (the "DIP Facility").

52. Certain of the Kaiser Companies (collectively, the "Nondebtor Affiliates") have not commenced chapter 11 cases. Prior to the Petition Date, the Debtors and the Nondebtor Affiliates engaged in intercompany financial transactions in the ordinary course of their respective businesses. Transfers of cash to and from appropriate accounts are made as a result of these transactions, which typically are in the nature of payment of costs related to the production of goods and services procured by the Debtor from the Nondebtor Affiliates for the benefit of all of the Kaiser Companies. The transactions also include payments for: (a) the funding of the

Nondebtor Affiliates' working capital requirements; (b) goods purchased by the Debtors and Nondebtor Affiliates from one or more of the Debtors, or vice versa; and (c) ordinary course asset transfers from one company to another.

53. The Debtors anticipate that the ordinary course transactions and related transfers among appropriate accounts described above (collectively, the "Intercompany Transactions") will continue following the Petition Date. Accordingly, the Debtors will seek authority to continue the Intercompany Transactions. These transactions reduce the administrative costs incurred by the Debtors and their Nondebtor Affiliates. By contrast, if the Intercompany Transactions were to be discontinued, the Cash Management System and related administrative controls would be disrupted, to the detriment of the Debtors and their Nondebtor Affiliates.

54. In connection with the Intercompany Transactions, funds generated by the domestic business operations of each participant, after any applicable disbursements, generally flow into a centrally maintained concentration account (the "Concentration Account"). As individual Debtors and Nondebtor Affiliates participating in the Cash Management System require funds to meet current obligations, cash is transferred from the Concentration Account into the appropriate disbursement accounts, as required to meet such current obligations. In addition, cash is transferred between the Concentration Account and accounts maintained by the Nondebtor Affiliates. Accordingly, at any given time, there may be balances due and owing from one Debtor to another Debtor or to a Nondebtor Affiliate. These balances represent extensions of intercompany credit. The Debtors maintain strict records of all transfers of cash and can readily ascertain, trace and account for all Intercompany Transactions. The Debtors, moreover, will continue to maintain such records, including records of all current intercompany

accounts receivable and payable. To ensure that each individual Debtor will not, at the expense of its creditors, fund the operations of another entity, the Debtors will request that, pursuant to section 364(c)(1) of the Bankruptcy Code, an order be entered confirming that all intercompany claims arising after the Petition Date as a result of Intercompany Transactions be accorded administrative status pursuant to section 503(b) of the Bankruptcy Code.

55. In connection with their cash management requests, to avoid substantial disruption to the normal operation of their businesses and to preserve a "business as usual" atmosphere, the Debtors also will seek authority to continue to use their prepetition bank accounts. Allowing these accounts to be maintained with the same account numbers will assist the Debtors in accomplishing a smooth transition to operating under chapter 11. To protect against the possible inadvertent payment of prepetition claims, however, all banks with which the Debtors hold prepetition bank accounts will be advised immediately not to honor checks issued prior to the Petition Date, except as otherwise ordered by the Court. The Debtors have instituted procedures that will enable them to distinguish between pre- and postpetition obligations and payments without closing the prepetition bank accounts and opening new ones.

56. With respect to the issuance of postpetition checks and related items, in the ordinary course of their businesses, the Debtors use a multitude of checks and other business forms. By virtue of the expansive nature and scope of the Debtors' business operations and the large number of suppliers of goods and services with whom the Debtors deal on a regular basis, it is important that the Debtors be permitted to continue to use their existing checks and other business forms without alteration or change and will seek a court order permitting such continued use. To avoid disruption of the Cash Management System and unnecessary expense,

moreover, the Debtors will request that they not be required to include the legend "Debtor in Possession" or a "debtor in possession number" on any checks or other business forms.

57. Finally, as part of the Cash Management System and consistent with the requirements of the DIP Facility, excess funds generated by the Debtors' business operations are invested on an overnight basis primarily in either certificates of deposit, A1-P1 commercial paper, repurchase agreement or money market funds. Although all such investments may not literally satisfy the requirements of section 345 of the Bankruptcy Code, all investments are safe, prudent and designed to yield the maximum reasonable net return on the funds invested, taking into account the safety of such investments. Accordingly, the Debtors will seek an order authorizing them: (a) to invest and deposit funds in a safe and prudent manner in accordance with their existing investment and deposit guidelines (the "Investment Guidelines"), notwithstanding that such guidelines may not strictly comply in all respects with section 345 of the Bankruptcy Code; and (b) for the applicable institutions to accept and hold or invest such funds in accordance with the Investment Guidelines.

**D. The DIP Financing Motion.**

58. It is essential to the Debtors that they obtain postpetition financing to continue their ordinary course, day-to-day operations, service their customers, accomplish their long-term strategic business restructuring goals and effectuate their reorganization. Although the Debtors have considerable assets, including approximately \$99 million in cash as of the Petition Date, immediate access to credit under the DIP Facility described below is necessary to enhance their liquidity and provide customers, employees, vendors, suppliers and other key constituencies with the confidence that the Debtors have more than sufficient resources available to maintain their operations in the ordinary course. The failure to have this liquidity or the full cooperation

of these parties at this time could cause the loss of customer patronage and thereby impair the Debtors' ability to maximize the value of their estates and reorganize successfully.

59. Accordingly, without prompt access to a postpetition financing facility, the Debtors risk real and substantial harm to their businesses. The availability of credit under such a facility should instill confidence in vendors, suppliers and customers, as well as encourage these parties to continue to do business with the Debtors, thereby facilitating the Debtors' smooth transition to chapter 11 and their ultimate successful reorganization.

60. The Debtors will therefore seek the entry of an interim order (a) authorizing the Debtors to obtain a \$300 million postpetition credit facility (the "DIP Facility") pursuant to a postpetition revolving credit agreement by and among KAC as borrower, KACC as guarantor and Bank of America, N.A., for itself and as agent (the "Agent") for certain other lenders; (b) pending a final hearing with respect to the DIP Facility, authorizing the Debtors to obtain loans under the DIP Facility in an amount not to exceed \$150 million; (c) granting the Agent liens on substantially all property of the Debtors' estates to secure the repayment of the obligations under the DIP Facility; and (d) scheduling a prompt final hearing with respect to the DIP Facility.

61. To obtain postpetition financing, the Debtors approached three sophisticated commercial entities, all of which have more than adequate financial resources to make a debtor in possession financing facility available to the Debtors. Given the magnitude of the financing required, the complexity of the Debtors' businesses, the immediacy of the Debtors' financing needs, and the favorable and comparable terms the Debtors received from the lenders they solicited, the Debtors determined that it would not be productive to solicit interest from additional lenders. None of the entities approached by the Debtors was willing to make a

postpetition loan on an unsecured basis for a facility of this type and magnitude and on terms as favorable as the DIP Facility. Moreover, after negotiations with each of these potential lenders or lender groups, the Debtors concluded that, under the circumstances, it could not have obtained a postpetition credit facility to meet its working capital needs either at all or on terms more favorable than those contained in the DIP Facility.

**E. Anticipated First Day Pleadings Not to be Heard First Day.**

***Extension of Time to File Schedules and Statements***

62. Because of (a) the substantial size and scope of the Debtors' businesses, (b) the complexity of their financial affairs, (c) the limited staffing available to perform the required internal review of their accounts and affairs, (d) the Debtors' utilization of decentralized accounting systems and (e) the press of business incident to the commencement of these chapter 11 cases, the Debtors will be unable to assemble all of the information necessary for each of the Debtors to complete and file the required schedule of assets and liabilities, schedule of current income and expenditures, schedule of executory contracts and unexpired leases and statement of financial affairs (collectively, the "Schedules and Statements") within the time period allotted by the Bankruptcy Code. The Debtors, moreover, have (a) thousands of active vendors, (b) approximately 5,800 employees and (c) more than 100,000 other creditors. The Debtors must ascertain the pertinent information, including addresses and claim amounts, for each of these parties to complete the Schedules and Statements on a Debtor-by-Debtor basis. Accordingly, the Debtors will seek the entry of an order extending the time within which the Debtors must file their Schedules and Statements by 90 days (to a total of 120 days).

***Professional Retention Applications***

63. The retention of certain chapter 11 professionals is essential to the Debtors' reorganization efforts. Accordingly, the Debtors will seek to retain various professionals to represent and assist them in connection with these chapter 11 cases. These professionals include: (a) Jones, Day, Reavis & Pogue as counsel; (b) Richards, Layton & Finger as co-counsel; (c) Kramer Levin Naftalis & Frankel LLP as special corporate counsel; (d) Wharton, Levin, Ehrmantraut, Klein & Nash, P.A. as special asbestos counsel; (e) Heller Ehrman White & McAuliffe, LLP as special insurance counsel; (f) Seyfarth Shaw as special labor, employment and employee benefits counsel; (g) Lemle & Kelleher, L.L.P. as special non-asbestos products litigation counsel; (h) Shaw Norton, L.L.P. as special products liability counsel; (i) Lazard Freres & Co. as financial advisors; (j) Arthur Andersen LLP as independent auditors; (k) The MWW Group as corporate communications consultants; and (l) Resources Connection as compensation consultants.

#### *Interim Compensation*

64. Given the size and complexity of the Debtors' chapter 11 cases and the amounts of fees and expenses that will be incurred by the Debtors' professionals, the Debtors also will seek the entry of an administrative order establishing certain procedures that will permit the Debtors to pay the professionals retained by them and other constituencies in these cases on a monthly basis. Such professionals' fees and expenses will be subject to interim and final allowance in accordance with the procedures established by the Court.

#### *Ordinary Course Professionals*

65. The Debtors' employees, in the day-to-day performance of their duties, regularly call upon certain professionals, including accountants, actuaries, attorneys, environmental, financial and other consultants (collectively, the "Ordinary Course Professionals"), to assist them in carrying out their assigned responsibilities. Because of the

magnitude and breadth of the Debtors' businesses and the geographic diversity of the professionals regularly retained by the Debtors, it would be costly, time-consuming and administratively cumbersome for the Debtors and the Court to require each Ordinary Course Professional to apply separately for approval of its employment and compensation. Moreover, the uninterrupted service of the Ordinary Course Professionals is vital to the Debtors' continuing operations and their ability to reorganize. Accordingly, the Debtors will seek the entry of an order authorizing them to retain, employ and pay the Ordinary Course Professionals in the ordinary course of their businesses. If the fees of any Ordinary Course Professional exceed \$50,000 during the preceding six-month period, however, the Debtors will seek to retain that professional, pursuant to section 327 of the Bankruptcy Code.

### III. CONCLUSION

66. To preserve the value of their businesses to the fullest extent possible, the Debtors' immediate objective is to maintain "business as usual" following the commencement of these chapter 11 cases by minimizing any adverse impact of the chapter 11 filing on the Debtors' operations. For the reasons described herein and in the First Day Pleadings, I believe that the prospect for achieving these objectives for the benefit of creditors and other stakeholders will be substantially enhanced if this Court grants the relief requested in each of the First Day Pleadings.
