# AD HOC RESEARCH

## Core Capabilities

AHR core capabilities are IT Support, Cybersecurity, Test and Evaluation (T&E), Modeling and Simulation (M&S), Cyber Analytics, Data Analysis, and Visualization.

- Provide IT Managed services to include life cycle, help desk, network/system administration, web development, SharePoint development, and Video Telecommunication Conferencing (VTC) and audio support
- Cybersecurity Operations – threat hunting, digital twins
- Cloud computing and service provisioning
- Information System Security and RMF packaging to include security auditing and HBSS ePO configuration and administration
- Agile Software Life Cycle from requirements to deployment
- Data science services
- Network/system architecture and engineering
- Support test environment models and simulators with verification, validation and accreditation
- Develop data, application, and network modeling, simulators, and emulators to provide a realistic synthetic network test environment
- Provide training simulated environments
- Provide solutions for cybersecurity attack models

### Modeling & Simulation
- Synthetic Test Environment
- IW & EW M&S
- Cyber Range
- Threat Integration
- Operational Effectiveness study
- System of Systems Experimentation

### Test & Evaluation
- Capability LVC
- Integration Test
- Independent V&V
- Field test support
- Data collection & reduction
- Big Data Analysis & Visualization
- Network Design – tactical waveforms / radios
- Software Defined Network
- Message Oriented Middleware testing
- Integration Root Cause Analysis

### IT Managed Service
- Helpdesk / Lifecycle
- Web/SharePoint Develop
- Cloud Computing
- Systems/Network/Database O&M
- Service-Oriented Architecture design
- Big Data Sciences and analytics
- Change Management
- Records Management
- Data Engineering Services
- Computer Vision Analytics
- MLOps Platform
- AI Cognitive Agents

### Cyber Analytics
- Deep Packet Inspection cyber analytics
- Distributed Test Data analysis
- Tactical Message analysis
- Advanced Network Visualizations
- Threat hunting
- Network and system baselining
- DCO/OCO experimentation and exercises

### Logistic/Supply Chain
- Warehouse Operations
- Inventory management
- Supply on demand
- FSR "Fly Away" kits
- 10,000 SF warehouse
- DRMO
- Return/Spare Management
- SIF/STAMIS
- Logistics Supportability Analysis
- reliability, availability, and maintainability (RAM)
- Human Systems Integration (HSI)

**Cybersecurity:** AHR provides certified Information Systems Security professionals from security control identification to implementation with continuous cybersecurity monitoring across the network, cloud, and business applications. We develop and maintain RMF accreditation to ensure NIST compliance. Our cybersecurity capability solutions and services include:

- Security auditing and patch management
- Computer Network Defense (CND)
- HBSS/ePO server configuration and administration
- RMF package create, monitoring, and Assessment and Authorization (A&A)
- Develop System Security Plans (SSP) and Plan of Action and Milestone (POA&M).
- Vulnerability testing, ACAS scanning, continuous monitoring
- Implementing security controls and performing system/software assurance assessments.
- Information and data security
- Disaster recovery and continuity planning
- End-user IA support for operating systems, peripherals, and applications

AHR utilizes its cybersecurity/AI product, DarkStax™ to simplify the cyber threat hunting process. **DarkStax™** is a multi-purpose platform that provides synthetic cyberspace environment, predictive threat detection and autonomous actions powered by AI. Cyber Range Features: Traffic Generator, Digital Twin Provisioning, Cyber Entity Behavior Modeling, Autonomous Cyberspace Operations, Cyber Deception, Cyber Analytics, and Threat Hunting.

**Engineering Services:** AHR provides Engineering Services using our Agile iterative framework to perform all levels and areas of a managed engineering service for IT strategy, infrastructure, cybersecurity, business processes, data, governance/compliance, and assurance coupled with our requirements analysis capability. Our engineers investigate and identify communication issues, tools, and solutions data collection systems, simulation systems, and systems under test that use network technologies and methodologies for operational testing of network-centric systems and concepts. Our team provides expertise in network operations, network management, computer network operations, emerging cybersecurity offensive and defensive concepts, and information advantage concepts to develop network-based experimentation and analysis. Aspects of our Engineering Services consist of:

- Model-based systems engineering
- Trade-off and feasibility studies
- Analysis of alternative (AoA)
- Process and technique engineering and management
- IT strategy planning, managing, and monitoring
- Quality assessments
- Human behavioral factors
- Rapid prototyping

**Data Analytics:** AHR has invested capital and knowledge in building a Data to Decision Framework (D2D) to assist in the life cycle management of big data environments. This framework is easily applied to support training, model and simulation, and performing business data analytics. We develop database software, files, or interfaces from existing models and simulations to ensure analytical results can be gathered, documented, analyzed, and visualized in real-time at point of data collection. We combine Artificial Intelligence (AI) and Machine Learning (ML) cognitive agents with pattern recognition algorithms to act in a prescribed manner without the need for a tremendous number of resources.

With this capability, the analysts can quickly see if valuable data is collected and can adjust on the fly rather than waiting until after the exercise is done, the data collected and analyzed weeks later. This framework is also easily adaptive in supporting a training environment with scenarios and vignettes as it can change the parameters and conditions in near real-time.

Our managed solutions support an agile DataOps methodology, an approach to data analytics that automates the orchestration of data to production and the deployment of new features, both while maintaining impeccable quality.

D2D's advanced visualization library supports the analysis of multi-variant datasets and can display real-time data feeds and persistent data storage, as well as geospatial visualization that supports time-dynamic 3D scenes such as satellites and aircraft. These capabilities are easily deployed in a training environment to provide a synthetic realistic scenario library to rerun within a training environment.

**Requirements Analysis:** Our Requirements Analysis capability from discovery to implementation to validation throughout the system/application life cycle to ensure it meets the business requirements of customer organizations. We elicit, record, and analyze requirements based on objectives as it pertains to the business, customer, architectural, structural, behavioral, functional, performance, and user aspects. Analyze as the system is designed and implemented to ensure it meets all the requirements. We analyze throughput, quality of service, and availability to analyze the requirements of a business application.

- Requirements traceability matrix
- User stories and use cases
- Perform Table Top experiments through data models, simulations, and flows
- Rapid prototyping
- Risk analysis
- Cost-benefits
- Measurable goals

We assess business processes and solutions. We analyze events to determine objective outcome feasibility. We develop models and simulations to provide a real-world environment to access actual processing with human behavior cognitive agents to act out different permutations automatically without a large investment in hardware/software.

*"It was a great pleasure working with ATI and your amazing team!!!!!! You are the best team I've worked with, very good work ethic, great knowledgeand helpful. Thank you very much for all the support and great cooperation."*

DHS Contracting Compliance Spec.
April 2020

## ATI, Inc.

Headquartered in Columbia Maryland, ATI is a small (125 person) professional services firm helping federal government agencies, public/private institutions, non-profits, and industry craft more effective solutions for critical problems. With a portfolio of more than 3,400 projects completed throughout the United States and across 160+ countries, ATI has the resources, capabilities, and experience not usually available in a small business.

### Core Services

- Architectural & Engineering Services
- Facility Management & Operations
- Environmental Compliance, Remediation & Military Munitions Response
- Program Management, IT & Technical Staffing Services
- Construction & Construction Management
- Industrial Hygiene, Safety, Biohazard Testing & Decontamination

## Department of the Treasury and Internal Revenue Service Experience, Insight, and Expertise

ATI has significant experience providing **environmental regulatory compliance** and **indoor air quality (IAQ) data analysis** for the Department of Treasury and IRS:

- **Bureau of Engraving and Printing (2013-2020).** *Asbestos Abatement Project Oversight.* ATI staff ensured that hazardous materials were removed properly and that required final clearance air sampling was performed in accordance with OSHA, EPA and local regulations.

  ATI dedicated select staff to the BEP *Asbestos Abatement Project Oversight* contract who had cleared credentials to access work areas in the BEP building. The ATI team established rapports with regional asbestos laboratories to ensure strict compliance with reporting and timely receipt of laboratory results. ATI performed the services after hours and on weekends.

- **Internal Revenue Service (2019-2021).** *Monitoring of Indoor Air Quality During Construction Renovation at the Freedman Bank Building.* ATI staff reviewed IAQ data from datalogging instruments; reported data spikes; and prepared instrumentation for weekly data collection. ATI reviewed data and advised the IRS of significant changes that should occur to meet ASHRAE 62.10 indoor air quality guidelines.

- Dept. of Homeland Security
- Department of the Interior
- Department of State
- Department of Transportation
- State Agencies / Commercial

*Over Forty Years of Federal Agency Experience*
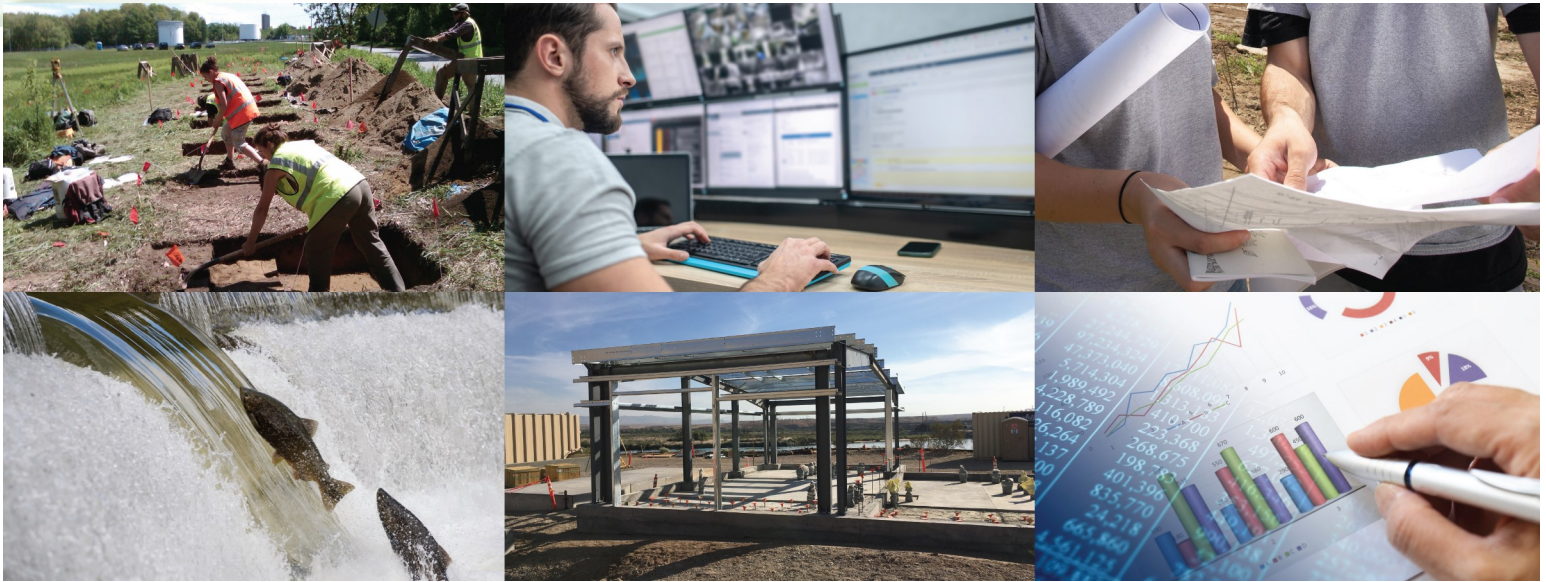

## OUR COMPANY

BB&E is a full-service civil and environmental engineering small business under OASIS SB Pool 1 contract, with the capability and depth and breadth of resources necessary to respond to large and small requirements. We have been providing advisory and assistance support for federal and industrial clients since 2002.

## PROGRAM/PROJECT MANAGEMENT

Our qualified, professional, and motivated workforce of program and project management professionals foster a culture that emphasizes teamwork, integrity, continuous improvement, and effective resource management. Our program/project management support integrates and manages all activities needed to successfully execute client's requirements that may include coordinating with a wide variety of internal and external agencies and stakeholders for the development of execution strategies, monitoring, and analysis of program performance.

## ACQUISITION SUPPORT

BB&E provides support for all phases of the acquisition cycle, including development, award, management, and measurement of contracting actions including contract closeout. We review and analyze project acquisition documents for compliance, accuracy, completeness, and technical acceptability. BB&E interacts with a wide variety of internal and external agencies and stakeholders to develop and review acquisition and execution strategies, monitoring and analyzing program performance.

## ENGINEERING SERVICES

BB&E assists in all phases of R&D management activities from strategy development and planning, through technology assessment and transition activities and reports. We also provide acquisition management and procurement recommendations; market research; cost estimation; and expert strategic advice.

## REQUIREMENTS ANALYSIS

BB&E applies analytical research methods to perform project and requirements analysis, planning, and documentation development. We provide technical recommendations that are technically, accurately, and logically supported, and identify trends that may impact programs, advocating for improvement opportunities.

# ADDITIONAL CAPABILITIES RELEVANT TO THE IRS

## Workload Analysis & Planning

- ✓ Workload planning and assistance with daily status tracking, reporting, and coordination of taskers

- ✓ Preparing/monitoring tasker reports, including descriptions, suspense dates, and the status of ongoing taskers to ensure taskers are completed within required suspenses

- ✓ Managing, establishing, tracking, and coordinating all taskers to meet administrative management and data collection requirements on suspense taskings

- ✓ Workload fluctuation risk management/mitigation, with the goal of ensuring responsive support within the designated manning constraints

## Cost/Scheduling Support

- ✓ Cost and schedule monitoring and analysis of infrastructure recovery projects (including pavement and asphalt recovery)

- ✓ Systems analysis for life cycle costing and return-on-investment determinations

- ✓ Cost estimates, including modeling/analyzing cost and schedule risks

## Enterprise Risk Management

- ✓ Risk assessment, including analyzing the business and operational impact of proposed policies, programs, and issues and recommending options

- ✓ Developing and utilizing decision-making tools for continuous process improvement

## Data Analytics

- ✓ Data collection on programs and services, including environmental programs, engineering, facility use, real property, infrastructure condition assessments, and utility and facility energy consumption

- ✓ Organizing, managing, and tracking data to reveal trends and metrics

- ✓ Assisting our clients in optimizing processes to increase the overall efficiency

## Regulatory Compliance

- ✓ Permitting, reporting, and technical and regulatory support

- ✓ Knowledge and conformance with federal, state, and local statutes and regulations, including but not limited to CERCLA, RCRA, NEPA, ESA, and NHPA

- ✓ Assessment, research, and monitoring of cultural and tribal resources to ensure that all archaeological and/or potentials for buried resources, historic structures, facilities, ruins, Native American/Alaskan Native-sensitive resources (or treaty protections) are reviewed prior to field activities/ excavation

- ✓ Coordination with regulators and other stakeholders to identify and focus on applicable regulatory requirements

- ✓ Biological assessments for threatened and endangered species known to be present on site and preparation of mitigation plans in case these species are encountered during field activities

- ✓ Meeting facilitation and conflict resolution support

# Brown & Company CPAs and Management Consultants, PLLC

## Capabilities

Brown & Company CPAs and Management Consultants, PLLC (Brown & Company) has served nearly 60 Federal Departments, Agencies, and Bureaus since the Founding Member, Tyrone Brown, started the firm in 1976.

We have performed more than 800 Chief Financial Officers (CFO) Act audits of Federal agencies and more than 1,000 audits of Federal agency grantees since 1990.

Our team of financial management and information security professionals has an outstanding reputation for providing financial and information technology services to Federal, state, and local agencies, as well as industry, private, and not-for-profit institutions.

### Our OASIS Small Business Contract support capabilities include:

- Budget Analysis and Tracking
- Business Information Systems
- Cost Estimating and Analysis Support
- Cost Performance Risk Assessments
- Disbursement & Reconciliation Support
- Financial & Financial Risk Analysis
- Financial Management, Accounting & Auditing Services

- Impact Statement Development
- Program Management for Financial Services
- Program Objective Memorandum (POM) Creation and Documentation
- Oversight & Fraud Detection
- Safeguarding Personal Data
- Loan Management
- Grant Management

**Brown & Company has 47 years of experience in providing a range of services to the Federal Government.**

## Financial Services, Performance and Complementary Audits

CFO Financial Statements Audits
Financial Related Audits
Compliance Audits
Not-For-Profit Audits/Grant Awardee Audits
Contract and Invoice Audits
Incurred Cost Audits
Improper Payment Audits
Attestation Engagements

## Information Technology Services

Federal Information Security Modernization Act (FISMA)
Federal Information System Control Audit Manual (FISCAM)
Information System Review in Accordance with NIST 800-53
Financial System Modernization (FSM) Support Services
Internal and External Vulnerability Assessment

## CFO Management Support Services

Federal Information Technology Acquisition Reformed Act (FITARA)
Office of Management and Budget (OMB) Internal Control
Digital Accountability and Transparency Act (DATA Act)

# CAYUSE
## TECHNOLOGIES

Cayuse Technologies, LLC is a Small Business Administration (SBA) Tribal 8(a) certified technology and government solutions provider located in Pendleton, Oregon. Founded in 2006, our past performance spans both private and public sectors, providing innovative solutions and delivery excellence across a range of information technology and government client missions, focused on minimizing risk through the delivery of quality outcomes.

## CORE CAPABILITIES

### Information Technology

- Application Development
- Computer Systems Design
- Cybersecurity
- Service & Help Desk
- Systems Administration

### Emergency Management

- Anti-Terrorism Force Protection
- Continuity of Operations
- Interagency Coordination
- Operation Centers
- Training, Education, & Exercise Support

### Mission Support

- Program Management Services
- Counterintelligence & Surveillance
- Health & Medical Support
- Linguists & Intelligence Analysts
- Facility Support Services
- Military Munitions Response Program
- Operations & Maintenance
- Unexploded Ordnance

### Product Solutions

- Sourcing & Procurement
- Logistics & Warehouse
- Installation and Training

The Cayuse Family of companies are wholly owned by the Confederated Tribes of the Umatilla Indian Reservation with a 40,000 sq. ft. state-of-the-art technology center headquartered near Pendleton, Oregon.

 541.278.4660       OASIS-SB@CAYUSEGOV.COM       CAYUSEGOV.COM
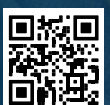

# EXPERIENCE -
## TREASURY, IRS and RELATED PROJECTS

### Occupational Health Services

Cayuse provides a Facility with a comprehensive occupational health program including necessary personnel, supervision, and supplies. A Medical Director, Audiologist, and four RNs are available 24 hours a day M-F and on an as-needed basis on weekends. Services include treatment physical and psychological needs; health education and medical surveillance; preventative care; and documentation and maintenance of employee wellness data using client-supplied software.

### Comprehensive Information Technology Services

Cayuse provides program and project management and a wide range of information technology services. Application design, development, system integration, and advisory support services support cybersecurity and international investigations, threat analysis, and counterterrorism. We provide Software Development Life Cycle (SLDC) support, hardware distribution systems, telecommunications/networking systems, IT facility planning, execution of IT infrastructure projects, facilities management, networking, IT engineering services as well as Tier III IT Support across the country.

### Armored Truck Transport Services

Our management of an active fleet of bonded, secure armor trucking assets provides on-call, safe and secure logistical solutions for the physical transport of securities. Cayuse provides program management and operational capabilities to ensure successful, secure completion of transports, including maintaining existing standard operating procedures (SOPs), manuals, training tools & exercises, and a quality management system (QMS) based on industry standards, best practices, and ISO:9001 certified resources.

### Joint Operations Centers

We understand the challenges of executing an efficient contract start-up, based on client needs, to ensure continuity and a smooth phase-in of mission support. Cayuse mobilized a Joint Operations Center within 25 days with 100% recruiting effort to provide uninterrupted 24x7x365 watch and briefing operations for critical response actions advice to top leadership. Operational support extended to political, economic, civil, and military operations and included support of COVID-19 Department strategic objectives.

### Lean Agile Center of Excellence (LACE) Support

Cayuse enhances and enables the Agency's technology workforce through improving skill sets of their software development and support workforce through the implementation of Scaled Agile Framework (SAFe) Agile training and coaching. Cayuse focuses on six primary areas: Training Assessment, Training Development and Delivery, Continuous Improvement, Formal Coaching, Ad Hoc Coaching, Strategic Planning, and Program Management.

### Tier 1 and 1.5 Helpdesk

Cayuse provides an experienced solution for IT issue needs that includes both hardware and software for over 35,000 Government Client end users and delivers a first contact, minimal escalation required resolution. Tier 1 and 1.5 Technical Help Desk resolution and routing staff process an average of 2,300 tickets per month through multiple mediums for financial, asset and accounting management systems on a 24/7 basis in a secure environment.

## INTRODUCTION

Centennial Technologies, Inc. is a minority-owned SBA 8(a) and HUBZone certified company. We are committed to developing and delivering innovative solutions and services in Financial Management (FM) and Information Technologies (IT) to government and private sector organizations. We are a CMMI Level 3 Dev/Svc and ISO 9001:2015 organization and help our clients achieve their mission, vision, goals, and objectives in business process reengineering, financial and grants management services, and information technology. We improve business processes to achieve greater efficiencies to support data management and visibility initiatives. We help ensure responsible financial management via innovative services and solutions that protect and secure the confidentiality, integrity, and availability of data and IT assets using Centennial's Subject Matter Experts (SME), mature processes, and innovative technologies.

## OASIS SB Pool 1 Contract Number– 47QRAD21D1003

## MISSION

Our mission is to provide Business Process Re-engineering, FM, and IT services and solutions to help commercial and public sector clients improve business process efficiency, compliance, cyber security, IT modernization, and mission alignment.

## WHAT WE DO

We are committed to developing and delivering innovative solutions and services in the areas of financial management and information technologies to government and private sector organizations using industry-leading technologies and best practices

## CORE CAPABILITIES
- Professional Services
- Financial and Grants Management Services
- Information Technology Services and Solutions

> **Centennial's Robotic process Automation (RPA) Financial Management Center of Excellence Our (FMCoE) innovation lab** enables us to bring added synergies to our customers by integrating business process reengineering, FM processes, SMEs, and RPA bots.
>
> We work with our customers to ensure compliance with FM requirements, regulations, governance, policy, cybersecurity, usability, system development lifecycle, and section 508.

## BUSINESS PROCESS REENGINEERING - BUREAU OF THE FISCAL SERVICE (BFS)

Centennial supported the Bureau of the Fiscal Service's (BFS) Office of Information Technology (OIT) to modernize its IT business applications portfolio by migrating to a cloud-based architecture. BFS realigned its resources and applications to meet its strategic business goals as part of the business applications modernization initiative. BFS's focus was to assess the continuity requirements for existing applications and the migration and conversion of pertinent applications to BFS's new collaborative environments. As BFS combined its IT departments, Centennial and its partner supported the establishment of an Enterprise IT Project Management Office (PMO).

The PMO supported user productivity and training, enterprise data management, full lifecycle project management, business analysis, operations, and maintenance for cloud platforms, and approximately 30 IT initiatives (per fiscal year) for FY14, FY15, and FY16. We supplied formal monitoring and tracking of the initiatives by creating and supporting Executive Dashboards monthly for the Chief Information Officer (CIO) and Deputy CIO. We tracked actual and projected spending and supported the process of reporting budget information to the Office of Management and Budget (OMB). We implemented change management, communications, and training support, provided standard processes and templates for IT-managed projects, and coordinated information sharing between technical and non-technical teams.

Centennial aided the security office in evaluating the Draft to Digital (D2D) system security and writing/collecting necessary documentation, collating information into key security documents such as the System Security Plan (SSP) and the hardware-software inventory. Our team also

checked all major projects' cost and schedule variance, ensuring the Office of Enterprise Infrastructure (EIS) finished the year within 10 percent of schedule and cost variance.

### BUSINESS PROCESS REENGINEERING - OUTSOURCED CHIEF INVESTMENT MANAGER (OCIO) - IRS

Centennial supplied strategic decision support services to the Department of the Treasury's (Treasury) Outsourced Chief Investment Manager (OCIO). We worked exclusively with the Strategy, Portfolio Planning, and Integration (SPPI) team within the OCIO to develop a strategy that provided an unobstructed vision and goals for creating a decision analytics organization. The plan incorporated integrated analysis and reporting to support critical CIO investment decision-making, delivering exceptional value and service to its customers. Centennial supported the Department's IT portfolio management processes in compliance with Federal Information Technology Acquisition Reform Act (FITARA) requirements. We enhanced the maturity of the OCIO's enterprise capabilities in IT Program Management, Strategic Planning, Capital Planning and Investment Control (CPIC), and Enterprise Architecture. Centennial also fostered a collaborative environment and worked to integrate SPPI activities with other OCIO offices like the OMB.

Our team developed trusted lines of communications with customers across the IRS bureaus and offices and supplied enhanced portfolio visibility across the enterprise to management and executive staff. Our value to IRS was the increased capability of executive leadership to have access to actionable information that allowed for insightful decision-making. More insightful decision-making led to cost reduction, engaged staff, and the ability to serve the mission of the Department better.

### SUMMARY

At Centennial, we use Artificial Intelligence (AI), Machine Learning (ML), and RPA technologies like UiPath and Automation Anywhere to automate business processes and digitally transform business environments. We use business process reengineering methodologies, subject matter expertise, domain knowledge, and robotic process automation to improve business process efficiency. Our business process reengineering efforts help agencies modernize business systems and maximize legacy investments to support evolving business needs so that knowledge workers and end-users can focus on higher-value tasks and activities.

# REPRESENTATIVE IRS ENGAGEMENTS

### IRS IPCO Strategic Planning & Execution (SP&E)
Maintain the SP&E playbook for strategic planning. Develop and update the Annual Key Insights Report and create the monthly Taxpayer First Act and Modernization Plan report for the CIO.

### IRS Criminal Investigation Technology Operations (CITO)
Provide CI Project Management and Integration support of the various investigative functions. Assist CI with modernizing their IT operations, cybersecurity, and data protection programs and projects including user support and asset management, electronic fingerprinting solution, IT support services ticketing platform replacement, and data storage infrastructure technology solution.

### IRS OCFO Custodial Financial Accounting
Interpret Unified Work Requests (UWR) related to unpaid assessments, conduct project management, and test financial systems programs. Creates periodic reports to Congress, Treasury, General Accounting Office (GAO) and other oversight agencies to prove the accuracy of the IRS financial reporting. Analyze systems to confirm the reliability of the financial statements.

### IRS EPMO CADE2 & ECM Independent Assessment
Independent Verification and Validation (IV&V) assessments of the CADE2, ECM, and IMF Programs as required by the Taxpayer First Act. Verified and validated the implementation plans of two key components of the IRS Modernization Plan, CADE 2 and the ECM system. Assessed the CADE2 Target State (TS) and Individual Master File (IMF) retirement plan.

### IRS EOps TISO Program Management Support
Program Management support to develop and implement the IRS program management framework for the EOps TISO. Developed and implemented a Program Management framework for large IT initiatives and technology focused programs.

### IRS HCO One Tax Compliance Program
Documented the processes and gaps in the IRS One Tax Compliance Program. Unified 7 tax compliance processes for 7 projects into a single common service. Developed and delivered training to incorporate the new system into existing business processes. Drafted the Tax Compliance Check definition for the IRM.

### IRS RAAS Alternative Modeling for Workload Selection
Developed method to extract relevant data elements from case file documents (Microsoft Word, MS Excel, and PDF) to create data files for analysis within Sybase relational database tables.

### IRS RAAS Data Expansion and Analysis
Developed predictive models using various data analysis approaches and techniques utilizing two data sets with over 15,000 observations and 500 variables. Developed models that categorize and/or rank the observations that performed best for the top tail of the distribution of the output variable, as defined by the IRS.

## CAPABILITIES

Contracting Resources Group, Inc. (CRG) is an economically disadvantaged woman-owned small business (EDWOSB) founded in 2002 with a strong portfolio of projects supporting the U.S. Department of the Treasury (USDT) Financial Crimes Enforcement Network (FinCEN). Our services include capabilities that are relevant to the Treasury's missions and requirements, including Program and Project Management Services; Program Evaluation; Research and Analysis; Financial Management Support Services; Acquisition and Grant Management Support Services; Logistics and Facilities Management; Administrative Support Services; IT Professional Support; and Event Management, Communications, Market Research, and Analysis.

## PAST PERFORMANCE

| FinCEN Project | Project Description |
|---|---|
| Bank Secrecy Act (BSA) Consulting Services | ▪ Review business processes in the BSA data access inspection program to ascertain if goals related to safeguarding BSA data are being met. |
| Report Processing & Data Entry Services | ▪ Enter data received into the BSA e-Filing System and track correspondence from financial institutions. Generate and send reports to appropriate recipients and check compliance against FinCEN databases. |
| Administrative Logistics Specialist Services | ▪ Support a broad range of general facilities, administrative, and logistics support functions for FinCEN program offices. Manage inventory and issue supplies and equipment, mail services, support the execution of construction contracts and employee relocations, and manage personnel transportation services schedule. |
| Administrative Assistant Services | ▪ Coordinate between FinCEN divisions and operating units, resolve day-to-day administrative and operational problems. Coordinate meetings and events, prepare business correspondence, manage files, make copies, send faxes, scan files, answer phones, and manage supplies. |
| Print Production Services | ▪ Review print production requirements, identify suppliers, coordinate with procurement activity, maintain compliance with FinCEN policies and procedures for printing and related services, operate copying/printing/plotter machines, mount and frame displays, manage reproduction equipment inventory and supplies. |
| Trainer Support | ▪ Provide expert training to FinCEN's external and internal stakeholders in the proper use, dissemination, handling, and safeguarding of BSA data and the FinCEN portal. |
| Financial Analyst | ▪ Provide financial analysis, including the preparation and analysis of budget exhibits, financial plans, performance reports, performance surveys, interagency agreements, execution reports, purchase requests, unliquidated obligations, and payment status reports. |
| Records Management | ▪ Provide electronic records knowledge management services (ERK), inventory and track the disposition of records; create and document records management policies and procedures; manage compliance with federal requirements; and provide records management training, consultation, expertise, and metrics. |
| Technical Writer | ▪ Perform writing and copyediting services for FinCEN's Policy Division. Gather requirements, provide content, manage the document development lifecycle, ensure policies are free from error, and meet high quality standards. |

# Capability Statement

*Dynamic Management Associates is a Service-Disabled Veteran Owned Small Business that specializes in providing high quality management consulting services. We leverage best practice, collaborative tools, ISO 9001 quality procedures, and intellectual capital to optimize cost, schedule, and technical performance. The confluence of these factors and our close relationship with our customers enables us to effectively react to change, implement solutions, and ultimately provide best value.*

## Differentiators

What separates DMA from other small business competitors is the priority we place on our customers. Simply put, DMA's singular objective is to provide exceptionally rated services, and we achieve that by being indispensable to our customers. This approach has earned DMA multiple follow-on contracts and Exceptional Contractor Performance Assessment Reporting System (CPARS) ratings.

We attribute this success to
1) our degree of specialization
2) dynamic management framework
3) highly effective staffing and networking capability
4) personnel training and
5) leadership.

Specialization enables DMA to lower operation and recruitment costs and increase on the job performance. Our "dynamic management" framework enables DMA to improve performance and control at both the corporate and contract levels. Our non-stop staffing and network capability, benefited by specialization, shortens the time to recruit, increases the quality of candidates and lowers our attrition rates. DMA incentivizes our personnel to set and achieve annual training objectives that optimize both personal, team and customer performance. Most importantly, our cadre of strong leaders embrace DMA's commitment and is the glue that binds our specialization, dynamic management, staffing/networking, and training processes together.

### North American Industry Classification System

**541330** – Engineering Services
**541611** – Administrative Management and General Management Consulting Services
**541618 –** Other Management Consulting

**561499** – All Other Business Services

## Core Competencies

**Financial Management**. Our approach encompasses a variety of techniques, including establishing project budgets, tracking project expenditures, addressing project risk, controlling procurement costs, and the use of financial management tools and techniques. Offerings include

- Budget Preparation
- Cost Estimation
- Capital Planning and Investment
- Planning, Programming, Budgeting and Execution
- Earned Value Management
- Business Case Analysis

**Program and Acquisition Management.** DMA aligns your goals, objectives, and priorities for the most efficient, cost-effective program operation. Our common thread that connects our approach with successful delivery are the documented best practices leveraged within the facets of the program management lifecycle.
Offering include:

- Acquisition Management
- Change Management

# Capability Statement

- Integrated Master Scheduling
- Program/Project Management
- Risk Management
- Contract Administration
- Governance

**Planning and Analysis.** We analyze needs, recommend solutions, and implement the solution to drive improvement. Our experts are skilled at researching and analyzing complex programmatic problems and developing solutions that are aimed at improving program performance. Offering include:

- Acquisition Planning
- Knowledge Management
- Strategic Planning
- Portfolio Management
- Operations Research
- Data Analysis
- Business Process Reengineering

**Systems Engineering.** DMA provides engineering services in core areas of enterprise architecture, acquisition engineering and systems engineering. Offerings include:

- Acquisition Engineering
- Enterprise Architecture
- Software Engineering
- Systems Engineering
- Technical Advisor

# FEDERAL MISSION SOLUTIONS

## Delivering innovative mission-focused services and solutions

Federal Mission Solutions (FMS) is an 8(a) and HUBZone joint venture resulting from an SBA-certified mentor-protégé relationship between SD Solutions, LLC and Avantus Federal. This joint venture not only strengthens our existing mentorship relationship, it allows us the ability to provide mission-focused services and solutions to our Federal clients.

## SD SOLUTIONS LLC
### Quality. Solutions. Delivered.

SD Solutions is an award-winning, SBA Certified 8(a) and HUBZone small business, whose mission is to deliver enduring results to their clients by using strong business acumen, technical solutions, and management services.

We provide Strategy & Governance, Professional Services & Management Consulting, Cyber Security, and IT Modernization solutions to large and small clients in the government sector. Their broad spectrum of services includes Strategic Consulting, Digital & Legacy Transition, Decommissioning, Communications,
Agile Transformation, and Operations.

## Avantus

Avantus Federal, a NewSpring Holdings Company, is a mission-focused data, cyber and space services and solutions company. As a mid-market powerhouse with an intentional blend of elite talent, infrastructure and speed to impact, Avantus leads with technical and domain expertise for its Defense, Intelligence, Homeland Security and Federal Civilian customers.

Helping to solve some of the toughest national security problems and government missions, Avantus' offerings enable services at scale, including cyber technologies and operations, data and software solutions, digital engineering and integration, intelligence analysis and operations, space domain capabilities, transformation and advisory services and more.

# Federal Mission Solutions

FMS has the experience and resources to support an agency's toughest challenges. We deliver innovative mission-focused services and solutions to our Federal customers by offering the following capabilities:

## Capabilities

### IT Project & Portfolio Management

Program & Project Management | Cost & Financial Analysis | Acquisition Support | Security & Compliance

Providing full project lifecycle delivery regardless of size and complexity, and assessing tools and processes to identify measurable value and achieve a sustainable ROI.

### Strategy & Governance

Strategic Plans | Benchmarking | Roadmaps | Agile Solutions

We collaborate with client executives to develop IT strategic plans, goals, benchmarks and execute them with measurable targets by employing industry best practices.

### Cybersecurity

Governance | Risk Management | Compliance

Providing CISOs and CIOs to assess security disciplines and controls to strengthen Security Posture and ensure system/data availability, integrity and confidentiality.

### Engineering & Technical Services

Architecture & Engineering Consulting | Facility Management

Providing our customers the gamut of engineering and technical services, from assessing challenges to providing solution recommendations to meet R&D, program, and transition stakeholder needs.

### Mission Analytics & Strategic Advisory

Strategic Management Consulting | Mission Analytics | Organizational Transformation

Designing analytics that use mission-related data and organization insights to maximize agency objectives and help our clients analyze, evaluate and make optimal decisions to increase business and mission success.

### Digital Transformation & Innovation

System Engineering & Integration | Rapid Prototyping | Software Development & Modernization | Business Intelligence | Advanced Analytics | IT Modernization

Helping our customers and partners leverage digital tools to address their most complex challenges and to develop solutions that enable mission success. We help our clients with end-to-end IT modernization including legacy systems decommissioning and transition.

### Data Readiness

Artificial Intelligence | Data Modeling I DevSecOps

Data solutions require a deep knowledge of domain complexities. Following years of demonstrated success, we are now working with clients to harness data to drive mission critical decisions. From satellite communication operations to space situational awareness, we are helping Federal clients develop and improve data repositories that support activities essential to our nation's security, scientific development, and economic prosperity.

# Information. Insight. Impact.

We help organizations better manage **complex** portfolios.

FI's financial services and government clients manage a wide range of portfolios in pursuit of their missions-- portfolios of financial instruments, physical and intangible assets, assistance and oversight programs, stakeholder relationships, and many others. Across all portfolio types, high-performing organizations share a common goal—to continually increase the value that their portfolios deliver. Achieving this goal requires a deep understanding of each portfolio, the ability to systematize capabilities, and the ability to take action. We deliver solutions that help leaders gain deeper insight into what they have, operate with greater efficiency and speed, reduce risk, and enable smarter, faster decision-making.

## Service Offerings
- Analytics

- Federal Reserve
- Department of Commerce
- Commercial Clients

## Case Studies

### CARES ACT Modeling

**CHALLENGE:** In March 2020, Congress passed the CARES Act, directing the Treasury and Federal Reserve to make up to $500 billion in investments, loans, and guarantees to eligible businesses during the coronavirus pandemic. Treasury hired FI to develop valuations for its CARES Act portfolio.

**FI SOLUTION:** FI delivered auditable models, documentation, and valuations for CARES Act programs in a condensed timeframe and a continually changing policy environment. Our work was essential to Treasury meeting its financial reporting deadlines and achieving a clean financial statement opinion.

### Valuation of Cares Act Programs

**CHALLENGE:** For the 2020 CARES Act, Treasury needed to develop valuations for its new $500B portfolio of investments, loans, and guarantees to eligible businesses during the coronavirus pandemic. The goal is to support the valuations and underlying models throughout future financial statement audits.

**FI SOLUTION:** FI developed auditable models for seven CARES Act programs in five months. Our models value equity warrants, forecast loan defaults, amortize loans and bonds, estimate cashflows, distribute cash flows based on special purpose vehicle rules, and estimate government and commercial-basis fair values. Our work was essential to Treasury meeting its financial reporting deadlines and achieving a clean financial statement audit opinion.

### SBA Loan Review Tool (LRT)

**CHALLENGE:** The FSOC produces and publishes in its annual report more than 180 charts on systemic financial risk. The analytics underlying the charts need to be accurate, reflect current data at time of report publishing, and charts must be formatted consistently.

**FI SOLUTION:** LRT's self-guided workflows and intelligent process automation expedite manual tasks while ensuring consistency and accuracy.

## Contact

**Mike Staab** | OASIS@FIconsulting.com | 571.255.6876

## Financial Consulting Expertise

FI Consulting's data analytics, financial management, federal subsidy, and technology experts deliver results. For the Treasury Department's TARP program, we helped the OCFO improve the quality and accuracy of its existing formulation models, formulate reestimate models for each program, and develop a robust modeling process to improve the accuracy and performance of its programs. In less than 5 weeks, FI Consulting helped USDA implement a new loan program designed to enable the flow of capital for community facility projects. On the SBA Loan Review Tool program, we helped in-source reviews for more than 50,000 7(a) loans annually while ensuring compliance, quality, increased efficiency, and transparency.

## Our professionals assist Government leaders with the following:

- Design financial assistance programs to ensure operational excellence

- Understand and establish the data architecture needed to monitor, evaluate, and administer assistance programs

- Build right-sized technology solutions that deploy and scale quickly for constrained timelines and budgets

## PIM SOFTWARE

Program Investment Manager (PIM) is FI Consulting's COTS solution for managing federal assistance programs. Built using our deep knowledge of federal loan and subsidy programs, PIM automates processes, workflows, and reporting for application review, recipient evaluation, program monitoring, portfolio management, executive dashboards, performance analytics, risk management, closeout/disposition, and stakeholder engagement.

Because of its low-code technology, PIM can rapidly scale to meet pandemic financial assistance response needs in such areas as Analytics, Modeling, Credit Risk Analysis, Data Management and Integration, Data Governance Support, Business Analysis and Strategy Design, Program Design, Policy Analysis, Portfolio Management, Customer Relationship Management, and Automation/Reporting.
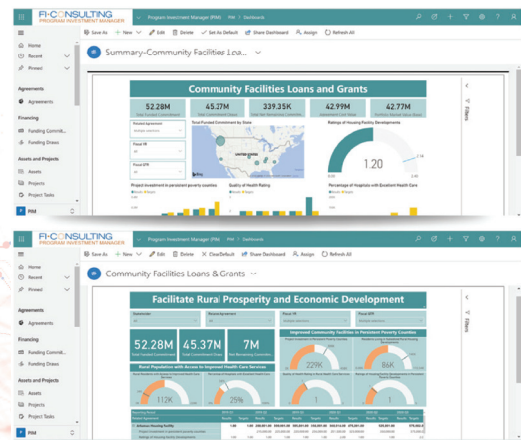

### Program Design and Application Processing

- Develop policies, procedures, and documentation to support overall program design, application reviews, and the award process. This can include a step-by-step document detailing how to intake and process applications, how to enter data in applicable systems, and how to issue a letter of conditions.

- Review and score program applications in conjunction with program staff.

### Administration and Award Monitoring

- Provide effective and efficient communications and outreach to program stakeholders. This may include developing frequently asked questions (FAQs), answering questions from applicants, and onsite and remote workshops and webinars.

- Support program staff with award status tracking and application closing activities.

- Prepare award summary information and assist with planning of award announcements.

- Assist with development of webpage content for announcing funding windows, communicating requirements of the funding window, announcing awards, and other necessary webpage development to support the program.

- Lead periodic meetings with the Contracting Officer Representative (COR), Contracting Officer (CO) and program staff to discuss overall status and direction of the program.

### Reporting

- Develop reports that show funding location(s), funding use, and population impacted for internal and external stakeholders.

- Prepare summary reports highlighting all approved awards from each funding window.

## COMPANY BACKGROUND

G2 Global Solutions, LLC (G2) is an 8(a) certified Service-Disabled Veteran-Owned and Woman-Owned small business founded in 2012. ❯ CIO-SP3 8A Contract Number: 75N98119D00080

**Heartland Consulting** offers a full suite of business consulting services. Our staff brings **decades of experience** providing quality support and working with key stakeholders to ensure that our services **exceed expectations,** and our approved accounting process ensures our clients that we are fiscally responsible.

At Heartland, we understand that each customer brings their own unique perspective and set of requirements. We know that many customers are looking for a comprehensive solution to address their business challenges, while others require very focused assistance to supplement their existing capabilities. **We are here to listen to you and deliver services designed to meet your individual and specific needs.**

## Our Work with the Department of Treasury:

Recipients of Heartland's professional services under the Department of Treasury include Alcohol Tax and Trade Bureau **(TTB)**, Consumer Financial Protection Bureau **(CFBP)**, and the Office of Inspector General **(OIG)**.

❯ **TTB -** Chemists and Scientists performed analytical chemistry studies, using instruments and methods to separate, identify, and quantify matter. We practice separation, identification, and quantification to independently analyze analytical data. We capture and input data and results, and ensure compliance with Occupational Safety and Health Administration (OSHA) and Environmental Protection Agency (EPA) safety programs. Through this effort we maintain and implement recommendations to sustain accreditation standards outlined in ISO 17025 and apply Good Laboratory Practices (GLP) for quality assurance.

❯ **CFPB -** Our event management and logistics support assists the Office of Human Capital (OHC) to provide a learning program for bureau internal leadership, team member, and career development training events. We provide continuity of services, through overall project management, pre-event and post-event planning and logistical support, administrative services, and data management and visualization (i.e., Tableau) ensuring effective execution of the learning development program and bureau leadership and staff trainings.

❯ **OIG -** For the Office of Inspector General (OIG), Heartland delivered Continuity of Operations (COOP) support to assist in plan development and training to OIG Senior leadership and general employees. Through this exceptional performance, Heartland improved communication with employees on metrics and significantly decreased the outstanding credit bills in one year. With the newly implemented controls in place, OIG improved working relationships with managers, addressed all training opportunities, and now have visible metrics that increase awareness and training of the COOP program.

## Notable Clients Served

### One Acquisition Solution for Integrated Services

# INTELLIGENCE FEDERAL

## ABOUT US

INTFED focuses on providing only the highest quality services for our clients. With nearly 100% "Exceptional" past performance ratings, we deliver top-notch services by being responsive, highly detailed in our work, and meeting all deadlines. We strive to live out our motto to "Work Hard and Be Good to People." Intelligence Federal is an 8(a) certified, small disadvantaged business (SDB), with 20 years of experience focusing on: 1) Legal and Professional Services; 2) Program Management; and 3) Science, Engineering, and Information Technology.

## CAPABILITIES

- **Legal and Paralegal Services:** We have extensive experience working on tax related cases including: advising multi-national corporations on tax matters; analyzing documents and filings; applying the IRS Code, Treasury Regulations, and other legal authorities; drafting legal documents; overseeing discovery; and managing/conducting investigations.

- **Complete FOIA/PA Support:** We work with our clients to manage the FOIA process from cradle to grave, addressing case backlogs, and providing technical expertise on FOIA litigations.

- **Program Management, Acquisition, Logistics, and Management Consulting:** We implement a tailored, agency-specific approach to develop practical solutions and drive efficiencies.

- **EEOC Complaint Investigations:** We conduct investigations to obtain evidence from all relevant sources and provide agencies with fact from which findings can be determined and document in a final agency decision.

- **Video Production, Graphics, and Branding:** We support clients in developing content across various media platforms that reflect the priorities, mission objectives, and messaging of our clients.

- **Real Estate Services, including Title review/searches and Appraisals:** We assisting with legal requirements for government taking and acquisitions.

## Excerpts from CPARs Ratings

*"Contractor did an exceptional job of understanding the needs of the government and the customer. Communication was excellent, and the technical expertise was outstanding. Contractor was devoted to ensure the government agency was informed on issues that would affect project modernization."*

*"JCS has been extremely agile in the ability to integrate stakeholder requirements from across the Army and the Department of Defense as components of the Army [Special Access Program] SAP Enterprise Network Modernization Strategy."*

*"The contractor provided extremely proficient and professional staff who provided early communication and high quality services. The program manager did a great job of indentifying concerns, problems, and impediments. Very cooperative and professional team at all times. The few concerns we did run into were mitigated and addressed by the PM and JCS immediately. This exceptional program management was a great benefit to the Government in meeting this important mission."*

# METAPHASE CORE VALUES

## RELATIONSHIP-ORIENTED
We focus on building relationships with and on behalf of our clients; **relationships establish trust**, and trust is an essential foundation for progress.

## ACTION-ORIENTED
We hire and train for an **inclination towards action**. Refusing to simply share ideas or raise risks - we put pen to paper, build wireframes or prototypes, and bring solution or mitigation options.

## SERVICE-ORIENTED
**We serve people**, not projects, and focus on doing right over being right. Making you successful is our goal and our focus.

## TEAM-ORIENTED
MetaPhase values **collaboration over competition** and engender a "one team" mentality with clients, teaming partners, and other contractors.

**Planning, Programming, Budget, & Execution**

**Program Management:**
- Provide strategic planning, IT capital planning, performance and budget management, and financial reporting support for CISA's Planning, Programming, Budget, and Execution process.
- Responsible for business process improvement and maturation of financial operations and development of tools (e.g., dashboards and data visualization) and processes to improve efficiency and effectiveness in analysis and inter/intra-agency communications.

**Digital Services:**
- Support business and digital transformation in alignment with the agency's and office's strategy and vision.

### CISA NRMC
**Strategic Planning Support Services**

**Program Management:**
- Facilitate planning sessions and leverage structured analytic techniques to align visions, strategies, policies, processes, and tools and develop strategic roadmaps, annual operating plans, and risk reduction initiatives.

**Data Management:**
- Provide strategic planning and operational planning to enhance enterprise capabilities or mitigate emerging risks such as Mis-Dis-Malign Information, Supply Chain Security, Data Integration, IT Development, Future Technologies, and Advanced Analytics.

**Digital Services:**
- Provide research, analysis, process mapping, communication models, facilitation of strategic planning sessions, and a variety of strategic documentation to develop strategic ideas, initiatives, and programs along with operation plans.

### CISA SED
**International Affairs Management Support Services**

**Program Management:**
- Stand up and support an international Attache and Liaison officer to grow CISA's overseas presence.
- Develop relationships with and manage bilateral engagements with foreign partners to support the protection of critical infrastructure both here and abroad.

**Digital Services:**
- Support international travel for the entire agency, to include: developing and maintaining the backend IT infrastructure, processing VISA and passport paperwork, and supporting the lifecycle of travelers' plan.

# McManis & Monsalve Associates
## Capability Statement

**GSA** | **OASIS**ᴹ
One Acquisition Solution for Integrated Services

McManis & Monsalve Associates (MMA) is a Small Business (SB) providing solutions for clients dealing with complex issues including investigations, data analysis, and personnel security.

In operation since 2000, MMA has Top-Secret facility clearance and provides cleared personnel throughout CONUS and OCONUS locations. Our success is built upon meeting the needs of both our Federal clients and employees. MMA delivers effective, practical, and cost-effective solutions to our clients, always remaining flexible and responsive to the changing requirements.

### MMA's Core Areas of Strength:

- Program/Project Management Services
- Administrative & Professional Services
- Training and Exercise Support Services
- Intelligence & Security Support
- Language & Cultural Training Services
- Business Intelligence and Data Analysis
- Communications/Multimedia Support
- Personnel Security Services

### Capabilities Description:

**Program/Project Management:** We provide a range of professional staffing solutions ranging from administrative to subject matter experts to address. We provide program management solutions to the Department of Homeland Security (DHS), National Institutes of Health, and DOS.

**Communications/Multimedia Support:** Our team provides clients with communications support including outreach and stakeholder engagement services. MMA also provides clients with a full range of multimedia production capabilities spanning from print to video services. Our clients include the United States Operational Command.

**Cybersecurity:** We provide IT professionals that aid to protect critical systems and help to maintain decision advantages needed to meet our client's objectives. MMA provides cybersecurity support to the Defense Intelligence Agency, Department of State.

**Business Intelligence and Data Analytics & Analysis:** Our team helps client better understand and manager their data. This includes help through statistical analysis, business intelligence, dashboard utilization and enterprise software implementation. Our clients include DHS and Indian Health Services (IHS).

**Security Solutions:** Our team supports clients with intelligence analysis and investigative support services. Additionally, MMA is able to fully support personnel security operations, spanning from intake processing, adjudication, background investigations and continuous evaluation processing. We provide these services to the DOS, Department of Counterintelligence and Security Agency, and the Navy.

## The Small Business Partner of Choice

## About Us

Nationwide IT Services (NIS) is a SBA-certified 8(a) and CVE-verified Service-Disabled Veteran-Owned Small Business (SDVOSB) headquartered in Fairfax, VA. We have been delivering cost effective and diverse Information Technology requirements through leveraging innovative and emerging solutions since 2006. We currently perform on **39** prime contracts across **15** Federal Agencies in **24** states across the United States. We remain committed to doing what is right for our customers, for our employees, and for our Nation, today and tomorrow.
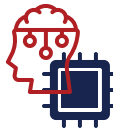

## Our Services

### Software Development / DevSecOps

NIS builds quality software products, modernizes legacy applications, and manages applications based on Agile/DevSecOps engineering practices using open-source technologies and cloud native services. Our Agile/DevSecOps approach accelerates delivery of high-quality software products and infuses security throughout the SDLC. We also connect with modern UI/UX techniques to engage customers with Human-Centered Design.

### Enterprise IT

NIS manages IT Infrastructure O&M (i.e., system and database administration, application support,SharePoint/network management, multimedia, AV/VTC, virtualization, and containerization) by using an Agile methodology along with our customized Integrated SDLC approach. We support IT help desk support by following ITSM and Help Desk Institute processes, as well as provide ERP maintenance and support functions.

### Digital Services

NIS helps our federal customers to modernize core technology and incorporate innovations by capitalizing on AI, Blockchain, Cloud Services (e.g., IaaS, PaaS, and SaaS), ML, RPA, VR, and XaaS to optimize operations. We assist in modernizing legacy IT infrastructure and cloud migration, as well as strategically design and evolve new enterprise architectures.

### Training

NIS provides training on cyber security, project management, COTS, and custom applications. We utilize instructional systems design and ADDIE approach to systematically design, develop, and deliver training products/services. Our capabilities include classroom lessons, curriculum/courseware design, and dynamic learning using 3D multimedia animation, simulations, and high-resolution modeling.

### Mission Support

NIS provides services and personnel that support professional services, management consulting, customer service, program management, technical and scientific advisory, engineering, training solutions and physical security/access control. We provide solutions and professional services support for budget planning/execution and aid in managing contracts and programs.

### Cyber Security

NIS assists federal agencies' compliance with CNSS, NIST, FedRAMP, RMF, FIPS, DoD, and FISMA policies. We support federal customers to assess their technology security profiles, identify and prioritize critical assets, and build capabilities to neutralize threats. We advise on the latest in cyber security such as in zero trust architecture and AI/ML. Our services include vulnerability assessments, A&A, CND, security architecture/engineering, security testing/exploitation, and incident response.

## Web Content Management System (WCMS) and Tax Withholding Estimator (TWE) ("IRS")

NIS is providing the project management for web-based service, customer web consultation/coordination, and technical services including web site/application development, web design, requirements specification analysis, planning, web hosting, Enterprise Life Cycle (ELC) processes and documentation. We implement our Drupal practice utilizing Agile SCRUM, Kanban and Rapid Delivery methodologies. We will develop the entire website for irs.gov while migrating the current Drupal 8 website to Drupal 9 before the end of life deadline. Our team consists of software developers and systems administrators including three certified Drupal Grand Masters.

- NIS capably provides both web-based services and improvements while maintaining the four (4) sites that make up the WCMS: irs.gov, eitc.irs.gov, marketingexpress.irs.gov, and stayexempt.irs.gov.
- NIS' Drupal and open source practice provides industry-leading experience and governance that is combined with in-depth Drupal expertise among government-focused service providers
- The Web Content Management System (WCMS) / IRS.gov test team completed a full 508 Regression test for both the WCMS Drupal Editor View and the WCMS Taxpayer View (irs.gov).
- The Web Content Management System (WCMS) / IRS.gov team implemented a new configuration management scheme that simplifies the management of the WCMS configuration across the eight+ environments in use on the project.

## Web Content Management System (WCMS) and Tax Withholding Estimator (TWE) Success Story The Web Content Management System (WCMS) / IRS.gov team reduced our filesystem storage after being notified of potentially reaching critical capacity. This was achieved in collaboration with Online Services (OLS).

Our filesystem storage contains content updates and related artifacts that are required while performing irs.gov business and applicable to Freedom of Information Act (FOIA) rules. NIS was notified that our system storage capacity was reaching a critical state that could lead to system failure or data loss. At the time of notification, we were approaching ~95% of storage availability.

Analysis into the issue identified a legacy processes had been filling the storage with redundant and unneeded 'Temp' files. The automated script to remove 'Temp' files was not working properly. Our first step was to free up by removing unneeded dormant databases, this greatly reduced the immediate risk of failure or loss of data on the Production site. Our second step was to identify a 'Hotfix' that was implemented as a special deployment to correct the scripting issue for deleting the no longer needed 'Temp' files. This allowed us to provide additional stability to the environment and ensure future build up was limited to actual files required for storage.

NIS conducted a final review and cleanup of redundant and unneeded files. We verified removing additional files kept the system and records in compliance with all FOIA rules and run a script that removed redundant artifacts. After running this script, we are reduced capacity by 55-60%, re-capturing storage space for the IRS.gov system.

**BENEFITS:**

- Eliminated unneeded data storage overhead by stopping the creation and retention of redundant 'Temp' files.
- Improved performance on IRS.gov website and mitigated the risk of having a system/site issues due to storage capacity or storage system failure.
- Future proofed our approach and gained a better understanding of how our scripted processes are maintaining the filesystem capacity.

# Speed up True Modernization

## TRANSFORM YOUR BUSINESS THROUGH CONTINUOUS VALUE DELIVERY

**nüvitek**

## WHO WE ARE

**We enable Federal Agencies to Supercharge into True Modernization.**

Our core mission is to enable Federal agencies to rapidly optimize, transform, and innovate modernization efforts through human-centered business process design and Low Code solutions. We remove complexity and automate business processes with Cloud Native and Low Code Engineering.

**SBA** SBA (8)a **Certified**

## WHAT WE DO

**Low Code Platforms**

**Cloud Strategy & Migration**

**Business Process Modernization**

**Customer Experience & Feedback**

**Intelligent Process Automation AI/ML/RPA/DPA**

**Case Management**

## WHO WE ARE

SSAI personnel support a broad range of information technology support services on the Technology and Enterprise Support Services contract for the Federal Retirement Thrift Investment Board. Tasks include Recordkeeping, Business Process Services, Data Center Services, Data Network Services, Voice Network Services, End User Services, Application Services, Service Desk Services, and Cross Functional Services.

SSAI's responsive management team is underpinned by efficient and effective business and mission assurance processes, documented in our Quality Management System (QMS) registered under ISO-9001:2015 and appraised at CMMI Maturity Level 2. We have a 46-year record of successful performance on more than 175 contracts awarded by U.S. federal agencies, science institutes, and universities.

## OUR EXPERTISE

### SCIENCE, ENGINEERING, AND INFORMATION ANALYTICS
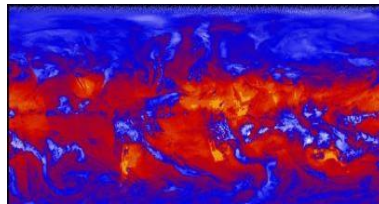

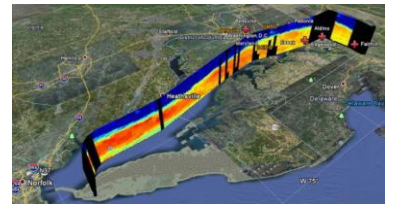

#### Data Ingest and Distribution

*Image depicting longwave energy being radiated to space. SSAI distributes data products that allow scientists to better understand Earth's atmosphere.*

#### Remote Sensor Data Collection

*Wildfire smoke profile over the Chesapeake Bay. SSAI and NASA collected data using the HSRL remote sensor on NASA's US-12 research aircraft.*

#### Data Analysis and Modeling

*Global Aerosol Modeling and Visualization Performed on NASA's Center for Climate Simulation (NCCS) Supercomputer.*

#### Instrument Development and Calibration

*SSAI builds, tests, integrates, and calibrates research instruments, such as the Cloud-Aerosol Transport System (CATS), which flew aboard the International Space Station.*

## Corporate Experience

**Contract Field Teams (CFT) Support:** STi is one of 10 small businesses awarded this $11 billion contract. We provide a rapid-deployment workforce to complete Organizational, Intermediate/ Field, and Depot/Sustainment level maintenance for aircraft and other active systems. Customers include the U.S. Air Force, Navy, Marine Corps, Army, and Coast Guard.

**Integrated Logistics and Distribution Support:** STi provides project management, logistics, warehousing, Heavy Mobile Equipment, and Systems analysis support for the Marine Force Storage Center. STi provides services to the overall Reset/Retrograde effort supporting of the warfighter.

**Federal Aviation Administration Services:** STi currently provides aviation maintenance services to Federal Aviation Administration Flight Program Operations at multiple locations. We provide program management support, electronic technical support, A&P Technical support, and laborer support on and for FAA supported aircraft.

**NUWC Keyport - Technical and Industrial Support Services:** STi oversees logistics, testing, training, and measurement facilities equipment, range system operations and maintenance processes, and system evaluation activities throughout all phases of the acquisition life cycle. We assist in the design, fabrication and testing of systems for USW warfare environment simulation and performance measurement. STi performs Test and Evaluation and executes test programs which approximate war-fighting environments and provides methods for measuring system performance in those environments. STi provides acoustic testing against weapon specification, test documents, and a joint interoperability capability to support full-spectrum acquisition, at-sea trial, and experimentation requirements.

**Space Force:** STi provides aircrew services to perform Functional Check Flights (FCFs), maintenance flight tests, Operational Check Flights (OCFs), and Acceptance Test Profiles (ATPs) (as well as recoveries and pickups) to determine airworthiness and maintenance status of various aircraft in support of the PR Helicopter Rescue Squadron (RQS).

# MISSION

To rapidly produce cost effective, modern, and secure capabilities that exceed our customer's expectations

## Capabilities

- **Software Development and Systems Engineering**
  DevSecOps software developers and engineers utilize Lean Kanban Software Development Life Cycle (SDLC) methodologies
- **Database Management Systems Development and Support**
  Creates, manages, and sustains worldwide Enterprise and custom databases for the Department of Defense
- **Legacy Software and Systems Modernization**
  Longstanding experience with transitioning legacy software, systems, and databases to modern, robust, and capable products
- **Experience with Geographically Separated Customers**
  Supports worldwide customers with both help desk and onsite
- **Accelerated Processing, Exploitation, and Dissemination (PED)**
  Data Flow Analysts, Engineers, and Scientists streamline and accelerate data transport by providing secure, integrated, highly automated Big Data management in multi-network environments

## Differentiators

- Cutting edge remote DevSecOps software application development for integration into any domain
- DoD Platform One compliant/DevSecOps software model and Technology stack
- Highly-experienced with Open-Source Software and technologies enabling efficient, cost-effective, and modern solutions

## TeAM's Best In Class Solution

# LinkNxtGen

## Making it Easy to 'Trust the Process'

**LinkNxtGen** is a hybrid resource management, project management and process and procedure management tool based on Industry best practices. **LinkNxtGen** captures detailed, self-reported information on the processes, procedures, tools, and deliverables that staff use to perform their work assignments. **LinkNxtGen** can also capture the time spent on those processes and procedures. **LinkNxtGen** offers companies insights into their organization and customers by:

- Supporting all levels of the organization including strategic, mid-tier management, and operations
- Supporting continuous process improvement and recording all changes that occur within the system for future reference
- Storing over 125 predefined, commonly used Technical Labor categories in its databases with definitions

**LinkNxtGen** is available across multiple platforms (Apple OS, Android, desktop) and staff can use it anywhere and at anytime. **LinkNxtGen** offers a platform that can automate business processes and responses throughout the life cycle of any given project. Using Artificial Intelligence and Machine Learning, **LinkNxtGen** allows management to have transparency into the full life cycle of their organization by standardizing critical processes.

One Acquisition Solution for Integrated Services

## Capabilities

### Grants management, financial management, and reporting

- Grants management

- Assessment of compliance with 2 CFR 200

- Financial and grants management training

- End-to-end financial management

- Financial reporting and analysis

- Accounting services

- Audit support and remediation

- Budget execution, formulation, and planning

- Regulatory reporting activities

- Performance measurement and reporting

- Financial policy development

- Quality assurance services

- Policies and procedures design and documentation

- Regulatory compliance

### Internal control and risk management

- Comprehensive OMB Circular A-123 compliance support

- Enterprise risk management (ERM) support

- Process re-engineering to streamline compliance efforts and eliminate redundancies

- Development and implementation of risk frameworks and tools to monitor and test internal controls

- Risk assessments, including risk scoring and heat maps

- Development of risk management policies and procedures

- Development of risk mitigation strategies and action plans

### Audit and attestation

- Financial audits

- Performance audits

- Compliance audits

- Internal control reviews

- Agreed-upon procedures

### Improper payments assessment

- Statistical sampling, testing, and reporting of high-risk programs in accordance with OMB Circular A-123, Appendix C

# About us

TFC Consulting Inc. is a trusted, solutions-driven consulting firm. We serve federal agencies who require comprehensive solutions to improve their financial operations and compliance. We meet agency grants management goals, for example:

## Department of The Treasury (Treasury), Bureau of Engraving and Printing (BEP)

### OMB Circular A-123 Testing

TFC performs OMB Circular A-123 testing for BEP. The testing supports the following business processes for internal controls over reporting (ICOR):

- Fund Balance with Treasury
- Financial Reporting
- General Ledger
- Accrued Liabilities
- Fixed Assets
- Procurement
- Accounts Payable/Cash Disbursements
- Travel Cards
- Purchase Cards
- Sales/Accounts Receivable
- Cash Receipts
- Inventory
- Cost of Goods Sold
- Human Resources and Payroll
- Information Technology (supporting both Appendix A and Appendix D)

### Acquisition Assessment Support

In addition to the ICOR testing performed, TFC also performed an Acquisition Assessment for BEP. This assessment included a review of BEP's acquisition programs to ensure compliance with all four cornerstones of OMB Circular A-123 and the Federal Acquisition Regulation. Our support included:

- Verifying acquisition activities are integrated with BEP's existing control processes and practices
- Conducting assessment for entity level reviews
- Reviewing status of previously identified control deficiencies
- Performing walkthroughs of the acquisition function and performing inclusive risk assessment
- Using the GAO Framework and OMB Guidelines to create an evaluation tool that is customized to BEP and its operations
- Identifying performance and/or control gaps to provide recommendations for implementing corrective action

As part of the A-123 support provided to BEP, TFC drafted the annual monitoring plan that was submitted by BEP to Treasury, assessed materiality at the qualitative and quantitative levels, prepared test plans to test key controls identified by BEP process owners, drafted testing results, TFC updated test plans, prepared testing results reports, prepared corrective actions, and provided support to BEP personnel to resolve findings.

## Department of The Treasury (Treasury), Office of Financial Stability (OFS)

### OMB Circular A-123 Testing

TFC performs OMB Circular A-123 testing for OFS. As part of the services provided to OFS, TFC performed the following:

- Appendix A testing
- Appendix B testing
- Appendix C testing
- Appendix D testing
- Updating process documentation • Data Analysis
- Creation and implementation of testing criteria

## Corporate certifications

- CPA Firm, Peer Reviewed
- Small Disadvantaged Business
- NIST SP 800-171 Compliant

## Contract vehicles

- **GSA OASIS Small Business Pool 1**, Contract No. 47QRAD20D1142
- **GSA OASIS Small Business Pool 2**, Contract No. 47QRAD18D000X

## Key tasks performed

- SF-270
- SAR Resolution

## Key agencies served

**Treasury • USDA • DHS • HHS • DOT • SBA • DOC • DOD • DOE**

## COMPANY OVERVIEW

Total Solutions, Inc. (TSI) is a leading consulting and professional services firm providing a broad range of services and solutions in program management; administrative, communication, and business support; engineering; research; technology; strategy, and operations. Since our founding in 1995, TSI has supported over 500 federal and state contracts for multiple government in 25 states and in 45 countries. To meet the demands of today's fast-changing world as the government's needs evolved over time, we have invested in numerous technical and organizational capabilities. Today, we serve federal civilian, defense, and intelligence agencies with a wide range of services. TSI is a subsidiary of Bristol Bay Native Corporation (BBNC), an Alaska Native Corporation. This enables us to provide rapid contracting options for customer

## SAMPLE OF FINANCIAL and ACQUISITION SUPPORT CONTRACTS

**NASA Operations and Programmatic Support Services (OPSS)**
TSI provides administrative, professional, and communications support services across a wide range of activities at NASA Headquarters while managing a team of experts on high visibility programs. We provide administrative and financial support to the NASA Office of the Chief Financial Officer (OCFO). TSI also provides grants management to OCFO. In support of the NASA Office of Procurement, TSI provides acquisition planning support in helping NASA re-engineer how it conducts contracting in order to attain an efficient enterprise-driven acquisition strategy and plan.

**National Flood Insurance Program (NFIP): Accounting and Actuarial Support**
TSI supports the Federal Emergency Management Agency's NFIP program by providing accounting and actuarial support to help ensure program financial viability. This effort includes financial subject matter expertise, financial controls and risk management, accounting and auditing responsibilities, and data analysis of the NFIP funding and operational activities. TSI staff produce financial statements and reports based on policy, claim, and financial transaction information from the Write-Your-Own insurance companies and the NFIP Direct Contractors.

**US Navy Bureau of Medicine and Surgery Operations, Plans and Readiness Directorate Budget Office Support**
We provide Operations, Plans, and Readiness (OP&R) Budget Office support with portfolio and financial management to facilitate the successful execution of OP&R portfolios. We facilitate industry best practices of budget formulation and budget execution processes in support of the Special Programs, OP&R, and Centrally Managed Account portfolios each fiscal year. Our staff implement controls to mitigate plan variance, unfunded requirements within the portfolios, and end of year unobligated funds.

**Air Force Financial Improvement and Audit Readiness Support Services**
We provide critical capabilities to the Air Force FIAR contract, especially in support of the Air Force Civil Engineering Center environmental restoration and liabilities programs. Our team is composed of subject matter experts, data analysts, and environmental specialists who have the education and professional background needed to excel at providing FIAR guidance and support.

**Department of Labor Job Corps National Office Acquisition Support Services**
BBNC provides the Employment and Training Administration Office of Contract's Management in all aspects of day-to-day pre-award (with emphasis on conducting full and open competition) and post-award contractual activities. We work directly with the Contracting Officer (CO) and Contracting Officer's Representative to ensure that contracting operations run smoothly. Our team consists of a highly-experienced senior Contract Specialist and an onsite Project Lead who manages Contract staff. We assist the CO with solicitation development, acquisition strategy development, strategic requirements review, and other associated procurement tasks. We also make recommendations to the CO to accept or reject documents submitted by the Program Office based on a thorough review of the adequacy of document requirements. Our personnel help with preparing

## WHY TSI and BBNC?

**Easy to Hire**
Alaska Native Corporations can accept up to $100 million direct awards that do not require justification and approval and are not subject to protest.

**Our Past Performance**
Verifiable, reliable & consistent. Long-term experience working with diverse groups of people and cultures.
