# PAI PRODUCT BARCODES

## INTRODUCTION

## WE ARE AN INDUSTRY LEADER

PAI is the industry leader of high-quality, reliable, US-made, *patient-centric* unit-dose medicines. We are continuously evolving and growing to offer the industry-leading full line of innovative unit-dose medications, direct contracting and supply, and dedicated customer service support. Our unwavering commitment to medication safety and ability to ensure the availability of high-quality unit-of-use medications drives development of unique and differentiated offerings.

## BROADEST PORTFOLIO OF UNIT-DOSE AND LIQUID MEDICATIONS

### Extensive Inventory

Over 145 SKUs  
50+ retail items  
100+ unit-dose items

### #1 Unit-dose

rigorous quality control

### #1 Largest Gx-liquid

capacity in the United States

## BARCODE GUIDE

**Before beginning to test your scanner for barcode reading ability, please ensure that your scanner's hardware and software has been updated to read the GS1-128 Databar Linear and 2D Datamatrix code.**

### TEST YOUR SCANNER

If your scanner does not display any numbers or fails to beep, contact your scanner supplier. Your scanner is not enabled to read the GS1-128 Databar Linear or the 2D Datamatrix barcode symbol.

**Scan the images below to test your scanner:**

(01) 00301210873164

The scanner display should show:

**0100301210873164**

The scanner display should show:

**0100301210873164211234567890121721063010AB12**

### NO PRODUCT FOUND!

If the scanner has been enabled to read GS1-128 Databar Linear, and the product does not appear in the database when it is scanned, contact your scanner supplier, pharmacy informatics team, or IT department to troubleshoot.

### BARCODE QUALITY

Potential packaging defects:

- Smearred
- Smudged
- Faded
- Crosses the perforation

**For questions about how to purchase or any other information on products, call your PAI sales representative or contact customer service at [864-331-1832](tel:864-331-1832) or [Info@paipharma.com](mailto:Info@paipharma.com).**

#### THE BARCODE SYMBOLS

Case 2D	Carton	Bottle	Cup
GS1 Datamatrix	GS1 Datamatrix	GS1 Datamatrix	GS1-128 Linear

#### WHAT IS A GTIN?

GTIN is an acronym for Global Trade Identification Number and is a 14-digit number. The GS1 assigns a prefix to a registered company which is used to create an item number. For drug products, the prefix includes the FDA-assigned labeler code:

GS1 Prefix GS1	NDC Labeler Code
030121	0121

If your product database does not allow the storage of the 14-digit GTIN, programming will be required by your product data provider to extract the NDC or PAI ID from the GTIN. The format of the three-segmented numbers are as follows:

10-Digit NDC	11-Digit NDC
4-4-2	5-4-2

#### WHAT DOES THE DATA REFERENCE?

The encoded data follows GS1/HDA specifications. There are two-digit Application Identifiers (AIs) that will help GS1-128 compliant systems identify the information being read. PAI uses the following AI codes:

GTIN (14-digit)	Serial Number (12 digits)	Expiration Date (YYMMDD)	Lot Number (4 digits)
01	21	17	10
