3. Seed of *Scadoxus membranaceus*

### **BX 138 (Jan. 23, 2007)**

>From Stephen Putman:

1. Seed of *Hippeastrum reticulatum striatum* "the real thing NOT 'Mrs. Garfield'"
2. Small bulbs of *Hippeastrum* sp., miniature, 8" scape, blooms: 3"x4", two per scape. Looks like a small version of *H. striatum rutilum*. Is said to come from Sao Paulo state.
3. Small bulbs of *Hippeastrum puniceum*
4. Blooming size bulbs of *Zephyranthes candida*

### **BX 139 (Feb. 2, 2007)**

>From Alberto Castillo:

(W = winter-growing; S = summer-growing; SE = summer-growing, evergreen)

1. *Hymenocallis maximilianii* seeds. Just harvested. Most germinated. (S)
2. *Tropaeolum pentaphyllum* seeds. (W)
3. *Zephyranthes primulina* seeds. Just harvested. (S)
4. *Allium canadense*, umbel bulbils. A selected form, look lacquered, a nice maroon. (W)
5. *Gladiolus illyricus* seeds, not many. Just harvested. (W)
6. *Cooperia morrisclintii* seeds, a few. Just harvested. (S)
7. *Sparaxis bulbifera* seeds. Fresh. (W)
8. *Ornithogalum longibracteatum* (*caudatum*) seed. Just harvested, from wild collected plants. (SE)
9. *Albuca nelsoni* seed. Fresh, from wild collected parents. (SE)
10. *Albuca juncifolia* bulbs, it is self fertile and produces good seed, therefore one can make it with a single bulb (W)
11. *Ferraria uncinata* corms, just finishing dormancy (i.e. ready to sprout) (W)

### **BX 140 (Feb. 7, 2007)**

>From Alberto Castillo:

(W = winter-growing; S = summer-growing; SE = summer-growing, evergreen)

1. *Cypella herberti* seeds, just harvested, selected form, extremely robust, this is something special (W)
2. *Habranthus martinezi* seed, just harvested, from the original collection in the seashore in S. Brazil (W)
3. *Romulea hirta* seeds, few, fresh (W)
4. *Scilla greiheri* seeds, few, fresh (W)
5. *Manfreda rubescens* seed, fresh (S)
6. *Echeandia* sp. Mexico, seed (few), fresh, light orange flowers (S)
7. *Moraea ochroleuca* seeds, fresh, a very fine deep salmon form (S?)
8. *Ixia pumilio* seed, fresh (W)
9. *Moraea huttonii* seeds, I have found this not easy to germinate, perhaps my climate too warm (SE)
10. *Ferraria crispa* seed, fresh, may be a dozen different forms (W)

11. *Neopatersonia uitenhagensis* seed, fresh (W)
12. *Canna tuerckheimii* seeds, just harvested, A miniature species (usually less than 2 ft. tall) (S)

And seeds from Alberto that were leftover from BX 139:

13. *Hymenocallis maximilianii* seeds (very few) Most germinated. (S)
14. *Zephyranthes primulina* seeds. Just harvested (S)
15. *Allium canadense*, umbel bulbils (few). A superb selected form in which they look lacquered, a nice maroon (W)
16. *Sparaxis bulbifera* seeds (few) (W)
17. *Ornithogalum longibracteatum* (*caudatum*) seed. Just harvested, from wild collected plants (SE)
18. *Tropaeolum pentaphyllum* seed (few). Fresh. Should be sown at once (W)
19. *Albuca nelsoni* seed. Fresh, from wild collected parents (SE)
20. *Albuca juncifolia* bulbs (few), it is self fertile and produces good seed, therefore one can make it with a single bulb (W)

SEED (some QUITE RARE!):

22. *Milla magnifica* - largest and rarest species of this genus. Wild-collected in Mexico State near the border with Guerrero. Grows in tropical deciduous jungle with a very pronounced dry

- period.
23. *Tigridia* sp. - A tall-growing species collected at around 6000 feet in Mexico State, could be *T. meleagris*, but the flowers were not seen.
  24. *Tigridia mexicana* - Seed harvested from wild-collected plants found in Mexico State.
  25. *Tigridia* sp. - A short-growing species collected near Bejucos in Mexico State. Found growing in the shade of *Crescentia alata* trees in a very hot environment with an extremely pronounced dry period. Grows in clay soils that flood during the rainy season but bake in the dry season.
  26. *Tigridia* aff. *mortonii* - I think that it could be this species based on where it was found. Found at the type locality for the species in Mexico State growing directly on rock faces. Culture is similar to *Worsleya*, but with more shade. If this plant is what I think that it is, it will be the first time it has been collected since 1935. Flowers were described as RED by the original collector....this is the only member of *Tigridia* with red flowers. I will confirm the identity next summer when it flowers.
  27. *Rhodochiton* sp. - I think that this is a species of *Rhodochiton* (not *R. atrosanguineus*), but I am not 100% sure of the identity. It has a root structure similar to *Dahlia* and grows as a lithophyte on wet cliffs in Mexico state where it was collected. Flowers are large, reddish-purple, showy and pendulous.
  28. Irid - A species of pleated-leaf irid that does not grow more than 12 inches with pointed seed capsules. Found in Mexico State growing near the city of Tejupilco at around 4000 feet in tropical deciduous jungle.
  29. *Penstemon* sp. - has beautiful flowers that are an amazing bright coral-pink color with a fuzzy, yellow beard at the base of the lip. It was collected in Texcoco district in Mexico State and will grow well with other summer-growing bulbs in cool climates. Grows

with *Tigridia vanhouttei* and *Calochortus barbatus*.

The following are wild collections made in South Africa in September, 2011 (Northern Cape, Namaqualand, and the western coast area). IDs are educated guesses based on locality, leaves, seed pods, and expert consultations. Please retain my M- or Mx- numbers for future reference.

25. *Lachenalia bulbifera*, coastal dunes at Rocherpan. Olive green leaves with nice red markings.

26. *Massonia depressa*, M41, Matjiesfontein Cemetery. Unusual cliff dwelling form.

27. *Massonia depressa*, M42, S of Middelpoos, rocky area.

28. *Massonia depressa*, M45, near Middelpoos Hotel, ribbed leaves.

29. *Massonia pygmaea*? M46, Nieuwoudtville, Matjiesfontein Farm

30. *Massonia depressa*, M47, Nieuwoudtville waterfall, well marked.

31. *Massonia depressa*, M48, Nieuwoudtville waterfall, reddest

32. *Massonia depressa*, M49, Carolusberg, near the old Van Der Stel copper mine, extra large form.

33. *Massonia depressa*, M51, Modderfontein, large form.

34. *Massonia 'pygmaea'* pustulate form, M52, Modderfontein, rocky dome.

35. *Massonia pygmaea*, M54, Modderfontein, dry field/renosterveld

area.

36. *Massonia pygmaea*, M55, Modderfontein, wet pasture.
37. *Massonia depressa*, M56, field across from Kamieskroon Hotel, good color.
38. *Massonia depressa*, M57, Kamieskroon Church, from a huge population with some immense forms.
39. *Massonia pygmaea*, M59, SE of Elands Bay, rocky area. Seed and pod morphology is different from the Modderfontein forms.

The following are from a different population in Jacobs Bay.

40. *Daubenya zeyheri*, Mx22, Jacobs Bay, selected forms from private garden.
41. *Daubenya zeyheri*, Mx23, Jacobs Bay, limestone area.
42. *Daubenya zeyheri*, Mx24, Jacobs Bay, near old runway, sandy area over limestone.
