New Zealand indigenous vascular plant checklist – alphabetical	49

INTRODUCTION

This is the second approximation of New Zealand's indigenous vascular plant taxa sponsored by the New Zealand Plant Conservation Network.

This list covers the New Zealand Botanical Region as defined by Allan (1961, Flora of New Zealand, Vol. I, Government Printer, Wellington). That means it covers those taxa indigenous to the Kermade, Three Kings, North, South, Stewart, Chatham, Antipodes, Bounties, Snares, Auckland, Campbell, Macquarie islands of the New Zealand subcontinent. The indigenous flora of Lord Howe and Norfolk Island have been specifically excluded from this list because, although they are part of the New Zealand subcontinent, they were not included by Allan in his concept of the New Zealand Botanical Region.

The list expresses the biosystematic opinions of the authors. In taxonomy, perhaps more than any other of the natural sciences, one has the freedom to form an opinion based on available evidence. As such, some of the taxa accepted here at particular ranks may be regarded by others as doubtful, e.g., the monotypic genus *Ewartiothamnus* for what others would regard as a species of *Ewartia*. Equally other taxa listed here have been regarded as naturalised by other authors e.g., *Persicaria prostrata*, *Scirpus polystachys*. Again this view of their status is based on field experience, personal interpretation of the available literature, the autecology, and biogeographic nature of the occurrences of these taxa, factors which were not as a rule considered by past authors in their decisions regarding indigenous or naturalised status.

Following the long tradition established by the late A. P. (Tony) Druce (1920–1999) a compilation of available chromosome data is attempted, standardising this to “diploid” ($2n$) numbers. The presentation expands on the work presented by Dawson (*New Zealand Journal of Botany* 38: 47–150 (2000)) and other more recent publications in that same periodical. These are the primary sources, and should be referred to in situations of doubt.

Furthermore, those taxa believed endemic to the New Zealand Botanical Region have been documented, at the ranks of family, genus, species, subspecies, variety and forma (the latter four done collectively). We hope that this will help rectify published discrepancies in the exact numbers of endemic taxa.

This list will be updated as and when new revisions of New Zealand vascular plant families and genus are completed. Authorities and synonymies are not provided, and readers should refer to the website of the New Zealand Plant Conservation Network for these. The list does not include the approximately 200 plant entities that are currently considered “taxonomically indeterminate” meaning they have not been formally described or recognised as distinct taxa.

This is a departure from previous unpublished works of A.P. (Tony) Druce on which this list is based. This is because, to practising biosystematists, the mass proliferation of “tag named” entities to a wide audience is unhelpful. There is much more required in testing a hypothetical entity, than its provisional listing, usually without specific voucher specimen citation. In our experience, all that has been achieved by past listings of such entities is much debate, dissension and confusion amongst the wider botanical audience.

Taxa are first listed by plant group (e.g., orchid, fern or sedge) then alphabetically. For more information about the plants listed here please see the web site of the New Zealand Plant Conservation Network – www.nzpcn.org.nz. Any specific comments about listings provided should be made to the Network: info@nzpcn.org.nz.

The list and its arrangements owe their origin to the late A.P. (Tony) Druce who initiated the concept through a series of largely unpublished “working” documents initiated in the early 1970s. Summary statistics about the New Zealand flora are provided below. For each structural class, we have provided summary figures, expressed as XX/XX, as a quick guide to indicate the numbers of taxa regarded as indigenous, numbers of taxa for which chromosome counts have been published, and the numbers of taxa regarded as endemic by family, genus or lower ranks.

Two taxa *Cardamine debilis* and *Myosotis australis*, are treated as species aggregates (agg.) meaning that there is probably more than one entity included under the current circumscription of these. Names for some of these are available in the literature but, on specific advice from specialists working on these taxa, we have refrained from using these names. For the purposes of the summary figures provided in this document, we treat both species aggregates as representing single entities.

NEW ZEALAND VASCULAR FLORA – SUMMARY STATISTICS

Total number

Families	90
Genera ¹	446
New Zealand vascular plant taxa: species, subspecies, variety, forma:	2357

Number of threatened and uncommon taxa

Threatened vascular plant taxa:	230	(9.8%)
Uncommon vascular plant taxa:	524	(22.3%)
Other threat categories (e.g., Extinct, Data Deficient, Coloniser, Vagrant):	86	(3.7%)

Numbers of plant by threat category

Extinct:	5
Nationally Critical:	56
Nationally Endangered:	53
Nationally Vulnerable:	19
Serious Decline:	28
Gradual Decline:	74
Range Restricted:	389
Sparse:	134
Coloniser:	11
Data Deficient:	54
Vagrant:	15

Numbers of plant by plant group

Gymnosperm trees & shrubs	21
Monocotyledonous trees & shrubs	7
Dicotyledonous trees & shrubs	574
Monocotyledonous lianes	2
Dicotyledonous lianes & related trailing plants	52
Clubmosses & quillworts	13
Ferns & fork ferns	188
Monocotyledonous herbs	
Orchids	104
Grasses	217
Sedges	178
Rushes & allied plants	49
Herbs other than orchids, grasses, sedges, rushes & allied plants	60
Dicotyledonous herbs	
Composites	257
Herbs other than composites	635
TOTAL:	2357

Number of endemic taxa

Families	1	(1%)
Genera	65	(14%)
Species, subspecies, varieties, forma	1944	(82%)
Vascular taxa for which chromosome counts have been reported	1879	(80%)

¹ *Corallospartium* is not included in this figure because that genus is not regarded as distinct from *Carmichaelia*, and the sole representative left in it, *C. crassicaule* var. *racemosum* awaits formal transfer to *Carmichaelia*.

NEW ZEALAND INDIGENOUS VASCULAR PLANT CHECKLIST – BY PLANT GROUP

Species name	Family	Chromosome number ($2n$)	Conservation status	Endemic		
				Family	Genus	Taxon
Gymnosperm trees & shrubs (21)		21/21		0/5	2/11	21/21
<i>Agathis australis</i>	Araucariaceae	26	Not Threatened			E

<i>Samolus repens</i> var. <i>strictus</i>	Primulaceae	52	Not Threatened				Dicot herbs other than composites
<i>Sarcocornia quinqueflora</i> var. <i>quinqueflora</i>	Amaranthaceae	18	Not Threatened				Dicot herbs other than composites
<i>Scaevola gracilis</i>	Goodeniaceae	48	Range Restricted				Dicot herbs other than composites
<i>Scandia geniculata</i>	Apiaceae	22	Not Threatened	E	E		Dicot herbs other than composites
<i>Scandia rosifolia</i>	Apiaceae	22	Sparse				Dicot herbs other than composites
<i>Schefflera digitata</i>	Araliaceae	24	Not Threatened				Dicot trees & shrubs
<i>Schizaea australis</i>	Schizaeaceae	188	Not Threatened				Ferns & fork ferns
<i>Schizaea bifida</i>	Schizaeaceae	154	Not Threatened				Ferns & fork ferns
<i>Schizaea dichotoma</i>	Schizaeaceae	c.1080	Sparse				Ferns & fork ferns
<i>Schizaea fistulosa</i>	Schizaeaceae	c.380	Not Threatened				Ferns & fork ferns
<i>Schizeilema allanii</i>	Apiaceae	32	Data Deficient	E			Dicot herbs other than composites
<i>Schizeilema cockaynei</i>	Apiaceae	48	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema colensoi</i>	Apiaceae	80	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema exiguum</i>	Apiaceae	32	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema haastii</i> var. <i>cyanopetalum</i>	Apiaceae	32	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema haastii</i> var. <i>haastii</i>	Apiaceae	32	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema hydrocotyloides</i>	Apiaceae	32	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema nitens</i>	Apiaceae	48	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema pallidum</i>	Apiaceae	48	Sparse	E			Dicot herbs other than composites
<i>Schizeilema reniforme</i>	Apiaceae	32	Range Restricted	E			Dicot herbs other than composites
<i>Schizeilema roughii</i>	Apiaceae	32	Not Threatened	E			Dicot herbs other than composites
<i>Schizeilema trifoliolatum</i>	Apiaceae	48	Not Threatened	E			Dicot herbs other than composites
<i>Schoenoplectus pungens</i>	Cyperaceae		Not Threatened				Monocot herbs: sedges
<i>Schoenoplectus tabernaemontani</i>	Cyperaceae	42	Not Threatened				Monocot herbs: sedges
<i>Schoenus apogon</i>	Cyperaceae	8	Not Threatened				Monocot herbs: sedges
<i>Schoenus brevifolius</i>	Cyperaceae		Not Threatened				Monocot herbs: sedges
<i>Schoenus caespitans</i>	Cyperaceae	8	Not Threatened				Monocot herbs: sedges
<i>Schoenus carsei</i>	Cyperaceae	c.60	Gradual Decline				Monocot herbs: sedges
<i>Schoenus concinnus</i>	Cyperaceae	c.64	Not Threatened				Monocot herbs: sedges
<i>Schoenus fluitans</i>	Cyperaceae	10	Range Restricted				Monocot herbs: sedges
<i>Schoenus maschalinus</i>	Cyperaceae	10	Not Threatened				Monocot herbs: sedges
<i>Schoenus nitens</i>	Cyperaceae	c.74	Not Threatened				Monocot herbs: sedges
<i>Schoenus pauciflorus</i>	Cyperaceae	28, 56	Not Threatened	E			Monocot herbs: sedges
<i>Schoenus tendo</i>	Cyperaceae	c.70	Not Threatened				Monocot herbs: sedges
<i>Scirpus polystachys</i>	Cyperaceae		Coloniser				Monocot herbs: sedges
<i>Scleranthus biflorus</i>	Caryophyllaceae	48	Not Threatened				Dicot herbs other than composites
<i>Scleranthus brockiei</i>	Caryophyllaceae	48	Not Threatened				Dicot herbs other than composites
<i>Scleranthus uniflorus</i>	Caryophyllaceae	48	Not Threatened	E			Dicot herbs other than composites
<i>Scutellaria novae-zelandiae</i>	Lamiaceae	60	Nationally Vulnerable	E			Dicot herbs other than composites
<i>Sebaea ovata</i>	Gentianaceae	c.54	Nationally Critical				Dicot herbs other than composites
<i>Selliera microphylla</i>	Goodeniaceae		Not Threatened	E			Dicot herbs other than composites
<i>Selliera radicans</i>	Goodeniaceae	16	Not Threatened				Dicot herbs other than composites
<i>Selliera rotundifolia</i>	Goodeniaceae	16	Gradual Decline	E			Dicot herbs other than composites
<i>Senecio australis</i>	Asteraceae	80	Vagrant				Dicot herbs: composites
<i>Senecio banksii</i>	Asteraceae	60	Not Threatened	E			Dicot herbs: composites
<i>Senecio biserratus</i>	Asteraceae	100	Not Threatened				Dicot herbs: composites
<i>Senecio carnosulus</i>	Asteraceae	80	Sparse	E			Dicot herbs: composites
<i>Senecio dunedinensis</i>	Asteraceae	40	Sparse	E			Dicot herbs: composites
<i>Senecio glaucophyllus</i> subsp. <i>basinudus</i>	Asteraceae	100	Range Restricted	E			Dicot herbs: composites
<i>Senecio glaucophyllus</i> subsp. <i>discoideus</i>	Asteraceae	100	Not Threatened	E			Dicot herbs: composites
<i>Senecio glaucophyllus</i> subsp. <i>glaucophyllus</i>	Asteraceae	100	Range Restricted	E			Dicot herbs: composites

Species name	Family	Chromosome Number (2n)	Conservation status	Endemic			Structural class

<i>Wahlenbergia albomarginata</i> subsp. <i>olivina</i>	Campanulaceae	36	Range Restricted	E			Dicot herbs other than composites
<i>Wahlenbergia cartilaginea</i>	Campanulaceae	36	Range Restricted	E			Dicot herbs other than composites
<i>Wahlenbergia congesta</i>	Campanulaceae	36	Sparse	E			Dicot herbs other than composites
<i>Wahlenbergia littoricola</i> subsp. <i>vernicolora</i>	Campanulaceae	54	Not Threatened				Dicot herbs other than composites
<i>Wahlenbergia matthewsii</i>	Campanulaceae	36	Range Restricted	E			Dicot herbs other than composites
<i>Wahlenbergia pygmaea</i> subsp. <i>drucei</i>	Campanulaceae	36	Range Restricted	E			Dicot herbs other than composites
<i>Wahlenbergia pygmaea</i> subsp. <i>pygmaea</i>	Campanulaceae	36	Not Threatened	E			Dicot herbs other than composites
<i>Wahlenbergia pygmaea</i> subsp. <i>tararua</i>	Campanulaceae	36	Data Deficient	E			Dicot herbs other than composites
<i>Wahlenbergia ramosa</i>	Campanulaceae	72	Not Threatened	E			Dicot herbs other than composites
<i>Wahlenbergia rupestris</i>	Campanulaceae	72	Not Threatened	E			Dicot herbs other than composites
<i>Wahlenbergia violacea</i>	Campanulaceae	72	Not Threatened	E			Dicot herbs other than composites
<i>Waiarea stenopetala</i>	Orchidaceae		Not Threatened	E	E		Monocot herbs: orchids
<i>Weinmannia racemosa</i>	Cunoniaceae	30	Not Threatened				Dicot trees & shrubs
<i>Weinmannia silvicola</i>	Cunoniaceae	30	Not Threatened				Dicot trees & shrubs
<i>Wilsonia backhousei</i>	Convolvulaceae		Vagrant				Dicot herbs other than composites
<i>Winika cunninghamii</i>	Orchidaceae	38, 40	Not Threatened	E	E		Monocot herbs: orchids
<i>Wolffia australiana</i>	Araceae	20, 40	Not Threatened				Monocot herbs other than orchids etc
<i>Xeronema callistemon</i> f. <i>bracteosa</i>	Xeronemataceae	34, 36	Range Restricted	E			Monocot herbs other than orchids etc
<i>Xeronema callistemon</i> f. <i>callistemon</i>	Xeronemataceae	34, 36	Range Restricted	E			Monocot herbs other than orchids etc
<i>Zannichellia palustris</i>	Potamogetonaceae	24	Not Threatened				Monocot herbs other than orchids etc
<i>Zostera capricorni</i>	Zosteraceae	24	Not Threatened				Monocot herbs other than orchids etc
<i>Zostera muelleri</i>	Zosteraceae	24	Not Threatened				Monocot herbs other than orchids etc
<i>Zotovia accicularis</i>	Poaceae		Data Deficient	E	E		Monocot herbs: grasses
<i>Zotovia colensoi</i>	Poaceae	48	Not Threatened	E			Monocot herbs: grasses
<i>Zotovia thomsonii</i>	Poaceae	48	Not Threatened	E			Monocot herbs: grasses
<i>Zoysia minima</i>	Poaceae	40	Not Threatened	E			Monocot herbs: grasses
<i>Zoysia pauciflora</i>	Poaceae	40	Not Threatened	E			Monocot herbs: grasses
