\*Built-in Bluetooth not available for the KX-TCA185 model.

## PANASONIC KX-TCA85 SERIES DIGITAL ENHANCED CORDLESS TELECOMMUNICATIONS (DECT)

The KX-TCA85 series, our most advanced DECT handsets, complement the Panasonic multi-cell DECT system and ensures clear communication with features like noise reduction and automatic receiver volume adjustment. With the touch of a button the noise reduction feature is activated and reduces surrounding noise to ensure crisp and clear audio delivery. And for work environments that can become noisy the handset is designed to automatically adjust the receiver volume to an easy to hear level. A desk phone extension can be assigned to the handset so calls can be delivered when the user is away from their desk. And when a user returns to their desk, the DECT phone can be seamlessly transferred to the desk phone and back again. For those situations that require hands-free interaction both the KX-TCA285 and KX-TCA385 also support Bluetooth.

With an IP65 rating, the KX-TCA385 protects against water and dust for those harsh work environments.

### One year Warranty with US-based customer support

Making sure your business communication system stays up and running is a top priority. Provided with each model is a standard one year warranty, along with dedicated US-based customer support at our Virginia-based call center.
