3. *By Mr. Rotton:* Were the girls to whom Mr. Macarthur alludes some who had been sent up the country, in consequence of having been returned from employment in Sydney? Yes; they were some who had been returned from service, after complaints had been made of them in Sydney. Here is a letter from Mrs. Elinor Magrath, of Scone, enclosing the depositions taken at the Police Office there, in reference to one of the orphan girls. (*The witness read and handed in the same. Vide Appendix L, Nos. 1 & 2.*) I have here a letter from Mr. Gilbert Elliott, who was the gentleman in charge of the female depôt at Parramatta. (*The witness read and handed in the same. Vide Appendix M, Nos. 1 & 2. The witness then read letters from the Honorable E. Deas Thomson, Mr. Wm. M'Kee, of Port Macquarie, Mr. H. Chatto, and Mr. Gilbert Wright, of Sydney. Vide Appendix N, Nos. 1, 2, 3, and 4.*) And now, having disposed generally of the girls in question, that is, of those who arrived under the system adopted by the Commissioners, I may allude to those who came by the "Lady Kennaway." The Rev. Mr. Parker was the Roman Catholic Clergyman who was placed in charge of them on the voyage; he had been chaplain of the workhouse at Cork, and had had the selection of most of them from that workhouse. The authorities at home were so anxious that these girls should be brought out satisfactorily, and that there should be no differences on the score of religion, that as the majority of the girls were Roman Catholics, they had appointed gentlemen of that religion both as chaplain and as surgeon; and Mr. Parker told me that although he had selected the girls with great care, he had great cause to regret that he had allowed many of them to come. The sub-matron of the depôt was matron of this ship, and at first there was an unfavorable impression respecting her, as she was charged with having been mixed up with the chief mate, but it was subsequently proved that a *bona fide* engagement existed between them, and that nothing improper had taken place. She remained for some time in the barracks as a sort of servant, and at length was promoted to the office of sub-matron. As she had been prior to the voyage wardswoman at the Cork Workhouse, and was a woman in whose word I placed great confidence, I some time since called upon her to make a statement with reference to those girls who had come out in the ship with her. She did so, and this is the statement. (*The witness read and handed in the same. Vide Appendix O.*) If the Committee think proper, she can be examined upon the matter. With the view of testing the accuracy of this statement, I sent the list furnished by her across to Captain M'Levie, and he stated that the truth of it was fully borne out by reference to the detective department of the police. I have adhered as much as possible to documentary evidence, to shew that I have no personal feeling in the matter; but I may, in conclusion, be permitted to state, with regard to the country girls who have generally been received from Ireland, that they have, with very few exceptions, been unaccustomed to domestic service, and that the persons who came to hire them rarely kept them more than a week or ten days. The consequence was, that in those days—that is, at the time of the gold discovery—when we had ship after ship coming in, when money was plentiful, and a large number of persons were about who were not very particular in their conduct, these girls, in very many instances, fell victims to seduction by bad characters. I have in clearing out the Port Phillip steamers recognized dozens and dozens of these girls who had come out at the expense of the country, whom I have no doubt, from no fault of their own, but from their ignorance of domestic service, had been turned out of doors by their employers, and whose only resource was to pick up the diggers and to live in an improper state with them. I may say I have recognised hundreds of them who have

H. H. Browne, Esq. cost the country £16 or £17 each, whose services have been thus lost to the Colony, and who, I very much fear, have tended to swell the ranks of those unfortunate characters of which Melbourne streets are full.

22 Dec., 1853. 4. I suppose these remarks apply to female immigrants generally, and not to any one class? No; I am bound to say that these girls are more liable to get into mischief than others, on account of their want of knowledge. They are treated unkindly, are turned out of their situations, and then have no resource but to seek a living in this way; and when I have spoken strongly of the difficulty of disposing of these girls, I have done so from a feeling that to introduce them in such numbers was calculated to do them serious injury rather than to benefit themselves or the Colony. The demand for domestic servants is very large, but employers are not inclined to put up with want of knowledge when wages are high. If servants do not suit their employers they are got rid of, and are compelled to seek employment from the Registry Offices, for they are not received back at the Barracks; they then get into public houses, where they are led into mischief, and ultimately are thrown on the streets. I believe if the Commissioners had sent us out a fair proportion of domestic as well as of farm servants, these difficulties would not have arisen; but from the time of the arrival of the "Sabrina," I think in the month of July, until the month of December, no fewer than 1,655 Irish girls, principally farm servants, were introduced; and I say it was not fair either to those girls or to the Colony to bring them in such numbers. A feeling of dislike to this particular class of immigrants was excited; and it is no secret—indeed it was an every day occurrence at the Barracks—that employers came into the hiring room at my department and particularly asked the matron not to give them an Irish servant. I believe that feeling was not confined to either English or Protestant employers, but existed in very many of their own persuasion and country.

5. *By Mr. Deniehy*: You do not say Irish Orphans, but Irish servants? Yes, it is unfortunately so. I attribute it to the fact that so large a number of an unsuitable class having been thrown upon the Colony. In those days, if eight or ten English girls came out, although the same advance of £12 had to be made, I could get employment for them in an hour, while if I filled the room with the others, nobody would make the necessary advance, although this was shortly after the discovery of gold, labor was very much in demand, and they had a better chance of getting employment than they have had at any other time.

6. *By the Chairman*: Do I understand your reference in the paragraph particularly complained of to apply to orphans generally from the United Kingdom, or to orphans from any particular part? I could only allude to those we had received who were from Irish Unions—we never had any either from England or from Scotland.

7. You have spoken, I think, of some of the girls as having been too young—what ages were they? Some of them were as young as fourteen; mere children. In the first instance there was no very great difficulty in disposing of them—there was a great demand for servants, as immigration had only just re-commenced, but after a time it became difficult to find persons who would undertake charge of these young children.

8. Do I understand the expressions used by you in paragraph 13 of your Report to refer to orphan immigrants exclusively? Exclusively.

9. Not to the immigration of Irish females generally? Certainly not: that Report referred to the immigrants by a certain ship, which ship had no females on board, but orphans from an Irish workhouse. It was not a report upon immigration generally, but, as I stated at the commencement of my evidence, it resulted from an inquiry which had taken place before the Immigration Board. If the ship had arrived without any complaints having been made, it is quite possible that neither the Board nor myself would have expressed ourselves strongly, but, feeling that these girls had to some extent misconducted themselves, and knowing at the same time the trouble the Colony had had in disposing of former orphan girls, myself and the other members of the Board were led to make the strong recommendations we did. The Commissioners received strict instructions to send out no more orphans except under a modified plan, namely, that in consideration of their being less qualified than others for the wants of the Colony a portion of the payment of their passage should be borne by the Home Government, and not entirely by the Colony, as was the case in this instance.

10. Did you, in the expressions to which your attention has been drawn, refer to their deficiency as regards their domestic capabilities, or to their moral character? I did not refer to their moral character, for I believe they will bear comparison with any other description of immigrants that have been introduced. The lower class of Irish are, as a whole, I believe, more moral than either the English or the Scotch, although cases have occurred where their improper conduct has come before the Board. There have, however, been some very flagrant cases which have come before us, particularly the English needlewomen. Although these girls cost the Colony nothing for their passage, I felt so strongly on the subject that I wrote to Mr. Sydney Herbert, at the expense of whose Committee they were sent out, stating that if a better class were not selected, and a better system adopted on the voyage out, they had better not come at all. (*The witness read and handed in the same. Vide Appendix P.*) As I felt strongly in this matter—and it is my misfortune, perhaps, to do so in such cases—I had previously written home, commenting in severe terms upon the character of these women, although they were of my own country; and it was in reply to a letter from Mr. Sydney Herbert, who felt hurt at my statements, that the letter I have just read was written.

11. With reference to these needlewomen, did you feel it to be your duty to send a despatch to the Home Government? I did. I send in to the Colonial Secretary a report upon each ship, and the character and qualifications of the girls. I did so in this case, and the report was transmitted in the usual way to the Land and Emigration Commissioners.

12. *By Mr. Deniehy*: Did more vessels than one arrive with English needlewomen? Yes; five or six, I think, altogether. Some of these females were particularly nice girls, but what I complained of was, that many girls of evidently abandoned character had been admitted to the dépôt at home, which appeared to have been a sort of Magdalen, with a view of reforming them

them in a fortnight or three weeks, so that they might be shipped to Australia, and that these were mixed with the other girls, many of whom were highly respectable and well-conducted. I have here a memorandum from Sir Charles Fitz Roy, with reference to the immigrants from the Isle of Skye, by the "Ontario," and my reply thereto, which I will read. *(The witness read and handed in the same. Vide Appendix Q, Nos. 1 and 2.)* There was a Committee formed in Scotland for the purpose of sending laborers from the Isle of Skye to this Colony. The "Ontario" came with some of these people, and the passengers were unfortunately attacked with typhus fever on the passage, and a large number died. I reported upon this description of immigrants, and stated that I thought they were not suitable to the requirements of the Colony.

H. H. Browne,
Esq,
22 Dec., 1853.

13. *By the Chairman:* Have you any further remarks to make? No. I am unfortunately placed in an awkward position in trying to perform my duty in a straightforward upright manner.
14. *By Mr. Deniehy:* In a petition referred to this Committee it is stated, "That the Immigration Agent has, in the opinion of your petitioners, misrepresented Irish Female Immigrants 'as being most unsuitable to the requirements of the Colony, and at the same time distasteful to the majority of the people.'" Now, have you in any of your despatches made reference as to Irish female immigrants generally? I think in my Annual Reports I have reported upon all classes of immigrants.
15. In one of your Reports have you not reported upon Irish females, irrespective of the orphans? Unless I refer to my Reports I cannot say.
16. You have said in the course of your remarks to-day, that Irish females generally were distasteful to employers? No; I said they were suited for farm servants, and not for domestic servants, and that therefore they were open to objection here, where the latter class were chiefly required.
17. Did I not understand you to say that you had a large number both of English and Irish employers who call at your office and say, "Give me English, and not Irish servants"? I am sorry to say that that feeling exists even at this very time—I state the fact, but it is very natural, because the country Irish girls are not suitable for servants.
18. That being in your opinion a fact, have you at any time stated it in any Report? I really cannot charge my memory with all the Reports I have written. I think if the Irish girls came out in any one particular year in such large numbers as to be inconvenient, I should have said there was a difficulty in getting rid of them in consequence of their unsuitableness for domestic service; but I am quite sure I said nothing about their being distasteful. I try to report as faithfully as I can what is the actual result of the immigration.
19. Have you at any time in any Report stated generally that Irish females were unsuitable? I do not think I have made use of the word "unsuitable;" I think I have said when a large introduction of farm servants has taken place, that they could not meet with ready engagements. I do not think I have used the expressions in any other place than in the despatch complained of—I cannot charge my memory.
20. You do not recollect having stated in any of your Reports that Irish female immigrants—and I wish now to use the words generally, and not with reference to any particular class—not specifically naming orphan girls—were not the sort of colonists wanted here? I do not. I have in my Reports spoken according to the demand that has existed during the year, and the supply that has reached the Colony; but I have been very cautious in what I have written, because I know that the Irish nation are so easy to take offence.
21. In the closing portion of the 13th paragraph of this Report, signed by yourself, Mr. Mann, and Dr. Alleyne, you use the words "most unsuitable to the requirements of the Colony, and, at the same time, distasteful to the majority of the people"—was the intention that they were distasteful to the majority of the people because they were unsuitable to the wants of the Colony? I think they were distasteful on the grounds I have stated—that the employer incurred additional responsibility for their care—that they could not be dealt with and got rid of by their masters or mistresses as ordinary servants, but only through a legal proceeding. I did not mean the expression to apply in an offensive way. I simply desired to convey that they were distasteful as compared with other servants they could get.
22. But would not the distaste be rather to the system than to the persons? I am very much opposed to workhouse immigration at all. I have written emphatically against any immigrants being brought from any workhouses.
23. Do not your objections apply rather to the system than to those persons who were sent out? I think the system was bad; but that it was the only one under which employers would have taken them as servants. It savoured in some measure of the old assignment system, and it was difficult, for some years, to wean the public from that system; as one gentleman who was examined before this Committee, Mr. Gorman, said, that when once an employer got a girl into the country, he thought it hard she should leave to get married.
24. Is not that an objection which applies rather to the employers than to the Irish orphans themselves? I do not mean to say that many of these girls were not unkindly treated.
25. They were distasteful to the majority of the people because this particular system was carried out? I think you must, to some extent, allow that my feelings might be more strongly warped than others from sitting day after day adjudicating in cases between these girls and their employers, and hearing at the Police Office the strong expressions of feeling on the part of employers against this class.
26. My object is not to challenge the expression in a censorious spirit, but to get at the real meaning it is intended to convey: I glean from what you have stated that the expression "distasteful to the majority" is connected more with the nature of the system than with the people themselves? Yes.
27. As regards the words "unsuitable to the requirements of the Colony," you mean by them that they were unsuitable to the particular services likely to be required here? Yes.
28. These orphan girls were apprenticed out here in a peculiar manner? Yes.

- H. H. Brown, Esq.
22 Dec., 1868.
29. Will you state what that was? They were apprenticed on certain terms.
30. The parties to the indentures were the employer and the Immigration Agent? Any member of the Orphan Board was one party, the employer was another party, and the apprentice was the third.
31. And, of course, any member of the Board acted for the Board, or at all events he acted under a power making him a party to the indentures? Yes. I do not think I became a party to many indentures, but as one of the Board I took joint responsibility with the other members.
32. With regard to English and Scottish girls, these were not apprenticed, but were hired as ordinary servants, and there was not the relation to the Board which existed in the other cases? Yes. None came from the workhouses of either England or Scotland.
33. There was no control on the part of the Board? No, and no farther expense on the part of the Government, unless from accident or illness, and to this day in such cases we exercise a reasonable guardianship, and either receive the party into the Barracks or send her to the infirmary.
34. When English or Scottish girls were hired out the Board had no more to do with them? No.
35. But the Irish being apprenticed the Board were to a certain extent responsible for them? Yes, during the term of apprenticeship.
36. The whole of the females for whom you were in any way responsible were Irish orphans? Yes.
37. Then, seeing that you were responsible for these Irish orphans, may that not have been the cause of your having had so many complaints in connection with their conduct, while you heard nothing of the conduct or of what became of the English or Scottish girls for whom you were not responsible? We should not have heard so many complaints as we did if these girls had not been apprenticed, and we had not held the employers responsible, for they could otherwise have been turned adrift at a moment's notice as any ordinary hired servants, and hundreds would no doubt have been ruined. It was by exercising this control, and by keeping the girls in communication with their ministers of different religious persuasions, that the system was at all beneficially worked. A great deal of credit is due to the clergymen for their assistance in the settlement of disputes, and the prevention of the girls being brought before the Courts.
38. Do you not think that if there had been any control in the Board over the English and Scottish women, such as there was over this peculiar class of Irish females, that there might have been as large a correspondence as regards the unfitness of these females, and various other causes of complaint against them, as you have produced against the Irish female orphans? It is quite possible it might have been so.
39. You have also had the control of the Assisted Irish Immigrants, have you not? Yes.
40. Among whom there were a number of Irish females? Yes; the Irish people have contributed more largely to the introduction of their relatives and friends through these regulations than any other people resident here.
41. Some of these people were sent for from Moreton Bay, I believe? The assisted immigration to Moreton Bay has been very small; some persons have been sent for by that district, but, as compared with Sydney, the number is very small.
42. Is it the fact that some of the assisted immigrants sent for from Moreton Bay, and who were to have been conveyed to that place, were landed in Sydney, and then sent on to Moreton Bay, involving as great an amount of expense as would in the first instance have conveyed them to Moreton Bay? Such has been the case in perhaps a dozen instances, and, in consequence of the hardship of their cases, when persons have arrived here who ought to have been landed at Moreton Bay, I have represented the matter to Government, and obtained authority to send them on. At the same time I represented the irregularity on the part of the Commissioners, and latterly such cases have not occurred, except in one or two instances, where persons have been put on board ship by mistake, or in order to make up the requisite number of passengers. Under the Remittance Regulations, the people sometimes do not attend, and the Commissioners are bound, under a fine, to put a certain number on board, to make up that number, persons intended for Moreton Bay have been put on board, but no hardship has been felt by the individual, as the expense of the passage has been borne by the authorities.
43. Then, in all such cases the Government have, upon your representation, drafted the parties to Moreton Bay? They have.
44. *By Mr. Rotton:* I think you were the Chairman, or, at all events, a member of the Immigration Board? I was Chairman of the Board at the time the Despatch complained of was written.
45. The words complained of in the Petition to the Assembly were not used merely as your own individual opinion, but as the mouthpiece of the Board? As the mouthpiece of the Board.
46. You are not individually responsible for the expression—you used it merely as the mouthpiece of the Board? Yes; but I concurred with the other members in the opinion expressed.
47. The expression, I think I have gathered from your evidence, does not refer in any sense to the private or moral character of the girls alluded to, but merely to their unsuitableness as domestic servants, in consequence of their not being well up in their duties? That was the intention of the Board in making that Report. The expression had no reference to their moral character, for it would have been very hard to have blamed the whole ship for the misdeeds of a few.
48. The construction you now place upon the expression is that they were unsuitable and distasteful because they were not sufficiently educated domestic servants? Precisely so. They were not the class required by the Colony. I thought it was my duty to bring to the

the Colony the best description of immigrants in return for the money expended, and I did not think this was a class that should be brought, considering their great disqualification, and the dissatisfaction manifested by the employers. H. H. Browne, Esq.

49. You have given in a large bundle of reports from the Police Office of cases which have been adjudicated upon with regard to these girls—are you able to state now from recollection whether those complaints were confined to English and Scotch employers, or whether they were equally from Irish employers? I think you will find that they are from English, Irish, and Scotch. 22 Dec., 1858.

50. So that in fact their own countrymen and co-religionists have complained of them as well as those who were of an opposite faith and different country? The names I think will shew that. I think they were pretty well mixed. Certainly there were more complaints from the humbler than from the higher classes.

51. You have stated that the principal cause of these objections being made to these girls was that they were not well up in household duties. Now, if these girls had been distributed in the interior amongst the humbler classes, where their services would have been more acceptable, where their want of knowledge of household duties would not have militated so much against them, do you think there would have been so many complaints made against them? There were, certainly, fewer complaints from the country than from the towns; many of them having been on farms in their early days, they adapted themselves more quickly to a country than they could to a town life. Depôts were opened at Bathurst, Goulburn, Parramatta, and Illawarra, and indeed wherever we could do so, for the disposal of these girls, with the view of making their labor as useful as possible to the country.

52. I think I understood you to say, in answer to a previous question, that these girls were not forwarded to the country until they had been returned from service in Sydney—returned principally for misconduct? That was so in the first instance; but that order was revised, as shewn by the minute I have handed in, and they were afterwards sent to the depôts as they arrived from the ships.

53. After that you did not receive so many complaints from the country districts? I cannot tax my memory, but I should say that was the natural result.

54. Upon the whole, I think you said you had very few complaints from the interior? Very much fewer than from Sydney.

55. Did not that shew that if the girls had been placed in situations suited to them complaints would not have arisen? Suitable places could not be provided for them as they came in in such numbers. Some few girls who came from the neighbourhood of Dublin, or of large cities in Ireland are very excellent servants, but the majority of them come from the country districts, and know more about milking, making butter, and work of that kind, than of taking care of a house.

56. The petitioners request the Assembly to instruct this Committee to "take into consideration what further steps ought to be taken to render the Immigration Department in Sydney more efficient in supplying the inhabitants of the interior with female servants than it is found at present to be." Now, you have had very long experience of immigration matters, and are, I should suppose, more competent than any other individual to offer suggestions as to the proper course to be adopted? In consequence of a resolution passed by the Assembly some months ago, I was called upon by the Chief Secretary to report upon that very matter. I placed myself in communication with the Police Magistrates at Bathurst, Goulburn, and Maitland, and received from them the information, that at Bathurst and Maitland the two old depôts still exist, and could be applied to the original purpose with very little expense. That at Goulburn does not exist; and, moreover, the people there do not manifest any great anxiety to get servants. I did not consider, looking to the small number of girls then arriving in Sydney, that there was sufficient to justify me at that time to re-open the depôts; but I proposed that there should be placed on the Estimates for 1859 a sum to enable me to dispatch into the interior some female servants; and I believe, with the assistance of the Police Magistrates, I shall be able, at a small expense, to form some *quasi* depôts for the purpose of the districts. I may, however, here state, that the course I have adopted with regard to persons residing in the country has been to allow them to take servants before the usual hiring day; because we find that if they go into the hiring room they refuse to take situations in the country. In this way many gentlemen have been enabled to obtain servants who would not otherwise have got them. I have no doubt, if the £500 placed on the Estimates be voted, there will be no difficulty in supplying the country districts. I am a great advocate for supplying the country districts. Indeed, if the Maitland depôt had not been in existence when the large immigration took place in 1854-55, we should not have been able to have disposed of the people, as among them were some very large families, and the land carriage is so expensive that we could not have sent them to Bathurst.

57. *By Mr. Jenkins:* In your replies to the questions of Mr. Deniehy, when he wished to obtain from you the meaning you attached to the word "distasteful," I understood you to say that the word referred to the system—that of apprenticeship? The system had a great deal to do with it; because, under the agreement the employer could not get rid of a servant without going before a Police Bench, and he would therefore rather submit to inconvenience than expose himself to annoyance.

58. Apart from the system of apprenticeship, do you think orphan female immigration as desirable as other female immigration? Certainly not; I would not have recourse to any workhouse immigration; I think it is not a desirable class.

59. *By Mr. Deniehy:* In saying that, you allude to all countries? To all countries. I have seen families come here from English workhouses, and I have reported against it.

60. In fact, the refuse of the British population have been sent out? Workhouse people have been sent, but I have reported against it, as I think we ought to get the best article in return for our money.

H.H. Browne, Esq. 61. *By Mr. Jenkins*: Can you inform the Committee at what wages the orphan immigrants were engaged? From £5 to £10 a-year.

22 Dec., 1858. 62. Was that lower than the ordinary rate of wages at which females engaged? Yes, very much lower. Wages were not very high at that time, but I think for ordinary servants they were not less than £15 or £18. The very young girls got £5 a-year, those a little older £7, and those about sixteen or seventeen £10.

63. Of course it is your opinion that if they had been otherwise eligible, complaints would not have been so generally made against them? If they had been hired out as ordinary servants the complaints would not have come to the office.

64. If they had been ordinary servants, would not the lowness of their wages have induced employers to have retained them? I think many of them were taken because there were no others to be had, and the Orphan Board having fixed the rate of wages, many employers thought they were paying them a great deal too much—more than they were worth; but the Board fixed what they considered to be the lowest amount which would enable the girls to provide clothing during the year.

65. You would have found much greater difficulty to dispose of them but for the low rate of wages? Yes.

66. *By Mr. Rotton*: Even at the low rate of wages fixed, you had difficulty in getting them situations? Yes.

67. *By the Chairman*: Your evidence will be sent to you, and you will be at liberty to add anything that may have escaped you, or any explanation you may consider necessary?

As an illustration of the difficulties which appear to have, in like manner, encumbered the labor market of South Australia about the same period, I add extracts from the Reports of the Immigration Agent of that Province, Dr. Duncan, as also from the Despatches of the Governor Sir Richard McDonnell, adverting, in equally strong language as that used by me, to the dissatisfaction manifested by the Colonists of South Australia at the introduction of so large a number of females unaccustomed to be employed in domestic service.

ADDENDUM.

EXTRACT 1.

"To one circumstance I must again urgently call the attention of His Excellency. The numbers of young women from Ireland are out of all proportion to the others. A very great proportion are quite unfit for respectable domestic service; and the consequence is, that it is almost impossible to get employment for them. At this time there are nearly 200 young women, almost all Irish, unemployed in the Depôt and on board the ships, and it threatens to be a most serious evil to this Colony. In many of the Quarterly Reports I have called the attention to this great error in the kind of girls selected. The result is, that the prejudice against the Irish women is so great that really good Irish servants cannot now find families to engage them."—*Dr. Duncan, Immigration Agent, Adelaide, to Colonial Secretary, South Australia. 31 March, 1855.*

EXTRACT 2.

"On this subject I refer your Lordship to the Despatch of Mr. Finniss, then administering the Government, who, in transmitting the Immigration Agent's last Quarterly Return, drew attention to the very disproportionate number of single women sent out from Ireland. At that time he stated the number of female immigrants rationed by Government to be 126; at present the number of single Irish women alone is more than 520, and with so little prospect of any diminution that no less than from five to eight, almost exclusively Irish, are every day returning from situations which they had obtained, their employers being unwilling to maintain them any longer."

"In addition to the above there are five immigrant vessels, as per margin, expected to arrive, with, probably, altogether 425 single women on board, of whom, judging from the average arrivals in the current year to this date, viz, 1,025 Irish, out of a total of 1,630 single women, 265 will be Irish also, making a total of Irish single women to be supported at the public expense of 785, supposing the number disposed of during the next three months to equal the number returning from service.

"I cannot but regard this state of things as productive of grave social embarrassment; that embarrassment is increased by the extremely high cost of living at the present moment, which compels many to reduce the number of their domestic servants, but its primary cause is the unsuitableness individually of the immigrants themselves.

"Having visited the Destitute Asylum, the last arrived immigrant vessel in the port, and the German Hospital, in which latter building 203 of the Irish single women are at present lodged, and having questioned and conversed freely with them myself, I cannot but express my very great surprise that two-thirds of those emigrants should have been selected at all. They are designated domestic servants, but appear almost quite ignorant of their duties as such; and, indeed, it would be difficult to know for what they are at present suited, unless it be to work as out-door agricultural laborers, such as hay-makers or reapers, and occasionally as dairymaids, and even as actual tillers of the soil.

* * * * *

"This complete stoppage of such emigration has become necessary, because even if eligible single females were now to be sent here from Ireland, the prejudice just now created against them, in consequence of the class of persons already sent by the Emigration Commissioners is so great, that there would be considerable difficulty in finding them suitable employment."—*Governor Sir R. G. MacDonnell to the Right Honorable Lord John Russell. 27 June, 1855.*

EXTRACT

EXTRACT 3.

" In reference to my Despatch of the 25th ultimo, relative to the excessive immigration of single Irish females, I have now the honor to enclose two copies of the Report of the Immigration Agent at Port Adelaide, for the quarter ended 30th June.

" The Report shews that there are now in the vicinity of Adelaide, either on shore or on board ship, 895 single women still unemployed, unsuitable to the present wants of the Colony, who have been sent here contrary to the warnings given to the Emigration Commissioners, and who are likely for some months to be a source of very great expense to the Colony.

H. H. Browne,
Esq.
22 Dec., 1853.

* * * * *

" If the Emigration Commissioners find any difficulty in carrying out these views, it appears to me that they should be instructed to discontinue, for the present, sending emigrants here, unless they can send those for whose labor there is a demand. It is much better to send only one emigrant ship per month with suitable emigrants, than that a great number should be landed whose presence here, instead of being a guarantee for increased industry and production, becomes a source both of social and financial embarrassment, tending to lay the foundation of permanent pauperism in the Colony."—*Governor Sir R. G. MacDonnell to the Right Honorable Lord John Russell. 13 July, 1855.*

EXTRACT 4.

" In the Report for the quarter ended 31st March, 1854, and in every Quarterly Report since that time, it has been stated that the young women sent here were generally of a class quite unsuited to the wants of the colonists—accustomed to out-door farm work, they are quite unfit for domestic services.

" These statements were made in the hope that the system of sending that class of persons would be discontinued, but the evil, instead of being arrested or diminished, has been greatly increased, till it has assumed an aspect seriously injurious in its probable effects to the social well-being of the Colony.

" At present the number of young women supported expense
" in Adelaide is 519

" The number of young women on board ship at Port Adelaide, unemployed, is,—

" Constantine	116
" Velocity	103
" Sea Park"	157
	895

* * * * *

" There appears, therefore, to be little prospect of finding employment for any large number of these young women till the coming harvest, which promises to be most abundant, shall have increased the demand for farm labor, and at the same time diminished the expense of the necessary articles of food. In the meantime we may expect fresh accessions to their numbers by every ship which arrives."—*Dr. Duncan, Immigration Agent.—Report for Quarter ended 30th June, 1855.*

EXTRACT 5.

" I now enclose a return, giving amongst other details, according to a form prepared by myself, and which is filled up daily, the number of immigrants on the 31st ultimo. The total number of Irish adult female immigrants supported by the Government at that date, either on ship board or on land, appears to have been 1,111, of whom I have ascertained that nearly 1,000 were single women."

* * * * *

" As the last of those reports must have reached the Commissioners at latest some time in last December, and as all the reports since sent to them convey the same information, their persistence in forcing on the Colony, at a vast expense, such a crowd of unsuitable immigrants, seems without a parallel in Colonial history; for, even supposing it beyond their power to have sent a better class of female immigrants, it is not apparent why they need have sent them in such numbers, if at all. Nevertheless, they actually sent in the first quarter of the current year 514—a number as great, within six, as the total number sent in the whole previous year; and though the remonstrances of the Immigration Agent have been renewed every quarter, they sent in the following quarter more than 1,000 single women, and have since been keeping up a constantly increasing supply."

* * * * *

" That part of the first condition requiring that they should be fitted to supply the wants of the Colonists as domestic servants, has been unfulfilled. Perhaps it would have been difficult to have sent from workhouses females possessing all the required qualifications. This, however, cannot be asserted of the other two conditions laid down by the Legislature, the fulfilment of which rested entirely with the Commissioners, namely, that a limited number only should be sent out in each vessel, and that the regulation should apply to all parts of the United Kingdom; and that no encouragement should be given to the emigration from Ireland which was not also afforded to the natives of England and Scotland."

" So little regard has been paid to the last two conditions, that, as already observed, in the first eight months of this year, 2,047 Irish out of a total of 2,800 adult single females have been landed on these shores, being nearly treble the number of English and Scotch together, whilst more than 200—I believe even more than 220—have been land from

"from one vessel; thus precluding the possibility of getting the cargo of one vessel absorbed in the general population before the arrival of another."

* * * * *

"It must be remembered, that the expenses and trouble above detailed, arise only from one portion of the recent Immigration to this Colony. Unusual expense has also attended the settlement of the male immigrants. Of those the English were in the aggregate more numerous than all the rest, yet both they and the Scotch have almost all found employment, whilst large numbers of the Irish laborers were long, and still are thrown on the Government for assistance."

* * * * *

"In conclusion, I presume I need scarcely impress on Your Lordship the necessity of issuing such instructions as may entirely stop all further immigration, for the present; to this Country of unprotected Irish single females. I would also suggest, that as the other Irish Immigrants will not, in all probability, be absorbed for a long time, it would be advisable to send none but English and Scotch immigrants till a more favorable opening be presented of settling some additional Irish. If any of the latter are sent they should be single men, to counterbalance the great number of single Irish females."—*Governor Sir R. G. MacDonnell to Right Honorable Lord John Russell. 24th September, 1855.*

EXTRACT 6.

"Serious loss has already been occasioned by Immigration referred to, as explained in my previous Despatches on the subject, and there is little probability that the Irish Female Immigrants now here will soon find employment. Therefore, if the Commissioners cannot procure more suitable emigrants, it is much better that they should send none than those whose presence here is so far from adding to the prosperity of the Colony, that it is actually creating a large amount of destitution, which is more and more assuming a permanent character."—*Governor Sir R. G. MacDonnell to Right Honorable Sir W. Molesworth, Bart. 26th October, 1855.*

EXTRACT 7.

"A large proportion of the Immigrants, especially the single women, seem to me to have been selected without any reference to the class of people who are most in demand.

"Were the young women of a proper class, even though numbers might temporarily be in excess of the demand, yet some hope might be entertained of their gradual absorption into the mass of the population, but I see no such prospect for the majority now unemployed.

"Any one accustomed to visit the rural districts of either Scotland or Ireland must know well that females there are employed in out-door farm work in a way not customary in England. The female peasantry of both these countries think it no degradation either to make hay or reap the corn fields, to milk cows or manage the details of the farm-yard.

"It is to that sort of work that a great many of the young women now unemployed have been accustomed; and it is my sincere conviction that till work of that kind is provided for them, they must be maintained in idleness. Let me not be misunderstood. I do not think they should be asked either to dig or to plough, or to do ought to which their strength is unequal; but out-door farm work has been their usual occupation at home; it is the most healthful employment in which they could be engaged, and for nothing else are they in the slightest degree fitted."—*Dr. Duncan, Immigration Agent, Adelaide.—Report for Quarter ended 30 September, 1855.*

Arthur Savage, Esq., R.N.,
George Allen, Esq.,
W. H. Christie, Esq.

Report of the Orphan Immigration Committee respecting the Female Orphans who arrived in the "Earl Grey."

"In his letter dated the 7th October last, Dr. Douglass, the Surgeon Superintendent of the 'Earl Grey,' reports to the Colonial Secretary, for the information of the Governor, that in the selection of the orphans sent out in that ship gross imposition had been practised upon the Land and Emigration Commissioners; that instead of girls educated in the orphan schools in Ireland, (as the Secretary of the Emigration Board in London had led him to expect,) the females placed under his charge had been early abandoned to the unrestricted gratification of their desires, and left as erroneous an idea of the value of truth as of the necessity of personal restraint," that there are "not wanting among them those who boast of the prolific issue of their vices, that expatriation has been held out to them as the reward of the workhouse, and that the professed public woman and barefooted little country beggar have been alike sought after as fit persons to pass through the purification of the workhouse ere they were sent as a valuable addition to the colonists of New South Wales." Dr. Douglass further submits, as a matter claiming inquiry by the Colonial authorities, "the nature of the material afforded to him for the surveillance" of the females under his superintendence.

By

By the Minute of His Excellency the Governor upon this letter of Dr. Douglass, the Committee are requested "to enter into an investigation of the circumstances brought under notice, and to furnish such a report of the result as may be deemed necessary for the information of Her Majesty's Government and the Colonization Commissioners, with a view, if the complaints prove to be well founded, to prevent the absorption of the Immigration Funds of the Colony in the introduction of females of such an ineligible description."

In pursuance of this request, the Committee examined the undermentioned witnesses, to the minutes of whose evidence they beg to refer, viz. :—

Henry Grattan Douglass, Esq., Surgeon Superintendent.

Mrs. Maria Cooper, Matron.

Mr. Alexander Robertson, Master of the "Earl Grey."

Before stating the conclusions to which they have been led by the evidence taken before them, and by the personal observation which they have since had opportunities of making, the Committee think it necessary to premise, that although Dr. Douglass may have cause to complain, if led to expect that the females whom he was appointed to superintend would be taken exclusively from the Orphan Schools in Ireland, yet that the colonists have no just grounds of complaint at their selection from the workhouses, provided that they were carefully chosen, inasmuch as it is expressly stated in Earl Grey's Despatch on the subject that they would be taken from those institutions.

The Committee were glad to learn from the evidence of Dr. Douglass, that, so far from including in his condemnation all the orphans by the "Earl Grey," he was able to speak in satisfactory terms of more than two-thirds of their number; and that the language used in his letter was intended to apply to about 56 females only, who obtained an opprobrious distinction from the remainder of the emigrants under the title of the "Belfast Girls"

That imposition has been practised upon the Commissioners, and that great injustice has been done to the Colony in the selection of these 56 females, appears to the Committee to be proved beyond doubt by the strong concurrent testimony of Dr. Douglass, Mrs. Cooper, and Mr. Robertson. From the representations of all three witnesses alike, it is clear that, so far from the females in question having been persons "whose education and moral," and religious training, "had been such as to afford a reasonable guarantee that they would become active and useful members of society" here, their violent and disorderly conduct on the voyage, their habits of pilfering, and their grossly profane and obscene language, were such as to admit of no other conclusion than that they had mixed with the lowest grade of society, and that many of them had been common prostitutes. Nor do the Committee see any reason to doubt the statements made to them,—that many of these females were not orphans who had been inmates of the workhouses for any length of time "receiving such education as is there given," but that they had merely been passed through those institutions for the purpose of qualifying them for free passages to this Colony under the Commissioners' notice. That (to use the expression of one of the witnesses) "they had been swept from the streets into the workhouses, with a view to their being thence swept out to New South Wales."

* Commissioners' Circular, Par. 10.

The Committee have now to direct the attention of His Excellency the Governor to two further matters which have been brought under their notice by Dr. Douglass. 1st—Of the so-called orphans, Dr. Douglas represents that two were married women who had run away from their husbands, and that a third had either been married in Ireland, or had lived with a man without marriage. 2nd—Dr. Douglas states that two females at least emigrated under assumed names. The statements made by the females themselves to the Immigration Board are as follows :—

(1.) "Mary Wood states that she came out under the name of Anne Hartley. She was sent by Mr. Senior from the Dungannon Workhouse in the place of Anne Jane Hartley, who died. Mr. Senior told her that the name of Anne Hartley was in the book, and that she must go under that name."

(2.) "Isabella Davidson states that she came out under the name of Charlotte Willis. She was told by Mr. Rae to assume the name of Willis."

It is obvious that no securities which may be taken by the Commissioners for the selection of properly qualified emigrants will be of any value, if the individuals approved of by them be personated by others respecting whom they have made no inquiry.

The Committee have alone noticed the injustice done to the Colony in the selection of the females whose characters and conduct have been so strongly, and, in the Committee's opinion, so justly stigmatized by the persons placed in authority over them; but they feel that they should not fully discharge their duty if they did not also point out the grievous injustice which has been done to those who were really such orphans as the Commissioners intended to send, in associating them with a number of women whose conduct and conversation were so openly indecent and disorderly as to induce both the Surgeon Superintendent and the Matron to declare, that had they previously known what they were, they would not, out of consideration for their own daughters, have embarked in the vessel.

Considering that the landing of the "Belfast Girls" in Sydney would assuredly lead to their final ruin, and being also impressed with the importance of separating them from the remainder of the orphans, the Committee acceded to the proposal of Dr. Douglass, that they should be at once forwarded into the country. Forty-seven of them, who were named by Dr. Douglass for the purpose, were accordingly dispatched by the Agent for Immigration to the interior, under the charge of persons connected with the Immigration Department, who were instructed to consign them to the care of the Police Magistrates of the districts to which they were forwarded, and to explain the circumstances under which they were sent. The Committee have learned with pleasure, that in consequence of the great demand for servants in those districts, these females, with the exception of one, who has given much trouble to the Police Magistrate, have all obtained situations at high rates of wages; and it may be hoped that the honest and very remunerative employment which they have so

readily found, may be the means of reclaiming them from their former habits, and may lead to their being comfortably and respectably settled.

Of the remainder of the orphans who were received into the Institution in Hyde Park Barracks, the Committee are able to make a very favorable report. Their orderly, obedient, and industrious conduct, has earned for them the commendation of all persons connected with the establishment, and of the clergymen who daily visited them there. Many of them, to the personal knowledge of the Committee, have given great satisfaction to the employers in whose service they have been placed; and the few complaints which have been made have rather had reference to their ignorance of household work than to any impropriety of conduct or want of industry.

The orphans were kept in the Institution for one week after their landing, in order that they might receive religious instruction and advice from the clergymen of their respective churches, and that the Committee might have opportunities of forming by personal observation an opinion of their characters, habits, and qualifications. As soon as they were open to engagement they were all rapidly hired, most of them by persons resident in Sydney or its immediate neighbourhood, and their number was not nearly sufficient to enable the Committee to satisfy the applications which had been approved by them.

The general rules upon which the Committee acted in placing the females in service, will be seen from the following extracts from the Minutes of the Proceedings.

Extract from Minute of 21st October, No. 48-3.

“ The Chairman announces that the orphans were this morning landed from the ‘ Earl Grey,’ and lodged in the Institution. The Committee then visit that portion of the building in which the orphans are lodged, in company with Dr. Douglass, the Surgeon Superintendent of the vessel, and personally inspect the orphans, with whose appearance and manner they express their satisfaction.

“ Having returned to the Committee Room, the Committee proceed to consider the terms on which the orphans shall be hired, and decide as follows:—

“ (1.) That all female orphans under *seventeen years of age* shall be apprenticed, and that the term of apprenticeship shall in each case cease on the orphan attaining the age of *eighteen years*.

“ (2.) That the wages due to female orphans so apprenticed shall be paid to themselves in money by quarterly instalments, and that the yearly rate thereof shall in no case exceed *ten pounds*. The Committee are desirous to adopt some arrangement which would secure the deposit of a certain portion of the apprentices’ yearly wages in the Savings Bank; but they fear it would be impracticable to carry out a general regulation to that effect, and they therefore, for the present, refrain from adopting it.”

Extract from Minute 30th October, No. 48-5.

“ It is resolved by the Committee that the wages to be paid to orphan females arrived per ‘ Earl Grey,’ and hired under ordinary agreements, shall be payable in cash, monthly, at the rate of ten pounds per annum.

“ That such of the orphans from the ‘ Earl Grey’ as may be placed in service under Indentures of Apprenticeship, the rates shall vary as follows, viz. :—

“ For those of 14 and under 15 years.....	£7	0	0
“ For those of 15 and under 16 years.....	8	0	0
“ For those of 16 and under 17 years.....	9	0	0

“ In reference to Dr. Douglass’ suggestion, that inquiry should be made respecting the material afforded for the surveillance of the females under his superintendence, it is the duty of the Committee to report that Ellen Corsan, who was appointed to act as Assistant Matron, was removed from duty, in consequence of her utter inefficiency, and that she appeared to the Committee to be almost imbecile. As respects the Matron, Mrs. Cooper, the Committee have to observe, that although it would have been better had she possessed, in addition to her other qualifications, the energy of character which is requisite for the effective control of such persons as were placed under her charge, yet that her strict propriety of conduct and demeanour must have had considerable effect in the preservation of good order, and supported as she was by so active and experienced a Surgeon Superintendent as Dr. Douglass.

“ To Dr. Douglass the Committee consider that very great praise is due for the efficient discipline which he maintained on the passage, as evidenced by the orderly and respectful conduct of the females after their landing, no less than by the direct testimony which has been borne to it; and certainly Dr. Douglass has reason to be satisfied with the success which has attended his exertions, if the belief which he entertains, in common with Mrs. Cooper and Mr. Robertson, be well founded, that ‘ no act of criminality’ occurred on the passage, notwithstanding the depraved character of so large a proportion of females under his care.

“ The Committee adjourned *sine die*.

(Signed)

“ FRANCIS L. S. MEREWETHER.”

APPENDIX B.

Committee Room,
Tuesday, 13 February, 1849.

PRESENT:—

F. L. S. Merewether, Esq., Chairman.

H. H. Browne, Esq., J.P.,
Arthur Savage, Esq., R.N.,
George Allen, Esq., M.C.,

Rev. R. Allwood, B.A.,
Rev. John MacGarvie, D.D.,
Rev. John MacEneroe.

Par. 1. "The Committee having met pursuant to notice, the minutes of the two last meetings are read and confirmed."

Par. 2. "It is resolved, that all parties whether masters or servants who may prefer complaints to the Committee respecting the conduct of the one to the other, shall be referred to the Magistrates sitting in Petty Sessions, at the Water Police Office, where Messrs. Innes and Browne undertake to attend every Friday at 11 o'clock, A.M., for the purpose of forming a court for the adjudication of such cases."

Par. 3. "That all orphan females under the control of this Committee, whose indentures may be cancelled by the Magistrates in consequence of misconduct on their part, shall be re-admitted into the institution; but shall be thence forwarded into the country, as opportunities offer, instead of being again placed in service in Sydney."

APPENDIX C.

The Chairman of the Orphan Immigration Committee to the Colonial Secretary, transmitting Report respecting the proposed Emigration of Orphans from the Workhouses in England.

Orphan Committee Room,
Hyde Park Barracks,
Sydney, 26 April, 1849.

Sir,

With reference to your letter of the 9th January last, transmitting a Despatch from the Right Honorable the Secretary of State respecting a proposed emigration to this Colony of female orphans from the workhouses in England, I do myself the honor to forward herewith Extracts from the Minutes of the Committee's proceedings, which contain their Report on the matters submitted to their consideration.

I return at the same time the Report of the Melbourne Committee, which was forwarded to me for the information of this Committee here.

I have, &c.,

FRANCIS L. S. MEREWETHER,
Chairman of the Orphan Immigration Committee.

P.S.—I return herewith the original enclosures to Earl Grey's Despatch, as requested.

Minutes of Proceedings of the Orphan Immigration Committee with reference to a letter from the Colonial Secretary, transmitting a Despatch from the Right Honorable the Secretary of State respecting the proposed extension to England of the plan which has already been in operation in Ireland, of conveying Female Orphans from the Workhouses as emigrants to Australia.

Extract from Minutes of Proceedings on the 13th February, 1849.

"The Chairman lays before the Committee a letter from the Colonial Secretary, transmitting a Despatch from the Right Honorable the Secretary of State respecting a proposed emigration of female orphans from English workhouses, and requesting the report of the Committee respecting the prospect which there may be of placing any girls of the description mentioned by the Commissioners who may arrive in this part of the Colony in eligible situations, and also of any preliminary measures which it may be necessary to adopt for that purpose beyond those already taken in respect to Irish orphans. This paper is laid aside for further consideration at the next meeting."

Extract from Minutes of Proceedings on the 23rd February, confirmed on 17th April, 1849.

"The Committee resume the consideration of the letter from the Colonial Secretary, which was laid before them by the Chairman on the 13th instant, with the accompanying Despatch and enclosures from the Right Honorable the Secretary of State.

"The Committee are of opinion that female orphans from the English workhouses of the description specified in the Report from the Colonial Land and Emigration Commissioners, which is enclosed in Earl Grey's Despatch, will be acceptable to employers in the Colony, and that in the Sydney District suitable situations could readily be obtained for 800 of them during the ensuing year, in addition to the equal number of Irish orphans who, according to the rate of their immigration during the past six months, may be expected during the same period.

"In answer to the second question submitted in the Colonial Secretary's letter, the Committee have to report that, for the reception of the proposed orphans from England, no preliminary arrangements appear to be required beyond those which have been already made in reference to the Irish orphans.

"The Committee, however, avail themselves of this opportunity to remark, that the guardianship of the female orphans, both before and after their being placed in service, will

" will entail upon the Colony a considerable expense to which it is not subject in respect to the ordinary female immigrants, who are either of mature age or are accompanied by their natural protectors. The Committee, therefore, trust that the Colonial Land and Emigration Commissioners may be able to establish a general rule, that if the Parochial Authorities in any part of the United Kingdom desire to avail themselves of the assistance of the Land Fund of this Colony, for the removal hither of the orphan inmates of their workhouses, they must all alike contribute the proportion of the passage money which the Unions referred to in the enclosures to Earl Grey's Despatch are prepared to give."

Colonial Land and Emigration Commissioners to Mr. Merivale, 27 June, 1848. Paper on Emigration to Australian Colonies, dated August, 1848, p. 111.

" The more advanced age of those orphans who have been accepted by the Colonial Land and Emigration Commissioners without any contribution towards their passage money from parochial funds does not appear to the Committee to be a sufficient compensation for the loss of such contribution, more especially as the principal, and almost the only fault, which has been found with those orphans collectively, both at Melbourne and here, has been a want of that 'training to domestic service' which the Commissioners supposed them to have received. Indeed, seeing that both the older and the younger females have alike to learn the business which they are wanted to perform, the Committee consider the latter to be preferable, supposing them to be not under the age of 14 years."

" In reference to the doubt expressed by the Colonial Land and Emigration Commissioners as to the power of the Governor, under the local law, to apprentice children not sent out entirely at the expense of Her Majesty's Government, the Committee beg to point out that they do not apprentice the orphans consigned to their care under the provisions of the Act referred to by the Commissioners, but under those of the more recent Act of 8 Victoria, No. 2, which authorizes any one or more of the persons having the inspection or control of any institution in the Colony in which eleemosynary support is given to apprentice any young person having no parent or guardian who may be in the receipt of such eleemosynary support. The orphans can therefore be legally apprenticed by the Committee, without any such enactment as is suggested by the Commissioners; but there appear still to be some imperfections in the present law which the Committee will probably have occasion to bring under His Excellency's notice at an early date, and of which the principal is the want of any suitable punishment for female apprentices who may be guilty of misbehaviour."

" FRANCIS L. S. MEREWETHER,
" Chairman of the Committee."

APPENDIX D.

Committee Room,
Saturday, 8th December, 1848.

PRESENT:—

Francis Lewis Shaw Merewether, Esq., Chairman.

W. H. Christie, Esq.,

The Revd. Robert Allwood, B.A.,

Edward Denny Day, Esq., P.M.,

Arthur Savage, Esq., R.N.

Par. 8. " The Committee concur with the Melbourne Board in the opinion that the ordinary female immigrants are much more serviceable than the orphans, and that if the cost to it be the same the Colony suffers by the introduction of the latter instead of the former. The Committee, however, hope that their suggestion, that no orphan should be accepted without contribution from the Parochial Authorities, will have been acted upon."

* * * * *

Par. 10. " With reference to the question as to how orphans returned to the Committee's charge should (on the cancellation of their indentures for misconduct) henceforth be disposed of, the Committee resolve that it will not be expedient to continue the practice of sending them to the country districts as heretofore, because it is found that they have not generally amended their conduct, and that their behaviour has tended to bring the whole class into disrepute, and to create a prejudice against them."

APPENDIX E.

The Superintendent of Port Phillip to the Colonial Secretary, with reference to Orphan Immigration, (with one enclosure.)

No. 49-125.

Superintendent's Office,
Melbourne, 8 November, 1849.

Sir,

Referring to my letter to you of this date, No. 49-126, reporting upon the Orphan Immigrants arrived in the "New Liverpool," I beg leave to transmit to you, for the information of His Excellency the Governor, copy of a further communication which has been addressed to me by the Orphan Immigration Committee and Board of Guardians, drawing my attention to the recommendation of the Board, in a previous letter, that the English Orphan Immigration be carried on concurrently with that from Ireland; but to the extent only of 200 girls in four months, including Irish as well as English; and with further reference to their letter to me of the 6th August, now taking occasion to point out certain facts bearing on the question of the Orphan Immigration now set on foot which induces the Board to recommend its temporary suspension.

As

As I concur in the view taken by the Board of the expediency of such a temporary suspension of Orphan Immigration to this district, for the reasons adduced, I would request you to move His Excellency to bring the subject, at his earliest convenience, under the attention of the Home Authorities.

The Honorable
The Colonial Secretary,
Sydney.

I have, &c.,
C. J. LA TROBE.

Melbourne, 26th October, 1849.

Sir,

Referring to the letter addressed to your Honor by the Orphan Immigration Committee and Board of Guardians, dated 19th January last, No. 4, upon the subject of English Orphan Immigration, wherein they recommended that the English Orphan Immigration be carried on concurrently with that from Ireland, but to the extent only of 200 girls in four months, including Irish as well as English, and further stated, "that as fluctuations might occur in the demand for this description of immigration, they would consider it their duty to report from time to time, as experience might dictate, their opinion as to the propriety of increasing or diminishing the number then recommended," and referring also to their Report of the 6th August last, No. 14, in which they state that the subject was under their consideration, and that they would report thereon to your Honor the following facts, as bearing upon the subject of Orphan Immigration both from England and Ireland.

- (1.) That the demand for the orphans has sensibly diminished.
- (2.) That the orphans by each succeeding ship have been disposed of to parties of a lower rank, and less desirable class than those preceding.
- (3.) That there is shewn by the public a decided preference for other Bounty Immigrants, on account of the inexperience and incapacity for household work of the orphan girls.
- (4.) That the cost of these latter to the Colony is even greater, by the recent regulations of the Commissioners, than that of the former.

2. Under these circumstances the Board cannot but look forward with some degree of anxiety to the responsibility of disposing of those orphan girls who may be at present on their passage, and of those who will have been embarked before any communication can be made to the Government at Home; and they would venture to suggest that it would be expedient to suspend this branch of Emigration to the Port Phillip District until the Board may feel themselves justified by further experience in recommending its renewal.

His Honor
The Superintendent,
Melbourne.

We have, &c.,

C. MELBOURNE,
Chairman.

APPENDIX F.

Committee Room,
Monday, 18th March, 1850.

PRESENT:—

Francis L. S. Merewether, Esq., Chairman.

George Allen, Esq., M.C.,
Alfred Cheeke, Esq.,
Charles Nicholson, Esq., M.C.,
The Rev. Robert Allwood, B.A.,

Edward D. Day, Esq., J.P.,
Arthur Savage, Esq., R.N.,
The Very Rev. H. G. Gregory, D.D.,
G. P. F. Gregory, Esq.

Par. 2. "The Committee proceed to consider the question for the decision of which this meeting is specially called, viz., the expediency of discontinuing Orphan Female Immigration for a time, and they record their opinion as follows:—

Par. 3. "That a strong recommendation should be made to the Government that the emigration of Female Orphans from the Workhouses in Ireland should for the present be discontinued."

Par. 4. "The Chairman then brings under the consideration of the Committee the desirableness of providing, if possible, some employment for the orphans, and especially those returned to the Institution, as their number is likely now to be so large, and the period of their remaining in the Institution so long, that the ordinary housework and their own needlework will not be sufficient to occupy their time. It may also be found possible to obtain for them work which will wholly or in part repay to the Government the expense of their maintenance."

Par. 5. "The Committee resolve that the Chairman should be authorized to employ the females on such suitable employment as can be found for them; and, if the experiment be successful, it may perhaps hereafter be expedient, for the encouragement of industry, to establish a rule, allowing to any female who may do more work than would yield a sum sufficient to pay for her support the difference between the cost of her maintenance and the price of her work."

* * * * *

Par. 6. "The Chairman lays before the Committee a letter from the Bench of Magistrates at Berrima, requesting general information as to the course to be pursued by them with respect to those orphans whose indentures may be cancelled, and as to whether

the expense of their removal to the nearest depôt should be defrayed by the Government or the employers. The Committee consider that it is clear that females whose indentures are cancelled must be taken care of by the Government, under whose guardianship they are placed; but, at the same time, it seems to them unreasonable that the public fund should be charged with the cost of removing them to distant depôts. On the other hand, it appears to them to be unfair, in many instances, to require the employer to pay for apprentices' removal to the depôt, even were there legal power to do so; and the Committee must, therefore, leave it to the discretion of the Magistrates to do the best they can to save the expense to the Government, either by placing the females in other services in the district, or by requiring, if possible, the master or the apprentice (if any wages be due to her) to pay the expense, accordingly as the one or the other may be in fault."

APPENDIX G.

The Agent for Immigration to the Colonial Secretary, forwarding Minute of the Orphan Immigration Committee, recommending the discontinuance of Female Orphan Immigration.

No. 50-130.

*Immigration Office,
Sydney, 27 April, 1850.*

Sir,

In duplicate.

I do myself the honor to request that you will have the goodness to lay before His Excellency the Governor the enclosed Minute of the Orphan Immigration Committee, containing a resolution that a strong recommendation should be made to the Government that the emigration to this Colony of female orphans from the workhouses in Ireland should for the present be discontinued.

2. At the Meeting at which this resolution was unanimously adopted the following Members were present—

Francis Lewis Shaw Merewether, Esq., Chairman.

George Allen, Esq., M.C.,

Alfred Cheeke, Esq.,

Charles Nicholson, Esq., M.C.,

The Revd. Robert Allwood,

Edward D. Day, Esq., J.P.,

Arthur Savage, Esq., R.N.,

The Very Revd. H. G. Gregory,

G. P. F. Gregory, Esq.

3. It is known to me that the three absent members would have concurred in the resolution, had they been able to attend.

I have, &c.,

FRANCIS L. S. MEREWETHER,

Minute of the Orphan Immigration Committee recommending the discontinuance for the present of the Emigration of Female Orphans from the Workhouses in Ireland, dated 18th March, 1850.

"On the 8th of December last, the Committee recorded their opinion that, although the female orphans from Ireland were, in consequence of their ignorance of the duties of domestic servants, less acceptable to employers generally than the ordinary female immigrants, there was still an opening for a limited number of them. The Committee at the same time, with reference to a Minute made in February, 1849, in which they stated that 800 English and 800 Irish orphans, would readily find employment in the then ensuing year, recorded their opinion that the total number of orphans to be sent in the year 1850 should be limited to 800.

"At that date 328 Irish orphans had just been landed from the ship "William and Mary" and "Lismoyne." 351 have since arrived in the ships "Panama" and "Thomas Arbuthnot," and 290 more are daily expected by the "John Knox," which will make a total of 969 within the short period of four months. Of those who have already arrived situations have still to be provided for about 200.

"Under these circumstances, the Committee unanimously resolve that a strong recommendation should be made to the Government that the emigration of female orphans from the workhouses in Ireland should for the present be discontinued."

FRANCIS L. S. MEREWETHER,

Chairman of the Committee.

APPENDIX H.

No. 1.

The Superintendent of Port Phillip to the Colonial Secretary, respecting Orphan Immigration to Port Phillip (with three Enclosures.)

*Superintendent's Office,
Melbourne, 21st May, 1850.*

Sir,

21st May, 1850.

I have to request that you will do me the honor to lay before His Excellency the Governor the enclosed copy of a communication which I have received from the Orphan Board of this district, in which the Board refer to their former report on Female Orphan Immigration, dated the 26th October, 1849, a copy of which was forwarded for His Excellency's perusal in my letter of the 8th November, 1849, 49-125,—and bringing before me the views which they are now disposed, after further experience, to entertain upon this important subject.

2.

2. His Excellency will perceive that the Board has arrived at the conclusion, that the system, to be renewed with advantage and satisfaction to the Colony, requires material modifications in several important respects, which are brought under consideration under the following heads :—

- 1st The cost of this species of immigration.
- 2nd. The age and description of the immigrant.
- 3rd. The locality from whence sent.
- 4th. The number to be sent.

3. Without adverting particularly to each observation offered by the Board, I must be allowed to state, that in the main I am fully inclined to admit the propriety of the view now taken of the question; and also inclined to consider, that if a continuance of this class of immigration is *still to be looked for, it ought, out of justice to the Colony, to be carried on under very considerable modifications.*

4. The advantages anticipated to the Colony from the Immigration, under the management of Government, of female orphans from Ireland, are shewn by the earlier communications received from the Right Honorable the Secretary of State to have been the following :—

28th Feb., 1849.

- (1st) A quicker supply of eligible emigration than would otherwise be practicable.
- (2nd.) That by thus sending out a proportion of unmarried females, a proportionate number of good and useful laborers might be sent, who, being unmarried, would otherwise be ineligible, insomuch as the greatest difficulty was always experienced in securing the emigration of a proportionate number of eligible unmarried females.
- (3rd) That the Colony would, in the case of these orphan immigrants, be relieved from meeting the casual expenses attending the outfits, superintendence, and instruction, it being proposed that these should be defrayed from the funds of the Mother Country.

5. On these several points I would now take leave to observe.

1st. I see no sufficient reason to decry or undervalue the introduction of this class of immigration as far as it has been properly carried out.

The Colony undoubtedly, particularly by the first accessions received to its population through this channel, secured a seasonable supply of most useful labor. Latterly, however, it must be remarked, that notwithstanding the strength of the argument that might be advanced in favor of any arrangement which might tend to add to the female population of the Colony, *the age and character of the orphans forwarded to Port Phillip have scarcely sustained the expectations that were originally held out and entertained with regard to them, either by the Home or Colonial Government; and I am not surprised that, from this and other causes, a degree of unforeseen difficulty has been experienced by the Board in seeking to perform the duty imposed upon it on the one hand, and, on the other, that great dissatisfaction has been expressed on the part of a portion of the public.*

2nd. The fact that, according to the original stipulation, a certain portion of the expense of the conveyance of these female orphans, viz., *the casual expenditure, is borne by the Home Government, seems to be pretty generally overlooked.*

But, after investigating the point, as far as I have means of doing, I must admit that, even taking this fact into consideration, the real amount of expenditure incurred by the Colony *in assisting in carrying out the scheme, is fully as great, if not greater, than that incurred in the case of a similar number of ordinary immigrants.*

It is impossible to give in figures the relative cost of ordinary and orphan immigration, as it depends very much upon certain contingencies; but I enclose a memorandum, furnished by the Acting Immigration Agent, shewing the average cost per head of each class for conveyance per ship. This average, even, will also vary according to the amount contributed by the ordinary immigrants towards their passages. In addition, it must be remarked that the cost of the orphans in the depôt, erected and maintained for their special convenience at no inconsiderable outlay, and of their conveyance to distant parts of the district, and other expenditure not usually incurred in the case of the ordinary immigrants, will add considerably to the expense.

3rd I am further constrained to admit, from a review of the Immigration Returns, from the time when the orphan immigration was first set on foot to the present date, that, whatever may be the cause, the further advantage anticipated to the Colony of obtaining by the introduction of these female orphans a proportionate supply of useful male labor, has not been realized.

This will be clearly seen from the annexed statement, shewing the number of single men and single women sent to this district since the date of the dispatch of the first orphan ship from England in 1848.

It will be observed, that the total number of unmarried men sent to the Port Phillip district between the month of September, 1848, when the female orphan emigration commenced, and the close of the year 1849, was only in excess of the number of unmarried female immigrants, exclusive of the female orphans, by two hundred and forty-three, leaving the introduction of upwards of one thousand female orphans of the number sent hither during the same period uncompensated for in the manner clearly proposed and stipulated at the first introduction of the system.

Such being the facts, I conceive that it is incumbent upon His Excellency to bring the subject under the early notice of Her Majesty's Government, with a view to the revision of the whole arrangement, and the adoption, in the event of the continued introduction of orphans of this description into the Colony, of such changes in the system as may be justly shewn to be expedient and called for.

I have, &c.,
C. J. LA TROBE.

The Honorable
The Colonial Secretary,
Sydney.

No. 2.

No. 2.

Enclosure in the Superintendent's letter to the Colonial Secretary, dated 21st May, 1850,
No. 50-72.

Melbourne, 8 May, 1850.

Sir,

With reference to our report to your Honor, dated the 26th day of October, 1849, on the subject of Female Orphan Immigration from Ireland to this district, at the conclusion of which report we had the honor to state that "the Board would venture to suggest that it would be expedient to suspend this branch of immigration to the Port Phillip District until the Board may feel themselves justified by further experience in recommending its renewal."

"William Stewart,"
"Mahomed Shah,"
"Lady Kennaway,"
"Pamberton,"
"New Liverpool,"
"Diadem,"
"Derwent," and
"Eliza Carolina."

In now resuming the subject we have the honor to report that, after having disposed of nearly one thousand one hundred and forty of the Orphan Immigrants from Ireland who arrived by the ships mentioned in the margin, we are led to the conclusion that the system, to be renewed with advantage and satisfaction to the Colony, requires material modifications in several important respects, which we propose to consider briefly under the following heads:—

- 1st.—The cost of this species of Immigration.
- 2nd.—The age and description of the Immigrant.
- 3rd.—The locality from whence sent.
- 4th.—The number to be sent.

First.—As to cost.

It is hardly necessary to advert to the circumstance that Orphan, as compared with adult Immigration, implies by its name a species of immigration which, if its cost were equal, would be obviously to the disadvantage of the Colony defraying the charge.

This Board is informed, and believes it is known to your Honor, that the cost to the Colony of the importation of a female orphan immigrant is greater than that of an adult immigrant of the mixed classes.

It is evidently unreasonable that the Colony should pay for inferior labor a higher rate than it does for superior.

It is also to be observed that the expense to the Colony of the orphan, after arrival, is greater than that of an adult immigrant, from the circumstance that the orphan is received immediately on arrival into the Immigration Depot, and there provided for, for an indefinite period, determined only by her hiring; whereas the adult immigrants are open to engagement on board the ship, where, being entitled to remain at the expense of the charterer for fourteen days, they are usually hired. Comparatively few of this class require to come into the Immigration Barracks.

We would beg on this head to express a most decided opinion, that the cost charged on the Colonial Land Fund, under the authority of the Colonial Land and Emigration Commissioners for Orphan Immigration, should not, under any circumstances, exceed one-half of the whole charge, and that, if Orphan Immigration cannot be obtained under such circumstances, it is not desirable that it should be renewed.

Second.—The age and description of the immigrant.

The Board is of opinion that, in regard to age, in no case should these immigrants be under 17 years at the time of embarkation.

The Board would here remark that the age of many of these children as stated in the ship's indent is, from their appearance and their own admission, evidently erroneous.

By the accompanying table your Honor will observe that the elder orphans are much more easily disposed of than the younger ones; a circumstance arising, doubtless, in the desire of the employers to obtain useful servants, as well as to avoid the responsibility attached to the employment of the younger ones, whom we do not allow to engage in service unless under indentures of apprenticeship for at least twelve months; and we regret to say that many children of this class, under 15 years of age, arrive by every ship. The Board cannot contemplate, without anxiety, the placing of these children in such employments as usually offer.

In fact, had the Board strictly adhered to the instructions as to the disposal of the orphans generally, they feel assured that a great number must have still remained in depot, the class of employers being evidently in very many instances such as were not contemplated by the Home Government.

In regard to description, the Board would remark that it will appear by the indents that out of one thousand two hundred and ninety-six orphans who have arrived, there are four hundred who have never been in service, being nearly one-third of the whole; while of those who have been in service, or are so entered, more than one-third are described in the Returns as "Nursemaids," which the Board believes to mean no more than that they are the elder children of their respective families.

Third.—The locality from whence sent.

The Board, in their letter to your Honor of the 19th of January, 1849, recommend that "English Orphan Immigration" should be carried on concurrently with that from Ireland, and the Board remain of that opinion; but if the orphans cannot be obtained from England of the age suggested, and are sent exclusively from Ireland, as hitherto, the Board would then recommend that their number be taken into consideration by Her Majesty's Land and Emigration Commissioners in arranging the proportions of the entire emigration to this district from England and Ireland.

Fourth.—The number to be sent.

If the foregoing arrangements are adopted, the Board would recommend that 200 orphans be dispatched to this district every four months.

This

This recommendation is made without any reference to the reported emigration of needlewomen from London, which, if carried on to any great extent, would, of course, have a considerable influence on the demand for orphans, and would render it extremely difficult to dispose of even the numbers to which we propose to limit this immigration.

We do not feel it necessary to take into consideration in our calculation the arrival of any unusual number of other single female immigrants, as the Commissioners of Land and Emigration would, we conceive, have regard to this circumstance, if it should arise, and its probable operation on the demand for female orphan immigrants in the Colony.

In conclusion, the Board beg leave to state, that after a most careful consideration of this important subject, the Board do not venture to recommend the continuance of this description of Female Orphan Immigration to the Port Phillip District, unless the principles embodied in the foregoing modifications are adopted and acted on by Her Majesty's Land and Emigration Commissioners.

His Honor
The Superintendent
of Port Phillip.

We have, &c.,
(For the Board),
WM. LONSDALE,
Chairman.

NOTE.—577 Orphans arrived in Depôt during the first four months of 1850.

APPENDIX I.

The Agent for Immigration to the Colonial Secretary, reporting on letter from the Superintendent of Port Phillip respecting the expediency of continuing Irish Female Orphan Emigration at the entire expense of the Colony.

*Immigration Office,
Sydney, 14 June, 1851.*

Sir,

21 May, 1850.

28 April, 1849.

I do myself the honor to return herewith a letter from His Honor the Superintendent of Port Phillip, with an enclosed communication from the Orphan Immigration Committee at Melbourne, on which I deferred my report in the expectation that an answer might have been received to the Despatch of His Excellency the Governor in which was transmitted a letter from the Orphan Committee at Sydney, containing recommendations, which, if adopted, would have carried out sufficiently, perhaps, the views of the Superintendent and the Committee at Melbourne as to the terms on which the emigration of female orphans from Irish workhouses, if renewed, might be assisted out of the Colonial funds. *From the recent communications, however, it appears, that although it has been decided that the emigration of female orphans from the Irish workhouses will not be resumed without some modifications of the former system, the precise nature of the modifications has not been determined upon.*

2. The Sydney Committee recommended in the letter above referred to, *that inmates of the Irish workhouses should not be accepted as assisted emigrants, unless there were paid for them the same amount as it appeared from the official correspondence on the subject could be obtained for the inmates of the English workhouses, viz., four or five pounds a head towards the passage money, which, at the reduced rates at which the contracts are now taken, would not be far short of one-half the price.* It was pointed out that *the anticipation of the Commissioners, which induced them to set a higher value on the inmates of Irish workhouses, namely, that they would be found not only of mature age, but trained servants, had certainly not been realized. At least two-thirds of those who arrived here were utterly ignorant of the duties of domestic service, properly so called, a very large proportion were quite incapable from their previous habits of learning them.* As respects general character I am disposed to think that they were superior to the inmates of English workhouses.

The opinion expressed by the authorities at Port Phillip, in the papers now under consideration, is, *that the Irish Orphan Immigration should not be resumed, except on the following conditions, viz., that one-half, at least, of the passage-money be paid out of British funds; that none of the females be under seventeen years of age; that an equal number of English orphans be sent, or, if they cannot be obtained of the required age and description, that the aggregate Irish immigration should be reduced to its due proportion by a corresponding increase in the number of the ordinary immigrants selected from England and Scotland; and, lastly, that single males should be sent in equal number to the unmarried female immigrants, including the orphans.* On this latter point Mr. La Trobe lays great stress, and he points out that during the late immigration the number of females exceeded that of males by more than 1,000.

With these remarks I beg to suggest, that copies of the papers should now be transmitted to the Colonial Land and Emigration Commissioners for their consideration.

I have, &c.,

FRANCIS L. S. MEREWETHER.

APPENDIX J.

RETURN of CASES of ORPHAN FEMALE APPRENTICES whose INDENTURES were cancelled, by the Court of Petty Sessions, at the Water Police Office.

DATE OF MAGISTRATES' DECISION.	NAME OF ORPHAN.	NAME OF SHIP.	NAME OF EMPLOYER.	NATURE OF CHARGE.	MAGISTRATES' DECISION AND RECOMMENDATION FOR DISPOSAL.
1 16 Mar., 1849	Jane M'Conkey		Mr. Joseph Marshall, Woolloomooloo-street	Bad conduct	Indentures cancelled; returned to the Barracks to be sent into the country.
2 16 " "	Nancy Pritchard		Mr. James Allison, Flag Staff	Charged her master with ill-usage; herself being charged with bad conduct	Both dismissed; indentures cancelled.
3 13 April, "	Mary Ann Kelly	Earl Grey	Mr. Robert Blake, Balmain	Improper conduct towards her master	Agreement cancelled; wages forfeited; returned to Orphan Barracks.
4 5 " "	Rose M'Donald		Mr. Henry Loader	Claim for wages	Proved to have been paid.
5 5 " "	Margaret Hanna		Mrs. H. M. Lett	Disobedience and neglect to obey orders	Agreement ordered to be cancelled.
6 22 May, "	Margaret Williamson	Earl Grey	Mr. H. Gibson, Pilot, South Head	Disobedience of orders, and absenting herself from her master's premises without leave	Indentures cancelled.
7 16 June, "	Margaret Durkin	Digby	Mr. W. H. Cory, Surgeon	Improper conduct in absenting herself without leave	Indentures cancelled; wages forfeited.
8 20 July, "	Mary Stephens	Inchinnan	Mr. John Mackay, Merchant	Neglectful and disobedient	Indentures cancelled; to be sent into the country.
9 22 June, "	Rose Ann Carroll	Earl Grey	Mr. Hy. Smithers Hayes	Absent without permission	Not proved; indentures to be cancelled.
10 29 " "	Bridget M'Caon	Earl Grey	Mr. John Lublin, George-street	Absent without permission	Indentures to be cancelled.
11 29 " "	Christiana Wynne	Digby	Mr. J. L. Faucett, George-st.	Charge against master of assault	Case dismissed; indentures cancelled.
12 7 July, "	Margaret M'Kinlay		Mr. Joseph Hunt, Balmain	Insolent and disobedient	Agreement cancelled.
13 14 " "	Anne Haggarty	Inchinnan	Mr. Alfred Elyard	Refusing to obey orders	Indentures cancelled.
14 14 " "	Mary Ann Ward	Digby	Mr. John Lord, Macquarie-st.	Absent without leave, and general misconduct	Indentures cancelled.
15 20 " "	Rose Peel	Inchinnan	Mr. G. J. Wrentmore	Insolence and neglect of duty	Indentures cancelled.
16 21 " "	Mary M'Keighe	Inchinnan	Mr. John Lord, Sydney	Leaving place of residence without permission; neglect of duty	Indentures cancelled.
17 14 " "	Mary Ann Ward	Digby	Dr. Douglass	Incompetency and idleness	Indentures cancelled.
18 27 " "	Margaret Conlan	Digby	Mr. James M'Intosh, Bay-street, Glebe	Charged her master with assault	Indentures cancelled.
19 27 " "	Mary M'Caon	Earl Grey	Mr. Richard B. Sheridan	Disobedience of orders, and absence without leave	Indentures cancelled; to be forwarded to the country for employment.
20 27 " "	Elizabeth Reilly	Digby	Mr. Eugene Flynn, Castle-reagh-street	General misconduct	Indentures cancelled.
21 27 " "	Abigail Brady	Digby	Mr. Wm. Sotheren, Castle-reagh-street	General misconduct	Indentures cancelled.
22 4 Aug. "	Mary Daniel	Earl Grey	Mr. Theodore James Jaques	Disobedience of orders, and wilful destruction of her master's property	Indentures cancelled; to be sent into the country for employment.
23 17 " "	Mary Flynn	Digby	Mr. Thomas M'Culloch, Liverpool Road	Carelessness and improper conduct	Indentures cancelled.
24 24 " "	Mary Ann Dayley	Inchinnan	Mr. Wm. Clarke, Strawberry Hills	Disobedience of orders, and absenting herself without leave	Indentures cancelled; to be sent into the country for employment.
25 24 " "	Mary May	Lady Peel	Mr. J. H. Maddocks, William-street	Absent from her place without permission	Indentures cancelled.
26 17 " "	Mary Doyle	Digby	Mr. William Brown, Sydney	Unable to do the work	Indentures cancelled.
27 14 Sept.	Elizabeth Just	Earl Grey	Mr. Parry Long, Solicitor	Charged her mistress with assault	Case dismissed. Indentures cancelled.
28 7 " "	Ellen Handbridge	Lady Peel	Sir T. L. Mitchell	Insolence, and absenting herself without leave	Indentures cancelled; to be forwarded into the country for employment.
29 7 " "	Jane Dayley	Inchinnan	Mr. John Lynch	General misconduct	Indentures cancelled.

APPENDIX TO THE FOREGOING EVIDENCE.

APPENDIX TO THE FOREGOING EVIDENCE.

H. H. BROWNE,
Agent for Immigration.

APPENDIX K.

No. 1.

Immigration Depot, Goulburn,
2 December, 1849.

Sir,

I think it is only my duty to inform you, from the short experience I have had of the conduct of the orphan females who arrived at this depot on the 30th November, I consider them nearly irreclaimable, and hope very little from them.

Francis L. S. Mercwether, Esq.,
Sydney.

I have, &c.,
FRANCIS M'ARTHUR.

No. 2.

LIST of IMMIGRANTS from the ships "Inchinnan," "Lady Peel," "Digby," "Earl Grey," and "Diana," forwarded to Goulburn, via Parramatta, by the Government.

Conway, Mary Ann	15
Superintendent and Wife.	

I hereby certify that the above-named individuals appeared before me at Goulburn, this 30th day of November, 1849.

FRANCIS M'ARTHUR.

APPENDIX L.

No. 1.

Scone, September 7th, 1849.

Gentlemen,

I am grievously necessitated to seek your advice and protection under the following circumstances:—

About the month of January Mr. Magrath brought me, as a servant, one of the emigration orphan children.

I have been unable to get this young person to obey my lawful commands or attend to her duties as a servant, and on all occasions more inclined to deteriorate my property than be of any use as a domestic. For the last six weeks, when spoken to, to do her work in any way but as she thinks proper, her conduct is much like that of a person delirious or excited by drink: I request to draw your particular attention to her conduct on Sunday night, 2nd September, 1849.

On leaving my home on the 2nd instant for church, I left directions she was not to leave the house. I gave those directions, having received information that she was to have a meeting, if possible, with a man who has this day been (I am told) brought before your Bench.

On receiving her instructions she became alarmingly violent; she made several attempts to burst the locks from the doors, tearing the curtains from the windows, seizing the sofa-covers or tidies, and attempting to tear them to pieces, at the same time using the most blasphemous expressions against all around her, damning her soul to hell but she would get out of the window and throw herself into the well.

On my return from church I sent for constable Dunn; and I was unable to get her quieted until very late at night.

I have written to the Committee to release me from the unfortunate charge, (and cancel her indentures), but I have not as yet received an answer.

In

In the interim I crave the protection of your Bench, as I am apprehensive some serious matter may occur in those paroxysms of rage she is subject to

I therefore crave the protection of the Bench, and that she may be imprisoned in the lock-up until the Committee decide upon what is to be done with her.

I have the honor to be,
Gentlemen, &c.,

To
The Bench of Magistrates,
Scone.

ELINOR MAGRATH,
Scone.

No. 2.

Police Office, Scone,
14th September, 1849.

In the presence of—

FRS. LITTLE, ESQ., J. P.
JOSH. DOCKER, ESQ., J. P.

Magrath v. Mary A. Littlewood, a female orphan apprentice.
8th Victoria.

Mrs. E. Magrath, who being duly sworn, deposes:—A girl of the name of Mary Littlewood, one of the Irish orphan girls, was apprenticed to my husband, Mr. Thomas Magrath, of Scone, on 3rd January, 1849. For some time past her conduct has been very bad; she refuses to obey my lawful commands or to attend to her duties as a servant, and is excessively insolent when spoken to; on Sunday night, the 2nd September, I had directed her not to leave the house, in consequence of having received information that she was to have a meeting with a man who had for some days been hovering about the premises. I was informed that on receiving her instructions she became alarmingly violent; she made several attempts to burst the locks from the doors, tearing the curtains from the windows, and at the same time using the most blasphemous language against all around her. On my return I was compelled to send for constable Dunn before she could be quieted; since then her conduct has been exceedingly disorderly.

ELINOR MAGRATH.

Sworn before me, this }
14th September, 1849. }

J. DOCKER, J. P.

Summons granted.

J. DOCKER, J. P.

Police Office, Scone,
14th September, 1849.

In the presence of—

FRANCIS LITTLE, ESQ., J. P.
JOSH. DOCKER, ESQ., J. P.

Thomas Magrath, Esq., v. Mary Littlewood, an orphan Irish girl, apprentice.
8th Victoria.

Mrs. Elinor Magrath, being duly sworn, and her former deposition in this case read over, deposes same to be correct:—I have to add that this is not the first instance in which her conduct has been so violent. In fact I am afraid to remain alone in the house with my servant maid, Mary Littlewood.

Cross-examined by the Bench for Prisoner:—The prisoner did attempt to force the locks of the front and back door in my presence; I did not see you tear my curtains.

Examined by the Bench:—On my return from church I heard the prisoner Mary Littlewood address blasphemous expressions to me, as also to my husband Mr. Magrath.

ELINOR MAGRATH.

Duly sworn before us this 14th day of }
September, 1849. }

J. DOCKER, J. P.
FRS. LITTLE, J. P.

Thomas Magrath, being called and duly sworn, deposes:—On Sunday night, 2nd September, on communicating Mrs. Magrath's instructions to my servant Mary Littlewood that she was to remain in the house, she became excessively violent; she went towards the front door and endeavoured to get out; I placed myself between her and the door; she "damned her soul to hell," but that she would get out of the house; she went towards the back door; I again prevented her from using violence on this door, when she again repeated the blasphemous expressions; she went into the sitting room and seized the sofa covers and window blinds, swearing she would tear them; she continued this violent conduct till the return of her mistress from church, when I went for Constable Dunn's assistance.

Cross-examined by Prisoner:—You did attempt to tear the window curtains, and behaved in this violent manner; I told you your mistress had left instructions that you were not to go to church; I also add that I directed you not to go to church on that night; I did tell you as your master that I had reasons for your not being allowed to go to church.

Examined

Examined by the Bench:—Mary Littlewood had been to church that Sunday in the morning, and the reason why she was not allowed to go to church in the evening was that alluded to by Mrs. Magrath in her deposition.

THOMAS T. MAGRATH.

Duly sworn before us, this 14th day of }
September, 1849.

FRS. LITTLE, J.P.
JOSH. DOCKER, J.P.

Thomas Magrath, being recalled, not having left the Court, states:—That the amount of goods purchased for Mary Littlewood and the several items in the account now produced are correct, amount to £4 15s. 2d., leaving a balance due to her as wages of one pound.

T. MAGRATH.

Duly sworn before us, this 14th day of }
September, 1849.

FRS. LITTLE, J.P.
J. DOCKER, J.P.

The Bench find that Mary Littlewood is guilty of disobedience and of highly disorderly conduct. Hereby cancel her indentures, and direct her to be forwarded to the Immigration Depôt at Maitland at the expense of her master, he being authorized to apply the balance of wages due to her for that purpose.

JOSEPH DOCKER, J.P.
FRANCIS LITTLE, J.P.

These depositions entered.

APPENDIX M.

No. 1.

Immigration Depôt, Parramatta,
12 December, 1849.

Sir,

I do myself the honor to acquaint you, that the female orphan named in the margin has this day been received into the Barracks, her indenture having been cancelled by the Parramatta Bench, (for immoral conduct), at the request of her master, Mr. Arthur Barker. Mary M'Cormick per ship "Inchinnan."

2. In accordance with your instructions, her tea and sugar will be stopped while she remains in the Barracks.

3. A copy of the deposition taken in the case, appended to the indenture, is herewith enclosed.

I have, &c.,

The Agent for Immigration, Sydney.

GILB. ELIOTT.

No. 2.

Court House, Parramatta,

GEORGE BANKS SUTTOR, ESQ., J. P.

Betsy M'Cormick, }
Per ship "Inchinnan." }

Mr. Arthur Barker, tailor, residing in Church-street, Parramatta, being sworn, states as follows:—

The prisoner at the Bar is my indented apprentice, under the indenture now produced, marked A. On the night of Saturday last I found her in bed with an apprentice boy of mine, named Robert Mellington; she received him in her bed-room. Her conduct is very immoral; and for some time past I have been informed that she has been cohabiting with my apprentice. She has behaved so very ill that I do not wish to have her any longer in my family; and I therefore request that her indenture may be cancelled.

ARTHUR BARKER.

APPENDIX N.

No. 1.

Barham, 6 July, 1850.

Gentlemen,

I have the honor to inform you of my desire to return the female orphan, Hannah Mack, by the "Panama," apprenticed to me on the second day of February last. I am inclined to prefer this request, in consequence of her repeated misconduct. She not only systematically neglects her duty, and disobeys the orders which are given to her, but absents herself in the evening for hours together; although I have myself personally warned her against such serious impropriety of conduct. It is because I feel the sacred obligation which is imposed upon me by the conditions of her apprenticeship, and the impossibility, from her intractable temper and habits of disobedience and irregularity, of satisfactorily fulfilling them, that I am so desirous of ridding myself of the responsibility of longer retaining her in my service.

You will oblige me by stating whether, under the circumstances represented, I am at liberty to return Hannah Mack to the Emigration Barracks, with a view to the cancellation of her indenture of apprenticeship, or what other course I should adopt for this purpose.

I have, &c.,

The Orphan Immigration Committee.

E. DEAS THOMSON.

No. 2.

*Port Macquarie,
14 October, 1851.*

Dear Sir,

I beg to return Mary Solmon to the Barracks. I wrote to you some time ago to have her taken back. Since that upwards of 60 articles belonging to me, besides two from a young friend and four from her fellow-servant, have been found in her possession. I do not wish to prosecute her. She is as worthless a character as could easily be found. I send her under the charge of the captain of one of the little vessels here, who promises to see her safe under your care. I am very sorry for the trouble I have given you, and beg to remain,

Your's sincerely,

WILLIAM M'KEE.

Captain Browne.

This girl may be received into the Depôt, and this communication had better be laid before the Orphan Board.—H. H. B.

May be brought forward for hiring.—H. H. B.

No. 3.

Sydney, 4 January, 1850.

Sir,

I have to inform you that Catherine Conlon, per "Lady Peel," apprenticed to me on the 26th July last, has this day absconded from my house, and still remains absent; having first refused to perform the work assigned to her, and being insolent also; and I have further to state, that having been away 14 hours I now refuse to receive her back again at all. Where she has gone to I don't know, but she has left her box here, which, if you think fit, shall be delivered to your order, but not to anything else.

This girl has been used with the greatest kindness and consideration, fed and lodged as my own children, and never over-tasked, or set to any work which her mistress would not do or has not done hundreds of times. She was, with only one or two exceptions, every Sunday afternoon allowed to chapel, and her wages have been paid regularly, even beyond the time of her leaving. She has behaved most ungratefully, and some day will bitterly repent it. But as long as Government offer the premium of home and companionship, it is useless for employers, however kindly disposed, to hope for anything but deception and ingratitude from the Irish orphan.

Your obedient servant,

HENRY CHATTO.

F. L. S. Merewether, Esq.

Acknowledge receipt, and inform the applicant that in order to relieve himself from responsibility under the indenture it will be necessary for him to take out a warrant for the apprehension of the girl, so that she may be brought before the magistrates, and the indenture legally cancelled.

Under an arrangement made by the Committee these cases are generally taken at the Water Police Office, and the applicant should be requested to apply there for the warrant.

No. 4.

No. 4.

Sydney, 14 July, 1849.

Sir,

With reference to the female whose name and ship are noted in the margin—<sup>Ellen Maguire,
"Digby."</sup>—I regret to say that she has proved to be so untractable, and impracticable, as to render unavailable every effort to control her; and she was yesterday about to quit her service, when she was prevented, and I promised to state to you her request that she might leave my service.

To prevent the girl's absconding, and her consequent ruin, I would therefore request that she may be re-admitted to the Barracks, and the indentures cancelled.

F. L. S. Merewether, Esq.

I am, &c.,
GILBERT WRIGHT.

To go to the Magistrates for cancellation of indentures.—20 July.

APPENDIX O.

STATEMENT of the Sub-Matron in reference to the Girls who came to this Colony in the ship "Lady Kennaway," under her charge.

About sixty of the girls had never been in service; of the remainder I am unable to speak positively, as I had no previous knowledge of them, but I am inclined to think that about thirty had been in service previously to their going into the workhouse.

Of those who were not in service, twenty-two are known to be bad characters in Sydney, of whom sixteen are included in the sixty above referred to.

Two of them, named Honora Lenehan and Catherine Lynch, were in the Penitentiary, a part of the workhouse into which girls of doubtful character are received; and the two girls named above were released from there, and admitted to the general establishment, with a view to their being reclaimed, the priests being of opinion that their removal from the other bad characters would best tend to their restoration to good conduct.

Amongst the girls stated above to have gone astray here are Honora Lenehan, one of the Penitentiary girls, and Ann Ryan, known in Sydney by the name of "The Great Britain." This latter girl's sister came out with her through the influence of the Rev. Mr. Parker, although I objected to her getting a passage, as I saw her strike her mother.

APPENDIX P.

(Sent by "Australian" steam ship, September, 1852.)

Dear Sir,

In acknowledging the receipt of your communication by the "Tartar," I beg to thank you for the consideration which you have given to my suggestions as to the arrangements to be entered into with the owners of future vessels chartered by your Society, and I only regret that my despatch containing those suggestions did not reach you in time, so that you might have been enabled to have modified the charter-party of that vessel, and made the balance of the passage-money dependent on the strict prevention, by the master, of intercourse between the needle-women and the crew.

Had such a clause been introduced in the charter-party of the "Tartar" I should have felt it my duty to have withheld my certificate, as I do not consider that sufficient exertion was used by Captain Davis to check the irregularities that occurred on the voyage.

Notwithstanding the depraved conduct of some of the girls, I am happy to say that the most of them are behaving with propriety; and you will observe by my official Report that all have obtained respectable employment at highly remunerative wages.

There is little doubt but your Society has, in some instances, been grossly imposed on; and it is much to be regretted that such should be the case, as the class of persons you profess to assist would be much sought after by all the respectable persons in the Colony.

It is manifest that the pernicious example of a few bad characters has been highly detrimental to the prospects of the needle-women generally, having not only sent many artless and unguarded girls to destruction, but has also influenced the minds of the Colonists to consider all needle-women equally bad alike.

I trust the Committee will take in good part my several communications to them respecting these persons, as I can most candidly assure them that I feel a deep interest in the success of their endeavours, and my only object in thus placing before them all the circumstances which have transpired on the voyage is to enable them to check, with a strong hand, the fearful irregularities which conduce to so much future misery, and at the same time to expose the shameful impositions which have been practised on the Committee, and which have led to the assistance of worthless characters instead of to those objects who were really deserving of their kind consideration.

I beg to remain, &c.,
H. H. BROWNE.The Right Honorable
Sidney Herbert,
&c., &c., &c.

APPENDIX Q.

No. 1.

Captain Browne,—How were the Immigrants by the "Ontario" disposed of? Did they obtain engagements at fair wages? And was there any difficulty raised by them to a compliance with the engagements they entered into with the Society respecting the repayment of the sums advanced to them?

CH. F
3rd.

Not official.

I want the answers to these questions for a letter to Sir C. Trevelyan.

 No. 2.

The Immigrants by the "Ontario" arrived in the Colony under considerable disadvantages, having left many of the elder branches of their families in Quarantine.

The difficulty which they experienced in making themselves understood prevented many from obtaining employment in Sydney.

A very few were therefore hired in Sydney, and the majority were sent to the depôt at Maitland, where they appear, in some instances, to have been hired at remunerative wages; some have left the depôt on their own account, and some have been turned out for refusing fair employment.

I have very little hope that much of the money advanced by the Society will be repaid, more especially as many of the acceptors of the promissory notes died on the voyage out.

On the whole they are a class of emigrants not much liked in the Colony, and many of them are dirty, slothful, and discontented.

*Royal Mint,
11 December, 1858.*

Sir,

I have the honor to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the following Returns have been duly received from the Deputy Master of the Sydney Branch of the Royal Mint, in conformity with the Order in Council of the 19th August, 1853.

Six Monthly Returns shewing the transactions in Bullion of the Sydney Branch of the Royal Mint for January to June, 1858, inclusive.

The Coin produced during these months is as follows:—

	SOVEREIGNS.	HALF-SOVEREIGNS.	TOTAL.
	oz.	oz.	oz.
In January.....	59,107·37	59,107·37
„ February	55,293·28	55,293·28
„ March	18,462·51	18,462·51
„ April	17,989·35	17,989·35
„ May	18,021·30	18,021·30
„ June	26,065·14	26,065·14

Amount charged for Coinage—Nil.

Two Returns of waste in coinage of Gold at the Sydney Branch of the Royal Mint, for the quarters ending 31st March, and 30th June, 1858.

Two duplicate Returns made by the Board of verification to the Colonial Secretary, reporting the state of Bullion in the Mint on the 1st April, and 1st July, 1859.

I have also to request you to submit to their Lordships my Report, enclosed, (being the eleventh) on the weight and fineness of the coins produced at the Sydney Branch of the Royal Mint during the sixth months January to June, 1858, inclusive, and transmitted by the Deputy Master for examination, in accordance with the provisions of Her Majesty's Order in Council above referred to.

A copy of said Report will be forwarded to the Deputy Master at Sydney, for his information.

I have, &c.

Sir C. E. Trevelyan, K.C.B.

&c., &c., &c.

THOS. GRAHAM.

ELEVENTH REPORT submitted to the Lords Commissioners of Her Majesty's Treasury by the Master of the Mint, on the Weight and Fineness of Gold Coins struck at the Sydney Branch of the Royal Mint, and transmitted by the Deputy Master for examination, in accordance with the provisions of Her Majesty's Order in Council of 19th August, 1858.

Pieces taken, without preference, by the Colonial Secretary at the deliveries of the Sydney Mint.

NEW SOUTH WALES.

POST OFFICE.

(THIRD ANNUAL REPORT FROM THE POSTMASTER GENERAL.)

Ordered by the Legislative Assembly to be Printed, 15 February, 1859.

THE POSTMASTER GENERAL to THE HONORABLE THE COLONIAL SECRETARY, transmitting
the Post Office Report for 1857.

General Post Office,

Sydney, 23 December, 1858.

SIR,

In accordance with the instructions contained in your letter of the 30th January last, I have the honor to transmit my Third Annual Report on the Post Office, being that for the year 1857.

EXTENSION OF INLAND SERVICE IN 1857.

The Postal Lines of the Colony have been extended during the past year about 685 miles.

In the Northern District, the communication has been extended 158 miles to the northward, by the establishment of a line from Gayudah to Gladstone. Tenterfield and Frazer's Creek (50 miles) have been connected by a cross line of Post, and a branch Post in connection with the line between Stroud and Port Macquarie has been established between Wingham and Cundletown (10 miles); whilst the Postal Line to Surat (84 miles), which in my Report for 1856 I stated had been discontinued, has been resumed. In the Western District, a branch line from Wiseman's Ferry to Mangrove Creek (12 miles) has been established; whilst the existing line to Mudgee has been extended to Mundooran (71 miles), and the Carcoar and Canowindra line to Bundaburra (50 miles). In addition to this, Windsor and Camden (39 miles) have been connected by a cross line, *via* Penrith and Mulgoa. The additional lines in the Southern District comprise a cross line from Wagga Wagga to Doniliquin (180 miles), a branch line from Berrima to Sutton Forest (8 miles); one from Dapto to Shell Harbour (15 miles), and an extension of the coast line from Moruya to Bodalla (8 miles). The line from Coolah to Mundooran has been discontinued, and the line from Mudgee to Mundooran substituted.

Increased communication has been afforded on 464 miles of existing Postal Lines, as follows:—In the Northern District the Mails are conveyed three times instead of twice a week between Morpeth and Dungog (53 miles), between Maitland and Wollombi (48 miles), and between Scone and Armidale (147 miles); and in the Western District between Hartley and Mudgee (84 miles.) The communication has been made twice a week instead of once,

between Mudgee and Avisford (18 miles), in the Western District; and between Cooma and Bombala (54 miles), in the Southern District. A second daily communication has been established between Sydney and Parramatta (15 miles), Sydney and Camden (39 miles), and Sydney, St. Mark's, and Watson's Bay (6 miles).

The number of miles travelled by the Mails in 1857 was 1,289,386, being 182,664 miles in excess of the number travelled in 1856. The excess of 1856 over 1855 was only 83,467.

During the past year 20 additional Post Offices have been established, viz., at Falconer, in the Northern District; at Bundaburra, Mangrove Creek, Wiseman's Ferry, Meadow Flat, Luddenham, Blayney, Castlereagh, Smithfield, Vinegar Hill, and Little Hartley, in the Western District; and at Bodalla, Marengo, Shell Harbour, Sutton Forest, Ten Mile Creek, Gerringong, Merimbula, and Kembla, in the Southern District. The Post Office at Surat has been re-established, and a new Post Office established at Manly Beach. The number of Post Offices in existence on the 31st December, 1857 was 198.

Four more persons have been authorized to sell Postage Stamps, making the total number of places in Sydney at which stamps are procurable, inclusive of the General Post Office, twenty-five.

In my Report for 1856 I spoke favorably of the Iron Letter Receivers that have been erected in Sydney, and am happy to find that the public are fully alive to their advantages, as evidenced by the urgent applications made for the erection of new pillar boxes in various parts of Sydney and the suburbs, and in many of the larger towns in the interior.

I take this opportunity (as many complaints have appeared on the subject in the public prints,) to give the reasons why it has been decided that letters only (not book packets or newspapers) should be posted in the street receivers. First and foremost, it has been found necessary that letters and newspapers should be posted in separate boxes, from the liability of the former to "pig," as it is technically termed, viz., become enclosed in the folds of the latter. Again, the hour for closing the Inland Newspaper Mails are different from those established for the closing of the Inland Letter Mails; and this fact would necessitate double arrangements for clearing the pillar boxes, or would lead to disappointment as to the dispatch of the newspapers so posted. At present, also, a mail-boy on horseback, or a letter-carrier on his round, is enabled without difficulty to empty any pillar boxes entrusted to his charge, and to convey the letters therein to the General Post Office three times a day; but if these boxes were made a receptacle for newspapers and packets, the contents might become so much heavier that other and more extensive arrangements would be rendered necessary.

The railway from Newcastle to East Maitland having been opened in April, 1857, advantage has been taken thereof since that period for the conveyance of the Mails.

In acknowledging the great benefits that must necessarily arise to the Postal Service from the use of railways instead of coaches for the conveyance of Mails, I must, nevertheless, state that some inconvenience was sustained in 1857 from the down, or up-country Mails (as they are styled in the Railway Time Table,) which arrived in West Maitland at 10.30 a. m., being too late for dispatch to Sydney by the train leaving the same day; the hour at which the train left being 9 a. m. The Mails were consequently detained for 24 hours from the simple circumstance that the train left West Maitland one hour and a-half before the Mails arrived there. There can be no doubt, that to make the Postal Service thoroughly efficient the fullest control as to every part of the progress of the Mails, whether by railway or steamer, should be vested in this department, even should such extended control entail additional expense. The 55th clause of the Railway Act, 13th Victoria, gives the Postmaster General power to name the hours by day or night for the mail trains to leave; whilst the subsequent clause provides, that the compensation for conveying the Mails shall be fixed by agreement or arbitration. Up to this period, however, this power of fixing the hours for dispatching the mail trains has not been exercised, and the arrangements for the conveyance of Mails by railway, both as regards the hours of departure and the amount to be paid for their conveyance, have either been initiated by the Railway Department, or been made the subject of mutual agree-
ment

ment and concession. The expense, therefore, of the transmission of the Mails by railway has as yet only had reference to their conveyance by the *ordinary* trains. Such expense, as may be seen by a Return herein given, exceeds that of the average cost of Mail conveyance in the Colony, but is less than that of Mail conveyance by wheeled carriage.

In my Report for 1856, I pointed out that obstructions to the regular and rapid transmission of the Mails to and from the Northern District, were caused by the Government not having the power to control the times of departure and arrival of the Hunter River steamers. Of course it is not in the province of the Government to regulate by Legislative enactment, as in the case of Railway Trains, the hour of dispatching steamers which belong to private companies; but the benefit that would accrue from such a power would be so great as to fully justify any reasonable expenditure that might have to be incurred in obtaining so desirable an object. Having pointed out, however, very fully in my last Report that the power to control the arrival and departure of all Mail conveyances, should be vested in the head of the Postal Department, and that perfect regularity in the conveyance of Mails is impossible so long as this power is not possessed by him, it is, perhaps, unnecessary that I should enter any further into the subject on the present occasion.

The following tabular statement will shew the average cost per mile of the conveyance of Inland Mails for 1857 compared with 1856.

Year.	Extent of Postal Lines, (Railway.)	Average cost per mile.			Extent of Postal Lines, (Coach.)	Average cost per mile.			Extent of Postal Lines, (Horse.)	Average cost per mile.			Total Extent of Postal Lines.	Annual cost of Mail Conveyance.			Average cost per mile.		
	Miles.	£	s.	d.	Miles.	£	s.	d.	Miles.	£	s.	d.		£	s.	d.		£	s.
1856....	22	11	10	0	1,624	13	19	5	4,686	3	11	10	6,332	39,781	0	0	6	5	7
1857..	38½	11	10	0	1,598	12	11	8	5,371	3	7	6	7,007½	38,690	8	9	5	10	5
Increase	16½	685	675½
Decrease	26	1	7	9	..	0	4	4	1,090	11	3	0	15	2

This Return is favorable, inasmuch as it shews a decrease in the cost conveyance of Mails both by coach and horse. In 1856, as compared with 1855, there was an increase in the cost of conveyance by horse of 3s. 5d. per mile. The decrease by coach was £1 9s. 2d.—almost the same decrease as in 1857. The decrease in the average cost per mile for conveyance by all modes is 15s. 2d., which is considerably more than the decrease in 1856, which was 9s. 6d. The decrease in the number of miles travelled by coach is accounted for by a parallel increase in the number of miles that the Mails are conveyed by rail.

NUMBER AND WEIGHT OF LETTERS AND NEWSPAPERS.

The following is a comparative Tabular Statement of the number of Letters and Newspapers delivered in the Colony during 1856 and 1857.

YEAR.	Number of Letters delivered in Sydney.	Number of Letters delivered in the Country Districts.	TOTAL.	Proportion of Letters to Population.
1856.	1,336,032	1,481,416	2,817,448	About 10½ to each person { Rather more than 10 to each person.
1857.	1,551,770	1,621,758	3,173,528	
Increase	215,738	140,342	356,080	

The population is taken at 266,189 for 1856, and at 305,487 for 1857, according to the Registrar General's Return.

Under the head of "Letters" are included book and other packets.

This Return shows an increase at the rate of more than 16 per cent. in the number of letters delivered in Sydney; about 14 per cent. being the rate of increase for 1856, as compared with 1855. The number of letters delivered in the country districts have increased at the rate of more than 9 per cent., 7 per cent. being the increase for 1856 over 1855. The increase in the total number delivered is at the rate of nearly 13 per cent. against 10 per cent. in 1856, as compared with 1855. This per centage of increase is greater than that of any recent year, except that of 1855, as compared with 1854, and would, I think, be very satisfactory, considering the depressed state of the Colony during 1857, were it not for the large increase to the population of 39,298 souls, which is at the rate of more than 14 per cent.

I am at a loss to account for the decrease in the proportion of letters to the population, considering the increase in the latter, but it may be that the number of births and the influx of Chinese, who would not, of course, make the same use of the Post Office as other portions of the community, sufficiently account for the decrease in question.

About 1,805,599 newspapers were delivered in the Colony in 1857, (exclusive of the provincial newspapers delivered in the country districts, of which no accurate estimate can be formed); of which number about 1,260,335 were delivered in the country districts, and the remaining 545,264 in Sydney.

The number of Valentines estimated to have been delivered from the General Post Office during the Valentine week of 1857 was 10,160.

The following comparative Tabular Statements refer to Foreign Mails, and give the number of letters and newspapers received in, and dispatched from, the Colony during 1856 and 1857.

LETTERS.

YEAR.	DISPATCHED.			RECEIVED.			
	Australasian Colonies.	United Kingdom.	Foreign Countries.	Australasian Colonies.	United Kingdom.	Foreign Countries.	TOTAL.
1856	141,883	177,695	8,569	131,255	168,205	14,567	642,174
1857	140,239	190,683	11,420	133,875	168,130	13,069	657,416
Increase	12,988	2,851	2,620	15,242
Decrease	1,644	75	1,498

NEWSPAPERS.

YEAR.	DISPATCHED.			RECEIVED.			
	Australasian Colonies.	United Kingdom.	Foreign Countries.	Australasian Colonies.	United Kingdom.	Foreign Countries.	TOTAL.
1856	161,654	173,642	19,432	74,555	270,239	10,760	710,282
1857	159,814	230,190	18,808	83,037	272,004	10,322	774,175
Increase	56,548	8,482	1,765	63,893
Decrease.....	1,840	624	438

The Return as to letters is not on the whole so satisfactory as the similar one given in my last Report, the increase in the total number of ship letters being only 15,242, whereas the increase for 1856 over 1855 was 25,133. There appears the very small increase of 976 letters in the inter-colonial correspondence against an increase in 1856 of 19,274. On the other hand, the correspondence with the United Kingdom, which in 1856 shewed an increase of 9,536, shews for 1857 an increase of 12,913; but it is worthy of remark that the increase is in 1856 chiefly, and in 1857 entirely, in the number *dispatched* to the United Kingdom. The foreign letters, which in 1856 shewed a decrease of 1,795 in those dispatched, and 1,932 in

in those received, exhibit for 1857 an increase of 2,851 in the letters dispatched, and a decrease of 1,498 in those received.

The statement as to newspapers is much more favorable. Instead of a decrease in the total number dispatched and received of 110,104 (being that for 1856 over 1855), there is an increase of 63,898, this increase being chiefly derived from the increased number passing between the United Kingdom and this Colony. Whilst in 1856 there was a decrease of 98,245 in the number of this class of newspapers, the past year shews an increase of 58,313. There is also a moderate increase in the number of inter-colonial newspapers; the decrease in the number dispatched being less than was the case in 1856, and the increase in those received being greater. The decrease in the number of foreign newspapers, which in 1856 amounted to 15,718, amounts for 1857 to only 1,062. The Newspaper Return, though it shews a steady increase of business, and gives hope of still further improvement, nevertheless exhibits a considerable falling off for 1857, as compared with 1854 and 1855.

About 22,223 of the letters posted in the Colony were returned to the writers during 1857, being a decrease of 9,685 on the number returned in 1856. Of this number 13,000 were addressed to places within the Colony, 4,243 to Victoria, 1,040 to the United Kingdom, and 120 to other places beyond the Colony, and 3,820 (addressed to various places) were posted insufficiently stamped. The number of returned letters would have been considerably less, but for a misconception of the public as to the postage payable on letters sent overland to Melbourne. As it is, the number returned from the United Kingdom is, singular to state, the same as in 1856; the number returned from Victoria is 857 less; that from other parts, 140 less; and the inland letters returned have decreased by 5,228. The number of letters received from beyond the seas and returned as unclaimed are set down as 7,653, shewing an increase over the number for 1856 of 765. Of this number 4,608 were returned to the United Kingdom, against 4,414 in the previous year; 1,779 to Victoria, against 1,564 in the former year; and 1,266 to other parts, against 910 in 1856.

About 19,000 letters originally addressed to Sydney were re-directed at the General Post Office to various parts of the Colony and elsewhere.

The number of registered letters that passed through the office for 1857 was 86,914, being 10,693 more than in the preceding year. 7,873 ounces of gold were received through the Post Office in 1857, against 23,712 ounces in 1856.

I must observe in concluding this section, that the statistics are derived from the best data procurable, but some of the items are necessarily estimated.

FOREIGN LETTERS, PACKETS, AND BOOK PACKETS.

Arrangements made with the Imperial Government, necessitated an alteration in the existing Postage Acts, so far as British book packets were concerned; and advantage was taken at the same time to amend previous provisions with respect to the rates of postage on inland packets, which formerly passed at the reduced rate. The Postage Act, 18 Victoria, No. 17, gave full powers to the Government to make arrangements with the Imperial Government as to the rate of postage on letters passing to and from this Colony and the United Kingdom, and also regulations affecting their transmission; and the new Act has extended those powers to book packets. Great inconvenience having been found to exist from the circumstance of there being various different rates of postage on ship letters, the Act further provided for the establishment of one uniform rate of postage of 6d. the 1/2 oz. on all letters posted for dispatch beyond the Colony. To compensate, however, for the increase of postage on outward letters, all inward letters are delivered without (as formerly) any charge, provided they have been duly posted at some Post Office, failing which, they are charged, under the Act above referred to, the rates payable on outward ship letters. The establishment of this uniform rate has simplified considerably the transactions of the office, and would do so to a greater extent were it not that there is a slight difference in the Imperial arrangement as to the scale of weight by which letters to the United Kingdom are charged; no weight less than an ounce being recognized after the first ounce, whereas, for all other ship letters, the scale under the new Act proceeds throughout by half ounces. The matter is still further complicated by the circumstance of the British and Inter-Colonial scale for book packets proceeding by *half pounds*, which is not the case with the Inland Book Post.

The rates of postage on book packets passing between the Colony and the United Kingdom continue as before, viz., 8d. the $\frac{1}{2}$ lb; whilst the postage on Inter-Colonial packets has been fixed at 6d. the $\frac{1}{2}$ lb., and the inland rate at 2d. for the first 4 ozs., and 1d. for every additional 2 ozs. I have again to point out that this difference in the scale of weight is perplexing to the public, and causes additional labor to the department, without conferring any advantage whatever.

The present regulations as to the transmission of all book packets have been framed in accordance with those proposed for the British book packets, and assented to by the Colonial Government.

Almost every article usually transmitted through a Post Office, except *bona fide* letters, samples of merchandize, photographs—*not on paper*, and newspapers, (which pass at a still lower rate, and in some cases free,) can be forwarded as book packets; and consequently the repeal of the 8th clause of 15 Victoria, No. 12, (which, by allowing samples of merchandize and other articles to pass through the post at very reduced rates, caused endless trouble to the department in guarding against the continued frauds that were attempted,) has, whilst excluding a few articles that may justifiably be charged with the letter rate of postage, placed the remainder under the definition of book packets, thereby securing nearly all the advantages previously possessed by the public, and at the same time guarding against fraud.

The arrangements with the Imperial Government provide for the compulsory prepayment of letters and packets, and (to avoid accounts as much as possible) the retention by each Government of the postage so collected. Some allowance, however, has been made for the mistakes of parties posting, and in consequence, any letter or packet bearing at least a *single rate* of postage is charged with the deficiency and sent on—the amount being collected on delivery, and retained by the Government of the country in which the collection is made. Letters and packets not bearing a single rate are returned to the senders. This rule also applies in this Colony to foreign letters transmitted *through* England and to *all other* letters for dispatch beyond the Colony when they do not bear the full amount of postage. The new arrangements are, undoubtedly, a step in the right direction, but there is still much to be done in the way of simplifying the rates of postage and the scales of weight by which letters and book packets are charged and transmitted; and I trust that the next Postage Act will establish such desirable simplicity and uniformity. There can be no question but that as the public become better acquainted with the Postal Regulations, correspondence will be transmitted more expeditiously and correctly, and so to some extent increase.

REVENUE AND EXPENDITURE.

The following is a comparative Statement of the Revenue and Expenditure of the Post Office Department for 1856 and 1857 :—

YEAR.	REVENUE.	EXPENDITURE.	EXCESS OF EXPENDITURE.
	£ s. d.	£ s. d.	£ s. d.
1856	29,458 10 11	65,639 0 3	36,180 9 4
1857	35,715 13 3	63,865 8 3	28,149 15 0
Increase	6,257 2 4
Decrease.....	1,773 12 0	8,030 14 4

It will be seen by the above that the revenue has increased at the rate of about 21 per cent., the increase for 1856 having been 18 per cent.

The expenditure has decreased at the rate of nearly three per cent., whilst in 1856 there was a decrease of about 2 per cent. Still it is to be remarked that the expenditure of the department is nearly double the revenue.

The

REPORT FROM THE POSTMASTER GENERAL—1857.

7

The following detailed Statement will, however, give more ample information with reference thereto

REVENUE.					EXPENDITURE.				
YEAR.	Sale of Stamps.		Fees for Private Boxes.	Postage on Unpaid Letters.	TOTAL.	SALARIES.	Conveyance of Mails.	Contingen- cles.	TOTAL.
	£	s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1856	28,570	2 2	198 19 6	689 9 3	29,458 10 11	20,465 0 10	42,855 5 7	2,318 13 10	63,639 0 3
1857	31,030	15 11	267 14 0	1,297 3 4	33,715 13 3	19,836 4 8	41,324 8 5	2,704 15 2	63,865 8 3
Increase	5,460	13 9	88 14 6	767 14 1	6,257 2 4	386 1 4
Decrease	628 16 2	1,539 17 2	1,773 12 0

The revenue, it will be seen, appears to have increased under every head. The postage on unpaid letters has increased more than 100 per cent., which was to be anticipated, from the changes in the mode of collecting the rate of postage alluded to in section 3, and from the increase of the ship postage rate on loose letters. The expenditure shows a decrease in the salaries, and cost of conveyance of Mails but an increase under the head of contingencies, which is natural, seeing that this head involves every item of expenditure not included under the other two heads, and of course must provide for the increase of the establishment during the year, in the shape of additional stores, stationery, and miscellaneous expenditure.

It must be noted, that the expenditure does not include the proportion to be paid by New South Wales towards the subsidy for the conveyance of English Mails, and which is put down on the Estimates of 1857 at £20,000.

The expenditure for 1856, as given in these Returns, will be found apparently to differ from that given in my Report for that year. This is rendered necessary in consequence of a change of classification made during 1857, and in order that a comparison may be drawn between the expenditure of the two years. In my last Report the salaries for 1856 did not include the temporary gold increase, which was paid from a separate fund; nor the Country Postmasters' salaries, which were included in the Estimates of that year under the head of "Allowances." As for 1857, a portion of the temporary increase has been added to the fixed salaries, and the Country Postmasters' salaries have been placed under the head of "Salaries," instead of "Allowances," it was of course necessary to adapt the form of the Return for the former year, 1856, to that now employed for 1857.

POSTAL COMMUNICATION WITH THE UNITED KINGDOM.

In my last Report I alluded to a contract just entered into for the conveyance of the Mails between the Australasian Colonies and the United Kingdom, and had every reason to anticipate that I should have been able in this Report to enumerate the many advantages which had resulted therefrom. It is, I am sorry to say, however, a matter of notoriety, that the new contract has proved an utter failure, so far as the stipulated Time Table may be taken as the criterion. The contract has been performed not only in an inferior manner to the one that existed with the Peninsular and Oriental Company in 1854—the annual subsidy to the latter being £84,000 per annum, and to the former £185,000 per annum—but I am disposed to think that the results have not been even so satisfactory as those obtained when steam vessels were not procurable, and when, during the Crimean war, the Mails were conveyed by clippers, at a comparatively trifling cost.

The following is a Tabular Return of the actual days of arrival and dispatch of the Mail

Mail Contract Vessels at Sydney during 1857, and also shews the dates at which they ought to have arrived and departed :—

ARRIVAL.			DEPARTURE.			
NAME OF VESSEL.	Actual Date of Arrival.	Specified Date of Arrival.	NAME OF VESSEL.	Actual Date of Departure.	Specified Date of Departure.	
These Vessels came via the Cape.	1856.

	Simla	7 Sept.	8 Sept.	Emeu	11 Sept.	11 Sept.
	European	18 Oct.	9 Oct.	Simla	11 Oct.	11 Oct.
Columbian	17 Nov.	9 Nov.	City of Sydney . .	11 Nov.	11 Nov.	
No Mail Steamer . .	in Dec.	9 Dec.	European	11 Dec.	11 Dec.	

* The vessels that came by the Cape were allowed 75 days.

The above statement shews the following results as to the performance of the Mail Contract :—

1st. Only *ten* monthly Mail Steamers arrived in the Colony instead of twelve; and only *eleven* were dispatched instead of twelve.

2nd. Of those that arrived from Suez (the first three ships having come direct from England) only one arrived within, or to its time—the September steamer; whilst two arrived a day after time, and the remainder at periods varying from eight to ten days after time.

3rd. Of the steamers dispatched, eight left punctually, but three left after the specified time, at periods varying from seven to thirteen days.

4th. To three out of the seven Suez Mails received there was no return Mail the *same month*; in two cases the Homeward Mails having been dispatched before the arrival of the Outward Mail, and in one case there having been no dispatch of a Mail Steamer at all.

It will readily be supposed that the not being able to return replies to the correspondence received by the Monthly Mail, would have been complained of under any circumstances; but it has been felt as a still greater matter of complaint by the colonists, because on New South Wales, of all the contracting parties, from its position as the last port of arrival and first of dispatch, has the hardship chiefly fallen. In common with this Colony, on one occasion, the colonists of Victoria had no Monthly Homeward Mail, but they were enabled in every other case to reply at once to their home correspondence. I have not taken into consideration in these remarks the occasions in which the departure from Sydney of a colonial steamer, after the Mail Ship, has allowed of a supplementary Mail being placed on board the Mail Steamer at Hobson's Bay; because such arrangement entailed additional expense to the Government, and to the New South Wales correspondents, and was extraneous to the regular Mail Contract Service. The effect of these irregularities has been to make the time of communication with the United Kingdom in three cases respectively, 79, 80, and 80 days, always supposing that the homeward passages were performed in the 56 days specified, which I believe was not the case in every instance. It is evident from the above that the service could be, and indeed has been performed just as well, if not better, by sailing vessels, and of course at a much cheaper rate. I do not mean to infer that the best mode of Mail conveyance is by sailing vessels, but to shew by comparison the unsatisfactory manner in which the Mail Contract has been carried out by the E. and A. Company. Indeed the whole service has been nothing but a series of disasters and irregularities, which, so far from moderating in course of time, appears to have steadily increased.

The apologists of the company have endeavoured to palliate the non-performance of the contract, by urging in the first place the difficulties they had at the outset to encounter, and then the fact, that the voyage could not be performed regularly in the time specified. The first plea is invalid, inasmuch as the service, so far from improving

improving after the first difficulties might be supposed to have been surmounted, became, on the contrary, worse performed than ever. As to the time allowed for the transit, the contractors ought to have well considered that most important point when they made their tender, and were bound to have carried out rigidly the strict terms of a contract for which they were so amply paid. It may be well, however, to consider this latter point independently of any blame in the matter that may attach to the contractors.

It has always appeared to me that in the desire to make the communication with England as rapid as possible, not only has that object itself been defeated, but all regularity has been lost. By specifying a time for the conveyance of the Mails which was barely sufficient for the very long voyage between Sydney and Suez, and by making the delay at Sydney so short, that the slightest irregularity would cause the dispatch of the Homeward Mail to be antecedent to the arrival of the Outward one, confusion was almost inevitable. Experience has shewn, that when a very long distance by sea has to be traversed by steamers it is impossible to reckon with perfect accuracy on the day and hour of arrival, and that to ensure due allowance being made for casual delay in such time of arrival, a wide margin should be granted in fixing the interval of time between the arrival of the one Mail and the dispatch of the return one. The time now allowed for communication to and from England and Sydney is as follows :—

58 days from Southampton to Sydney.
 2 „ interval for replies.
 56 „ from Sydney to Southampton.

116 days.

I have taken the usual interval for reply, though it is in some few cases, by the Time Table, somewhat more, and in others somewhat less than 2 days.

Now, let us suppose the following Time Table to have been adopted, which, of course, gives more time than would be actually needed for the voyage, if efficient vessels were used and shorter trips made, and is only given to illustrate the subject :—

65 days from Southampton to Sydney.
 5 „ interval for replies.
 60 „ from Sydney to Southampton.

130 days.

By this Time Table 14 days more are allowed than at present, and there is every reason to believe that, even under the European and Australian Company, the contract could have thus been satisfactorily performed. The communication by such Time Table, had it been carried out, would have actually been quicker than it was in the three instances enumerated, and what is of more importance, it would have been *regular* in every case. I dwell particularly upon this point, for the reason that it has always seemed to me that hitherto the regularity of the Mail Service has been considered secondary in importance to the speed at which the Mails were to be conveyed, whereas in my opinion, the speed should never be so great as to jeopardize in the slightest degree the regularity.

An important feature in the arrangements as proposed by the Lords of the Treasury, was the establishment of Branch Lines in connexion with the Main Postal Service, and intended to benefit those Colonies not visited by the Contract Mail Ships. It was contemplated that Branch Services should be established by open competition from Melbourne, as the central point, with Port Adelaide, Van Diemen's Land, and New Zealand; and that the entire cost of the Main and the Branch Services should be equally divided between the Home Government and the Colonies collectively, each of the Colonies contributing to the moiety to be paid by them collectively in proportion to the number of letters annually dispatched by the steamers.

It was considered that "if an adjustment took place every two years, it would be sufficiently accurate for all practical purposes."

As the Lords of the Treasury considered it desirable, that the contracts for the Branch Services should be made on the spot, and as it was expedient that there should be joint action on the part of the Colonies interested, the Victorian Government proposed to the five Colonies of New South Wales, New Zealand, South Australia, Tasmania, and Western
 Australia,

Australia, that a Postal Conference should be held at Melbourne, to receive tenders for the Branch Services, and to consider any other postal questions that might arise. The New South Wales Government acceded to the proposal from Victoria, and named the Postmaster General as their representative at the Conference. The want of punctuality in the performance of the existing Mail Contract, had naturally led this Colony to consider what means should be adopted to establish a more satisfactory communication with Great Britain; and it chanced that, prior to the Postal Conference which was held in June of last year, Mr. Champion Wetton, an agent from the Royal Mail Company, together with Mr. Dillon Bell, a delegate from the New Zealand Government, visited Sydney with a view of arranging the establishment of Steam Communication *via* Panama.

Mr. Wetton's proposal was, that Mails were to be conveyed once a month to and from Sydney and Panama, touching on the homeward voyage at Wellington, and on the outward at Auckland. The head quarters of the company's fleet in the Pacific were to be established at Port Jackson, and the trunk line to run direct to Sydney; the service being performed between England and Sydney within fifty-two days during eight months of the year, and within fifty-five days during the remaining four months. The contract was to be for seven years; the service however not to commence until two years after signing the contract, and any agreement entered into in Sydney being made subject to ratification by the Directors of the Royal Mail Company. Before closing with Mr. Wetton, the Government deemed it expedient to consult the other colonies, and the representative of New South Wales was instructed to bring the matter under the notice of the Postal Conference; although at a subsequent period, the New South Wales Government, under certain conditions, closed with Mr. Wetton's offer, and agreed to pay the Royal Mail Company £50,000 per annum for the Mail Service in question, of which sum £15,000 were to be contributed by New Zealand. It is understood that the arrangement as concluded with the agent, was not ratified by the Directors of the Royal Mail Company.

At the Melbourne Conference, there were present the representatives of New South Wales, Victoria, and Tasmania. The Colonies of South and Western Australia (the former of which had already declined co-operating in the establishment of the main line, on the ground that the steamers did not touch at Port Adelaide,) failed to send representatives, and forwarded communications which amounted virtually to a refusal to co-operate. New Zealand was likewise unrepresented, although no communication as to the non-attendance was received by the Conference.

The tenders for branch lines that had been called for by the Victorian Government were opened, and it became at once apparent that some of the branch services would cost more than the subsidy to be obtained from the Colony to be benefited thereby.

The Conference resolved, therefore, that no branch service should be sanctioned, the cost of which would be more than £1,000, which was the lowest tender sent in for the performance of the monthly Mail Service between Melbourne and Hobart Town. Subject to such limitation, the Conference gave their adhesion to the plan proposed in the Treasury Warrant of 27th November, 1855, viz., that the Imperial Government should pay one-half the expense of the main and branch services required to be performed in connection with the contract *via* Suez; and that the adjustment of the Colonial contributions should be made by the British Government, each of the Colonies contributing to the moiety to be paid by them collectively, in proportion to the number of letters dispatched by each, to be ascertained every two years.

The Conference further resolved, that no Mails should be conveyed by the contract ships to or from any of the Australasian Colonies that did not pay towards the colonial subsidy; and that His Excellency the Governor General should be requested to procure the necessary authority for the Admiralty Agents to tranship to colonial steamers at Melbourne Mails for or *via* New South Wales, in all cases in which an earlier delivery in Sydney might thus be secured. With reference to the proposed postal contract *via* Panama, the representatives of Victoria and Tasmania declined co-operating with the Colony of New South Wales, as they considered that it would be premature to decide on the matter, until the provisional contract was ratified by the directors of the company that Mr. Wetton represented.

MISCELLANEOUS.

The staff of the New South Wales Post Office Department at the end of the year 1857 was as follows, viz. :—

ON 31 DECEMBER, 1856.		OFFICERS IN NEW SOUTH WALES.	ON 31 DECEMBER, 1857.	
	1	Postmaster General	1	
	3	{ Secretary, Superintendent of the Letter Branch, and Accountant	3	
	189	Postmasters	197	
	30	Clerks, &c.	30	
	5	Guards	8	
	34	Letter Carrier, Messengers, &c.	36	
263	1	Marine Mail Officer	1	276

Of the above 276 persons, 65 are attached to the General Post Office, Sydney.

I find that during the year 47 Country Postmasters have, from various reasons, been changed; that 7 clerks, mail-guards, &c., have resigned, and one been dismissed; and that 6 changes have occurred in the class of letter-carriers, messengers, &c.—2 from resignation and 4 from dismissal.

No death in the more immediate establishment occurred during the past year.

The following return shews the expenditure of the General Post Office Establishment in Sydney during the years 1856 and 1857, there being a decrease of expenditure in the latter year of £190 6s. 1d. This statement is the more satisfactory when the increase of business as shewn in the preceding heads of report is taken into consideration.

1856.

General Post Office salaries	13,955	16	10
Extra Clerical assistance	514	9	9
Overtime, sorting English Mail	198	18	0
	<u>£14,669</u>	<u>4</u>	<u>7</u>

1857.

General Post Office salaries	13,874	4	4
Extra Clerical assistance	410	10	2
Overtime, sorting English Mail	194	4	0
	<u>£14,478</u>	<u>18</u>	<u>6</u>

In the Annual Report of the Postmaster General of Great Britain, great prominence is given to the successive steps that have been taken to ameliorate the condition of the Post Office employés, and to render the postal service popular and efficient.

When it is considered that the number of persons employed in Post Office business in the British Isles alone, exclusive of Colonial Post Offices and Agents in Foreign Countries, amounted at the end of last year to 23,731 souls, their significance can hardly be overrated. In addition to the advantage of medical attendance afforded to the Post Office officials in London, the chief medical officer, in his annual report to the head of his department, enters into minute details on every matter affecting the health of the establishment; not only giving full statistics of the diseases prevalent during the year, but reporting on the ventilation of the Post Office buildings, the sanitary condition of the letter carriers' dwellings, and on the age, length of service, former status, and causes of retirement of superannuated and pensioned officers. Whilst the arrangements as to the superannuation and pensioned list are very complete, and are drawn from a fund aided by a deduction from every officer's salary, encouragement has also been given to all officers of the establishment to insure their lives for the benefit of their families, (one-fifth of the whole premium being paid by the Government;) whilst the Post Office Widows' and Orphans Society that previously existed, was extricated from difficulties by timely aid from the same source. I have understood that the

last

last liberal arrangement as to Insurance and Widows' Fund have been chiefly, if not altogether, consequent on the provision that property contained in unclaimed letters reverts, not to the general revenue of Great Britain, but to a special fund available for the Post Office.

A similar provision in this Colony would, at the present time, be of trifling aid; but, as the Colony progresses, it might become of considerable importance, and would tend so much to the benefit of the Postal Service, that I would respectfully urge its adoption at the very earliest opportunity.

I may quote, in support of my recommendation, the present state of the Police Superannuation Fund in this Colony. This fund was established in 1850, and is derived from the appropriation of that moiety of the fines and penalties awarded by the different Benches of Magistrates, which was formerly payable to *individuals* of the Police Force; and is further aided by a compulsory reduction of 2 per cent. from the salaries of every member of the Executive Police. This fund now amounts to nearly £25,000; and will not only answer its purpose of ensuring a provision for the members of the Force desirous of retiring, but has proved the strongest incentive to good men to enter the Police Service and remain therein.

In June 1852, the sanction of the Government was obtained by me to Dr. Rutter being appointed Medical Attendant to the Post Office, for the purpose of attending in sickness all the officers below the degree of clerk, and examining them (giving the requisite certificates) on their entrance into the service. It is obviously necessary that persons called on to perform duties of an active nature should be free from any important physical ailment; and that some check should exist upon those who absent themselves from work, assigning illness as the cause. Dr. Rutter has fulfilled his duties to my satisfaction, and I feel assured that the benefits conferred by the arrangement far outweigh the trifling expenditure it involves. I have reason also to believe that the letter carriers are grateful for the medical advice thus received gratuitously by them. I purpose next year requesting Dr. Rutter to furnish me with a Report, together with any remarks he may deem expedient, on the duties he has been called on to perform during the present year. Only one officer of the establishment is pensioned. Extreme deafness incapacitated him for the due performance of his duties, and he now receives a pension, after 20 years service, of £52 per annum.

At present, I regret to state, there exists no provision whatever for the widows and children of officers dying in the Post Office service. Many attempts have been made at various times by parties nearly interested in the question to establish a Civil Colonial Fund, somewhat analogous to those excellent institutions in India, Ceylon, and other Colonies; and which in so many instances have enabled families to live in comparative ease and comfort, who would otherwise have been reduced to beggary, or been dependent on the charity of others. The most systematic attempt of the kind was made in the years 1854-55, when meetings were held, composed of Government clerks of every branch of the Service, and steps taken to organize such a scheme—an Actuary being consulted as to the amount of per centage that would be necessary to secure, in addition to retiring pensions to officers in the service of the Government, a scale of allowances to widows and children of deceased officers. It was considered that the desired object would be attained, by a contribution of eight per cent. on the fixed salaries of all officers brought within the scope of the proposed measure, together with an additional contribution of six per cent. (in order to secure the retrospective operation of the fund) on each year of previous service, taking the average annual salary of the whole period of service as the basis of such per centage; and it was further proposed that the Government should provide half the above per centage and be relieved of all further expenditure on account of superannuations or pensions. As the subject is one which is intimately connected with the efficiency and popularity of the postal and every other branch of the Public Service, I have not thought it irrelevant to annex in the appendix the "provisions for incorporation in the proposed Pension Bill" which were assented to by the Government clerks at that time, together with the Actuary's Report already adverted to. Although not so stated, it was intended that the per centage payments were to be compulsory on all Government officers to whom the fund could apply.

Several improvements have been made during the past year in the means and appliances of the Post Office. The stamps used for dating letters, and for obliterating postage stamps,

stamps, have been superseded by others constructed upon a better principle and of superior workmanship; and seals of a uniform size and pattern have been substituted for the seals of various sizes and patterns that were previously in use for sealing mail bags. The importance of these changes will be more fully appreciated when it is remembered that upon the legibility of the post marks of a letter, questions of vital importance may depend. The safety of the contents of a mail depending very much upon the use of proper seals, makes *their* construction also a matter of importance; whilst the utility of well made obliterating stamps, constructed upon a uniform principle, has been proved, on many occasions; as tending to prevent stamps being used again, and the revenue defrauded; and as a check on individual Post Offices, the obliterating stamps of each office having a different number. Since the introduction of these stamps and seals, great improvement has been observed both in the stamping of letters and sealing of mail bags; although some Country Postmasters still neglect to make their stamps as clear and as distinct as they ought to do. Another improvement that must be noted is in the construction of the Letter, Newspaper, and Packet Receivers of the General Post Office. Instead of the antiquated wooden receptacles for letters and newspapers with horizontal apertures, there are now three fire-proof safes, of cast iron, with perpendicular ones. One safe, with five openings, is the box for town letters; another, with the same number, is allotted to country letters; and the third, having only one opening, is for ship letters posted at night, as these cannot then be posted in the yard. The doors of these boxes are fitted with plate glass, so that the clerks can ascertain, without unlocking them, what letters the boxes contain. Two windows, adjoining the one at which letters are posted, afford separate posting places for foreign and inland newspapers; and a new posting place, with a large aperture for book packets, (which last were formerly posted with the letters, or, when too bulky to be so posted, deposited on the tables of the lobby.) Two very desirable objects have been obtained by this improvement. The public are afforded suitable means, without overcrowding, for posting their letters, packets, and newspapers; and the letters are more secure from fire and fraud, both from the outside and the inside. The safes were made on a plan furnished by Mr. T. W. Levinge, the present Postal Inspector.

I am sorry to find that the plan of having letter-boxes on private doors, which is a saving of time to letter carriers and to servants, has not been more generally adopted. I would also point out that a good street nomenclature, and the correct numbering of houses, are great adjuncts to the correct delivery of letters. No two streets in a city or township should bear the same name; and the houses should have odd numbers on one side and even on the other; whilst all unnecessary changes in the numbering are greatly to be deprecated, as such changes tend to confusion, and to postal irregularities.

I have, &c.,

W. H. CHRISTIE,
Postmaster General.

APPENDIX.

PROVISIONS FOR INCORPORATION IN THE PROPOSED PENSION BILL.

1. Adopting generally the terms, conditions, and scale applying to officers appointed subsequently to the 4th August, 1829, as more particularly set out in the Act of Parliament 4 and 5 William IV, chap. 24, retired officers of the Civil Service of New South Wales to be entitled to pension, computed with reference to their past service and the salaries or average salaries they enjoyed during the three years preceding their retirement, in the proportions following, viz. :—

For a service of 10 and under 17 years,	three-twelfths	salary.
" 17 " 24	four-twelfths	"
" 24 " 31	five-twelfths	"
" 31 " 38	six-twelfths	"
" 38 " 45	seven-twelfths	"
" 45 and upwards	eight-twelfths	"

Intermediate periods to be taken into account rateably, and the age of 60 years to give claim to retire at will, without medical or other certificate, upon the maximum pension then due for service, in accordance with the above scale.

2. Dismissal from the Service to be followed by absolute forfeiture of all claim whatsoever upon the fund.

3. Resigning the Service to be followed by absolute forfeiture of all claim whatsoever upon the fund, unless the officer rejoin, in which case his previous shall count with his subsequent service.

4. An officer disabled to continue in office, by accident or otherwise, before serving ten years, to be entitled, on medical certificate, to a gratuity equal to half the amount of the minimum pension of his grade for one year, multiplied by the number of years he may have served.

5. An officer accepting office under Her Majesty elsewhere than in New South Wales to be entitled to the amount of his own contributions to the fund, without interest, and no more.

6. If a retired officer re-accept office under Her Majesty, his pension shall revert to the fund, unless the emoluments of his office fall short of the amount of his pension, in which case the difference only shall be made good to him out of the fund, but his subsequent shall count with his previous service on again retiring.

Families.

7. For purposes of the proposed Bill, majority in both sexes to be taken to have been attained on marriage, or at the age of 18 years.

8. Widows during widowhood, and children during minority, to be entitled to the following proportions of the pensions which the deceased officers, in respect of whom they claim, enjoyed or were entitled to at the time of their death, viz. :—

Widows without children... ..	Two-fifths.
with not more than 3 children	Three-fifths.
with more than 3 children.....	Four-fifths.

to be reduced rateably as the children attain majority or die.

9. The pension of widows, dying unmarried, to go to the children, if any survive them, but to be reduced rateably as the children attain majority or die.

10. The children of a deceased widower to be entitled, according to their number, to the same proportion of the pension which he enjoyed or was entitled to at the time of his death, as their mother would have been entitled to had she survived him, subject to be rateably reduced as they attain majority or die.

11. In the case of an officer dying before serving ten years, his widow, or his children if any survive him, to be entitled to a gratuity equal to half the amount of the minimum pension of his grade for one year, multiplied by the number of years he may have served.

12. On the marriage of a widow, with or without children, her pension immediately to revert to the fund.

The Fund.

13. The fund to be of retrospective as well as prospective operation, but contributions for retrospective service to be left optional, while those for prospective service be made compulsory.

Prospectively
Appendix A.

14. According to the Report of the Actuary hereto appended, contributions to the extent of 8 per cent. upon the fixed salaries of all officers now applying, or who may hereafter apply to be brought within the scope of the proposed measure, will be ample to secure in perpetuation the operation of the fund—4 per cent. to be contributed monthly from the General Revenue, the other 4 per cent. to be deducted monthly from the fixed salaries of the Officers.

Retrospectively
Appendix B.

15. According to another Report of the Actuary, also hereto appended, the retrospective operation of the fund will be amply secured to present officers, in proportion to their respective periods of past service, by a contribution, for each year of such service, of six per cent. upon that sum which, at the time when the proposed measure may come into operation, shall represent the average annual salary respectively enjoyed by them during the entire period of their service—3 per cent., or £36,000, to be contributed in gross from the General Revenue, in immediate establishment of the fund—the other 3 per cent. to be contributed by the officers, at such times, and for such periods of one or more whole years of past service, as they may find practicable and convenient, consistently with the compulsory deduction to which they will have to submit on account of current service.

16. Claims on the fund to be limited to the number of years for which each officer shall have contributed prospectively alone, or prospectively and retrospectively together.

Trustees.

Management.

17. Trustees to be appointed, and Rules and Regulations for vesting and managing the fund to be made, by His Excellency the Governor General, with the advice of the Executive Council.

APPENDIX A.

Retiring Pensions to Officers in the Service of the Government of New South Wales, and Allowances to Widows and Children of deceased Officers.

Report by Robert Thomson, Actuary, Sydney, on the rate per cent. on their salaries, necessary to secure to the officers the advantages set forth below :—

I. I have been called upon to calculate what rate per cent. per annum on the salaries of the officers will be sufficient to produce the following allowances :—

- 1.—A pension to officers who shall have been more than ten years in the service, which may commence on the completion of their 60th year of life, according to the scale contained in the 1st section of the "Provisions for Incorporation in the proposed Bill."
- 2.—A pension, according to the same scale, commencing at previous permanent incapacitation, and to continue during life.
- 3.—Pensions to the widows and children of deceased officers, according to the proportions set forth in the 8th section of the same paper, of the pensions which such officers were entitled to or in the receipt of at the date of their death.

II.

II. It being desired to render the fund immediately available to those officers whose past services would entitle them to become claimants in terms of the various provisions set forth in the proposed scheme, I have been desired to calculate what retrospective per centage on their salaries will be adequate to meet the proportion of risk now attributable to their cases, and, in connexion with whatever future payments they make to the fund, may be sufficient to entitle them to their pensions at any future time whatever :—

- 1.—The objects set forth under the first question will be accomplished by an annual per centage on the total salaries of £7-945, say 8 per cent., in other words, by a deduction of 4 per cent. per annum from the fixed salary of each officer, and an allowance of the like amount from the Colonial Government.
- 2.—The total retrospective rate on the salaries sufficient to raise a present fund for the objects set forth in the second question is 6 per cent. per annum, that is, 3 per cent. from Government, and a like amount from the officers, to entitle them to become participators in the advantages of this part of the scheme.

In making these calculations I have been guided by the data placed in my hands, and which I tabulated and worked upon with as much accuracy as they would permit. At best they are only approximations to the true values; I therefore made it a point to keep the calculations wide of what a course of years will probably shew to be the true rate; and have framed them at a rate of interest considerably lower than what at present rules in the Colony; yet I think I have come sufficiently near the "safety point" not to make the fund accumulate to a much higher amount than may be found necessary to meet claims.

It is to be borne in mind that I had very little certain information on any one point, and that in each particular, before I was able to make the calculations at all, I had to ascertain as nearly as possible correct averages. I had to decide on what might be the probable ages of the officers, the probable periods of service before becoming claimants on the fund, and the proportion of salary on which the allowances would fall to be made, &c., before I had any data to go upon.

In fixing the per centage for incapacitation, I had to collate my data, and the rules laid down in the scheme for adjusting this allowance, with the ascertained rate of sickness which may be called "permanent" in the same class of society in Europe.

The steps by which I arrived at the per centage for widows' and children's allowances involved the consideration of very many points on which my data would only enable me to approximate the truth.

Referring to the Retrospective Fund, it may be necessary to explain, that the calculation of the per centage necessary to form this amount was made at the same rate as that for the Permanent Fund; and that the difference of 2 per cent. per annum in the respective rates arises from the difference in the nature of the risk, so that while 8 per cent. is necessary to cover the total risk on the Permanent Fund, 6 per cent. is sufficient for the former and smaller risk, which has, during the whole past service of each officer, been borne by the individual, and the duration and extent of which are therefore correspondingly reduced.

On the fund, generally, there are no doubt several sources of profit which I have not allowed to enter materially into my calculations; the principal of which is in the fact that many officers may probably retire from the Service from various causes, leaving, of course, all their contributions to the credit of the fund. At present it is obviously unsafe to allow anything considerable on that score or on account of any other of the minor sources of profit. On the other hand, I have been careful in providing for all causes of loss.

ROBERT THOMSON,
Actuary.

353, Pitt-street, Sydney,
September 23, 1854.

APPENDIX B.

Estimate for grant on account of past services at 3 per cent.

From 1824 to 1853, a period of 30 years, salaries have been paid to the extent of about £2,498,850.

The annual mean amount will therefore be.....	£83,295
Three per cent on this	2,498-85

Supposing that the mean period of service is to be taken at 14½ years, by multiplying the above per centage by 14½ the amount of the grant will be found to be £36,233, say £36,000.

ROBERT THOMSON,
Actuary.

353, Pitt-Street, Sydney,
September, 30, 1854.

1858.

Legislative Assembly.

NEW SOUTH WALES.

STEAM POSTAL COMMUNICATION.

(DESPATCH RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 22 December, 1858.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(Circular.)

*Downing-street,**16 October, 1858.**16 October,
1858.*

SIR,

I have great satisfaction in transmitting herewith, for your information, the copy of a letter which has been received from the Board of Treasury, by which you will perceive that the Lords Commissioners have entered into arrangements with the Peninsular and Oriental Steam Navigation Company which, it is trusted, will secure to the Colonies a regular and efficient Postal Communication with this country.

I have, &c.,

GOVERNOR

SIR W. DENISON, K.C.B.,
&c., &c., &c.

E. B. LYTTON.

[Enclosure.]

*Treasury Chambers,**16 October, 1858.*

Sir,

The Lords Commissioners of Her Majesty's Treasury have directed me to acquaint you, for the information of Secretary Sir Edward Bulwer Lytton, that the steps which they have taken for procuring a new Mail Service between this country and Australia have resulted in the acceptance of the tender of the Peninsular and Oriental Steam Navigation Company, upon terms which My Lords trust will be considered satisfactory to the Colonies.

It was not without difficult and considerable discussion that a decision could be arrived at, but in the arrangement which their Lordships have now sanctioned will be found, as they believe, a reasonable guarantee for securing to the Colonies a regular and efficient postal service, with a course of post as rapid as it is possible to obtain, and at the same time, as far as practicable, in conformity with the special requirements and expressed wishes of each Colony.

The contract will be executed without delay, and will be communicated to the Colonies through the Secretary of State; but in the meanwhile it will be desirable to inform them of the general features of the new service, and My Lords request, therefore, that

* 20—

Sir

Sir E. B. Lytton will cause the necessary communication for this purpose to be addressed to the different Governments by the mail of this evening, and that they may be furnished with the Time Tables, printed copies of which will be forwarded to you without delay.

It is intended that the contract shall be for seven (7) years, commencing with the February mail from Sydney, and that the service shall include, both on the homeward and outward voyages, Mauritius, King George's Sound, Kangaroo Island, Melbourne, and Sydney, thus placing on the main line, under all circumstances, the four Australian Colonies,—Western Australia, South Australia, Victoria, and New South Wales,—leaving only Tasmania and New Zealand to be supplied with branch services, and, in the case of the latter Colony at least, this has been already established.

The annual sum for which the Company undertake the service is one hundred and eighty thousand pounds, (£180,000) exclusive of the payment of £24,000 a-year which My Lords presume the Colony of Mauritius will be willing to continue for a service better than the one which they now possess, and which My Lords hope will fully meet the wishes of the Colony, as expressed in Governor Stevenson's Despatches of 14th December, 1857, and 7th January, 1858.

The Company will bind themselves to perform the service between the extreme ports, namely, Sydney and Southampton, both on the outward and homeward voyages, in a maximum time of fifty-five (55) days, and a Time Table has been carefully framed, according to which ample time will be afforded for answering letters in the proper course of post.

It is intended that the contract shall contain, in addition to the clauses enforcing penalties for the non-fulfilment of the engagements of the company, stipulations prescribing the application of the severest tests by the Admiralty, to ensure the perfect fitness of the vessels destined to be employed in the service.

My Lords confine themselves at present to this general view of the contemplated arrangements, in which they can hardly doubt the acquiescence of the Colonies. But no time will be lost in finally settling the various details of the new service, all of which will be notified to you, in order that they may be forwarded to the Colonial Governments.

With regard to the question of establishing a second monthly service, and the advisability of adopting the Panama route as the alternative line, My Lords are carefully considering this question, in order to see how the wishes and interests of the Colonies may best be met.

It would be an essential condition of the adoption of this line that it should so far coincide in point of time with the service *vid* Suez as to make the two work entirely in harmony.

In the meantime My Lords have intimated to the public their intention of calling for tenders for the Panama route, as soon as the necessary arrangements have been completed.

I remain, &c.,

C. E. TREVELYAN.

H. Merivale, Esq.,
&c., &c., &c.

STEAM POSTAL COMMUNICATION.

(DESPATCHES RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 27 January, 1859.

No. 1

MR. ELLIOT to SIR C. E. TREVELYAN.

Downing-street,
9 November, 1858.

SIR,

With reference to your letter of the 16th ultimo, I am directed by Secretary Sir E. B. Lytton to transmit to you, to be laid before the Lords Commissioners of the Treasury, the copy of a Despatch from the Governor of New South Wales forwarding a series of Resolutions adopted by the Legislative Assembly of the Colony with regard to Postal Communication between this country and Australia. I am also to annex a copy of the answer which Sir E. B. Lytton has returned to the Governor.

No. 115, 10 Aug.,

I am, &c.,

SIR C. E. TREVELYAN, K.C.B.,
&c., &c., &c.

T. F. ELLIOT.

No. 2.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

(No. 40.)

Downing-street,
9 November, 1858.

SIR,

I have to acknowledge the receipt of your Despatch, No. 115, of the 10th August, forwarding some Resolutions adopted by the Legislative Assembly of New South Wales with reference to Steam Communication, *via* India, between this country and Australia.

On this subject you will have learned by my Circular Despatch of the 16th ultimo that, previous to the receipt of the present intelligence, measures had already been completed, in compliance with what was understood to be the general wish of all concerned in the welfare of the Australian Colonies, for securing a speedy and regular communication with those important parts of the British dominions; I hope, therefore, that on seeing the endeavour which has been made in that arrangement for promoting the general interests of the Australian Colonies, the Legislative Assembly will see reason to believe that Her Majesty's Government have made the best provision in their power for an object which can only be accomplished by mutual forbearance and concession on the part of the various colonies concerned.

I have, &c.,

GOVERNOR SIR W. DENISON, K.C.B.,
&c., &c., &c.,
New South Wales.

E. B. LYTTON.

No. 3.

THE SECRETARY OF STATE FOR THE COLONIES to THE GOVERNOR GENERAL.

Downing-street,

16 November, 1858.

SIR,

15 Nov., 1858.

With reference to your Despatch, No. 115, of the 10th August last, and to my reply of the 9th instant, I transmit to you a copy of a letter from the Treasury, written especially with reference to that Despatch, but bearing upon the whole question of the contracts for the performance of the Australian Mail Service both by Suez and by Panama. You will perceive that the Lords Commissioners of the Treasury have decided to abstain from entering upon any further arrangements, and especially with reference to the establishment of a second line *via* Panama, until Her Majesty's Government shall have been informed distinctly of the feelings of the different colonies as to the practicability and eligibility of that route for the performance of a service alternating and harmonizing with that *via* Suez, and until they shall also have received a distinct statement of the amount which each colony would be willing to contribute in aid thereof, and for what period.

16 Nov., 1858.

I also enclose a further letter from the Treasury in connexion with the subject of the contract recently entered into, and I have to request that you will attend to their Lordships' wishes on certain points of detail as expressed in that letter, and in their Lordships' Minute.

I have, &c.,

E. B. LYTTON.

GOVERNOR SIR WILLIAM DENISON, K.C.B.,

&c., &c., &c.

No. 4.

MR HAMILTON to MR. MERIVALE.

(Immediate.)

Treasury Chambers,

15 November, 1858.

SIR,

I have laid before the Lords Commissioners of Her Majesty's Treasury your letter of the 9th instant, transmitting a copy of a Despatch from the Governor of New South Wales, and of its enclosures, together with a copy of the answer returned to the Governor by Secretary Sir E. B. Lytton, on the subject of Postal Communication between this country and Australia, and I am desired by their Lordships to state, for the information of Sir E. B. Lytton, that they utterly concur in the observations contained in his Despatch.

It will be impossible, My Lords apprehend, to arrive at the establishment of an efficient service suitable to the wishes and interests of the various Australian Colonies, unless some general plan of action can be adopted with the acquiescence of all parties, and with the mutual forbearance and concession so judiciously urged by the Secretary of State.

Considering that this country represents the largest individual interest in the promotion of the undertaking, and offers more available means for establishing a service than the Colonies, Her Majesty's Government willingly consented to use their endeavours with a view of making such arrangements as, upon mature deliberation, would appear to be most beneficial both to Great Britain and to Australia.

The sudden failure of the late contractors placed Her Majesty's Government in a very difficult position; they felt it was necessary to take prompt measures to prevent the interruption of the communication; they have now succeeded, relying upon the co-operation of the Colonies in establishing what they have no doubt will prove a regular and efficient service by Suez. They are willing to consider the subject of second service by Panama, and they would regret if a want of co-operation upon the part of the Colonies were to disturb the uniformity of those arrangements, and render their efforts nugatory.

In reference to the establishment of the second route *via* Panama, My Lords have observed with satisfaction that the subject is now engaging the attention of the Colonies, as their desire to see this line of communication opened up, in conformity with the intimation conveyed in the notice appended to the advertisement for the service *via* Suez, continues unabated.

At

At the same time, My Lords cannot but feel that the amount of subsidy requisite for this service must of necessity be very large; and that however desirous they may be to see it established, there are limits beyond which it would not be justifiable to go in the contribution to be made by the Imperial Government.

My Lords are desirous, therefore, of eliciting from all the Colonies an express opinion as to the practicability and eligibility of this route for the performance of a service alternating and harmonizing with that *via* Suez; and also a distinct statement of the amount of subsidy which each Government would be willing to contribute in aid thereof, and for what period.

One of the Resolutions (No. 5) of the Legislative Assembly at New South Wales, enclosed in Sir William Denison's Despatch, states, with reference to subsidizing a line *via* Panama,—“the question of cost is not the first for consideration.”

Should the other Colonies be inclined to consider the question in the same liberal spirit, strong grounds would be afforded for ascertaining by tender in this country the cost at which the service could be obtained, and for establishing it, if the terms should appear reasonable.

At the same time, My Lords are unable to agree with the opinion expressed in the second Resolution of the Legislative Assembly of New South Wales,—“that any new arrangement for the performance of the Mail Service by the India route, though it ensured postal regularity and speed, would confer no other considerable benefit on New South Wales;” nor can they believe that the Colony will hesitate to contribute its fair proportion to any service which offers the advantages of regular and prompt communication with the Mother Country.

My Lords presume, therefore, that the subsidy which the Colony of New South Wales express themselves ready to contribute towards a line *via* Panama will be independent of and in addition to that for the Suez service.

With regard to the opinion which prevails in this country, as to the necessity for the adoption of the Panama line, My Lords think it right to mention that the Postmaster General has expressed a strong opinion, that so far as postal considerations are concerned the second service is not at present required.

A plan has been suggested in reference to the Suez route, on the principle of the Colonies, by their joint action, arranging for the service from Australia to some intermediate point between this country and these Colonies, and although it has not been thought advisable to adopt this principle under the new arrangements, My Lords would not be unwilling to consider any suggestions of a similar nature in reference to the contemplated service by way of Panama.

With these remarks My Lords, being satisfied that no interruption is likely to occur in the present monthly communication, leave the question of the second service until they shall have received answers from the Colonies upon the points above-mentioned.

Should the opinion thus expressed be sufficiently satisfactory and unanimous, My Lords will at once apply themselves to consider the best means of carrying out the wishes of the Colonies, upon the most favorable terms they may be able to obtain.

H. MERIVALE, ESQ.,
&c., &c., &c.

I am, &c.,
GEO. A. HAMILTON.

No. 5.

SIR C. E. TREVELYAN to MR. MERIVALE.

Treasury Chambers,
16 November, 1853.

SIR,

I am desired by the Lords Commissioners of Her Majesty's Treasury to transmit, for the information of Secretary Sir E. B. Lytton, the enclosed copy of their Lordships' Minute of this day's date, and of the enclosures referred to therein, on the subject of the expenditure with respect to the Postal Communication between this country and the Australian Colonies; and I am to request that you will move the Secretary of State to cause the same to be communicated to the Australian Colonies without delay.

As

As regards the mode in which the payments are to be made by the Colonial Governments for the Mail Service, I am to state, that they should be instructed to cause the amounts to be paid into the Treasury Chests in charge of the Commissariat Officers at the different stations, to whom the necessary instructions will be issued to receive the same.

I am, &c.,

H. MERIVALE, ESQ.,
&c., &c., &c.

C. E. TREVELYAN.

[Enclosure in No. 5.]

Copy Treasury Minute. Dated 15 November, 1858.

My Lords advert to the Minute of the late Board of Treasury, dated 27th November, 1855, respecting the establishment of Postal Communication between Great Britain and the Australian Colonies, in which the principle is laid down that the subsidy payable to the Contractors for the performance of the service shall be contributed in equal moieties between the Imperial Government on the one hand, and the Colonies collectively on the other hand, and that as between the Colonies themselves, the payment of each shall be in relative proportion to the number of letters received and dispatched on account of each, such proportion to be ascertained and adjusted in every three years. And it was further proposed that the Home Government should, in the first instance, defray the entire cost of the service, and should be reimbursed by the Colonies to the extent of one-half. These arrangements received, eventually, the acquiescence of the Colonies.

Since the 1st January, 1857, a service established on this principle has been performed between this country and Australia, and the subsidy has been entirely advanced by Her Majesty's Government, but no adjustment has yet been made, nor has any contribution been received from the Colonies.

Statements have now been furnished by the Admiralty and by the Postmaster General shewing the sums which have been paid on account of the Australian Mail Service from its commencement by the European and Australian Company up to the 30th September last, after deducting all penalties incurred, and also of the number of letters conveyed between Great Britain and the Colonies during the year 1857.

My Lords have also before them calculations apportioning to the different Colonies the payments due by them for past services, those which will be due, and for which they may be liable up to the time of the commencement of the new service, and, finally, the amount which will have to be contributed by each under the contract of the Peninsular and Oriental Steam Navigation Company. This calculation is based upon the principle laid down in the Minute of November, 1855, the relative proportions being fixed by reference to the correspondence attributed to each Colony in the return of the Postmaster General.

It appears to my Lords advisable to adjust the accounts between Her Majesty's Government and the Colonies without delay in accordance with the above calculation, upon the understanding that a re-adjustment shall take place in a similar manner at the expiration of three years, or sooner if there shall appear sufficient reason.

COLONIES.	Receipt of Letters for each Colony.	Per Centage for each Colony.	1.		2.		* 3.	4.	5.

STEAM POSTAL COMMUNICATION.

No. 1.

THE COLONIAL SECRETARY, AUCKLAND, to THE COLONIAL SECRETARY, NEW SOUTH WALES.

New Zealand,

Colonial Secretary's Office,

Auckland, 7 April, 1858.

SIR,

I have the honor to acknowledge the receipt of your letter, No. 12, of the 27th of February last, respecting the irregular manner in which the Mail Service between England and the Australian Colonies has been performed by the European and Australian Royal Mail Company, in which you state that the subject of that Steam Postal Service is under the serious consideration of the Government of New South Wales, and invite suggestions from this Government, with a view to the proposal of some plan by which a speedy and regular communication may be secured.

In reply, I have the honor to inform you that this Government is deeply sensible of the irregularities alluded to by you, and will willingly join in the remonstrance which you state is to be made to the Imperial Government on the subject.

While, however, New Zealand shares in the general sources of complaint to which you allude, it has a further special right to protest, on the grounds that the Suez Steam Service has never been continued to New Zealand, in accordance with the conditions of the original Treasury Minute of November, 1855; had that condition not been a part of the proposed arrangement, New Zealand could not have been invited or expected to contribute to a service which, in so far as it has yet been carried out, has rather confused and delayed than facilitated its correspondence with Great Britain.

It was this consideration which led to the proposal for establishing the Panama Line being so favorably received, and should the latter line not be established, at least for the present, the assent of this Colony to any new Contract for a Mail Service, *via* Suez, can only be secured on the condition that a Branch Service to New Zealand from Sydney or Melbourne in connection with such service be made part of the new Contract.

In the event of a new Contract being entered into for the conveyance of the Mails *via* Suez, I would suggest that a change of steamers should take place at Point de Galle. Not only would this insure that time was afforded on each voyage for a due inspection of the vessels, the want of which is likely to lead to constantly recurring defects in the machinery, but it would afford a direct means of communication between India and the Australian Colonies, which could not fail to be advantageous to the latter.

I beg to express my thanks for the desire evinced by the Government of New South Wales to co-operate in an united endeavour to obtain a measure mutually advantageous to the Australian Colonies, and to assure you that this Government will at all times be ready, in this or any other matter, to act with a regard for the common interests of their fellow-colonists in this part of Her Majesty's dominions.

I have, &c.,

E. W. STAFFORD.

THE HONORABLE

THE COLONIAL SECRETARY,
New South Wales.

No. 2

No. 2.

THE COLONIAL SECRETARY, NEW ZEALAND, & THE COLONIAL SECRETARY,
NEW SOUTH WALES.

New Zealand.

Colonial Secretary's Office,

Auckland, 16 April, 1858.

SIR,

I have the honor to acknowledge the receipt of your letter, No. 19, of the 15th ultimo, enclosing copy of a letter addressed by the Government of New South Wales to Mr. Watton, respecting the Conveyance of Mails between England and Australia, *via* Panama, and to convey to you my thanks for the same.

I have, &c.,

E. W. STAFFORD.

THE HONORABLE

THE COLONIAL SECRETARY,

Sydney, New South Wales.

No. 3.

THE COLONIAL SECRETARY, NEW SOUTH WALES, to THE CHIEF SECRETARY, VICTORIA.

Colonial Secretary's Office,

Sydney, New South Wales,

31 August, 1858.

SIR,

With reference to my letter of the 27th of February last, on the subject of the Steam Postal Service between the United Kingdom and the Australasian Colonies, I have now the honor to transmit for your information, copies of the Minutes of the Proceedings of the Executive Council of this Colony, in consequence of an Address presented to His Excellency the Governor General by the Legislative Assembly on the 6th instant; and of the receipt of intelligence which has, no doubt, also reached Victoria, that the present Contract with the "European and Australian Royal Mail Company" has been dissolved; and that a temporary arrangement only, has been made for carrying on the Australasian Mail Service which will not extend beyond the end of 1858.

Laid before
the Assembly
27th August,
1858.

2. It seems to be generally admitted, that the object of a frequent and regular communication between these Colonies and all the civilized parts of the Globe, would be best attained by maintaining a line to Ceylon, and from thence to England and India, on the one hand; and to Panama, and from thence to England and North and South America, on the other. This result might, it is conceived, be secured by an arrangement between the Imperial Government and the Australasian Colonies; the former, in consideration of the receipt of the postage paid in England, engaging to deliver their letters at Point de Galle on the first line, and at Panama on the second line; the latter undertaking to convey the Mails between Australia and Point de Galle and Panama; each Colony receiving, as at present, the postage charged upon its letters, and contributing to the expense in proportion to the number of letters sent from each.

3. In order, however, to avoid the difficulties arising, or likely to arise, from having too many parties to the contract, it seems desirable that the Contract for the line *via* Ceylon should be made by the Government of Victoria, and that for the Panama line by the Government of New South Wales; the cost of the two lines being divided between the Australasian Colonies in proportion to the number of letters despatched from each, as before mentioned; and I have accordingly to request, that you will favor me by stating the views of the Government of Victoria on the subject, and whether that Colony will be prepared to undertake to carry out the arrangement for the line to Ceylon. It will be observed, that in both cases it is proposed that a Postal Service only should be provided for, as it is considered that should the passenger and goods traffic be likely to prove remunerative the Contractors will make the necessary arrangements for its accommodation.

4. In the event of the contemplated measures being carried out, the Colonies of Victoria and New South Wales would, of course, have to arrange with those adjoining for the branch services to each, as was suggested when a contract for the conveyance of the mails by way of Panama, was formerly under consideration.

5. This Government has already adopted steps towards giving effect to the arrangements which have been recommended with a view to the establishment of a service by way of

of

of Panama, by inviting the Legislative Assembly to make provision, by appropriating the necessary funds for the purpose, for a period of seven or ten years, and further measures will be taken, without delay, in accordance with the opinions expressed in the documents now transmitted.

6. In one of these documents, the Minute of the Executive Council of the 16th of August, 1858, you will perceive it stated that the Government of New South Wales never contemplated the establishment of a separate and distinct line all the way from England to Australia; and, in a communication which has been addressed by the Governor General to the Secretary of State, His Excellency has urged upon the attention of Her Majesty's Government the principle which has been affirmed by a Resolution of the Legislative Assembly, "that in any future Contract for the Mail Service it is not for the interests of New South Wales that the Imperial Government should make any arrangement binding on this Colony without previous reference thereto."

I have, &c.,

CHARLES COWPER.

THE HONORABLE
THE CHIEF SECRETARY
OF VICTORIA.

No. 4.

THE COLONIAL SECRETARY, NEW SOUTH WALES, to THE CHIEF SECRETARY, VICTORIA.

Colonial Secretary's Office,

Sydney, New South Wales,

10 September, 1858.

SIR,

With reference to my letter of the 31st ultimo, on the subject of a Steam Postal Service between the United Kingdom and the Australian Colonies, I have now the honor to enclose, for the information of the Government of Victoria, copies of the Resolutions upon the same question which have since been adopted by the Legislative Assembly.

2. These Resolutions indicate fully the course which it seems to this Government desirable should be followed, for providing effectually for these Postal Services.

I have, &c.,

CHARLES COWPER.

THE HONORABLE
THE CHIEF SECRETARY OF VICTORIA.

[Enclosure in No. 4.]

RESOLUTIONS of the Legislative Assembly, on the 8th of September, 1858, respecting Steam Postal Communication.

- (1.) That a sum not exceeding £50,000 per annum be appropriated for ten years towards defraying the cost of establishing Steam Postal Communication, monthly, between Sydney and Panama, under a Contract to be entered into by the Imperial Government and the Government of New South Wales, with parties willing and competent to undertake the service.
- (2.) That application be made to the Imperial Government to authorize the conveyance of the Mails for the Australasian Colonies, under the Contract already entered into for Steam Postal Communication between London and Aspinwall.
- (3.) That the Imperial Government be also requested to take the necessary steps for securing the conveyance of the Australian Mails, by the Railway, from Aspinwall to Panama.
- (4.) That the Colonies of Victoria, Tasmania, South Australia, and New Zealand, be also requested to co-operate with the Government of New South Wales, in undertaking to pay an equitable contribution for the advantages which may be afforded to them respectively by the establishment of such means of communication.
- (5.) That the Government of Victoria be invited to contract in a similar way for the establishment of a monthly Steam Postal Communication between Melbourne and Suez or Point de Galle.
- (6.) That in the event of Victoria co-operating with New South Wales in defraying the cost of the Mail Contract *via* Panama, this Colony ought to co-operate with the Government of Victoria in paying an equitable amount for the conveyance of letters by the Point de Galle route.
- (7.) That the expense which may be incurred in establishing either or both of these Postal Services should be borne in equal proportions by the Imperial Government and the Australian Colonies.
- (8.) That letters brought by either the Panama or Galle mail routes be conveyed by each Colony for which they are directed by such arrangement as may be respectively determined.

No. 5.

THE COLONIAL SECRETARY, NEW SOUTH WALES, to THE COLONIAL SECRETARY, TASMANIA.

*Colonial Secretary's Office,
Sydney, New South Wales,
11 September, 1858.*

SIR,

With reference to my letter of the 27th of February last, on the subject of Steam Postal Service between the United Kingdom and the Australasian Colonies, and to a communication of the 15th March from the Colonial Treasurer of Tasmania, I have now the honor to transmit, for your information, copies of the Minutes of the Proceedings of the Executive Council of this Colony in consequence of an Address presented to the Governor General by the Legislative Assembly on the 6th ultimo, and of the receipt of intelligence that the present Contract with the European and Australian Royal Mail Company has been dissolved, and that a temporary arrangement only has been made for carrying on the Australasian Mail Service, which will not extend beyond the end of 1858; and I also enclose copies of Resolutions which have since been adopted by the Assembly, which indicate fully the arrangements by which it seems to this Government that future Postal Service may be most effectually provided for.

2. It will be observed that it is proposed that there should be two lines of communication, one by way of Panama, and the other by Ceylon, the cost of the former being defrayed by New South Wales, and the latter by Victoria, in concert, in both cases, with the Imperial Government, but that the adjoining Colonies should be invited to co-operate by undertaking to pay an equitable contribution, calculated on the principle laid down in the Minutes of the Executive Council, for the advantages which they will derive from the Contracts which may be entered into.

3. I have, therefore, the honor to request that you will favor me by stating how far the Government of Tasmania will be prepared to co-operate with New South Wales in the establishment, in the manner proposed, of a Postal Service by way of Panama.

4. I have addressed a communication to the Government of Victoria, on the general question discussed in the accompanying papers, as well as with respect to the arrangements for the establishment of the line by way of Ceylon, which it has been suggested should be arranged by that Colony and the Imperial Government.

I have, &c.,
CHARLES COWPER.

THE HONORABLE
THE COLONIAL SECRETARY,
Tasmania.

No. 6.

[Similar letter addressed to the Honorable the Chief Secretary, South Australia, dated 11th September, 1858, with following alteration, "and to your communication of "15th March."]

No. 7.

THE COLONIAL SECRETARY, NEW SOUTH WALES to THE COLONIAL SECRETARY,
NEW ZEALAND.

*Colonial Secretary's Office,
Sydney, New South Wales,
17 September, 1858.*

SIR,

With reference to my letter of the 27th February last, and also to your communication of the 7th of April, respecting the Steam Postal Service between the United Kingdom and the Australasian Colonies, I have now the honor to transmit, for your information, copies of the Minutes of the Proceedings of the Executive Council of this Colony, in consequence of an Address presented to the Governor General by the Legislative Assembly, on the 6th ultimo, on the subject, and also of the Resolutions which have since

been adopted by the Assembly, which indicate fully the arrangements by which it seems to this Government that the future conveyance of the Mails may be most effectually provided for.

2. It will be observed that it is proposed that there should be two lines of communication, and that for one of these, namely, that by way of Panama, the Contract should be made by the Imperial Government and the Government of New South Wales, and that the other, by Suez and Point de Galle, should be arranged for in a similar way by the Imperial Government and the Government of Victoria; the adjoining Colonies being requested to contribute towards the establishment of these lines in return for the advantages which may be offered to them respectively.

3. As the Colony of New Zealand will largely participate in the benefits which may be expected to be derived from the establishment of a Steam Postal Service by way of Panama, the Government of New South Wales confidently anticipates the co-operation of your Government in the arrangement; and I have, therefore, to request that you will favor me by stating whether New Zealand would be prepared to contribute towards carrying it into effect, in the same manner as was intended when a similar service was formerly proposed.

4. I have forwarded to Victoria, and the other adjoining Colonies, copies of the papers now enclosed, for their information; and invited them, at the same time, to unite with New South Wales in this effort to obtain Steam Postal Communication between the United Kingdom and the Australasian Colonies by way of Panama.

I have, &c.,

CHARLES COWPER.

THE HONORABLE

THE COLONIAL SECRETARY,
Auckland, New Zealand.

No. 8.

THE CHIEF SECRETARY, SOUTH AUSTRALIA, to THE COLONIAL SECRETARY, NEW SOUTH WALES.

South Australia,

Chief Secretary's Office,

Adelaide, 11 October, 1858.

SIR,

I have the honor, by instructions of Sir Richard Graves MacDonnell, to forward, for the information of Sir Wm. Denison, copy of a Resolution of the Legislative Council of South Australia on the subject of a combined action on the part of the Australian Colonies with the Home Government for the establishment of a Monthly Postal Service between Great Britain and Australia,—calling off Port Adelaide each way; and I have to request that you will favor me by stating whether the Government of New South Wales is prepared to co-operate in carrying such an arrangement into effect.

I have, &c.,

W. YOUNGHUSBAND,

Chief Secretary.

THE HONORABLE

THE COLONIAL SECRETARY,
New South Wales.

[Enclosure in No. 8.]

“ That it is the opinion of this Council that, in consequence of the failure of the contract entered into by the British Government with the European and Australian Mail Company for the conveyance of the Australian Mails, it is desirable that the Colonies of New South Wales, Victoria, Tasmania, and South Australia, should unite in recommending to the Home Government that an arrangement be entered into for the conveyance of a monthly mail to and from Great Britain and Australia, calling off Port Adelaide each way; and that an Address be presented to His Excellency the Governor-in-Chief, requesting him to communicate with the Governments of the aforesaid Colonies, with the view of ascertaining how far they may be disposed to join in such a measure; and, also, that he will take whatever other steps may be found advisable for perfecting this important matter.”

No. 9.

THE CHIEF SECRETARY, SOUTH AUSTRALIA, to THE COLONIAL SECRETARY, NEW
SOUTH WALES.

South Australia,
Chief Secretary's Office,
Adelaide, 11 October, 1858.

SIR,

By instruction from Sir R. G. MacDonnell, I have the honor to acknowledge the receipt of your communication, dated 11th September last, with its various enclosures indicating the arrangements by which it seems to the Government of New South Wales that the future Postal Service with England may be most effectually provided for. This Despatch, together with the documents enclosed, have received the careful consideration of this Government, and I have to state, that, whilst the advantages which would accrue to South Australia from a Postal Service to England *via* Sydney and Panama appear to be of too doubtful and contingent a character to warrant this Colony, at the present moment, in contributing any direct subsidy towards such a scheme, yet, that the postage on letters between South Australia and England by that route might, to a certain extent, assist in reimbursing the Government of New South Wales for the outlay incurred, and that this Government would be glad, in the event of the Panama line being established, to enter into an arrangement by which the amount of such Postages would be collected in the Colony for the benefit of New South Wales.

In order that you may the more fully comprehend the views entertained by the Government of South Australia on the subject of Postal Communication with Great Britain, I transmit herewith a copy of a Despatch addressed to the Secretary of State by the Governor-in-Chief, and another by myself to the Directors of the Peninsular and Oriental Steam Navigation Company, shewing the desire of this Colony to combine with the other Australian Colonies in a joint contract for the performance of the Postal Service, provided the steamers call off Port Adelaide both in their outward and homeward voyage.

Should this proposition, however, not meet with the concurrence and support of the other Colonial Governments, I have good reason for supposing that the Legislature of South Australia would be prepared to vote a sum sufficiently large, when supplemented by the Imperial Government to secure a line of communication direct between Adelaide and Great Britain, in connection with any of the terminal points fixed under existing contracts held by the Peninsular and Oriental Steam Navigation Company, either Galle, Singapore, or Mauritius, as might be found most expedient and economical.

I have, &c.,

W. YOUNHUSBAND,
Chief Secretary.

THE HONORABLE
THE COLONIAL SECRETARY
New South Wales.

[Enclosure 1 in No. 9.]

Government House, Adelaide,
9 September, 1858.

Sir,

1. I wish to acknowledge, specially, receipt of your Circular Despatch of the 10th June, informing me of the dissolution of the Contract made by Her Majesty's Government with the European and Australian Royal Mail Company, and also of the intention of Her Majesty's Government to invite Tenders for a fresh Contract,—the conditions "modifying the terms in such particulars as experience may have shewn to be necessary."

2. I have laid that Despatch before my responsible advisers; and, whilst we regret the failure of the hopes expressed in Lord Stanley's Circular Despatch of the 13th March—that the measures then taken would ensure a greater degree of punctuality in the performance of the Mail Service—both I and my Ministry nevertheless feel assured that Her Majesty's Government is now in a better position to take effectual measures to prevent the recurrence of delays heretofore made the subject of such frequent complaints.

Vide Secretary of State to Governor. No. 46, 14 Nov., 1857.

Vide Governor to Secretary of State. No. 194, 10 Nov., 1857.

3. As Her Majesty's Government—in accordance with my Despatches 155, 156, and 157—have signified their assent to the proposal contained therein, that the homeward bound Mail Steamers should call at Kangaroo Island, on condition of this Colony passing an Act to contribute to the then existing contract,—and as that condition has been since fulfilled,—I presume that one of the stipulations in any fresh Contract will enforce the calling of the homeward bound steamers at some point in this Colony.

4. I would, however, suggest for the consideration of Her Majesty's Government:—
1st. Whether it be any longer desirable to ignore—even partially—the natural claims of this Colony, from its geographical position, to be visited as well by the outward as the homeward bound Mail Steamers.

2nd. I would further suggest that—as the telegraphic communication between Port Adelaide and Melbourne is now complete, and cannot be completed to Nepean Bay, except at great expense, and after considerable delay—it might be found more convenient, both on this account as well as for other reasons, that the Mail Steamers should call at the Light Ship off Port Adelaide, instead of at Nepean Bay.

5. I have not as yet communicated with the Governors of the other Australian Colonies, but it is my intention to do so; and I can scarcely imagine any serious objection being made to such an arrangement—at least *ad interim*—as it would enable the Melbourne community at once, and, ere long, that of Sydney also, to receive European news nearly fifty hours earlier than would otherwise be possible.

6. Meantime, as this Government wishes to repose, as far as possible, on the wisdom and efficacy of the arrangements which Her Majesty's Government may make, I have thought it desirable, on the eve of a fresh Contract being entered into, to draw your attention to the feasibility of inserting therein some such stipulations. It seem to me and my Ministry that they may, perhaps, be found to entail no additional, or, at least, very little additional expense or delay, and yet render justice to the position of this Colony, without inconveniencing others.

I have, &c.,

RICHARD GRAVES MACDONELL.

Governor.

The Right Honorable
Sir E. L. Bulwer, Bart.

[Enclosure 2 in No. 9.]

South Australia,

Chief Secretary's Office,

Adelaide, 5 October, 1858.

Sir,

I am directed by His Excellency Sir Richard Graves MacDonnell to request that the Directors of the Peninsular and Oriental Steam Navigation Company will furnish me with information on the following points:—

1st. In the event of South Australia not combining with the other Colonies in a Contract for conducting Steam Postal Communication with England, whether the Directors of the P. & O. Company would feel disposed to enter into arrangements with this Colony alone, for that object?

2nd. What would be the speediest and most economical route to connect South Australia with some terminal point of the existing lines of the P. & O. Company, more especially with that of the Mauritius?

3rd. The amount of subsidy which the P. & O. Company would require to induce them to undertake a service of this character;—such service to be performed by a class of vessels best adapted for the quick conveyance of Mails; the size and passenger accommodation of such vessels being left to their own consideration?

I have only further to add, that in case the other Colonies determine to ignore the geographical position of South Australia, and decline to become parties to a general Contract, by which the Postal Steamers would touch off Adelaide both on the outward and homeward voyage, I have reason to believe that the Legislature of this Colony would be prepared to vote a sum of money—by way of subsidy—sufficiently liberal, when assisted by the Imperial Government, to meet any fair and equitable requirements of the P. & O. Company for the establishment of a Mail Service between England and Adelaide, should it concur with their views and interest to entertain the project.

I have, &c.,

W. YOUNGHUSBAND,

Chief Secretary.

The Secretary to the
Peninsular and Oriental
Steam Navigation Company.

No. 10.

THE COLONIAL SECRETARY, NEW ZEALAND, to THE COLONIAL SECRETARY, NEW
SOUTH WALES.

New Zealand.

Colonial Secretary's Office,

Auckland, 1 November, 1858.

SIR,

I have the honor to acknowledge the receipt of your letter of the 17th September last, transmitting copies of the Minutes of the Executive Council of New South Wales, and also of Resolutions which have since been adopted by the Assembly of that Colony, on the subject of the Steam Postal Service between the United Kingdom and the Australasian Colonies.

In reply, I have to inform you that the Government of New Zealand approves generally of the proposal conveyed in those papers, and will be happy to co-operate with the Australian Colonies in establishing efficient Steam Communication between Great Britain and Australasia.

I observe, however, with reference to the proposed line *via* Panama, that it is not stated whether it is intended that the steamers on that line should call, both going and returning, at New Zealand, as was contemplated when Mr. Wetton's offer was made and agreed to. This condition would be necessary, to enable New Zealand to receive an advantage from that route correspondent to the increased expenditure which it would entail. It is the more necessary that this should be stated, as the amount of a contribution from New Zealand to any new Postal Service, must of course depend on the advantages which it may receive.

With respect to the amount of the subsidy to be borne by Great Britain and the Australasian Colonies respectively, it would appear preferable that an equal share of the whole amount should be paid by the Imperial Government, on the one part, and by the Colonial Governments, on the other part, rather than that the former should pay for the Mails to Point-de-Galle and Panama only; as by the latter arrangement Great Britain would, from being able to avail itself of the vessels of the Panama, Oriental, and Royal Mail Companies, be required to provide a comparatively small portion of the whole cost of the proposed services, from which it must be expected to benefit to at least an equal extent as the Colonies concerned.

I have, &c.,

E. W. STAFFORD.

THE HONORABLE
THE COLONIAL SECRETARY,
Sydney, New South Wales.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

STEAM POSTAL SERVICE *viâ* PANAMA.

(INSTRUCTIONS TO E. C. MEREWETHER, ESQ. RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 12 January, 1859.

RETURN to an *Address* from the Honorable the Legislative Assembly of New South Wales to the Governor General, dated 7 January, 1859, praying that His Excellency would be pleased to cause to be laid upon the Table:—

“ Copy of all Instructions handed to Edward C. Merewether,
 “ Esq., upon the subject of his mission to Europe on the business
 “ of the proposed Postal Service between Australia and Great
 “ Britain *viâ* Panama.”

(Mr. Donaldson.)

SCHEDULE.

No.	PAGE.
1. Under Secretary to Edward C. Merewether, Esq., apprising him of his appointment as Agent from this Government, in negotiating for a Contract for a Steam Postal Service with the United Kingdom <i>viâ</i> Panama. 24 November, 1858	2
2. Do. to do. instructions for his guidance in carrying out the duty entrusted to him. 10 December, 1858	3.

STEAM POSTAL SERVICE *via* PANAMA.

No. 1.

THE UNDER SECRETARY to EDWARD C. MEREWETHER, Esq.

No. 58-80.

Colonial Secretary's Office,

Sydney, 24 November, 1858.

SIR,

I am directed by the Colonial Secretary to inform you that it has been deemed expedient that an agent from this Government should proceed to England, and, under instructions to be given to him before leaving the Colony, to negotiate for, and assist in carrying out to a successful issue, a contract for a Steam Postal Service with the United Kingdom *via* Panama; and that as, from your position as Clerk of the Executive Council, you have had full opportunity of acquiring an intimate knowledge of the views of the Government upon this particular question, His Excellency the Governor General, with the advice of the Council, has been pleased to confer upon you the appointment of Agent.

2. You are aware that, acting upon the recommendation of the Council in their proceedings of the 23rd of August, of which I enclose a copy, the Governor General, by Message, invited the Legislative Assembly to appropriate towards the establishment of the the Panama route, a sum of £50,000 for any period not exceeding ten years. That Message was taken into consideration on the 8th September, and the Assembly passed a series of Resolutions adopting the proposal, and, in substance, affirming the views of the Council. A Bill was accordingly introduced by the Government to authorise the appropriation of the amount, and, having passed both Houses, has recently received the Royal Assent.

3. Under these circumstances it is considered desirable that prompt measures should be taken to secure the contemplated communication as speedily as possible; and it is with this view that the appointment of an Agent has been decided on. It is proposed that you should, upon your arrival in England, place yourself in communication with the proper authorities, and urge on, with all the ability and energy you can bring to bear upon the subject, the arrangement so earnestly desired by the Colonists of New South Wales. The Resolutions of the Assembly, a copy of which is appended hereto, will form the basis of the instructions to be given to you, and of the contract or arrangement; and it is proposed that a small number of Colonists, at present in London, who are known to be favorable to the Panama route, should be associated with you as a Committee for consultation, in order that you may refer to them for advice when in doubt or difficulty.

4. For performing this duty you will receive the following salary and allowances, to be charged against the special appropriation authorised by the Parliament for the Panama route, viz. :—

1st. Salary at the rate of £600 a-year during the whole period of employment upon the special service, which will be held to include one month beyond the time when the mission may be regarded as closed, as also the time occupied in the return voyage.

2nd. An allowance of two guineas a day, to commence upon arrival in England, and to cease upon the closing of the mission. Such allowance to cover all expenses, except those which may be distinctly incurred on behalf of the Government of New South Wales in carrying out the objects of the mission.

3rd. The cost of passage to and from England, as also that of any other voyage which may be undertaken in furtherance of the mission.

5. The Council have further desired it to be recorded, that in accepting the appointment of Agent you only temporarily vacate your office of Clerk of the Executive Council, and that it is clearly understood that you will be entitled to resume it upon your return to the Colony.

6. I am directed to add, that it is the opinion of the Government that your departure should not be delayed beyond the time at which the December mail should leave the Colony, and to request that you will prepare and submit, with as little delay as possible, a draft of the instructions with which you would, in your present knowledge of the views and wishes of the Government, desire to be furnished, in order to enable you fully to carry out these views.

I have, &c.,

EDWARD C. MEREWETHER, Esq.

No.

No. 2.

THE UNDER SECRETARY to EDWARD C. MEREWETHER, Esq.

Colonial Secretary's Office,

Sydney, 10 December, 1858.

SIR,

Referring to my letter of the 24th ultimo, I am now directed to communicate the following instructions which have received the approval of His Excellency the Governor General and the Executive Council, and will, it is considered, suffice for your guidance in carrying out the duty which has been entrusted to you.

2. A passage having been provided for you in the Mail Steamer "Columbian," which is to sail on the 11th instant, you will proceed by that vessel in furtherance of the important object of your mission; and upon your arrival in London you will present the accompanying Despatch from His Excellency the Governor General to the Right Honorable the Secretary of State for the Colonies, accrediting you to Her Majesty's Government.

3. From the intelligence which has reached the Colony by the last mail, it seems not improbable you may find when you reach England that preliminary steps have been already taken for entering into a Contract for the Postal Service *via* Panama. A postscript to the Admiralty Notice, inviting tenders for the conveyance of Mails *via* Gibraltar and Suez, intimates that so soon as those arrangements were completed, it was the intention of the Government to call for tenders for a Monthly Steam Communication with Australia *via* Panama, in addition to the Service *via* Suez. It may, therefore, fairly be assumed from this notification, that one very important part of the duty which it was originally conceived would have devolved upon you has been already accomplished; and that Her Majesty's Government admit the desirableness, if not the necessity, of a Second Postal Route, and recognize the benefits, political and commercial, of frequent as well as regular Postal Communication between Great Britain and the Australian Colonies.

4. But although there appears reason to believe that Her Majesty's Government entertain these views, and are now prepared to take action to accomplish this great object, the anxiety which is felt to secure its attainment makes it of more importance than ever that an agent should be on the spot, in order that in making the Contract the interests of these Colonies, and especially of New South Wales, should be had in due regard.

5. His Excellency the Governor General has been compelled from time to time to make representations as to the inconvenience and loss which this Colony has suffered from the irregular and unsatisfactory performance of the Mail Service by the European and Australian Mail Company, and by the latest Mails has, in an especial manner, brought the subject still more forcibly under the notice of the Imperial authorities. You will, if necessary, reiterate the statements of these inconveniences and disadvantages, and urge the reasons which have induced the Government and the Legislature to press for the establishment of the Panama route; and in bringing under the notice of Her Majesty's Government the irregularity which has characterized the service under the recent contract, you will support your statements by Returns, with which you will be prepared, shewing the dates upon which the Mail Vessels should have arrived and departed, and the dates upon which they did actually arrive and depart.

6. Admitting, however, that much of this irregularity has arisen from causes which the Imperial Government could not control, it is obvious that the increasing wealth and importance of these Colonies demand a more frequent communication with Great Britain than can be afforded by one monthly service, however efficiently performed; and that the maintenance of a double line is absolutely essential, as a provision against the contingencies to which a single line will always be more or less exposed. The second monthly service should be so arranged as in practice to afford a fortnightly communication; and by adopting the Panama route, the same advantages with respect to arrival and departure would be extended to New Zealand and the Eastern Colonies as the Southern and Western Colonies will derive from the Suez route.

7. In your negotiations with the Imperial authorities, questions will probably arise which could not be foreseen or provided for; and you may feel it desirable to have the advantage of counsel and advice from those who, being interested in the welfare of these Colonies, and having already given to the question a large amount of consideration, are qualified to aid you in arriving at a correct decision as to the course you should take under such circumstances; and it has therefore been determined to nominate a certain number of gentlemen

gentlemen to act with you as a Committee of Advice. Mr. Edward Hamilton, the Governor of the Australian Agricultural Company, who is now in the Colony, but returns to England by the Mail Steamer, has already been requested to form one of such Committee, and has kindly consented to do so, and further, in the event of your death or incapacity to act, to assume the duties and position of Agent, under the same instructions as those furnished to you.

Robert Towns,
Donald Larnach,
G. A. Lloyd,
Esquires.

8. Relying also upon the readiness of the gentlemen named in the margin to give you the benefit of their experience, a communication will be made to them by the present mail inviting their co-operation with you as members of the Committee of Advice; and should they accede to the request, and accept seats in such Committee, you will consult with them, not only in cases of doubt or emergency, but in all matters connected with the object of your mission. You will, however, be at liberty to adopt or reject any advice tendered by the Committee, but in any case in which you see fit, in the exercise of this discretion, to depart, either wholly or in part, from the course recommended by them, you will be expected to render a full explanation and justification of the measures you may ultimately adopt.

9. You will keep full minutes of all your conferences with the Committee, and of all your proceedings generally in the matter of your mission,—copies of which you will transmit to this department as opportunities offer.

10. In the Minutes of the Executive Council on the 16th and 23rd August, the Resolutions of the Assembly on the 8th September, and the Act 22nd Victoria, No. 15, are contained the views of the Government; and it will be your duty to urge upon the Imperial authorities the various grounds which may be brought forward in support of those views; and you will distinctly understand that you are not to depart from the general principles contained in those documents without further communication with the Colony. You may also with propriety contrast the terms on which the Australian Colonies are seeking for increased facilities of postal communication, with the exclusive support by the Mother Country, of the postal services which have been for many years established with other British Colonies, and even with foreign countries, of comparatively small commercial importance.

11. Considering also that these Colonies will bear so large a portion of the annual expense, you will be entitled to ask for full information regarding the particulars of any proposed Contract, previously to its being entered into; and should it appear to you and the gentlemen acting with you, that any of the terms and conditions of such proposed Contract are objectionable, you will formally bring your objections under the consideration of Her Majesty's Government; and if not successful in obtaining the alterations you suggest, you will consider yourself authorised to enter a protest on behalf of the Colony.

12. The time fixed for commencing the Contract should be as early as possible; but you will not object to any moderate delay which may be found indispensable for securing the eventual efficiency of the service, and may prevent a recurrence of those irregularities which have characterized the late Postal Service.

13. With reference to the details of the Contract, it is not considered necessary or expedient to furnish you with specific instructions; but if, after consultation on these points with the gentlemen associated with you, it should appear desirable, you will prepare a Minute setting forth the terms and conditions which the experience derived from the failure of the Contract with the European and Australian Royal Mail Company shews to be essential, and submit the same to the proper authorities.

14. Should any question be raised as to the terms which may be demanded by New South Wales for the conveyance of the Mails of the adjoining Colonies, it may be answered that each Colony will be expected to contribute to the gross subsidy in proportion to the amount of correspondence. It is not anticipated that any difficulty will arise on this head. This Colony has not any exclusive views in desiring to get Steam Postal Communication by Panama, and is willing that each Colony shall participate upon equitable terms in the benefits of any arrangement that may be entered into.

15. In conclusion, I am directed to impress upon you the extreme importance of the negotiations confided to you, and to intimate to you that the Government trust you will allow no consideration whatever to divert your attention from it.

I have, &c.,

W. ELYARD.

EDWARD C. MEREWETHER, Esq.

1858.

Legislative Assembly,

NEW SOUTH WALES.

CIRCULAR QUAY.

(OCCUPATION OF A PORTION BY OCEAN STEAMERS.)

Ordered by the Legislative Assembly to be Printed, 14 December, 1858.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 5 November, 1858, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“Copics of all Correspondence which may have taken place
 “between this Government and the Agent or Representative of
 “the Peninsular and Oriental Steam Navigation Company, or
 “others, on the subject of the appropriation, made in 1853, of
 “a portion of the north-eastern extremity of the Circular Quay
 “to the use of Ocean Postal Steamers, and the recent resumption
 “of the same by the Government.”

(Mr. Donaldson.)

CIRCULAR QUAY.

J. S. SPARKES, ESQ., to THE COLONIAL SECRETARY.

*Peninsular and Oriental
Steam Navigation Company's Offices,
Sydney, 3 August, 1853.*

SIR,

I have the honor to submit to you that the dispatch at all times necessary for vessels carrying H. M. Mails renders it imperative that no time should be lost in getting them to some convenient wharf, in order to expedite the necessary repairs—to coal and refit them for the service upon which they are engaged.

From the great demand at present for wharfage in Sydney, I have found it impossible to secure such accommodation.

I would, therefore, respectfully request that I be permitted to take upon lease, for the use of the Peninsular and Oriental Steam Navigation Company's Steamers, upon such terms, and for such period, as the Government may be pleased to grant, a portion of the eastern side of the Circular Wharf beyond that already held by Messrs. Campbell & Co.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY,
Sydney.

J. S. SPARKES,
Superintendent.

MEMO. OF ACTING SURVEYOR GENERAL.

I enclose a tracing shewing the land alluded to. How far it may be proper, as regards the navigation, to appropriate this land for wharfage will be for the consideration of the Harbour Master.

The Military authorities may also have to be consulted, and then comes the question of expediency as regards the interests of the present Lessee of the Quay, and the right of public competition which the owners of private wharfs may contend for.

JOHN THOMPSON,

*Surveyor General's Office,
Sydney, 20 August, 1853.*

Acting Surveyor General.

J. S. SPARKES, ESQ., AND OTHERS, to THE COLONIAL SECRETARY.

*Peninsular and Oriental Steam Navigation Company,
Sydney, 23 August, 1853.*

SIR,

We, the undersigned, as Agents for the Steam Companies having Mails and Ocean Steamers visiting this Port, are desirous of the honor of a personal interview with you, in order to lay before you the great disadvantages under which we labor for the want of wharf accommodation in this Harbour.

We, therefore, respectfully request that you will be pleased to name such time as may be convenient to receive us.

We remain, &c.,

J. S. SPARKES,
Superintendent P. & O. Steam Co.

ALEXANDER CURRIE,
pro Australasian Pacific Mail Steam Packet Co.

DONALDSON & Co.,
Agents for the General Screw Steam Shipping Co.

CRAWLEY & SMITH,
Agents for the "Great Britain," and other Ocean
Steamers.

THE HONORABLE
THE COLONIAL SECRETARY.

CIRCULAR QUAY.

3

THE COLONIAL SECRETARY to J. S. SPARKES, ESQ.

*Colonial Secretary's Office,
Sydney, 25 August, 1853.*

SIR,

In acknowledging the receipt of your letter dated the 23rd instant, signed by yourself and other agents of Steam Navigation Companies having Mail and Ocean Steamers visiting the Port, requesting an interview, in order to lay before me the great disadvantage under which you labor for the want of wharf accommodation in the Harbour; I have the honor to inform you, that I shall be happy to receive you, and the other gentlemen who signed the letter, on Saturday morning next, the 27th instant, at 11 o'clock.

I have, &c.,

J. S. SPARKES, ESQ.,
Superintendent of the Peninsular
and Oriental Steam Company.

E. DEAS THOMSON.

J. S. SPARKES, ESQ., AND OTHERS, to THE COLONIAL SECRETARY.

Sydney, 29 August, 1853.

SIR,

Referring to the annexed plan, we have now the honor of transmitting to you a description of the frontage and land upon the Semi-Circular Quay which we are desirous of inducing the Government to reserve for the accommodation of Ocean Steamers, and more particularly for the use of those carrying Her Majesty's Mails; convenience for dispatch being in their case the more essential that they are bound by contract, and under penalty, to certain dates of arrival and departure.

The portion of land is that which is colored on the plan, and may be described thus:—Bounded on the north by a line from the north side of the boat wharf on the Naval Reserve, and extending easterly to a point eleven yards north of the north point of the existing fence; on the east by that fence, and a line continued to the west side of the Government Sheds, and on to the present boundary line of the Semi-Circular Quay; on the south by a line at right angles to the boundary of the Semi-Circular Quay, which would pass eighteen yards south of the north lamp post on the Semi-Circular Quay; and on the west by the Cove.

In submitting for your approval this description of the land, which, in our opinion, would be necessary, and at the same time sufficient for the objects that we have in view, we have the honor to request, that in the event of the Government acceding to our proposition, we may be informed upon what terms such grant or reservation will be made; that is to say, whether it will be permanent, or for a term of years; and whether it will be competent for those acting as agents for steam ships so to be accommodated, to quarry and blast rock, and make such alterations on the land reserved as may extend its conveniences, and improve its fitness, for the purposes contemplated.

Awaiting your reply,

We have, &c.,

J. S. SPARKES,
Superintendent P. & O. Co.

DONALDSON & CO.,
Agents for the G.S.S.S. Co.

ALEXR. CURRIE,
pro Australasian Pacific Mail Steam
Packet Co.

CRAWLEY & SMITH,
Agents S.S. "Great Britain," and other
Ocean Steamers.

THE HONORABLE
E. DEAS THOMSON,
Colonial Secretary.

PROCEEDINGS of the Executive Council on the 19th September, and 24th October, 1853, with reference to Wharfage Accommodation to Ocean Steamers visiting this Port.

Minute No. 53-46. Confirmed, 1 November, 1853.

His Excellency the Governor General lays before the Council a letter signed by the Agents, in the Colony, of the Peninsular and Oriental Steam Navigation Company; the Australian Pacific Mail Steam Navigation Packet Company; the General Screw Steam Shipping Company; and the "Great Britain" Steam Ship, in which a joint request is preferred that the eastern portion of Sydney Cove, from the north side of the boat harbour at Fort Macquarie to a point a little to the south of the northernmost lamp post on the Semi-Circular Quay, may be reserved for the exclusive accommodation of Ocean Steamers visiting this Port, and especially for those carrying Her Majesty's mails.

2. After some deliberation the Council defer the further consideration of this matter to a future day.

Extract from Minute No. 53-52. Dated 24 October, 1853.

The Council resume the consideration of the question of wharfage accommodation for Ocean Steamers, partially proceeded with on the 19th ultimo.

The Council conceive that a compliance with this request will tend materially to forward the public interests, and they therefore advise as follows:—

- (1.) That, in re-letting the Circular Wharf, the existing lease for which will expire with the current year, it should be a distinct condition of the lease that the portion thereof indicated on the sketch submitted by the applicants should be reserved by the lessee for the exclusive accommodation of Ocean Steamers, and that this reservation should be maintained in each succeeding lease of the Quay for the next ten years.
- (2.) That the portion of the eastern side of the Cove applied for which does not come within the defined limits of the Quay should be reserved, in the manner suggested, as a coaling depôt, and for otherwise accommodating the Ocean Steamers of the lines at present trading to this Colony, and any other steamers of that class which may hereafter visit this Colony.
- (3.) That the land so indicated may be occupied for these purposes by the agents of the several steam lines before named, and of any future lines for the space of ten years; the allotment of space intended for any particular line being nevertheless subject to the approval of the local Government.
- (4.) That the agents so occupying shall be at liberty to quarry stone from, and erect buildings on the land, provided that the quarrying be conducted, and the buildings erected in such situation as may be determined by the Colonial Architect, or other officer of the Government duly appointed in that behalf, and that all wharfage projections or other operations whatsoever effected by the occupants, shall be in strict accordance with the design of the Semi-Circular Quay, to be determined in any case by such officer of Government as aforesaid.
- (5.) The wharfage dues on landing goods, and tonnage dues, will be payable to the lessee of the Circular Wharf, in respect to the portion thereof exclusively reserved for the use of the Ocean Steamers.
- (6.) Irrespective of these dues, each of the parties representing the owners of the Ocean Steamers availing themselves of the accommodation of the coal depôt will be required to pay an annual rent of £100; but any sums laid out by them in the formation of the Quay, according to the approved plan, will be allowed as a set-off against the payment of such rent.
- (7.) No other vessels than the Ocean Steamers, and the colliers employed for their supply, are to be accommodated at any portion of the Circular Quay and coaling depôt set apart for this purpose.
- (8.) At the expiration of the term of ten years, compensation will be allowed for any buildings erected, the value of such buildings to be assessed by arbitrators (and an umpire, if necessary,) chosen in the usual way.

(9.)

- (9.) By "Ocean Steamer" is to be understood any steamer now or hereafter visiting this Colony from Great Britain or any Foreign Country, but not steamers engaged in inter-colonial trade.

MICHAEL FITZPATRICK,

Clerk of the Council.

*Executive Council Office,
Sydney, 28 October, 1853.
No. 53-270.*

THE COLONIAL SECRETARY to J. S. SPARKES, ESQ., AND OTHERS

Colonial Secretary's Office,

Sydney, 3 November, 1853.

GENTLEMEN,

I have the honor to inform you that the Governor General has laid before the Executive Council your letter of the 29th August last, requesting that the eastern portion of Sydney Cove, from the north side of the boat harbour at Fort Macquarie to a point a little to the south of the northernmost lamp-post on the Semi-Circular Quay,

2. I am further to inform you that the Council conceived that a compliance with your request would tend materially to forward the public interests, and with their advice His Excellency has been pleased to direct—

1. That in re-letting the Circular Wharf, the existing lease for which will expire with the current year, it shall be a distinct condition of the lease that the portion thereof indicated on the sketch submitted in your application shall be reserved by the lessee for the exclusive accommodation of Ocean Steamers, and that this reservation shall be maintained in each succeeding lease of the Circular Quay for the next ten years.
- (2.) That the portion of the eastern side of the Cove applied for which does not come within the defined limits of the Quay, be reserved in the manner suggested as a coaling depôt, and for otherwise accommodating the Ocean Steamers of the lines at present trading to this Colony, and any other steamers of that class which may hereafter visit this Colony.
- (3.) That the land so indicated may be occupied for these purposes by you as the agents for the several steam lines mentioned in your communication, and by the agents of any future lines, for the space of ten years,—the allotment of space intended for any particular line being nevertheless subject to the approval of the local Government.
- (4.) That the agents so occupying be at liberty to quarry stone from, and erect buildings on, the land, provided that the quarrying be conducted and the buildings erected in such situation as may be determined by the Colonial Architect, or other officer of the Government duly appointed in that behalf, and that all wharfage projections, or other operations whatsoever effected by the occupants, shall be in strict accordance with the design of the Semi-Circular Quay—to be determined in any case by such officer of Government as aforesaid.
- (5.) The wharfage dues on landing goods, and tonnage dues, will be payable to the Lessee of the Circular Wharf, in respect of the portion thereof exclusively reserved for the use of the Ocean Steamers.
- (6.) Irrespective of these dues, each of the parties representing the owners of the Ocean Steamers availing themselves of the accommodation of the coal depôt will be required to pay an annual rent of £100; but any sums laid out by them on the formation of the Quay, according to the approved plan, will be allowed as a set-off against the payment of such rent.
- (7.) No other vessels than the Ocean Steamers, and the colliers employed for their supply, are to be accommodated at any portion of the Circular Quay and coaling depôt set apart for this purpose.
- (8.) At the expiration of the term of ten years, compensation will be allowed for any buildings erected, the value of such buildings to be assessed by arbitrators (and an umpire, if necessary,) chosen in the usual way.

(9.) By "Ocean Steamers" to be understood any steamer now or hereafter visiting this Colony from Great Britain or any Foreign Country, but not engaged in inter-colonial trade.

I have, &c.,

E. DEAS THOMSON.

J. S. SPARKES, Esq.,
Superintendent of the Peninsular and Oriental
Steam Navigation Company.

MESSRS. DONALDSON & Co.,
Agents for General Screw Co.

ALEXANDER CURRIE, Esq.
Agent for the Australian Pacific Mail Steam
Navigation Co.

MESSRS. CRAWLEY, SMITH, & Co.,
Agents for the "Great Britain."

J. S. SPARKES, Esq., AND OTHERS, to THE COLONIAL SECRETARY.

Sydney, 20 December, 1853.

SIR,

Referring to your letter of the 8th ultimo, and to the subsequent interviews we have had with you on the subject thereof, we have now the honor to inform you, that we, the undersigned, will accept the accommodation proffered for our steamers, on the terms laid down in your letter, subject to certain modifications, which we proceed to suggest:—

First,—That His Excellency the Governor General's "first direction" should be altered by the substitution of "twenty-one years" instead of "ten years." Second,—That the same alteration be made in the "third direction." Third,—In reference to the "fifth direction," we presume that the landing and tonnage dues to be exacted from us are only such as are laid down in the Acts 8th Vict., 16, and 10th Vict. 11, empowering the Lessee of the Circular Quay to demand and receive tolls.

We shall be glad to have our portion of space allotted to us as soon as is convenient.

We beg, through you, to tender our thanks to the Executive Council for the readiness with which they have acceded to our proposals, and, further, to acknowledge the courtesy and consideration our suggestions have met from yourself.

We have, &c.,

J. S. SPARKES.
ALEXANDER CURRIE.
CRAWLEY & SMITH.

THE HONORABLE
THE COLONIAL SECRETARY.

PROCEEDINGS of the Executive Council on the 28th December, 1853, with respect to Wharfage Accommodation for Ocean Steamers.

Extract from Minute No. 53-61. Confirmed 3rd January, 1854.

* * * * *

2. The Council record their opinion that the advantages already offered to the proprietors of Ocean Steamers are very considerable, and they do not feel at liberty to recommend that they should be extended in the manner now requested.

3. In answer to their inquiry on this head, the Council advise that the applicants be informed that the landing and tonnage dues to be paid by them in respect of the portion of the Semi-Circular Quay reserved for their exclusive accommodation, are the ordinary dues, which the Lessee of the Quay is empowered by law to demand.

4. The Council further advise that the Acting Deputy Surveyor General be instructed to allot to each of these applicants a suitable portion of the coaling depôt at the eastern side of the Harbour, reserving, however, sufficient space to meet the probable requirements of the other Ocean Steamers which may be expected to arrive here.

MICHL. FITZPATRICK,
Clerk of the Council.

Executive Council Office,
Sydney, 4 January, 1854.
No. 54-2.

CIRCULAR QUAY.

7

THE COLONIAL SECRETARY to J. S. SPARKES, ESQ., AND OTHERS.

*Colonial Secretary's Office,
Sydney, 7 January, 1854.*

GENTLEMEN,

I have the honor to inform you, that the Governor General has laid before the Executive Council your letter of the 20th December last, proposing certain modifications in the terms on which it was stated in my communication of the 5th November last that a portion of the Circular Quay would be reserved for the use of Ocean Steamers visiting this Port.

2. The Council recorded their opinion, that the advantages already offered to the proprietors of Ocean Steamers are very considerable, and they did not feel at liberty to recommend that they should be extended in the manner requested by you.

3. In answer to your inquiry on the following head, the Council advised that you should be informed that the landing and tonnage dues to be paid by you in respect of the portion of the Semi-Circular Quay reserved for your exclusive accommodation, are the ordinary dues which the Lessee of the Quay is empowered by law to demand.

4. I am to add that, with the advice of the Council, the Acting Deputy Surveyor General has been instructed to allot to each of you a suitable portion of the coaling depôt, at the eastern side of the Harbour, reserving however sufficient space to meet the probable requirements of the other Ocean Steamers which may be expected to arrive here.

I have, &c.,

J. S. SPARKES, ESQ.,
ALEXANDER CURRIE, ESQ., and
MESSRS. CRAWLEY AND SMITH.

E. DEAS THOMSON.

J. S. SPARKES, ESQ., AND OTHERS, to THE COLONIAL SECRETARY.

*Peninsular and Oriental Steam Navigation Company's Offices,
508, George-street, Sydney,*

11 January, 1854.

SIR,

In reply to your favor of the 7th instant, we have the honor to inform you that we accept the terms offered by the Government in your communication dated the 8th November, 1853.

As the Deputy Surveyor General has been instructed to allot to each of us a suitable portion of the coaling depôt, at the eastern side of the Harbour, we will immediately wait on that gentleman, to enable him to carry out those instructions.

Understanding, Sir, that it is your intention, during the present month, to leave this Colony for England, we beg leave to tender you our sincere thanks for the courteous manner in which you have always received us, and for the kind assistance you have rendered us, in promoting, as far as you could, the interests of those companies we have the honor to represent.

Wishing you a safe and pleasant passage to England,

We have, &c.,

J. S. SPARKES,
P. & O. Company.

ALEXANDER CURRIE,
*pro Australasian Pacific Mail
Steam Packet Company.*

THE HONORABLE
THE COLONIAL SECRETARY.

CRAWLEY & SMITH.

CIRCULAR QUAY.

THE COLONIAL SECRETARY to THE ACTING DEPUTY SURVEYOR GENERAL.

*Colonial Secretary's Office,
Sydney, 9 January, 1854.*

SIR,

With reference to my letter of the 24th November last, No. 808, stating that a portion of the Circular Quay was to be reserved for the use of Ocean Steamers visiting this Port, I am directed by His Excellency the Governor General to request, that you will have the goodness to allot to each of the undermentioned parties, viz. :—

J. S. Sparkes Esq., as Agent for the Peninsular and Oriental Steam Navigation Company,

Alex. Currie, Esq., as Agent for the Australasian Pacific Mail Steam Navigation Packet Company,

Messrs. Crawley & Smith, as Agents for the "Great Britain" Steam Ship,—
a suitable portion of the coaling depôt at the eastern side of the Harbour, reserving however, sufficient space to meet the probable requirements of the other Ocean Steamers trading to the Colony, or which may be expected to arrive here.

I have &c.,

(for Colonial Secretary,)

THE ACTING DEPUTY
SURVEYOR GENERAL.

W. ELYARD.

THE ACTING SURVEYOR GENERAL to THE ACTING COLONIAL SECRETARY.

*Surveyor General's Office,
Sydney, 22 March, 1854.*

SIR,

I have the honor to acknowledge the receipt of your letter, No. 54-5, of the 9th January, referring to your letter of the 24th November last, 53-808, enclosing a minute of the Executive Council, No. 53-46, and requesting that I will allot to Alexander Currie, Esquire, J. S. Sparkes, Esquire, and Messrs. Crawley and Smith, as the representatives of certain Ocean Steam Companies, portions of the proposed coaling depôt, at the eastern side of the Harbour, near Fort Macquarie, reserving, however, sufficient space to meet the probable requirements of the other Ocean Steamers trading to the Colony, or which may be expected to arrive here.

2. In reply, I do myself the honor to forward, for the consideration of His Excellency the Governor General, a sketch shewing a proposed division of the space set aside as a coaling depôt into four portions, with a frontage of 120 feet each, and of an average size of 50 perches, leaving a portion of approximately equal size with the others, and which may hereafter be appropriated to the same purpose, but which I would propose to be temporarily added to that portion of the Semi-Circular Quay to be exclusively set aside for the general use of the Ocean Steamers.

3. In proposing the division exemplified by the sketch, I have not been unmindful that, in addition to the companies mentioned in your communication, there are at present trading to the Colony,—

The General Screw Steam Ship Company,

The Royal Australian Company, which formerly conveyed the Mails, and

The American Company, to which the "Golden Age" belongs;

and that steamers belonging to another company (that with which Captain Hoseason was or is connected) may perhaps be expected by the Panama route.

4. Thus there are seven companies either now trading, or which may be expected to trade here.

5. I have ascertained, however, that even after these portions now proposed to be allotted have been sufficiently levelled to admit of their being used for the purpose for which they are required, they will only carry an average quantity of 2,000 tons of coal each, and it would, consequently, be useless to divide the land to be allotted into smaller portions; and, as some of the representatives of the Ocean Steam Companies may make other arrangements
for

for coal depôts, perhaps the five portions will suffice for all that are disposed to take advantage of the arrangement.

G. I may mention, that in allotting the three portions I have obtained the concurrence of Mr. Sparkes, Mr. Currie, and Messrs. Crawley and Smith, and that these gentlemen have arranged respectively to take the lots as under:—

Alexr. Currie, Esq. Lot 1.
 J. S. Sparkes, Esq. Lot 2.
 Messrs. Crawley and Smith..... Lot 3.

Trusting that this arrangement may meet the approval of His Excellency,

I have &c.,

THE HONORABLE
 THE ACTING COLONIAL SECRETARY.

JOHN THOMPSON,
 Acting Surveyor General.

PROCEEDINGS of the Executive Council on the 30th March, 1854, with respect to the proposed division of Land at the eastern side of the Cove for Coaling Depôts for Ocean Steamers.

Extract from Minute No. 54-15. Confirmed, 4 April, 1854.

* * * * *

2. The Council advise that this allotment of the land be approved, reserving the 4th and 5th portions to meet future demands of the like nature.

Executive Council Office,
Sydney, 5 April, 1854.
 No. 54-83.

MICHL. FITZPATRICK,
 Clerk of the Council.

W. ELYARD, ESQ., to J. S. SPARKES, ESQ.

Colonial Secretary's Office,
Sydney, 13 April, 1854.

SIR,

With reference to my letter of the 7th January last, stating that instructions had been given to the Deputy Surveyor General to allot to you a suitable portion of the coaling depôt for Ocean Steamers, at the eastern side of the Harbour, I have the honor to inform you, that I have laid before the Executive Council a letter from the Acting Surveyor General, forwarding a sketch shewing a proposed division of the space set aside for a coaling depôt, and that, under the advice of the Council, the portion described as lot 2 on the sketch has been appropriated to the use of the vessels of the Peninsular and Oriental Steam Navigation Company.

2. For any further information you may require I beg to refer you to the Acting Surveyor General.

I have, &c.,

J. S. SPARKES, ESQ.,
 Agent to the P. & O. S. N. Company.

W. ELYARD.

J. S. SPARKES, ESQ., to THE COLONIAL SECRETARY.

Peninsular and Oriental Steam Navigation Company's Offices,
212, George-street, Sydney,
 15 May, 1854.

SIR,

I have the honor to acknowledge the receipt of your letter under date 13th April, informing me that section No. 2 of the coaling depôt for Ocean Steamers, on the eastern side of Sydney Cove, has been apportioned to the steamers of the Peninsular and Oriental Company, referring me for any further information to the Acting Surveyor General.

I beg to express to you my thanks for your kind attention to this matter.

I have, &c.,

THE HONORABLE
 THE COLONIAL SECRETARY.

J. S. SPARKES.

13 April, 1854.

Similar—(Lot 1 for the use of the vessels of Australasian Pacific Mail Steam Packet Company.)

W. ELYARD.

Agent for the Australasian Pacific
Mail Steam Packet Company.

ALEXANDER CURRIE, ESQ., to THE COLONIAL SECRETARY.

Australasian Pacific Mail Steam Packet Company,
474 George-street,
29 June, 1854.

SIR,

I have the honor to acknowledge the receipt of your letter, under date 13 April, informing me that lot 1 of the space set apart as a coaling depôt for Ocean Steamers, on the eastern side of Sydney Cove, has been apportioned for the use of the steamers of this company, and referring me for any further information to the Acting Surveyor General.

On behalf of the company which I have the honor to represent, I beg to express to you my thanks for your kind attention in this matter.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

ALEXANDER CURRIE.

13 April, 1854.

Similar.—(Appropriation, &c., of lot 3 for the use of the "Great Britain" steam ship.)

W. ELYARD.

MESSRS. CRAWLEY AND SMITH,
Agents for the "Great Britain" Steam Ship.

MESSRS. CRAWLEY & SMITH to THE COLONIAL SECRETARY.

Sydney, 15 April, 1854.

SIR,

We have the honor to acknowledge receipt this day of your letter of 13th instant. In reference thereto we beg to call your attention to the circumstance of our having applied for a portion of the wharf for the accommodation of Ocean Steamers, as agents for the "Great Britain" and *other Ocean Steam vessels*. Your letter permits this accommodation to the "Great Britain" steam-ship only, but we trust its use is not intended to be confined solely to her, as there is a line now forming in connection with that ship, and we presume there will be no objection to their occupying the same portion of ground.

We have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY,
Sydney.

CRAWLEY & SMITH,
Agents for the "Great Britain"
and other Ocean Steamers.

THE COLONIAL SECRETARY to ALEXANDER CURRIE, ESQ.

Colonial Secretary's Office,
14 July, 1854.

SIR,

In acknowledging the receipt of your letter of the 29th ultimo, respecting the portion of the land on the eastern part of Sydney Cove set apart for the use of the steamers of the Australasian Pacific Mail Steam Packet Company, I have the honor, by the direction of His Excellency the Governor General, to inform you, that as this company no longer intends to send steam ships to Australia the land in question will be now considered as vacant.

I have &c.,

ALEXANDER CURRIE, ESQ.,
474, George-street, Sydney.

C. D. RIDDELL.

C. D. HAYS, ESQ., to THE COLONIAL SECRETARY.

Australasian Pacific Mail Steam Packet Company,
474, George-street, Sydney.

SIR,

Mr. Currie having sailed for New Zealand, I have the honor to acknowledge the receipt of your letter to him under date 14th instant, but to hand only yesterday.

Your letter, I see, refers to the receipt of one from that gentleman of the 29th ultimo, respecting the portion of the land on the eastern part of Sydney Cove set apart for the use of the steamers of this company, and that in reference to which subject you, by direction of His Excellency the Governor General, inform him that as the company no longer intends to send steam ships to Australia, the land in question will be now considered as vacant.

In reply, I have the honor to state, that the advices to the company, both to Mr. Currie and to me, speak only of the operations being suspended; and that my instructions are to proceed to England *via* Panama, with the view of reporting proceedings to the Directors on my arrival in London.

Under these circumstances, I should prefer, if consistent with the views of the Government, to retain possession for the company of the land referred to till a final settlement of the question of the company's operations is arrived at, which I have no doubt will be as soon as possible after my return to England; besides, we have, in accordance with the terms upon which the land was granted, already incurred considerable outlay and liabilities, amounting together to about £1,000 or £1,100. I therefore beg respectfully to submit, that His Excellency may be pleased to allow the possession to be retained till advices can be sent out after my return to England, subject to the terms of the original grant; at the same time I have the honor to inform you, that after my departure from this Colony, which I expect will be on Tuesday or Wednesday next, the interests of the company will be entrusted to Messrs. Thacker & Co., of this city, who will therefore be empowered to carry out the wishes of the Government, and to enter into any arrangements that may be considered desirable.

Mr. Currie will return from New Zealand to this in about two months, on his way to England.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

C. D. HAYS,
Colonial Superintendent.

W. ELYARD, ESQ., to C. D. HAYS, ESQ.

Colonial Secretary's Office,
Sydney, 7 August, 1854.

SIR,

In acknowledging the receipt of your letter, without date, requesting permission to retain possession of the portion of the land on the eastern part of Sydney Cove set apart for the use of the Australasian Pacific Mail Steam Packet Company, I am directed by His Excellency the Governor General to inform you, that there will be no objection to the company retaining this land until it is finally decided whether or not they will resume their operations.

I have, &c.,

C. D. HAYS, ESQ.,
474, George-street, Sydney.

W. ELYARD.

A. CURRIE, ESQ., to THE COLONIAL SECRETARY.

Australasian Pacific Mail Steam Packet Company,
474, George-street,
9 January, 1855.

SIR,

I have the honor to acknowledge the receipt of your letters of the respective dates of 14th of July and 7th August, 1854,—the former of which had reference to the giving up of that portion of the eastern part of Sydney Cove appropriated for the use of this company as a coal depôt,—the latter in reply to a communication from Captain Hays, in which permission was granted by His Excellency the Governor General that the land in question might

might be retained by this company until it was finally decided whether or not they would resume their operations. For the permission so granted I have to thank His Excellency.

I now take the liberty, in consequence of my early departure from this Colony, (per next overland mail,) to draw His Excellency's attention to a subject which, in the event of our company having entirely ceased its operations, would necessarily have to be brought before His Excellency's notice, viz., an application for the return of the amount of outlay (less certain rental) which has been incurred by this company in the improvement of the property belonging to the Government.

The outlay in question, on the the part of this company, has amounted, in round numbers, to about £930, as per enclosure.

It may be as well to mention that the jetty at coal depôt was erected in conjunction with the Peninsular and Oriental Company, the landing stage at Semi-Circular Quay in conjunction with the Peninsular and Oriental Company and Messrs. Crawley & Smith, representing the "Great Britain" steamer, as also the moorings and fencing requisite for the protection of the coal depôt.

I have, &c.,

ALEXANDER CURRIE.

THE HONORABLE

THE COLONIAL SECRETARY.

Australasian Pacific Mail Steam Packet Company's Outlay at Coal Depôt.

A. CURRIE, ESQ., to THE COLONIAL SECRETARY.

Australasian Pacific Mail Steam Packet Company,
474, George-street,

22 January, 1855.

SIR,

Understanding that the company which I have the honor to represent have disposed of their two remaining vessels, the "Kangaroo" and "Emu," and that, from this proceeding, I infer that it is their intention to wind up their affairs at as early an opportunity as possible, I beg leave to surrender into the hands of the Government the space of land allotted as a coal depôt to this company, according to the wish expressed in your letter of the 14th July last, and shall feel greatly obliged by the Government taking into its earliest consideration the amount expended by this company, both in the Circular Quay and coal depôt, (an account of which was forwarded to you in my communication of the 4th instant,) with a view to a reimbursement of the same.

I have, &c.,

ALEXANDER CURRIE.

THE HONORABLE

THE COLONIAL SECRETARY.

W. ELYARD, ESQ., to ALEXANDER CURRIE, ESQ.

*Colonial Secretary's Office,
Sydney, 26 February, 1855.*

SIR,

The Governor General having had under consideration your letters of the 9th and 22nd ultimo, surrendering the land allotted by the Government to the Australian Pacific Steam Packet Company for a coal depôt, and applying for compensation for your outlay, I am directed by His Excellency to inform you, that the Government is not in any way called upon to make good to the company the cost of work which has been executed for their sole convenience.

I have, &c.,
W. ELYARD.

ALEXANDER CURRIE, ESQ.,
474, George-street, Sydney.

ALEXANDER CURRIE, ESQ., to THE COLONIAL SECRETARY.

*Australasian Pacific Mail Steam Packet Company,
474 George-street,
27 January, 1855.*

SIR,

I beg leave to inform you that, in consequence of my departure for England per "Madras," the winding up of the affairs of this company will be entrusted to Messrs. Thacker & Co., of this City.

I have, &c.,
ALEXANDER CURRIE.

THE HONORABLE
THE COLONIAL SECRETARY.

MESSRS. THACKER & Co. to THE COLONIAL SECRETARY.

Sydney, 13 March, 1855.

SIR,

Referring to the letter addressed to you by Mr. Alexander Currie, of date 27th January last, and also to that gentleman's previous correspondence with your department, we now beg to hand you a copy of a letter we have received from the Secretary of the Australasian Pacific Mail Steam Packet Company, announcing the decision of the Directors on the subject of that portion of the Circular Quay allotted to them by the Government for the use of their steamers, and directing us to take the necessary steps for closing the transaction, on the terms understood to have been arranged between yourself and the representatives of the company in this Colony.

We, therefore, beg to request your attention to the question of reimbursement of the sum of eight hundred and thirty-two pounds four shillings and five pence, (£832 4s. 5d.) which we are authorized to receive on behalf of the company, and we trust we may be favored with your reply in due course.

We have, &c.,
THACKER & CO.

THE HONORABLE
THE COLONIAL SECRETARY.

*Australasian Pacific Mail Steam Packet Company,
50, Moorgate-street, London,
8 December, 1854.*

Gentlemen,

I am instructed to acquaint you that the Directors have decided on at once relinquishing the privileges accorded to them by the Government of New South Wales, arising from the use of a part of the Circular Quay in Sydney Harbour, and on transferring to the Government authorities their interest in that portion of the wharf erected at the expense of this company.

You have already received from Captain Haycs, previous to his departure from your city, copies of correspondence with the Colonial Secretary on this subject, as well as the

account of payments made by this company for their proportion of the wharf; I beg therefore to refer you to these documents for detailed information relative to these transactions, and to your Mr. Daniells' and Captain Hayes' joint conversations with the Colonial Secretary, soon after receiving notice of the suspension of the undertaking, for the terms on which the Directors expect you will be enabled to negotiate and conclude this matter.

It will be sufficient to remark here, that although not officially notified to Captain Hayes, it was understood that the Government consented to allow the portion of the Quay to remain in this company's possession for twelve months, at the end of which time, upon receiving a notice of the determination of the Directors not to renew operations, the Government was to take the wharf off the company's hands, paying them the actual amount expended in its construction, which you will see is £832 4s. 5d.

It is the wish of my Directors to procure a full, complete, and final settlement of all the company's assets and liabilities in Sydney without delay, and I am therefore desired to confirm the authority you received from Captain Hayes to act for and on behalf of this company, and to request that you will on receipt of this take immediate steps for effecting the transfer of the wharf to the Government, and remit the balance of moneys which may become due to the company in short first-class bills.

I am desired so thank you for the advice and assistance given to our Captain Hayes during his stay in your city.

Messrs. Thacker & Co.,
Sydney.

I have, &c.,
CHAMPION WETTON,
Secretary.

W. ELYARD, ESQ., to MESSRS. THACKER & CO.

*Colonial Secretary's Office,
Sydney, 30 March, 1855.*

GENTLEMEN,

Having laid before the Governor General your letter of the 13th instant, applying, on behalf of the Australasian Pacific Mail Steam Packet Company, to be reimbursed in the sum of £832 4s. 5d., the amount stated to have been expended by them in the erection of a wharf on that portion of the Circular Quay reserved for the accommodation of Ocean Steamers, which was appropriated to the company above-mentioned; I am directed by His Excellency to inform you, that the Government is not in any way called upon to reimburse to the company the cost of work which has been executed merely for their own convenience.

MESSRS. THACKER & CO.,
Sydney.

I have, &c.,
W. ELYARD.

MESSRS. THACKER & CO. to THE COLONIAL SECRETARY.

Sydney, 20 October, 1855.

SIR,

We beg to enclose copy of a letter, dated 19 July, received from the Secretary of the Australasian Pacific Mail Steam Packet Company, on the subject of the claim of that company against the Government of this Colony for £832 4s. 5d., and request that you will re-consider the decision which you had formerly come to with reference to this claim.

We respectfully request that you will be pleased to peruse all the correspondence between the Government and the then representatives of the company in this Colony, from which it appears to us that the company has a just claim.

THE HONORABLE
THE COLONIAL SECRETARY,
Sydney.

We have, &c.,
THACKER & CO.

*Australasian Pacific Mail Steam Packet Company,
50, Moorgate-street, London,
19 July, 1855.*

Gentlemen,

I last addressed you on the 1st June, since which I am favoured with yours of the 5th April, enclosing copy of a letter addressed to you by the Colonial Secretary, in reply to yours of 13th March, in which he says that "the Government is not in any way called upon to reimburse the company the cost of the work which has been executed merely for their own convenience."

In

In reply, I am instructed by the Court of Directors to acquaint you that they have received such a statement with the greatest surprise, and it appears to them that this determination of the Government has been arrived at without a due consideration of the true merits of the case.

In examining the correspondence upon which the agreement was based, the Court would draw your attention to the reason assigned by the Government of New South Wales for reserving a portion of the Semi-Circular Quay for the use of Ocean Steamers, viz., "that the Council conceived that a compliance with the request would tend materially to forward the public interests," from which it would appear that the object of the Government was to induce the respective companies to make an outlay of money for the improvement of the Semi-Circular Quay, which was to be refunded to them, in conformity with the 6th clause of the agreement, which states—"any sums laid out by them in the formation of the Quay according to the approved plan, will be allowed as a set-off against the payment of the rent for the coal depot." Far from the moneys having been laid out on the works in reference solely for this company's convenience, it is made an essential condition of the agreement that all Ocean Steamers visiting Sydney should have the benefit of the accommodation of such wharf, to the improvement of which this company contributed by the outlay.

It is further observed, that upon the suspension of this company's operations Mr. Currie was called upon by the Honorable the Acting Colonial Secretary, in his letter of 14th July, 1854, to surrender the land, which was accordingly complied with by Mr. Currie in January, 1855, by which this company lost the only means they had of repaying themselves, not only for their share of the outlay on the Semi-Circular Quay, but likewise for their share in the formation of the coal jetty; and the Government became possessed of an improved property and works, which could be readily let at a greatly enhanced annual rental.

It therefore appears to the Court, that upon a due representation of the circumstances, by which a thorough understanding of the case may be arrived at, His Excellency the Governor General will reconsider the whole matter, and recommend that the amount applied for should be paid over to you on behalf of this company; not only in the terms of the agreement, but likewise in the liberal spirit in which it was accorded.

I am, &c.,

Messrs. Thacker & Co.,
Sydney.

J. R. BEARDMORE,
Assistant Secretary.

W. ELYARD, ESQ., to MESSRS. THACKER & CO.

Colonial Secretary's Office,

Sydney, 30 October, 1855.

GENTLEMEN,

Having submitted to the Governor General your letter of the 20th instant, enclosing a copy of a letter from the Secretary to the Australasian Pacific Mail Steam Packet Company, on the subject of the claim of that company against this Government for £832 4s. 6d., the amount stated to have been expended by them in the erection of a wharf on that portion of the Circular Quay reserved for the accommodation of Ocean Steamers, which was appropriated to the company above mentioned, I am directed to inform you, that the work which has been done is of no use to the Government, and that His Excellency cannot, therefore, agree to pay for it.

2. I am, however, to add, that should it in its present state be made use of by any other parties, these will be called upon to repay the amount, as they will derive the benefit, which the Government does not.

I have, &c.,

MESSRS. THACKER & CO.,
Sydney.

W. ELYARD.

MESSRS. THACKER & CO. to THE SURVEYOR GENERAL.

Sydney, 9 November, 1855.

SIR,

We have been informed that there are men engaged in quarrying stone for the fortifications on that portion of the Circular Quay which has been let by Government to the Australasian Pacific Mail Steam Packet Company.

As agents for the Company we have no objection to hand over to Government the portion of the Quay let to the Australasian Pacific Mail Steam Packet Company, on being refunded, in terms of our agreement, the amount of the outlay.

We

We have taken the liberty of addressing you upon the subject, as the trespassers allege that the contractor for the fortification works is set in motion by you. If we have been misinformed we shall esteem it a favor if you will set us right.

COLONEL BARNEY, R. E.,
Sydney.

We have, &c.,
THACKER & Co.

THE SURVEYOR GENERAL to THE COLONIAL SECRETARY.

Crown Lands Office,
Sydney, 13 November, 1855.

SIR,

I have the honor to enclose, for information of His Excellency the Governor General, a letter this day received from Messrs. Thacker & Co., agents for the Australasian Pacific Mail Steam Packet Company.

It will be seen that the agents are desirous of handing over to the Government the portion of land (near Fort Macquarie) let to the company, on being refunded the outlay by the company, in terms of their agreement.

The letter of Messrs. Thacker & Co. has been written under the impression that the use of the quarry within their enclosure is required for the purpose of the Defences; this, however, is not the case.

I did send a party to cut a few stones required for Fort Macquarie, but the men were shortly warned off by Captain Sparkes, and the stone required has been procured elsewhere.

GEO. BARNEY,
Lt.-Col.

THE HONORABLE
THE COLONIAL SECRETARY.

W. ELYARD, ESQ., to THE CROWN LAW OFFICERS.

Colonial Secretary's Office,
Sydney, 29 November, 1855.

GENTLEMEN,

His Excellency the Governor General has directed me to forward for your consideration the enclosed papers, respecting the portion of the Circular Quay appropriated for the accommodation of Ocean Steamers, and the claims raised by certain parties for compensation on account of improvements effected by them to the Quay; and I have the honor to request that you will favor me with your advice as to the steps to be taken by the Government to obtain repossession of the portion of the Quay in question.

I have, &c.,
W. ELYARD.

THE HONORABLE
THE ATTORNEY GENERAL and
THE SOLICITOR GENERAL.

THE CROWN LAW OFFICERS to THE COLONIAL SECRETARY.

Attorney General's Office,
Sydney, 15 December, 1855.

SIR,

In reply to your letter of the 29th ultimo, No. 878, forwarding for our consideration, by direction of His Excellency the Governor General, the papers herewith returned, respecting the portion of the Circular Quay appropriated for the accommodation of Ocean Steamers, and the claims raised by certain parties for compensation on account of improvements effected by them to the Quay, and requesting our advice as to the steps to be taken by the Government to obtain repossession of the portion of the Quay in question; we have the honor to report, that the steps to be taken by the Government to obtain repossession of the portion of the Quay in question will be first to demand such repossession, and on refusal, to file an Information of Intrusion against the persons now in possession. Whether such

CIRCULAR QUAY.

17

such proceeding would be successful, if resisted with determination, may be questionable, because of the agreement for a ten years' lease; but the strong inclination of our opinion is, that the proceeding would be successful.

We have, &c.,

J. H. PLUNKETT,
Attorney General.

W. M. MANNING,
Solicitor General.

THE HONORABLE
THE COLONIAL SECRETARY.

W. ELYARD, Esq., to THE CIVIL CROWN SOLICITOR.

*Colonial Secretary's Office,
Sydney, 27 December, 1855.*

SIR,

I do myself the honor to transmit to you the accompanying papers, respecting the portion of the Circular Quay appropriated for the accommodation of Ocean Steamers, and the claims raised by certain parties for compensation on account of improvements effected by them to the Quay, and to request, by direction of His Excellency the Governor General, that you will, on behalf of the Government, make the necessary demands for repossession of the same.

I have, &c.,

THE CIVIL CROWN SOLICITOR.

W. ELYARD.

THE CIVIL CROWN SOLICITOR to THE COLONIAL SECRETARY.

*Civil Crown Solicitor's Office,
Sydney, 15 February, 1856.*

SIR,

Referring to your letter of 27 December last, requesting me to make the necessary demands for repossession of the portion of the Circular Quay appropriated for the accommodation of Ocean Steamers, I do myself the honor to inform you that I sent the requisite notice to Messrs. Thacker and Company, who hold the same as Agents of the Australasian Pacific Mail Steam Packet Company, who have sent me the accompanying letter, intimating that they will offer no obstacle to the Government resuming possession of these premises, and urging the claim of the company for reimbursement for their expenditure.

It is only necessary, therefore, that the Colonial Architect, or other proper officer, on behalf of Her Majesty, should enter upon the land and take formal possession of the same.

It may be necessary that you should enable me to reply to Messrs. Thacker and Company's claim on behalf of the company for compensation.

I have, &c.,

W. W. BILLYARD,
Civil Crown Solicitor.

THE HONORABLE
THE COLONIAL SECRETARY.

Sydney, 2 January, 1856.

Gentlemen,

I am instructed by the Government to require you forthwith to quit and deliver up possession of that portion of the Circular Quay, in the City of Sydney, recently used by the Australasian Pacific Mail Steam Packet Company.

Mr. Alexander Currie has already, by his letter to the Honorable the Colonial Secretary of 22nd January last, surrendered these premises to the Government, but I am informed that the same are still retained by you as the agents of the company, notwithstanding this surrender. I trust that you will render legal proceedings unnecessary by complying with my demand of possession; but in case of your refusal to do so, I am to bring an action of intrusion for your removal.

I have, &c.,

W. W. BILLYARD,
Civil Crown Solicitor.

Messrs. Thacker & Co.,
Sydney.

Sydney, 14 February, 1856.

Sir,

We have to acknowledge receipt of your letter of the 2nd January, requiring us to quit and deliver up possession of that portion of the Circular Quay recently used by the Australasian Pacific Mail Steam Packet Company, and which you state you are informed we retain as agents of that company, notwithstanding that the premises had been surrendered to the Government by Mr. Currie, by his letter of the 22nd January, 1855.

In reply, we beg to say, that if the interpretation put upon Mr. Currie's letter, above referred to, is correct, and the premises were actually surrendered, we cannot ever have been in possession, for our authority to act on behalf of the company bears date subsequent to Mr. Currie's letter to the Honorable Colonial Secretary, and we have never made any use of the premises.

We have, however, been in communication with the Government on the subject of a reimbursement of the moneys expended by the Ocean Steam Companies in the formation of the jetty and coal depôt, which repayment was clearly guaranteed by the Honorable Colonial Secretary's letter of the 8th November, 1853, and upon the faith of which letter we are assured the steam companies disbursed the sum of £2,170 4s. 6d., the share borne by the Australasian Pacific Mail Steam Packet Company being £832 14s. 5d.

Our claim for the latter sum was negatived by the Honorable Colonial Secretary's letter of the 30th October, 1855, on the plea that the work done was of no use to the Government—adding, however, that should the wharf in its present state be made use of by other parties these will be called upon to repay the amount.

Whilst, therefore, we offer no obstacle to the Government resuming possession of the premises said to have been surrendered to them by Mr. Currie, we still desire, on behalf of the company, to urge their claim for reimbursement of their share of the expenditure, and we can scarcely believe that His Excellency the Governor General will, on a proper representation of the facts being laid before him, give his sanction to a repudiation of the arrangement made by His Excellency's predecessor with the Ocean Steam Companies, as shewn by the correspondence of the present Honorable Colonial Secretary.

W. W. Billyard, Esq.,
Civil Crown Solicitor.

We have, &c.,
THACKER & CO.

MESSRS. THACKER & CO. to THE COLONIAL SECRETARY.

Sydney, 20 March, 1856.

SIR,

We beg to forward to you herewith a memorial addressed to His Excellency the Governor General, requesting his Excellency to reconsider his decision on the claim made by the Australasian Pacific Mail Steam Packet Company for reimbursement of money expended on that portion of the Circular Quay let by Her Majesty's Government to the company, and since resumed.

We respectfully request that you will submit this memorial to His Excellency's favorable consideration.

THE HONORABLE
THE COLONIAL SECRETARY,
Sydney.

We have, &c.,
THACKER & CO.

To His Excellency Sir William Thomas Denison, Knight, Governor General in and over all Her Majesty's Colonies of New South Wales, Tasmania, Victoria, South Australia, and Western Australia, and Captain General and Governor-in-Chief of the Territory of New South Wales and its Dependencies, and Vice-Admiral of the same, &c., &c., &c.

(Laid before the Executive Council, 3 April, 1856.)

The Memorial of Thacker and Company, Agents for the Australasian Pacific Mail Steam Packet Company,—

Humbly Sheweth:—

That after certain preliminary correspondence and interviews between the Colonial Secretary and the representatives of the Great Ocean Lines of Steam Vessels trading to these Colonies, that officer communicated to those gentlemen, in his letter of the 8th of November, 1853, the direction of His Excellency the Governor General, under the advice of the Executive Council, to inform them:—

“ That the Council conceived that a compliance with the request which they had made for the reservation of a portion of the Quay for the exclusive accommodation of Ocean Steamers would tend materially to forward the public interest, and accordingly that the portion of land indicated on the sketch submitted by them should be reserved for that purpose for the next ten years.
“ That as one of the conditions of this accommodation, the quarrying, erections, projections, and other operations to be performed by the occupants, should be effected subject to the approval of an officer of the Government.

“ That

" That the ordinary wharfage dues in respect of this portion of land should be
 " paid to the Lessee of the Circular Wharf, and in addition.

" That each of the parties representing owners of Ocean Steamers, availing
 " themselves of this exclusive accommodation, should pay a further sum of
 " £100 per annum ; such sum, however, to be allowed out of any sums laid
 " out by them in the formation of the Quay, according to the approved plan.

" That at the expiration of the term compensation would be allowed for any
 " buildings erected, to be assessed by arbitrators."

That, depending upon the faith of this arrangement, the representatives of the Peninsular and Oriental Steam Navigation Company, of the "Great Britain" Steam Ship Proprietors, and of this company, expended a sum of £2,638 13s. 2d., of which this company contributed the sum of £933 0s. 1d., the whole being chiefly laid out in the construction of the jetty, the plan for which was duly submitted to and approved by the proper officer.

That one year's rent only has formed the subject of allowance in respect of this disbursement.

That upon the reported suspension of this company's operations towards the Colony, the Government immediately apprised them that the portion of land allotted for their use would be considered vacant ; but upon the representation of Mr. Hayes, of 19th July, 1854, referring to the subject of the outlay which had been made, and to the terms under which the same was made, the Colonial Secretary allowed the retention of the land until the question of the resumption of their operations would be finally decided or officially announced.

That Mr. Currie, acting on behalf of this company, by his letters of 4th and 22nd of January, 1855, surrendered to the Government the use of the land, and put forward the claim of this company for reimbursement, in terms of the Colonial Secretary's letter first referred to.

That your Memorialists have been thereupon informed that, on account of the work being of no use to the Government, their claim to compensation must be refused.

That your Memorialists having expended their money upon the faith of a guarantee based upon the public advantage, fail to recognize the justice of a decision which seeks to ignore a contract upon conditions which were not elements of its inception, and beg most respectfully to solicit your Excellency's consideration of the claim again submitted.

Your Memorialists, therefore, pray that your Excellency will be pleased to direct that the improvements made in manner above mentioned may be valued by arbitrators, and that this company may be reimbursed to the extent of their proportionate part therein.

And your Memorialists will ever pray, &c.

THACKER & CO.

Sydney, 20 March, 1856.

PROCEEDINGS of the Executive Council on the 3rd April, 1856, with respect to a claim for the reimbursement of the cost of improvements effected on that portion of the Circular Quay set apart for Ocean Steamers.

Extract from Minute No. 56-12. Confirmed 8th April, 1856.

* * * * *

2. The only item of expenditure set forth in Messrs. Thacker and Co.'s memorial in respect of which any reimbursement could be looked for is the cost of the wooden jetty ; but the claim even to that extent can be entertained only by a very liberal interpretation of the conditions detailed in the Minute of Council of the above date. The Council are not, however, indisposed to advise a reimbursement, to the persons entitled, of the sum claimable on that head, namely, the assessed value of the jetty as it now stands ; but they desire to have before them a joint application from all the companies or persons interested, the improvements having apparently been effected at their joint expense. Upon the receipt of such an application the proper steps should be taken to have the value of the jetty assessed in the manner provided for in the agreement between the Government and the companies.

MICHAEL FITZPATRICK,

Clerk of the Council.

Executive Council Office,

Sydney, 9th April, 1856.

No. 56-167.

W. ELYARD, ESQ., to MESSRS. THACKER & CO.

Colonial Secretary's Office,

Sydney, 15 April, 1856.

GENTLEMEN,

I have the honor to inform you that the Governor General has laid before the Executive Council your further letter of the 20th ultimo, enclosing a memorial respecting the claim made by the Australasian Pacific Mail Steam Packet Company, for the reimbursement of the cost of improvements effected by the company on that portion of the Circular Quay

Quay set apart for the accommodation of Ocean Steamers, but which has been resumed by the Government.

2. It appears to the Council that the only item of expenditure set forth in your memorial in respect of which any reimbursement could be looked for, is the cost of the wooden jetty; but the claim even to that extent can be entertained only by a very liberal interpretation of the conditions detailed in my letter to the company of the 8th November, 1853.

3. I am further directed to inform you that, under the advice of the Council, His Excellency is not indisposed to sanction a reimbursement to the persons entitled of the sum claimable on that head, namely, the assessed value of the jetty as it now stands; but the Council desire to be furnished with a joint application from all the companies or persons interested—the improvements having apparently been effected at their joint expense. Upon the receipt of such an application, the proper steps will be taken to have the value of the jetty assessed, in the manner provided for in the agreement between the Government and the companies.

MESSRS. THACKER & Co.

I have, &c.,

W. WLYARD.

MESSRS. THACKER & Co. to THE COLONIAL SECRETARY.

Sydney, 26 April, 1856.

SIR,

We have the honor to acknowledge the receipt of your letter of the 15th instant, in reply to the memorial presented by us to His Excellency the Governor General on the subject of the Australasian Pacific Mail Steam Packet Company's claim.

We note that His Excellency is not indisposed to sanction a reimbursement to the persons entitled of the sum claimable, and that the Executive Council desires to be furnished with a joint application from all the companies or persons interested.

We have to convey our thanks to His Excellency for the consideration which he has given our memorial, and to state that we are about to communicate with the other companies or persons interested, and when completed, forward the joint claim in respect of the disbursements incurred.

We have, &c.,

THACKER & CO.

THE HONORABLE

THE COLONIAL SECRETARY,
Sydney.

MESSRS THACKER & Co. to THE COLONIAL SECRETARY.

Sydney, 28 May, 1857.

SIR,

1. We beg to refer you to our letter of the 26th April, 1856, apprising you of our intention to communicate with the parties interested jointly with the Australasian Pacific Mail Steam Packet Company (whom we represent) in claiming a refund of disbursements expended on that portion of the Circular Quay which was let to them by the Government

2. Circumstances, to which we need not here refer, have hitherto prevented any joint action on the part of those interested in the refund, or allowance referred to.

3. We now beg to inform you, that the Peninsular and Oriental Company, the Agents for the "Great Britain" steam ship, and ourselves, as Agents for the Australasian Pacific Mail Steam Packet Company, have agreed to a joint application, which we have the honor to transmit to you herewith, and submit to your favorable consideration.

We have &c.,

THACKER & CO.

THE HONORABLE

THE COLONIAL SECRETARY,
Sydney.

Sydney,

Sydney, 28 May, 1857.

Sir,

Referring to the communications which have passed between you and Messrs. Thacker & Co., as representatives of the Australasian Pacific Mail Steam Packet Company, on the subject of their claim for disbursements on that portion of the Circular Quay leased by the Government to said company, to the Peninsular and Oriental Company, and to the Agents for the "Great Britain," and to your letter to Messrs. Thacker & Co., of 15th April, 1856, wherein you state that His Excellency the Governor General is not indisposed to sanction a reimbursement to the persons entitled of the sum claimable, and that the Executive Council desires to be furnished with a joint application from all the companies or persons entitled,—

2. We, being all the parties or companies interested as above, have the honor, in accordance with your recommendation, to wait upon you with our joint claim, which we are prepared to substantiate by detailed accounts and vouchers.

3. We beg to say, that the improvements have been made in accordance with a plan submitted to, and approved of, by the Executive Council, which plan as been duly initialled by the proper officers, and carried out under the superintendence of Mr. Walcott, in accordance with paragraph 4 of the Honorable the Colonial Secretary's letter of 8th November, 1853.

4. The amount disbursed, in respect of which compensation is claimed, is £2,676 3s. 2d., which is divided under the following heads:—

Landing Stage	£1,191	3	8
Coal Jetty	542	11	9
Moorings	260	1	3
Fencing	110	6	8
Superintendence	273	11	10
Material, &c.	260	18	0
Plans, &c.	37	10	0
TOTAL	£2,676	3	2

5. In terms of agreement with the Government a rent of £100 per annum was to be paid by each of the three parties interested; but any sums laid out by them in the formation of the Quay to be allowed as a set-off against the payment of such rent.

6. The valuation, we presume, will be made in accordance with paragraph 8 of the Honorable E. D. Thomson's letter of the 8th November, 1853, already referred to.

7. Requesting your early consideration to the settlement of this claim,

We have, &c.,

THACKER & CO.,
Agents for the Australasian Pacific Mail Steam Packet Company.
J. S. SPARKES,
Agent for Peninsular and Oriental Steam Navigation Company.
H. SELWYN SMITH,
Agent for the "Great Britain," S. S. S., and other Ocean Steamers.

The Honorable
The Colonial Secretary,
Sydney.

The former papers in this case appear to have been sent to the Treasury. The claim is one which will, perhaps, have to be dealt with and disposed of between the Treasury and the Department of Lands and Works; and this letter may therefore be forwarded to the former, and Messrs. Thacker & Co. apprised.

1 June, 1857.

H. W. P.

THE SECRETARY TO THE TREASURY to MESSRS. THACKER & CO.

The Treasury, New South Wales,
15 June, 1857.

GENTLEMEN,

I am directed to acknowledge the receipt of your letter of the 28th ultimo, submitting the joint application of the three companies interested in the matter of the refund of certain disbursements incurred in effecting improvement on the part of the Circular Quay leased to the said companies by the Government in 1853.

In reply, I am instructed to enclose herewith a *précis* of the correspondence, &c., which has passed between the Government and the companies, (for the information of the company whom you represent); and to state that the Honorable the Secretary for Finance and Trade can only recommend to the Government the payment (after assessment) of such a sum as the permanent improvements, in the shape of a jetty, may be considered to be

worth, subject to the prescribed deduction for rent of the land. I am to add, that the Honorable Treasurer will be glad to hear that the several parties interested concur in this adjustment, and that measures will then be immediately taken to give it full effect.

MESSRS. THACKER & Co.,
Sydney.

I have, &c.,
HENRY LANE.

MESSRS. THACKER & Co. to THE COLONIAL TREASURER.

Sydney, 20 June, 1857.

SIR,

We beg to acknowledge receipt of your letter of the 15th, and to thank you for the *précis* of the correspondence between the Government and the companies interested in the question of compensation for improvements made by them on the Circular Quay.

As the amount at which the improvements are likely to be valued will be nearly absorbed by the amount of rent accruing to the Government, we beg, by authority of Mr. Champion Wetton, representing the Australasian Pacific Mail Steam Packet Company, to abandon any claim for compensation which that company may have against the Government.

THE HONORABLE
THE COLONIAL TREASURER,
Sydney.

We have, &c.,
THACKER & CO.

P. MARSHALL, ESQ., to THE RIGHT HON. H. LABOUCHERE.

European and Australian Royal Mail Company,
33, Renfield-street, Glasgow,
2 August, 1856.

SIR,

I am instructed by the Directors of this company, who have contracted for conveying the mails between this country and Australia, respectfully to bring under your notice that there is ground at Sydney, near the town, which we understand has been set aside to be used as a wharf for the special use of the steamers engaged in the Australian Mail Service.

I have now, therefore, to beg the favor of your informing me what proceedings to take in order to secure the use of the ground during the continuance of the contract with the Government.

THE RIGHT HONORABLE
H. LABOUCHERE,
&c., &c., &c.

I am, &c.,
(For W. Millero, Secretary,)
P. MARSHALL.

THE SECRETARY OF STATE to THE GOVERNOR GENERAL.

Downing-street,
10 August, 1856.

(No. 95.)

SIR,

2 August, 1856.

I transmit to you herewith, for your information, copy of a letter from the Secretary to the European and Australian Royal Mail Company, requesting to be informed what steps should be taken in order to secure to the company the use of certain ground as a wharf near the town of Sydney.

I have informed the company that this is a question which rests exclusively with the local Government, and that any further communication which they may deem it expedient to make on this subject should be addressed to the local Government.

I shall be glad, however, if you will do all in your power, with the advice of your Executive Council, towards affording all proper facilities to the applicants in the performance of their important public duties in connexion with the Australian Mail Service.

GOVERNOR
SIR W. DENISON,
&c., &c., &c.

I have, &c.,
CLARENDON,
In the absence of Mr. Secretary Labouchere.

THE

CIRCULAR QUAY.

23

THE SECRETARY TO THE TREASURY to THE HARBOUR MASTER.

*The Treasury, New South Wales,
6 May, 1858.*

SIR,

I have the honor to request you will acquaint me, for the information of the Honorable the Minister for Finance and Trade, with the names of persons at present in possession of that portion of the Circular Quay, on the eastern side of the Cove, which was reserved in November, 1853, for Ocean Steamers; stating also the particulars of the terms and conditions of their tenure.

THE HARBOUR MASTER,
Sydney.

I have, &c.,
HENRY LANE.

THE HARBOUR MASTER to THE SECRETARY TO THE TREASURY.

*The Port Office,
Sydney, 11 May, 1858.*

SIR,

In reply to your letter of the 6th instant, relative to the occupancy of the premises on the eastern side of the Circular Quay, I do myself the honor to report that, from inquiry which I have made, it appears that the following persons are in possession of the dwellings:—

- 1st—Mr. Bayliss, stevedore, who states, that he was placed there by the Government, and that the papers relative to his tenancy are in the office of the Colonial Architect.
- 2nd—Mrs. Coffee, who states that she is the widow of one of the boatmen recently (five months past) in the Customs' boat.
- 3rd—Mr. Gorman, who occupies one of the houses without any authority; and the fourth person states that he purchased the house from the Colonial Architect, eight or nine years ago, but was to have taken it down one month after.

I have the honor to enclose to you a letter from Mr. W. H. Moore, upon the subject of the accompanying of that portion of the Circular Quay which was let to the Ocean Steamers Companies.

THE SECRETARY TO THE TREASURY.

I have, &c.,
JOHN CROOK,
Harbour Master.

[Enclosure.]

*Moore's Wharf,
Sydney, 11 May, 1858.*

Sir,

With reference to our interview on Saturday last, regarding the portion of the Circular Quay leased to the Peninsular and Oriental Steam Navigation Company, I beg now to state, for the information of the Government, that I hold the same as agent for the said company, and that Mr. Thomas Gibbes is residing on it under my authority.

Some correspondence took place between Captain Sparkes and other parties and the Government in 1857, with the object of terminating this lease, as well as other adjoining leases to other companies, but nothing was settled; the terms proposed are set forth in a letter to the Honorable the Colonial Secretary, dated 28th May, 1857; and I am prepared, on behalf of the Peninsular and Oriental Steam Navigation Company, to carry out the arrangement on receipt of their proportion of disbursements made, less the rental to be set off against the same, in accordance with the Colonial Secretary's letter of 8th November, 1853.

THE HARBOUR MASTER,
Sydney.

I have, &c.,
HY. MOORE.

THE SECRETARY TO THE TREASURY to HENRY MOORE, ESQ.

*The Treasury, New South Wales,
21 May, 1858.*

SIR,

Referring to your letter of the 11th instant to the Harbour Master, on the subject of your occupation of a portion of that part of the Circular Quay set aside for Ocean Steamers Companies, I am directed by the Honorable the Treasurer to invite your attention to a communication from this Department, dated 15th June, 1857, addressed to Messrs.

Thacker

Thacker and Co., in reply to one from that firm enclosing a joint application from the following parties, or companies (interested in the question of occupancy as above), requesting the reimbursement of sums expended by them in improvements, viz,—

Messrs. Thacker and Co., Agents for the Australasian Pacific Mail Steam Packet Company.

Mr. J. S. Sparkes, Agent for the Peninsular and Oriental Steam Navigation Company.

Mr. H. Selwyn Smith, Agent for the "Great Britain" S. S. S. and other Ocean Steamers.

I am to state that no reply was received from the company of which you are agent (then represented by Mr. Sparkes) to the proposals made by the Government, viz,—

That payment for the improvements effected on that part of the Circular Quay leased to the said companies could only be made (after assessment) for improvements of a permanent character, such as the jetty, subject to the prescribed deductions for rent of the land.

As the Peninsular and Oriental Company have now been in occupation upwards of four years, the rent of £100 per annum, agreed to be paid by that company, has long since absorbed the amount of compensation to which they would have been entitled. I am therefore instructed to request that an early arrangement may be made, in order that the arrears of rent now due by them to the Government may be paid up.

I have, &c.,

HENRY MOORE, Esq.,

HENRY LANE.

Agent for the Peninsular and
Oriental Steam Navigation Company.

THE SECRETARY TO THE TREASURY to HENRY MOORE, ESQ.

*The Treasury, New South Wales,
Sydney, 19 August 1858.*

SIR,

Referring to our late interview at the Treasury, on the subject of the occupation of that portion of the Circular Quay set aside for Ocean Steamers, by the company which you represent, I am directed to request that you will have the goodness to state whether the instructions from your constituents, which you expected by the July mail, have arrived, and if so, to invite the favor of a reply to my communication of the 21st May last.

I have, &c.,

HENRY MOORE, ESQ.

HENRY LANE.

Agent P. & O. S. N. Company.

HENRY MOORE, ESQ., to THE MINISTER FOR FINANCE AND TRADE.

*Moore's Wharf, Sydney,
14 October, 1858.*

SIR,

With reference to the correspondence which has passed between us, regarding the portion of the Circular Quay leased by the Government to the Peninsular and Oriental Steam Navigation Company, I have now the honor to intimate to you, that I have received a letter from the Managing Directors, dated London, 16 August, 1855, from which the following is an extract:—"With reference to the Circular Quay, I am desired to request "that you will *not give it up to the Government*, but retain possession on company's account "until you hear further from us on the subject."

You will be good enough therefore to consider that in not resisting the erection of a boat-house on the ground lately I have not waived the possession by the P. & O. S. N. Co. of the ground in question, under their existing lease or agreement with the Government, as I am now only authorized to act in the matter for the first time by the Managing Directors.

I have, &c.,

HY. MOORE,

THE HON. THE MINISTER FOR
FINANCE AND TRADE,
Sydney.

Acting as Agent for the Peninsular and
Oriental Steam Navigation Company.

THE SECRETARY TO THE TREASURY to HENRY MOORE, ESQ.

*The Treasury, New South Wales,
Sydney, 2 November, 1858.*

SIR,

Referring to previous correspondence on the subject of the occupation of that portion of the Circular Quay set aside for Ocean Steamers, I am directed to inform you, that, as the Government considered that the agreement under which the Quay was let to the companies had become void, they resumed possession thereof, and have taken steps for its re-occupation for public purposes.

I have, &c.,

HENRY MOORE, ESQ.,
Agent for the Peninsular and
Oriental S. N. Company.

HENRY LANE,
Under Secretary.

HENRY MOORE, ESQ., to THE MINISTER FOR FINANCE AND TRADE.

*Moore's Wharf, Sydney,
3 December, 1858.*

SIR,

Referring to my letter dated 14th October last, on the subject of the portion of the Circular Quay leased by the Peninsular and Oriental Steam Navigation Company, I have now the honor to intimate my receipt of another letter, dated 16th September, from the Managing Directors, confirming their previous instructions that I should not surrender possession of the same, and that I consequently take the liberty of protesting against any occupation of it, as communicated by you on the 2nd ultimo.

In your letter of 21st May last, you applied to me for arrears of rent then due by the P. & O. S. N. Co., but my interpretation of the lease being that their share of the expenditure had amounted to more than the rent of £100 per annum against which it was to be applied, I did not tender you any sum, and I am still of that opinion, but should be glad to be favored with an account preparatory to adjustment, in a proper manner, being prepared to pay any amount reasonably found to be due.

In the prospect of requiring to make use of this leasehold immediately, I shall be obliged by your arranging for removal of the shed erected on the premises, as I cannot imagine your perseverance in the course indicated by you on 2nd November, which I respectfully submit to be against all law and justice.

I have, &c.,

HY. MOORE,
Agent for the Peninsular and
Oriental Steam Navigation Company

THE HONORABLE
THE MINISTER FOR FINANCE AND TRADE.

THE SECRETARY TO THE TREASURY to HENRY MOORE, ESQ.

*The Treasury, New South Wales,
Sydney, 4 December, 1858.*

SIR,

I am directed to acknowledge the receipt of your letter of yesterday's date, relative to that portion of the Circular Quay which was reserved under certain conditions for Ocean Steamers, in 1853, and to inform you that the Treasurer cannot add anything to the intimation conveyed to you in my letter of the 2nd ultimo.

I have, &c.,

HENRY MOORE, ESQ.,
Agent for the Peninsular and
Oriental Steam Navigation Company.

HENRY LANE,
Under Secretary.

MR. JAMES FRENCH.

(PRAYING REDRESS.)

Ordered by the Legislative Assembly to be Printed, 11 January, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of James French, of the Parish of Willoughby,—

SHEWETH :—

That your Petitioner was appointed one of the Rangers of Crown Lands for the County of Cumberland in the month of July, one thousand eight hundred and fifty-one, and continued to fill the said office until the fourteenth day of July last, when he was informed, by letter from the Surveyor General, that his services would be dispensed with from that date, in consequence of no provision having been made in the Estimates for the Ranger's salary.

That until the receipt of the said letter your Petitioner had no intimation that it was intended that the office of Ranger should be abolished.

That your Petitioner's salary at the time of his dismissal was eleven pounds and ten pence per month.

That your Petitioner, considering himself entitled to compensation for the loss of his appointment, presented a Petition to the Governor in Council, praying for such compensation, to which your Petitioner received a reply in the month of October last, stating that the Executive Council had decided that your Petitioner is not entitled to compensation.

Your Petitioner, therefore, humbly prays your Honorable House to take into your consideration the above premises.

And your Petitioner, as in duty bound, will ever pray, &c.

JAMES FRENCH.

Sydney, 21 December, 1858.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

MR. EWEBANK LOUGH.

(PRAYING INQUIRY INTO THE CAUSE OF HIS DISMISSAL FROM OFFICE.)

Ordered by the Legislative Assembly to be Printed, 9 March, 1859.

The Honorable the Legislative Assembly, in Parliament assembled.

The humble Petition of EweBank Lough, late Clerk and Steward of the Lunatic Asylum,
Tarban Creek,—

MOST HUMBLY SHEWETH:—

That your Petitioner, who occupied the situation of Clerk and Steward of the Lunatic Asylum, Tarban, for about four months, was unjustly dismissed at the command of Dr. Campbell, under the pretence of neglect of duty.

That your Petitioner having been subpoenaed to attend the Central Criminal Court on the part of the Crown, and Dr. Campbell knowing that your Petitioner had serious charges to make relating to the internal management of that Institution, made, together with other persons, three contra charges against your Petitioner, which they are totally unable to substantiate.

That your Petitioner, whose character is at stake in consequence of these imputations, earnestly prays that your Honorable House will, without delay, cause an inquiry to be made, as two of the principal witnesses are about to leave the Establishment.

And your Petitioner, as in duty bound, will ever pray.

EWEBANK LOUGH.

NEW SOUTH WALES.

COLONIAL CIVIL SERVICE.

(PENSIONS AND GRATUITIES TO OFFICERS OF, ON SUPERANNUATION, REDUCTION,
OR ABOLITION OF OFFICE.)

Ordered by the Legislative Assembly to be Printed, 5 April, 1859.

No. 1.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. FITZ ROY.

Downing-street,

(No. 78.)

14 May, 1848.

SIR,

With reference to the schedule of appointments of special payments in New South Wales for the quarter ending 30th June, 1847, which accompanied your Despatch No. 167, of the 21st August last, and was referred to the Lords of the Treasury, their Lordships have made the following observations in regard to an issue of £200, reported to have been made to Mr. Stephen Partridge, as a gratuity of two years' salary on the abolition of his office of Superintendent of Convicts at Port Macquarie, under the terms of a Despatch from one of my predecessors, dated 29th September, 1831. Their Lordships have stated that the arrangement you have authorised in the case of Mr. Partridge does not appear to them to be objectionable, but that, adverting to the regulations in regard to granting allowances to Public Officers on retirement or reduction of office, adopted subsequently to the date of the above-mentioned Despatch, they consider it would be advisable that no retired allowance should be assigned by you without a previous reference to Her Majesty's Government.

You will also bear in mind that gratuities on reduction of office after periods of service which may not entitle the holders to any permanent allowance are usually granted at the rate of one month's salary for each year of service.

I am, &c.,

GOVERNOR SIR CHARLES FITZ ROY,

GREY.

&c., &c., &c.

No. 2.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. FITZ ROY.

Downing-street,

(No. 2.)

20 July, 1849.

SIR,

I transmit to you herewith, for your information and guidance, the copy of a ^{2nd July, 1849.} letter from the Assistant Secretary to the Lords Commissioners of the Treasury, enclosing copy of a Minute of that Board, dated the 29th ultimo, regulating the system of granting Retiring Pensions or other allowances to subordinate officers in the Colonies.

I have, &c.,

GOVERNOR SIR C. FITZ ROY,

GREY.

&c., &c., &c.

[Enclosure 1 in No. 2]

Treasury Chambers,
2 July, 1849.

Sir,

I am commanded by the Lords Commissioners of Her Majesty's Treasury to transmit to you the accompanying copy of a Minute of this Board, dated 29th ultimo, relating to the superannuation of subordinate officers in the Colonies; and I am to request that, in laying the same before Earl Grey, you will state that, should his Lordship concur in the view My Lords have taken of the subjects to which it has reference, a communication to the purport of it should be made to the Governors of those Colonies to which the proposed arrangement may be applicable.

2 I am at the same time further to state, that My Lords have been generally guided in assigning Colonial Superannuations by the provisions of the Act of the 4th and 5th Wm. IV, cap 24, relating to Civil Departments in the United Kingdom, although the salaries of colonial officers have not in all cases been made liable to the deduction provided for by that Act.

3. I am likewise to state that the conditions and requirements of the said Act, as regard incapacity of applicants for retirement, from age or from infirmity of mind or body, for the further performance of their public duties, and the previous discharge of those duties with diligence and fidelity, and also as regards the period during which the rate of salary on which allowance may be calculated has been received, should be strictly attended to, and that in all cases full information, returns, and certificates, on all these points should be required by the Colonial Government, and forwarded in explanation and support of each grant of allowance when submitted to the Secretary of State; and My Lords consider it may be advisable that the discretionary power of granting retired allowances without previous reference to Her Majesty's Government should not be exercised except in those cases in which the said conditions and requirements have been duly fulfilled and complied with; but I am to request that you will also observe to Lord Grey that in assigning superannuation or retired allowances according to the scales specified in the British Act, it has not been the practise of my Lords' Board to let the increased rates of allowance authorised by those scales after periods of 5 or 7 years service take full effect immediately after the completion of each period, but that My Lords have usually apportioned the authorised rate according as the service might exceed such completion, and approach the next period of increase. Thus, for example, upon the rate of salary to which it is proposed to limit the discretionary grants of retirement by the Colonial Executives, viz., £120 per annum, the maximum allowance authorised by the scale in the 9th clause of the Act, after a service of 15 and not exceeding 20 years, being five-twelfths, or £50. The increase of £10 between this and the next preceding rate of £40 should be distributed by annual apportionments between the fifteenth and twentieth years, as follows:—

Service, 15 years—allowance	£42
" 16 "	"	"	"	"	44
" 17 "	"	"	"	"	46
" 18 "	"	"	"	"	48
" 19 "	"	"	"	"	50

And, in like manner, the Act authorising the allowance of six-twelfths, or £60, for service from 20 to 25 years, the apportionment should be—

For 20 years	£52
21 "	"	"	"	"	54
22 "	"	"	"	"	56
23 "	"	"	"	"	58
24 "	"	"	"	"	60

And in the same ratio with reference to longer or shorter services, a similar distribution by sevenths, instead of fifths, being made, when the allowance is regulated by the scale in the 10th clause of the Act; or, should the term of service, being under ten years, not warrant the assignment of an annual allowance, a gratuity may be granted after the rate of one month's salary for each year of service.

4. I am likewise to request that you will observe to his Lordship, that the regulations laid down in the Minute of this Board of the 21st June, 1831, which was forwarded to the Colonial Office in a letter of the 29th of that month, and of which an extract of such part as may have more immediate bearing on the subject of the allowances now in question accompanies this communication, are also considered by My Lords to apply to Colonial superannuations; and, accordingly, that the apportioned rates above mentioned, giving the maximum allowance for the last year of each period to which the scales of the Act are adapted, are only to be granted in those cases of decidedly faithful and meritorious service contemplated by that Minute; and it will be incumbent on the Colonial authorities to exercise all the precautions, and institute all the inquiries adverted to in it, and where the testimony as to fidelity, diligence, and merit is in any respect defective, to give effect to the intention of the Minute, by directing the deduction from the apportioned rate either of one-fifth or of greater or less amount, for which it provides, or by altogether withholding the grant of allowance where there has been obvious negligence, irregularity, or misconduct.

5. But I am at the same time to state that in cases of special merit it will remain open to the superior authority in this country to award the maximum allowance warranted by the scales of the Act to the shortest terms of service, or to give such extraordinary recompense as is contemplated as regards officers in this country by the 17th clause of the Act.

6. I am further to request that you will observe to Earl Grey that in the case of Ceylon, although the rates of allowance and terms of periodical increase will be regulated according to the scale specially sanctioned for that Colony, the above-mentioned apportion-

ments,

ments, as well as the deduction under the Minute of the 21st June, 1831, will be equally applicable; and that as respects Hong-Kong, the discretionary power vested in the local Governments must only be exercised in cases where the salary, not exceeding £120 per annum, has been subject to the abatement specified in the 27th clause of the Act of 4th and 5th Wm. IV., and referred to in the communication from this Board to the Secretary of State of the 6th December, 1843.

7. I am also to state that the services in respect of which superannuations are granted ought in all cases to have been continuous, unless interrupted by reduction of office or other temporary suspension of employment, not arising from misconduct or voluntary resignation of the party, and that, in computing the amount of allowance, reference may be had to emolument derived from rations, house-rent, or other unquestionable remuneration for personal service in addition to salary, but not to allowances for horse-keep, travelling, stationery, or other expenses of that description which are contingent only on the particular nature and actual transaction of the business of the office the person retiring may have held.

8. I am likewise to state, that although the allowances thus to be granted by Colonial Governments may be permitted to take effect without awaiting confirmation by the Home Government, periodical reports of all that are granted ought to be made to the Secretary of State, accompanied by all requisite explanatory information, and with the understanding that they will be carefully reviewed, and that any grants of which the Secretary of State or My Lords' Board may not approve will be subject to modification or revocation, as circumstances may be found to require.

9. I am also to request that you will observe to Earl Grey, that in cases of suspension of employment on reduction or abolition of office, temporary allowances may be assigned according to the same rules, but with the condition that parties receiving the same will be liable to be recalled into service, as pointed out in the 19th and 20th clauses of the Act 4th and 5th Wm. IV., and with the understanding also that they are to be re-employed as opportunity may offer, in preference to new applicants for office.

I am, &c.,

HERMAN MERIVALE, ESQ.,
&c., &c., &c.

C. E. TREVELYAN.

[Enclosure 2 in No. 2.]

COPY of Treasury Minute, dated the 29th June, 1849.

The attention of the Board is called by Mr. Rich, on the part of the Superannuation Committee, to the frequent references from the Colonial Secretary of State's Department of recommendations from the Governors of Colonies, in which the arrangement of the Civil Establishment does not depend upon the enactment of Local Representative Legislatures, respecting the retirement of persons in the Civil Service of the Colonial Government and the grant of pensions, or other allowances, upon such retirement; and likewise to the numerous instances in which these references relate to persons in subordinate offices usually filled, on the Governor's nomination, by natives of the Colony, and when the arrangements for keeping the departments to which they appertain in an efficient state must be delayed, by requiring that no case of superannuation shall be determined without previous reference to the Secretary of State and to My Lords' Board. And Mr. Rich suggests, for the consideration of the Board, whether the rule relating to such previous reference might not be relaxed in the case of subordinate offices and employments, and where the pension or allowance granted is payable wholly from Colonial Funds.

My Lords refer to the following provisions relating to pensions and retiring allowances in the "Rules and Regulations for the Colonial Service" issued by the Secretary of State, viz. :—

- " 1. It is to be understood, as a general rule, that no Colonial Officers, of any rank or description, are entitled, as of strict and absolute right, to retiring pensions.
- " 2. Each case, however, as it presents itself must be specially considered and treated on its own merits, and the amount of pensions to be granted in any instance will be regulated by the principles of the British Superannuation Act, it being clearly understood that the maximum rate of pension established by that Act is not in practice the minimum rate also."
- " 3. Whenever a Governor may have occasion to bring under the consideration of Her Majesty's Government the application of any officer for a retiring allowance on quitting the Public Service, he is required to furnish a detailed statement shewing the age of such officer, the nature and length of his services, the salary and emoluments of his office, according to the Schedule prescribed for that purpose."

My Lords also refer to the special arrangements relating to superannuation or retired allowances to persons on the Civil Establishment at Hong-Kong, sanctioned by Minutes of the Board of December, 1843, 7th November, 1845, and 9th October, 1846; and at Ceylon, sanctioned by Minutes of 29th April, 1845, 5th June, 1846, 11th May, 1847, and 2nd June, 1848.

My Lords are of opinion that if authority were given to the Executive Government of those Colonies from which superannuation cases are now usually referred to their Board, to consider and dispose of all minor cases of retirement, either on superannuation or reduction of office, much superfluous correspondence and some inconvenient delays might be

be avoided, and with this view it appears to My Lords that the decision as to the rates of allowance to be granted in all cases where the salary of the retiring party has not exceeded £120 per annum, and where the allowance will be chargeable, as before stated, on Colonial Revenues, might be advantageously left to the Local Executives, subject only to specific reports to and revision, if requisite, by the Home Government. But at the same time My Lords conceive that the decisions of the Colonial authorities in this respect must be governed by the rules hitherto conformed to by their Board in determining the rates of allowance on retirements from the Colonial Service, and by which the allowances to Colonial officers in cases not comprised in the above arrangement will still be regulated.

[*Extract from Treasury Minute of 21st June, 1831*]

12-216.

My Lords take into consideration the Act of the 3rd Geo. 4th, cap. 113, for regulating the amount of allowances which may be granted to Civil Officers in the Public Services who have become unfit, from infirmity of body or mind, to execute the duties of their situations, and also the conditions under which the grant of such allowances is authorised.

The scale of allowances inserted in the Act is the highest rate which superannuated officers can legally receive, except in such extraordinary cases as may be brought under the special cognizance of Parliament.

My Lords, upon a mature consideration of the Act, are clearly of opinion that it was not the intention of the Legislature that the full allowance authorised by the scale attached to the Act should be granted indiscriminately to all entitled to superannuations, but that while that allowance was confined to servants of the public who have served with diligence and fidelity, the amount should be adapted to the individual merits and particular circumstances of each case.

The Act imposes on this Board the highly responsible duty of fixing, subject to the conditions contained therein, the allowances in all cases except those in which the Lords Commissioners of the Admiralty may obtain the sanction to a superannuation allowance from the King in Council.

It appears to My Lords that in fulfilling the important duty which Parliament has thus imposed upon them, it is their duty to consider carefully all the particulars of health, of age, and the circumstances of the parties interested, and whether they are holding any other public situation, or receiving any other public money whatever, but especially as the object of the Legislature was to furnish a provision for those who by their diligent and faithful services had deserved well of their country, it is incumbent on My Lords to have particular reference to, and to take into attentive consideration, the services of each individual.

To enable therefore My Lords to do justice to the public, and to the superannuated officers, it is necessary that they should receive a more detailed statement than heretofore of the merits, value, and extent of service which each officer recommended for superannuation may have performed; for My Lords are clearly of opinion that the highest rate of allowance authorised by the Act ought to be given in those cases only in which the services performed have been proved to their satisfaction to have been more than ordinary meritorious, and to have engrossed fully the time and attention of the officer, excepting during a moderate period allowed for relaxation and health.

In the exercise of the discretion entrusted to them by Parliament My Lords will conceive themselves warranted in ordinary cases to grant an allowance equal to about four-fifths of the scale authorised by the Act; but My Lords will deem it their duty to award a lower rate in cases where it shall appear to them that the services of the parties have not been such as to entitle them to that amount, or where the circumstances shall lead My Lords to consider that a less sum will be proper, and My Lords will also fix the allowance, either at the highest amount, or at a rate between four-fifths of, and the whole of the amount authorised by the Act, according to the merit of each case, wherever they may appear to entitle the party to more than the ordinary rate.

To enable My Lords to exercise their discretion on the principle thus stated, they are pleased to desire that directions may be sent to the Heads of all Departments of Government, acquainting them with the views and intentions which My Lords have expressed, and desiring that in every case in which any Civil Public Officer is recommended for superannuation, the recommendation may be accompanied by such statement as will exhibit the merit, and value, and labor of the services of the person recommended, embracing as long a period of his public services as can be authentically stated; and with a view further to assist My Lords in determining the amount of allowance to which the services of each individual may entitle him, they consider it necessary that they should be acquainted with every circumstance which may affect the services of the applicants, and as the actual amount of attendance which an officer may have given to his public duties must necessarily form a material feature in the extent of his claims on the public to be supported when he becomes infirm, My Lords desire that the Heads of Departments, when they recommend any individual whomsoever for superannuation, should be required to state the number of days on which the individual has been present in his office during each of the preceding ten years, stating also the number of days on which he has been absent each year by reason of sickness.

No. 3.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. FITZ ROY.

Downing-street,
22 July, 1851.

SIR,

It has been suggested to me by the Lords Commissioners of the Treasury, that it would be very desirable, in submitting for the consideration of Her Majesty's Government the claims of Civil Officers serving in the Colonies to retired allowances, that such recommendation should be accompanied by a statement, shewing at what period the officers so recommended are expected to retire from active service -- whether on forwarding their application after reduction, or after having passed a Medical Board, or whether on the receipt of the authority for the required superannuation, or at whatever other time, as the case may be.

The inconvenience of applications from distant Colonies for a subsequent consideration of the intermediate term of service between the Governor's recommendation and the confirmation by Her Majesty's Government will be thereby avoided, and the Lords Commissioners of the Treasury will be enabled to fix the date at which the respective allowances will be chargeable in the accounts to be rendered to the Commissioners of Audit, or to make the requisite provision for payment in those cases in which the retired allowances are to be defrayed by this country.

I take this opportunity of transmitting to you a printed form, shewing the particulars required by the Act 4 & 5 William IV., c. 24, and the Treasury Minute dated the 21st June, 1831, to be furnished in reference to each person recommended for a superannuation allowance; and it will be very desirable that the same form should be used in submitting any such recommendation in favor of any officer serving under your Government.

I have, &c.,

GOVERNOR SIR C. FITZ ROY.

GREY.

[Enclosure in No. 3.]

PARTICULARS required by the Act of 4 & 5 Wm. IV. c. 24, and the Treasury Minute, dated 21st June, 1831, to be furnished in reference to each Person recommended for a Superannuation Allowance.

Name of Applicant, and Official Station, recommended for Temporary Allowance or Superannuation.

Age
 Service, in Years and Months
 Actual Salary, if 3 years have elapsed since last promotion; but if not, then average Salary for the last 3 years
 according to old or new Scale—i. e., if appointed subsequent or prior to 4th August, 1829.....

NOTE.—When a Temporary Allowance is intended, the applicant should draw a line through the word "Superannuation," or vice versa.

½ Deduction

Cause of Retirement [with annexed Medical Certificate, if from infirmity of mind or body, and under 65.]

Dates of commencement and termination of the several appointments held by applicant, with their emoluments, distinguishing Salary from other allowances, and specifying such allowances.

Whether holding any other public appointment, or receiving any public money by compensation, half-pay, or otherwise.

Absences during each of the last ten years ...

YEAR.	NUMBER OF DAYS.	
	Illness.	Other Causes.
Date of Cessation of Duty.	18	
	18	
	18	
Date of Cessation of Salary.	18	
	18	
	18	
Date of first contribution to the Superannuation Fund.	18	
	18	
	18	

Statement according to the Superannuation Act, that the applicant has discharged his duties with diligence and fidelity, to the satisfaction of the Head Officer or Officers of his

Department, to be signed by any two of such Head Officers, if there shall be more than one, or by such Head Officer, if there should be but one, together with such a statement as will exhibit the merit, and value, and labor of the services of the person recommended, embracing as long a period of his public service as can be authentically stated, together with observations as to Special Services, Suspension, Reprimand, &c., with full particulars of any injuries received on duty, or other claims or matters for consideration.

"My Lords consider themselves warranted in ordinary cases to grant an allowance equal to about $\frac{1}{3}$ ths of the sum authorised by the Act, but they will consider it their duty to award a lower rate in cases where the services of the parties or circumstances lead them to consider a less sum will be proper; and My Lords will grant an allowance, either at the highest amount, or at a rate between $\frac{1}{3}$ ths and the whole amount authorised by the Act, according to the merits of each case whenever they appear to entitle the party to more than ordinary allowance."—*Extract from the Treasury Minute, dated 21st June, 1831.*

No. 4.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. FITZ ROY.

(No. 43.)

Downing-street,

26 July, 1852.

SIR,

Having referred to the Lords Commissioners of the Treasury a copy of your Despatch No. 37, of the 17th of February last, reporting the circumstances which had led to the retirement of Mr. Kerr, the Chief Commissioner of Insolvent Estates in New South Wales, and that a pension, at the rate of £71 8s. 6d. per annum, had been assigned to him, payable from the amount of £2,500 appropriated by Schedule A, Part 2, of the Constitution Act of Australia to such services, I have to acquaint you that their Lordships have intimated to me their approval of the arrangement, and I have accordingly instructed the Colonial Agent to pay to Mr. Kerr his retired allowance from the 1st of February last inclusive, the period up to which it appears from your Despatch he received it in the Colony.

I have, &c.,

GOVERNOR SIR C. A. FITZ ROY,

JOHN S. PAKINGTON.

&c., &c., &c.

No. 5.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR C. FITZ ROY.

(No. 159.)

Downing-street,

30 October, 1850.

SIR,

Having communicated, for the decision of the Lords Commissioners of the Treasury, a copy of your Despatch of the 11th of March last, No. 39, submitting for favorable consideration, with the advice of your Executive Council, the copy of a memorial from Mr. Carter, praying that he may be allowed a pension in consequence of the abolition of his office of Registrar General, I now transmit, for your information, a copy of a letter which has been received in reply from that Board, from which you will perceive that, on a full consideration of the circumstances of his case, their Lordships are prepared to sanction the grant to Mr. Carter of an allowance of £300 per annum, to be paid out of the unappropriated balance of the sum set apart for pensions under Schedule B of the Constitutional Act of the Colony, 5 and 6 Victoria, cap. 76.

20 October, 1850.

I have, &c.,

GOVERNOR SIR CHARLES FITZ ROY,

GREY.

&c., &c., &c.

[Enclosure in No. 5.]

Treasury Chambers,

26 October, 1850.

SIR,

The Lords Commissioners of Her Majesty's Treasury having had before them your letter of the 16th ultimo, transmitting copy of a Despatch from the Governor of New South Wales, submitting the claim of Mr. Carter, who lately held the office of Registrar of Deeds in that Colony, for a pension; I am commanded to acquaint you, for the information of Earl Grey, that under the peculiar circumstances of Mr. Carter's supersession from the office of Master in Equity in 1832, in consequence of his having unfortunately become involved, on the serious depreciation of property at that time, as stated in Governor Sir C. Fitz Roy's said Despatch, my Lords are of opinion that the break of continuity of service from 1832 to 1837, when

when Mr. Carter was re-employed as Chief Commissioner of the Court of Claims, should not preclude his service from 1823 to 1832 from being considered; and, taking into consideration his various services, the reduction of his office, and his advanced age, My Lords are pleased to sanction the grant to him of an allowance of £300 per annum, to be paid out of the portion of Schedule B. of the Constitutional Act, 5 and 6 Vic, c. 7G,—viz., £3,000 set apart for pensions.

I am, &c.,

H. Merivale, Esq.,
&c., &c., &c.

C. E. TREVELYAN.

No. 6.

[*Extract of a Despatch dated Downing-street, 20 July, 1855.*]

(No. 51.)

19. But with respect to the holders of present interests, whether in the salaries or pensions provided for them, Her Majesty's Government entertain the opinion—in which they do not doubt the concurrence of yourself and the Legislature—that the maintenance of these interests is incumbent on the Crown in order to keep faith with individuals, and incumbent on the Legislature in due execution of its compact with the Crown. I have, therefore, to instruct you to reserve for the Assent of the Crown any Bill which may affect such interests (those namely of present incumbents) either in such salaries or pensions, unless in your discretion you think proper to negative it.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

COLONIAL TREASURY.

(RETURN SHEWING BALANCES TO THE CREDIT OF VARIOUS ACCOUNTS, ON 31 DECEMBER, 1858.)

Ordered by the Legislative Assembly to be Printed, 4 February, 1859.

STATEMENT shewing the Balances in the Treasury on the 31st day of December, 1858, distinguishing the various Balances at the Credit of the Public Revenue Accounts, and the various Lodgment Accounts, with Total Balance ; and also the distribution of the Balances.

MEMORANDUM.—The Sums not embodied in the Appropriation Act, 22 Viet., No. 27, but which form part of the Expenditure authorized for the year 1859, will (with the exception of £57,950, appropriated under the Schedules to the Constitution Act, and Interest Endowments and other Services sanctioned under various Acts of past Sessions), be found set out in the Loan Act of the present Session, 22 Viet., No. 26.

Legislative Assembly Offices,
Sydney, 9 April, 1859.

R. O'CONNOR,
Clerk of the Legislative Assembly.

*R. O'CONNOR,
Clerk of the Legislative Assembly.*

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

CUSTOMS—PORT OF ROCKHAMPTON.

(BUSINESS DONE DURING QUARTER ENDED 31 DECEMBER, 1858.)

Ordered by the Legislative Assembly to be Printed, 4 February, 1859.

THE COLLECTOR OF CUSTOMS to THE SECRETARY TO THE TREASURY.

Custom House, Sydney,
28 January, 1859.

SIR,

I do myself the honor to transmit herewith a communication from the Sub-Collector of Customs of Rockhampton, respecting the business of his Port.

I have, &c.,

J. GIBBES,
Collector of Customs.

THE SECRETARY TO THE TREASURY.

Custom House, Rockhampton,
17 January, 1859.

Sir,

Conceiving that it will be agreeable to you to be placed in possession of some particulars respecting the Customs business of this Port during the Quarter ended the 31st ultimo, I do myself the honor to forward, for your information, the following Report:—

1st. *Shipping*.—(105) one hundred and five vessels arrived during the period above referred to.

2nd. *Tonnage*.—Of these the aggregate burthen was (14,992) fourteen thousand nine hundred and ninety-two tons.

3rd. *Duty*.—Duties have been paid as follows:—

On Brandy	£ 148	9	4
Rum	17	10	0
Liqueurs	9	15	0
Gin	85	16	4
Whisky	4	6	5
Ale	5	9	8
Wine	8	14	0
Coffee	4	3	2
Sugar	0	5	0
Pilotage	296	19	8

Making the Total ... £581 8 7

Of which amount I have remitted, by two separate drafts of the Joint Stock Bank, the sum of (£556 6s. 10d.) five hundred and fifty-six pounds six shillings and ten pence, sterling, being the amount of my collections to the 30th November last, less (£5 0s. 10d.) five pounds and ten pence, Bank charges on the exchange.

The balance (£25 1s. 9d.) twenty-five pounds one shilling and nine pence, remains for transmission by the "Eagle," steamer, now considerably overdue.

4th. *Passengers*.—Of these there have been 6,488 arrivals, and 6,568 departures, the excess of the latter arising from the numerous arrivals overland at the first discovery of gold in this District.

5th. *Gold*.—Only 999 ounces of gold are shewn by the clearance papers as having been shipped hence, and that for Sydney. Independently, however, of this quantity, a considerable portion overland must have been conveyed into other districts of the Colony, and it is, moreover, more than probable that the passengers by the Melbourne ships, which anchored at Keppel Bay, took gold with them amongst their personal baggage.

6th. *Wool*.—Of this produce of the District there were shipped, during the quarter, (270) two hundred and seventy bales, and of—

7th. *Tallow*.—(4) four casks.

8th. *Hides*.—(74) seventy-four.

9th. *Sheepskins*.—(14) fourteen bales.

2. There is likely to be a large quantity of wool shipped for Sydney during the present season; but having lately made it my business to visit Gladstone, and having observed the great facilities it offers as a harbour and for wharfage purposes, and observing that the ephemeral importance which has attached to this place on account of its proximity to a supposed rich gold field is passing away, I am not prepared to maintain any decided opinion as to the superiority of Rockhampton as the future port of this northern portion of the Colony. It possesses the advantages of an extensive back country, which should be considered in arriving at a determination of the question, one to which it may possibly be my duty to refer at greater length on a future opportunity. The disadvantages, however, which I experienced in the case of all the larger vessels from Melbourne anchoring in Keppel Bay, and thus rendering a due surveillance over them impossible, are too fresh in my recollection to permit an entire silence on the subject in the present communication.

The closing of the mail by the "Emily Hort" (the steamer not having arrived) compels me to bring my Report to a somewhat abrupt conclusion.

I have, &c.,

HENRY LUMSDAINE,

Sub-Collector.

The Collector of H. M. Customs,
Sydney.

**INQUIRY INTO CHARGES AGAINST CERTAIN OFFICERS
OF CUSTOMS DEPARTMENT.**

REPORT.

Sydney, 4 February, 1859.

SIR,

In compliance with the desire of the Government, we have, as a Board, investigated the circumstances connected with the clearing and dispatch of the brigantine "Louisa," on the 2nd of September last, and her sudden return and subsequent departure on the 7th of October following. We have also examined such evidence as we considered would throw light on the conduct of the officers of the Customs concerned in this matter; and as in the course of our inquiry we became acquainted with any fact which appeared, though unconnected with the "Louisa," to reflect on the conduct of any officer of the Customs, we considered it our duty to take sufficient evidence, to enable us to report thereon. Appendix No. 1.

Addressing ourselves to the circumstances connected with the movements of the "Louisa," the following facts have been established by the evidence.

The brigantine "Louisa" was placed on the berth outwards for New Caledonia on the 27th August last. On the 28th Captain Riddel, the master, engaged Mr. Thomas Cranmer, who discharged the duties of chief officer, remaining on board during the day, until the morning of the 2nd September. On Saturday, the 28th August, he took on board five hogsheads, which he supposed to contain rum. Export bonds had been taken for these on the day before by Mr. Maddocks, the Cashier and Chief Clerk of the Long Room. They were brought down by Mr. Edward Newton, tide-waiter, who declined to take the mate's receipt for them. They were stowed as far aft as possible. On Monday, the 30th, the mate received and stowed away ninety or more empty beer hogsheads. There were also put on board some 20 tons of shingle ballast, a quantity of old sails, and other lumber, together with some coal and ship's stores. On the evening of the 1st September, Mr. James Stewart, the Custom House Agent, Mr. William Stewart, the charterer of the "Louisa," and Mr. Gibbes, an active and confidential agent, if not a partner, of Mr. Wm. Stewart's, visited the brigantine, taking with them Captain King, who was then formally installed as master of the "Louisa," in the place of Captain Riddel. Captain King had been procured for the purpose from Brisbane Water, by the exertions of Mr. James Stewart, who had ridden to Broken Bay with a letter which he had induced the Custom House Officer at that port to transmit, in the Customs' boat, to Captain King, by representing that it was on a subject in which the Collector was much interested. Appendix No. 2.
Still, 129-139.
Rogers, 57-60.
Collier, 63.

On the evening on which Captain King took charge of the "Louisa," the mate, Mr. Cranmer, received notice to leave. He was directed by Captain King to deliver up his receipts for the cargo, which he did, together with the inventory, (which he had received on joining the ship from Captain Riddel), of the articles on board, which he had checked, and found correct. On the morning of the 2nd of September, between 10 and 11 o'clock, Mr. Cranmer finally quitted the "Louisa," she being then in light sailing trim, and nearly full, with but one man on board, (a black cook), her hatches apparently as he had left them on the evening previous.

THE HONORABLE ROBERT CAMPBELL,
COLONIAL TREASURER,
&c., &c., &c.

At

At about 9 A.M., or two hours previous to this, Mr. Charles Henry Manton, sixth clerk of the Customs, took bonds from Mr. James and Mr. William Stewart, for the due export in the "Louisa" of the following dutiable articles:—

No. of Export Entry.		
1306	200 casks of geneva
1307	28 hogsheads of rum
1308	15 quarter-casks of whisky
1309	{ 31 hogsheads of brandy
		{ 14 quarter-casks ditto
1310	50 cases of claret.

Gibbes, 47.

Appendix No. 7.

The public interest in the proper export of these goods, amounting to about £2,400, and the Act of Council, 9 Vic., No. 15, requiring that the bonds given should be to double that amount. In this duty Mr. Manton acted according to general usage, and with the approval of the Collector, for Mr. Maddocks, and then put the bonds into his own desk, without reporting what he had done. The entries for the goods appear to have been subjected to the usual routine examination; to have been finally passed by Mr. Manton, and then handed to Mr. Rogers, a clerk under the Warehouse-keeper, to make out the usual orders for their delivery. He appears to have done so, and to have placed the whole of them in the hands of Mr. Edward Newton, who at once proceeded, in his own way, to discharge his duty. During the day the following entries were passed in the order stated:—

Appendix No. 4.

No. of Export Entry.	Description of Goods.	Vessel.	Destination.
1311	{ 498 hides and 4 bags } of hoofs	"Bride"	London.
1312	63 bags of sugar	"Rebecca" ...	South Sea Islands.
1313	Salad oil, pickles, &c.	"Louisa"	New Caledonia.
1314	Tea and sugar	"Eli Whitney"	San Francisco.
1315	Coffee and tea	Ditto	Ditto.
1316	8 half-tierces of tobacco	"Louisa"	New Caledonia.

Gibbes, 69, 71,
72, 73.
Newton, 22, 27.

Newton, 30.

Gard, 5, 6, 19, 20.
Hill, 16, 19, 20.

The entry for the tobacco was the last passed on this day, and was not issued from the Custom House till after one o'clock — an export bond having been previously taken for it, as appears by the initials of Mr. Maddocks to the export entry. The goods thus entrusted for shipment to Newton were sufficient to load some thirty drays. It was part of his duty to receive them from the lockers of the several Bonds, and to accompany every package to the vessel, to see it placed on board. He admits that he did not accompany some of the goods, that he was not present at the delivery of any from the Chilian Bond, that he did not accompany any portion of the brandy from that bond to the ship; but he would have it believed that he saw every package, either on the wharf, or in the vessel, during the day. It is however established, by the evidence of Mr. Gard, and of Mr. Hill, that very few loads of any kind of goods came to the wharf that day for the "Louisa." This is confirmed by the evidence of the mate, Cranmer, and of the boy McDonald, who both certify to the "Louisa" being at the time nearly full.

Gard, 3.

Gard, 18.

Gard, 17.

Hill, 26, 27.

Hill, 3, 4.

Hill, 16, 20.

The evidence on this point is very important. Mr. John Gard, who on that day was chief mate of the brig "Swan," lying at the same wharf as the "Louisa," states, that he was at the Grafton Wharf during the whole of that day; that before dinner the "Louisa" had no crew, but only a black cook on board; that at 3 P.M. a dray load of Kanakas came down and placed on board some three dray loads of casks. Mr. William Russell Hill, a partner in, and manager of, the same wharf, confirms Mr. Gard's statement as regards the absence of the crew before dinner, and the influx of blacks during the afternoon. He further states, that arrangements were made with him for wharfage at a rate per day, instead of per package (the usual mode), because the shippers thought there would be no cargo. In consequence he took particular notice of the quantity shipped, to see which mode of charge would pay him best. He considers that from three to five dray loads may have been shipped that day; from what he saw a rate per package would not have paid

paid him. When the "Louisa" hauled off she was not deep, and did not appear full. Hill, 2, 10.
The next day, on seeing in the papers a copy of the "Louisa's" manifest, he made the remark that the goods stated had not been shipped.

On comparing this evidence with that of Cranmer, before quoted, and with the clearance Appendix No. 5.
of the "Louisa," which we have obtained from Port de France, in New Caledonia, from which goods supposed to have been shipped, and not forthcoming, were crased at that port, and with a considerable portion of the evidence which goes to shew that it was quite impossible to have shipped this quantity of goods in one day, also with the fact that a portion of the goods have Still, page 104.
since been seized by the Inspector of Warehouses, we are of opinion that nearly the whole of those intrusted to Newton on that day were passed through the agency of the two Stewarts and himself into home consumption.

At about half-past four in the afternoon of the 2nd of September, Mr. Newton, having previously procured from Captain King, of the "Louisa," a false certificate that the goods had been shipped, found Mr. John Bramwell, Landing-waiter of the Customs, on the Hunter Newton, 63.
River Steam Wharf, and procured his signature to the export warrants. These warrants are Appendix No. 3.
signed in duplicate, and the signature of the landing-waiter implies, according to the printed form of the document to which it is attached, that he has been concerned in shipping the goods. Mr. Newton, having obtained Mr. Bramwell's signature in duplicate, should, according to the regulations of the Board of Customs, have returned one copy to the Warehouse-keeper, that he might write off the goods as shipped; and the other, through the Landing Surveyor, to the Clearing Clerk, to enable the vessel to be properly cleared: he, however, handed both copies to Mr. James Stewart.

In the meantime, Mr. Manton had received a note from Mr. W. Stewart, requesting Appendix No. 6.
his attendance, as a very great favor, on board the "Louisa" at a quarter past 4, to receive the usual declaration to the manifest, and to clear the vessel. In return for this Mr. Stewart agreed to pay him £1 1s. He attended accordingly.

Before a vessel is cleared a declaration is taken from the captain, on her manifest or Powell, 10-12.
content outwards, to the effect that the manifest is a true account of the goods on board, and of the respective shippers and consignees. After this a clearance is granted, and a copy of the manifest being attached to it, the copy and clearance are sealed together with the Customs seal. The declaration should be taken at the Custom House, and, being an important document, should not pass from the custody of an officer of the Customs. The clearance should be given at the same place; and the evidence of the Collector and of others shew that it is only in extreme cases, and by special leave, that these documents may be executed on board ship. The duty of taking the declarations belongs to Mr. Maddocks, the Chief Clerk of the Long Room, and that of giving the clearance should, according to the Appendix No. 7.
Regulations of the Board of Customs, be discharged by at least one of the principal officers July, 1830.
of the port. In this case, however, Mr. Manton, 6th clerk of the Customs, and of five and a-half years' standing, discharged both duties on board the "Louisa," as she lay at the Grafton Wharf, and subsequently handed the manifest, and returned the export warrants, to Mr. James Stewart.

The "Louisa" was towed to sea by the "Black Swan," steamer, on the same evening. She left the Grafton Wharf at about half-past six, having on board Mr. Manton, the two Stewarts, and Mr. William Gibbes. When she had passed Bradley's Head these gentlemen were transferred to the steamer. At about 8 P.M. the steamer and brigantine parted company abreast of the North Head, and the latter stood away to the south-east, with her cargo of empty barrels, ballast, and old stores.

Mr. Manton, on the same evening, as before stated, handed the "Louisa's" papers to Manton, 46-2.
Mr. James Stewart, who returned them on the following morning to Mr. Newton, avowedly Manton, 57-2.
for the purpose of allowing Newton to sign the book, and to hand them to Mr. Manton. Newton, 154.
Mr. Newton delivered them to Mr. Manton, who put them into Mr. Mowle's, the 4th clerk's, desk.

Mr. Collier, Tide-Surveyor, was induced between 10 and 11 o'clock, on the morning of the 3rd September, by rumours of a suspicious character, to examine the "Louisa's" papers. He then found the declaration on the manifest not witnessed, and Mr. Manton's initials at the foot of the entries on the manifest wanting. The initials should have been attached before Mr. Manton took the declaration of the captain. Mr. Collier reported the circumstance to Mr. Garling, who appears to have called on Mr. Manton to complete the document, and then to have let the matter drop.

Four

Four days after the departure of the "Louisa" Mr. Manton transferred the export bonds, which he had taken, as before stated, on her account, to the custody of the messenger, who kept them with others, according to the practice of the department, in a desk accessible to any one during the day.

It was on the 27th of the same month that Mr. William Norman Llewellyn, Chief Clerk of the Customs, was informed in the streets, by the Harbour Master, of a rumour that no bonds had been taken for the dutiable goods supposed to have been shipped in the "Louisa." This led him to send the messenger for these documents, and to direct Mr. Kelly to examine them. Mr. Kelly having communicated to him that all was correct, the bonds were returned to the messenger.

In the meanwhile the "Louisa" had gone to New Caledonia; had discharged a portion of her empty casks, and had sold some claret, ale, and porter, at the Port de France. After a week she cleared out for the Navigator's Islands, and sailed for Sydney; her mate died off the harbour on 6th October, and she entered port the same night.

It was at about five o'clock on the morning of the 7th of October last that the "Louisa" was again seen in Darling Harbour by the Harbour Master. Captain Crook, with some difficulty, obtained permission to board her. His boat's crew were not permitted to accompany him. He desired to see the log-book, to ascertain how the vessel had returned so soon, but was not permitted. He was informed by a person who represented himself to have been placed in charge by Mr. Stewart, that the captain was on shore. Later in the day, having seen him go on board, he again boarded the vessel, and was again informed that the captain was on shore. His suspicions were further excited by noticing that the royal yard was hoisted as if for a signal. He communicated his suspicions to Mr. Cowell, of the Water Police, and expressed his opinion that the vessel would be off that night.

Crook, 3.

It appears that on this occasion the "Louisa," though it was decided by the Shipping Master that she had completed her voyage, and must enter into fresh articles with her crew, did not report inwards in the regular way. She produced no Post Office certificate that her mails had been landed, nor was she visited by a tide-surveyor. During the day Mr. James Stewart applied to the Collector, by letter, to permit the "Louisa" to be cleared at the Customs after hours that evening, on the ground that she had put into port under difficulties, at a great loss. Permission was granted, and Mr. Manton undertook to give it effect.

Appendix No. 8.

Bremer, 13, 14.

Appendix No. 6.

It is required by Act of Council, 15 Victoria, No. 12, that before any vessel shall be allowed to report inwards, the captain's declaration, taken before the Postmaster General or his deputy, to the effect that the mails have been landed, shall be produced before the Collector, Comptroller, or other principal officer of Customs. It is also required, by established regulations, that as soon as a vessel has discharged her cargo, as per manifest, she shall be examined or rummaged by the tide-surveyor, to have determined if she is empty, or, in the absence of cargo, to ascertain the quantity of stores on board. It has been stated in evidence that it is most unprecedented to allow a vessel to clear till a rummage certificate has been received. The evidence we have taken shews clearly that no Post Office declaration was produced, that no rummage took place, and no rummage certificate was given.

Faneourt.

Collier.

Previous to a clearance outwards being granted, a ship's inward papers (of which the Post Office and rummage certificates form a portion) are examined by a jerker or auditor, who, if they are found correct, certifies to the fact by attaching his initials to the ship's manifest or content outwards. The manifest is also initialled by another clerk of the Customs, to shew that all pilot dues have been paid. It is not till after these important certificates have been given that a clearance should be granted. Mr. Manton took upon himself to clear the "Louisa," on the 7th October, without the production of any certificate whatever, and he again resorted to the irregular course of taking the captain's declaration and granting the clearance on board the vessel. Owing to his conduct the "Louisa" was enabled to quit the port that evening.

Appendix No. 9.

The "Louisa," though she cleared for the Navigator's Islands, appears, on this occasion, to have sailed for Hobart Town, as she was found there by Mr. W. Stewart, who left Sydney on the 16th in the "Tasmania" steamer, together with 20 half-tierces of tobacco. The tobacco was transhipped into the "Louisa" by a Customs' order procured by Captain King, and Mr. Stewart returned to Sydney in the steamer.

The "Louisa" proceeded from Hobart Town to Jervis Bay, and on the way fell in with the "Pilot," schooner, bound for Melbourne. Captain King took his passage in her and surrendered the command of the "Louisa" to a Mr. Logan, who had acted as his chief officer. At Jervis Bay Mr. W. Stewart joined the "Louisa," and proceeded in her to Howe's Island. Mr. James Stewart had, in the meantime, with the assistance of Mr. Soares, a Custom House officer, left Sydney in the "Martha," accompanied by his wife and family; Mr. Soares having undertaken to place under safe keeping the household furniture Mr. Stewart would leave. Mr. J. Stewart joined the "Louisa," and his brother, off Howe's Island, and the brigantine stood off the island.

Having thus given a brief narrative of the transactions which we have been desired to investigate, we will now proceed to review the conduct of those officers of the Customs who have been suspended by your orders, and to draw your attention to that of others who appear by their public conduct to have encouraged these and similar irregular or dishonest practices.

Addressing ourselves to the first point on which you have requested our report, viz. :—

"Whether Mr. Maddocks is at all culpable in not having taken care that export bonds were
 "duly executed; or if they were duly executed, whether he is at all at fault for having
 "permitted the abstraction of those bonds from his custody; or whether it is, in any respect,
 "owing to negligence on his part that these documents have been taken from their proper
 "place"—we would draw your attention to the evidence bearing on this subject, and
 named in the margin. From this it appears, that though it is Mr. Maddocks' duty to take
 export bonds when he is in the Long Room, yet any officer in that room would be justified
 in acting for him in his absence. Mr. Manton took the bonds for the majority of the dutiable
 goods for the "Louisa" during Mr. Maddocks' absence, at 9 A.M., or the hour at which the
 Custom House opened; and this act has received the approval of the Collector. There are
 sufficient grounds for supposing that these bonds were duly executed, then deposited by
 Mr. Manton in his own desk, and after four days transferred by him to a drawer under
 the charge of the messenger. They were not, as they should have been, delivered to Mr.
 Maddocks, nor is there any evidence to shew that Mr. Maddocks was informed of their
 having been executed. There is however one bond on account of the "Louisa" of the
 existence of which Mr. Maddocks was cognizant, which is not forthcoming. As regards this,
 his defence is that it was the practice of the department in his predecessor's time, and has
 been since 1847, to deliver bonds when completed into the custody of the messenger, who
 has been considered answerable for their production when called for. It is the impression
 of the officers of the Long Room that Mr. Maddocks is responsible for the safe custody of these
 bonds, apparently on the ground that being the Chief Clerk in that room, he is responsible for
 every article in it. It is the practice to treat the messenger as the responsible person; for,
 when desirous of examining these documents, the Collector and Mr. Llewellyn, the Chief
 Clerk, send for them by the messenger, who procures them without consulting Mr. Maddocks,
 with whom the messenger considers he has "nothing to do." During the night the bonds
 are locked up, and the key is retained by the messenger. During the day they are kept on
 the top of a drawer behind Mr. Manton's desk, at some distance from, if not out of sight of
 Mr. Maddocks' position in the Long Room, and are accessible to any one, even to persons
 unconnected with the department or the public service, who are freely admitted within the
 railings of the Long Room.

MR. MADDOCKS.

Falconer

throughout.

Manton, 66-92.

The evidence further shews that these bonds are accepted without any regard to the solvency of the parties who execute them, are often so carelessly filled up as to render them invalid, and that only one bond, during the last twenty-four years, has been enforced. They are therefore treated in the Long Room as lumber, and considered, as they indeed are, valueless.

Under these circumstances, we acquit Mr. Maddocks of any neglect of duty in regard to the loss or abstraction of the export bonds of the "Louisa," seeing that he acted in accordance with the established usage of the department. We think, however, that as an officer of long standing in the service, fully aware of the insecure manner in which these bonds were preserved, and that frequently irresponsible persons executed them, he is deserving of censure in not having brought these circumstances pointedly and forcibly to the notice of the Collector.

We

We now turn to the second point on which our opinion is requested, viz, whether the other officers of the Customs suspended from duty by your orders have not certified to the exportation of certain dutiable goods by the "Louisa" on the 3rd September, when that vessel is proved to have left the port on the previous day, and whether their proceedings in this, and in other respects connected with this transaction, are consistent with the faithful discharge of their duties.

MR. BROWN.

It is established by the evidence of Hill, M'Cue, M'Donald and others, that the "Louisa" left this port on the second of September, Mr. M'Cue having been the master of the steamer which towed her to sea. The evidence of Mr. J. H. Williams, the lessee, and of Mr. Watts, the storekeeper of Walker's Bond, shew that on the morning of the 3rd, or the day following, Mr. M. G. Brown, Customs locker, issued from that bond eight half-tierces of tobacco marked $\frac{N}{44}$ to Mr. Newton, tide-waiter and export officer. Mr. Williams had arranged for a large auction sale on his wharf on the 3rd September, and had given orders that no goods should be delivered out of bond that day. At about 9 or 10 A.M. application was made to him to allow to be issued 7 or 8 half-tierces of tobacco, as the ship was waiting for them, in fact had cleared and was ready to sail. Mr. Williams gave permission, and saw the tobacco being issued from the store. He has no doubt of the day. He could swear to it, as the order he gave prohibiting the delivery of goods was a most unusual one. He had never given such an order before. The evidence of Mr. Watts supports that of Mr. Williams. Mr. Watts also identifies the tobacco, the officer who authorised the issue, and the officer who received it for export. He testifies that at about 10 A.M., on the 3rd of September, he delivered from Walker's Bond to Mr. Edward Newton 8 half-tierces of tobacco marked $\frac{N}{44}$, which were taken out for export on account of Mr. Stewart, were issued by order of Mr. Brown, and were removed in his, Brown's, presence, the rent being paid at the time. They were the only goods issued on that day.

Appendix No. 4.

There is also the following chain of evidence in support of this. There were eleven export entries issued on the 2nd of September, numbered in the order of their issue from 1306 to 1316 inclusive. It is the custom at stated periods of the day for a messenger to take from the clerk's desks all export entries for free goods which have up to that time been passed, and to distribute them among the landing-waiters of the wharfs to which they refer. The landing-waiters' record in a book kept by the messenger the time these entries are delivered to them. It appears that export entry No. 1311 for free goods was the highest free export entry passed at a quarter before one, at which time messenger Garvan started on his duty of delivery. Entry No. 1313, also a free entry, must have been passed after a quarter before one o'clock, and No. 1316 at a still later period. The last entry named is that for the 8 half-tierces of tobacco at Walker's Bond. It must then have been passed after one P.M., the hour at which Walker's Bond is closed for the day. We consider it to be thus conclusively proved that the tobacco in question was not issued on the 2nd of September, but on a subsequent day.

The only evidence opposed to this is that of O'Brien, the carter, who was Newton's accomplice, and that is contradictory. In his evidence before us he states that the day on which he removed this tobacco from Walker's Bond was a busy day with him, as it was the day that he removed goods from other bonded stores to the Grafton Wharf—meaning the 2nd of September; that he did not remove any goods there next day. In his evidence before the Treasury, which we have received, he stated that he removed this tobacco to the Grafton Wharf on a day previous to the busy day,—on a day on which he took 4 half-tierces of tobacco and 3 hogsheads of spirits from the Chilian Bond to the same wharf. The general evidence shews that the day thus referred to was the 27th of August, or six days previous to O'Brien's busy day. Thus O'Brien's evidence is sufficient to prove that he was an accomplice in the fraud, but nothing more.

The tobacco thus proved to have been issued from bond on the 3rd of September was included in the manifest of the "Louisa" on the day before, and declared to, before Mr. Manton, as on board. When the tobacco was issued the "Louisa" was at sea.

It is the practice to require, on the back of an export entry for dutiable goods, the signature of the locker as to their delivery, of the export officer, the chief officer of the vessel, and landing-waiter as to their shipment.

These signatures are on the back of the export entry for the 8 half-tierces of tobacco. That of the captain must have been attached on the 2nd of September, and, if Mr. Bramwell's evidence

Bramwell 6.

evidence is to be believed, that of Mr. Brown, the locker, and Mr. Newton, the export officer, on the same day.

Mr. Brown was also on the 2nd of September acting locker at the Chilian Bond. The Chilian Stores belonged to Mr. W. Stewart, and consist of three stories, of which the two upper have been used as a bond, and the lower as a free spirit store. The bond on the first floor opens on to a lobby in which there is a trap-door communicating with the free store below. Through this all bonded goods issued for export are passed. They should be delivered through it into the custody of the export officer charged with their conveyance on board the vessel. On the 2nd of September last Mr. Brown should have delivered into Mr. Newton's custody, between the hours of 1 and 4 in the afternoon, 31 hogsheads and 14 quarter-casks of brandy, and 50 cases of claret. The evidence of Mr. Mundy, the locker of Lamb's Wharf, shews that Newton was employed between two and three that afternoon in receiving goods from him. This is confirmed by a statement from Mr. Lamb's warehouse-keeper, forwarded to us through the Government. Newton admits that he did not attend the deliveries from the bond. Mr. Brown admits that he took no pains to ascertain if the export officer was present, believing that his sole duty was to deliver the goods down the trap door. Mr. Still, in a Return which he has furnished us, has shown that the duty value of the goods issued from this bond during this afternoon exceeds £1,000. There is no reliable evidence in proof of their having been removed from the free portion of the Chilian Stores, while the evidence is conclusive that they were not placed on board the "Louisa."

Reviewing the whole of the evidence referring to the conduct of this officer, we consider that, as regards the issue of the tobacco from Walker's Bond, he cannot be acquitted of participation in a conspiracy to defraud the revenue, while his reckless conduct in the delivery of the goods for the Chilian Bond would lead us to a like conclusion. Under the most favorable interpretation of his conduct, he is deserving of all the odium and disgrace which can attach to a public servant for a wilful neglect of a very obvious and important public trust.

The manner in which Mr. Edward Newton discharged his duties in connection with the "Louisa" will be understood from the following summary of the evidence we have taken. Mr. Newton is an established tide-waiter, and does the duty of an export officer. On the 28th of August he accompanied some dutiable goods from bond to the "Louisa," and refused to take the mate's receipt for them, saying it was unnecessary. In this he was aware that he was acting against regulations. He admits—and there is no reason to doubt this portion of his evidence—that on the 2nd of September last he obtained from Mr. Rogers delivery orders for dutiable goods, amounting to some 30 cart loads, and consisting of more than 300 packages, distributed among four bonded stores in different parts of the town. From Gilchrist's he received seven loads of rum, the last only of which he accompanied from the store. From Lamb's Bond he received 200 cases of gin, amounting to eight loads, of which six were sent away unaccompanied by a Customs' officer. He then received from Pollard's Bond 15 quarter-casks of whisky. During the afternoon Mr. Brown, the locker, delivered from the Chilian Bond, in compliance with a delivery order which Newton had given him, 31 hhd. and 14 quarter-casks of brandy, and 50 cases of claret. Mr. Newton was engaged in another locality during the delivery. He, however, is desirous that it should be believed that the goods, which he and Mr. Brown sent away from the several stores unaccompanied by an officer, he afterwards verified and checked on board the "Louisa." It has been proved by the evidence of Cranmer, of M'Donald, of Gard, and of Hill, that no such goods were brought to the Grafton Wharf that day. They must, therefore, with his connivance, have passed into home consumption. It is also established, by the evidence we have quoted in reviewing the conduct of Mr. Brown, that on the day after the "Louisa" left port Mr. Newton took from Walker's Bond 8 half-tierces of tobacco, which he also permitted to be passed into consumption.

Thus, by the active, fraudulent co-operation of Mr. Newton, on the 2nd and 3rd of September, the Revenue was defrauded to an amount exceeding £2,500.

Mr. Newton's conduct in this case is but a solitary instance of his general disgraceful and reckless behaviour. We have omitted to draw attention to his neglect of duties of a less responsible character, as insignificant in comparison with such barefaced frauds as those we have noticed. We may remark, however, that he has habitually neglected the duty of following drays, and has thus surrendered the only check on smuggling which exists in this

Newton, 147-151. portion of the export business; that he is in the habit of making false records in the Customs Register book, kept specially to check the export officer in the discharge of his duty. There is the evidence of Captain Crook to shew that he is a drunken character, and of Cranmer and Crook, 11-15. Hunt that he is abusive, and that he has been suspended from duty and reinstated. We are surprised to find that such an unworthy and discreditable officer should have been permitted Gibbes (2), 134. to remain so long in the public service, and that he should have been so hastily restored to his position after having been once suspended for bad behaviour. Still (8 Dec., 1838), 21-2.

MR. MANTON. We next proceed to review the delinquencies of Mr. Manton; the important part he took in the frauds we have described, and the manner in which he contributed to their success. Mr. Manton's position in the Customs is that of clearing clerk, and his own special duty is to pass entries for export, and to examine the ship's manifest before the captain's declaration is taken. He has, however, by the Collector's authority, taken bonds for the export of dutiable goods for Mr. Maddocks, the Cashier, in his absence; and has a general authority to clear vessels after hours for the Collector, for which he has permission to receive fees.

It would appear that on the morning of the 2nd of September, during the absence of Mr. Maddocks, Mr. Manton took bonds from Mr. James and Mr. William Stewart for an unusually large amount of dutiable goods. The amount of the bonds, if taken according to law, must have been little short of £5,000. The parties to them were a Custom House Agent and the charterer of the vessel. It was obviously Mr. Manton's duty to report these important proceedings to Mr. Maddocks, as the senior officer of the Long Room. He did not do so. He subsequently again neglected his duty by passing irregularly executed export warrants for these goods, some without date, others without his initials, in evidence of the necessary bonds having been taken. These irregularities, though in themselves of moment, are of little consideration as compared with his neglect to check the "Louisa's" manifest with the entries which he had passed, and to place his initials at the foot of the entries in it; with the unusual course he pursued in taking the captain's declaration on board the vessel, and in delivering the ship's papers to the agent, in whose custody they appear to have remained till the next day. Gibbes, 106-108. Maddocks, 32-12. Powell, 41.

To exhibit in its proper light Mr. Manton's conduct in these respects, it is necessary to explain that when goods under bond are required for export, four copies of export entries are prepared. Having been numbered by himself, as clearing clerk, he retains one copy, and two are issued, through the Warehouse-keeper, to the export officer, together with an export warrant or order to the locker to deliver—the fourth copy being designed for the Audit Office. The export officer having received from the locker, and seen on board, the goods mentioned in the entry, and having obtained the certificate of the locker to their delivery, and of the chief officer and landing-waiter to their shipment, having also attached his own certificate to the same effect, should return one copy to the landing-surveyor or clearing clerk, to enable the vessel to be cleared. It is the duty of the clearing clerk to see, in the first place, that every export entry has been executed, and, in the second place, that it is duly entered in the manifest, and he can only do so by comparing together, the copies of the entries in his possession, the copies received from the export officer, and the ship's manifest. This check, then, cannot be so well performed elsewhere as at the Custom House, as the copy of every entry issued is, as before stated, retained there. The comparison having been made, and all found to be correct, the clearing clerk should place his initials immediately below the last entry on the manifest, to prevent any addition to that document. The declaration of the captain is then taken before an officer, who attests, by his own signature on a printed form, that it has been taken before him at the Custom House; lastly, the clearance is granted at the same place. In clearing out the Melbourne steamers it has been the practice to grant clearances on board, but these are an exception to the general rule. Powell, 60, 65.

Mr. Manton, at the solicitation of Mr. Stewart, proceeded on the afternoon of the 2nd September to clear the "Louisa" on board. He omitted to place his initials below the last entry in the manifest as a security against additions. He took the declaration from the captain, without attaching his signature in witness. He granted the clearance on board. He proceeded down the harbour in the "Louisa" in company with the two Stewarts and Mr. William Gibbes, and, lastly, he delivered the whole of the ships papers to the Agent, Mr. J. Stewart, and thus afforded him an opportunity of tampering with them without fear of detection. Powell.

detection—for it has been clearly proved that at that time the manifest did not bear the signature or initials of a single Customs Officer.

The reckless manner in which Mr. Manton discharged this portion of his official duties contributed to the success of the frauds which others had initiated. His subsequent conduct in connection with this vessel lays him open to a more serious charge. On the return of the "Louisa" to this port on the 7th October, it was necessary, as has been stated, that before being entered inwards she should produce a Post Office certificate that her mails had been landed, and before clearing a rummage certificate as to the delivery of her cargo, if any, or as to the stores remaining on board. Mr. Manton should also have obtained the jerker's initials on her manifest, in testimony of the vessel having complied with the regulations of the port. The Act of Council, 15 Vict., No. 12, is peremptory as regards the Post Office certificate, leaving no discretion to the Collector to dispense with it, and the evidence shews that it is unprecedented to allow any vessel to clear till her rummage certificate has been produced and the jerker's initials have been attached to her manifest. Mr. Manton, however, took upon himself to dispense with all these documents, and cleared the "Louisa" a second time on board.

Col. Gibbs, 1, 18,
105.

It appears to us that it is impossible to attribute to an honest motive these glaring violations of laws and regulations.

At that time rumours of a suspicious character regarding the "Louisa" were in circulation. It was known to Mr. Manton and Mr. Rogers, who had been extensively concerned in her movements of the 2nd of September, that Mr. Collier had, on account of these rumours, examined her former papers, and Mr. Llewellyn her export bonds. Possessing this knowledge it was obviously Mr. Manton's duty to be studiously regular in his conduct with regard to her. But if the "Louisa" had stayed to clear out regularly, all must have been discovered. Mr. Crook had been twice on board on the 7th October to examine her log-book, but without success. Mr. Collier had been watching her movements from a Customs boat; men were on board who could report her doings during her absence from Sydney; the Water Police had been made acquainted with the suspicious afloat. It was therefore essential, in order to escape detection, that she should not be visited by any honest man. Mr. Manton was, however, permitted to go on board, and to receive there a second time the captain's declaration, and again to clear her in a manner more irregular than before. He allowed her to proceed to sea that evening after dark, and thus prevented, for the time, the detection of these disgraceful frauds.

Collier, 85, 91.

Crook.
Collier.
Crook.

Powell, 38-41.

Mr. Bramwell, landing-waiter, has contributed to the success of the frauds we have described, by signing warrants to the effect that he assisted in shipping the goods which have been proved to have been passed into home consumption.

MR. BRAMWELL.

The regulations of the Board of Customs applicable to the Colonies direct the landing-waiter to examine all shipping bills (or export warrants as they are here called) delivered to him; also, to endorse them with the particulars of the goods shipped, and to notify to the Warehouse-keeper any short shipment, that such may be returned to that officer before the ship is permitted to clear. The signature of the landing-waiter to an export warrant certifying, as it does, to the goods shipped, is therefore intended to be a security of a *bona fide* character. From want of a sufficient staff of landing-waiters, it would appear that the Collector, some years since, had dispensed with their certificates to shipping bills. Mr. Barnes, the Surveyor General of the Customs, on a visit here in 1845, directed the signatures to be again required, but, according to the Collector's view, as a matter of form, not of security. Mr. Bramwell acted on this view. His conduct is, however, aggravated by the fact that he did not belong to the wharf at which the "Louisa" was lying, and that he signed, without examination, a very unusual quantity of important warrants. In doing this, however, he acted in accordance with the Collector's interpretation of the Regulations, and his act has received the Collector's unqualified approval, as well as that of other officers of the Customs, some of whom bear a character unquestioned for probity.

Bramwell.

It may, perhaps, be said for Mr. Bramwell, that he has, on these grounds, some claim to a merciful consideration of his conduct. We do, however, most strongly condemn the reckless, off-hand manner in which he, an officer of high standing, and of 15 years service in the Customs, placed his signature to documents of such value, at the request of an officer of a known disreputable character. While we acquit him of any intention to defraud the Revenue, we consider he has shewn himself unworthy of the responsible position which he holds, and is deserving of punishment for his negligence in this matter.

We

We shall now proceed, in accordance with our instructions, to report on the conduct of other officers of the Department, and to offer some remarks on the Department generally.

MR. ROGERS.

Mr. Rogers, clerk under Mr. Nash, has shewn himself unworthy of any trust or confidence, by the incautious manner in which, in defiance of regulations, he issued to Mr. Newton, the export officer, a much larger number of warrants than could have been carried out by him in the day. Art. 9 of the Warehouse-keeper's Instructions, issued by the Board of Customs, directs that the Warehouse-keeper shall take care that goods entered for exportation shall not be delivered from the warehouse, or other place of exportation, unless there is sufficient time to deliver them to the searchers, that they may be shipped during the hours of business the same day. Yet, on the 2nd of September, Mr. Rogers delivered to Mr. Newton more delivery orders than could have been properly executed in two days. It was also Mr. Rogers' obvious duty to have drawn Mr. Nash's attention to the fact of the large amount of dutiable goods about to be issued from bond, and to the necessity of placing a tide-waiter on board the vessel to receive them; this he omitted to do. Mr. Rogers has also had the duty of taking charge of the Locker's Book, in which are entered the export warrants issued, the time of their issue, and of their return after due execution; this book is essential as a record of the time taken by export officers in the discharge of their duties, and is intended as a check on them. Mr. Rogers has neglected to preserve this check; the book has been kept in a most slovenly manner, and has been left open to be completed by those whom it was designed to check. Through Mr. Rogers' negligence, Mr. Newton has been enabled to falsify this record, and to make it appear (contrary to his own evidence) that the export warrants entrusted to him on the 2nd September were duly carried out and returned to the Warehouse-keeper the same day. Mr. Rogers is also guilty of falsehood, in alleging that the entries in the locker's book were made by Newton, and the export warrants returned to his custody at the time stated in the book. Whereas by Newton's own evidence it is shewn that the documents were not returned until the morning of the 3rd, nor the book entered up until that time.

MR. NASH.

Mr. Nash is answerable for Mr. Rogers' negligence in many of the above particulars, inasmuch as, holding the position of Warehouse-keeper, he is responsible for the conduct of a subordinate of his Department. He is also culpable for his neglect to bring under the notice of the Collector the loose system tolerated in the transfer of goods from one bond to another, and for keeping no record of the issue of transfer orders, or of the officers intrusted with their execution. Mr. Rogers' neglect of duty has extended over a long period, and cannot have escaped the notice of his superior. Yet it has been permitted to continue, on the apparent ground, that though he is, in Mr. Nash's opinion, incompetent to discharge his duty—he has a wife and family, and therefore deserves consideration. Mr. Nash has stated that to this incompetent person he has intrusted the whole duty connected with the Export Branch of his Department. By thus neglecting the responsibility obviously attaching to his position, Mr. Nash has contributed towards the disorganization of the Customs Department generally, and of his own.

Nash, 103, 109.

Nash.

MR. BREMER.

It has been stated in evidence that Mr. Bremer, tide-surveyor of the Customs, has been drunk on duty, and has acted in other ways in a manner unbecoming his position as a public officer. We have not considered it necessary to delay our report with a view to inquire into the truth of these allegations, but, as a charge of a grave character has been made against a gentleman in a responsible position, we are of opinion that further inquiries should be made, in order either to establish the truth of it, or to remove the imputation which now rests on this officer.

Appendix, No. 13

MR. SOARES.
Appendix, No. 14.

The conduct of Mr. Soares, a locker in the Customs Department, was brought under our notice through a report made by a detective officer of the police to the Inspector General, charging that officer with being privy to the escape of Mr. James Stewart from the Colony, and with permitting that gentleman's furniture and effects to be removed to his own charge.

Mr. Soares, in his examination before us, denied that he was at all aware of the escape of Mr. James Stewart, and although he admitted that he was employed up to a late hour on the 6th of November in removing furniture from Stewart's house, he alleged that he was only taking out of the house that portion of the property belonging to Mr. James Stewart's mother.

Were

Were it not for the testimony of the boy M'Donald, Mr. Soares' explanation of his conduct might have been considered sufficient, but when it appears to be beyond a doubt that M'Donald (who had made the voyage in the "Louisa" when she was employed in the nefarious act of defrauding the Government) had been a resident at Soares' house for a period of nearly three weeks, and had been, during the evening of the 6th November, employed by that officer in removing cases and other things for Mrs. J. Stewart to the vessel, which was about to take Mr Stewart and his wife to Howe's Island—and on board of which vessel there is little doubt he proceeded during the night—it is manifest to the Board that Mr. Soares was accessory, after the fact, to the fraud which had been committed, as well as instrumental, to a considerable extent, in facilitating the escape of Mr. James Stewart from the Colony.

We have not considered ourselves called upon to review the conduct of Mr. James Stewart, Mr. William Stewart, or Mr. William Gibbes. We have, however, to draw attention to the evidence taken, by which it appears to us to be established that they have been parties in a conspiracy to defraud the Revenue, and to suggest that the attention of the Crown Law Officers be drawn to it, with a view to the institution of such legal proceedings as may appear desirable. We are also of opinion that there are sufficient grounds for similar proceedings against Messrs. Manton, Newton, and Brown, three of the officers of the Customs whose conduct we have reviewed.

The evidence which we have taken has disclosed an extraordinary want of organization in the Customs Department. It has rendered apparent that there is no departmental unity of action, or uniformity of practice; that the duties and responsibilities of the several officials are undefined; that irregularities prevail almost unchecked, and extensive frauds can be perpetrated, with scarce any attempt at concealment, and yet escape detection or punishment.

For this state of things the Collector, as head of the department, is in a great degree responsible. We now propose to draw your attention to the views entertained by him, and to those of his acts during his administration of the department which we consider have contributed to these injurious results.

The view taken by the Collector as regards the necessity of rummaging vessels is, in our opinion, opposed to that of the Board of Customs, to the practice of his own department, and a strong encouragement to smuggling.

When a vessel has been reported inwards, having on board dutiable goods, the practice is to put a tide-waiter on board, whose duty it is, in conjunction with the landing-waiter of the wharf, to check the goods discharged. After the cargo has been discharged, as per manifest, a tide-surveyor should examine or rummage her, to see that she has no dutiable goods remaining on board which could be run after the tide-waiter has been removed. A rummage certificate should be then given by him; and be examined and filed with the inward papers by the jerker, and the vessel should not be allowed to enter, or clear outwards, till the jerker has certified that he has received this, with all other inward papers relating to the vessel. It is evident that this precaution is as necessary with regard to a vessel entering inwards in ballast, or in distress, as with regard to one entering inwards in cargo; and to dispense with the check in the former cases, especially as regards vessels trading with places where no Custom House exists, is to provide an easy means for smuggling. The General Orders of the Board of Customs, compiled by their authority, and issued to the service, comprise the following very stringent order on this point:—"The Collector and Comptroller at the several out-ports are to take especial care, whenever any vessel puts into their port, or the creeks thereunto belonging, under plea of distress, or of want of repair, forthwith to ascertain, by examination of the tide-surveyor, or some other competent officer, and if there is no competent officer, taking the aid of some person who is so competent, that the distress is real, * * * and in case they have any doubt of those circumstances, or any other matter arises which may appear to them fit for the cognizance of the Board, they are forthwith to represent the same, * * * and they are, on all such occasions, to be particularly active, vigilant, and attentive in the execution of this Order, so as to prevent any improper practices." The Order further directs that the Collector is not to grant any distress sufferance to such vessel to land goods without a previous certificate from the tide-surveyor as to the necessity thereof.

This Order is sufficient to shew that the Board of Customs consider that the utmost vigilance should be exercised over vessels entering port in distress, and that every such vessel, whether she has reported inwards or not, should be examined by the tide-surveyor.

The "Louisa" reported inwards, in ballast, on the 7th October, and should at once have been boarded and rummaged. The clearance granted to her that afternoon to proceed outward should have been withheld till a certificate of rummage had been given; yet she was, through the instrumentality of Mr. Manton, allowed to proceed to sea again without any examination whatever.

Col. Gibbes, 124,
138.

We have stated our opinion in a former part of the Report that Mr. Manton's conduct in this respect was most irregular and suspicious; it has, however, been justified by the Collector. Regarding the rummage, the Collector states that he believes the tide-surveyor's coxswain and boat's crew did visit the "Louisa," (we have ascertained that they did not) and found her in ballast; that it was not necessary for the tide-surveyor to give a rummage certificate as the vessel was in ballast, that, in fact, none was required; that the jerker had nothing to do with the "Louisa's" papers on the 7th October, though she had reported inwards; that the "Louisa's" was an exceptional case, like all such cases of vessels in ballast; that Mr. Manton was perfectly justified in clearing the "Louisa" on this occasion.

Fancourt, (No. 1)

Collier, 27, 58, 65,
69.
Powell, 72.
Collier.

The Collector's opinions are opposed to those of his subordinates, and of others who emphatically declare the rummage certificate to be indispensable; Mr. Manton also shews that he was aware of the necessity of such a certificate by the trouble he took to procure it the day after the "Louisa" had sailed.

The Collector's justification of Mr. Manton's conduct in this particular has surprised us. The consequence of his view is, that a vessel laden with dutiable goods, intended to be run, should, as a precautionary measure, report inwards in ballast, by which means she may calculate on escaping the visitation of any officer of the Customs, may land her cargo during the night, and may clear out next day, in accordance with Customs Regulations, without fear of detection. It is, in our opinion, essential, to prevent this description of fraud, that the duties pointed out in the Instructions of the Board of Customs should be faithfully discharged; that the tide-surveyor should board every vessel entering port, and, if necessary, put a tide-waiter on board. It is especially directed in the Instructions referred to that the tide-surveyor shall board, in person, every vessel as soon as the cargo has been discharged, and shall carefully rummage all suspicious places, and he is expressly prohibited from allowing this service to be performed by his boatmen. It is also very necessary that the certificate of the tide-surveyor that he has duly rummaged should be received by the jerker or auditor of the inward papers, as he is the officer responsible for the detention of the vessel till she has complied with regulations, and discharged all dues; and that the clearance outward should not be granted till the jerker has given his certificate to the correctness of the inward papers. The neglect of these precautions permitted the "Louisa" to leave the port on the evening of the 7th of October under most suspicious circumstances; yet, in the opinion of the Collector, in accordance with regulations, and with the practice of the department.

Tide-surveyor's
Instructions.
Art. 12.

The Collector appears also to consider that the Post Office Certificate of the Mails having been landed may, in some cases, be dispensed with. The Act of Council, 15 Vict., No. 12, sec. 34, is very clear on this point; it directs that no Collector, Comptroller, or Principal Officer of the Customs shall permit any vessel to report till the certificate has been produced, and permits of no discretion in the matter.

Dispenses with
anding-waiter's
certificate to
shipping bills.

132, 165.
Powell, 49, 52, 57.
Russell, 14, 23.
Kidd, 5, 13.

A very important check on the export of goods has been surrendered by the Collector, owing to his view of an order he received from a superior officer. It is provided by the Regulations of the Board of Customs that a searcher shall certify to the due shipment of all dutiable goods issued from bond for export. Articles 20 and 21 of the Landing Waiter's Instructions, applicable to the Colonies, impose this duty on the landing-waiter. That it is not imposed as a matter of form is evident from the tenor of those instructions, which direct the landing-waiter to examine all shipping bills delivered to him, and to notify to the Warehouse-keeper any short shipment. That the Board of Customs enforce the application of the check is also clear; for we find in the General Orders of the Board, before referred to, that a searcher of the first class at the port of Liverpool, having authorised and certified to the shipment of certain goods without due examination, whereby the Revenue had been defrauded, was dismissed the service. There appears thus to be no doubt that the certificate of the landing-waiter

Landing-waiter's
Instructions.
Art. 20 & 21.

waiter is intended to be a *guarantee* of the due shipment of dutiable goods. This check appears from the evidence of the Collector to have been, in the first place, dispensed with, on the ground that there were not sufficient landing-waiters to maintain it. The practice of the Department was in this position when, in the years 1845-46, Mr. Barnes, in the capacity of Surveyor General of the Customs, visited the Colony, and having found that in this respect the Treasury Regulations were not complied with, gave order that they should be observed in future. The order was verbal, and no record of it was taken. According to the Collector's view, Mr. Barnes required the form alone to be observed; other witnesses are of opinion that it was intended that the check should be restored. The Collector's view became the rule of the Department, and continued so till the frauds in connection with the "Louisa" were brought to the notice of the Government. Some officers of the Customs have protested against this view of the instructions, but the majority have felt called upon to act up to it.

Appendix No. 16.

Thus from some date prior to the visit of Mr. Barnes, until very recently, it has been the practice to intrust the whole duty of checking the shipment of dutiable goods to tide-waiters, of whom many are stated to be disreputable, drunken, or insufficiently educated. Since 1845, the signature of the landing-waiter has been required, but as a matter wholly of form.

Our own views of this question are, that the Collector has misunderstood Mr. Barnes' order; that, taking the view he did, he should have requested, in writing, instructions of so important a character, and so directly opposed to the printed Regulations of the Board of Customs; that, his request being refused, he should at once have applied to that Board to confirm the order. In omitting to act in this manner he has omitted to take a very obvious precaution, for his own justification; he has surrendered a very important check on insufficient grounds; and in doing so has failed in his duty.

Previous to the period at which the Customs Department, with its revenues, was transferred to the Colony, it was under the orders of the Board of Customs in London, and governed by Regulations of a very precise and detailed character: These Regulations defined, among other matters, the duties of the Collector, Comptroller, Landing Surveyor, Tide Surveyor, Gaugers, Warehouse-keepers, Tide-waiters, and Clerks for general business. The Regulations referring to each class of officers were bound separately, with a view that each officer, on joining, should be furnished with a copy. The Collector's Instructions imply that he was supplied with these copies for distribution. It appears that in 1852 the Collector received a communication from the Board of Customs directing him, as the Customs Department of the Colony had been transferred to the Colonial Government, to call in the Commissions and Instructions issued by the Board to the several officers of this port and survey, and to transmit the same, together with those issued by himself, to the Board, for the purpose of being cancelled. This order was complied with, and from that time the business of the department appears to have been conducted without any code of instructions for the reference and guidance of junior officers. At present there are no written or printed instructions issued to officers on joining the department. They are taught and told the practice by their superiors. With the exception of those issued by the tide-surveyors to tide-waiters, there are no printed instructions for a deviation from which an officer can be called to account. There is great difficulty in saying what the regulations are. No record has been kept even of minutes. It is stated that a rule of practice adopted one day may be broken a few days after. It thus happens that the responsibility of junior officers is undefined. Some, intrusted with most important duties, consider that they may act in all things according to their discretion. Even the practice of the department is not uniform, nor do the officers agree in their views regarding it. A laxity of practice has been the result; of which we may here give a few examples.

Has set aside or neglected to issue regulations for the guidance of the department.

Appendix No. 17.

Col. Gibbs, 42, 243, 247. Bancourt, 205, 207. Powell, 23, 30.

The printed instructions to the Warehouse-keeper direct that he shall not allow goods for export to issue from bond, unless there is sufficient time to deliver them to the searchers (who are here the landing-waiters) that they may be shipped during the hours of business. This appears an obvious precaution; yet Mr. Nash states that if the shipper were to ask it he would issue export warrants to an export officer without considering his capability to perform the duty in the day. In fact, it is evident that the whole responsibility in this matter is thrown on the lockers, a very junior class of officers. The manner in which they act is indicated by their evidence.

Mr.

StuL, 80.
Nash 20, 21.
Hunt, 8, 13.

Dickenson.

Brown.

Brown, 21, 22,
45, 49.
 Mr. Still, the Inspector of Warehouses, states he has required that spirits which have been in bond for a period exceeding one month shall be re-gauged before issue. But this is not the recognised practice. Mr. Hunt, the locker of Pollard's Bond, states there is no such order, and that it is left to the locker's discretion to act as he thinks fit, even if the spirits have been in bond six months. Mr. Dickenson, who was on the 2nd September the locker at Gilchrist's Bond, issued 28 hhd. of rum without re-gauge, because he was told by a Customs officer that there was no necessity to re-gauge spirits going to the Islands. Mr. Brown, the locker at the Chilian Bond, states, that on the 2nd of September he neglected to re-gauge any portion of the 31 hogsheads and 14 quarter-casks of brandy, because if he had acted otherwise he would have prevented their shipment: thus shewing that he considers it no part of his duty to protect the Public Revenue. He re-gauges when time allows. When a large order comes he cannot re-gauge. He exercises his own discretion in all cases.

Appendix No. 24.
 It is manifest that thus great opportunities for fraud are offered. Spirits are, in the first instance, bonded under the gauge of a landing-waiter on whose conduct there is no check. By the fraudulent co-operation of this officer, spirits may be readily passed into bond and re-issued under a false gauge. By similar co-operation on the part of the locker, they may be drawn off in bond and replaced by other liquids without detection. It appears to us that the trust reposed in these officers is far beyond that which is requisite for the Public Service, or the legitimate operations of trade; that some check on their conduct is necessary; and that precise instructions, defining the responsibilities, and limiting the discretion of lockers, and other junior officers, are urgently required for the protection of the Revenue.

Title Surveyor's
Instructions,
Art. 13.
 The absence of printed instructions has acted detrimentally in other important respects. In the instructions issued by the Board of Customs, it is evidently intended that landing-waiters shall keep a proper supervision over tide-waiters, both as to the export and to the import of dutiable goods. The same instructions require that tide-surveyors shall take care that a tide-waiter does not leave the vessel placed in his charge until the cargo has been delivered and he has been duly relieved; that the tide-waiters on such duty shall be visited by tide-surveyors twice a week, at uncertain hours, and a report of such visit shall be made on the following day to the Collector and Comptroller; also that the tide-surveyor shall rummage all vessels in person, and not by his boatmen.

Fancourt,
2nd evidence,
21-42.
Collier, 151-158.
 We have inquired into one instance which has exemplified the misbehaviour of a landing-waiter, named Warburton; and which though brought to the knowledge of the Collector, was apparently passed over without notice. Some twelve months since the "Fanny Fisher" entered inwards, with 4012 bags of sugar, of which about 550 bags were allowed by the tide-waiter to be landed without entry. This neglect of duty should have been discovered by the landing-waiter of the wharf. It, however, escaped detection till the ship's books were examined by the jerker. In the meantime the importer had become insolvent, and the duty would not have been recovered to the public had not the Union Bank held a lien on a large portion of the sugar which had not been delivered. On the neglect being discovered, the Collector withheld the sugar belonging to the Bank till the Manager had paid the duty for that portion improperly removed by the insolvent, as well as for the sugar the property of the Bank. To avoid a greater loss, Mr. Robertson, the Manager, was compelled to make good the sum of £173, which had been lost to the Revenue by the carelessness of the tide-waiter and landing-waiter. The tide-waiter, who was a known drunken character, and, according to Mr. Garling's evidence, was in the habit of neglecting his duty, was dismissed; but the landing-waiter, who should have detected the neglect at the end of the day, appears to have escaped punishment.

Appendix No. 19.
 We have drawn your attention to this case with the view of illustrating the loose system allowed to exist in the discharge of ordinary cargoes, and the small supervision exercised by landing-waiters, or by their immediate superior, the landing-surveyor; not with the desire of bringing Mr. Warburton under the displeasure of the Government, he having been since disgraced for another offence, and appointed to an inferior position.

Gauger's
Instructions.
 In order to detect peculiarities in the manufacture of spirit casks, and thus to prevent frauds on the Revenue, the Board of Customs have issued very precise instructions as to gauging and calculating contents, which we are confident cannot be complied with unless a copy is furnished to those intrusted with the gauging duty. The tide-waiter's instructions direct

that

that he shall on no account leave his ship; that he must not allow his friends to be invited on board, nor accept, at his own meals on board, other than the necessary provisions of the ship. The instructions for the Collector and Comptroller direct that whenever a warehouse is offered for approval as a bond they shall inspect it, to ascertain that the windows are secured with iron bars fixed into brick or stone, or into iron frames secured inside. They also direct that no more warehouses than are necessary for the trade of the Port shall be licensed; and the Collector's Instructions direct, that, previous to any officer being permitted to perform the duties of his office, he shall be furnished with a copy of the Instructions applicable to his position.

Tide-waiter's
Instructions.
Art. 3.
Art. 13.

Collector's and
Comptroller's
Instructions.
Art. 2.
Art. 4.

Collector's
Instructions.
Art. 29.

The evidence we have taken shews that these Instructions have been, more or less, departed from, both in letter and spirit. Landing-waiters exercise little or no supervision over tide-waiters. Vessels are not effectually or systematically rummaged. The gauging of spirits is not correctly performed, as it is well known that spirits have been issued from bond at a higher gauge than that at which they were bonded. Tide-waiters, as a rule, quit vessels under their charge during the night, and return in the morning; they also get treated on board, and in some cases become intoxicated while on duty. The Chilian Bond, licensed to Mr. W. Stewart, was not found secured in the manner pointed out in the regulations; and, as we have stated before, there are no printed instructions issued to an officer on joining.

It is our opinion that the Collector has, in a great measure, contributed to these irregularities, by having permitted the department to continue for so many years without any regulations for the instruction and guidance of the officers. Whatever view he may have taken of the directions he received from the Board of Customs to return the instructions issued by them, he should, we conceive, have obtained the authority of the Colonial Government to preserve in force such of them as had been found to work beneficially, and should have adhered to the practice of issuing to every officer on joining printed instructions, defining their responsibilities, and limiting their discretion. Under existing circumstances a staff of about 100 officials is governed by the practice of the Department, as explained by the Collector when appealed to, and by other officers, each according to his own view.

The existing practice as regards the taking, preservation, and enforcement of bonds for the export of dutiable goods, appears to us to afford no security to the Revenue. They are taken from any two persons who may offer, without regard to their solvency. They are allowed to be taken before any officer, on the ground that one officer is as good a witness as another, thus shewing that the witness as to execution is the only security insisted on. It is further proved that no steps are taken to require the fulfilment of the bonds. The conditions of it, which are in accordance with the Act of Council, 9 Vict., 15, require that it shall remain in force until the goods named in it have been proved to the satisfaction of the Collector, or other proper officer, to have been duly landed. It would appear from the Mercantile and Maritime Guide, by Willmore and Beedell, published in 1856, that it is the Imperial practice to require the satisfaction of these bonds, time being allowed for the landing of the goods, varying from 3 to 18 months, depending on the distance of the port of destination; in special cases a consular or even a known merchant's certificate being taken as sufficient satisfaction. We are of opinion that this practice should be introduced here. Had it prevailed, the frauds in connection with the "Louisa" could not have been attempted with any hope of escaping detection.

Practice of
taking bonds
defective.
Col. Gibbes, 109,
113, 254, 260.
Llewellyn, 72, 84,
174, 176.
Colonel Gibbes,
page 109, ques-
tion 54, 62.

We have in evidence another example of the illicit practices which the absence of this check has encouraged. On the 16th of October the "Tasmania" steamer took on board 20 half-tierces of tobacco, and sailed with Mr. W. Stewart as passenger for Hobart Town. On her arrival there the tobacco was transhipped into the "Louisa," then lying in the harbour, conveyed to Jervis Bay, and afterwards to Howe's Island, obviously with the intention of landing it at one or other of these places, should an opportunity offer. Had proper bonds been in the first place taken for these goods, and the Imperial practice prevailed, the parties to the bond might now have been called on to give satisfaction as to their having been duly landed, or to forfeit the amount, of which there is little doubt the public Revenue will in this case be defrauded.

From a Return furnished by the Collector of Customs to the Treasury, and from other evidence we have received, it appears that large quantities of dutiable goods are

exported

exported for places at which Custom Houses do not exist; and as no satisfaction is required that they are landed at the ports for which they are shipped, there is no security against their being run on the coast, and thus brought into home consumption, to the detriment of the Revenue and the honest trader.

Fees for extra hours of attendance allowed to be received without control. Col. Gibbes, 143, 145, 156, 288, 287. Appendix No. 6.

Another practice which is open to grave objections obtains in the Customs Department—that of allowing officers to receive fees for work done during extra hours, without the interposition of the Collector. This license was taken advantage of by Mr. William Stewart to persuade Mr. Manton to clear out the “Louisa” after hours in an irregular manner, and is an inducement to postpone work till after hours. Bonded stores are thus kept open beyond the regular hours, and dishonest practices are encouraged. It appears to us that the regular duties performed by the officers of the Customs should, as a rule, be considered as for the public service, independent of the hour at which they may be performed; and that if in any special case an officer has been detained for the sole accommodation of the merchant, or master of the vessel, he should be paid by him, through the Collector, at an established rate.

Page 182.

Gibbes, 52, 57. Also Maddocks and Manton.

The Collector has also permitted the following order of the Board of Customs to be set aside—“No person must be permitted to enter any of the offices, except on business strictly official, and in such cases they are not, on any pretence to be allowed to come within the rail or to have access to any official book or paper.” It is shewn in evidence that the public are permitted, without restraint, to enter within the railings of the Long Room of the Customs, and to have access to the bonds and other records in the custody of the department. The Collector appears to doubt if any part of the Long Room is safe; he states that officers have had their desks opened during their absence. To this license may be attributed the loss of the export bonds of the “Louisa.”

No organisation in the department for the detection of irregularities.

Collier, 60.

Many of the irregular practices which have been disclosed during our inquiry have been encouraged by the want of a proper organization in the department, by means of which delinquencies and irregularities on the part of the officers would be brought to the notice of the Collector. This defect has been forcibly illustrated by the circumstances in connection with the “Louisa” which have been disclosed. It has been shewn that a glaring fraud has been somewhat clumsily perpetrated, and apparently with hardly an attempt at concealment; yet, as far as may be judged by the evidence, it would not have been brought to the notice of the Collector, or inquired through the exertions of any officer of the Customs. Suspicions in regard to the movements of this vessel were entertained by Mr. Collier, tide-surveyor, as early as the 4th of September. He accordingly communicated them to Mr. Ross, the Customs’ officer at Broken Bay, and furnished him with a copy of the cargo, requesting him to keep a look-out at several points which he named, as he was of opinion that the cargo would be run on the coast, but he did not consider it his duty to take any further action. On the 26th of September, the Harbour Master having drawn the Chief Clerk’s attention to a report that no bonds had been taken for the goods shipped in the “Louisa,” he caused an examination to be made, and having been satisfied on that point, he made no further inquiries. The Warehouse-keeper, an officer charged with very responsible duties, does not appear to have noticed that which his books shewed, viz., that an extraordinary amount of dutiable goods had been removed from his custody in one day by one export officer, or to have made any communication or report on the point. The apathy or ignorance which prevailed regarding this matter was so general, that on the 7th of October, or five weeks after her first departure, the “Louisa” having been compelled, from circumstances, to enter this port, was granted extraordinary facilities for departing on the same day—no officer of the Customs having considered it his duty to investigate the rumours in circulation, or to suggest to the Collector the propriety of some delay in granting this vessel a clearance. The officer implicated in her frauds was enabled, by the power improperly deputed to him, to allow the vessel to escape, and to prevent for a time the discovery of the fraud, which appears to have been ultimately brought to light by the exertions of a gentleman unconnected with the Government.

Naah. Still.

The Collector considers the case of the “Louisa” as a solitary instance of a successful attempt to defraud the public. We are not of that opinion. It appears to us that the want of proper organization in the Customs offers great facilities for defrauding the Revenue, which we cannot doubt are frequently taken advantage of. It is clearly shewn by the evidence that

until

until the Collector's notice was drawn to the fact, an order directing the transfer of dutiable goods from one bond to another might have been made use of to obtain the goods out of bond, might then have been destroyed, and the goods passed into consumption without detection until stock was taken (a duty performed once in three years,) and without trace being left of the officer who committed the fraud. It has been shewn that these transfers are frequently performed by an irresponsible carter, without the supervision of a customs officer, and thus that no security is taken in this branch of the Customs to protect the Revenue. It has also been admitted that there is no central record kept shewing the nature and amount of stock which ought to be in charge of each locker, and thus the verification of the stock in each bond could not be performed without considerable delay.

Nash.

Jewell, 22, 5
92, 102, 93, 112.
Maddocks, 49,
68, 65.

A further defect in the organization of this department, is the permission granted to subordinate officers to discharge important duties. The powers which have been delegated to Mr. Manton are an illustration of this. In the supplement to the General Orders of the Board of Customs applicable to the British Possessions abroad is the following letter, addressed, in 1830, by the Board of Customs to Collectors and Comptrollers in the British Possessions abroad :—"It having been represented to us that vessels frequently arrive in this country from the British Colonies with clearances signed by clerks or other persons for the Collector and Comptroller, we direct you to take care that clearances and other documents be signed by at least one of the principal officers of your port, and not to delegate that duty entirely to clerks." Notwithstanding this the Collector has delegated the duty of clearing after hours, which is one of a still more responsible character than that of clearing during hours of business, to Mr. Manton, the 6th clerk of the Customs. The manner in which this officer discharged this duty in the case of the "Louisa" on two occasions is in itself sufficient to condemn the practice. When it is considered that the clearance is the document which enables a vessel to leave the port and the jurisdiction of the Colony, it is evident that it should be granted with great caution, and not till every necessary regulation has been complied with; and that the power to grant it should not be entrusted in the hands of a subordinate clerk.

Subordinate
officers entrusted
with important
duties.

This is not the only important duty which Mr. Manton has been permitted to discharge. He has acted for the Cashier, or Chief Clerk, in the Long Room in that officer's absence, in taking bonds and declarations; for the jerker, in certifying the correctness of the inward papers; and he has, in addition, discharged in his own way his special duty of examining ships' outward papers, preparing clearance papers, and passing export entries. He has had, in fact, permission to discharge so many duties that an exporter, by judiciously timing his transactions at the Customs, could escape the supervision of every officer, except Mr. Manton and a tide-waiter. By such an officer being entrusted with so many responsible duties unusual facilities have been offered to defraud the Revenue.

Jewell, 223

When dutiable goods are about to be shipped for export, the Warehouse-keeper must of necessity be aware of the fact; yet it is left to the tide-waiter employed in their shipment to suggest, as a precaution, that an officer should be placed on board the vessel to receive them. In the absence of this precaution, there is no security whatever taken against the goods being withdrawn from the vessel and passed into consumption. The success of the frauds we have investigated is mainly due to the absence of this precaution.

The organization of the Customs Department is also deficient in the following points :—Vessels entering port after sunset are not boarded by any Customs officer till next morning, and thus have an opportunity of landing spirits or other dutiable goods during the night. Vessels laden with dutiable goods, and outward bound, are allowed to clear out with undue haste, and after hours—are not accompanied out of port by a tide-waiter or any officer, and thus have opportunities of anchoring down the harbour and discharging a portion of their cargo before proceeding to sea. No guard-boats patrol the harbour day or night. We are not in a position to say how far the existing practice in these respects is due to a want of representation on the part of the Collector; it has not, however, been shewn that these facilities for illicit practices have been brought to the notice of the Government.

We have considered it our duty thus to draw attention to those acts of the Collector which have been detrimental in their effect, and to the want of organization, which has enabled smuggling to be carried on almost without check. At the same time, we are of opinion that the Collector is not solely responsible for the present disorganized state of the Customs.

Mr. GARLING.

The Landing Surveyor, Mr. Garling, is the officer who is immediately responsible for the out-door business of the department. In this Colony the Landing Surveyor discharges the duty of a Comptroller, and keeps a check on the daily receipts of revenue; superintends the waterside department; is directed to take care that landing-waiters do their duty, and to instruct them when in doubt; he is also required to see that the landing-waiters' blue-books are properly kept; to visit daily the several landing wharfs to see that a ship's cargo, as landed, agrees with her manifest, and that the officers appointed to her are in attendance and do their duty. It is his duty also occasionally to check the gauging and weighing performed by landing-waiters, and from time to time to adjust the hydrometers, beams, scales, weights and measures used by these officers in the performance of their duty.

Landing
Surveyor's
Instructions.
Art. 3.
Art. 6.

The printed instructions for the Landing Surveyor plainly indicate that he is responsible for the entire out-door business of the Customs, and in some degree independent of the Collector's control. He is directed to confer with the Collector in all points, and to tender his advice whenever he may consider it necessary, without reserve. Mr. Garling appears to admit his independent position, but at the same time is either very insufficiently informed of the business done out of doors, or is very reluctant to give information regarding it.

Appendix No. 18.

The facts elicited regarding the Customs proceedings in connexion with the "Fanny Fisher" prove that very disreputable, as well as inefficient, officers are permitted to remain in the service of the out-door branch of the establishment, and are employed on duties for which they are known to be unfit; and that the Landing Surveyor does not exercise that supervision over them which the printed instructions direct. Mr. Alder, a tide-waiter, was employed about twelve months since to discharge the "Fanny Fisher," and allowed about 550 bags of sugar to be landed without entry or payment of duty. The landing-waiter, who should have detected this neglect of duty, did not do so. Mr. Garling, whose special duty it is to see that the landing-waiter's books are correctly kept, took no steps in this case to rectify the error, which was discovered at last by the jerker. Referring to the tide-waiter concerned in this affair, Mr. Garling stated that he had misbehaved himself in so many vessels that he could not call to mind his misconduct in this instance; that he had continually misbehaved himself previous to this occasion; had once been dismissed, though afterwards reinstated. Other evidence shews that he was frequently intoxicated. It is, therefore, surprising that such an officer should have been retained in the service up to that period.

Crook.

The general evidence regarding the out-door officers shews that, as a class, they are inefficient. Some landing-waiters are stated to be addicted to intemperance, and incapable of gauging spirits; half the tide-waiters are inefficient. As regards tide-waiters, the Regulations of the Board of Customs are very stringent. They direct that if any tide-waiter shall be found guilty of quitting a ship, or leaving his station on board during the time of his watch, he shall be dismissed for the first offence, unless sufficient cause be shewn for his absence; yet we have in evidence that tide-waiters habitually leave their vessels during the night, returning at daylight. It appears that Mr. Garling has not taken any measures to put a stop to these irregular practices; but, on the contrary, he has permitted such officers to occupy the most responsible positions without regard to their incapacity or misconduct. In regard to the "Louisa," Mr. Garling has been guilty of a serious neglect of duty. We have before remarked that the clearance of the "Louisa" on the 2nd of September was so irregularly executed that on the morning after she had sailed her manifest did not bear the signature of Mr. Manton, as the officer who took the declaration, or his initials at the foot of the entries in the manifest, Mr. Garling's attention was drawn to these omissions by Mr. Collier, but beyond requiring Mr. Manton to complete the document, he took no notice of his gross neglect. Our opinion is, that Mr. Garling is unworthy of the confidence which has been reposed in him, and of the high position he holds.

Manton.

Mr. LLEWELLYN.

Mr. Llewellyn, the Chief Clerk of the Customs, has been described by the Collector as holding the position of his Under Secretary, and in that position should share a large amount of responsibility which attaches to the Collector for the disorganization of the in-door business of the Customs. Mr. Llewellyn's duties are not however defined by printed or written instructions, while his conception of them leads to the conclusion that he is in no way responsible for the business of the Long Room, for the important duties connected with the entering and clearing of vessels, or for the receipt, issue, and transfer of bonded

bonded goods. His duties, in practice, appear to be confined to correspondence with the Government and with the officers of the department, to the payment of salaries and drawbacks, and to replying to queries in the absence of the Collector. His evidence also shews that he is very imperfectly acquainted with the in-door duties of the department, and that therefore he is unqualified, in the absence of the Collector, to direct. Under these circumstances, we are unable to decide on the degree of blame which is attributable to Mr. Llewellyn, on account of the disorganization of the in-door department of the Customs, but we consider that he failed in his duty when he neglected to bring to the notice of the Collector the suspicions regarding the "Louisa" which had been communicated to him by the Harbour Master on the 26th September, and were then generally prevalent. If this duty did not properly appertain to him, it is our opinion that his position in the Customs might be dispensed with, for we can see no necessity for an officer of such high standing in the department being intrusted with so small a share of responsibility as Mr. Llewellyn lays claim to.

Having thus drawn notice to those more prominent defects in the organization and management of the Customs Department which have been brought to light during our inquiry into the circumstances connected with the "Louisa," we shall now take leave briefly to suggest the modifications in the administration and practice of the department which we consider to be urgently required.

1. The practice of the department both in the Long Room and out of doors should be regulated by minutes of the Executive Council or by orders of the Treasury.

2. Fees or allowances to officers for work done after hours should be at an established rate, and should in all cases, whether chargeable against the merchant or the Government, be paid through the Collector.

3. A Bond Office should be established, and an officer detailed for the special duty of taking Bonds. No bond should be accepted unless the security offered is deemed satisfactory. All bonds should be enforced according to the terms of their obligations.

4. Bonded Stores should be licensed in those parts of the town only which are easily accessible from the waterside. No building should be licensed as a Bond which is in the same block with a duty paid store.

5. Licenses for Bonded Warehouses should issue from the Treasury on the certificate of the Collector and the Inspector of Warehouses. The applicant for the license, or the bond owner, should be required to give security for the proper conduct of the duties of the bond. All goods issued from bond should be re-gauged or re-weighed, and all goods before being bonded should be marked or branded.

6. The Inspector of Warehouses should have the control of all bonded goods, the warehouse-keeper and lockers being under his orders.

7. Drawbacks should not be paid until a certificate has been produced that the goods on which drawback is claimed have been landed at the port of destination.

8. All dutiable goods for export, bond, or transfer when in bond, should be conveyed by licensed drays or lighters, and should be accompanied by a pricking note, on which should be stated the time at which the goods were dispatched for, and the time at which they were received at, the place of destination.

9. Appointments in the Customs Department should be on probation, and be confirmed or otherwise after three months service, according to the certificate of the officer under whom the candidate has been employed.

10. All out-door officers should be compelled to wear uniform.

11. Landing-waiters should, as far as possible, be substituted for tide-waiters; they Appendix No. 24. should be responsible for the due shipment of dutiable goods issued for export, and should attest to the shipment by their signature to the shipping bills or export warrants. They should be relieved from the duties of gauging and weighing, which should be discharged by men specially appointed for that purpose, under the superintendence and check of landing-waiters.

12. Tide-waiters should receive a low permanent salary as a retaining fee, which should be supplemented when they are employed on duty. A tide-waiter should be placed on board every vessel taking in dutiable goods, and be required to keep a cargo book to be shewn to the landing-waiter or clearing clerk before such vessel can be cleared. Vessels laden with dutiable goods for places at which no Custom House exists should be accompanied out of port by tide-waiters.

13. Guard-boats should be established, to patrol the harbour during the night, under the charge of a tide-surveyor. A vessel entering port should be immediately boarded, and, if laden with dutiable goods, her hatches should be secured by Queen's locks.

14. A Court of Appeal should sit once a month at the Treasury to receive and to hear complaints.

15. The Act of Council, 9 Viet., No. 15, being insufficient to provide for the present extended operations of the Customs, we would recommend, for the consideration of the Government, an Act similar to that passed on 27th August, 1857, in the neighbouring Colony of Victoria.

In conclusion, we have to state that the thanks of the Government are due to Mr. Charles Smith for his praiseworthy exertions, which have materially assisted us in exposing the frauds which have been perpetrated on the Government, and the present lax system of the Customs Department.

In submitting this Report, we desire to state that we have confined our investigations to matters connected with the "Louisa," and to those irregularities which have been brought to light during our inquiry. We have not considered it within our instructions to inquire into the general arrangements of the department, which we have strong grounds for believing to be defective.

We have the honor to be,

Sir,

Your most obedient servants,

E. W. WARD.

H. H. BROWNE.

JNO. M'LERIE.

APPENDIX No. 1.

The Treasury, Sydney,
26 October, 1858.

SIR,

Circumstances which have just been disclosed, with respect to the clearing and dispatch from this port of the brig "Louisa" on the 2nd ultimo, seem to the Government to demand that an immediate and searching inquiry should be at once instituted into the conduct of the Officers in the Customs Department employed on that occasion.

I have, therefore, the honor to request that you will undertake the duty of conducting this investigation, in conjunction with Mr. McLerie, Inspector General of Police, and Mr. H. H. Browne, Immigration Agent.

The Attorney General has commenced proceedings in the Supreme Court against other parties alleged to be implicated in the extensive frauds perpetrated upon the Revenue; and I have directed the suspension from duty, pending this inquiry, of the following Officers, viz. :—

Mr. C. H. Manton, Clerk.
Mr. John Bramwell, Landing-waiter.
Mr. M. G. Brown, Tide-waiter.
Mr. Edw. Newton, Tide-waiter.

The Collector had previously, with my concurrence, also suspended Mr. Maddocks, 2nd Clerk of Customs, who had charge of the Export Bonds, which have, it is alleged, been abstracted in an unaccountable manner from the Customs Buildings, and are not forthcoming.

The following documents will be laid before you, viz. :—

1. Copy of the Attorney General's information filed in the Supreme Court.
2. Affidavit of the Master of the "Black Swan" (Mr. R. McCue.)
3. Affidavit of Watts, Bonded Storekeeper.
4. The Collector of Customs' affidavit of the clearance.

The points upon which I have to request your report are these :—

- (1.) Whether Mr. Maddocks is at all culpable in not having taken care that Export Bonds were duly executed; or, if they were duly executed, whether he is at all at fault for having permitted the abstraction of those bonds from his custody; or whether it is, in any respect, owing to negligence on his part that these documents have been taken from their proper place.
- (2.) Whether the other Officers of the Customs have not certified to the exportation of certain dutiable goods, per "Louisa," on the 3rd ultimo, when that vessel is proved to have left the port on the previous day; and whether their proceedings, in this and in other respects, connected with this transaction are consistent with the faithful discharge of their duties.

I have also to request that you will inquire into the circumstances attending the subsequent return to port, and the sudden and mysterious departure of the same vessel on the 7th instant; and that you will report generally upon the conduct of any other Officers of the Customs Department which may come under the notice of the Board in the course of the investigation, either as regards this case or the general performance of their duties; and upon any other circumstance referring to Customs frauds which may be disclosed during your proceedings, and yet not pertinent to the case of the "Louisa."

CAPTAIN WARD, R. E.,
Deputy Master of the Royal Mint.

I have, &c.,
RT. CAMPBELL.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE BOARD

APPOINTED TO INQUIRE INTO CHARGES AGAINST CERTAIN OFFICERS
OF THE CUSTOMS DEPARTMENT IN CONNEXION WITH

THE "LOUISA."

THURSDAY, 28 OCTOBER, 1868.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.

J. M'LERIE, Esq.

Colonel Gibbs, Collector of Customs, having been called in, a Reporter from the office of the *Sydney Morning Herald* applied for permission to be present, which the Board granted, on condition that nothing should be published until the inquiry was closed.

Mr. Charles Smith was also allowed to be present, with the understanding that he should watch the inquiry and make any suggestion to the Chairman, but should not himself put questions to witnesses.

The Chairman also intimated to Colonel Gibbs, that should anything appear in the course of the inquiry calculated to affect the character of any officer of his department, such officer would be allowed to be present.

It was also decided by the Board, that if anything affecting the character of an officer of the Customs should transpire during the inquiry in the absence of that officer, he should be informed of it, and called on for an explanation.

Colonel J. G. N. Gibbs, Collector of Customs, examined:—

1. *By the Chairman:* The Board wish to know the duties discharged by the several officers of Customs, from the time of a vessel's arrival in port till she finally leaves it again: will you describe, as succinctly as you can, what those duties are—upon a vessel first entering the port what is the first step taken by any officer of Customs? Colonel J. G. N. Gibbs.
The first step is for the tide-surveyor to board the ship and take down the names of the vessel, the master and passengers, the number of the crew, &c., and where from. The next step is to take the report of the master of the vessel at the Custom House, which he is allowed twenty-four hours to make. 28 Oct., 1868.
2. What is the nature of that report? The report is to the same effect. It gives an account of the number of people on board, the master and crew, the cargo on board, where from, and such points as those, to the truth of which the master declares.
3. Are any papers handed to the officer of Customs by the master? Only the manifest.
4. Are there any papers with respect to the mails on board—Post Office papers? A certificate is sent to us from the Post Office, through the captain.
5. What is the nature of that paper? That the master has landed all his mails.
6. That paper is invariably given? It ought to be; and the 5th Clerk (Mr. Fancourt) initials the manifest, to shew that the Post Office and Pilot Regulations have been complied with. There have been instances where it has not been given in, and the Post Office authorities have taken notice of it, and have proceeded against the parties.
7. That report is made to an officer of Customs—what is the name of that officer? Maddocks.
8. What is his title? Second clerk of the Customs.
9. What steps does he take? He has no further steps to take, except to send the report or manifest to the landing-surveyor, who forwards it to the landing-waiter in charge of the ship.
10. Does he report that to you? No.
11. Is that called reporting inwards? Yes.
12. Does the information rest with him? I am not sure now whether he or Mr. Fancourt takes this report.

- Colonel J. G. N. Gibbes.
28 Oct., 1858.
13. Whose duty is it? * No particular person's duty—according as it may be arranged and altered; the division of duties has occasionally been altered.
14. Who has authority to alter the instructions? Myself.
15. Have you ever allowed Mr. Maddocks to delegate that duty to another? It has not been delegated; it has been done with my consent, no doubt, but I do not recollect it.
16. On official application? No; but by general regulation, that if the cashier was absent, the clerk connected with ships' entry should take the report.
17. Unless under special authority, he is considered to discharge it himself? Yes.
18. He has not authority to delegate it to another? No; it devolves upon another, when necessary, by regulation; who that other may be depending on who is present, as business cannot be stayed.
19. Having received that report, what steps ought he to take? He has no other steps to take, except as stated in par. 9.
20. He does not report it to you? No; it is a matter of routine.
21. What is the next step taken with regard to the vessel—the next precaution on the part of the Customs? If the vessel has dutiable goods on board, an extra tide-waiter is placed on board to see that nothing comes out of the ship without my warrant.
22. When the ship is discharged, what is the next duty performed by the Customs? When the ship is discharged a tide-surveyor goes on board, who jerks the ship and takes off the tide-waiter. †
23. Jerking is a technical term—can you state what it means? It means what I have said,—that the officer goes on board, and sees that all the stores are as they ought to be; that the ship is empty; that all the cargo is taken out of her; and compares the stores with the account taken on coming in. Before the vessel reports at all, a tide-surveyor goes on board, and, as already stated, takes an account of the passengers and stores (not the cargo, of course,) as far as it can be done; this is entered in a book which is kept by the tide-surveyor, and it is eventually ascertained that no larger portion of these stores has been consumed than is proper.
24. Is jerking the same as rummaging? No; rummaging is merely a search; jerking is more, and it is then put into writing ‡
25. Which is the first step? Rummaging is supposed to take place on the arrival of a ship, but it is a perfect farce.
26. Does no rummaging take place when the ship is entirely empty? That is the time the tide-surveyor goes on board and rummages, and jerks the account to ascertain the stores on board; he knows what *were* there, and takes an account of what *are* there.
27. It is the tide-surveyor's duty to see that the ship is perfectly empty before she is put on the list of outward bound? Yes. There are cases where a vessel is crank, and cannot be left entirely empty, when she is allowed, under a stiffening order, to take in goods before the original cargo is all taken out.
28. In such cases you grant special leave? Yes; the stiffening order comes to me, and permission is given by me to do so.
29. When a vessel is laid on a berth outward bound, what steps are then taken by the Customs to check the loading of that vessel? To see that no goods are shipped, though free, without entry is passed for the same, and more particularly if they are goods for exportation from the warehouse, or for drawback.
30. What is the course with respect to goods for drawback, or from a bonded warehouse, for export? In the case of goods for export the party comes to the Custom House, enters into a bond for the goods he wishes to export, and brings the export entry in which they are entered; he signs the bond in the presence of Mr. Maddocks.
31. Who prepares that export entry? Generally speaking, a Custom House Agent; the merchant may do it himself, if he chooses.
32. He executes a bond? Yes, with a view to the exportation of these goods, in the presence of Mr. Maddocks.
33. Is it Mr. Maddocks' duty to see all bonds executed? It has been; I have altered it now, since this affair came to light.
34. Into whose custody do these bonds go? Mr. Maddocks receives these bonds, and, of course, they are in his custody. There are many things which I wish were not so; for instance, we have great difficulty in getting parties to come together to sign these bonds, and therefore the bond is put into Mr. Maddocks' desk, and locked up till the second party comes to sign it.
35. Do you require that bond to be executed before you allow any bonded goods to be issued from the warehouses? Yes.

36.

* It is, as stated above, the cashier's duty, and in his absence the clearing clerk's, Mr. Fancourt. If both are absent, the fourth clerk, Mr. Mowle, would take it. In a department like the Customs business can never be delayed, and although the division of duty is arranged when all are present, that duty must be occasionally taken by a different clerk from the one who it was intended should perform it. Formerly the chief clerk was the cashier, and presided in the Long Room, took the cash and all the leading duties when the Collector might be away from his office; but when, from the change in the system on the introduction of Responsible Government, the chief clerk became the assistant or secretary to the Collector, many of his duties were given to the second clerk, who was made the cashier, but which I now think should have remained as they were, with the chief clerk, who then should have been relieved from some of his present duties.

† Ascertains, also, that all the cargo is discharged.

‡ It is a comparison of the entries by the jerker for goods landed with the goods set forth in the inward manifest. If there is no entry for any article in the manifest, the master is called on by the jerker to account for it. Jerking by the tide-surveyor has nothing to do with the manifest beyond the account of the stores. The landing-waiter reports to the tide-surveyor that the cargo (as per manifest) is out. He then searches to ascertain that no dutiable goods are stowed away, for the purpose of being run after the tide-waiter is taken off.

36. If the people who are required to execute a bond on dutiable goods for export delay to execute the bond, the loss falls upon themselves only? Yes, of course. Colonel J. G. N. Gibbes.
37. They can take no steps to load their vessel till they execute the bond? No; the export entry for the goods mentioned in that bond would not be passed, and therefore the goods could not be shipped; but there may be no bonded goods on board—all free goods. 28 Oct., 1858.
38. You say these bonds lay a long time unsigned? Not a long time—sometimes a few days, for the second signature.
39. No risk can occur to the Government by these bonds not being executed? No—at least it ought not to be so; the entry ought not to be passed, and I presume, and believe, has not been passed; and if it has not been passed the goods cannot be got out of the warehouse.
40. Whose duty is it to pass these entries? They are passed before Mr. Manton, the clearing clerk.
41. Has Mr. Manton any communication with Mr. Maddocks, to see that the bond is signed, before he allows the entry to be passed? Yes; Mr. Maddocks is there to be applied to. It has been the practice lately for Mr. Maddocks to initial the corner of the entry, as a sign that the bond has been entered into, and then it is handed over to Mr. Manton.
42. It is Mr. Manton's duty to take security of that character before he issues the goods? Yes. There is no rule nor regulation in the Customs Department for such a course to be pursued, nor any law, but that has been latterly the practice, that Mr. Maddocks initials the entry.
43. You consider that practice to be essential for the protection of the public revenue? No; for, as will be seen in this case, some of these bonds were executed before Mr. Manton, as Mr. Maddocks was not there, and of course Mr. Manton was secure in passing the entry if he had the bond.
44. You consider it as essential for the protection of the public that the bond should be executed? Yes.
45. And you would not approve of deviation from that course? No.
46. Have you given authority to Mr. Manton to take these bonds? I could not answer that question. I do not know.*
47. Do you consider that he exceeded his duty in taking these bonds? Quite the contrary; it would have impeded business if he had not done so.
48. The bonds having been executed, who is responsible for their safe custody? The cashier, Mr. Maddocks.
49. If a bond were taken from his custody you would consider it was owing to his fault? Of course it would be. It appears he has not taken precisely the same precaution as his predecessors had done, for as soon as a bond is completed, by having the signatures of the different parties, he gives it to the messenger, to be filed; the messenger adds that bond to the others, and they run on for the month; the messenger adds the last bond entered into to the file of papers; they are then sewn through at the corner; he then places them in a certain part of the Long Room, during the hours of business, and then locks them in a secure drawer, where they remain.
50. Is that done by your authority, or Mr. Maddocks? Mr. Maddocks'.
51. Entirely on his responsibility? Yes.
52. Do you consider him justified in doing so? Not altogether. As a matter of course Mr. Maddocks has too much to attend to, to file these bonds, and therefore naturally gives them to some one else, namely, the messenger in the Long Room, to be filed; but in my opinion they should go back to Mr. Maddocks, and be locked up in his desk. Whether they would be safer it is impossible to say; for since this business, on three successive days, one of the clerks in the Long Room who has been doing Mr. Manton's duty, while he is on leave of absence, looked up Mr. Manton's desk in the afternoon, and in the morning the desk was open.
53. Has Mr. Maddocks the means of properly securing these bonds in proper custody? He has the same security as there has always been. He has a place with a patent lock upon it where they always used to be kept *under* the cashier's desk.
54. You have said it is Mr. Maddocks' duty to take charge of these bonds—has he the means of discharging that duty? Certainly.
55. There are sufficient means within the Custom House to secure the bonds properly? Yes. I think Mr. Maddocks' compartment is the most secure in the Long Room; but I am afraid no part of it is very secure. I have therefore ordered the bonds to be placed in the chief clerk's (Mr. Llewellyn) room, to which no one has access. They have access to the Long Room at all times—reporters and various other people.
56. If I understand you, Mr. Maddocks had other means of placing them in security besides the Long Room? No, he had not. He should have put them in a tolerably secure place in his own compartment; there is a place with desks and drawers.
57. Then I understand you to say that to put them in the Long Room is adequate security? It used to be thought so. I do not remember that we had any accident in days gone by about these bonds; this is the first instance; so far therefore they may be thought secure; but I have considered it advisable now that they should not be kept in the Long Room †
58. Has Mr. Maddocks ever made any complaint that the bonds were not secure? No.
- 59.

* I do not know whether I did or not, but should say the latter, because it would be unnecessary. It is, and must be, the practice, that when one clerk is out of the way some other clerk takes his duty, or public business would be at a standstill. The clerk taking a bond is only a witness to the signatures, and the junior clerk is, consequently, as competent to take it as the senior.

† Particularly as so much stress is laid on the only accident that has occurred to a bond in 24 years kept in a public office open to everybody.

- Colonel J. G. N. Gibbes. 59. It would have been his duty to do so if he had felt any insecurity? Yes; but without doubt he did not consider them insecure.
- 28 Oct., 1853. 60. Has Mr. Maddocks made any complaint with respect to the duty discharged by subordinate officers, either as connected with the security of these bonds, or in any other way? No.
61. Then, if I understand you rightly, Mr. Maddocks, by having allowed these missing bonds to get out of his custody, neglected his duty? Yes. It is the system which no doubt has run on for a great length of time, and I dare say they were considered sufficiently safe. As I have already stated, I do not think such a thing ever occurred before in the twenty-four years I have been Collector, nor has there been but one export bond put in suit.
62. You say the system has gone on for a length of time—was it not with your consent? Not with my consent; in fact I may say I was not aware of it.
63. Well, having these bonds duly executed, what is the next step which the Custom House takes as regards the shipping of goods, in order to protect the public revenue? There are various little things to be done, such as reference to the warehouse-keeper's books, and so forth. The export warrant is delivered to the export officer for the occasion. The export warrant is made out immediately after signing the bond.
64. Then the shipper goes to the bonded warehouse, is that it? * Yes; he then gets an export officer appointed to procure the goods from the warehouse in which they have been deposited; that export officer goes to the warehouse, delivers the warrant to the locker, and the locker then delivers the goods to him.
65. Is this the warrant? (*Referring to the "Louisa's" export orders*) This is the document. There is a document given which is called the locker's order—
66. An order to the locker to deliver? Yes; and that the locker keeps as a security to himself, but this is the export warrant, passed in the usual way; it is a printed document, and specifies the goods delivered to the export officer. For instance, on the back of this warrant, "Port of Sydney—Delivered the undermentioned goods to the export officer on "2nd September, 1853, 8½ tierces of tobacco," giving all the marks and numbers; this is presented by the export officer (drays being in readiness) to the locker of the bond in which the goods have been placed.
67. What is the locker's duty? It is the locker's duty, on the strength of this delivery order, to give the goods to the men waiting outside, and to place the goods on the drays in charge of the export officer, who accompanies them to the ship.
68. Does the export officer sign a receipt? No, not for goods from bond.
69. It is his duty to accompany the goods to the ship? Yes; he takes them on board, and gets a receipt from the chief officer or master of the ship for them.
70. Anything else? Having received the goods from the locker, taken them on board the vessel, and got the receipt of the proper authority on board the vessel for them, the export officer's duty is then over, with the exception of calling upon some landing-waiter as a kind of confirmation to sign this document.
71. If I understand aright, it is the export officer's duty to see these goods taken to the ship, and then to sign the export warrant? Yes; he signs under the word "Shipped."
72. He is bound to follow the goods to the ship always? Yes.
73. He is not allowed, under any pretence, to leave the carts? No.
74. If he can get a landing-waiter upon the spot, it is his duty to get his signature also? Yes; and if the shipments take place in the presence of the landing-waiter, that landing-waiter would be quite safe in signing it; but my objection is to his signing that which he has not seen.
75. To four or five wharfs there may be only one landing-waiter? Yes.
76. And therefore it is impossible to get a landing-waiter to sign the export orders? To get a landing-waiter that has seen the goods shipped is almost impracticable. In the whole range of wharfs in Darling Harbour, from the Grafton Wharf to the Albion Wharf, we have but two officers.
77. Does the export officer see the goods to the ship only, or into the ship's hold? He ought to see them put into the ship's hold.
78. The export warrant being signed by one or two responsible parties, as you have described, what is next done with respect to the protection of the public? The next step taken on the part of the export officer is to endeavor to get the signature of a landing-waiter; but if he does not happen to see one, he takes it back to the Custom House to its proper destination; or he may find a landing-waiter, and if he does so, he asks him to sign it; and upon his doing so the document is then lodged with Mr. Manton, and being attached to this paper, which is a duplicate of the ship's clearance, they are then filed and put away.
79. Before a ship can leave the port are there any papers required from her? Yes.
80. Is there any paper to show that she has been rummaged? The tide-surveyor reports that he has rummaged the stores.
81. Before she finally leaves the port what paper does she deliver up—assuming she has taken in the cargo, and before the vessel has finally cleared out, is not a paper required—a rummage certificate in fact? No. When the cargo has been shipped, or supposed to be shipped, and the vessel is ready for sea, the master then comes to the Custom House, produces the content outwards, which is generally prepared by some Custom House Agent, and he declares to the truth of the shipment of this cargo.
82. Before that declaration is finally made, is the master not required to deliver up sundry papers, for instance, a rummage certificate? No.
83. Never? No; I am not aware there is any rummage certificate; that is the tide-surveyor's business.†

84.

* No, not one shipper in twenty ever goes near the bonded warehouse.

† It has already been stated that the rummage certificate is sent to the jerker, when the inward cargo is discharged, and is filed with the inward papers. It has nothing to do with the outward cargo.

84. Is there nothing else but these documents necessary after they come back to the Custom House, to enable her to clear? Not that I know of.*
85. Would you clear a ship on these documents? Yes, certainly.
86. Supposing a rummaging certificate from that vessel is not received in the meantime, would you allow her to go out? I scarcely know.† I sign all these clearances when I am present; but I do not clear the vessels myself, and I may have omitted some papers, but I think not.
87. A vessel, from the time of its coming in till leaving the port finally, has a certain number of certificates to enable it to proceed on its course—among them is a rummaging certificate: would you allow a vessel which had come in to leave the port without having, between the time of coming in and going out, received a rummaging certificate from an officer of Customs? It is a question I do not feel prepared to answer; in fact, I do not quite understand the drift of it.
88. I wish to know whether you require a rummaging certificate from the captain of the ship? Certainly not. A tide-surveyor rummages the vessel. He does not report to me in every case, but only when he finds something wrong in the cargo or the stores.
89. He does not in every case give a rummaging certificate? Certainly not.
90. A rummaging certificate is not required to allow a vessel to go out again? No.
91. Are these the only papers required by you in order to grant a clearance? Yes, these are all.
92. That is, the export warrants and the master's content? Yes.‡
93. You were saying just now that in many cases you are not able to get the certificate of a landing-waiter who has actually seen the goods put on board? Yes.§
94. What has led you in all cases to require it? Mr. Barnes, Collector of Customs at Hobart Town, and Acting-Surveyor General, was ordered here by the Board of Customs, and, among many other arrangements he made, he gave an order that a landing-waiter's signature should be placed on the back of the export warrant, to complete the document, whether he had seen the document or not.
95. And it is under his order that you have always required some landing-waiter to sign the warrant? Yes.
96. Should not the export officer, when he takes goods on board a vessel, ascertain first whether he can get the signature of the landing-waiter that attends on the wharf, before he goes to another? Yes, certainly ||
97. Is there a landing-waiter at the Grafton Wharf? There are two landing-waiters to the whole range of wharfs in Darling Harbour.
98. Is Mr. Bramwell one of them? He was not one, and is not.
99. Could you state whether, in the case of the "Louisa," when these goods were cleared out of Walker's Bond there was a landing-waiter at the Grafton Wharf who could have signed that certificate? I apprehend there should have been. There are altogether two landing-waiters in that part of the harbour, and therefore I should have thought there would have been one to have signed.
100. You think Mr. Newton should have got the signature of that officer in preference to Mr. Bramwell's? I think he ought; but from the nature of this transaction I think it very probable the officer might think it did not matter who signed.
101. Is it not the usual practice for the landing-waiter who belongs to the set of wharfs to sign? I cannot tell you.
102. Mr. Bramwell did not belong to that set of wharfs? No.
103. Who are the landing-waiters belonging to that set of wharfs? Mr. Carron and Mr. Anderson. The landing-waiters are shifted every quarter. I find that last quarter Mr. Carron and Mr. Anderson were the landing-waiters belonging to that set of wharfs. ¶
104. Is it usual to take the signature of the Custom House Agent for goods shipped for the South Sea Islands from bond? Not for the amount.
105. Not for the security, in fact? Yes. I allow the Custom House Agents to sign bonds in conjunction with the shippers, to the amount of £200 and no more. Therefore this case (*alluding to a bond shewn him by the Board*) is a deviation from the general rule; but I dare say it is one of those things that has lapsed. It arose from a circumstance in connexion with the only other case I recollect—a Custom House Agent having signed a bond for £6,000 in conjunction with a shipper. The goods were run, the shipper escaped, and the Custom House Agent was put in prison, and after a length of time was released; and from that time I gave orders that Custom House Agents should not sign at all; but as it was pointed

Colonel J. G.
N. Gibbos.

28 Oct., 1858.

* In fact there are no ship's papers come back. The only papers outwards to be produced are, the certificate of clearance, the content, and sometimes a certificate of produce, and a passenger list.

† The rummage certificate has nothing to do with the outward cargo, and if a little consideration is given to the subject, it must at once be seen how utterly impossible it would be to rummage a full ship with cargo from the keel to the deck.

‡ But the export warrants do not go with the ship.

§ In numerous cases the landing-waiter cannot see the goods put on board; in fact, persons conversant with London practice—such as Mr. Metcalfe and others—can tell you that even there the searchers sign over and over again for goods which they do not, and perhaps cannot, see shipped. We have one large ship in port now whose shipping bills are not signed at all by any searcher.

|| But if there is not one, he has no alternative but to procure that of some other.

¶ I have now learnt that Mr. Carron was all that day at Barker's Wharf, and Mr. Anderson at Macnamara's, assisting the landing-waiter there under a press of business; and I believe that all the entries outwards having been passed on the same day, with the exception of two, were taken in the lump to the first landing-waiter whom the export officer fell in with, and that that officer was Mr. Bramwell, who, according to long practice, signed them.

Colonel J. G. N. Gibbs. pointed out to me that that would be detrimental to public business I altered it to signing for £200, and I was not aware that the rule had been broken through. It may be easily understood, that in an establishment where there are 101 persons I do not see all that goes on, or remember after years every order given.

23 Oct., 1858.

106. In this case the bond was signed in opposition to your instructions? Yes.
107. Are you aware how many bonds were taken in the case of the "Louisa"? I cannot state it as a positive fact, but I believe three.
108. Can you state who signed them? No. I did not see them, but I have no doubt they were signed by the same parties. One would most likely be signed by another party of the name of Abbott.
109. What steps are generally taken to ascertain the solvency of the party who signs the bond? None; we cannot; we might stop business altogether if we were to inquire into such matters. For instance, a bond was signed to-day by a person whom I believe to be of no substance, but I have no means of knowing.
110. Have you no power to make them justify? No.
111. Is that the English practice? Yes, to take them as they come. I can only judge of my own port in England; I knew most of the parties there, and knew pretty well whether they were responsible parties or not.
112. Have you ever given an order that no Custom House Agent should sign bonds for the export of goods shipped to any place where there is no Custom House? No, I have not.
113. Then you do not make any difference in signing bonds with reference to goods sent to the South Sea Islands and goods sent to any other place? No; I do not see how I could. I am of opinion that some change should take place with regard to the South Sea Islands, and I should propose myself that no such goods as these should be shipped to any place without there was some person competent to sign a certificate for their delivery. According to the English law, in places where there are no Customs establishments the Consul, or, where there is no Consul, a merchant is called upon to sign. And I believe it goes further than that. I should be inclined to recommend that on islands where there are no other suitable persons even a missionary might sign, to shew that the goods had been delivered.
114. Are you aware that the clearing clerk took the declaration of the captain of the "Louisa" upon the 2nd of September, and also upon the 7th of October? On the 2nd of September he did; I cannot say about the 7th of October.
115. That is dated the 2nd September (*handing the first declaration referred to*)? Yes.
116. And this is dated the 7th October (*second declaration*)? Yes; here is his signature.
117. Is that regular? Yes.
118. You allow him to do so? I do, if I am not there. I sign all these if I am present.
119. On the 7th October the "Louisa" cleared out after hours, did she not? That I cannot say. I do not recollect the circumstance, but it is possible she might.
120. Do you remember her coming in at night, and going out the same evening—being towed out—clearing out in ballast? I do not know anything about that; all I know is that she did come in, and I was asked whether it was necessary for her to report. I said I did not consider it necessary for her to report, but that as her position was somewhat peculiar, I should call upon her to report. I expected she should be reported inwards and cleared outwards. It was stated to me that the vessel came in merely to procure some fresh hands, who were shipped from Mr. Venour's office. She landed nothing, took on board nothing but a small quantity of stores, and proceeded to sea. It is not necessary, supposing a vessel puts in merely for instructions, or for various other reasons, that she should report.
121. In this case you required a report? Yes.
122. Have you given authority to the clearing clerk to take the declarations of captains of vessels that clear out after hours? I have. It is my wish to give every facility to the public. In England vessels are cleared at nine and ten o'clock at night—in London and Liverpool; and I had no reason to suppose I ran any risk. I consider that person is quite competent, and I see no reason why he should not do it. I would not stay till nine at night, and therefore I consider it necessary for the convenience of the public that he should have authority to do it.*
123. When the "Louisa" cleared out, on the second occasion, was that document—(*the content outward*)—the only document necessary to allow her to clear, after having been reported inwards to you? Yes, I should say so; I do not see any thing else that was wanted.
124. When the "Louisa" came in on the second occasion was it the duty of the tide-surveyor to have gone on board to rummage the vessel? Yes, he ought, certainly, to have visited her, and I believe his coxswain and boat's crew did board her, and found her in ballast.
125. And to furnish the usual rummage certificate? No; merely to make a report of it, as she had no cargo to rummage; she was in ballast.
126. You considered that in the case of the coming in of the "Louisa" you were justified in taking that precaution? I thought it desirable.
127. Did you require a rummaging certificate of her? I am not aware whether a rummaging certificate was presented to Mr. Manton, or not; in fact none was required.
128. You did not consider it necessary that a rummaging certificate should be attached to that document before you cleared her? No. The Board seem to place a good deal of reliance on the rummaging certificate, but I must own I do not see the use of it. What was the officer to rummage and report? A rummaging certificate is not usual here. The officer goes on board, examines the state of the vessel, and enters it in a book. He only comes to me if there is anything wrong; he then shews what it is, and I take steps accordingly; but I do not know myself that there was anything in this case that required him to go on board, though I thought he did so.

* The Hunter River Steam Company's vessels are cleared out almost every night at 8, 9, and 10 o'clock.

129. We wish to know whether Mr. Manton was justified in clearing this vessel during your absence, without having any certificate attached to the captain's content anything beyond what you see here—(referring to the papers produced).* Did he perform his duty in letting the ship go without anything else? I must own I do not see that anything else was necessary; but I will reserve my answer to the question, and make inquiry what Mr. Bremer did on that occasion. If Mr. Bremer did his duty he would board that ship, and would find, as I presume, that she was empty, or in ballast, with only a few stores on board.
130. Will you say whether the jerker performed his duty with respect to the "Louisa" on the second occasion? He had nothing to do with her.
131. Not when she was reported inwards? No. The jerker's duty is a very arduous one; he jerks all the books respecting the landing of goods; that is his province. He has not much to do with these vessels.
132. The "Louisa" was reported inwards? She was nominally reported inwards.
133. Does not his duty commence when a vessel is reported inwards? No, he has nothing to do with it; that is the tide-surveyor's duty. He should board all ships coming into port, and see their condition. I dare say Mr. Bremer will be able to shew from his books the state of this vessel.
134. You consider that the jerker had no duty to perform with regard to the "Louisa," when she was reported inwards the second time, nor before she went out? No; there was nothing to jerk.
135. You do not consider that he had anything to do with this vessel in this case? Nothing whatever—
136. This is an exceptional case? Yes.†
137. Did the "Louisa" when she entered the port on the 7th of October produce any Post Office certificate? That I cannot answer; but the vessel came in and went out again on the 7th October.
138. Either then or since? No.
139. I think you said that no vessel could enter inwards without a Post Office certificate? I doubt whether the Post Office would expect any letters or give any certificate to a vessel coming in in that way; but at the same time I am not positive on that point. I think the law with regard to the Post Office certificate would not effect such a case; but I am not positive on that point.
140. Can you tell the Board whether with respect to the subordinate officers of the Customs they are entitled to fees for the discharge of their duties? Only for extra hours.
141. Fees from the captain of the vessel or the parties whom they check? Yes; if an officer works in hours that are his own, (not the usual office hours), he is entitled to receive pay from the party whose work he performs.
142. Are there any regulations with respect to those fees? I think not with regard to the in-door officers; there are with regard to the out-door officers—one shilling an hour is paid upon each £100 of his annual salary.
143. How is that paid, is it paid direct to the officer? Direct to the officer.
144. It does not come through your hands? No.
145. Then there is no check that he is not paid double the amount? No, nor would there be if it passed through my hands. The proper amount might be paid through me, but I could not know how much more he received.
146. The only fees allowed are those paid to the out-door officers, who are paid for extra hours? I consider that in any branch of the service if any officer gives up his time in order to expedite the business of private parties he is entitled to be paid, upon the same principle as the out-door officers. Indeed, I am not sure that there is not a regulation in England of that kind. The landing-waiter, to accommodate the master of a ship and consignees, goes to business at an earlier hour in the morning, or remains until a later hour in the evening than the rules of the service require, and I see no reason why in such cases the individual who is benefited should not pay him. He might shut up his desk and go away if he pleased, but he remains for the accommodation of the public.
147. Are these officers bound to stay whether they like or not? No they are not, but it is my direction that they should stay, and, in fact, they are, if ordered, bound to stay according to an old regulation of the Board of Customs, which states that officers shall stay beyond office hours where it is necessary for the accommodation of the public.
148. Can you compel the parties whom these officers check to pay them? Yes, certainly, out-door officers; I do not know about the in-door.
149. Can you do so by law, or by refusing to allow your officers to work? It is by regulation. I do not think it is in the law; I am not positive about that. The regulation was made by the Board of Customs, and although we are no longer under the Board of Customs, this Government has issued no particular instructions, and we therefore act as though we were still under the Board.
150. Do you think any reform might be made with respect to that practice? No.
151. Do you not think that officers who act as checks upon others should be paid by those whom they check? I do not know who else is to pay them—the Government would not.‡
152. Assuming that they would, do you not think it would be better that they should, because it is business done on account of the Government? It is more on account of private parties.

Colonel J. G.
N. Gibbs.
28 Oct., 1853.

* Mr. Manton was perfectly justified in clearing the "Louisa" on this occasion, and required no other documents. It is quite plain that the Board do not understand the nature or object of a rummaging certificate, which, as has been already stated, is only inwards in a vessel with cargo, after that cargo is discharged.

† Like all such cases of vessels in ballast.

‡ It is not the owners of the goods who pay the officer, but the master or agent for the ship, and the check of the officer is on the goods.

- Colonel J. G. N. Gibbes.
28 Oct., 1858.
153. Putting aside the particular hour of the day, it is just as much Government business as if it were done in the middle of the day? Of course it is; but I consider that unless special application is made to me, and I give orders to him to attend, a clerk is not bound to do so unless he pleases. I have stated that the English orders are that officers shall stay beyond the usual hours when absolutely necessary for the despatch of business, and it is upon that principle that vessels in the large ports of England clear at all hours of the night—I mean by all hours of the night till ten or eleven o'clock.
154. If I understand you rightly, no application was made to clear the "Louisa" when she came in at night on the 7th October? I think not.*
155. The whole of the business on that occasion was done by Mr. Manton? I fancy so. The usual clearance for a vessel in ballast was given.
156. Do you know the reasons given for the return of that vessel? The reason given for its return on the 7th was, that the vessel having cleared from New Caledonia for the Navigators Islands found it necessary to run for Sydney, in consequence of the dangerous illness of the person on board who was acting as chief officer, and that this person died, and was thrown overboard before the vessel arrived here. The description of the crew on board was such that without an officer the captain must have kept watch the whole voyage, night and day, and he therefore thought it better, having a fair wind for this port, to come here and procure the necessary hands, and then to pursue his voyage to the Navigators.
157. You had no reason to suspect his story? No; I thought it singular, but he did not tell it to me—I think it was Mr. Stewart.
158. Did any one breathe any suspicion to you with respect to the vessel's coming in? No, I think not; I never heard anything of this business till I heard it from the Minister of Finance—when that was I could not say.
159. Is it the practice to clear out vessels for foreign ports after hours? Yes.†
160. The general practice? Yes; it may not be often called for; if it is they are cleared.
161. What is the main duty of the clearing clerk—I do not mean his extraordinary duty when you give him extraordinary powers? I could not give you a detail of them. He has various duties to perform as well as that, for there are some occasions when no ships are being cleared, but he is the party who is deputed to perform that particular duty, to take the declarations of the master, and, in short, to see to everything connected with the clearing of a vessel going out—and why should he not? he is perfectly competent.
162. To see that all the certificates are right before he gives the clearance? Yes, all the papers.
163. Does he get a fee for the declaration? No.
164. Are the duties of the export officer confined to what you have been stating; that is, to following goods to the wharfs and seeing them put on board the ships? Yes.
165. Has Mr. Newton, the export officer, ever been suspended by you for misconduct? I could not answer the question decidedly, but I am inclined to say that he has been.
166. Then I suppose you cannot recollect the circumstance? No.
167. It is not a recent occurrence? No. I think I did suspend him for something, but do not recollect what.
168. He had leave the other day, had he not, after clearing out the "Louisa?" He had no leave from me.‡
169. You are not aware whether he had leave? All I know is, that I understood he was taken ill at Parramatta. I had a certificate from a medical man there that he had met with an accident, and I had also a second certificate to the same effect. I think he must have been absent a week.§
170. There are export warrants existing (*the Chairman here referred to several documents before the Board*) shewing that a number of packages, consisting of hogsheds of rum, quarter casks of brandy, casks of whisky, &c., amounting in all to 296 packages, were put on board the "Louisa" by the export officer on the 2nd September—do you think it likely he could put all these on board in a day? It is a large quantity and looks suspicious; it would be a great many dray loads.
171. Does it look like the ordinary work of one day? I should say it is beyond the ordinary work of one day.
172. For one export officer to see after? Yes, I should think so.
173. Do you think the quantity could be put on board in one day, even with the extra hours? I cannot give an opinion upon that.
174. Do you think the goods could have been put on board before one o'clock in the day—before the dinner hour? I should say not; I should think it would take pretty well the whole day.
175. 296 packages, many of them bulky? I should say it is very unlikely they could have been put on board before one o'clock; but I am not a very good judge of such matters; I do not know what the drays carry; I think possibly it might have been done by four o'clock.
176. You think there is no probability that it could have been done by one o'clock? I think that is quite out of the question; much, however, would depend upon what wharfs the goods came from.
177. They seem to have been taken from Lamb's, Gilchrist's, the Chilian, Walker's, and Macnamara's bonds, and to have gone to the Grafton Wharf? I think there would have been

* But she came in during the night of the 6th—was found in the harbour on the morning of the 7th, and sailed the same day.

† All ports are foreign to this, except those on our own coast.

‡ Neither had he anything to do with the "Louisa" on the 7th October, that I am aware of.

§ There is nothing to prevent an officer going after 4 o'clock p.m. to Parramatta, without asking leave, and returning again by 9 o'clock next morning. In this case, it would appear that he met with an accident, and could not return.

been more difficulty in that case; for unless good arrangements were made by the export officer beforehand, so that the moment he had seen certain goods carried to the wharf he could go away to the nearest, there would be great difficulty in going with the drays. Indeed, I think the difficulty would consist in that, rather than as to the quantity of the goods.

Colonel J. G.
N. Gibbes.
28 Oct., 1868.

178. He certifies that he has seen all the goods down, and has shipped them? Yes; it was his duty to see every one of these packages put on board the ship; and though he might not go the absolute length of seeing them stowed in the hold, he should see them taken on board.

179. He ought to have followed every cart? Yes.

180. And remained with the goods until he saw them on board the ship? Yes.

181. We will now turn to another point: What security is taken for the safe custody of goods in bonded stores—will you describe the steps taken by Government from the first application for a license being made—do you, on application being made, inquire into the applicant's character before you grant him a license for a bonded store? Generally speaking, we do not call upon him to shew who and what he is, but I usually make some little inquiry about the parties. They do not enter into a bond at all; they merely apply for a license for a bonding store, and the appointment of that bonding store is in the hands of the Collector. I send the application first of all to the Inspector of Warehouses, that he may go and inspect the premises that are intended to be bonded, and to give his report upon them. He examines the premises, sees that they are properly secure, and that such alterations as may be necessary are made; he then measures them and ascertains their capacity, with a view to the tonnage duty being taken. He then sends in his report to me, and that is sent in with a letter for the approval of the Governor General.

182. And on the approval of the Governor General the license is granted? There is no license; it is reported to me that the store is approved as a bonded store, and upon the alterations recommended being made, and the fee paid, the party may commence taking in goods.

183. What security do the Government take that goods bonded in the stores are properly protected? There is a locker appointed to be always at the store while it is open. He cannot get into the store without the proprietor or occupier of the store, neither can the occupier get in without him. There are separate locks, the locker keeping the keys of one lock, and the storekeeper's man the keys of the other. That is the only security, excepting the bonds which are given by the importer on the entering of the goods for the due lodging of them in a particular store, and I do not see what more need be required.

184. Who enters into the bond? The owners of the goods.

185. What is the purport of the bond—do the parties make themselves responsible for the keeping of the goods in the store? No; the purport is merely that they shall go to the store, that they shall not, between the ship and the store, be walked away—in fact that they shall not go into consumption without payment of the duty.

186. What certificate does the owner take from the person to whom he delivers the goods to shew that he has delivered them at the store? Our books shew that.

187. The locker's book? Yes; that shews all the goods that go into the bond are entered in a book by the lockers, and also by the landing-waiter, and all the goods that go out of bond are written off every time they are delivered. The number and description of packages are summed up on a very long sheet, to shew the balance in bond.

188. When the owner of goods sends goods to a bonded store he takes a receipt from the bonded storekeeper? Yes, I suppose so, but the Customs have nothing to do with that. The bonding system is a boon to the public, not to the Government. A certificate is given by the occupier of the warehouse to the person bonding, but I do not acknowledge it as of any value to the Government.

189. Then the locker and storekeeper are mutually answerable for the security of the goods in the store? By the way, I am wrong in saying that the bond ceases on the delivery of goods into bond; it does not; on the contrary, it remains in force three years, and if the party placing goods in bond sells them, he may say to the purchaser "I will not have my bond remain, you must enter into bond." He does so, and the first bond is then cancelled; but not one man in fifty thinks of doing it here; and in truth, that man's bond could be sued upon at any time if anything occurred, although the goods might have passed through the hands of three or four other persons.

190. When the owner wants his goods from the store what does he do? He passes an entry to take them out of bond.

191. Either for home consumption or for export? Yes. The difference is in the entry. Where the goods are for home consumption the entry is for duty, the duty is paid and the locker's order is written and sent for the goods; if for export, I have already explained the process.

192. When you want goods to be transferred from one bond to another, is there a similar entry made? No; there is an application made to me. Mr. A. writes to say that he has purchased fifty hogsheads of brandy from Mr. B, in such a bond, and wishes to have it removed to his own or some other bond more convenient. The order is then given for the removal of these goods from one bond to the other, and, of course, the locker in the bond where they have been stowed writes them off, with proper comments, as to when and where they were sent. The locker at the bond to which they are sent enters them in a book, with such notes as are necessary.

193. Have any representations been made to you with reference to the irregular manner in which the Chilean Bond has been conducted? No.

194. That has never been brought to your notice? No.

195. Have you any reason to suppose it has been at all badly conducted? No; certainly not. I was spoken to respecting it by a gentleman, who might not wish to have his name

- Colonel J. G. mentioned, a Member of the Assembly; he asked me whether it was right that the lower part of the Chilian Bond should be occupied as a private store, while there was a bonded store over-head. I said it was quite usual, and that I would, if he pleased, walk with him and shew him the bond, which is, perhaps, one of the best secured stores I am acquainted with. He however declined doing so*
 N. Gibbes.
 28 Oct., 1853.
196. What is your opinion of the mode in which the business is conducted there? I have never had any complaints of it.
197. Who is the locker there? The lockers vary, but the last locker there was a man named Brown.
198. Is that the Brown who has been suspended? Yes; he had charge of Walker's Bond, and of the Chilian Bond; they are two bonds which are open only half the day each—Walker's Bond, as it is called, which is kept by Mr. Williams, the late American Consul, is opened from nine till one, and the Chilian Bond from one to four, and when the locker leaves one he goes to the other.
199. What duty does the Inspector of Warehouses perform with respect to the lockers? The lockers are under his supervision.
200. Are the books kept according to his instructions, or according to yours? The mode of keeping the books was introduced at the time he came in, but suggested (if I am not mistaken) by Mr. Weekes, M.P.
201. Who is responsible for the system of book-keeping? The Inspector of Warehouses is liable for everything relating to these warehouses.
202. Do you recollect Mr. Billyard calling on you on the morning of the 23rd of October? I recollect Mr. Billyard calling, but I could not say the date.
203. About four or five days ago? Not long ago; I dare say it was the 23rd.
204. Do you recollect who was present during that interview? I think his clerk, but I am not sure.
205. Any one else? Mr. Jackson only, I think.
206. Was Mr. James Stewart present? No, I should say not.
207. Did Mr. James Stewart make any promise that he would call at Mr. Billyard's in half an hour to make the declaration required of him? Yes. Mr. Billyard said, "I wish you would order Mr. Stewart to go to my office to make an affidavit"; I said, "I have no power to order him, he does not belong to me; if you wish, I will ask him to do so." I sat down, and wrote a few lines, to say that Mr. Billyard wished him to go to his office, and I requested him to do so. As I understood he afterwards went, but would not make the declaration or affidavit that was wanted.
208. What was the nature of the affidavit? I do not know; it was something Mr. Billyard wanted.
209. He did call at Mr. Billyard's office, but did not make the affidavit? Yes; I was told he did not make the affidavit.
210. I think at one time you doubted whether the "Louisa" left on the 2nd or 3rd September—have you now made up your mind? Yes, I have now made up my mind that she left on the 2nd September, but there was conflicting evidence on the point, which at first created some confusion. No doubt she was towed to sea on the evening of the 2nd. Mr. Manning had it down in his books on the 3rd, but the captain of the steamer stated that it was the 2nd, and gave as his reason for being positive on that point, that he had returned from Manly Beach when he was required to tow her out, and was somewhat disappointed at being obliged to go back. The steamer does not go to Manly Beach on Friday, but on Thursday, therefore that circumstance proved that the "Louisa" must have been towed out on Thursday.
211. Is it usual to take bonds from Custom House Agents for the faithful discharge of their duties? Yes.
212. Was a bond taken from Mr. Stewart? Yes.
213. Have you it in your custody? Yes.
214. Was it duly executed? Yes.
215. Have you any objection to produce it? No.
216. It has been stated that you have lately recommended the promotion of a good many of the officers who have now been suspended, in connection with the "Louisa" affair—is that the fact? Not one of them.
217. You never have recommended one of them for promotion? No. Perhaps, on recollection, I ought to correct what I have just said, although in one point of view it is quite right. I did not recommend any for promotion, but an application in writing was made to me by Mr. Bramwell to be sent to Rockhampton. That application I sent to the Government, but I made no recommendation. I said that from his long practice here, and his knowledge of the English practice, he was competent to perform all the duties. He was many years in Liverpool as an officer of Customs, and was sent out by the Lords of the Treasury as a tide-surveyor, and ultimately became second landing-waiter. I sent in his application, and I am not sure that I did not send in one from Mr. Manton. I sent in a good many, but there was only one person whom I really did recommend, and that was Mr. Hindmarsh, as a fit and proper person to go. All this, however, was prior to any rumours of the "Louisa" case being talked of; and even now I consider there is nothing to connect Mr. Bramwell with the alleged smuggling by the "Louisa."
218. From what you know of the whole business affecting the "Louisa," do you think the twenty half tierces of tobacco shipped for Tasmania were intended to be used for a lawful purpose? I could not give any opinion as to that.
219. Had you any suspicion? Not the least; I never heard of it until yesterday.

220.

* But I may mention, to shew that such is not uncommon, that Campbell's upper bond is reached by going through his free store,

220. Considering the parties connected with it, it has not raised any suspicion in your mind? I certainly think it very odd. Colonel J. G. N. Gibbes.
221. Your suspicion is not strong enough to enable you to proceed in the matter? Certainly not. There is nothing in it farther than this,—it is singular that people who might have shipped these goods on board the "Louisa," if they had thought proper, should have paid heavy freight to a steamer to convey them to Hobart Town to put them on board the "Louisa" there, and would induce any one to suppose that she had been ordered to touch there. 28 Oct., 1858.
222. Which vessel was going to the Navigators Island? There is nothing in that, as vessels frequently change their destination. I do not know that I am even justified in saying that it was odd, because something might have arisen between the departure of the "Louisa" and of the "Tasmania," which might have induced the parties to send these goods on, on speculation. But all these things combined have certainly an awkward appearance. There was nothing to prevent the "Louisa" from going to Hobart Town, if she thought proper; we know that ships clear for Guam, Lombok, and other places, every day, without any intention of visiting those places.
223. You are not in a position to conduct any further inquiry in the matter? In the first place, I do not think I have any such power; and, in the second place, I do not see what is to be gained by it. If any persons could prosecute such an inquiry, it is the authorities in Hobart Town.
224. Who shipped the goods from here? I could not tell without reference; I can find it.
225. Will you furnish the Board with the particulars—20 half tierces, marked H 563? Yes. Shipped by G. N. Russell, senior established tide-waiter.
226. On whose application were the Chilian stores first made a bond? By Mr. Stewart's.
227. It has been said that your son has an interest in it? I do not think he has any interest. My son first asked for the store, but withdrew his application. He asked if I would sanction his having the store; I said "Yes," and sent his application to the Government.
228. Was it made in the usual way? Yes. He then withdrew it. He came to me and said that, on second thoughts, he would withdraw it, and Mr. Stewart afterwards applied. The usual course was pursued.
229. Has your son any interest in it now? He assures me has not.
230. You are not aware of his having any? No. It is impossible for me to say that he had not, or that he had, any interest in it, beyond what he told me. I fancy he has interested himself in getting goods bonded with them. He might have done that. His affairs and mine are separate; but I have every reason to believe he has not any interest as a proprietor—that he is not mixed up with the affairs of the bond, by purchase, or sale, or any other way whatever.
231. By Mr. M'Levie: After the export officer has delivered goods on board a ship and received the receipt of the captain or mate, are those goods entirely beyond the control of the Customs Authorities until the ship sets sail? No.
232. Do you leave an officer on board? No. I have now given orders to that effect, but we have not been in the habit of doing it. Boarding outwards has never been the practice at this port, except on two or three occasions.
233. Then there was nothing to prevent these goods being relanded? No, nothing more than that the landing-waiter might go on board and see that there was no diminution in the cargo.
234. You have corrected that now? Yes, I have.
235. By the Chairman: In what way have you corrected it? I have ordered an extra tide-waiter to be placed on board such ships.
236. Who sees her out? That will remain for regulation. There is some difficulty in that, on account of the distance they have to come back. Formerly, on some occasions, I did put tide-waiters on board, but only in cases of suspicion. I will not give names, but there were persons who were suspected, and in such cases officers were put on board, and in such cases the tide-waiter was put on shore, and he had to walk five or six miles, from the Heads. But there are other difficulties.
237. Till you changed the practice there was nothing to prevent these goods being relanded? Certainly not.
238. They might have been relanded in the case of the "Louisa"? Yes, I think they might, but there being no suspicion at that time, no particular steps were taken.
239. In reference to the payment of officers in the departments for extra time, are you aware that there is a Government regulation refusing to allow Government officers to receive any fee for extra services? It does not apply to my department.
240. Was not such a circular received by your department? I do not think it was; but these fees are sanctioned.
241. I mean with reference to clerks—the out-door fees are recognised? I believe that in England there are persons employed to stay to clear ships, and in emergencies they are all ordered to remain.
242. Supposing this colonial circular had been received by your department, you would not have considered it as applicable to your department? I should not, most assuredly.
243. By Mr. Browne: You speak about regulations for the guidance of your officers—are they printed regulations, pointing out the particular duties of each officer, both in-door and out-door? Yes, but we have none.
244. Are there really no definite regulations for the guidance of your officers? None others than those that were formerly issued before the department was handed over to the Colony.
245. How would officers joining the department become conversant with their duty unless they have some line of conduct pointed out to them? We are obliged to teach them and tell them what is the practice. We follow in practice those instructions, but have none besides.

- Colonel J. G. N. Gibbes.
28 Oct., 1858.
246. Then there are really no printed instructions for a deviation from which you could at once call an officer to account? No, there are none.
247. Do you not think such instructions would have been a great safeguard to the public, and have narrowed the operation of this irregularity? I think they would, but such irregularities are the exception, and not the rule.
248. *By the Chairman*: Are you about to introduce any, after what you have seen? I dare say I could introduce them, and perhaps improve upon the old ones.
249. *By Mr. Browne*: You say Mr. Manton has authority to take bonds in the absence of Mr. Maddocks? Yes.
250. Does he receive that authority from you? Yes.
251. Do you remember whether he obtained any authority of that kind in the case of the goods by the "Louisa"? Not specially on that occasion. He took two of the bonds.*
252. Do you know where Mr. Maddocks was on that occasion? I do not know; he was not there.
253. You mean that he was absent from the office? Yes.
254. For the day? No. I made some inquiries, and I believe the bonds were executed at an early hour in the morning, immediately on the opening of the office, at nine o'clock, and Mr. Maddocks had not arrived; but he might have had leave of absence—I cannot say positively.
255. You say these bonds are really of no use—more matters of form than anything else? Not these bonds † (*referring to papers.*)
256. You say you only know one case in which they have been sued upon? That is all, in twenty-four years.
257. In reference to the English practice, do you adopt a similar practice, namely, within three years to make the parties exporting goods under these bonds account for them, and then cancel the bonds? No, I do not remember that that is the practice.
258. Is not that the practice at home—that they are in force for three years, and the parties are bound within that time to have them written off, or they become due? No, they do not. At my port in England, I do not remember their taking any trouble about it at all. After a time, perhaps, they were burnt.‡
259. Do you not think that if a merchant exporting goods were bound at the time he exported them to satisfy you that he had carried out the bond in its integrity, it would be a great protection to the revenue? Yes.§
260. Are they not now in fact mere waste paper? I do not regard them as mere waste paper. It is not easy to have cancelling certificates, but they formerly existed, and were required from Van Diemen's Land, and nowhere else. The Collector there sent up a certificate of the due delivery of the goods, and that was called a cancelling certificate.
261. You say that where the certificate of a regularly constituted authority could not be obtained—at places where there are no Customs—the certificates of the consul, if a foreign port, or even, under peculiar circumstances, from a missionary, or some other respectable person, would be a safeguard to the public? Yes, I should like to see it; but I am met by the statement, that it would tend to cripple commercial operations.
262. Do you not think it would be a protection to the honest trader? Yes.
263. For instance, the case just now alluded to, of exporting the 20 half tierces of tobacco to Tasmania, which there is reason to believe were transhipped to the "Louisa," or it may have been landed—in such cases would it not have been a protection, if the shippers were called upon within a proper time to account for them.¶ Could they not easily account for them at the island where they trade? That I cannot answer. I do not think in law you could do it.
264. Does not the bond set out that they are bound to account (*reading the terms of the bond*), otherwise it is to remain in full force? But we could do nothing upon that. They could tell you they would account for them some day or other.
265. They must account to your satisfaction? That would be rather sharp upon them; it might be difficult to satisfy me they were not landed, and I should not have any real grounds to say they were not fairly disposed of. I wish extremely that these certificates could be established, but I fear there will be much difficulty in the way.¶
266. It has been stated by you that the signature of the landing-waiters attached to the export warrants in accordance with the instructions of Mr. Barnes is a mere matter of form, and that warrants have been signed by landing-waiters even at the Custom House, though they could know nothing of the goods? Yes.
267. Do you not think these are most important certificates, and that, seeing the position these officers hold in the Customs, they should be cognizant of the shipment? Yes, I think they are important certificates.**

268.

* But I have already shewn that a bond is as valid taken by one clerk as by another.

† But I say, as I have said before, that a bond is as valid when taken by one clerk as by another.

‡ The fact is, that the bond is not made for three years, or any particular time; but that the goods must be cleared from the warehouse at the expiration of that time—by an overtime sale—except under certain circumstances, and the bond then continues in force for a longer period.

§ But how is it to be done from the Islands at present? and what merchant would consent to have his account sales, his profits or loss, exposed to official inspection, when there is no law for it.

¶ I see no protection in such a case. The goods were shipped for Tasmania by the "Tasmania," and there transhipped on board the "Louisa," of which transaction the master could have procured a certificate from the Custom House, and sent it up here, without being in the slightest degree a protection to our revenue. The goods were transhipped there.

¶ Nothing of the sort, I believe, exists in the neighbouring Colonies.

** But with the present strength of landing-waiters it is impracticable.

268. Do you think that a person who would sign a certificate that he had seen goods shipped when he had not done so, would be worthy of any consideration whatever? Yes, I do; because it was a positive order that he should so sign, but he does not sign to the *shipment*, as may be seen if the document is looked at.
269. Do you not think it was intended by Mr. Barnes as a proper check upon the export officers, who receive but low salaries? I do not think it was, for it was pointed out to him that the landing-waiters could not by any means see all goods shipped; and he said, "No matter, they must put their names."
270. Do you not attach importance to it? I do not; I should if it were the signature of the party who had seen the goods; I think that is most essential—there are cases where they do see them. In the new order which I have transmitted to the Minister of Finance, I have revoked the old order, and required that the goods should be seen before they sign—
271. I believe the landing-waiters are really the responsible officers to see that vessels discharge their inward cargo—is not that their duty? Yes.
272. As the Government are liable to frauds equally on export as on import goods, does it not appear to you that this certificate is to bring these officers into contact with the export of dutiable goods as well as the import of them? It may have been so intended, but you must see that it cannot be so in practice.*
273. Assuming that Mr. Newton took the trouble to search out Mr. Carron and Mr. Anderson, and that neither of those officers could be found to give this certificate, do you think that, excepting under circumstances of that kind, he would have been justified in going to Mr. Bramwell at some other wharf, and getting him to certify to that which he could not know? I do not approve of it; but it was in obedience to the order.
274. What would you do in such a case if an officer refused to sign? I should approve of it.
275. If you were now connected with Mr. Barnes, would you report it to him? Yes, certainly; and say that the officer declined to sign.†
276. You would justify the officer in refusing to sign? Yes.
277. This vessel loaded at the Grafton Wharf, which was in the set of wharfs where Carron and Anderson were landing-waiters? Yes.
278. Have you made any inquiries of these two gentlemen to know whether they were in the neighbourhood at the time of the shipment of these goods? No ‡
279. After the goods have been shipped by the export officer, is it not the duty of the tide-surveyor to examine the vessel and see that she takes those goods to sea—is he not the water officer? Yes, he is.§
280. Where any large quantities of dutiable goods are shipped by any vessel, should not his attention be specially directed to it, to see that they really do leave the port, and not under suspicious circumstances? I consider it is his duty, and I think he ought to do it where there is any suspicion; but I do not know that much good could arise from it, as I could show you, because I have myself been on board ships—the "Freak" for instance—where nothing in the shape of dutiable articles were to be come at, being stowed under other goods.||
281. That might be; but here is a small vessel of seventy tons which takes on board, I should say on a rough calculation, a full cargo in one day, of which the tide-surveyor, I presume, should be made aware by the landing-waiter, and of which the landing-waiter on the wharf should be aware? Yes.¶
282. Would it not have been his duty, if he saw the vessel about to proceed to sea at night, to take some precaution to satisfy himself that all these dutiable goods were on board? I do not see how he would know it.**
283. Do you know whether he did make any inquiry or rummage? No.
284. You say you have authorised Mr. Manton to clear vessels after Custom House hours? Yes.
285. Is there any limit at all—may he do it at any time after the Custom House closes and before it opens again? That was not my intention. Although the Custom House does not close till four o'clock, there are certain duties which are not performed after half-past three; for instance a London ship would not be cleared. I did not mean or understand that he should clear vessels after dark, and if he did I think he is much to be condemned.
286. Do you know what fee he would be entitled to receive from the merchant or owner of the vessel for clearing her out after hours? There is no fixed fee, nor do I know that he has any fee; but, I presume, he would not do anything without derive some advantage from it. It might be fixed that such and such a fee should be allowed under the circumstances.
287. He would wait in his room at the Custom House to perform this duty after hours? Yes, in the Long Room.

288.

* With our present staff.

† But I am not connected with Mr. Barnes, who had a little brief authority given, and on returning to England immediately afterwards, in expectation of high reward, was superannuated, from "infirmity of body and mind," on a low pension, from (as I believe) the disgraceful and treacherous way in which he conducted his inquiry.

‡ I have since, and given the explanation.

§ The law provides that he may go on board after a ship has cleared, but it is not compulsory.

|| Besides which, if such a course was to be adopted with every vessel carrying large quantities of dutiable goods, I should require half a dozen tide-surveyors in a harbour like this, and gain nothing by it; because the goods would be there till after the vessel left the port, unless, as in the case of the "Freak," the vessel was detained and half unloaded.

¶ But not by the landing-waiter, as there was none present.

** He, the tide-surveyor, cannot be everywhere, and possibly was not informed that the vessel was going to sea that evening; but had he gone on board he could only see that there was cargo on board, that the ship was full, without being able to know that they were the goods entered; but his rummage *outwards* is merely the stores, and he is not on duty night and day.

- Colonel J. G. N. Gibbes.
28 Oct., 1858.
288. If it should turn out that Mr. Manton, the gentleman who cleared this vessel, cleared it on board the ship, would not that be irregular—if he signed the papers on board the ship, would not that be irregular? Very irregular, certainly. There are very few cases where I consider anything of that sort is admissible; for instance, if the commander of a vessel is so ill that he cannot come on shore to report his vessel, I then send off my chief clerk to take his report, if he is well enough to sign his name, and declare to the contents of the document in his bed, but nothing beyond that.
289. Is it regular for a vessel taking in a large quantity of dutiable goods in bond to clear out and proceed to sea the same day she takes them on board, or have you issued a regulation as to that? No, I have not issued such a regulation. These things do not occur to one's mind till something gives rise to them. I do not think it is usual; I think it is rather rare.*
290. Usually a day intervenes between the clearing of the vessel and her sailing? It is not infrequent for a vessel to clear while the goods are going on board, but the goods are previously entered on the manifest, entries having been passed for them; there may not have been time to get the goods on board before, and the master may wish to sail the following morning.
291. *By the Chairman:* How can that be done with reference to the export warrant—the export warrant would not accompany the clearance.†—how could the clearance be signed—the content paper would not be prepared for the signature of the clearing officer? Yes, it would.‡ I do not mean to say they would be entered *after* that; they would be entered beforehand for exportation.
292. How can you grant a clearance till you get the export warrant, and how could the export warrant be signed till the goods are got on board? I mean to say that all but the one document are brought forward, and before the papers are finished that document is produced.
293. *By Mr. Browne:* Would it not be the usual course in clearing a vessel that the documents should be run through together and sealed? Yes, they always are.
294. That does not appear to have been done in this case? These are not originals; the original papers that were sealed went to sea with the ship, and are never returned to us.
295. Would not the duplicates that remained with you be the same as the originals? Not exactly; all the papers that go with the vessel *are* sealed and tied with tape,
296. Should not the papers be tied together and sealed? It would be better, perhaps; but they *are tied* together, though not sealed.
297. That is not the customary course? It is not the customary course to seal them, but they are always filed, and can be produced at any time.
298. Are not the several duties, such as taking bonds, entering inwards and outwards, clearing vessels, and so on, put upon separate officers, for the purpose of having a check by one officer upon another? Yes.§
299. Would it not be likely to assume a suspicious appearance if Mr. Manton took the bonds, signed the export orders, and cleared the vessel after hours, as has been the case in this instance? It would be a very strange proceeding, indeed; but I am not aware of its having been so.
300. Has not Mr. Manton in this case done all this—he has taken the bonds—you say he took two of the bonds? Yes, by his own assertion, at an *early hour* of the day.
301. He took the bonds, gave the export orders, received them back, and cleared the ship after hours, doing the duty himself solely, and that which would appertain to several officers besides himself—would not that of itself look rather suspicious? If that is the case, I think it does.||
302. You have told us that Brown, the locker, was at Walker's Bond, and also at the Chilian Bond, that Walker's Bond is open from nine o'clock to one, and the Chilian Bond from one to four, therefore all the goods that left the Chilian Bond, as set out in this certificate, must have left after one o'clock? Yes.
303. Could you from memory tell the hours during which Lamb and Parbury's Bond remains open? I cannot.
304. Or Pollard's Bond? It is open all day. I think Lamb's is open all day also.
305. How long is Gilchrist and Co.'s open? I think only half a day, but I do not know.
306. Macnamara's? I think it is open all day.
307. Do you remember when the master's name was introduced upon the register of the "Louisa"—was it done before you? I do not remember it.
308. There would be a notice of it in your books? Yes.
309. Of the day on which it took place? Yes.
310. Who keeps those books? Mr. Rucker. They are very correctly kept.
311. What becomes of the lockers' orders, which you state go to him, besides these export certificates? They are filed in the warehouse.
312. Is any memorandum put on them? I do not recollect that there is.¶
313. Would the locker enter on the back of it the same as a bank clerk would on a cheque, the date of delivery? No, that is entered in a book.**

314.

* But there is neither law or regulation against it; and I believe it to be quite common in England, and we have had instances here.

† They never do.

‡ With the greatest ease at the Custom House, and the content would, and must, be prepared beforehand.

§ But not with a view to create a check, but from the necessity of a division of business.

|| But it has been shewn that he took the bonds in the morning, and, as I have said, the bonds were as valid and safe if taken by him as by Mr. Maddocks; and it is also shewn that they were properly filed, and seen by the chief clerk and Mr. Kelly, though afterwards stolen.

¶ Except the day of delivery on the face of it, and the folio of the stock book and journal in the corner.

** On the face of it, and not on the back, but amounting to the same thing.

314. You do not know whether he would? No.*

315. You have explained to us how a transfer of goods is made—would it not afford great opportunities of defrauding the revenue if a person having 250 cases of gin in one store could take out an order to transfer a portion of them, and to export a portion of them, unless there were a sufficient number of officers to follow the drays, inasmuch as the portion professedly moved under the export order might be moved under the transfer order? I should say it would be a very improper course to pursue to have the two orders out at the same moment.†

316. Can you charge your memory to know that this was not the case in respect to the gin from Lamb and Parbury's Wharf? No.‡

317. We can get the date of the transfer order? Yes.

318. Have you any further information you wish to give to the Board? None other than what I have written.

Colonel J. G. N. Gibbes.

28 Oct., 1858.

FRIDAY, 29 OCTOBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

H. H. BROWNE, Esq., | J. M'LERIE, Esq.

William Norman Llewellyn, Esq., called in and examined:—

1. *By the Chairman:* What is your position in the Custom House? I am Chief Clerk.
2. What are your duties? I assist the Collector, carry on the correspondence, pay the disbursements of the department, and attend to the out-port business.
3. Is there any part of the business of the Custom House for which you are not responsible? I am not responsible for the out-door business at all.
4. Do you check the out-door business at all? Not at all; it does not come under my supervision.
5. Who checks that? The business is divided in this way:—The cashier has charge of the Long Room, and in that room the jerking of ships' papers is carried on. The ships' papers are sent up from the wharfs to the landing surveyor, and then by him to the jerkers; usually, however, they are sent to the jerkers direct.
6. The jerkers are responsible to the Collector of Customs? Yes. There are two jerkers—one the gauging jerker, and the other the jerker of ships' papers.
7. Do you exercise any check over the jerker? I never check his jerk.
8. Do you act as secretary to the Collector, in the same way as Mr. Lane acts as Under Secretary to the Minister of Finance, or do you take one-half of the department and does some one else take the other half? The cashier has the entire charge of the Long Room.
9. He does not send his papers through you? Not at all.
10. Then you take the duty, and are responsible for it? No. I think you do not exactly understand me now. There is in the Long Room the cashier, and he receives all the duties. The next in rank would be the jerker, who sits in the Long Room. He jerks, or checks, the drawbacks, also the gauging-books, and makes up the abstracts for the Treasury. The next is the clearing clerk—he clears all vessels; and then we have what we call the Blue Book Jerker, who passes the entries, another who compiles the statistics, and next to Mr. Maddocks is a clerk who carries on the register of the shipping duties.
11. What are you responsible for—what are your duties? I carry on the whole of the correspondence, generally speaking, under the supervision of the Collector, pay all the officers, pay the drawbacks, and, in fact, act for the Collector on all occasions when he is not present himself, and sometimes when he is in his office, but engaged.
12. Who is the Collector's deputy when he is away? All references are made to me.
13. In every matter? Supposing reference to the Collector were required, and he were absent, the parties would refer to me; but the landing-surveyor takes the out-door duty.
14. *By Mr. Browne:* Have you any thing whatever to do with the entering or the clearing of vessels? Nothing to do with them.
15. Your business is confined to the correspondence which takes place with the Government and the Collector, or with the officers and the Collector—is that your duty? Yes; the general correspondence—all the correspondence—the out-port business, payment of salaries, and drawbacks.
16. On whose authority do you pay these drawbacks? The Collector signs the cheques.
17. On whose authority do you pay these drawbacks—by warrant, I presume? By law, by the 9th Victoria, No. 15.
18. How is that law carried on—if, for instance, I wish to obtain a drawback on a certain quantity of sugar shipped, how do I obtain a drawback upon that from you? Entries are passed in the Long Room—bond is first taken, entry is passed, and the sugar is exported in the usual way.
19. Who does that? The bond would be taken by the cashier; the entries would be passed by Mr. Manton; the export entry and declaration is made on the entry, and the goods are put in the manifest outwards, and after the landing-waiter has certified on the back that the goods

William N. Llewellyn, Esq.

29 Oct., 1858.

* See Par. 312.

† Nevertheless, if there were separate cart followers I see no objection.

‡ But I am informed that the two batches of gin were not removed from Lamb's at same time, although on same day, which, if true, would be unobjectionable.

William N.
Llewellyn,
Esq.

29 Oct., 1858.

- goods are duly shipped, the paper goes to the drawback clerk, who checks the drawback debenture put in his hand by the shipper of the goods or his agent, to which is attached the declaration, which is signed by the shipper or his agent and countersigned by the jerker.
20. Then do you pay the debenture? Yes.
21. That debenture is an office document? Yes.
22. You have, if I understand you, nothing to do with the entry of vessels, or with the export of goods? Nothing whatever, immediately; I know the business is going on in the office.
23. You know no more what goods are shipped in the "Louisa," or any other ship, than if you were not in the Customs? No.
24. That is not your duty? No.
25. *By the Chairman:* Has it been your duty to examine the export bonds? No, not particularly so.
26. Have you ever done so? Yes.
27. On what occasion? In the case of the "Louisa."
28. Have you done so on any other occasion? Not on any particular occasion.
29. Do you consider yourself justified in examining them upon any occasion? Yes.
30. What led you to examine them in the case of the "Louisa"? I was told in the street by a Government officer that no bonds had been passed in the case of the dutiable goods shipped by the "Louisa."
31. What was the result of your examination? I found all the packages enumerated.
32. Will you state what bonds you found? I found three or four, I am not sure which.
33. Did you find all the necessary bonds? I found every item enumerated in the bonds.
34. What were the bonds? I cannot say.
35. By whom were they signed? By William and James Stewart.
36. By whom were they taken? By C. H. Manton and Mr. Maddocks.
37. Is Mr. Manton authorised to take bonds? Not usually.
38. Was it irregular for him to do so on this occasion? I will explain, if the Board will allow me: I believe if the cashier is absent some one steps forward and passes the bond for him—the next clerk in succession.
39. Was Mr. Manton justified in taking it? If he did an act of kindness for another clerk he was justified in doing so, I presume.
40. Is there any rule which permits him to do so? The proper person to take them is the cashier.
41. In the absence of the cashier —? Then, I believe, some of the clerks take them.
42. Whose duty is it to take the bonds in the absence of the cashier? It has never been defined. I suppose any one he asks to do it.
43. That contingency is not provided for? No.
44. Does any body then take the bond who may be in the room at the time? Yes, one of the clerks.
45. Any one would be justified in taking it according to the present practice? The next senior clerk in succession would take it, I should think.
46. So down to the lowest, is there any limit as to the power of any clerk to take it? I believe the bond would be equally valid if taken by a junior as by a senior clerk.
47. I wish to know what is the practice of the department—what is allowable? I could not say exactly. The proper person is the cashier, and in his absence one of the clerks would do it.
48. Is there any rule that imposes a restriction upon any particular class of officers taking the bond? It is generally taken by a clerk.
49. I call a clerk an officer in his way—I want to know whether it is allowable for any person to take a bond in the department? I cannot answer your question exactly. If the cashier is absent then the other clerks may act for him.
50. Down to the lowest clerk in the establishment—suppose the next clerk is absent, may the one next to him take it? Yes, I suppose he might.
51. And so down to the lowest clerk? It is an unusual thing. I never saw it done. I never knew all the clerks to be absent. There is no specific rule laid down.
52. The whole of these bonds in the case of the "Louisa," dated the 2nd of September, were signed by William and James Stewart? To the best of my belief two were taken by Mr. Manton and one by Mr. Maddocks. I believe there were three; but, if there were a fourth, I could not say who took the other.
53. In taking these is it customary to take a bond for each warehouse? Yes.
54. Would it be irregular to put goods from two or three warehouses into one bond? They do so sometimes—they say, in warehouse so-and-so.
55. Is it allowable? Yes. (*The bonds were handed to the witness.*)
56. How would that bond read, the goods being in two warehouses? It should say—"in "Macnamara's and the Chilian warehouses."
57. It does not say so? No; I have seen it done before now—two warehouses put in one bond.
58. Is it regular or proper? I see no objection to it.
59. Is it usual to allow the issue to take place from two warehouses, and to insert only one warehouse in the bond? No; that would not be regular at all.
60. Then that bond is incorrectly made out? Yes, it is, certainly.
61. When you examined the bonds for the "Louisa" how long were they in your possession? About half-an-hour, I should think.
62. What did you do with them then? I sent them back to the Long Room.
63. In what manner? They are tied in bundles—there were two bundles.
64. By whom did you send them? By the messenger.
65. To be delivered to whom? To Mr. Maddocks.
66. Have you any idea whether they were delivered or not? I asked him since this occurred, and,

and, as far as I understood him, he delivered one of the bundles to Mr. Maddocks, and the other he put in the Long Room.

66. I understand that these bonds are tied up in bundles of fifty? About fifty in a bundle.

67. Did you send these bonds in the bundles of fifty? Just as they came to me, tied up.

68. Have you seen anything of the bonds since? I have never seen them since.

69. Do you remember the date on which you examined these bonds? The 27th September.

70. Do you consider these bonds important documents? Very important documents.

71. Why did you then deliver them to the messenger—could you trust the messenger with them? He is trusted with all documents, to take them backwards and forwards.

72. Documents of that important character? Yes. When I say *important*, only one bond has been enforced since I have been here. They are usually moved about by the messenger. If the Collector were to send for them the messenger would take them to him, and if I wanted them he would bring them to me.

73. Can you form any idea where these missing bonds have got? Not the slightest.

74. Whose interest would it be to take them? They would be of no value to any one but the person who had executed the bonds.

75. Has he offered to re-execute them? He has.

76. The parties who executed the bonds were the two Stewarts? I think the letter was signed by James Stewart.

77. Has he offered to execute the bonds? Yes.

78. With respect to these bonds, do you ever see that they are enforced—what steps do you take to see that the obligation of the bond is carried out, to see that the goods are actually landed at the port? We do not take any; the law does not provide for that.

79. But that is stated in the bond? (*The Chairman read the conditions of the bond.*) Yes; but very often vessels clear for Guam, and I have even known a vessel to clear for Kamtschatka—the object of the merchant being not to disclose his venture.

80. Then where that condition is not complied with the bond is still over his head? Yes, the bond is still over his head; he is bound to land the goods at the place to which he is bound, or to give a proper account of them.

81. Is he ever called upon to do so? No, never.

82. Then these bonds are practically always in force? Until three years.

83. Suppose he does not satisfy you in three years? We do not ask him.

84. Why do you not? It has never been the practice.

85. *By Mr. Browne*: Then these bonds are so much waste paper—is that so? The law says only you shall execute a bond. We do not get certificates from the ports to which goods are shipped.

86. You have the power to enforce these bonds, under the 72nd section of the Customs Regulation Act, 9th Victoria, No. 15? We enforce them if the goods are run.

87. Do you ever require satisfaction if the goods are landed at a particular port? Never.

88. Then, unless you get information that goods have been run, you take no step to enforce the bond? Never.

89. *By the Chairman*: Is it usual to take the signature of a Custom House Agent to a bond for dutiable goods going to the South Sea Islands? Yes.

90. Is there any rule in force that their signature to a bond shall only be taken to a limited amount? I believe the Collector has issued an order lately that no agent shall sign a bond for more than £200.

91. Was that order given before or after this bond was signed? After.

92. Previous to this an agent was allowed to sign a bond for any amount? It would be in the discretion of the party who took the bond, and would depend upon who the agent was.

93. At the discretion of any clerk in the Long Room, if I understand your evidence? In the absence of the cashier of course.

94. *By Mr. Browne*: Any man of straw, then, wanting to get a bond passed need only wait the absence of the cashier, to get a clerk in the Long Room to pass it? I have never known any distinct regulation as to the extent to which these bonds were to go, or as to who was to take them.

95. That is not an answer to my question—I ask you whether any man of straw, wishing to defraud the revenue, can, by waiting till the cashier is out of the room, pass a bond by any junior clerk who happens to be in the Long Room? If Mr. Maddocks were absent, the other clerks were in the habit of taking the bonds.

96. The next in office, and so down in rotation? I do not know about a man of straw.

97. You do not seem to understand my question—you say the discretion rests with the officer who takes the bond, then, if any officer in the Long Room can take a bond in the absence of the cashier, the next in turn, and so on down to the junior clerk, cannot a man of straw go up and pass a bond before a junior clerk in the Long Room, if he only waits till the cashier is out of the room? He might do so, of course, if the clerk would take his bond.

98. *By the Chairman*: You are aware that the clearing clerk took the declaration of the captain of the "Louisa" on the 2nd of September? I am aware his name is attached to the document as having been taken on the 2nd.

99. Had he authority to do so? Yes; he is authorised by the Collector to clear vessels after the usual hours of clearing vessels.

100. Is any body else authorised to clear vessels? No one; the clearing clerk is the person authorised.

101. *By Mr. Browne*: He takes the master's declaration, even though the Collector may be in his room? The cashier takes the declaration then.

102. When the Collector is not there the clearing clerk takes the declaration? No; the cashier.

103. What is the duty of the clearing clerk? He has the ship's papers, examines them, makes out the clearance paper, passes the export entries, and makes out the export return.

William N.
Llewellyn,
Esq.

29 Oct., 1858.

104. You see his name to that clearance (*referring to the clearance of the "Louisa"*) as having taken the declaration? Yes.
105. Was it his duty to do that? If the vessel cleared after hours.
106. After hours the authority is delegated to him to take declarations—to perform the duty of the Collector? Yes.
107. Who authorised him? The Collector.
108. *By the Chairman*: Do you not think it is open to abuse, that a junior officer like Mr. Manton should be allowed to give clearances after hours? He may abuse the power of course.
109. *By Mr. Browne*: How were these instructions issued? Verbally.
110. There are no written instructions issued for the guidance of either in-door or out-door officers of the Customs? I believe not. When the Imperial Government relinquished our department, all the instructions sent out by the Board of Customs were ordered to be returned.
111. And no instructions either for out-door or in-door officers have been issued since? No written instructions. The Collector, of course, may issue an order in writing upon any subject.
112. A person who is anxious to defraud the Government has only to wait until the Collector and chief clerk are away, and if there is a junior clerk who is willing to lend himself to such a scheme, he can pass any vessel or any amount of goods out of the harbour without the knowledge of his superior officer—is that the case? He clears the vessel after the papers are drawn in the usual way.
113. Look at these (*handing the ship's papers to the witness*) are not these all passed and checked by Mr. Manton himself? As I understand the matter, Mr. Manton took this paper early in the morning, and if that were the case his name would appear both to the bond and to this.
114. Am I to understand that it would be right that a junior clerk in the Custom House should take bonds and pass export entries for a vessel, and then clear that vessel after hours, without reference to some of the officers above him—would not such course be open to grave objections and to abuse? I could scarcely answer the question, for this clerk acted as cashier early in the morning.
115. Do you or do you not think so—you are chief clerk in the office, and surely the Board should obtain some information from you as to the duties of the junior officers? As I said before, if he took the bonds for the cashier in the morning, and acted upon it afterwards, it was perfectly regular. If he acted for Mr. Maddocks as cashier in the morning, passed the entries, and acted in the evening upon what he had done in the morning, it would be perfectly regular.
116. If he cleared the ship on board the vessel itself would that be regular? No, that would be irregular, certainly. It says here—"Declared before me at the Custom House, Sydney."
117. If it were not declared at the Custom House it would be an irregular proceeding? Yes.
118. Look at the back of this export certificate—what is the certificate at the bottom? "Received on board the ship "Louisa" eight half-tierces tobacco."
119. By whom is it signed? Mr. G. Brown, Customs locker; Ed. Newton, export officer; J. Bramwell, landing waiter.
120. Were all these officers, before they signed that certificate, expected to be personally cognizant of the shipment of these goods? The Customs locker signed to the delivery of the goods from bond, the export officer is responsible for the delivery of the goods on board the ship, but Mr. Bramwell, the landing-waiter, signed under an order issued by Mr. Barnes when he was here—
121. His signature, I presume, was required as an additional check? It is not any check at all; it is merely signed *pro forma*.
122. An officer signs that certain goods are shipped, and he does that merely *pro forma*? He does so merely by order.
123. Was not that order given as an additional check? I cannot say, but it is so done.
124. Merely as a matter of form? It is perfectly a matter of form.
125. Then any landing-waiter at any port in the Colony is competent, and, if called upon, would be justified in signing these certificates, although he may be a mile away from the place where the ship is said to take in the cargo—is that what you would say? I cannot speak as to justification; I only tell you what is done.
126. Will you answer the question? I believe he would be justified, under his orders.
127. *By the Chairman*: Then this certificate is of no value? Not the slightest.
128. *By Mr. Browne*: What are the officers who take these goods on board—the export officers—are they senior to the landing-waiters? The landing-waiter is senior to the export officer.
129. What is the rank of the export officer? This export officer is an established tide-waiter.
130. What would he receive a day? I do not recollect exactly—I think something over £200 a year.
131. Does not the landing-waiter get double that? No; £325 I think.
132. Is it the duty of the export officer to follow all the goods from the bonded stores to vessels? Certainly.
133. Do you think any one officer could follow the quantity of goods in this manifest from four or six stores to a vessel in any one day—there are two hundred and ninety-six packages? It would be a very good day's work I should think.
134. Do you think he could possibly do it? No, I think not.
135. The Grafton Wharf was the wharf at which this vessel took in her cargo, was it not? It says here the Grafton Wharf.
136. Is that a sufferance wharf? Yes.
137. Are dutiable goods allowed to be exported from any but a sufferance wharf? I believe it is the regulation to ship them from a sufferance wharf.

William N.
Llewellyn,
Esq.

29 Oct., 1858.

138. Is there any landing-waiter attached to the Grafton Wharf? Yes.
139. How many of these export officers are there? Four or five I think.
140. Do you know any one of them now in the service who was dismissed for having been detected in stealing, and afterwards restored? Not one.
141. One of the officers who follows the carts? I am speaking of the established officers now.
142. I asked you how many officers follow the carts, and you said four or five? I am speaking of the established tide-waiters—there are the extra tide-waiters.
143. I want to know how many officers are there whose duty it is to attend to the following of drays conveying goods for export? I could not say how many extra ones there are—I only speak of the established tide-waiters.
144. Then there are no export officers, the duty is performed by any tide-waiter? The tide-waiter is often employed.
145. Is Mr. Newton an export officer, or a tide-waiter—what is he? He is an established tide-waiter.
146. Is there any export officer? He is an export officer; Mr. Russell is an export officer. The established tide-waiters are occasionally employed to do that duty.
147. Then there is no export officer, but tide-waiters who do the duty? The established tide-waiters do the duty, and the extra tide-waiters.
148. *By the Chairman:* Are there any export officers? There are no export officers on the establishment so called.
149. Then those who are called tide-waiters and extra tide-waiters do the duty? Yes.
150. Are any other persons employed to do that duty? No, I think not.
151. *By Mr. Browne:* The extra tide-waiters are, I presume, men of whom you have not so much knowledge as to their respectability as the established tide-waiters? I am scarcely acquainted with them.
152. You do not know much as to their respectability? Not of the extra tide-waiters; sometimes they are taken off; sometimes they leave and come back again.
153. Is Mr. Newton on the establishment? He is a fixed officer.
154. Is he a man of reputable character? He is a man I know nothing about; I see him sometimes in the waiting room, standing about the place, but I do not see him perhaps once a week out of doors.
155. *By the Chairman:* How long has he been in the service? I could not say exactly.
156. *By Mr. Browne:* Is there any regulation promulgated by which a vessel taking in dutiable goods one day shall not be allowed to clear till the next? I think not; not that I know of.
157. No such regulation exists? I know of none.
158. You would do so if such a regulation did exist? There being no printed regulations I cannot speak to them; the practice may be altered from time to time. I know of no such regulation.
159. Is not the Collector of Customs in the habit of occasionally issuing written regulations which are considered to be binding upon the officers of the department? I know no such regulation as the one you allude to.
160. *By the Chairman:* There is an entry there for six kegs of tobacco for which there is no export warrant among these documents? This is New South Wales tobacco.
161. Is that regular? There should be an entry passed for it I think.
162. Then it is irregular? It is irregular.
163. It was not dutiable? No.
164. In that case these kegs of tobacco went away without entry at all? They did.
165. *By Mr. Browne:* Is Mr. Barnes' order, which you have alluded to, a written or printed order? I could not tell you that.
166. Is there any record of this order having been given—is it in the records of the Custom House—is it printed or written? I never saw it, printed or written, but I have always understood such to be the case.
167. Have you a copy of the instructions usually acted upon when the department was under charge of the Imperial Government? There were copies issued to the Collector, the landing-surveyor, landing-waiters, clerks, and lockers.
168. Have you a copy of them? I have not.
169. *By the Chairman:* Have you ever had it represented to you that the place where the export warrants are kept is insecure? No.
170. Has Mr. Maddocks ever made that representation to you? Never.
171. Has it ever been brought to your notice by any one else? It has, lately.
172. Not before the "Louisa's" case? No.
173. *By Captain M'Lerie:* Have you ever known an instance in which export bonds were taken by any other clerks than Mr. Maddocks or Mr. Manton? Certainly—Mr. Mowle or Mr. Fancourt. Suppose you went to the Custom House and found Mr. Maddocks was not there, you would say to another clerk, will you take my bond.
174. *By Mr. Browne:* Are these bonds taken in large numbers? Sometimes half-a-dozen or more in a day—sometimes few, sometimes many.
175. *By the Chairman:* How many in a year? I could not tell.
176. *By Mr. Browne:* Are any attempts made to ascertain the solvency of the parties to the bonds? It is a very delicate question.
177. Has any attempt been made? I cannot answer for other persons; I should make it myself, and have done so within the last week.
178. You think it a proper precaution? I may state that I saw upon a bond the name of one person who I thought had been in the Insolvent Court; I inquired and found that he had his certificate, and as the bond was not for a very large amount I took it.
179. You say you think it a very proper course to pursue, and particularly in the case of heavy

- William N. Llewellyn, Esq.
29 Oct., 1858.
- heavy bonds, to see that the person executing is a man of substance? Certainly, and if I had a heavy bond to take I should lay it before the Collector before I took it.
180. *By Mr. M'Levie*: Has any reference been made to you by the other clerks before taking bonds, in the absence of the Collector, as to the solvency of the parties offering themselves? Never.
181. The question has never arisen? Never.
182. *By Mr. Browne*: Is there any regulation respecting the taking of fees either by officers in-doors or out-doors? Yes; the clearing clerk is allowed fees for clearing vessels, and the landing-waiters so much an hour, after the hours of business.
183. Who established those fees? The Collector, in accordance with the English practice.
184. What is the fee? I could not tell the amount.
185. A fee is established, and you do not know the amount? I do not know the amount the clearing clerk receives; it is not a fixed amount.
186. You are not aware what the fee is? No. I did the clearing duty for years.
187. Did you receive instructions from the Collector to receive any fee? Yes.
188. Was the amount discretionary with you? He did not fix it by writing; it was left to the discretion of parties.
189. Then you might take from £1 to £100? The fee is generally a very small one.
190. What was it? It depended a good deal upon the time; for instance, Mr. Metcalfe was the person who got the Collector to introduce the practice, and I then staid till six at night, and got half-a-guinea, or a guinea, according to the time I had to stay.
191. Who made the regulation? The Collector ordered that vessels might be cleared after hours upon payment of a moderate fee. The landing-waiters have a fixed sum of one shilling per hour for every hundred pounds of salary; that is the Treasury regulation.
192. Is there any Treasury regulation applicable to the clearing of vessels after hours? Not that I am aware of.
193. Are you aware of a circular having been issued by the Government to the effect that no Government officer should be entitled to take any fee or reward for anything done in the execution of his duty? No.
194. You never saw such a circular? I do not recollect it.
195. *By the Chairman*: Do you know anything about the steps usually taken to secure the integrity of bonded stores? No bonds are taken for bonded stores at all.
196. Or the safe custody of goods inside those stores? I have nothing to do with that. Import Bonds are taken for goods so warehoused.

Mr. John Gard called in and examined:—

- Mr. J. Gard.
29 Oct., 1858.
1. *By the Chairman*: What is your position? Mariner. I am second mate on board the steamboat "Grafton."
2. Were you chief mate of the brig "Swan," lying at the Grafton Wharf, on the 2nd of September, when the "Louisa" was there? I was mate of the "Swan" the night the "Louisa" was towed from the wharf, and when she was lying along the wharf—I forget the day of the month—from the time the "Louisa" went to the wharf till the time she sailed.
3. How many of the crew had the "Louisa" on board that day? All the crew that day; but there were none on board until after dinner, excepting a black cook.
4. How many did the crew consist of? That I cannot tell you.
5. Do you recollect seeing any goods shipped on board the "Louisa" that day? I saw some drays coming with casks.
6. How many? Two or three.
7. Do you think as many as ten came down that day? No.
8. What was the greatest number? I think three was the most I saw.
9. Were you there all day? Yes.
10. What time did the drays that you saw come down? A little after dinner; somewhere about two o'clock.
11. Did any come before dinner? Not that I took notice of.
12. Were you in a position to see if they did come down? No, for I had other business.
13. *By Mr. Browne*: The Grafton Wharf is not a very broad wharf? No.
14. Were you lying on one side and the "Louisa" on the other? Yes.
15. Did you see these goods that came down on the drays go on board the "Louisa"? Yes.
16. What did they consist of? Casks.
17. The three dray-loads? Yes.
18. If 296 packages had come down in the course of the day to that vessel, consisting of hogsheads of brandy, hogsheads of rum, and cases of gin, do you think it possible they could have been taken on board? I do not know. There was no crew till after dinner, only a black cook. About three o'clock a dray came with a load of Maories or Lascars and their clothes.
19. If a vessel were hoisting in and out large quantities of goods on the wharf, with your vessel at the other side, must you not have seen it? There was no goods taken in before dinner.
20. That you are quite sure of? That I am confident of.
21. Can you say what time of night the "Louisa" was towed from the wharf? I think somewhere about half-past five; between that and six o'clock.
22. Did you see anything of Captain King? I do not know Captain King.
23. (*The Chairman read the list of goods in the content outwards*) Do you think it possible all these goods could have been taken on board that day? From the time the goods went on board it was impossible.

24. These goods could not have gone on board without the crew? If the goods had been taken on board I would have seen it. Mr. J. Gard.
25. You say the crew were not on board? None but the black cook. I saw only three drays, in which there were some casks, but no cases. 29 Oct., 1858.
26. *By Mr. Browne*: How many casks were on each load? I suppose three or four.
27. Then ten or twelve went down at the utmost? Yes.

Mr. William Russell Hill called in and examined:—

1. *By the Chairman*: You are a partner in and Manager of the Grafton Wharf? Yes. Mr. W. R. Hill.
2. Do you recollect the "Louisa" lying at the wharf? Yes. 29 Oct., 1858.
3. What were the arrangements made for the wharfage? So much per day.
4. What were the reasons given for paying by the day instead of in the usual mode? They thought there would be no cargo. I wished to arrange in the usual way, so much per package, but the captain said, No; she was only going an island voyage, and would pay me so much a-day.
5. Do you remember the day she left the port? Yes.
6. What day was it? On a Thursday evening.
7. Do you remember the day of the month? The 2nd.
8. At what hour in the evening? I suppose about 6 o'clock; I could not say exactly to half-an-hour.
9. Do you recollect seeing her clearance papers two or three days after? Yes; I think it was the second morning.
10. Did you observe anything in the clearance papers that excited your suspicion? Yes; I made a remark that she had not shipped the goods at the wharf. I thought it strange.
11. Did you go to inquire into the matter? No, not till lately.
12. What did you do after making that remark? I said it was a good thing that I had got so much per day, or else she would not have paid.
13. How many dray loads were mentioned in the clearance as having been shipped? I should say from thirty-five to forty.
14. Was that (*handing a paper*) the clearance you saw? I merely took it out of the papers. It appeared to me to be very large.
15. "28 hogsheads of rum"—read that—was that like it? I could not say. I think it was spirits principally that I noticed.
16. From the inquiries you made, and your knowledge of what took place at the wharf that day, what quantity of goods should you say were shipped by the "Louisa" from your wharf—how many dray loads? Two or three; there could not have been many.
17. Could there have been five? There might.
18. Ten? Certainly not.
19. What is the utmost that you think could have been shipped? Three or four dray loads.
20. What reason have you for supposing there could not have been more? I should have seen them if they had been shipped. I took particular notice, on account of the arrangement made, to see which would pay me best, by the day or the number of packages.
21. You were taking very particular account? Yes; because I was paid by the day.
22. In fact, you would have remonstrated if you had seen any such quantities shipped as are named in the clearance? No; but I should not have made such an arrangement again.
23. Did you notice whether any goods were shipped after dinner? I should say not.
24. Could you be positive? I should not like to swear it.
25. These three or four came before dinner? It might have been between eleven and twelve.
26. How many of the crew of the "Louisa" did you observe on board in the early part of the day? I did not observe any but a black; there might have been a white man, but I could not say.
27. Was the black an able scaman? That I could not say. In the afternoon a mob of blacks came down to the ship, and a dray with their traps. They had a barney with the drayman about paying him.
28. *By Mr. Browne*: Did you see a Custom House officer accompanying any dray? Not that I knew.
29. Do you know Mr Newton by sight? I cannot say I do. I know most of them by sight but not their names. (*The Chairman read the content outwards.*)
30. Do you think it quite impossible that anything like 296 packages of these goods could have been put on board? Not on that day.
31. Did you know she was going to sea that day? I was not aware of it till I told them they would have to haul off, for I had to make room for the steamer which was due on Thursday evening. When I went on board they said they were going away. I went later in the afternoon, and they said a steamer was coming for her, and when I went again they were getting warps ready.
32. Did she appear deep, and full of cargo? No.
33. *By the Chairman*: You say during the latter half of the day some blackfellows came down? Yes, with their blankets and trunks or chests.
34. *By Mr. Browne*: Did you see gin cases come down, either red or green? I did not take particular notice what they were, barring this barney with the blackfellows.
35. These goods that have been now enumerated by Captain Ward would measure a great many tons? They would.
36. They would have filled the vessel? No doubt, or close to it.
37. *By the Chairman*: There are nearly three hundred packages, consisting of hogshcads, quarter-casks, cases of gin, and half-tierces of tobacco? They would half fill her.
38. *By Mr. Browne*: Is your wharf a sufferance wharf? Yes.

- Mr. W. R. Hill. 39. Is there any landing-waiter attached to the block? Yes, on the Flour Company's Wharf.
40. What is that gentleman's name? I do not know; they shift them every month.
- 29 Oct., 1853. 41. An officer at the Flour Company's Wharf would have been able to see any large quantity of dutiable goods shipped at the Grafton Wharf? If he had been on our wharf, or standing on the jetty of the Flour Company's Wharf, not otherwise.
42. Do you know his beat? He goes from the Victoria Wharf up to our wharf; he might go further up—that I cannot say.
43. *By the Chairman*: Did you notice the "Louisa" bring up at your wharf on the 7th October when she came back from her cruise? Some time after. She went away again the same night.
44. What time did she come in? I cannot say; I was not in town.
45. What time did she leave? She was towed out after dark; she was there when I went away.
46. Did she come alongside your wharf? No.
47. Had you any communication with her? No.
48. *By Mr. Browne*: From all you have seen with reference to the loading of this cargo, her coming back again, and departure in the night-time, do you think there was anything to justify the suspicion that it was not altogether regular? I think it looked suspicious. When I looked at the clearance, and found she had so much on board her, I thought it would have paid me good wharfage if I had had it by the package.

Mr. William Lyons, Mate of the "Tasmania," called in and examined:—

- Mr. W. Lyons. 1. *By the Chairman*: When did the "Tasmania" leave Sydney last? On the 16th or 17th, I think.
- 29 Oct., 1853. 2. Did she ship any tobacco on that occasion? Twenty half tierces.
3. What was the brand? H, No. 360, I think.
4. Was it 360 or 560? I gave it to Mr. Singleton.
5. Was it 563? Yes.
6. Do you recollect how the tobacco came down to the ship? In a cart.
7. Was a Custom House officer with it? Yes.
8. Did you sign his receipt? Yes, I signed his warrant.
9. Do you recollect who he was? Mr. Russell was the officer.
10. What became of that tobacco at Hobart Town? It was transhipped.
11. Into what vessel? Into the "Louisa."
12. Did you find the "Louisa" in the Derwent when you arrived there? Yes.
13. She was there waiting your arrival? Yes.
14. Was she up at the wharfs at Hobart Town? No, lying in the stream—lying off the town in the middle of the river.
15. Who came on board the "Tasmania" for this tobacco? Captain King. We got in about eight o'clock in the morning, and between eight and nine, directly the Customs opened, he passed a transhipping order.
16. He produced the order to tranship? Yes.
17. Was there a Mr. Stewart a passenger by the "Tasmania"? Yes.
18. Did he take any interest in this tobacco at all? I never saw him at all concerned in the tobacco.
19. He took no interest in the transhipment? I never saw him. We got in in the morning, and I never saw him till the day of sailing.
20. Had he landed from the "Tasmania" before Captain King got the transhipping order? Yes; he landed some time before.
21. *By Mr. Browne*: Mr. Stewart came back again by the "Tasmania"? Yes.
22. Was his name included in the list of passengers? Yes, his name appears in our list.
23. His name does not appear in the Customs list? Yes, Mr. Gifford said it did; but it did not appear in the *Herald*.
24. Can you at all recollect the draymen who brought the tobacco to your ship? No; in fact I was not sure of the officer till Mr. Gifford told me himself, for we had other bonded goods the same voyage—15 hogsheads of brandy.
25. Did Mr. Russell see this tobacco on board the ship before you signed the receipt, or did you sign on the wharf? No; he saw it on board.
26. Was there a landing-waiter at the wharf? No; there is none at the Patent Slip; the landing-waiter at the Flour Company's Wharf does the Patent Slip duty.
27. Did this tobacco come down late, or was there any difficulty in taking it on board? No; it was down rather early; it was the first thing on Friday morning.

Mr. John Alfred Maddocks called in and examined:—

- Mr. John A. Maddocks. 1. *By the Chairman*: What situation do you hold in the Customs? I am in the position of cashier and second clerk.
- 19 Oct., 1853. 2. When vessels are cleared out, is it not your duty to take the captain's declaration as to the truth of the statements contained in the manifest? Yes.
3. Do you ever delegate that duty to another? Of course if I should have to go out for a minute or five minutes some one must act for me; my desk is never left vacant; any one coming to transact business must be attended to immediately, and I take care always to leave some one in my place.
4. Who generally acts for you? Mr. Mowle at present.
5. Does Mr. Manton ever take a declaration for you? Not if I am there.
6. If you are absent? For clearing vessels he takes declarations after hours, which I never see.
- 7.

7. In other cases you generally take the declarations? Yes.
8. You give him general authority to take declarations? I give him no authority; he has authority from Colonel Gibbes.
9. He is recognised as an officer authorized to take declarations? Yes.
10. Is it not your duty to take bonds previous to the exportation of goods? It is.
11. Are those bonds kept in your custody? They remain on my desk during the day, and those that are executed are given to the messenger and he files them; those only executed by one party remain in my custody.
12. Are you answerable for their safe custody? I was not aware of it before the Collector called for the bonds of the "Louisa," on the 20th October. I take the bonds, and hand them to the messenger when they are finished, and he files them and locks them up in a drawer. That is the system that was in force when Mr. Webb was first clerk, and I have carried out the same system.
13. How long have you had the duty of taking bonds? I have taken the bonds for the last three or four years; I used to take the bonds in Mr. Webb's time when I acted for him. It was my duty to take the bonds in 1847; I was then acting chief clerk; I have also performed this duty when Mr. Llewellyn was acting chief clerk years ago, and, to the best of my knowledge, the bonds have always been disposed of as I have stated.
14. During the whole of that time it has been the practice for the messenger to take the bonds from you and lock them up? Yes.
15. Who has charge of the key? The messenger.
16. Is that the recognised practice of the Customs? The practice did not originate with me. I asked the messenger if Mr. Webb always gave him the keys, and he said he did; and, to the best of my knowledge, that was the case.
17. That practice existed before you came into the position of cashier? Yes. I told Colonel Gibbes that if any one were so disposed he could abstract a bond before my face. I have so many matters to look to at once: I have to take the declarations of captains as well as bonds, and they are in such a hurry that I have sometimes to attend to three or four parties at the same moment; so that it is utterly impossible for me to give that due attention to the bonds which now appears necessary. It is all very well for people to say it is a very loose system, but during all the time I have been there—now seventeen years—such a circumstance as this has never transpired before, and I do not remember a bond having been called for or cancelled.
18. *By Mr. Browne:* Is any inquiry made before you take a bond as to the solvency of the person whose name is attached to it? I think I have brought such questions before the Collector, asking whether I should take a certain party's name, when I have seen the name in the papers as insolvent; but in carrying on business everything is done hurriedly in the Custom House; we have to transact business the best way we can, and have to conform our rules to circumstances.
19. Do you prefer taking bonds from Custom House Agents? I do, decidedly, to taking them from persons we know nothing about.
20. Is it possible for any dutiable goods to be exported without bonds being taken? Yes; the clearing clerk can clear a vessel without any bond; but it is his duty first to see, before passing the entries, that bonds have been given.
- (*The witness was requested to refer to the papers on the table.*)
21. Are those your initials? Yes. The entry is brought to me and I initial it, to certify that a bond has been given; then it is taken to the clearing clerk, and he looks to my initials before he passes the entry. The vessel may not clear for a week after.
22. According to that, has that vessel been properly cleared? The vessel ought not to have been cleared without having all the entries initialled, to certify that bonds had been taken.
23. The vessel was irregularly cleared, because these entries had not your initials? Yes.
24. If a bond is taken by any other officer in your absence, that bond comes to you, for the purpose of enabling you to initial these warrants? Yes.
25. If the clearing clerk thinks proper to clear a vessel he could do so without bonds having been issued? Yes.
26. Has any other person beside yourself authority to receive export bonds? I consider any one has authority who acts in my position. They would sign the same as if I was there.
27. Had Mr. Manton authority on the 2nd of September to take bonds? None that I am aware of.
28. Had you given him authority to take bonds for you? I gave him no authority.
29. Do you remember whether you were absent from the Custom House at all that day? I do not remember if I was absent. It would make no difference; Mr. Mowle would have acted for me.
30. How long have you adopted the practice of asking Mr. Mowle to take your duty during your absence? Mr. Mowle exchanged with Mr. Arnold, and joined the department on the 12th September, 1856. Since Mr. Mowle joined the department it has been a portion of his duty to act for me when required; when Mr. Webb was chief clerk I acted for him when required.
31. Then Mr. Manton had no authority to take the bonds for the export of these goods on that day? He had no authority from me.
32. Even if he had taken these bonds, would they, after having been taken, have been put upon your desk, for the purpose of enabling you to initial the warrants before the ship cleared? If the bonds were taken in office hours, they ought to have been handed to me, or left on my desk, and my attention called to them. Mr. Fancourt might take a bond in the absence of myself and Mr. Mowle, if he did so he would inform me of it.
33. If Mr. Manton took a bond during your absence would that bond remain with him, or would it be taken to your desk? If he took a bond it would be his duty to forward it to me, and then the entry would come to me in due course.

Mr. John A.
Maddocks.
29 Oct., 1858.

- Mr. John A. Maddocks.
- 29 Oct., 1858.
34. Then this vessel being cleared after hours without these warrants being initialled is an irregularity? Yes, I consider it is so
35. *By the Chairman*: Did you ever represent to the Collector that bonds were taken and vessels cleared, or declarations taken, without your knowledge or the production of the necessary papers? I mentioned it to the Collector a short time ago, that I found Mr. Manton was in the habit of clearing vessels after hours; I asked whether the Collector had given permission, and he told me he had. I also named to the Collector that I found that Mr. Fancourt took declarations of ships inwards, which is contrary to the usual practice. I noticed the steamer from Van Diemen's Land, the "Tasmania," but the Collector was engaged at the time, and he said he could not go into the matter at that moment. I had previously ascertained from Mr. Manton that he had permission from the Collector to clear vessels after hours, so that I do not think it necessary to mention the matter to the Collector; but when I found that Mr. Manton had taken upon himself to receive the captain's declarations in office hours, I thought he was overstepping his authority; that was the reason I broached the subject to the Collector.
36. Was that the only time you made a representation to the Collector? That is the only one I remember.
37. Is it usual to take the signature of a Custom House Agent for goods going to the South Sea Islands out of bond? It has been usual.
38. For how long has it been the case? It is only within a few weeks that I was called upon to stop taking the signatures of agents for goods to the Islands.
39. Did you take the declaration of the captain of the "Louisa" on the 2nd of September? The manifest will prove that—I do not remember. (*The witness referred to the papers.*) I find by reference that I did not.
40. Is it not your duty in the absence of the Collector to sign these clearances? It is, and I frequently sign them when he is in the Custom House; for instance, when the Collector is engaged.
41. In this case you did not sign the clearance, because it was after hours; do you know by this whether it was after hours? If Mr. Manton had cleared this vessel in the middle of the day I should not have known of it, unless the manifest was sent to me and I had taken the captain's declaration. When I am engaged making up the cash the Collector takes the captain's declarations; if the Collector should be away, or engaged, when the clearance is made out, it would be brought to me to be signed. It strikes me that the Collector told me that he had given Mr. Manton permission to take the captain's declarations at any time; but I would not be positive.
42. Have you any idea whether the "Louisa" was cleared in the middle of the day? When I was called upon to get the bonds I asked the question.
43. Then it appears you did not sign the clearance on the 2nd September? I did not.
44. Did you sign the clearance on the 7th October, when she went out again? No.
45. Whose signature is that? Mr. Manton's.
46. Can you tell whether at that time she cleared after hours or not? I could not.
47. When some one acts in your behalf to clear a vessel, is it ever reported to you next morning? No; there is no necessity.
48. Your deputy for the time being does not report his acts to you on your return? No. After the declaration is taken I have nothing more to do with the manifest, so that it would be useless.
49. So that vessels can be cleared without your knowledge at all? Yes.
50. *By Mr. Browne*: Though it is your duty to clear vessels? That depends upon circumstances. The Collector generally takes the captain's declarations for ships bound to London or Liverpool. It is the duty of the Collector or chief clerk to take the captain's declarations.* This document, which is the manifest, ought to be complete in every respect before it is brought up to me. The clearing clerk compares the entries with the cargo, marks them off, and when everything is complete he initials the manifest as correct. I then affix my signature, and return it to the clearing clerk, in order that he may make out the clearance.
51. *By the Chairman*: When a vessel is cleared for you by any deputy that happens to take your duty for you, does he report to you? No, it is not usual or required; it goes out of my hands immediately; this paper is merely produced before me as being correct.
52. Is there any record made of the clearance by your deputy in your office? Yes; there is the outward book. The clearing clerk has the whole responsibility. The papers are merely sent to me or the Collector, or my deputy, as a matter of form, for signature; if I discover anything omitted, I send them back to the clearing clerk. The outward manifest is numbered the same as the blue book and inward manifest. The landing-surveyor's book is the record.
53. *By Mr. Browne*: Then he has no business to send these papers as complete till he has checked the manifest to see that the goods are all correct? No. The clearance is then handed to the Collector for his signature, and the Collector hands it back to the clearing clerk or agent.
54. Who has the custody of these—the office copy of the clearance? † They go into the hands of another clerk, who enters the papers in his book; Mr. Mowle is his name. Mr. Manton delivers them complete.
55. Are they not usually sealed together, or are they merely pinned? They are merely folded up, handed to Mr. Mowle, and put into a drawer. If there are drawbacks to them,
- he

* In this matter I act as chief clerk, in other matters I have not the authority of the chief clerk. Since the 3rd of May, 1855, the Collector has seldom referred to me respecting the management of the Long Room. He generally gives his orders to the clerks personally, or to Mr. Llewellyn. As second clerk and cashier, I have very little authority.

† Mr. Mowle has the custody of the outward manifests until they are put away with the inward manifests, blue book, &c.

he has to see all the drawbacks and under-bond entries from the clearing clerk, and he can enter what information he requires out of the manifest, and he then places it in the drawer. Mr. John A. Maddocks.

56. Mr. Manton being clearing clerk, whether before or after hours he is bound by the same regulation? Decidedly. He ought to do the business correctly.

29 Oct., 1856.

57. Then in clearing this vessel these documents, before they are properly passed, should be initialled by you or Mr. Mowle? Yes, but by Mr. Mowle only when acting for me; if I am present, Mr. Mowle has nothing to do with it; if there is any bond he has, but no bond has been given.

58. These not being initialled they are irregular? Yes.

59. The ship should not have been cleared by Mr. Manton, except these export warrants were initialled by you? Or by himself, or any one acting as chief clerk for the Collector; most certainly not.

60. Are you aware that an order was given by the Collector twelve months since that Custom House Agents were not to give bonds for goods shipped to the South Sea Islands? No. I brought the matter before the Collector, and, as I understood, the order was this—that the agents were not to sign any export bonds.

61. It is not usual in such a case to take a bond from the captain and exporter? In the case of stores only we take the captain's bond.

62. I mean goods going to the South Sea Islands? There might have been a bond taken from the captain, as the captain is sometimes part owner; but he must, in this case, be the shipper also. With regard to taking bonds, it has been a matter of business that is required to be carried through in such a hurried manner that there has not been time to consult who was the proper person to do it and who was not.

63. Do you think it right that a ship's clearance should be signed, or a declaration taken after hours, by the clearing clerk or any subordinate officer? I do not think it right, as it leaves an opening for irregularities, as in the present case.

64. *By Mr. Browne*: Would you not think it necessary to take more precautions when there are dutiable goods on board a vessel than when there are no dutiable goods in her? Yes. If there were eight or ten hogsheads of tobacco for which there was no entry I would not clear the ship, I would make a note on the manifest, "so-and-so not returned." In the case of under-bond goods, or drawbacks, I never cleared a vessel without special orders.

65. Then this is wholly irregular? Yes, so far as I see. Allow me to state that I think these entries must have been passed after office hours altogether.

66. Your impression is that the whole of the entries must have been passed after office hours? Yes, the whole of these entries not initialled; but this is only an opinion.

67. *By the Chairman*: Have you at any time called the attention of the Collector to the insecurity of the documents under your charge? Not having any documents under my charge, with the exception of the cash-book and unsigned bonds, I have not done so.

68. Or complained of the manner in which the duties have been performed by subordinate officers? I have not made any formal complaints that I am aware of, or had occasion; but in the course of conversation with the Collector, I have on several occasions pointed out matters relating to my own duties. These remarks had no reference to any subordinate officer, but to bonds and cheques.

69. Did you at any time, or frequently, complain that you could not be responsible for the custody of documents if irregularities were allowed in your department? No; for the reasons before given, namely, that I had only the cash-book and unsigned bonds in my custody. The only formal matter I have brought before the Collector, without reference to the custody of papers, was that the agents, captains of ships, and the public, were allowed inside the railing of the Long Room. The Collector said he thought they could be kept out, but Mr. Manton said he could not clear the ships unless they were allowed inside. I had not the authority to say I will not allow you in.

70. You think it is inconvenient? Decidedly so. If you let in one you must let in the whole, for if you allow the agent in the captain follows him.

71. If I understand you rightly, you did not take the bonds for all the goods shipped in the "Louisa" on the 2nd? I took the bonds for these three entries, that is all.

72. *By Mr. Browne*: Is there any order issued by the Collector that vessels with dutiable goods shall not be cleared on the same day that they take the goods on board? There may be such an order, but I am not aware of it.

73. Is there such an order? I never saw it.

74. You do not believe there is such an order? I go by the practice. I get very few orders. I generally do the work as well as I can, and as strictly as I can. Our department is more public than any other in the Colony; it is like an auctioneer's room. I did not receive such an order.

75. The signature of the landing-waiter is attached to the warrant, is it not, after the export officer? That is Mr. Bramwell's signature.

76. Would you consider that an officer holding the position of landing-waiter would be justified in signing that warrant if he had not himself personally seen that the goods were on board the ship? I am not conversant with out-door officers' duties; I never acted as out-door officer; but to the best of my knowledge it would be unavoidable in practice. From the position of the wharfs the landing-waiter has several duties to attend to; he cannot be at every place; he takes the officer's signature as a proof that the goods have been shipped, although he never saw them shipped; you cannot prevent it under existing circumstances.

77. You consider that under the practice that has been adopted the landing-waiter at Walker's Wharf signing the certificate of goods being put on board at the Grafton Wharf would have been within the scope of practice, as far as you know? If that wharf came within the range —?

78. If it did not? If it did not, seeing the export officer's signature he would take it for granted

Mr. John A. Maddocks. granted that the goods were shipped. It is the same with the tide-waiter's book. The landing-waiter is not on the ship. The entries are taken by the tide-waiter; he makes up the book and hands it to the landing-waiter; and the landing-waiter makes up his book from the tide-waiter's.

29 Oct., 1853.

79. Then the landing-waiter's signature is valueless? Yes; it is a mere matter of routine. He might not look to the date of the entry at all, but to the signature of the export officer.

80. In fact Colonel Gibbes does not hold the landing-waiter responsible for anything in that paper? This question I cannot answer, as I really do not know.

81. You say you have never complained of the conduct of any subordinate officer to Colonel Gibbes? I am not aware that I have had occasion for some time past. I do not like making complaints if I can possibly avoid it.

82. *By Captain M'Levie*: You suppose that these entries were passed after office hours because your initials are not attached to these? Yes; because there are no bonds to be found.

83. Because your initials are not attached you presume the entries were not passed in office hours? Yes.

84. Is it not possible for these entries to be passed during office hours, and, for certain reasons, not to be sent to you for initialling? They might be passed in office hours, and there might be an omission to send them to me.

85. *By the Chairman*: The questions you have put in your letter to Colonel Gibbes, of the 23rd October seem to imply a doubt that the bonds were ever executed. Mr. Llewellyn says that the bonds were seen by him, and that they had been in his hands—do you doubt that statement, or are you satisfied, from what he states, that these bonds did exist? I do doubt whether they ever did exist. Mr. Llewellyn having heard the reports got the papers to see that all the documents were correct; now, it is my opinion that he got the file of bonds from the messenger unknown to me, that he came across the bond which I presented to the Collector, and also the other bond which is missing, and might be on the file at the time, and, seeing these two, jumped at the conclusion that all the bonds were right.

86. Have you any statement to put in before the Board, or further information to give? I wish to put in the following statement, which I will read. (*The witness read the statement appended.*) With regard to the responsibility of bonds in general, I think, now this question has been raised, that I am in a measure responsible, but still I only carry out a former practice. I have been seventeen years in the office, and have never been called upon for a bond to proceed upon before. Besides, if Mr. Llewellyn had these bonds it is quite possible that the bond missing might have been mislaid in his office. The inference is that it has been abstracted. Again, I have never, either directly or indirectly, been informed that the bonds were under my especial care, or in my custody. The only question is, whether the bond has been lost or abstracted.

87. Who would be interested in taking away the bond? The party who signed it.

88. They offered to execute another? I do not know whether the party who shipped the goods did; I believe one of the Mr. Stewarts did.

Statement read by Mr. Maddocks.

The Collector called for the bonds of the "Louisa" on the 20th October.

The "Louisa" cleared on the 2nd September.

The file of bonds for September had been tied up and put away; I had to get them from the messenger. I searched through several files, and could only find one bond for the "Louisa"; this bond had been turned down at the corner by Mr. Fancourt, in order to draw my attention to it. Mr. Fancourt told me that he had searched through the files, and that was the only one he could see. I sent this bond to the Collector. Previous to my sending this bond to the Collector I asked the messenger to get me the manifest and entries, in order to ascertain how many bonds I had received. I looked over the entries, and found several without my initials; I pointed this out to the Collector. Two of the entries were initials for the bond I sent to the Collector; the third entry, bearing my initials, was for eight half-tierces tobacco; for this entry I could find no bond.

The Collector then told me this was a very serious matter; that he held me responsible for the bonds. I told the Collector that a bond might be abstracted before my face if any one was disposed to do so.

The Collector then said that Mr. Stewart was prepared to prove that he had given bonds for all the goods shipped on board the "Louisa."

The Collector also stated that Mr. Llewellyn and Mr. Kelly had seen the bonds—Mr. Llewellyn having had them in his possession.

This evidence the Collector appears to have considered quite conclusive; and upon this evidence the Collector represents the matter to the Government, charging me with the loss of the "Louisa's" bonds, and neglect of duty. Upon this charge I am suspended.

In talking over this affair to Mr. Llewellyn, he (Mr. Llewellyn) said that Mr. Manton had taken the missing bonds for the entries not initialled.

I called at Mr. Stewart's office and asked him about these bonds. Mr. Stewart said to me that bonds had been given for all the entries, and he named Mr. Mackenzie having taken a bond or bonds. On the following morning Mr. Mackenzie told me that he had just seen Mr. Stewart, and that Mr. Stewart told him (Mr. Mackenzie) that he had delivered a bond or bonds to Mr. Mackenzie. I give this information as I received it. This contradicts Mr. Llewellyn's statement that Mr. Manton received the bonds. If Mr. Manton received the bonds, why did he not initial the entries?

I accidentally met Mr. Manton in George-street, on the 25th instant. I questioned him about the bonds for the entries not initialled; he said that he would swear that he had received bonds for these entries, and had them in his desk a week. I also understood him to say that the Collector had given him a written order to clear the "Louisa."

My

My opinion has been from the first that no bonds were ever given for those entries not initialled. The evidence which I have collected bears me out in that supposition. There is no reliable proof that more than two bonds were executed, and those two signed by myself, one of which is missing.

Mr. John A.
Maddocks.
20 Oct., 1858.

Question 1st—How many bonds did Mr. Mackenzie take?

Question 2nd—How many bonds did Mr. Manton take?

Question 3rd—How many bonds did Mr. Llewellyn see on the file or files when he had them in his possession?

The entries not initialled must have been passed after office hours.

I am inclined to think that Mr. Mackenzie never took a bond or bonds for the "Louisa."

Mr. Llewellyn states that he saw the bond or bonds Mr. Manton took—did Mr. Llewellyn see them at the time the vessel cleared, or in Mr. Manton's desk, or on the files?

(These remarks are written in haste.)

J. A. MADDOCKS.

MONDAY, 1 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.

J. M'LERIE, Esq.

Mr. John Ryan Brenan, Solicitor, applied to the Board to be permitted to be present on behalf of Mr. Brown, the locker, and Mr. Newton, export officer.

The Chairman stated that he was at liberty to attend at any time during the inquiry, but that all questions to witnesses must be put through the Board.

Mr. Thomas Fancourt called in and examined:—

1. *By the Chairman*: What is your position in the Customs? I am fifth clerk.
2. To whom are you immediately responsible? To the Collector.
3. Are you immediately responsible to Mr. Llewellyn or to Mr. Maddocks? To Mr. Maddocks; he is the cashier, and the head of the room.
4. You are responsible to Mr. Maddocks, and Mr. Maddocks to the Collector? Yes.
5. Do all your communications go through Mr. Maddocks, or direct to the Collector? I communicate with the Collector if there is anything wrong in-doors, or with the landing-surveyor if it is for anything out of doors.
6. Whenever you think proper you are entitled to communicate directly with the Collector? Yes.
7. You could report any irregularity directly to the Collector? I could do so.
8. What are your duties? To receive all reports of ships inwards—the manifests; when the captains make their reports I copy the date, the ship, captain, where from, tonnage, and see that the register and Post Office certificates are produced.
9. In fact, you examine the whole of a ship's papers inwards? Yes; and see that the one copy corresponds with the other; one is a declared copy, the other is a written copy, and I see that they correspond. In the case of a vessel from London I go through the ship's cockets—at least they are not called cockets now, but shipping bills—and see that everything is on the manifest according to these papers. Free goods are not taken any notice of, except that I see that the copy is exact.
10. You examine into the integrity of the ship's manifest? Yes; one copy goes to one gentleman, Mr. Mackenzie, who ticks off the entries, and the other to the landing-waiter.
11. What do you mean by ticking off the entries? When an entry is presented the clerk who has that particular duty looks down the manifest to see that the goods are in the manifest; if he finds the two papers correspond as to marks and numbers, and number of packages, he ticks the goods off. Then the entries are numbered by him, one of which is retained by him, and the others sent down by the messenger to the landing-waiter, who compares them, and keeps one, which comes back with the ship's books when complete; the other he initials, and returns by the messenger, who makes it up with the landing-surveyor's entries at the end of the day.
12. The entries are made by the party to whom the goods are consigned? Yes, or by his Custom House Agent.
13. There are two copies of the ship's papers, one copy is given to the landing-waiter, and the other to Mr. Mackenzie to tick off as the entries are made by the agents, or parties to whom the goods are consigned—what is your duty after that? I have to check the books after the cargo is discharged, to see that the landing-waiter's book is correct, and everything accounted for according to the manifest.
14. You have the entire control of the books? Yes; not the gaugers books or red books, but the blue landing books, and the tide waiters' books.
15. Does Mr. Mackenzie hand you the manifest again? No. When the ship's papers are sent up by the landing-waiter I go and take the manifest off the file. They take the manifest when the ship's papers are sent down. I just go and take it off the file.
16. You examine that against the entries? Yes, and see that the ship is entirely cleared.

Mr. Thomas
Fancourt.
1 Nov., 1858.

- Mr. Thomas Fancourt.
1 Nov., 1858.
17. What other duty have you to discharge? To make out the quarterly return of the shipping inwards.
 18. What is this return? The number of ships inwards, their tonnage, the number of men, where from, the nation to which they belong, and so forth. A very voluminous return that is.
 19. What other duties have you? That is all.
 20. With respect to ships going outwards what duties have you? I sign the outward papers, in order that the clearing clerk may see that all the inward cargo is properly discharged and accounted for.
 21. Have you any check upon the cargo that goes out? No, nothing. I merely sign the outward documents as a proof that the inward cargo is discharged.
 22. What is the character of the documents you sign? Statement of content outwards.
 23. That is the ship's manifest outward—a document like that? (*Handing the "Louisa's" content outward to witness.*) Yes.
 24. This document is not signed by you? No.
 25. Should it be signed by you? Yes.
 26. How can you account for that? I cannot.
 27. Ought it to be signed by you? It ought.
 28. Is it allowable for any other person to sign it? No, I am the only person to do so.
 29. That document having been passed without your signature it is wrong? Yes, it is wrong.
 30. Has it ever happened before that you have not signed a ship's content outwards? It has not.
 31. Has this paper been left unsigned by special leave? I do not know whether the Collector has given leave to the clearing clerk to do so.
 32. What is the next step with this content after you have signed it? When a vessel is ready for clearing the agent goes to the clearing clerk, who gives him all the entries that have been passed for the vessel, who copies them in the manifest, and calls them over with the clearing clerk, and sees that all the entries are correct.
 33. Having seen that, does he take the declaration? Mr. Maddocks should take that, if he is in the way.
 34. If he is not, who should do so? The clearing clerk, or any gentleman in the room.
 35. Down to the lowest clerk in the room, if Mr. Maddocks is not there? No; they do not generally go to the lowest clerk in the room; if Mr. Maddocks is not there either the clearing clerk, or the clerk who is doing Mr. Maddocks' duty, who is generally the next to him, does it.
 36. In this case the clearing clerk did it? Yes.
 37. Mr. Manton, in taking this declaration of content outward without seeing your signature upon it, acted irregularly? Yes.
 38. You consider it quite unprecedented? Quite unprecedented.
 39. Can you account for it at all? Not at all. I signed one document for that vessel to clear, that was on the 2nd September, but the next day I found that that one was destroyed.
 40. You consider that a very great check is lost by your not being allowed to sign the content outward? Yes, because he cannot know whether the content inward is discharged or not.
 41. Are you aware that the "Louisa" cleared out again on the 7th October? Yes; but I did not sign the papers.
 42. Will you examine that paper—(*handing witness the "Louisa's" content of the 7th October*)—is your signature to that? No, it is not.
 43. That was another most irregular step, was it not? Yes.
 44. It seems that on this occasion Mr. Manton passed it without your signature? Yes, and there was no rummage certificate.
 45. Why did you not sign it? It was not presented to me. I did not know that the "Louisa" was cleared until the next morning.
 46. Was it then presented to you? Yes, but I would not sign it, for I had not the rummage certificate, and I had not the Post Office certificate. It was half past three when they came up to enter that vessel inward—I forget the date. The Collector has on several occasions where vessels have come up late allowed them to be entered, but not without the Post Office certificate, and the papers have not been given up to the ticking-off clerk till that document has been produced.
 47. In this case the vessel was reported inwards, no Post Office certificate was produced, but she was cleared out and sent away? Yes.
 48. Was that highly irregular? Yes. I should have looked out to have got the documents before I would have signed the paper.
 49. Has the Collector ever allowed a vessel to come in and go out again without producing the Post Office certificate? No; I never knew an instance of it.
 50. It seems that Mr. Manton took the declaration of the master also? Yes.
 51. In doing that did he also act irregularly? I do not know what instructions the Collector has given him; he may have instructions to clear vessels after hours.
 52. Are you employed in the discharge of any other duties? No; I think that is quite enough, and rather more than I can accomplish sometimes.
 53. Does any body exercise any check upon you in the discharge of your duties? No.
 54. You are employed as a check upon others? Yes; to check the landing and tide-waiters' books.
 55. How long have you been acquainted with Customs establishments? Ever since 1831.
 56. Where have you been employed since that time? I was eight or nine years in the St. Catherine Docks in London, where, I may say, I was almost connected with the Customs; although I was not in the service of the Crown, I had a great deal to do with the Customs there.
 57. What class of duty did you perform there? I was a sort of clerk—landing-clerk and warehouse-clerk in the Dock Company's service.

58. Where the duties analogous to those of tide-waiter or landing-waiter in the Customs? No.
59. Were you ever employed in the Customs in England? No.
60. When did you come to this Colony? I have been in this Colony about eleven years and a-half, and about eleven years in the Customs.
61. In what capacities have you been employed here? For five years as an extra tide-waiter, and about six years as a clerk in the Long Room.
62. You signed the outward content of the "Louisa" proving the correctness of the cargo inwards? Yes; I signed that on the 2nd.
63. Did you get the rummage certificate for the stores? Yes, for the inward cargo; it was merely for the stores of the vessel. The landing-waiter looks for the cargo, the tide-surveyor looks out for the stores—that rummage certificate was for the stores.
64. What does the rummage certificate declare? The quantity of stores on board.
65. You require that in every case? Yes.
66. No vessel is allowed to proceed to sea without it? No.
67. Who generally procures the rummage certificate? The agent who clears the vessel, (Mr. Stewart, in this instance,) and sometimes the tide-surveyor; it is usual, and I may say a general rule, so soon as the papers are sent in by the landing-waiter complete as to the final discharge of the vessel, I send the tide-surveyor a printed notice, informing him that the books are in my hands, and that the vessel is ready for rummaging. This is always done where no tide-waiter has been placed on board the vessel.
68. Do you think the tide-surveyor could have gone on board and searched the vessel in the short period that elapsed between the time that you asked for the rummage certificate and that at which the agents produced it? I do not know where the vessel was lying.
69. The vessel was lying at Grafton Wharf? No, he could not; but he might have had information, perhaps, from the agent of the vessel in the morning, and might have gone round some time during the day and got the particulars.
70. At what time did you ask for the rummage certificate? When Mr. Stewart came up to ask me to sign the papers.
71. What did he say when you asked him for the rummage certificate? He went to the tide-surveyor and brought it up.
72. Who signed the rummage certificate? I can shew the very document. (*The witness produced the same.*)
73. For all you know, the officer may have rummaged the vessel properly? Yes.
74. There is nothing to make you suspect that he did not? No.
75. Who was the tide-surveyor? Mr. Collier.
76. You have been shewn the outward clearance of the "Louisa," which you say you did not sign? Yes.
77. Did you sign any outward clearance for the "Louisa" on the 2nd September? Yes, I did; when the rummage certificate was produced I signed it, and asked Mr. Stewart whether he was going to clear out that day, and he said he was not.
78. To whom did you give the clearance? To Mr. Stewart. I wrote the words "jerked inwards," put the date and number of the vessel for this year, and what stores there were.
79. Are you aware what became of that certificate? No. Mr. Manton next day asked me to sign another one, and said the first had been destroyed, as there was some mistake. That might have been the case, and if so, I think it better to tear a paper up and write another than to allow an error to remain, or to be effaced by scratching it out.
80. That clearance certificate is not forthcoming—Mr. Manton said it was lost or destroyed? Yes, destroyed.
81. You signed a second? Yes.
82. Where is that? I do not know.
83. You are quite sure you signed it? Yes; I signed one on the third.
84. And this now before the Board, purporting to be that document, is not that document? My signature is not on this document; the stores were filled in in the document I signed.
85. In the document you signed the stores were filled in—here it is said, stores "Nil"? Yes, that is filled in in "Nil."
86. When these clearance papers are signed by you are they given to the captain? No, to the agent.
87. Then the agent takes them? And gets entry from Mr. Manton for all the outward cargo, and then he copies them into the manifest; it is filled up by the agent, and Mr. Manton sees that it corresponds with the back of the entry.
88. After you sign the content outwards you hand the paper to the agent, who then fills it with the goods going to leave the port, and afterwards the captain makes the declaration? Mr. Manton signs at the bottom first.*
89. Then the captain makes the declaration in the presence of Mr. Maddocks, or of the clearing clerk? Yes, or whoever is acting for him, and then the clearance is made out for the vessel.
90. What does that clearance state? The clearance states on the face of it the whole of the bonded goods shipped, the bond mark, the number of gallons, and so forth; not the free goods, only the bonded and drawback goods.
91. Who gives that clearance to the captain? Mr. Manton; but the clearances are generally signed, if the Collector is in the way, by the Collector himself.
92. Where are they generally signed? In the Collector's room; in his absence Mr. Maddocks signs them; or, if he is very busy, the clearing clerk.

Mr. Thomas
Fancourt.
1 Nov., 1858.

* Initials at the bottom under the cargo, and also under the stores, if any from bond. This is a proof to the gentleman who takes the declaration that all is correct, and nothing more can be added afterwards without fresh initials.

- Mr. Thomas Fancourt. 93. Are they ever signed on board the vessel? They are signed on board steamers on Saturday afternoons, or late in the evening.
94. Is it usual to sign them on board? Yes.
- 1 Nov., 1858. 95. Is it usual to sign them on board other vessels? No.
96. Then it would be irregular if Mr. Manton signed a clearance on board? It has been very seldom, if ever, done. If a captain had not a mate on board, and could not come to the office, at the last moment, perhaps, a clerk might go down and take his declaration.
97. The "Louisa" returned to port the second week in October, and was reported inward to you? Yes.
98. Had you all the papers you required? Yes, with the exception of the Post Office certificate.
99. Have you ever had that since? No. I sent a messenger to the captain† ten minutes after the vessel had reported, and when he returned he said the captain had gone up about it.
100. Did you jerk the outward papers? She had nothing on board; she came in in ballast. The only document deficient was the Post Office certificate.
101. The only document that came back was the clearance from New Caledonia? Yes.
102. Had you the usual rummage certificate from the tide-surveyor on that occasion? No; I did not know she had cleared till I went down the next morning.
103. On the occasion of the "Louisa" coming back the second time what was the date? The 7th October.
104. When did she enter inwards? That was the date.
105. At what time? About half-past three o'clock in the afternoon.
106. She came in here at what hour? I do not know.
107. When did she clear out again? She cleared out the same day.
108. At what time? I do not know at what time she cleared out.
109. By looking at that (*handing the inward report*) can you tell? She reported at half-past three. I cannot tell at what time she cleared out; but she had not cleared out when I left at 4-10. "Without any rummage certificate or Post Office certificate." That is my memorandum.
110. The tide-surveyor, as I understand you, did not give you a rummage certificate on that occasion? No; I had no rummage certificate.
111. Who was the tide-surveyor? Sometimes Mr. Bremer, sometimes Mr. Collier.
112. Can you say which officer was acting at this time? I cannot say.
113. Can you ascertain by referring? Yes.
114. Is it not required, in all cases, that these documents, the rummage and Post Office certificates, should be produced before a vessel is cleared outwards? Yes.
115. And to clear out without these papers is highly irregular? It is wrong.
116. Do you find that the work of the different officers passing through your hands is performed in a proper manner? I find a good many mistakes at times.
117. What do you mean by mistakes? Errors I find in going through the ships' books and papers; I find many discrepancies that I have to send back to the landing-waiter to get rectified.
118. Will you describe some of these discrepancies? In discharging a cargo of twenty or thirty thousand bags of sugar there may be errors in the addition of the weights sometimes.
119. Do you think ordinary precaution is taken to make out these papers correctly? Not always.
120. There is no negligence on the part of any of the officers whose work is checked by you? Yes, sometimes.
121. Have you ever met with any impediment in the performance of your duty, or noticed any irregularity you have thought necessary to bring under the notice of your superior officer? I have, on several occasions; for instance, I have sent down books to one or two landing-waiters with questions, and they have returned them without making any comments.
122. Would not that be rather a neglect of duty? Yes. I am authorised to do a particular duty, and if anything appears to be wrong I have to inquire into it.
123. And when you have done so the parties whom you have addressed have not taken notice of your questions? No, not all of them.
124. Then they did not properly perform their duty? But I took care that it was done.
125. Then, in many cases they have been negligent? Yes; that was negligence, certainly.
126. Is there any other irregularity you have noticed? No.
127. Have you had to bring irregularities of that or of any other character under the notice of your superior officer? Yes, of Mr. Garling.
128. What particular irregularities? Those I have referred to—where there has been an omission of duty on the part of the landing-waiter, and he has sent back his books without altering them.
129. Can you mention any particular landing-waiters? Mr. Hindmarsh and Mr. Passmore, particularly.
130. Did Mr. Garling pay any attention to your representation? No, he did not. He altered them himself in one or two instances.
131. Then he spoke to the officers themselves? He might have done, and they might have given him satisfaction, when they did not give it to me.
132. He did not tell you what action he had taken? He is my superior officer, and as long as he initials anything that is sufficient for me.
133. When you made these applications to him the correction was applied? Yes.
134. Have you found him, generally speaking, willing to support you in carrying out your duty? Not in all cases.
135. Can you mention a particular case in which you think he did not? There was a case a day or two ago with respect to some sugar, where he did not support me: I sent down a book

† To Mr. Stewart, the agent, not the captain.

book to a landing waiter to be corrected. He said it was right. I insisted it was wrong. He then took the book, found the calculations were wrong, and gave instructions that the book was to be altered or explained. It was referred by me to the Collector, and he gave the instructions.

Mr. Thomas Fancourt.
1 Nov., 1858.

- 136. As you wished? As I wished.
- 137. Are there any other cases where Mr. Garling did not support you in your duty? There are two or three cases, but I took no memoranda at the time.
- 138. You have no great complaints to make? No, no very serious complaint.
- 139. What do you think of the way in which the business of the department is carried on—is it carried on in a loose manner? In some cases. With respect to the export duty, I think the landing-waiters have had to sign documents that they knew nothing about. Export orders stating that certain goods have been shipped are signed by them when they know nothing about the matter.
- 140. Do you know why they have signed them? The practice was introduced by Mr. Barnes a great many years ago, and I think it was a very ridiculous thing; for the landing-waiters cannot see the goods that are shipped. The officers who go in charge ought to be decent, respectable, trustworthy men, and they should be responsible. How is a landing-waiter to know that a keg of tobacco has been taken out of Pollard's Bond, and shipped on board a vessel at Bradley's Head, when he is stationed at a wharf in Sydney?—How is he to know that it has not been put on board some coaster?
- 141. Have you any other fault to find with the department? The drawbacks, I think, are hardly satisfactory. I think the money should not be paid until a certificate is produced from the port of landing. If the vessel were going to Adelaide, Melbourne, or New Zealand, there would be a little delay certainly, but the inconvenience would be slight. Of course, if goods were going to the South Sea Islands, or any of those places, you could not get a certificate without a great deal of delay; but an officer should go in charge of goods to the vessels in those cases.
- 142. Are you at all conversant with the practice at home—do you know whether a cancelling certificate is required for goods shipped out of bond? The goods go in charge of an officer who has a pricking note; they are all conveyed in lighters, which are all licensed; and there are officers with every vessel at home. I have seen ships go up from Gravesend with four or five officers on board into the docks—in London they are very particular in the tide department; and I have known them to have two officers on board even in the docks, where they are so very strict. They remain on board till the ships are finally discharged.
- 143. Do they when goods are shipped from a bonded store, before the bond is discharged require a cancelling certificate in England? I do not know.
- 144. Is there anything else you have to notice with respect to the loose manner in which the business is carried on? No, I do not know of anything. I think the ship's stores should be all placed under seal as soon after a vessel arrives as possible.
- 145. For what object would you put them under seal? So that they should not have the use of them.
- 146. Are not ships' stores sealed up when ships come in? No. It would be almost impossible when a ship comes in here for a tide-surveyor to see what were the ship's stores, but after a certain time they should be put under seal, and served out by the tide-surveyor a little at a time, say once a week, and then sealed up again until his next visit; this is the method in England, and works well; there is no fear of stores being taken on shore then.
- 147. Does the tide department come much under your notice? No; all I have to do with the tide is to receive the rummage certificate and tide-waiters' books.
- 148. Then you cannot form an opinion whether the duties of that department are performed properly or not? No.
- 149. You have no reason to complain of irregularity in that department? No, not under existing practice.
- 150. Who is the senior tide-surveyor? Mr. Bremer.
- 151. Do you think he is competent to perform his duties? I should not like to say.
- 152. Have you ever seen him tipsy? No.
- 153. Have you ever seen him incapable to discharge his duty? No; he is an out-door man, and I see very little of him.
- 154. You are a check upon him in a certain way? I check his duties—that is for rummage of stores.
- 155. Then you are in a position to say whether he is competent to fulfil his duty? I mean that I do not see him.
- 156. You check his work? I check his work where a rummage is given.
- 157. Is he competent to discharge his duty? I should hardly like to answer that question.
- 158. Does he satisfactorily discharge the duty that comes under your notice? He always has done so.
- 159. Do you think he discharges the duty that comes before you faithfully and efficiently? I think he does.
- 160. You would not like to give an opinion with regard to his efficiency? No, I should not, for I have little to do with him further than the rummage certificate is concerned.
- 161. Are not your duties of a most important character, as a check upon the whole working of the landing department? Yes.
- 162. In fact every vessel going out has her papers passed through you to the Collector? Yes; the papers are examined by me first.
- 163. By Mr. M'Levie: Did you know after the "Louisa" sailed that she had cleared without your certificate? Yes, I knew after.
- 164. Did you bring that fact to the notice of the Collector? Yes, I did, the next day.
- 165. She cleared without going through the proper forms? Yes, without the rummage certificate.

Mr. Thomas
Fancourt.

1 Nov., 1858.

166. Do you know whether any steps were taken in the matter by the Collector? No, I do not.
167. You said, in answer to a previous question by the Chairman, that you frequently discovered mistakes in the accounts brought before you? Yes, in the landing-books.
168. Can you say whether these errors are made frequently in favor of the importer, or whether they are in favor of the revenue? I cannot say. Sometimes we have errors in one way, sometimes in the other. I have kept no account of that. I should not like to say whether the balance is in favor of one or of the other.
169. Did any of these mistakes ever appear to you to be of a suspicious character? No, I have no reason to say that.
170. With respect to the men employed as export officers, how is that duty taken—is it performed by supernumeraries as well as by those on the establishment? There are four men employed in that duty.
171. Is it confined to those four men? When we are very busy extra tide-waiters are taken on.
172. Do you think this class of men should be entrusted with such important business? Some of them might.
173. As a class? I think so. There are some very decent men among the extra tide-waiters; but I should not like to speak for all.
174. Are there any of them of a class you would not like to trust with so important a duty? Yes, there are many of them.
175. You know them to be employed in that duty? They take their turn, but there are four permanent men.
176. Do you not think it would be a check upon the out-door officers if they were compelled to wear an uniform? They do at home.
177. Do you not think it would be a check upon their conduct here? Yes, it might.
178. Particularly these men who are employed as export officers? I do not think the extra tide-waiters are put upon a proper footing—they have nothing to depend upon but what they earn when they are employed, and then they are paid by the day. At home they are put into classes, and receive certain salaries, and then are paid by the day when they are employed. I think there are three classes—the first receiving £50 a-year, the second £40, and the third £30; and I think that is the fairest way. When I was an extra tide-waiter I was sometimes for seven or eight weeks without earning a penny-piece. At home, too, the tide-waiters are put on board vessels by the Customs boats; here they sometimes have to pay as much as three or four shillings to be put on board a ship.
179. *By Mr. Browne:* You were speaking about the irregularity in the payment of drawback of goods exported—has it ever come under your notice that goods upon which drawback has been claimed have never paid duty at all? I never heard anything of the sort; I do not say there is any irregularity as far as the drawback is concerned; but I think it would be a better system to have a certificate signed by the Collector of Customs at the port of discharge before the money is paid.
180. Upon the last occasion of the "Fanny Fisher" coming in here with sugar, was all her cargo discharged correctly? There was a good deal of trouble over that. I do not know what voyage it was. The tide-waiter on board of her had two sets of books to make out; they were both wrong, and he was dismissed.
181. Was there not an actual deficiency of thirty-seven tons, which never paid duty? I never heard; it was all arranged to the satisfaction of the Collector.
182. What was the error in the books? The tide-waiter's books did not correspond with the cargo.
183. Was it a deficiency? It was short, if I remember rightly; I know there was a good deal of trouble and bother with that vessel.
184. Do you know the name of the tide-waiter? Alder. I know the Collector dismissed him instantly. What the error was I do not recollect, but I know it was settled to the Collector's satisfaction. I think I made a memorandum to that effect in the books.
185. You say when the "Louisa" came in on the 7th October she did not enter inwards till about half-past three in the afternoon? I think about that.
186. Is not that unusually late? I have taken them up as late as four. I give every facility possible to the public.
187. After the vessel had left the harbour in the previous month, was not some suspicion entertained by you, and among other officers? Yes, there was. I heard it first from Mr. Collier. I was going down stairs when Mr. Collier asked me if the "Louisa" had cleared out. I said, No; I had signed the papers, but Mr. Stewart had told me she was not going to clear out that day. I went and found she had cleared.
188. Were you aware when she made her entry at half-past three o'clock on the 7th that she had actually been in port from the night of the 6th? No, I was not aware of that.
189. You were not called upon to sign an outward clearance on her content that day? No.
190. He never asked for that? No. That is the inward report (*handing in a paper.*)
191. When that inward report was brought to you, there was no rummage certificate attached to it? No, for the vessel was entering then.
192. Would you have cleared out that vessel without a rummage certificate? Vessels have cleared out sometimes without a rummage certificate.
193. Under the peculiarly suspicious circumstances connected with this vessel, would you have cleared her without a rummage certificate? I would not have cleared her without a rummage certificate, for I had not the Post Office certificate.
194. Has Mr. Manton instructions to clear vessels after dark? That I cannot say.
195. Is it at home customary to clear foreign vessels after hours? I do not think it is. At London I have known steamers to be cleared at ten or eleven o'clock at night, but I will not be certain about other vessels.

197. Does Mr. Manton receive extra pay for clearing vessels? If he stops after hours he is paid.

198. Is there any scale of fees? I think not. I think it is just left to the generosity of the parties. I think he receives 7s. 6d. on Saturdays from the steamers for clearing them.

199. Why did you refuse to sign the document that was brought to you on the morning of the 3rd September? I did sign the document on the 3rd September. I said I had signed one the day before; he said that was destroyed, and I then signed another.

200. This one produced is not the one? My name would be attached if it were.

201. You say you were employed in the St. Catherine's Docks Office? Yes.

202. Did not the Dock Office perform all the Customs duties appertaining to all vessels loading and discharging in the docks? Yes.

203. Would you, as a clerk in the docks, become conversant with the way in which Custom House business in the Port of London was managed? I should with the out-door duty, but not the in-door duty.

204. Where have you gained your experience as to the system to be adopted in this Colony? I have known a good deal of the system at home, having been in the docks so many years. My father was in the London Docks and St. Catherine's for fifty years.

205. Are there any printed rules in this Colony for the guidance of the in-door or out-door officers? I have never seen any.

206. You act merely by the usual routine which you found in force when you came into the department? Yes.

207. You have nothing to guide you as to whether you are exceeding your duty or not? We have got no rules at all. At home there are rules for the landing-waiters, clerks, tide-waiters, and all sorts.

208. You said, in answer to Captain McLerie, that of the extra export officers some were people of reputable character, and some were not so—not trustworthy? Some of them are very old men. I did not say they were not trustworthy. I know nothing of their private characters.

209. What do you think of the permanent officers—are they any better? They do not come under my eye at all. I should not like to say anything about them.

210. Is there much drunkenness in the Customs Department? I do not know of any in-doors. I do not know what there is out.

211. Having been connected with the landing of goods for many years, do you think one officer could possibly remove and see on board one vessel in the course of a day the number of packages enumerated in that content? No; I know I could not; I am satisfied of that; I do not believe it is possible.

212. What is your impression with regard to this affair altogether—do you think these goods were ever put on board? I should not like to say either one way or the other. I am quite satisfied one officer could never see them put on board in one day.

213. Is Mr. Manton the proper officer that takes these warrants when they are first presented? No.

214. Before these warrants are taken by him is any process gone through in the presence of the warehouse-keeper or any other officer of the department? They go to the warehouse-keeper, Mr. Nash; he sees that they correspond with his book, and puts his initials to them; then they go to Mr. Maddocks, who receives the bonds for his signature to be attached to them.

215. Then, when he has taken the bonds and initialled them — ? Then he is at liberty to number them and sign his name.

216. Who numbers them? They are numbered by Mr. Manton, and signed by him.

217. On being signed? They go to Mr. Nash. One copy is retained in the Long Room, and three copies go down to Mr. Nash, one of which he retains in his own room, and two are sent by the export officer to ship the goods—one he brings back and gives to Mr. Nash, and the other goes to the clearing clerk.

218. They are made out in quadruplicate? Yes.

219. Would the warehouse-keeper be justified in issuing an order to the locker to discharge goods from bond unless he saw Mr. Maddocks' signature to these? He might not notice that, seeing that they were signed by the clerk. If they were signed by Mr. Manton that would be satisfaction for him, for Mr. Manton is the responsible party, therefore Mr. Nash would have nothing to do with that.

220. When the papers come back to Mr. Nash are they expected to be completed on the back the same as we now see them? Yes. They are delivered over to the officer, who gets them signed by the mate; he then signs them himself, then the landing-waiter signs (which I think is very foolish), then they come back to Mr. Nash, and one goes to Mr. Garling, for the landing-waiter to sign, and then he sends them in to Mr. Manton.

221. Mr. Garling's duty, I believe, is to supervise all the out-door duty—would that be the first time that he would become cognizant of goods being exported, when the document was brought back in this complete form? Mr. Garling would not know anything about the export entries at all.

222. You say one copy comes back to him? They are made up with his entries.

223. Did you not say one comes back to Mr. Garling? They are made up with his day's entries.

224. He would not know about these goods being exported, unless he checked them the next day? He does not check them.

225. Who does check them? Mr. Manton.

226. If Mr. Manton thought proper to be corrupt he could, in conjunction with the export officer, pass anything out of the port without any other officer knowing anything about it? It could be done.

227. Is it usual for parties shipping bonded goods to acquaint Mr. Garling that they are about to do so? Not bonding goods—drawback goods. I think where vessels are taking in

- Mr. Thomas Fancourt.
1 Nov., 1858.
- large quantities of bonded goods there ought to be an officer on board to enter them in a book as they are shipped.
228. Do you not think that officer should follow the vessel out of port? Yes, he ought to see her out.
229. Is that ever done? It has not been done lately.
230. Who is the last officer of Customs that leaves a vessel going out of port? The tide-surveyor, because he rummages the vessel as to her quantity of stores.
231. Where does he leave the vessel? Alongside the wharf, or it may be in the stream.
232. Does he never follow her out to sea? No.
233. Then there is apparently no difficulty in landing goods after the tide-waiter leaves? No.
234. Under present arrangements a vessel might land goods at any part of the harbour after dark? It might be done with the greatest ease.
235. *By Mr. Browne*: Who appoints the tide-waiter to the ship? The tide-surveyor.
236. Is that discretion left in the hands of the tide-surveyor or Mr. Garling? The tide-surveyor or Mr. Garling appoints the landing-waiter to the different vessels, and the placing of officers on board ship is the tide-surveyor's duty. I think officers ought to be placed on board all these export ships; that would be a check. He should keep a book in which should be entered all the goods put on board, and if that book were to go to the clearing clerk he would see that everything was accounted for in the book.
237. Do you know whether the "Louisa" was boarded on the day after arrival, on the 7th? That I cannot tell.
238. Who produced that paper to you? Mr. Stewart, the agent.
239. You admitted her inwards without the Post Office certificate? Yes; he was to get it that afternoon. I sent a messenger, and he brought word that the captain had gone up for it; but I have never seen it.
240. *By the Chairman*: Is a vessel generally entered in the same day she arrives? Generally within twenty-four hours, sometimes a little over.
241. Is she boarded directly she arrives? Yes, by the tide-surveyor.
242. Where is she boarded? Perhaps at Bradley's Head, or off the Cove.
243. If she comes in at night when is she boarded? Not till morning.
244. Then she could land goods all night? There is no one to check it; no officer is appointed for night duty; there is no coast guard; there used to be at Watson's Bay, but that was done away.
245. *By Mr. Browne*: The actual clearance certificate which is attached to the content is a printed form with a seal? Yes.
246. Is a duplicate of that kept in the Custom House? Yes; we have a declared copy; it is the duplicate that is sent away.
247. Where is the original of this? This is the original; this is the clearance.
248. Is there no duplicate certificate of clearance retained in the Custom House but merely the content? Yes.
249. Are they allowed to be put away in that slovenly manner? They ought to be made fast with a piece of tape or twine.
250. Whose duty would that be? These papers, after Mr. Manton is done with them, go to Mr. Mowle, the clerk who takes the entry for drawback, and he makes the entry at last. I dare say these have been cut adrift, and had out for use; they are always made up, or should be.
251. Is it usual for the landing-waiters to sign the certificates of goods exported in any other beat than the particular beat to which they are appointed? Sometimes they do.
252. Would it be correct for an officer stationed at Walker's Wharf to sign a certificate of goods shipped at the Grafton Wharf? It would not be correct—at least I do not see that there would be any offence; as it is a useless practice altogether, the officer who ships the goods should be held responsible.
253. Do you think any landing-waiter having his senses about him would sign certificates in this wholesale way? He is obliged to sign it. It was introduced by Mr. Barnes.
254. Do you mean that Mr. Bramwell was obliged to sign this without knowing anything about the goods? It is the order; it is a complete farce; the officer who goes in charge is the responsible party.
255. *By Captain M'Levie*: You know the Chilian Bonded Store? Yes.
256. Who are the proprietors of it? Mr. William Stewart, I think.
257. Have you ever heard of any person else being connected with that store? No, never.

Mr. Frederick Garling called in and examined:—

- Mr. Frederick Garling.
1 Nov., 1858.
1. *By the Chairman*: What is your office in the Customs? Landing Surveyor.
2. What is your duty? To superintend the out-door department, to keep a check on the daily receipts and collections, and generally to supervise the out-door officers.
3. You say you keep a check on the daily receipts—what sort of supervision do you exercise? I have copies of the day's warrants and see that they balance with the cash received the day before. I have one set of the entries given to me, and see that the duties agree with the cash received and put to the credit of the Government by the cashier.
4. You control the out-door business, do you? Yes.
5. To whom do you account for the out-door business? To no one but the Collector; he is my superior officer, as head of the department.
6. What officers have you under you? More particularly the landing-waiters.
7. How many? There are nine.
8. Have you any others under you? All the out-door officers generally. They are all under me, inasmuch as I am second officer in the department.

9. Would the tide-surveyors be under you? Yes.
10. Are they under your orders? Yes.
11. Bound to obey you? Yes—though their duties are distinct from mine, they having the immediate supervision of the tide-waiters, boarding and measuring vessels, &c.
12. Is the Inspector of Warehouses under you also? Since his appointment, which is a new one, I have never interfered with that branch of the business.
13. Does he receive orders from you? I consider he is bound to do so.
14. Is it definitely understood? No, it is not.
15. The tide-surveyors, Mr Collier and Mr. Bremer, are under you? Yes—though, as I have said before, their duties and mine are distinct.
16. They have boatmen under them? Yes, they are immediately under them, and the tide-waiters also.
17. Does the tide-surveyor report to you, or straight to the Collector? Straight to the Collector.
18. He can communicate with the Collector without going through you? Yes.
19. Are you employed to discharge any other duties besides out-door duty and that of checking the accounts? Nothing particularly.
20. In checking the accounts of collection do you point out mistakes to the Collector, or report to the Government? To the cashier. If I find any alteration required, I compare them with his books to see where the entry is wrong.
21. Do you certify to the accounts at all—is your certificate required at the Audit Office? Yes, I suppose so; I always have certified, but I have never received any orders from the Colonial Government since the department was handed over to them. We had printed instructions from the Board of Customs at Home, which we have acted up to as far as the work will admit of it.
22. Have you a copy of these printed instructions? No.
23. Can you supply them? Yes.
24. Will you be good enough to supply them to-morrow? Yes. In fact all the officers, excepting, I think, the tide-waiters, had printed instructions from the Board.
25. Do you report your acts in the exercise of your duty to the Collector at all? No, I cannot say I do.
26. How does the Collector exercise any control over your out-door duty? He never does; but there are many points arise which we have to discuss and arrange together.
27. Does he know anything of what you do? Yes; I suppose he must be aware that the duties are carried out according to our instructions.
28. How does he know if you do not report? We make no daily report, I mean.
29. How would your conduct in the discharge of your duty come under his notice? Unless reported officially I do not suppose it would in any way.
30. Is he at all cognizant of what you do out of doors? No.
31. Do you make any return to him? Only of the stations of the different officers, so that if he wants any information he knows where each officer is stationed.
32. You do not make any return of the amount of business done in the week or day? No.
33. There is no official record of what you do? No.
34. In fact you act independently of the Collector? Out of doors I may say I do.
35. Do you remember the clearance of the "Louisa" on the 2nd September? No. As I said before, I have no supervision over the in-door department; there are none but clerks in-doors.
36. You remember the fact that the "Louisa" was cleared on the 2nd September? Yes.
37. Was there anything unusual about the clearance that led you to examine the outward papers? No. I saw the outward papers some days afterwards. The only unusual thing was the hurry in which it was done, being all done in one day; that was unusual; but in case of emergency it may be done.
38. You mean issuing all these bonded goods from the store, putting them on board, and clearing on the same day? Yes; it was very unusual.
39. Did you examine the clearing papers? No.
40. Are these the clearing papers? (*Referring to the papers of the "Louisa" before the Board*) Yes.
41. I want you to examine them, and ascertain whether there were not issued that day from the store for the "Louisa" as many as 296 packages of dutiable goods? I have a memorandum of the goods, and, from what I understand, the whole of them were not shipped upon that particular day. I make three hundred packages; and, from my experience of dray loads, I take them to be thirty-four dray loads. (*The witness handed in the memorandum referred to.*)
42. Do you think it possible that that quantity of goods could be put on board on the same day? I think they could, but I almost doubt whether they could by one officer, coming from different stores. If they all came from one store I can imagine that it might be done.
43. If they all came from one store do you think they could have been put on board by one officer in one day? I think so. I do not know how many drays were on. Personally I had no superintendence in this particular case.
44. How many years have you been in the discharge of your present duties? About ten years as landing-surveyor, but I joined the department as landing-waiter in 1827.
45. You have had pretty good experience of how many loads a given quantity of goods will make? Yes.
46. You think it impossible that goods amounting to three hundred packages, or thirty-four dray loads, should be issued from five different stores and put on board a vessel in one day? I have my doubts; I think it very improbable; it would depend a great deal on the number of drays.
47. Assuming that thirty-four drays were employed, do you think they could have been loaded

Mr. Frederick
Garling.

1 Nov., 1858.

- Mr. Frederick
Garling.
1 Nov., 1858.
- loaded by one officer in one day? I have my doubts about it, but I cannot say, because I do not know the number of drays employed.
48. Do you think all this business could have been done, in addition to the passing of the usual entries and going through the other routine which is necessary before goods issue from a store? Yes, decidedly, because all this business is done when they enter the goods outwards.
49. Is there not a routine of business that will take some time? Yes.
50. Is it possible, when there is this routine business to get through, and export warrants to be made out, added to the work done by these drays, that all that could be done in one day? Yes.
51. Could one export officer have carried out the whole of this business of shipping these goods, and in addition have obtained these export warrants from the Custom House? Yes.*
52. I think you said just now the drays could not have been loaded? I do not think they could, but I think the warrants could have been issued in one day.
53. Could the two duties have been performed by one man in one day? I doubt it. The papers do not necessarily come before me.
54. Did you examine the outward papers on this occasion? I have seen them once since.
55. Were they in proper form, and all the requirements of the Customs complied with? Yes.
56. Is the signature of the jerker to them? That is in-doors; I am not conversant with the routine in-doors.
57. Is it not your duty to check the out-door business? Yes. This did not come before me in any way.†
58. You had no check upon the clearance? No.
59. And yet you superintend the whole business of the out-door department? Yes; but the preparation of the clearance papers is part of the in-door work.
60. At the same time that some of your officers discharge duties and you know nothing about it? There is something more to —
61. Will you answer my question—you told me you were responsible for the whole of the out-door business, and yet some of your officers discharge duties and you know nothing about it? They do, as far as signing these documents as to the goods being shipped; but they themselves cannot know it. The landing-waiter cannot possibly, or very seldom, see them shipped, and he signs what he does not know of. It is one of the forms introduced by the Inspector General when he came here, to carry out, as far as possible, the London practice.
62. Does the officer, in shipping goods, discharge duties of which you know nothing? His signing these warrants —
63. Of which you are never informed? No.
64. Does it ever come under your notice? No.
65. In discharging these duties with whom do they co-operate? The shipping officers—the mate or captain of the ship, who gives a receipt.
66. Who checks that duty, do you? No; but without these receipts the clerk will not clear the vessel when the papers are brought to him.
67. Then virtually there are some of the officers under you who act independently of you? The only way they do so is in signing these entries.
68. The export officers are under your superintendence, are they not? Yes.
69. Are you informed whenever they are employed? No; the tide-surveyor puts them on duty; it is his duty.
70. The tide-surveyor is under you? Yes.
71. Are the export officers under the tide-surveyor in looking after the goods? Yes, in their capacity as export officers.
72. Does the tide-surveyor name an export officer to carry a certain amount of goods to a ship? Yes. In this case the export officer ought to have informed the tide-surveyor of all he had to do, and then he would have placed an officer on board.
73. Who issues the export warrant to the export officer? The warehouse-keeper. When he gets this warrant he (the tide-waiter) ought to send word to the tide-surveyor; but in this case the export officer undertook to do this without giving him notice.
74. Did you examine these papers on the 3rd September? I do not think it was the 3rd. I have seen them once since, but they do not generally come under my notice.
75. On the day after the sailing of the "Louisa" did you examine them? I do not think it was the following day; I know I have seen them once.
76. When you examined these papers were they signed, and the proper declarations taken? They were just in the state they are in now.
77. Were you apprised of the fact of so large a quantity of goods being about to be shipped in a vessel for the South Sea Islands? No, I was not.
78. Is it not usual to acquaint you? No. The shipping officer ought to have acquainted the tide-surveyor more particularly, because with an excessive quantity like this we put an officer on board, and retain him till the ship is outside the Heads; but he omitted to do so in this case.
79. It is not usual to acquaint you? No.
80. Mr. Nash does not think it necessary to communicate with you, who are the head of the out-door department, when he wants to communicate with the export officers? No; it would be useless and unnecessary, and impede public business, as my duties take me away from the office nearly all day.
81. He communicates directly with one of your subordinates? Yes; he gives the goods to the export officers.
82. Who names the export officers to do any duty? We have four officers, and the ware-
house-

* I have already said that I think not.

† Nor is it necessary for these papers to come before me in any way.

- house-keeper gives them to any one that is unemployed; and if there is none, he acquaints the tide-surveyor, who puts the first officer on that is for duty.
83. Then it depends upon the export officer or tide-waiter whether he asks for further assistance in shipping goods or not? Yes.
84. You do not know that goods are going to be shipped? Yes; if applied to for an officer to accompany them.
85. Does the tide-surveyor know what goods are going to be shipped? No; unless he is informed by the export officer.
86. Unless informed by his subordinate? Yes.
87. When the "Louisa" returned to port, was it not stated that it was in consequence of the mate having died at sea? Yes; so I have understood.
88. Have you any means of knowing whether that was the fact? I have no means at all of forming an opinion on that point.
89. Have you examined at any time, or caused to be examined, the books of the storekeeper at Walker's Bond? No; the Inspector of Warehouses is in charge of that branch.
90. It is not your duty to examine the books? Not since his appointment.
91. Had you taken upon yourself to examine them before Mr. Still was appointed? Yes.
92. What is your general opinion of the way in which they are kept? I have always found them correct when stock is taken.
93. How often is stock taken in these warehouses? I do not know how often Mr. Still takes it.
94. How often used it to be taken? About once a year.
95. With respect to the store books at Walker's Bond, did you ever examine them? I have not done so for some time.
96. Did you ever examine them and find anything irregular? No.
97. Did you not, on the 26th of October, examine them to discover a supposed irregularity in the export of cigars per "Chectah" in March last? No; I have not been there.
98. Did you ever order them to be examined? I do not recollect at this moment. I think I have some recollection of what you refer to. Mr. Brown, who was a locker, said there was a discrepancy; I did not go myself, but I referred to the books in Mr. Nash's room, and found that Mr. Brown was wrong; I found that the date was correct, and that the delivery was on the day the locker made it.
99. What is the rule with respect to boarding vessels inward—where are they generally boarded? Generally off the Fort.
100. Whose duty is it to look out for vessels? The tide-surveyor's.
101. Does he send a tide-waiter on board? Yes.
102. It is entirely in his department? Yes—boarding ships and putting officers on board.
103. Where are they boarded? I have nothing to do with that particular branch.
104. I thought you said the tide-waiters were under you—do you not control their movements in any way? Yes.
105. If a vessel came in at night would a tide-waiter be sent off at night? No, I do not think he would, except under particular circumstances.
106. When would that vessel be boarded? I fancy not till the following morning.
107. I suppose we shall get more of the detail of boarding vessels from the tide-surveyor? You will get it direct from him.
108. With respect to vessels leaving —? That is the tide-surveyor's duty.
109. Which tide-surveyor? They take it week about.
110. Is there any regulation existing respecting when vessels ought to be boarded coming in, and when they are to be left going out? No, I am not aware that there are.
111. Is there no regulation as to how far they should be accompanied by a tide-waiter? No.
112. Can you give the Board any information with respect to the certificates required to be furnished by vessels coming in and vessels going out? No; that is done in the Long Room; I have no supervision in the in-door branch.
113. What do you look after in your position as comptroller? I see that the landing-waiters do their duty, and check all their gauging.
114. You do not superintend the whole of the duty of the landing-waiters and tide-surveyors? Not the tide-surveyors. My instructions tell me to superintend the landing-waiters, check the gauging, and see to the examination of goods landing.
115. Do you exercise an entire check over the landing-waiters? Yes.
116. You know everything they do? Yes; I am round to the wharfs every day where vessels are discharging.
117. You can give the Board no information about rummaging certificates or clearance? No; that is entirely the tide-surveyor's business.
118. Have you ever been employed in England in connection with the Customs? No. We have had instructions from home.
119. You cannot speak of the practice at home? No; I cannot say I have personally any knowledge of the London practice.
120. If an export officer and a locker combined together to cheat the revenue, could they do it? Yes, I think they could.
121. Do you exercise any check upon that? If an officer choose to be dishonest, I do not see how it is possible to check it.
122. Is there no means of checking collusion between the export officer and the locker, in the in-door department? I do not know that there is.
123. Do you remember the "Fanny Fisher" coming in here in January last? She has been here so often that I cannot say.
124. With a cargo of sugar? She always brought sugar.
125. In the case when Alder was put on board as tide-waiter—do you remember that? Yes, I think so. He has misbehaved on board so many vessels that I cannot remember that particular occasion.

Mr. Frederick
Garling.
1 Nov., 1858.

- Mr. Frederick Garling.
1 Nov., 1858.
126. Do you remember a case where there was a great discrepancy? There always was in every ship he was put on board of, and I was very glad when I got rid of him.
127. Have you any record with respect to the bad behaviour of Mr. Alder on this occasion—you say he misbehaved himself? When I said he misbehaved, it was because he never could be depended upon.
128. What steps did you take? I reported him to the Collector, and he was dismissed.
129. He was not dismissed every time? He was dismissed and put on duty again on account of some one interceding for him, and afterwards he was finally dismissed.
130. Is there any record of his dismissal? I think the tide-surveyor would have it.
131. It is your business you say to look after the tide-waiters—would you report it, or the tide-surveyor? In this case I think I did.
132. Do you recollect reporting this case? I cannot say in this particular instance, for that vessel has been here so often.
133. Could you, by referring to papers, bring to memory the circumstances of Mr. Alder's case? I think I could.
134. Do you remember that at any time there was a large deficiency of sugar—thirty-one tons of sugar supposed to have been taken away from the "Fanny Fisher"—and no record made in Mr. Alder's book of the circumstance? I do not remember it at this moment.
135. Do these circumstances occur so frequently that you cannot remember them? Not such a discrepancy as that.
136. Do you remember what step was taken on the occasion by Colonel Gibbes with a view to obtain a correct account? I have not a recollection of that particular case.
137. Was any person prosecuted on that occasion for the removal of the goods? I do not remember; I think I should have remembered if it had been so.
138. Surely an important discrepancy like this is not easily forgotten—it ought to impress itself upon your mind, ought it not? Yes; but at this moment I cannot recollect what steps were taken, nor can I remember whether it was for that Alder was dismissed.
139. Do you remember that a merchant did take away more than thirty tons of sugar from the "Fanny Fisher" without paying duty? I cannot remember at this moment.
140. Would Mr. Fancourt refresh your memory on the subject? Yes, I suppose he would, for he jerks these books.
141. Do you remember the occasion of Mr. Alder being dismissed? At this moment I cannot recollect what it was for.
142. The tide-waiter keeps a book of this sort (*handing a book to witness*) does he not, on board? Yes.
143. Who checks it? He delivers it to Mr. Fancourt, and he jerks it.
144. Mr. Fancourt would find out his error? Yes.
145. What is the landing-waiter's duty? He takes the weights, and adds them up, to see if they are correct; and the final jerking is done by Mr. Fancourt—that is his particular duty.
146. Who was the landing-waiter on this particular occasion—could you tell by the look of the book? The landing-waiter's book is endorsed on the outside. (*The witness referred to the book.*) This is Mr. Warburton's.
147. Is not the landing-waiter directly responsible for the landing of the cargo? No; the tide-waiter and landing-waiter here do the gauging; in England they do not; here it is nearly their principal duty. There are gaugers in England.
148. The whole collection of the revenue for imported dutiable dry goods is dependent upon the honesty of the tide-waiter? Yes, such as coffee and sugar; but tobacco, cigars, wine, and spirits, the landing-waiters have to do.
149. *By Mr. Browne:* You say that the landing-waiters are liable for the correctness of all dutiable goods, such as tobacco, spirits, and —? Tobacco, cigars, and spirits are under his immediate superintendence, but the sugars he cannot attend to.
150. Is tobacco weighed at the wharf before it goes into bond? Generally, if the scales can be depended upon.
151. Has it not more often to go into store without being weighed? Then he goes to the store and does it there, instead of at the wharf. It is always advisable, when he can do it, to do it on the wharf.
152. Would a landing-waiter be authorised to sign export warrants for goods shipped at a wharf not in his own beat? Yes, for it is merely a form; they sign for what they do not, and cannot, see done.
153. There is a heavy duty now upon sugar, is there not—£5 a-ton? Yes.
154. Can you not charge your memory with the circumstances attending the case of the "Fanny Fisher"? I really cannot, of that particular case you refer to.
155. They so often occur, do they? Not such a one as that; but I really cannot remember the particular case.
156. Would not this (*the tide-waiter's book*) shew that there were 32 tons deficient? There seems to be a correction here of 32 tons 15 cwt. 7 lbs.
157. Would the Government lose that amount of duty? If these books were not jerked they would, but the object of jerking is to correct.
158. If in jerking the books there is found to be a deficiency of 32 tons of sugar, who would be made responsible for it—would the Government lose the duty on it? No; because it would be discovered in the jerking.
159. Who would be called upon to pay it? The importer, I suppose.
160. Supposing the importer were insolvent. Do you know whether the duty has ever been paid on that sugar? No; I am unprepared to answer without referring, but I could ascertain it on my return to the office.
161. You cannot remember such a large deficiency? I confess I do not at this particular moment.

162. Are there frequently discrepancies in weights in weighing sugar? Not anything like Mr. Frederick Garling that.
163. Was Mr. Alder a regular tide-waiter? No; he was one of the extra men, employed when he was wanted.
164. You are not aware of any prosecution having taken place against the person who landed this sugar without paying duty? No, I am not; I will refer when I return, but at present I cannot explain.
165. The Custom House does not open till nine o'clock? No.
166. At what time does it open for the entry of export goods—are they taken at once? Yes.
167. What length of time would it take to pass entries for these 296 packages, and to get the proper documents through till they reached the bonded warehouse-keeper? I should say it could be very soon done.
168. Has it not all to be checked in the warehouse-keeper's books? Yes.
169. Would not that take some time? Not a very long time.
170. Has not every separate shipment to be made upon different entries? Yes; all of which the parties may have prepared the previous day, and then they would merely have to be checked in the morning.
171. Supposing there were half-a-dozen, would not that take considerable time? It would, some little time.
172. If none of these goods were taken on board the vessel till after one o'clock, do you think between that time and the time it started it would be possible to put these goods on board? I should think it would not, if they were not taken down till after one o'clock.
173. *By Mr. McLerie:* The subordinate officers of the out-door department are under your control? The tide-waiters are more particularly under the tide-surveyor.
174. Then you are merely a link in the chain of responsibility? Yes.
175. Do you keep any record of any omission or inaccuracy on the part of these officers? No.
176. For offences that the Collector would not consider deserving dismissal is there no punishment by fine? Suspension for a few days, or a week, or deduction of pay for a time.
177. For any trifling offence, such as being half-an-hour late for duty, does the Collector ever resort to the infliction of a fine? No, except mulcting a day's pay, which amounts to a fine.
178. There is no record kept of these offences and their punishment? I do not think there is; I am not sure.
179. Of officers under your control? These suspensions take place by the Collector.
180. If you bring the offence of any officer under you under the notice of the Collector, is there no record kept? I am not aware that there is.

TUESDAY, 2 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.

J. M'LERIE, Esq.

Mr. Charles Smith.

Mr. Thomas Fancourt called in and further examined:—

1. *By Mr. Browne:* I think you told us yesterday that it is your duty to jerk the landing-waiter's blue landing books? Yes.
2. The books that come from the landing-waiters? Yes, the blue landing books.
3. Did you jerk the books of the "Fanny Fisher" on her arrival in the month of December? Yes.
4. When you examined those books did they come up as a matter of course after the vessel was discharged? Yes.
5. When you examined them did you discover any deficiency? I discovered a great number of errors.
6. Did you discover any deficiency? I cannot tell, for some of the tide-waiters' books—some of the former books—were destroyed. There were two sets of books given to the tide-waiter. I could not make head or tail of the tide-waiter's books; in fact the landing-waiter had to make out another book.
7. Was there any great discrepancy between what ought to have been discharged and what was discharged? I do not think there was any discrepancy. There were a great number of errors in the addition, as you will see. I think this is the first book (*examining the book*).
8. Will you refer to these warrants, and tell us what portion of the cargo was bonded and what portion duty was paid upon? The whole of it paid duty.
9. At once? At different times—ten tons, twenty tons, fifty tons, and so on.
10. What is the object of the hundred tons bond taken? I made a mistake here and turned over two entries for one. I see that 100 tons were for bond.
11. What was that for? 100 tons were for bond.
12. Is that the only lot for bond? Yes.
13. Who was that bonded by? Henry Fisher, in the Exchange warehouse.
14. Tell us what went into bond? 134 tons 16 cwt. 24 lbs. went into the Exchange Bond.
15. How could 134 tons go into bond when there were only 100 tons in the warrant? It does

Mr. Thomas Fancourt.

2 Nov., 1858.

- Mr. Thomas Fancourt. does not matter how much goes into bond, because it cannot be delivered out of bond without duty being paid.
- 2 Nov., 1868. 16. 134 tons went into bond on a warrant for 100 tons? Yes.
17. When was the post entry passed—was it after you had jerked the ship? Yes.
18. What was the object of the post entry? There was an entry passed for 20 tons, but instead of 20 tons being landed there were 54 tons 11 cwt. 3 qrs. 19 lbs. The entry for 20 tons was the last passed.
19. Who passed that entry for 20 tons? Mr. Fisher.
20. Who passed the entry for 34 tons? Mr. Robertson, of the bank.
21. Why was Mr. Robertson called upon to pay the post entry? I cannot tell that. It was paid through Church & Gifford, the agents.
22. Was it not discovered that these 34 tons had been removed without payment of duty; and was not the other cargo held back that belonged to Mr. Robertson, till the Government was satisfied with the duty on 34 tons? Not that I am aware of. It must have been done by the Collector.
23. Is it a common practice in jerking a sugar ship to find that where a warrant is issued for 20 tons, 54 tons have been issued? Frequently we have entries for 5 tons, and 10 tons are issued; that is the object of the post entry being issued. It is a very rare occurrence that so large a quantity is delivered before the duty is paid.
24. That discovery would not have been made till you jerked the ship? The landing-waiter ought to know that.
25. Did he report that? No, not till the books came in.
26. Was no discovery made till the books were jerked? No; the books were in such a dreadful state.
27. If you had not jerked the books correctly, would not the Government have lost to that amount? A great deal depends upon my jerking.
28. Supposing you had not checked them properly? The Government would have lost the duty.
29. *By the Chairman:* There is no check after you? No. A tide-waiter may make a mistake in his addition, and perhaps the landing-waiter does not go through the tide-waiter's books to make up his additions.
30. *By Mr Browne:* Who was the landing-waiter of that wharf? Mr. Warburton.
31. Does not Mr. Warburton keep a book of the discharge of the cargo? He cannot; a landing-waiter cannot stand at the ship's side.
32. Does he take no record of the discharge of ships? No; he takes it from the tide-waiter. It is the duty of the landing-waiter to see to the tide-waiter's book every night.
33. If the landing-waiter had done his duty, and seen the books you found so erroneous every night, could this fraud have occurred? There is no fraud, because the duty is paid.
34. Could that irregularity have occurred if the landing-waiter had looked through the books? No.
35. Were the mistakes so glaring as to be perceptible to you at once? The books will shew themselves. Where alterations have been made in the additions, the additions have been wrong.
36. Might not that be intentional? I do not suppose the man did it intentionally.
37. Was he not a drunkard? He was a terrible drunkard; he was dismissed.
38. Had he not been dismissed before and reinstated? I rather think he was; I will not be certain. At every page there is an error in the book.
39. Did Mr. Warburton, before that book came to you, make any official report to you, or did it come to your knowledge that this irregularity existed—or were you the first to discover it? I was the first to discover it.
40. With a grossly negligent landing-waiter any amount of fraud might be committed, provided the jerker did not strictly do his duty? Yes, because all these books pass through my hands; I am the last.
41. Is not the landing-waiter the officer primarily responsible—do not the warrants go to him? Yes.
42. Is he not primarily responsible for the due discharge of the ship's cargo? Yes.
43. Is it not his duty to examine the tide-waiters' books day by day? Yes; the books ought to be given into his hands at the end of the day. With a sugar cargo the book is more important than with a London cargo, in which there is a variety of goods.
44. Is it not his duty to initial it? It has never been done, but I dare say the practice had better be brought forward.
45. Is not the practice at home so? No, because there are perhaps a couple of tide-waiters with the ship, and the ships there discharge so rapidly that no one or two men could take an account of the cargo.
46. You do not know whether Mr. Fisher was called upon for any explanation as to the reason why he carted the sugar away to his own store? No.
47. Did you know he was in difficulties? I heard he was.
48. Had he not become insolvent when that post entry was passed? I should not like to answer that question, because I am not aware.
49. If these books had not come into your hands and been jerked by you, the Government would never have come into the receipt of £150? The Government might lose a great deal if the books were not jerked by me, for many of these men are not fit to discharge a cargo.
50. When you find a discrepancy of this kind to whom do you report it? To Mr. Garling; he is the head of the out-door staff.
51. Do you remember reporting this to Mr. Garling? Yes; and it was brought under the notice of the Collector. I was with the Collector several days before we could bring the thing to a proper state.

52. What was the necessity of being in with the Collector several days in a simple thing of that kind? Because he was particular in going through the ship's cargo and accounts. Mr. Fisher sent in his account, and there was our account. Mr. Thomas Fancourt.
53. Do you mean that Mr. Fisher denied that he had landed more than his proper quantity? I think he did. 2 Nov., 1858.
54. You were satisfied he had got more than his proper quantity? I really almost forget the circumstances now; it is twelve months ago, and it is almost impossible to charge one's memory. The books were in such a state that I took the precaution, after I had been with the Collector, to make this memorandum for my own safety. I should not like to speak positively as to what occurred twelve months ago.
55. Mr. Garling seemed to remember nothing about it? He must remember something of it, for he is the first person I go to with these matters; he is the head over the landing-waiters.
56. He distinctly told us he did not remember anything about it—he remembered the man being dismissed, but whether it was in consequence of this affair he could not tell? I remember having a great deal of bother over these books.
57. Mr. Robertson eventually passed this entry and completed it? Yes.
58. Whether he was coerced you do not know? That was through Mr. Gifford. I know nothing of those private matters. I think, if I remember right, that the first books of the tide-waiter were destroyed, for they could be made nothing of, they were in such a dreadful state.
59. Was not the process of sealing with a cord formerly adopted, so that no defacement, or erasure, or abstraction, should be made? So that no leaves should be taken out, they used to be stamped; there was a ship stamped on the corner.
60. How long has that course been broken through? Perhaps eighteen months or a couple of years. They had the same sort of books, and a seal stamped with sealing wax, and all the leaves were numbered and initialled. There is a great deal more difficulty with sugar ships than with others.
61. How much sugar did the "Fanny Fisher" actually enter inward with? 4,012 bags.
62. How many did she discharge? 4,010 bags were landed altogether; that makes 2 short, for which I issued this notice to the captain to account for them.
63. How many bags would there be in 34 tons? About 550 bags.
64. Those 550 bags would go away without payment of duty? Yes.
65. What really is the duty of the landing-waiter? The duty of the landing-waiter is to see that everything is landed according to the declared copy of the manifest sent to him.
66. *By the Chairman*: Speaking about the capacity of the tide-waiters to discharge this duty? A great many of them are useless; they cannot add up a dozen figures.
67. I see there are 27 tide-waiters—how many of them are useless? I dare say half of them; it gives me no end of trouble. In fact as to sugar-books I can't bear the sight of them.
68. Who has the appointment of the extra tide-waiters? I believe the Collector appoints them. I suppose, like most of the officials, he is bored to death by recommendations; I suppose they all have a fair share of worry in their way. It requires a good smart man to add up a sugar-book, especially to check them over afterwards in the state they are sent in. I have taken them home many a time and sat up till twelve o'clock at night to do them.
69. *By Captain M'Levie*: In reply to a question yesterday you said that on one occasion you did not receive that amount of assistance from Mr. Garling that you had a right to expect, with reference to a sugar account—was that in this case? No, that was in another case; that was all rectified. I never trouble the Collector if it is possible to do otherwise. I go to the head of the department outside, and it is his duty to insist upon the landing-waiters answering all questions sent to them.

Mr. James Collier called in and examined:—

1. *By the Chairman*: What position do you hold in the Customs? Second tide-surveyor. Mr. J. Collier.
2. What is your duty? To board ships, make out the reports, keep an import journal of the arrival of ships, lists of passengers, measure, rummage, and place tide-waiters on board ships and attend to them while on duty, and various other duties. 2 Nov., 1858.
3. Are you answerable for the unloading of goods liable to duty? No.
4. Are you answerable for goods not liable to duty? No; that comes under the supervision of the landing-waiters that have charge of the ships.
5. To whom are you responsible for the discharge of your duties? I expect to the Collector of Customs.
6. Directly, or through any other officer? Not through any other officer.
7. Does Mr. Garling exercise any control over you? No.
8. How do you inform the Collector of the duty you discharge? We have no way of informing him.
9. Your books are always open to his inspection? Yes.
10. Would they give him sufficient information? Yes.
11. Quite sufficient to enable him to see everything you had done? Yes.
12. Do you remember the clearance of the "Louisa" on the 2nd September? I know she was about to clear out on the 2nd, but on the 3rd I found she had cleared out.
13. Were you on duty on the 3rd, or was Mr. Bremer? We were both on duty.
14. Do you not take duty week about? Yes—that is in boarding.
15. You are on duty for other purposes? Yes; if he is boarding I may be measuring, rummaging, and so on; we merely take alternate weeks as far as boarding goes.
16. You say on the 3rd of September you heard the "Louisa" had cleared? Yes.
17. Did you hear she had cleared the night before? I think she was about to clear the night before, but I did not know what cargo she had.

- Mr. J. Collier. 18. Did you hear on the 3rd that she had cleared on the 2nd? Yes.
19. Did you examine the clearance papers? Yes.
- 2 Nov., 1848. 20. Was there anything unusual about the clearance that led you to examine her? I heard a report that she had gone out with a large quantity of spirits, and was induced to examine the clearance, which I found in Mr. Mowle's drawer, who examines the papers and documents connected with ship's clearance. I found that the usual declaration had not the clearing clerk's signature; the captain had signed it, but the clerk had not witnessed it.
21. Will you examine that paper—(*the content outward*)—if you look there you will see a signature to the declaration of the captain? Yes. It did not bear the signature of "C. H. Manton" at the time I saw it. I saw it on the morning of the 3rd September, between ten and eleven o'clock.
22. Could you say whether that was the particular paper you saw, without the signature? I would not swear to it.
23. Then that signature may have been added after the 3rd by Mr. Manton? Yes; and here are also his initials, which it did not bear at the time, if this is the document I saw; but I will not say it is.
24. When ought these initials to be put? These should have been put before the captain took his declaration; it should have been examined by the clearing clerk, and then the captain should sign and declare that that was a true statement of the cargo outward.
25. Then the content outward which you got from Mr. Mowle was irregularly executed? I should say so, for it should bear his signature.
26. It was no clearance at all? No. This should bear another signature, the signature of Mr. Fancourt, which I do not see to it.
27. The omission of that signature is highly irregular? It is; for without his signature we should not suppose it was a correct document. He puts his signature to these documents to shew that all entries were passed for the cargo inward, and that she was at liberty to clear; and without that a ship is not allowed to enter into a fresh manifest.
28. When you found that the document which you got into your hands from Mr. Mowle on the 3rd September was irregular, what steps did you take? I showed the documents to Mr. Garling. Afterwards I met the reporter of the *Herald*, and I asked him why he had not reported the cargo of the "Louisa" outward in the same way as that of the "Bella Vista" and two or three other vessels which had also cleared on the 2nd? He said he could not get the papers; he was then sent for the papers to Mr. Garling, and I have never seen them since.
29. Did Mr. Garling take any steps with regard to the papers you put in his hand? I am not aware that he did; I have not heard.
30. Are you aware whether the irregularities regarding the execution of that paper were ever brought to Colonel Gibbes' notice? I do not think they were, unless Mr. Garling has told him. The papers I know have been inquired for since that time, but I am not aware whether he told the Collector of Customs.
31. When the "Louisa" was about to clear out with so large a quantity of dutiable goods, was it not the duty of Mr. Nash, or some other officer of the in-door department, to warn you of it, in order that you might put an officer on board? It is the duty of the export officer to do so—the established tide-waiter.
32. The export officer in this case was Mr. Newton? Yes.
33. Did he inform you? No, he never came near me. I did not know she had taken a package of spirits until the next morning.
34. You did not know what was asserted to be on board the vessel until the day after she sailed? No.
35. Is it the general practice to put an officer on board when spirits are shipped? If she is going to the Islands, or is a suspicious ship. That is left to our discretion by the Collector, as we are visiting the ships.
36. Is it the duty of the export officer to inform you when spirits are shipped? Yes, they have invariably done so.
37. Mr. Newton's omission in this case was very extraordinary? Yes; for if he had acquainted me or Mr. Bremer that this quantity of spirits was going on board we should have been prepared.
38. By examination of the content, can you say the quantities shipped on the 2nd of September? Everything was shipped on that day, with the exception of 50 cases of claret, 4 half-tierces of tobacco, and 5 hogsheds of rum, which were shipped on the 27th of August.
39. According to a memorandum handed in by Mr. Garling, there were about 34 loads (*The Chairman handed the memorandum to the witness*)? That is my memorandum. As nearly as I can guess, there would be about three hogsheds to a load, and 25 cases would be a good load.
40. Do you think it possible that quantity of goods could have been shipped on that day? No, I feel certain it could not have been done, judging from the time it has taken to ship goods in other vessels, and from the time it would take to go through the mere official forms. It would be difficult to get even two officers to do that amount of work.
41. The whole of these goods, as far as the papers go, are stated to have been shipped by one export officer? Yes.
42. Supposing he had taken them all from one store, could he have shipped them in one day? I think it would have been a good day's work.
43. As it appears, he took them from five different stores—could he have done it? No. I calculate that at ten o'clock he would get the certificates and the warrants, which would have to be examined by Mr. Nash. This would occupy some time, so that he would not begin operations before eleven; then if he went to Walker's store for eight half-tierces of tobacco, and to Lamb's for two hundred cases of gin, he would then go down to ship them at the Grafton Wharf—that would occupy him till one o'clock; then he must come back to Gilchrist's for twenty-eight hogsheds of rum, then to Pollard's for whisky, then to the Chilian Bonded Store

Store for the quarter-casks of brandy, and the hogsheads—I do not see how he could do it; Mr J. Collier. I think it is impossible.

44. You are aware that the "Louisa" came in again on the 7th of October? I believe ^{Mr J. Collier,} 2 Nov., 1853. she did.
45. Do you remember at what time of the day she came in? In the morning when I arrived at the Custom House I found Mr. Bremer had got the papers—he was the boarding officer. I sent up to Mr. Stewart's office for the Port de France, New Caledonia, clearance; I wanted to compare it with another one we had there, because I consider that that clearance would shew whether he cleared out for the Navigator Islands, or to come direct to Sydney. I have not seen that since to compare it with one I have—that was the "Spec's." (*The Chairman handed the witness the "Louisa's" clearance, in French.*) I cannot read that. It appears he cleared out for the Navigators, then why did he come to Sydney? It appears that in New Caledonia they are very particular in giving particulars of the clearance; it states whether the ship is going to the Navigators, or to what other part of the world.
46. He gave a reason for coming to Sydney? He did give a reason—I believe that he lost the mate, but I never knew he shipped one.
47. Assuming that reason to be true, I suppose it would be a just reason for coming to Sydney? I think not; I think a man would be a foolish man to come back twelve or fourteen hundred miles to ship a mate, when he could get the same kind of mate that he took there.
48. The mate he took was a colored man? Yes; he could get plenty. He stated that he was very sick himself, but he did not seek for much medical comfort here.
49. Did he go away the same day? The same night. I passed him about three o'clock, as I was going to the "City of Sydney"; I had to measure a vessel up above, and was intending to visit the ship, but, from reasons, I did not go.
50. You say Mr. Bremer took the papers of the vessel? He had the papers from Mr. Stewart on the morning of the 7th; I found him with the papers, and sent to the Chilian store for that document, and it was sent immediately—rightly it belongs to us—it should be taken in charge by the officer boarding, and should not go out of his hands again till it is handed up to the chief clerk.
51. When the "Louisa" cleared out the second time, did she clear out in a regular manner? I do not know what instructions the Collector of Customs might have given, but I think, under the circumstances, it was very extraordinary that there should be such a hurry to clear out a vessel in ballast, and I believe there was no certificate of rummage, for, although it was my week of rummage duty, I did not go on board, not knowing she was going out.
52. Did you see her outward content (*handing it to witness*) on her clearing out the second time? No; I have not seen this before. I think I saw this inward one, where there were two cases of claret of the original quantity taken.
53. Is that document you now see regularly executed—the jerker's certificate, and so forth? No; that does not bear Mr. Fancourt's signature, which it should have; with the exception of that, I think it is all right; here is the captain's signature.
54. The declaration is properly taken? It is, apparently.
55. Are you aware whether that declaration was taken on board, or at the wharf, or at the Custom House? I cannot say, for I was not aware she was about to clear that day.
56. You referred to the inward papers just now; are these (*handing papers to witness*) the papers of the "Louisa"? Yes; I think I have seen them before, but not with the memorandum on.
57. What memorandum—the memorandum in pencil? Yes; I am referring to that.
58. Are these papers regular? The papers may be regular enough, but what Mr. Fancourt says here is correct,—she had no Post Office certificate, no rummage certificate, and had not complied with the forms of the port; for she had no right to report inward without a Post Office certificate.
59. Ought the Post Office and rummage certificates to be attached to the clearance papers? Yes; she should have a Post Office certificate before she can be rummaged at all.
60. Did you put yourself in communication with Mr. Ross, the Custom House officer at Broken Bay, on either of those occasions? I did; on the 4th September I wrote a letter, but had no opportunity of sending it to him till the Monday.
61. What did you communicate? I gave him a copy of the cargo, and said I had suspicions that the cargo would be run on the coast. I think it was about the 6th September I sent my letter to him, requesting that he would keep a good look out, and pointing out the different places where he might visit, for I had a suspicion of the man; I knew the man well.
62. What man are you referring to? King; he knows the port of Broken Bay, and I had a suspicion the cargo might be run there. I have sent to Mr. Ross twice since upon the same matter; he has written up to me to say the vessel has not been there.
63. Was any information conveyed to you by Mr. Ross beyond his stating that the vessel had not been there? Mr. Ross and Mrs. Ross told me that Mr. Stewart had been there, which I had heard previously to their coming up to Sydney. I heard he had gone there with two horses, had lost his way, and when he arrived at Broken Bay had requested Mr. Ross to take a letter over to Brisbane Water for Captain King. Mr. Stewart said that he wanted to return to Sydney as he had the keys of the store in his pocket, and as the Collector of Customs was very much interested in the matter he knew he would take the letter over. Mr. Ross, hearing that the Collector was interested in it, took the letter to Captain King, and brought him back again at twelve o'clock. He afterwards came up in a fishing boat, and arrived in Sydney on the same night.
64. Referring back to the "Louisa"—the time she returned to port do you know whether your colleague rummaged the ship or not? No; it would be my rummage.
65. You are certain he did not? No; we were both under the stern of the ship, but, for reasons,

Mr. J. Collier. reasons, I did not go to the ship; I saw Mr. Crook going to the ship, and expected some information which would be got better by my not going on board. I thought it might be
 2 Nov., 1853. got from sailors on board.

66. Were you called upon to give a rummage certificate on the second occasion? No. On the morning after the vessel cleared Mr. Bremer received a note from Mr. Stewart asking him to give a rummage note for the vessel, but she had then left the port; I said, "Do not do it for she has now left the port," and he objected to give it.

67. Was it ever given? No. It should have been my rummage. I told him I would not give it, and should recommend him not to do it.

68. Was Mr. Stewart aware that the vessel had not been rummaged? I imagine so

69. After he required the certificate? Yes, the following day. It ought to have been given before the clearance was signed.

70. Do you find it difficult to perform your duties afloat to your satisfaction? We cannot carry them out satisfactorily, for the duties are very arduous. We had a clerk in the office, but he has been taken away, and that throws a great deal of clerical duty on my shoulders. The measurement of ships is almost enough for one man to do.

71. Are you efficiently supported in the discharge of your duties? Yes; I have no complaint to make on that score.

72. Do you ever find it necessary to neglect your own duties to discharge those of your colleague? I must say, with respect to ship measurement under the Merchant Shipping Act of 1854, that he has not attended to that; I take the whole of that with my other duties.

73. Why do you? I do not know; I have done it.

74. That is a matter of favor to him? Yes.

75. Is he capable of discharging the duty of measuring ships? Not at present.

76. Why not? He does not pay that attention to it which he might do. We have had to measure ships for years, but this is a new Act.

77. You think at present he is incapable of discharging that duty? He is.

78. How long has he been in the Customs service? I think ten or eleven years.

79. How long has it been his duty to measure ships? He measured under the former Act for some few years.

80. How long has the new Act been in force? Since 1854.

81. Has he never discharged this duty under that Act? He has measured one ship, I think—not more than one or two.

82. You said just now that you neglected going on board the "Louisa" on the day of her return to port, the 7th October—what reason had you? I saw Mr. Crook, the Harbour Master, going on board with one of the natives in his boat, and I thought my going might be the means of preventing him, for I had reason to believe he had gone on board to get information from the natives as to what had become of the cargo, and I believe if the vessel had remained we should have got the information; but I heard from Mr. Crook, afterwards, that they would not admit the boy on board the ship.

83. You think the reason for clearing out in ballast was to hide —? Yes. I think if the crew had remained in port we might have had some information.

84. Is it not your belief, from the manner in which the thing was done, that Mr. Manton must have connived at it? I do not know what instructions he might have received.

85. Do you think he could have received instructions to clear out the vessel without Mr. Fancourt's signature? No, nor could the Collector have known that the vessel had all these spirits on board, or he would never have permitted her to clear out after hours.

86. Have you any reason to suppose that your actions with reference to the "Louisa" have been watched and reported to the parties interested? Yes. I could not stir in any part of the Custom House but I have been suspected. I have seen persons looking over my shoulder when I have been taking the copy of the goods. I have no doubt the news was conveyed to the parties immediately. On the 3rd of September they knew within ten minutes of my having the documents in my hands. When I got the papers from Mr. Mowle I believe Mr. Stewart was informed within ten minutes.

87. Who do you think informed Mr. Stewart? I think Mr. Rogers, clerk to Mr. Nash.

88. What reason have you to suppose Mr. Rogers informed him? I have found him looking over my shoulder when I have been examining this book, which I do frequently, to see what spirits any vessel may be taking.

89. What book are you referring to? The warehouse book of exports and imports—a book kept in the warehouse-room.

90. Did Mr. Rogers look over your shoulder to see what extracts you were taking? I fancied so.

91. Any body else? Mr. Manton knew I had the documents in my possession.

92. Was any body but Mr. Rogers in a position to inform Mr. Stewart? Mr. Manton could.

93. Any body but Mr. Rogers and Mr. Manton? I do not think it.

94. It must have been either from one or the other that information was conveyed to Mr. Stewart? I cannot say so, though I was constantly watched by those parties; I will not say they did convey it.

95. You have not suspected any other persons of watching you? No; I think those are the two parties.

96. Is it part of your duty to board ships, or to send to tide-waiters to board them? No, to board ships myself.

97. Where do you board them? Sometimes at the Quarantine Ground, sometimes between the Heads, Bradley's Head, or Pinchgut. If a vessel is towed up by a steamer I do not go below.

98. If a vessel comes up late at night do you board her at once, or wait till morning? Our instructions are, that we are not to board after sun-down. Some years ago, when we took up the mail, I have boarded as late as eleven at night.

Mr. J. Collier.

99. If a vessel comes in after sun-down when is she boarded? In the morning.
100. At sun-rise? No, not at sun-rise; not at all times.
101. What time, then? Seven or eight o'clock, sometimes as late as nine if they are 2 Nov., 1868. coasters; if they are foreign ships earlier than that.
102. Have not these vessels during the night an opportunity of landing goods? Yes; but we do not rummage stores till after they report inwards, and they are allowed twenty-four hours.
103. If you put a tide-waiter on board to take care that the hatches were not broken, would not that be a great security? If the man did his duty that would be a preventive.
104. A competent officer put on board would prevent the landing of goods during the night? Yes; but we should require a great staff of officers to do that; under the present system we have not sufficient to do that.
105. That would be a check; at present there is no check to landing goods at night? No, not with the coasters. We put officers on board the foreign ships, who remain during the night—all foreign vessels with dutiable goods, such as vessels from London and the States.
106. Even they could land goods on the first night they came in, if they came in after sun-down? That could not be prevented.
107. Not by putting an officer on board? A vessel may come in at twelve or one in the morning, and we are not supposed to put an officer on board then.
108. Might we not have a revenue cruiser outside the Heads to put revenue officers on board vessels? That might do for the pilots as well.
109. You think that would be a proper precaution? I think so; but then it depends entirely on what class of vessels you are going to put them on—whether you will put them on coasters as well as foreign vessels.
110. On every vessel coming into the port—would not that be a very proper precaution? You could not carry that out; you would want 150 officers. As to coasters, I believe there are nineteen out of twenty that do not bring one article of dutiable goods.
111. Then it would not pay to put them on coasters? No.
112. With respect to ships going out, when do the Custom House officers leave sight of a vessel going outward? The officer is supposed to leave in the pilot-boat.
113. Is that the practice? It is the practice, generally, I believe; I believe that is the instruction.
114. Whose duty is it to see it carried out? We give instructions, and expect the officers to follow them up. We place an officer on board as soon as a ship commences to take in cargo, and he remains on board till the ship goes out of the heads.
115. Was that practice carried out with the "Louisa"? No; because I did not know she had anything dutiable on board; she passed the entries on the 2nd and cleared out on the 2nd. The clerk, Mr. Rogers, might not have had time to copy the entries into the export book, and if I had gone to the book I should not have known from that that she had taken no spirits in.
116. They might not have been posted up on that day in the warehouse-keeper's book? I cannot answer that question. I have since made inquiries when the entries are passed. I asked Mr. Rogers and Mr. Nash the question when the entry is passed for goods outwards; they said they enter it in this book as soon as the entry is passed, but whether it has been the practice before I cannot say.
117. You say that with regard to all foreign vessels it is the practice to put an officer on board, and for him to remain on board till the vessel goes out to sea? Yes.
118. You see that carried out as far as you can? Yes.
119. With respect to Mr. Bramwell—is he under your orders? No; under the supervision of Mr. Garling, the landing-surveyor.
120. Do you know where Mr. Bramwell was on the day the "Louisa" went out? I believe his station at that time was at Lamb's, Botts' and Walker's wharfs—three wharfs.
121. Are you aware that he signed the export warrant? I heard he did.
122. Is that his signature? Yes. (*Handing the warrant to witness*).
123. Was it unusual to get his signature to that warrant? The landing-waiters do sign for each other, but I am surprised that Mr. Bramwell, an old officer, should have signed for so large a quantity of spirits unless he had some authority for doing so, for he is generally a cautious man.
124. Do you know where he was on that day? No, I do not; I might have seen him that day, but I do not recollect whether I saw him at the wharf or not.
125. Do you remember whether he was at the adjoining wharf that day? That I cannot say.
126. Have you opportunities of observing the conduct of your colleague, Mr. Bremer, in the discharge of his duties? We are very often together.
127. What is your opinion with respect to the manner in which he discharges his duty? He can discharge his duty well.
128. I thought you said he could not discharge his duty with respect to measuring ships? Yes.
129. Does he discharge his duty well excepting that? Yes.
130. *By Mr. Brown:* By this clearance on the 7th it appears that the vessel cleared for the Navigator's Islands? Yes.
131. Are you aware by report that she went from here to Hobart Town? My attention was drawn to the passenger list by the names of Mr. King and Mr. Stewart, who I heard had arrived from Hobart Town in the "Tasmania." When I saw Captain Clinch I said, "Who is this King you have on board." He said, "Mr. Stewart went down with me with twenty half-tierces of tobacco, and this Captain King was with the "Louisa" at Hobart Town." They had a suspicion there that the "Louisa" was about to smuggle on the coast, and the moment the tobacco was shipped the Customs placed an officer on board. Captain King had taken his passage in the Tasmania, but, in consequence of the mate not having a certificate of competence, he was obliged to remain in charge of the "Louisa."

- Mr. J. Collier. 132. Is it usual for vessels clearing out for the South Sea Islands to go to Hobart Town, or other places? Not in that way. We often find vessels clearing out from Guam, but afterwards we do not expect to see them at Hobart Town. I think it a very suspicious circumstance.
- 2 Nov., 1858. 133. Particularly as she shipped goods from the "Tasmania"—it would have saved freight if they had gone by the "Louisa"? I know it was removed into the Chilian Bonded Store. A party signing the bond is, I believe, now in Sydney.
134. Who is that? A Mr. Brown. I believe a person of the name of Brown signed the bond for the export of twenty tierces of tobacco, and I have reason to believe that he is a man of straw, not a merchant settled in town. Mr. James Stewart is a Custom House Agent, brother to Mr. William Stewart, and I should like to know why he employed Mr. Gifford to pass the entries when he could do it himself.
135. This tobacco is assumed to have been bonded in the Chilian Bond by Young and Co.? Young and Co. would be the original bonders. I believe Leigh's was the store in which it was first bonded—Young and Co. would bond it there—and it was afterwards removed to the Chilian Bond and shipped from there.
136. Have you been a landing-waiter? Yes.
137. Were you in the habit of signing certificates for the export of goods that were not shipped at wharfs within your beat? I might have done that. I consider it a very bad system. It was adopted by Mr. Barnes. It was practised more frequently formerly than now for drawbacks. At one time we took a certificate and notice to shew that goods were about to be shipped for drawback, but we have no such thing now, but we have what is called a drawback officer—Mr. Russell; he ships the goods, but no landing-waiter sees them; he has to certify that the goods are shipped, and to sign the drawback debentures for the money. He makes himself responsible for some thousands of pounds.
138. *By the Chairman*: Is it not the case that when a merchant ships goods for which there is no certificate the landing-waiter signs? I do not think so, for many have lost their drawback by not giving the required notice.
139. Is it not the fact that the landing-waiter takes the testimony of the merchant, and upon that signs the certificate for the drawback? I do not know.
140. *By Mr. Browne*: When you were landing-waiter did you consider yourself responsible for the due discharge of the cargoes of ships within your beat? When I was a landing-waiter I have had twelve large vessels to discharge myself—at the time of the California Gold Fields—and every landing-waiter at that time had an equal number. Therefore it was impossible for each of us to superintend one ship.
141. You were, therefore, altogether dependent upon the officers on board the ships? Yes. I have had to attend to Towns', Ebsworth's, Smith's, and Moore's wharfs.
142. You were perfectly dependent upon the correctness of the tide-waiters? Yes, and so it is now; the landing-waiter must depend solely upon the officer on board.
143. What is the class of people employed as extra tide-waiters? Some are very good men, others are equally bad. When I say they are bad, I mean that they are not up to their duties.
144. Are they sober and correct? I think I may say I have got a sober lot now; we have had several who have not been so. The captains here are too liberal.
145. Some tide-waiters have tumbled overboard, and been drowned? I think some have tumbled overboard, but I do not know whether it was from drunkenness or missing their footing.
146. Are they, as a whole, a class of officers that ought to be entrusted with these important duties? We have many very good men, but unfortunately our tide branch has been very much culled out; we have had a number of additional lockers appointed, and they have been taken from among the tide-waiters; all the best men have been taken away by Mr. Still, and I am sorry to say we have such men recommended to us to be taken on as have been rejected by every other office; I do not think that is right.
147. Who recommends them? Various parties. The Collector has frequently said his department is a refuge for the destitute; and I consider that it is so.
148. Have any regulations been issued for your guidance since the Colony took over the department? No.
149. How do you know what the routine duties are, or how would you instruct a new officer in a particular routine of duty? We have tide-waiters' instructions.
150. Printed? Yes. They have been issued to each tide-waiter.
151. Issued by yourself? Yes. They set forth the duty they are expected to do, and the way in which the ship's cargo is to be discharged—the weight of sugar, and how to take the weights.
152. Do you think that by any accident such a mistake as the one we have been inquiring into this morning could possibly occur, namely, that under a warrant for the delivery of 20 tons of sugar 57 tons could have been delivered, without the concurrence of the tide-waiter? There must have been a good deal of carelessness there.
153. Something more than carelessness—would it not be something like 400 or 500 bags? It depends upon what port they were from.
154. Mauritius? They are large bags, 1 cwt. 3 qrs.—it would take a good number of bags to make that difference.
155. Did any irregularity of that kind come under your notice with reference to the "Fanny Fisher's" last voyage from Mauritius? I have heard something about that; I had notice respecting it from the Collector of Customs that the officer was to receive no pay until his books were corrected.
156. Do you know what became of that man—his name was Alder? He was dismissed, I think, at that time.
157. Was he a sober man? No; he was one of those men we were very glad to get rid of.
158. You are aware that the discovery was only made when the jerker came to examine the books.

books after the discharge of the whole cargo? I think it was; it ought to have been discovered before. Mr. J. Collier.

159. Should not the landing-waiter have discovered it? Certainly; it is part of his duty to check the tide-waiter's book before it is sent to the jerker. 2 Nov., 1853.

160. *By Captain M'Levie:* I think, in reply to one of the questions, you said you had heard the Collector of Customs remark more than once that his department was a refuge for the destitute? Yes.

161. What is your inference? I am only speaking as far as the tide branch goes.

162. Do you infer from that that people are thrust upon the department without any examination by Colonel Gibbes? A recommendation is sent to the Collector, who then, if there is a vacancy, sends the officer down to the tide-surveyor to be placed on duty.

163. It is a mere recommendation, not an appointment? It is not an appointment, but it is tantamount to that. It comes down—I cannot say from what quarter—but the Collector feels that he is bound to take the party on. These men are thrust upon us, and they take as much training as really good men.

164. Do they undergo any examination as to their fitness for the office before they are taken on? They go under instruction by the side of an experienced officer, put no examination. The rule in the home establishment is, that they shall not be under 20, nor over 35 years of age.

165. Do you not think it would be an advantage to the department if such a regulation existed here? Yes. At home they also undergo examination by a Board of medical men, and have to procure a certificate from a magistrate that

166. You think it would be a good regulation to establish here, that there should be an examination as to their mental and physical ability, and that no man should be taken on above a certain age? Yes.

167. Do you not think it would be an advantage, and that it would act as a check on the officers in the junior grades of the service, if they were compelled to wear a uniform? I think a uniform would be a very good thing here. It is adopted in the case of tide-waiters at home; but they are paid so much a day; we only pay our tide-waiters when they are employed. I have recommended to the Committee of the Assembly now sitting that the men should have fixed pay, and that only fourteen should be employed. We have now twenty-seven, who have not more than half employment. I think we might give them half pay, so much a day, when off duty, and that when on duty they should have the pay of a clerk.

168. Do you not think it an objectionable practice to allow the captains of ships to feed the tide-waiters—might it not tend to collusion between them and the officers of the ship? It might.

Mr. Charles Henry Manton called in and examined:—

1. *By the Chairman:* You are a clearing clerk at the Customs? Yes.
2. Do you remember the clearing of the "Louisa" on the 2nd September? Yes.
3. At what hour was she cleared? About five.
4. Where was she cleared? At the Grafton Wharf.
5. Was Captain King present when you took the declaration? He was.
6. Are you authorised to clear vessels after hours? Yes.
7. By whom? The Collector.
8. Have you the authority with you? Not to clear that particular vessel. I have his verbal authority to clear vessels after hours.
9. You were not specially authorised in this instance? Not when she cleared out in the first instance, but afterwards. I have not it in my pockets.
10. On the 7th October? I forget the date.
11. The second time she cleared? Yes.
12. Do you receive any fees for clearing out vessels after hours? Yes.
13. What fees? That depends upon the hours at which vessels clear. After four o'clock and up to five, half-a-guinea, and if later, a guinea. I have had less than that; it depends upon the hour.
14. Is it regulated by the Collector? No; I do not know that the Collector knows how much I receive.
15. Have you a right to demand anything of the captain, or do you settle the matter with him? I cannot say that I have a right to demand it, but I think they must know I do expect it if they are after hours.
16. Does what he shall give rest with the captain, or is it according to regulation? It is according to regulation; I have always understood it to be so.
17. According to the scale you have just mentioned? According to the scale I have just mentioned. I clear the Melbourne steamers every Saturday afternoon, at three o'clock, and as they are regular I get seven shillings and sixpence. That is once a week.
18. Did you clear the "Louisa" again on the 7th October? Yes; the second time I did.
19. Was she cleared then after hours? She was cleared then, I think, between four and five; I cannot exactly say.
20. Was it after hours? It was; to the best of my knowledge and belief, it was between four and five.
21. In clearing on the first occasion, that is, on the 2nd September, did you get the jerker's certificate as to the correctness of the inward cargo? I did not require a jerker's certificate; I get his memorandum—his initials.
22. Did you not require his memorandum, or initials, upon the content outward? I did.
23. Where is it? (*Handing the content to the witness.*) It is not on the manifest. Owing to some error in the manifest, it was destroyed.

Mr. C. H.
Manton.

2 Nov., 1853.

- Mr. C. H. Manton.
- 2 Nov., 1858.
24. Who destroyed it? I cannot say that it was destroyed; but, at all events, that one was substituted for it, owing to some mistake in it.
25. What was done with the other manifest? I cannot say; I left it with the agent.
26. Did you take the captain's declaration in any other manifest? Yes, and on that also.
27. Did you witness it? I did—I did not witness it—on the other copy?
28. On the other copy? I cannot say that I did; I think the mistake was made out before the declaration was taken, and this one I did not witness till the day after; I forgot it at the time, having many papers to sign.
29. When was the mistake upon the other manifest found out, the one not forthcoming? When the ship was being cleared.
30. On the same day? On the same day.
31. When you found out the mistake, what did you do with the manifest? I did not take it at all; I left it with the agent; it was of no service to any one.
32. Who was the agent? Mr. Stewart.
33. You immediately prepared the other? I did not prepare it; the agent prepared it.
34. You initialled it as being correct in every respect? Yes.
35. When you had neglected getting the jerker's certificate to it? On the second.
36. That was irregular? I cannot say so; it was the same as the former.
37. Are you not required to get the jerker's initials upon the manifest when the captain takes the declaration? Yes.
38. And on that which is for office record? Yes.
39. Then, the not getting his initials on this was irregular? I will grant that it was irregular.
40. When you cleared out the "Louisa" on the second time did you get the jerker's certificate upon that manifest? No, I did not.
41. That was another irregularity? That was another irregularity. I think I saw the agent talking with the jerker, and it struck me that everything was completed. She entered out the same stores as she had reported in, and it was therefore a mere matter of form to say "this ship is jerked outwards."
42. Is it not required to have the jerker's initials on the manifest? Yes; but it often happens that I do the jerker's business myself.
43. Do you ever give the jerker's certificate on the top of the manifest? The jerker's initials I put often.
44. With his sanction? Sometimes in his absence, at other times when I have cleared out a ship overtime; and I have not exactly arranged to give the jerker half the fees for overtime ———
45. I ask you, do you put the jerker's initials with his sanction? Yes.
46. Have you ever got his permission to do so? Yes.
47. Can you shew any authority for it? Yes.
48. You can establish that statement? I can.
49. What proof have you? I can bring any gentleman in the Customs to shew that I do his duty, and with the Collector's approbation.
50. It will be necessary that you should, in order to establish your regularity in respect to this case, shew that you have authority from the Collector and from Mr. Fancourt to do this? I will grant that it was irregular in this instance; I did not have the jerker's permission in that case.
51. Where does the jerker generally initial? He is not very particular in what part.
52. If you are allowed to discharge the jerker's duty with respect to this ———? I grant that it was irregular in this case. I knew the ship was jerked; all I wished to be satisfied of was, that the ship had been jerked inward, and I was satisfied of that.
53. Do you intend to bring forward any proof that you had authority to discharge the jerker's duty? Every gentleman in the Custom House can establish that, and many merchants in Sydney.
54. Did you get any rummage certificate from the tide-surveyor on the occasion of the vessel coming in on the 7th October? No, I did not.
55. Was not that irregular? Upon the same rule that Mr. Fancourt in some cases does not require a rummage certificate; I believed it was not necessary in this case.
56. Is it ever not required by Mr. Fancourt? I believe so.
57. Do you know it as a fact? No, I do not; I know that many times when I have done his duty myself, I have thought it not necessary to have a rummage certificate.
58. Did you ever know Mr. Fancourt to think it unnecessary to have a rummage certificate? I have known him to jerk a ship without a certificate.
59. Can you establish that statement? That is a well known fact to every body nearly.
60. It is only when you have discharged Mr. Fancourt's duty that a rummage certificate is dispensed with? I cannot say what he has done when he has done his duty.
61. Do you generally, when you discharge Mr. Fancourt's duty, dispense with a rummage certificate? Generally, when I do Mr. Fancourt's duty, I leave the papers so that on his return he can examine them, and, if I mistake not, he gets the certificate to make them complete, as a matter of form, if not of utility.
62. Who gave authority to clear the "Louisa" on the second occasion in the irregular manner in which she was cleared? The Collector.
63. Will you produce that authority? Yes; I have not it here.
64. What does the authority say—to what extent is it? It was in a letter from the agent of the vessel to the Collector. I think I could tell it almost by heart. He says—"The Shipping Master has ruled that the return of the 'Louisa' back to Sydney terminates the voyage, and that a new set of articles is required; therefore, owing to the great loss already sustained by the 'Louisa,' I request that permission may be given to clear the vessel over-hours. Yours, &c., J. STEWART." In the corner is written—"Permission granted. J. GIBBES."

65. That is not a permission to clear it irregularly? No; when the Collector gives permission to the clearing of a ship after hours it is understood that she is to be cleared regularly.
66. Do you ever take signatures to export bonds? Frequently.
67. Did you take the signature in the case of the "Louisa" when she went out on the first occasion? Yes.
68. What bonds did you take? I could not say what bonds—for all the goods that were passed on the 2nd September.
69. You do not know how many bonds? Two, I think.
70. Do you know what you did with them? I put them with the rest of the bonds.
71. Where were they? It was not on the day that the ship cleared; it was early in the morning, and I put the bonds along with some other papers I had in my desk. I think four days after that the bonds were put by with the rest in a drawer behind my seat, by myself.
72. You tied them up in a bundle with the bonds? Yes.
73. Did you put them together with the other bonds—did you tie them up? I put them in the drawer.
74. Did you lock them up? No, they are never locked up.
75. Neither night nor day? Neither night nor day.
76. In whose charge are those bonds? In the charge of the messenger, I suppose; I cannot say for certain. They are left as lumber in the Long Room.
77. Is any person presumed to be answerable for the custody of the bonds? I can only say from what I have heard, the cashier.
78. Is it the general impression in the Long Room that he is answerable for the custody of the bonds? Yes.
79. Then if you and the messenger put away these bonds between you, how is Mr. Maddocks answerable? I do not know that the messenger touched them.
80. You say they were in charge of the messenger? I suppose he has them as he has every thing else in his charge that is in the room—in the same way that the books in this room are in charge of the messenger of this office.
81. These bonds were never given to Mr. Maddocks? These bonds were never given to Mr. Maddocks.
82. Can you tell us what bonds they were? No, I cannot; they were for goods taken in on the 2nd.
83. Cannot you tell the number and amount? No, I cannot; the entries will speak for themselves.
84. Cannot you tell from memory? I do not recollect.
85. You do not remember the number of the bonds? To the best of my memory there were two.
86. Who signed them? I did, of course.
87. Who were the bondsmen? James Stewart and William Stewart.
88. Do you know for what amount? No; for three times the value I suppose, as in all other bonds.
89. Do you know what goods were contained in the bonds? No; I could tell by looking at the entries. (*The witness examined the same*) "Fifty cases claret, four half-tierces of tobacco."
90. Could you describe what was in one bond and what in another? No.
91. You could not tell for what each separate bond was taken? No.
92. You could not tell for what each separate bond was taken, nor for what amount? No. I have taken as many as twenty entries in one bond, or seen them taken in one or two bonds.
93. When an export entry is taken out for goods for which bonds have been taken, is it not usual for the officer who takes the bonds to initial the export entry? Yes.
94. Did you initial the export entry with respect to these two bonds? No.
95. Was not that irregular? I do not think it was, because the initials are merely to shew who the party was that took the bond.
96. Then these initials were not on? No, for I took the bonds myself. I could not pass the entry without the bonds were passed, and as I took them myself that was sufficient.
97. Is it not usual for Mr. Maddocks to initial the export entries? It is an understood thing that it is his duty; it is considered so to be.
98. When you were discharging his duty for him, was it not your duty to initial them? Not if I was doing my own duty also; I would not think it necessary.
99. Why not in your case if you were performing Mr. Maddocks' duty? Because it would not be Mr. Maddocks' duty.
100. When that export entry came before you for signature in the form in which you have signed it, you knew the bonds had been taken? Yes, I knew the bonds had been taken.
101. You considered it therefore unnecessary to put your initials to it? Yes.
102. Have you ever seen these bonds since? Never.
103. Did this export entry (*handing witness the export entries*) go from you to the warehouse-keeper? The entry goes from me to the agent: the agent takes it to the warehouse-keeper.
104. And he names the export officer? And he names the export officer.
105. *By Mr. Browne*: When you were down upon the Grafton Wharf on the afternoon of the vessel's sailing did you see Mr. Bramwell there? No, I do not recollect seeing him; I am sure I did not.
106. Is it usual to clear vessels on board, or on the wharf? Not usual; but I have often done it. For instance, I clear the Melbourne steamers every Saturday on board.
107. You would consider it not necessary to take any greater precaution when you were clearing a vessel that had a large quantity of dutiable goods on board than if you were clearing the Melbourne steamer? In what respect greater precaution?
108. In seeing that everything is regular and correct? I should clear it in a straightforward manner, the same as any other vessel.

Mr. C. H.
Manton.

Nov., 1838.

Mr. C. H.
Manton.

2 Nov., 1858.

109. Do you consider that this with all the irregularities you admit—? I do not see any irregularity at all.
110. Why did you take the bonds—why did not Mr. Maddocks? Because he was not there to take them at the proper hour.
111. At what hour did you take them? Just at nine o'clock.
112. Just as the Custom House opened? Yes.
113. And Mr. Maddocks was not at the office at nine? He was not there.
114. Is it not customary when you take them to put them on Mr. Maddocks' desk, so that he may check the export entry? I do not remember doing so before; I have generally laid them on one side. I frequently take them when Mr. Maddocks is making up his cash in the afternoon, when he is present in the Custom House.
115. You say you signed this clearance at the Grafton Wharf, but think you did not fill it up till the next day? I did not say any such thing. I beg your pardon for having to contradict you.
116. What did you do—take the declaration and issue the clearance? Yes.
117. When did you fill up your attesting signature? I think the next day Mr. Garling said to me, "You have not taken the declaration?" I said, "I beg pardon, I have taken the declaration;" and I signed it then.
118. What was the error in the content at the time of clearing—was that found out at the time you were at the Grafton Wharf? I think it was nothing more than a mistake in the marks and numbers.
119. You returned that to Mr. Stewart? I think so.
120. Where was the other one made out? It was made out there.
121. On board the ship? On board the ship.
122. You say Mr. Fancourt signed the content outward of the "Louisa" on the 2nd September? Yes.
123. He did not sign that paper at all? (*Referring to the content outward before the Board.*) No, not that.
124. Is this the paper you signed on the 3rd? Yes; I took the declaration on the 2nd, but I signed this in the presence of Mr. Garling on the 3rd.
125. Did you sign this, or the other one? This.
126. Did you not bring a paper also to Mr. Fancourt to sign on the 3rd? Yes; that paper I gave Mr. Fancourt, if I mistake not, to sign, and he would not sign it.
127. Was that declaration taken on board the ship—the one on the 7th October? Yes.
128. *By the Chairman:* The vessel was cleared out by you on board? By me on board.
129. On both occasions? On both occasions.
130. *By Mr. Browne:* What fee did you get on either of these occasions? A guinea on either, or both.

FIRST EXAMINATION.

Explanation and remarks to questions.

No. 17.—Steamers sometimes clear at 3, 5, and 12 o'clock, P.M.; when they clear at 5, or after, the fee I received was double, being fifteen shillings; this scale was made by the Custom House Agents, Messrs. Metcalfe & Co. Sometimes the steamers had a great deal of dutiable and drawback goods on board, almost on every occasion.

No. 26.—I obtained the captain's declaration on the manifest which was returned to the Agent, and also on the one now in the hands of the Board.

No. 36.—The jerker's initials are merely to shew that the vessel has discharged her inward cargo; if the jerker neglects to get a Post Office certificate when the vessel reports in, it is irregular.

No. 38.—The jerker's initials are required on only one copy (the record copy), the copy now in the hands of the Board on which Mr. Fancourt refused to put his initials.

No. 39.—Mr. Fancourt refused to initial the fresh copy after I explained the circumstances of the case, therefore, I was obliged to dispense with it. Mr. Fancourt's initials are merely to shew that the ship was jerked inwards. Mr. Maddocks' initials are to shew that the bond is taken for the goods to be shipped. I therefore felt quite justified in passing the entries as the bonds were taken by myself, and also in dispensing with Mr. Fancourt's initials, as he could not dispute that the vessel was jerked, as a remark to that effect is always made in the ships' *inward papers*.

No. 41.—The vessel came in in ballast, therefore she required no jerking. I saw her inward manifest, and knew what stores she had on board. If Mr. Fancourt allowed her to report in without a Post Office certificate he was the responsible party—that is, however, a common occurrence.

No. 50.—To prove that I have done Mr. Fancourt's duty, *vide* certificate sent by me to the Board.

No. 52.—Wrong in a matter of form only.

No. 54.—Rummage certificates are not required when a ship reports in.

No. 56.—Rummage certificates have only lately been introduced by Mr. Fancourt, merely as a matter of form. Mr. Fancourt generally gives the particulars of stores supposed to be remaining on board, so that Mr. Collier may fill up a blank form without actually knowing the same to be correct.

Nos. 57, 58, and 59—I have seen Mr. Fancourt give the particulars on a slip of paper; I have known him frequently to clear a ship without a rummage certificate—*vide* all the ships' papers in the Custom House a short time back, and you will see that no rummage certificates were given.

No. 61.—I dispense with the rummage certificate, but leave the papers open so that Mr. Fancourt may get one afterwards from Mr. Collier.

No. 62.

No. 62.—The vessel was cleared in a proper manner.

No. 68.—The bonds taken by me were for all goods shipped on the 2nd September, with the exception of the bond for eight half-tierces tobacco, which was taken by Mr. Maddocks—as a proof of which *vide* Mr. Maddocks' initials on the entry.

No. 74 and 75—I never saw the drawer containing the bonds locked up; it might have been at night but never was in the daytime.

No. 76.—The agents and the public get the bonds without asking for them; they used to be kept close to Mr. Maddocks, but Mr. Mowle had them removed to the back of my seat.

No. 86.—I witnessed the bonds given by Mr. W. and Mr. J. Stewart.

No. 88.—I know that the amount taken on each bond was for three times the amount of duty on the goods for exportation.

No. 98.—Mr. Maddocks' initials are shewn to inform the party who passes the entries that the bond is given, but when the party who passes the entry takes the bond no initials are required.

No. 102.—I never saw the bonds after Mr. Llewellyn examined them.

No. 108.—The irregularities mentioned were matters of form only. The clearance of the "Louisa" was a true and correct one, to the best of my knowledge, with the exception of a rummage certificate. In the above I allude to the second clearance; the first clearance was also correct. If Mr. Fancourt's initials are not on the record copy, it is owing to that gentleman's disagreeable manners, for I can look upon it in no other light, for no person with the smallest spark of sense can point out what object it would be to anyone to have a copy of the "Louisa's" manifest; it could not be made use of in any shape or way. Mr. Fancourt must have been laboring under a mistake when he said that he initialled two copies, and that the one now in your hands is neither of the two; such could not have been the case, for how could the captain's signature come there the day after the ship went to sea? If there was anything suspicious about the "Louisa" it was the duty of Mr. Collier to board her on the evening of the sixth when she came in, but, as it was, he never went near her, not even on the seventh. Captain Crook was equally to blame, especially as he made himself so very busy about the matter. I feel bound to make these remarks in justice to myself, and I cannot allow the evidence of Mr. Powell to pass unnoticed. I have always understood that a Custom House Agent is bound to do his duties in a proper manner, that is, according to the regulations of the Home Service. Under the circumstances this question will arise to me, how Messrs. Metcalfe and Co. can justify themselves to clear vessels over hours, when they say it is contrary to the regulations; the agents are the first to break through these regulations. I will say nothing about drawbacks, or the recently appointed party to superintend that duty, or hint at whose recommendation he was established. I should not have mentioned anything about the agents had it not been for Mr. Powell's evidence, by which many may suppose that nothing irregular is done through his office. I beg to remind the Board that I had too much work to do in my seat, having had to clear all ships foreign and coastwise, with the exception of steamers coastwise, make a return of the same, and also having had to keep Export Blue Book Return. The duties of my seat are now performed by two individuals.

No. 114.—The entries were checked by me.

No. 115.—The clearance was complete in every respect; the record copy only wanted my attesting signature.

No. 124.—Mr. Fancourt says he signed the second copy on the 3rd, in the morning, about 11 or 12 o'clock, which is incorrect; Mr. Collier had the papers on the 3rd in the morning (early); late in the day the reporter asked for them, and I sent him to Mr. Collier, and that gentleman sent him to Mr. Garling; Mr. Garling then brought the papers to me, and said, you have not taken the declaration, &c., &c.: this proves that Mr. Fancourt has made a false statement, because the documents in question were only in the hands of those two gentlemen (Mr. Garling and Mr. Collier) until a late hour in the day.

THURSDAY, 4 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.,

J. M'LERIE, Esq.

James Hartwell Williams, Esq., called in and examined:—

1. *By the Chairman:* You live near Dawes Point? Yes.
2. The stores on Walker's Wharf are in your possession? Yes.
3. Do you recollect Mr. Newton, the export officer, asking your permission, on or about the 3rd September, for eight half-tierces of tobacco to be taken out of your store? No; I have no recollection as to the quantity.
4. Do you remember application being made to you for any tobacco on or about the 3rd of September? An application was made by my storekeeper to let it go out. I will state the circumstances:—Upon the 3rd of September I had a large auction sale upon my wharf; and in consequence of the great number of people that would probably be there, and the great variety

J.H. Williams,
Esq.

2 Nov., 1858.

Mr. C. H.
Mantoa

2 Nov., 1858.

- J.H. Williams, Esq.
4 Nov., 1858.
- variety of articles upon the wharf, which was covered with goods, I had given orders that no bonded goods should be delivered that day. At about half-past nine to ten o'clock, as far as I recollect the hour, the storekeeper came to me, and said that the export officer had sent him to me to ask if I would allow seven or eight half-tierces to go out of bond, as the ship was waiting for them, and the parties would be put to great inconvenience if they did not get them that day; in fact, that the ship had cleared, and was ready to sail the day before, I think.
5. Did he mention the name of the ship? I am not positive about that. I at first refused; but, on reflection, I felt that, as a bonded storekeeper, I ought not to detain a ship for any purposes of my own, called him back, and said he could deliver the tobacco, and I saw it going out of the store myself.
 6. Do you know what tobacco he did deliver? No, but I can trace. There is no doubt in my mind about the fact I have stated.
 7. You have no doubt the tobacco was delivered from your store on the 3rd of September? I am quite certain.
 8. Who was the locker who issued it? I do not know; I had nothing to do with him.
 9. Do you know the export officer who took it? No; and I should not have known the day even, had it not been for the circumstance that I had given orders that no goods should be issued from the bonded store that day—a most unusual thing, a thing I never did before—and their coming to me to make this request.
 10. You have no doubt it was on the 3rd of September this happened? I could swear to it.
 11. Do you know anything more respecting that circumstance? I know nothing more.
 12. Do you find that the Custom House officers stationed at your wharf attend to their duty? I had occasion several months ago to complain to the Collector, not only of neglect of duty, but absolute violation of duty, as I consider it, on the part of the locker.
 13. Will you state the circumstances? I found that the men on the wharf were supplied with spirits; indeed, I was obliged to discharge my foreman in consequence, not exactly for being intoxicated, but so nearly approaching it as to become almost worthless. I was satisfied it must be obtained in the store, for the people are not allowed to leave the wharf. And, moreover, I was told by the wharfinger that he had found the locker asleep in his office, while the bonded warehouse was left open. It was such an irregularity that I considered it my duty to call the attention of the Customs authorities to the matter.
 14. How long ago was this? It must have been eight or nine months.
 15. What was the locker's name? Paget.
 16. Did the Customs authorities take notice of your report? They did take notice of it, in a very different way from what I expected they would have done. I said to the Collector, these are things known to me, but points I should find difficulty in proving; I do not wish to be called upon to prove them, but I wish you to have your eye upon this man, to see whether these charges are just. It was understood at the time that I was not to be called upon to prove them. The Collector communicated with the Treasurer, Mr. Jones, and I said the same thing to Mr. Jones, that my simple object was to have attention directed to the matter. However, things proceeded so far that I received a note from the Collector to say that I should be called upon to prove the charges brought against Paget, the locker, and the consequence was that hours of my time upon three or four days, and of my salesman's time, were occupied at the Custom House in the investigation. I considered that I proved the charges, at least, so proved them, that although Mr. Jones said he should not discharge the man immediately, he should be removed to another store, and be allowed three months to find another situation, which seemed to me quite irregular, for either he was guilty or not guilty. There seemed such a spirit of combination at the time throughout the whole Customs department—I do not mean to include Colonel Gibbes or the higher officers—that a threat was made that my salesman, who gave the principal evidence in the matter, should be prosecuted for perjury. We were quite prepared to meet the charge, but it was dropped.
 17. Is it your opinion that much alteration is required in the management of the Customs Department, for the due protection of the revenue and of the honest trader? I can hardly say, for my bond is chiefly confined to the custody of my own goods; but my impression is that many of the arrangements, especially of the outside department, are not proper.
 18. You refer to the out-door officers? Yes, the tide-waiters and lockers. I have been here some twenty years, and formerly they were more under my eye than at present, and I believe that many of them are men altogether unsuitable.
 19. Have you formed any opinion of your present locker, Mr. Brown? He is removed.
 20. Have you been able to form an opinion of his conduct? No; I have hardly seen him. I seldom go into the bonded store myself. I make the storekeeper responsible for what he does in the matter. I am satisfied that my own bonded store has been much better conducted since that inquiry took place than it was previously.
 21. You are satisfied that much reform is necessary in the out-door business of the Customs? I hardly know so much of the character of the officers now as when I was nearer the Custom House. My impression, as a general thing, is that they have not been proper appointments.

William Watts called in and examined:—

1. *By the Chairman*: You are storekeeper at Walker's Wharf? Yes.
2. Now in the possession of Mr. Williams? Yes.
3. Have you brought any books with you? Yes.
4. Will you let the Board see them? Yes. (*Witness produced the books.*)
5. You place two books before the Board—what is the smaller one? The cash and delivery book.
6. And the larger one? The stock book.
7. What is the object of the cash and delivery book? To make entries of the goods as delivered, without specifying the numbers on the packages, and also of the money received for store rent and charges.
8. And the larger book? Specifies the numbers of the packages and the stock delivered each particular day.
9. Is there any account shewing the stock on hand? This will shew it.
10. Have you an entry in your book, on the 3rd of September, of eight half-tierces of tobacco marked N 442? Yes.
11. You have against it the rent you received? Yes.
12. To whom did you deliver these eight half-tierces? To the export officer.
13. Who was he? Edward Newton.
14. At what time of day did you deliver them? About ten o'clock, as near as I can tell.
15. On whose account were they said to be exported? W. Stewart.
16. Are you certain it was on the 3rd September these goods were delivered? Yes.
17. What makes you particularly remember it besides the record of the book? We had a large auction sale that day, to take place on the 3rd, and Mr. Williams instructed me the evening previous, or early in the morning at breakfast, not to deliver anything, and when the officer came I refused to deliver them till he went to Mr. Williams and got permission. That is one thing that impresses it upon my memory; the other is, there is the certificate, and there is where I calculated the rent upon the back of it (*producing the same.*) I calculated the store rent up to the 3rd.
18. Was the store rent paid without any demur? Yes.
19. Who paid it? Mr. Newton.
20. Does the export officer pay you the rent? In general, because I do not give the goods up without the rent—the drayman, or the export officer, or whoever comes for them.
21. Then he acted in that capacity for Mr. Stewart? Yes.
22. On the back of the certificate I see you have made a memorandum of the store rent due? Yes.
23. Was that made at the time? Yes.
24. In the presence of Mr. Newton? Yes.
25. And he then and there paid the Bill? Yes.
26. Where was Mr. Brown at that time? In the bond.
27. Had Brown then given you instructions to deliver the goods? Yes.
28. Those instructions were given the same day? Yes.
29. You are quite sure he did not give instructions overnight? Yes.
30. Was Mr. Brown aware at the time that the goods were being removed? Mr. Brown was there seeing them removed. He was not present when I made the bill out.
31. After you had made the bill out you went down and, with Mr. Brown, delivered the goods to Mr. Newton? Yes.
32. Did they say where they were going to? For exportation, that was all. I cannot speak positively whether the vessel was mentioned or not.
33. Did you examine the export warrant at all that day—did you see who was the agent who prepared the warrant? I cannot say that I did. It was not my custom to examine them; I may have done it sometimes.
34. You did not notice it in that particular case? No.
35. *By Mr. Browne*: What description of tobacco was it—of good or inferior quality? I think the last time we sampled it it was rather inferior.
36. Was the entry in the delivery book made at the time? Yes.
37. Shewing the amount you received for store rent, £6 15s. 4d.? Yes.
38. Do you know how it was paid, whether by notes? I received altogether £6 17s.; there was £6 15s. 4d. for the charges, 1s. 6d. the usual fee paid to the men for loading it, that left 2d., and as I had no change I received £6 17s.
39. How was it paid—in notes, money, or cheque? It was in cash, in notes I think, not a cheque.
40. Were these the only goods you delivered from bond that day? That was all.
41. These you would not have delivered unless you had received express orders from Mr. Williams? No; in consequence of the orders he had previously given not to deliver anything.
42. You do not know whether Newton made any remark to the effect that the vessel was waiting for these goods? He said they were for exportation, and he must have them out, for the vessel was going out.
43. Do you remember who was the drayman that came for them? Two draymen came for them; one, I believe, was one O'Brien.
44. The other you do not know? The other I do not know.
45. Did you ever see any of the tide-surveyors on the wharf, either Mr. Collier or Mr. Bremer? I have seen Mr. Collier.
46. Not Mr. Bremer? I do not know him.

W. Watts.
4 Nov., 1858.

Mr. Henry Anderson called in and examined :—

- Mr. Henry Anderson.
4 Nov., 1858.
1. *By the Chairman*: You are a landing-waiter, I think? Yes.
 2. Were you stationed at the Flour Company's and the Grafton Wharf on the 2nd of September last? Yes.
 3. Was it not the export officer's duty to report to you any large quantity of dutiable goods shipped at either of those wharfs on that day? Yes.
 4. Did Mr. Newton report to you his being about to ship a large quantity of goods on board the "Louisa" that day? He did not.
 5. Do you remember the "Louisa" being alongside the Grafton Wharf on the 2nd September? I recollect the "Louisa" being either there or in the stream, but I could not say positively whether she was alongside the wharf or not.
 6. Did you notice at all what goods went on board the "Louisa" that day? No; I could not tell.
 7. Did Mr. Newton apply to you that day to sign the export warrants for the shipment of certain dutiable goods? No; he could not have applied to me, for this reason, if I had seen him I would have signed it at once.
 8. Do you think that 34 dray loads could have been shipped from that wharf, on board the "Louisa," without your knowledge? Hardly thirty-four, I think.
 9. Do you think half that number could? I think half that number would have been noticed either by one or other of us.
 10. Who is the other you refer to? Mr. Carron.
 11. You are quite certain that 34 dray loads of goods were not shipped that day on board the "Louisa?" I could not say.
 12. It is possible? They might have been shipped, as far as I know of.
 13. If you had been asked to have signed for the shipment of 296 packages that day on board the "Louisa," without seeing them, would you have done so? I would, if I had seen the mate's signature and the export officer's, for he is the one we look to.
 14. You look to the export officer? Yes.
 15. You would have signed, having seen his signature, whether you had seen the goods go on board or not? Yes.
 16. You do not even require to be cognizant that the goods have been shipped, except in so far as you receive the testimony of the mate and the export officer to that effect? We do not require to see it, unless we have a doubt, which we sometimes may have.
 17. If the goods had been shipped from Towns' Wharf would you have been justified in signing the warrant after having seen the signature of the mate, as well as that of the export officer—I am assuming that Towns' Wharf would not have been within your beat? If I went down to that wharf on any business, and the officer there was out of the way, if the export officer came to me and shewed me the mate's signature, I would have no hesitation in signing.
 18. Suppose you had been at the Custom House, and not at the wharf, and the export officer had come to you and asked you to sign the export warrant, would you have done it, having seen the signature of the mate and export officer? There is a rule to that effect.
 19. Then the custom is, that wherever an export officer can catch a landing-waiter he is authorized to get his signature, and the landing-waiter is authorized to grant it? No, not that, but as I tell you, if I went on the wharf and did not find the landing-waiter there, or an export officer came to me when I was there, I should have no hesitation in signing it, if I saw the mate's signature and the export officer's.
 20. Suppose the export officer found you elsewhere, not on the wharf, and he said he had not been able to obtain the signature of the landing-waiter to the warrant, would you then sign it? Yes, I think I would, if I knew the man. I cannot give answer.
 21. Let me put it to you another way: Do you think Mr. Bramwell's having signed that warrant in this way irregular? Not at all irregular; I would have done the same thing for him.
 22. Was he at your wharf that day? He came there, I believe, after we left.
 23. On the 2nd September? On the 2nd September.
 24. Can you form any idea what brought him there? I can form an idea. He came down there a little after four o'clock—about ten minutes after; we had little or nothing doing; I had no ship at that time myself, and I recollect I left at sharp four, instead of waiting till half-past four or five; he came down there after his hour was up, upon some business of his own, and I suppose met the export officer and signed the warrant.
 25. Then do you know as a fact that he signed upon the wharf? I do not.
 26. He signed after hours? He signed then. I would do the same thing myself.
 27. He did sign after hours that day? I believe it was four o'clock or so, or after four o'clock.
 28. Did you not say just now that he came down to the wharf? I am not talking of what I know for a fact.
 29. *By Mr. Browne*: Where were you during the whole of the 2nd—were you very far away from the neighbourhood of the Grafton Wharf any portion of the day? There is a long beat there; I could not say exactly where I was, for I was all about that day; we had a vessel up the length of Barker's Wharf, and we had to pay attention to the whole of those wharfs.
 30. You said you had no ship that day yourself? I had no ship discharging that day.
 31. Therefore you would not be fixed to any particular spot? I was moving about the whole of my beat.
 32. Were you at any time during the day on the Grafton Wharf? I must have been on the Grafton Wharf two or three times perhaps.
 33. Then, if during any of the time you were on the Grafton Wharf you had seen two hundred or three hundred packages of dutiable goods being shipped on board a vessel, would you

you not naturally have staid to see where they were going? I would have staid to see where they were going, if I had seen them.

Mr. Henry
Andersen.
Nov., 1858.

34. If goods to that extent had come down, would it have been possible for you not to have seen them? It was possible I might not have seen them, for I might have been at other places at the time.

35. Considering the time that would be occupied in discharging from the drays and shipping three hundred packages of goods, some of them large, bulky articles, could they have been all put on board a vessel without your seeing something of them while passing and repassing during the day? I think it is possible; I might have been on the beat in the morning and in the afternoon, and they might have been shipped during the day.

36. Would it not have taken quite the whole day to have got these packages on board ship? How many packages?

37. Two hundred and ninety-six packages? It would have taken a long while.

38. There were a large number of hogsheads of brandy and rum—they could not have been handled? No.

39. Have you reason to believe they were shipped? I have no cause to think otherwise.

40. If the shipping officer, Mr. Newton, had wished to find you, could he not have found you, or Mr. Curran? He could before four o'clock.

41. Is it customary to ship dutiable goods after hours? They get them out of the bonded store perhaps before four o'clock, and then take them on board; the officer is then obliged to stay alongside the vessel till they are taken aboard, and the mate will not sign till they are below hatches, nor will the officer put his signature to it.

42. Is not the officer of Customs supposed to be a check upon the mate or captain, and not the mate to be a check upon the Custom House officer? The mate receives them on board, and the export officer makes them delivered on board.

43. You attend the discharging of a vessel as a landing-waiter, do you not? Yes.

44. What control or check have you over the discharge of that vessel, or any one vessel that may be discharging a sugar cargo, for instance, to know that the cargo is discharged in accordance with the warrants you receive? There is a tide-waiter on board who keeps all the tallies.

45. Do you take any steps to check the tide-waiter's tallies? Yes, every day; perhaps every half-hour I just go and look on.

46. Is it the duty of the landing-waiter to check the tide-waiter's books at least once a-day? He can do it once a-day, or twice a-day, if he chooses.

47. He should do it once? That I do not know; I never received instructions.

48. You act upon your own responsibility and judgment? Yes.

49. If a tide-waiter sanctioned the discharge from a ship of 57 tons of sugar, on a warrant for the discharge of 20 tons, do you consider that the landing-waiter ought to have discovered that before the ship was discharged, or when she was discharged? I never knew such a case.

50. If it did occur would you have detected such an error? I could not say that I would, but I would do my best towards it.

51. Will you look at these books? (*Tide-waiter's books relative to discharge of "Fanny Fisher."*) Are these books regular or irregular—what do you think of these books? I prefer not to answer the question.

52. Being a landing-waiter in the service you are bound to answer a question affecting the particular duty of a landing-waiter. What objection have you to answer it? I see the tide-waiter's book is kept in a very bad manner.

53. I want to know whether the landing-waiter ought not to have discovered that before it came into the hands of the jerker at the Customs, if he had done his duty? I have got three vessels at the wharf now —

54. Answer the question, Yes or No, and then give us an explanation afterwards? He might have discovered it. I have generally made it a practice myself to get the books at the dinner-hour, when I am not disturbed, and to check one or two of the tallies.

55. Are not the additions there totally incorrect? Yes. I would check not only the additions but the tallies, it is so much easier afterwards.

56. The landing-waiter is supposed to be the responsible officer, is he not? He is.

57. It is his duty to check the tide-waiter's book, and see that the goods are delivered according to the warrants? Yes.

58. Do not the warrants come to the landing-waiter? Yes, and he hands them over to the tide-waiter.

59. What is the class of persons employed as tide-waiters, generally? I have found them all very decent, the whole of them.

60. All sober, steady men? All sober, steady men, so far as I know.

61. You think them a proper class of persons to be employed in that capacity—I am speaking of the extra tide-waiters? I have not had much experience as a landing-waiter.

I am the sixth landing-waiter, and have been but a year in that office; but those that I have had to do with I have always found very efficient, excepting one or two.

62. Young men, are they? Some of them are old men.

63. Have you known any of them to have tumbled overboard from any of your ships, and been drowned? No.

64. Such things have happened, have they not? I do not know.

Mr. James Powell called in and examined:—

- Mr. J. Powell. *1. By the Chairman:* You are a Custom House Agent? Yes.
- 2.* How long have you been so? I have been an Agent for the last five months only, but I have been connected with Customs business about eighteen years.
- 3.* In what capacity? I was in the employ of the London Dock Company thirteen years.
- 4.* How long have you been connected with the Customs here? About six years, as clerk to Mr Metcalfe.
- 5.* The Board wish you to describe the successive steps taken, with reference to the Customs, from the first entry of a vessel into port till she is finally leaving it again? I am sorry I have not had time to get the necessary papers together. I could have made it much more clear if I had them; but I think I can explain. The first step would be (in making the report inward) to produce the clearance from the last port of departure, then to make two fair copies—one on a printed form, and there should also be a landing-waiter's copy, which is a written one, which is ultimately forwarded to the Audit Office. It is then necessary to procure the Post Office certificate, and to proceed to the entering clerk and hand in the papers; he would require the production of the ship's register, and would then enter the vessel in the books. The declaration should then be taken by the Chief Clerk, and the printed form handed over to the clerk who has charge of that particular duty, for the purpose of passing entries for the cargo.
- 6.* What is the next step? We will suppose the cargo of the ship to be duly discharged, the papers are then sent in to the jerker for examination, and the vessel should be rummaged by the tide-surveyor to ascertain that the report of stores is correct.
- 7.* In rummaging is it his business to check the amount of stores stated? Yes, to ascertain that the stores are correctly stated. The rummage should extend to the cargo. There might be dutiable goods remaining on board, perhaps a cask of rum.
- 8.* Should he sound the cask of rum? He would not gauge it, but he would sound it, and get an approximate estimate within a few gallons of the contents.
- 9.* It would be his duty to ascertain that? As nearly as possible.
- 10.* Assuming that the vessel had gone through the regular process of discharging her cargo, and had been correctly jerked and rummaged, she now proceeds to take her cargo outwards of bonded or other goods? I think it would be better to confine myself to the ship first. I now proceed with the ship clearing outwards. The outward manifest would be handed to the jerker for the purpose of examination; the jerker, upon finding that the inward cargo was properly disposed of, would sign his name, and the papers would then be handed to the clearing clerk with the manifest outward of the vessel; he having examined the outward cargo, and checked it with his entries, would cause the declaration of the captain to be taken by the chief clerk, after which he proceed to make out the clearance, which having been done the Collector would sign it; the ship would then be allowed to proceed upon her voyage.
- 11.* Would the document require any signature of the jerker? I have already stated it would require the signature of Mr. Fancourt, the jerker, before the clearing clerk could act upon it.
- 12.* Would you describe how goods under bond are exported? We should prepare four export entries for each parcel of goods; having first given the necessary bonds, they would be initialled by the warehouse-keeper, to prove the fact of the goods being in bond, they would then be taken to the chief clerk, who should initial each set of entries, to prove that the bonds had been duly given, they should be then handed to the clearing clerk, for the purpose of being numbered and passed, after which they should be returned to the warehouse-keeper, who would then issue his warrant to the export officer, whose duty it would be to obtain the goods from the bond and see them shipped. The export officer would have the goods delivered to him by the locker, he would then convey them to the ship, obtain the receipt of the chief officer, and also of the landing-waiter upon the station, return one of the documents to the clearing clerk in order to clear the vessel outward, and one to the warehouse-keeper, to enable him to write the goods off in his books. I think I have already stated the practice of clearance outward. It would be necessary for the clearing clerk, having these documents, to see that they were properly manifested, and that all the necessary signatures were obtained before he allowed the outward report to leave his hands, or the declaration to be taken.*
- 13.* Are you acquainted with the Customs practice in London? Mostly with the water-side practice, that is, the out-door practice.
- 14.* Is it the practice there to clear out foreign going vessels after hours? I never knew any foreign vessel excepting tidal steamers to be cleared after hours; it would be almost impossible, for before she leaves the Docks she has to be cleared, and then drops down to Gravesend, and the clearance is put on board there.†
- 15.* The reason that they do not clear is, that they have not time to do the necessary business?

I

* Four documents are required. One copy is retained by the clearing clerk when he numbers the document; this copy, which bears no endorsement, is afterwards bound with others and kept in the Long Room. Another copy (which is also unendorsed,) is forwarded to the Audit Office. The two other copies, or warrants, which bear the signatures of the locker, export officer, mate, and landing-waiter, are given, one to the clearing clerk to clear the ship, after which it is put away with the the ship's papers; the other warrant is kept by the warehouse-keeper as voucher for the delivery.

† By clearing after hours, I mean such a clearance as that of the "Louisa," where one officer combined the duties of five other officers, without their knowledge, in violation of established routine. I have frequently cleared vessels after hours; almost every Saturday this occurs; but every signature is obtained, and the necessary documents produced preparatory to the clearance, before the hour of closing. The advantage in clearing later under these circumstances is very great, enabling vessels to receive free goods much later than they otherwise could. The clearance is always made at the Custom House, and not on board the ship, with rare exceptions. One case I remember where the clearance was made or given on board. There was an object to serve. This alone, I think, is sufficient to shew how undesirable such a practice is. I have referred specially to the steamers in my evidence.

- I never heard of such an application being made. Officers are specially appointed to clear Mr. J. Powell foreign steamers in England leaving with the night tide. No application is requisite.
16. Do you consider it an objectionable practice to clear out foreign going vessels after 4 Nov., 1858. hours? Except steamers, unless very good reason could be shewn.
17. You think it very likely to lead to fraud? Yes; the absence of the principal officers would leave the door open to fraud.
18. In fact, officers like the jerker, and other necessary officers, would be absent after hours, and then the duty would fall on subordinates? Yes; the clearing officer would act as Collector, as jerker—in fact as everything, where he has such power.
19. That leaves very large responsibility in the hands of one officer? It leaves the whole responsibility in his hands, and places all other parties connected with the vessel in a very precarious condition. For instance, the jerker may have post entries unpaid against the vessel, or goods to be accounted for, and would be secure if the papers passed through his hands in a proper manner. If the clearing clerk takes upon himself to clear the vessel without the knowledge of the jerker, that officer is entirely at fault.
20. What authority has the clearing clerk to act for the jerker, even after hours? He has no authority whatever to act for the jerker. If a vessel is cleared after hours and the jerker does not happen to be present, his part of the duty is neglected.
21. You think the clearing clerk should not clear vessels without seeing the jerker's signature? Undoubtedly not; for then no check can be exercised upon the inward cargo.
22. Is it customary for agents to sign bonds for goods about to be exported to the South Sea Islands? I should sign perhaps for Tahiti or New Caledonia, but not so vaguely as the South Sea Islands. I do not think an Agent would like to sign a bond either for Tahiti or New Caledonia; certainly not for a large sum. He would feel that where there was no Custom House he would be placing himself in jeopardy.
23. Do you know whether it is the practice at home to see that the bonds are carried out in their integrity—is it incumbent upon the parties to shew that the goods have been landed? I do not think it is necessary to produce a certificate to shew that the goods have been landed. We never give a certificate now, not even to English vessels arriving at this port, as to the discharge of dutiable goods.
24. Has the Collector ever given orders to prevent the Custom House Agents from signing bonds? I believe he did give an order in the case of Mr. Metcalf. He had signed a bond some years since which caused him much trouble; and, in order to protect him and other agents, the Collector issued the order that in future they should not sign bonds over £200.
25. Do you know whether it has ever been broken through? It has never been broken through in our office, except to ports where there is a Custom House—say New Zealand, Melbourne, or Tasmania.
26. Has it been broken through in the case of the "Louisa"? If the parties acknowledge the rule as we did it certainly has been broken through, if it be a rule. We always considered it a protection not to sign the bonds, and therefore accepted it as a rule.
27. Who took that bond? Mr Maddocks.
28. Has he taken it contrary to the existing regulations? There is great difficulty to say what are fixed regulations in the Customs here. There are no minutes. A rule may be made to-day and broken a few days hence.
29. The instructions given are not in writing? Never in writing* unfortunately; I think it would be very much better if they were. You should have something like fixed practice to act upon.
30. You cannot say whether that—(referring to taking of bond)—has been given against or in accordance with the regulations? I cannot, for I do not know what the regulations are. At home we have Treasury Minutes or Board's Orders for everything, and we know how to act; here we have merely verbal instructions, which may be altered from time to time.
31. Do you sign such bonds in practice? I would not sign such a bond as that.
32. Do you in practice sign any bonds from Tahiti or New Caledonia? I have signed small bonds for Mr. Drentler under £100. I would not object to sign under £200 for persons I knew, if the goods were going to places of which I knew something of the trade.
33. What is the practice with regard to landing-waiters signing the export warrants for goods that are shipped? They should be signed by the landing-waiter on the station, but they rarely are; the first landing-waiter the export officer gets generally signs.
34. If the export officer at the Grafton Wharf were to ask a landing-waiter at the Custom House to sign would he be justified in doing so? It has been done; I cannot say it is the practice, but it is common to do it.
35. Is it allowed? It is certainly allowed.
36. Recognised by the Collector? I do not know whether the Collector has known it, but it has been done for years.
37. Has it been recognised throughout the department as allowable? Yes; I have seen landing-waiters asked to sign papers, and they have signed at once.
38. Do you think that in this case Mr. Bramwell was to blame in signing that paper, when he belonged to an entirely different wharf, and had no knowledge of the goods? I think it was a very injudicious step.
39. In what way? So large a quantity of goods being shipped at a place where he could have no control over them.
40. You think the quantity of goods should have excited suspicion? Yes: if it had been a box of tobacco or a case of cigars he might have signed the papers without further consideration.

41.

* Minutes are and have been made in writing from time to time, but, no record having been kept of them, they cannot be referred to, and are useless.

- Mr. J. Powell. 41. Do you think the extraordinary amount of goods said to be taken on board for one day could not have failed to draw his attention? It is an extraordinary amount of goods; I never
 4 Nov., 1858. knew such an amount of dutiable goods to be shipped in one day. I cannot conceive a person shipping so many goods to discharge his duty properly.
42. You think there is no excuse for the landing-waiter? Except that it has been the practice.
43. Do you not think that if he had been a man of reasonable intelligence his suspicion would have been excited? I will not say his suspicion should have been excited, but I think he should have known something of the business before he signed.
44. Had the quantity of goods not been extraordinary he would have been justified according to the existing regulations? According to the existing regulations he would have been justified, but nevertheless I think it very wrong.
45. *By Mr. Brune*: Is it not intended as a check upon the export officer that the landing-waiter, as his superior officer, should certify? Yes, upon the same principle as the searcher in England in signing shipping bills; but no searcher would betray his position by signing shipping bills he knew nothing about.*
46. *By the Chairman*: Do you know that Mr. Barnes gave orders that these men should sign? Mr. Metcalfe has told me so, and he told me that in one case the landing-waiter refused, and Mr. Barnes insisted.
47. What was the objection? Because he did not know the goods were on board. He told Mr. Barnes, and Mr. Barnes insisted, and said if he did not know they were on board he should have known, as they were on his station.
48. He insisted he should sign, although he did not know? Yes; and he gave him the alternative of being declared incompetent for his position if he did not know what was going on on his station. Of course this is only from Mr. Metcalfe's statement to me.
49. What is the general impression with regard to Mr. Barnes' order—was it understood that the landing-waiters should sign for goods whether they saw them shipped or not? My impression of the matter is, that Mr. Barnes intended this should be something more than a mere form; he wished to establish the practice as it existed in England; he meant that the ships should be searched, and that the landing-waiter or searchers should know everything that went on on their stations.
50. Do you think their position enables them to watch? I think two men are not sufficient to keep a proper supervision over the vessels at the wharfs in Darling Harbour, which extend a mile and a-half.
51. You think the landing-waiters cannot see to all the goods shipped? I think not.
52. Was Mr. Barnes aware of that? The extent of the wharfs was not so great in Mr. Barnes' time.
53. There are nine landing-waiters now upon the establishment—do you think they can look after all the vessels? I speak more especially with reference to the officers in Darling Harbour, when I say they cannot look after it.
54. Then, to get their signature to the document to mean what it implies is impossible? Yes, with two it is quite impossible.
55. Is there assistance sufficient obtainable in the whole staff of the Customs to discharge all the duties—are nine officers sufficient? They have to attend to all the import duties and to gauge †
56. Is it practicable with the present staff to obtain the signature of the landing-waiters to the export warrants, and at the same time for them to see that the goods have been shipped? No, I do not think it is.
57. Then it is of no use to insist upon these documents being signed by these landing-waiters? I think the propriety of doing so still exists, but I do not think there is a sufficient staff to carry it out. I think a better system might be devised.
58. As it is impossible that nine landing-waiters can see to the shipment of all goods exported as well as the discharge of vessels, is it right to require them to sign these documents? I think it better they should not sign at all than incur the responsibility. If I were a landing-waiter I should very respectfully decline to sign, except I knew something of the shipment.
59. They ought not to be required to sign under existing circumstances? I think not; still the necessity for the check exists.
60. Will you examine these two clearances of the "Louisa," one on the 2nd of September, and the other the 7th October, to see whether they are regular? Here is an irregularity in the warrants. I see the goods were not re-gauged at the time they were taken out of bond; I see they have been delivered out at the same gauge as they went in. It is very unusual for any exporter to be satisfied to pay for the same amount of liquid as at the time of importation.

61.

* The duties of landing-waiter and searcher are combined at this port. The landing-waiter in England has only import ships to attend; the searchers, export ships. The searchers' duty has until lately been performed by the landing-waiters. As an illustration of this, I may refer to the shipment of goods for drawback, which have been always under the control of the landing-waiter, who has signed the documents, not as landing-waiter, but *searcher*. The searcher in England does not see all the goods shipped, yet he signs; his being on the station gives him an opportunity of looking after the file-waiters, who take an account of the goods received, and forward their books, which are carefully examined previous to the clearance being given. It is also the practice of searchers to examine goods occasionally, to see that the contents are duly entered; the exporter attending to open or close packages.

† This answer has an appearance of evasion. I did not feel myself at liberty to give any opinion as to the working of the department. In answer to question 57, I have stated that a better system might be devised. I beg to state, in addition, that I am of opinion that there is a great want of system throughout the Customs' Department; and also that, with better organization, all the duties required could be performed in a much more satisfactory manner with numerically the same staff.

61. Is it usual to re-gauge? The order is to re-gauge, because they might not otherwise detect a fraudulent deficiency. Mr. J. Powell.
62. There seems to have been unnecessary haste? It looks like it to me I also notice that Mr. Newton has acted as clerk in the matter. These documents are very carelessly got up; there is no value, no master's name; and five months after they have been bonded the exporter is content to take the same gauge out of bond that was put in. No prudent merchant would take goods out of bond the same as they went in without re-gauging, because there might have been a fraudulent abstraction of liquid. I see one of these warrants bears no date, value, or master's name. 4 Nov., 1858.
63. Whose handwriting is that in? The agent's, but I see the export officer, Mr. Newton, acts as clerk, in a manner; he has endorsed these documents, which is a very unusual circumstance.
64. Whose duty is it to make these endorsements? The locker's duty.
65. He endorses them when he delivers the goods? When he delivers them, and the export officer signs for the receipt of them.
66. *By Mr. Browne*: Is there any other omission or irregularity in the clearance? It is not signed by the jerker.
67. It ought to have had the jerker's initials before the contents were filled up? Before the paper was handed to the clearing clerk.
68. Do you know whether it is customary in this port to clear vessels on board the vessels themselves when they are foreign bound? They have never, within my own knowledge, cleared during the time I have been in the Custom House, on board the vessel, except the Melbourne steamers, and those only on Saturday, by special order from the Collector; and that is merely a permission to clear with free goods—not with bonded goods. It is a great convenience to shippers of fruit to ship at the last moment.*
69. Is there any other irregularity in that clearance of the 2nd? Nothing else.
70. Look to the clearance of the 7th; take it in conjunction with the entry of that vessel on the same day, and see whether these papers are correct? This is the clearance. A copy of this should have been written. The Post Office certificate seems not to have been obtained; I notice a memorandum of Mr. Fancourt's to that effect.
71. Is it usual to allow a vessel to enter inwards without a Post Office certificate? I have two or three times got Mr. Fancourt to allow a vessel to be entered before the captain got the Post Office certificate, but nothing has been done beyond entering the vessel.
72. You would not allow a vessel to clear again without having it? I would not allow her to land a package, or do anything. I think it would be very foolish to do so. There is no rummage certificate with this paper; I do not know whether you have it; you should have a clearance from Mr. Venour, of the Shipping Office, which should be with every clearance, and the rummage certificate also.
73. That is an informality? It will be if it is not here; the Shipping Master's certificate and the rummage certificate should be with the outward papers.
74. Should similar certificates be attached to the clearance of the 7th also? Yes, the same documents would be required in both cases.
75. Does that bear the jerker's certificate also? (*Handing the clearance*) That has not been jerked.
76. With an informal entry at half-past three o'clock in the evening, a clearance at five o'clock, without the jerker's certificate, or the Shipping Master's certificate of her having shipped a crew, would not the whole of that clearance on the 7th of October be irregular and informal? Yes.
77. Are there any rules of practice that have been adopted that would justify the clearing clerk clearing the vessel on this occasion with this informal paper? None.
78. I now come back to the question of the Chairman with respect to the certificate of the landing officer—if I clearly understood you, you thought it was a necessary certificate? I think so; most essentially necessary.
79. It is a similar one to that obtained from the searchers at home? Yes; and similar to that obtained here for obtaining goods before drawback is allowed.
80. Is it the practice to seek for a landing-waiter ———? We have nothing to do with that; the export-officer attends to it.
81. They come to you in that shape, complete? Yes. The clearing-officer should not sign the documents unless every entry is correct.
82. Mr. Bramwell is an old landing-waiter? Yes; he is an old Liverpool officer.
83. Would he not, on the face of this document, observe this irregularity? I think not; I think it is very likely he signed it without knowing what he signed.
84. You think he did not look to the quantity of goods? I doubt whether he thought about it, or looked at the papers; he merely signed them as a matter of course.
85. As far as the public or the revenue is concerned, would you consider it would be better to prevent an officer from signing a certificate, unless he saw the goods shipped? I would not do so; the signature being that of a subordinate †
86. Are not the export officers of a lower grade than the landing officers? They are of a lower grade; they are, generally, men of very low average ability.
87. Do you refer to the extra tide-waiters? The same remark will apply to the permanent tide-waiters.
88. Are they persons who should be entrusted with the shipment of some £2,000 or £3,000 worth of dutiable goods without the presence of a superior officer? I think not. This clearance

* See note to question 14.

† I would not abolish the signature of the searcher, because I consider it implies the supervision of a superior over the acts of a subordinate officer.

Mr. J. Powell. clearance (referring to the "Louisa's" clearance on the 7th October) has not been initialled to shew that the pilotage has been paid; therefore, for aught we know, no pilotage was paid; but the whole system of collecting pilotage is a very bad one.

4 Nov., 1858. 89. Who is the clerk who takes the pilotage? Mr. Mackenzie; he is a junior clerk in the department. I think it very strange that there should be two cashiers in the department

90. Mr. Mackenzie ought to have initialled that paper, to shew that he had received the pilotage? Yes; it should bear his initials

91. *By the Chairman*: Ought not the export officer, in the case of shipping these goods on the 2nd of September, to have applied to the landing-waiter on the station before he had applied to any other to sign the warrant? Yes; he should have gone to one of the landing-waiters stationed there; there are two on that station close to the wharf at which the "Louisa" received cargo.

92. *By Mr. Browne*: Do you think it possible for one officer to have put all these goods on board in one day? His signature is to the document; but I never got such a day's work done; if I could only get a quarter of the work done in one day I should think myself very fortunate. Sometimes I find a whole day is wasted with a few half-tierces of tobacco; but perhaps a powerful stimulant was applied.

Mr. William Munday called in and examined:—

Mr. W.
Munday.

4 Nov., 1858.

1. *By the Chairman*: Do you remember on the 2nd of September delivering sundry cases of gin from Lamb's Wharf? I do.

2. Do you remember what number you delivered? 200 for exportation, and 50 for removal to the Chilian Bond.

3. At what time did you deliver the goods for exportation? Four dray loads before one o'clock, and four after two o'clock.

4. At what time did you deliver the goods for the Chilian Bond? I believe in the afternoon.

5. At the same time that you delivered the goods for exportation? No; the goods for exportation I delivered to one officer, and the others to another.

6. Who was the officer to whom you delivered the goods for removal? I am not positive; I think his name is Robertson.

7. Who was the export officer in the other case? Mr. Newton. Two loads were taken to the Chilian Bond: the drays take twenty-five in a load.

8. *By Mr. Browne*: Is it customary to take out a transfer order for goods and a delivery order at the same time for export for the same person? I could not account for that in any way; if a proper officer comes and brings an order from the Customs, knowing the signature to be genuine I deliver the goods.

9. When did you sign that paper for the cases of gin attached to the warrant? On the 2nd.

10. Will you look at that paper? (*Handing the witness the export warrant*) It was the 2nd.

11. Who filled up the paper on the back? I did.

12. Is it usual for the locker to do so? Yes.

13. It is not usual for the export officer to fill up the back of the warrant? No; I never knew him to do it; all the time I have been there I have done it myself.

14. Is it customary to regauge spirits before exportation? It is.

15. Is that practice seldom deviated from? I believe it is. I am some times told that I do what some officers do not, and I am blamed for keeping them waiting. I say, "It is my duty to regauge." The cask might be half empty, and I never allow spirits to be shipped without dipping and calculating the contents.

16. Who was the export officer who came for the gin? Mr. Newton.

17. Did he take all the four drays together? The way he did it was this: I delivered the gin at the stores, and I am always very particular in respect to the duty of the Customs to see every thing done with my own eye, and in this case I saw every case of gin put on, and every case marked E 56 r. I know this because I had two lots, and the others were marked E 56 2½, and I made this alteration to shew the difference between the two; one lot was 500 cases, and the other 1,000.

18. Did all the four loads go together with Mr. Newton? No; one was loaded at a time, and he sent the drays away.

19. He did not go with each dray? No; he went with the fourth dray; where the others went I could not say. I think he sent three away from the wharf.

20. Do you remember the name of the draymen who took them away? I know the men well by sight. O'Brien took some of the goods, I believe.

21. Another man took some of the goods? Three other men—the goods for exportation.

22. Do you think you could give the names of these? I am afraid I could not; sometimes I hear the men's names mentioned, but there are so many draymen who come about the wharf that I could not say. O'Brien I have known the last six years.

23. Did he come for any? I am not certain whether he took any for the exportation order. He took some of the goods that day, but whether he took part of the export, and part of the removal, I cannot say. Two or three of the men were men who often draw goods for Mr. Stewart. I may also mention, as I am here, that the officer wanted me to send the goods on, and said he would go first, which I refused. I said it was my place not to do such a thing as that, but to deliver the goods to him according to my warrant. He said it was too strict, and in every way possible trying to impede the shipping of goods. I said I would not do as he wished, and if he did not like to take them according to rule he might leave the goods. I was obliged to do so, for I had had to take the matter before the Police Office.

24. With reference to this same officer? No—might it be through the instigation of this officer—the manner in which he demanded them; therefore, I was determined to be very particular.

- 25. Do you think the last dray load was away before three o'clock? The last dray load was away by three.
- 26. You know pretty well, I suppose, how long it would take to remove and tranship a large quantity of goods? I do.
- 27. Do you think it possible for one officer to remove and tranship in one day 296 packages, consisting of such goods as those described in this manifest? I think no officer in the department, or any other person out of it, could perform it in the time this was done in. I have done a great deal of export duty—for I at one time acted as export officer—and I never could do it. I was, I believe, as active as any one, and I could not remove such a quantity of goods from the various bonds to the Grafton Wharf, or any other. It might be done, if the officer sent away the drays without going with them.
- 28. *By the Chairman*: Could you ship half the quantity of goods in a day? I might do perhaps half.
- 29. Even if you removed the goods from five different wharfs? Yes, if there were no delay at the stores, and sometimes there is a great deal of delay. The delay at Lamb's Wharf on this occasion would be from about half-past eleven till one, and the delay after dinner from two till about three.
- 30. *By Mr. Browne*: You have been an export officer? I have acted as an export officer.
- 31. When you acted in that capacity to what officer did you take the certificate to be signed? Generally to the landing-waiter of the wharf where the vessel was lying upon which the goods were shipped; but if I could not find him I would go to another, and I have occasionally gone from Darling Harbour down to Pinchgut and got a warrant signed that should have been signed by the landing-waiter at the Flour Company's Wharf. I never received any other instructions.
- 32. Would you do so where a large quantity of dutiable goods were shipped, as was said to have been the case with respect to the "Louisa"? I should not think there was anything wrong, seeing that the signatures were right; but if the quantity were so large it might require some consideration. The landing-waiter signs on the strength of the export officer's signature; he takes his word for the shipment of the goods. I never put goods on board without the chief mate's signature, and if there were no chief mate I got the master's signature.

Mr. W.
Munday.
4 Nov., 1858.

MONDAY, 8 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

II. H. BROWNE, Esq. | J. M'LERIE, Esq.

Mr. William Cathcart Still called in and examined:—

- 1. *By the Chairman*: What is your position? I am Inspector of Warehouses in the Customs.
- 2. What is the nature of the duty you discharge? The general superintendence of the warehouse branch of the department.
- 3. Have you the regulating of the books that are kept by the lockers? I have the supervision of those books.
- 4. Are they regulated by you, or do you merely check them—is the way the books are kept ordered and directed by you? They follow on the system that was organised when I joined, but I have likewise supplemented those books by others.
- 5. Do the lockers' books shew every thing that is taken into the warehouse? Yes.
- 6. And every thing that goes out? Yes.
- 7. In the case of a transfer from one warehouse to another, is there any means of checking that—the goods go to the warehouse to which the order purports they are to be transferred? In the first place, a manuscript application is made to the Collector by the owner of the goods to remove his goods from one warehouse to another; upon that a locker's warrant for the delivery is issued, and these two papers are then put in the hands of the removing officer; he then goes to the warehouse where the goods are deposited, and shews the locker's warrant for delivery. That paper is retained by the first locker, and the second endorses on the back of the application having received the goods; he then enters the transaction in his stock book and journal; the removing officer then takes back this endorsed application to the warehouse-keeper in the Custom House.
- 8. If it is never taken back—supposing it is destroyed while the goods are *in transitu*, what check is there then? Such a case could occur, but I have not heard of such an occurrence. Ultimately it would be sure to be found out, in this way: we take stock every six months, for the purpose of selling what we term "overtime goods"—that is, goods that have been three years in bond. All these goods are then put up for sale; the list of them is under my direction, and if I find the goods are not in bond I report accordingly.
- 9. That might not be found out for three years? It might not be found out for some time.
- 10. Is there any other more immediate check? I should say the owners of the goods would look out for that—they have to pay the removing officer.
- 11. Supposing the owner of the goods is interested in smuggling the goods away, is there any check then? As I said before, such a thing can occur, but it would be found out ultimately.
- 12. When the transfer order is granted does the warehouse-keeper record it in his books in any way? Not until it is returned by the removing officer, and then he debits the new store.
- 13. He does not make a journal entry, debiting and crediting each store? I am not aware that he does before the issue of the transfer warrant. The application is taken down to the bond to be acted on one day, and Mr. Nash would debit the new store next morning.

Mr. W.C. Still.
8 Nov., 1858.

Mr. W. C. Still. 14. If he received the warrant? If the application were returned endorsed.

15. If he does not get it, what then? He cannot make any entry.

8 Nov., 1858. 16. He does not make any entry of having granted the warrant? Not that I am aware of; but we have a check in this way—all these goods are under bond to be produced when required.

17. I ask whether there is any immediate check? There is nothing but what I have stated.

18. When goods are transferred from one bond to another are they sent in charge of a tide-waiter, export officer, or any Customs officer? There are four senior tide-waiters paid as export officers who do the export duty; one of these is sent, if unemployed, but if an extra tide-waiter is sent it is at the merchant's expense.

19. Do you always send an officer to accompany the goods removed? One is supposed to be always sent. They are not under my direction, I beg to inform the Board.

20. Do they take these warrants? They are in possession of these two warrants.

21. Have you ever known a case where an officer has not gone with a cart? I cannot state positively; but I am under the impression that they do not follow every load.

22. Could you show me the transfer warrants? Yes. I produce an application for the removal of goods, and a removal order. (*The witness produced the same.*)

23. To whom does this application for the removal of goods first go? It is directed to the Collector; he endorses permission, or his clerk in his absence.

24. In this case it appears that Mr. Llewellyn signs for him? Yes.

25. Has that the initials of Mr. Nash? Yes.

26. Mr. Llewellyn passes it to Mr. Nash? No; the agent, or party presenting the application, takes it down to Mr. Nash's room, and gets a removal order made by Mr. Nash, or his clerk, and then it is put in the hands of the removing officer.

27. Does the Collector, or Mr. Llewellyn, take any record of having granted the application? No. In fact when I joined the office the applications were signed by junior clerks of the department. I stated to the Collector that the lockers did not like to act upon documents with these signatures, and I left him to infer that they should be addressed to me, I having control of the warehouses; although sometimes re-addressed to me, I do not see, in reality, one in six, and know nothing about them until the removal has taken place.

28. There is nothing on the face of this to shew that the export officer or tide-waiter accompanies the goods from one store to another? It is so, and has been the practice for years. My initials are here that the goods have been delivered. I see that the entry accords with the figures in the locker's book, and initial every paper that goes through the officer's hands.

29. There is nothing on the face of these documents to shew that the export officers receive all the goods? The receiving locker endorses on the application to remove the goods he receives, and this the removal officer hands to Mr. Nash, the warehouse-keeper.

30. Looking at this you do not know what officer took these fifty cases of gin from one warehouse to the other? No, there is nothing on the documents; but although I wish the locker to put the name, it has not always been done. There is a very loose practice in these matters, and I believe some of the removing officers will not shew the application to endorse to the delivery locker, but merely the order; they consider that the delivery locker has nothing to do with endorsing the application.

31. Suppose an inquiry were instituted with reference to some dutiable goods being transferred from one store to another, and it were desired to ascertain what export officer accompanied the goods, how could that be discovered? Without one locker had been more particular than another, and he had recorded it on the back of the removal order, it could not be discovered.

32. There is no order to that effect? I am not aware that there is any order from the Collector to that effect.

33. Suppose an order were given to remove goods from one store to another, and the officer did not take them to that store, but to some other place, and then destroyed the order, how could it be ascertained by what officer the goods were sent? I have no doubt that in some cases such a thing could occur.

34. Unless you kept a record? In some cases the more particular lockers may do so.

35. Does the locker's stock book shew to whom the goods are delivered? Not invariably.

36. It is made out in that form? (*Referring to the order produced.*) It is.

37. If the order does shew it, it is because the locker takes the extra precaution for his own protection? Yes.

38. When the goods get to the store to which they are to be transferred that receipt is given by the locker? The receiving locker

39. He is assumed to enter it in his books? Yes, he enters it in two books.

40. What are the two books? The stock book, and the locker's journal, which I have introduced since I joined, and which states the date of actual receipt; formerly the date of the warrant only was entered in the stock book. (*The witness produced the stock book, and the locker's journal of receipts and delivery.*) This book (*the latter*) checks the other, and is balanced every Friday. The locker makes out a weekly account of whatever is done.

41. The locker having given a receipt he is supposed to enter it in two books? Yes.

42. What check is there that he enters it at all? My check; every paper he receives he shews to me.

43. Suppose he tears it up? If he does not shew the warrant there is no check.

44. You do not know whether a warrant has ever been torn up? I can only check what is placed before me.

45. You have no means of finding whether it has been torn up? No; it depends altogether upon the integrity of the officer

46. If there were a book kept in the central office in the warehouse-keeper's department, there would be a check? The warehouse-keeper has a registry, or book, but that is merely a duplicate of the locker's stock book.

47. Then there is properly no check? No other than I have stated. Mr. W. C. Still.
48. Can you inform the Board whether there was a removal order issued for the transfer from Lamb's Wharf to the Chilian Wharf on 2nd September for 50 cases of gin? Yes. I 8 Nov., 1853. think the order I have handed in is that order.
49. Can you shew us by the books of the Chilian Bond whether that gin ever came into bond? I beg to hand in a transcript of the work of that bond from the commencement, and I find that on the 2nd 50 cases of gin were received from Lamb's. (*The witness handed in the same.*)
50. Are you aware whether they are there now? I cannot positively say; if they have been delivered of course the books will shew; but they were removed on that day to the Chilian.
51. They were received in? Yes.
52. That is, they were supposed to be received? They are recorded in the books of entry, and initialled by me.
53. Do you know whether it is the custom for goods to be issued for export and removal on the same day to the same owner? It is the custom.
54. Is the practice at all likely to be abused? I do not think the practice can well be altered; it might interrupt business. There might be two distinct parties, one shipping goods and the other wishing to remove on the same day, and it might cause inconvenience if the practice were altered.
55. When the same person wishes to ship and transfer would you allow that also? I never heard of any refusal in cases of that nature.
56. Do you not think this privilege is liable to be abused? I cannot say that.
57. You have seen the working of the business, and ought to be able to judge? I think if proper precautions were taken, both with regard to export and removal, the thing could be done safely enough; but I consider the present system very lax.
58. Both the transferring and the exporting? Yes, by the same party on the same day.
59. Can you shew by your books what day in the month of September it was upon which eight half-tierces of tobacco were issued from Walker's Bond for export, W Stewart being the shipper? (*The witness referred.*) I see by Walker's journal that there is an export on the 2nd September of eight half-tierces of tobacco. I have not Walker's store-book here, but I think I have the export warrant.
60. Is that entry in the handwriting of the locker? It is in the handwriting of the locker for that bond.
61. Are you aware whether these eight half-tierces were issued on the 2nd? I cannot tell farther than from seeing that entry in the book, and from the warrant having been placed before me, which accorded with the entry in the book. Here is the warrant to the export officer for the delivery, and here is the entry in the journal. (*The witness handed in the locker's warrant for delivery, "8½ tierces of tobacco for New Caledonia, William Stewart."*)
62. I see in this case the locker's warrant for delivery is signed by the clerk to the warehouse-keeper, Mr. Rogers? Mr. Rogers generally makes out the locker's warrant for delivery.
63. There is no signature in this warrant as to the export officer receiving these goods? No, but he has two papers besides that—two warrants filled up by the agent; that is merely the locker's warrant to shew me for the delivery of the goods. I see that, and then put my initials to it when entered in his stock-book.
64. For any check you have, these eight half-tierces of tobacco might have been issued on the 3rd? They might. It depends upon the integrity of the officer, and whether he makes faithful record of his work.
65. Would it be quite correct for a delivery warrant to be issued on the 2nd, and the goods to be issued on the 3rd? It would not be irregular; it might not be convenient for the parties to ship on that day.
66. Did you examine the books of the storekeeper at Walker's Bond? I did.
67. What did you see? I found that the goods had been apparently delivered on the 3rd.
68. You say "apparently"—have you from this book any doubt that they were delivered on the 3rd? I have no reason to doubt it was a correct entry.
69. The entries were made regularly? Yes; the books were kept in a clear business-like style.
70. Since this case of the "Louisa" has been brought before the public, and under the notice of the Government, have you examined the Chilian Bond? I have counted the packages.
71. Have you re-gauged any of the casks? I am now seeing to the re-gauging as they disappear, and when they have all disappeared I shall have the re-gauge of all the goods, and be able to find whether the quantity is deficient. I have found no deficiency in the number of packages.
72. You say when they all disappear? That is, as they are removed; they go out slowly. The parties are allowed three weeks to remove the goods.
73. The license is taken away from the store? The license is taken away, but we must allow time for the removal of the goods, and the Collector of Custom has allowed three weeks.
74. Then, by the time the whole of the goods are issued you will be able to tell whether the proper stock is in bond now? Yes.
75. To state whether the whole stock of the bond has been delivered over? Yes, I shall be able to give that information.
76. With respect to the construction of that bond, is it as well constructed for the security of goods as any other? As regards the security of the goods, I think equally so.
77. As regards the security for the public revenue? When the store was applied for it required alterations to make it secure; these I pointed out; my suggestions were attended to, and I consider, as regards its safety from being broken into, it is equal to any other store.
78. In what respect is it deficient as compared with other stores? I do not think it is so. The entrance is badly arranged, and the mode of getting goods up to the upper flats is very inconvenient.

- Mr. W. C. Still. inconvenient. I believe it is my duty to report only as to the security of the stores; but I think I should be inclined to go beyond my duty if an application were made for a similar store, on account of what I call the scanty working room—I mean in the shifting the goods from place to place. When goods come to us in any quantity we cannot get them immediately into the store, and they lie about the doorway until we are prepared to take them in, of course under the supervision of the locker.
- 8 Nov., 1858.
79. Have you noticed anything irregular about the store? Nothing as regards the bonded store in connection with the goods there.
80. Is it usual to issue spirits from bond without re-gauge? In some cases the merchant pays on the original entry; in others he has the spirits re-gauged, and then pays on the quantity found by the locker.
81. If the spirits are issued for export is it the duty of the locker to re-gauge? When I joined, goods that had been three months in bond were dipped before they were exported, but I have reduced the period to a month. If the spirits have not been in a month we take the same quantity as landed, but if over a month we dip, and endorse the quantity on the warrants.
82. Do you not think it desirable that all goods should be re-gauged on issue, whatever time they may have been in store? It is my own opinion that they should be.
83. What is to prevent a cask from being half-emptied before the issue if the owner of the goods and the locker connive? There is nothing to prevent, if they enter into collusion.
84. Could you tell, from looking at this export warrant, (*referring to the cargo supposed to be shipped by the "Louisa" on the 2nd September,*) whether any of these spirits should have been re-gauged, and whether the re-gauges are stated on the backs of them? Yes; the rum should have been re-gauged.
85. Had that been in a month? Yes, more than a month—from March, 1858.
86. Is the re-gauge written on the back? It does not appear; the locker has put the total quantity in words at length; he may have taken the dips, and, from the bare space on the warrant, may have condensed the items.
87. Is that regularly made out? The quantities should appear; it is not altogether regular to put it in that way.
88. Whose duty is it to make the re-gauge? The locker's.
89. Who was the locker on this occasion? Mr. Dickenson was temporarily in charge on that day.
90. Who is Mr. Dickenson? An extra tide-waiter. In the absence of a locker I am obliged to take any one I can find. I find that Mr. Hunt, at Pollard's, on another warrant has made the same kind of entry as Mr. Dickenson.
91. Do you think in either of these cases the lockers performed their duty, as far as the export warrant shews? I should have preferred seeing the actual gauge mentioned.
92. Whose duty is it to fill up the backs of these certificates? The locker's.
93. Can you tell whether, in these cases, the locker performed his duty? He signs his name, and is answerable for that particular duty; it is always done, as far as I can learn, by him. I am not aware that it is done by the export officer, except in an extreme case.
94. Is the handwriting on the back of the order for the eight half-tierces of tobacco that of the export officer or of the locker? I cannot say.
95. If it is in the writing of the export officer would it be irregular or regular? I think irregular; it should be in the writing of the locker; he signs his name. It might occur, when there was a great press of business, that to expedite it and to assist the locker, the export officer might put down the dips and strength.
96. You think in some cases it would be justifiable? In some cases; still it should be done by the locker if possible.
97. As regards the Chilian Bond, is it not the fact that one of the floors is used as a dwelling floor? I am not aware of it.
98. The centre floor is the bonded store, is it not? There are three floors, and the two upper are bonded.
99. Then no one lives on the third floor? No.
100. On the second? No; that is full of goods; that is the principal store.
101. You are not aware that any one lives there? I am not.
102. Are there any bedrooms in the front of the second floor? At the top of the landing there is a compartment where the locker sits, and in which Mr. Stewart and his partner lunch at one o'clock. I am not aware that it is used for any other purpose.
103. Could these parties get there at night? There is nothing to prevent their being locked in at night. We do not command the main entrance; the entry to the bond is on the second flat. I may mention that on one occasion the locker was detained there till very late, to superintend an operation of re-packing some spirits and blending them in a vat. I gave permission to Mr. Stewart to have this done upon the landing, for, from what I could understand, I believed it would be done in the usual hours; and I did not till the following morning know that the locker had been detained till eight at night. I have gauged the casks that were blended, and found no deficiency.
104. Is there without the intervention of the locker any access to this place where they take lunch? Yes.
105. Can they get there at all times of the night? Yes; if they wish to go.
106. Have they the means of getting into the store? Not into the bond; they can get into their private store below, and the outer compartment of the second floor.
107. Is it your opinion that the bond is secure? Yes, sufficiently secure—that is the bond itself.
108. You mean secure against fraud, do you not? Yes.
109. *By Mr. Browne:* I see a foot note to the account you have handed in, in which you say, referring to the exports by the "Louisa," on the 2nd September, "Two of these hogsheds were returned to bond same day according to the locker's memo., and finally delivered for shipment on 1st September?" That is the account I had from the locker.

110. Could a locker adopt such a course without any documents passing through the warehouse-keeper's and your hands? That is a matter not at all uncommon; we frequently find goods sent from the warehouse too late to ship—shut out—and they must be brought back to a place of safety; sometimes they are brought back to the Queen's Warehouse, and sometimes to the bond from which they were delivered, and shipped on a subsequent day. Mr. W. C. Stull
8 Nov., 1858.
111. Has the export officer shipped a portion and brought a portion back? Yes.
112. This was not a very large number of packages—five hogsheads of rum, and four half-tierces of tobacco, out of which two hogsheads were returned—does that appear in the locker's journal, or how did you get the information? There was a memorandum on the back of his warrant, and likewise in the stock book.
113. Have you the stock book here? Yes. (*The witness referred to the book.*) I find there is a memorandum to this effect, "Returned to the bond, and delivered again the 1st September."
114. Refer to M 547? "Two hog-heads returned to bond, and delivered again the 1st "September"; when too late for being shipped is what we call "shut out," or "short shipped."
115. Would it be regular for a locker to certify that these goods were exported on the 27th or 28th, when a portion of them were not actually exported till the 1st September? It would not be regular, but the entry is filled up on the first delivery, the locker assuming that the goods are to be shipped then.
116. *By the Chairman*: Does he ever see that export warrant after he has signed it? No.
117. *By Mr. Browne*: Have you found any difficulty in carrying out your duties since you have been appointed Inspector of Warehouses? The difficulty I find is that I am only partially recognised as Inspector of Warehouses in the Customs Department.
118. What difficulty do you find—are you anxious to check what you consider a lax system, and is that the reason of their objecting to your interference? Matters that should have been, I consider, referred to me, have not come to me at all. I am passed over, and these matters go either to the Collector of Customs or to the Landing Surveyor, and I think that injures my authority in the warehouses, and in the eyes of the portion of the public connected with our transactions.
119. You consider that every matter connected with the receipt and delivery of goods should in some way come under your cognizance? I think so. The export officer does not come under my cognizance at all; from the moment the goods leave the warehouse I have nothing to do with them.
120. When the regular export officers are engaged, and an extra tide-waiter, who is paid by the merchant, is employed, by whom is he selected? I believe there is a rule that these officers should be employed in turn, but I am not aware whether that rule is strictly carried out in the Customs.
121. You have nothing to do with the selection? No.
122. Some other officer of the Customs selects them? Seemingly.
123. Are the men who are employed as established tide-waiters men of good repute and respectable, generally speaking? I hardly like to say anything to affect any man's character, but there are among them some very indifferent persons.
124. Do you think any single export officer could in the course of one day take from five different bonded stores, and place on board a vessel, 296 packages of goods, some of them of a bulky nature, such as hogsheads or puncheons of rum, and half-tierces of tobacco? I think such a quantity might be taken out of so many bonds and put on board ship, but I think no one officer could do so conformably to his proper duty.
125. You spoke a little while ago about Mr. Stewart and his partner—whom do you mean by his partner? Perhaps I may have been hurried into mentioning a partner, but I spoke merely on assumption.
126. Do you know that he has partner? Perhaps the Committee will allow me to withdraw the expression.
127. You have said "Mr. Stewart and his partner"—to whom did you refer as his partner? When I say partner I mean the people who seem to be working with him.
128. Whom have you seen lunching there besides Mr. Stewart? I have not myself been present when they lunched.
129. Who was working with Mr. Stewart that led you to suppose he was a partner? I always understood that Mr. William Gibbes was his partner.
130. Do you know whether Mr. William Gibbes was his partner or not? I do not know. I merely judge from the circumstance of Mr. William Gibbes having applied for that bond in the first instance, and its being granted in his name. I took my instructions from him, and measured the bond.
131. How do you mean "took instructions"? Mr. William Gibbes applied by name for this bond, and after I had measured it and made my report, and his name approved of by the Government, his name was withdrawn, and another application was sent in, in the name of William Stewart. I then conjectured there must be a connection between them.
132. *By the Chairman*: Have you seen Mr. Gibbes exercising any kind of authority in that store that would lead you to suppose he had an interest in the business? Yes.
133. What sort of authority? When Mr. Stewart has been away I have occasionally spoken to Mr. Gibbes about matters affecting the bond, and he has attended to me.
134. Did he appear to be recognized as one of the partners? Apparently so.
135. *By the workmen*: By the workmen.
136. You have no doubt in your own mind that he was a partner in the bond? I cannot but think, from what I have observed, that he is connected with the business.
137. *By Mr. Browne*: Were any goods bonded in that store for merchants in town, or were they principally used in the business of the free store below? The goods bonded there are principally removals from other warehouses.
138. For their own business? Some of them are used by themselves, but other parties also pay duty and take goods out.
139. They are not all used in their own business? Not all.

Mr. William Noble Davidson called in and examined:—

- Mr. W. N. Davidson.
8 Nov., 1858
1. *By Mr. Browne:* You are the engineer of the "Black Swan" steamer, belonging to Mr. Edge Manning? Yes.
 2. Do you remember where and how that vessel was employed on the 2nd of September last? She was running to Manly Beach in the afternoon.
 3. After she returned from Manly Beach did she perform any other duty that day? Yes; we towed a vessel to sea.
 4. What vessel was it? I heard it was the "Louisa;" I am not positive.
 5. Was she a schooner? Either a schooner or a brig.
 6. Where did you take her from? From the Grafton Wharf.
 7. Had she any pilot on board that you are aware of? Not that I am aware of. I think not.
 8. Did anybody belonging to the vessel go down in the steamer and return in the steamer? Nobody went down in the steamer; some parties returned from on board of the vessel.
 9. Do you know who they were? No, I do not.
 10. You would not recognise them again? I think not.
 11. Do you know Mr. King by sight—the master of the schooner? No.
 12. Do you know Mr. Stewart at all by sight? I have seen Mr. Stewart. I saw a Mr. Stewart—I do not know whether he is the individual you mean—come out of the "Tasmania" the other day.
 13. Did you see him on board the "Louisa"—did he return in the "Black Swan"? I could not say. There were either three or four gentlemen came on board us down at Bradley's Head, who came out of the schooner or brig, and remained on board till we went outside with the vessel, and came up to the Phoenix Wharf with us; but who or what they were I could not say.
 14. The captain, I suppose, would know them? I think not; but he will be here in a short time.
 15. Did you tow the vessel some distance outside the Heads? No; we took her outside of the Floating Light, you may say almost out of the South Head, but not the foremost point of North Head; we did not go quite that distance with her.
 16. Did you go past the Floating Light by the eastern or western passage? The western passage.
 17. You came straight from Manly Beach, took hold of the vessel, and towed her out? Yes. We left the Phoenix Wharf about half-past six, took her in tow, and got down there about eight o'clock.

Mr. George Norton Russell called in and examined:—

- Mr. G. N. Russell.
8 Nov., 1858.
1. *By the Chairman:* I think you are an established tide-waiter? Yes.
 2. You sometimes do the duty of export officer? I do two or three duties.
 3. What other duties? I am appointed to a responsible situation as drawback officer: I am very cautious about that. Next, when I am not doing anything, I am ordered to move spirits from bond to ships for export; in fact, I wish never to be idle.
 4. From whom do you generally receive warrants for goods that are about to be removed? From the warehouse-keeper and Mr. Rogers, his clerk.
 5. Do you let the tide-surveyors know before shipment? Always when I have anything of importance for shipment—for instance, nine or ten hogsheads of dutiable goods—if they wish them to send an officer on board.
 6. In that case is anybody generally put on board? I wait till they are put on board between decks. When I get them out of the store I do not let any dray go by itself, but wait till they are all loaded, and accompany the goods; and I see them put between decks before I receive a receipt from the chief officer.
 7. You make it a point to accompany every dray? Every dray. I consider myself bound to do so; the responsibility is very great.
 8. What is the greatest number of drays you have accompanied in a day? Three or four.
 9. Do you think it possible that any export officer could see thirty-four dray loads shipped in one day? I never did it. It might be done if he did not accompany the drays.
 10. Supposing he accompanied them? He cannot; they may be puncheons, they may be hogsheads, perhaps tierces or half-tierces of tobacco; then there may be two or three officers waiting in the store for goods—I have to take my turn—then the goods have to be broken out.
 11. Under the most favorable circumstances, do you think he could ship thirty-four dray-loads in a day from five different stores? To the best of my belief I could not do it, and I believe there is not a more active man in doing business than I am. I do as much as I can.
 12. Do you think you could put three hundred packages on board a ship in one day? I might in cases of brandy, if I got them out of one store; but if I could not take them altogether; I would take the first portion to the ship and wait till I had them on board, and then come for the remainder.
 13. If they consisted of hogsheads of rum, half casks of whisky, half-tierces of tobacco, and so on, could you then ship three hundred? I could not; it is impossible to be done.
 14. When you have the goods put on board, and the signature of the mate, what do you do to get the signature of the landing-waiter? After having shipped the goods, got the mate's signature to the warrant, and signed my own name, I immediately take it to the landing-waiter.
 15. What landing-waiter? The landing-waiter belonging to the wharf the ship is at.
 16. What do you do when you cannot find him? I wait till I find him. The landing-waiters stick to their duty at their own wharf. I never have occasion to look for an officer.
 17. Then you have never been obliged to get the signature of any landing-waiter but the one at the wharf? Not to my knowledge. It has only lately come out that no landing-waiter

- waiter is required to sign. I do not think it is a binding thing to sign because he sees my name to it. How can he tell I am an honest man?
18. You always think it your duty to get the signature of your own landing-waiter—you never get the signature of any other? No.
 19. Have you ever applied to any landing-waiter to sign for the shipment of goods that he has not seen shipped? I cannot say on my oath that I have not, but to the best of my belief I have not.
 20. When you have acted as export officer, has any landing-waiter signed for goods that he has not seen shipped? That I cannot say; but I never found it difficult to get the signature of the proper landing-waiter on the wharf.
 21. When goods are shipped after hours, and the landing-waiter is not there? Then I take the warrants home and put them up in my desk.
 22. What do you do with them ultimately? When I meet the proper officer of the wharf, I tell him the goods have been shipped, and he signs for them.
 23. That is not till the next day? No.
 24. You say that when a large amount of dutiable goods are to be shipped you inform the tide-surveyor, and he is to put an officer on board if he chooses? Yes; they put one on board foreign vessels going away, or to the islands, except it is a ship going to a port where there is a Custom House.
 25. When you tell him is it his practice to put an officer on board? He always does so when he is informed, if he considers it necessary.
 26. *By Mr. Browne:* You have had considerable practice in the Customs Department, having been a good many years employed in it? Yes
 27. Would you consider it a regular course of proceeding for a vessel with an enormous quantity of spirits on board to proceed to sea after dark? I never heard of such a thing; it is not customary, except with steamers.
 28. Do you think it would be possible to pass the entry, ship them, and clear them out in one day, with due regard to regularity and the protection of the revenue? I consider that if I had done that work in two days I should have done right well.
 29. *By Mr. M'Levie:* Does the landing-waiter at the wharf generally satisfy himself that the goods are shipped before he signs the export warrant, or takes your word for it? He takes my word for it; he never satisfies himself, for he is always perfectly satisfied with my signature; he is not present at the shipment of the goods.
 30. When you lay before him a warrant for the shipment of goods, does he go and satisfy himself that the goods are shipped, or merely take your word? He takes my word. I must say, for the number of years I have been in the Customs, my word has never been misdoubted.
 31. How many years have you been in the service? Fifteen or sixteen years.

Mr. G. N. Russell.

8 Nov., 1858.

Mr. John Kidd called in and examined:—

1. *By the Chairman:* You are in the Customs Department as landing-waiter? Yes.
2. How long have you been in the Customs? Nearly twenty years.
3. In that capacity? No.
4. How long as landing-waiter? Since my return from England; I think about seven years—six or seven.
5. Is it your duty to sign warrants for goods exported from your station? It has ever been the custom since the regulation was instituted by Mr. Barnes. I never sign those for the export of goods except on the wharf from which the goods are shipped. I ever set my face against it.
6. Has the practice of signing been sanctioned in the department by any superior authority? I cannot reply to that. I think that when Mr. Barnes first instituted that rule the understanding was that only for the wharf from which the goods were exported you were supposed to sign for. I never did otherwise myself; I adhered to that as closely as possible.
7. You were never found fault with for refusing to sign except on those occasions? Yes, once.
8. By whom? By Mr. Garling, some twelve months since. That was under peculiar circumstances. I was then stationed at Campbell's Wharf, in company with Mr. Rolleston. Mr. Rolleston was absent that day, and there were some export warrants which required to be signed as they were wanted to clear the vessel. Mr. Garling insisted upon my doing it. I declined, and brought the matter before the Collector, who quite approved of my not signing; at the same time he told me that although justified in declining I might do it by signing for Mr. Rolleston, and he said I could not be found fault with, because I had reported it to him.
9. Would you consider it justifiable for a landing-waiter to sign for goods shipped at the Grafton Wharf when he himself was the landing-waiter at Walker's Wharf? On the same principle that I say I never did, I should think, of course, that he would not. I know I would not do it.
10. Then you think he was not justified in doing it? It remains for you to decide that.
11. Does Colonel Gibbes expect one landing-waiter to sign for goods shipped at another's wharf? I could not tell, excepting from this case I mentioned that occurred lately.
12. Suppose a large quantity of dutiable goods had been shipped at your own wharf, would you sign for those goods without seeing that they were actually on board? It would be hardly possible for me to do so, for I invariably pay such attention to these things that I can always do it with a clear conscience; and another thing I do—when I see an undue quantity of dutiable goods for export I always make application to the Custom House for a tide-waiter to be placed on the craft while being loaded, and then, on the strength of that officer's guarantee, as well as my own knowledge of the affair, I always sign with confidence.

Mr. J. Kidd.

8 Nov., 1858.

Mr. J. Kidd. 13. Then you satisfy yourself that the goods are on board before you sign? Yes, I always do. I am very scrupulous in these matters.

8 Nov., 1858. 14. *By Mr. Browne*: When vessels are discharging cargo at the wharf at which you are landing-waiter, what supervision do you exercise over the tide-waiter's books, particularly with reference to sugar ships? I am always in attendance every afternoon; I look at the weights and scales, because I cannot always be there, as I have various things to call my attention off.

15. I am not speaking of the weights and scales—what examination do you make of the tide-waiter's books to see that he discharges the cargo in accordance with the warrants that come down? I am always in attendance, and see that he puts down each lot weighed. Generally speaking cargoes of sugar, coffee, and rice, are discharged by putting so many bags in the scale at a time, and I see that the officer takes the proper weights. I make it an almost undeviating rule that, for form's sake, I look through the officer's book and see that the proper tallies are made, and the signature and date put to it.

16. Would you consider that a landing-waiter was attending to his duty if a tide-waiter permitted thirty-seven tons of sugar more to be delivered from a vessel than there was a warrant actually sent down for? I think it possible the tide-waiter might do that without the cognizance of the landing-waiter, because he cannot be always there.

17. Supposing the vessel were discharged and the landing-waiter had forwarded his books of the vessel complete to the jerker at the Custom House, would you consider the landing-waiter had done his duty if upon examination by the jerker he found thirty-seven tons of sugar had not paid duty? I hardly understand the question.

18. Do you not, when a vessel has discharged her cargo completely, as landing-waiter transmit your own book to the tide-surveyor for the purpose of being transmitted to the jerker in the Long Room to check the cargo? Yes.

19. If you had forwarded the books of a sugar ship which on being jerked shewed that thirty-seven tons of sugar had not paid duty, would you consider you had done your duty in a proper way? If the jerker found out the discrepancy I should participate in the blame.

20. Should not any landing-waiter have discovered that discrepancy long before it reached the jerker's hands? (*The landing-waiter's books with reference to the discharge of the "Fanny Fisher" were handed to the witness.*) I think the error ought to have been found out before it went to the jerker.

21. Is Mr. Warburton a landing-waiter now? He was for some time, but I think latterly he has been disrated. He performed the duty of landing-waiter under the denomination of coast-waiter.

22. Has he been promoted, or the contrary? Latterly, through some circumstances—I do not know what—he has unfortunately been disrated. He is now, I believe, junior locker.

23. *By Mr. M'Levie*: Are not the duties of a locker equally responsible with those of a landing-waiter? I should think almost more so.

Mr. David Nash called in and examined:—

Mr. D. Nash. 1. *By the Chairman*: What is your position in the Customs? I am warehouse-keeper.

8 Nov., 1858. 2. What are your duties? I keep the stock-book and record of all the goods in the warehouses.

3. All goods received and issued? Yes. I also have to compare, by this stock-book, all entries previous to paying duty, and to write delivery orders out. (*The witness produced the stock-book.*)

4. Do you keep any other book besides the stock-book? There is a registry of aggregate quantities and balances every quarter.

5. When an export warrant is made out for the shipment of goods out of the country, I believe it comes to you? Yes.

6. What is your duty when you get that warrant? I first refer to the stock-book, and see that the numbers and weights correspond.

7. When they do correspond, what is the next step? The warrant is initialled and forwarded to the Long Room by the agent to the chief clerk, whoever he may be—Mr. Maddocks or Mr. Llewellyn—for the purpose of certifying as to the proper bond having been given, and then to the export clerk for signature, and then back to me, to make out the delivery order.

8. Is not the entry passed first? No.

9. Do you keep any record of the delivery order? There is one filed in the office, but I make no record in my book until the warrant is returned and endorsed by the landing-waiter and the parties concerned.

10. Shewing that the goods have been actually shipped? Yes.

11. Have you anything more to do with the export of these particular goods till the warrant comes back? No.

12. Do you inform the tide-surveyor that the goods are going to be shipped? No. Our room is convenient to him, and we keep a book for the purpose of entering all particulars for export and home consumption too; he can look at that at any moment.

13. Is it ever expected of you to warn the tide-surveyor that a certain quantity of dutiable goods are to be shipped, and that he had better put an officer on board? I have never done it.

14. Whose duty is it? The tide-surveyor's.

15. It is not your duty to inform the tide-surveyor? No.

16. When you have issued the delivery order to the export officer, and he has taken it to the locker, and the goods have been shipped, what check have you upon the export officer bringing that export order back to you? We make an entry of them, and if they are not returned we can ascertain the fact by the locker's delivery-book.

17. Where do you make it? In a daily book we keep.

18. What is the character of the entry? A fair copy of the warrant, and all particulars, Mr. D. Nash. for the locker and shipping officer to sign.
19. Where is that book? In the office. 8 Nov., 1858.
20. When spirits are issued from store upon your delivery warrant, is it usual to re-gauge them? If the owners make application they can have them re-gauged.
21. Is it not usual, whether they enter an application or not? For exportation they do generally, if they have been in any length of time.
22. Not for purchase or home consumption? For home consumption there is a requisition form. They can have it re-gauged at any time previous to paying duty.
23. To come back to the Custom House business in connection with the warrants; after you have prepared the export warrant and delivery order to whom do you deliver them? To the export officer.
24. What export officer do you generally give them to? I have no choice—to any who may be disengaged; I generally call the one that is handiest.
25. Then you lose sight of that particular business till the documents come back to you at the Custom House? Yes.
26. What do you do when the documents are returned to you? They are compared with the book; one is filed and put with the ship's papers, the other is bound for the warehouse-keeper.
27. Are they written off in this book? Yes.
28. Is there any other entry made in any of your books? (*Vide Addenda.*)
29. Have you no books shewing the amount of goods you have in store? I have, in gallons. I keep the weekly stock.
30. You have nothing to shew what is in each warehouse? I have not, but the lockers have; they keep an account of the number of packages.
31. When you give a transfer delivery order from one locker to another, have you no book in which you credit the locker who delivers, and debit the locker who receives? I enter it in the journal.
32. Have you no debtor and creditor account? No; they are all in one journal.
33. If you were required to give a return of dutiable goods in charge of each locker you could not give it? Not without referring to the locker's book.
34. You could not state the amount of goods in charge of each locker? Yes; by referring to my book.
35. But you would have to pick it out of this book and several others, and then to compare it with the locker's book, so that you could not tell without a week's work? More than that.
36. How long would it take you to shew that the lockers had been properly charged and properly relieved? I dare say a month.
37. Then if you wanted to check any particular locker's book it would take a month? Not one locker's book, but all. Each locker keeps a double entry.
38. The locker has a sort of account of what he receives and what he delivers? Yes: he balances it up every week.
39. Have you any book which shews how much each locker is debited and credited with each month? Not of each store.
40. Then you could not give the balance in hand? Not in any particular store.
41. Without picking them out and comparing this book with the locker's book? No.
42. Do you keep any debit and credit account with ships? Yes.
43. When a ship comes in with a certain amount of dutiable goods on board, do you charge her with those goods? I enter them in this book.
44. Have you any ledger in which you enter them? No.
45. When a ship discharges, do you debit—? Only in this book.
46. Do you not think it is desirable to keep a sort of journal in your office, in which you could at once debit and credit every thing you receive and issue, like a merchant's journal? We do keep such a register for the whole of the stores, which is balanced every quarter. The register shews the aggregate quantities delivered and landed.
47. That is not with respect to particular stores or individuals? No; the whole.
48. Would it not be better to have a journal, in which you could at once charge the locker at each store with the goods he receives, and credit him with those he delivers? I am afraid we could not do it with our staff of officers.
49. In the meanwhile you have no check upon the lockers by which you could verify their accounts within a month? Not the whole of them; we might check the accounts of one in a couple of days perhaps.
50. By picking the items out of this book? Yes.
51. *By Mr. Beane:* When is the entry made in this book which you call the Locker's Daily Delivery Book—who is this written up by? Mr. Rogers.
52. When is it written? At the time the export warrant goes out. It might have been some time after.
53. This is supposed to shew the names of the different bonds in which goods are lodged, the persons who export them, and the export officers and lockers of the different stores, at the time of the departure of the warrants? Yes.
54. Would you, in your capacity as warehouse-keeper, give these seven warrants to one export officer, without considering whether he was capable of performing the duty in the course of the day? If the shipper were to ask it; otherwise I should think it too-much.
55. Did the shipper in this case request you to give all these warrants to Mr. Newton? I think it was the clerk, Mr. Rogers, who gave them.
56. This seems to have been the only account of the export that took place on the 2nd September? Yes.
57. This is the book the tide-surveyors have access to? Yes.
58. Are you sure that entry was made on the day the entry was passed, or was it made after it? It must be made the same day; no doubt about it.

- Mr. D. Nash. 59. Is this made at the time the warrant has been returned stating that the goods have been shipped? Yes.
- 8 Nov., 1858. 60. Do you believe that by any possibility all these goods—300 packages—could have been shipped between ten and four by one man? It would depend upon what the packages were.
61. These are heavy packages? Yes.
62. On this very day was there not a transfer taken out for transferring some gin from Lamb's store to this very store? Yes.
63. If you had it in evidence that none of this gin was delivered before twelve, and a large portion of it between two and three o'clock, do you think by any possibility it could be shipped by one man? It is a very short time to do it in.
64. How is that information obtained in that column (*referring to the book*)? It is put down by the shipping officer, at the time of the return of the warrant.
65. Who is the shipping officer? In this case Mr. Newton was.
66. Then this which purports to be a faithful record of the proceedings in the shipment of goods is dependent upon the honesty or dishonesty of the shipping officer? We have it countersigned by the locker.
67. The entry as to time—that is supposed to be a check, is it not? Yes.
68. Is that any check upon the delivery of these goods on board the "Louisa"? I do not see that it is possible.
69. Do you look at the book every day? Yes, but not so closely as to say the time put down.
70. When you saw so large a shipment of spirits and tobacco to New Caledonia in one day, would you take no notice of it to give information? I have had very much larger shipments than that, and taken no notice.
71. *By the Chairman*: Is not this intended to be a check upon the export officer? Yes.
72. How does it happen that you allow him to fill up the time that he returns himself, when it is supposed to be a check on the time he returns his warrant? I do not know that there is much difference whether he fills it up or we fill it up for him. It is mostly the afternoon before we receive any of the export warrants back.
73. Do you think it right to allow him to enter up the time—if we have it recorded as a matter of fact that he did not return the warrant by the time he states there, will not that false record be owing to your negligence? I think he must have put down that when he came in at four o'clock.
74. He could not have made that false record without you allowed him to, could he? We are so busy then.
75. Answer that question—could he have done that without your allowing him to have the book? The book is open.
76. The book is under your charge? It is.
77. You allow it to remain open? Yes.
78. That book is a farce as a check upon the time of the export officer returning the warrant, is it not? I do not know.
79. If you do not know the time he returns it, is it any use as a check? I think it is.
80. What check is it? We should detect it if they put down the wrong time, for one or other of us would look at the book.
81. How would you detect it? By looking at the book.
82. What object would you have in looking at the book unless your attention was drawn to it at the time? I frequently look at it myself when they are taking goods away.
83. If he chose to defraud the revenue, and, in order to protect himself, put down the wrong time, there is no opportunity of finding it out unless you were —? We could not tell whether he had been that time occupied or not. The time was put down for the purpose of bringing them to task if they delayed too long.
84. I come back to the old question—if he chose to put down the wrong time, you would not find him out unless for some cause you were to look at the book? I might, for I frequently look.
85. You do not systematically look—always look to it? No.
86. *By Mr. Browne*: This purports to be the number of warrants as passed in the Long Room? Yes.
87. What has become of the warrants between 1,310 and 1,316? Our numbers of warrants do not run consecutively. The British entries are not sent out.
88. Is not this the number of the entry upon the warrant? Yes.
89. What has that to do with the British entry? 1,310 to 1,316 may be the number of entries of British goods.
90. These warrants are numbered with reference to the warrants in the Long Room, and not with reference to any consecutive numbers in your book? No.
91. Do you think it possible that a man could ship 200 cases of gin, 50 of claret, and 28 hogsheads of rum between ten and twelve o'clock, besides going to two different bonded stores and getting them out? I should say he would have enough to do, to do that.
92. Is this copied in by Mr. Rogers? Yes.
93. Is this Mr. Rogers' handwriting? Yes.
94. Are these figures in his handwriting? No; I rather think they are mine.
95. You do not remember whether the shipper particularly requested you to give these warrants to Mr. Newton? No; not at this time.
96. Who passed the entries? Mr. James Stewart.
97. He is a Custom House Agent? Yes.
98. Can you find any entry in this book shewing the transfer of fifty cases of gin from Lamb's store to the Chilian Bond on that same day? I think some person came and asked me if 50 cases were removed that same day.
99. Is it usual to take out a removal order by the same person at the same time they would take

- take out a shipping order from the same store? I do not recollect any occurrence of the same kind. It could be done.
100. There would be no objection? No.
101. Might it not lead to irregularity? This was done by two different officers.
102. Who was the officer who removed the 50 cases of gin? I think he is called Doctor Smithwick.
103. When you grant an order for the removal of bonded goods from one bond to another, what record do you make when you issue the order to the locker to deliver the goods to the export officer? I note it in the margin of the stock book.
104. Then you issue the order at once? Yes.
105. When do you record it? Not until it is returned and receipted.
106. If that order never came back to you, what record have you of the removal of the goods at all? I can scarcely answer you.
107. Supposing the export officer should tear up the removal order, how would you detect his fraud? I certainly should know nothing about it then. I make no note of it then.
108. When would be the nearest time such a fraud would be detected—if the export officer removed these 50 cases to his own residence instead of to the Chilian Bond, when would it be detected? When we took stock.
109. When do you take stock? Frequently, since Mr. Still's appointment. An overtime sale could not be longer than three years.
110. It might not be detected for three years? Not if the goods had been just bonded, so that they would have to remain three years.
111. You make no entry whatever of issuing these orders—you issue them as so much blank paper, with the understanding that they come back endorsed? Of course I keep a look out.
112. *By the Chairman:* You cannot recollect every order if you do not record it? These removals I could.
113. You trust your memory? Yes.
114. *By Mr. Browne:* This book has reference only to goods exported; the export officers have nothing to do with goods for home consumption? No.
115. You say it is not unusual to give this large number of goods to one export officer? I think that by referring to the book you will see that some have had as many again, but it would not be the bulk of goods.
116. You do not say in this book where the goods are exported to? No.
117. Then the tide-surveyors, by looking over this book, would not know whether the goods exported by the "Louisa" were exported to a place where there was no Custom House? They would know by the name of the ship.
118. Where would they know that? There are always entries to refer to—they are filed in the Custom House.
119. *By the Chairman:* Who fills in the time of departure? Mr. Rogers.
120. What else does Mr. Rogers fill in of this? All the particulars of the entry.
121. Then you have nothing to do with this book? No, except that it is kept in my office as a general check.
122. Which is your book? The journal, making out delivery orders, and the stock book.
123. The stock book is altogether in your handwriting? Yes.
124. Does Mr. Rogers make out all the export orders? Yes.
125. Who makes out the transfer orders? Myself, and I make out the orders for home consumption.
126. *By Mr. Browne:* Is there any book by which the name of the officer transferring goods can be ascertained? It is named on the receipt; the locker writes, "Delivered in charge of Mr. So-and-so, so many cases."
127. Is there any record on either the merchant's application or the transfer warrant, to shew the officer who transferred these 50 cases of gin from Lamb's Bond to the Chilian Bond? No; I see it is omitted there.
128. In any case it would remain with the locker to put down to whom he delivered the goods? Yes.
129. If you desired to find out what officer conducted the transfer of those 50 cases of gin how would you do it? I could ascertain by referring to the locker, but he should put on the face of the removal order to whom he delivered them.
130. Is that regulation an established one? I cannot say that it is, but it should be the case.
131. It is an understanding? Yes.
132. There is no check kept upon him that he does do so? No.
133. Did you observe anything about the export warrants in the case of the "Louisa," on the 2nd of September, when they were returned to you? I did not receive them; it was Mr. Rogers received them.
134. What is your opinion of the manner in which Mr. Rogers performs his duty? He is middling now. I think that he committed many errors some time ago. He was rather embarrassed a little while ago, pecuniarily.
135. Do you think this a book properly kept (*referring to the Registry*)? I think it is middling.
136. I will refer to the case of the "Victoria," in which a large amount of dutiable goods appear to have been issued from a bonded store —? From Larmour's bonded store?
137. There seems to be no record of the time of the issue of the warrant or the time of its return, from what store it was issued, or to whom it was issued—do you consider that regular? No.
138. That is a decided omission? Yes.
139. In the case of the "John Bunyan" there is no record from what store it was issued, to whom it was issued, or where the vessel was lying? No.

- Mr. D. Nash. 140. That is irregular too? Yes.
- 8 Nov., 1858. 141. Would you say that this man was an efficient public servant after seeing this book? This is dirty; so many have access to it.
142. I am not speaking of the dirt—I ask if the entries are correct? Some of them are not.
143. Do you consider that Mr. Rogers discharges his duty when he leaves entries incomplete in this way? He has a large family—
144. Do you think he discharges his duty? I think it speaks for itself.
145. Do you defend that book as a proper record? I cannot.
146. Do you not think it a very important book? Yes.
147. And very slovenly kept? It certainly is.
148. Do you not think the way in which this book is left open for the export officers to enter their own transactions in leaves the door open for great fraud? I will be more particular and see what time they do put down.
149. Do you think they should be allowed to put it down at all? They have to sign it.
150. When you issue these warrants is there any record made of the time they are issued? No. (*Vide Addenda.*)
151. When a transfer warrant comes to your hand, do you ever see a record of the time the dutiable goods left one store and the time they reached another? It is so now; but not till lately.
152. Then until lately there would have been plenty of time for an officer to change goods off a dray? It was possible.
153. It was a fraud very easy of execution? I do not think it.
154. *By Mr. McLerie:* Are these books ever examined by any other officer of your department but yourself? No.
155. The books of your branch of the Customs Department are never looked at by any superior officer of Customs? No.

ADDENDA.

In reference to question 28, the answer should have been *Yes*, as the entry is written off in Stock Book and Register, as well as the Locker's Daily Delivery Book.

In reference to question 150, the answer should have been *Yes*, as a record of the time is noted in the Locker's Daily Delivery Book immediately the warrants are issued to the export officer.

Mr. Edward Rogers called in and examined:—

- Mr. E. Rogers. 1. *By the Chairman:* You are a clerk, under Mr. Nash, in the Customs? Yes.
- 8 Nov., 1858. 2. It is your duty to keep this register book, is it not? Yes.
3. What is the object of this book? The object is to enter in it the locker's order for the shipment of goods, the time the export officer leaves, and the time he returns.
4. Who enters the time they leave? I do.
5. And the time they return? Themselves.
6. When they enter the time they return is that any check upon them, if they are allowed to write what time they choose? No; I generally know the time they do return, because I generally go up to the book to see.
7. In this particular case, on the 2nd September, did you ascertain as a fact that the warrants were returned at the time stated? I have no watch. He returned them the day he took the goods and signed for them.
8. Did he return them at this hour (*pointing to book*)? He put down this hour, and as near I could state, having no watch at that time.
9. Are you quite certain all these warrants were returned that day? Quite certain.
10. Signed by the lockers and export officer? Yes.
11. And the landing-waiter? Yes.
12. Would you be surprised if you heard one of those orders was not executed till the day after? It very often happens that when they cannot finish the export that day they keep it in a portfolio till it is finished and then enter it the following day.
13. But it is entered as returned at 12 o'clock of the 2nd? There is no column for remarks.
14. There is one for the time—this column is meant for the hour? It does not say so.
15. It is intended to record the time? But not the date.
16. You examined this at the time? I went up and saw him sign the book.
17. On the 2nd of September? Yes, when he got the warrants, but as to this one—the one you say was not done till the following day—
18. Which one is that? I cannot say.
19. Which one are you not sure of? I only allude to the one you mentioned.
20. Which one is that—which one do you say was not returned till the following day? I do not say so; I only referred to the one you spoke of; you said that one you pointed to was given to him on the 2nd September out of Walker's.
21. Was it returned on the 2nd September—was there any one of these not returned on the 2nd September? I cannot tax my memory.
22. Were there any of them returned on the 2nd September? To the best of my belief the whole, but as to this particular one I cannot say.
23. Which one do you refer to? This one out of Walker's, for eight half-tierces of tobacco.
24. Why could you not say that before? I did say so.
25. You said the one I alluded to? You pointed to this one at the time. It very often happens, as I said before, that the export officer gets a quantity to do for one agent, and if he does not do the whole he puts them in a portfolio and does the others the next day.
26. Did you give these warrants to Mr. Newton? Yes.

27. *By Mr. Browne*: At whose request? The agent's, Mr. James Stewart. Mr. E. Rogers.
28. Would you consider that Mr. Newton could be capable of shipping three hundred packages in one day, and returning them at the hour you state as having been put on board? 8 Nov., 1854.
I should think not.
29. Do you think if he has stated he shipped these goods at the hour stated in this column, he has stated what is true or untrue? Untrue.
30. Who appoints the export officers for this particular duty? They attend in the morning, and the senior officer is taken, and the next to him, and so on.
31. You said just now that the agent tells you which to give them to? I say that when an agent has a number of export warrants for one ship he requests that one export officer should do the whole.
32. You gave them all to Mr. Newton, at the request of Mr. Stewart? He is the senior officer, with the exception of Mr. Russell.
33. *By the Chairman*: Did you see the export orders when they were returned? Yes; they were brought to me, and I put them on the file.
34. Did you observe any thing unusual about them? Nothing.
35. Was there any re-gauge marked upon them? No.
36. Is not that unusual? It is according to the time the spirits are in bond.
37. There are 15 quarter-casks of whisky placed in bond on the 17th June; is there any re-gauge upon that? They are often re-gauged.
38. Can you tell by looking at the back of that whether that is a re-gauge? It has been re-gauged, or it would not have the Customs locker's signature.
39. Does not the locker sign as having issued the goods? Yes, but not in that way; he says "delivered."
40. Is there any re-gauge upon that one for 28 hogsheads of rum? No.
41. That was irregular, then, was it not? Yes. Mr. Dickson was acting for the locker.
42. Has Dickson in that case re-gauged? No.
43. When the warrant was brought back to you by the export officer, Mr. Newton, did you observe that? No; but it is not always necessary to re-gauge.
44. Do you observe this export warrant referring to 31 hogsheads 14 quarter-casks of brandy—there is no statement of the ship on board which it was received? That statement is on the face of the warrant.
45. But there is none at the back? No.
46. Where the captain signs there is no receipt from the ship? The face of the warrant shows the ship.
47. The face of the warrant does not shew what ship received it? No.
48. Is not that warrant made out irregularly—is it incomplete? No; I can shew many warrants in the same way.
49. Has that warrant been completed? It has, with the exception of putting in the name of the ship, which is shewn on the face.
50. Is it usual to omit on the back of these warrants the name of the ship receiving the goods? There are many of them do not state it.
51. Have you been in the habit of visiting the Chilian Bond during the day? I have been there before the "Louisa" ever came in. Mr. Stewart was an old clerk in the Custom House, and I believe I have bought a case of ale; that is all. I have been in the habit of visiting. I knew one of the partners, Mr. Gibbes, when he was a boy.
52. Have you ever gone there for lunch, or to get drink? Yes.
53. Have you been in the habit of visiting Dixon's tobacco shop? I have known him ever since I have been in the Colony.
54. Have you ever gone there during office hours? No, I have not.
55. Have you been there often? Where?
56. At Dixon's? Two or three times in a week. I generally call at night and take home a cigar or two, which I purchase.
57. *By Mr. Browne*: You say you have known Mr. Stewart's partner, Mr. Gibbes, ever since he was a boy? Yes.
58. Is he a partner? It is reported so.
59. Have you ever known him act in that capacity? Whenever I have passed I have seen him in the store.
60. Do you think he has any interest in it? I cannot say; I can only speak from what has been reported.
61. Is that entry perfect (*referring to Larmour*)? Yes, because Thos. Jamison is landing-waiter, locker, and export officer.
62. Where? At Waterview Bond.
63. Therefore it requires nothing at all? No.
64. Nobody has any check upon him at all? No, except Mr. Garling or Mr. Still.
65. *By the Chairman*: Is it necessary in his case to record the bond from which it is issued and to whom it is issued? No.
66. How do you get this information? From the returns of his warrants; he returns warrants similar to this.
67. How does he get his warrant? From us.
68. Why is not that required? Because he may take the warrants and not act upon them for two or three days.
69. Why is the time in this entry not entered—the shipment of 115 cases of Geneva, shipped by Mr. Smithwick, and delivered by locker King—why is there no return of the time at which the warrant was returned, or the locker issued the goods? That is not correct. One is my omission, the other not.
70. Is that a correct book? No.

Mr. E. Rogers.

8 Nov., 1858.

Explanation of Evidence.

No. 3.—In reply, for locker's order read "warrants."

No. 12.—Though it is entered at 12 o'clock, the book was not signed till the following day, the Customs being closed.

No. 14.—The column states at the top for the "hour or time."

No. 17.—On taxing my memory, he did not sign till the following day, the Customs being closed when he came back.

No. 19.—Captain Ward pointed to the eight half-tierces from Walker's.

No. 24.—I said, the one you pointed to.

No. 26.—I recollect Mr. Nash gave one in the afternoon to Mr. Stewart.

No. 28.—I have known (as I stated) export officers having a number of warrants to execute to load the dray at one bond, and proceed to another, and so on; meeting them at the wharf, in this manner, it is quite possible.

No. 33.—The file stood in the front of my desk, and when the officer came in he put them on for the landing waiter's signature, and then took other warrants that were ready, and during the day I was frequently up in the Long Room, on other duty.

No. 41.—The locker was in duty bound to re-gauge them.

No. 43.—As I before stated, I was frequently in the Long Room on duty, and considered warrants placed on my file as given to me.

No. 44.—The warrants now in use have been recently introduced; the former ones, at the back, are blank, and are used by some of the agents to this day. The face of the warrant states the ship, and warrants can be found before my time receipted in this manner.

No. 50.—I have known instances where the mates have refused to sign any more.

No. 51.—I have bought a case and cask of ale. I went to order them, and then to pay for them. In answer to a question put by Captain Smith, I have known Mr. Gibbes since he was a boy. I did not say one of the partners.

No. 52.—To this I said, distinctly, No. When the Chilian Bond first opened, Mr. Still asked me when it was required would I have any objection to go and deliver any thing that might be wanted. I did so for some days, when he took the vouchers, and a locker was appointed.

No. 53.—I have known Mr. Dixon about seventeen years, when he was a client of my brother's, of the firm of Carr, Rogers, and Owen.

No. 58.—I answer this question merely from hearing conversation of agents talking about the Chilian Bond opening. I know nothing of Mr. Gibbes' business transactions.

No. 65.—Mr. Jamison signs the export register.

No. 68.—The vessel not being ready to take them.

No. 69.—I was on other duty in the Long Room when Mr. Smithwick returned, and I have frequently reprimanded him for it.

No. 70. In answer to this question, I would add, the blanks are quite immaterial, because, in a great measure, it is only a recapitulation of the left-hand side of the register; in fact, the old export register had nothing of the kind, and the present one was brought into use by Mr. Stewart. As to being able to verify the time, it is impossible; I have no watch, nor is there any clock in the room.

Custom House,

13 December, 1858.

W. E. ROGERS.

P. S.—I would add, in reference to export officers taking so many export warrants, that Mr. Russell, during my being in Mr. Nash's office, (lately appointed as drawback officer), took warrants for fifty-six half-tierces of tobacco to ship on board the "Freak," belonging to Captain Smith; these were out of different bonds, and at the request of Messrs. Metcalfe and Co. This is not a single instance.

The uncleanness of the export register may be accounted for, first, from the class of men signing; secondly, that, at times when they signed it it was frequently wet weather, and, wet as they were, went up to the register to attach their signature, and time.

W. E. R.

Custom House, Sydney,

14 December, 1858.

Mr. W. E. Rogers,

Sir,

We, the undersigned Custom House Agents, &c., beg to testify to the attention we have always received at your hands in the execution of your duties as respects the export warrants, &c., and to the general convenience and dispatch in shipping goods, and other business generally connected with the warehouse department.

N. GIFFARD.

P. J. COHEN.

R. T. FORD.

M. BAYLEY.

J. M. ALLAN.

HY. M'CREA.

Mr. Robert McCue called in and examined:—

Mr. R. McCue. 1. *By the Chairman:* You are master of the "Black Swan"? I was.

2. Did you tow the "Louisa" out on the 2nd of September? Yes.

3. About what time? I should say it might be a few minutes past six when I left the wharf, and about half past six when I took her in tow.

4. Did you take her from the wharf? Yes.

5. Do you know the captain of the "Louisa"? No.

6. You are sure it was the "Louisa"? I am not sure, further than that Mr. Manning told me to go there and tow the "Louisa" out. I went there and hailed the captain; he was all ready. I hailed the "Louisa."

7.

7. Did you hail her as the "Louisa"? Yes. Mr. R. McCue.
 8. And the captain answered? Yes. 8 Nov., 1858.
 9. Did you see any one on board you knew? No; there were three gentlemen came on board me just after I got round Bradley's Head.
 10. Who were they? I do not know. I took them on board just as we got round Bradley's Head. I have several occasions to know it was the 2nd—I thought it was the 3rd—but on overhauling, I found it was the 2nd.
 11. What time did you leave the "Louisa"? It might be a quarter to eight or eight o'clock.
 12. In what position? She was standing away to the eastward, with the wind about north-east.
 13. Did you go beyond South Head? Beyond South Head, abrcast North Head.
 14. She stood away to the eastward? About south-east.

WEDNESDAY, 10 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.

J. M'LERIE, Esq.

Mr. John Crook called in and examined:—

1. *By Mr Browne*: You are Harbour Master of Sydney? Yes. Mr. J. Crook.
 2. Do you remember the "Louisa," Captain King, arriving on the 7th October? Yes, very well. 10 Nov., 1858.
 3. She arrived here in the night of the 6th? About five o'clock in the morning I got up and saw a strange vessel up Darling Harbour, off the Gas Works, and wondered what vessel it could be. I know it was a strange vessel because there was no vessel there in the evening; I took the glass and saw it was the "Louisa." When I came to the office they reported that they knew nothing of her, only that she was a vessel from New Caledonia; I told them to enter her as the "Louisa." I went down the harbour, and about two o'clock went on board the vessel to see her log-book, to see where she had been, as I thought she had been away a short time for a trading voyage. When I went on board there was a man in charge, who said he was put there by the owner, Mr. Stewart, and no person was allowed to go on board. I said I wanted to come, officially, to see the log-book, to see where the vessel had been. He said, "I cannot let you see anything—you may come on board, but none of the crew may come." I said, "Could you not let me go to the captain, to see the log-book?" and he said, no, the captain had gone on shore with the rest of the crew, to ship them to go away. I saw the royal-yard hoisted as far as it could go, for some signal, for it is very unusual to see the royal-yard of a vessel in that way. That attracted my attention. He said the captain had gone on shore with the whole of the crew to ship them. I went on shore, and on my way I saw a couple of the Water Police. I said to them, "That vessel is off to-night, there is a screw loose, you had better look out for her"; one of them said, "She can't go." I said, "I tell you she is going to-night, I am sure she is by the movements of the vessel." After I went on shore the "City of Sydney" was going away; we had a boat going down by her, and I went to see the boat well secured. Afterwards I went to the vessel again to see the captain and the log-book. I had a black boy with me from Captain Smith, and the man on board refused to let me go on board; he said the captain was not there.
 4. Had you not, previous to this, seen Captain King go on board? Yes
 5. They denied his being on board? Yes, and the man was on board all the time.
 6. Of that you are certain? Yes; for I talked to Captain King on the Quay, and told him I was coming. The man refused to let me go into the cabin. A native of one of the islands, who knew what I wanted, nodded, as much as to say he was there; but I could not go down.
 7. Did that vessel, either on the 2nd of September or the 7th October, apply for a pilot when she was leaving? No; we had no orders about the vessel at all. The only way I knew she was going was by taking men to re-ship, and, by seeing the royal-yard up, I thought something was wrong
 8. Do you know whether she paid pilotage on either of those occasions? There is no record in the office; there would be if she had a pilot.
 9. She is not exempt from taking a pilot going to New Caledonia? No; the master is exempt for a coasting voyage, but not for a foreign voyage.
 10. Do you know anything of a man named Newton, employed in the Customs Department as export officer? I know him very well—when I say very well, he lives a few doors from me.
 11. Is he a man of good repute? Oh dear no! far from that; he is a drunkard; many a time I have been going to tell the Collector; but then it was after hours I have seen him.
 12. Does he lead a disreputable life? Yes, very; he never ought to have been in the place.
 13. He has lived near you? He has lived near me these ten years; and ever since he has been in the Customs Department he has been in the same way, only it was after hours I saw him. I suppose they could not take any notice because I had not seen him in time.
 14. You have had opportunities of observing many other officers of Customs in your trips round the wharfs? Yes.
 15. Are they generally a sober steady set of men? No; many of them are rather addicted to drink, I am sorry to say.

- Mr. J. Crook. 16. Do you know the tide-surveyors, Collier and Bremer? Bremer I have seen groggy many times, but Collier, I think, is a very steady man.
- 10 Nov., 1858. 17. Did you see Mr. Bremer on the occasion of the wreck of the "Catherine Adamson"? I saw him then, but I did not see him groggy. I was not there late; but I have seen him here in Sydney very groggy. I have seen him go on board ships.
18. Topsy? Yes. The other day I saw one of the crew of his boat lying drunk in the street, and the man had an axe in his hand; I went and reported that to Mr. Collier.
19. Then by repute he is not a sober man, or a man likely to secure control by good example? Mr. Bremer is not at all; but Mr. Collier is a different man altogether—he seems a very excellent man.
20. You did not see anything of the "Louisa" on the 2nd September, when she was going away? No. I saw her going out on the evening I went on board, at eight o'clock at night, in tow of one of the small steamers; I would have stopped her then, but I had no authority to do it.
21. Did you consider that her movements altogether, from the 2nd of September to the 7th October, were of a suspicious character? Decidedly so. I thought so from the beginning.
22. You know some little of the Island trade? Yes.
23. Do you think such a cargo as she took on board, consisting of so large a quantity of spirits and tobacco, was likely to be marketable in New Caledonia? I should think it would; but I understand she never sold anything there—never sold a pound of tobacco there—only a cask of porter, at 6s. a dozen.
24. How did you learn that? From _____, who has just come from New Caledonia. He landed a few casks that sold for a trifle; I went to Captain _____ and ascertained that.
25. Captain _____ would have known if he had landed this enormous quantity—three hundred packages of dutiable goods? Yes. They were making fun of him there, to know what the fellow was to do; they thought him a fool to go there to sell a few bottles of beer, and his oil casks.
26. Do you think there would have been any necessity for him to have borne up from New Caledonia to Sydney, when bound to the Navigator's Islands, in consequence of his mate having died? I do not think he took a mate; there was not a white man on board but himself. The man he called the mate when he went away, was a native of Vavou.
27. The crew were all Kanakas? Every one.
28. *By the Chairman*: You have spoken of having seen Mr. Bremer drunk? Yes.
29. Can you recollect any specific date? No; I could not tell the date, but I have seen him frequently.
30. You have seen him on many occasions decidedly drunk? Yes, many times; I was on board a ship once when he insulted the captain on board.
31. *By Mr. Browne*: What ship was that? I forget the name of the ship. The captain asked me who he was afterwards, and I told him he was a gentleman belonging to the Customs.
32. Have you ever known any tide-waiter fall over from a ship and be drowned? I did once. I have known tide-waiters not to be on board ships many times. I have gone down to the wharf, I suppose for weeks, of a morning at five o'clock and met them coming down. I asked one of the captains did not these men sleep on board, and he said, "Oh! no; they go away every night."
33. *By the Chairman*: Is that the general practice? The general practice.
34. Of all the tide-waiters? Almost every one; there are one or two exceptions, but very few.
35. Do they leave the ships with the hatches open? Yes, they have always done that; I have never seen them do anything else; for in the morning when I have gone on board the master has joked and said, "We have made a good run to-night, Crook." I think within a month they have been all on board their ships every night.
36. That is since the case of the "Louisa" has been "blown"? Yes.
37. You do not mean before that? No.
38. *By Mr. Browne*: From your knowledge of the harbour, do you think the absence of some protection from the Heads would afford facility for running goods? Yes. I think there ought to have been a place at the Heads always. In my opinion, a great deal is smuggled between Sydney and the Heads. There is nothing to stop them from doing it down below.
39. There is no protection whatever? No. There was very good protection when the Water Police were there; they boarded every ship, night and day.
40. You think that protection should not have been removed? I think not. There is nothing now to prevent vessels taking on board dutiable goods in Sydney and anchoring at Watson's Bay or the Quarantine Ground, and running them. The other day I was coming through the Argyle Cut, and I saw a dray going with six or seven large tierces of tobacco. I asked the drayman where the Custom House officer was, and he said he was Custom House officer. I said, "Where are you going, my man?" He said, "I am going up there." He did not tell me at first; but afterwards he said he was going to the Argyle Store, and I stopped and saw that he did go there.
41. A good deal is trusted to the honesty of the draymen and boatmen? The drayman seems to be the man that does it all, I think. The old drayman that took the goods up to the "Louisa" says he often takes goods with no Customs officer.
42. *By the Chairman*: Have you ever had opportunity of observing Mr. Garling in the performance of his duty? I think Mr. Garling is a steady man.
43. Do you think he looks after the subordinate officers? He is generally up at the other end of the harbour.
44. Up Darling Harbour? Up Darling Harbour. He seems to be up about the wharfs there; I do not see him much at this place.
45. Is it his duty to look after the tide-waiters? No; I think it is Mr. Bremer's.
46. *By Mr. Browne*: You know King, who commanded the "Louisa"? Very well.

47. Is he a man of good repute? No; he ran away with a vessel once before (a whaler), Mr. J. Crook, and left the captain on shore on this island, some years ago.
48. Has he not twice? I do not know. He got a certificate only four days before he went 10 Nov., 1853. to New Caledonia.
49. *By the Chairman:* Did you, on or about the 26th September, meet Mr. Llewellyn near the Treasury, and tell him that no bonds had been taken for the goods on board the "Louisa"? Yes; I told him I had heard no bonds had been taken, and he had better look out for himself, to see to put them on guard. I thought it best to let him know what I had heard in the town. Mr. Llewellyn seemed very uneasy, and said he would go immediately and see.

Mr. Richard Kelly called in and examined:—

1. *By the Chairman:* What is your position? Eighth clerk in the Customs.
2. Do you remember having examined any bonds with regard to the "Louisa," in Mr. Llewellyn's room? Yes; I have seen the bonds.
3. By whom were they executed? If you will allow me to explain:—On Monday, the 27th of September, I was sitting in the room with the chief clerk, Mr. Llewellyn, when he brought over two files of bonds and left them on my table, and at the same time produced a small slip of paper which I knew to be a list of dutiable goods; he said, "I wish you to see the bonds," and I checked over the bonds with the lists and found the bonds were given for all the items on that bit of paper; I saw the bonds were there given for all the dutiable goods.
4. Do you remember by whom the bonds were executed? To the best of my knowledge, by William Gibbes, William Stewart, and James Stewart, agent.
5. In whose presence? At this time it was not a public question, and we looked at them just to see that the bonds were there.
6. What induced Mr. Llewellyn to examine the bonds? Mr. Llewellyn said he had been met by a Government officer in the street, who said that certain parties had been running goods without giving bonds, and then, to satisfy himself, he got these files in and brought them to my table.
7. Did you examine them, and find that for every portion of dutiable goods assumed to be sent by the "Louisa" bonds had been given? I did not see the manifest; but, from the extract, I found —
8. Did Mr. Llewellyn take the extract from the warehouse-book or from the manifest? I do not know; it was a slip of paper in red ink. I think he told me afterwards he had got it from the *Herald*.
9. And you checked the bonds from the statement of the manifest in the *Herald*? I checked the bonds with the paper Mr. Llewellyn produced, which I considered was taken from the *Herald*.
10. How many bonds were there? To the best of my belief there were three, but I would not swear, but there might be four; I would almost swear there were three; I am sure there were three, but there might have been four.
11. You are quite sure there were not less than three? To the best of my belief there were three bonds.
12. In whose presence had they been executed? They purported to be executed in the presence of Charles Manton.
13. Were any of them executed in the presence of Mr. Maddocks? I could not say. I merely satisfied myself that the bonds were there.
14. Could you tell me whether that (*handing a bond*) was one of the bonds? Yes; I do believe that to be one of the bonds.
15. That is executed in the presence of Mr. Maddocks? Yes. I know some of them were executed by Charles Henry Manton—I think most of them.
16. Did you examine the amount? I read the amount, but did not make any extract. I merely satisfied myself that the bonds were all there.
17. You did not examine them to see whether they were made out according to regulations? No; I only saw the name of the ship and who signed the bonds, and then satisfied myself they were bound.
18. What did you do with the bonds? I did nothing with them; they were on the table, and Mr. Llewellyn called in the head messenger, and said, "Here are the bonds; give them to Mr. Maddocks; be careful of them," or something of that sort. Wilkinson took them out I suppose to Mr. Maddocks. The bonds were made into two large lots, so that they could not fall out, unless they were extracted.
19. The messenger took them out of the room? Yes

Mr. R. Kelly.
10 Nov., 1853.

William Norman Llewellyn, Esq., called in and further examined:—

1. *By the Chairman:* Whom do you consider the officer answerable for the safe custody of the bonds—is it the messenger or Mr. Maddocks? The cashier. May I be allowed to explain: In 1844 I was appointed to do the duty of chief clerk, which I did. I took the bonds, and they were kept in a cupboard under my desk; there was no other place supplied—no iron chest—for the purpose of keeping them.
2. Were they kept locked up? Yes, always.
3. Are they kept locked up now? Yes, I believe so.
4. Who has charge of the bonds now? I believe the messenger, Henry Falconer, an old man.
5. He now has charge of them? He had: what I have now I take charge of, and what the Collector takes he keeps.

William N. Llewellyn, Esq.
10 Nov., 1853.

MINUTES OF EVIDENCE TAKEN BEFORE THE BOARD APPOINTED TO INQUIRE

William N.
Llewellyn,
Esq.

10 Nov., 1858.

6. When you have been in the habit of sending for bonds, did you send the messenger for them? On this occasion I think I asked Mr. Maddocks for them.
7. Generally, what is the practice? I should send the messenger to bring them out of the drawer.
8. Would the messenger go to the drawer and get them out? Yes.
9. Is the drawer accessible to him? I presume so.
10. If Colonel Gibbes wants them does he send the messenger for them? Yes.
11. And he goes directly to the drawer? Yes.
12. Practically, are they recognised as being in the custody of the messenger? I presume they are, that being the case.
13. I wish to know whether the messenger or Mr. Maddocks, according to the practice of the Customs, could be fairly held to be responsible? When I did the duty I was responsible.
14. You say the messenger is sent to the drawer, and to lock them up if he chooses? Yes.
15. The messenger is practically responsible for the bonds? As you put it in that light it may be so.
16. How can Mr. Maddocks be responsible for papers put in a drawer without his leave and without his knowledge? At this time he took the bonds.
17. I am talking about the bonds being sent for by Colonel Gibbes and yourself? I do not think you could hold Mr. Maddocks responsible under those circumstances.
18. Then, practically, you do not consider Mr. Maddocks responsible for the safe custody of these bonds? I do.
19. How do you, if he does not know when they are taken from his custody? Not under those circumstances. The Collector —
20. Are they taken from his custody without his knowledge? They must be taken for the use of the office: I may want some information from the bonds. We never dreamt of bonds being taken; we never before heard of such a thing.
21. *By Mr. Browne*: What did you do with these bonds after you had requested Mr. Kelly to examine them in your room? I told the messenger to take them back to Mr. Maddocks.
22. You furnished Mr. Kelly with a memorandum by which he examined them? Yes.
23. How did you make that memorandum, or what did it contain? Merely the packages.
24. Taken from where? From the newspaper. I took it in the evening.
25. Supposing that in the course of the day Mr. Manton thought proper to take bonds instead of Mr. Maddocks, whose particular duty it is to take bonds, and had kept those bonds in his own drawer for four or five days, could Mr. Maddocks be responsible for those bonds? I should think not; but they were on the file when I saw them.
26. Could Mr. Maddocks know any thing of the existence of these bonds at all? Not at all.
27. If the messenger has access to this drawer, could not any person anxious to extract the bonds for the purpose of prosecution withdraw them? Yes.
28. Could Mr. Maddocks be responsible for that? No.

H. Falconer.

Henry Falconer, Messenger to the Customs Department, called in and examined:—

1. *By the Chairman*: It is generally the practice to place export bonds in your charge, is it not? I do not take them away until they have the two signatures to them, and then I tie them and put them on the file, and every month I tie them up and put them away.
2. Where do you put them? In a drawer, or else they are locked up in the room below.
3. Do you lock up that drawer? Yes.
4. Often? Pretty well every time I have them; but till the bonds are signed with two signatures I must not take them away.
5. When they are put away in a drawer do you lock the drawer at once? Yes.
6. Where do you keep the key? Sometimes in my pocket, sometimes in a bit of a desk.
7. Where is that? Up-stairs in the Long Room.
8. Is it in Mr. Maddocks' desk? No.
9. How long does it remain there? Till the morning; then I take it out. I cannot keep the drawer locked, for every body goes to it; people want to see the lists.
10. Then you do not keep the drawer always locked? No.
11. Throughout the day you do not keep the drawer locked? If I am sent out I have the bonds on the top of the place; so that if anybody called for them they could receive them.
12. Or take them away and examine them? They would not take them away out of the place.
13. Suppose they did take them away, could you find them out—if one were taken away for a quarter of an hour would you miss it? I cannot say I would.
14. Is it your business to see whose signature is at the bottom of the bond? It is my business to see the signature here. (*Pointing to the left side, at the bottom of the bond.*)
15. You never give the key, after you have locked the drawer, to Mr. Maddocks? Mr. Maddocks I have nothing to do with. When I have the two signatures here, and his name is signed to it, or any body that takes the bond, then I can tie it on my file.
16. You think with regard to these bonds you have nothing to do with Mr. Maddocks? Nothing to do with him.
17. *By Mr. Browne*: Do you remember Mr. Manton giving you any bonds on the 2nd or 3rd of September? I do not, and it is a very strange thing to me if Mr. Manton took any bonds, and if he signed them it was his business not to do so, but to give them to Mr. Maddocks, and then I ought to have received them from Mr. Maddocks to put them on my file.
18. You do not remember his giving you any? No, I declare it.
19. *By the Chairman*: You said that the key with which you locked the drawer you put at night into a desk? I put it away; sometimes I take it away with me.
20. When you put it away do you put it in a desk? No, in a bit of a hole I have got there.

21. *By Mr. Browne*: You, according to the colonial phrase, plant it? I do not know H. Falconer.
about planting it.
22. *By the Chairman*: You put it in a hole in the wall? We have holes with slides, and 10 Nov., 1858.
I put it in one of them.
23. Does any body know where you put it? I have been there a great many years, and it is a thing I have never been asked for.
24. Does any body know where you put that key? I cannot say anything about that.
25. *By Mr. Browne*: Do you sleep on the premises? No.
26. Has not the messenger and office-cleaner access to the place? There is a messenger belonging to the office—a person to take care of it—but I am only a messenger.
27. If they have access to that room, and to the slide, they could open the drawer, could they not? They could do that, certainly.
28. *By Mr. M'Levie—(handing bond to the witness)*: Look at that bond, and see if that has ever been put on the file by you? Yes, that has been on the file; I can tell that by the holes at the side.

Mr. Stewart Mowle called in and examined:—

1. *By the Chairman*: What is your position in the Customs? Fourth clerk. Mr. S. Mowle.
2. Is it your duty to take charge of the clearances after they have passed through the usual process of clearing the ship? Yes. 10 Nov., 1858.
3. Did you get the clearance and content of the "Louisa" on the 2nd of September, when she cleared? I could not answer that question.
4. You do not know? No; I imagine I did, for I delivered the paper to Colonel Gibbes?
5. Did not the Collector come to you and ask for them on the morning of the 3rd? I am not aware that he did; he may have done so.
6. When you get these papers, do you examine them, or merely put them away? I have to compare the entries for drawback with the content outward.
7. If there are no goods for drawback? I then merely put the papers together, and place them in the drawer.
8. Are they not sealed together? They are tied.
9. Look at these—*(handing the witness the papers of the "Louisa" pinned together)*—would they be put away in that state? No, they would not, generally; but when there are very few papers I do not tie them up.
10. You do not examine whether there are any documents wanting, such as the shipping officer's certificate, or anything of that kind? I generally do; but I do not know that I am called upon to do so; I merely require the drawback; that is my particular duty.
11. It would not be your duty to see whether these papers were irregular? I have done so, but I do not know that it is my duty.
12. Who gives these papers to you? Mr. Manton; he puts them in my drawer; I do not know when he puts them in; I keep an account with him, an outwards book, and see that I have every ship's papers.
13. Would not that book shew when you got the papers? No, it would not.
14. Mr. Manton puts them in your drawer, and as you find them there you enter them in your book? No. I go to the lower end of the room where he sits; he has an account of the vessels cleared, and I take an account of them too, that I may write off the drawbacks.
15. Is your drawer open? Yes.
16. Are none of the public documents locked up? I have no keys whatever.
17. No keys to your desk? No keys whatever.
18. Is that the pilotage book? *(Referring to a book produced by the witness)* Yes.
19. Do you keep that? I do not.
20. *By the Chairman*: Can you state whether the pilotage of the "Louisa" was paid on the 2nd of September, and the 7th of October? The gentleman who takes the pilotage, and who keeps the pilotage book, authorised me to say that the "Louisa" cleared out after time on the 2nd September, and again on the 7th October; thus in both cases the pilotage was credited on the following day.
21. Whose signature is that on the top of the paper? Mr. Mackenzie's.
22. Should not that signature be always upon the content outwards? It should, except in the case of a steamer.
23. Should the clearing clerk see that that signature is upon it before he clears a vessel out? Yes; otherwise he would be liable for it.
24. It would be a neglect of duty on his part if he were to clear out a vessel without seeing that the pilot dues are paid? No doubt; every charge ought to be correct before a ship is cleared.
25. Will you examine the content outward of the "Louisa" of the 7th October. *(The witness examined the same.)* Is there any signature upon that showing that the pilotage has been paid? No.
26. When Mr. Manton cleared out the vessel upon that occasion, then he did it irregularly? It appears that the vessel cleared out before the pilotage was paid. It is Mr. Manton's business to see that the document is completed in every way.
27. Is it the jerker's business to see that signature? The outward papers do not go the jerker at all; they come to me. I mistake, he does look at them to see that the ship has been jerked inwards; but it does not concern the jerker at all whether the pilotage has been paid.

TUESDAY, 23 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq. | J. M'LERIE, Esq.

Mr. Edward Newton called in and examined:—

Mr. Edward
Newton.
23 Nov., 1858.

1. *By the Chairman*: The Board, before they ask you any questions, wish to inform you that you are not bound to answer any put to you, if you think it better for your own case not to do so, but that whatever you do answer they may make use of in any way they please. You have done the duty of tide-waiter? I have.
2. And occasionally of export officer? Yes; I have been export officer for some time; it is the same as tide-waiter.
3. As permanent tide-waiter? Yes, it is one and the same thing.
4. Do you remember the case of the "Louisa" clearing out on the 2nd September? I do.
5. You were employed then as export officer to put on board that ship a certain amount of dutiable goods? I was.
6. Will you describe to the Board all the circumstances connected with your discharge of that duty, commencing with the time the warrant was given to you? I commenced on the 27th of August, and I took out of the Chilian Bond 3 hogsheads of rum, and on the same date I took out 2 hogsheads of rum and 4 half-tierces of tobacco which I brought back again, there being no person on board fit to take them in; I brought them back and re-banded them.
7. *By Mr. Browne*: All of them? No; I shipped three, the first load that went down, but after that I went with two more of the same mark and 4 half-tierces of tobacco, which I brought back again. That was two loads. On the 2nd September I shipped from Gilchrist's Bond 28 hogsheads of rum, and on the same day I shipped out of Walker's Bond 8 half-tierces of tobacco; on the same date I shipped 200 cases of Geneva; on the same date again, 15 quarter-casks of whisky, 50 cases of claret, 31 hogsheads of brandy, and 14 quarter-casks ditto. That is all.
8. *By the Chairman*: On the 2nd September who was the officer of the Customs who gave you the export warrants to carry those shipments into execution? Mr. Rogers, if I recollect aright; I will not be positive whether it was Mr. Rogers or Mr. Nash; sometimes I get warrants from one, sometimes from the other; I rather think it was Mr. Rogers.
9. When you got the warrant what did you do? I went to the different bonds.
10. Which bond did you go to first? To Gilchrist's Bond first.
11. What did you take from there? 28 hogsheads of rum.
12. Did you take that to the ship? I went with the last load.
13. What did you do with the 28 hogsheads? They went to the ship. I did not go with each load, but I went with the last.
14. How many loads were there? About seven loads; sometimes three, sometimes four in a load.
15. You accompanied the last load of rum to the ship? I did. I then went to Walker's Bond for eight half-tierces of tobacco, which made two loads, and I went down with both of them to the ship.
16. After that what did you do? I went to Lamb's for 200 cases of Geneva.
17. And what did you do with them? I went with the last load.
18. How many loads were they? Eight; five-and-twenty cases in each load.
19. What did you do next? I went to Pollard's for 15 quarter-casks of whisky.
20. How many loads did they make? Two.
21. Did you accompany both of them? I did.
22. After Pollard's, what did you do? I went to get the warrants out of the Chilian Bond for the 50 cases of claret, 31 hogsheads and 14 quarter-casks of brandy, which had been sent down without my accompanying them, for I had left the warrants with the locker. I asked him if he would be so good as to get them dipped while I was getting these articles out of the other bonds. I took the warrants in the morning to get them dipped, and asked the locker if he would be so good as send them down and I would meet them.
23. Was the locker in attendance on that bond in the morning? Yes, at the Chilian in the morning — No, he was not; at least I do not think he was in the morning; but I gave the warrants to him.
24. Where did you give the warrants to him? In the Custom House.
25. If he could not be in attendance at the bond in the morning, where would be the advantage of giving them to him? Because he might dip them; because he opened at one o'clock.
26. Then you intended him to dip them after one? Yes.
27. Did you accompany them to the ship? No; they had gone down while I was shipping the other things.
28. Who sent them down? The locker.
29. Who did the locker send them by? By drays.
30. Who accompanied the drays? Nobody, but I saw them on the wharf when I went to get my warrant signed, and saw them all on board.
31. Then, if I understand you right, these 31 hogsheads and other goods from the Chilian Bond were sent from the bond to the wharf unaccompanied by any officer of Customs? Yes.
32. And they were sent down by Mr. Brown? Yes, at my request.
33. What was the next order you accomplished that day? There was no more.
34. How many loads did these 31 hogsheads and 14 quarter-casks of brandy make? Four in a load of the hogsheads, and six of the quarter-casks. The 50 cases of claret made one load; it was in one-dozen cases.

35. What time was it these several orders were given into your hands by Mr. Rogers or Mr. Nash, as the case might have been? About ten o'clock.
36. Were they all given you at one and the same time? Yes, all on the 2nd of September, with the exception of five hogsheads and four half-tierces.
37. How long did it take you to execute the order for 28 hogsheads of rum? About half an hour, for they were not re-gauged; they had only just come into bond, and they were rolled out, and loaded, and away they went*.
38. Eight half-tierces of tobacco? They did not take five minutes.
39. I think you accompanied them to the wharf? Yes.
40. It must have taken more than five minutes to accompany them? The delivery of them I understood you to refer to. That must have been about half an hour.
41. What time were you at Walker's Bond in the morning? Between ten and eleven, I think.
42. Was there anything going on on the wharf? No.
43. No auction going on? No.
44. No business at all going on that day? Yes, there was.
45. Did the storekeeper refuse to give you out the goods when you asked him? No.
46. Did he make any objection? No.
47. Having seen these on board you had to come back for 200 cases of Geneva? Yes.
48. You say you saw the last of them on board only? Yes.
49. What time did you see the last of them on board? I cannot say exactly; it must have been between twelve and one; I should say somewhere about that.
50. When you saw the last case on board? Not the last case, the last load—directly I got on the wharf.
51. Did you take the whole of these cases before dinner? Yes.
52. They were all sent at one and the same time? Yes, the drays all followed down. I stood there and kept tally.
53. How long did it take you to execute that order? About an hour, I suppose; it might have been more.
54. From that you went for 15 quarter-casks of whisky? I did. That was after dinner—after two o'clock.
55. You say you accompanied the last load of that? I accompanied both of them.
56. How long did you take to do that? Somewhere about half an hour.
57. Then you came to the 31 hogsheads of brandy——? I came to the Chilian Bond then, to inquire whether the whole of them had been sent; because I had seen, each time I had been down with other goods, these on the wharf, and they were being taken in as quickly as possible; and I had then, immediately after I had shipped the 15 quarter-casks of whisky out of Pollard's, to go back to the Chilian and get two sets of warrants, because the hogsheads and quarter-casks were in one set of warrants. I got them back from the locker, took them down, and saw everything on board the ship.
58. By the time you came to the Chilian Bond these goods had been sent away? Yes, very nearly. I think there was about one load; I was a good bit behind it, and it got down there just before me.
59. Having got these several cases on board, what did you next do? I went to the landing-waiter's office on the Flour Company's Wharf, to get the warrants signed.
60. What time was that? About ten minutes after four.
61. Who is the landing-waiter of the wharf? Mr. Anderson, and some one else. Mr. Anderson was then, I know.
62. Did you find him there? No.
63. What did you do then? I went round to the Hunter River Wharf, which he had charge of likewise, to see if I could find him there. I did not find him, but I found Mr. Bramwell there.
64. What did you ask him to do? If he would be so good as to sign these warrants. He looked at them, and said yes, he would.
65. Did he sign them then and there? He signed them there and then. He asked me if they were all the goods in the ship; I said yes, because I had signed the warrants myself previously.
66. What time did you find him there? At from five to ten minutes past four—perhaps it might have been a quarter past four.
67. It has been stated to the Board that it is the duty of the export officer to follow drays to the ships—as far as I understand, you did not follow all the drays to the ship? I did not, but that is often done to hurry business on. It would take a dozen export officers to follow every dray.
68. When you say it is very often done, by whose authority is it done? I am not aware of any particular authority.
69. Has Colonel Gibbes ever given you authority to leave the drays? No.
70. Has Mr. Garling? No.
71. Has Mr. Collier? Mr. Collier has nothing to do with me.
72. Then your superior officers, Colonel Gibbes and Mr. Garling, never gave authority to leave the drays? No.
73. Did you see the goods into the ship too, because it has been stated that that is your duty? I did.
74. Who was on board at the time? Captain King.
75. What crew had he? Well, I am sure I did not take particular notice of them.
76. How many of the goods did you see into the ship's hold? I saw the whole of them. There might have been a stray package I would not absolutely swear to.

Mr. Edward
Newton.

23 Nov., 1868.

77.

* This is not true: they had been in bond since 23rd June.

- Mr. Edward
Newton.
23 Nov., 1858.
77. You said you were continually backward and forward? Yes, I was continually backward and forward as they were taking them in.
78. How then could you be there to see what they put in? I saw them at the last.
79. Did you count the packages? No; I say I cannot say to one or two packages.
80. How could you tell they were in the ship's hold if you did not count them—there were 350 packages altogether? I could count the hogsheads where they were stowed away without going into the hold.
81. Did you count the packages so as to check them against the export warrants? I did not.
82. Then when you say you saw them into the hold, you mean you took a cursory view after they were supposed to be put in? After they were put in, not supposed to be put in; the captain would not have signed my warrants without.
83. You think the certificates of the captain were sufficient to convince you the goods were there—that makes you certain the goods were in the ship? Yes; I am quite certain.
84. Did the "Louisa" go out that day? I am sure I do not know; I had nothing more to do with her; I do not know when she went out.
85. Did you notice any time you were there how many men were employed putting these things on board? There were a great number.
86. Were they black or white men? There were some black, but there were a great number of shore laborers.
87. Could you mention one? No, I could not; they were all strangers to me. I did not pay any attention to them; there was a great number, I know; they were getting the goods in as fast as I could bring them down—indeed quite as fast.
88. When you took these out, had you to pay the warehouse-keeper the warehouse fee for rent? I did not, if I remember, in that case—I would not be positive.
89. Did you in any one case pay the fee? I cannot say; I do not frequently. There was some talk about it some time ago, but the Collector said the officers might do as they thought fit.
90. Do you remember whether you paid the fee in the case of the 8 half-tierces of tobacco you took from Walker's Bond? I think I did.
91. Whom did you pay it to? To the storekeeper.
92. What rent did you pay? I am sure I cannot say.
93. You pay the rent for another man, do you not? Yes.
94. At some period then you are paid back, are you not? No; I did not pay it out of my own pocket.
95. How did you pay it? With their money, and I got a bill. When I go back I say here is the bill, there is the change. Suppose it comes to five shillings and the Custom House Agent gives me £10—I do not know what it will come to—I give him the bill and change back, to save him the trouble of sending his clerk to pay it.
96. When you had these warrants put into your hand, did you inform Mr. Collier or Mr. Bremer that a large quantity of export goods were about to be shipped in the "Louisa"? No.
97. We have been told by the tide-surveyor that it is the duty of the export officer to do so—why did you not do so on this occasion? Because as I mentioned to Mr. Collier I had done it so often that I was completely tired, for he never had put an officer on board any of the vessels, but when this case occurred he blamed me for it; that was the reason I told Mr. Collier.
98. You took upon yourself to disobey orders because you were dissatisfied with Mr. Collier? I never was ordered to do so.
99. Is it not a regulation of the Customs that you should do so? I am not aware that it is. I never was ordered to do so.
100. Did you not think it a safe precaution to take when you knew you could not accompany the drays to the ship? Being all done in one day I had not time to go to the Custom House if I had felt inclined. I was running about all day long.
101. You considered it unnecessary to take the precaution? I did.
102. It has been proved to us very circumstantially that the eight half-tierces of tobacco did not leave Walker's Bond till the 3rd of September—have you any proof to bring that they left it on the 2nd? Yes.
103. What proof? The drayman.
104. Who is the drayman? O'Brien. I do not know whether he knows the date exactly or not, but he has other means of proving that it was on the 2nd.
105. Would you like him to be examined? Yes.
106. Have you any other proof besides O'Brien's evidence? No, any more than the locker. I could not have shipped them on the 3rd—at least he delivered them to me on the 2nd, so what could I have done with them?
107. But it is stated that he delivered them on the 3rd—have you any proof they were delivered on the 2nd? Yes, the locker and the drayman.
108. Will you warn O'Brien to give evidence in this case—we will examine him on Thursday if you bring him? Yes, I will bring him.
109. Mr. Watt has told us that you paid him the rent up to the 3rd inclusive? So I believe. I am given to understand that; but he is quite wrong.
110. He has brought testimony to the fact—can you bring anything to prove that you did not? Yes, just what I said just now.
111. That you did not pay him rent to the 3rd? I paid him rent on the 2nd. I will not say what I paid him, because I cannot; it is impossible; but I paid him the rent on the 2nd, and took the tobacco out on the 2nd.
112. Mr. Anderson has told us that he was continually about the Grafton Wharf on the 2nd September—did you ever see him? I cannot say whether I did or not; very likely I did, and took no notice of him.
113. You did not think it desirable to ask him to sign the export warrants? He was not there when they were completed.

114. As they were completed—some of them were completed during the day? I could not wait for that; I wanted him to sign all at the end of the day.
115. You could not get him to sign them as they were done? That was impossible.
116. What made it impossible? I had not time; the drays were waiting.
117. Not time to hand the papers to him? No, not for him to sign.
118. Have you ever shipped such an amount of dutiable goods in one day? Yes.
119. On what occasion? The 20th of August, 1857, the day before the "Dunbar" was lost.
120. It appears from evidence we have received that these export warrants are very incorrectly made out. We find there has been no re-gauge in any one case—did you see any re-gauge on that day? No, they were not re-gauged.
121. It is not your duty? I have nothing to do with it, unless I am in the bond as acting locker. The lockers never re-gauge them, I believe, unless they are requested to do so, for export; at least that is only a surmise of my own.
122. It has been proved to us very circumstantially that four loads of gin left Lamb's Wharf after dinner and four before. You have stated that the whole left before dinner—can you prove that by any evidence? I would not be positive about that; it is impossible for me to recollect exactly the time I took them. When I am constantly shipping goods every day from different places, it is impossible for me to recollect the exact time.
123. You very carefully just now read to the Board off a piece of paper, in order that you might make no mistake, the time at which you had shipped the different parcels of goods? I put no time at all, I only put down the quantities.
124. You have stated very circumstantially the order in which you executed these different warrants? Yes.
125. Now, it has been very circumstantially stated to us, with respect to the order for the gin, that you had not finished executing that order before three o'clock in the afternoon? That is very easily proved. Mr. Macrae, at Pollard's, will prove that I went to Pollard's after that for 15 quarter-casks of whisky.
126. I say the whole of the gin had not left Lamb's Wharf before three o'clock? Mr. Macrae will prove that I went to Pollard's after that.
127. You might have left the gin behind and then gone to Pollard's? No; Mr. Mundy would not have allowed the gin to leave without me.
128. Can you prove that the whole of the gin left Lamb's Wharf before one o'clock? No; it might have been between one and two, or half-past two. Sometimes they work between one and two.
129. Then you are not certain whether the last case of that gin left Lamb's Wharf before or after two o'clock? I will not be positive. I know that after I left there I went to Pollard's for 15 quarter-casks of whisky, which I accompanied myself.
130. In two dray loads? Yes.
131. After that you had to go to the Chilian Bond? Yes, for the warrants for the claret and brandy.
132. You told us just now that you had shipped more dutiable goods in one day than these you say you shipped on the 2nd September? Yes.
133. We have examined the register-book and find they were all shipped from one bond? Yes.
134. But the goods said to be shipped on board the "Louisa" were from five different bonds? Yes.
135. Have you ever shipped from five different bonds so many as you say you shipped on the 2nd September? I do not remember that I did.
136. In the case you referred to, the whole came from one store? Yes.
137. Therefore you might have accompanied every dray by simply making one journey? No.
138. On that occasion did you accompany all the drays to the ship? I did not accompany one till the last. I sent tickets down to Mr. Lloyd at the steam-boat wharf, and when I went down I had my memorandum, and I took off his tickets, and found them all correct.
139. When you were taking the gin from Lamb's Wharf did you ask Mr. Munday to let the drays follow you? No, for he would not.
140. Did you not ask, and he refuse to let the drays follow you? Very likely he might, for he has refused me often, but when I stopped there they were in my charge, and I sent them on.
141. Then you had to remain there till the last dray left? Yes.
142. And after that you had to go to other stores? Yes, to Pollard's for 15 quarter-casks.
143. You reside near Mr. Crook's, do you not? I do. (*The witness was directed to refer to the register.*)
144. Is that your signature? Yes.
145. What does it mean—that you have shipped these goods? Yes.
146. Does it mean that you shipped by a particular time? No, that is nothing—the time.
147. They were given you at one and the same time? Yes.
148. You enter the time you return yourself, do you not? Yes.
149. Are these your figure? Yes.
150. You say you returned the warrant for 200 cases of gin at twelve o'clock? Yes.
151. You returned the warrant for 50 cases of claret by twelve o'clock—is that correct? No, that is completely nominal, for they all came in at once. I might just as well have put five o'clock to it.
152. Give the thing a proper name—do you mean by nominal false? They are not right; they should all have been five o'clock.
153. You put down twelve when you meant five? Yes.
154. We are to understand that the whole of these warrants were returned to the Custom House at five o'clock? They were not returned to the Custom House; I gave them to Mr. Stewart to clear the vessel with, a little before five, and he returned them to me the first thing the following morning, and it was the following morning I put this down.

Mr. Edward
Newton.
23 Nov., 1858.

- Mr. Edward
Newton.
28 Nov., 1858.
155. *By Mr. Browne:* You say Mr. Stewart returned the warrants to you the next morning—what for? For me to sign this book and give them to Mr. Manton.
156. *By the Chairman:* Is it not your duty to return the export warrants to Mr. Rogers or Mr. Nash? Yes, but it was too late.
157. Is it your duty to give them to Mr. Stewart, the Custom House Agent? It is frequently done when they want to clear a vessel.
158. By whose authority? I do not know; I have done it frequently.
159. With anybody's knowledge except your own—with Mr. Garling's knowledge? I do not know whether it was with Mr. Garling's knowledge or not, but I have frequently done it.
160. Has anybody authorised you to do it? No, not that I am aware of.
161. *By Mr. Browne:* Did you give these warrants the next day to Mr. Manton? Yes.
162. At what time in the morning? Between nine and ten o'clock—a little after nine.
163. Should not these warrants have remained with the content of the ship? No; one set goes to Mr. Nash, and one set to Mr. Manton—at least one half-set.
164. Then Mr. Manton had no set till the next morning? Yes; he could not have cleared the vessel without them.
165. Then, must he have given them back to Mr. Stewart? He gave them back to Mr. Stewart. I got them from Mr. Stewart the next morning.
166. What did you do then? I signed the book with them, and gave one half-set to Mr. Nash, and one half-set to Mr. Manton.
167. Is it usual for the export officer to endorse the bonds he takes warrants from? Yes.
168. Have you not endorsed some of these? I endorsed them all.
169. Have you not written on the back of them that which properly belongs to the locker? That is very likely. (*The witness examined the warrants.*)
170. Two are endorsed by him? Merely filled up, not signed.
171. The back of the warrant is filled up by yourself? Yes; but signed by the Customs locker.
172. You say you went first to the Chilian Bond, or found the locker of the Chilian Bond, and told him to get the goods out—the rum and some of the things—and send them down to the ship? Yes.
173. You saw him in the Custom House? Yes.
174. Is not he the locker of Walker's Bond too? He was; he is one of the export officers, not a locker.
175. He had charge of two bonds at that time? Yes; Walker's in the beginning of the day up till one o'clock, and the Chilian from one till three, or four.
176. What opportunity would he have of delivering these goods from the Chilian Bond between nine and one o'clock—would he not be at Walker's Wharf? He had not.
177. What time did you go back to the Custom House to the locker after the warrant you spoke of? About half-past three, or a quarter to four. That was the last I did.
178. I thought you said you went to Pollard's last? That was the last place I shipped from; but then I came back for the warrants to the Chilian.
179. You never saw any part of the goods that left the Chilian Bond go towards the ship? No, I do not think I did see any.
180. If there had been no crew on board this vessel till one o'clock in the day, do you think all these packages could have been taken on board? Quite easy.
181. I say if there was no crew? There was a crew—I do not mean to say there was a crew, they were shore laborers. Some might have been part of the crew.
182. Mr. Mundy tells us that the time taken at Lamb's Bond in delivering the gin was from half-past eleven until one, and from two until three—is that the case? No; there might have been some after dinner, I would not be positive of that—after two o'clock. It did not take till three o'clock or anything like it; I must have been at Pollard's at three.
183. Is Pollard's open all day long? Yes.
184. You must have been at Pollard's at three, and gone to the Flour Company's Wharf, and then been back at the Chilian Bond at half-past three? Half-past three—no.
185. At half-past three you said you were at the Chilian Bond looking after the warrants? About that time.
186. How long does it take to break out hogsheads of brandy and load them? In some cases a week to take out twenty; sometimes not half an hour to take out half a hundred.
187. Is it at the discretion of the export officer to have the goods re-gauged? We have nothing to do with that.
188. How was it that some of the goods were not gauged? They had just come into bond.
189. In this case they had been three months? Three months is the given time.
190. *By the Chairman:* One has been in from 11th April, and there is no re-gauge for it—is it three or four months that is the time? Three, I have always been told; but that I have nothing to do with; that is out of my line altogether.
191. Did you never communicate with Mr. Garling when you were going to ship a large quantity of spirits? No.
192. Does any one in the Custom House know whether you have gone upon any duty during the day? Yes; Mr. Nash and Mr. Rogers. If any one wants to inquire for any export officer, Mr. Rogers refers to the book to see where he has gone.
193. All the other out-door officers might be perfectly ignorant of your shipping any quantity of dutiable goods at all—that is the custom, is it? Yes. I do not know anybody we could let know, except we were to go to a tide-surveyor and get an extra tide-waiter put on.
194. *By Mr. McLerie:* At the time you shipped the large quantity of gin from Kirchner's you said you sent a ticket down of each case, and kept a copy yourself? Yes; because they were small cases, and I was frightened of their getting lost.
195. For what purpose was the ticket—was the ticket brought back? No; it was left with Mr. Lloyd, who was the managing man down there at the Melbourne steamers' wharf; and when

when I went down with the last load I had a memorandum, and asked him to call over his tickets.

196. Did you adopt the same precaution in shipping the goods by the "Louisa"? There was no one to receive them except the captain. This was a different thing, being at the Company's wharf and office.

197. There was a captain and mate on board to acknowledge the shipment? I could not have done it, when I come to think, because I was not at the different bonds at the time; but I was in the case of Kirchner's.

198. You mean to say that, in the case of shipping the "Louisa's" goods, they left the store whether you were present or not? Yes.

199. You did not adopt any check to satisfy yourself whether the goods went down? I did not, till I went down to the wharf at last.

Mr. Edward
Newton.

23 Nov., 1853.

Mr. Michael George Brown called in and examined:—

1. *By the Chairman*: You are employed as a locker at Walker's and the Chilian Bonds? Yes.

2. Walker's Bond is open till one? Till a quarter to one.

3. And the Chilian Bond — ? From one till four.

4. Do you remember delivering eight half-tierces of tobacco from Walker's Bond on or about the 2nd or 3rd of September? I do.

5. What date was this? This question was asked before, and I was bound to say I could not tell—that was in the presence of a former Board, consisting of the Colonial Treasurer, the Crown Solicitor, and Colonel Gibbes—without reference to the books. I have referred to the books, and found that I delivered them on the 2nd of September.

6. Having looked at the books, are you sure you did deliver them on the 2nd? I have no reason to doubt it; I have heard a great deal of conversation from that time to this, but I have no earthly reason to suppose this is wrong.

7. Have you any other means of refreshing your memory besides the book? I know when I arrived at the Chilian Bond that day I found goods waiting to go in there, in charge of an officer named Smithwick, one of the extra officers employed to remove goods from store to store; I know that on the very day I delivered this tobacco I found these goods waiting for me—shewn to be on 2nd September by removal orders.

8. Are there any other circumstances which impress the date strongly upon your memory? I think not, just now.

9. At what time of the 2nd was it that you delivered these eight half-tierces? It is impossible for me to state what time.

10. About what time? I can only say between half-past nine and a quarter to one.

11. Was anything going on on the wharf that day when they were delivered? Not that I am aware of.

12. Any auction? I remember an auction going on, but not that day.

13. Was any objection made by Mr. Williams as to delivering these tierces when the export officer applied for them? Not that I am aware of.

14. Nor by Mr. Watt? I know of none.

15. As soon as the export-officer came they were at once delivered? I believe they were delivered in the usual way.

16. It has been stated by Mr. Williams, and also by Mr. Watt, that there was an auction on the wharf that day; that application was made by the export-officer for the discharge of these eight half-tierces; that he declined to issue them till the storekeeper had appealed to Mr. Williams, and then that Mr. Williams finally consented to give them out? I remember the storekeeper made that very remark that you now make, but that was some days after the delivery; when the matter was discussed, he said he was assured it was on the 3rd—he said, I recollect Mr. Newton calling upon me, and asking me to deliver them, and I objected.

17. I ask you whether you remember the auction being on the wharf at the time these eight half-tierces were delivered? I do not. I remember the auction.

18. Do you remember delivering goods that day? I do not believe I delivered a single package that day.

19. You issued a large amount of dutiable goods on the 2nd of September, did you not? Yes; I delivered 31 hogsheads and 14 quarter casks of brandy from the Chilian Bond on that day.

20. And 50 cases of claret that had been restored? I recollect delivering the claret, but I cannot say whether it was that day from memory.

21. Did you re-gauge any of the goods you delivered from the Chilian Bond? I did not.

22. Why not? The fact was, the order came in such a manner that it prevented me—it would have prevented the shipment if I had. I re-gauge when time allows; but when a large order comes we cannot re-gauge, otherwise we should shut out the shipment of goods.

23. Where did you get the orders with reference to the issue of dutiable goods from the Chilian Bond? From the export officer.

24. Where was he? Are you aware of the position and situation of the Chilian Bond?—the bonded store is on the first floor.

25. Where was the export officer? He came to me on the first floor, on a level with the bonded store.

26. At what time in the morning or afternoon? I cannot say—it was in the course of the afternoon.

27. In the course of the afternoon he came with the warrants—you are quite sure of that? Quite sure.

28. Did he stay with you while you issued the goods on this occasion? I can only say he delivered

Mr. M. G.
Brown.

23 Nov., 1853.

Mr. M. G.
Brown.

23 Nov., 1858.

delivered the warrants to me, and then went below to receive the goods. I consider it my duty to put them down, and when they are through the trap they are in his charge, and I have nothing more to do with them.

29. Did he stay while they were discharged from the upper to the lower store? I believe he did.

30. When you deliver to his charge you deliver to his own custody? Most assuredly.

31. When I say custody I mean into his presence? It is just possible he may have left them.

32. Did you hand over cask after cask and case after case in to the custody of Mr. Newton or of the draymen? I do not know the draymen in the matter. When the export officer receives goods from me he delivers the warrant to me, and then goes down to the lower floor.

33. When you deliver a cask, to whom do you hand it? To the officer.

34. Was Mr. Newton present on the occasion of the delivery of these? I know he was there when he handed me the warrant, and at the beginning of the delivery; but I can tell you this, that it is the practice to receive a large quantity of goods from a bonded store, and send a portion to the wharf without the actual presence of the export officer; but he sees them delivered on board ship.

35. Is it the practice of the lockers to deliver out of bond to any one else than the export officer? To none other.

36. Did you deliver these to Mr. Newton? Yes.

37. Are you quite sure of that? Yes; but I should like you to understand that it is just possible that I did not catch sight of Mr. Newton every cask I delivered.

38. Are you confident Mr. Newton never left you when the goods were being delivered? I believe he did.

39. Did he leave you for half an hour? My presence—I cannot say. It is my duty to see the goods broken out from the tiers, and during that time he may go God knows where. I consider they were all put into Mr. Newton's charge when—

40. When the goods were put on the drays to be taken away, did you take care to see that Mr. Newton was there? I have stated how the Chilian Bond is situated; we cannot see a dray; we lower the goods on to the floor below through a trap door.

41. After having delivered them, you do not know whether Mr. Newton, Mr. Stewart, or the drayman took them? I know after they were delivered Mr. Newton came to receive the warrant—it being signed.

42. After the goods leave the trap door you cannot tell where they go to? I cannot; they might be rolled into the next door for aught I know.

43. When do you sign the warrants? At the completion of the delivery.

44. The export officer brings them to you? He brings them to me before I deliver at all.

45. On what authority did you neglect to re-gauge these dutiable goods? Nothing more than to facilitate the business of the merchant.

46. You did it on your own responsibility? To some extent, certainly.

47. Entirely, as I understand you? I never received orders to re-gauge for exportation.

48. In the absence of orders you exercise your own discretion? Yes.

49. There are no printed orders? No; I have never received any.

50. Then the lockers have no instructions but verbal ones? I have heard that lockers' instructions are in circulation, but I never received any. I think you said just now that Mr. Williams' storekeeper states that he delivered this tobacco on the 3rd. I have made a memorandum here that I find a discrepancy of this kind has arisen before, of which I can give you the dates. With regard to Walker's books, they shew a delivery on the 12th April, where the locker's books shew a delivery on the 9th. I want to shew you, gentlemen, that this discrepancy may have arisen, and, I believe, has arisen, on the part of Mr. Watts, although I believe he has not manhood enough to admit his error.

51. How do you propose to shew this, for it may have been an error in your books? It may be so, but I think not.

52. Is there anything to shew who was right and who was wrong in the entry? I have not gone to that extent; but I can do so, I think.

53. Then you cannot establish anything in your favor? It will shew if an error has arisen on his part before he is just as likely to commit an error now.

54. Is there anything, then, that will help you? I feel perfectly safe in the case, and therefore have nothing further to study than to give satisfaction to you. There is another matter I would call attention to—the date on that warrant of eight half-tierces of tobacco. When the order is presented to me with the warrants for delivery, without questioning whether it is to be delivered that day, I enter on each of the warrants the actual date on which it is delivered to me. It does happen sometimes that these orders are delivered to me to-day, and perhaps the goods are not required until to-morrow. I want to shew that, although the goods are not actually delivered, they shew the date on which I receive the order.

55. Do you enter in your locker's book the date on which you deliver the goods, or that on which you receive the order? The date of actual delivery.

56. Always? Always.

57. So that if that export order contained one date, your book might shew another? Yes. Twenty half-tierces of tobacco were delivered for exportation on the "Tasmania," on warrant 239, dated 16th September, delivery being actually made on the 15th.

58. That shews, either on your part or on the part of some other officer of Customs, that an error as to the date was made? I should like to know how the error could have arisen with me. I can scarcely admit that an error could be brought home to me in that case. I called the attention of Mr. Still to it, and I think you will find a star upon the warrant, to shew that although the goods were delivered, by permission, on the 15th, yet the warrant bore date 16th.

59. *By Mr. Browne:* You are sure Mr. Newton did not give you the warrant for the delivery

delivery of these goods on the morning of the 2nd before you delivered the tobacco from Walker's Bond? I feel satisfied I did not receive the warrant till I arrived at the store.

60. Which would be about one o'clock? Yes.

61. At what time did you begin to deliver them—immediately? I believe so. We were very busy on that occasion, and goods came before and after; I mean removals, some of which were waiting when I arrived.

62. Would it not take some time to deliver these goods? It would.

63. An hour, or half-an hour? That would depend on where and how they were stowed.

64. An hour? I should say so, at least.

65. Did you not see Mr. Newton at all in the morning until he came to Walker's Bond? I might have seen him, but I do not believe I spoke to him.

66. Do you think it likely that Mr. Newton would pay the rent of the tobacco up to the 3rd if it was delivered on the 2nd? Yes. I have been acting as export officer for four or five years, and I have paid on the 2nd rent due on the 5th or 7th.

67. Would you pay on the 2nd rent for goods up to the 3rd—when the goods were to be delivered on the 2nd, would you pay in advance the store rent? Most assuredly, for if they are in store two days of the week they charge the entire week's rent; and thereby I would call your attention to the statement of Mr. Wilkinson, of Kirchner's store, who says,—“It is a common practice to date either before or after delivery, in order to make the rent account good.”

68. What does that mean? They do actually charge a week's rent for two days' storage, so that they may leave the goods five days after if they please.

69. *By the Chairman:* Whose letter is that? Those are memoranda of my own. This person would come forward and state this. I mean Wilkinson.

70. Is that the practice at Walker's store? I find it is the practice at Walker's to charge a week's rent though only three or four days of the week has passed.

71. That is the point you would have to establish? I think I could shew it.

72. *By Mr. Browne:* You think the charging of rent up to the 2nd is no criterion—would it be so on the 2nd? I cannot say.

73. Does not the 3rd of September fall on Friday? I cannot say.

74. That would not be the end of the week? It might be the end of the week of storing, and I believe it must be their practice.

75. *By Mr. Browne:* Mr. Watts says he received the money, and credited it in the cash-book on the 3rd? It must be that Mr. Watts has made a serious error, that has been the cause of all this trouble; and it appears that he has neither the manliness, the honor, nor the honesty to acknowledge his error.

76. *By Captain Ward:* But Mr. Williams backs up Mr. Watts' statement, and shews, from certain circumstances that occurred, that the tobacco must have been removed on the 3rd? I do not know Mr. Williams in the matter, but circumstances may have caused his mind to be led astray.

77. Mr. Williams has distinctly told us that an auction sale was to be held on his wharf on the morning of the 3rd, and he had given orders that no goods should be delivered on that day, but that in consequence of the application of the export officer for the delivery of these goods he had consented? I think you will find, in reference to an inquiry touching that little matter, that Mr. Williams himself told the three gentlemen at the Custom House, or at his wharf—Mr. Campbell, the Collector of Customs, and the Crown Solicitor—that he knew nothing whatever of the matter; that he did not remember a single item, date, or day, or any thing else. I went to the Collector of Customs to ask him why I was suspended, and he told me that —

78. *By Mr. Browne:* You said you were busy at the Chilian Bond before the delivery of these goods on the 2nd, and for some days after? I believe we were.

79. Do you know that in the statement copied from your books it appears that only one package was delivered from that bond for ten days before? It may be so, but I can account for that. The store was in a very deranged state, and I complained to Mr. Still, day after day, that they would not stow the goods; hogsheads of rum were lying on their bilges.

80. Do you mean that they had not been bedded? Yes.

81. There were no skids for them to lie upon? Yes; and not only that, but they were merely rolled into the store, and I had sometimes to climb over three or four to gauge a particular cask at the back. The matter was made up with Mr. Still and Mr. Stewart.

82. Did not all the goods from that bond pass into the duty-paid store before they got into the cart? Yes.

83. Then they might as easily be taken into the store as out of the store? Just so; and in rolling the package it would be just as easy to roll it to the right as to the left; still it was not my duty to complain of the store in such a matter.

84. You think the store was not properly conducted? In my opinion a bonded store should not be in a free store at all. The export officer might receive goods at the door, and do any thing he pleased with them.

85. *By the Chairman:* Could the merchant, while the goods were being delivered, after they had left you, and before they had reached the cart, do anything he pleased with them? Not without the knowledge of the export officer.

86. *By Mr. Browne:* When did you take in the fifty cases of gin that came from Lamb's store? I believe on the very day we delivered the brandy.

87. Did you take them before or after? They would be taken in at intervals.

88. They would have to go into the free store? Yes, before they could possibly be taken up into bond, and there is the danger; many tricks might be played there if the parties were disposed to do so.

89. Did you ever find any discrepancies in the re-gauges? None whatever. Since I have left the store I have heard reports of hogsheads being found filled with water; but I am happy

Mr. M. G.
Brown.

23 Nov., 1868.

Mr. M. G.
Brown.
23 Nov., 1858.

happy to say that the locker informs me that there has been nothing of the kind. Such rumours have, however, reached me, and have led me to ask the present officer "How do you get on with your re-gauging?" And I do not believe there will be found to be any deficiency more than can be accounted for by ordinary causes.

90. *By Mr. McLerie*: Do you recollect Mr. Newton, on the morning he gave you this delivery order, saying anything about getting the goods ready by dipping? Possibly he may have asked the question, but I do not recollect. If it had been a store that had been open all day he might have said, "I cannot call for all these goods till the afternoon, will you have them dipped ready for me?" but I could not have dipped them to have delivered them after I had received the warrant from him.

91. The time would not have allowed you to dip them on the same day, after receiving the warrants from him? No; in fact the store only opened at one o'clock, and then generally the men lost an hour in going to dinner. I beg to state that Mr. Still signed the warrant for eight half-tierces tobacco on the morning of the 3rd September, which he does only a day after actual delivery; that he remained with me long enough to measure the whole of Walker's bonding warehouse on various floors, and must have seen a delivery if such had taken place; he remained with me from about half-past ten until a quarter to twelve, which fact he must admit. Having never received orders to re-gauge, I do not consider it necessary to do so for the Islands, but always do so when goods are entered to go coastwise. I have rolled the casks out of store, and, after sounding and examining them, if no leakage or loss appears, they are allowed to pass. Mr. Nash, warehouse-keeper, will tell you that it often occurs so when goods are going to South Sea Islands, or to California, or elsewhere, in cases of emergency. Mr. Still has told me to use my own discretion in his absence, and has given me credit for having done so in a more important case than this omission. I allude to a vattung affair, where I had to remain and close the store below after all persons had left, using the Queen's lock on the outer door. The locker is allowed to deliver bonded goods to the export officer with the usual order, without regard to date, and therefore I should be justified in delivering on the 3rd, and could have no object in entering any other date, if such was the date of delivery.

Charles Robertson, Esq., called in, and examined:—

C. Robertson,
Esq.
23 Nov., 1858.

1. *By the Chairman*: You are Manager of the Union Bank, are you not? Yes, I am.

2. Had you not, some time in January last, to make a post entry in reference to a certain quantity of sugar brought by the "Fanny Fisher"? Yes: When the sugar was sold, I wished at first to clear out a hundred tons and to pay the duty; that was all I wanted at first, but Mr. Giffard came up and told me that some sugar had been taken away from the ship's side, and that they would not deliver it unless I paid the duty for that also. I went down to see Colonel Gibbes, and he told me it was the case. I said I did not consider I had any right to pay for what I had not received.

3. Then, were you actually made to pay £173 for the duty on this sugar before you were allowed to get your own? Yes. I said I had no right to pay it. They would not allow me to take more than a hundred tons. I wished to get the whole that was there belonging to the Union Bank. I objected to pay the duty upon what was taken away by somebody else from the ship's side.

4. What proceedings did you take upon it? There was some conversation between Mr. Giffard, Mr. Garling, and myself. We were allowed to pay duty on a hundred tons first, and then we paid duty upon the whole; but I protested against it at the time. We had a lien upon the sugar; it belonged to a bank in the Mauritius.

5. Have you had to pay £173 for duty on sugar which you never received? Yes; we did not get the sugar at all.

6. How is it supposed that that sugar was got away without payment of duty? It was stated to me that there was some drunken officer on board who had allowed it to go away, and that the man had been dismissed. I said that was no satisfaction to me.

7. How was it you did not call upon Mr. Fisher, to whom the sugar was consigned, to pay the duty? There was a very good reason for that.

8. Was he insolvent? He was insolvent to all intents and purposes, but had not surrendered, although he did so very shortly after. My object was to get the sugar before it fell into the hands of the official assignees.

9. Why did you not call upon the original owners to pay the duty? Because they would have turned round and said it was our fault in not seeing that the sugar was there.

10. Did you speak to Mr. Garling about it? I did; but I suppose the Customs authorities were only too well pleased to have a hold of the sugar; they were interested in getting payment of the duty.

11. All the satisfaction you received was that Colonel Gibbes said the tide-waiter was dismissed, and you must bear the loss? Yes.

Mr. John Bramwell called in, and, having been cautioned as previous witnesses, was examined:—

Mr. John
Bramwell.
23 Nov., 1858.

1. *By the Chairman*: You are a landing-waiter, are you not? Yes.

2. Do you remember signing some export warrants for dutiable goods said to be shipped on board the "Louisa," on or about the 2nd September last? Yes.

3. Where were you when you signed those warrants? On the Hunter River Steam Wharf.

4. At what time did you sign them? A little after four o'clock. It was about four o'clock when I left Lamb's Wharf, and it took, I suppose, about five minutes to walk there.

5. Who applied to you to sign them? Mr. Newton.

6. Did you examine the warrants? No; no further than seeing the signatures of the proper officers attached.

7. Did you examine the goods stated in the warrants to have been shipped? No; it has never been the practice of the landing-waiters at this port to do so.
8. Is it your usual practice to sign warrants without observing what goods are stated. Yes. It often happens that goods are shipped in the stream, sometimes as low down as Bradley's Head, or even at Watson's Bay, and it would, therefore, be impossible for me to examine them. If the receipt of the master or mate is on the back of the warrant as having received the goods, and if there are the signatures of the locker and of the export officer, I sign the warrant. We find by the warrant that the bond has been taken.
9. Are you not aware that it is the practice of some landing-waiters to sign only for goods delivered at their own wharfs? There are very few (none, I think,) who would refuse to sign if the warrants with the proper signatures were produced.
10. Mr. Kidd is a landing-waiter, is he not? Yes
11. Does he usually sign for other wharfs than his own? I am not aware that he refuses to do so. (*For further particulars see Addendo.*)
12. You have no objection to sign for any wharf, according to what you consider the existing regulations? If I see the documents properly signed, I do not hesitate to sign at any time.
13. Without seeing who the export officer is? They are all the same to me; they are all duly appointed.
14. And without making inquiry where the vessel is going to? Yes; we never make any distinction.
15. *By Mr. Browne:* What regulations are you governed by in the discharge of your duty as landing-waiter? We had instructions from the Board of Customs at the time we were under the Home Government.
16. Have those instructions never been cancelled? We have never had new instructions.
17. You consider yourself bound by those instructions? Yes. Mr. Barnes made an order as to the signing of these export orders.
18. In what way were the orders of Mr. Barnes promulgated? Verbally. Before he gave the order we did not sign, and he ordered us to sign whether we saw the goods or not, though we remonstrated.
19. Is not the landing-waiter in the same position as a searcher at home? No. He is called a landing-waiter and searcher, but the searchers at home are separate officers. They are placed at the entrances of the different docks, and have no import duties to attend to at all. There is a depôt, and the export officer in taking goods to a ship calls at the depôt to give notice to the searcher, whose duty it then is to visit the vessel, and examine the goods before they go on board. The tide-waiter then takes charge of them, and before the ship can clear the entries are forwarded from the searcher, and the book of the tide-waiter is sent in at the same time.
20. How do you understand this nineteenth regulation to the landing-waiter—"You are carefully and without delay to examine all shipping bills delivered to you, taking care that the same, when regularly marked off and signed by you, be delivered to the landing-surveyor previously to the clearance of each vessel, in order that the same may be examined with the manifest and clearance of such vessel, before the clearance is granted by the Collector and Comptroller?" The 19th article referred to alludes only to bills or warrants, and *not* to goods.
21. Is not this warrant a shipping bill? Yes
22. It is part of your duty, according to the nineteenth article of the regulations, to sign that shipping bill, and deliver it to the landing-surveyor? That is in England, where the searcher is entirely an export officer; the landing-waiter here has to attend to import duties.
23. Do you not think that Mr. Barnes, in issuing the regulation referred to, intended to carry out this nineteenth article? I do not know; I dare say he did.
24. Do you not think it was intended that the landing-waiter, being an officer high up in the Customs, should sign this document, as the proof of the officers' signatures, and to complete the document, as some security to the revenue, seeing that the export officer was in a lower position? But there are not sufficient landing-waiters to perform this duty; they could not possibly do it and attend to their import duties.
25. Is it not equally important that the revenue should be protected in the export of dutiable goods as in their import? Yes.
26. Does it not open a way to fraud if the exporting of dutiable goods is left entirely in the hands of an export officer? Yes.
27. Do you, as an old officer of Customs, having been in that department in Liverpool, and for some years in this port, consider that you could conscientiously perform your duty, and sign for 296 packages of dutiable goods shipped in one day from five different bonds? It depends upon the particular sort of packages—case wines or spirits could easily be shipped in one day—and, according to the rules of the service, I feel that I did; as the export bills do not shew when the delivery commences, they are not signed as completed till all are on board.
28. Then what is the object of having Custom House officers at all? Where there is a large quantity of goods shipped for exportation it is necessary that a tide-waiter should be placed on board to protect the revenue, and then the searcher or landing-waiter has little difficulty to examine into such matters. If an officer had been placed on board in this case it would, or could not have happened.
29. Would it not be better that it should be the work of one person? Yes. It is better to separate the export from the import business, as the landing-waiter has often other duties to attend to; for instance, he may have 150 or 160 casks of spirits to gauge and get into bond before four o'clock.
30. Then, if I understand rightly, everything is to be sacrificed to the import duty; that is, to be the primary duty? Yes; our duty as landing-waiters is that of an import officer.
31. You feel clear in your conscience for having signed these documents? Yes.

Mr. John
Bramwell.
23 Nov., 1858.

Mr. John
Bramwell,
28-Nov., 1858.

32. Although it is presumed that none of these goods went on board? If I presumed they were not on board, I would not have signed the warrants, as I did not see a single package.
33. Will you tell me in what way, and under what regulations, the landing-waiters receive extra payment? There is an order of the Board.
34. In whose hands is that? In the hands of the Collector, and it ought to be in these regulations. In working over-time the landing-waiters are allowed a shilling an hour for every hundred pounds they receive.
35. Are the other officers' fees stated? I do not know anything of the in-door department.
36. Did you ever in the Port of Liverpool know vessels, with the exception of steamers foreign bound, to be allowed to clear after hours? Yes; packets carrying mails I have known to clear till twelve at night.
37. Are not a large number of landing officers now employed in the Customs of recent appointment? Yes.
38. In what way do they become acquainted with the duties of their office? They are not placed under any instructions; they have to find out in the best way they can. There is no probation here as at home; there you have to serve three months, and then to be certified as a qualified person.
39. Then there are no rules here? No; the officers must learn in the best way they can from others.
40. We have had an instance before us of an officer allowing fifty-seven tons of sugar to come out under a warrant for twenty? The post entry in that case would be too large. At home the officer is not allowed to give a merchant credit for more than five tons, and he has then to amend his entry.
41. Did you see the "Louisa" when she was here? No, only once; I was never on board.
42. Do you know Mr. Dixon, the tobacconist? Yes.
43. Were you at his place at the time of the departure of the tobacco? No.
44. Nor he at yours? No.
45. You had no communication with him about it? None at all.
46. *By the Chairman:* You say there are instructions from the Treasury in the Customs; are they accessible at all times to every officer? No; they are generally given to the officers when they are appointed; they come out with their commissions.
47. But now they are appointed by this Government? There are no instructions issued now.
48. Then the practice that used to prevail has, since the establishment of Responsible Government, been departed from? There are only tide-waiters' instructions; there are no landing-waiters' instructions accessible to me.
49. What instructions ought there to be accessible to the officers? There ought to be tide-surveyors', landing-waiters', tide-waiters', lockers', and even scale-porters' instructions.
50. These ought to be accessible, but what are really accessible? I am not aware of any.
51. If a tide-waiter wanted to read up his instructions are they accessible? I think the tide-waiters have them.
52. Have the lockers? I do not think they have.
53. *By Mr. Browne:* Is it the landing-waiter's duty to check the tide-waiter's books when goods are landed? It is the tide-surveyor's; the landing-waiter has to go over the book when it is perfected, before he makes up his own book, and then he sends in all to the jerker—the manifest, warrants, and books.
54. Do you think he would be wanting in his duty if he sent in incomplete accounts to the jerker? Yes. In England we have to pay for queries. There is a query book kept at the office, and whenever an error is committed it is entered in the query book, which has to be signed by the officer, and there is a fine imposed for every query.
55. Is that a reputable sort of book? (*Handing witness, Mr. Warburton's book of the discharge of the "Fanny Fisher."*) No, a very bad book indeed; the landing-waiter has copied the weights from the tide-waiter's book without checking the additions.
56. Do you consider that there are any means of preventing the landing of goods in this harbour after they have been put on board ship? The Customs have no means of prevention; the Water Police may have.
57. If the Water Police go down the harbour no farther than Sydney Cove they could not prevent it? No.
58. From your knowledge of the harbour, do you think goods could be landed with impunity? I do. At Liverpool, London, and all the large ports in England, there are row-guards, and the tide-surveyors take turn for night duty, and board all ships as they arrive.
59. Did you notice that these warrants were incomplete—that they had no re-gauges? I do not think there were any re-gauges; if the goods have been in only a short time it is not necessary to re-gauge.
60. Are you quite sure that the certificates were carefully filled up? They were all filled up correctly, and bore the signatures of each of the officers, and of either the master or mate of the vessel.
61. From your knowledge of the time occupied in the shipment of goods, do you think it possible that any one could ship 296 packages between the hours of twelve and four? It seems a great many; the officer could not follow every load.*

* For reference see answer to No. 27.

ADDENDA.

Memo. to question No. 11.

Since my examination, however, I find that Mr. Kidd, like the rest of the landing-waiters, has followed the usual practice. This was in the case of the "Tasmania" for twenty half tierces of tobacco, as a proof of which I have forwarded to the Board the warrant bearing his signature.

I am induced to write this addition to my evidence in consequence of Mr. Kidd having stated that he had *never* signed a warrant for goods shipped from any other wharf than that on which he was stationed. This warrant above referred to bears a later date to that signed by me for the shipment on board the "Louisa." I have no hesitation in saying that if I made search I could find plenty more signed by Mr. Kidd under similar circumstances.

Mr. John Bramwell.

23 Nov., 1858.

Memo. to question No. 19.

The shipping of goods would be very much delayed if the landing-waiter had to examine all dutiable packages, as the export officer might call several times at the landing-waiter's office and not find time there. He might be in the bonded stores on the wharf, or at some of the other bonds through the City, engaged in his duty as gauger, which is also a distinct appointment at home.

THURSDAY, 25 NOVEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

H. H. BROWNE, Esq., | J. McLERIE, Esq.

Mr. Charles Manton called in and further examined:—

1. *By the Chairman:* As you have not been present during the whole of this inquiry, I may state to you that the Board have examined a great number of witnesses, and in the evidence taken there has been a great deal that seems to bear against you, and we therefore wish to give you an opportunity of justifying your conduct. In your peculiar position it is right to tell you, you are not bound to answer the questions that may be put to you, but whatever answers you do make may be used against you. The Collector of Customs, in the first place, has given evidence that the Post Office certificate ought to be invariably taken from a vessel before she reports inwards? Yes; that is correct.
2. When the "Louisa" came in the second time, you did not get the Post Office certificate? I had nothing to do with it; that was the jerker's duty.
3. You jerked the papers outward on that occasion for the jerker? I did not say I jerked the papers outward; I said, she reported the same quantity of stores outward that she reported inward.
4. I think you said you acted on that occasion for the jerker, and jerked the inward papers? I only knew that she reported so many stores inwards when she came in from New Caledonia, and the same quantity were reported out, and nothing more.
5. Did you not inform the Board that the jerker's initials were not on the content outward, and therefore it was not necessary for you to put your initials as clearing officer also? I do not think I said so.
6. You are aware the jerker's initials were not on the papers? Yes.
7. What made you clear the vessel without his initials? I said I thought the vessel had been jerked, having seen the agent with Mr. Fancourt. (*The Chairman read from Mr. Manton's former evidence, question 41, and the answer thereto.*) That is all right.
8. You acted in that case for the jerker, did you not? I acted for the jerker.
9. And in acting for the jerker carried out the jerker's duty without knowing that the Post Office certificate had been delivered? When she reported in, exactly.
10. In that case you acted irregularly as a jerker? Yes, as a jerker.
11. Because, in fact, you jerked the ship's papers without receiving the Post Office certificate? I did. It is the jerker's duty to receive the Post Office certificate before he allows the vessel to enter.
12. Colonel Gibbes also says he does not allow Custom House Agents to sign bonds above £200? I never knew such to be the regulation.
13. In the present case you did take a bond above £200 from a Custom House Agent? Yes.
14. You never knew that was the regulation? Never. There were no instructions at all given. If it had been fifteen or thirty thousand pounds I should have taken it just in the same way.
15. It seems to be the custom also that when vessels come in there should be a rummaging certificate, and the jerker does not sign the content outward again until he receives that certificate: Did you receive the rummaging certificate of the "Louisa" on the 7th October? No, I did not on the second occasion of her clearing out; I did not on many occasions. As I said in my former evidence, it is a mere matter of form, and is not required. I have known the jerker, when clearing ships outward, give the quantity of stores and the list of goods he supposes the vessel has on board to the tide-surveyor, who makes out his certificate accordingly.
16. It has also been stated to us by a good many witnesses that it is very irregular to clear out vessels on board the ships themselves; that clearing out on board is never allowed, except in the case of steamers, and not even in the case of steamers when there are dutiable goods? It is a common occurrence.
17. Does not the body of the declaration say, "Taken before me at the Custom House, Sydney"? It does.
18. But you took it on board the ship, not at the Custom House? It has been the custom ever since I have known any thing of the business.
19. Are there no regulations for these things? No, none at all.
20. The evidence we have taken shews that it is highly irregular—the evidence of Colonel Gibbes, Mr. Llewellyn, and Mr. Collier? I know it ought to be taken at the Custom House, but

Mr Charles Manton.

25 Nov., 1858.

Mr. Charles
Manton.

25 Nov., 1858.

but it always has been customary to take a declaration on board a ship. Why there should be any exception in the case of a steamer or any other vessel I cannot tell. A steamer carries bonded goods as well as any other vessel

21. It has been stated to us by Mr. Maddocks that in taking the bonds for the "Louisa" you acted irregularly, unless Mr. Mowle was absent from his place in the Custom House—your evidence went to shew that Mr. Maddocks was absent, but in that case Mr. Mowle should have taken the bonds? Mr. Mowle could not have been there, for I never remember taking a bond when Mr. Mowle was there.

22. You are not sure, as I understand you, but you think he could not have been there? He may have been in the Custom House.

23. You took no pains, am I to understand, to ascertain whether he was there? I did not look over the Custom House to see if he was there. He was not in the room.

24. Mr. Maddocks says, that if you took any bond during his absence it was your duty to put it on his table, that he might check it? I never knew him to jerk one before, or to check them in any way.

25. Did you put the bonds on his table? No, I did not; I put them in my desk, as I said before.

26. You kept them there some days? I kept them there some days.

27. Then it appears from the evidence that Mr. Maddocks received no information from you that bonds were taken for the "Louisa" till the bonds were asked for, some three weeks after? I never spoke to him on the subject, and I never had any other occasion

28. It has also been stated that the clearing clerk is responsible for goods placed on board—did you see all these goods placed on board? No, certainly not; I initial that. All the entries are passed as shewn in the manifest.

29. But on the manifest is stated everything shipped on board; and at the bottom of that statement it is usual for the clearing clerk to attach his initials? I only put my initials underneath the goods, so that no more goods could be put in afterwards

30. Are you not responsible? Certainly not. How can I be responsible for goods I never saw in my life?

31. I do not think we obtained a satisfactory explanation from you as to the way the first content outward was destroyed? I have nothing further to say on the subject. I said there were some mistakes made in the marks and numbers, or something of that sort. I know there was some colonial tobacco stated to be foreign tobacco. I expected to have been able to have produced that manifest; for I saw Mr. Stuart afterwards and spoke to him about it, and he said, fortunately he had not destroyed the original; he promised to let me have it from time to time, but unfortunately he has gone away, and I have seen no more of him.

32. On the second occasion of the "Louisa" going out you applied to Mr. Fancourt for his initials to the content outwards after the "Louisa" had gone? Yes. About half-past 3 the agent applied for the vessel to be jerked outward. At that hour I thought Mr. Fancourt had jerked her out, having seen him with the agent.

33. Having the next day applied to Mr. Fancourt for his initials, he refused to give them you, no rummage certificate having been given? Yes. I knew it was a matter of form. On many occasions Mr. Fancourt takes the particulars of stores to one of the tide-surveyors, and says, "These are the particulars of the goods," and he fills in his certificate accordingly. I have not the slightest doubt that if I had asked one of the tide-surveyors to do so he would have done it at once, but I left it to the jerker. I cleared the "Staghound" without Mr. Fancourt's initials; he reported it to the Collector, and the Collector justified me in having done so, on the ground that I knew the stores the vessel had reported in, and knew the cargo to be lauded.

34. Have you never received any written regulations with reference to your duty? Nothing at all.

35. Are any accessible to you if you want to receive any instructions as to the carrying out of your duty? No.

36. Have you ever asked for any? No. When I have had promotion I have been taught my duty by the clerk who had been doing it before me.

37. If I understood you, you have nothing to do with seeing goods in the ship's hold? No.

38. *By Mr. Browne*: Do you give any security? £100.

39. What is the condition of your bond? I really cannot recollect. It is something about not entering into any other business, I believe.

40. Not with reference to the performance of your duties? Nothing of that sort.

41. Mr. Collier has stated to us that on the morning of the 3rd he obtained these papers from Mr. Mowle, and that on examining it he found the initial on the bottom of the content, which now appears to bear your signature, was not there—was that true? Not to my recollection.

42. He says he examined the papers and found no declaration had been taken? That is false.

43. There was no attesting signature? That was a clerical error; I believe it was on the former manifest, and that was destroyed. I do not recollect omitting it.

44. Who did you get these warrants from on the afternoon of the 2nd? From the agent.

45. Do you remember the time? Between four and five o'clock.

46. Did you give them up to anybody else the next morning? Back to the agent again.

47. What was that for? He took care of the rest of the papers; he had the whole of the papers. I was going home, and had no pocket to put them in.

48. On the night of the 2nd you gave them back to Mr. Stewart again to be given to you in the morning? Yes.

49. Is that the regular course? Yes, it is always done on every occasion.

50. Do you know he gave them to some other people before they came to you again? Yes, I do.

51. Do you know who had them? He gave them to the export officer to bring them to me.

52. Do you know that he gave them to the export officer so that the export officer might write up the book? I know no more than that the export officer brought them to me in the morning. Mr. Charles Manton.
53. You gave them to Mr. Stewart that afternoon after you had cleared the ship? Yes. 26 Nov., 1858.
54. I think you told us that on neither occasion you went down with the vessel? Went down where?
55. In the vessel? I never made such a remark; no such query was put to me.
56. Did you go down with her? I did.
57. On the first or second occasion? On the first occasion.
58. Have you any objection to state who accompanied you? Yes; I would rather not state who accompanied me.
59. Some persons did accompany you? Yes.
60. Is that the document you gave on board? (*handing to witness the clearance obtained for New Caledonia*) Yes, that is the document.
61. Where did you attach the Custom House Seal? On board the ship.
62. Do you carry the seal out of the office with you? Yes.
63. Is that regular? Yes; I have always done so.
64. And taken the declaration as if it were taken at the Custom House? Yes.
65. Do you know whether Mr. Collier was called upon on the morning of the 8th to give a rummage certificate and declined to do so? I do not know anything about it.
66. I think you stated you had an authority that you would put in, shewing that you had been particularly authorised by the Collector to clear that vessel on the 7th? Yes, I have it, but not with me now. I understood you to say I should have to produce it at court.
67. It appears that you performed the duty of the Collector, of Mr. Maddocks, of the jerker, and your own duty as clearing clerk, and we want your authority for performing these duties, which you have stated you can produce? I scarcely know how I could produce it; it is known to almost every merchant.
68. It simply rests upon your statement as it now stands, others contradict it? I would rather not place myself under a compliment; I would rather let it rest upon the merits of the case.
69. Will you produce the authority you have for clearing the steamers? I will produce witnesses.
70. You must have some written authority? No; I have no other than verbal authority for performing these duties. I could produce witnesses to prove that I have done all these duties in one day—that I have done the duty of jerker, clearing clerk, import clerk, export clerk, and cashier.
71. It will go for nothing in your defence, without you can shew you have done it with the consent of the Collector? This letter of the Collector's shews that permission was granted to clear the vessel over-time.
72. Will you give in that? Yes.
73. Have you any other written authority? I do not know that I have.

SECOND EXAMINATION.

Explanations and remarks on my second examination before the Board.

No. 9.—If I had acted with the jerker's full consent there would have been nothing to shew to me that the Post Office certificate was wanting; it was the jerker's duty to have one before he allowed the ship to *report in*.

No. 12.—Mr. Maddocks took bonds signed by Captain Fairclough, of the "Freak," Captain Smith's vessel, together with Messrs. Metcalfe and Co., for about fifty-six half-tierces tobacco; these fifty-six half-tierces for the South Sea Islands the amount for these bonds ought to be about (£6,000,) six thousand pounds.

No. 16.—These witnesses have cleared out steamers and sailing vessels after hours, if the witnesses have done the clearing clerk's duty. Four nights in the week coasting steamers clear at 11 o'clock at night with bonded goods. Some of the Melbourne steamers clear at six p.m., with (100) one hundred tons refined sugar for drawback, and forty or fifty hhd. spirits under bond: this shews that witnesses have told an untruth, or are ignorant of the matter.

No. 20.—The object in going on board is to take the declaration of the captain; as for Mr. Collier, he never took a declaration in his life, and knows nothing about clearing a ship. If Mr. Collier were to attend to his duties at an earlier hour, and look after vessels that come in on Sundays, he would find more to do than to make false statements.

No. 21.—I have known the junior clerk to take bonds when Mr. Maddocks has been present.

Nos. 22 and 23.—Mr. Mowle comes to the office and puts his name down in the Appearance Book, and then leaves the office after—this used to be a daily occurrence.

No. 24.—If Mr. Maddocks initials the entry, he would then check the bond—not without.

No. 26.—My object in keeping the bond was because I saw Mr. Collier look at the "Louisa's" papers, and take them away with him; and, thinking there might be something wrong, I put the bonds by in my desk for security—or rather kept them there for security: after that Mr. Llewellyn and Mr. Kelly had them.

No. 28.—The party who made such a statement must be an ignorant person.

No. 42.—The declaration was taken, but I forgot to witness it.—(Clerical error.)

No. 43.—Destroyed or returned to the agent; it was useless to any one.

No. 46.—I returned the entries to the agent after clearing the ship—not in the morning.

Mr. Charles
Manton.

No. 53.—The afternoon of the 2nd September.

No. 67.—The fact of the Collector allowing me to clear after hours is proof that I have his authority to do his duty. To shew that I have done Mr. Maddocks' see ships' papers before my suspension, and it will be seen that I have taken ten declarations to Mr. Maddocks' five.

25 Nov., 1858.

I beg to state to the Board, that no erasures were made by me on the "Louisa's" clearance.

C. H. MANTON.

Mr. William Warburton called in and examined:—

Mr. William
Warburton.

25 Nov., 1858.

1. *By the Chairman:* What is your position in the Customs? I am acting as locker at present.
2. In the course of the inquiry we have been entrusted with, certain evidence has been taken which reflects in some manner upon you, and we have called upon you to ask for an explanation. You are not, however, bound to give any answer which you think it better to withhold? I shall give any explanation I can.
3. About a year ago I think you discharged the duty of landing-waiter? Yes.
4. Have you been disgraced? Yes.
5. Does disgracing imply lower pay or lower responsibility? I was dismissed at first, and then restored again as locker.
6. What caused your dismissal? It occurred in connexion with some sugar belonging to the Sugar Company. The Sugar Company were allowed to ship their sugar according to their own cart-notes. A cart-note came with the dray, describing the sugar and weights, and I shipped it, and they received the drawback accordingly; but their agent, Mr. Metcalfe, passed the drawback warrant, and when that drawback warrant came to me I found that he called it what it was not. I examined part of the sugar, when I found that one differed from the other. I examined as much as I could at the time, for I had a great distance to walk—up to the other end of the harbour—and to attend to all the vessels there. At all events I examined a good deal of the sugar, and found it a refined sugar. Mr. Metcalfe called it ten tons of refined and eighty tons of raw sugar. The cart-note called it all refined. The ship wanted to clear out, and I did not like to detain her. Being a responsible officer, and giving security for £500, I thought I might allow the ship to clear, and the mistake might be corrected the next day; so I signed the warrant for which the Sugar Company's Agent called; and as soon as they found out the mistake they signed for the difference of duty.
7. Did you sign for the shipment of this sugar without knowing that it had been shipped? I examined it as much as I could; I examined portions of it. It had never been weighed by the export officer, or supposed to be weighed by the export officer, but was shipped by the Sugar Company at their own weights, and they furnished me with a ticket—so many bags of sugar, so much.
8. Was it not your duty to check the shipment? I did; I counted the bags whenever I could.
9. You did not check the descriptions of sugar? I did not find any raw sugar there; it was all refined. The warrant being passed for raw sugar, I knew the revenue could be at no loss, the sugar being refined; because the duty on refined sugar is more than that on raw sugar. Therefore I wished them to correct themselves, when I saw that the Government was safe, and that at any time with the Collector's consent they could be allowed what they had a right to.
10. You certified to what you knew was not the case? Yes. I was satisfied so far as the cart-notes* and what I examined, but it might be in such a large shipment as that that there would be raw sugar shipped without my knowing it; and I could not examine it all.
11. That led to your removal? Yes.
12. Were you dismissed by order of the Government, or of the Collector? Yes, by the Government.
13. You were subsequently reinstated by the same authority? Yes, as acting locker.
14. Do you remember being landing-waiter in the case of the "Fanny Fisher," about twelve months ago? Yes.
15. There was a large quantity of sugar landed then, was there not? Yes.
16. That was your book, (*book handed to witness*) was it not, kept by you on that occasion? There have been two or three books made on this occasion—two or three issued to the tide-waiter; they are wrong.
17. Was it not your duty to check the tide-waiter's books before they went in to the jerker? Yes. I corrected it and gave it back to the tide-waiter two or three times; he made out two or three sets, and they were all incorrect; his books were wrong. He was dismissed.
18. Did you report him? Yes, to the Landing Surveyor, Mr. Garling.
19. What did Mr. Garling do? By Mr. Garling he was brought before the Collector, and the Collector dismissed him.
20. Did Mr. Fancourt discover the error, or did you? I discovered errors two or three times; and after I had corrected them as far as I could I sent the books in.
21. *By Mr. Browne:* Is not your own book wrong that you sent in to the jerker? It might be.
22. *By the Chairman:* Was it wrong or not? I did not find it wrong, nor has it been shewn to me wrong yet.
23. You see it has been corrected by the jerker? (*The witness examined the book.*) I do not see where it is wrong; I do not see the error.†

24.

*The practice was, and I believe is, to take the cart-notes as correct.

† I must here explain that I speak of this book as being correct after the jerker and myself had made the corrections. If he found any further errors since then I am not aware of it.

24. *By Mr. Browne*: What do you make the amount landed—how many bags? I almost forget about it now.
25. *By the Chairman*: Were you brought before the Collector for the errors in that book? I was not. This was written up when the tide-waiter's book came in. I had to go to the Custom House, and this book was made out in the presence of the jerker. I had to make out three books. They were all wrong, in consequence of the mistakes made by the tide-waiter.
26. Your books were wrong? Yes, my books were wrong, as they were sure to be. The jerker and myself had to go over the whole and find out where the sugar went, and the number of bags.
27. Where did they go? They were in bond. There were more in bond than the tide-waiter had an account of in his book—in the Exchange Company's Bond. That was one mistake that occurred.
28. That was not where the thirty-seven tons of sugar went to? The tide-waiter allowed that to go without even an entry being passed.
29. And without paying duty? Yes; but the duty was paid afterwards by post entry.
30. You knew nothing about that? I knew nothing of the sugar being landed without warrant, for my instructions to the tide-waiter were, that as soon as the warrant was completed, and the quantity of sugar in the warrant was landed, he was to stop, but he did not do so.
31. Did you bring that under the notice of Mr. Fancourt? Yes.
32. Mr. Fancourt tells us it was never discovered till he came to jerk the books? I say it was discovered before he came to jerk the books. I knew very well the tide-waiter had landed more sugar than I had a warrant for. (*The Chairman referred to Mr. Fancourt's evidence, questions 24 to 27 inclusive*) I had no occasion to report it to Mr. Fancourt at all; he was not my superior officer.*
33. Was it not your duty to check the tide-waiter's books every night? No.
34. Not once a day? No. I never check the books. I go and see what he is doing. I could not take his books away; I should disturb him in his work. I could not take his books till they were complete. I would see how he was going on, and ask if everything was going on right.
35. How do you check his work? After the ship is cleared out, she is jerked by the tide-surveyor, and the tide-waiter brings his books.
36. You do not think of checking his books until the ship is cleared out? No. There was an order against it; that was Mr. Jeffrey's order, and at one time Mr. Dean, the landing-waiter, was severely reprimanded by him for taking the tide-waiter's book during the hours of discharge.
37. Then the whole responsibility of delivering a ship's cargo rests with the tide-waiter? Yes. I mean in sugar ships.
38. *By Mr. Browne*: What is the duty of the landing-waiter? The landing-waiter has, may be, three or four ships at a time; he gauges spirits, measures spirits, takes the strength, makes up the ship's books, and so forth.
39. Makes up the ship's books, whether right or wrong? Not whether right or wrong. He has a right to examine them, and get them made correct. I examined them, and found they were wrong, and gave them back to the tide-waiter to make them correct.
40. How long had you been a landing-waiter before you were dismissed? I suppose I have been six or seven years now.
41. Did you ever receive any instructions? Never.
42. How did you learn your duty? I learnt it of my own accord.
43. Are there any regulations? No. I learnt even gauging. I got two or three lessons in gauging from one party and learnt the rest myself.
44. In other portions of the duty of landing-waiter you used your own discretion? Yes. I learnt from other landing-waiters and their books, as well as I could.
45. Have you seen the printed instructions? No.
46. You do not know that under the printed instructions it is the duty of the landing-waiter to see carefully everything that is landed? He does that as far as it is in his power.
47. You tell us you have never done that? When I have time; but if I am gauging, or employed upon more important business, the tide-waiter looks after it.
48. Do you think it more important to gauge a spirit cask or to allow thirty tons of sugar to go over the ship's side? I consider that it is of no use having a tide-waiter if he cannot be entrusted with weighing twenty or thirty tons of sugar. The landing-waiter cannot do everything.
49. Have you ever seen any of the tide-waiters drunk? Well, I do not know.
50. You must know, surely? I might have seen it; I dare say I have.
51. Was not the tide-waiter of this ship, the "Fanny Fisher," a notorious drunkard? I think I have seen him the worse for liquor, but I would not go so far as to call him a notorious drunkard. On that occasion, it seemed to me that he must have drunk something, or that there was something else the matter with him; I think the man was rather out of his mind—not in his sound senses.
52. You now discharge the duty of locker? Yes.
53. When casks of spirits are brought to you from a ship do you ever have them gauged in your presence? No, I never gauge them without an order.
54. You receive the gauge upon the statement of the landing-waiter? Yes.
55. Does the warehouse-keeper, who is a check upon you for the warehousing of these goods, gauge? No.

Mr. William Warburton.
25 Nov., 1858.

* Mr. Passmore, the landing-waiter stationed with me at the time, will, I am sure, corroborate my statement, and I beg to refer to him, as he assisted me in setting the books right before the jerker saw them or could be aware that any mistake occurred.

- Mr. William Warburton.
25 Nov., 1858.
56. Then you receive a certain amount of what is supposed to be spirits, but it may be water or spirits? Yes.
57. When landing-waiter did you put no cart-note of the hour of the day you sent off spirits to be stored in bond? I do not know that I did.
58. As locker, do you take note of the time of the day at which goods are shipped? No. I have taken notice of it latterly, since these mistakes have been made.
59. What have you taken notice of latterly? When an export officer takes away any thing for exportation I notice the time by a note on the back of the warrant.
60. Since the "Louisa" has been talked about Yes.
61. How have you learnt your duty as a locker? I have been acting as locker these fifteen years*.
62. Did you ever get any regulations for that? No.
63. You use your own discretion in that as well? Yes.
64. *By the Chairman:* When you issue spirits from bond, as a locker, do you ever gauge them? If for exportation, I do.
65. Always? Yes, always.
66. If they have only been a fortnight in your charge do you gauge them then? No. If they are more than a month in bond I re-gauge them.
67. Then, if they have been in less than a month the casks may go out empty, or nearly so? No.
68. You never start the bung? Yes, I sometimes start the bung to see if it is correct.
69. Do you gauge it then? Never without it is in more than a month. We used not to do.
70. You invariably start the bung, do you not? Yes, if I have any doubt of the cask having leaked, or any thing the matter.
71. Otherwise you do not feel called upon to do so? Not within a month, if I see nothing wrong with the cask.
72. If you are applied to for samples, whose authority do you require to deliver them? The warehouse-keeper's. He puts it on the back of the certificate.
73. Not the Collector's? No.
74. Mr Kidd, who is a landing-waiter, considers himself answerable for his landing books being correct—in that he differs from you? I suppose so. I dare say he has made as many mistakes I have done.

Mr. John De Courcy Bremer called in and examined:—

- Mr. J. De C. Bremer.
25 Nov., 1858.
1. *By the Chairman:* You act as tide-surveyor? Yes; I am first tide-surveyor in Sydney.
2. In the investigation we have been directed to undertake regarding the Customs Department, we have had evidence which bears, in some cases, unfavorably upon you, and we have therefore thought it right to call upon you to make you aware what it is, that you may answer if you think fit. Do you measure ships? Yes, occasionally I measure ships. I was the measuring officer before Mr. Collier came. In his absence I measure vessels now. I measured some vessels when he was absent on medical certificate. I can measure ships as well as Mr. Collier.
3. Do you measure them now? Not within the last month or two.
4. Have you done so till the last month or two? No, I think not till within the last six months.
5. What has made you cease measuring during the last six months? Because, generally speaking, Mr. Collier took that office upon himself.
6. Voluntarily? Not voluntarily, of course; we both had the same instructions and the same duties; but he took the measurement of vessels, which I, of course, did not interfere with, and in fact I consider him the measuring officer of the port, as far as that goes.
7. You say you are perfectly capable of measuring ships? Yes.
8. Under the new Act? Yes.
9. You would be prepared to undergo an examination? Yes, if called upon.
10. It has been stated to us that on some occasions you have been the worse of liquor? (*The Chairman quoted the evidence of Mr. Crook, questions 16 to 20*) I think you have a confusion in that matter. The man groggy in the streets did not belong to my boat. The men in my boat do not drink at all. However, what you have read to me appears to me to imply drunkenness all through with regard to myself. These are charges you are preferring against me individually. Perhaps you would be good enough to tell me who are the informants.
11. That is the evidence of Mr. Crook, the Harbour Master; I meant to have told you so. I will read some more of this (*read questions 28 to 30*)? I rebut these charges at once. I say there is no foundation for it. In the first place, I should like to know the names of the captains to whom I have been discourteous at any time. I have always treated them with great consideration, I believe more than they actually desired. In the execution of my duty I believe I have acted with integrity to the Government and credit to myself. However, since these charges are brought—drunkenness is the first charge—I rebut that; I say it is false.
12. I may state to you the object of the Board in reading this evidence. This will go before the Government. I do not say at present I shall be able to form a decided opinion that you have been drunk, because perhaps the evidence is insufficient; but still there is evidence to cause the Government to make further inquiry, and keep a supervision over your conduct. Therefore, I think it right to tell you what has been stated, and we take your denial for what it is worth.

13.

* What I mean here is, that I have had a good deal of practice as locker, having been frequently employed in that capacity during the last 15 years.

13. *By Mr. Browne*: Do you remember being applied to by anybody for a rummage certificate on the morning of the 8th of October, after the "Louisa" left? Yes.
14. Who applied to you? Mr. Stewart. I was astonished that the vessel was gone. A note was written to me by Mr. Stewart, saying he wanted to see me; he wanted a rummage certificate, which I refused, of course.
15. You were not aware that the vessel was going to sea? No.
16. We were told, by Mr. Collier I think, that when he came to the Custom House in the morning you had the papers of the "Louisa." Had you the papers of the "Louisa" on her arrival from New Caledonia, on the morning of her entering inwards? Yes.
17. From whom did you get them? Mr. Stewart.
18. At what time in the day? About half-past nine o'clock.
19. Were there any papers deficient? I got nothing but the French clearance. Mr. Stewart told me the captain had left the ship, which my coxswain had told me in the morning.
20. You got nothing but the New Caledonian clearance? I think Mr. Smith was in the office and saw the clearance. At all events there was some conversation between Mr. Collier and myself relative to the extraordinary trip this vessel had made.
21. Would you get the Post Office certificate? No; I only take the usual clearance on board the vessel.
22. What became of the New Caledonian clearance—it did not go back to Mr. Stewart? No; it was sent up to the chief clerk; it was sent up-stairs. I wanted to see it afterwards, and I understood the Collector got it.
23. You sent it up-stairs to the chief clerk? Yes, in the usual course.
24. Is it your duty, as tide-surveyor, to board vessels having tide-waiters on board? Yes.
25. When you visit vessels having tide-waiters on board, do you do so during the night as well as day? Yes; sometimes it may be late in the evening, but not actually very between two or three o'clock in the morning I have not done it. (*Vide appendix.*)
26. When you visit do you initial the books? Yes.
27. Have you ever found any of the tide-waiters actually intoxicated? No.
28. Are they a good set of people? We have good and bad. As far as the books go, I should say they are not men addicted to drink so much.
29. You say there are good and bad? They are too old. Some are old enough to be my grandfather, I was going to say.
30. *By the Chairman*: In boarding a vessel coming in, would you send a tide-waiter to board her at the Heads, or when she came to the wharf? The tide-waiter goes on board in the usual course; they ship off from the Circular Quay.
31. Where did you board the ship "La Hogue"? Where one can pick her up; I may have other vessels to board.
32. When a vessel is going out where is she finally left—alongside the wharf or outside the Heads? We generally put an officer on board if she is going to the Islands with spirits on board, and if the pilot-boat goes out it brings the officer back.
33. Does the tide-waiter always go with the vessel outside the Heads? Yes. He leaves when the pilot leaves the vessel.
34. Is that a recent regulation? No. Officers have had to walk up from Watson's Bay.
35. Was there a tide-waiter placed on board the "Louisa" when she went out on the 2nd September? At the time she took those goods on board I think not. I did not know anything about the vessel at all.
36. *By Mr. Browne*: Is it not your duty to know something about her? No. It was only afterwards that I knew the goods were shipped. The vessel lay in Sydney Cove: she was purchased, almost immediately filled full of goods, and taken away. Of course it is impossible that any one officer could go among all the various craft bound to different ports in the Colonies and the Islands. It would take, I assure you, not two tide-surveyors, but four.
37. Were you aware the "Louisa" was about to clear out on the 2nd? No. I beg respectfully to state, that I knew no more of the vessel than I have stated.
38. On the 2nd of September were you aware the "Louisa" was taking on board dutiable goods? No, I was not. I had no notice from the office. They should have given us such notice.

Mr. J. De C.
Bremer.
25 Nov., 1858.

APPENDIX.

MEMO.

Having carefully read over the enclosed evidence, I see no alterations requisite, excepting only the question No. 24, viz. :—" Yes, sometimes it may be late in the evening, " but not actually on every one; but also, sometimes, between two or three o'clock in the " morning I have done it, but not lately." This is what I stated, or words to that effect.

As regards Nos. 9, 28, 30, which the tenor of my letter addressed to Captain Ward, 26th November, 1858, bears reference, I have not as yet the honor to receive any reply. I also beg respectfully to enclose a note from the Collector of Customs, as regards the mention of my name in his evidence.

J. DE COURCY BREMER.

Custom House, Sydney,
14 December, 1858.

To Captain Ward, R. E.,
&c., &c., &c.,
Colonial Secretary's Office.

Mr. J. De C.
Bremer.

Custom House,
13 December, 1858.

25 Nov., 1858.

My dear Sir,

I perceive by the abstract of my evidence before the Board of Inquiry on the 8th instant, published this morning in the *Herald* newspaper, I am made to say, "One person had reported Mr. Bremer for being drunk, &c." Now, I never said anything of the kind. As far as I recollect, I mentioned no name, (though I could give it), but I stated that a tide-waiter had been so reported, and that when I made inquiry about it the master of the vessel explained that he had been in a fit.

I am, my dear Sir,

Yours truly,

J. de Courcy Bremer, Esq.

J. GIBBES,

Mr. George O'Brien called in and examined:—

Mr. George
O'Brien.

25 Nov., 1858.

1. *By the Chairman:* You act as carter sometimes, do you not, in taking goods from bonded warehouses to ships? Yes, on many occasions.
2. When you are taking dutiable goods on board ships the export officers generally accompany you? They do generally; but if there are eight or ten dray-loads from one bond, he generally stops there till they are all delivered, and then goes with the last.
3. You were employed in taking goods on board the "Louisa"? Yes.
4. On the 2nd of September? I have no recollection of the day of the month. I know I carted some, and employed a great many drays to cart the rest.
5. What stores did you get the goods from? Some from Pollard's, I think, some from Walker's, some from Lamb's, some from Gilchrist's, and some from the Chilian Bond.
6. Did you get all these goods out in one day? Yes.
7. In what order did you get them out—which store did you go to first? I cannot say whether it was Gilchrist's or Walker's.
8. Can you recollect which you went to last? No, I could not. I was in a bustle all day. There was only one dray of mine; all the others were strange drays.
9. How many men were employed in the work? There were six drays at one place—I think at Lamb's; and I think three drays at Gilchrist's, two at Pollard's, and two employed in getting tobacco out of Walker's. I do not know what number were employed at the Chilian Store.
10. Were you employed at all these stores? No; I had a load out of each of these places. I had a load of tobacco out of Walker's, and I think I had two loads out of Lamb's, two out of Gilchrist's, and one out of Pollard's.
11. What did you do with all those loads? They were all delivered at the what-do-ye-call-it wharf, to go on board the "Louisa."
12. Where did you put them? Landed them on the jetty.
13. To whom did you hand them over? The captain or mate.
14. Was any Custom House officer there? I did not see any one. We put them on the jetty, and went back as fast as we could. We were only paid by the load.
15. Did Mr. Newton accompany you at any time? He did the first load.
16. From Walker's? I cannot say from what store. He came with the first load, and then came back and stopped there, and let the drays go on with the rest.
17. When you took away the tobacco from Walker's Bond was there an auction going on on the wharf? There might have been an auction of timber, but I did not see any bill.
18. Was there any objection about getting the tobacco out that day? Not that I know of. Mr. Newton went to Mr. Watts and got the tobacco.
19. What makes you sure you got the tobacco out that day? Because it was all done in one day, and there was none the next day.
20. Are you sure you took any tobacco from Walker's Wharf that day? I took eight half-tierces. I took one load myself, and had another dray along with me. Mr. Newton came with those two loads himself.
21. When did you finish your work that day? About four o'clock. The bond was closed at four.
22. What bond? All the bonds in Sydney close at four.
23. Which bond were you at last? I do not know; I kept no day nor date, as I told Mr. Campbell before.
24. Did you not tell Mr. Campbell you were three days carting goods to the "Louisa"? Yes; we were carting goods down two days previous, but only a few loads.
25. Where did you get them from? Some stores from the Chilian Bond.
26. Did you take any back to the Chilian Bond? We took down two loads previous to this to the vessel, and whether the parties were drunk, or whatever the cause, Mr. Newton would not deliver them, but brought them back to the Chilian Bond again.
27. Did you transfer any goods from Lamb's Bond to the Chilian Bond that day? Yes. I recollect now there was a removal to the Chilian Bond that day. A heavy day's work was done.
28. *By Mr. Browne:* Did you do that? No, I did not take that myself.
29. Where the wharf begins and where the vessel lies is some hundred yards, is it not? Yes. We just threw them on the end of the jetty. She was lying at the other end of the jetty.
30. Whether they went on board the ship or not you do not know? No; I never looked after them; the officer has to do that.
31. Did you cart some of these goods before and some after dinner? I think we did. It was all done in two turns. There were eight drays.

32. Did you go after dinner for some of the rest? I might have gone for some of the rest, but I did not. I think it must have been either before or after dinner, for they generally stop from one to two o'clock; but I believe they might keep open between one and two.
33. *By the Chairman:* Do you not remember telling Mr. Campbell you took the eight half-tierces the day after the busy day? No; I told Mr. Campbell I delivered nothing for the "Louisa" the day after the bustling day.
34. Did you cart any tobacco after that day? Not a bit, to my knowledge. I have carted a box or half-tierce of tobacco from some bond, but not for the Stewarts.
35. *By Mr. M'Levie:* I thought you were very correct in all your dealings, Mr. O'Brien, and kept a memorandum of all the work you did? No.
36. Did you never do so? Yes; I have a book I kept.
37. Have you your book with you? Yes. I do not think you will be able to make it out. (*The witness handed the book to Mr. M'Levie.*)
38. I see here is an entry of the 27th October—where is the page before this? I lighted my pipe with that. I do not keep these things after I am paid.
39. Have you not more than one dray? Yes, I have two—one is a spring van.
40. Who drives the other? A man named Jack Sheppard, a namesake of the celebrated man.
41. Where was Jack Sheppard? He was out with a load of furniture to Waverley that day.
42. How many loads did you say you took down to the Grafton Wharf with one dray that day? Six or seven I suppose, or eight; it might be more.
43. With your own dray? With my own dray.
44. You do not recollect what stores you took them from? I said before I took some from Lamb's, some from Walker's, some from Pollard's, and some from the Chilian Bond.
45. In fact you took some from each place? Yes. Mr. Stewart requested me to get drays to get the work done, and wherever I found an idle dray to put goods on it and pay them.
46. Do you not recollect any fellow-draymen you employed? No; I do not know a dozen draymen in Sydney. I know the drivers of them, but I never took their names.

Mr. George
O'Brien.
25 Nov., 1858.

WEDNESDAY, 1 DECEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

J. M'LERIE, Esq.,

| H. H. BROWNE, Esq.

Mr. William Almond, again called in, stated:—

About the 17th or 18th November I was passing Messrs. A. and E. A. Levy's stores, when Mr. Levy said to me, "How is it, Mr. Almond, that my Geneva bonded in your stores runs so large in quantity, and so high in proof?" I said, "I am not aware your cases are larger than others; you are at liberty to see Mr. Campbell's certificates." He said, "Parties refuse my certificates; they say the cases are so much larger than they can buy elsewhere; they tell me that if I bond my spirits at other bonds I can get them of whatever quality and strength I like." I replied, "If such is the case, rather than lend myself to such a course I would lose the best customer we had." He said, "I have no intention of leaving you, but I thought it best to make this known." A considerable quantity of gin is now in Campbell's Stores, of which the lowest measurement may be stated as $3\frac{3}{4}$ gallons, and the highest $3\frac{1}{2}$ gallons. There may be gin in the Colony measuring $3\frac{1}{2}$, but we never received any under $3\frac{1}{2}$, except one batch of three hundred cases, at $3\frac{1}{2}$. The Campbell's Wharf Bonded Stores are the most extensive in point of business in the Colony. It has been told me by two or three parties who have regularly bonded with us that they have written home on several occasions to ask that their cases might be sent out not to exceed $3\frac{3}{4}$, but that they have not gained their object, as the lowest they have received has been $3\frac{1}{2}$.

Mr. W.
Almond.
1 Dec., 1858.

1. *By the Chairman:* Then the inference the Board must draw is, as I understand you, that cases of gin come out containing $3\frac{3}{4}$ gallons, and are passed through the Customs as containing only $3\frac{1}{2}$? I could not say that, because that would be bringing a direct charge of fraud, and I should not like to do that. I can say that we never received them of the latter quantity; they never came under our notice.
2. With respect to the spirits taken into your bond, have you ever observed any discrepancy between the gauge on entering and on leaving your bond? I could mention several instances: On Thursday last we had a dipping order sent down for five and a half casks of brandy; that brandy had been in the store I think eighteen months, and the casks contained a gallon more than when they came in. There was another case of some rum re dipped for Messrs. Macintosh and Hurst a fortnight ago; it had been there about twelve months, and one cask contained four gallons more than when it came in.
3. What was the size of the cask? About sixty gallons; it was rather a large size.
4. Were not all the casks over the amount? I think that was the largest.
5. Are these discrepancies of frequent occurrence? Very frequent indeed now. It is a very usual thing indeed, when we have a re-gauge, for the lockers to clap on a gallon on a cask, either in gauge or quality.
6. To what do you attribute these discrepancies? To the gauger, no doubt.
7. To the inaccurate gauging of the landing-waiter, in the first instance? Yes; there can be but one cause.
8. Is there any special landing-waiter employed in this duty, or are they all engaged in their turn? They are removed every three months. It is always possible to tell who gauged these

Mr. W.
Almond.

1 Dec., 1858.

these casks by referring to the Custom House book; every shipment is signed at the bottom by the landing-waiter.

9. Are these re-gauges ever pointed out to the Collector? I cannot say that.

10. When the locker becomes aware of them does he point them out? It is the locker who detects the discrepancy, and the re-gauge order is carried to the Custom House, and given to the warehouse-keeper, Mr. Nash.

11. He ought, then, to be aware of it? It is not possible for him to avoid it.

12. Do you know whether these discrepancies have ever been brought to the notice of the Collector by the warehouse-keeper? I cannot say; it is not possible for me to know. It has been mentioned to Mr. Still very frequently.

13. *By Mr. Browne*: When goods are sent out for exportation do you have them always re-dipped before they go out? Yes, always.

14. Would it not be highly irregular to have goods shipped without their being previously dipped? No doubt; it is a law of the Customs that they shall be dipped before they go out.

15. *By the Chairman*: Did you ever find a re-gauge come exactly the same as the original gauge? Very frequently. In three months we are supposed to lose a gallon from a cask by evaporation, but our stores are very damp, and it is very common for us to have goods two years in bond without losing a gallon.

16. *By Mr. Browne*: What class of men are employed as landing-waiters? I should not like to be personal; there is a great difference in them.

17. Are they men who understand the business of gauging? Some of them.

18. Some do not? I believe not.

19. Are they sober men? There are very great exceptions; that is one great fault, and I believe the foundation of the other.

20. They are men of intemperate habits? There is great temptation to that.

21. Are the tide-waiters who have charge of the vessels respectable, steady men generally? There are a great number of them very inefficient.

22. Do you know whether they are in the habit of remaining on board ship at night, or whether they leave? That I cannot say.

23. Do you think they are, as a class of men, likely to assist in protecting the revenue? I have no proof that they do otherwise—that they would endeavour to rob the Government.

24. Do you think, from their manner and conduct, that, as a class, they are likely to protect the revenue? I have no right to say otherwise.

25. Do you ever see the tide-surveyors round at your wharf—Mr. Bremer or Mr. Collier? Yes, they are very frequently round, almost every day.

26. Are these gentlemen both sober men? I never saw Mr. Collier the worse for liquor in my life. I have known him now a long time.

27. What have you to say of Mr. Bremer? I never saw him what I should call very—it is rather a delicate sort of thing.

28. *By the Chairman*: Have you seen him the worse for liquor? I have seen him what they call fresh—I have never seen him so that he could not fulfil his duty.

29. *By Mr. Browne*: Have you seen him tipsy? I would not say that.

30. *By the Chairman*: Do you think the re-gauge of thirty-one hogsheads and twelve quarter-casks of brandy would turn out the same as the original gauge? I should think it an impossibility. It would of course depend upon the time they had been in bond; but even supposing they had been in only a week, I should say it was an impossibility.

31. This brandy, according to the statement on the warrant, had been in from the 11th April to the 2nd September, and the quantity when it came out is stated to be 2,068 gallons, precisely the same as when it went in? It is an impossibility—the thing is ridiculous.

32. *By Mr. Browne*: On the very face of it it shews it is a fraud? Yes.

33. *By the Chairman*: I see from another warrant that five hogsheads of rum, containing 276 gallons, went into a bonded store on the 19th March, and that on the 28th August they came out containing precisely the same quantity—is that possible? It is quite impossible.

34. That last re-gauge, from the statement on the back of the certificate, purports to have been made by Mr. Brown? I do not believe the statement. The thing is an impossibility.

35. Then, twenty-eight hogsheads of rum went in on the 23rd June, and came out in September, in both instance the casks containing 1,576 gallons—is that equally impossible? Yes; it is ridiculous.

36. *By Mr. Browne*: It bears fraud on the face of it? Yes; they might have made an allowance of half-a-dozen gallons, or something of that kind.

37. *By the Chairman*: Do you ever think it a necessary precaution for yourself to have spirits re-gauged before you, previously to taking them into your store? We have never done it.

38. You always require them to be re-gauged before they go out? Not always.

39. When spirits are transferred from one store to another, do you take them in without re-gauging? We never take them in without, for our own satisfaction. As an instance, I may mention that the Union Bank some time ago held a very large quantity of certificates from Mr. Henry Fisher; they were to be transferred to our store, and I refused to take them in unless they were re-gauged; because, if they had afterwards been found to be deficient, it might have been said that they were correct when they were delivered to us from the Exchange Bond. We charged sixpence a cask for the re-gauge.

40. Do you remember whether there was any great discrepancy? I cannot recollect.

41. Is it the locker or yourself who requires the re-gauge? It is immaterial to the locker; it is for our own protection, that the parties may not make a claim upon us.

42. It is not required by the Customs regulations? No.

43. When these transfers are made does an export officer generally accompany the cart? Yes.

44. Have you noticed that he does generally accompany the cart? I have never noticed anything to the contrary; he is supposed not to allow the goods to go out of his sight.
45. *By Mr. Browne:* When you remove goods from one store to another is there any fee or charge to be paid to the Government? The officer has 10s. 6d. a day.
46. The officer who accompanies the dray? Yes.
47. To whom do you pay that? To the officer himself.
48. Who appoints the men to perform that duty? I can hardly say who appoints the men. The Custom House Agent makes the application for the removal of the goods, and I rather think he applies to Mr. Garling for the officer.
49. In all cases of removal of goods the proprietor of the goods pays the officer who accompanies the cart? Yes.
50. Do you know whether these officers who are paid for the removal of goods are in the receipt of regular pay from the Customs, or whether they are dependent upon this occasional employment? I think there are three regular export officers, and when these are employed they are not paid by the proprietor of the goods; but, if these are all engaged a chance man is put on, and he is paid as I have stated.
51. *By the Chairman:* I see here a certificate signed by Mr. Hunt, the Custom House locker, from which it appears that 137 gallons of whisky went in to Mr. Pollard's store on the 22nd June, and left on the 2nd September; the whisky was in quarter-casks, and is stated to have been re-gauged by Mr. Hunt? Mr. Hunt has always borne a very good name; but I cannot believe it is possible. There might have been eight, nine, or ten of them the same, but for the whole of them to have been so seems impossible. That might have been an extraordinary case.
52. Then we come to another, signed by Mr. Dickinson, acting locker: 28 hogsheads of rum were stored at Gilchrist's on the 23rd June, and taken out on the 2nd September; they went in 1,576 gallons and came out 1,576 gallons—does that look at all like a re-gauge? If that is the fact it is an advantage to persons to bond at any other stores rather than at ours. It is very extraordinary such a thing never came under my notice. I doubt very much if some of our acting lockers are able to re-gauge a cask.
53. You think they do not know how to gauge? I think so from what I have heard of them. We have been fortunate enough to have had very good lockers with us.
54. *By Mr. Browne:* Do you think it would at all add to the respectability of the officers, and to the protection of the revenue, if all Custom House officers, of whatever grade, were obliged to use a distinguishing uniform? No; I cannot say I do. I think there has been a great oversight on the part of the Government as regards the export officers. I look upon theirs as the most responsible situation in the Custom House, and the office should be filled by honorable men, who should be well paid, and be under a bond. A locker, who has not one-twentieth part of the opportunity of doing wrong that the export officers has, gives a bond, but the export officer, who, as he goes through Sydney streets with goods can do what he likes, has not one shilling's responsibility.
55. Are not men of a very common class appointed? Yes; and you ought to have the very best men for export officers.
56. *By the Chairman:* Is it the duty of the landing-surveyor to check the landing-waiters in their gauges? Yes; I imagine the landing-waiters to be under the superintendence of the landing-surveyor.
57. Have you seen the landing-surveyor generally check the landing-waiter? Yes.
58. Have you had much opportunity of seeing him at work? The only times I can see him are when he comes down to the wharf.
59. And you have seen him check the landing-waiter? Yes.
60. *By Mr. Browne:* Where do the landing-waiters keep their hydrometers and other instruments? In their boxes.
61. Is any attempt made to test them periodically by any standard hydrometer? That is part of Mr. Garling's duty. Mr. Still has the superintendence of the lockers, and he tests their instruments every now and then.
62. You do not know whether Mr. Garling tests the landing-waiters' instruments? I have seen him do it; if the instruments of the landing-waiters and of the lockers do not agree it is apt to cause very great confusion.
63. May not an error occur in consequence of a twist in the callipers of a gauging rod? Yes.
64. And these rods require testing from time to time? Yes. They being under the landing-waiter's charge he is supposed to keep them in proper order.
65. Do you know whether they carry their own hydrometers and gauging instruments? They each have their own, and carry them from one wharf to another. There is one great evil which I think ought to be remedied—I refer to the landing-waiters having to leave the wharf. If a ship discharges at our wharf it is not of much consequence, but if it is at Gilchrist's, or some others, the landing-waiter has to leave the wharf in order to examine spirits or tobacco.
66. Could not that be done by the proper locker if the landing-waiter were taken away? Yes; but it is not the duty of the locker.
67. Sometimes your wharf is left for a day together without a landing-waiter at all? Not only our wharf, but others.
68. Do you think it is a convenience to have bonded stores scattered about the centre of the town? I think it is a very bad thing.
69. Should not bonded stores be in the vicinity of sufferance wharfs, so that they might be handy for the reception of goods from ships? Bonded stores should be waterside premises.
70. Do you know how many bonded stores there are in Sydney? I think there are twenty-five.
71. The majority of these are in the town, are they not? The majority.

Mr. W.
Almond.
1 Dec., 1858.

Mr. W.
Almond.
1 Dec., 1858.

72. *By Mr. M^r Lerie*: How are packages of dutiable goods bonded—how are they marked? They run alphabetically.
73. How is it done? The Customs give us the mark for each shipment.
74. Are you confined to any color in marking the casks? No; we are compelled to use paint according to the color of the head of the cask; if it is a white head we use black paint, if black, white.
75. These marks could easily be removed without disfiguring the cask? It would be very difficult.
76. Do you know anything of the Customs Department in London? No.
77. You are a practical cooper I believe? Yes.
78. Do you not think if the Customs mark were put on by a branding iron that would be a better arrangement? That would not answer, because we could not see the marks, and it is necessary that in our stores everything should be marked very distinctly.
79. Is it not the practice in the Port of London to mark the casks with a scribe? Yes; but the vaults in the docks in London are very different places from our bonded stores here; besides, the brandy casks heads are almost covered with scribe marks.
80. Would it not be possible to make some mark of a more indelible kind than that of paint? I do not know any other plan that could be adopted, unless a branding iron were used, in the same way as it is used for stamping a number on a brandy cask; but that would be very indistinct, and would give immense labor and trouble; besides, the mark might be obliterated by painting over after the cask was taken out and duty paid.
81. Would it not be as easily done before duty was paid as after—would it not be an easy thing to commit a fraud upon the revenue by painting them over when the goods were *in transitu*? Yes, decidedly.
82. Would it be as easy to do this if the cask were branded as it is now? No, because if an attempt were made to remove the brand, a large depression would be left upon the head of the cask. There is one thing I should like to see remedied in the Customs: I refer to the landing of goods. I think the power should be in the hands of the landing-waiter to prevent too many goods being landed in one day. The Collector says he has not the power to stop it. I will give an instance: yesterday was a half holiday; the "Esperanza" was lying at Russell's Wharf, near the Steam Company's Wharf, with 104 quarter-casks for us, and the captain would insist upon landing them all, which put us to an expense of 25s., and kept the locker all the day, as the store was open. I may have 500 cases of gin upon the quay, and two other shippers may have two or three hundred each, and all the parties may demand the privilege of landing the goods on the same day.
83. At what rate do you pay the locker when he is kept over-time? Two shillings an hour.
84. Is that one shilling for every hundred pounds of salary? They have not all the same salaries, but they are paid the same.
85. As the locker had to stay yesterday, it being a half holiday, what had you to pay him? I should refuse to pay him, as it was not our fault that he was kept, but the fault of the Government in allowing the goods to be landed.
86. Is this an extra fee under a Custom House order or notice? I think it is a perquisite allowed by the Government to the landing-waiter.

Mr. William Cathcart Still was again called in, and addressed by the Chairman, as follows:—

Mr. W. C. Still. The Board have reason to believe that cases of gin are sent to this Colony and are sold on the understanding that they contain less than they actually do, whereby the revenue is defrauded. For instance, cases are said to contain $3\frac{1}{2}$ gallons, when they measure nearly four gallons and are sold as four gallons, so that the duty upon a half a gallon is lost to the Colony. The Board wish you look through the different warehouses, and to prepare a statement shewing the average quantity contained in those cases stated to be $3\frac{1}{2}$ gallons.

FRIDAY 3 DECEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

H. H. BROWNE, Esq., | J. M. M^r LERIE, Esq.

Mr. Loftus Dickinson called in and examined:—

Mr. Loftus
Dickinson.
8 Dec., 1858.

1. *By the Chairman*: You have acted, I believe, as Customs locker? Yes.
2. Did you not act as locker on the 2nd September, and deliver 28 hogsheads of rum to be shipped on board the "Louisa"? Yes.
3. Is that your signature on the back of that? (*Handing a warrant to the witness.*) Correct.
4. Did you re-gauge those spirits when they were issued? No.
5. Why did you not? Mr. Newton told me there was no occasion to do so, as they were going to the Islands, and I having been there only three days thought it was not necessary to do so, as he was superior to me in years in that department.
6. How long were you acting locker at this particular bond? I was there about eight or nine days, but this was just as I took charge. Mr. ——— was there, and Mr. Still or Mr. Nash told me to take the keys and go to Gilchrist's Bond. I think it was a few days after that Mr. Newton came and gave me that warrant which I acted upon. He said there was no necessity to re-gauge it.

7. You were not aware of the regulation of the Customs, that after spirits had been in bond one month they should be re-gauged before issued for exportation? No, I was not aware of it.
8. At what time did you issue these 28 hogsheads of rum? It was between nine and twelve. Mr. Newton has entered his name in the Customs book as having shipped them by twelve, consequently, as I went to the bond at nine, it must have been between nine and twelve.
9. Are you certain, from your own knowledge, that you did issue them between nine and twelve? I will swear it.
10. You do not depend upon what Mr. Newton has written in the book? No. I think they went away by three dray loads at a time.

Mr. Loftus
Dickinson.
3 Dec., 1858.

Mr. Gualter Soares called in and examined:—

1. *By the Chairman*: What is your situation in the Customs? I am a locker.
2. It appears from some papers that have been sent to us that on the 6th of November you, at a very late hour in the night, took part in removing Mr. Stewart's goods from his house for the purpose of taking charge of them yourself? That is not quite the fact.
3. Did you not assist? In the first place, if you will allow me to enter into particulars, about fifteen months ago Mr. James Stewart, who had been living previously with his mother at Balmain, took a house at Pymont; his mother assisted to furnish his house; and I saw the goods across in boats.* I believe I was one of the last who saw Mr. Stewart in Sydney; it was on a Saturday morning.
4. On the 6th November? About that date, as nearly as I can recollect. He was to have been with me at twelve o'clock, but he did not come. I waited till half-past one, although on Saturdays we are allowed to leave at a quarter to one. I then went to Mr. William Stewart's store, where I saw a gentleman who said they were expecting him there, and he thought he was behaving very strangely. I waited there some time, and then went over to Balmain, where I reside. From Balmain I went over to Pymont, where I heard his mother was, and found her at his house. I asked her if she had seen her son James. She said she had seen him in the morning, when he seemed to be in a great hurry, and said he was going away. When she asked him what were his intentions, he said he had to act, and not to talk; he said he wished to return her the furniture he had had from her fifteen months before, and that any little addition he had made she was welcome to also. My mother-in-law, Mrs. Stewart, asked me if I would assist some of these things over. It was a late hour in the evening when I got them across, and for that reason I had difficulty in getting a dray, and, as my house was nearer to the place where the furniture had been left than Mrs. Stewart's, I had them taken to my own house.
5. At what hour were you doing this? I commenced at four o'clock, but I did not remove all the furniture; a good part was removed subsequently, without my supervision, for auction, some two or three days afterwards.
6. Were you not employed at eleven o'clock at night in helping to remove Mr. Stewart's furniture? Decidedly I was, but it was not Mr. James Stewart's.
7. Till what hour were you employed in removing the furniture? I dare say before I got home it might have been eleven.
8. You assisted generally to remove the whole of the furniture? No; I did assist to remove part, but the rest, I am informed, was afterwards sent to be sold by auction. It was wholly given to Mrs. Stewart before I put a hand upon it.
9. Given that day? Yes; but even so, the articles given were very small; the whole of them, or nearly so, belonged to Mrs. Stewart.
10. How do you know that? Because I was the party who forwarded them to Pymont about fifteen months ago. I lived close to Mrs. Stewart at Balmain.
11. Did you not know that Mr. Stewart was under suspicion of having been connected with a fraud upon the Customs? No, not Mr. James; I heard it reported of Mr. William Stewart. I may state that I am a connection of theirs, and that we were on terms of the greatest intimacy, but I never suspected anything wrong in their business transactions, neither did they ever make me acquainted with the nature of them; as a relation they might naturally look upon me as one of the first to be questioned on the subject, and and as an officer of the Customs, my knowledge of anything illegal in their affairs could be of little service to either of us.
12. Had you not heard suspicions expressed that Mr. James Stewart was also connected with the Customs fraud? I had not.
13. Although it was the 6th November? I believe it was.
14. And at least a week after this Board had commenced sitting? I do not know when the Board commenced sitting; I was not aware that a Board was sitting until some time after.
15. Did you not notice in the paper that a Board was sitting to inquire into the subject of the Customs' frauds, in which Mr. Stewart was implicated? No. The first intimation I had was when the reward was offered in the paper, and if I am correct that was on the Monday or Tuesday after I last saw my brother-in-law. That I had heard of suspicions I do not deny, but that the Board was sitting I was not aware.
16. You took part of the furniture? Yes, temporarily, because my own house was more convenient, on account of the lateness of the hour, the carter refusing to take them further.
17. Did you not think you were compromising your position as an officer of Customs in assisting Mr. Stewart? No. I was assisting my mother-in-law—the furniture belonged to her.
18. The furniture did not all belong to her until that day? Some small part of it, but by far the greater part was hers.

Mr. G. Soares.
3 Dec., 1858.

19.

* One of the boats belonged to a man of the name of Maurice Bullivant—the other is, I believe, since dead; but I have forgotten his name.

- Mr. G. Soares. 19. Some was given to her that day? Yes; but I am not aware I removed any of that.
20. He was to have met you, and you missed him? Yes
- 3 Dec., 1858. 21. And you had heard it remarked that it was rather curious he was absent? Yes
22. And all this excited no suspicion in your mind as to Mr. Stewart's behaviour? None whatever; at this very moment I am not aware of anything at all with respect to Mr. James Stewart.
23. *By Mr. M'Levie*: Did any person speak to you about the furniture on the night you were removing it? Yes; a person of the name of Dixon, a stationer.
24. A stationer? I mean to say a tobacconist. He asked me if the goods were mine. I said, "No—is it yours?" He said no. I replied, "If it is not do not interfere with me." He said Mr. Stewart owed him money—that he had robbed him.
25. Are you sure nothing passed between you and Mr. Dixon but that? No; to the best of my belief that was pretty nearly what passed. He asked if Mr. Stewart was in the house, and I said he was not.
26. Did Mr. Dixon make any remark about Mr. Stewart's absence? Mr. Dixon said he would find him if he was to be found in the Colony. I said I had no idea that he was out of the Colony. From his remarks, I believe he thought I was harbouring him in my house. I said I was not, and that I should be very glad to find him myself.
27. Do you remember that Mr. Dixon said, as Mr. Stewart owed him a large sum of money he thought the furniture belonged to him? No, he did not.
28. Did you not say, "That remains to be proved to whom the furniture belongs?" No; he did not make that remark; the expression he used was, that he did not care a curse about the furniture—he did not suppose it was worth much. He said Mr. Stewart had cheated him to a considerable amount; and I said if Mr. Stewart had done so he had proved himself to be very smart.
29. *By the Chairman*: Did Mr. Dixon give you the impression that he believed Mr. Stewart was absenting himself from the Colony, or hiding himself? I believed that he thought Mr. Stewart was trying to keep out of his way.
30. Not out of the way of the authorities? No.
31. *Mr. M'Levie*: If you thought the transactions were not of an extraordinary kind, what could have induced you to engage in the removal of these goods at so late an hour? You must be aware that as a Government officer I had not time to engage in such matters in the middle of the day. Saturday is the only day I have; and on this occasion by the time I reached Pymont, after going to Balmain, it was late.
32. You admit having had from one o'clock? I did not leave till half-past one; I then went to the store Mr. Stewart occupied, from there I went to Balmain, and thence to Pymont, and you must be aware that would take some little time.

Mr. William Cathcart Still again called in, made the following statement:—

Mr. W. C. Still. Circumstances having arisen to warrant the suspicion that a portion of the goods supposed to have been shipped in the "Louisa" had been forwarded to Parramatta, I proceeded to that town on Monday, the 29th November, and, accompanied by Chief Constable Drury, and, empowered by a "Writ of Assistance," examined the spirit stores on the premises of Mr. Williams: the spirit stores are three in number, and are separate portions of the premises. On proceeding through the second one, containing a mixture of goods, my attention was attracted to two blocks of Geneva. One of these blocks, the largest, had the *Key* brand; the other, consisting of seven cases, with an empty one lying near, bore the *same private marks and brands as those delivered to the "Louisa."* On a closer inspection I found that two of the full cases and the empty one had a Customs bond mark in chalk, G 548; the bond mark of the "Louisa's" Geneva was E 562. The bond mark not tallying with the private marks aroused my suspicions, and I considered it my duty to place these cases under seizure until I communicated with Sydney. I accordingly placed the seizure mark upon them, and placed them under the surveillance of the Chief Constable. Mr. Williams admitted, after I had made the seizure, that he had bought these goods, originally ten cases in all, from Mr. William Gibbes of Sydney, about the 20th September last, to assist him (Mr. Gibbes) in business; he stated that he also bought two hlds. of brandy at the same time, and that it was the only transaction he had with Mr. Gibbes. In the third store I examined a number of cask goods, consisting of wines and spirits, and I took notes of the different marks and Nos. on the packages. I then returned to Sydney. On examining the Customs books I found the marks on the packages in the third store to agree, but the *chalk bond mark* on the Genevas did not agree with the *private marks and brands*. Cases of Geneva are still in bond and bear an entirely different *private* mark and brand; the private marks and brands on the seized goods correspond with the "Louisa's" goods. I find that Mr. Stewart paid duty on 14th September on 15 cases of G 548, (a portion of a lot removed from Gilchrist's to his bond,) and the placing that bond mark on a different batch of spirits gave rise in my mind to a suspicion that all was not right. I therefore felt justified in returning to Parramatta to confirm the seizure, and I left the goods in charge of the Chief Constable at the Police Office, where they are now. To strengthen my suspicion that these are a portion of the "Louisa's" goods, I found on my second examination, when brought into the light, that one of the cases has actually a sufficiently legible bond mark scribed with some sharp instrument, *namely, E 562—the bond mark of the "Louisa's" goods.* I may mention that Mr. Williams offered no impediment to my examination of his premises, but, on the contrary, lent me his own cart to remove the cases to the Parramatta Police Office. I am of opinion, from Mr. Williams' manner throughout, that he purchased those goods from Mr. Gibbes believing them to have been properly cleared from the Customs.

Police Office, Parramatta,
2nd December, 1858.

Mr. W. C. Still

3 Dec., 1858.

Received into my charge from the Chief Inspector of Distilleries and Inspector of Warehouses the following cases of Geneva, seized by him as smuggled goods at Mr. Williams' Spirit Stores, on Monday, 29th November, 1858:—

Five full cases, and one ullage case of three bottles, marked L.Z., and branded J.D.K.Z. with anchor.

One full case, marked and branded as above, with a scribe mark E. 562 on same side.

One empty case, marked and branded same as first five cases particularised.

Three of the above cases have the following chalk mark—G. 548.

The fourth bottle of the ullage taken by the Inspector to Sydney to test the strength of the liquor.

GEORGE DRURY,
Chief Constable.

WEDNESDAY, 8 DECEMBER, 1858.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.,

J. M'ERIE, Esq.

Mr. William Augustus Hunt called in and examined:—

1. *By the Chairman:* You are the locker at Pollard's Bond? Yes
2. An issue of dutiable goods took place from that bond on the 2nd of September? Yes.
3. Do you remember what that issue was? Fifteen quarter-casks of whisky.
4. Did you re-gauge them? I did not.
5. Why not? These casks had not been very long in bond, and they were all full. The same morning I had received an order for some of the same lot, and on gauging them I found they were all full.
6. These fifteen quarter-casks had been in above a month, had they not? I cannot say.
7. If they had been in bond above a month would it have been your duty to re-gauge them? Yes.
8. Is it a standing order in the Customs that you are to re-gauge all goods issued from bond that have been in bond above a month? No.
9. Is there any order at all of that kind existing? There was an order issued some time ago, that if spirits were issued after they had been in bond three months they should be re-gauged.
10. If these spirits had been in bond above three months — ? I should have re-gauged them.
11. We have not the papers with us, because they have gone to the Attorney General with reference to the trial; but if we should find, when they come back to us, that these spirits had been bonded above three months, we are to understand that you ought to have re-gauged them, and if you did not you neglected your duty? Sometimes I have had casks in bond six months, and they have lost nothing. I did not, therefore, think it necessary to re-gauge them.
12. What are your instructions—is it left to your own discretion? There is no order at all; we can do it if we like.
13. You re-gauge whenever you like, or omit to do so when you like? Yes; but we generally do it lately.
14. What do you mean by lately? The last two or three months.
15. Under what circumstances? For export.
16. Quite independent of the time the goods have been in bond? Yes.
17. At what time were these goods applied for from Pollard's Bond? The officer came there after dinner, I think.
18. Who was the officer? Mr. Newton, I think.
19. Did you issue them to him? Yes.
20. Did you see him take them away? He took away both loads.
21. Followed both? Yes.
22. *By Mr. Browne:* Do you know at what time of the day—after dinner? I should say about three o'clock, because we had to break them out; we had to break out a good many casks before we came to that particular lot.
23. Did Mr. Newton come to you with the order some time before you could deliver them? Yes; he came there at two o'clock, when we broke them out and delivered them about three.
24. Did he tell you not to mind gauging them, or anything of that sort? No.
25. Nothing of that kind? No. Some of these casks had been in the Chilian Bond, and I have received an order from Mr. Still to re-gauge every thing that goes out of that bond, and they have not lost more than half a gallon even now.
26. *By the Chairman:* Are you aware whether Mr. Newton, the export officer, was ever dismissed from the Customs? No, he was not, that I know of; he has been suspended.
27. Do you remember what he was suspended for? He made some report against some of the lockers about samples.
28. How long ago? I do not exactly know.
29. Six months ago? About that time.
30. Was the report inquired into? I do not know.
31. You do not remember what the report was? He accused some of the lockers of delivering some samples without an order from him.

Mr. W. A.
Hunt.

8 Dec., 1858.

- Mr. W. A. 32. *By Mr. Browne:* Have you ever held any other appointment in the Customs except
 Hunt. that of locker? Tide-waiter.
- 8 Dec., 1888. 33. Have you ever been an export officer? No; only an extra tide-waiter.
34. Did you do any export duty when you were an extra tide-waiter? I think I attended
 once to the export of goods during the whole time.
35. How did you learn your duty as a locker? After I was taken off the ship I was
 instructed by one of the landing-waiters in gauging; that was the only instruction I had.
36. Was that the sum total of your instruction as a locker? That was all.
37. Were there no rules given you for your guidance? No.
38. *By the Chairman:* Were you examined in book-keeping? No.
39. Did you get any instruction how to keep the locker's book? No.
40. Has Mr. Garling, in the capacity of surveyor of warehouses, ever visited your bond?
 Before Mr. Still was appointed he did occasionally.
41. Did he examine your books? No.
42. Did he ever record his visit in the book? No.
43. Did he ever initial the book at all? No.
44. He made no record of the time at which he visited you? No.
45. How long have you been a locker? About five years.
46. How many times during that period has Mr. Garling visited your bond? Sometimes
 three times a week; sometimes every day in the week.
47. *By Mr. Browne:* Are any dutiable goods gauged or weighed at the bond? Very
 often.
48. What goods are? Tobacco is generally weighed at the store, and gin is always weighed
 at the store—case spirits.
49. Who does that? It is under the locker's supervision, and he has to give the account to
 the landing-waiter when it is finished.
50. The landing-waiter is not obliged to be present when it is being done? He has been
 sometimes present.
51. Not always? It is not necessary.
52. When these goods are received from the ship, how are they received into bond before
 they are gauged or weighed—is there any shipping note? Certainly; we receive cart-notes.
53. Anything from the landing-waiter? From the landing-waiter we receive a cart-note;
 that is only lately.
54. How long ago was that practice commenced? Within the last seven months.
55. Before that nothing was received? No.
56. Who introduced that form? Mr. Still, I think.
57. When goods are received at the store, are they immediately weighed, and an account
 taken, or are they allowed to remain some time till a convenient opportunity occurs for doing
 it? The landing-waiter can insist upon its being done at once.
58. How do you send the report to the landing-waiter? He either calls for it or I send
 a slip of paper by one of the working men in the store.
59. With that, he enters it in what is called his red book? Yes; and then I have to sign
 for so many packages received into bond.
60. With reference to cases of gin, are they all marked? They ought all to be marked.
61. Does not the practice exist of marking the stacks, just the front of the stacks, without
 marking each individual case? That is a very common practice.
62. Is that a proper practice—when the front row is taken away, is the back row marked
 the same? Perhaps they are marked as they are delivered.
63. As they go out, instead of as they come in? Yes.
64. Is that a frequent case? Yes; because at the time the men stow them they do not
 know the bond mark.
65. The bond mark in Mr. Nash's book? Yes.
66. That comes afterwards? Yes, and if they do not know the bond mark they cannot mark
 the cases.
67. There are some goods in the bond you now have charge of that are not marked at all?
 No, there are none in the bond I now have charge of.
68. Does such a thing exist in any of the bonds? Yes.
69. That they are not marked at all? Yes.
70. If these cases got out into consumption without being marked with the bond mark there
 would be no check on them? We would have to send to Mr. Nash for the right bond mark.
71. You do not understand me. If these cases, by any fraud on the part of the persons
 connected with the bond, got into consumption, there would be no check to trace them as
 having been goods that had not paid duty? But the lockers would have no right to let
 persons into the bonds.
72. When you examine a batch of gin how do you examine it—suppose, for instance, that I
 have put five hundred cases of gin into the bonded store of which you are in charge, without
 their having been gauged or marked, will you describe what course you adopt before the
 certificates are issued to me for these cases? Before the cases leave the wharf the landing-
 waiter takes a bottle out, sees what it holds, and returns it again; then I see how many
 bottles are in each case, and nail the case up again, and send in a return of how many bottles
 there are in a case.
73. Then you do not measure the liquor at all? No.
74. Does the landing-waiter send up a memorandum to you that he has measured one bottle?
 No; sometimes he comes up himself and measures a bottle, if he has not done it on the wharf.
75. One bottle? Or perhaps half-a-dozen.
76. Then, when you send down the particulars to him as having received the cases, does he
 fill up the contents and strength? Yes.
77. If five hundred cases are placed in one bond, how many cases would be examined to
 ascertain.

- ascertain the quantity? We open one case and put the others through the scale, and if they weigh as much as the one that has been opened they are correct.
- 78. The measuring is dependent on one bottle out of fifteen? Or perhaps half the case.
- 79. Has Mr. Still lately examined any gin in your store? No.
- 80. What store are you at now? The Chilian.
- 81. Is that the only store you have charge of now? Yes.
- 82. Is that cleared out yet? There are about thirty packages in it altogether now.
- 83. *By the Chairman*: What sort of book does the locker keep—when the gin is sent up, and the landing-waiter comes to see how much gin there is, how do you enter that in the book? So many cases. I do not enter the contents; I am not answerable for the capacity or contents of the cases or casks.
- 84. *By Mr. Browne*: In marking cases, when they go out of bond, are they marked in paint or scraped with iron? With paint.
- 85. Then, if I understand you right, many would go out with the paint fresh? Yes.
- 86. So that any one outside could wipe off the marks? Yes.
- 87. Is that the case when they go out for export—do they go out in the same way? Yes; but when the paint is fresh put on they generally throw a little sand on it to dry it.
- 88. If gin was sent out for export would that course be adopted—they would be painted and then a little sand thrown over it before they went out? Yes.
- 89. *By the Chairman*: Are there two locks to each bond—the Government lock and the private lock? Yes.
- 90. Who supplies the Government lock? The Customs.
- 91. Is it bought by the Customs? Yes.
- 92. And selected by the Customs? Mr. Still, I believe, chooses the lock.
- 93. Has it ever been the habit of the warehouse-keeper to purchase the lock on account of the Customs and furnish the keys? Yes.
- 94. These locks are often supplied with duplicate keys, are they not? They are generally supplied with duplicate keys.
- 95. You are quite certain of that? I bought some locks for Mitchell's Bond, and I got two keys.
- 96. Are you certain the warehouse-keepers in some cases supplied the Government locks? I could not swear to it, but I believe it has been the case in the olden time.
- 97. What do you mean by the olden time? Two years ago.
- 98. *By Mr. Browne*: How long have you been at the Chilian Bond? About a month.
- 99. Do you consider that bond a secure and proper bond? Yes; I do not know any way you could get into it; it seems to be well protected.
- 100. Have not the goods that go into bond to go through a free store? Yes; they have to go down a trap.
- 101. Is that right? They have not to go far into the store; the trap is just by the door.
- 102. Suppose you were up above, could you tell whether the goods went into the store or went on to a dray? You could not see them go on to a dray.
- 103. Does it not offer facility for fraud? Yes, if they were so inclined.
- 104. *By the Chairman*: Do you ever consider it your duty to re-gauge spirits when they are sent up by the landing-waiter to bond? Yes.
- 105. Do you regularly re-gauge them? No, not regularly.
- 106. You do not consider yourself answerable for the spirits in the cask? It does not do to be always knocking about a cask—it spoils it.
- 107. You are not expected to re-gauge them? No. If we suspect any deficiency, or see any leakage, we re-gauge them for our own satisfaction.

Mr. W. A. Hunt.
 8 Dec., 1858.

Colonel J. G. N. Gibbes, Collector of Customs, called in and further examined:—

- 1. *By the Chairman*: We have gone through the evidence, and there are certain points which we think bear upon the way in which you have conducted the department, and which we think it right to examine you upon. For that object we have asked you to attend again, and we leave it to you to give your answers as you like. The first point the Board wish to examine you upon is with respect to the Treasury Regulations, which you said were withdrawn some time ago. At what period were these Treasury Regulations withdrawn? In 1853 or 1854.
- 2. Were they withdrawn by letter? Yes.
- 3. Have you the letter in your office? Yes, no doubt.
- 4. Perhaps you can produce it? It is not loose, it is bound up in a book.
- 5. Will you give us a copy, so that we may judge of the tenor of that letter in making our report? Yes.
- 6. Perhaps you can tell us its tenor? It was merely to the effect that the department being turned over to the Colony we should send back the books of instructions to the Board of Customs.
- 7. Did you understand from the recal that you were no longer to conform to the spirit of those instructions as regards your duty to the Colony? No, certainly not. I cannot form any opinion why they withdrew them; but although they were withdrawn we continued to carry on the business in the same form—perhaps they were as good as any that could be made.
- 8. You considered it your duty to carry out the practice directed in these instructions even after they were withdrawn? Oh! certainly. They were not withdrawn on account of the Board of Customs supposing them in any way defective.
- 9. Did you consider that the withdrawal meant that you should return every copy, and that you should not keep any for your guidance? Yes, every copy. Perhaps hardly any but myself had a second copy.

Colonel J. G. N. Gibbes.
 8 Dec., 1858.

- Colonel J. G. N. Gibbs.
8 Dec., 1858.
10. Are the instructions, a copy of which you sent to me, in compliance with my application, the same as those that were withdrawn? Yes. There are some trifling alterations in the renewed instructions, which I think I mentioned. The new instructions are, perhaps, ten or twelve years old.
11. In the main these instructions are still in force? Yes, they are so far in force that we act in accordance with them as far as we can.
12. There are many parts of these instructions that, although they were issued for officers in the Colony, any one may see are perfectly unsuitable, and cannot be performed by them; for instance, in Article 2 it is said, "You will also receive herewith copies of our instructions to the Comptroller at your port." Have you any copies of the instructions referred to here? I sent you some, I think.
13. None with reference to the Comptroller of the port? No. The orders are almost all obsolete; they are running back—I cannot tell you to what years. Although they say they sent them, they did not send them.
14. Then you have no further instructions to lay before us than those you have already sent? No; I should say not.
15. For instance, there are no instructions for the Comptroller of the port as to how he is to behave? I do not think I have any, but perhaps I might have an old copy. There has been no Comptroller here since Mr. Cooper went—about 1845, I think.
16. *By Mr. Browne*: What we want to understand is, whether these ordinances did provide a course of proceeding for entering, clearing, and so forth? No.
17. *By the Chairman*: Here is a book, entitled "The Laws of the Customs for the United Kingdom of Great Britain and Ireland, and the British Colonial Possessions abroad," marked with the Royal Arms, by Robert Ellis, Long Room, Custom House, London? I remember the name.
18. Here is a long article upon the final clearance of vessels, in which it says all vessels will be cleared in the following manner:—"First, that on the ship's content being delivered by the master of the vessel to the searcher appointed to clear vessels, the searcher do proceed in all respects according to the 73rd section of the 6th Geo. IV, c. 107, and file the cockets together, and attach with a seal a label to the file, and compare the particulars endorsed on the cocket with the marks, numbers, and packages in the content, and attest the correctness thereof by his signature on the label and on the content, as required by the said Act?" All that is English, and not Colonial.
19. Do you adopt the principle? Yes.
20. This is the clearance outward of the "Louisa" on the 2nd September, which was sent to us from New Caledonia for our inspection—has that practice been adopted with respect to that clearance? Yes; this is the content outward, and this is the certificate, and that is all that is necessary to go with a vessel from hence.
21. Where are the cockets or shipping bills? We have none. Our export entries are similar to the cockets, or shipping bills, in England, but we do not send them, whereas in England they do; that has never been the practice in the Colony at all.
22. *By Mr. Browne*: Is it not the practice with ships going to England? No. A London ship goes from here with a very small number of papers; she has a content outward, a similar certificate to this, a passenger list, and then a certificate of produce.
23. *By the Chairman*: This book speaks of the instructions as applicable to British and Colonial possessions abroad? So I see; but I have been in two British possessions, and they have never adopted the practice.
24. You never have adopted it either in the West Indies or here? No, I have not, nor, to the best of my belief, is it adopted anywhere in the Colonies.
25. *By Mr. Browne*: Would not the shipping bill be necessary in clearing? No: an export warrant is a shipping bill.
26. You would attach nothing to a London clearance? Nothing.
27. If I remember, when I commanded a ship there was a certificate, even if I had only wool and tallow on board? There was a certificate of produce—that is quite a different thing. Wool, tallow, and horns are entered in a long form, called a certificate of produce, that shews everything not liable for duty in England.
28. What would be the certificate of dutiable goods for a London ship? Just the same as this, nothing more. In fact I may say it is an unusual thing for a London ship to take dutiable goods from here except as stores.
29. Sometimes they take wines? Principally Colonial wines. I do not remember.
30. *By the Chairman*: Here is a copy of instructions issued by the Commissioners of Her Majesty's Customs to landing-waiters and searchers in the British possessions abroad, and it says with respect to the outward department, "You are carefully, and without delay, to examine all shipping bills delivered to you, taking care that the same, when regularly marked off and signed by you, be delivered to the landing-surveyor previously to the clearance of each vessel, in order that the same may be examined with the manifest and clearance of such vessel before the clearance is granted by the Collector and Comptroller?" That is just what I have stated already. These are the export warrants.
31. That shews the landing-waiter is bound carefully to examine them, and not to sign them merely as a matter of form, and to deliver them to the landing-surveyor? The landing-waiter never signs these documents at all here.
32. Did not Mr. Bramwell sign them in the case of the "Louisa"? Yes—oh! yes; but that you have already had explained—how and why he signed them.
33. *By Mr. Browne*: Is not that the identical regulation which Mr. Barnes thought proper to enforce? I apprehend it is; but upon my word I do not know.
34. *By the Chairman*: That regulation requires the landing-waiters carefully to examine all shippings bills and export warrants? Yes, it would appear so; but then the Government must give us landing-waiters to do it. I consider that it is very unfair the way such things are treated.

treated. I am not alluding to the Board of course. The Legislature will not pay for people, and yet they expect the work to be done as if our officers were as numerous in proportion to the extent of work as they are in England, where no expense is spared.

35. I understand from your evidence that your impression is that Mr. Barnes cancelled that Treasury order, and you considered the landing-waiters should sign as a matter of form? Yes, he did.

36. Then, in effect, Mr. Barnes' instruction was to cancel that Treasury order? Yes.

37. That is the tenor of your former evidence? Yes: he wished to have the order carried out as far as it could be.

38. When Mr. Barnes came to the Colony he found that the landing-waiters did not sign the shipping bills, or export warrants, and he gave an order that they should? Yes.

39. Was that order given with a view of carrying out the Treasury regulation, or not? That it is impossible for me to say. Mr. Barnes never explained himself upon any point. I called upon him to give written orders for any change, and he declined to do so, saying he had full power from the Board to carry out his instructions.

40. What view did you take of that order? I considered it an excessively absurd one, and told him so. It was pointed out to him that it was utterly impossible, with our strength, that the landing-waiters should see to the shipment of goods; he said, never mind, but let them sign it to make the document complete. Somebody has given evidence, I believe, that when Mr. Barnes was questioned upon the subject, about the landing-waiter not having seen it, he said he ought to have seen it. Now I venture to assert that it is not true, whoever said it, for Mr. Barnes was too old an officer; he had gone through all the different grades at home and abroad, and would know that with our landing-waiters, in point of numbers, it was impracticable. Therefore, I am certain that assertion is not correct.

41. If I understand you right, Mr. Barnes required the landing-waiter to sign that bill whether he saw the goods shipped or not? Yes, he did, expressly.

42. Did he give the order verbally? Yes.

43. Do you consider yourself justified in obeying a verbal order? I do not know. This man was sent out with full powers to inquire into the working of the department, and to make any change he considered necessary. I was bound to obey his orders, for I received a letter from the Board of Customs telling me that Mr. Barnes was to come here as a Surveyor-General, and that I was to attend to any orders he issued.

44. Did you ask him to give you an order in writing, and did he refuse? I did—Mr. Llewellyn remembers that.

45. Under those circumstances, did you not think it was necessary to get the sanction of the Treasury to have that order of Mr. Barnes carried out? I did not.

46. When it seems to be opposed to the order of the Treasury? I did not. The thing generally worked well enough, and I did not think it necessary to look into little minute points.

47. You did not report that order for the information of the Board of Customs? No. I suppose he reported it himself.

48. At what date did Mr. Barnes come here? I think either at the end of 1844 or the beginning of 1846.

49. And ever since that time this order of his has been carried out? Yes.

50. Mr. Fancourt has stated to us that he brought under your notice, on the 8th October, the fact that the "Louisa" had cleared out on the 7th without a rummage certificate—what steps did you take upon this irregularity being reported? I could not answer, for I do not remember his having done so; if he said he did, I dare say he did, but I considered there was nothing to rummage—the vessel was in ballast.

51. The evidence that we have taken, not only of Customs officers but of those connected with the Customs, generally goes to shew that a rummage certificate was indispensable? I do not think it was; but if it was, Mr. Collier, the officer for the week, should have procured it.

52. You do not remember the circumstance of Mr. Fancourt reporting it to you? No.

53. Therefore, you do not remember what action you took upon it? No.

54. You have in your evidence justified Mr. Manton in acting for Mr. Maddocks, in taking bonds on the morning of the 2nd September, and also for taking the clearing declaration in the evening—do you not think Mr. Manton, after having done those two acts as deputy for two other officers, should have reported his doing so to those officers? I should think he ought. I presume that after having taken the bonds in the morning he would acquaint Mr. Maddocks. It is the practice, that if one clerk his absent his duty is not to stand still, but another clerk is to do it; and, although the Board lay much stress upon these bonds, and much surprise is expressed that a junior clerk should take a bond, I ask, what is taking a bond? "Signed, sealed, and delivered, before me, John Gibbes or John Styles." There is no more difficulty or more responsibility whether a bond is taken by a junior clerk or by myself.

55. We do not think there is more responsibility in witnessing a bond, but there is great responsibility in seeing that the parties signing that bond are solvent parties? We never do call upon them to justify, and if we did Mr. Manton could as easily call upon them to justify as I could; he could say, I do not know you, and I cannot pass this bond without you shew you are competent to pay the penalty of it. But business could never go on here, in an extensive place like this, if we called upon all sureties to shew their banker's books.

56. Then of what use are these bonds at all? They are of use, because if the parties cannot pay in pocket they must in person.

57. Suppose they are men of straw, and decamp directly afterwards? I have never known such a case. Generally speaking, one of the parties is a person we can place reliance upon, and the other is not. It is the fashion among merchants here to get one of their clerks to sign.

Colonel J. G.
N. Gibbes.
8 Dec., 1858.

- Colonel J. G. N. Gibbes.
 8 Dec., 1858.
58. *By Mr. Browne:* Is it not the fact that both parties who signed the bonds in the case of the "Louisa" are absent from the Colony? Yes, so I understand; they are not forthcoming.
59. In this case the bonds must be about £9,000? They must, of course.
60. But the bonds are a nullity because the men are not within the jurisdiction of the Court, and perhaps are not in funds to pay if a judgment were obtained against them? I will admit it is a very peculiar case, and perhaps Mr. Manton ought to have been more careful than he was; but no one had any conception of what was going to be done.
61. *By the Chairman:* You consider it is not necessary to take any precaution with respect to the solvency of the parties who sign bonds? I do not say it is not, but it never has been done.
62. You have never considered it necessary to make regulations on that head? No.
63. You said just now that Mr. Manton should have reported his having acted as deputy for Mr. Maddocks in taking the bonds in the morning, and in taking the declaration in the evening? No; I do not consider he had any body to report to for taking the declaration in the evening; nor do I know that there was any necessity for it unless there were suspicious circumstances.
64. How can the responsibility of any one officer be maintained, for instance, Mr. Maddocks' responsibility for taking bonds, if you justify Mr. Manton in taking them without reporting it? I think he should have reported it to Mr. Maddocks when he came.
65. He took the declaration for Mr. Maddocks after hours, and he did not report it to him? I do not think it was necessary to report that to Mr. Maddocks. That should have been reported, if at all, to me. I will take the opportunity of stating, with regard to question 125 of my former evidence, that I wished it to be understood that the clearing clerk had a general authority from me to clear vessels after hours, or when the closing hour of business was three o'clock. That was principally to meet the requirements of large London ships. I certainly do not advocate the clearing of such ships after hours, since the hour of clearing was changed to four o'clock; and though no revocation of that general authority was made, I never intended he should clear a vessel after dark, or even after five o'clock, or away from the Custom House, and of course not under extraordinary or suspicious circumstances. I did not understand such intimation was given as is stated, that officers might attend, and in proof of it I wrote to the Minister of Finance to know if I might attend myself.
66. Are you alluding to statements made in the papers? Yes. The reporter has given it in the *Herald* that at the opening of the proceedings it was intimated by the Board that officers under suspension might attend the matter all through, if they thought proper.
67. The declaration Mr. Manton took for Mr. Maddocks in the evening, you say it was his duty to report, not to Mr. Maddocks, but rather to you? Yes; I am the party who should sign the clearance, and if there was any thing extraordinary he should have reported to me.
68. Did he report it to you? No.
69. Mr. Manton, I see, is an officer of only five and a half years' service, and receives a salary of £250 per annum—do you think a junior officer should be entrusted with so important a duty? I do not see any objection. I am the officer to take declarations, and I consider the shipmasters should come to me; but they generally make them before Mr. Maddocks, more for their own convenience than for any other reason. They make their declaration to the content outward, and then, when the whole thing is completed, it is brought to me for signature. For ships for Europe I almost invariably sign.
70. The declaration appears to me a very important document, inasmuch as it lets the ship out of the custody of the Customs—do you think that release should be given by such a junior officer as Mr. Manton? I can see no objection; he is perfectly master of his business as clearing clerk, however short the time he has been there—I think it is five years and a-half.
71. Would it not be better to entrust it to a more responsible officer—say Mr. Llewellyn or Mr. Mowle? I should have no objection; but you must take away some other duty.
72. This is a very important duty? I do not think it is.
73. Not giving the final release? If a man makes his declaration that that is true, what more can you do. Why were Custom House oaths abolished? Because it was known that nineteen out of twenty were false.
74. I am speaking of allowing a man to make a declaration before every paper of the ship was complete? I quite agree to that being wrong.
75. Should not such an important release be entrusted to an officer senior to Mr. Manton, or more responsible? I do not consider it, as I have said, necessary; but there could be no objection to the duty being given to a higher officer.
76. You think an officer in Mr. Manton's position quite sufficient for that duty? I do.
77. *By Mr. Browne:* Do you not think the facilities that have been allowed to exist for taking these declarations and passing these vessels before a junior clerk have induced persons not to come to you, because they might think you would be more particular in matters that would not be taken notice of by a junior officer? Such may be the case. I have often, I repeat, inquired why the masters were not brought to me to sign the declarations, and have desired it to be done; but there has always been some obstacle—perhaps I have been told I was not in the office at the time, or something of that sort.
78. In this case of the "Louisa," we will assume fraud is contemplated—Mr. Manton takes the bonds, passes the entry, performs the duty of jerker, performs the duty of yourself as the clearing officer in taking the declaration, taking it, not at the Custom House, but on board the vessel, and afterwards proceeding down the harbour in her—If these facilities were not placed in this young man's hand, could that vessel have had the facility of going she had? No; if more than one person were employed. I do not recollect now, but I think, so far, that he could not have done the jerker's duty; I think there was a rummage certificate.

79. No, there was not on the second occasion? I am speaking of the first. As to the second occasion I can see nothing in it. Colonel J. G. N. Gibbs.
80. They contend that the content was initialled by the jerker, and that that paper was destroyed. The document now has no initial of the jerker, and when it was brought to the jerker the day following the sailing of the vessel, it was not initialled by him? Mr. Fancourt was quite right in his conduct, and Mr. Manton quite wrong. 8 Dec., 1858.
81. *By the Chairman:* Under the system by which Mr. Manton was allowed to do the duty of these several officers, would it not be possible for him to clear out vessels without taking any bonds at all, and without its ever coming to your knowledge that he had done so? I think he might.
82. For instance, he cleared out the "Louisa" on the 2nd September, and no officer of Customs knew till the 27th whether Mr. Manton had taken any bonds at all, and even now some doubt seems to hang over the fact whether he did so or not? He must have taken them, because they were seen by two of the clerks—the chief clerk and the eighth clerk, Mr. Kelly. They saw them together on the file.
83. Ships may have been cleared out by him in this way for which no bonds exist? Yes, it may be so.
84. Does not the circumstance that that was not found out shew some want of organization in the Customs Department? Yes. These things will arise. I cannot look to the whole of the department, and such things as you allude to might take place.
85. Some check should be established by which it could be found out whether an officer takes bonds? That I admit.
86. Mr. Llewellyn and many others have stated that there are no written instructions for the guidance of the officers? No, there are not.
87. They say instructions issued one day are cancelled the next. Mr. Powell says it is very difficult to know what the instructions are, because they are issued one day and cancelled the next? Mr. Powell should have said in what way and under what circumstances I have no knowledge of it. I may issue an order, sometimes written, and, finding it works badly, I may revoke it. I could not say what these orders are.
88. However, there are no written instructions for the guidance of officers? No; the practice has been when a new clerk comes—but, in fact, we have not had many new clerks since the withdrawal of these instructions—he is put under a course of instruction, so to speak, that is to say, he is shewn his duty by another clerk.
89. *By Mr. Browne:* Do you not think that if written or printed instructions were issued for the guidance of the clerks in the Long Room, and the out-door officers, much of the time and difficulty you complain of would be saved—such rules not to be altered without urgent necessity? I do not conceive it would make any difference. The routine of the out-door department is perfectly well known without any further instructions, either written or printed. It is not for the officers, but the Custom House Agents that the difficulty arises. I mean that they have had instructions for years.
90. They say they have had no instructions, and it appears that many regulations which you consider exist they say they have never heard of. The lockers say they have no instructions? There are none necessary for the lockers; it is a most simple business.
91. The lockers have no instructions with regard to re-gauging—there is no rule as to when they ought to re-gauge—it is left to their discretion? They are certainly bound to re-gauge if the owner requires it.
92. But I am speaking of the security of the Customs. It seems to be an understood regulation among some of the officers that spirits issued after being in bond over three months should be re-gauged—others say one month—but the lockers say it is left to their discretion to carry out that regulation? That, of course, would rest with Mr. Still.
93. There is no Customs regulation with respect to that? I think not.
94. We are told by many of the landing-waiters that have been examined, some of whom were not originally appointed from home, that they have had no instructions for their guidance, excepting what they have picked up when they were tide-waiters, and that they are obliged to use their own discretion with respect to the discharge or loading of ships? That may be perfectly true, but they never need be at any loss, for they may go to the landing-surveyor, who is an officer of thirty years standing.
95. The landing-surveyor says he has all the officers under his control, and yet knows nothing whatever of the duties they perform; he does not know what they do from one day to another, and they seem to be perfectly independent of him in the performance of their duty? That is his look-out.
96. *By the Chairman:* You stated in your evidence that you heard nothing of the suspicions regarding the "Louisa" till you were informed of it from the Finance Minister—do you not think some officer of the department should have brought the suspicious circumstances under your notice? I think those who were aware of them should have done so. I did not mean that there was not a breath stirring about it; but it was from that very circumstance that there was some talk about it. I told William Stewart that although I thought it not necessary the "Louisa" should be reported, still he had better report her, and on that occasion she was reported. So little had I heard of it, that when Mr. Campbell's note came begging me to walk up there, and shewing Mr. Smith's letter —
97. In fact you could not have heard much of it, for you let the "Louisa" go away so easily —? It was all rumour. We could not have done anything.
98. Could you not have kept back the clearing papers? On my own responsibility —
99. You need not have given her facility for going out at night? No. I believe an application was made, which I sanctioned, I am told; I do not remember it. She had no cargo to land, no cargo to take in, and therefore I saw no difficulty in the case.
100. It is stated that it is very easy for vessels coming in after dark to land any amount of dutiable goods—to "run" them? So they might.

- Colonel J. G. N. Gibbes.
8 Dec., 1858.
101. Do you not think that ought to be provided against? I do not know how.
102. By putting an officer on board when ships come in? How can it be done?
103. Could they not be put on board at the Heads, or within range of the harbour? That would depend upon whether they could board or see her. I think it would be by no means a bad plan; but I do not think it would altogether answer the purpose expected.
104. Why not?
105. Could not the officer board the vessel with the pilot? Yes, if Custom House officers were kept at the Heads; but there is no place for them.
106. Have you ever pointed out the necessity of boarding vessels as soon as they come in? I think they should be boarded in the morning; but it is impossible my two tide-surveyors could board all vessels at night.
107. Have you represented the necessity of boarding vessels at all hours? I have never given such an order at night, for it would be out of the question for them to do it. I do not think I have. I originally recommended the establishment of a station at Watson's Bay of an officer and boat's crew. That establishment was formed, and remained a considerable length of time; but after a certain period there were only two men allowed for the boat; economy was the order of the day, and that, as I conceive, injudicious economy has been the cause of the failure of my department. Some time after a Water Police boat was established, and this boat had five or six men and an inspector; and I then recommended the Government to discontinue the other boat, which cost about £500 a-year. Since that the Water Police boat has been abolished, and now Watson's Bay is open to anything.
108. During the time the boat was at Watson's Bay did the officer board vessels at all hours? Certainly not; he did not do the boarding duty.
109. You never considered it important to press upon the Government the necessity of boarding vessels? If I had done so I know I should have been refused.
110. *By Mr. Browne:* At the time of the existence of the revenue cutter "Prince George" was not every vessel that came in at night boarded? I should say certainly not; she lay in Farm Cove for weeks and weeks together. I know she was very rarely at the Heads.
111. *By the Chairman:* We have had it stated in evidence that about January last Mr. Alder was employed as a tide-waiter, under Mr. Warburton as landing-waiter, to discharge some sugar from the "Fanny Fisher"; that Mr. Alder made out his books wrongly; that Mr. Warburton copied from them, and was not capable of taking charge of a sugar ship; and that Mr. Robertson came to you with respect to paying duty for sugar he had not received? I dismissed the tide-waiter; that is the only thing I recollect. Mr. Robertson was, I think, a Bank Director here, and had advanced money on the "Fanny Fisher's" cargo, but I cannot recollect what was stated at the time; all I know is that the whole of the duty was paid. I do not remember the circumstances. (*The Chairman briefly stated the circumstances.*)
112. If Mr. Robertson had not paid the duty, the sugar would have gone with Mr. Fisher into the Insolvent Court, and the Government would have lost the revenue upon the 37 tons taken away without paying the duty? I should say not, for I should say we could have laid hold of the "Fanny Fisher." The sugar must have been landed from the ship; and if landed without payment of duty we could have seized.
113. It was allowed by the officers of Customs, Alder and Warburton, and was not discovered till the matter came before Mr. Fancourt. Under those circumstances, could you have come upon the ship? Not if it was landed upon due entry.
114. Entry was passed for twenty tons, and fifty-seven tons were landed? The captain had no business to land so much, but it was the duty of the officer to say "stop"; but Alder was a worthless fellow. All these things are laid at my door. But as regards the appointment of Mr. Alder, he was sent to me by Sir Charles Fitz Roy to be appointed. He had been a clerk at Government House, and the Governor General sent him to me.
115. Ordering you to appoint him? Asking me to do so. The tide-waiters' appointments are supposed to belong to the Collector; and Mr. George Fitz Roy wrote on his father's account, giving this man a most excellent character. He was taken as a clerk into the Long Room; and then he either misconducted himself or got into difficulties, and after that was made a tide-waiter.
116. It has been stated to us by a great many that half of these acting tide-waiters are drunken fellows, and cannot add up a dozen figures? I do not think that. That there are some such I have every reason to believe; but I think it is a libel upon them to say that anything like one-half are men of that description. There might be out of the twenty-five perhaps five of that class.
117. The evidence upon this point is strong. Both Mr. Powell, and Mr. Williams, the late American Consul, say they are disreputable and drunken characters? If so, why are they not reported to me? Mr. Williams did report one, and he was tried and dismissed. There was a man the other day—one of Mr. Robert Campbell's appointments—dismissed by me; but they are all *my* tide-waiters.
118. It having been represented to us that nearly half are drunken or disorderly fellows, who cannot add up a dozen figures, how do you justify their retention in the service? I cannot justify it, but by referring to how I am pestered if I turn them out. There is one man whom I believe to be as honest and sober as any man in the country, but he is a stupid, thick-headed fellow. He committed a blunder, and I dismissed him; but a gentleman in the Government pleaded so strongly on his behalf, that as it was only a blunder he had committed I reinstated him; but at the same time I gave orders that he should not be put upon any responsible duty. Drunkenness, if not reported to me—and people will not report—I cannot deal with. I have heard of cases over and over again; people come to me and say—"Did you hear so and so?" and when I ask—"Did you see it?" they are sure to say "No." "Will the parties who saw it come forward?" "No." Then I say, "What is the use of your making such observations to me?" This has been the case for years past,

and

and I never have seen these people in the state described. I do not often leave my office; they are all out of doors, and I never do see them. Colonel J. G. N. Gibbes.

119. In transferring spirits from one bond to another, it is shewn there is no check upon a transfer; for instance, although the export officer should follow the cart he does not? Then he should be dismissed. 8 Dec., 1858.

120. There is no check upon him? There surely ought to be, for the officer who delivers the goods must see that the cart follower is there; and when they are delivered, the officer who receives them must also see whether he is with the cart or not.

121. Mr. Newton, the export officer, has told us that he hardly ever follows the carts? The deuce he has! what is he there for?

122. Yet he never has been reported, has he? No.

123. It has also been stated that drays in going from one bond to another may spend any time on the road without being called to account, until very lately? There again that would depend upon the officer attending the cart; if there were no cart follower they might do what they pleased.

124. It has also been shewn that if an export officer in transferring dutiable goods from one store to another chooses to tear up the transfer warrant, and to take up the goods into the town for consumption, the loss of the goods will not be found out till stock is taken at the end of three years, and that the officer who is party to the fraud cannot be found out at all? I do not understand you.

125. The export officer is intrusted with a transfer warrant to transfer spirits from store to store? Yes.

126. It is open to him to take these goods into town, to give them to any body, and to tear up the transfer warrant, without being detected: At the end of three years the stock will be found to be deficient, but there will be no means of bringing home the crime to the person who committed it? I should think it would not be likely to remain undiscovered any length of time. If a merchant, Mr. A., takes out a removal order from Lamb's to Macnamara's, or any other bond, he having purchased those goods, would naturally look after them to see that they were removed.

127. Suppose I am a fraudulent merchant, and bribe the export officer to take my goods home to my own stores, there is no trace in the Customs' books of the officer who committed the fraud? I should think it could be traced.

128. Mr. Nash, the warehouse-keeper, states that it is impossible to trace it, because it is not entered in the books? Then it ought to be. As a matter of course, when an officer is wanted application is made to the warehouse-keeper, Mr. Nash, and he gives the order immediately for an officer, or rather sends to the tide-surveyor to appoint an officer, and he should book who that officer is.

129. *By Mr. Browne*: He does not record in any book in his office that he has issued a warrant for the transfer of dutiable goods from one store to another; until he gets that warrant back he makes no entry in any book? I see they stand in the old entry, and are not written off.

130. If the goods get into consumption there is no record, nor would the deficiency be discovered till the stock was taken? That might easily be obviated. All I can say in regard to it is, that I doubt whether such a thing has occurred, unless it be in the case under consideration. Some check should certainly be put upon that; and I must say I wonder that Mr. Nash, who is really an excellent and attentive officer, should not have had such a check, even for his own safety.

131. It appears that the extra tide-waiters are often employed to transfer these goods? We have no other means.

132. All this responsibility of transferring goods is entrusted to the tide-waiters? I imagine the tide-surveyors would guard against sending improper persons; but I would ask who were the landing-waiters, from Mr. Kidd downwards, but extra tide-waiters? The lockers, who or what were they? Who was Mr. Collier but a tide-waiter? What were three out of four of the established tide-waiters, but extra tide-waiters? If a tide-surveyor puts on a man of disreputable character to do this duty he does wrong; but at the same time, if one of these men is sent to relieve a tide-waiter, who is engaged on board ship, not much is gained, as he would have to perform the duty of the established tide-waiter on board the ship.

133. It is stated that there is no check upon the gauging of a landing-waiter: For instance, a landing-waiter may undergauge a cask, that would be re-gauged after it had been in bond a month, and the revenue would be defrauded to the amount of the first mistake? There is no check upon that either in England or anywhere else, that I am aware. I think most of our landing-waiters are very good, but they had very bad instruments some years ago, and when the new system of warehouses occurred we had the good luck to get new instruments for all the lockers.

134. Does not the fact of there being no check throw a great temptation in the way of landing-waiters to undergauge? I do not take that view of it myself; I do not think my landing-waiters would do it. There might be a check by having the goods gauged by the lockers directly they go into bond.

135. That is not required at present? It is not, but it could be.

136. We are told that the landing-waiters consider they are insulted by the lockers if a cask is re-gauged? The idea is a silly one. I should be very willing to give an order that it should be always done; it would prevent the disputes that arise afterwards when the casks are going out and they are re-gauged. When there is a difference between the re-gauge and the original gauge the locker says it is the landing-waiter who has made the error, but I think the landing-waiters are as good guagers as any of the lockers, taking them as a body.

137. Do you not think a check of that sort should be established? I should be very glad to see it, but I do not think it necessary, in an economical point of view, for I think the labor entailed would be greater than the advantage gained by it, for, in my opinion any error in the

Colonel J. G. the inward gauge is very trifling indeed, and very infrequent. I have no hesitation in saying, if it can be done, it were better to be done; but I think you will find the lockers could not do it.

N. Gibbes.

8 Dec., 1858.

138. Do you think it would be desirable to put on sufficient lockers to do it? Yes, I think it would.

139. So as to be able to do it on every occasion? Yes.

140. You think it would protect the revenue? Yes. I do not know that there is any loss that way, but I think it might be desirable to have additional strength to do that.

141. It appears that the warehouse-keeper or his clerk, Mr. Rogers, issues the export warrant to the export officer, and leaves the export officer to inform the tide-surveyor, so that he may put a tide-waiter on board to see the goods shipped. It appears to be rather an insufficient check to allow the export officer to be the officer to report to the tide-surveyor that dutiable goods are going to be shipped when he is the officer to be checked? The tide-surveyor's and Mr. Rogers' offices are close together, and therefore it would be a very simple thing for the latter to give notice to the former officer.

142. Do you not think Mr. Nash should do it? Yes, I think so.

143. In such a case as this of the "Louisa," where there were warrants for goods said to be shipped upon which the duty would amount to some £3,000 or £4,000, do you not think this should have been done? Yes; and I think the hasty manner in which the business was conducted was another reason why it should have been done.

144. The warehouse-keeper also tells us that if he wished to check the stock of any locker he has no ledger of his own to shew what he has in hand; that he would have to pick out what he had in any particular store, and that it would, probably, take him a month to ascertain it—do you think that a proper arrangement? No, I do not; but I think there is no use in the office of Inspector of Warehouses if that officer cannot give an account.

145. He can look at the particular locker's book, but he has nothing by which to check that book—do you not think there ought to be a single ledger kept, to shew what each locker ought to have? Yes.

146. *By Mr. Browne:* Should not the warehouse-keeper be able to tell what should be the contents of every store, in order that an officer might be sent at any time to examine the store? I think it desirable; but our forms are the same as at home, and they have nothing of the sort there.

147. *By the Chairman:* If a suspicion were entertained of a particular bond, it would be of no use to say lock up that bond and see what you have there, for you could not ascertain what the locker was chargeable with? There are documents which he must enter in a book; nothing can go in or out without a document to shew the transaction. Great stress is laid upon the existing lockers' books, which were originally introduced by Mr. Weekes: to these you can go at any time at the end of a week, and see exactly all goods entered inwards for the warehouse, and those entered outwards, you can then deduct the one from the other and at once see the balance.

148. If the locker does not keep the check himself, what check have you? The papers; the orders go into the warehouse-keeper, and although the locker may not keep the documents, as there are duplicates, Mr. Nash keeps them.

149. Mr. Nash has told us that he could not tell what any one locker had under a month; he could tell the gross quantity in bond, but not the quantity in any one particular bond? All the books are kept here that are kept elsewhere.

150. Do you think these books are sufficient? According to your statement now it appears they are not: I shall speak to Mr. Nash upon the subject. I have consulted many mercantile men in Sydney with reference to the introduction of a system of double entry into the Customs, but they have said it is impracticable.

151. You think some check is necessary, and that you should be able at any moment to know what any one locker has? Yes, I think it very necessary; I will inquire and see whether anything can be introduced. I believe that the warehouse-keeper could, with a little application, tell you at once what ought to be in any store.

152. It appears that the clerk to the warehouse-keeper, who is described by Mr. Nash as very inefficient, has the entire duty of issuing all the export warrants—do you consider that Mr. Nash properly discharges his trust when he lets Mr. Rogers perform this important duty? It does so happen that Mr. Rogers is an inefficient man, and that gives Mr. Nash double work; but he never reported him as incompetent.

153. Do you consider Mr. Rogers as incompetent? I do not consider him a competent man. He was sent to me temporarily by Sir Charles Fitz Roy till a vacancy was opened in the Shipping Master's Office; but when the new office came before the Council they would not vote the salary; therefore, unfortunately, he remained with me. He was sent to me for three months, and has remained. He has a wife and nine or ten children. His conduct has never been brought before me; but he certainly is not a useful man. What can I do with him?

154. Mr. Crook gives Mr. Newton a very bad character—what is your opinion of him? I have no means of knowing the private characters of the people under me, but, from all I hear, his character is very bad; although I was informed yesterday it was not altogether the man's own fault, but his wife's. I am told that he gives way to drinking at night, though I fancy no one has seen him intoxicated by day. A dreadful instance of the effects of this habit occurred some time since, when he knocked out the eye of one of his children, a fine girl of fourteen.

155. Have you ever heard of Mr. Bremer being drunk? I have heard people say that he was a man who drank; but nobody came to me and said they had seen him drunk.

156. You never heard it reported—it was never reported to you that he had been drunk on board ship? That is what I complain of; nobody will come forward to prove a statement of the kind. I will take the opportunity of mentioning, because I think it is only right to do so, that I have seen Mr. Bremer in my room in such a state of excitement that I have hesitated,

hesitated, and argued the point with myself whether the man was right or not; and by remaining a short time, until he had cooled down a little, I was convinced he was sober. He is of so excitable a temper that at such times nine out of ten men would charge him with drunkenness. Still, I will not say that he does not get drunk on board. I am, however, sorry to say that captains will not come forward in such cases. One man some time since was charged with being drunk on board, and I ordered him to be dismissed, when the captain of the vessel on board which he had been employed came forward and said the man was in a fit. I could not discharge a man for being in a fit, although it might unfit him to perform his duty.

Colonel J. G.
N. Gibbs.
8 Dec., 1858.

157. Are clearances ever issued to ships with erasures of that character upon them—(*handing the clearance of the "Louisa."*) You will see that a large amount of dutiable goods entered as cleared out have been scratched out: that document was sent to us by Capt. Smith, with a letter, stating that this was the clearance of the "Louisa" which had been returned by the authorities at New Caledonia. I wish to know whether it is possible these erasures were made here? No; the entries upon an inward manifest are scratched off, and that might have been done so at New Caledonia, only that some parts are not erased. If that were done subsequently to the document being drawn out, and left the Customs in that state, nothing could be so irregular.

158. We have received a letter stating that the clearance was delivered at New Caledonia in that state—what would you infer from that? I do not know what to infer. Is that from any official authority?

159. It has not been communicated directly to us, but through Mr. Smith; they sent that clearance to him, and said it arrived in that state. Would you infer that these goods had been duly shipped, and had been got rid of before the vessel reached New Caledonia? I do not know what to infer from such a document as this.

160. That is executed by Mr. Manton, is it not? Yes.

161. It bears his signature and the Customs seal? Yes.

162. He would not be authorised to issue that clearance with this erasure? Nothing could be more irregular than that, for if it were shewn that the goods were marked off as being short shipped, and were initialled by the party, you would know what it meant; but I do not know what to make of this. If this is the work of an official authority at New Caledonia, I should take it that the goods marked off were landed, and these 200 cases of Geneva, and 50 cases of claret were unaccounted for. All I can say is, that this is a most disgraceful document.

163. *By Mr. Browne:* In your copy of the regulations, the 19th article, it is stated—"You are not to pay the salary of any landing-waiter until the controller shall have certified, at the foot of the Collector's account of salaries and incidents, that the 'blue books' for all ships discharged by such landing-waiter in the quarter for which his salary is due have been delivered in, and that no post entries are outstanding, nor are you to pay the salaries of any other persons employed at your port until the several books kept by them have been duly posted up to the end of the quarter." I believe the landing-surveyor now does the duty of controller to a certain extent? Yes.

164. Are you furnished by him with a certificate to that effect before you pay? No; I never have required him to give it. I may have been to blame, but the practice is not adopted at home. I was for six years collector in England, and I never had such a certificate before me, although I had both a controller and landing-waiter.

165. Have you brought under the notice of the local authorities, since the withdrawal of the instructions by the English Board, the necessity of having fresh regulations? No.

166. Do you not think, in a large and important department like yours, printed regulations for each branch would be beneficial? I think it would, but it is only now and then that some unfortunate occurrence, like the present, brings these matters into notice. During the twenty-five years I have been here very few casualties have occurred.

167. Mr. Manton, in his last examination stated that, when he cleared the "Louisa" on board, at the Grafton Wharf, he gave the content and export warrant back again to Mr. Stewart, and that Mr. Stewart gave them back to Mr. Newton on the morning of the 3rd, so that he might write up the locker's book in Mr. Nash's Office, that afterwards he returned them to Mr. Manton, who gave them to Mr. Mowle,—would that be a regular course for the clearing officer to adopt? No. Mr. Stewart has nothing to do with the papers.

168. What object could Mr. Stewart have in giving them to Mr. Newton? I do not know.

169. Mr. Manton had no right to give them to any one but to Mr. Mowle? No; they had no business to leave the office that I see.

170. Mr. Newton informed us that, on the morning of the 3rd, he wrote up in the locker's book, in Mr. Nash's office, the time at which he put these different articles on board, and returned the warrants to Mr. Nash. Some of these entries appear to have been made as early as twelve o'clock on the previous day, although it is quite clear that Newton was not in possession of the warrants to enter up the book till the morning of the 3rd—did he perform his duty properly in writing in the book what was clearly untrue? Most assuredly not.

171. Should not Mr. Rogers or Mr. Nash, to a certain extent, see that the entries in that book are correct—it is intended as a check upon them, is it not? Yes, certainly.

172. Do you know whether any authority has passed the Custom House for the sale of this vessel, the "Louisa"? I do not know, but I can inform you on my return to the office. Mr. Rucker, who has charge of that department, and whose time is fully engaged, would have reported it to me; he is an efficient, active officer, and has plenty to do in connection with the sale and transfer of vessels.

William Cathcart Still, Esq., again called in and examined :—

The witness produced particulars of examination of cases of Geneva.— *Vide Appendix.*

- Mr. W. C. Still. 1. *By the Chairman* : Have you any knowledge of Mr. Newton having been suspended from his duty as export officer? He was suspended in the month of August last, in consequence of a charge brought by me against him of falsehood and attempt to intimidate one of the lockers under me. The matter was reported to the Collector of Customs, and I have here a copy of my report, which will make the Board acquainted with the circumstances. (*The witness handed in the same.*) My report was referred to Mr. Garling, to report upon it; he did so, and the following is the concluding portion of the Collector's decision in the matter, addressed to me :—“ I consider the conduct of Mr. Newton extremely irregular. He had no right whatever to ask for, or procure samples at the request of the exporter. If the person exporting wished to have them, he should have obtained a sampling order. Mr. Newton's explanation, too, in regard to the three samples from fifty casks at Pollard's, is completely swept away by Mr. Hunt's shewing that there never were fifty casks of wine in that bond at one time. Under all these circumstances I consider that it is desirable that Mr. Newton should be suspended, and the matter reported to the Government, and he is suspended accordingly.” He was suspended for five days, and I never heard that he was reported to the Government. Two days after this suspension expired he was put in charge of this important delivery of goods. On the 27th he commenced this business. It created some surprise in the department that he should have been put to his duty again without any further inquiry.
2. *By Mr. Browne* : He commenced performing his duty in connection with the “ *Louisa* ” on the 27th? Yes.
3. *By the Chairman* : What do you know of what led to his restoration? I think some influence must have been used.
4. What kind of influence, and by whom exerted? I have seen him constantly at the Chilian Bond, and on one occasion I ordered him away. I reminded him that it was one of my instructions to allow of no lounging about the bonded stores, especially on the part of the tide-waiters.
5. Do you know of any influence having being exerted? I do not.
6. But you consider that some influence must have been used? Yes.
7. *By Mr. Browne* : Mr. Hunt, in his examination this morning, has told us that case gin is usually received into the stores without being marked, and that frequently the bond-mark is not put on until it goes out either for exportation or payment of duty? The bond-mark is ordered to be put on cases as speedily as possible, and it should be so, but sometimes, if we have a very large batch, and are busy at the bond, we have to stow them at once, and then, when we get the bond-mark, we mark the front rows, and cannot get to those at the back, but when they go out it is usual to chalk the marks on the cases.
8. Mr. Hunt states that not unfrequently they are marked with paint as they are going out, and that a little sawdust is then thrown upon the fresh paint? That may be done, because the marks would be liable to be obliterated when the paint is fresh. When an order comes we have to deliver the goods at once, and if they are in a back row they may not have been marked.
9. He also states that the landing waiter when sending up a cart note with gin, takes a sample of it, and when the locker has examined and weighed the cases, he sends a memorandum of the strength and quantity by one of the men in the store to the landing-waiter, to enter the whole batch in his red book? The measurement of these cases is taken in two ways, sometimes by the landing-waiter on the wharf, but it often happens that the case is taken to the store in the neighbourhood of the wharf, and is then examined by the locker; the rest then go through the scale; those that are right are put on one side, and by that means it is found what are full cases and what light; the landing waiter takes that account from the locker, and that finishes the operation. The book is then signed by the locker.

THURSDAY

INTO CHARGES AGAINST CERTAIN OFFICERS OF THE CUSTOMS DEPARTMENT.

THURSDAY, 9 DECEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

H. H. BROWNE, Esq.

J. McLERIE, Esq.

Mr. Thomas King Cranmer called in and examined:—

- Mr. T. K. Cranmer.
9 Dec., 1858.
1. *By Mr McLerie*: You are a mariner? Yes.
 2. You were engaged at one time as first mate of the brig "Louisa"? Yes.
 3. On what day were you engaged, and by whom? On the 28th August, by Captain Riddel.
 4. Was he at that time in command of the "Louisa"? He was; he took command on the evening of the 27th, and I joined him on the morning of the 28th August.
 5. How long did you remain on board? Until the 2nd September. On the evening of the 1st I received my notice to quit the vessel, and on the 2nd of September I was settled with to the 1st inclusive.
 6. Were any reasons given for discharging you? No more than that Captain King had engaged another person, not knowing of my being there. He had engaged a mate of his own. He said he was sorry, and that had he known previously of my being there he would have retained me.
 7. Who gave you notice to quit? Mr. Stewart, I believe.
 8. Were you paid wages for the five days you were on board? Yes, by Mr. Stewart.
 9. Which Mr. Stewart do you mean? I do not know; he is a tall gentleman, with black whiskers. I know both of them, but not by name.
 10. It was one of the two brothers Stewart, of Circular Quay? Yes; that is where I was settled with.
 11. What duties did you perform on board the "Louisa" during the five days you were acting as first officer? I received cargo on the 28th.
 12. Cargo of what description? Spirits; at least it was supposed to be rum. I received five hogsheads on the 28th—on Saturday.
 13. Did you sign for five hogsheads? No; I asked for the receipts usually signed by the mate, and the Custom House officer said it was not necessary to sign them. Mr. Stewart was on the quay at the time.
 14. Would you know the marks upon the casks? No; I could not say in the hurry. Mr. Stewart came down as they were got off the drays; he asked where was the captain—why was he not on board. I said they had only just arrived, and I was getting them on board as fast as I could myself, with the help of a man named Brown, the black cook, who was the only other person on board. That was between twelve and one on Saturday.
 15. Do you know the name of the Custom House officer who shipped them? No; I know the man by sight; he is a tall man, and had a stick.
 16. What state was he in? He appeared to me, from the manner he went on, and what he said to me, to be half drunk. He came jawing to me, and we had one or two words on the quay. I asked him what he had to do with us; he interfered with me in my duty.
 17. Do you think if the brands of the hogsheads were mentioned now you would recollect them? I do not think I should. I think it was R or M.
 18. Was any paper shewn you? No. I saw a paper in the Custom House officer's hands.
 19. Would you know the paper if you saw it again? No; it was folded up and he held it in his hand.
 20. What cargo was next taken in? On Monday I received nine dray loads of empty beer hogsheads—ten hogsheads on each dray. There were ninety I am certain, and I think there were more. I think I received some on Saturday afternoon after the rum. They were shipped as empty casks, and the receipts for them I delivered to Captain King on the Tuesday.
 21. Did you stow them away yourself? I stowed them all myself, every thing in the hold.
 22. How were they stowed with respect to the rum you had shipped on the previous day? The rum I stowed as far as I could possibly get it aft. There was a bulk-head aft where a cabin for second passengers had been fitted up for five or six to sleep in, and the rum was stowed against that bulk-head. I levelled part of the ballast to make a level floor for it. Being Saturday, Captain Riddel told me to stow them as close as I could, and to cover them up. I covered them with these empty puncheons, I think, on Saturday afternoon.
 23. What other cargo did you take on board? Nothing, except some coal—some ship's stores at that time.
 24. After stowing these empty hogsheads, what room was there in the vessel for further cargo? There was no more room than just merely under the main-hatch—just in the way of the main-hatch. The casks for the water I stowed under the fore-hatch; they were all ready for being filled. There could be no passage fore-and-aft. They were stowed in two tiers; there were from fifteen to twenty tons of shingle, blue-stone ballast, and a quantity of old sails and other old lumber.
 25. This was on the 28th you shipped these goods? Yes; the 29th was Sunday. On Monday I shipped the empty casks, and on Tuesday Captain King took charge; on Wednesday I spoke to him on board.
 26. Did he give you notice to leave on Tuesday? I think on the night previous the two Messrs. Stewarts and Mr. Gibbes came down.
 27. Anybody else? There was another party; there were four altogether, and Captain King was formally installed in charge of the vessel. They dismissed Captain Riddel, and, at the same time, informed me they were very sorry my services were not required.
 28. You say *they*, whom do you mean? Mr. Stewart.
 29. Who were the parties present? The two Messrs. Stewart, Captain King, Mr. Gibbes, and

and some other party; I have seen the party before, and would know him if I saw him again, but his name I never heard.

30. What kind of person was he? Apparently he was a foreigner.

31. Was he dark or light complexioned? Light.

32. Was there anything peculiar about his features—had he a moustache? Yes.

33. At what time did you get notice to leave? That evening; they told me my services would not be required. That was the second time I saw Captain King; he came round in the morning and took a survey of the ship; I went aft to see who he was; he asked me whether I was mate of the vessel; I said I was; he then asked me if the captain was on board, and I said he was not. In the evening he came to take possession. I said, as he would have to take charge I would have to give up my receipts of the cargo; he replied, yes, I had better do so, and told me to come down the next morning.

34. What was the last time you were on board? Between ten and eleven on the 2nd; she was then about to haul away from the Grafton Wharf.

35. At that time was she ready for sailing? Yes; she was making preparations to haul off. There was no cargo, and no appearance of cargo, alongside of her.

36. Did you see any change in the stowage of the vessel? No; the hatches were apparently as I had left them.

37. Was there any tobacco shipped at all? There was no tobacco shipped by me; not any to my knowledge. In the cabin there were two 4-dozen cases of beer or porter; but the captain said they were not cargo—they were merely sent for ship's use. I got an inventory from Captain Riddel at the time I was there of all the articles on board; and I examined the vessel through with the inventory, and found all correct. This inventory I delivered to Captain King.

38. *By Mr. Browne:* Who did you leave on board as the ship's company when you left? I saw none, with the exception of Brown, the black cook, who had been with me all the time. He assisted me in stowing the cargo; and his was all the assistance I had, with the exception of two or three day laborers, who on Monday assisted in stowing the cargo.

39. From your knowledge of the stowage of a ship, do you think it would have been possible, from the time you left the ship until she sailed, to have discharged the empty casks from her, and to have taken in 296 packages of goods, consisting of puncheons, hogsheads, and cases? It was almost physically impossible, if they had worked night and day; even if they had worked on the 3rd and 4th it would have taken all night to have discharged the cargo of ballast, and she was in good sailing trim when I saw her—not to say deep, but in light trim.

40. You saw no drays come down with packages of goods to the wharf before you left? None; no appearance of any.

41. *By the Chairman:* You are quite sure there was no tobacco shipped? I never received any; I never saw any.

42. If four half-tierces of tobacco had been shipped would you have seen them? I must have seen them, for I was in every part of the ship.

43. Did you see any officer of the Customs at any part of the time you were shipping these goods? On the 28th an officer of the Customs brought down five hogsheads of rum.

44. Was there any landing-waiter on the wharf? Not that I saw.

45. What sort of man was the export officer? A tall man, with a stick.

46. What colored hair and whiskers? I really could not say. I would know the man in a moment if I saw him.

47. Have you been in the Colony since your discharge? I have been to Rockhampton.

48. When did you go to Rockhampton? Perhaps a fortnight or three weeks after.

49. You came back a few days ago? I have been back three weeks.

50. Did you hear any reason given for Captain King being put in the place of Captain Riddel? No, I did not hear any definite reason when he joined. On the evening of the 28th the two Mr. Stewarts came on board and inquired for Captain Riddel he was not on board, and they asked who I was. I told them I had been shipped as mate along with Captain Riddel. They waited for some time, and at last left an order that he was to come to the office on Monday morning before nine o'clock, as they wanted to see him particularly. I reported the same to the captain; but it appeared that he did not go to the office, and on Wednesday evening the Stewarts were down with Captain King to unship him.

51. Where is Captain Riddel now? I believe I saw him a week or ten days ago in Sydney. He was formerly in the schooner "Gazelle"; he had been down in the "Gazelle" to New Zealand.

52. What mate was shipped instead of you? The party represented to me as mate was a Kanaka, a black man. When I went down to see Captain King on Thursday morning I asked him where was his mate. He said, turning round to the black man, "This is the party I have engaged." There was no white man on board, with the exception of Captain King. There was a little boy, who had come down a few days before to engage as cabin boy, but Captain King said he did not require one.

53. Did you see the "Louisa" again after eleven o'clock on the 2nd? No.

54. When you saw her she was ready to haul off? Yes; I bent the sails myself.

55. Were the hatches fastened down? No. It is not usual with ships going down in ballast trim.

56. *By Mr. Browne:* There was no Custom House officer placed on board the ship? Not any. I remember Mr. William Stewart brought a man on Saturday evening to take charge of the ship as watchman. I saw a strange man walking about when I came out of the cabin, and I asked him what he was; he said he was going to be watchman.

57. *By the Chairman:* Have you anything further to state to the Board? When Mr. James Stewart was waiting to see Captain Riddel he told me that he had had a long ride to Brisbane Water, to see Captain King; he said he felt very tired, as he had not had any rest.

Mr. T. K. Granmer. 58. *By Mr. Browne*: He did not say where they were going, or what they were going to do? Captain Riddel I think did not know himself. He was shipped as it were all in a hurry. He was mate in the barque "Monarch," along with Captain Morrison, and when she arrived in port, as soon as she dropped her anchor the Stewarts went down and brought him up to take charge of the "Louisa." On the evening of the 27th, Captain Riddel, who had known me previously, sent for me, and on the following morning I went on board, took charge of her, and remained until I was dismissed.

9 Dec., 1858.

FRIDAY, 17 DECEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

H. H. BROWNE, Esq.,

J. M'LERIE, Esq.

Mr. W. C. Still. William Cathcart Still having been called in before the Board, hands to the Chairman three letters, written by himself, each the distinct report of a separate seizure of dutiable goods included in the ostensible cargo of the brig "Louisa," when she cleared from the Port of Sydney for the South Sea Islands, on the 2nd of September last. The Board determine to forward these reports to the Government.

17 Dec., 1858.

R. Mint, Sydney,
17 December, 1858.

Thomas Waldeck Smith, called in and examined, states:—

T. W. Smith. I am a licensed victualler, and, following that calling, reside at the Burnbank Hotel, in Balmain. I had a transaction with Mr. Stewart, respecting the sale to him of some land, for which the price I asked was three hundred pounds. Mr. Stewart came to my house at Balmain about it. The Mr. Stewart that I mean is Mr. William Stewart of Macquarie-place, as appears by this card, which he left with me, having on it that name and address. He asked me if I would dispose of the land I had to sell for less than three hundred pounds. I told him that I could not let it go for less. He inquired of me whether it would make any difference to me if I should only get paid for the land partly by stores and partly by cash, saying that, as I was in the public line of business, perhaps it would make no difference to me to take spirits, &c., from his store; and that he would supply me on reasonable terms. He said, I will give you a list of my prices; and he wrote the memorandum of prices I now shew the Board on the back of the card on which is his address. The writing in pencil is what he then wrote:—"28 O.P. Rum, 13s. 6d.; U.V. Brandy, 25s.; Geneva, 50s." This was about the price of the spirits at that time. The price of the brandy I thought rather high, and he altered it. The price also he asked for the gin was rather above the ordinary rate. I told Mr. Stewart that I should require that a portion of the payment for the land should be made to me in cash, in order to satisfy the claim of Messrs. Stenhouse and Hardy thereon; their claim being one hundred and nine pounds, or thereabouts. I arranged to sell the land to Mr. Stewart, and did so sell it. The conveyance of it was made out to his mother, Mrs. Stewart, at his (Mr. Stewart's) desire, he stating that he wished to build his mother a homestead. The conveyance was completed at the office of Messrs. Stenhouse and Hardy. All that Mr. Stewart paid over to me for the land in cash was one hundred and nine pounds. He has not completed the order I gave him on this account, and I am still not settled with by him for the land referred to. In consequence of the above bargain with Mr. Stewart, I ordered from him, at the Chilian Store, the following goods:—ten cases of Geneva, one hogshead of rum, one quarter cask of brandy, four cases of sherry, five cases of pale brandy, three hogsheads of porter, one quarter cask of port wine, and, I think, but am not sure, two casks of ale. The ten cases of gin were delivered to me on the 14th of September, and the one hogshead of rum on the 13th of October. Some of these goods have been seized by Mr. Still, but the rum and brandy had been both previously consumed, having been disposed of by me by retail in the ordinary course of my business. The gin was not used, except one case only. These cases of gin and the cask which had contained the brandy were yesterday seized on my premises by Mr. Still. The arrangement for the sale of the land above mentioned—as to the mode of payment—was made in September last. I cannot fix upon any exact date. Mr. Stewart came to my place backwards and forwards about the matter several times. The thing was finally arranged, and the conveyance made out for him and executed on the 13th of October last. The first conversation Mr. Stewart had with me about the purchase of this land occurred after the 2nd September last. I have not, and have not had, any written contract with Mr. Stewart as regards the arrangement agreed upon between us, by which I was to receive a portion only of the payment for the land in cash; but Mr. Stenhouse can prove that what I have stated was the understanding between Mr. Stewart and myself at the time of making this arrangement—that I was to take in payment for the land a certain sum in money and the rest in stores. Mr. Stenhouse asked me if I was satisfied as to that arrangement, in the presence of Mr. Stewart; and Mr. Stewart told me that he would send me the goods I required to complete the arrangement on the following day. The position that I am now in is this, that I have conveyed away my land, and have not received on its account all that for which I have parted with it. I went to the Chilian Stores and saw Mr. William Gibbes there, and it was to him I spoke about the goods ordered by me, in consequence of my transaction with Mr. Stewart as regards the sale of my land. I spoke to him, as he seemed to be the gentleman who

who was in charge. I said I would not give him an order until I first saw the invoice of the goods I had already received, and knew how my account stood. I saw Mr. Gibbes a week after that at my residence, and he then told me that he had looked over the account as to what had been supplied to me, and he thought that there was a balance still in my favor of about sixty pounds. I told him to send me some more rum to settle the account, and he promised to do so. He said, "What sort of rum was it that you had." I told him that it had been very good. He asked me whether he could see the cask, and whether I would let him look at the brand so that he might send me more of the same. The cask he alluded to was then standing empty in my store, and I turned it up accordingly and shewed him the head of it. He said, "I know the brand; that's good rum; I'll send you some more of it." I went to his store—the Chilian Store—after that again, and he wanted me to give further orders, saying, "We shall not press you for the cash, if you give us an order; you had better take samples of what is in the store and choose for yourself." But this I did not do. This last conversation took place within the last fortnight. I have also, subsequently to this conversation, and within the last fortnight, seen Mr. W. Gibbes at Pochlman's Hotel, and I there reminded him that he had not sent me what I wanted, meaning the hogshead of rum I had ordered of him. He replied, "You had better come down and see me when I am at the store, I cannot attend to business here." When I went about what I was to receive from Mr. Stewart on the first occasion, it was Mr. Gibbes who answered me, and I always considered him to be concerned in the business of the Chilian Store, and that when Mr. Stewart was not in, if I saw Mr. Gibbes it was all the same. In Mr. Stewart's absence I did not doubt but that Mr. Gibbes was his representative, and acting for him. I had every reason to consider that he was his partner, and did so consider him, especially as he knew the nature of the arrangement between me and Mr. Stewart consequent upon the sale by me to him of the land. The hogshead of rum which I last ordered would have nearly settled the outstanding account between me and Mr. Stewart. Mr. Gibbes, at the store, when I went there, told me I could sample what was in the store, and could have what I liked, on as much credit as I required. I declined to take advantage of that offer until I should have a proper account with particulars furnished me as to what had been already sent to me. The brandy cask and the cases are, as respects their marks and brands, in precisely the same state as when they came to me, and have not been altered by me in any way. I drew off the one case of gin. The empty case was taken away by Mr. Still, along with the brandy cask and the other cases.

T. W. Smith.
17 Dec., 1858.

THOS. W. SMITH.

Signed before the Board, on 20th December, 1858.

E. W. WARD.

MONDAY, 20 DECEMBER, 1858.

Present:—

CAPTAIN WARD, R.E., IN THE CHAIR.

H. H. BROWNE, Esq.

J. M'LERIE, Esq.

Richard Prosser called in and examined:—

1. *By the Chairman:* You were shipped on board the "Martha," of Sydney, a Colonial ketch? Yes.
2. In what capacity? Cook and seaman.
3. And you signed articles on what date? I think last June or July.
4. When was the last time you sailed in the "Martha"? It must be five or six weeks ago since we left Sydney.
5. Can you recollect the date at all? No.
6. Who commanded her then? Henry Camroux.
7. Do you recollect the day of the week you left? Yes, on Saturday.
8. Was it as far back as six weeks? It must be very near hand six weeks.
9. Where did you sail for? We sailed then, as we supposed, for the Manning River.
10. Cleared out for the Manning River? Yes.
11. What did you take on board? General cargo, besides spirits and provisions for passengers.
12. What passengers had you on board? When we first left the wharf we had a lady named Stewart, and family, and also a little boy named George Macdonald.
13. Did he ship with the Stewarts? No; he came on board to look after the children, as servant to Mrs. Stewart.
14. Was there a Mr. Stewart on board also? Not when we left the wharf, till we came below Bradley's Head, when Mr. Stewart came in a waterman's boat.
15. Did he seem to be the husband of the lady? Yes.
16. Do you know him by sight? Yes.
17. What kind of looking man is he? A stout set man, rather tall, full face.
18. Has he whiskers? Yes, I think so.
19. Did any other passengers come on board? No.
20. Did you ever see Mr. Stewart on business here? No.
21. Do you know where his place of business was? I have heard it was in Macquarie-place; I saw boxes on board marked "William Stewart, bonded store warehouse, Macquarie-place."
22. And you knew him personally? Yes.
23. What amount of spirits had you on board? Very near a dozen cases of different sorts.
24. How much in each case? I dare say they might hold two dozen bottles.
25. *By Mr. Browne:* No bulk spirits? No, only cases.

R. Prosser.
20 Dec., 1858.

- R. Prosser. 26. *By the Chairman*: You say when you left Sydney you cleared out for the Manning River? Yes.
- 20 Dec., 1858. 27. Did you go to the Manning River? We did afterwards.
28. What did you do first when you got outside the heads? When we got out the captain asked Mr. Stewart where he should steer for, and he said to the eastward. We were caught in a heavy snow-storm on Sunday, and the captain said, "I must return to Sydney unless I know where I am going to." Mr. Stewart said, "No, for God's sake don't return to Sydney, go to any other port but that;" and he came to the conclusion that we should go to Howe's Island.
29. Mr Stewart told him to go to Howe's Island? Yes.
30. From that, are you under the impression that Mr. Stewart chartered the vessel? No more than that he was engaged on that trip to go to Howe's Island. The captain had so much to take him on board, that was all.
31. Did you go to Howe's Island? Yes.
32. How many days were you going there? Three days. We sighted the island, then had a heavy gale from the eastward, and did not get sight of the island again for four or five days; it took us four days to get up to the island again, after we sighted the island. From the time we first fell in with the "Louisa" we were eight or nine hours until we left.
33. You met the "Louisa" there? Yes.
34. Was she anchored there? No, sailing about.
35. Did you make for her? No. Mr. Stewart had a private signal that he ordered to be shewed. The "Louisa" thought we were a cutter belonging to the "Herald," and made off from us, till we shewed the private signal, and they then bore down upon us. They told us to go to the lee of the island, where we could discharge what we had on board belonging to Mr. Stewart. We went under the lee of the island, hove to, and transhipped from the one vessel to the other the whole of Mr. Stewart's goods, and the passengers—Mr. and Mrs. Stewart and the children; the boy came back again.
36. Where is that boy now? I am not able to say; I will try to find out to-day.
37. How did you know the "Louisa"? I have worked on board of her myself, before she belonged to the Stewarts.
38. Did you board her? Yes; I went on board for a drink of water, when we were passing the goods out of the boat.
39. You were quite satisfied it was the "Louisa"? Yes.
40. Did you read her name on the stern? It was painted out; there was no name to be seen.
41. Neither on the bow nor stern? No, neither on one or the other. I knew the vessel, from having seen her so many times before.
42. Did Mr. Stewart have any conversation on the way down with the captain, or any one else, that you overheard? No, not that I heard, more than passing remarks about Sydney.
43. Did you suspect anything at that time? No.
44. When you got to the "Louisa" did you hear any conversation between the mate and Captain Camroux? Yes; after we left Howe's Island —
45. Who was the mate of the "Louisa" when you got on board her? Mr. Nicholson
46. Was there anybody else? A Mr. Stewart.
47. In what capacity was Stewart? As captain.
48. Which Stewart was it? I do not know his christian name, but William Stewart's brother was on board as commander of the vessel.
49. Who was the mate? Mr. Nicholson was chief mate.
50. When you parted with the "Louisa," did you take the mate on board? He came on board the "Martha" to go to the Manning River.
51. Did you hear any conversation between Mr. Nicholson, the mate of the "Louisa," and the captain of the "Martha"? Yes; he asked if we knew what lay the "Louisa" was upon. Captain Camroux said, "No." "Well," he said, "if I were you I would run the stuff for the "Louisa." Mr. Camroux said, "No, I will have nothing to do with it." Captain Camroux then asked what the "Louisa" had on board, and he said, about £13,000 worth of tobacco.
52. Did you hear any more conversation with them? No more than that he asked Camroux's opinion where he thought the vessel could run it best. They were talking of different topics of that kind, but nothing further concerning the "Louisa."
53. Did you hear the mate say any other name the "Louisa" took? Yes; the "Mary Ann"; he said they told several vessels they called her the "Mary Ann," and that they had it painted on a board ready to be put over the stern when required.
54. Do you know where Nicholson is now? I have heard that he has gone to Hobart Town, but I am not certain.
55. Have you seen him lately? Yes; the day we came in with the "Martha."
56. How long ago? A week last Saturday.
57. Do you think you could find him? No. I have heard he has gone to Hobart Town; his wife and family reside there.
58. Did you hear Nicholson say that Stewart had given him any money? Yes; he gave him £50 to pay his expenses to Hobart Town.
59. In addition to his wages as mate? Yes.
60. I suppose he was fully paid off when he left the "Louisa"? Yes.
61. And this £50 was given to him afterwards? Yes. He had £12 a month when he shipped on board the "Louisa," but the month was not quite expired, and he had no wages coming to him, but Mr. Stewart gave him £50 as a settlement of his claim.
62. *By Mr. Browne*: Did they say anything about what they mistook you for when they first sighted you? Yes; they said they mistook us for a cutter belonging to the "Herald," for there was a large full rigged ship to leeward of us, and they thought the "Herald" was down; they kept away. I guessed something; I thought all was not right, for Mr. Stewart said to the men,

- men, "Do not any of you know that vessel"? I heard the captain say no, and the mate and the other men said no; but when I came on deck I said, "That is the old 'Louisa,' of Sydney." He said, "Are you perfectly sure of that?" and I said, "A blind man could see her; I worked on board her." He then hoisted an ensign at the peak, and the "Louisa" hoisted the first distinguishing pennant, and then they came down upon us. When he was satisfied he hailed us and told us to go to Howe's Island. I heard the conversation with Captain Stewart: our captain was asking when he left, and he said he left Jervis Bay on Thursday as we left Sydney on the Sunday.
63. Was Captain King on board the "Louisa"? No.
64. Then Mr. Nicholson was in command of the vessel? No; he was navigating the vessel for Captain Stewart.
65. Did you hear what took the "Louisa" to Jervis Bay? To try to run the stuff; they expected a ketch there—at least I heard Nicholson say they expected a small vessel to run the tobacco on the coast.
66. You heard Nicholson say that? Yes.
67. Was Captain King on board when the "Louisa" went into Jervis Bay? That I could not say.
68. What became of the "Louisa" after you had put all the things on board? When we made away from them she was hove-to at the island; she made no attempt to get underway while we were in sight.
69. *By the Chairman*: Did you hear Mr. Stewart say anything to the boy? Yes; he said, "You will never see Mr. or Mrs. Stewart again, for they will never come to Sydney any more."
70. Did you talk to the boy? Yes, often.
71. Did he let out anything? No; he was too wide awake. I tried to get out about the previous voyage, as I heard they had been at the same game before; but he was too wide awake. Some captain came for the boy when we arrived and took him over to Mrs. Stewart, at Balmain.
72. How long have you been in these Colonies? It is about seven years altogether since I first came out, but I have been home since.
73. How did you first come out? As boatswain to Hobart Town, and then I came to Sydney in the barque "Chamois."
74. Have you been in any of Mr. Dunbar's ships? Yes; I was boatswain of one about twelve months ago—the "Duncan Dunbar."
75. Under Captain Neatby? Yes.
76. Where was the "Martha" loaded before you sailed for Howe's Island? At the Commercial Wharf.
77. At what time of the day or night did she take in cargo? She first commenced to take in Mr. Stewart's cargo about six in the evening, and continued till about seven; that was the ship's company alone; there was work done after that, but not by us.
78. What did the cargo consist of? Spirits; that was all we took.
79. Any furniture? No furniture came on board during the night.
80. Where did the spirits come from? Out of Mr. Allen's stores.
81. Were they put on board by Custom House officers? No; by only the chief mate of the ketch and me.
82. Did you see a Custom House officer there at all? There was no Custom House officer there then. There was a man came on board that the little boy told me was a Custom House officer; he was a shortish man, rather full in the face. I was down below; and about one o'clock I poked my head through the hatchway to see what was the matter, as I heard a noise on deck, and saw a deal of things come on board; they were put in the hold the next day; they were clothes belonging to Mrs. Stewart.
83. Where did this officer come from? Balmain.
84. How do you know? Because I saw the boat go in that direction.
85. Did you hear his name? I have heard his name mentioned by the boy.
86. Do you think you would know his face again? I think I should.
87. Was he dark or light complexioned? He looked rather darkish when I saw him by the glimmer of the light.
88. Had he any moustache? No; I cannot say whether he had or not.
89. *By Mr. Browne*: Had you any cargo at all for the Manning? Yes.
90. You took in the Manning River cargo before you started on Mr. Stewart's expedition? Yes.
91. Where is the "Martha" now? I believe she sailed this morning.
92. For the Manning again? Yes.
93. When this Custom House officer came on board was Mrs. Stewart on board? No. She did not come on board before the Saturday morning.
94. Was he aware of that? I think he was, because he sent some clothes down to her. It was Saturday morning we sailed; he came on board on Friday night.

R. Prosser.
20 Dec., 1858.

Mr. Thomas Waldeck Smith again called in.

The statement made by him before the Board at their last meeting, having been read over, was signed by him. He was then further examined:—

- Mr. T. W. Smith.
20 Dec., 1858.
1. *By the Chairman*: Since Mr. Still made the seizure over at your public house, have you seen Mr. Gibbes, or any person connected with the Chilian Store? No; I have not.
 2. Have you had any communication with him? No; not with him, or any one connected with the Chilian Store.
 3. *By Mr. Browne*: The parties have made no communication to you? No.
 4. You have not applied to them, notifying that the goods sold by them have been seized? I have not, but I called upon Mr. Richardson, the auctioneer, by whom the land was to have been sold, the other day—Mr. Stewart's mother had told him to sell the land at the time of the sale of Captain Perry's land—and told him that I should take steps to regain the land by course of law.
 5. This was the land to which you referred when you were before examined? Yes; it was put into Mr. Richardson's hands to sell on account of Mr. Stewart's mother. Mr. Stewart mortgaged the land on the same day he got it from me to Messrs. Stenhouse and Hardy.
 6. Do you not intend to give the parties at the Chilian Bond notice that the goods received from them have been seized? I have put the matter into Messrs. Stenhouse and Hardy's hands. I told them I would spend the value of the land, £300, but I would see myself righted, as it was a dishonest transaction; and I wished them to apply to the Court, to see if I could obtain the land back.

20 DECEMBER, 1858.

Mr. Manton.
20 Dec., 1858.

Mr. Manton was called in and asked before the Board, consisting of Captain Ward and Captain Browne, if he was prepared now to name the gentlemen who were on board the steamer on the occasion of her towing out the "Louisa" on the evening of 2nd September; and he answered, that those gentlemen were the two Mr. Stewarts, Mr. W. Gibbes, and himself—We left the Grafton Wharf in the "Louisa," and went on board the steamer near Bradley's Head.

TUESDAY, 28 DECEMBER, 1858.

Present:—

J. M'LERIE, Esq., IN THE CHAIR.

H. H. BROWNE, Esq.

Mr. John Williams called in and examined:—

- Mr. John Williams.
28 Dec., 1858.
1. *By the Chairman*: The Board have received a letter from your solicitors, Messrs. Duns-mure and Stafford ———? Yes, that was at my request.
 2. Requesting that you may be examined "with reference to your purchase of some cases of gin from Mr. William Gibbes, suspected to be a part of the cargo alleged to have been shipped by the 'Louisa' in September last"—you attend here for that purpose? I have come here for that purpose.
 3. Will you put the Board in possession of all the facts connected with this transaction? It will be necessary to preface my statement by shewing in what manner I have become acquainted with Mr. Gibbes. I have been an hotel-keeper for a number of years, and Mr. Gibbes having been a frequenter of hotels, from time to time, I have had a good deal of his patronage, both at Petty's Hotel and at Parramatta, where I now reside. He has always shewn me the greatest friendship, as it were; he has been very liberal, and always paid me honorably. I always looked upon him as an independent gentleman, connected in no way whatever with business, until, I think, some time in August last, or early in September, when he accosted me in George-street, near the Café, and after asking me how business was going on in Parramatta, he said he understood I had entered into the wholesale wine and spirit trade, and asked me if I could not give him a turn. I asked him if he had entered into our line of business, and I understood him to say, Yes. I assured him that I was not in want of any stock, that I had rather overstocked my store in Parramatta, and that business was so dull I could not get rid of stock. Two or three times subsequently I came in collision with him in the streets, and he asked me whether I did not intend to look down at their stores in Macquarie Place, and he said he thought he would be able to serve me as well and as reasonably as any person in Sydney could. I again told him that I really was so full of stocks that I had no desire to purchase, but that at some future time, if I required, I would give him a call. Some time in September I was down at the Custom House, paying duty upon some goods, and on turning round the corner of Wilkinson's fence—the corner fence opposite the Chilian Bond—Mr. Gibbes hailed me, and beckoned. I was in a great hurry, being anxious to get away by the afternoon train, and wished to catch the omnibus at Pitt and Hunter streets. He came across and said, "As you are so close you will come and see what we can offer you, "I think you will give us a turn." I went over, and there were three or four gentlemen there. I was still anxious if possible to have caught the train. I recollect that Mr. Gibbes spoke to one gentleman, but who he was I cannot tell, and he came out and said, "Will you not take some brandy? here is a sample of it, it is very good and very reasonable."
 4. Said to you, or to the gentleman? To me.
 5. Who offered the sample? Mr. Gibbes. I tasted the sample and asked him the price; he told me it was 18s. a gallon; I said I was very full of brandy, but as an old friend I would

would take two hogsheads of brandy; he then asked me if I would take some rum, and I told him I had so many certificates by me, and found it so slow to move off—only by retail in Parramatta—that I could not do so; they offered me inducements by naming the price; I said, "I cannot take them, for I have no use for them, they would only be dead stock."

Mr. John
Williams.
28 Dec., 1858.

6. *By Mr. Browne*: You say they did? Mr. Gibbes I mean; he was the only party who spoke to me, but several gentlemen were standing by—three or four. He then offered me some gin; I looked at the brand; I said, "I have a quantity of gin, I do not require it, I have a quantity of a better brand, the key brand;" this was the anchor and JDKZ; he said, "To induce you to buy we will sell you this gin at 46s. 6d.,—I think, I am not sure—46s. or 46s. 6d.; I did not think it anything like a bargain, because my stock on hand did not cost me more than sixpence or a shilling more a case; I gave him a very small order—I said I would take five cases; he said you had better take ten; I said, "Well send up ten," and I hurried off and caught the train. He also offered me some cigars, and wanted me to take a case, but I declined to do so.

7. Was there any invoice with them? I got an invoice afterwards.

8. Have you that invoice with you? I am sorry I have not, but these letters (*producing a number of letters*) will explain the transaction.

9. Have you any objection to lay those letters before the Board? None whatever. (*The Witness handed in the same. Vide Appendix.*)

10. Were the five cases of gin taken from your cellar by the Inspector of Warehouses part of the ten you allude to? Yes, part of the ten I purchased from Mr. Gibbes.

11. *By Mr. Browne*: When did you receive this gin? I can tell you by reference to this letter. (*The witness read letter No. 1—Sept. 17th, 1858.*) On the 18th I received this note. (*The witness read letter No. 2—Sept. 18th.*) On the 20th I received this. (*Witness read letter No. 3—Sept. 20th.*)

12. Have you had any other communications with Mr. William Gibbes since then? I have, several. I had no communication after that until I wrote to Mr. Gibbes myself. Having purchased these goods more as a compliment than anything else, I called at the office the first time I came to town after receiving them, and tendered my cheque; I said it was the practice to allow some discount off, and in consequence Mr. Gibbes spoke to some gentleman who was there; I waited outside, but they took the account into the office and brought it back to me receipted for the discount, and handed a cheque for my signature, which I gave.

13. By whom was that receipt signed? It is signed, "Stewart & Co." I regret very much I have not brought it with me, but I did not think of it till I was in the omnibus on my way to the train.

14. Had you any doubt, when making these arrangements with Mr. Gibbes that you have now spoken of, that he was a principal in the business, and interested in the sale of these goods to you? I believed him to have been interested, otherwise I should not have bought them. I bought them from mere compliment; I was not in want of stock, as Mr. Still and those who have seen my stock well know. Mr. Still came to me one afternoon, or rather the Chief Constable came to me, and told me there was a gentleman in the front parlour who wished to see me. He introduced himself as Inspector of Distilleries, and said he wished to inspect my stocks. I shewed him through the cellar, and three different stores I had; in looking over the gin he said—"Mr. Williams, I am afraid I shall have to take this gin from you. I am an officer appointed by the Government to search for goods the Government have been defrauded of. I think these are some of the goods, and I must take them away." He asked me where I got them—

15. *By the Chairman*: Did he say anything on seizing them before he asked the question? No; he asked me questions before he seized, and called the Chief Constable's attention to something on one of the cases, which I understood to be the card bearing the address of Stewart & Co., Chilian Stores. It was then he said he was afraid he should have to take them away to the Police Office, and asked me where I got them. I told him I bought them from Mr. William Gibbes. I requested he would not be hasty, but would make himself certain these were the goods he was in quest of, for it would be rather an unpleasant thing to see my goods taken across the street to the Police Office, and I assured him they would be as safe in my stores as in the Police Office. I told him the Chief Constable would certify that; the Chief Constable said something to him, and afterwards he seemed perfectly willing to leave them; he asked for chalk, and put the broad arrow on seven cases, six full and ullage, and one empty. One bore the chalk mark of G 548; this case Mr. Still put on one side, and did not put the broad arrow on that. He told me he would let me know to-morrow evening—that was the following evening—whether the goods were those he was in search of or not. The following evening I saw Chief Constable Drury, and he brought me over a note to read, in which he was instructed by Mr. Still to consider these goods as still under his surveillance. I remarked to Drury that it seemed a strange affair that Mr. Gibbes should induce me to purchase goods of this description under the garb of friendship, and I still had my doubts about it, and would see Mr. Gibbes on the subject. I did so. On the 2nd December Mr. Still came from Sydney by the first train in the morning, and said he wished to see the goods again, and if he had any doubt in the matter that he would give me the benefit of the doubt. I took him into the stores, and he had Constable Wade with him, and told Constable Wade to remove the goods over to the Police Office. I told Mr. Still then that I hoped he was perfectly satisfied of what he was doing—that I had seen Mr. Gibbes, and Mr. Gibbes had assured me that these goods had duty paid upon them on the 14th September; that, not being satisfied with that, I had got an agent to make the necessary inquiry at the Custom House whether such was the case or not; that the agent sent a clerk, and on his return certified to me that the duty was paid on the 14th September for this particular mark, and I concluded that I felt perfectly satisfied Mr. Still might have been mistaken. Therefore, when he was removing the goods, I asked him to be particular, and to be certain what he was doing, as it was a matter very unpleasant to me. He said, "I have a duty

Mr. John Williams.
23 Dec., 1858.

"duty to perform." I said, "You have a very unpleasant one. I give you every credit for what you are doing, but, if I am not misled by the intimation I received yesterday that these are not the goods you are in search of, but the goods the duty was paid upon on the 14th September, you have not a right to remove them." Mr. Still assured me that he was satisfied with what he was doing, and he would run all risks, and that he was acting under the direction of the Board. I then rendered him every assistance in my power by horse and cart and the help of my son, as I did not wish to call in the servants to hear and see what was wrong. I even then felt confident the goods would be restored to me; but as they were going on to the dray or cart, my son observed another case bearing a chalk mark, G 548—

16. A similar chalk mark to what Mr. Still had seen on the former day? Yes. I called Mr. Still's attention to it, and subsequently saw another with the same mark, G 548. I said to Mr. Still, "This appears to be a strange thing—three cases out of the lot bearing this mark. Are you still satisfied these are the goods you are in quest of?" He said, "Mr. Williams, I will take these." He then directed the constable to take the empty case to put on the dray with the others that bore the chalk mark with the broad arrow. There is one part I omitted in my answer. I understood, when I made my first observation to Mr. Still, that he could seize these cases as contraband, having no bond mark. The goods were removed to the Police Office, and I heard no more about them until I came down to Sydney. In the interim I wrote this letter to Mr. Gibbes. (*Witness read letter No. 4, Dec., 1st.*) Subsequently I received a note from Mr. Gibbes, dated 4th December. (*Witness read letter No. 5.*) I saw Mr. Gibbes personally on the 2nd, relative to my letter of the 1st December, and he still assured me that the goods were proper, and that I ought to take proceedings immediately to recover them back. I went to Mr. Dunsmuir and acquainted him with the matter, and he said there was no occasion to move in it, and that, if the goods were not those they were in search of, they would be restored to me ultimately, and no blame would be attached to me. After having been assured that the G 548 cases had had duty paid upon them by the agent, Mr. Cohen, that I sent in to inquire, I felt perfectly content; but, before I left town, I met him again, and he asked me if I had heard anything further—that there was a report—he said that he had heard for certain that there was one of these cases bore the mark of E 562, which corresponded with the mark on the goods supposed to have been exported by the "Louisa." I was quite indignant, and said I was quite sure it was a falsehood, for I saw the others go away which bore the mark of G 548, except those which bore no mark at all. I said I was quite sure it was the case, and that when I returned I would go to the Police Office and see whether it was so. When I went back to Parramatta I was detained some time in conversation with Mr. McDougal, and when I went over, not knowing that Mr. Still or any other person was there, I asked for the Chief Constable; Mrs. Wade said she did not know that he was in, but if I would walk up to his office I might see him. I did so, and I smelt a strong smell of gin, and saw Mr. Still and another person measuring a case of gin. Constable Wade was present. I remarked to Mr. Still that I was not aware he was there, but I was very glad to see him, for I wanted to know when he would release the gin. Mr. Still said he was afraid it would be some time first. I said, what brought me over was, that I had heard a report in Sydney that one of the cases bore the contraband mark of E 562. Mr. Still made no observation to me, and took no notice of what I said. I then asked what he was doing. I said, "I am acquainted with what you are doing, but, at all events, you are filling up those bottles fuller than I ever received"; he was filling up from another case that ultimately proved to bear this contraband mark; he was taking them out of the ullage case which bore no mark. I remarked that I had not seen bottles filled so full before, and the assistant who was with him said, "Yes, they are too full, Mr. Still," and Mr. Still gave directions to turn some of the gin out. I do not know what the object was. I always pay an agent to clear my goods, and therefore I did not understand his object. Mr. Still went away, and I told Mr. Drury what I had heard in Sydney, and Drury said, "It is the case; one of these cases is marked with the "Louisa" mark, E 562." I said, "It is very strange Mr. Still did not let me know that; I made the observation and he said nothing about it." He said "Perhaps Mr. Still wishes to be still upon this matter, and not to say too much." I said, "Have you any objection to shew me the case?" and he said, "Not the least;" and after looking at it some time I found a very faint mark could be traced as being E 562, but it appeared to have been scratched on in a great hurry with a piece of sandstone rather than chalk. In consequence of that I wrote this letter to Mr. Gibbes. (*Witness read letter No. 6, December 10th.*) In reply to this letter, I received the following (*Witness read letter No. 7, December 11th.*) and subsequently I received, by private hand, another, dated the same evening, which ran as follows (*Witness read letter No. 8, dated Saturday night, December 11th, 1858.*) I then wrote to Mr. William Gibbes, under date December 12th (*Witness read letter No. 9.*) I then wrote to the Collector of Customs, stating the whole circumstances of the case. (*Witness read letter No. 10, dated December 13th.*) To that letter I received this answer (*Witness read letter No. 11, dated Custom House, Sydney, 15 December, 1858.*) After this I addressed another letter to Mr. William Gibbes; it is dated the 27th, but I wrote it on the 26th. (*Witness read letter No. 12, December 27th.*)

17. You have had no reply to that? I have not.

18. These letters embrace all the correspondence you had with Mr. Gibbes and with the Collector of Customs, on the subject of this seizure? Yes.

19. Have you seen any officer of the Customs personally upon this subject? None but Mr. Still. Mr. Still admits the justice of my remarks; he says that at the time of leaving my store he did not see the mark; but upon greater scrutiny, and in a stronger light, he saw it, and called the attention of the constable.

20. Was the mark so faint (E 562) that it might have escaped your attention when in your store? Unless looking closely for it. Mr. Still says he thinks they have attempted to erase the marks.

21. In Mr. Gibbes' letter of 4th December he states that he had reported to the Government that you had said you had not purchased the goods from him, but through his introduction—is this statement of Mr. Gibbes correct or not? He had no authority from me to make such a statement.

Mr. John
Williams.

28 Dec., 1858.

22. Is that statement true or not—that you did not purchase the goods from him? I consider I purchased the goods from Mr. Gibbes; he was the only person I had any dealing with.

23. Was the name of any other person mentioned in the transaction? None whatever, not until I received the receipt signed "Stewart & Co."

24. *By Mr. Browne*: You had no other object but to please Mr. William Gibbes, who had been an old customer of yours? No.

25. The prices you paid were the full market prices of the day? They were the highest market prices of the day; I could not get the same money for the gin now, and the brandy I could get for a much lower price. I gave them what they asked.

26. You never saw the Collector of Customs on the subject? No; that letter is the only correspondence I had with him; I never spoke to Colonel Gibbes in my life.

27. I suppose the brandy you have sold in the course of business? Yes; the brandy was sold in the course of a few days.

APPENDIX.

No. 1.

Sydney, September 17, 1858.

My dear Sir,

Your ten cases of Geneva were forwarded by steamer this noon, but I regret to say that the brandy was too late in going down, and will be forwarded by steamer to-morrow (Saturday) one o'clock.

John Williams, Esq.,
Parramatta.

Yours truly,
W. GIBBES.

No. 2.

Sydney, Saturday, September 18, 1858.

My dear Sir,

Your brandy left per steamer at mid-day, and will arrive all safe, I trust. With kind regards to your young ladies,

Believe me,
Yours truly,
W. GIBBES.

No. 3.

Sydney, September 20, 1858.

My dear Sir,

I forgot to send you the re-gauge of the brandy, and therefore enclose you a memo.

John Williams, Esq.,
Parramatta.

In haste,
Yours truly,
W. GIBBES.

No. 4.

Parramatta, December 1, 1858.

Dear Sir,

After the assurance I have had from you to-day of the goods in question being legal and duty paid, there must be some unwarrantable delay in releasing them on the part of Mr. Still. They were seized on Monday, and I was in the first instance directed to take them over to the Police Office as contraband goods; but reasoned that such a proceeding would be greatly detrimental to my interest and reputation here *undeservedly*, and gave my pledge to keep them secure in my store until decided, which was agreed to by Mr. Still after putting the broad arrow on them, and placing them under the surveillance of Mr. Drury, the Chief Constable *here*, with a promise to report on the following morning (*Tuesday*.)

In consequence of the branding of these goods, my *son* in my absence could not open the stores (where they were secured) to the public to-day; and to-night's post has not brought any order to the Chief Constable to release them, who has just shewn me Mr. Still's letter, in which he states to the C. C., "you are to consider these seven cases as still under "your surveillance,"—consequently my business must in a manner be suspended during to-morrow.

The matter is *abroad here*, greatly to my damage; having purchased the goods through you, is the only excuse I can offer for troubling you to ascertain for me on what grounds they are so long detained from release.

W. Gibbes, Esq.

I am, dear Sir,
Yours truly,
JOHN WILLIAMS.

No. 5.

Mr. John
Williams.

No. 5.

December 4, 1858.

28 Dec., 1858.

My dear Sir,

Your letter has not come to hand. I have written to the Government stating, upon your authority, that you did not say to Mr. Still that you bought these goods *from me*, but, through my introduction, from Mr. Stewart, and that you had furnished me with the bond mark of the gin, from which I have proved that the gin sold to you on 16th September was paid duty on two days before. My letter will be laid before the Treasurer on Monday morning, at nine o'clock, and, if not exceedingly inconvenient to you to come to Sydney, I shall be very glad to see you in the early part of the day.

I am, my dear Sir,

With kindest regards to your family,

Yours truly,

J. Williams, Esq.

W. GIBBES.

Can you be here by half-past 9? Try.

No. 6.

Parramatta, December 10, 1858.

W. Gibbes, Esq.

Dear Sir,

Circumstances have transpired since I returned home this evening, the meaning of which I do not understand; but as I consider you responsible to me, I do not think I am justified in withholding from you any report for a single post.

It was my intention to have addressed a letter to the Collector of Customs to-night, to inquire the cause of the detention of the gin, after it had been published that the contraband gin was marked E 562, whereas the gin I bought from you was G 548, and that the contraband gin was cleared for export on September 2nd, and the gin I had was duty paid on the 14th September; but, as I told you, amongst other reports that came to my ears to-day, that it was alleged one case bearing the mark E 562 was seized from me with the others, I went over to the Police Office half an hour after I returned home, to ask permission of the Chief Constable to allow me to inspect the cases, so as to satisfy myself. The C. C. not being in, I was directed by Mrs. Wade (the lock-keeper's wife) to the C. C.'s office, where I should find Mr. Wade. On proceeding there I was surprised to see Mr. Still and another there measuring gin. I asked the reason, but Mr. Still said he had his reason, and a duty to perform, but did not explain. I asked him when were the goods going to be released, &c., &c. He said he could not tell, but no harm could happen me. Again I remarked, I could not understand why I had received no communication whatever from the authorities; again, that I had heard in Sydney that one case was marked E 562, and had been seized from me—that I had come over to satisfy myself. Mr. Still did not *openly*, as I think he ought to have done, tell me that the case he was then measuring the contents of, and filling up from another, the ullage one of C 548—(N. B. A broken bottle was in the one filling up, and it was replaced with another, to make the quantity right, and a second one from the ullage case for filling up)—was marked E 562, or give me any other reason. In the meantime the Chief Constable came in, and was surprised to see what was going on. Mr. Still and his assistant having left, I asked permission to examine the cases, as I had heard there was a case bearing the contraband bond mark, E 562.

Mr. Drury at once told me it was so, and pointed to the case which had been opened and filled up just before.—(N. B. I had called the attention of Mr. Still and his assistant, who remarked that the bottles were never filled to the cork, and he emptied some out of each bottle again. I offered to allow any of my key brand to be examined, to shew that the bottles they were filling were too full, but I did not understand, nevertheless, what the scrutiny was for.) However, on Mr. Drury pointing out to me the mark on that particular case, I could discern a faint thin mark, like as if scratched on in a hurry with a piece of soft sandstone, E 562. I never remember seeing a proper bond mark thus (a writing E), but always with, as in print, E. This attracted my serious attention, and it cannot be denied but it is evident such a mark, if to serve any purpose, could have been scratched on in an instant, either before or after the cases left my store. I think Mr. Still ought to have pointed it out to me, if he seized on that mark, *there and then*. He professed to seize for having no bond mark: this is all I complain of Mr. Still. I think Mr. S. ought to have pointed this out to me at the time of removal, when all three of us—(my son, constable Wade, and myself)—turned all the cases over, and saw no such mark. It is to me a singular thing that this one case should bear this imperfect mark so suddenly; however, should this turn out to be one of the cases in search of, it will alter my opinion of the matter altogether.

As things wear the aspect they do, I shall address a letter of full particulars to the Collector of Customs as soon as possible, but which is impossible for me to do to-night, as I think it right to inform you first, you being responsible to me, that you may detect if there is any trickery in this.

Yours, &c.,

J. W.

No. 7.

My dear Sir,

I have received your letter, and am surprised at its contents, and will send it to the Government. I am at a loss to understand your statement; but although a Mr. Abbot exported some gin, E 562, early in September, great numbers of cases of such bond mark have been paid duty upon.

I am, my dear Sir,

Yours always,

Sydney, December 11, 1858.

W. GIBBES.

Sydney, Saturday night,
December 11, 1858.Mr. John
Williams.

28 Dec., 1858.

My dear Sir,

I wrote you hurriedly this morning to acknowledge receipt of your letter, and now have to tell you that, if you choose to dilly-dally over your affairs, and to risk the loss of your reputation and business, I cannot help you.

As to any responsibility attaching to me, there is none; but, nevertheless, as an old friend, who has always treated me with great kindness, I shall be most happy to render you every assistance in my power in placing you right with the Government and the public; but unless you write I cannot move in the matter.

You sought my advice; I gave it sincerely, and you have as yet rejected it.

Instead of writing to the Government *you keep addressing me*: I cannot help you, except by information, with which I have endeavoured to supply you.

As to the case of seizure itself, if there is anything wrong, or any rascality has been perpetrated, I can solemnly assure you I am perfectly ignorant of it; I know nothing of Mr. W. Stewart's affairs, and can only again advise you to lose no time in addressing the Government—by to-night's post, if possible.

With kind regards to your family,

I am, my dear Sir,

Yours truly,

W. GIBBES.

John Williams, Esq.,
Parramatta.

Please to start the bearer back in time for the train.

No. 9.

Parramatta, December 12, 1858.

Dear Mr. Gibbes,

I am in receipt of both your letters, and will, if convenient to you, see you at the stores to-morrow (Monday) morning, at 10 o'clock, and explain to you anything in my letter of the 10th unintelligible to you.

In the meantime I remain,

Yours truly,

J. W.

No. 10.

Williams' Hotel, Parramatta,
December 13, 1858.

Sir,

On the _____ day of December Chief Constable Drury came into my office, and said there was a gentleman in the coffee-room wishing to see me; on entering I saw Mr. Still, who said, "I am the Inspector of Distilleries, and wish to inspect your stores." I said I would be happy to shew them to him, and took them all over the cellar and stores, where he carefully examined every article; on examining my stock of gins, he inquired where I got a particular lot from; I told him I bought them from Mr. Gibbes; he (Mr. Still) then called the Chief Constables' attention to the cards on the cases, (viz., W. Stewart & Co., Chilian Stores,) and said, "Mr. Williams, I am afraid I must seize these cases as contraband goods, and send them over to the Police Office." I requested he would not do that, as the fact would be injurious to my business and reputation; he said it was, he knew, a very unpleasant business, but he had a duty to perform; that a fraud had been perpetrated on the Government, in which Mr. Stewart was implicated, and he had no alternative. I told him I bought and paid legitimately for them, and as far as being concerned, I did not even know Mr. Stewart. I asked him if he was sure they were any of the goods; he said if they were not he would seize them as contraband, having *no bond mark* on them. I assured him of their perfect safety in my stores, in which assurance the Chief Constable acquiesced, and Mr. Still asked for chalk, put the broad arrow on seven cases, and agreed to leave them in my stores until he satisfied himself, and promised if they were right to write the next day and let me know. There were in all 8 (eight) cases—an empty one, an ullage, and 6 (six) full ones. There was a chalk mark perceptible on the empty one, which Mr. Still threw on one side, and did not mark it with the broad arrow. On inquiries from the Chief Constable the following evening, he read a note to me he had received from Mr. Still, in which that officer directed him to consider the goods still under his surveillance, &c. On the morning of the 2nd December Mr. Still came to Parramatta by the first train, and asked me to let him see the goods again, and that if there were any doubt he would give me the benefit of it; he had Constable Wade with him, and directed him to remove the seven cases to the Police Office, leaving the one (empty) with mark G 548 behind; my son helped Constable Wade to load the horse and cart, and when out in open light he saw a mark in chalk on another case, which was G 548, same as the one left out, and called Mr. Still's attention to it. I then instructed my son and Constable Wade to examine every case carefully, and take down the marks; three were taken down as G 548, the empty one included—5, no marks perceptible. I then asked Mr. Still if he was not mistaken, as I understood he seized the goods as having *no bond mark*; that I had seen in merchants' free stores cases gin no mark, either in paint or chalk, to indicate any particular bond; also that I had a case with sundries in, from Sydney, just the same, and that I had been assured *duty had been paid* on the gin that I had from Stewart on September 14th. But Mr. Still said he must remove them and run the risk, and ordered them to the Police Office. I offered my store keys rather than such should be done, but it was denied, and it was removed, and the empty case then Mr. Still directed to be taken with them. I then applied to Mr.

21—2 K

Gibbes

Mr. John
Williams.
23 Dec., 1858.

Gibbes, through whom I purchased the goods, to satisfy me, as I did not understand the proceedings. He assured me that the goods taken from me duty was paid on, on the 14th September, and that he believed the seizure to be illegal, and advised me to apply for their release, or proceed for the recovery of them *by law*. This I did not do, believing every hour might bring an order from the Government to release them. On the 10th December, when in Sydney, I gave a description of the marks on the cases in question to a Custom House Agent, who sent his clerk to inquire if duty had been paid on such gin, and he returned with an answer he had, on September 14. Subsequently I saw him (the agent) again, and he told me he had heard that there was one case marked with the "Louisa" bond mark, viz., E 562; this I indignantly repudiated, stating I had, with my son, Constable Wade, and in the presence of Mr. Still, carefully examined every case as it went on the dray. Subsequently I was spoken to by many friends in town that the report was all over the place that the goods were traced to me, and in one instance that a 14-ton boat had been seized on the Parramatta River, with the goods from me, which I consider is most injurious to my reputation as an upright and honest tradesman. Shortly after my arrival in Parramatta I proceeded to the Police Office, to tell the Chief Constable what I had heard, and to ask him to let me see the cases, as I felt very certain that the report that one of them bore the mark E 562 was a fabrication. Mrs. Wade, the constable's wife, directed me to Mr. Drury's office, where I saw Mr. Still and another, and Constable Wade, with a case of gin open, and measuring its contents. I remarked that I did not know Mr. Still was there, and that I was glad to see him, as I wished to know if he could give me any information when the gin would be released. He said he could not tell me. I then observed what brought me over was in consequence of a report I had heard in Sydney that there was one of the cases marked E 562, which I thought was impossible, after the scrutiny of four of us on the goods leaving. Mr. Still did not reply, and I concluded it was a false report. On observing that they were filling the gin bottles up to the cork, and taking two bottles from another case—one to replace a broken bottle, the other to fill up the remainder of the case they were measuring—I asked Mr. Still what he was doing, (for I was ignorant, and still am.) He said, only his unpleasant duty; that no harm could come to me, and he had told the Board his opinion, and stated the ready and willing manner I satisfied all his questions. After the cases were headed up, Mr. Still and his assistant left; I then told Mr. Drury what I had heard. He said it was so, and that Mr. Still made him give a receipt for that particular case on the morning they were removed from my stores. I said it was impossible, as Constable Wade, my son, myself, and Mr. Still handled them all over, and saw no such mark. He (the C. C.) then pointed it out to me. It was the case they had been measuring; I could trace a very faint mark, thus, E 562—apparently neither paint nor chalk, but as if scratched on with a piece of sandstone in a great hurry. So struck was I with it, that I could not help remarking my belief that it had been scribbled on after leaving my stores, and the time of the Chief Constable's attention being drawn to it and his receipt demanded. If such is a Government bond mark, and one by which goods are to be seized, no honest man's goods are safe, whenever a dishonest one may defraud the Government; and if such marks are to bear evidence, then any informer may easily enter the stores of any merchant, and in an instant, whilst his eye is off such person, he may brand one or more at his will, to serve his ends to obtain reward. It has occurred to me, that the locker in whose custody the cases E 562 were, should be called upon to inspect this case at once, and to affirm, or not, if it is one in question. I have received no word from the Government, or any one else, as to the detention of the cases; yet I have been assured that many other cases, bearing that mark, has duty paid upon them. I look upon this case, as regards myself, as a very great hardship, not knowing how to answer my friends about it; and as I consider my business and reputation is suffering severely through the reports which have now become quite public, and exaggerated, and by which I appear branded as a smuggler. Should I be out of place in addressing you upon this subject, may I beg of you to lay my communication before the proper authorities, that I may at once understand the position in which I am placed with respect to the Government, and thus afford me the means of acquainting my friends and customers with the true merits of the case, as it is now a fortnight since the goods were seized, and I have not as yet heard anything in reference to them.

I have the honor to be, Sir,

Your obedient servant,

JOHN WILLIAMS.

To

Colonel Gibbes,
Collector of Customs.

No. 11.

Custom House,
Sydney, 15 December, 1858.

Sir,

I beg leave to acknowledge the receipt of your letter of the 13th instant, and to say that I have called on the Inspector of Warehouses for his report on the extraordinary circumstance related by you of one of the cases of gin seized by him having left your store without any mark upon it, and a scratched mark being afterwards found thereon; and so soon as I get his explanation I shall forward your letter to the Government.

Beyond that I can take no steps, as the seizure has never come into my custody, nor have I any report of the grounds on which it was made.

I am, Sir,

Your very obedient Servant,

J. GIBBES,

Collector.

To

Mr. Williams,
Williams' Hotel,
Parramatta.

No. 12.

No. 12.

Parramatta,
December 27, 1858.

Mr. John
Williams.
28 Dec., 1858.

W. Gibbes, Esq.
Dear Sir,

Notwithstanding your assurances that you could prove the gin purchased by me, (and seized by Mr. Inspector Still as contraband), had duty paid thereon, September 14th, I have now to inform you that, notwithstanding my protest on these grounds, the authorities have decided otherwise, and have taken the goods to Sydney.

I will be examined to shew how I became possessed of them, and if you are still so sure of their seizure being illegal, I consider, under the circumstances which induced me to purchase them, you should shew to the Board satisfactory proof of the same, and at once exonerate my character more satisfactorily than by my own representations alone, otherwise I have no alternative but to conclude that I have been most shamefully imposed upon, and will take the necessary steps to acquit myself to the public of (if any) supposed participation in the disgraceful fraud which has been committed on the Revenue. In the meantime,

I remain,
Yours faithfully,
JOHN WILLIAMS.

159, late 325, Castlereagh-street,
Sydney, December, 1858.

Sir,

As Solicitors for Mr. John Williams, of the "Wool Pack Inn," Parramatta, we have the honor to request that Mr. Williams may be examined by you with reference to his purchase of some cases of gin from Mr. William Gibbes, suspected to be a part of the cargo alleged to have been shipped by the "Louisa" in September last.

This application is made on his behalf in consequence of certain rumours having reached his ears relative to his conduct in the transaction.

We have the honor to be,
Sir,

Your most obedient Servants,
DUNSMURE & STAFFORD.

To
The Chairman of the Board of Inquiry
Upon the late Custom House Frauds.

George McDonald called in and examined:—

1. *By the Chairman*: How old are you? Fourteen.
2. Where are you living? Up in Kensington-street.
3. You are an orphan, are you not? I have no father nor mother.
4. Do you know Mr. James Stewart, Custom House Agent? Yes.
5. How long is it since you first knew him? About ten weeks—two months and a fortnight.
6. How did you first become known to him, or he to you? My sister was coming from Brisbane Water, and she fell in with Captain King in a ketch, and he got her a place at Mr. Stewart's.
7. Did Mr. Stewart put you on board the "Louisa"? No; I went on board first the day before, and they said they did not want me.
8. What day was that? On Tuesday I went first.
9. You went on board the "Louisa" the day before she sailed? Yes; and they said they did not want me. Mr. Stewart told me to call the next morning, and they kept me then.
10. What did you do on board? I was helping the man to cook.
11. What sort of crew had they? A black crew.
12. Not all black, were they? Every one, except the captain and me.
13. How many were there, do you recollect? I think ten; there were thirteen of us altogether.
14. Including the captain and yourself? And the cook.
15. What sort of black was the cook? An American.
16. What were the other ten? Kanakas.
17. What time did you go on board on the day the "Louisa" sailed? About eight or nine.
18. In the morning? Yes.
19. Where did you go on board? At the Grafton Wharf.
20. Was she ready for sailing then? No; she had not the casks on board.
21. What casks? Empty casks.
22. How many did she take on board after you went on board in the morning? I do not know; I think there were forty the morning I filled them.
23. Filled them with what? Water from the tank-boat.
24. Was any other cargo taken on board that day? I think a man came down with a dray load of goods.
25. One dray load? I cannot say whether it was only one.
26. Were there twenty? I cannot say whether there that many, for I was below taking care of goods.
27. What sort of goods were they? I saw some cases come.
28. Do you know what casks of tobacco are? I saw some half casks on board the "Martha."
29. Did you see any cases like that going on board? No, I did not see any of them; they might have been on board before I went.

G. McDonald.
28 Dec., 1858.

- G. McDonald. 30. Did you see any drays about the wharf? Yes; coming to a vessel going to the Fitz Roy Gold Fields.
- 28 Dec., 1858. 31. Did you see any dray loads for the "Louisa"? One dray from the grocer's.
32. When did the crew ship—that day? The day before we sailed.
33. Are you sure of that? Yes.
34. You are quite sure of that? Yes.
35. Did they come down altogether? They came down that morning; they went on board the day before, but I do not know whether they stopped then.
36. You went on board at half-past nine in the morning? The first morning.
37. The second morning? I went about the same time.
38. Were the black crew there then? Yes, they were there then; but I do not know whether they had stopped there the night before.
39. Did they leave the ship after you went on board? I do not know.
40. Did you see Mr. Stewart on board before you sailed that day? In the evening I did, the two Mr. Stewarts and I think Captain Gibbes.
41. Any one else? I do not know who the other was; there was some person else; they were down in the cabin.
42. You knew those three gentlemen by name—the two Mr. Stewarts and Captain Gibbes? I knew them by seeing them.
43. How far did they go in the vessel? They went down to the Heads with her, and came back in the steamer.
44. Was any Custom House officer on board? I do not know.
45. You do not know whether the other person was a Custom House officer or no? No, I do not.
46. What time did you leave the harbour that night? At six o'clock we hauled away from the wharf; the steamer took us in tow then.
47. The gentlemen you have named, and some one else, left the vessel outside the Heads and returned to Sydney in the steamer? Yes.
48. Where did the "Louisa" go to then? Straight to New Caledonia.
49. How long were you making the passage? Three weeks I think.
50. Where did you touch at New Caledonia? In Port de France.
51. Had you any sickness going down? One.
52. Who? The mate.
53. Who was the mate? A black man.
54. One of the Kanakas? Yes.
55. Did he get better? He died on the passage up, when we were off Sydney, the day before we reached the harbour.
56. He was taken sick on the passage down and remained sick till the day before you came into Sydney Harbour, and then he died? Yes.
57. What was done with his body? It was thrown overboard.
58. How long did you remain at Port de France? A week; we went in on Monday and sailed on Tuesday in the following week.
59. What cargo was landed there? Some cases; I only saw some cases going on shore, for I was down below.
60. How many? I cannot say.
61. What kind of cases? Square cases—brandy, or something.
62. Were they small square cases? Yes.
63. You do not know what they contained? No.
64. How many of them were there—one or two boat loads? Yes. When we went out of port, going down, we went alongside a small island and landed some empty casks.
65. How many? Forty, I think.
66. Was that all you saw landed from the vessel? That was all I saw.
67. Do you know what a rum cask is? Something like a beer cask.
68. Did you see any casks of that kind landed at Port de France? I do not know whether there were any of them landed.
69. Did you see any of them landed? No.
70. You only saw empty casks landed? There might have been some full.
71. How long were you in discharging cargo? They began at eight, and left off at four. We went to one wharf and left it at twelve o'clock, and then went down the harbour and discharged the rest.
72. What did you do after the "Louisa" came into Port Jackson? I left her that night.
73. Where did you go to then? To my uncle's.
74. How long did you remain at your uncle's? A day.
75. Where did you go to from there? To Mr. James Stewart's.
76. Where did he live? At Pyrmont.
77. Was this the same Stewart with whom your sister lived? Yes. I left, and then went to Mr. Soares'.
78. How long did you remain with Mr. Stewart? About a week or two.
79. Who is Mr. Soares? A Custom House officer.
80. How long did you remain at Mr. Soares'? Three weeks or so—I don't know.
81. Where did you go when you left him? On board the "Martha."
82. Who sent you on board the "Martha"? Mr. Soares sent me down with a boat with some cases and some things for Mrs. Stewart.
83. Did you go on board the "Martha" with those cases? Yes.
84. Did you come ashore? No; I stopped on board the same night, and next morning went away.
85. Did you know you were going away next morning? No.
86. When did you know first that you were not going on shore again? Just as they were hauling away.

87. Who told you then? My sister, who came with Mrs. Stewart to the vessel.
 88. What did your sister tell you? She did not say anything, only "good bye."
 89. Did she tell you where you were going? No; no one knew where they were going.
 90. You went on board with some cases, did you? Yes, for Mr. Stewart.
 91. Did you see Mr. Stewart on board that night? Yes.
 92. Any one else? Some man on deck.
 93. What man? I think it was Mr Soares.
 94. What makes you think it was him? Because it sounded like his voice.
 95. You did not see Mr. Soares? No
 96. You heard him when you were below? Yes.
 97. And you think it was him from his voice? Yes.
 98. When did the "Martha" sail? The next morning, Saturday morning, the 6th November, I think it was.
 99. Was Mr. Stewart on board when she sailed? No, only Mrs. Stewart and the children.
 100. When did Mr. Stewart come on board? He met us at the Heads in a boat.
 101. What kind of boat, a waterman's boat? Yes.
 102. What time was this in the morning? About nine or twelve. I cannot say what time.
 103. It was in the morning? Yes, before dinner.
 104. Where did you go to in the "Martha"? To Howe's Island.
 105. How long were you between Sydney and Howe's Island? Two weeks, I think.
 106. When you arrived at Howe's Island what took place? Mr. Stewart got some things put on board the "Louisa."
 107. You found the "Louisa" there? Yes; she was waiting for us.
 108. How do you know she was waiting? Because Mr. Stewart was looking for her.
 109. What did you put on board her from the "Martha"? Cases of flour and spirits.
 110. Anything else—preserved meat or anything? Yes, there was, in the cases.
 111. How long did you remain by the "Louisa"? About two hours.
 112. Who left the "Martha" to go on board the "Louisa"? Mr. Stewart, Mrs. Stewart, and the children.
 113. Did they want you to go? They wanted me to go, and I would not.
 114. You returned in the "Martha" to Sydney? Yes.
 115. You are quite sure as to the time the mate died—it was the day before the "Louisa" came in to Sydney? Yes, I think it was the morning of the day we came in to Sydney.
 116. *By Mr. Browne:* Did you see anybody else on board the "Louisa" at Howe's Island? Mr. William Stewart and Captain Nicholson. Nicholson came on board the "Martha" and went with us to the Manning, and then came to Sydney and left for Hobart Town.
 117. Did you see anything of Mr. Stewart's brother? I saw William Stewart on board the other vessel.
 118. And it was James Stewart that went down in the "Martha"? Yes.
 119. You did not go on board the "Louisa," did you? No.
 120. What sort of cases did you bring down from Mr. Soares' house? A case of clothes and things—a barrow load.
 121. Did either of the Mr. Stewarts come to Mr. Soares' house during the fortnight you were there? No.
 122. You did not see Captain King on board the "Louisa" at Howe's Island? No; they said he had left her outside, and gone away in another vessel and come to Sydney.
 123. *By the Chairman:* Were the same crew on board the "Louisa" at Howe's Island as those who went away on the first voyage? Yes, except the captain and mate. There was a white mate and white captain.
 124. Who was the mate? Nicholson.
 125. He left and came up with you? Yes.
 126. Have you seen the Stewarts since? No.
 127. Have you seen old Mrs. Stewart since you came back? Yes, once.
 128. Did you call upon her, or did she send to you? She sent to me. Some captain came to me and took me to Mrs. Stewart.
 129. For what purpose? I do not know for what purpose; he said she wanted to see me.
 130. Did you see her? Yes. She did not ask me any questions; she wanted me to stop there.
 131. Where are you living now? You will always find me where I was this morning—at the "Wheat Sheaf."

G. McDonald.

28 Dec., 1858.

THURSDAY, 27 JANUARY, 1859.

Present:—

CAPTAIN WARD, R. E., IN THE CHAIR.

H. H. BROWNE, Esq.

JOHN McLERIE, Esq.

John Garvan, having been called in and examined, makes the following statement:—

I am one of the messengers of the Customs Department, and am employed, with another messenger, to take from the Custom House all entries to the landing-waiters of the different wharfs, and also to keep account of the time when I do so take any particular entry. I and the other messenger go alternately on this duty—first one and then the other—during the day. The times when the entries are so taken out are, half-past eleven, a quarter to one, two o'clock, and three o'clock. I know the book produced by the Chairman; it is mine, and is kept in order to shew at what time of the day the landing-waiter receives the entries. From this book it will be seen that several entries (beginning with that numbered as 1311) were given to witness, for delivery to the landing-waiter on the Circular Wharf;

John Garvan,
27 Jan., 1859.

John Garvan, I had them to deliver at a quarter to 1, p.m., on the 2nd of September last; the entry numbered 1311 was one of the entries handed to me for delivery at a quarter to one o'clock. I have no doubt but that I did take out and deliver the entries—noted in this book as having been so taken out—to the landing-waiters, at a quarter to one o'clock on the above mentioned day. I took them from the Long Room of the Custom House, and got them from three different clerks—from the Export Clerk, from the Import Clerk, and from the Cashier. These entries are generally laid out ready for me—some on the desk, some perhaps left in the drawer. I ask the clerks for them. The Import Clerk always lays out his for me on the corner of his desk. I get them, if they are not laid out for me, when I ask for them—all those ready to go out up to that particular time. I have sometimes left behind me an entry which has been passed. I take out every entry when made out, except, perhaps, the last entry of the day. I observe the item 1311, entered in this book under the date of the 2nd of September last. It was given to me at a quarter to one o'clock on that day. The book is kept by me, and receipted by the landing-waiter, and I believe the other messenger keeps a similar book. These numbers are those belonging to all the entries which were taken out by me at a quarter to one o'clock on the day referred to. All the entries here noted in my book I took to Mr. Ormsby on that occasion. There are entries taken by me which do not appear in the book as having been received by landing-waiters; in the absence of those officers, weighers, and messengers, on the wharfs would initial and receive such entries, but would not sign my book.

James Powell, having been called in and further examined by the Board, makes the statement hereafter following:—

J. Powell,
27 Jan., 1859. The Chairman having informed him that copies of all the export entries passed at the Customs on the 2nd September last have been obtained by the Board; and that of these they are informed that numbers 1314 and 1315 were made out by the firm in which Mr. Powell is a partner,—requests, on behalf of the Board, that Mr. Powell will oblige by stating at what hour the entries, numbers 1314 and 1315 went out? In reply to this, and to other questions, Mr. Powell states:—I am afraid I cannot exactly say whether numbers 1314 and 1315 went out before or after one o'clock. They were certainly passed after twelve o'clock, and I have every reason to believe that they did pass after one. The firm with which I am connected generally pass drawback entries in the afternoon, when there is more time to attend to them. I am unable to see any data on these drawback entries which would lead me to infer at what time these entries were given. I think it looks strange that the free entry, 1313, should have been passed before the bonded one for the same wharf. I examine the messenger's book produced; I see there an export entry, No. 1311, having reference to free goods, which is said to have been taken out by the messenger at a quarter to one. In connection with the fact of that entry in this book, I feel no hesitation in saying that I must have passed 1314 and 1315 after one o'clock. The entry 1313 is a free entry, and must have been passed after one o'clock. That is my belief. Number 1316 (for the eight half-tierces of tobacco) must consequently have been passed after one o'clock, p.m., on the 2nd. At a quarter to one o'clock, number 1311 was the last entry passed as regards its number; therefore, 1316 must, of course, have passed after that time.

Charles Nicholson, having been called in and examined, makes the following statement:—

C. Nicholson,
27 Jan., 1859. I was for some time in the service of the Hobart Town Government, as master of the Colonial schooner "Beacon." A short time since the brigantine "Louisa" came to Hobart Town, and I was at that place at the time of her arrival there. I was employed on board the "Louisa," being engaged as mate by Captain King, for a trading voyage to the Islands. I shipped in the "Louisa" accordingly, and sailed in her from Hobart Town, on Saturday, the 23rd of October last. The "Louisa" at that time had some cargo on board—some tierces of tobacco having been transhipped on board from another vessel after I joined. I sailed from Hobart Town in the "Louisa" under the command of Captain Logan, as Captain King intended to leave, on account, as it was stated, of ill health. The Custom House officers, however, would not allow Logan to clear out the vessel in his own name. Mr. Darch, of the Customs there, would not sanction such an arrangement unless the ship's papers and documents were made out afresh in Logan's own name. Captain King accordingly sailed from Hobart Town in the "Louisa" in reality as a passenger—the actual command being in the hands of Mr. Logan, formerly chief mate. I found Logan on board the "Louisa" when I joined her at Hobart Town, but do not know how long he had been there. The "Louisa," after leaving Hobart Town, first fell in with a schooner called the "Pilot," bound for Melbourne. Captain King was put on board the schooner, and the "Louisa" afterwards sailed on and went to Jervis Bay. She anchored in that bay, and remained there about eleven hours. She anchored late in the evening, and got away on the following morning. The "Louisa" had no communication with any vessel before she came into Jervis Bay after parting from the "Pilot." At Jervis Bay she communicated with a small fore-and-aft schooner called the "Spec." The nature of that communication was the reception on board the "Louisa" of Mr. William Stewart, who had with him in the "Spec" a quantity of ship's stores, which were placed on board the "Louisa." The "Louisa" landed nothing at Jervis Bay, and did not hold any communication with the shore at all. The "Louisa," when Mr. William Stewart and the stores were on board, went away to Howe's Island. During the passage of the "Louisa" to Howe's Island she fell in with only one vessel—the "Aladdin," a whaler from Hobart Town. Captain Macarthur, in command of that vessel, came on board, and was told that the "Louisa" was the "Mary

"Mary Anne" from Hobart Town, bound for the Feejees. The name of "Mary Anne" C. Nicholson, was, as I think, the name that Mr. William Stewart purposed to call the "Louisa" if she met any other vessel—so I was given to understand. That was the only time the name was so given, but I believe the "Louisa" was to have been again so called had she met other vessels. After the "Louisa" had made Howe's Island we found the "Martha," ketch, near that spot. On board the "Martha" was the other Mr. Stewart, having with him his wife and two children, and some more ship's stores. I left the "Louisa" off Howe's Island, and proceeded in the "Martha" to the Manning River. From the Manning River I afterwards came on in the "Martha" to Sydney. The reason I left the "Louisa" was, because Mr. Stewart told me that he was going on a long cruise, where nobody would find him, and that he might possibly be away for two or three years. I did not feel at all disposed to join in any such cruise as that, and told him so. He agreed to allow me to leave, and could not have very well helped himself, for I would not have stopped. I cannot tell where they meant to go. My own idea is that Mr. Stewart purposed to go to the North Pacific, to California, China, or some such place; for he asked me whether I had any charts of the North Pacific. I did ask him where he was bound, and he told me he did not know; not liking perhaps to tell me, because I was leaving. Up to the time that I left the "Louisa" no tobacco had been taken out of her. The "Martha" brought no tobacco to the "Louisa," but brought cases of spirits for ship consumption. The tobacco on board the "Louisa" was all put on board at Hobart Town. It was done openly, everything seeming to be perfectly fair and above board. Captain King left the "Louisa" under a plea of sickness. It was at first not quite a sure thing that Logan would feel himself competent to take charge of the vessel; if he did not do so, Captain King intimated to me that the command would be offered to me. There was nothing at all in the manner in which I was shipped that would lead me to suppose that there was anything wrong. When out at sea, from what I saw I began to have some suspicions. After Captain King left, Captain Logan went by a letter of instructions. By this he was directed to go to Jervis Bay on the 6th of November, and, if no vessel should there be found, he was to go out again to sea and stand in again on the 8th. This struck me as something unusual and suspicious. I believe the "Spec" was bound to Kiama. No spirits were brought down in her by Mr. William Stewart—only biscuits and beef. We ran rather short of spirits before we arrived at Howe's Island. When I saw Mr. James Stewart and his wife come up to meet us in the "Martha" I was confirmed in all my previous suspicions. Two boats came off from Howe's Island before the "Martha" came up to us, and I heard Mr. William Stewart say that the pigs were too dear there, and that he would not purchase any, but would buy some at Norfolk Island. Mr. Logan and myself were the only two white men belonging to the "Louisa." The rest were all men of colour, and (except the cook, who was a negro,) all of them Kanakas. I believe the cook had been with the "Louisa" for two voyages. The "Louisa" had nothing on board besides the transhipped tobacco but stone ballast. I was told that Mrs. Stewart was the sister-in-law of Mr. William Stewart. Captain Logan was only appointed to the command of the "Louisa" at Hobart Town by Captain King; his name was not in the ship's papers as captain, and that was why Captain King had to sail out from Hobart Town with him in the "Louisa." Mr. Stewart was in Hobart Town at the time that the "Louisa" was there, but he did not come on board whilst I was on board. He was coming off one day when Captain King met him, and they both returned to the shore.

Remarks of COLONEL GIBBES on perusal of his Second Evidence.

Page 108,	reply to Question 26,—	If considered wrong, it would long ago have been noticed by the Commissioners.
" 108,	"	29, I do not remember an instance.
" 108,	"	30, There never were shipping bills, whatever there may be now, in any Colony that I am acquainted with.
" 109,	"	35, I am not aware of any <i>Treasury</i> Order on this subject; but he changed the system, and as he had authority to issue orders, they were carried out.
" 109,	"	45, I have already said there is no <i>Treasury</i> Order.
" 109,	"	47, Every change and circumstance <i>was</i> reported.
" 109,	"	51, I still think it was necessary, but understood that Mr. Collier <i>did</i> give a rummage certificate, and the Board have got it.
" 110,	"	59, I think this is wrong.
" 110,	"	61, And those who know the nature of business here will agree with me. In the case of the "Fair Barbadian," Mr. Dunlop was competent, but he left the Colony, and the bond was never satisfied.
" 110,	"	69, <i>After the words</i> "I do not see any objection"—I do not see that it is so very important a duty. This was one case in a thousand, and unforeseen; but as it turned out bad, vast stress is laid upon it.
" 111,	"	81, But Mr. Manton was never intended by me to do all these duties.
" 111,	"	82, And, if I am rightly informed, Mr. Crook also.
" 111,	"	89, I will beg to ask if at the time these occurrences took place the clerks in the Colonial Secretary's Office, the Treasury, or Immigration Office, had any printed instructions?
" 111,	"	91, <i>After</i> "requires it" for duty.
" 111,	"	93, Except that if a merchant requires a cask of brandy from bond without a regauge he must pay on the original gauge. If he thinks there has been waste, the locker is bound to regauge.
" 111,	"	96, <i>After</i> "Mr. Smith's letter," What then?
" 111,	"	97, <i>After</i> "any thing" on the second occasion.
" 111,	"	99, But I believe she went out at 5 o'clock, which is not night.
" 112,	"	110, I have made inquiry, and find I was right, and that it was Capt. Roche's practice.
" 113,	"	123, But there always is one appointed.
" 114,	"	145, But I think that book should be kept by the Inspector of Warehouses, who appears to have very little to do, and Mr. Nash is over-worked.
" 114,	"	149, At any rate each locker can at any time tell what is in his own bond, by the new mode of book-keeping.
" 115,	"	172, The "Louisa" has not been sold, according to my Register Books.

Explanation in answer to the first part of Mr. Still's Evidence, as printed in page 116, and sent to me for that purpose.

Question 1. I have no recollection of having said I should report Mr. Newton's conduct to the Government, but as Mr. Still quotes my Minute, without doubt I did.

Nevertheless I changed my opinion as to the necessity of so doing, in consequence of the merchant whose goods were taken out of Bond coming forward and assuring me that it *was* at his request that Mr. Newton applied for the samples he particularly wished to have, not being aware that a sampling order was necessary; and on further inquiry, it did not appear to me that Mr. Newton had attempted to *intimidate* the locker.

According to English practice, established tide-waiters and lockers are of the same grade.

I therefore considered that suspension from duty and from pay for five days was sufficient punishment for the offence.

Question 2. When an officer is suspended for a fixed period, he returns to duty at the end of that time.

Mr. Newton was suspended on the 21st August, and returned to duty on the 26th of that month.

There are only four established tide-waiters, who are the real export officers.

Mr. Russell is permanently employed for drawback goods; Mr. Brown was acting as a locker, and Mr. Newton was therefore the first for turn on the 27th.

He was consequently, I presume, appointed to take down to the "Louisa" the five hogsheads of rum, and four half-tierces of tobacco on that day; a "most important delivery" in one day.

But whether important or not important, had Mr. Still at that time any suspicion about the "Louisa"?

If he had, I believe him to be the only official person of any standing who was of that way of thinking, until some time after the departure of that vessel.

Why then should not Mr. Newton have been appointed on the 27th August to do the duty required?

6. I cannot close these remarks without expressing my surprise that when Mr. Still gave the answer he did to the sixth question he was not called on to shew why he considered some influence was used with me to procure the restoration of Mr. Newton, and by whom; for no one did intercede for him, except the gentleman alluded to—a Mr. Gilfillan.

Since writing the above, I find that, at the request of Mr. Powell, Mr. Newton was put on export duty at his request, on the 26th, to convey a box of tobacco to the "Anna Lange," there being no other officer at liberty.

J. GIBBES, Collector.

1858-9.

Legislative Assembly.
NEW SOUTH WALES.

CUSTOMS DEPARTMENT.

(APPENDIX TO THE REPORT OF THE BOARD OF INQUIRY INTO CHARGES
AGAINST CERTAIN OFFICERS OF, IN CONNEXION WITH THE "LOUISA.")

Ordered by the Legislative Assembly to be Printed, 11 February, 1859.

(Appendices 2, 3, 4, 7, 8, 9, 18, and 26, exhibit merely the usual routine forms of the
Customs Department, and are not printed.)

APPENDIX 5.

Sydney, 23 November, 1858.

Sir,

Herewith I enclose, for your perusal, the clearance of the "Louisa" on the 2nd September last, which document was forwarded to me by my correspondent at Port de France, who advises me that the clearance paper in its present form was received by the authorities at that port; you will perceive that the pen is run through all the bonded goods, with the exception of 50 cases claret and 4 half-tierces of tobacco (but I am advised that it was only 4 kegs of tobacco) that were landed there, the master of the "Louisa" having stated that he had sold the rest of the cargo at the Feejees.

I will feel obliged by your returning this clearance to me in time for me to forward it per "Spec" to the French Authorities, from whom it was received.

I am, &c.,

CHS. SMITH.

To the Chairman of the
Board of Inquiry on
Schooner "Louisa."

Port of Sydney, New South Wales.

These are to certify to all whom it doth concern, that F. King, Master or Commander of the "Louisa," burthen seventy-four tons, mounted with no guns, navigated with nine men, British-built, and bound for New Caledonia and South Sea Islands, having on board,—

31	Two hundred cases Geneva	781 $\frac{3}{4}$ galls.	}	From
542	Thirty one hhds. and fourteen q. casks Brandy	2,068 "		
559	Eight half tierces Tobacco	3,101 lbs.		
442	Five hhds. Rum	276 galls.		
547	Twenty eight hhds. Rum	1,576 "		
562	Fifty cases Claret	100 "		
506	Four half tierces Tobacco	1,554 lbs.		
563	Fifteen q. casks Whisky	437 galls.		

Warehouse under bond. Sundry free goods as per manifest annexed.

hath here entered and cleared the said vessel according to law.

Given under my hand at the Custom House, at the Port of Sydney,
in the Colony of New South Wales, this second day of Sep-
tember, one thousand eight hundred and fifty-eight.

CH. H. MANTON,

pro Collector of Customs.

True copy of "Louisa's" manifest,

E. W. WARD.

2 Feb., 1859.

General Clearance

F. J. KING.

CH. H. MANTON, for Collector.

APPENDIX 6.

Sydney, 24 November, 1858.

Sir,

I do myself the honor to enclose two letters and a certificate for your inspection, and I beg that you will, after examining them, please to return them to me (Custom House.)

I could, no doubt, produce certificates from nearly all the Officers of Customs to the same effect as the above, but I decline to put myself under any obligation, and will, therefore trust myself to your good judgment.

The evidence I have given I am willing to give again on oath.

I have, &c.,

Captain Ward,
&c., &c., &c.,
Mint.

CH. H. MANTON.

My dear Manton,

If you will have the goodness to come aboard the "Louisa," at the Grafton Wharf, at a quarter past four o'clock this evening, and there receive her manifest, &c., and clear her, I shall esteem it a *very great favor*, and pay you £1 1s. for your trouble.

Your's truly,

W. STEWART.

September 2, 1858.

Please let me have a reply.

W. S.

Custom House,
25 November, 1858.

I hereby certify that Mr. Manton has on more than one occasion acted for me during my absence, with my consent and approval.

THOS. FANCOURT,
Jerker.

To the Collector of Customs.

7 October, 1858.

Sir,

I have the honor to state, that the Shipping Master has ruled that the voyage of the "Louisa"—(which has put into this port under difficulties, which have been explained to you.)—terminates here, as far as the articles of the crew are concerned, and that she cannot go to sea without a fresh set of articles being signed. This decision has been come to at a
late

late hour, and as great loss has already accrued from bringing the vessel so far out of her track, I have to request that you will give permission for the vessel to be cleared at the Customs after hours this day.

I have, &c.,

J. STEWART.

Permission granted,

J. GIBBES, Collector.

7 October, 1858.

Custom House, Sydney,

1 December, 1858.

Sir,

I respectfully beg to inform you that I questioned Mr. Fancourt this morning, in the Long Room, relative to some evidence given by him with regard to the jerking of the "Louisa's" manifest; and he stated, in the presence of Mr. Mowle, that he could not swear to the same being true.

I have, &c.,

CH. H. MANTON.

To Capt. Ward,

&c., &c., &c.,

R. Mint, Sydney.

Custom House, Sydney,

20 December, 1858.

Sir,

According to Mr. Fancourt's evidence, the Rummage Certificate for the "Louisa" must have been given by Mr. Collier on the afternoon of the 2nd September; if such is the case, Mr. Collier ought to know what goods were on board at that time. As I feel positive that the ship was not rummaged, I write this merely to shew that the certificates in question are not genuine articles, and also to prove that the amount of stores supposed to be remaining on board are furnished by Mr. Fancourt, so that blank forms may be filled up by the Tide Surveyor.

I have, &c.,

CH. H. MANTON.

To

The Chairman of the Board of Inquiry
on the "Louisa."

APPENDIX 10.

George O'Brien :—I am a cart proprietor, and drive a cart myself. Mr. Stewart employed me to take goods out of different bonded stores and take them to the Grafton Wharf. I remember taking down on one occasion, in two loads, eight half-tierces of tobacco, from Walker's Bonded Stores to the wharf, in company with Mr. Newton, the Custom House Officer. This was, I think, between eleven and twelve in the morning. I do not remember on what day it was. My instructions were to deliver the goods on the wharf, to be shipped on board the "Louisa." A previous load I delivered I saw put on board a ship, I believe the "Louisa," but although I unloaded this tobacco on the same spot I did not see it shipped. I took down a load from the Chilian Bond, consisting of four half-tierces of tobacco and three hogsheds of spirits to the "Louisa," to be shipped, but as there was no one to receive them I brought them back to the store. Mr. Newton was with me all the time, and I brought the load back by his directions. On another day I, with my own drays and hired ones, took about thirty loads from the following bonded stores, namely, Gilchrist's, Lamb's, the Chilian, and Pollard's Bonds, to the Grafton Wharf. Some goods, consisting of red cases (I believe of gin) taken from Lamb's Bond, were removed to the Chilian Bond. The Custom House Officer did not go with every load. He accompanied me the first time, on this thirty load day, to shew me where to leave the goods. Mr. Newton was the Custom House Officer I speak of. I do not remember on what particular days these different loads, or numbers of loads, were taken, but I am almost certain that the eight half-tierces of tobacco were not taken on this last-mentioned day; it may have been on that day, but if it were not it was on the day previous. I am certain that it was not after this bustling day, because I did not after that day deliver any tobacco at the Grafton Wharf for the "Louisa," for Mr. Stewart. I do not know the names of any of the draymen I employed on this occasion, nor do I think my man docs. My man's named John Sheppard.

GEORGE O'BRIEN.

APPENDIX 11.

Sydney, 27 October, 1858.

My dear Sir,

Referring to our conversation yesterday respecting the case of smuggling now under investigation, I find that Lamb, Parbury, & Co. sold, on the 31st August, 250 cases gin to William Stewart, and not 200 as supposed. I instructed the superintendent of Lamb's Bonded Stores to give me every information respecting the removal of this gin. His report is enclosed, and perhaps may assist in the investigation now being instituted.

I remain, &c.,

WALTER LAMB.

The Honorable

Robt. Campbell, M.L.A.

[Enclosure.]

CUSTOMS DEPARTMENT.

[Enclosure.]

Lamb's Wharf,
27 October, 1858.

Dear Sir,

I have made every inquiry respecting the 250 cases Geneva purchased by Stewart, and the deliveries, I find, were as follow :—

E—200 Cases delivered on an Export Order to be shipped per "Louisa." H. Abbott is the name of the person by whom the export was nominally made—Newton was the Export Officer, and I believe a man named O'Brien was the drayman employed. 100 cases went in the morning, and the remainder in the afternoon of the 2nd September.

„— 50 Cases delivered on a Removal Order, also on the afternoon of the 2nd September, to the Chilian Bond. The officer's name I do not know, nor can I discover who the carter was.

Walter Lamb, Esq.

I am, &c.,
JOHN F. PAIGE.

APPENDIX 12.

APPENDIX 13.

Custom House, Sydney,
26 November, 1858.

Sir,

I have the honor to address you with reference to the charges brought against me in your examination yesterday; I therefore have the honor to request you will cause me to be furnished copies of the information, stating parties names, time, place, and date, in order I can call such witnesses in my defence as may be necessary.

I have, &c.,

Captain Ward, R.E.,
&c., &c., &c.,
Colonial Secretary's Office.

J. DE COURCY BREMER.

APPENDIX 14.

MEMO.

It is reported by the Inspector General of Police to the Government that the Messrs. Stewart, mixed up in the frauds upon the Customs, have clandestinely left the Colony; and that Mr. Soares, a locker in the Customs, has permitted their furniture and effects to be removed to his charge, which shews that he was cognizant of their intention. Intimate, therefore, to the Collector that Mr. Soares be called upon to explain the charge, and to submit his report as speedily as possible; for the fact of an officer being privy to such a transaction, and intended to defeat the ends of justice, demands the immediate notice of the Government.

Rr. C.

To Mr. Lane.

10 Nov., 1858.

The Collector of Customs.—To be returned.

11 Nov.

Urgent. H. L.

Inspector of Warehouses requested, in writing, to send for Mr. Soares, the locker, at 9:40 A.M.

J. GIBBES, Collr.

11 Nov., 1858.

Mr.

Mr. Soares not having, he says, received any earlier notice, was not in attendance until one o'clock, when he was examined by the Landing Surveyor and myself, and made the accompanying statement.

J. GIBBES, Collr.
FREDK. GARLING, L. Sur.
11 November, 1858.

Mr. Soares states, that of Mr. Wm. Stewart and his affairs he knows very little. He does not know whether he has left the Colony or where he is. As to the furniture, the greater part of it does not belong to Mr. Jas Stewart, but is the property of his mother, who lent it to him when he took a house at Pymont.

Further, that he, Mr. Soares, is the person who had the furniture conveyed from Balmain to Pymont, by the direction of Mrs. Stewart.

On Saturday last, the 6th inst., he saw Mr. James Stewart, about 9 o'clock A.M., at the premises in Macquarie-place, since which time he has neither seen or heard anything of him.

He proceeds to say that he was not, and is not, aware, that there is any charge against Mr. J. Stewart. That when he went home on Saturday, he found Mrs. Stewart, senior, at Mr. James' house; she told him that James Stewart had gone away without giving her any intimation of what he was going to do.

At the same time she said, that he told her he should no longer occupy the house, and that she could take away not only the furniture that was her own, but that which was his also; and that if there was more than she required she could sell it.

He, Mr. Soares, therefore, assisted in removing the furniture to her house, but from the lateness of the hour was obliged to take a part of it to his own until a more convenient opportunity offered of conveying it to hers; which, however, he has not yet done. His (Mr. Soares) wife is Mrs. Stewart's daughter, and he considered it a duty he owed to her to assist her in every way he could, as he had done on every previous occasion that he was called on to do.

He can safely assert that Mr. Wm. Stewart had no interest in the furniture alluded to.

He may add, that he himself had no control whatever over the furniture, and therefore merely acted as he was requested by Mrs. Stewart, senior; it was, consequently, not by his authority or permission that it was moved.

G. SOARES.

Having received this report without any comment from the Collector, I desire to know whether Colonel Gibbes has any observations to make upon it.

The Collector of Customs.
12.
H. L.

Rt. C.
12 Nov.

MEMO.

When the Collector's answer is returned, let the papers relating to Mr. Soares be sent to the Board of Inquiry sitting upon Customs Frauds, for a report upon his conduct.

To Mr. Lane.

Capt. Ward, Chairman.
12 Nov.
H. L.

Rt. C.
14 Nov.

I did not consider that any observations from me were necessary. Agreeably to the order of the Minister of Finance, I called on Mr. Soares to explain his conduct in the charge brought against him by the Inspector General of Police, and his answer is the statement sent in.

It is impossible for me to know whether that statement is true or false.

If the former, I do not see any peculiar impropriety of conduct on his part.

He forms by marriage a part of the family of the Stewarts; and as neither of those men have as yet been convicted, he appears to consider that the Government had no lien on their goods, and thus took charge of them on account of their mother.

If, on the other hand, his statement is false,—if he knew beforehand that those men had left the Colony clandestinely, to avoid the consequences of the alleged acts of smuggling on their part, and that their property was liable to be attached, I should say that his conduct would be perfectly unjustifiable.

J. GIBBES, Collr.
12 Nov., 1858.

CUTTOMS DEPARTMENT.

APPENDIX 15.

Custom House, Sydney,
185 .

SIR, I beg to inform you, that the Books of the Ship
from , are in my hands, and that the vessel is now ready
for rummaging.

TO THE
TIDE SURVEYORS,
SYDNEY.

A. B.
Customs' Jerker.

[This document is sent to the Tide Surveyor, who, after rummaging the ship *Inwards*, sends the accompanying certificate to Jerker, who files it, and jerks the papers. The master then notifies his intention to load, and proceeds to do so. When ready for sea the Tide Surveyor again boards the vessel, and ascertains that the *stores* are correct, and the vessel is cleared,—the former rummaging certificate being filed with the Inward papers kept in the office; but, as I before said, does not go with the vessel, having nothing to do with the *Outward cargo*.]

J. G.

NEW SOUTH WALES.

PORT OF SYDNEY,

THIS is to Certify, that I have carefully rummaged the
Ship
Master, from
and have left on board no Goods subject to duty, except such as are specified underneath.

Dated day of 185 .

C. D.
Tide Surveyor.

Rummage Certificate.

APPENDIX 16.

(No. 166.)

Customs, Sydney,
26 October, 1858.

Sir,

I have the honor to transmit herewith, for the information of the Honorable the Minister of Finance, copy of an order which I have considered it necessary to issue for the protection of the Landing-waiters of this department—or rather the revocation of a former order which should never have been given.

I have, &c.,
J. GIBBES,
Collector.

The Secretary to the Treasury,
&c., &c., &c.

To be referred to the Board of Inquiry just appointed.

Captain Ward,
28th,
H. L.

Rt. C.
27 Oct.

In the year 1846, instructions were given by Mr. Barnes, Acting Surveyor General of Customs, that all Export Warrants, or rather Delivery Orders, should be signed by a Landing-waiter as a matter of form, to make the document perfect, according to the English practice—even though they might not have seen the goods shipped—and that system has ever since been carried out:—the Landing-waiter depending on the three signatures of the Locker as to delivery, the Chief Officer or Master of the vessel as to the receipt of the goods on board, and the Export Officer as to their shipment.

Such a course is suitable to London, Liverpool, and other large ports at home, where there are many Landing-waiters at the same wharf, and generally one to every ship.

Here we have nine Landing-waiters to twenty-three sufferance wharfs,—one of those having charge of Walker's, Lamb's, and Willis' at the same time (all wharfs of great business, and separated from each other); one, of Towns', Moore's, Ebsworth's, and Smith's; and two, the whole range of Darling Harbour, from the Grafton Wharf to the Albion Wharf, including the three steamer wharfs, and all others on that line.

It must therefore be evident, that, except in a few instances, the Landing-waiters cannot see, or attend to the shipping of goods under bond, and that it is consequently most unjust to make them responsible for that which they neither do or can see,—and I hereby revoke that order, except in such cases as the shipping of any goods under bond may have taken place in their presence.

J. GIBBES,
Collector,
Custom House, Sydney.

FOR THE

APPENDIX

CUSTOMS DEPARTMENT.

APPENDIX 17.

Custom House, London,
20 March, 1852.

Sir,

With reference to the Board's Circular Letter of the 18th instant, apprizing you of the arrangements which have been made for the transfer to the Colonial Governments of the Establishments heretofore under the control and superintendence of this Board,—

I am commanded to direct you, upon the transfer taking place, to call in the Commissions and Instructions issued by the Board to the several officers in your Port and Survey, and to transmit the same, together with those issued to yourself, to the Board, for the purpose of being cancelled.

A true Copy,
J. GIBBES, Collector.

I am, &c.,
F. GARDNER.

Custom House, 9 December, 1858.

APPENDIX 19.

The Tide-surveyor will please withhold Mr. Alder's pay for the last month until he makes up his books of the "Fanny Fisher." He has had three sets of books issued, and his account is still incorrect.

It is of no use boarding him on a sugar ship in future.

FRED. GARLING,
Landing Surveyor.
December 30, 1857.

To the Tide Surveyors.

Mr. Alder having kept an irregular account of the delivery of the cargo of sugar ex "Fanny Fisher," on which vessel he was boarded as a tide-waiter, and having failed to rectify the error when called upon to do so, being at the time in a state of intoxication, and highly impertinent to the Landing Surveyor he is hereby dismissed from the Department.

J. GIBBES,
Collector.

The Tide Surveyors of Customs.

Custom House, Sydney,
6 January, 1858.

CUSTOMS DEPARTMENT.

APPENDIX 21.

My dear Ward,

Although I do not think that such an occurrence as you described would ever be likely to occur, in regard to a cart follower tearing up the removal order, and going off with the goods, &c., I wish to acquaint you that I have issued such an order, and made such arrangements as will make a step of that kind impracticable.

Very truly yours,

J. GIBBES.

10 December, 1858.

2 September, 1858.

To the Collector of Customs.

Sir,

I have the honor to request permission to remove the undermentioned cases of Geneva from Lamb's to the Chilian Bond, I having purchased them:—

^E Fifty cases Geneva, ex "Isabella C. Jones," Woodburn, Master, from London, 24th June, 1858, warehoused by Lamb, Parbury, & Co.

I have, &c.,

J. STEWART.

Permission granted, under the supervision of the proper officer.

W. N. LEWELLYN,

(For Collector.)

To Inspector of Warehouses.

2 September, 1858.

Received the within named fifty cases Geneva into Chilian Bond.

M. G. BROWN,

Acting Locker.

M. C. 29		D. NASH, Warehouse-keeper.

APPENDIX 22.

(No. 162.)

Customs, Sydney,

25 October, 1858.

Sir,

I beg leave to acknowledge the receipt, on Saturday the 23rd instant, of your letter of the 22nd instant, No. 1,098, stating that the Honorable the Treasurer declined to receive the overture of Mr. Stewart to enter into fresh bonds to replace those alleged to have been abstracted from the Custom House, and calling upon me to report all the circumstances within my knowledge, or which I can ascertain from inquiry respecting the abstraction of those bonds.

2. In reply, I beg say that I had, previously to the receipt of your letter, caused the fullest search to be made for the missing documents (two in number) without success, and made every inquiry into the circumstances of the case, without being able to obtain any clue to the manner in which the abstraction had taken place.

3. All export bonds have hitherto been in the custody of the Cashier—before whom they were executed—and were, or ought to have been, locked in a drawer in the inner part of the Long Room.

4. This room, however, is considered by the public as public property, and is therefore open, after the regular hours of business, to the reporters for the newspapers; to Custom House Agents, their clerks, and others; and as the head messenger is frequently absent on duty at that time, or assisting to clear the offices below, it is almost impossible to know who does enter the room; but this much I have learnt, that since the discovery of the loss of these bonds, the clerk performing Mr. Manton's duty during his absence on leave, has found,

on

on three several occasions, the desk or drawers of that seat open, when he had himself securely locked them before he left the house.

5. Some years back I had a correspondence with the editors of the leading newspapers, in consequence of my refusing admission to their reporters after 3 o'clock, against which they remonstrated, and, in the end, I gave the point up, although some of the ship's papers had every now and then been missed from the room.

6. I have now directed all export bonds to be executed before myself when I am present—when not (which is seldom the case) before the chief clerk, Mr. Llewellyn, with whom they are always to be lodged, his room not being open to the public unless he is there, and locked when away.

The Secretary to the Treasury,
&c., &c., &c.

I have, &c.,
J. GIBBES,
Collector.

(No. 169.)

Customs, Sydney,
27 October, 1858.

Sir,

I have the honor to transmit herewith a letter addressed to me by Mr. J. H. Maddocks, second clerk and Cashier in this department, dated the 23rd instant, in vindication of his conduct in respect to the loss of certain export bonds for the goods entered outwards by the schooner "Louisa," King, master, for New Caledonia, which were or ought to have been in his custody.

2. Mr. Maddocks has attempted, I think injudiciously, to cast the blame of this transaction on to the shoulders of his fellow-clerks.

3. In the 4th paragraph of his letter he says, "Mr. Manton cleared the 'Louisa' at 'after hours'"; that is to say at five o'clock p.m.

4. Such practice generally has been with my authority, following that of England, where vessels bound foreign are cleared up to ten and eleven o'clock at night, officers being appointed expressly for that purpose.

5. Mr. Maddocks, in the 5th paragraph, says that his initials on the export entry is the proof that bond has been entered into.

6. For this there is, as far as I am aware, no general or special order; and it must have been an arrangement made by himself with the clearing clerk; but I think a very good one.

7. In the 6th paragraph he says he found two entries initialled for the bond which he himself sent to me; also, a third initialled, but no bond; and goes on to say "the other 'entries are not initialled,'" which proves that I never received any bond or bonds for them.

8. But Mr. Maddocks is mistaken, as there were but three bonds for the whole cargo; one which he himself found on the file for five hogsheads rum and four half-tierces of tobacco; one for the eight half-tierces of tobacco, which is not forthcoming, and one for the remainder of the cargo, which is also missing.

9. In the 7th paragraph Mr. Maddocks says, "I am charged with the loss of certain 'bonds, but there is no proof that more than one is missing.'" Here again I think he is mistaken, as I have reason to believe there were three, as above stated.

10. In the 9th paragraph Mr. Maddock says, "I am charged with losing them, but 'have had nothing to do with the bonds and papers of the 'Louisa' since she cleared"; but assuredly he ought to have had, for he must have known that his predecessors, Mr. King, Mr. Llewellyn, and Mr. Webb, always kept the export bonds themselves in a press or drawer in the cashier's own compartment in the Long Room, and did not intrust them to the care of one of the messengers to stow away in a drawer remote from his own seat.

11. In the 10th paragraph Mr. Maddocks says, "the bonds are not left in my charge 'after they have been executed.'" But they should have been; for although they might of necessity be handed to a messenger to file or tie together, they are of too much importance to be left altogether in his charge, and should have been brought back to his (Mr. Maddocks') desk.

12. In the 12th and 13th paragraphs Mr. Maddocks says, "the agents and public 'have access to these bonds, and are allowed within the railing of the Long Room, &c.'" Without doubt the parties mentioned do intrude on the inner part of the Long Room, and do gain access to the different papers deposited therein, but not with my consent; and Mr. Maddocks and the other clerks know that I have repeatedly given orders that they should not be permitted so to intrude, and if they have been it must have arisen from want of firmness on the clerks occupying seats therein.

13. Mr. Maddocks in the 14th paragraph says, "I have to request that you will 'cause inquiry to be made as follows:—

" 1st. What right had some of the entries to be passed without my initials?

" 2nd. For what purpose had Mr. Llewellyn the 'Louisa's' bonds and papers in
" his possession?

" 3rd. Who declared to those bonds for the entries not initialled and now missing,
" and by whom were they signed?

" 4th. At what date had Mr. Llewellyn the 'Louisa's' bonds and papers in his
" possession?"

14. I have made these inquires, and beg to say that Mr. Llewellyn, the Chief Clerk in this department, who stands in much the same light towards me as Mr. Lane does to the Colonial Treasurer, would be perfectly justified in examining these bonds and papers, and having returned them to the custody of Mr. Maddocks, he was no longer responsible for them. His explanation is appended.

15. The first and third questions will be answered by Mr. Manton, who has been absent with leave.

16. Having now commented on the different paragraphs of Mr. Maddocks' letter, I hope I may be excused for adding a few remarks in regard to his career in this department.

17. He entered as junior clerk in the year 1841.

18. He has with diligence and attention worked his way up to the highest seat but one of the eleven clerks in this Custom House.

19. He has been faithful and diligent in the discharge of his duties, and may, perhaps, have relaxed more than was advisable in the strict keeping of these important documents, from the circumstance that the putting in suit an export bond is of so rare occurrence that during the twenty-four years I have had charge of the Customs in this Colony, only one export bond has been sued for, and that many years ago.

20. I therefore trust that the Government will take into consideration Mr. Maddocks' long services, and the circumstance that a Custom House is unlike any other public office, being open at all times to all comers, and that they will not visit him with their serious displeasure for one act of carelessness.

21. With regard to the abstraction of the bonds themselves, I have no opinion to offer. It is a most extraordinary occurrence; because they could not be worth one farthing to any person except the exporter, and he volunteered to replace them by fresh bonds if the Government wished it.

To

The Secretary to the Treasury,

Refer this to the Board of Inquiry upon Customs matter.

Rt. C. 28 October.

Captain Ward, Chairman.

28, H. L.

Waverly,

23 October, 1858.

Sir,

I beg to acknowledge having received, on the afternoon of Wednesday, the 20th instant, a notification from you, informing me that you were under the necessity of suspending me from office until further orders, in consequence of my not producing certain bonds for goods shipped on board the "Louisa" for New Caledonia, which you consider a serious neglect of duty.

2. I respectfully submit, that when the whole of the circumstances and facts are revealed, my suspension will be considered as a harsh proceeding towards me.

3. The facts of the case, so far as I am cognizant, are these.

4. The "Louisa" was cleared by Mr. Manton on the 2nd September, after office hours; the cargo consisted principally, if not altogether, of goods under bond.

5. On the 20th instant the "Louisa's" manifest was in your possession; you required the bonds, and sent the messenger to me for them. I handed to the messenger the only bond I could find; before doing so I asked for the "Louisa's" manifest and entries, in order to ascertain whether any other bonds had been given; my initials on the entries are the proofs.

6. I found two entries initialled for the bond I sent you; I also found a third entry bearing my initials, but could find no bond for this entry; the other entries are not initialled, which proves that I never received any bond or bonds for them.

7. I am charged with the loss of certain bonds, but there is no proof as yet that more than one bond is missing.

8. I was informed by you that Mr. Stewart was prepared to prove that bonds had been given for all goods shipped on board the "Louisa."

9. I was also informed by you that Mr. Llewellyn and Mr. Kelly had seen these bonds, and I heard Mr. Llewellyn further state that he had had them in his possession, that he had also had the "Louisa's" manifest, and compared the bonds with the entries, and the entries with the manifest. In fact, that he examined the papers of the "Louisa" and found everything correct. The question now is, what has become of the missing bonds? I am charged with losing them, but have had nothing to do with the bonds or papers of the "Louisa" since she cleared.

10. On this charge I am suspended.

11. The bonds are not left in my charge. After they are executed and signed, I hand them to the messenger, who places them on a file; the bonds remain on this file from the 1st to the last of the month, for reference. This has always been the practice. This file is locked up by the messenger at the close of the day. In the morning the messenger again places the file on the top of the drawers in which it is kept; these drawers stand within the railing of the Long Room, but are out of my sight; consequently, a bond, or bonds, might at any time be abstracted from the file without my knowledge.

12. The agents and the public have access to these bonds, and all other documents in the Long Room.

13. The agents, captains of vessels, merchants' clerks, and others, are allowed within the railing of the Long Room. I have on several occasions broughtt his before your notice, as I thought it ought not to be allowed.

14.

14. Having now furnished you with all the particulars I am in possession of with respect to the "Louisa," I have to request you will cause inquiry to be made as follows, viz. :—
- 1st. What right had some of the entries to be passed without my initials?
 - 2nd. For what purpose had Mr. Llewellyn the "Louisa's" bonds and papers in his possession?
 - 3rd. Who declared to those bonds for the entries not initialled, and now missing, and by whom were they signed?
 - 4th. At what date had Mr. Llewellyn the "Louisa's" bonds and papers in his possession?

15. As this matter has now become a public notoriety, I consider it will be but common justice on your part to lay this my statement of facts before the proper authorities.

I remain, &c.,

The Collector of Customs,
&c., &c., &c.

J. H. MADDOCKS.

To the Chief Clerk for explanation.

J. GIBBES,

Collr.

25 Oct., 1858.

Custom House, Sydney,

28 October, 1858.

Sir,

In explanation to Mr. Maddocks' questions respecting myself, I beg to state,—

1st. That Mr. Maddocks' initials are not required when the bonds are taken by another party.

2nd. That I took the bonds for goods shipped in the "Louisa" on the 2nd September, owing to Mr. Maddocks' absence from his seat.

I have, &c.,

The Collector of Customs,
Sydney.

CH. H. MANTON.

In reference to the explanation given by Mr. Maddocks in allusion to the missing bonds, I beg to state that my reason for examining the clearance of the "Louisa," and the Export Bonds for the dutiable goods shipped on that vessel, was that I was told by a Government Officer that no bonds had been given. Under these circumstances, I thought it my duty to see these documents, and I found that bonds had been given for all the packages enumerated in the outward manifest.

These bonds are filed in bundles of about fifty each, tied together with tape, two of these bundles (August and September) were examined in my room by myself and Mr. Kelly on Monday, the 27th September, after which I directed the messenger to take them back to Mr. Maddocks, who, I understand, found one of the bonds in question and gave it to the Collector.

I enclose Mr. Kelly's statement.

W. N. LLEWELLYN.

26 October, 1858.

MEMO.

The Export Bonds for the dutiable goods of the "Louisa's" cargo, King, master, for New Caledonia, were examined by Mr. Llewellyn in my presence on the 27th ultimo, and then given by him to Wilkins, the Head Messenger, to deliver to Mr. Maddocks, the Cashier, in the Long Room.

Custom House, Sydney,
27 October, 1858.

R. KELLY.

My dear Ward,

I have no wish to hurry Mr. Palmer, who has enough to do with his own branch of the public service, but it is now a fortnight since my evidence was taken, and I have not received a copy of it for examination and amendment.

I have spoken to Campbell this morning, and he said you ought to procure clerical assistance, for of course all other witnesses are entitled to have copies, and I do not see how the Board can Report till the whole of the evidence is returned. I could have wished to have seen two merchants of standing joined with the Board, from their knowledge of our system; or, if not, then such persons as Mr. Metcalfe and Mr. Thornton,—and I have to request that one or both of these gentlemen may be examined.

I send you Mr. Stewart's bond, and will see about such instructions as may be obtainable, but all our books of instructions were withdrawn by the Board of Customs in 1853.

Very truly yours,

10 November, 1858.

J. GIBBES, Collector.

15 November, 1858.

My dear Colonel,

The Board will, as you desire, examine Mr. Thornton and Mr. Metcalfe, if they consent to give evidence. You should let me know the points on which you desire their evidence, and it might be better for you to be present at the time and suggest questions.

Your

Your evidence will be sent you. As regards that of other witnesses I will put the question to the Board for their decision.

Yours truly,
E. W. WARD.

P.S.—The clerical assistance you suggest would hardly hasten our proceedings. The evidence is written out faster than I can read it.

16 November, 1858.

My dear Ward,

I have received your note of yesterday, and beg to thank you for agreeing to my suggestion of calling such persons as Mr. Metcalfe and Mr. Thornton to give evidence, if they are disposed to do so, but such a course will be of little effect, unless the previous proceedings of the Board are open to inspection.

Without reading all the evidence taken, it would be useless for me to put questions to those gentlemen; in fact I should have no questions to put, not having had time to attend and learn the object of the inquiry.

You will perhaps pardon me for saying, that from the manner in which questions were occasionally put, some of the witnesses were confused and lost all self-possession, thus giving answers very different from what, had they had time to reflect, they would have done (at least so they tell me). Independent of which, many of those questions shewed a perfect want of knowledge of the usages of Customs Establishments; and thus it was that I expressed my regret that there were no mercantile men members of the Board, and that such men as were, or had been, Custom House Agents, should not have been examined as to the working of the Customs Department here and elsewhere.

You are kind enough to say that copy of my evidence shall be sent to me, but that as regards that of other witnesses you will put the question to the Board for their decision. I, however, venture to ask, whether they have not a sort of right to correct or amend their evidence, agreeably to the practice of Committees of the Legislative Assembly—and, if not a right, whether it should not be allowed as an act of courtesy.

Very truly yours,
J. GIBBES.

Proposed to reply:—That as Collector had opportunity afforded him of attending during the inquiry, the Board do not feel called on to allow him the perusal of the whole of the evidence taken before them. That the Board will forward the evidence of each officer of Customs for his perusal, and for correction of verbal or grammatical errors; that no other correction will be admitted in the body of this evidence. The Board, however, will admit an explanation, as an appendix, to be added to the evidence.

For opinion of—
Capt. Browne.
Capt. M'Lerie.

E. W. W.
H. H. B.
J. M'L.

Monday, 22 November, 1858.

My dear Ward,

I have this moment received your note of the 19th instant.

I had previously put under cover to the Board my evidence; but having corrected errors, and made amendments at some considerable length (in the same way as I have always been allowed to do by Committees of the Legislative body) and you say that such will not be admitted by this Board, I must now retain it for a few days to take a copy of it, with its alterations, for future reference.

Very truly yours,
J. GIBBES.

The Board had no objection to explanation of evidence by way of Appendix on the opposite margin. They do, however, object to alteration of replies so as to give them another and an opposite meaning. There appears no answer necessary to this as Colonel Gibbes asks for none.

E. W. W.
H. H. B.
J. M'L.

22 Novr.

My dear Ward,

At the request of Mr. Bramwell, I send you one of the copies of the export entry for 20 half-tierces of tobacco by the "Tasmania" steamer for Hobart Town, from which it will be seen that Mr. Kidd, the landing-waiter on the Circular Quay, signed as landing-waiter for goods from the Patent Slip Wharf in Darling Harbour, when in his evidence he stated (Mr. Bramwell says,) that he never did, or would sign for goods shipped at any other wharf than his own.

The same with regard to Mr. G. N. Russell, the export officer on that occasion.

As far as I can understand, Mr. Kidd was told by the Board that Mr. Bramwell had signed the export warrants of the "Louisa," although he (Mr. B.) was attached to Botts' Wharf, and asked if he (Mr. Kidd) would have done so; to which he made answer as above, thereby

CUSTOMS DEPARTMENT.

thereby condemning Mr. Bramwell for doing that which he and Mr. Russell had both done a short time previously, and leading the Board to suppose that he (Mr. B.) had stepped out of his way, and done that which other landing-waiters would not have done.

Be so good as to return the warrant.

Very truly yours,
J. GIBBES.

APPENDIX 23.

Sydney, 4 December, 1858.

To the Collector of Customs.

Sir,

1. I have the honor to acknowledge the receipt of your communication of yesterday's date, wherein you say, "I have received a letter from the Inspector of Warehouses, notifying that he has made seizure of seven cases of gin in the cellar of Mr. Williams, hotel-keeper at Parramatta, who informed him (he says in his Report) that he (Williams) had purchased them from you."

2. And further calling upon me for an official explanation of the circumstances attending the sale of the gin.

3. Firstly,—Sir, I never made sale of any gin to anybody, never having had any to sell or any interest in the sale of any.

4. Secondly,—Feeling an interest in the welfare of Mr. W. Stewart, with whom I was likely, towards the end of the present year, to enter into a partnership, if he should be able to succeed in forming a business, I introduced Mr. Williams as an old acquaintance, and as a buyer, to Mr. Stewart, who fixed the prices, sent away the goods, and received the money.

5. Thirdly,—I beg to state that Mr. Williams has been here, and denies the truth of Mr. Still's statement in reference to the use made of my name in his Report.

6. Mr. Williams authorises me to say that when Mr. Still asked him where he got the gin, he replied that he purchased it from Mr. Stewart, of the Chilian Bonded Stores, through Mr. W. Gibbes' introduction. Mr. Still asked him when it was bought, and was told on 16th September—when Mr. Still immediately rejoined, "then the goods are contra-band, and I must place the broad arrow on them." Mr. Williams then said, "I am sure this is a mistake, as I know from the long acquaintance I have had with Mr. W. Gibbes that he would never stand quietly by and allow Mr. Stewart to sell me contra-band goods."

7. After such a conversation it is impossible to believe that Mr. Still could have misunderstood Mr. Williams' statement, unless his zeal to establish a wished for state of things had overcome his discretion.

8. Under these circumstances, and bearing in remembrance the extraordinary rumours which have been for weeks propagated through the city, and which, altho' emanating from some ignorant "informer," are nevertheless believed—reflecting upon me as having been mixed up in some alleged smuggling transactions of Mr. Stewart's. I cannot refrain from saying that Mr. Still should have been more particular in wording his Report—the expressions "buying from" and "buying through an introduction" are so different in their meaning that I am forced to believe that Mr. Still's Report has been studiously worded without regard to truth, and do not hesitate to say that Mr. Still, actuated by motives of no very high order, has mis-stated the expressions of Mr. Williams as regards myself.

9. Referring to your requirement for an explanation of the seven cases of gin, I beg to state that Mr. Williams has just furnished me with the bond mark, viz., G 548, and, on reference to Mr. Stewart's stock book, I find that of these 48 cases 41 were duty paid, 6 exported, and 1 removed during the months of July and November, as under,—

G 548	} 48 cases. Warehoused by W. Stewart, 16 June.	15 July	5	Exported by Prout.
		5 August	3	Duty paid by W. Stewart.
		20 "	6	" "
		26 "	3	" "
		28 "	1	Exported "
		31 "	10	Duty paid "
		14 September ...	15	" "
		27 October.....	4	" "
		12 November.....	1	Removed.
			—	48

10. On comparing this memo. with the "locker's journal" at the Chilian Bond, and with the "Warehouse-keeper's Register" at the Custom House, I find it to be correct.

11. You will perceive that 15 cases were paid duty upon by W. Stewart on 14th September, and his ledger shews that 10 of these were purchased by Mr. Williams on 16th and delivered on 18th to the Parramatta steamer.

12. I understand from Mr. Williams that the cases remained on the wharf for two days after delivery before being forwarded to him, and that since that he has disposed of only three cases, and left the address as having been sold by Mr. Stewart upon the remaining cases up to this date.

13. I may state also that, on reference to Mr. Stewart's ledger, Mr. Williams paid a higher price for his purchase than could be obtained for similar goods at the present time.

14. Trusting that this statement and explanation may be forwarded to the Government without delay, and that the latter will be satisfactory to you.

I have, &c.,
W. GIBBES.

I enclose a note from Mr. Williams, dated 1st December; also a card shewing how the goods were addressed. Please to mark the note before forwarding.

W. G.

Parramatta,

W. Gibbes, Esq.

Parramatta, December 1, 1858.

Dear Sir,

After the assurance I have had from you to-day of the goods in question being legal and duty paid, there must be some unwarrantable delay in releasing them on the part of Mr. Still. They were seized on Monday, and I was, in the first instance, directed to take them over to the Police Office as contraband goods; but reasoned that such a proceeding would be greatly detrimental to my interests and reputation here, undeservedly, and I gave my pledge to keep them secure in my store until decided, which was agreed to by Mr. Still, after putting the broad arrow on them, and placing them under the surveillance of the Chief Constable, Mr. Drury, of this place. In consequence of the branding of these seven cases gin, my son, in my absence, could not open the stores (where they were secured) to-day to the public; and to-night's post has arrived, but has brought no order to the C. C. to release them, who has just been here and shewn me Mr. Still's letter to him, in which he states to the C. C., "You are to consider these seven cases as still under your surveillance." Consequently my business must be, in a measure, suspended during to-morrow. The matter is abroad here greatly to my damage. Having purchased these goods through you is the only excuse I can offer for troubling you to ascertain for me on what grounds they are so long detained from release.

I am, &c.,
JOHN WILLIAMS.

(No. 191.)

Customs, Sydney,
6 December, 1858.

Sir,

I have the honor to transmit herewith, copy of a letter which I addressed to Mr. William Gibbes on the 3rd instant, after receiving the notification from the Inspector of Warehouses of his having seized seven cases of gin at Parramatta, together with his reply thereto, which I received this day.

The Secretary to the Treasury,

Custom House, Sydney,
3 December, 1858.

Sir,

I beg leave to acquaint you that I have received a letter from the Inspector of Warehouses, notifying that he has made seizure of seven cases of gin in the cellar of Mr. Williams, hotel-keeper at Parramatta, who informed him (he says in his report) that he (Williams) purchased them from you.

I have to request that you will favor me with the particulars of this transaction, in order that I may ascertain that the duty has been paid upon them.

William Gibbes, Esq.,
&c., &c., &c.

I have, &c.,
J. GIBBES,
Collector of Customs.

To
The Collector of Customs.
Sir,

Sydney, 7 December, 1858.

Since sending my letter of explanation yesterday, and which refers to "gin" seized by Mr. Still, I have read a portion of evidence published by the Board of Inquiry, and learn therefrom that Mr. W. Stewart was not the owner or shipper of any "gin" on board the "Louisa."

The

The only "gin" so shipped appears to bear mark E 562, and to have been the property of, and shipped by, a Mr. H. Abbott.

Begging to call your immediate attention to this,

I have, &c.,
W. GIBBES.

(No. 193.)

Customs, Sydney,
10 December, 1858.

Sir,

The enclosed letter, received on the 8th instant, should have been forwarded on that day, but was overlooked; and I now beg to transmit it, as being connected with Mr. Wm. Gibbes' letter of the _____ of this month.

The Minister of Finance,

I have, &c.,
J. GIBBES, Collector.

The Board of Inquiry into Customs' Frauds, 15th.

H. L.

Captain Ward, R.E.

[Should have been enclosed in Collector of Customs' Letter, No. 199.]

Williams' Hotel, Parramatta,
December 13, 1858.

Sir,

On the 29th day of November, Chief Constable Drury came into my office and said there was a gentleman in the coffee-room wishing to see me. On entering I saw Mr. Still, who said, "I am the Inspector of Distilleries, and wish to inspect your stores." I said I would be happy to shew them to him, and took him all over the cellar and stores, where he carefully examined every article. On examining my stock of gins, he enquired where I got a particular lot from. I told him I bought them from Mr. Gibbes. He (Mr. Still) then called the Chief Constable's attention to the cards on the cases, (viz. W. Stewart and Co., Chilian Stores), and said, "Mr. Williams, I am afraid I must seize these cases as contraband goods, and send them over to the Police Office." I requested he would not do that, as the fact would be injurious to my business and reputation. He said it was, he knew, a very unpleasant business, but he had a duty to perform—that a fraud had been perpetrated on the Government, in which Mr. Stewart was implicated, and he had no alternative. I told him I bought and paid legitimately for them, and as far as being concerned, I did not even know Mr. Stewart. I asked him if he was sure they were any of the goods. He said if they were not he would seize them as contraband, having *no bond mark* on them. I assured him of their perfect safety in my stores, in which assurance the Chief Constable acquiesced, and Mr. Still asked for chalk, put the broad arrow on seven cases, and agreed to leave them in my stores until he satisfied himself; and promised if they were right to write the next day and let me know. There were in all (eight) 8 cases, an empty one, an ullage, and six full ones. There was a chalk mark perceptible on the empty one, which Mr. Still threw on one side and did not mark it with the broad arrow. On inquiries from the Chief Constable the following evening, he read a note to me he had received from Mr. Still, in which that officer directed him to consider the goods still under his surveillance, &c.

On the morning of the 2nd December Mr. Still came to Parramatta by the first train, and asked me to allow him to see the goods again, and that if there were any doubts he would give me the benefit of it. He had Constable Wade with him, and directed him to remove the seven cases to the Police Office, leaving the one (empty) with mark G 548 behind. My son helped Constable Wade to load the horse and cart, and when out in the open light he (my son) saw a mark in chalk on another case, which was G 548, same as one left out, and called Mr. Still's attention to it. I then instructed my son and Constable Wade to examine every case carefully, and take down the marks. Three were taken down as G 548, the empty one included; five, no marks perceptible. I then asked Mr. Still if he was not mistaken, as I understood he seized the goods as having *no bond mark*; that I had seen in merchants' free stores cases of gin with no mark either in paint or chalk to indicate any particular bond; also that I had a case with sundries in just the same; and that I had been assured duty had been paid on the gin I had from Stewart and Co. on September 14th. But Mr. Still said he must remove them and run the risk, and ordered them to the Police Office. I offered my store keys rather than such should be done, but it was denied, and the goods were removed, and the empty case *then* Mr. Still directed to be taken with them. I then applied to Mr. Gibbes, through whom I purchased the goods, to satisfy me, as I did not understand the proceedings. He assured me that the goods taken from me duty was paid on, on the 14th September, and that he believed the seizure to be illegal, and advised me to apply for their release, or proceed for the recovery of them by law. This I did not do, believing every hour might bring an order from the Government to release them. On the 10th December, when in Sydney, I gave a description of the marks on the cases in question to a Custom House Agent, who sent his clerk to inquire if duty had been paid on such gin, and when he returned with an answer, *it had*, on the 14th September. Subsequently I saw him (the Agent) again, and he told me he had heard that there was one case marked with the "Louisa" bond mark, viz., E 562. This I indignantly repudiated, stating I had, with my son and Constable Wade, and in the presence of Mr. Still, carefully examined every case as it went on the dray. Subsequently I was spoken to by many friends in town that the report was all over the place that the goods were traced to me; and in one instance that a

14-ton boat had been seized on the Parramatta River with the goods from me—which I consider most injurious to my reputation as an upright and honest tradesman.

Shortly after my arrival in Parramatta, I proceeded to the Police Office to tell the Chief Constable what I had heard, and to ask him to let me see the cases, as I felt very certain of the report that one of them bore the mark E 562 was a fabrication. Mrs. Wade, the constable's wife, directed me to Mr. Drury's office, where I saw Mr. Still and another, and Constable Wade, with a case of gin open and measuring its contents. I remarked that I did not know Mr. Still was there, and that I was glad to see him, as I wished to know if he could give me any information when the gin would be released. He said he could not tell me. I then observed what brought me over was in consequence of a report I had heard in Sydney that there was one of the cases marked E 562, which I thought impossible after the scrutiny of four of us on the goods leaving my stores. Mr. Still did not reply, and I concluded it was a false report. On observing that they were filling the gin bottles up to the cork, and taking two bottles from another case, one to replace a broken bottle, the other to fill up the remainder of the case they were measuring, I asked Mr. Still what he was doing (for I was ignorant, and still am); he said only his unpleasant duty, that no harm could come to me, and he had told the Board his opinion, and stated the ready and willing manner I satisfied all his questions. After the cases were headed up, Mr. Still and his assistant left. I then told Mr. Drury what I had heard. He said it was so, and that Mr. Still made him give a receipt for that particular case on the morning they were removed from my stores. I said it was impossible, as Constable Wade, my son, myself and Mr. Still handled them all over, and saw no such mark. He (the Chief Constable) then pointed it out to me; it was the case they had been measuring. I could trace a very faint mark, thus, E 562, apparently neither paint nor chalk, but as if scratched on with a piece of sandstone in a great hurry. So struck was I with it that I could not help remarking my belief that it had been scribbled on after leaving my stores, and the time of the Chief Constable's attention being drawn to it, and his receipt demanded. If such is a Government bond mark, and one by which goods are to be seized, no honest man's goods are safe whenever a dishonest one may defraud the Government; and if such marks are to bear evidence, then any informer may enter easily the stores of any merchant, and in an instant, whilst his eye is off such person, he may brand one or more at his will to serve his ends to obtain reward. It has occurred to me that the locker in whose custody the cases E 562 were should be called upon to inspect this case at once, and to affirm or not if it is really one in question. I have received no word from the Government, or any one else, as to the detention of the cases, yet I have been assured that many other cases bearing that mark has had duty paid upon them.

I look upon this case as regards myself as a very great hardship, not knowing how to answer my friends about it; and as I consider my business and reputation is suffering severely through the reports which have now become quite public and exaggerated, and by which I appear branded as a *smuggler*. Should I be out of place in addressing you upon this subject, may I beg of you to lay my communication before the proper authorities, that I may at once understand the position in which I am placed with respect to the Government, and thus afford me the means of acquainting my friends and customers with the true merits of the case, as it is now a fortnight since the goods were seized, and I have not as yet heard anything in reference to them.

Colonel Gibbes,
Collector of Customs.

I have, &c.,
JOHN WILLIAMS.

Custom House,
14 December, 1858.

Sir,

Having received a letter from Mr. Williams of Parramatta, relative to the seizure made by you, of certain cases of gin on his premises, in which he insinuates that subsequent to the removal thereof a mark has been forged upon one of them, I request that you will have the goodness to report the circumstances attending their removal, to enable me to lay the matter before the Government.

Mr. Williams states that the case alluded to was, together with the others, thoroughly examined by himself, his son, Constable Wade, and yourself, preparatory to removing them, and that it bore no mark whatever; but that now there is a scratched mark apparently done with a piece of sandstone.

It is a pity that the cases were not at once removed to the Queen's Warehouse when seized, according to the practice of the service, as no such difficulty could have arisen.

I have, &c.,
J. GIBBES,
Collector.

To Inspector of Warehouses,
&c., &c., &c.

(Enclosed in Collector's letter, No. 199.)

Customs, Sydney,
14 December, 1858.

Sir,

In reply to your letter of this day's date, I beg respectfully to state, that as nothing has occurred to alter the state of things, since the date of the Minister's letter on the subject of my withholding further information concerning the seizure made by me at Mr. Williams', Parramatta, I am under the impression that I may still decline entering into a detail of the particulars relative to such seizure.

Officers of Revenue are subjected to unpleasant remarks in the discharge of their duties. In the present instance an insidious insinuation appears to be thrown out, which will prove to be groundless.

I have, &c.,

W. CATHCART STILL,
Inspector of Warehouses.

The Collector of Customs,
&c., &c., &c.

(No. 199)

Customs, Sydney,
16 December, 1858.

Sir,

I beg leave to transmit, herewith, a letter which I have received from Mr. Williams, of William's Hotel, Parramatta, from whom certain cases of gin were seized by the Inspector of Warehouses, in which he represents, that on the removal of those cases from his premises, they were thoroughly examined by himself, his son, and Constable Wade, in the presence of Mr. Still; and that one of them was found to contain no mark of any kind upon it;—but which case, when subsequently seen by him at the Police Office, was found to have been opened, and to have scratched upon it with some gritty substance, a particular bond mark, viz., $\frac{F}{102}$, which he alleges must have been forged.

I referred the matter to the Inspector of Warehouses, as seizing Officer, for his report, but as it appears that he has been placed in a position perfectly independent of the Head of his Department, he declines to obey the order given to him.—Enclosed is his letter.

I have, &c.,

J. GIBBES,
Collector.

The Secretary
to the Treasury,
&c., &c., &c.

The Board of Inquiry into alleged Frauds in Customs Department.

17th H. L.

Capt. Ward, R.E.

Sydney, 45 Hunter-street,
21 December, 1858.

Captain Ward, R.E.,
Chairman of the Board
investigating into the
Customs Department.

Sir,

At the request of Mr. T. W. Smith, of the Burnbank Hotel, Balmain, we beg to inform you that on the 13th October last he executed a Conveyance to a Mrs. Maria Stewart (the mother of Mr. William Stewart, late of Macquarie-street, Sydney,) of 1a. 1r. 29p. of land at the corner of Balmain and Wharf-streets, Balmain, and that the terms of purchase were £109 in cash, and the remainder in goods, some of which (we were informed) had been already supplied.

We have, &c.,

STENHOUSE & HARDY.

Hanoverian Consulate,
6 Macquarie Place,
Sydney, Decr. 21, 1858.

To the Chairman of the Board of Inquiry
upon Customs Department.

Sir,

I have the honor to state that I have read in this morning's paper the report of the evidence of Mr. Thomas Waldeck Smith, as authorised to be published by you, and containing the most audacious falsehoods as regards his statement of his pretended intercourse with me.

I am ready and willing to appear before the Board, at any time that I may be favored with an invitation, to refute the slanders of this man.

Had the Board done me the honor of requesting my attendance at an earlier period, so as to have enabled me to be present at the time of the malicious attacks which have been made upon me in my absence, I am inclined to believe that greater justice would have been done me; and I do not hesitate to say, that a larger amount of truth might have been elicited than is likely to accrue from the "assumptions" of Mr. Still, or the outrageously false evidence of Mr. Thomas Waldeck Smith.

Waiting the desire of the Board,

I have, &c.,

W. GIBBES,

(Reply.)

23 Dec.

Sir,

In reply to your communication of this day, offering to give evidence before the Board of Inquiry into the Customs, I have the honor to inform you, that should the Board require your evidence to throw light on points which they are called on to investigate, they will avail themselves of your offer. In the meantime any information you may desire to communicate, if forwarded to me, shall be laid before them.

Parramatta,

CUSTOMS DEPARTMENT.

19

Parramatta, December 30, 1858.

To the Chairman of the Board of Inquiry into
the late Frauds on the Customs Revenue.

Sir,

Had I had an opportunity of seeing my evidence before the Board for correction, as I understood was to have been forwarded to me, I should have pointed out that the receipt was not signed by Mr. Gibbes, but that Mr. Gibbes took the bill inside (meaning the office) and brought it out to me receipted, less discount for cash.

The receipt, you will perceive, is signed,—

Received per cheque,
W. STEWART.

September 22nd, 1858.

I herewith enclose the receipt as delivered to me.

CHILIAN BONDED AND FREE STORES.

Sydney, September 20th, 1858.

Mr. John Williams,

Dr. to W. STEWART.

Sir,

In reply to your letter to the Board of Inquiry on the Customs Department, enclosing a communication from you to the *Sydney Morning Herald*, which it is understood you desire may be authorised by the Board to be published in the same manner as other evidence relating to the same subject which as appeared in the paper, I am requested by the Board to inform you, that the evidence which has been published was taken by a Reporter of the Press during the proceedings of the Board, which were open to the public; that the Board do not consider themselves responsible for the matter contained in it, except so far as they may have become so by having offered no objection to its publication.

As regards your letter, the Board will offer no objection should the Editor of the *Herald* desire to publish it; but they cannot undertake any further responsibility with regard to it.

I may add, that any communication which you may make to the Board which can be considered as evidence shall be attached to their proceedings, and forwarded with their Report to the Government. If, however, you prefer to make a statement before it, they will appoint an early day to receive it.

E. W.

No. 6, Macquarie Place,
Sydney, 6 January, 1859.

To the Chairman of the
Board of Inquiry on Customs Department.

Sir,

I have the honor to state, that I received your letter authorising me to communicate through you with the Board.

I did not mean to avail myself of your kindness, as I thought it would be possible yet that I might induce the Board to examine me.

Since then the enclosed libellous article has appeared in the *Sydney Morning Herald*, based upon the evidence authorised by you to be published; the proprietor of that journal has returned me the enclosed document with a refusal to publish.

I am placed in a most disadvantageous position—the Board will not allow me to rebut the false evidence given against me—and the Press declines to allow me space to vindicate my character from the malicious charges brought by itself. Under the circumstances I have the honor to appeal to the justice of the Board, and to request that the enclosed papers may be laid before the Board, and that my statement may be authorised to be published with the Evidence.

I have, &c.,

W. GIBBES.

[Enclosure.]

[Enclosure.]

" This brings us to another part of the case, in which we regret to find a relative of the Collector of Customs very deeply concerned. An advertisement appeared in our journal, under date December 9th, signed by WILLIAM GIBBES. In this he states that he had never issued even *one* order in MR. STEWART'S Bond, until placed in charge of Mr. S's attorney, on 9th November, either to mark, stow, gauge, break out, or indeed any thing else. That up to that period he had never *entered* the Bond more than once, and that was with Mr. Still, about a month after the license was granted, and when he was about taking stock. That he never purchased or sold any goods, and that he had never received a farthing of his (MR. STEWART'S) money.

" The evidence of MR. WALDUCK SMITH and the statement of MR. WILLIAMS, of Parramatta, shew that MR. GIBBES was an active agent in the transactions of the Chilian Store at a date previous to that stated in the advertisement. There are several letters given signed by MR. GIBBES himself, which state that he had forwarded parcels of spirits to MR. WILLIAMS, of Parramatta. We quote one for its brevity :—

" " I forgot to send you a regauge of the Brandy, and therefore enclose you a memo."

" This is dated September 20th, 1858. MR. GIBBES accompanied the "Louisa" to the Heads on her celebrated voyage. The conclusion which is inevitable from all the facts of the case is, that he was in the confidence of the STEWARTS; that he was the agent by whom they carried on a contraband trade.

" Every right-minded person must deeply regret to see a person in the position of MR. GIBBES, not only violating the law, but compromising a venerable parent, whose character has ever been high, and who has served honorably for more than forty years. Were the public inclined to take malignant pleasure in exaggerating particular facts, it is possible that Colonel GIBBES would not be unscathed. He has been deficient in that penetration which such an office requires; but he has been shamefully deceived and betrayed.

" It must, however, be recollected that Colonel GIBBES has had forced upon him persons utterly incompetent—that the system of patronage in the Government has almost compelled the head of a department to pass over irregularities, and to retain in the public service men whom he has known to be untrustworthy or unfit. The evidence given by Colonel GIBBES upon this point will require most careful consideration, when we decide upon the reforms demanded by this branch of the public service."—*Sydney Morning Herald*, 3 January, 1859.

To the Editor of the Sydney Morning Herald.

Sir,

In your leader of to-day you put your readers "upon their guard," telling them that the evidence taken before the Board of inquiry is *ex parte*, and not upon oath.

In the face of such warning you have pleased to advert to me as being, from all the facts (?) of the case, "very deeply concerned,"—"in the confidence of the Stewarts"—and, "their agent for carrying on a contraband trade;" also, as having violated the law, and compromised my father.

I have to state, for your better information, that had the evidence been taken upon oath you would have had a very different statement of FACTS to publish, and the most of which you have yet to learn.

You have condemned me in the strongest terms upon the unsworn evidence of a Mr. Smith and Mr. Williams, (both interested, altho' in different ways), and you refuse to publish my note to Mr. Smith, inviting him to repeat his evidence upon oath.

Mr. Smith states that he saw me at the Chilian Stores prior to my visit to his house; and subsequently, several times, that I solicited his orders—offered him many samples, and an extensive credit. Also, that I was cognizant of his transaction with Mr. W. Stewart about the land.

Now, Sir, fortunately I have two witnesses to disprove the larger portion of above falsehoods.

Mr. Smith called at Chilian Stores some time in *November*—after I was placed in charge, and when I was *not in town*—and left word with a gentleman then present, and the storekeeper, that he wanted to give an order, but would not do so until the former one was completed, and would call again next day; this was written down by the gentleman referred to, and given to me on my arrival, I looked at Mr. Stewart's ledger and saw that Mr. Smith owed him £163 4s., and concluded that some portion of the goods had not been delivered. Mr. Smith did not call again, and after a day or two Mr. Tompson advised me to call upon Mr. Smith, and get payment of his account, as he would require the money for costs of Mr. Stewart's defence. I waited upon Mr. Smith at his house, and saw him then for the *first time*, told him the nature of my visit, and desired to know what portion of his order had not been forwarded? He then stated that Mr. Stewart had purchased some land from him for £300,—£109 of which was cash to Stenhouse and Hardy—account in ledger £163 4s., leaving a balance still due to him of £27 11s. Is this Mr. Smith's £60?—Vide his evidence. I doubted his statement, and asked who held the deeds. He replied, Mrs. Stewart, and that he was sorry for it, for the land was worth £1,000. He also said that Stenhouse and Hardy drew the deeds, and referred me to them for confirmation of his statement. He then asked to be supplied with a hhd. of rum, to liquidate his balance, and he would pay cash for any difference. I told him if I found it all right about the land, and, therefore, that Mr. Stewart was still in his debt, I would send him a hhd. rum, X 568, of which there were many in bond, provided Mr. Tompson authorised me. I left, and waited upon Stenhouse and Hardy, and learnt that the sale was made, and I now assert that this was my first knowledge of the arrangement. Is it likely that I should run over to Balmain after a man I did not know, nor even his residence, to obtain payment of an apparent debt (for

(for there is no credit given him in the ledger, except for a former account), and then to his lawyers, if I had any previous cognizance of the circumstances?

Mr. Tompson was immediately made acquainted with the result of my *only visit* to Mr. Smith, but gave no directions to send the rum. I next saw Mr. Smith at the Café door, when he asked me for a guinea subscription to Regatta, and reminded me that I had not sent the rum, to which I replied, No, and went away with some friends.

Since that date I have *never seen* Mr. Smith any where, and have ascertained from the storekeeper and men that he has never once been to the stores. When were the solicitations made for orders? Where were the samples offered? As to the *credit*, I am strictly prohibited from selling, except for *cash prior to delivery*, and have sold nothing upon credit—then why offer credit to an unknown person? As to Mr. Smith's veracity upon other points of his evidence, but which does not concern me—he says that he bargained for the sale of land, and purchase of spirits in part payment, *early in September*. Certain persons should have good memories! I find on reference to Mr. Stewart's ledger that Mr. Smith, on 18th September, purchased some goods, for which he paid cash, £31; and that he did not enter into the land arrangement, or give the order for the spirits, until 8th October following. Facts are stubborn things, and dates and figures the most stubborn of all FACTS!

Mr. Smith probably imagined that by getting his spirits seized he would be able to recover his land, which he fancied he sold too cheap, and now values at £1,000. Permit me here to say that Mr. Walduck Smith's letter addressed to you, in this morning's paper, reminds me of the rejoinder of the school boy, when his companion called him a liar, viz., "You're another!"

Now for Mr. Williams, who has labored so hard to try and prove that he did not know Mr. Stewart—who says in his letters to me, copies of which he published, that he *only troubles me*, because he bought the goods *through me*; but in his evidence that he bought *from me*. Again, in his letter to the Government, in the first page, he says he bought the gin *from me*; and afterwards *through me*!

On the occasion of my calling Mr. Williams across the pavement, I introduced him to Mr. W. Stewart and his brother, in the presence of other parties, who are prepared to prove it. Mr. W. Stewart fixed the price of the brandy, and asked Mr. Williams to have some gin; the price named was 47s., which Mr. Williams thought too high; and Mr. Stewart said, if you will take ten cases you shall have it for 46s. 6d., at which he closed. About a week afterwards I met Mr. Williams going towards the Parramatta steamer, when he regretted he was not near a Bank that he might draw a cheque, and save himself the trouble of going so far as the Chilian Stores—but he should expect an allowance as discount for the cash; I told him I could not take his cheque or say anything about discount; I afterwards mentioned this to Mr. Stewart, and in the evening Mr. Williams went down to Mr. Stewart's office—both the Mr. Stewarts were present. Mr. Williams asked for 2½ per cent. discount; Stewart said, I will make it even money, say £121 10s.; are you satisfied?

The account stood thus	£124 19 0
Less discount, 2½ per cent.	3 2 5
	£121 16 7

Mr. Williams rejoined, perfectly, that it was a very liberal and handsome allowance; he was then asked what Bank he would draw upon; a cheque-book was handed to him, and he drew a cheque *at the office desk* with the cheque resting upon the cover of the Stock Book of the Bond, and received a receipt from Mr. W. Stewart's *own hands*; the butt of the cheque is still there.

In Mr. Williams' evidence, where does he infer that he drew the cheque?—outside the door? or where else? Does Mr. Williams not remember drinking brandy and water with, and having samples of rum offered by, Mr. Stewart on this occasion? Did he not, whilst Mr. Stewart sat upon a beer cask near the door, ask him if he had any low class rums, at about 2s. 6d. a gallon, and was answered in the negative? So much for Mr. Williams' dealing with me! Now for my "part of the play." I wrote the three short notes published by Mr. Williams, only as to a friend whose interest I should gladly look after, and feeling that he had purchased the goods—not particularly wanting them—through my introduction, and from kindness towards me, possibly thinking he was doing me a favor.

No one else has received any notes from me; no one out of the 150 persons whose names are entered in Mr. Stewart's Ledger ever purchased from me, or can shew my receipt for money, *prior to the 9th November*.

That I went down the harbour in the "Louisa" I am free to admit. I received an invitation to do so, to have a cruise, a blast of fresh sea air, some brandy and water and cigars. I have been out to sea in many vessels on their homeward passage—think it very agreeable, and do not perceive any particular wickedness therein.

I deny that my letters to Mr. Williams state that I have forwarded parcels of spirits to him, as stated by you, and there was no necessity to send a reguage to him, but I did so, in consequence of introducing him, and being desirous to shew him that he was fairly dealt with.

I submit, Sir, that even if the Government should by any possibility convict Mr. Stewart of having done something wrong, I have nothing to do with it, unless you mean to say that my three short notes in the interest of a friend, and my acceptance of a passage down the harbour on board the "Louisa" constitute a crime.

I emphatically deny that I have ever acted as Mr. W. Stewart's agent in any transaction whatever, or that I have even violated the law in the slightest form, and I therefore call upon you to retract the expressions contained in the last four paragraphs of your leader.

You refer to a seizure of the gin sold by Mr. Stewart to Mr. Williams. The one case to which you allude *does not* bear upon it the bond mark of the goods exported by "Louisa." The parties moving in these transactions seem to be ignorant that the Excise Laws are not in force in N. S. Wales; and, therefore, when an article has been paid duty upon, the owner is allowed to do with it in the Colony whatever he pleases.

Possibly you will learn now, for the first time, that nearly all the holders of duty paid gin erase the bond mark so soon as the packages reach their stores, and no one can seize them with success; and there is nothing to prevent any person from placing upon his duty paid casks of spirits, or even empty casks, the export bond marks of the "Louisa's" brandy or rum.

Probably neither you or the public are aware that late in the month of August last I offered, by letter, to sell to the Government an armed clipper vessel of 112 tons, ready to go to sea in an hour, for the express purpose of protecting the revenue, and that my offer was rejected by the Minister of Finance as unnecessary!

In conclusion, Sir, after publishing so libellous an attack upon me, I trust you will see the justice of placing this communication before the public in to-morrow's issue.

I am, &c.,

W. GIBBES.

Sydney, Jany. 3rd, 1859.

APPENDIX 24.

(Private.)

117, Kent-street, North,
14 December, 1858.

Sir,

On reading the abstract of the Collector of Customs' evidence given before you as Chairman of a Board now sitting upon that department, and published in the *Herald* of the 13th inst., he states there is no check upon the landing-waiter's gauge here, *nor is there in London, or any where else.* If the above is a correct report, the Collector must be ignorant of the duties of the Inspectors of Gaugers in England, who invariably visit the gaugers two or three times in the course of the day, and not only sees the casks, but invariably tries a few of them, and I have seen an Inspector of Gaugers when he has discovered an error go over each cask in a tier of fifty. All the Dock Companies have also their own gaugers, whose duty is to follow after the Customs guager, and they usually try one cask in five, and any error detected is rectified previous to the goods being stored and the books sent in. The landing-waiters also when weighing tobacco, sugar, &c., &c., always have a check clerk, who sits in the same box with them, and the weight of every tally is compared. In the East India Company's stores, the landing-waiters, who are always of the 1st class, are never allowed to weigh the most trifling article, except in the presence of the check clerk.

I am, &c.,

J. L. DEANE.

To

Captain Ward, R. E.

Custom House, Sydney,
27 November, 1858.

Gentlemen,

I beg to call your attention to certain incidents which I had omitted to mention during my recent examination by your Honorable Board, viz., that on the morning of the 3rd September I received an official visit from Mr. Still, who then examined such delivery orders as were used on the day previous, and initialled the order for 8 half-tierces of tobacco, thereby shewing that they were delivered on the previous day, 2nd September; and further, that he remained with me long enough to examine and measure the whole of Walker's Bonding Warehouses, and, therefore, if any deliveries had been made on that morning, his attention must have been directed to it.

Now, as that gentleman will admit that he saw no appearance of bonding business, nor did he see any export officer on that occasion, I trust that the above facts will suffice to shew that no deliveries were made on that day, as a public auction was being held on the wharf, and that I left the store at a quarter to one o'clock; therefore the date of delivery made by the storekeeper must be his error and not mine. You will also find on inquiry, that it is the practice at Walker's to charge rent for the entire week, though only three days of actual occupation had taken place, which may account for the discrepancy of date.

Now, gentlemen, I, having been some thirteen years attached to the Customs Service in its various grades, and that during such period the Collector of Customs and his various officers will admit that no single instance of complaint or error has ever been made against me, and, therefore, gentlemen, I trust that whatever may have occurred, you will at least give me credit for having done no wrong.

Having delivered only on the proper order and to the proper officer, which, during business hours, I am bound to do.

Trusting that the above-named truths will meet with your satisfaction.

I beg, &c.,

MICHAEL GEORGE BROWN,
2nd Tide-waiter, H. M. Customs.

The Chairman and Gentlemen
of Board of Inquiry.

APPENDIX 25.

NOUVELLE CALEDONIE.

PERMIS DE DEPART DE LA COLONIE.

Le Sieur (1) King, Capitaine du Brig Goélette Anglais "Louisa," s'étant conformé aux arrêtés locaux, et n'ayant suscité contre lui aucune réclamation, il lui est permis de quitter la Colonie (2) avec son navire, pour se rendre aux Navigateurs.

(4) Maitre de Port ou Commissaire de Police.

(5) Pour un colon, à l'état civil.

APPENDIX No. 27.

Colonial Architect's Office,
Sydney, 24 January, 1859.

Mr. Speer presents his respectful compliments to Captain Ward, and begs to submit to him, as Chairman of the Customs Inquiry Committee, a Memorandum of Mr. Speer's views as to the mode in which the business of that Department might with advantage and increased efficiency be conducted. There is little of novelty or originality professed to be set forth in this paper. It is, in fact, but the result of Mr. Speer's experience of the Service in other parts of the world, with a few modifications suggested by the pending Inquiry, and late events roughly thrown together, but in as concise, explicit, and consecutive a manner as Mr. Speer was able to command. It may possibly assist the Committee, in connexion with the other information before them, in fully understanding the working and practice of the Customs Department, and in framing, should they desire to do so, a Code of Regulations and Instructions for the guidance of its Officers, if, indeed, it be not too late for the consideration of the Committee. And Mr. Speer ventures to hope that the having offered it will not be imputed to him as presumptuous or intermeddling.

[Forwarded by the Board with the other papers attached to their Report to the Treasurer of Finance and Trade.]

E. W. W.

1 Feb., 1859.

MEMORANDA for the regulation of the practice of the Customs Department.

It is a trite but true axiom, that the best preventative to smuggling is to be found in so arranging the rates of duties that the evasion of the law shall not present a sufficient temptation to incur the penalties attached to detection. Introduction.

The point at which a rate of duty will cease to afford a sufficient inducement to the smuggler to exercise his vocation must necessarily vary at different times and places; but it must always be in the ratio of the probable gain to the chances of detection and the penalties attached to discovery. Whilst these chances must of necessity be increased or lessened accordingly as the appliances of the Customs are more or less ample and sufficient, and the regulations and practice more or less perfect.

This much being premised, it appears to the writer that, with a view to the prevention of smuggling, and of rendering the Customs regulations and practice as perfect and as efficient as possible, something like the following system might with advantage be adopted:

A revenue station to be established at some convenient spot at the mouth of the harbour. It should command a good and extensive view of the neighbourhood, both land and sea; a branch of the Customs to be stationed here acting in a double capacity,—in a capacity analogous to what is called a coast guard, and in a capacity similar to that of tide-waiters; a sufficient staff of officers to meet the ordinary requirements of the port capable of acting in this double capacity to be maintained; proper boats, to enable these officers to carry out their duties, to be provided, and a constant look-out, both day and night, to be kept from the station. This branch of the Customs service might be called (for instance) the coast guard, and each boat should be under the directions of a superior officer, who might be named (for example) the coast captain; and the whole of the establishment should be subject to the superintendance of a chief, or head, who might be called (in illustration) the Coast Guard Inspector. Revenue Station

Upon the approach of a vessel a coast guard-boat, properly manned and commanded by a coast captain, having on board besides the rowers a coast guard officer to act in the capacity of tide-waiter should board such vessel. In the event of there being two or more vessels to be boarded two or more of these officers would be taken in the boat; and if should Duty of coast guard on approach of vessel.

should be the duty of the coast captain to ascertain the usual* particulars with respect to such ship and her voyage. The coast guard-boats might also be employed in surveillance of the coast and harbour at such times and seasons as the officer in charge of the station might deem necessary and expedient. On obtaining the particulars mentioned, the coast captain should record the same in a book to be kept for that purpose; and from this book the officer in charge, (viz., the Coast Guard Inspector), ought to make a daily (or perhaps more frequent) report to the Collector—thus keeping that officer early and fully informed in respect of the various vessels arriving at the Port.

The coast captain would then, on behalf of the Customs, place a tide-waiter in charge of every ship he boarded. And it should be the duty of such tide-waiter to remain on board the ship, either until she was about to leave the port, or until she had discharged her inward cargo.

On a vessel commencing to take in outward cargo a tide-waiter might also be placed on board in charge (by the tide-surveyor, or superintendent of tide-waiters at the wharfs,) whose duty it would be to take care that all goods entered outwards for exportation were *duly shipped*, and not otherwise disposed of, or smuggled on shore again. The tide-waiter would attend to and supervise the shipment of all merchandize, but more particularly of all dutiable or ex-warehouse goods intended for exportation. These latter he would receive charge of from the export officer escorting them from the warehouse. And the latter officer would thus be relieved from the duty of superintending the shipment of these goods, and, consequently, be at liberty to turn his attention to other matters.

The tide-waiters must of necessity be provided with sleeping accommodation on board the ship—at least, space should be afforded them for that purpose, although, whatever bedding they required ought to be their own. It would, probably, be useless to *prohibit* these officers from eating and drinking at the expense of the vessel, but they ought not to be allowed to *demand* any food as of right. And they should be *most strictly* instructed not to receive anything whatever by way of fee, perquisite, gratuity or present, under pain of *dismissal* for the first discovered offence.†

The tide-waiter to remain on board, and not to leave the ship under any pretence whatever without the permission of his superior officer, until such time as the vessel is under way ‡

Report and
Entry.

It is the duty of the master or commander of every vessel (except men-of-war and Government transports) to proceed to the Custom House as soon as possible after arrival in port, and there to make a report, in writing, embracing certain particulars§ as to the name, voyage, cargo, &c., of the ship. And it is the duty of the importer or consignee of any goods, merchandize, &c., (except in the case of Government stores of any description, which are landed under permit granted on the back of the certificates or documents accompanying them,) to pass entries for the same at the Custom House, within a given number of days prescribed by law. Entries thus passed may either be for "Free Goods," for goods "for Duty," or for goods "for Warehousing," as the case may be.

How Report to
be made.

The Report of the Ship to be made in duplicate, setting forth the full particulars of the marks, numbers, and description of goods and packages; one copy to remain in the Long Room, as the Collector's Record, and the other to be transmitted to the landing-surveyor.

On the receipt by the landing-surveyor of the duplicate report, he is to prepare what is technically called a "Blue Book," in which the discharge of the ship is to be subsequently shewn by the landing-waiter; and, likewise, in the case of goods for warehousing, a "Red Book," in which a detailed statement of such goods is to be also made by that officer.

The landing-surveyor will then appoint a landing-waiter to the ship—that is to say, an officer whose duty it is to attend to the general superintendence of her discharge; and the surveyor will record these particulars in a book to be kept for that purpose.

Report and
Clearance Out-
wards.

The master of every vessel desiring to leave the port is required by law, in the first instance, to "Report Outwards." This he should not be permitted to do until he has obtained the landing-waiter's "Rummage Certificate" with respect to his inward cargo. It is usual, in cases where a ship might be in danger of capsizing from her lightness were she compelled to discharge the whole of her inward previous to taking in outward cargo, or ballast, to grant her what is called a "Stiffening Order"; that is to say, an authority for taking in sufficient goods or ballast to stiffen the ship. But this does not do away with the necessity of producing a rummage certificate previous to entering the vessel outwards.

The ship having been entered outwards, "Bills of Entry Outwards" for all goods intended to be exported must be passed, as heretofore described. And this having been done and the goods duly shipped, the master of the vessel, or his agent, must prepare, in duplicate, a "Content Outwards," setting forth the marks, numbers, and description of packages, and nature of the goods comprising the whole cargo. The duplicate contents should then be submitted to the landing-waiter, who, checking the same by his copy of the "Bills of Entry "Outwards," and assuring himself of his own knowledge, as well as by the testimony of the tide-waiter, that the goods therein mentioned have been duly shipped, according to law, should certify the original "Content," and transmit it to the Collector, as being the document on which the "Clearance" of the vessel is to be granted. And the Collector, or other proper officer appointed by him for that purpose, having in his turn checked the content by his
copies

* These particulars it is unnecessary to state here in detail, as they are well known to every one acquainted with the Customs Regulations usually in force.

† MEMO—Tide-waiters being a low paid class of officers, as well as frequently an inferior class of persons, it seems desirable that as little responsibility should be devolved upon them as possible, whilst the strictest practicable supervision should be exercised over them.

‡ The writer sees that it is proposed to keep the tide-waiter on board the vessel until she is leaving the Heads. This, under the proposed system, would seem unnecessary.

§ These particulars are too well known for it to be necessary to state them.

copies of the "Bills of Entry Outwards," and having satisfied himself that the same is correct, will make out and deliver to the master of the ship a "Certificate of Clearance," on the receipt of which the vessel is at liberty to depart the port at the convenience of the master.

The landing-waiter should also, previous to the clearance of any ship, obtain from the tide-waiter in charge all the documents relative to her outward voyage, and, after comparing and checking them, as well as the "bills of entry," with the "content outwards," transmit the whole, made up and certified by himself, to the landing-surveyor, for his examination, and to be retained by that officer as the "Out-door" or "Waterside" record of the clearance.

Bills of Entry Inwards for merchandize should be passed in triplicate, and in the case of goods "to be warehoused," in quadruplicate. The original, or bill of entry, should be written in words at length, but the copies may be made in figures. Bills of Entry Inwards.

The bill of entry, on being examined and verified, and the duties, if any, on the goods therein specified duly checked, is to be signed *by or for* the Collector, and the copies attested by the initials of the officer performing this duty. The bill of entry, thus signed, becomes the "Warrant" for the delivery of the goods. One of these copies should be retained by the Collector, as his record of the transaction, and from which he makes the proper entry in his Cash Book, in cases where duties are paid; and the other, together with the warrant, are to be forwarded to the landing-surveyor, who, retaining the copy to enable him to check the Collector's Cash Account, transmits the warrant* to the landing-waiter in charge of the ship, as his authority for authorizing the discharge of the goods therein named, and permitting them to be landed; whilst in the case of goods for warehousing a copy must be forwarded to the warehouse-keeper for his information, and to enable him to make the necessary entry in his ledger.

With respect to goods ex-warehouse for home consumption at a period subsequent to the discharge of the ship, the bill of entry must likewise be made out in triplicate, as before described. In this instance the entry ought, however, in the first place to be presented to the warehouse-keeper, in order to enable that officer to ascertain that the goods therein described are actually in bond, having been duly and properly warehoused; and he should attach his initials to the bill of entry, in proof of this being the case. The entry may then be presented to the Collector, who, having ascertained and collected the duty, will dispose of the copies in the manner before pointed out, transmitting the warrant, in this instance, to the warehouse-keeper. That officer, on the receipt of the warrant, will make out and address to the locker at the bond wherein the goods are warehoused, a "Delivery Note for Home Consumption," authorizing the delivery of the goods therein mentioned to the importer or his agent. And it would probably be a satisfactory regulation, that this party should, on receipt of the goods, sign the "Delivery Note," as a certificate of having so done.

Should a re-gauge, or re-weight, &c., be desired or necessary, an application to that effect must be made to the Collector, who will exercise his discretion in directing a proper officer to attend for that purpose.

Free Goods.—The free goods by each ship may be included in a "General Entry" passed by the agent of the ship, should he see fit. Such entry must however contain the marks, numbers, and description of package, of all goods so entered. The several descriptions of merchandize are likewise to be kept separate and distinct, and are on no account to be blended. For instance—it would be highly irregular to include in one item, and under one term, packages of linen and cotton goods with those of ironmongery, &c.; and the approximate values are in all cases to be given. These particulars are necessary for the preparation of the Statistical Return of Imports and Exports—the value of which can scarcely be over-rated in the consideration of questions affecting the finance and trade of any country.

"Bills of Entry Outwards" must likewise be made out in triplicate, and disposed of in the same manner as pointed out in respect of "Bills of Entry Inwards"—the warrant, signed *by or for* the Collector, being forwarded to the landing-waiter, as his authority for allowing the goods to be shipped. Bills of Entry Outwards.

In the case of goods for exportation which had *previously paid duty*, and which are then "*for Drawback*," the exporter or his agent should, at the time of passing the "Outward Entry," obtain from the Collector or other proper officer a "Certificate of Drawback." This document will be granted after due reference by such officer to the "Entry Inwards," and payment of duty on the goods, ascertaining as far as practicable, by the identity of the marks, numbers, description of packages, and ship in which imported, that they are the same in both cases; viz., that the articles on which drawback is claimed are those which had previously been duly entered and paid duty inwards. And it will be the business of the exporter or his agent to obtain the certificate of the landing-waiter and of the tide-waiter in charge of the vessel, on the Certificate of Drawback, that the goods therein mentioned have been duly shipped. The amount of drawback mentioned in the certificate will then be payable at the Custom House, within twenty-four hours after the clearance of the ship.

In respect of goods ex-warehouse for exportation, the bill of entry outwards should be made out in quadruplicate, as it is necessary that the landing-waiter should be furnished with a copy thereof, in order to keep him duly informed as to all goods shipped on board the vessels under his charge, and as the warrant must be transmitted to the warehouse-keeper; that officer will then grant a "Delivery Note for Exportation," addressed to the locker at the Bond where the goods are warehoused, authorizing him to deliver the same to the export officer. The export officer should be under the directions of

* MEMO.—In the transmission of these as well as all other official documents, it would perhaps be as well that they should be sent through regular Customs Messengers, and not through the importer or his agent.

of the warehouse-keeper, and should be sent by him with the delivery note, to receive charge of the goods from the locker. It ought to be the duty of the export officer to superintend the transit of the goods to the ship; and on delivery, the locker should accompany them with a document setting forth the particulars of the marks, numbers, and description of packages and merchandize thus delivered. This document might be called a "Transire;" and the export officer having attended the goods to the ship, and given them over to the tide-waiter in charge, should obtain that officer's signature to the transire, in proof of having so done. And the export officer should return this document so signed to the locker.

Duty of Collector

The Collector exercises a general supervision over the affairs of the whole department; but his more immediate province is to superintend the in-door portion of the business. He is to satisfy himself that all vessels report in accordance with the law; that entries for all goods are duly and regularly passed; that the duties thereon are strictly paid; that such duties are duly carried to the credit of the Crown in his daily cash-book; that all *bonds* whether in respect to goods for warehousing, for exportation, or otherwise, are not only given, but are *sufficient*; and he is by virtue of his office the arbiter of all disputes and differences that may arise in any branch of his department.

In respect of any differences occurring in the out-door or water-side department, all representations for redress should be made to the Collector, through the landing-surveyor, warehouse-keeper, coast guard inspector, or tide-surveyor, depending upon the branch of the service in which the difference may arise. And the Collector should invariably obtain the report of one of these officers (namely, the superior officer of the branch in which the difficulty originates,) previously to deciding upon any matter brought before him.

Duty of Landing-surveyor

The Landing-surveyor is the second superior officer of the Customs. His duty is to supervise the whole of the out-door or water-side department; and, in the absence of an Inspector of Warehouses—which officer the writer does not look upon as necessary—to superintend the general warehousing arrangements. It is also a very important part of his duty to *check* the receipts and disbursements of the Collector.

He issues Blue and Red Books for every vessel about to discharge; he appoints the landing-waiter to each ship; he authorises, fixes, and decides tares, gauges, weights, &c.; and he is the referee, in the first instance, (whose decision may frequently obviate an appeal to the Collector,) in all differences arising out of such matters in this his immediate department.

Duty of Landing-waiter

On receiving the Collector's Warrant for the landing of any goods, the landing-waiter should compare that document with the Report or Manifest of the ship, and, on finding it to correspond as regards marks, numbers, and description of packages and goods with the report, it should be the duty of that officer to* issue to the tide-waiter on board a Delivery Note, or Order, specifying these particulars, signed by himself. And this document would be the authority to the tide-waiter for allowing such goods to be landed.

As it is impossible for the landing-waiter, unless the staff of these officers was very much increased, personally to superintend the discharge of every ship throughout the day, it is clear that he must place much reliance upon the diligence and integrity of the tide-waiters. But the landing-waiter, as the higher paid and more responsible officer, should exercise a constant supervision from time to time over the unloading of every ship within his charge. And on no account should any dutiable goods, or goods for warehousing, be suffered to be removed from the wharf without his presence and permission.

The landing-waiter should be constantly in attendance during business hours, either in his box or engaged in passing from place to place in general superintendence of the unloading of the different ships under his survey.

As a general rule, *no goods whatever* should be allowed to be removed from the wharf without his permission. And in the case of *free goods*, the landing-waiter should satisfy himself, by such inspection and examination as he deems requisite, that they really are what they purport to be in the warrant, and are not made the vehicle for smuggling dutiable articles.

In respect of goods for duty, or for warehousing, the landing-waiter should take care that they are gauged,† weighed, or measured, accordingly as they may be rated for duty, either by himself, or in his presence, and to his satisfaction, previous to their removal from the wharf.

In the case of goods to be warehoused, the landing-waiter, on ascertaining the gauge, weight, or measure of the goods, should make out, sign, and deliver to the officer (an export officer would probably perform this duty) whose province it is to accompany the goods to the warehouse where they are to be bonded, a Transire in duplicate, setting forth the marks, numbers, description of packages, and quantity and description of goods. And the officer thus in charge on delivering the said goods to the locker at such bond, should obtain that officer's signature to the Transire, in proof of having so done, and leaving the duplicate with him to enable him to make the necessary entries in his books, return the original transire to the landing-waiter, for the purpose of being preserved with the Blue Book, and other entries of the ship, as a voucher for the disposal of the goods.

And

* MEMO.—The writer believes that the suggestion here made is contrary to present practice at this Port, where, he understands, the "Warrant" itself is sent on by the landing-waiter to tide-waiter, as his authority for permitting the goods to be landed. But, as he has before remarked, the tide-waiter is not only a low paid officer, but frequently an inferior class of person to the landing-waiter, and consequently it is undesirable to devolve any more responsibility than can be avoided on the former officer, whilst it would seem equally just and advantageous to throw as much responsibility as practicable upon the better paid official. And it is in this view that this suggestion, which, to a certain extent, would act as a check on the tide-waiter, is made.

† At this Port, where there are no regular gaugers and weighers, it is understood that the landing-waiter performs these duties himself.

And on the final discharge of a vessel it should be the duty of the landing-waiter to make up the *Blue and Red Books issued for such ship, wherein should be contained a detailed statement, made in a given form and manner, of the various entries passed, and of the unloading and landing of the entire cargo, with the mode in which it was disposed of, as either being "Free," "Duty paid," or "Warehoused." And the landing-waiter should transmit these books, so made up, and accompanied by the various entries and †documents appertaining to them, and to the discharge of the vessel—the Blue Book, to the Landing-surveyor, and the Red Book, to the Warehouse-keeper, for the purpose of being examined and jerked.

And on the whole cargo being unladen, it should be the duty of the landing-waiter to search and rummage the ship thoroughly, granting a Rummage Certificate when satisfied that all her merchandize is discharged. And no vessel should be allowed to enter outwards until a rummage certificate is produced to the Collector or other proper officer from the landing-waiter in charge. Rummage Certificate.

It is the duty of the locker to remain in charge, during business hours, of the bond or store at which he is stationed, and in which goods are to be warehoused, for the security of the duty due thereon to the Crown. Every bond is secured by what is technically called a Crown Lock, provided by Government, as well as by another lock, the property of the proprietor. Hence a bonded store cannot be opened without the sanction of both the Crown and the proprietor. The Warehouse-keeper is, by virtue of his office, custodian of the Crown keys; and they ought to be delivered to him by the locker every evening when the bond closes for the day, and obtained from him when wanted in the morning. Locker's duty.

It should be the duty of the locker to receive charge of, from the officer who accompanies them from the wharf, all goods that are to be warehoused for payment of duties. There should be with these, as has been before stated, a transire, signed by the landing-waiter in charge of the ship, and setting forth the fullest particulars as to the marks, numbers, quantity, quality, and description of the goods. The locker should satisfy himself, so far as practicable, that the goods he receives correspond with those mentioned in the transire, and he should then enter the particulars thereof in a ledger, or book to be kept by him for that purpose. And he should notify to the warehouse-keeper, on the morning following the receipt of any goods, on a document which might be called a "Warehouse Receipt," the fullest particulars in his possession with respect to them.

From the warehouse receipt the warehouse-keeper would fill in, in the general warehouse ledger, the full particulars as to gauge, quantity, measure, weight, &c., of the goods, having previously only made a skeleton entry of the marks, numbers, and number and description of packages from his copy of the bill of entry inwards. But previous to doing so he should check the same by the Red Book, which, as before stated, is to be transmitted to him by the landing-waiter. And, in the event of his discovering any discrepancy, he is to call upon that officer and the locker for an explanation thereof, reporting any matter that may appear to him unsatisfactory, for the information and decision of the Collector.

As regards goods ex-warehouse for home consumption—on receipt of the warehouse-keeper's delivery note the locker will deliver the same to the party therein named, causing him to sign the delivery note by way of receipt, and writing off the goods with all the particulars thereof in his ledger. The ledger will thus at any moment present the exact balance of goods on hand.

In the case of goods ex-warehouse for exportation, the locker will, on receipt of the warehouse-keeper's delivery note, deliver the same to the export officer who is to accompany them to the ship, sending with them a transire setting forth the particulars of the marks, numbers, quantity, quality, and description of goods. And the export officer having delivered the said goods to the tide-waiter on board the exporting ship, will obtain his signature to the transire, and return that document to the locker. And the locker will write off the same in his ledger, as in the case of goods for home consumption.

The locker should also retain and file, by way of vouchers, all delivery notes, transires, and other documents which may relate to the receipt and delivery of goods passing under his charge, as these may be necessary to substantiate the correctness of the entries in his books.

Whether or not it might be advantageous to place the Bonding Warehouses of the Colony upon a similar footing to that on which they are in England, namely, as though they were the property of Government (in reality they are the property of large public companies), and under its entire control, is a question it is not proposed here to enter into. But at once assuming the continuance of the present system it must be obvious to every one, that previous to any building being authorised as a warehouse by the Collector, it should be well ascertained that it is a place of indubitable security, without any †communication whatever with any other place or building. Warehousing.

To effect this, whenever application is made to have any building declared a bonding warehouse, it should, in the first instance, be carefully inspected by the landing surveyor, and warehouse-keeper, assisted, if they deem it necessary, by the professional advice of an architect, and it should be *only* on the *joint certificate of these officers* that the Collector should authorise or license any building as a bonded warehouse.

The

* The Blue Book should account for the discharge and disposal of the *whole cargo* of the ship, giving a *minute detail of quantities*, except in the case of warehoused goods, the detailed statement of which are given in the Red Book.

† The Delivery Notes issued to the tide-waiter should be returned by him to the landing-waiter on the final discharge of the ship, and preserved by the latter officer with the Blue Book.

‡ NOTE:—From the evidence before the Committee of Inquiry it would appear that this point had not been sufficiently attended to here.

The Bonds should, moreover, as much as possible, be kept in the neighbourhood of the wharfs, and not suffered to extend, as they do at present, far through the city.

Because, it is obvious that, when this is the case, a greater portion of time is consumed by the officer whose duty it is to escort the goods between the ship and the warehouse, and *vice versa*, than is necessary; whilst, at the same time, enlarged facilities are afforded for evading the law, or smuggling.

On the entry of goods to be warehoused, simultaneously with the passing of the Bill of Entry Inwards, the law requires that bond* should be given to Her Majesty in a penalty of three times the amount of the duties due on the goods, that such duties shall be duly paid, or the goods cleared for exportation, or otherwise accounted for within a period of three years from being so warehoused. And it seems to the writer that this bond *should be a good and sufficient bond*, with good and sufficient sureties, and not a mere matter of form, as would appear to be the opinion of some parties examined before the Committee of Inquiry now sitting.

On goods being taken from the warehouse for home consumption the duties thereon are at once paid; and on the whole of the goods for which a bond is given being cleared, either by payment of duties or for exportation, the bond thereby becomes cancelled. In respect of goods ex-warehouse for exportation a similar bond to that above-mentioned is to be given, with the same penalty attached, and conditioned that the goods shall be duly landed at the port for which they are cleared, or otherwise satisfactorily accounted for. And this bond, the writer is also of opinion, should be a good and sufficient one.

It should also be incumbent on the exporter of any ex-warehouse goods to obtain and produce to the Collector, within a given time, a certificate of the due landing of such goods either at the port for which they were cleared, or at some other. At a British port the Collector of Customs will grant such a certificate, and at a foreign port the British Consul, if there be one, will do so, and if not, a certificate of the landing of the goods might be obtained either from the local Foreign authorities, or from two respectable British merchants residing at the place. But the Collector should possess the discretion of dispensing with such certificate in cases where it may appear to him that after due endeavour it was impossible to obtain one.

Warehouse-keeper's duties.

The duties of the warehouse-keeper have been almost sufficiently described in going through other parts of the subject. He is the head of the Warehousing Department, subject of course to the general control of the Collector, and by virtue of his office, the custodian-in-chief of all warehoused goods; he keeps the keys of the various warehouses, which should be delivered to him every afternoon by the locker, when the business of the day is over, and obtained from him again in the morning for the purpose of opening the bonds.

Warehouse-keeper's Ledger.

It is his especial duty to keep a book called a *Ledger*, in which on the one side are recorded the particulars of all goods warehoused, whilst on the other is a statement of the manner in which they are disposed of or accounted for, as being either for Home Consumption, for Exportation, or otherwise, as the case may be.

According to the present practice of this port, if the writer understands correctly, it would be difficult to ascertain, at any given time, from the Warehouse-keeper's Ledger, the precise balance of goods on hand in the various warehouses. Now, this is decidedly an imperfection in practice of a very grave character, opening a door, as it does, to serious evasions of the law.

To remedy this, the writer would suggest that a *separate heading* should be opened in the warehouse-keeper's ledger for every bond or warehouse, in the same manner as in merchant's books, a *separate account* is opened for every individual or matter in respect of which business is transacted. Under the head of each particular warehouse would be entered on the one side a minute account of all goods received therein, and on the other a statement of all goods delivered therefrom, as either for home consumption, for exportation, or as otherwise disposed of, as the case might be. The balances shewn, therefore, at any given time, by the warehouse-keeper's ledger, would be a complete check upon the different warehouses, as well as upon the ledgers kept thereat by the various lockers.

It has been already shewn that on receiving his copy of the Bill of Entry Inwards, in respect of any goods to be warehoused, the warehouse-keeper makes a *skeleton entry* of the same in his ledger setting forth *only* the marks, numbers and description of packages, and nature and description of goods, and that he fills in the particulars as to gauge, quantity, measure, weight, &c., not until he has obtained the locker's warehouse receipt for the same.

It has also been shewn that on receiving the Collector's warrant for the delivery of any goods for home consumption he issues a delivery note for the same to the locker, writing off the said goods in his ledger, and that the locker delivers the goods on this authority.

It has further been seen that on being presented with the Collector's warrant for goods ex-warehouse for exportation, he acts in a somewhat similar manner; the locker in this case delivering the goods into the charge of the export officer for shipment. Thus it will be apparent that the balances shewn at any time by the warehouse-keeper's ledger will, if these rules be attended to, represent the exact quantity of goods on hand in the various warehouses, and form a complete check upon the ledgers kept by the different lockers.

In conclusion of this portion of the subject, it is thought that it might be advisable, as well for the security of the revenue as the satisfaction of importers, that the warehouses should be overhauled and stock taken of the goods therein, say every six months.

The

* MEMO.—The writer here states in reference to the Imperial British Possessions Act, 8 and 9 Vic., cap. 93—not having had an opportunity of seeing the local Act—but they are no doubt similar, at any rate in spirit and intention.

The writer is not in a position to know how the cash accounts of the port are kept, Cash Accounts. and therefore can scarcely give an opinion upon the subject; but if they are kept in the usual manner—in the mode laid down by the Imperial Board of Customs some years ago—that is to say, if a separate cash-book be appropriated to each description of revenue, as for instance, "Import Duties," "Tonnage Duties," "Light Dues," &c., the balances being shewn at the end of every day, or every week, as may be decided on, in a book called a Cash Balance Book, and which stands in the place of a ledger, then, perhaps, it would be difficult to suggest any improvement in the mode of keeping. For the double entry system has been considered *cumbersome* and *unadapted* to the peculiar nature of the Customs accounts by gentlemen fully conversant with the subject, and well able to form an opinion thereon.

It is presumed that the accounts of Imports and Exports, of "Vessels Entering Statistical Returns. Inwards," and "Clearing Outwards" (technically known as the A, B, C, D, E, and F accounts), of "Vessels registered at the Port, lost, or broken-up" during the year; of "Transfers of Property," and "Endorsement of changes of Master," as well as all other accounts are kept in the usual manner; and in this case the writer does not see much room for an improved mode of account.

A. T. S.

Sydney, 24 January, 1859.

APPENDIX No. 28.

List of Letters and Reports received by the Board from the Inspector of Warehouses, and subsequently transmitted to the Minister of Finance and Trade.

Date.	Subject of Letter or Report.
2nd December, 1858.	Respecting seizure of cases of Geneva at Parramatta, sold by Mr. William Gibbes of Chilian Bond, to Mr. John Williams of Woolpack Inn.
8th December, 1858.	Respecting receipt of an insulting letter by Inspector of Warehouses from Mr. William Gibbes, which the Inspector conceives is intended to intimidate him in his public capacity, and he, in consequence, calls upon the Board to move the Government to protect him in the discharge of his duties.
15th December, 1858.	Reporting seizure of cases of Geneva and an empty brandy quarter-cask at Mr. Smith's, Balmain, which can be identified as portion of the goods removed from Bond for exportation per the "Louisa"
18th December, 1858.	Enclosing separate detailed reports of seizures of the "Louisa's" goods in four different quarters.
21st December, 1858.	Reporting seizure of cases of Geneva belonging to the "Louisa's" goods at the Café, George-street, ascertained to have been purchased by M. Chevall from the Chilian Stores, through the agency of a broker, M. Beursac.
5th January, 1859.	Reporting seizures in five different parts of the City, on the 4th instant, of the "Louisa's" goods.
13th January, 1859.	Report of visit to Maitland, and discovery of certain empty packages which can be identified as originally forming portion of the goods removed from for exportation, per the "Louisa."

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

NAVIGATION OF THE RIVER HUNTER.

(STATEMENT OF SUMS EXPENDED FOR IMPROVEMENT OF.)

Ordered by the Legislative Assembly to be Printed, 15 February, 1859.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 4 February, 1859, That there be laid upon the Table of this House :—

“ A Statement of all money expended each year up to the 31st
 “ December, 1858, out of the £40,000 appropriated by 19 Vic.
 “ No. 40 for making improvements in the Navigation of the
 “ River Hunter, and to the Ports of Newcastle and Morpeth,
 “ distinguishing payments of salaries and allowances, and
 “ specifying the names of the principal officers so paid, and the
 “ amount received each year up to the 31st December, 1858.”

(*Mr. Flood.*)

A. STATEMENT of all money expended each year, up to 31st December, 1858, out of the £40,000 appropriated by 19 Victoria, No. 40, for making Improvements to the Navigation of the River Hunter and Ports of Newcastle, and Morpeth.

Legislative Assembly.

NEW SOUTH WALES.

WOLLONGONG HARBOUR.

(REPORT OF ENGINEER-IN-CHIEF OF HARBOURS UPON.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1859.

THE ENGINEER-IN-CHIEF FOR HARBOURS, &c., to THE UNDER SECRETARY FOR LANDS
AND PUBLIC WORKS.

Wollongong Harbour.

SIR,

I do myself the honor to forward, for the consideration of the Honorable the Secretary for Lands and Public Works, Plans of the Harbour of Wollongong and of the adjacent coast, on one of which I have delineated such works as will, in my opinion, be found sufficient for the accommodation and protection of the shipping employed in the trade of that Port.

As will be observed, on reference to a general plan of the coast, Wollongong is situated near the centre of a bight or indentation, the northern extremity of which is formed by Port Hacking Heads, and the southern by Point Bass, the chord line being about 38 miles, the versed sine about 8 miles.

The Harbour consists of a small basin, excavated out of the rock in a slight indentation of the coast on the north side of Wollongong Head, by which, and by a short pier, it is partly sheltered on the south and south-east sides; on the west and north-west it is bordered by dangerous reefs of rocks. To the east, north-east, and north, the Harbour is quite exposed, and although partially protected on the south and south-east sides by the headland and pier above-mentioned, yet when gales of wind set in from these quarters the heavy seas which run round the headland sweep with such force on to the adjoining reefs as to produce considerable agitation in the waters of the Basin, rendering it at such times quite unsafe for vessels of even the smallest class to lie therein, and on these occasions the trade of the Port is almost entirely interrupted. In moderately calm weather the rise and fall of the water in the Basin is from 18 inches to 2 feet, increasing at times to as much as 4, or even 5 feet; and the instances are numerous when from this cause steamers and other craft have sustained considerable damage from coming in violent collision with the side walls of the Basin, or with each other—these facts, I think, point to the necessity for first undertaking such works as will have the effect of tranquillizing the waters within the present Basin.

Mooring chains have been laid down across the mouth of the Harbour for the convenience of vessels entering or leaving the Basin—the rocky nature of the bottom and the immediate proximity of reefs rendering it unsafe to attempt anchoring.

The mean depth of water within the Basin is about 9 feet; but at the entrance there is only 5 feet 6 inches of water—a ledge of rock, on which the cofferdam (formerly used in its excavation) had been placed, the ledge having been allowed to remain after the cofferdam was taken away. In designing the accompanying plans for the improvement of Wollongong

Harbour, I have had regard to the nature and extent of its present and probable trade, as well as to its natural features.

The present trade of Wollongong may be classed under two distinct heads,—first, the agricultural, pastoral, and passenger; second, the mineral trade—and this classification is likely to hold good. For these two branches of trade different descriptions of vessels are required and used, and a different amount of harbour and wharf accommodation will require to be provided. The agricultural, pastoral, and passenger trade is at present conducted almost entirely in steamers, which, calling at Wollongong on their passages up and down the coast, remain but a short time during each visit; for the accommodation of these steamers, therefore, a small extent of wharf or quay would be sufficient, it being only necessary that their access to the Harbour should be rendered safe and easy at all times, that they should be enabled to lie alongside the wharf in any weather in safety, and be subject to as little delay as possible, whilst embarking or discharging their passengers and goods: these objects would be sufficiently obtained by the extension of the present Pier, the formation of the proposed Breakwater on the western side, and the deepening of the entrance to the Basin.

For the proper working of the coal trade, more extended wharf frontage will be required, and as there is every reason to anticipate a large increase in the export of coal, I have made provision for far greater accommodation than is now wanted.

The works which I have marked on the accompanying plan are as follows:—

- 1st. The extension of the present Pier for a distance of 55 feet, which will take it into 13 feet water, forming a projection, or jetty, at its head, in order to check the in run of the waves along its face; the whole to be executed in heavy masonry.
- 2nd. The deepening of the entrance to the Basin, by removing the ledges of rock to a depth of 10 feet at low water of spring-tides.
- 3rd. I propose depositing the stone removed from the Basin upon the narrow reef which, it will be observed, projects from the rocks on the west side; this will answer the purpose of clearly marking out what is at present a hidden danger, and of producing still water within what may be termed the Inner Harbour; the head and sea slopes of this work will require to be pitched; a passage is left between the inner end of this breakwater and the rocks, in order to allow as free action as possible to the littoral currents, and thus avoid any danger of silting up.

The width of the entrance to the Inner Harbour would be 280 feet. With the execution of these works I feel assured that the water within the Inner Harbour and Basin would be rendered perfectly calm, as any slight swell that did enter would be expended on the opposite sandy beach. These works would, I consider, be sufficient for the trade carried on by steamers, both present and prospective.

For the proper accommodation of the coal trade additional facilities will be required, and I may perhaps here observe that I have been informed, and believe, that the Wollongong coal is peculiarly well adapted for steaming purposes, and that a large export trade may be anticipated; on this account I would propose the formation of an Inner Basin, opening into the present one; the site presents every facility for its execution, being an extensive level ledge of sandstone rock, soft in texture, and easily worked. The dimensions I have marked on this Basin—namely, 300 feet long, 100 feet wide, and 10 feet deep—need not be arbitrarily adhered to, but might be modified or extended to answer any reasonable demands the increase of trade should be found to require. The dimensions I have mentioned would be sufficient, with the space which will be available in the Outer Basin, to accommodate from 1500 to 2000 tons of shipping, and an export trade (if proper appliances shall be used for the shipment of the coal) of from 800 to 1000 tons per diem. With the stone excavated from the Inner Basin I propose constructing a Pier of about 500 feet in length. This Pier will afford great shelter in rough weather to the Outer Harbour, and will tend still further to tranquillize the waters of the Inner Harbour and facilitate the entrance and departure of vessels. In fixing upon the position for this Pier I have taken advantage of the reef, which at this point runs out nearly to the head of the Pier, so that while affording considerable shelter, and serving, as it will, to mark the reef, it will not in any sensible degree contract the entrance or increase the difficulty of beating out or in against adverse winds.

The

The Pier Head will require to be constructed of heavy masonry, to enable it to resist the shocks of the waves; the sea face and top of the Breakwater adjoining the head will require to be pitched or paved in the ordinary manner for such works with large blocks of stone.

Of the works above enumerated, the first to be undertaken as being of the most pressing importance should be the deepening of the present Basin, and the deposition of stone removed therefrom on the western Breakwater, in conjunction with which the extension of the present Pier Head can be carried out. The excavation of the New Basin, and the formation of the Outer Breakwater, can then be gone on with.

In the consideration of the general arrangements as well as details of the plan, I have been favored with many most valuable suggestions by His Excellency the Governor General, with whom I have had the honor, as well as the advantage, of personally inspecting the place, and of observing and discussing those various local circumstances which it is so necessary carefully to attend to, in order to form sound opinions on these subjects.

I have, &c.,

THE UNDER SECRETARY
FOR LANDS AND PUBLIC WORKS.

E. O. MORIARTY.

Legislative Assembly.

NEW SOUTH WALES.

PILOT SERVICE.

(REPORTS RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 27 January, 1859.

RETURN to an *Order* made by the Honorable the Legislative Assembly,
New South Wales, dated 12 January, 1859, That there be laid
upon the Table of the House,—

“ The Reports forwarded by the Pilot Board to the Government
“ in 1857* and 1858, relative to the improvement of the Pilot
“ Service.”

(*Mr. Williamson.*)

* The Report of 1857, having been already printed, by order of the Assembly, dated 4 November, 1857, is not included.

PILOT SERVICE.

REPORT of the Steam Navigation and Pilot Board, upon the Pilotage System.

IN attention to the Treasury letters of the 10th June, and of 22nd and 26th July, we have now the honor to report that, having given the subject matter therein alluded to our best consideration, we have arrived at the conclusion that the only thoroughly efficient system of pilotage to be introduced, which is likely to provide properly for the growing requirements of the port, is by the establishment of pilot vessels to cruise outside the heads.

In arriving at this conclusion we have carefully reviewed the evidence taken before the Light, Pilot, and Navigation Board, in October last; and, considering that the weight of evidence, given by men of considerable experience and nautical ability, is in favor of sailing vessels, and that our own view in this matter is unchanged, we have no hesitation in recommending the adoption of this scheme for the consideration of the Government.

It is admitted by every one that the present system is not only faulty in principle, but also ineffectual in its operation; and, as a return to the system of competition would place the Pilots so completely beyond the sphere of control, it is not advisable to adopt it.

The question, therefore, resolves itself into two propositions, namely,—the establishment of sailing vessels to cruise outside the heads, and the adoption of six-oared whale-boats, and employment by the Government of sufficient crews to man them; and, as the expense of the annual maintenance of each system would be nearly equal, with the exception of the first cost of the sailing vessels, we propose giving preference to the sailing vessels, as ensuring the attendance of Pilots in pilot's-water, which could not be effected under any other arrangement. We, therefore, recommend that two vessels be obtained, of not less than seventy tons burthen, and that they be manned and maintained at the following expense, viz. :—

For each vessel, including the cost of provisions,—

One Master, at per annum	£250
One Mate, at £15 per month	180
Five Seamen, at £10 „	600
One Boy, at £7 „	84
	£1,114

or, £2,228 for the two vessels.

That, for rendering assistance for the supply of Pilots for outward-bound vessels, a whale-boat, with four men and a coxswain, be attached to the establishment.

The coxswain of this boat, as also the crew, should reside at Camp Cove, in the neighbourhood of the life-boat station, in whose charge the life-boat should be; and they will thus form the nucleus of the crew required for manning her whenever required in cases of shipwreck or accident.

The annual cost for the support of the whale-boat would be as follows :—

One Coxswain, at per annum	£120
Four Men, at £108 per annum	432
	£552

The number of Pilots to be permanently maintained should be six. The three senior Pilots should receive an annual salary of £400, and the three junior £350, subject to a deduction of $2\frac{1}{2}$ per cent., to form a fund for the relief of the families of Pilots which may require assistance, in consequence of the loss of life or of injury which may be sustained by any of the Pilots when engaged in the discharge of their duties.

The

The masters of the pilot-boats should be licensed to act as Pilots, and when called upon to exercise their functions as such they should be entitled to receive for each vessel of less tonnage than 500 tons the sum of £2 10s., and for any above that tonnage £5, such sum to be deducted from the salary of the Pilot who ought to have been in attendance to have taken charge of the vessel so piloted; but in the event of no neglect existing on the part of the Pilot, no deduction shall be made.

In making this suggestion the Board have not thought it necessary to enter into any question of detail, as they anticipate that it will take probably the end of the year before the vessels can be provided, which will afford ample time for making the measure in all its minor arrangements complete, so as to secure an efficient discharge of the duties appertaining to the service in question.

The appointment, however, of coxswain of the whale-boat must be at once made, and who must be placed in charge of the life-boat now about to be stationed at Camp Cove.

In carrying out this arrangement the Government will be called upon to expend out of the funds collected under the "Pilotage Amendment Act of 1858," about £3,000 for the purchase of the vessels, and the total annual cost for the maintenance of the Sea Pilots after this outlay may be estimated at the following rates, (which it is anticipated will leave a large balance available towards the upholding of the Lights, out of the tonnage duty to be collected under the Act before-mentioned.)

1858.

Cost of building 2 Vessels at £1,500 each.....	£3,000
Maintenance of 5 Pilots, at £640 each per annum, from 22 July to 31 December	1,420
One Coxswain, at £10 per month, for three months	30
	£4,450

1859.

Maintenance of 2 Pilot Vessels, at £1,114 each.	£2,228
Four crew of whale-boat, at £108 each.....	432
Coxswain, at	120
Stores, Repairs, Sails, &c., £200 each Vessel..	400
Three pilots, at £400 each	1,200
„ „ at £350 each	1,050
Cost of Whale-boat	50
Fuel and Light, £50 each Vessel	100
Extra Pilotage	200
	£5,780

Harbour Pilot.

Deputy Harbour Master and Harbour Pilot ...	300
2 Men, at £108 each	216
	£516

HARBOUR PILOTS.

The Board propose that the Sea and Harbour Pilots be kept distinct, and that, as at present, the Harbour Pilot should take charge from the Sea Pilot whenever the vessel is brought as near as practicable to the intended place of anchorage, and that the Sea Pilot also take over the vessel in like manner when removed by the Harbour Pilot for the purpose of proceeding to sea.

We propose that a Deputy Harbour Master, to act as Harbour Pilot for the removal of vessels proceeding to sea, be maintained at a salary of £300 a-year, and that he be allowed a boat and two men, at a salary of £108 a-year each, to be paid out of the collections under the Act.

The

PILOT SERVICE.

The amount received for removals we recommend should be paid over to the Mud Pilots, whom we would propose to license as such, and limit in the first instance to *three*, with power to increase that number should circumstances require it.

These Mud Pilots should be obliged to maintain at their own expense a boat and two men ; they should be licensed and be removable in manner similar to all other Pilots.

They should receive payment for whatever vessels they might remove, in accordance with the scale of charges provided by the Act.

They should be subject to the orders of the Harbour Master, or his Deputy, as to the removal, anchorage, or berthing of vessels ; but they might in other respects be entitled to seek for employment without interference on the part of the Government, or Harbour Authorities.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

RAILWAY CHARGES FOR GOODS AND PASSENGERS.

(PETITION IN REFERENCE TO.)

Ordered by the Legislative Assembly to be Printed, 11 January, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Merchants, Traders, and other Inhabitants of the Hunter District, in the said Colony,—

HUMBLY SHEWETH :—

That, notwithstanding that it is universally admitted that Railways must be regarded as one of the great means for the prosperity of this Colony, the scale of charges hitherto fixed for goods and passenger traffic upon those already formed has been too high to allow of their becoming so extensively useful as their great capabilities permit; and that these charges have as much militated against the revenue which might be derived from them as they have against their general utility—the loss in revenue on the Great Northern Line, from this cause, being estimated, from clear data, at many thousand pounds a year.

That a comprehensive and liberal Railway policy, embracing a principle of low freights and fares, is now of the first importance to this country; and that while experience has shewn that cheap transit charges promote even the direct returns, the latter are secondary to those other great results which Railways may produce, and which in this Colony would so largely increase the general revenue, to the advantage of every portion of the community.

That there is good reason to believe that Railway management in this Colony is susceptible of much improvement; and that the appointment of a Minister solely responsible for their control, including that of internal communications generally, would be in many respects a valuable alteration, and would sensibly stamp the importance of the subject as a national question.

That your Petitioners therefore pray :—

First,—That your Honorable House will be pleased to cause the revision of the principle of charges for Goods and Passengers by Railway, so as to effect a liberal reduction therein; and

Secondly,—That the principle of Railway management may be altered, by vesting it in a Minister solely responsible for their control, including that of internal communications generally.

And your Petitioners will pray.

[Here follow 808 Signatures.]

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

CONSTRUCTION OF RAILWAYS.

(SCHEDULE OF PRICES IN PROPOSED CONTRACT.)

Ordered by the Legislative Assembly to be Printed, 23 February, 1859.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 15 February, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“A Copy of the Schedule of Prices, and all other documents
“alluded to in the P. S. to Captain Martindale’s letter to Sir
“S. M. Peto, and dated 11 August, 1858.”

(*Mr. Flood.*)

CONSTRUCTION OF RAILWAYS.

The SCHEDULE of PRICES upon which the Estimates for the extensions now sanctioned are founded.

GREAT RAILWAY. EXTENSION.

Date 18 .

FORM OF TENDER.

I hereby propose to execute the whole of the _____ required in the construction of that portion of the Great _____ Railway comprised in Contract No. _____ commencing at or near to _____ and being a length of _____ or thereabouts, in strict accordance with the plans and specification, at the following prices:—

		s.	d.
EXCAVATION from cuttings taken to embankment, at per cubic yard ...	2		9
Ditto from road approaches taken to embankment, not exceeding a quarter of a mile lead, at per cubic yard ...	2		6
Ditto from side cuttings to embankment, not exceeding three runs, at per cubic yard ...	1		9
Ditto extra for any additional run, at per cubic yard ...	0		3
Ditto from side ditches, including forming of mound alongside the ditch at per cubic yard ...	2		0
Ditto, if rock, taken to embankment, at per cubic yard ...	5		6
BRICKWORK, in mortar, to piers to bridges, wing walls, foundations, &c., at per cubic yard ...	60		0
Ditto in cement to ditto, at per cubic yard ...	65		0
Ditto in mortar to culverts, all sizes, at per cubic yard ...	60		0
Ditto in cement to ditto, at per cubic yard ...	65		0
Excavation in foundations to bridges, culverts, &c., at per cubic yard ...	2		6
Ditto if rock to ditto, at per cubic yard ...	4		0
TIMBER (iron-bark) in bridges, including the fixing of all iron work, at per cubic foot ...	4		6
IRON WORK, including bolts, nuts, and straps, at per lb. ...	6		0
			0

The prices in the preceding Schedule include all labor, materials, scaffolding, and workmanship of every kind necessary for the full and perfect completion of the works, and to the entire satisfaction of the Engineer-in-Chief.

ADDRESS—

GREAT SOUTHERN RAILWAY.

EXTENSION—LIVERPOOL TO CAMPBELLTOWN.

SPECIFICATION.

Contract No. 4.

1. This Contract commences in a field numbered 16 on the working plan, in the Parish of Minto, in the County of Cumberland, and terminates in a field numbered 37, in the Parish of St. Peter, in the same County, being a distance of eight miles.

2. The work for which Tenders are to be made, and to which this Specification refers, comprises all materials and labor for the full and proper completion of all the earthwork, brickwork, and timberwork required in constructing a single line of Railway, in accordance with the plans and this specification, and to the entire satisfaction of the Engineer-in-Chief.

3. The earthwork, brickwork, and timberwork will be let in one Contract—the Contractor stating a price for the earthwork and brickwork per cubic yard, the timberwork per cubic foot, and iron straps, bolts, &c., per pound, at which he will execute the work, finding all materials and labor—the work being paid for the net measurement as executed.

4.

4. The Contractor shall at all times proceed with the work at such a rate, and employ as many men, horses, wagons, barrows, and all other materials, as are in the opinion of the Engineer adequate for the due completion of this Contract; and the Engineer shall have the power of immediately dismissing any agent or workman, and of having removed off the line of Railway any materials, plant, or implements, which in his opinion are insufficient for the purpose intended, or at variance with the meaning and intention of this Specification—the cost of the removal of any such plant, materials, or implements, to be paid for by the Contractor.

5. The Commissioners will give to the Contractor possession of the land at as early a period as possible after the signing of the Contract; and although the land inside the fences of the Railway may be used for the purpose of carting materials, &c., on to the line, all damage that may be done to any land not actually the property of the Commissioners must be paid for by the Contractor; but should such damage not be at once paid, such an amount as shall appear reasonable shall be paid by the Commissioner, and deducted from any money that may be due to the Contractor for work done under this Contract.

6. The works will be set out for the Contractor, but he must satisfy himself of their accuracy, as no work incorrectly set out or improperly executed will be paid for by the Commissioners.

7. Should the Engineer be at any time dissatisfied with the mode of proceeding, or at the rate of progress of the works, or any part thereof, he shall have full power to make use of all labor or materials which he may deem necessary, the costs of such labor and materials to be deducted from any money that may be then due, or become due, to the Contractor; and should the Contractor fail to proceed in the execution of and to complete the works in the manner and at the rate of progress required by the Engineer, his Contract shall be considered void so far as relates to the works remaining to be done; and all sums of money that may be due to the Contractor, together with all implements in his possession, and all sums of money named as penalties for the non-fulfilment of the Contract, shall be forfeited to the Commissioners, and the amount shall be considered as ascertained damages for breach of Contract.

8. All measurements of works shall be made according to the actual dimensions, notwithstanding any general or local custom to the contrary.

9. The Contractor shall on or before the 1st day of December, 1857, complete the whole of the works comprised in this Contract.

10. The plan, which is drawn on a scale of two chains to an inch, shews the course of the line, the centre *red* line represents the line of the stakes which are driven down at intervals of one chain. These stakes are in the centre for a double line of Railway, but as the present line is only for a single way the actual working centre will be 5 feet 6 inches on the east side of the stakes, and shewn by a blue line on the working drawings and cross sections.

11. The section, which is drawn to the same horizontal scale as the plan, and a vertical scale of 20 feet to an inch, represents the surface of the ground (in black), and is taken along the centre line shewn on the plan in *red*. The upper or blue line represents the upper surface of the rails when laid; the lower or red line represents the level of the bottom of the ballasting, or formation level of both cuttings and embankments, and is two feet below the blue line.

12. The other plans, sections, and drawings, represent generally the form and dimensions of the several works; where any discrepancy exists between the dimensions as indicated by the scale and those marked in figures, the figures are to be considered as correct, and to be taken in all cases in preference to the measurements by the scale attached; and if there should likewise be any discrepancy between the figures or dimensions, or the form of construction, or the material, as indicated in the drawings and the dimensions, and material given in the specification, the directions of the specification shall be adopted; and in all cases of defective description, or of any ambiguity, the explanation given by the Engineer shall be considered correct, and shall be binding upon the parties. Also, anything contained in the drawings, or in the specification, shall be equally binding as if it were contained in both.

13. No addition, deduction, or alteration shall in any way vitiate or set aside the Contract, but shall be ascertained and valued by the Engineer, and added to, or deducted from, the contract sum accordingly.

14. The drawings referred to in this Contract are the following, viz. :—

- No. 1. General plan.
- 2. Longitudinal section.
- 13. Drawing of viaduct.
- 14. Do. of bridge.
- 15. Do. of viaduct.
- 16. Do. of viaduct.
- 17.)
- 18. } Do. of bridges.
- 19. }
- 20. Cross sections of cuttings and embankments.
- 6^a Drawing of culverts.

15. Where the Railway is in cutting a ditch three feet wide at the top, one foot at the bottom, and one foot deep, shall be made on the highest side of the ground to be occupied by the Railway; on the lower side it will not be necessary to have any ditch. The drains are to be made to fall into the ditches or water-courses at present existing for the drainage of the adjoining lands, or into the diverted channels, as the case may be; and whenever the fall of the drains, or that of the diverted channels, shall be so great as to endanger the stability of the sides or bottoms of such drains, the same to be protected by pitching; and whenever it may be considered desirable to carry the water from such drains down the slopes of the cuttings, a pitched drain shall be constructed on the slopes; but these matters will be considered as contingent expenses, and paid for at a price to be agreed upon during the progress of the works.

16. A ditch similar to the one described on the top of the cuttings to be formed at the foot of the embankments, on the higher side only.

EARTHWORK.

17. The excavations to be made of the depth shewn on the longitudinal section by the red line, being an average depth of two feet (2 feet) below the level of the upper surface of the rails, as indicated by the blue line.

18. The bottom of the cuttings to be slightly convex, being one foot nine inches below the level of the rails in the centre, and two feet three inches at the sides, having a fall from the centre to each of the side drains.

19. The cuttings to be sloped as shewn on the cross sections, and at a batter of one to one, to be nineteen feet wide at the bottom, that is to say at formation level; the sides as the excavation proceeds to be uniformly trimmed or dressed to the specified inclination, proper battering rules being used and provided by the Contractor for this purpose.

20. The excavations shall at all times be kept free from water, and so conducted as always to afford the utmost facilities to the escape of the water, by casting and keeping properly cleaned out ditches on each side of the excavations, and also by pumping, if necessary, and directed by the Engineer.

21. At the foot of each slope a drain of uniform depth below the rails, as shewn on Drawing No. 20, shall be made along each side of all the excavations on this Contract, the cost being included in the price for earthwork.

22. The Contractor must deposit the earthwork from the cuttings either to the embankments named for its reception, or to such other place of equal lead that may be directed by the Engineer during the progress of the works.

23. The term earthwork is to be understood to comprise soil, sand, gravel, clay, marl, shale, &c.; and no extra will be allowed to the prices under the head of earthwork, excepting for what is generally known as rock.

24. The earthwork must be well panned for such distance as may be required, not exceeding three yards, round all brickwork to piers, abutments, and wing walls, for the full depth of the embankment, and over all culverts where directed to do so, without any extra charge beyond the price stated in the schedule for earthwork.

25. The quantities stated in the longitudinal section are placed there for the Contractor's guidance, to enable him to determine the length of lead; but the quantities paid for will be the actual measurement of the work as executed, whether in excess or diminution of the quantities marked upon the section.

CONSTRUCTION OF RAILWAYS.

BRICKWORK.

26. The bridges are to be built in English bond, of the form and dimensions shewn upon the drawings: the bricks used to be well-shaped, sound, hard burnt bricks.

27. The mortar used to be of the best quality, and mixed in such proportions as shall from time to time be directed.

28. The price stated in the Schedule for excavation for foundations is also to include the keeping the foundations free from water, and filling in and well ramming round the brickwork to the level of the original surface of the ground, as the work proceeds.

29. The brickwork to the foundations shall in no case be commenced without an order from the Engineer; and when the excavation shall be ready to receive the brickwork the Contractor must give notice to the Engineer to that effect.

30. The culverts to be built with brick, in mortar, of the form shewn on Drawing No. 6^a. The materials and workmanship to be of the best description; the earth must be well rammed round the brickwork, and to the height of the top of the culvert when finished.

31. The brickwork to the culverts must not be commenced until the foundations have been approved by the Engineer.

32. All centering, scaffolding, tools, &c., of all kinds, must be provided by the Contractor at his own cost, and be included in the price stated in the Schedule.

CARPENTER.

33. The timber for the bridges to be iron-bark, squared, perfectly sound, straight, and well-seasoned, and to be framed as shewn on the drawings; great care must be taken in framing the work and in fitting the ironwork, which must be done with the greatest accuracy.

34. The sleepers on the bridges must be secured to the main beams with jagged spikes, ten inches long, four being driven through each sleeper, two to each beam.

PAYMENTS.

35. Payments will be made once in every month, as the work proceeds, in the proportion of 75 per cent. of the work actually executed, and the remaining 25 per cent. will be paid after the Engineer shall have certified that the whole of the works have been completed to his satisfaction.

RAILWAYS IN NEW SOUTH WALES.

(CORRESPONDENCE RELATIVE TO CONSTRUCTION OF.)

Ordered by the Legislative Assembly to be Printed, 27 January, 1859.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE SECRETARY FOR LANDS AND PUBLIC WORKS.

(Confidential.)

*Railway Department,
Sydney, 10 April, 1858.*

MY DEAR MR. ROBERTSON,

Will you permit me to draw your attention to the enclosed extract from the daily papers, relative to the tenders for the construction of the Victorian Railways.

You will see that Sir Samuel Morton Peto & Co. tendered to construct the whole of Railways, on terms, both as regards amount of charges and time of completion, to be agreed upon; and that their tender was not received, it not having been framed in accordance with the instructions issued by the Government of Victoria.

I conclude from these facts that Sir S. M. Peto & Co. are willing, upon fair terms, to enter upon the construction of Railways in Australia; and I think it would be a great advantage to this Colony to obtain such eminent contractors to carry on the works.

As the extensions at present contemplated amount to only about 70 miles, involving an expenditure of about £820,000, and as this may be spread over two, or, if necessary, three years, I imagine the firm I have named above would, from the magnitude of its operations, find no difficulty in undertaking the works, and that they would be disposed to take New South Wales Debentures in payment upon equitable terms.

Other advantages, as regards the construction of yet further Railways, would arise from a firm of such standing being once engaged in making lines in this Colony.

Should the Government desire, it I could by this mail place myself in communication with Sir M. Peto, with the view of ascertaining, for the information of the Government, how far the firm would be disposed to entertain the views I have here expressed.

I am, &c.,
B. H. MARTINDALE.

THE HONORABLE
THE SECRETARY FOR
LANDS AND PUBLIC WORKS.

[Enclosure.]

"MERCANTILE AND MONEY ARTICLE.

"Saturday Evening.

"In another part of our columns will be found a full report (copied from the *Argus*) of the opening of the tenders for the Victorian Railways. There were 92 tenders altogether for the several portions of these works—three of which were for the entire works, and were made by the following contractors:—Messrs. Randle and Holmes, £7,010,324 19s. 1½d., cash; Messrs. J. Musson and Co., £5,816,223, cash or debentures, and Messrs. Cornish and Co., £5,449,202 8s. 2d., cash or debentures. A tender delivered in by Mr. Gabrielli, on behalf of Sir Samuel Morton Peto and Co., was not received, it not having been framed in accordance with the instructions issued by Government. The *Argus* says:—The whole of the tenders were, at the conclusion of the ceremony of opening, entrusted to the charge of Captain Pasley, Mr. Darbyshire, and Mr. Ligar, in order that a careful analysis of the schedules of prices may be arrived at before the acceptance or rejection of them can be determined on. The following is a copy of the tender delivered in by Mr. Gabrielli:—

"A. Gabrielli, Esq.

"Dear Sir,—As you are about to proceed to Australia, we beg to state that we are willing to authorise you, on our behalf, to agree that we shall construct the whole of the Railways upon such terms, both as to amount of charges and time of completion, as may be mutually settled by engineers employed by the Government of the Colony and by ourselves, with power, in the event of difference between us, to refer the same, as was done in the case of our contracts in Canada, to the decision of Robert Stephenson, Esq., M.P., or, if preferred, to any other engineer of high standing, to be agreed upon between the Government of Victoria and ourselves.

"We deem it right to add that we have already constructed upwards of 600 miles of railway for the province of Canada, upon a similar arrangement, and also for French, Austrian, and Sardinian Railway Companies; and, further, that we have already entered into the like contracts to execute the Railways required in Algeria, and with the Government of Portugal, for the construction of its great arterial chain of Railway.

"We are, dear Sir, yours very faithfully,

" (For partner and self)

"S. MORTON PETO."

"9, Great George-street, Westminster,
"London, 13th January, 1858."

THE CHIEF COMMISSIONER FOR RAILWAYS to SIR S. MORTON PETO & Co.

Railway Department, Sydney,

10 April, 1858.

MY DEAR SIR MORTON,

By our daily papers—an extract from one of which I enclose—I learn that the tender of your firm, made through Mr. Gabrielli, offering to construct the whole of the Victorian Railways, on such terms, both as to amount of charges and time of completion, as may be agreed upon, was not received, as it was not framed in accordance with the instructions issued by the Victorian Government.

I conclude from the fact of your having tendered that your firm are willing to enter upon the construction of Railways in Australia, upon terms fair to all parties.

This Colony is not disposed to undertake at present the construction of lines of Railway on the extensive scale proposed in Victoria, at any rate if the works are to be paid for by loans; but, at the same time, there is a strong feeling in favor of such extensions being proceeded with, as there is reason to believe will prove within a few years self-supporting.

The Estimates for the year 1858, which are now before the House, contain a provision for extensions of about seventy miles in length, at an estimated cost of about £820,000, including land and rolling stock. I enclose for your information an extract from the Estimates.

My object in now placing myself in communication with you is to ascertain whether your firm would feel disposed to enter upon the construction of these extensions (supposing them to be sanctioned by the Legislature), and if so, upon what terms; and whether your firm would accept in payment the debentures of this Colony.

I need hardly observe that the peculiar position of this country, in having scarcely a navigable river, and in being destitute of good roads, renders it a matter of certainty that as the population increases Railways will be still further extended.

I am at present preparing a Report upon the condition and working of the existing lines, of which I shall do myself the pleasure of sending you a copy when printed.

I make this communication to you respecting the construction of Railway works in this Colony with the entire concurrence of the present Government.

I am, &c.,

B. H. MARTINDALE,
Chief Commissioner for Railways.

SIR S. MORTON PETO & Co.,
9, Great George-street, Westminster.

P. S.—To prevent the possibility of any misunderstanding, I think it right to inform you that the custom of this Government is to call for tenders by public competition; and that this would probably be done, should the Legislature sanction the proposed extensions. Should you therefore think fit to enclose a sealed offer, I am authorized to state it would not be opened until the time named for opening any other tenders that might be sent in.

It is contemplated that the proposed expenditure of about £820,000 would be spread over two, or even three years if necessary.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE SECRETARY FOR LANDS AND
PUBLIC WORKS.

(Confidential.)

Railway Department,
Sydney, 10 April, 1858.

MY DEAR MR. ROBERTSON,

In reference to the draft of my letter to Sir S. M. Peto of to-day's date, and the postscript added by the Government at the Council to-day, it appeared to me on consideration that the two militated the one against the other.

Failing to see you, I called upon Mr. Campbell, and, with his sanction, instead of transmitting my letter to England, I have written to Mr. Gabrielli, at Melbourne, a copy of which letter I enclose.

The idea in my mind in writing to Sir M. Peto was to get Railway works well and rapidly carried on, and to obviate any difficulty as regarded obtaining the necessary funds.

It appeared to me extremely probable that Sir M. Peto & Co. might be disposed to undertake, on fair terms, the construction of the very necessary extensions at present contemplated, and to receive payment in debentures—of which they would have many ways of disposing not so easily accessible to Government—and that, could favorable arrangements be made with them, the two objects would be accomplished that I had in view.

But I look upon this method of carrying out works as irreconcilable with public competition; nor do I think such competition really advantageous to the Public Service in a new country for such extensive works as Railways.

I submit for your consideration the propriety of laying before the Legislature some such plan as that I have suggested for carrying out the extensions now proposed, and obtaining their sanction to communicate with Sir M. Peto and Co., on the understanding, that if their offers are fair, and they are disposed to take debentures in payment, the work shall be entrusted to them to carry out.

I am &c.,

B. H. MARTINDALE.

THE CHIEF COMMISSIONER FOR RAILWAYS to A. GABRIELLI, ESQ.

(Private and Confidential.)

Railway Department,
Sydney, 10 April, 1858.

SIR,

Having seen by the daily papers that you were authorised by Sir S. Morton Peto & Co. to enter into agreements on their behalf relative to the construction of Railways in Victoria, I have the honor to request you will be so good as to inform me whether you have such powers from Sir S. Peto & Co. as would enable you to enter into arrangements on their behalf for the construction of Railways in this Colony.

I have, &c.,

A. GABRIELLI, ESQ.
Melbourne.

B. H. MARTINDALE,
Chief Commissioner for Railways.

A. GABRIELLI, ESQ., to THE CHIEF COMMISSIONER FOR RAILWAYS.

Melbourne, 18 April, 1858.

SIR,

In reply to your favor, 10th instant, I beg to inform you that I am authorised to undertake, on behalf of Sir Morton Peto & Co., the making of the Railways in New South Wales on the same terms as proposed to the Government of Victoria.

I beg at the same time to observe, that the amount here to be expended on Railways was about eight millions, sterling, and that it would not answer Sir Morton Peto's purpose to undertake any works in these parts unless the amount was commensurate to the outlay for the deplacement of numerous and efficient staff and plant to be imported from England.

Should your Government entertain Sir Morton Peto's proposal, I would undertake the negotiation of a loan on equitable terms for the Government, and proceed to Sydney to that effect.

As I intend to leave this for Europe by the next Overland Mail, I will be very happy to hear from you as soon as practicable.

I have, &c.,

B. H. MARTINDALE, ESQ.,
Sydney.

A. GABRIELLI.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE SECRETARY FOR LANDS AND WORKS.

(Confidential.)

Railway Department, Sydney,

26 April, 1858.

SIR,

In reference to my letter to you of the 10th instant, and your Minute thereon of the same date, herewith enclosed, relative to the construction of Railways in this Colony, I have the honor to transmit a copy of a letter from Mr. Gabrielli, dated 18th instant, in reply to the enclosed communication from me, dated 10th instant, written to that gentleman in compliance with your Minute above named.

As a Mail leaves for Melbourne to-morrow I can communicate further with Mr. Gabrielli by that opportunity, in compliance with his request, should I, in the meantime receive the instructions of the Government.

I have, &c.,

THE HONORABLE

B. H. MARTINDALE.

THE SECRETARY FOR LANDS AND WORKS.

THE COLONIAL SECRETARY to THE CHIEF COMMISSIONER OF RAILWAYS.

29 April, 1858.

MY DEAR CAPTAIN MARTINDALE,

Mr. Robertson and I have agreed that my accompanying Memo. contains the substance of what should be written to Mr. Gabrielli.

I hope you found the Campbell Town Line all right.

Yours, &c.,

CAPTAIN MARTINDALE, R. E.,
&c., &c., &c.

CHARLES COWPER.

Acknowledge and thank him for his communication, but say that his speedy return to England prevents our entering into any negotiation with him.

The intimation, also, that Sir M. Peto will only be prepared to make a contract for a very large amount interposes another and insuperable obstacle in the way of making any arrangement.

The Government is prevented by a previous agreement from negotiating for a Loan through him.

C. C.

THE CHIEF COMMISSIONER FOR RAILWAYS to A. GABRIELLI, Esq.

*Railway Department,
Sydney, 30 April, 1858.*

SIR,

Having laid your letter of the 18th instant before the Government, I have the honor to inform you that your immediate departure for Europe, and your intimation that it would not answer Sir Moreton Peto's purpose to undertake works in these parts, except on a very large scale, preclude the Government from entering into any negotiations with you.

Thanking you for your offer of visiting Sydney, if necessary,

I have, &c.,

A. GABRIELLI, Esq.,
Melbourne.

B. H. MARTINDALE.

A. GABRIELLI, Esq., to THE CHIEF COMMISSIONER FOR RAILWAYS.

Sydney, 21 June, 1858.

SIR,

Referring to the letter I had the honor to address you, in reply to yours, April 10th, I beg to state that, having delayed my departure for Europe, I have been able more fully to consider the purport of your inquiries, and I beg now to submit for your consideration the following proposal on behalf of Sir Samuel Morton Peto and partners.

Sir Samuel Morton Peto and partners will undertake to construct the whole of the Railways required by the Government of this Colony upon such terms, both as to amount and as to terms of completion, as shall be mutually agreed between the Commissioner for Railways, or any other agent appointed by the Government, and themselves, with power, in the event of any difference arising between Sir S. M. Peto and partners and the Government of this Colony, to refer the same to Mr. Robert Stephenson, or, if preferred, to any other engineer of high standing, to be agreed upon between the Government and themselves.

I beg also to state that Sir M. Peto and partners will be prepared to receive in payment for their contracts New South Wales Debentures bearing interest at five per cent. per annum, redeemable in twenty-five years, at a fixed price to be mutually agreed upon at the time of the Contracts being finally signed.

As a period of four months must elapse from the date of my departure before the final arrangements with Sir M. Peto and partners can be effected, supposing that the Government desires that the works should proceed without delay, I would submit for your approval the name of a respectable contractor who will immediately begin the works under your direction on behalf of Sir S. M. Peto & Co.

Sir Samuel Morton Peto's high standing as Railway Contractor will no doubt be sufficient guarantee that all works entrusted to his firm will give full satisfaction to the Government of this Colony.

They have constructed, on the same terms as those I have now the honor to submit for your consideration, the whole of the Canadian Railways (more than 600 miles,) many lines for English companies, and some of the most important lines on the Continent of Europe.

I beg to add that, as I intend to leave by the next Overland Mail, I shall feel grateful if you will favor me with an early reply, to enable me to make the necessary arrangements in case my proposal should be favorably entertained by H. M. Government.

I have, &c.,

CAPTAIN MARTINDALE, R.E.,
Chief Commissioner for Railways,
New South Wales.

A. GABRIELLI.

A. GABRIELLI, ESQ., to THE CHIEF COMMISSIONER FOR RAILWAYS.

Sydney, 23 June, 1858.

SIR,

Referring to my letter 21st instant, and the conversation I had the honor of having subsequently with the Railway Board, I beg further to state, that Sir Samuel Morton Peto and partners will undertake to construct the whole of the Railways at present contemplated in New South Wales at the schedule of prices stated in the Railway Estimates prepared by the Government Engineer, and approved by the Commissioners for Railways and the Government, with the understanding that every three months during the period of the contract the schedule of prices for labor shall be fixed according to the prevailing rates, and in case of any difference arising as to the prevailing rates, then the rates to be determined by arbitration.

I beg further to state, that it will be necessary for the Government to allow Sir Samuel Morton Peto and partners six months time, from the 11th July next, finally to accept the contract. In the meantime the arrangement proposed in the fourth paragraph of my letter 21st instant can be carried out if required.

I have, &c.,

A. GABRIELLI.

CAPTAIN MARTINDALE, R.E.,

Chief Commissioner for Railways,

New South Wales.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE SECRETARY FOR LANDS AND WORKS.

Railway Department,

25 June, 1858.

SIR,

In reference to my letter of the 10th of April last, on the subject of entrusting the construction of the Railways in New South Wales to an eminent English firm, I have now the honor to submit, for the consideration of the Government, two further letters from Mr. Gabrielli, dated 21st and 23rd instant, together with the following observations thereon, in which my colleague, Captain Ward, concurs.

2. The Government will perceive that Mr. Gabrielli, as agent for Messrs. Peto & Co., states that they will undertake to construct the whole of the Railways at present contemplated in New South Wales at the schedule of prices stated in the Railway Estimates prepared by the Government Engineer, and approved by the Commissioners for Railways and the Government, with the understanding that every three months during the period of the contract the schedule of prices for labor shall be fixed according to the prevailing rates, and in case of any difference arising as to the prevailing rates, then the rates to be determined by arbitration.

3. As Mr. Gabrielli does not feel authorised finally to accept, on account of Messrs. Peto & Co., a contract on the conditions proposed, he desires that a period of six months from the 11th proximo may be granted for reference to that firm, and in the meantime he proposes to submit, for the approval of the Commissioners, the name of a respectable contractor who will immediately begin the works under their direction, on behalf of Sir S. M. Peto & Co.

4. It appears to the Commissioners that the following advantages will attend the acceptance of these proposals:—

The value of labor remaining the same, the extensions proposed will be completed at a cost not exceeding the amounts stated in the estimate of 1858, exclusive of the sum assumed for land.

The lines will be well and speedily executed by persons thoroughly competent to undertake the work.

English capital and enterprise will be introduced, which cannot but favorably affect the development of the resources of the country.

5. The Commissioners feel that until a further sum for the construction of Railways has been voted by the Legislature, it would not be possible to return a definite answer to Mr. Gabrielli's proposals; and being fully impressed with the advantageous character of his offers, they would strongly urge on the Government the expediency of obtaining, without delay, the decision of Parliament with regard to the sum proposed for Railway extensions in the estimates

estimates of the year; and they further request that they may be authorised—having due regard to the sum voted—to provisionally accept Mr. Gabrielli's proposal, and to enter into a definite contract with whomsoever may be selected by Mr. Gabrielli, and approved by them, pending his reference to Messrs. Peto & Co. to act for that firm, it being understood that the person so selected and approved shall find sufficient security at his risk for the performance, on the conditions proposed by Mr. Gabrielli, of a portion of the Railways to be defined by the Commissioners, and shall be liable in all respects for the fulfilment of such portion as a principal party in the contract.

6. The Commissioners have further to suggest, that in any contract made a clause should be inserted that whenever the price of labor shall exceed a limit to be hereafter fixed, the Government shall have the power of stopping the works until the price of labor shall fall to or below the limit so fixed.

I have, &c.,

B. H. MARTINDALE.

THE HONORABLE

THE SECRETARY FOR LANDS AND WORKS.

A. GABRIELLI, ESQ. to THE CHIEF COMMISSIONER FOR RAILWAYS.

Sydney, 2, Church Hill,

9 August, 1858.

SIR,

I have acquainted you with Mr. Wright's reply. I since made an appointment with Mr. Gibbons, which he did not keep; and having just ascertained that he is in the actual employment of Messrs. Randle and Wright, I feel a delicacy in courting another interview. From information I have gathered, I do not think that there is at present any party in the Colony to whom I could entrust the works you require; and also, that there is not even plant in the Colony to begin the three extensions; nor do I consider that it will be prudent in the interest of the Government and Sir Morton Peto to make applications at random, which may be again fruitless.

Under these unforeseen circumstances, and having in view the desirability of putting the Government in possession of Sir Morton Peto & Co's. reply at an earlier date than the time stipulated, I will reduce the time to four months, but, should steam communication be interrupted, to five months from the 11th instant.

I conceive that the Government will not be put to inconvenience by this apparent delay, inasmuch as the details, plans, and sections, will naturally exhaust some portion of it, whilst the remainder will be more than compensated for by the extensive resources of Messrs. Peto & Co. for its speedy completion.

I beg to remind you, that in the letter I had the honor to receive from you in Melbourne, which has formed the basis of our negotiations, you inquired "whether I was prepared to undertake to construct the Railways of this Colony, on behalf of Sir M. Peto & Co., on the same terms as those proposed by them to the Government of Victoria," thence I am at a loss to account for the deviations since insisted on, which entirely alter the spirit of the terms alluded to.

My business compels me to leave by this Mail, nor do I see that my remaining here would remedy the difficulties I have to contend against at present.

The time being so limited prior to my departure, I should feel obliged by your modifying the agreement, herewith enclosed, in such way as to relieve me from the necessity of commencing the works until the receipt of Sir M. Peto & Co's. reply, as I have come to the conclusion, for the reasons above stated, that it will be impossible for me to make a satisfactory arrangement to that effect.

I trust that this alteration in the present agreement will not in any way prejudice the ultimate object to be obtained, namely, that this Colony should reap the benefits of Messrs. Peto & Co's. great experience and capability of giving to your public works that impetus they so fully require, coupled, as it will be, by the introduction of a large number of industrious immigrants, and with the advantageous financial arrangement proposed.

I have, &c.,

A. GABRIELLI.

THE CHIEF COMMISSIONER

FOR RAILWAYS.

THE CHIEF COMMISSIONER FOR RAILWAYS to A. GABRIELLI, ESQ.

*Railway Branch,
Department of Internal Communication,
Sydney, 11 August, 1858.*

SIR,

In reply to your letter of the 9th instant, I have the honor, by direction of the Government, to observe, in the first place, that the negotiation to which you have referred as opened with you by my letter of the 10th April, was terminated by my letter to you of the 30th April last, in which you were informed that the intimation contained in your letter of the 18th April of your own immediate departure for Europe, and of the improbability of Sir S. Moreton Peto and partners considering it worth their while to undertake the construction of such comparatively small works as those at present contemplated in this Colony, precluded further negotiation.

Upon your voluntary visit to Sydney, however, in June last, you re-opened the matter; and your letters of the 21st and 23rd of that month contain the basis upon which you were then prepared to treat.

Those letters were transmitted for the favorable consideration of the Government by the Commissioners for Railways on the 25th of the same month, since which time both the Government and the Commissioners have had repeated interviews with you, at which the entire subject was fully discussed.

These interviews resulted in the drawing up of a formal agreement, which on the instant was read, discussed, revised, and agreed to, as revised by the Government, the Commissioners, and yourself, subject to the condition of the Legislature approving of the principle of contracts being made without public competition.

It is to be regretted that your inability to find a contractor, as agreed upon, to whom you could entrust the works required, until the ratification of the agreement by Sir S. M. Peto and partners, has prevented the agreement being completed and carried out.

The time and labor bestowed on this matter cannot, however, be considered as entirely wasted, because it has shewn the willingness of the Government to enter upon negotiations with Sir S. M. Peto and partners for the construction of the Railways at present sanctioned for this Colony; and because it elicited last night from the Legislative Assembly the all but unanimous expression of its opinion, that in contracts for the construction of Railways the principle of public competition might be departed from.

The Government will now endeavour to make arrangements for the construction of a small portion of each line of Railway sanctioned—say about 20 miles in all—by parties now on the spot, and, should Sir S. M. Peto and partners without delay send a person to the Colony fully authorised to act on their behalf, the Government will be prepared to negotiate with him for any length now sanctioned, and not at the time of his arrival contracted for.

The absence of navigable rivers and of passable roads in this Colony render Railways a matter of necessity as arterial communication. The questions for consideration are, the time to be occupied in, and the system best adapted for, their construction; and, although the Government can make no contracts for the construction of Railways beyond the limits at present sanctioned by Parliament, they look forward to further extensions, and are prepared to discuss freely and receive proposals for their construction.

I enclose, for your information, copies of the letter of the Commissioners for Railways to the Government, dated 25th June last, of the agreement already referred to, and of the resolution of the Legislative Assembly of last night. Of the remaining correspondence, you have, I presume, the original, or copies.

A copy of this communication, and of the entire correspondence, will be forwarded direct to Sir S. M. Peto and partners.

Wishing you a prosperous voyage to England.

I have, &c.,

A. GABRIELLI, ESQ.

B. H. MARTINDALE.

THE CHIEF COMMISSIONER FOR RAILWAYS to SIR S. M. PETO & Co.

*Railway Branch,
Department of Internal Communication,
Sydney, 11 August, 1858.*

GENTLEMEN,

I have the honor, by direction of the Government of this Colony, to transmit for your information, copy of a correspondence between the Commissioners for Railways and Mr. Gabrielli, together with other papers relating thereto.

By these you will perceive that a negotiation was entered into with the view of placing the construction of Railways in this Colony in your hands should you have felt disposed to undertake the work.

The negotiation terminated without any definite agreement being entered into, because Mr. Gabrielli was not authorised to accept any contract on your behalf, and was unwilling to do so, and was also unable, in accordance with the proposed agreement, to find a local contractor to proceed with the works on your behalf, until the proposed agreement, which you will find among the accompanying papers, could be laid before you by him for your acceptance or refusal.

The correspondence will shew to your firm the willingness of this Government to enter into arrangements with you for the construction of Railways in the Colony; and the negotiation has been the means of eliciting from the Legislative Assembly an all but unanimous expression of its opinion, that in contracts for the construction of Railways the principle of public competition might be departed from.

The Government, in consideration of the trouble Mr. Gabrielli has given himself in the matter, are desirous that he should be the bearer of their views to you, the nature of which will be found in my letter to that gentleman dated this day, and transmitted to you herewith, together with other papers.

It would be useless for me to dilate upon the openings presented by the mineral resources and unoccupied lands of this Colony for the employment of capital and skilled labor; but I may say that, from the comparative absence in this country of navigable rivers and good roads, Railways must, sooner or later, form its arterial communications; and the question is not so much whether Railways will be wanted as the time to be occupied in their construction, and the system under which, and the means by which they shall be made.

I beg to forward, for your acceptance, copies of my two Reports on the Internal Communications of this Colony, as they may afford some information.

I have, &c.,

B. H. MARTINDALE.

P. S.—I am directed by the Government to enclose for your information the schedule of prices upon which the estimates for the extensions now sanctioned are founded, the schedule of prices upon which work has lately been done, a sample specification, and the trial sections of the lines; the works upon which however, it is anticipated, will be reduced in the execution. I am to request you will be so good as to consider these papers as strictly confidential documents, sent for your information only, and I am to add they are such as the Government would transmit to no person in whom they did not place the highest confidence.

ARTICLES OF AGREEMENT made, entered into, and concluded this _____ day of August, A.D., 1858, between Antony Gabrielli, at present of the City of Sydney, gentleman, of the one part, and the Commissioners for Railways, incorporated by an Act of the Government and Legislative Council made and passed in the 18th year of the reign of Her Majesty Queen Victoria, intituled, "An Act to make provision for the construction of Railways in the Colony of New South Wales," of the other part.

WHEREAS Her Majesty's Government of New South Wales have determined to make and construct lines of Railway extending from the present Southern and Northern Lines to Penrith, Picton, and Singleton, being in the whole a distance of 68 miles, or thereabouts: And whereas the said Antony Gabrielli is the Agent in this Colony of the firm of Sir M. Peto and Company, of London, Railway Contractors, and is desirous, on behalf of the said firm, of contracting for the construction of the whole of the said Railway works, but is unable to enter into a final contract on behalf of the said firm without further communicating with them on the subject: And whereas, in order to secure to the said firm the option of entering into a contract with the Commissioners for Railways for the construction of the said Railways, and to prevent any delay in the execution of the works, he has proposed to Her Majesty's Government to enter into this contract in his own name for the making and constructing of the whole of the said Railways, according to the specifications and drawings already prepared,

or which shall be prepared, by the Engineer-in-Chief for Railways, and signed by such Engineer, and approved and signed by the Commissioners for Railways, and subject to and in accordance with the conditions and stipulations to be annexed to such specifications to the satisfaction of the Commissioners or Commissioner for Railways for the time being, at the prices to be set forth in a Schedule to be prepared and signed by the said Engineer-in-Chief, and approved and signed by the said Commissioners for Railways, and forwarded by the said Commissioners for Railways to the said firm of Sir S. M. Peto and Co., subject, nevertheless, to the provisions hereinafter contained for the determination of this Contract: And whereas the said A. Gabrielli has agreed to pay into the hands of the Colonial Treasurer within three days after the execution of these presents the sum of £5,000 to remain as security for the due performance in all respects of this contract on the part of the said A. Gabrielli: And whereas it has been agreed by Her Majesty's Government to grant to the said A. Gabrielli remission orders to the extent of 80 per cent. of the amount usually allowed in aid of emigration, according to the Emigration Regulations, in respect of all laborers and artizans who may be brought out to this Colony by the said A. Gabrielli for the purpose of executing the said works:

Now these presents witness, that the said A. Gabrielli, for himself, his executors and administrators, doth hereby covenant and agree with the Commissioners for Railways that he the said A. Gabrielli, his executors or administrators, shall and will well and substantially, and in the best and most workmanlike manner, with the best materials of their respective kinds, to the satisfaction of the Commissioners or Commissioner for Railways for the time being, or of such person or persons as may be appointed to superintend the works on behalf of the Commissioners for Railways, and, in case there shall be any difference of opinion as to the quality of the materials or workmanship, the said A. Gabrielli, his executors, administrators, is to be bound by the decision of the said Commissioners, or their officer; and with all reasonable expedition make, execute and complete—such completion to be certified by the said Engineer-in-Chief, or other officer of the Commissioners duly appointed for the time being—lines of Railway from the present Southern Line to Penrith and Pieton, and from the present Northern Line to Singleton, a distance in the whole of 68 miles or thereabouts, according to the maps or plans of the same in the office of the Commissioner for Railways, with all works whatsoever, whether temporary or permanent, which shall be described or referred to in the specifications and drawings to be prepared as aforesaid, or which may reasonably be inferred therefrom; and that he or they shall and will forthwith commence the said works and proceed with the same to the satisfaction of the said Commissioners or their officer, and will complete the whole of the said works before the 31st day of December, 1860; and further, that he the said A. Gabrielli shall and will at all times appoint and employ constantly upon the works competent and responsible persons, to be approved by the Commissioners, as foremen or agents of the said A. Gabrielli, to whom applications may be made, and directions given, on all matters touching the works hereby contracted for, and in all matters arising out of this contract. And the Commissioners for Railways do hereby, for themselves and their successors, covenant, promise, and agree with and to the said A. Gabrielli, his executors and administrators, that they, the said Commissioners for Railways, will well and truly pay to the said A. Gabrielli, for the works executed under this contract, the prices mentioned in the said schedule to be prepared as aforesaid for the several works to be done and executed; such payments to be made either in cash or Government Debentures, at the option of the said Commissioners for Railways, the Debentures being valued and taken by the said A. Gabrielli at the rate of £95 for every £100. And it is further agreed between the said parties, that if at any time during the continuance of this contract the price of labor shall increase to the extent of 15 per cent. above the price mentioned in the said schedule of prices, the said A. Gabrielli shall be at liberty, upon his proving to the satisfaction of the Commissioners for Railways that the price of labor has so increased, to discontinue the said works for such period as he shall think fit, not exceeding in the whole the period of six months. And it is further agreed between the said parties, that in case and so often as any dispute or difference shall arise between the Commissioners for Railways and the said A. Gabrielli, his executors or administrators, concerning or relating to the works hereby contracted for, or any of them, or any covenant or engagement, matter or thing, herein or in the said specifications contained or to be contained, or the construction hereof (excepting always any question as to the quality of the materials or workmanship of any of the works, on which questions the decision of the Commissioners for Railways for the time being is to be final and conclusive), the subject of every such dispute shall be referred to the arbitration and award of two arbitrators, one to be chosen by the said Commissioners for Railways, and one by the said A. Gabrielli, his executors or administrators; and in case either party shall refuse to name an arbitrator within seven days after notice in writing shall have been given by the other party requiring him or them to do so, then at the expiration of the said seven days, the arbitrator appointed by the party giving such notice shall be at liberty to proceed alone; and such arbitrators as first above-mentioned shall have power to appoint an umpire, and the award or determination of the person or persons to whom the reference shall be made shall be final and conclusive on all parties: Provided always, and it is hereby declared and agreed, that if the Commissioners for Railways shall within a period of eight months from the 11th day of August instant, receive a notice in writing from the said firm of Sir S. M. Peto & Co., or from the said A. Gabrielli, to the effect that the said firm declines to adopt this contract, or to enter into a contract with the Government or the Commissioners for Railways, for the completion of the works hereinbefore mentioned upon the terms of this contract, then at the expiration of three months from the day on which such last-mentioned notice shall have been received, this contract shall cease and determine.

In witness whereof, the said A. Gabrielli has hereunto set his hand and seal, and the Commissioners for Railways have set and affixed their corporate seal, the day and year first above written.

SIR S. M. PETO to THE CHIEF COMMISSIONER FOR RAILWAYS.

5, Great George-street, Westminster,
16 November, 1858.

SIR,

We have had the honor to receive your communication of the 11th August, in reference to the construction of the proposed Railway Extensions in New South Wales, which you submit to us for acceptance on the terms therein specified.

We have since its receipt given our best exertions, in connexion with our esteemed friend Thos. Brassey, Esq., to gain the necessary information, and form such arrangements, as we trust will by the next mail enable us to reply definitely to your kind consideration of our house.

I am, &c.,

S. MORTON PETO.

THE CHIEF COMMISSIONER FOR RAILWAYS,
Sydney, New South Wales.

A. GABRIELLI, ESQ., to THE CHIEF COMMISSIONER FOR RAILWAYS.

London, 16 November, 1858.

DEAR SIR,

The Mail *via* Southampton did not arrive in time for Sir M. Peto to reply to your official letter, 11th August, before this. By this Mail you will receive their reply, to which I may add that I am confident that their proposal will be ultimately satisfactory to the interests of your Department, and to the Colony at large. They have decided to send by the next Mail a qualified agent, with full powers to treat with you; and I have no doubt that you will use your best endeavours to secure to the Colony the services of these able and efficient contractors, who have given during many years unmistakeable proofs of their abilities to perform every work they have undertaken, almost in every country and every clime.

Mr. Brassey, one of the most successful and able contractors, will join Sir M. Peto & Betts, and his co-operation will add to strengthen the combination.

Please to have the kindness to present my respects to the Honorable Mr. Cowper and Mr. Robertson, and thanking you for all the trouble I may involuntarily have given you,

Believe me, &c.,

A. GABRIELLI.

CAPT. MARTINDALE, R.E.,
Sydney.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

CONSTRUCTION OF RAILWAYS IN N. S. W.

(CORRESPONDENCE RELATIVE TO WITH SIR S. M. PETO.)

Ordered by the Legislative Assembly to be Printed, 10 February, 1859.

SIR S. MORTON PETO to THE CHIEF COMMISSIONER FOR RAILWAYS.

9, Great George-street,
Westminster, December 12, 1858.

SIR,

Referring to our letter of the 16th ultimo, in reply to yours of the 11th August, we have the honor to inform you that we have decided to accept your proposition to enter into arrangements with our firm for the construction of Railways in your Colony.

We have appointed an Agent, who will leave England for Sydney by the Mail following that which takes this letter, with full powers to treat with you on our behalf.

We have, &c.,

(for Brassey, Betts, and self.)

S. MORTON PETO.

To CAPTAIN MARTINDALE,
Chief Commissioner for Railways,
Sydney, New South Wales.

A. GABRIELLI, ESQ., to THE SECRETARY FOR LANDS AND WORKS.

9, George-street, Westminster,
London, 17 December, 1858.

SIR,

I have the honor to inform you that Messrs. Peto, Brassey, and Betts have communicated by this mail to Captain Martindale their intention to accept your Government offer to undertake the construction of New South Wales Railways, and they have made arrangements to send out by the next mail a qualified agent with a staff and full powers to enter with your Government into negotiations, which I hope will prove satisfactory.

I am now maturing a combination for raising a large amount in case your Government would decide on further extensions, the result of which I will communicate to you by next mail.

I have, &c.,

A. GABRIELLI.

THE HONORABLE
THE SECRETARY FOR LANDS AND WORKS,
Sydney, New South Wales.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

RAILWAY CONSTRUCTION.

(CORRESPONDENCE RELATIVE TO.)

Ordered by the Legislative Assembly to be Printed, 28 January, 1859.

THE HONORABLE J. MONTEFIORE, ESQ., to THE HONORABLE C. COWPER, ESQ.

*O'Connell-street,**23 December, 1858.*

MY DEAR COWPER,

It is one week to-day since I landed, and I have as yet received no reply to the very important Railway proposal I placed in your hands. In ordinary courtesy to the great financiers who, when good enough to meet my views, requested something like an answer by the January Mail, I shall feel it my duty, if I do not hear from you before you go to the House to-day, to place the proposed scheme before the public, which has as yet been communicated to yourself only, as the head of the Government.

Yours, &c.,

JACOB L. MONTEFIORE.

THE HONORABLE

CHARLES COWPER, ESQ.,

&c., &c., &c.

 THE HONORABLE C. COWPER, ESQ., to THE HONORABLE J. MONTEFIORE, ESQ.
Sydney, 23 December, 1858.

MY DEAR MONTEFIORE,

Your note of to-day has taken me by surprise, no Railway proposal having been placed in my hands by you. The conversations which we have had since you returned to the Colony upon the subject of a loan have been of rather an indefinite character, and, as I understood, only preliminary to a proposal which you were to make provided the Government were prepared to consider the matter. I did not learn from you, however, that you were duly authorised to negotiate for such a loan, or to fix any terms for the advance of money by any party in England; on the contrary, if I do not mistake, you informed me that you had no such authority, and that you were in a similar position in reference to the Railway project.

So far as I have had the opportunity, amidst my numerous pressing engagements, I have made my colleagues acquainted with what passed between us; and I intended that at the earliest moment we had for the purpose, we should determine whether any good result could arise, by the Government entertaining propositions which, even if assented to, would be binding upon no one. Before a formal reply could be given, it would be necessary that you should communicate to me in writing what your proposals are; and I can only assure you that if you will do so, they shall be carefully considered and determined upon without delay. I regret that you should be under the impression that any want of attention has been shewn to your communication; but I thought, and still think it doubtful, whether the matter, as presented for consideration, is so urgent that Parliament should be requested to consider it in a hurried Session like the present.

The Government cannot possibly have any objection to your placing your proposals before the public; and after Mr. Donaldson's allusion to them the other evening in the Assembly, the information would probably be interesting.

Yours, &c.,

CHARLES COWPER.

THE HONORABLE

J. MONTEFIORE, ESQ.,

&c., &c., &c.

[On the same day the following letter was placed in the hands of Mr. Cowper by
Mr. Montefiore.]

Angel Court, Throgmorton-street,

London, 14 October, 1858.

TO THE HON. J. L. MONTEFIORE.

DEAR SIR,

I have seen Baron Lionel de Rothschild, and he told me that he had examined the project of a Loan which I submitted to you and to him as the best means of raising the amount required for the construction of Railways in New South Wales. He also mentioned that he had the pleasure of seeing you in Paris, and that he then repeated to you that his house would be willing to undertake such loan, and to contract for the whole of it, subsequently to proper sanction being given by the Legislature, supposing that at the period of contract the terms and conditions could be mutually agreed on. Failing agreement in them, that his house would undertake to try and dispose of the amount of stock created by the Colony on commission, supposing that the conditions of this last arrangement could be agreed on.

Beyond a general assurance of good will, a willingness to take the loan on contract if terms could be agreed on, and a willingness to offer his services to dispose of it on commission if the first combination could not be carried out, he would not proceed at present; but I am sure that what he has said is quite sufficient to justify you, if your views are favorable to such a means of extending the already high credit of New South Wales, and finding the amount required for executing the great public works so indispensably required in the Colony, to exert your influence to promote the speedy enactment of such Legislative measures as will enable some one in this country to whom the Colony may delegate the power, to conclude an arrangement for a loan within the margin and terms to be confidentially communicated to such agent. He would then be in a position to negotiate a loan, and of course if he could not come to terms with Messrs. N. M. Rothschild & Sons he could apply elsewhere; but I am convinced that if his views and those entertained by the Colonial Legislature are reasonable, that there is a great chance of coming to an understanding; while from their expressed goodwill, still more from the advantage the Colony could not fail to derive from any of its financial affairs being committed to such hands, I am sure his first application should be to them. From what Baron L. de Rothschild said, I feel justified in stating that he feels no objection to your stating publicly his willingness to undertake the loan, supposing the terms can be mutually agreed on. At this distance of time, with all the contingencies that may or may not arise, I do not think he could reasonably be expected to say more: but I have little doubt but that he would have been willing to proceed at once to the discussion of details had it been possible to pursue the matter at this moment.

I shall be glad to hear from you on the subject, and offer my services to do anything in my power to aid the realization of a project so eminently calculated to benefit the interests of New South Wales, if it can be carried out.

With every assurance of regard and esteem,

I remain, &c.,

S. W. WALEY.

THE HONORABLE J. MONTEFIORE, ESQ., to THE HONORABLE C. COWPER, ESQ.

Thursday, [23 December, 1858.]

MY DEAR COWPER,

The letter of my Cousin being rather vague, I think it well to write a few explanatory lines, which you can use publicly. In enclosing to me the letter I handed you this afternoon, my Cousin writes privately—"I had a long interview with Baron Lionel this morning, and the result is my enclosing the accompanying letter. He said he had assured you of his willingness to undertake the loan, and that he could not go further at *this moment*, as it would be so long before anything definite could be concluded. I asked if you might publicly state so much. He said, Yes. If I might write you a letter which might be publicly quoted, in whole or in part, stating what he said. He replied, Yes. If he would like to see it before I sent it. He said it was unnecessary, he could trust to my repeating his words accurately. I accordingly drew up the enclosed letter, and keep a copy. I think it ought to be sufficient to enable you to make some progress in the
" matter

"matter. Baron Lionel asked me to see him before next mail, when I will write again and report progress. I feel sure that the scheme is practicable, and that if we were in a position to treat, at this moment it could be settled off hand; that on most points we should agree, and most probably should not fail in those which would become matters of discussion.

"This being my view, and not apprehending any change in monetary affairs for, say six months, I think that the thing can be done, if your Legislature give power to conclude it, and if they are satisfied with a reasonable figure, say 91 or 92, considering the novelty and magnitude of the affair. But Rothschilds are right not to come to details now; their expressed willingness to try and come to terms at the earliest moment the negotiations can be *definitively* made, seems to me satisfactory and enough." So much for my Cousin's letter, and I further enclose you sketch of the plan to which he alludes in his business letter, as being the one upon which they were willing to treat—the blanks* which I have filled up are the points of discussion with an authorised Attorney of the Government. Entreating most earnestly your attention to the affair.

*Blanks indicated by brackets.

In haste,

Most truly,

JACOB L. MONTEFIORE.

THE HONORABLE

CHARLES COWPER, ESQ.,

&c., &c., &c.

(Enclosure referred to)

PROJECT of a Loan for the Government of New South Wales.

New South Wales is the oldest, and, taking all into account, the most important of all the British Australian Colonies. Its capital, Sydney, is undoubtedly the first city in Australia. New South Wales is exceeded in population by Victoria, (capital, Melbourne), the great gold producing Colony, but certainly not in wealth and real productiveness. The population is about 330,000. The yearly expenditure, including interest on debt, about £1,200,000. The yearly revenue about £1,150,000. The apparent deficit arises from large Educational grants. The comparatively small revenue results from the taxation being hardly half what it is per head in Victoria. It is proposed to make Railways. The State will make them, and, of course, increase taxation in order to provide for their cost, or, if made by loan, in order to meet the interest on such loan. The whole system of Railways to be made would cost £8,000,000; but it is only proposed now to make so much of the Railway from Sydney to Melbourne as lays within New South Wales territory. This will cost about £4,000,000; the rest of it, laying within Victorian territory, is in course of construction by the Victorian Government. Of this £4,000,000, £2,000,000 will be wanted shortly, and £2,000,000 in about three years. It is with respect to those last two amounts that the following plan is submitted. It may be stated that the total present debt of New South Wales consists of about £3,000,000 of 5 per cent. debentures, payable off, at par, at various dates, extending to about 30 years. Its credit has always stood highest of all the Australian Colonies, and these debentures are readily saleable, in moderate amounts, in London at about par—(price, Sept. 20, 1858, 100½ ex-dividend paid 1 July.) The 6 per cent. debentures of the Victorian Government are quoted 110, and the Town Bonds of Melbourne (equally Victorian Government, 6 per cent. securities) 105. The Victorian Government proposes to raise its share of the costs of the Railway from Melbourne to Sydney in 6 per cent. bonds, not to be issued to the public under 105, and has contracted with the local Banks for the sale of a portion of these bonds. It is evident that the issue of such bonds in lots fully paid up from time to time, is an unskilful financial operation, and it is to avoid this and other plans open to various objections that the present scheme is proposed. A loan of £2,000,000 in 5 per cent. debentures, payable off at par at the rate of £50,000 a-year on and after 20 years from the period of issue, to be issued to the public in commission at a price not below [92 to 93, 94,] commission, and all charges not to exceed [1¼] per cent., or to be contracted for at [91 to 92,] with a proviso not to be issued to the public more than [2] per cent. higher than the Government contract price, the exact amount of the margin to be left to the contractor. Interest and principal to be paid in London (and Sydney). No other debentures to be issued for three years from the period of this loan otherwise than to renew debentures falling due at the time. £2,000,000 more to be issued and offered to the contractor of the first £2,000,000, (not necessarily at the same price). The instalments to be spread over a-year, but parties to have power to anticipate them at per cent. The bonds to bearer, with coupons, to be exchangeable for inscribed stock, with dividend warrants at the option of the holder, who also can retransfer the bonds to bearer in each case at a fixed charge to be paid as a fee. The inscribed stock not to be paid off while inscribed, but to become subject and entitled to be paid off when retransferred into bonds. In point of fact this would leave the option of being paid off or not with the holders. The power of inscribing the stock would add to its market value, and lead to its being permanently placed. The plan pursued for French stock and shares would furnish the method of carrying out this idea. The loan would be made by authority of the Legislature, and the interest would be secured on the Revenue, and all the Government lands of the Colony; there would be a party in London duly empowered to negotiate it.

THE HONORABLE J. MONTEFIORE, ESQ., to THE HONORABLE C. COWPER, ESQ.

Friday Morning,

24 December, 1858.

MY DEAR COWPER,

I find that I omitted to write yesterday that after seeing Rothschilds I obtained another interview with Sir Moreton Peto, who came up to London to meet me, and who authorized me to state that so soon as he was informed that the Government were surveying the *whole* line to Albury with the intention of opening it for contract, he would send out his own surveyor, who should be prepared, on the day the Government advertised for tenders for the whole line, to submit one under engagement to complete it in six years, and further, that if the bounties of £10 per head were altered, as proposed by the Committee of the Legislative Council, he would send out his own staff of navvies, &c.

Yours, &c ,

JACOB L. MONTEFIORE.

THE HONORABLE

CHARLES COWPER, ESQ.,

&c., &c., &c.

THE HONORABLE C. COWPER, ESQ., to THE HONORABLE J. MONTEFIORE, ESQ.

Wivenhoe, 27 December, 1858.

MY DEAR MONTEFIORE,

I have read attentively the letter from Mr. Waley which you handed to me on Thursday afternoon, and the notes which you have since addressed to me in reference to the subject of my last communication; I have also conferred with my colleagues upon the propriety of bringing before Parliament in the present Session, as you desire, a measure for raising a loan for the purpose of speedily completing the Railway between Sydney and Albury.

We have carefully considered the matter, and are of opinion that there is nothing in the correspondence with which you have favored me which proves that it would be expedient for the Government to alter the intention which had been formed before your arrival, to confine this, the closing Session of the existing Parliament, as far as possible to the consideration of the Estimates for 1859.

The great questions of a loan of some millions, and the construction of Railways upon the scale contemplated by you, appear to us to involve considerations of such magnitude that they ought unquestionably to be reserved for the judgment of the new Assembly.

In the meantime I trust no change of an unfavorable character will occur either in the money market, or as regards the willingness of Railway Contractors of high reputation and capital to direct their attention to these rising Colonies.

I remain, &c.,

CHARLES COWPER.

THE HONORABLE

J. MONTEFIORE, ESQ., M.L.C.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

SYDNEY AND PARRAMATTA RAILWAY.

(ACCOUNT OF OVER-PAYMENTS TO CONTRACTOR.)

Ordered by the Legislative Assembly to be Printed, 19 January, 1859.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE UNDER SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Railway Branch,
Department of Internal Communication,
Sydney, 6 January, 1859.*

SIR,

With reference to B.C. minute of the 11th ultimo, on the subject of certain frauds represented to the Secretary for Lands and Public Works as having been traced in the formation of the Railway from Sydney to Parramatta, I have the honor to report that from measurements of four cuttings, the results of which are appended, it appears that, taking the price paid for earthwork at 3s. 9d. per cubic yard, as fixed by the Board minute of the 28th December, 1853, a sum of £9,097 6s. must have been paid to the Contractor for 48,519 cubic yards of excavation not actually performed.

There can be little doubt but that a further investigation would lead to the discovery of further discrepancies between the amount of work performed and the amount paid for.

I have, &c.,

THE UNDER-SECRETARY
FOR LANDS AND PUBLIC WORKS.

B. H. MARTINDALE.

No. of Cutting.	Quantity actually excavated.	Quantity paid for on Engineer's Certificate.	Quantity paid for in excess of quantity actually excavated.
	c. yds.	c. yds.	c. yds.
9	8,050	9,984	1,934
10	13,837	17,444	3,607
15	41,282	58,314	17,032
19	64,854	90,800	25,946
	128,023	176,542	48,519

48,519 c. yds. @ 3s. 9d. = £9,097 6s. 3d.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

SYDNEY AND PARRAMATTA RAILWAY.

(CORRESPONDENCE RELATIVE TO RE-MEASUREMENT OF EARTHWORK.)

Ordered by the Legislative Assembly to be Printed, 15 February, 1859.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Railway Department,
Sydney, 23 November, 1857.*

SIR,

Shortly after assuming the direction of the Railway Department in this Colony I found that there was not that cordial co-operation existing between the Engineer-in-Chief, Mr. Whitton, and one of his subordinates, Mr. Brady, that is necessary in every branch of the Public Service.

Mr. Brady was at the time General Manager and Locomotive Superintendent, as well as Resident Engineer, on the Great Southern Line, and as the matter was not so urgent as others that pressed upon my attention, I allowed it to stand over for a time.

When, however, I commenced an examination into the condition of the Traffic Department, I found that Mr. Brady's services in the mixed capacity above named were unnecessary, and I had reason also to be dissatisfied with the management. The Commissioners, on my recommendation, removed him; but, in consideration of his past services, and of his experience and ability, determined to employ him as an Assistant Engineer only.

To do this it was necessary to place Mr. Brady under the immediate orders of Mr. Whitton, as the Commissioners held the head of each branch of the department immediately responsible to themselves for the proper conduct and employment of all their subordinates.

I found, however, that Mr. Whitton was unwilling to be thus responsible for Mr. Brady; and, on further inquiry learned, that, from an examination of some of the railway accounts, Mr. Whitton felt unable to place the necessary trust in Mr. Brady.

It was impossible to continue to employ Mr. Brady, without such an investigation as should shew how far this feeling was just; and some questions were, therefore, put to Mr. Brady on the 22nd September last, in reference to the accounts of the Sydney and Parramatta Railway; the replies to which were not satisfactory.

The inquiry has since been pursued, and the general result is as follows:—

- 1st. The earthwork on the Sydney and Parramatta Line was let at per cubic yard.
- 2nd. The work done was never measured on the ground to ascertain the quantity that should be paid for.

3rd. Yet certificates were given to the Board that the accounts were made out from actual measurement.

4th. In defence of this, Mr. Brady alleges, that by the expression "actual measurement" was meant "measurement from drawings"; that Mr. Wallace, by personal examination, satisfied himself the work charged in the accounts was done, and that though he (Mr. Brady) was entrusted with the compilation of accounts, and signed them with Mr. Wallace, yet he was only a subordinate, and cannot be held responsible.

The Commissioners are of opinion that actual measurement cannot be understood to mean measurement from plans and sections, as stated by Mr. Brady; and that the Engineers could not properly satisfy themselves what amount of work should be paid for without measurement.

It further appears, that for bridges and culverts, &c., the contractor made an estimate in detail of the quantity of work to be done, and, after adding one-tenth for contingencies, agreed to do each particular service for the total amount.

But it does not appear that any measurements were taken to ascertain that the amount of work shown in drawings and in estimates was done, or to deduct a proportionate sum from the contractor in cases where it was not done, although additions were allowed when additional work was done. Generally it appears that the amount of the original tenders was paid, and that there are no records of measurement having been taken to ascertain if the work had been actually done.

Mr. Brady states, in explanation, that Mr. Wallace satisfied himself the work was done, and then felt justified in certifying the accounts were made from actual measurement.

The explanation is not satisfactory to the Commissioners, and they have no means of ascertaining how far Mr. Brady and Mr. Wallace were justified in the course they pursued.

They have therefore to request that the late Directors of the Sydney and Parramatta Railway Company may be called on to furnish a reply to the following questions:—

Were the Directors aware that by "actual measurement" their Engineers simply meant measurement from drawings, or were the certificates passed under the impression that the work had been actually measured?

Had the Directors any understanding with the Engineers that, provided they were satisfied with the work, it was a matter of indifference whether the quantity contracted for was done or not? or did the Directors give the Engineer power to commute one description of work for another, at prices to be arranged between Contractor and Engineer, as less excavation in rock to be paid for in place of more in soil, &c., &c., and *vice versa*; and that the amount of the original tender, as shewn on the original drawing, might be certified for and paid?

How far would the Directors consider Mr. Brady responsible for the accounts he compiled and certified to during Mr. Wallace's stay in the country?

There is reason to apprehend that large sums have been paid to Mr. Randle under these circumstances which he would never have obtained under a more efficient system; and it becomes a question whether, however laborious the task may be, the work on the Sydney Railway should not be re-measured, to see what this excess has been.

I have, &c.,

B. H. MARTINDALE,
Chief Commissioner.

THE HONORABLE
THE SECRETARY FOR
LANDS AND PUBLIC WORKS.

Request the Chief Commissioner to have the work on the Sydney Railway re-measured forthwith, and write to the late Directors requesting answers to the questions suggested.

T. A. M.
Nov. 28, 1857.

THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to THE CHIEF COMMISSIONER
FOR RAILWAYS.

*Department of Lands and Public Works,
Sydney, 30 November, 1857.*

SIR,

In acknowledging the receipt of your letter of the 23rd instant, respecting the result of an inquiry into certain accounts of the Sydney and Parramatta Railway, I am directed by the Secretary for Lands and Public Works to request that you will have the goodness to cause the work in question to be re-measured forthwith, as suggested by you.

2. I am at the same time to inform you, that the late Directors of the Sydney and Parramatta Railway Company have been furnished with a copy of the questions contained in your letter, above referred to, with a request that they will have the goodness to furnish answers thereto.

I have, &c.,

MICHL. FITZPATRICK.

THE CHIEF COMMISSIONER FOR RAILWAYS.

F. L. S. MEREWETHER, ESQ., to THE SECRETARY FOR LANDS AND PUBLIC WORKS.

Forbes-street, 19 December, 1857.

SIR,

I have the honor to acknowledge the receipt of your letter of the 30th ult., requesting replies to certain questions which have arisen in connexion with an investigation into the accounts of the Sydney and Parramatta Railway.

On the receipt of that letter I communicated with those of my colleagues on the late Railway Board who were in Sydney, and went with them to the office of the Railway Commission, to ascertain the precise meaning of some of the questions which were not clearly understood. Having obtained the required explanations, and having referred to the documents deposited in that office, I beg now to send the following replies:—

1. The Directors understood by measurement, "actual measurement on the ground," and the certificates were passed by them under the belief that the works had been so measured.

2. The Directors had no understanding with the Engineers that, provided they were satisfied with the work, it was a matter of indifference whether the quantity contracted for was done or not, nor did the Directors give the Engineer power to commute one description of work for another, at prices to be arranged between the Contractor and the Engineer. The Directors expected, and understood, that no work would be certified for but such as had been done in accordance with the contracts approved and authorized by the Board.

The Directors recognized no divided responsibility as respects the works or accounts of works, but their dependence was placed on the Engineer-in-Chief (Mr. Wallace) alone. He was held answerable for every thing connected with the business of his office, and his certificate only was acted upon or received by the Board; but, as a subordinate officer, Mr. Brady is undoubtedly responsible for the correctness of his own work, and must thus be answerable for accounts compiled and certified to by himself whilst acting under Mr. Wallace.

I have, &c.,

THE HONORABLE THE SECRETARY
FOR LANDS AND PUBLIC WORKS.

FRANCIS L. S. MEREWETHER.

Will the Engineer-in-Chief suggest the measures he considers advisable to carry out the instructions of the Secretary for Lands and Works?

B. H. M.

Transmitted to Engineer-in-Chief, 1/12.

1/12.

It will be almost impossible to measure up the *whole* of these works, but there will be no difficulty with regard to the earthworks, which form the great bulk of the work, except the cutting first beyond the Cleveland tunnel, which has been used for ballast as well as for embankment.

J. WHITTON,

Dec. 3/57.

THE

This may be forwarded
to the Chief Commis-
sioner of Railways.

See letter of Secretary
for Lands and Works,
23 Nov.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Railway Department,
Sydney, 29 December, 1857.*

SIR,

In reference to your letter of the 30th ultimo, on the subject of re-measuring the works on the Sydney and Parramatta Railway, I have the honor to inform you that the pressure of work in this department leaves no hope that the measurement can be effected without extra assistance for a considerable time to come; I have, therefore, to request your permission to employ extra assistance for this purpose, for which a sum of about £600 will be required, which, if sanctioned, can be defrayed from savings on the vote for the extension from Liverpool to Campbelltown.

Approved,
C. C., 1 Jan., 1858.

To Chief Commissioner
of Railways, 6th Jan.,
1858.

Ask the Commissioner
for Internal Communi-
cation to have the good-
ness to forward the other
papers.

M. F.
B. C. 14 Dec.

It is proposed to take advantage of the re-measurement to make a plan of the line which does not now exist, shewing the property purchased by the Government.

I have to add that the Commissioners have dispensed with Mr. Brady's services from the 31st instant.

I have, &c.,

B. H. MARTINDALE.

THE HONORABLE THE SECRETARY
FOR LANDS AND WORKS.

THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to THE CHIEF COMMISSIONER
FOR RAILWAYS.

*Department of Lands and Public Works,
Sydney, 6 January, 1858.*

SIR,

With reference to your letter of the 30th ultimo, requesting permission (in consequence of the pressure of work in your department) to expend the sum of £600 in employing extra assistance for the purpose of re-measuring the works of the Sydney and Parramatta Railway, I am directed to inform you that the Secretary for Lands and Public Works has been pleased to sanction the expenditure of this amount for the purposes stated, the same to be charged to the savings on the vote for the extension of the Railway from Liverpool to Campbelltown.

2. I am likewise to convey to you the approval of the Secretary for Lands and Public Works to your suggestion of taking advantage of this re-measurement to make a plan of the line shewing the property purchased by the Government.

I have, &c.,

MICHL. FITZPATRICK.

THE CHIEF COMMISSIONER
FOR RAILWAYS.

Request Engineer-in-Chief to recommend some competent person for this temporary duty, together with the salary he considers should be allowed.

It would probably be advisable to measure a short portion first of the line, and to compare it with the accounts, to see if any action at law could be taken against the late Contractor, or Engineers, for fraudulent accounts.

B. H. M.

7/1. To Mr. Whitton.

7/1

For the purpose of assisting in the measurement of the earthwork on the Sydney Railway, and of making a complete survey of the land taken for the works between Sydney and Parramatta, I recommend the Commissioners to engage Mr. E. Micklethwait, at a salary of £500 per annum, with the usual allowance for expenses when his duties require that he should be absent all night from his usual place of residence.

J. W.

Jan. 8, '58.

Resolved,

Resolved, that Mr. Randle be acquainted that fresh measurements of the work executed by him on the line from Sydney to Parramatta have been ordered by the Government to be made, under the impression that proper measurements have never been taken, and with a view to legal proceedings, should such be advised; and that the Commissioners desire to give him the opportunity of attending in person, or by deputy, at the measurements, should he wish to do so. The measurements will commence on the 4th proximo, and Mr. Randle is requested to acquaint the Commissioners if he desires to be represented.

Acquaint Engineer-in-Chief; and that Mr. Micklethwait may be employed temporarily upon this duty from the 4th proximo, at the rate of remuneration named—the entire expense incurred not to exceed the sum of £600 sanctioned by the Government.

B. H. M.

21/1. To Mr. Whitton. 20/1. E. W. W.
20/1.

I would suggest to the Commissioners whether it would not be advisable, previous to giving notice to Mr. Randle, to have a section taken of the line from Sydney to Parramatta, so as to shew in which of the cuttings the probable deficiency in quantities is most likely to exist.

J. W.
 Jan. 21/58.

The Commissioners concur in this suggestion—the Engineer-in-Chief to proceed as suggested at once—defer writing to Mr. Randle.

B. H. M.
 21/1.

Engineer-in-Chief.

22/1. E. W. W.
 To Mr. Whitton. 21/1.
 J. W. 22nd '58.

It has been represented to me that certain frauds have been found in formation of Railway to Parramatta.

I allude to the measurement of the works, &c.
 Please ascertain from the Chief Commissioner.

JOHN R.
 11 Dec

1. Engineer-in-Chief for report as to what Mr. Micklethwait has done in this matter, and at what cost, and precisely how the matter now stands.

2. There must be some other papers, appointing Mr. Micklethwait temporarily, with, I think, some further remarks on them also by me.

B. H. M.
 15/12.

1. Engineer-in-Chief.
 2. Record Clerk.
 3. See previous page; Board Min. of 20-1.

1. To Mr. Whitton. 16/12/58.—B. M.

A section has been taken from Sydney to Parramatta, shewing the line of the existing rails, and also the level of the formation of the earthworks previous to ballasting. The formation level of the the earthworks as originally contemplated, or as shewn on the working sections, is also marked on this section for the greater portion of the distance.

Cross sections have been taken of every cutting at one chain apart, about one-half of which are plotted.

The quantity of excavation in the Petersham cutting has been taken out roughly, and shews that the quantity paid for is about 15,000 yards more than actually executed.

The cost of preparing sections, &c., up to the present date has been:—

Salary	£114	6	1
Chainmen's Wages	51	1	0
	£165	7	0

J. W.
 17/12/58.

SYDNEY AND PARRAMATTA RAILWAY.

Mr. Whitton informed me yesterday he could let me have the results of three or four more sections,—I should be glad to have them early.

To Mr. Whitton,
21/12.

B. H. M.
21/12.

Measurements have been made of the following cuttings :—

No. of Cutting.	Quantity actually executed.	Quantity paid for on Engineer's Certificate.	Quantity paid for in excess of quantity actually executed.
9	c. yds. 8,050	c. yds. 9,984	c. yds. 1,934
10	13,837	17,444	3,607
15	41,282	58,314	17,032
19	64,854	90,800	25,946
	128,023	176,542	48,519 @ 3s. 9d.

£9,097 6s. 3d. paid for work not executed.

J. W.
4/1/59.

THE CHIEF COMMISSIONER FOR RAILWAYS to THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

*Railway Branch,
Department of Internal Communication,
Sydney, 6 January, 1859.*

SIR,

Seen—
John R., 8 Jan.

With reference to B. C. Minute of the 11th ultimo, on the subject of certain

The Chief Commissioner should ascertain from the Railway Solicitor whether or not there is sufficient evidence available to call to account the parties who were concerned in the matter, which appears to me to be fraudulent. He should also prosecute inquiries, so as to ascertain whether there are any other similar instances.

frauds represented to the Secretary for Lands and Works as having been traced in the formation of the Railway from Sydney to Parramatta, I have the honor to report, that from measurements of 4 cuttings, the results of which are appended, it appears that, taking the price paid for earthwork at 3s. 9d. per cubic yard, as fixed by the Board Minute of the 28th December, 1853, a sum of £9,097 6s. must have been paid to the Contractors for 48,519 cubic yards of excavation not actually performed.

John R., 14 Jan.
I should like a copy of this letter for Parliament.

There can be little doubt but that a further investigation would lead to the discovery of further discrepancies between the amount of work performed, and the amount paid for.

Copy taken.
Returned to the Chief Commissioner.
B. C., 18 Jan.

THE UNDER SECRETARY
FOR LANDS AND WORKS.

I have, &c.,

B. H. MARTINDALE.

1858.

Legislative Assembly.
NEW SOUTH WALES.

GREAT WESTERN RAILWAY.
(CONTRACT FOR PROCLAIMED PORTION OF.)

Ordered by the Legislative Assembly to be Printed, 17 December, 1858.

THE COMMISSIONER FOR INTERNAL COMMUNICATION to THE SECRETARY FOR LAND
AND PUBLIC WORKS.

*Department of Internal Communication,
Sydney, 22 November, 1858.*

SIR,

In reference to your B. C. Minute of the 28th ultimo, requesting to be furnished with a copy of the contract entered into with the Contractor for the proclaimed portion of the Great Western Railway, I have now the honor to transmit a copy, signed by Mr. Gibbons.

You will, however, perceive that this is not a perfect document, as it is not signed by the Commissioners, nor by the proposed sureties, who have not yet been accepted by the Government; but I considered it my duty to transmit it as early as possible, even though incomplete.

In the meantime the works are being proceeded with upon such terms as practically ensure the Government against loss.

I enclose also a letter from Mr. Gibbons, praying that these papers may not be laid upon the Table of the House, and stating that such a course, if persisted in, is calculated to do him irreparable injury.

It is my duty to inform you that, in the opinion of the Engineer-in-Chief, in which I entirely concur, the publication of these papers would be calculated not only to injure the Contractor, but also materially to increase the cost to the public of the Northern and Southern extensions.

I have, &c.,

THE HONORABLE THE SECRETARY FOR
LAND AND PUBLIC WORKS.

B. H. MARTINDALE.

[Enclosure.]

KNOW all men by these presents, that we, John Gibbons, of the City of Sydney, in the Colony of New South Wales, Railway Contractor, William Randle, formerly of Sydney, but at present of Melbourne, in the Colony of Victoria, Contractor, and George Randle, of the same place, Contractor, are held and firmly bound to the Commissioners for Railways, incorporated by an Act of the Governor and Legislative Council of the said Colony, made and passed in the eighteenth year of the reign of Her present Majesty Queen Victoria, intituled, "An Act to make provision for the construction by the Government of Railways in the Colony of New South Wales," in the sum of Five Thousand Pounds of lawful money of Great Britain, to be paid to the said Commissioners for Railways, or to their certain attorney, successors, or assigns, for which payment to be well and truly made we bind ourselves, and each of us, our, and each of our heirs, executors, and administrators, and every of them, jointly and severally firmly by these presents. Sealed with our seals, dated this twentieth day of November, in the year of our Lord one thousand eight hundred and fifty-eight.

Whereas the above bounden John Gibbons hath proposed to contract with the Commissioners for Railways to make, execute, and complete, the whole of the works mentioned in the specification hereunto annexed, and the plans or drawings therein respectively referred to, in accordance with the said specification and plans, and subject to the stipulations and conditions annexed to the specification, at or for the prices mentioned in the tender also hereunto annexed and signed by the said John Gibbons, and hath also proposed to execute all

GREAT WESTERN RAILWAY.

the three-rail iron bark fencing required on the portion of the Penrith Railway extension defined in the specification hereunto annexed for the price and at the rate of one hundred and fifty pounds per mile, such fencing to be done according to such specification, and to the satisfaction of the Commissioners. And whereas the Commissioners for Railways have agreed to accept the said tenders of the said John Gibbons, and to enter into a contract with him for the execution and completion of the whole of the said works, upon his entering into this obligation, and the said William Randle and George Randle becoming his sureties for the due performance of such contract: Now the condition of the above-written bond or obligation is such, that if the above-bounden John Gibbons, his executors or administrators, shall find and provide all such materials as shall be necessary for the making, executing, and completing of the whole of the works mentioned and described in the said specification, and the drawings and plans therein respectively referred to, in accordance with the said specification and drawings; also for the said fencing; and if he or they shall in the best and most workmanlike manner make, do, and execute and complete the whole of the said works mentioned in the said specification, in accordance with the said specification and the plans therein referred to, to the satisfaction of the said Commissioners, and if he shall well and substantially erect and complete the whole of the said fencing, and well and truly do, observe, perform, and fulfil all the stipulations and conditions, matters, and things mentioned in the said specification to be by him done, observed, performed and fulfilled, then this obligation to be void, otherwise to be and remain in full force and virtue.

JNO. GIBBONS. [L.S.]

Signed, sealed, and delivered, by the said }
John Gibbons, in the presence of }
JOHN RAE.

Sydney, October 13th, 1858.

Sir,

I hereby offer to execute the whole of the works comprised in Contract No. 1 of the Great Western Railway, in accordance with the plans and specification, at the prices stated in the enclosed schedule.

I am, Sir, &c.,
JNO. GIBBONS.

The Chief Commissioner for Railways.

Sydney, 13th October, 1858.

Sir,

I beg to offer to execute all the 3-rail iron bark fencing on the Penrith Railway extension at the rate of £150 per mile.

I am, Sir, &c.,
JNO. GIBBONS.

To the Chief Commissioner for Railways.

GREAT WESTERN RAILWAY.

EXTENSION—PENRITH.

October 13th, 1858.

FORM OF TENDER.

I HEREBY propose to execute the whole of the Works required in the construction of that portion of the Great Western Railway comprised in Contract No. I, commencing at or near to Parramatta, and being a length of $8\frac{1}{4}$ miles, or thereabouts, in strict accordance with the plans and specification, at the following prices:—

		£	s.	d.
EXCAVATION from cuttings taken to embankment.....	at per cubic yard	0	2	7½
Ditto from road approaches taken to embankment, not exceeding a quarter of a mile lead	" "	0	2	7½
Ditto from side cuttings to embankment, not exceeding three runs	" "	0	1	9
Ditto extra for any additional run	" "	0	0	3
Ditto from side ditches, including forming of mound alongside the ditches	" "	0	2	0
Ditto, if rock, taken to embankment	" "	0	4	9
BRICKWORK, in mortar, to piers, to bridges, wing walls, foundations, &c.	" "	2	15	0
Ditto in cement to ditto	" "	3	0	0
Ditto in mortar to culverts, all sizes	" "	2	15	0
Ditto in cement to ditto	" "	3	0	0
Excavation in foundations to bridges, culverts, &c.	" "	0	3	0
Ditto if rock to ditto	" "	0	6	0
TIMBER (iron-bark) in bridges, including the fixing of all iron work	at per cubic foot	0	5	0
Ditto Memel or Riga	" "	0	5	0
IRON WORK, including bolts, nuts, and straps	at per lb	0	0	6½

The prices in the preceding Schedule include all labor, materials, scaffolding, and workmanship of every kind necessary for the full and perfect completion of the works, and to the entire satisfaction of the Engineer-in-Chief.

JNO. GIBBONS,
Bligh-street.

To the Railway Commissioners.

GREAT WESTERN RAILWAY.—SPECIFICATION.

CONTRACT, No. 1.

1. This Contract commences by a junction with the Great Southern Railway near to the existing Parramatta Station, at a point marked A on the proclaimed plan, part No. 1, in the parish of Saint John and County of Cumberland, and terminates at the Black Town Road in a field, No. 40 (on the proclaimed plan part No 2), in the parish of Prospect; being a distance of 8 miles, 25 chains, and 64 links.

2. The work for which Tenders are to be made, and to which this specification refers, comprises the providing of all materials, labor, scaffolding, tools, implements, and every other thing requisite and necessary for the full and proper completion of all the earthwork, brickwork, timberwork, and ironwork required in constructing a single line of Railway, in accordance with the plans and this specification; and to the entire satisfaction of the Commissioners for Railways.

3. The earthwork, brickwork, timberwork, and ironwork, will be let in one contract, the Contractor stating a price for the earthwork and brickwork, per cubic yard, the timberwork, per cubic foot, the wrought iron girders, bolts, &c., per pound, at which he will execute the work, finding all materials and labor—the work being paid for on the net measurement as executed.

4. The Contractor shall at all times proceed with the work at such a rate, and employ as many men, horses, wagons, barrows, and all other materials as are in the opinion of the Commissioners, or their engineer, adequate for the due completion of this contract; and the Commissioners, or their engineer, shall have the power of immediately dismissing any agent or workman employed by the Contractor, and of having removed off the line of Railway (or any land belonging to the Commissioners) any materials, plant, or implements which in their or his opinion are insufficient for the purpose intended, or at variance with the meaning and intention of this specification. The cost of the removal of any such plant, materials, or implements, to be paid for by the Contractor.

5. The Commissioners will give to the Contractor (or Contractors) possession of the land at as early a period as possible after the signing of the contract, and although the land inside the fences of the Railway may be used for the purpose of carting materials, &c., on to the line, all damage that may be done to any land not actually the property of the Commissioners must be paid for by the Contractor, whether such damage be caused by the carting of materials or the straying of cattle, in consequence of the destruction by the Contractor or his workmen of the original fences, or of the fences alongside the Railway erected by the Commissioners, or by any other cause connected with the construction of the works; but should such damage not be at once paid, such an amount as shall appear reasonable shall be paid by the Commissioners, and deducted from any money that may be due to the Contractor for work done under this contract.

6. The works will be set out for the Contractor, but he must satisfy himself of their accuracy, as no work incorrectly set out, or improperly executed, will be paid for by the Commissioners.

7. Should the Commissioners be at any time dissatisfied with the mode of proceeding, or at the rate of progress of the works, or any part thereof, they shall have full power to make use of all labor or materials which they may deem necessary, the cost of such labor and materials to be deducted from any money that may be then due, or may hereafter become due to the Contractor; and should the Contractor fail to proceed in the execution of and to complete the works in the manner and at the rate of progress required by the Commissioners, his contract shall be considered void so far as relates to the works remaining to be done, and all sums of money that may be due to the Contractor, together with all implements in his possession, and all sums of money named as penalties for the non-fulfilment of the contract, shall be forfeited to the Commissioners, and the amount shall be considered as ascertained damages for breach of contract.

8. All measurements of works shall be made according to the actual dimensions, notwithstanding any general or local custom to the contrary.

9. The Contractor shall, on or before the first day of October, 1859, complete the whole of the works comprised in this contract.

10. The plan, which is drawn on a scale of two chains to an inch, shews the course of the line, the centre *red* line represents the line of the stakes which are driven down at intervals of one chain. These stakes are in the centre for a double line of Railway, but as the present line is only for a single way, the actual working centre will be 5 feet 6 inches on the south side of the stakes, and shewn by a blue line on the working drawings and cross sections.

11. The section which is drawn to the same horizontal scale as the plan, and a vertical scale of 20 feet to an inch, represents the surface of the ground (in black), and is taken along the centre line shewn on the plan in *red*.

The upper or blue line represents the upper surface of the rails when laid; the lower or red line represents the level of the bottom of the ballasting or formation level of both cuttings and embankments, and is two feet below the blue line.

12. The other plans, sections, and drawings, represent generally the form and dimensions of the several works; where any discrepancy exists between the dimensions as indicated by the scale and those marked in figures, the figures are to be considered as correct, and are to be taken in all cases in preference to the measurements by the scale attached; and if there should likewise be any discrepancy between the figures, or dimensions, or the form of construction, or the material, as indicated in the drawings, and the dimensions and material given in the specification, the directions of the specification shall be adopted, and in all cases of defective description, or of any ambiguity, the explanation given by the engineer

engineer shall be considered correct, and shall be adopted subject to the approval of the Commissioners, whose decision shall be final and binding upon the parties. Also anything contained in the drawings, or in the specification, shall be equally binding as if it were contained in both.

13. No addition, deduction, or alteration shall in any way vitiate or set aside the contract; but any addition, deduction, or alteration shall be measured and allowed for according to the schedule of prices attached to the bond, or at a price to be agreed upon at the time.

14. The drawings referred to in this contract are the following:—

- No. 1. Working Plan.
2. „ Section.
3. Cross Section Cuttings and Embankment.
5. Brick Culverts.
6. Viaduct.
7. Do.
8. Bridge over Church-street.
9. Bridge over Marsden-street.
- „ Do. O'Connell-street.
10. Pitt Row.
11. Viaduct.
12. Do.
13. Do.
14. Do.
15. Bridge.
16. Viaduct.
17. Timber culvert.
18. Viaduct.
19. Do.
20. Do.

15. Where the Railway is in cutting, a ditch three feet wide at the top, one foot at the bottom, and one foot deep, shall be made on the highest side of the ground to be occupied by the Railway; on the lower side it will not be necessary to have any ditch. The drains are to be made to fall into the ditches or watercourses at present existing for the drainage of the adjoining lands, or into the diverted channels, as the case may be; and whenever the fall of the drains or that of the diverted channels shall be so great as to endanger the stability of the sides or bottoms of such drains, the same to be protected by pitching, and whenever it may be considered desirable to carry the water from such drains down the slopes of the cuttings, a pitched drain shall be constructed on the slopes; but these matters will be considered as contingent expenses, and paid for as provided in clause 13.

16. A ditch similar to the one described on the top of the cuttings to be formed at the foot of the embankments, on the higher side only.

EARTHWORK.

17. The excavations to be made of the depth shewn on the longitudinal section by the red line, being an average depth of two feet (2 feet) below the level of the upper surface of the rails, as indicated by the blue line.

18. The bottom of the cuttings to be slightly convex, being one foot nine inches below the level of the rails in the centre, and two feet three inches (2 feet 3 inches) at the sides, having a fall from the centre to each of the side drains.

19. The cuttings to be sloped as shewn on the cross sections, and at the batter stated on the longitudinal section, to be 19 feet wide at the bottom, that is to say, at formation level; the sides as the excavation proceeds to be uniformly trimmed or dressed to the specified inclination; proper battering rules being used and provided by the contractor for this purpose.

20. The excavations shall at all times be kept free from water, and so constructed as always to afford the utmost facilities to the escape of the water, by casting and keeping properly cleaned out ditches on each side of the excavations, and also by pumping, if necessary, and directed by the Commissioners or their engineer.

21. At the foot of each slope a drain of uniform depth below the rails, as shewn on drawing No. 3, shall be made along each side of all the excavations on this contract, the cost being included in the price for earthwork.

22. The Contractor must deposit the earthwork from the cuttings, either to the embankments named for its reception or to such other place of equal lead that may be directed by the Commissioners or their engineer during the progress of the works.

23. The term earthwork is to be understood to comprise soil, sand, gravel, clay, marl, shale, &c.; and no extra will be allowed to the prices under the head of earthwork excepting for what is *generally known as rock*.

24. The earthwork must be well panned for such distance as may be required, not exceeding three yards, round all brickwork to piers, abutments, and wing walls, for the full depth of the embankment, and over all culverts where directed to do so, without any extra charge beyond the price stated in the schedule for earthwork.

25. The quantities stated on the longitudinal section are placed there for the Contractor's guidance, to enable him to determine the length of lead; but the quantities paid for will be the actual measurement of the work as executed, whether in excess or diminution of the quantities marked upon the section.

BRICKWORK.

26. All brickwork required on this contract is to be built in English bond, in the form and of the dimensions that may be hereafter furnished. The bricks used to be well-shaped, sound, hard-burnt bricks.

27. The mortar used to be of the best quality, and mixed in such proportions as shall from time to time be directed. All lime used shall be stone lime—no shell lime shall be used for any purpose whatever for works on this contract.

28. The price stated in the Schedule for excavation for foundations is also to include keeping the foundations free from water, and filling in and well ramming round the brickwork, to the level of the original surface of the ground, as the work proceeds.

29. The brickwork to the foundations shall in no case be commenced without an order from the Commissioners or their engineer; and when the excavation shall be ready to receive the brickwork, the Contractor must give notice to the engineer to that effect.

30. The culverts to be built with brick in mortar, of the form shewn on drawing No. 5; the materials and workmanship to be of the best description; the earth must be well rammed round the brickwork, and to the height of the top of the culvert when finished.

31. The brickwork to the culverts must not be commenced until the foundations have been approved by the Commissioners or their engineer.

32. All centering, scaffolding, tools, &c., of all kinds, must be provided by the Contractor at his own cost, and be included in the price stated in the Schedule.

CARPENTER.

33. The timber for the bridges to be ironbark, Memel, or Riga, as may be directed by the Commissioners or their engineer, to be squared, perfectly sound, straight, and well seasoned, and to be framed as shewn on the drawings; great care must be taken in fitting the ironwork, which must be done with the greatest accuracy.

34. The sleepers on the bridges must be secured to the main beams with jagged spikes, 10 inches long, four being driven through each sleeper, two to each beam.

PAYMENTS.

35. Payments will be made once in every month, as the work proceeds, in the proportion of 90 per cent. of the work actually executed, and the remaining 10 per cent. will be paid when the whole of the works have been completed to the satisfaction of the Commissioners.

36. The Contractor must give approved security to the amount of 10 per cent. on the total estimated cost of the works embraced in this contract.

GREAT WESTERN RAILWAY—PARRAMATTA TO PENRITH.

SPECIFICATION FOR FENCING.

The fencing to be sound ironbark three-rail fencing, with posts not less than 7 feet 6 inches long and 6 inches by 2½ inches scantling, to be sunk 2 feet 6 inches into the ground, the earth well rammed and securely and firmly fixed. The rails to be 9 feet 10 inches long and 7 inches by 2 inches scantling, and fitted into the posts in the manner shewn on the drawing; the posts to be charred 3 feet in height. The fencing to be commenced and proceeded with at an uniform rate, as soon as possession of the land can be obtained by the Commissioners, and to be completed on or before the 1st April, 1859.

The Contractor to find all materials and labor for fixing the fencing complete.

Payments will be made monthly, on the engineer's certificate being approved and passed by the Commissioners, in the proportion of 90 per cent. of the work actually fixed, and the remaining 10 per cent. when the whole of the work shall have been completed to the satisfaction of the Commissioners.

MR. J. GIBBONS to THE CHIEF COMMISSIONER FOR RAILWAYS.

Sydney, 16 November, 1858.

SIR,

My attention having been called to a motion of the Legislative Assembly, passed on the 10th of August last, requiring all contractors' schedules to be laid on the Table of the House, I humbly submit that such a course, if persisted in, is calculated to do me irreparable injury, as must be obvious to all business men; and I have to request that, if this can be avoided, you will be pleased to give me that protection necessary for every contractor.

I remain, &c.,

To THE CHIEF COMMISSIONER
FOR RAILWAYS.

JNO. GIBBONS.

* * * * *

And Mr. Gordon having required that the Committee, if granted, be appointed by Ballot,—

Question (1)—That a Select Committee be appointed to consider and report upon the expediency of making a Railway to Windsor, diverging from the proposed Parramatta and Penrith line; with power to call for persons and papers,—put and passed;—

Whereupon the House proceeded to the Ballot, and the Speaker declared the following Members to be, with the Mover, the Committee duly appointed, viz.:—Mr. Dalley, Mr. Scott, Mr. Oakes, Mr. Parkes, Mr. Robertson, Mr. Suttor, Mr. Thornton, Mr. White, and Mr. R. Tooth.

VOTES No. 73. TUESDAY, 10 AUGUST, 1858.

11. Extension of Railway to Windsor:—Mr. White, on behalf of Mr. Smith, moved, pursuant to notice standing in the name of Mr. Smith eighth on the Notice Paper for to-day, That the undermentioned Papers be referred to the Select Committee now sitting on Extension of Railway to Windsor, viz.:—
(1.) Petition from the inhabitants of the Town and District of Windsor, praying for an extension of a branch line of Railway to the District of Windsor, *ordered to be printed* on the 9th April last.
(2.) *First* and *Second* Reports from Captain Martindale, R. E., Chief Commissioner for Railways, on the Internal Communications of New South Wales.
Question put and passed.

VOTES No. 81. TUESDAY, 24 AUGUST, 1858.

14. Extension of Railways to Picton, Penrith and, Singleton:—Mr. Smith moved, pursuant to notice, That the Report from the Chief Commissioner for Railways, in reference to the Extension of Railways to Picton, Penrith, and Singleton, ordered to be printed on the 17th instant, together with the plan shewing the proposed extension from Parramatta to Penrith, laid upon the Table of this House on the same day, be referred to the Select Committee now sitting on "Extension of Railway to Windsor."
Question put and passed.

(Further Proceedings stopped by Prorogation.)

1858-9.

VOTES No. 7. FRIDAY, 17 DECEMBER, 1858.

9. Extension of Railway to Windsor:—Mr. Smith moved, pursuant to notice,—
(1.) That a Select Committee be appointed to consider and report upon the expediency of making a Railway to Windsor, diverging from the proposed Parramatta and Penrith line, with power to call for persons and papers, and that all the Proceedings of the Committee of last Session upon this subject be referred to such Committee.
(2.) That such Committee consist of Mr. Dalley, Mr. Scott, Mr. Oakes, Mr. Robertson, Mr. Suttor, Mr. Thornton, Mr. White, Mr. R. Tooth, Mr. Plunkett, and the Mover.
Question put and passed.

VOTES No. 12. WEDNESDAY, 5 JANUARY, 1859.

- Extension of Railway to Windsor:—Mr. Smith, as Chairman, brought up the Report from, and laid upon the Table the Evidence taken before the Select Committee appointed, on the 17th ultimo, to consider and report upon the expediency of making a Railway to Windsor, diverging from the proposed Parramatta and Penrith line; with power to call for persons and papers,
Ordered to be printed, together with the Appendix and Minutes of Proceedings

[The following text is extremely faint and largely illegible due to low contrast and scan quality. It appears to be a list or index of items, possibly names of people or places, arranged in a structured format. Some faint words and numbers are visible, but they cannot be accurately transcribed.]

1858-9.

EXTENSION OF RAILWAY TO WINDSOR.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly appointed on the 17th December, 1858, "to consider and report upon the expediency of making a Railway to Windsor, diverging from the proposed Parramatta and Penrith Line; with power to call for persons and papers;" and to whom at the same time were referred "all the Proceedings of the Committee of last Session upon this subject," have agreed to the following Report:—

Your Committee have examined several witnesses who have resided for a lengthened period in the district of the Hawkesbury, and who are intimately acquainted with the capabilities of that fertile tract of country. These gentlemen are unanimously of opinion that the present productions of this district would be considerably increased, and the attention of its inhabitants directed to the growth of many other articles than those now raised by them, if railway communication were established between Sydney and Windsor.

From the evidence given by the Commissioner for Railways and the Engineer-in-Chief, it appears that no complete survey has yet been made of any line of railway to Windsor, but that a line of about 13 miles in length, diverging from a point on the Parramatta and Penrith line, near the Blacktown Road, and running to the Town of Windsor, has been roughly surveyed by a party of the Royal Sappers and Miners.

Judging from the results of this survey, the Commissioner for Railways and the Engineer-in-Chief consider that the extension to Windsor could be executed at a moderate cost,—the estimate of the first named officer being £108,000, including an assumed sum for the purchase of land, and of the latter about £7,000 per mile, exclusive of rolling stock and land.

The Commissioner for Railways has prepared a careful estimate* of the probable revenue derivable from a line to Windsor, which shews that this extension might reasonably be expected to yield a return of more than five per cent. upon the cost as assumed by him, viz., £108,000.

* Vide Appendix B to evidence given by Capt. Martindale, on 22 December, 1858.

Your Committee are further informed by Captain Martindale that the only available routes for a railway to the western interior, as yet known to the railway officials, are those *via* the valley of the Grose River, and *via* Penrith and the present line of road over the Blue Mountain Range; but that the survey of the valley of the Grose River is still incomplete, and that four or five months must yet elapse ere the work will be sufficiently advanced to enable him to report upon the comparative merits of these two routes.

Until it has been determined which will be the most advisable route, it is of course impossible to say whether an extension to, or near to, Windsor would be a branch line or form a portion of the Great Western Railway.

Your Committee are, however, of opinion that, even if it be ultimately determined to carry the Great Western Railway *via* Penrith, it will still be advisable to construct a branch line of railway to Windsor, in order that the metropolis may be brought into railway communication with an adjacent† district acknowledged to be of great fertility, and capable of yielding large supplies of dairy, farm, and garden produce, so essential to the health and comfort of the inhabitants of an extensive city.

† Vide Separate Appendix A Nos. 1 and 2

THOS. WHISTLER SMITH,
Chairman.

Legislative Assembly Chamber,
Sydney, 5 January, 1859.

PROCEEDINGS OF THE COMMITTEE.

THURSDAY, 5 AUGUST, 1858.

MEMBERS PRESENT:—

Mr. Smith,		Mr. Parkes,
Mr. Dalley,		Mr. White,
Mr. Scott,		Mr. Oakes.

Mr. Smith was called to the Chair.

Committee deliberated as to their course of procedure.

At the request of the Chairman, the members of the Committee *then present* suggested the names of certain persons capable of giving evidence valuable for the purposes of the inquiry, and the Clerk took a list of such names, as a datum to direct the Committee in their future selection of witnesses.

After further deliberation, it was *Resolved*:—

“That the Chairman do move in the House that the undermentioned Papers be referred to the Committee, viz:—

“(1.) Petition from the inhabitants of the Town and District of Windsor, praying for an extension of a branch line of Railway to the District of Windsor, ordered to be printed on the 9th April last.”

“(2.) *First* and *Second* Reports from Captain Martindale, R. E., Chief Commissioner for Railways, on the Internal Communications of New South Wales.”

[Adjourned till Thursday next, at *Eleven* o'clock.]

THURSDAY, 12 AUGUST, 1858.

MEMBERS PRESENT:—

T. W. Smith, Esquire, in the Chair.

Mr. White,		Mr. Parkes,
Mr. Suttor,		Mr. Oakes,
		Mr. Scott.

By direction of the Chairman, Resolution of the House referring to the Committee, on the 10th instant, certain Papers moved for, under a Resolution agreed to by the Committee at their last meeting,—read by the Clerk.

Mr. *George Bowman*, Mr. *Thomas Tebbutt*, Mr. *Joshua Cope*, Mr. *Richard Ridge*, and Mr. *John Dawson*, severally examined.

[Adjourned till Wednesday next, at *Eleven* o'clock.]

WEDNESDAY, 18 AUGUST, 1858.

MEMBERS PRESENT:—

Mr. Smith, | Mr. Parkes.

Captain Martindale, R. E., was in attendance as a witness, but a Quorum of the Committee was not present.

[Adjourned till To-morrow, at *Eleven* o'clock.]

THURSDAY, 19 AUGUST, 1858.

MEMBERS PRESENT:—

T. W. Smith, Esquire, in the Chair.

Mr. Dalley,		Mr. Parkes,
		Mr. White.

Mr. *J. M'Donald*, Mr. *Edward Powell*, J. P., Mr. *J. Cunningham*, and Mr. *G. M. Pitt*, severally examined.

[Adjourned till To-morrow, at *Eleven* o'clock.]

FRIDAY, 20 AUGUST, 1858.

MEMBERS PRESENT:—

T. W. Smith, Esquire, in the Chair.

Mr. Dalley,		Mr. Suttor,
		Mr. White.

Captain *J. L. Scarvell*, J. P., examined.[Adjourned till Thursday next, at *Eleven* o'clock.]

THURSDAY,

THURSDAY, 26 AUGUST, 1858.

MEMBERS PRESENT:—

T. W. Smith, Esquire, in the Chair.

Mr. White, | Mr. Parkes.

Mr. Edward Barton, Civil Engineer, and
Sergeant Henry Quodling, examined.

[Adjourned till Thursday next, at Eleven o'clock.]

THURSDAY, 2 SEPTEMBER, 1858.

MEMBERS PRESENT:—

T. W. Smith, Esquire, in the Chair.

Mr. Suttor, | Mr. White.

Mr. J. Whitton, Engineer-in-Chief, examined.

[Adjourned till Thursday next, at Eleven o'clock.]

THURSDAY, 9 SEPTEMBER, 1858.

MEMBERS PRESENT:—

Mr. Smith, | Mr. White.

Captain Martindale, R. E., was in attendance as a witness, but a Quorum of the Committee was not present.

[Adjourned.]

[Further Proceedings stopped by Prorogation.]

1858-9.

THURSDAY, 23 DECEMBER, 1858.

MEMBERS PRESENT:—

Mr. Smith, | Mr. Plunkett,
Mr. Dalley, | Mr. White.

Mr. Smith was called to the Chair.

By direction of the Chairman, Resolution of the House on 17th instant appointing the Committee, and referring thereto "all Proceedings of the Select Committee of last Session upon this subject,"—read by the Clerk.

Motion then made (Mr. Dalley) and Question—"That these Proceedings be now adopted as part of the Proceedings of this Committee"—agreed to.

The Chairman then laid before the Committee—

1. Letter from Mr. W. P. Wilshire to the Chairman, dated 12th ultimo, covering a Sketch of proposed Line of Railway for crossing the Blue Mountain Chain through the Kurrajong District, and thence to Bathurst.
 2. Hypothetical Section of a proposed Line of Railway for crossing the Blue Mountain Chain through the Kurrajong District, and thence to Bathurst,
- and stated that he had requested the Clerk to summon Captain Martindale and Mr. Wilshire before the Committee, as witnesses, for this day.

Captain Martindale, R.E., Commissioner for Railways, examined—

And the witness during his examination having handed in a Plan shewing four proposed Lines of Railway into the Hartley country,—

Committee examined the same, and it was Resolved:—

"That this Plan be lithographed, and form 'Separate Appendix B' to the Proceedings of this Committee."

Mr. W. P. Wilshire then examined,—

And Captain Martindale, who, by permission of the Committee, was present in the room during the examination of Mr. Wilshire, having stated his willingness to cause an examination to be made of that particular part of the country indicated in the two Plans transmitted by the witness to the Chairman, so as to ascertain its practicability for railway purposes, provided no such examination had been already made.

Committee thereupon Resolved:—

"That the two Plans transmitted by Mr. Wilshire be forwarded to Captain Martindale, with a request that he will, in accordance with his statement made this day to the Committee, cause the particular part of the country indicated therein to be examined, with a view to ascertain its practicability for Railway purposes."

Committee then deliberated, and it was Resolved:—

- "1. That sufficient evidence has now been taken for the purposes of this inquiry."
- "2. That the Chairman do, at his earliest convenience, convene a meeting for the purpose of considering a Draft Report."

[Adjourned.]

WEDNESDAY, 5 JANUARY, 1859.

MEMBERS PRESENT :—

T. W. Smith, Esquire, in the Chair.

Mr. Plunkett, | Mr. Scott.

Committee deliberated, and it was *Resolved* :—

“ That the Letter of the 17th July last to the Chairman, from Messrs. T. Tebbutt, J. Dawson, and H. Day, transmitting two Returns of Agriculture in the Police Districts of Windsor, for the years ending 31st March, 1857, and 31st March, 1858, respectively, be printed, together with the said Returns. (*Vide Separate Appendix A, Nos. 1 and 2.*)”

The Chairman then laid before the Committee a Draft Report.

Report read 1^o

Committee considered, and *verbally* amended the same.

Report read 2^o

Motion then made, and *Question*,—“ That this Draft Report, as *verbally* amended, be the Report of the Committee,”—*agreed to.*

Chairman requested to Report the same to the House.

Legislative Assembly.

NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

EXTENSION OF RAILWAY TO WINDSOR.

THURSDAY, 12 AUGUST, 1858.

Present:

MR. OAKES,
MR. PARKES,
MR. SCOTT,

MR. SMITH,
MR. SUTTON,
MR. WHITE.

T. W. SMITH, Esq., IN THE CHAIR.

George Bowman, Esq., called in and examined:—

1. *By the Chairman:* You are a very old resident at Richmond? The oldest in that part of the world; it is upwards of sixty years since I went there.
2. You have, I believe, considerable property in that neighbourhood? I have, at Richmond and Prospect.
3. You are well acquainted with the district and its resources? Generally so.
4. A petition was presented to the House by me on the 9th April last, from the inhabitants of Windsor, praying for railway extension to that district—that petition is before you, and you may there see the statistics enumerated? Yes: I see the quantity of hay, straw, wheat, maize, and potatoes, is stated.
5. At the present time it appears, from these statistics, and from the police statistics also, that the produce of the Windsor district is nearly confined to grain, straw, maize, and potatoes? We grow wheat, maize, oats, barley, potatoes, and, I think, the general products of the Colony. I believe no part of the Colony is more capable of producing almost every product of the soil than the basin of the Hawkesbury, and that very abundantly. All that we require is labor, cheaper and better; our labor is not so good as it ought to be, and this produces a very careless system of cultivation.
6. Do you think that if the communication with Sydney were cheaper and more expeditious this productiveness would be increased? Yes; it is the great cost of bringing produce to market that prevents a great deal of land from being under cultivation.
7. At present the whole of the land available for cultivation is not under crop? It is not. A great deal of the land formerly in cultivation is not now under crop; but, besides this, there is a great deal of new land that might be brought under cultivation.
8. At present arable land is lying fallow, and there is much that never has been cultivated? There is an immense quantity of land between Windsor and Parramatta which, if we had a cheaper method of bringing produce to market, would be brought under cultivation.
9. In a district so fertile and so near to Sydney, in the event of the establishment of railway communication, the farmer, I apprehend, would no longer confine his attention to the present articles of produce, but would grow green stuff in large quantities, and dairy produce, for the Sydney market? I imagine they would grow many articles which they cannot send to market now, because they would not pay the expense of transport; for instance, green stuff would not pay.
10. It would by railway? It would if we had a quick and cheap communication.

G. Bowman,
Esq.
12 Aug., 1858.

G. Bowman,
Esq.

12 Aug., 1858.

11. And vegetables might also be sent? Yes. The great drawback is the distance, and the time occupied in taking produce to market.
12. What is the average time occupied on the road in the carriage of goods? From three to four days. It depends upon the weather. From North Richmond to Sydney and back occupies fully four days.
13. Two days each way? Yes; many try to do two journeys a-week, but it is very distressing to the teams.
14. The length of the journey prevents the carriage to Sydney of what may be termed perishable produce? Yes, and prevents the production of it also.
15. You are clearly of opinion, from your long acquaintance with the district, that the productiveness of the district would be considerably increased were a railway established between Sydney and Windsor? Yes, that is my opinion. If the labor which is now consumed upon the roads in the transit of our produce could be expended upon the lands, the lands would be made more productive.
16. At the present time do the farmers lose much of their time by the necessity laid upon them of becoming their own carriers? Yes; many of them are their own carriers, and many become carriers for others; that being occasionally more profitable than cultivating their lands.
17. The circumstance of their being their own carriers is not only a serious tax upon their time, but, I imagine, in no degree improves the farmer's habits? I fear not—indeed when men make two journeys in a week they generally travel on the Sabbath.
18. Not only so, but I presume they frequently acquire habits upon the road from which they might, but for those journeys, remain free? No doubt when they congregate on the road carriers are much more likely to take intoxicating drinks than when they are at home.
19. In fact, they lose both time and health by becoming their own carriers? Just so.
20. Do you think the greater part of the Windsor farmers are their own carriers—either themselves or members of their families? A great number of them are, either themselves or their sons; I could not say the proportion of them. Not only are they carriers for themselves, but those who have teams find it more profitable to go up and down the country as carriers than to cultivate their land.
21. Are the farmers of the Hawkesbury, upon the whole, a thriving race? I think they are, those who are steady.
22. Their system of farming is rude, I believe? Very rude; it requires improvement, but from the great price of labor they are obliged to do their work as quickly as possible, and they do not pay the attention to the culture of produce they would do if there were cheaper labor, and a quicker mode of getting their produce to market.
23. Do you know what is the average cost per ton of the carriage of produce from Windsor to Sydney? I am not so well acquainted with the price from Windsor as from Richmond. From Sydney to Richmond, I believe it is from £2 10s. to £3 per ton. I have very little carriage in this part of the country, my property being principally on the Hunter, where part of my family reside, and consequently the most of my carriage there.
24. You think that is about the current rate? I think I was charged from 2s. 6d. to 3s. per cwt. for the carriage of some goods; my consumption is not great.
25. You are not aware what is the cost of the carriage of produce—how much per ton is charged for the carriage of hay, straw, and wheat? No. When I send in produce I send by my own team. I do not suppose I have hired a team to take in produce for many years.
26. The rates of carriage vary with the season, I suppose? Yes, and with the state of the roads.
27. Are you at all conversant with the mountain country between Richmond and Bathurst? I have been over the present line of road to Bathurst, but I have never been from Richmond to Bathurst direct over the Mount Tomah Road; many people do, however, travel that way; it is a bridle road, and a stock road.
28. The general impression appears to be, that the most eligible line of road from Parramatta to Bathurst would be through the valley of the Grose? I am informed that that is the best line of country to go; I will not speak positively myself.
29. You are not acquainted with the mountain country? No; I have never been further than the first range of the Blue Mountains. My property is in the northern country.
30. I believe a very considerable quantity of fat stock from the north and north-western country comes through Richmond to Sydney? Yes; indeed all that comes from the north or north-west comes through Richmond; some comes by Bell's Line, but the greater quantity comes the Bulga Road.
31. Do you not think the greater portion of this stock so arriving at Richmond, and intended for the Sydney market, would be sent by railway, if a railway were in existence? I think the greater portion would. The less travelling our cattle gets the better; their condition for killing is very much deteriorated by the travelling from Richmond to Sydney, there being little or no grass after leaving Richmond.
32. And the neighbourhood of Windsor—when I speak of Windsor, I mean the Hawkesbury country generally surrounding Richmond and Windsor—is favorable to the resting of stock prior to its being slaughtered? Yes; grass paddocks might be had there.
33. It is much more favorable than the neighbourhood of Sydney? Yes; it is a very rich country as compared with Sydney.
34. If slaughtering operations were extensively carried on in that neighborhood, somewhere near the Hawkesbury, would it become the custom to grow artificial grasses and food for the grazing of cattle previous to slaughtering? No doubt lucerne and clover, and grasses that would answer for the feed of stock, would be grown much more than at present.
35. What I mean is this, that if large slaughtering establishments were formed in the neighbourhood of Windsor and Richmond, and it became the custom to slaughter there, and to send the meat to Sydney by railroad, whether, in order to supply the stock with food during the

the short time that elapsed between the arrival of the cattle and their slaughter, artificial food could, and would, be raised in quantities sufficient to meet the demand? It could be raised in any quantity, but whether it would be I cannot say. No doubt anything for which a market could be found could, and would be raised, as grazing would be a good market without extra labor as carriage.

G. Bowman,
Esq.
12 Aug., 1858.

36. In this way, I presume, it might be fairly anticipated that an additional source of revenue to the railway would be derived? Yes; the settlers would be engaged in raising produce, and in occupying their teams more profitably than in the carriage of produce.

37. I refer to the carriage of meat to Sydney market? No doubt the railway would be made use of very generally in that way.

38. And the meat would arrive in Sydney in much better condition than it does at present? No doubt the extra driving to Sydney, and their being so long without food before they are slaughtered, must injure the meat. They have not been without food, generally speaking, up to the time of their arrival at Richmond.

39. *By Mr. Suttor*: You are acquainted with the country between Parramatta and Windsor? Yes; particularly about Windsor, Richmond, and thence to Prospect.

40. Do you know the contemplated line of road to Penrith? I do not, but I know there is a line marked through my farm at Prospect.

41. In the event of its being formed, where should the Windsor line branch off? Between South Creek and Richmond, after passing Rouse's fence about a mile.

42. That would be going too much to the north of Penrith? By going up to Toongabbee, and then by Quaker Hill Estate, crossing the Eastern Creek about Alcock's farm, and thence direct to the South Creek through Clydesdale and Rouse's farm, you have a level line of country.

43. What would be the distance from where the branch line would branch off to Windsor? About four miles; it is level country into Windsor. I do not suppose there would be six feet of cutting anywhere.

44. Is the country level from where you speak of to Penrith? Not so level as to Windsor or Richmond, but it is more level than any other line I am aware of.

45. Then the Penrith line should go there, whether the branch line were made or not? Yes; there is less engineering work necessary, and, consequently, there would be less expense. By crossing the South Creek one bridge would do for the whole district.

46. If the line should be carried out to Penrith, the additional branch to Windsor would not be more than four miles? Four miles, because I do not suppose it would go into the heart of the town, but to the edge of it—that is, if it went from Rouse's farm—and would be a level country nearly all the way from Toongabbee to Windsor, Richmond, and Penrith. I may mention, that by crossing South Creek about Rouse's farm, and then branching into Windsor, the valley of the South Creek, which is very deep and flooded in high floods near Windsor, would be avoided by crossing that creek at or near Rouse's farm, where the valley is narrow, and not so deeply flooded as it is near to Windsor.

47. *By Mr. White*: Supposing the line to Bathurst is not carried on by the valley of the Grose, do you think there is sufficient population and produce in Windsor, Richmond, and its neighbourhood, to pay for the outlay of money? I think there is no part of the country more likely to pay for the formation of railroads.

48. What would be the increase in the quantity of land under cultivation, which would be caused by the formation of a railway—would it be doubled? I do not think it would be doubled.

49. There is a good quantity of land on the opposite of the river which might be brought into cultivation? Yes. There is also good land up towards Mount Tomah, but I have not been near it. I have been a few miles up the Grose.

50. *By Mr. Suttor*: The population might double itself? Yes.

51. *By Mr. White*: Has the population in that neighbourhood increased very much within the last twenty years? Yes, within the last twenty years, but not within the last ten.

52. Do you think it would not be long in doubling, or even trebling itself, if it had a railway? Population would increase, but I do not know whether it would double itself.

53. Is there not land sufficient to support double the present population? I would not say, not being acquainted with the country towards, that is, beyond the mountains.

54. Still a railway would open a great deal of land not now used? A great deal. There is a great deal of good land on the Bulga road, but the difficulty of getting at it is great.

55. *By Mr. Oakes*: You have spoken of the slaughtering of cattle—do you think that the driving of cattle upon a hard road for forty miles, from Richmond to Sydney, injures them very much? I certainly do.

56. Do you think it injures them as much as the whole of the previous portion of their journey? I should think it injures them more, for there are few paddocks where there is any grass between Richmond and Sydney, and, consequently, neither food nor rest for the cattle.

57. Have you any further information to afford the Committee? I might mention that the country from Parramatta—passing through part of Toongabbee, and following that valley by Quaker Hill, and continuing nearly a west line—would cross the South Creek at Mr. Rouse's farm, the whole distance, with one or two exceptions (slight rises), is level to Richmond, and from midway between the South Creek to Riekaby's Creek or chain of ponds near Richmond; the country to Windsor, about four miles, and to Richmond, about three miles, is almost a perfect level, and that to Penrith, seven or eight miles, is almost as level, there being only a few slight rises near Penrith.

Mr. Thomas Tebbutt called in and examined:—

Mr. Thomas
Tebbutt.

12 Aug., 1853.

1. *By the Chairman:* You are a very old resident in the Windsor district? Yes; I have resided there fifty years, and forty-five in the borough of Windsor.
2. You have, I believe, been principally engaged in commercial pursuits in the Windsor district? I have, until lately.
3. From your residence there, and your business connections, you must have become intimately acquainted with the district and its resources? Pretty much so, but not so much as when I was in business. I have been in a bad state of health, and have not, in consequence, been about so much as formerly; but I am still pretty well aware of what is doing in a business way.
4. You are aware that a petition to the House was presented by me in the early part of this Session from the inhabitants of Windsor, praying for the extension of the line from Penrith to Windsor? Yes.
5. The petition states certain facts; the first refers to population, and that is estimated at 8,500 souls—do you think the population has increased since the census was taken in 1856, or the reverse? I should think it has increased, but I am not prepared to say that it has increased by a very large number.
6. The inhabitants of the Hawkesbury consist, in a large proportion, of families? In a large proportion of families. In the little towns of Richmond and Pitt Town there are many families, but in the country, among the settlers, they are nearly all so.
7. From the absence of openings in the district, are not a large number of the young men in the habit of seeking their fortunes in the outlying districts? Yes; they get stations and go away.
8. Many of the young men also become carriers? A great many.
9. The population, you think, is increasing? I think so; it certainly must be, but I am not prepared to say to what extent.
10. Do you think, in the event of fuller employment being found at home by an improvement in the means of tillage, and the growth of a greater variety of produce, many of these young men who now seek their fortunes in other districts would be tempted to remain at home? Yes; many, if they had the means of establishing homes for themselves, would prefer remaining in the district to going a distance off.
11. Would you consider the system of tillage now adopted in the neighbourhood of Windsor one of high cultivation, or the reverse? I think there is great room for improvement with regard to tillage. There are some farms very nicely cultivated, but a good many are not so.
12. At the present time, as it appears from the statistics in your petition, and also from those from the Police Office, the products are confined chiefly to wheat, hay, and maize? They are principally confined to those articles, but of late the farmers have substituted one thing for another; there is a good deal of lucerne grown, and a good deal of hay—lucerne has taken the place of maize and wheat in some degree; the farmers get very good crops of lucerne, and, at certain periods, when it sells for a good price, they bring it plentifully to market, but when the price is very low it will not pay them to bring it down.
13. Do you not think if you had a railway to Sydney farmers would raise a great variety of produce to which they do not now turn their attention in consequence of the high cost of carriage and the time consumed on the road? No doubt of it; they would raise anything that could be carried to Sydney. At a moderate cost for carriage, many things would be raised that they do not attend to now—many things besides crops. I believe if there were a railway a good deal could be done in making bricks and sending them to Sydney. I know of some now that I could buy at £2 7s. 6d. a thousand, which I am pretty sure would sell for £5 and upwards here. A great deal of stone and timber could also be sent.
14. You have some very fine iron-bark forests, have you not? Yes; a little this side of Windsor we have some very fine timber.
15. In order to supply the wants of a large city like Sydney, to use the common term, green-stuff of all kinds is required, and the Windsor district, I apprehend, would produce a very large supply? Any quantity could be grown there; crops of all kinds, if any attention be paid to the ground, will grow there—crops such as I have not seen anywhere else.
16. Would the growth of this green-stuff be a remunerative occupation to farmers, in the event of their having the means of sending their produce to market cheaply? Yes; it sells very high at times even there, and it would sell well here if it could be cut and sent at once to market, but it does not pay if it is long on the road, as it becomes heated, and spoils; but if it could be conveyed to Sydney in a short time, as it would be by railway, it would certainly pay very much better.
17. You think it would be grown extensively, and that a large supply would be sent to Sydney? Yes; they can grow any quantity of lucerne, Cape barley, and oats, which would be sent down as green-stuff.
18. Sorghum saccharatum, I imagine, could be grown to perfection? I should think so, from what I have seen, but I have not had much experience with reference to it. I think the same ground that would grow maize would be suitable for that. I have not seen any growing on ground that I should call good, but I have seen it in a few gardens on the hill in our town, and it grew pretty strong there; but on ground where they grow wheat and maize I think it would produce a fine crop.
19. Up to the present time it has not, I believe, been the practice to apply manure to the alluvial lands of the Hawkesbury? No; very little has been done in that way.
20. The system of tillage is not what is called first-rate—it is a rough style of farming, capable of very great improvement? I think so.
21. Do you think, if there were the means of cheap and expeditious transit, the system of tillage would be improved? I think it would; the settlers would do all they could to obtain a good crop if they could get it down to market; at present so much time is occupied by the settlers who have teams in taking their grain and produce to market that it puts them out of heart,

22. The condition of the farmers would be very considerably benefited by being relieved from the necessity of carrying their produce to market themselves? Yes.
23. Are you aware what is the present cost of carriage between the Hawkesbury district and Sydney? I think the charge to Windsor to storekeepers is about £2 a ton; it was more, but I think just now that there is a complaint of times being bad—they do not require so much carriage, and it is a little cheaper.
24. Are you aware what is the cost of carriage to market of hay and straw per ton? I cannot say, but I believe the charge is greater for taking goods down than for bringing them up; because, when the carriers go to Sydney they must come back again, and they would have to return empty if they had no goods to bring.
25. Generally speaking, do the farmers carry their own produce to market? Generally speaking; but there are people in Windsor who buy the produce of farmers, and take it down to Sydney.
26. Is that custom of bringing produce to Windsor to sell increasing? I should say not, for when I was in business I should think I bought three times as much as all that is bought now.
27. Are you at all acquainted with the district of the Lower Hawkesbury, towards Wiseman's Ferry? I do not know much of it; I have been to Wiseman's Ferry only once.
28. All the produce from that part is now brought by water to Sydney? No; some comes up to Windsor, and is sold there; some of it goes round to Sydney by water.
29. Do you think if you had a railway at Windsor the farmers down the river would bring their produce to Windsor to be sent by railway to Sydney? I think they would till you get far down the river, because the navigation of the river is very bad; it is a long way to sea; there is then a dangerous coast, and a long time elapses before the produce gets to market and the farmer receives his returns. If there were a railway I think a large quantity of produce would be sent down by it.
30. From as far down as Wiseman's Ferry, I presume? I would not say so far as Wiseman's Ferry, but a good part of the way down—a good deal from Macdonald's River.
31. Poultry, pigs, and dairy produce would be sent in great quantities if you had cheap transit? A large quantity could be sent, but it would not pay to bring them up in carts, owing to the distance.
32. From the districts more immediately surrounding Windsor that kind of produce could be sent in large quantities? Yes, they could send a very large quantity of produce from within five or six miles of Windsor.
33. *By Mr. Scott:* Are you one of the parties who signed the petition? Yes.
34. The petition states that there are fourteen thousand acres yielding agricultural produce? Yes.
35. How much more land is there fit for cultivation, and which would be under crop if you had a railroad? I think at present there is a considerable quantity more than is stated in the petition. I am not aware how the information in the petition was obtained, further than that I suppose it was from the police; but I have had some conversation with one of the gentlemen now present, Mr. Ridge, who has taken a great deal of trouble in collecting information, and who has consulted with me, as being an old resident, and knowing all the farms, and either the original or present owners, and from reference to maps, we are of opinion there must be a considerable quantity over what is stated there.
36. That is, absolutely in cultivation? Yes.
37. How much more is fit for cultivation, supposing you had easy and cheap means of transit? I could not say; but I think it would never be very large, as the greater part of the land near the river has been taken up, and the cultivation could not be much extended, because the high land at the back is not productive. There is land at what they call Kurryjong—North Richard—and land on the north side of the river, a considerable distance back, whence a large quantity of produce could be brought in, but I could not say what quantity.
38. Then, in your opinion, the railroad is to depend upon these 14,000 acres? I think this land might at least be put down at 20,000 acres, and there would be an increase upon that, but I am not prepared to say a very large one.
39. You say you could "supply the wants of Sydney and of the Colony generally": what description of produce could you supply the Colony, irrespective of Sydney, with? The articles with which chiefly we supply the Colony is maize. A large quantity of this goes to Melbourne; but, with regard to wheat, I do not think we have such a large quantity. We certainly send a great deal to Sydney, and our people make the most of it, by moving it about, for a great number send down their wheat, and at the end of the year we see them bringing back flour.
40. What I wish to know is, whether there are any articles particularly produced in your district? Not in particular: the chief article is maize.
41. If this railway were established, could you send fruits and various other perishable articles? We could send a great deal of fruit.
42. Of what kinds? Oranges, peaches, apples, pears, and the usual descriptions.
43. Which you do not send now? I have scarcely ever known it to be done.
44. You state that about £2 a ton is what you pay from Sydney to Windsor, and I suppose it is about the same from Windsor to Sydney? The charge for the carriage of hay is more than that, and also for green-stuff, but in bringing back goods they charge less, because they regard the money for goods brought back as clear profit.
45. Have you at all calculated what it would cost you by a railroad, if one were established between Windsor and Sydney? I have not, but I think it could be done for something like 14s. or 16s.: I think it could be very well done for that.
46. How many four-horse coaches are there running between Windsor and Parramatta? Two. One arrives in Windsor at eleven o'clock, and returns to Parramatta at two, and the other leaves at two in the morning with the mail, and returns at ten at night.

- Mr. Thomas Tebbutt. 47. That is to say, two coaches leave Parramatta and Windsor every day? Yes.
48. I think you stated that the back hills are unproductive? A large quantity of the land is unproductive.
- 12 Aug., 1858. 49. Have you any minerals of any kind, such as ironstone? Nothing of that kind.
50. Or limestone? No; our lime comes up from Broken Bay—it is shell lime.
51. *By Mr. Suttor*: Do you think there is any likelihood of any private company undertaking this work—the branch line from from Penrith? No; our people are greatly against a private company.
52. *By Mr. White*: What is the general value of agricultural land at Windsor? From £38 to £50 an acre: a great deal has been sold at the latter price.
53. If subdivided into smaller portions it would fetch a higher price? I have a great deal that I could sell now at £50, if I would take it.
54. *By the Chairman*: Have you anything further to state to the Committee? One thing I would beg to remark, that if there should be a branch line from the line going from Parramatta to Penrith, from my knowledge, although it is not so great as that of some of the gentlemen here, there is plenty of level ground over which it can come with very trifling engineering difficulties; and another point, which is really a great matter, that there is timber of the first quality for the purpose on the line nearly all the way.

Mr. Joseph Cope, of Windsor, called in and examined:—

- Mr. J. Cope. 1. *By the Chairman*: You reside at Windsor? Yes.
2. And have resided there for some time? I have, from my childhood.
- 12 Aug., 1858. 3. You are thoroughly acquainted with the district and its resources? Yes, I believe so.
4. You are aware that a petition has been sent from Windsor, praying for the extension of railway communication to that district? Yes; I am one of the petitioners.
5. It contains certain statistics, and among other things it states that the quantity of land under cultivation is about fourteen thousand acres? I have been listening to what the other gentlemen have said, and the four witnesses now present have made an estimate of the land in cultivation, and I have no hesitation in saying that the land under cultivation is at least twenty thousand acres. Very little but alluvial land is under cultivation. These statistics have been taken by the police, who go round to the farmers, and they are not very careful in making them.
6. *By Mr. Suttor*: That includes the Windsor Police District? Yes.
7. Does that include any of the land at Kurryjong? No; a great number of the farms at Kurryjong have gone out of cultivation of late years. There is very little cultivation now in Kurryjong compared with what there used to be ten years ago; it is used more for grazing. In fact it does not pay parties there to carry their produce to market.
8. *By the Chairman*: Besides the land at Kurryjong which is out of cultivation, there is land also, I believe, on this side of Windsor in the same state? Yes; between Windsor and Parramatta there is a great deal of land of a better character than much that is now cultivated; for instance, there is land about Pennant Hills which could be brought into cultivation.
9. Your petition states that hay, straw, grain, and potatoes, a large amount of poultry, pigs, fruit, and dairy produce, are sent to Sydney: I believe the principal productions of your district are hay, wheat, and maize? Hay and maize; not so much wheat is grown as formerly.
10. Do you not think, in the event of your having a cheap and expeditious means of transit, that the products of the district would be considerably multiplied? I think they would. I have no doubt in my own mind that they could. I agree with what Mr. Tebbutt says, that there has been no system of tillage—it does not deserve the name of a system. There is no rotation of crops, and no manure is used. I have no doubt that the time now employed upon the roads could be more profitably employed in carrying out improved modes of culture.
11. You think if a market were opened farmers would be tempted to improve their means of tillage, and would grow various kinds of produce? I have no doubt they would.
12. At the present moment the high price of carriage, and the length of time consumed on the road, prevents the farmers from turning their attention to the production of any other articles than those named? It compels them to take refuge in them, and none but the best of their lands are cultivated.
13. From the productiveness of your district and its proximity to Sydney, if you had a railroad you could raise a large quantity of green-stuff, poultry, pigs, and dairy produce? I think a great deal of dairy produce could, and would be raised; the land is especially adapted for it—that is, supposing the market to be the same as it is now.
14. I take it that to supply the wants of a town like Sydney a large quantity of dairy produce is always required? Yes; but at the present moment we have to pay two shillings a pound for cheese at Windsor.
15. You have no dairy farmers? No.
16. Your system of farming is very rude? Very rude; through the imperfect means of transit, and the high price of labor, you cannot carry out any but the rudest system of culture.
17. Nearly all the farmers there are men of families? The far greater portion of them; it is hard to find a house without a troop of infantry.
18. In the present state of farming there is no temptation to young men to remain in the district? There is no opening for them. I know if there is a farm likely to fall out of lease there are immediately a dozen applicants for it.
19. With a better demand for produce and improved tillage there would be more openings? With better means of transit there would be more business done, and, no doubt, some of the land at present not worth cultivating would be brought into cultivation.

Mr. J. Cope.

12 Aug., 1858.

20. I believe you are a squatter in the interior? Yes.
21. Do you not consider that it would become a very general practice to slaughter near Windsor or Richmond cattle and sheep intended for the Sydney market, and to send the meat to Sydney by rail? I think it likely, or, if that were not done, I think sheep would be sent alive on the rail.
22. And bullocks would probably be slaughtered at Richmond? Probably bullocks might be slaughtered at Richmond.
23. Is it not very injurious to bullocks to drive them from Richmond to Sydney? It is; but the fact is, that after they leave the squatters hands there they never taste a mouthful if they live for a fortnight. I believe that some of the cattle slaughtered in Sydney nearly die of starvation.
24. That of course must be very injurious to the meat? Any man going by the butchers' shops must see that from the appearance of the meat.
25. You think if the cattle were slaughtered at Richmond the meat would be better? It would be fresher and more wholesome.
26. Is the country around Richmond and Windsor favorable for the resting of stock? Yes; and convenient paddocks could be easily provided.
27. If need were, green-stuff could be grown? It could, but I do not say it would.
28. These things would grow up with an altered state of circumstances? Yes.
29. Of course the river affords an abundant supply of water? The district is well watered independently of the river.
30. I believe you are well acquainted with the mountain district? I have spent a great many days in explorations over it.
31. Do you think you are sufficiently well acquainted with the country to express an opinion as to the line the Great Western Railway will probably take? Yes.
32. Have you traversed the country alone, or with a professional man—a surveyor? I have been with one professional man; never with but one.
33. Which, in your opinion, is the most suitable road? I think if you had a railroad to Bathurst you must go up the valley of the Grose, and have a tunnel at the head. There is nothing original in that theory; it was propounded by Sir Thomas Mitchell thirty years ago.
34. How far is the head of the Grose from Hartley? I should say not more than five miles.
35. Would this tunnel be five miles long? No; but I cannot say exactly what would be its length: I have never examined the locality, but I was informed by a professional gentleman that he thinks about three-quarters of a mile would be sufficient.
36. Is the valley of the Grose circuitous or tortuous? I have not been in the Grose; my information is derived from the professional gentleman I have referred to, and from two men whom I procured to accompany him; they stated that it is rather circuitous.
37. Your observations have been confined to the ranges? Yes; to the exploration of Bell's Line.
38. *By Mr. White*: I think Bell's Line was taken to Mount Tomah? Yes.
39. *By the Chairman*: Do you think much timber would be sent by this railway to Sydney? Yes, I think a good deal would be sent. There is a good deal of iron-bark in the neighbourhood of Windsor, and stringy-bark is to be had within an obtainable distance of Kurryjong.
40. Do you consider that in the event of a railway being established from Sydney to Windsor, farmers from the Lower Hawkesbury would send their produce by it? I have considered that subject, and I think I may state pretty confidently they would; they would prefer sending it by the railway to sending it by coasters, which are liable to be weather-bound, and to be delayed.
41. The risk of damage by the sea voyage is considerable, is it not? Yes; in fact, the the damage is sustained, for corn sent by sea is never delivered at Sydney in such good condition as that sent by way of Windsor. It is well known corn that goes by coasters never catches as much money as corn conveyed by teams.
42. Of course it is quite impossible for these people to send poultry, pigs, fruit, and dairy produce to Sydney? I should think it was out of the question.
43. Would you not think that if a cheap kind of screw steamer were employed in collecting produce up and down the river it would be the means of drawing produce to Windsor to be forwarded to Sydney by the railroad? No doubt of it.
44. The loss of time is very great to the farmer from the present mode of shipping produce? Yes.
45. And the risk of damage is considerable? Yes.
46. *By Mr. Scott*: I think you stated that Kurryjong is now almost out of cultivation? Almost.
47. What is the reason of that? I imagine that it does not pay parties to bring their produce to Sydney, which must be regarded as the only market.
48. By dray? By dray.
49. If a railroad were carried out, could, and would this part of the district be brought into cultivation? I think it would: there are many hundreds of acres adapted for vine and orchard purposes, and there are considerable tracts—some thousands of acres—of very rich brush land, I should imagine equal to Illawarra, which does not at present pay to meddle with.
50. Which would be brought into cultivation if the railroad were established? Yes.
51. How many thousand acres should you say? I would speak very confidently as to ten or twelve thousand acres.
52. Making about 30,000 acres altogether? I speak within bounds when I say that.
53. *By Mr. White*: That is including Kurryjong? Taking Kurryjong alone, by Mount _____, where there is very fine land, and not a stick has been felled, there is a great deal of land, amounting to some thousands of acres.
54. *By Mr. Scott*: Have you at all calculated what number of passengers would go by this branch

Mr. J. Cope. branch line? No; there is a gentleman here, Mr. Ridge, who is better qualified to answer that question than I, having been a coach proprietor for many years.

12 Aug., 1858. 55. With respect to cattle and sheep, is there great traffic in that respect there? Yes; all the stock which comes from the northern district to Sydney market comes to Richmond by the Blacktown Road.

56. And you think this stock would proceed to Sydney by rail? I think it is likely it would.

57. What is your reason for supposing it would? The cattle could be kept in better condition; they would not deteriorate so much as they would by being driven.

58. Are there not cattle coming down Campbelltown direction? I should say two-thirds of the cattle come to Sydney by Richmond.

59. And the others by Campbelltown? No, by the Bathurst Road; I do not think a drove comes down the Campbelltown Road once in three months. They go to Port Phillip from that side.

60. *By the Chairman*: That traffic is likely to be increased? Yes.

61. For the cattle from the northward the Richmond route is likely to be the most favorable? Yes; they can take no other way; it must be taken for granted that the supply of stock for Sydney market must come to Richmond.

62. *By Mr. Scott*: Do you think the parties would send either the live animals or the meat by rail instead of by the road? I make no doubt of it myself.

63. What additional traffic would that give to the railroad—have you at all calculated? I should say, upon the average, 500 head of cattle per week come that way; and in average seasons the sheep must amount to from 1,500 to 2,000.

64. What is paid for driving these animals from Windsor to Sydney? Not much, generally speaking, a drover gets so much for driving a large lot. It is just as they make the bargain—from one pound up to two pounds for driving them to Fullager's.

65. So much for the whole lot? Yes.

66. They would have to pay more by the Railway? Yes, I should presume they would have to pay more than they do at present.

67. Do you think the better condition in which they would arrive at the Sydney market would counterbalance the difference of cost? I do. I think they could be kept in better condition by remaining in the neighbourhood of Richmond till they were slaughtered.

68. What additional resources would the railroad be the means of developing? It would lead to an improved mode of cultivation, and to the raising of dairy and other produce for the supply of the Sydney market. The district of Kurryjong would be a fine district for the vine.

69. *By Mr. White*: It would also induce population? It would, and I have no doubt a superior class of residents would occupy Kurryjong, which has a bad name at present.

70. *By Mr. Scott*: Have you any ironstone or coal? Coal has been found at South Creek, and at Richmond we have ironstone.

71. What quality of coal? I believe pretty good; it has never been worked, but specimens have been obtained.

72. *By the Chairman*: The climate of Kurryjong is, I believe, most salubrious? Yes, that is a well established fact, and I have no doubt it would be taken up by a superior class of residents if there were the means of transit, and that would induce better cultivation. I believe it would become a vine growing district.

73. It is a very picturesque district? Yes; there are many beautiful sites for gentlemen's residences, now in a state of nature. Medical gentlemen generally testify to its salubrity. With reference to what I have stated about taking the railway up the valley of the Grose, I must beg to assure the Committee that I have no interest in that locality; my only object is to have a railroad that would take me to my station at the Macquarie, and I should be happy to see a good line anywhere, and I do not think a better could be found. Bell's Line, for one reason, I believe to be the easiest got over, is that it was the main road of the blacks from the Hartley District; you can find their tracks now.

74. Have you any further suggestions to offer to the Committee?

Mr. Richard Ridge called in and examined:—

Mr. R. Ridge. 1. *By the Chairman*: You have been resident in Windsor many years? Yes.

2. And are, I believe, a native of the district? Yes.

12 Aug., 1858. 3. You are intimately acquainted with the district and its resources? Yes.

4. You were one of the petitioners for the extension of railway communication to Windsor? Yes.

5. You took part in getting up the statistics furnished in the petition? Yes, I did; but I have, since the petition was sent, made further inquiries, and I am convinced there is a greater quantity of land than that stated in the petition actually in cultivation.

6. You are in the habit of traversing the district? Yes.

7. At the present time do you think all the land is under cultivation that might be placed under cultivation? No, I am quite sure it is not.

8. And of the land that has been under cultivation much is now lying fallow? Yes, there is a great deal in paddocks.

9. We are told that there is much unbroken land that might be brought into cultivation? Yes, a great deal might be brought into cultivation.

10. Your district at present produces principally hay and maize? Hay, maize, wheat, and potatoes.

11. But the principal products are hay, maize, wheat, and straw? Yes, a great deal of straw; in fact, we supply Sydney with straw for bedding; nearly all for that purpose comes from our district.

12. Do you not think that, in addition to these articles, farmers might raise a variety of productions if they had the means of cheap and easy transit to Sydney? Yes; we could even supply fresh milk if we had a railway. Mr. R. Ridge.
12 Aug., 1858.
13. From the nature of your soil, you would be able to supply Sydney with an abundance of green-stuff and dairy produce? Yes; and fruit also, I think.
14. The inhabitants of Windsor are, I believe, a thriving class? Yes.
15. They are nearly all old residents, are they not? Yes.
16. At the present time there is a want of employment for many young men, is there not? Yes.
17. And they are compelled to seek employment beyond the district? Yes, or in carrying, and other pursuits.
18. In many cases are not the farmers their own carriers? Yes; but there are carriers who purchase hay and grain and bring it to Sydney.
19. But the majority bringing their own involves a loss of time to them? Yes.
20. That, of course, affects the productiveness of the district, as, if they were at home spending their labor upon their farms, instead of wasting their time upon the road, their products would be increased? Yes; and they are obliged to be away at the time when it is most important for them to be at home.
21. In many other points of view is it not prejudicial to them to be so long and so often upon the road? Yes, I think it is.
22. I believe you are thoroughly well acquainted with the coach and passenger traffic between Windsor and Parramatta? Yes.
23. You have been for some time a coach proprietor? For the last eighteen years.
24. Can you favor the Committee with the number of passengers who travel by that road? I can state the amount I have earned by the two coaches I am connected with, running between Parramatta and Windsor. In 1856 I received £3,163 5s. In addition to these coaches there is one running between Richmond and Parramatta, which I estimate earns at least £1,000, which will give £4,163 5s. between Windsor and Richmond and Parramatta. The passenger traffic being less in 1857 than 1856 was on account of the three floods.
25. Do you know the number of passengers conveyed by the Windsor coaches annually? I have not an account of the number, but as the fare is 6s. each way, that may easily be calculated. The amount received in 1857 was £2,686 4s. 6d., and the other coach, I suppose, would earn about £900—amounting together to £3,586 4s. 6d.
26. Who were the principal passengers between Windsor and Richmond and Parramatta? People from all parts of the Colony,—from the Hunter—from Port Phillip: those who came on business, and those who came on pleasure to see the country.
27. Do many come for pleasure? We should have more, but the coaches start at an unsuitable hour. The mail starts at two in the morning, and cannot leave Sydney till a quarter to six in the evening.
28. Do you not think the number of persons who would travel for pleasure, and for the purpose of seeing the country, would be very considerably increased if they had the means of getting to Windsor by rail? I believe the number would increase fourfold. The gentlemen who have now come down have come in their own conveniences.
29. Do you not think the farmers resident in the district would more frequently visit Sydney if they could do it cheaply and expeditiously—if they could leave home in the morning and return in the evening? As far as their convenience is concerned, they could better afford to pay 10s. to go by rail than they could pay 6s. to go by coach; because they could have their breakfast at home in the morning and return to tea in the evening.
30. They would avoid detention and loss of money? Yes.
31. They would, in point of fact, move about much more than they do now? Yes. If they come to Sydney now they have not time to attend to their business without stopping in Sydney for the night, which is attended with expense.
32. Do not the present inconveniences of travelling prevent farmers from bringing their wives and children to Sydney? Yes.
33. The expense is so great, and the inconvenience is also so great? Yes.
34. You think, from the nature of your district—its salubrity and picturesqueness—you would have a large number of visitors if you had a railroad? I believe so; the majority of the people who come are very much pleased, and say they would like to come down frequently, only there is so much trouble to get down.
35. You know the river down to Broken Bay? Yes.
36. The character of its scenery is highly picturesque? Yes.
37. So much so that it would become a favorite trip with the Colonists if there were means of easy transit? Yes. Lady Franklin says it is the most beautiful place she has ever seen, on the Colo River.
38. Are you aware what is the present cost of carriage from Sydney to Windsor? I think the carriage from Windsor to Sydney is about £2 a ton for heavy goods, such as maize, wheat, and potatoes; for hay and straw it is from £3 to £3 10s.; about £3 is the average.
39. How much from Sydney to Windsor? £2 for back carriage.
40. For the most part your farmers are their own carriers? Yes, the majority of them are.
41. At the present time your produce does not stop at the Parramatta terminus? No; it would not pay to unload and send them by the railway for that short distance.
42. In point of fact, the present Parramatta line is of very little service to the Windsor district? No, very little; some of the passengers travel by steamer, and some by rail; if the rail was extended to Windsor it would have the passengers the whole of the distance.
43. So far as goods and produce are concerned, it is of very little use to the residents at Windsor? I never heard of goods being sent by the railway.
44. The railway, therefore, derives no advantage from the traffic of your district? Not from the goods traffic.

- Mr. R. Ridge. 45. But if you had a railway from Windsor, or near to it, of course the whole of the produce would come by it? Yes, I believe the whole of the produce would come by the rail. I believe people in Windsor would purchase it and send it down.
- 12 Aug., 1858. 46. Your roads are not very good? No, very bad; it is one of the worst roads in the country; in dry weather we have dust and sand, and in wet weather the road is muddy and heavy. I believe they picked all the hills in the olden times on purpose for roads.
47. Do you think your population will increase very much if you have a railway? Yes, I believe it will, very much. I think crown lands town allotments would realise a very high price.
48. In your district, at Kurryjong, are there very many sites suitable for country residences? Yes; I believe there is not a place in New South Wales better suited for orchards than Kurryjong.
49. The statistics furnished by the police are, you think, under the mark? I believe they are a sheer matter of form altogether; they simply state what is actually under cultivation at the time they are made. If land has been lying idle for six months that would not be put down. In the Richmond and Cornwallis bottoms there are, I think, 7,000 acres of arable alluvial land; in Pitt Town bottoms, from the junction of Eastern Creek to Cordeaux's Creek about 4,000 acres; from the upper part of the Wilberforce district to opposite Cordeaux's about 3,000; from Ebenezer Church to Colo 2,500 acres, and on the Colo River 1,200 acres—making in all 18,370 acres. I do not include in this, Kurryjong, North Richmond, Box Hill, nor from Colo River to the Macdonald, nor the Macdonald.
50. Do you think settlers on the Lower Hawkesbury would send their produce to Windsor for transmission to Sydney by railroad, in the event of a railway being formed? Yes, I believe they would nearly all send their perishable articles, which they cannot now send to market at all. I believe it would pay a steamer to run from St. Alban's to Windsor twice a week.
51. How far is it from St. Alban's to Windsor? I think about fifty miles.
52. Do you think from as far down the river as that the whole of the produce would come to Windsor? Yes; I think the whole would come if there were a railroad.
53. *By Mr. Scott*: I think you stated the fares from Richmond and Windsor to Parramatta, and back, amounted to about £4,000 a-year? Yes.
54. That would give about 260 or 270 passengers a week? I have not calculated.
55. I think you said that the traffic would be increased fourfold—do you think there would be a thousand passengers a week, to and fro? Yes, I think so.
56. In this petition it is stated that about 13,000 tons of produce are annually sent to Sydney; do you think that would increase fourfold too? I do not know. I have not made a calculation; it would, no doubt, be very much increased.
57. I include the Kurryjong? I believe you might put down the quantity of land at 20,000 acres; and if that were under cultivation it would realise one ton per acre; besides that, there would be the up-carriage, and there is also another kind of carriage, which has not been included: If there were a great rise in the price of produce in Sydney market, parties would send up and sell, and if the price fell they would send it back again.
58. That would give increased traffic to the rail? Yes.
59. One of the witnesses has stated something about coal having been found in the district; do you know anything about that? I believe there is coal.
60. Do you know whether it is good coal or not? On the Colo River I found coal.
61. Do you know the thickness of the seam? No; the coal was washed down into the water.
62. If coal were found there would it go by vessels or by the rail, do you think? That I am not able to say.
63. Do you really think, from your knowledge, that the produce from the Macdonald would support a small steamer? Yes. I think it supports some five or six small craft at present. There would also be the passenger traffic.
64. *By Mr. White*: You think the Macdonald and Lower Hawkesbury together would support a steamer? Yes.
65. *By Mr. Scott*: Have you calculated what additional freight this small steamer would give to the railroad from Windsor? I think there would be sufficient freight to keep the steamer going twice a-week. It is a very good place for maize.
66. Do you think they would send their maize by the rail? Yes. I think there would be stores at Windsor where it could be kept, and when the price justified it, it would be sent to market.
67. Do you know what small craft charge for carrying maize to Sydney? I think about eight-pence a bushel.
68. Could a small steamer and railroad carry it at that rate? I believe they could; but there would be this advantage in the case of the railroad, that it could be carried to market by a certain day; now it may be detained a fortnight on the way. A small coaster might be wind-bound, or unable to get into Sydney by the prevalence of a southerly wind.
69. At all events, if goods did not go, do you think passengers would go? I think both would go; and I believe that people would rather give 14d. a bushel for carriage by road than 8d. a bushel for water carriage.
70. *By the Chairman*: Is not maize liable to injury in the holds of small craft? Yes; and if sent too green it spoils altogether.
71. Your coasters are much smaller than those which trade up the Hunter? I think some of them carry from eight hundred to a thousand bushels.
72. As a class they are small? I think they are.
73. *By Mr. Suttor*: In consequence of the roads being so bad, is there likely to be any competition with the railroad, or would it insure the whole traffic? I think it would.
74. The roads are getting so bad that carriers would not be likely to compete with the railroad? No.

75. *By Mr. Scott:* Can you furnish the Committee with any reason for supposing that the traffic would be increased fourfold in the event of a railway being established? People who now come to Sydney once in three months would, perhaps, come once a month, and try to do their business in one day, as it is very expensive to have to stop in Sydney all night. I believe, also, that a great number of persons would visit the district who now never look at it. At present, if a wedding party wish to come up, it costs about £10 for a carriage there and back.

Mr. R. Ridge.
12 Aug., 1858.

Mr. John Dawson called in and examined:—

1. *By the Chairman:* You are, I believe, a storekeeper in Windsor? A storekeeper and farmer.
2. Have you lived long in the district? About eight years.
3. You are in daily intercourse with the inhabitants there? Yes, a good deal.
4. And have traversed the district? In different parts about the locality of Windsor.
5. Do you think at the present moment the resources of the district are fully developed? Not by any means; not nearly so.
6. At the present time your productions are diminutive in number? There is much less produce raised than might be if we had cheap and quick communication.
7. And you might raise many kinds of produce for which you have now no market? A great deal to which attention has not been directed. For instance,—Kurryjong would supply Sydney with potatoes, which at present would cost more for carriage than to get them from Tasmania.
8. Kurryjong has a very salubrious climate? It has.
9. And the district might become a favorite resort? Yes, to those who had accumulated a little competence. They might get from fifty to one hundred acres, and turn their attention to the cultivation of fruit, and vines, and dairy produce, for which the place is well adapted.
10. These matters are now nearly neglected in that district? Yes.
11. In fact, from the high cost of carriage, the products of Kurryjong have much fallen off? It is almost entirely shut off. There is scarcely anything grown but a few potatoes to supply the towns of Richmond and Windsor, and a few other things of that sort.
12. At present, I believe, what are called "bottoms" or "flats"—alluvial lands—are principally cultivated, not the back-lying lands or mountainous parts? The poor lands are not under cultivation; the attention of the people has been confined almost entirely to flooded lands, which are very rich and productive.
13. Even these flooded lands are not cultivated in the best manner, are they? I do not think (excepting, perhaps, maize) the crops produced are more than half what they might be with a better state of cultivation and a rotation of crops. If a better attention were paid to the matter, I believe that on these rich flats the farmers might keep at least one-third of their land under two crops a year.
14. You are acquainted with the cost of carriage between Windsor and Sydney? Yes.
15. The cost from Richmond, I suppose, is about the same? About the same; the difference is trifling.
16. What do you now pay from Sydney to Windsor? About £2 a ton for the carriage down. I have two teams on the road almost regularly, so that I do not pay much myself. A shilling a bushel has been the average for grain for several years; hay and straw has been from £3 to £4; in fact straw pays very badly at £4.
17. Poultry, pigs, fruit, and dairy produce, of course are taken at varying rates? There can scarcely be said to be a rate, for people engaged in that traffic generally bring in their own. There are a great many poultry dealers who visit the district.
18. A district like yours could, I suppose, produce an enormous quantity of those articles? A very large quantity could be raised. If we had the means of sending them to market more quickly, it would add materially to the quantity of dairy produce and pigs sent to Sydney. At present very few pigs come alive, as from Illawarra; those that do come are corn fed pigs, in the shape of bacon.
19. Do you send poultry to Sydney? A very large quantity of poultry is sent. I have no means of knowing the number, but there are five or six parties at least, including Richmond and Kurryjong, perhaps half a score, regularly engaged in coming to Sydney with poultry.
20. Fruit and dairy produce could also be sent? Yes; but there is nothing done in dairy farming at present; a great deal of dairy produce could, however, be raised. For instance, fresh butter has been selling cheaper at Windsor than the Illawarra butter this winter.
21. Upon the whole your farmers confine their attention principally to the staple productions of the district? Yes.
22. They have not thought much of the little accessories of secondary products? No; they have been a great deal neglected. The holdings of the majority of the farmers are small—about thirty acres—and they confine their attention to wheat and maize particularly.
23. I take it that it is the holders of small farms who can, with the best hope of success, raise these little things if they have a market for them? No doubt their attention would, if they had a market, be more directed to them. They would be impelled to it, by various reasons, for, under existing circumstances the farmer has nothing to send to market more than once or twice a year, and if he could, in addition to the cultivation of his crops—having a few cows, as most of them might have who are situated on the river where there are bank paddocks—produce dairy produce, he would have a source of revenue coming in week by week, which would be a great advantage.
24. Have you much business with the residents on the Lower Hawkesbury? As far as twenty or twenty-five miles below Windsor I have.
25. At present their produce goes by water? Chiefly.

Mr. John Dawson.
12 Aug., 1858.

- Mr. John Dawson.
- 12 Aug., 1853.
26. Do you think this would come down by railroad, if a railroad were established? I have no doubt of it.
27. Do the people complain much of their present means of transit? They do, and they frequently sustain great loss. A case came under my own notice the other day: a party was indebted to me, and, anxious to turn a little of his produce to account, he sent down a shipment of maize to Sydney; it was too green when shipped, and the result was that it was entirely lost.
28. From their isolated position, the people on the river seldom travel? Very seldom; if they get as far as Windsor, that is the extent of their travelling.
29. Do you think if there were a small steamer in connection with the railway it would be the means of increasing the passenger and goods traffic on the line? Yes: in the event of a branch being carried to Windsor my impression is that we should have a grain market established at once, and that parties having grain would come and see the party to whom they sold, that they would not deal through the medium of a second party. Now the settler puts his grain in the hands of the party in charge of the boat, and has to receive the returns he chooses to bring.
30. And has to trust to him to buy the supplies? Yes, for which a commission is charged, and frequently a commission is received from the party from whom the purchase is made.
31. Of course the maintenance of a steamer to feed the railway would be a private undertaking—do you think private enterprise would soon set a steamer afloat? I think there is no doubt about it; but, under any circumstances, the corn grown would find its way to market through Windsor. Most of the cultivation on the Hawkesbury is much nearer to Windsor than to the Heads; it is principally between Windsor and the Colo, within thirty miles of Windsor.
32. Is there much arable land under cultivation on the Colo? Yes.
33. Do oranges flourish on the Lower Hawkesbury? Yes, they are very productive.
34. It is a very beautiful river, and has highly picturesque scenery? Yes.
35. Do you think, in the event of the railway being opened to Windsor, the passenger traffic would be greatly increased? It must of necessity greatly increase. At present there is no traffic but what comes immediately from the neighbourhood of Windsor; we should then have the intermediate traffic. Parties now living at Box Hill and other places on the road cannot trust to the coaches, and proceed on their own horses, or in their carts or gigs. There would be a very large intermediate traffic at once secured; and, of course, people travelling to and from Sydney upon business would travel much more frequently if they could do so more cheaply and expeditiously. For instance, I confine my journeying to Sydney at present to once a month; but the journey would not be a consideration to me if I could come and return in a few hours. It now involves a loss of two days.
36. I presume, too, that under the present system for the most part only the heads of families travel—that the wives and families remain at home? To a great extent. If there were greater facility and less expense the traffic would greatly increase.
37. I think, too, we might fairly anticipate that a number of pleasure seekers would travel from Sydney to Windsor by train, and then proceed down the river by steam? Possibly, if a steamer were plying, they would be glad to see the river as far as the steamer went.
38. *By Mr. Suttor*: Have you ever seen a system of irrigation carried on upon the Hawkesbury? No.
39. Not even upon a small scale? No.
40. Do you not think the amount of produce might be increased by a system of that kind? In dry seasons no doubt it might, and perhaps in average seasons it would. No doubt if a higher state of farming obtained, the quantity of produce raised would be very much increased. I do not think our district raises an average yield of wheat above twenty bushels to the acre, and I believe our rich lands would produce double that quantity.
41. *By Mr. White*: A higher state of farming is not likely to obtain at the present price of labor? Not unless an incentive were given by a better and quicker return.
42. *By Mr. Suttor*: Do you know to what depth you would have to sink in the flats of the Hawkesbury for fresh water? No; but as the people are living contiguous to the river there is no necessity to bore for water, unless some system of irrigation were adopted.
43. *By the Chairman*: Fruit of all kinds flourish in your district? Yes.
44. *By Mr. Scott*: Do you think freight from Windsor to Sydney would be cheaper by rail than by dray? Yes.
45. How much cheaper do you think? If I remember rightly, the basis of the Railway Commissioners' calculation was sixpence per ton per mile, and if the distance be thirty-six miles, that would be eighteen shillings—say twenty-shillings a ton, up and down.
46. What did you mean by stating that Kurryjong only raised a few tons of potatoes to supply the town of Windsor, when your petition states that the Windsor district sends 200 tons of potatoes annually to Sydney? The farmers in our locality grow about two crops of potatoes a year, and these are chiefly sent to Sydney, but the small settlers, who have not the means of taking them to Sydney, sell them in Windsor.
47. You send yours wholesale to Sydney? Yes; but the quantity grown is comparatively small.
48. I think you stated that the charge for the carriage of grain from Windsor to Sydney is about a shilling a bushel? Yes.
49. What do you suppose would be the cost by rail? I judge that would be from 5½d. to 6d. a bushel; one hundred bushels now costs £5, the same quantity at 5½d. would be £2 5s. 10d.
50. What is the distance from St. Alban's to Windsor? About fifty-five miles.
51. What would be the charge per bushel if the grain were sent to Windsor by a steamer? It would not be more than 3d., probably 2d. would suffice, because sailing boats would bring it for 3d.

52. Then you think the Macdonald people would prefer sending it to Windsor, and thence by rail, to sending it to Sydney by sea at 8d. a bushel? Yes; it would be to their interest to do so, as it would arrive at market in a better condition.

Mr. John
Dawson.

12 Aug., 1858.

53. Have you ever made an estimate of the probable amount of produce that would be carried by railway from Windsor to Sydney—bullocks, grain, hay, corn, and other produce from Kurryjong, Lower Hawkesbury, and other places? I have made a calculation that we have at the present time from 18,000 to 19,000 acres of land in cultivation, and this land, as it has been already shewn by other witnesses, would be greatly increased by Kurryjong and the high lands about Windsor, which are generally denominated valueless, being brought into cultivation. People would, no doubt, by the application of artificial manure, gradually increase the quantity of this land. But, supposing we have some 18,700 acres, which I believe we have now under cultivation, within the limits of the Windsor district—I think we have not less than 10,000 acres under maize crop from year to year, about 6,000 acres under wheat, 1,000 under oats and barley, 1,200 under hay, and about 500 under potatoes. Of grain, maize alone, taking 50 bushels as the average, we should have 500,000 bushels; of wheat, taking the average at 20, 120,000; of barley and oats, at 50, 50,000; giving a total of 670,000 bushels: 1,200 acres of hay, at 30 cwt. to an acre—which is not more than the land is capable of yielding of oaten hay, the yield of lucerne is much more—1,800 tons; 500 tons of potatoes; straw, from the breadth of wheat land under crop, would yield at least 3,000 tons for market purposes. The grain being brought to market at a charge of sixpence per bushel, which I think the settler would not grumble about, but would be very well satisfied with, would amount to £16,750; hay, straw, and potatoes, which would together amount to 5,300 tons, at 20s a ton, would amount to £5,300; dairy produce, poultry, &c., I estimate at about £1,250. I estimate the up-carriage at about 3,000 tons—this is the quantity stated in the petition, and I think it is quite within the mark. Cheaper carriage would also cause a great increase in the quantity of building materials, sawn stuff, slates, and a great many other articles, that I think would make an increase of 3,000 tons. I calculate, also, that we have, under existing circumstances, 600 tons of goods a year coming through Windsor to get to Bathurst and the western country, which does not go through Penrith. Many of the carriers engaged in that trade, residing near Windsor, bring the goods round by that course. That says nothing whatever of the passenger traffic, which has been already referred to by Mr. Ridge.

54. In this estimate have you included the Lower Hawkesbury and Macdonald? All the grain producing district, including the Lower Hawkesbury; the Macdonald is not included.

55. What would that give you additional? I have no idea what land is under cultivation there.

56. Have you anything you would wish to add? In the event of Windsor not being favored with a branch line, supposing the Penrith line were not to come nearer than within a distance of eight miles, I am under the impression that our produce would still find its way down by the road; that it would be as cheap to the settlers to bring it down to Sydney as to drive it the distance that would be required. For, if a station is not nearer than eight miles from Windsor, perhaps the average distance that teams would have to come, taking Wilberforce, Freeman's Reach, and Richmond bottoms, and on to the Nepean, would be twelve miles. That would involve the loss of a third of the time that would be consumed in going on to Sydney; and when to that is added the expense of the carriage by rail, and the slight difference in price, from not delivering it to the actual purchaser, I think it would be more to the interest of the settler to bring it on than to send it by rail. The question seems to me to be whether this amount of traffic shall be secured to the Government or lost, for this £25,000 or £30,000 would hang upon a branch line being carried to Windsor, or not.

THURSDAY, 19 AUGUST, 1858.

Present:—

Mr. SMITH,		MR. WHITE,
Mr. DALLEY,		MR. PARKES.

T. W. SMITH, Esq., IN THE CHAIR.

John McDonald, Esq., called in and examined:—

1. *By the Chairman:* You reside at Pitt Town, near Windsor? Yes.
2. You have lived there a great number of years, have you not? Yes, I think upwards of forty years.
3. And for some time you have followed agricultural pursuits in that district? Yes, a good deal for these last twenty or thirty years.
4. I believe you are one of the petitioners who signed a petition which was presented by me in the early part of this Session, a copy of which is before you? Yes.
5. In this petition you state that your population at the last census was, in round numbers, about 8,500—do you think the population of the district has increased since then? Decidedly; it has increased a good deal, I should think.
6. *By Mr. Dalley:* To what extent, do you think? Perhaps twenty per cent.
7. *By the Chairman:* The population principally consists of men with families? Yes, small farmers.
8. The petition further states that about 14,000 acres of land are under cultivation in your district—do you think that quantity is in excess of the actual number of acres under cultivation,

J. McDonald,
Esq.

19 Aug., 1858.

- J. McDonald, Esq.
19 Aug., 1858.
- vation, or otherwise? I think there are more. I speak from my own local knowledge of the parish of Pitt Town, where I reside.
9. The census was taken in the year 1856—since that time has the quantity of land under cultivation increased? Yes, it has a good deal increased.
10. Is there much land in the district adapted for cultivation, independently of that now under tillage? It is principally arable land. I do not think there are more than three or four hundred acres of land which is not fit for cultivation; that is in the parish of Pitt Town. The parish of Pitt Town contains about ten square miles under tillage, and produces on an average, in fair seasons, probably 40,000 bushels of wheat, 13,000 bushels of barley, 40,000 bushels of maize, 2,000 tons of hay, and the same of straw and chaff, and about 100 tons of potatoes.
11. It is principally with Pitt Town you are acquainted? Yes.
12. But you are generally acquainted with the remainder of the Windsor Police District? I am not particularly acquainted with it, but I know it.
13. Judging from your general knowledge of the district, do you think there is much more land which could be put under cultivation? Yes; I am quite sure a great deal more land might be put under tillage.
14. *By Mr. Dalley*: Good rich land, fit for all agricultural purposes? Yes. I have said nothing about what are called second crops, which are sometimes very productive. For several years past I have carted from Sydney, monthly, about ten tons of goods, and sent to Sydney about the same quantity of agricultural produce from my own establishment.
15. *By the Chairman*: Are you acquainted with the Kurryjong District? I have been there.
16. Are you aware whether the cultivation of that district has fallen off of late? I do not know, I am sure. I should rather doubt that it has fallen off. They are not subject to floods there as we are.
17. *By Mr. White*: How much of the Pitt Town lands are alluvial, subject to the overflowing of the waters? I should think above eight square miles in the parish of Pitt Town.
18. About three-fourths? More than that I think. All the small farms are principally flooded, more or less.
19. *By the Chairman*: Practically, you know little of the Kurryjong? Very little.
20. *By Mr. White*: The land is not so rich at the Kurryjong as on the opposite side of the river? No. If we had cheap carriage to Sydney we should cultivate a great deal more land.
21. It is the want of carriage that causes you to cultivate only the richest land? We cultivate some of the high land, but not much.
22. *By Mr. Dalley*: Can you give us any calculation of the increased price you have to pay for goods in consequence of the high rate of carriage? Carriage is high, and has been.
23. What is carriage from Sydney? I do not know exactly; perhaps between £2 and £3 a ton.
24. Is carriage down at the same rate? About the same.
25. *By the Chairman*: Judging from your petition, it appears that your principal products at the present time are hay, straw, and grain? Hay, straw, grain, fat pigs, bacon, hams, horses, potatoes, oranges, and vegetables.
26. The great bulk of your production consists of hay, straw, wheat, and maize? Yes. We used to send down a great deal of tallow, hides, salt beef, and salt pork; but we have not done much lately in that line.
27. In the event of your having a cheaper and more expeditious means of transport to market, I take it the productions of your district would be much multiplied? Yes.
28. A great deal more land would be thrown into tillage, and a better system of husbandry introduced? Yes.
29. The system of husbandry as yet has not been first rate? No; they are getting better now than they were; the farmers are paying more attention to their land.
30. The farmers would not then confine their attention to wheat and maize, but would apply themselves to the growth of green-stuff for the Sydney market? Yes; and the sugar-cane also.
31. The *Sorghum Saccharatum*, you mean? Yes. I tried some of it last season, and it seems to answer very well. Stock are very fond of it; in fact everything is fond of it, even the children.
32. It would thrive well on the alluvial land of your district? Yes.
33. That is an article for which there is likely to be a large demand in the Sydney market? Yes. I have a small quantity of it in this season, and I have machinery which I intend to convert into a sugar-mill.
34. You could also send to Sydney, with profit to yourselves, large quantities of fruit? Yes; oranges and grapes. One thing we could send that would benefit Sydney much, that is hard metal for the streets; there is plenty to be got between Parramatta and Windsor; and timber for building purposes.
35. Your present export of live stock—of poultry and pigs, would be greatly increased? Yes; fattened calves and milch cows would go down also.
36. The length of time now spent on the road prevents, in great measure, your settlers from devoting their attention to these articles? Yes; and also deters them from making many trips to Sydney to market; they put it off as long as they can, and make one trip perhaps do for a month or two. If we had a railway we should go much oftener to Sydney.
37. And the time spent by your farmers on the road, in carrying produce to market, also tends to operate injuriously upon their farms? Yes; the labor is lost from the farm, and also there is the loss by wear and tear and breakages; when the roads are bad, there is great breakage and loss of cattle.

38. The difficulty of communication prevents them in fact from tilling their farms as properly as they otherwise might do, and from raising a variety of crops? Yes. J. M'Donald, Esq.
39. You are clearly of opinion then that if you had a railway your system of tillage would be much improved, and your productions multiplied and increased? No doubt of it. I think if the rail branched off at Minchinbury, and ran from there to Windsor, a distance of about ten miles, through a level country, that would secure the principal traffic on Bell's Line, and also the Bulga Road, the Colo River, the Macdonald River, the Lower Hawkesbury, the Great Northern Road, Wollombi, Singleton, Jerry's Plains, and the Upper Hunter; it would secure a great deal of that traffic, which would then come to Windsor. 19 Aug., 1856.
40. *By Mr. White*: The fat stock from the Northern District generally come that way now? Yes; most come by the Bulga Road, Richmond way; a good deal comes Wiseman's Ferry way.
41. *By the Chairman*: At present the greater part of the produce of the Lower Hawkesbury is water borne in small coasters, is it not? Yes; but it would come by the rail if we had one. There would be lighters built to bring it up the river.
42. Or probably a cheap kind of screw steamer? Yes.
43. At present the farmers on the Hawkesbury seldom leave their farms—they entrust their produce to the captains of the coasting vessels, who bring it to Sydney, sell it, and bring them back what goods they require? Yes, that is exactly how it is.
44. But you think if you had a railway the produce and the people themselves would come to Sydney? Yes. They are rather in a wild state down there; the young people seldom go from home; more land would be thrown into cultivation, and it would raise the price of Crown Lands, and also of town lots; there would be an immense traffic if you had a railway to Windsor.
45. At the present time I apprehend that for the most part the families of the settlers do not visit Sydney very frequently—the passenger traffic is confined to the heads of families? It is, chiefly.
46. The expense is too great? Yes, and the journey too long.
47. Then the passenger traffic would be much increased if there were a railway? Yes, very much.
48. Not only would the settlers themselves come oftener to Sydney, but their families would sometimes accompany them? Yes. Where a person now goes one journey in a month to Sydney, perhaps he would go five or six. I know for myself that whenever I have anything to do in Sydney I put it off till I have a good many things to do together.
49. If you come now you must spend a night in town? Yes.
50. Therefore it would be cheaper to the settlers even to pay a higher fare by railway, when they could come and return the same day, than to pay a lower coach fare and spend a night in Sydney? Yes.
51. They would gladly pay a higher fare by railway than they now pay by coach? Yes.
52. I think you said the cost of carriage from Windsor to Sydney is about £3 a ton? From £2 to £3.
53. If there were a cheaper means of conveying goods to Windsor, do you think more goods would be sent there—that the inhabitants would purchase more freely in Sydney? Yes, I think so.
54. They would purchase many things with which they now dispense on account of the cost of carriage? Yes; the cost of carriage increases the value of the goods, and of course the buyer has to pay for that.
55. I believe you have been a large importer of agricultural implements? I have imported agricultural implements many years ago.
56. Generally speaking they are not used throughout the district? They are introducing them now.
57. But hitherto they have not been much in vogue? No, but they begin now to find the benefit of them.
58. At the present time your settlers do not avail themselves of the line of railway running as far as Parramatta, to bring their produce to Sydney? No, they go right through; they find it would not answer to unload and put it on the trains; besides, the hay is not prepared exactly for that, it requires to be trussed in a proper manner.
59. Do you think they would continue to do the same thing if the railway were made to Penrith, without a branch to Windsor? Yes.
60. A railway to Penrith alone would derive no advantage from the products of your district? I think not. I think it is about twelve miles from Windsor to Penrith.
61. And a very bad road? Yes.
62. *By Mr. White*: Have you any idea of the total cost of carriage to the district, up and down, for the year, by the present mode of traffic? I could not speak to that.
63. You have no statistical return which would give an idea of it? No. Those who hire teams pay between £2 and £3 a ton to Sydney.
64. *By the Chairman*: What price per hundredweight do you think your settlers could afford to pay for the carriage of hay and straw, and what price per bushel for wheat and other grain, by train, taking into consideration the freedom from risk of damage and the saving of time? I think they could pay from £1 to £1 10s. a ton for hay and straw.
65. And for grain how much per bushel? I think about sixpence or seven-pence a bushel.
66. Those rates would be considerably less than you now pay by teams? Yes, a hundred per cent., perhaps.

Edward Powell, Esq., J.P., called in and examined:—

E. Powell,
Esq., J.P.
19 Aug., 1858

1. *By the Chairman*: You reside in the Richmond District? Yes.
2. And are engaged in agricultural pursuits in that part of the country? Yes.
3. You are intimately acquainted with the district and its resources? I have never kept any account of the quantities of goods that go backwards and forwards, but no doubt it is immense. There is a large area of land in cultivation, from Windsor up to the Nepean—say ten miles in length, with an average of nearly two miles in width, all under cultivation.
4. Your petition states that there are at the present time 14,000 acres under cultivation in the entire Windsor Police District, do you think that number less or more than the number of acres actually under crop? I should think from Windsor upwards there are about twenty square miles under crop.
5. Perhaps I may remind you that the Police District of Windsor is bounded by the southern boundary of Ham Common and by the Grose River? I would not go above the Grose. I should say there are about twenty square miles under cultivation.
6. You mean from the Grose down to the Macdonald River? From the Grose down to Windsor and all Wilberforce; but I think there are twenty square miles exclusive of Wilberforce.
7. On the eastern side of the river? The south side.
8. The side nearest Sydney? Yes.
9. You are principally acquainted with the Richmond District? Yes.
10. That is, I believe, exceedingly fertile—the flats between Windsor and Richmond? Yes; it is all flooded land.
11. At present the attention of your farmers appears to be principally confined to the growth of hay, wheat, straw, and maize? Yes; those are the principal products.
12. Do you not consider that the farmers there could and would profitably turn their attention to many other productions if they had the cheap and expeditious means of transport to market that a railway would afford? I can speak for myself that it would be a great advantage. I had part of my wheat spoiled last year. I did not send it to market early; the floods came and I could not send it, and I had to keep it so long that the weevil got into it, and I had to feed the stock with it.
13. *By Mr. Dullcy*: How much did you lose? About three hundred bushels. Some of the bags remained good, and the weevil could not get in; but wherever the mice cut the bag, the weevil got in and destroyed the grain.
14. *By the Chairman*: When the roads are bad the expense and difficulty of conveying produce to market are very great? Yes; it will sometimes kill the horses to get it to market.
15. Your district is eminently calculated to produce green-stuff, is it not? I should say it will grow anything that can be produced in the same latitude. The ground is extremely rich.
16. Poultry and pigs could also be reared in very large numbers? Yes.
17. Do you grow fruit in any quantity? Yes. I suppose I send from ten to twelve tons of grapes to market every year. The rail would answer me very well for fruit.
18. But at the present time I understand that your farmers do not turn their attention to the growth of these subsidiary articles for sale? No; the market is too far for any kind of green crops.
19. But if you could send these things quickly to Sydney they would be found profitable? Yes. We could compete then with, and perhaps supersede, the gentlemen round about Sydney in growing green crops.
20. What are you now paying for the conveyance of goods from Sydney to Windsor? I do not pay anything myself; I have my own teams, but they often load back with goods; the price is £2 a ton to Windsor now, and £2 10s. to Richmond.
21. Are you acquainted with the Kurryjong district? Yes, I know a little of it; I have a piece of land there.
22. It is not at the present time fully cultivated, I believe? No; a great deal of the land there has gone out of cultivation. It is a part of the country where the soil wants manuring; it soon wears out.
23. Do you think it would come into cultivation again if you had a railway to Windsor? No doubt some of it would. There is new land that would come under tillage.
24. The present system of tillage in the district generally is not good, is it? No, it is anything but good.
25. The farmers have depended on the richness of the soil, and have not resorted to artificial means of improving it? I do not know of any one in our locality that has ever helped the soil at all. All that we have to do when the soil begins to fail is to allow the plough to go a little deeper, and then we have fresh earth.
26. Farmers have not attended much to the rotation of crops—they grow the same things from year to year? Yes, it is generally so.
27. You know the plant *Sorghum Saccharatum*—does it grow well with you? Yes, it grows very well; but I do not think it will answer to grow it for sugar at the present price of labor.
28. As green-stuff would it not pay well? Yes.
29. Lucerne also pays very well, does it not? Yes; I am laying down a good deal of it. In short, we must turn our attention to something else than wheat.
30. I take it that the growth of green-stuff of all kinds, and of fruit, and the rearing of poultry and pigs, would pay you better than the growth of wheat? Maize has answered us better.
31. I mean, supposing you had the means of conveying them to Sydney cheaply and expeditiously? We shall grow all we can if we have a railway.
32. Your farmers are generally their own carriers at present? Yes.

33. By acting in that way they lose much of their time? Yes; there is a great deal of time lost.
34. Which prevents them from giving proper attention to their farms? Yes, certainly; if they had not to go on the roads they could keep their farms in better order.
35. And make them produce more? Yes.
36. You think if you had a cheap and expeditious means of transit to Sydney the products of the district would be much increased? Yes; because there would be more encouragement.
37. Do your farmers and their families at present travel much backwards and forwards between Windsor and Sydney—I am not alluding to those who drive their own teams; do the people of the Windsor district travel much to Sydney? I should think not; only when they are compelled.
38. Do you think they would travel more if they had the means? I have no doubt they would, for where I come once to Sydney I should come five times.
39. At the present time the families scarcely ever leave home to come to Sydney? No; there are many families who, if you go to their houses, will hide themselves for want of seeing a little of the world.
40. A considerable quantity of fat stock comes through Richmond to the Sydney market? Yes; the bulk of the stock comes through there.
41. Are you in a position to speak positively of the quantity of stock arriving by that route? No.
42. The neighbourhood of Richmond or Windsor would be a very favorable position for large slaughtering yards? Yes.
43. There is abundance of room and water for cattle while they are kept prior to being slaughtered? Yes; there is plenty of ground to feed on.
44. And, if need be, green-stuff could be raised in any quantity for their maintenance? Yes.
45. That is, supposing it became the custom hereafter to keep stock for a short time before slaughtering. I am aware it is not the custom now, but if it should become so your district would present many facilities for that pursuit? It would; and I have no doubt cattle will be fattened in our district after some time.
46. Your roads at the present time are not good? No; it is very hard to keep the earthen roads in repair.
47. Do you think you could send much timber to Sydney market? Not exactly from our locality; it would come from further this way—Blacktown way; there is plenty of timber there.
48. In a part of the district which is near where the line would run from Windsor to Parramatta? Yes.
49. Ironbark? Yes.
50. Are you at all acquainted with the mountain country? No.
51. Have you never been across to Hartley, along Bell's Line? I was once to Hartley; but I went the Penrith way.
52. Have you been in the valley of the Grose at all? No; but in my opinion a line can never be carried from Penrith to Hartley; it is a congregation of mountains and gullies all the way.
53. *By Mr. White:* Can you tell me what the carriage of the district costs? I cannot.
54. Do you think it costs the district £10,000 a-year? I cannot say. I know immense quantities of goods and produce come up and down. The present line to Parramatta, even if it went up to Rooty Hill, would be altogether immaterial to us; it might as well be in the moon for us. When we get to Parramatta we think we are at home nearly, and we do not like to unload.
55. *By the Chairman:* You think if a line were made from Parramatta to Penrith only, your settlers would not make use of it? We could not. I should also think, that if there is ever a line to Bathurst it will have to go by way of the Grose: there is no other way.

E. Powell,
Esq., J.P.
19 Aug., 1858.

Mr. John Cunningham called in and examined:—

1. *By the Chairman:* You reside at Richmond? No, at Clarendon.
2. Some few miles from Windsor? A few miles.
3. You have lived for some time in the district? Yes.
4. And you are well acquainted with it? Yes.
5. Are you engaged in farming pursuits? Yes.
6. You are one of the petitioners who signed the petition which I presented in the early part of the Session? Yes.
7. Your petition states that your population amounted at the last census to 8,500—do you think it has increased since then? I do not know to what extent, but it has increased.
8. The petition further states, that you had at that time 14,000 acres of land under cultivation—do you think there is more or less than that? I think there is more, from the calculations I have been able to make.
9. Will you state to the Committee the basis upon which you found your calculations? The number of farms on the Windsor side, Richmond Bottoms, and Cornwallis. I have got the statistics from a gentleman who went through all the farms, and I know they are correct.
10. These have been carefully prepared? Yes; I have gone through them, and I can say they are correct. Richmond Bottoms and Cornwallis, about 7,500 acres; Pitt Town District, 4,000 acres; Wilberforce, about 3,000; from Wilberforce to Colo, 2,500; Colo River, about 1,300—I am not able to certify that that is exactly correct, but I think it is; of the Kurryjong I am not able to give a correct estimate; from the Grose to Weena Creek there are about one hundred farms, with about 5,000 acres under cultivation; from Windsor to Parramatta I have not got.

Mr. John
Cunningham.
19 Aug., 1858.

Mr. John
Cunningham.
19 Aug., 1858.

11. Is there much arable land, or land fit for cultivation, in your district which is not now under tillage? Under the improved system of cultivation, which will be brought into practice if we have a Railway, I think there will be one-fifth more land; the number of dairies and gardens that would spring up there would increase it by one-fifth. In fact in my possession now I have land which it would not pay me to cultivate; but if I could put the produce on a railway I could put twenty or thirty acres more under cultivation.
12. At the present time the farmers confine themselves to the staple articles, hay, straw, and wheat? - Yes.
13. Are you acquainted with the carrying trade? I have been in that trade for the last seven years, and I have sent about five tons a month to Bathurst for the last five years; and from Windsor to Sydney I sent down, up to the 1st of last January when I left Windsor, four tons a week, and brought four tons back.
14. What is the price of carriage from Windsor to Sydney? I have got agreements for twelve months, at £2 a ton.
15. Do you charge grain at per ton? No; that is taken by the bushel. But this is the up carriage I am speaking of at £2 a ton; to cart hay we get £4 a ton.
16. It is £2 from Sydney to Windsor? Yes.
17. Downwards how much is charged for hay? From £3 to £4 a ton.
18. And for straw? Straw is very seldom carted to town lately; we mostly buy it outright, but the rate of carriage for it is about £3 to £4.
19. How much for wheat? One shilling per bushel.
20. And maize? I have not carted any maize down to Sydney for a long time. It is about the same price as wheat.
21. These articles at present form the staples of your district? Yes.
22. I think you said that if you had more expeditious and cheaper means of communication the farmers could and would grow many articles to which they are now prevented from turning their attention? Yes.
23. They could raise large quantities of green-stuff? Yes; they could almost supply the city with green-stuff and dairy produce.
24. As well as pigs and poultry? Yes.
25. Is the population of the Hawkesbury a travelling population—do they move much up and down to Sydney? They are not accustomed to moving about very much. There are many persons who would come to Sydney a great deal oftener than they do, but they dread coming down by the coach. We come to Sydney as little as we can.
26. The wives and families of the farmers in that district scarcely ever leave home? Very seldom.
27. Do you, in the event of your having a railway, anticipate that there will be a much greater passenger traffic than there is now by the coaches, independently of the number of people who would visit the district from Sydney? Yes; I think there would be a much greater number of passengers by the rail.
28. The people would not only travel more frequently, but in greater numbers? Yes.
29. Do you think your settlers would avail themselves of the line from Parramatta to Penrith, in the event of your not having a branch line to Windsor? I think they would not. I have made a calculation that at present the carriers of Windsor and Richmond cart monthly about fifty tons of goods from Sydney to the Bathurst country; and it would not pay us to take it by rail to Penrith, and then to come around home to get forage and all that sort of thing for the rest of the journey. I think, therefore, they would still keep their teams on the old road.
30. I believe a great many of the Bathurst carriers are Windsor farmers? Yes.
31. That being the case, if you had a railway to Windsor, those people amongst you who are Bathurst carriers would, I apprehend, take their loading by train to Windsor, and start from Windsor with their teams to Bathurst? Exactly; so that while the horses were resting they would be getting the goods up from Sydney.
32. Your district is a very good district for carriers, because they have the means of rearing horses and feeding them and laying in cheap supplies of forage? Yes; the land is so rich round there that we can always grow green-stuff and forage for horses, which relieves the carriers from the heavy expenses incurred on the Bathurst Road.
33. So that in this way you think the railway to Windsor would have a source of traffic independently of your home traffic? Yes.
34. Your district is very well adapted for breeding cart horses? Yes. The Richmond and Windsor carriers take about half the goods that go to Bathurst now.
35. Do you know the Lower Hawkesbury, towards the Macdonald? I do not know a great deal about it. I know there is some good land, but what quantity I cannot say.
36. Do you think the settlers there would all send their produce to Windsor, if there were a railway, to be sent to Sydney by the rail, in preference to sending it by the coasters? Yes. I have been making a calculation that there are sent from the Windsor district to Penrith to go to Bathurst five hundred bushels of grain a-week lately, and all that would go by the train if it were near enough.
37. You think the train might depend upon that produce as a means of revenue? Yes, because that is the best market for produce, and has been these two years.
38. Maize is liable to injury, is it not, by being sent by coasting vessels? Yes.
39. At times, from the bad state of the roads between Parramatta and Windsor, your traffic is very much impeded, and the settlers sustain serious loss? Yes.
40. Do you know much of the Kurryjong district? Yes, I have been all through it. I lived there for about twelve months some thirteen years ago, and latterly I have been through it.
41. The amount of land under cultivation there has fallen off of late? Yes.
42. Do you think the farms there would be resumed in the event of your having a railway to Windsor?

- Windsor? Yes, I do. I think if we had facilities of getting to market, all the land that is available would be turned to account.
43. Is not the Kurryjong district favourably situated for vineyards, and for the growth of potatoes? Yes; I think at the present time the Kurryjong district sends to market from seventy to a hundred tons of potatoes annually.
44. Are you acquainted with the mountain road from Richmond to Hartley? Yes; I have been travelling that road these last seven years.
45. Have you ever traversed the valley of the Grose? No; I have never been up the Grose.
46. Do you think you are in a position to say which would be the most favorable line of railway to Bathurst? It would be very difficult to say. I have never been up the Grose, nor yet on Bell's Line; but I think if they take a railway to Penrith with a view of reaching Bathurst, it will be a failure; they would never surmount the mountains. I think it must be by the Grose and across Bell's Line, or otherwise to the right, by Mount Tomah.
47. In either case starting from near to Richmond? Yes; between Richmond and Penrith.
48. Have you made any estimate of the gross sum paid by your settlers for the carriage of produce to market, and the carriage of goods back from Sydney to your district? I have not.

Mr. John
Cunningham.

19 Aug., 1853.

Mr. George Matcham Pitt called in and examined:—

1. *By the Chairman*: You live near Richmond? Yes, in Upper Richmond.
2. And you have lived there a very long time? Yes; it is my native place.
3. You have been engaged in agricultural pursuits there, and have also lived in Sydney? Yes.
4. You are well acquainted with the district, and have travelled through all parts of it? Yes; I think I am in a position to say I am well acquainted with it.
5. *By Mr. Dalley*: You are now engaged in business as a cattle auctioneer? As a general auctioneer; but my business is principally with cattle.
6. *By the Chairman*: You signed the petition now on the table? I did.
7. The petition states that your population was 8,500, in round numbers, at the date of the last census—do you think it has increased since then? I do not think it has increased much.
8. At the present time there is not much opening for young men in the district? I mean that the population has not much increased, if you take the district altogether. The Kurryjong at one time was almost depopulated, when the gold fields were first discovered, and many have never returned.
9. There was not much temptation for young men to remain, I suppose? I do not know that. I got the gold fever as well as the rest, but there was a great temptation to me to stop.
10. You have not as much land under cultivation as you had in former years? I do not cultivate much for my own use.
11. I am speaking of the general cultivation of the district? I think there is no falling off in our district.
12. Is there not much land that could be profitably cultivated if you had a railway? If the rail was against my door it might make a difference; but still there must be a difference in the price of labor before I could cultivate profitably. I could not afford to cultivate now for sale by paid labor, nor could any other man.
13. *By Mr. White*: It is something like paying five shillings to raise half-a-crown? Not quite so bad as that; but it never paid me at all, only when I held the handles of the plough myself.
14. *By the Chairman*: At the present time your farmers convey their own produce to market? I should say nine-tenths of them do.
15. If these farmers were spared the time they now spend on the roads they could pay more attention to their farms? Yes.
16. They could improve their position and increase their productions, by devoting the attention of themselves and families to other than the staple articles? Yes. There is not a shadow of doubt in any reasonable man's mind that the railroad is a very great advantage; but one thing they want, to increase the productiveness of the land, and it is a thing which has never been attended to in this country, is a system of watering the land by irrigation. If we had that we should be one of the first countries under the sun. I believe our soil is so rich that it will produce almost any cereal that grows in the same latitude.
17. *By Mr. Dalley*: Do you think these statements in the petition are correct? I looked them over, and thought they were correct. I was not a party to making them up, but I depended on those who did.
18. *By the Chairman*: At the present time you are principally engaged in the sale of stock? That takes up a great part of my time now.
19. I believe the greater portion of the fat stock from the north-west and north country comes through Richmond? Yes.
20. Both by Bell's Line and the Bulga Road they come through Richmond? Yes.
21. The Sydney market is now principally supplied from the northern and north-western country? Yes.
22. The fat stock from the southward principally goes to Port Phillip? It does.
23. But all the stock from the north-westward and northward comes through Richmond to Sydney? Nearly all. Some lots come by Wiseman's Road.
24. *By Mr. White*: There is no feed on that line? There never is.
25. *By the Chairman*: Are you able to state the number of cattle and sheep that come to Sydney in this way? At a rough calculation, I think it takes about six hundred bullocks a week to supply Sydney market, and I think four hundred of the six hundred come through Richmond.

Mr. G. M. Pitt.

19 Aug., 1853.

- Mr. G. M. Pitt. 26. How many sheep? The number of sheep varies. The man who keeps the toll bar told me that the year before last 105,000 passed through; last year, 75,000; and this year, 19 Aug., 1858. about 35,000 for the half year. With some trouble I think I could make it up from the book.
27. Will you furnish the Committee with a return of the number of sheep and cattle that come to Sydney through your district? Ycs, the number of sheep that cross the ferry, but not the cattle. The man told me that all the cattle belonging to certain butchers are booked, but those that are paid for in money are not. I asked the toll-keeper, and he said eight hundred a month, but that, in my opinion, is incorrect. I made a calculation of what passed through my own hands, and they averaged two hundred a week, or nearly so, and I have only a branch of the business.
28. I apprehend the ferryman's return will be rather under than over the mark? He will tell you the number of sheep pretty accurately.*
29. You are getting a bridge now made across the river? The people of Richmond are; I have nothing to do with it.
30. That of course will facilitate the transmission of stock by that route? Yes.
31. *By Mr. Dalley*: Do not a good many horses come that way? Not a great many?
32. Can you give us any idea of the number? I do not think more than three hundred horses a year come that way.
33. *By the Chairman*: Do you not think that if you had a railway to Windsor, or some point near the town of Windsor, the fat stock now arriving at Richmond would be slaughtered and sent to Sydney by railway? No. I do not think it would keep in summer time.
34. *By Mr. Dalley*: Do you think these fat stock would be put on the train to come to Sydney? No; the bullocks are too wild.
35. The sheep would? Yes; I think it would answer very well to send all the sheep by the rail.
36. *By the Chairman*: Do you find Richmond a good place for resting stock until they are wanted for slaughter? I cannot say that it is altogether. The only pasture land near Richmond is a large common, presided over by trustees, and they go so far that they would almost impound the stock that walk over it without feeding. There is no place there, without you take paddocks near Kurryjong, or paddocks on the Blacktown Road.
37. Is not the road from Richmond to Sydney a very bad road for driving cattle? No; it is one of the best they can go—only for the bad fences which they get through.
38. I am speaking of the want of feed? You will get none unless you pay for it. There are paddocks where you can put them, if you pay for them.
39. *By Mr. White*: Is there much for the cattle to eat in them? Some are tolerably well grassed. Rooty Hill and Pye's, at Eastern Creek, are both good paddocks, besides several others.
40. *By the Chairman*: Is not the rapid driving the cattle are now subjected to from Richmond to Sydney very injurious to the meat? Certainly.
41. Is it not the practice to drive them fast from Richmond to Sydney? It is among the drivers employed; but if you employ the stockmen that bring them down, they will take them just as quietly as on any other part of the road.
42. *By Mr. White*: Have you been up the valley of the Grose? I have.
43. Have you crossed the range at the top which they call the Darling Causeway? I have never been up to the sources of the river, but I was up the valley in years gone by. I and others started at twelve o'clock and walked till the sun went down, and returned the next day. That is all I know of the valley of the Grose.
44. It is very rough up the valley? Very.
45. You have been along Bell's Line? Yes, many a time.
46. There is some very good land there all the way up to Mount Tomah? I cannot say it is very good.
47. It would answer for vineyards. I think Mount Tomah itself, if it is not too cold, is one of the finest places I ever beheld for vines. The eastern slopes of the Kurryjong hills would be equal to anything in the world for vineyards.
48. Do you think a road could ever be taken that way? Capital would do wonders. I think it is possible a road could be made there.
49. There was a road made there by Bell? Yes, and it has been improved upon since.
50. It is not a very bad line after you pass Mount Tomah? The only fault is that the stones are too loose for the cattle travelling.
51. *By the Chairman*: You have a general knowledge of the mountain country? Yes.
52. Judging from the lay of the country, which do you think will be found to be the most eligible line for a railway? I am not skilled in engineering; but I do not think it is possible at all to make a railroad over the Penrith line, because there is a gradual ascent for several miles. I think the highest point is about Blackheath.
53. Do you think a line would be practicable in the valley of the Grose and its neighbourhood? Yes, it is possible; but it would cost a considerable sum.

FRIDAY,

* I find, on inquiry, he is not prepared to furnish a correct return of the number of sheep.

ON EXTENSION OF RAILWAY TO WINDSOR.

FRIDAY, 20 AUGUST, 1858.

Present:—

Mr. SMITH,		Mr. WHITE,
Mr. DALLEY,		Mr. SUTTON.

T. W. SMITH, Esq., IN THE CHAIR.

Captain Scarvell, J.P., called in and examined:—

1. *By the Chairman*: You live near Windsor? I live near Windsor; yes.
2. You have lived there for a great number of years? Yes; I have lived there almost 30 years—29 years.
3. You are a magistrate of the territory? I am.
4. You are well acquainted with the district? I cannot say I am very well acquainted with the district; I have been a great home stayer. I am pretty well acquainted with the wants of the district in that part.
5. I believe you are one of the gentlemen signing a petition praying for railway extension to Windsor? I am.
6. In this petition you state that your population at the time of the last census was 8,500? If it is there I have no doubt it is correct; I don't keep these things in my head.
7. Do you think your population has increased since then? I think it has. I see there appears to be more trade going on in Windsor, and a great number of immigrants have arrived since then.
8. Your population consists principally of farmers, does it not? Yes; I think they are principally farmers.
9. The petition further states, that about 14,000 acres of land are under cultivation? I could not speak to these particulars of my own knowledge. If it is here in this petition I am perfectly satisfied it is correct, as far as the leading facts having been placed before me.
10. It appears by this petition that the principal products of your district are at the present time hay, maize, wheat, and straw? And potatoes.
11. Do you think these productions would be increased in the event of your having a cheaper and quicker way of carrying your produce to Sydney? I think so, because many small settlers have not the means of conveying their goods to market, and are obliged to sell to forestallers and carriers, and consequently sell at a much lower rate than they would get at the Sydney market if there were an easy means of transit. Indeed I am well satisfied they would rather send their goods to market than sell them to the parties they are obliged to do now. There are a great number of that sort of small farmers.
12. Many of your farmers are carriers, are they not? A great many of them.
13. If they were enabled to transport their produce to the Sydney market by railway, they would save the time they now occupy on the road, and they would have more time to devote to their farms? Undoubtedly they would.
14. In that way the farms would be more productive? Yes; there would be a greater inducement to cultivate more largely. They would get better prices for their produce, and that would be an inducement to them to extend their cultivation.
15. The Committee have been informed that this district is favorable for dairy produce—the rearing of poultry and live stock of that description? I don't think there is so much done in dairies as formerly since the establishment at Wollongong. I have no doubt if there was a demand for dairy produce they would turn their attention again to it, particularly the small men.
16. At the present time the dairy farms have decayed in your district? These farms do not pay so much as formerly. In former years there was a great deal of butter made there.
17. You could also grow large quantities of vegetables if you could convey them to market cheap? Undoubtedly. There is no inducement to small farmers to keep up gardens for vegetables now. If there was quick conveyance they would find it profitable to do so.
18. And to grow fruit also? Yes; I should say so.
19. I gather from your evidence that you conceive if there was a railway to Windsor the productions of the Windsor district would be considerably multiplied and increased? They would, I am satisfied.
20. Do the inhabitants of Windsor travel much to Sydney, backwards and forwards? Only as necessity obliges them.
21. I presume their wives and families seldom leave home—it is only the heads of families and sons who travel? I could not speak positively as to that. It is not within my own knowledge. I believe they would visit Sydney much more frequently if there was a cheap and quick conveyance.
22. They would no doubt do so? Yes, I think so.
23. And the passenger traffic, as regards the district itself, would be much increased? There is some data which I have at home that would enable me to answer the question. I think the mail contractor—he himself derives a profit or rather an income from passengers by his coach of £60 a week—that is one individual. I think I should be correct in saying there would be a large passenger traffic.
24. Much larger than that which now exists? Yes.
25. I presume you would also expect to see a larger number of visitants from Sydney on your having a railway? Yes; I think we should. For this reason, the locality is very much liked by persons who visit there. The site of the town itself is pleasing; I have heard many persons who visit Windsor for a short time complain of the want of sufficient accommodation. Now, if a railway was established, offering that quick and cheap mode of travelling, I am satisfied a great number of persons in Windsor would take advantage of that circumstance, and prepare accommodation for persons wishing to reside there for a few days.

Capt. Scarvell,
J.P.
20 Aug., 1858.

Capt. Scárvoll, J.P. At present there is only one inn I am aware of, and that is an inn of rather confined accommodation—M. Quade's is the only place there now.

20 Aug., 1858. 26. Do you think that much additional land would be placed under cultivation in the event of your having a railway? I think there would be many persons who pay attention to other things just now who would turn their attention to cultivation if there was a ready and cheap way of getting their produce to market. That is the great drawback, and prevents the carrying on of agriculture to a much greater extent than at present. Unless parties have conveyances of their own and appliances to deposit their goods in the Sydney market they are completely in the hands of the forestallers and carriers, because they must sell it there for what they can get.

27. You consider that the resources of your district are not by any means fully developed at present? I consider by no means so at present. I do believe if a railway were established it would be the means of developing the resources of the district to a greater extent than anything that could be established.

28. You mean that if you had a railway that what you call second-rate land would pay to be brought under cultivation? I think it would, if the farmers paid that attention to the dressing of the land which they should. There is a great deal of land near Windsor not paying in consequence of the slovenly way it is now done. It would be an inducement to farmers to cultivate properly.

29. The system of tillage at present is not good? Very slovenly. I have no doubt they would soon get into a better system when they found it was more to their interest to do so. I do not know anything that would more conduce to that end than a railway.

30. Do you think a railway would change the whole character of the district in the course of a few years? I really think it would.

31. Are you acquainted with the Lower Hawkesbury? No, not at all.

32. Do you think that the farmers on the Lower Hawkesbury would send their produce to Windsor for transmission to Sydney if you had a railway? The greater part of the produce of the lower part of the Hawkesbury comes up in boats to Windsor, and the farmers are obliged to sell it to parties who make it part of their business to act as carriers, and they must take what they can get offered by these persons. If a railway were established I feel satisfied that instead of selling it to the forestallers they would take advantage of the railway—leave their boats at the wharf, and come down by railway and sell their produce.

33. You think that their produce would come down by railway and not by water? I think so.

34. There are many drawbacks by carriage by water? Yes: the exposure of a short sea voyage; then the uncertainty of the weather, and risk of damage from length of time: these are great objections to water conveyance.

35. *By Mr. Dalley*: The goods are obliged to be trusted to captains of small vessels, who are entrusted with the disposal of them? Some are very small, and go to sea at very great risk. If caught in a westerly wind they may be blown off the coast, which has happened more than once or twice.

36. *By the Chairman*: You think a railway might depend on their produce? Yes.

37. The produce principally consists of maize on the Lower Hawkesbury? I am expressing my opinion now with the idea that the railway terminus should be in some convenient part of Windsor, so that there would be no expensive or long cartage to take place, as it is at present from the Parramatta terminus.

38. The produce of the Lower Hawkesbury consists principally of maize, does it not? Maize and wheat. I think they grow more maize than anything else.

39. Maize is especially liable to injury on a sea voyage? I could not say whether it is more so than wheat; I don't know that it is.

40. Now, with respect to return goods from here to Windsor? I believe there is a vast number of tons go by the carriers every week; I think I might be safe in saying it reaches nearly 50 tons a-week.

41. Fifty tons a-week, you think? Yes; there's Woods, Havclins,—I think there are four carriers, who have two waggons each on the road. These waggons carry from two to three tons, and go twice a week.

42. *By Mr. Dalley*: That would be about 48 tons? Besides that there are drays—as many as a dozen—that belong to different parties. Then this is to be taken into consideration—that a great deal of the goods go into the interior, to Bathurst and Goulburn.

43. *By the Chairman*: Many of your farmers are Bathurst farmers? They are residents of the town, but they hire themselves to carry goods to Bathurst.

44. Are you aware what is the present cost of carriage from Sydney to Windsor? I think £2 per ton.

45. Are you acquainted with the rates charged for carrying produce from Windsor to Sydney? I think it fluctuates a good deal for heavy wheat; they pay sometimes 1s. per bushel. The charge per ton is about £2. For hay they pay sometimes as high as £5 per ton.

46. The charges vary with the state of the roads? Yes; they vary with the state of the roads. There is an established rate for weight. They make a difference as to the quality of the goods they have to carry. I think wheat is charged by the bushel. I never sent any myself.

47. One shilling a bushel? Yes.

48. And maize? About the same.

THURSDAY, 26 AUGUST, 1858.

Present:—

MR. PARKES, | MR. SMITH,
|
MR. WHITE.

T. W. SMITH, ESQ., IN THE CHAIR.

Edwin Barton, Esq., called in and examined:—

1. *By the Chairman*: You are attached to the department of the Commissioners of Railways?
Yes.
2. As a surveyor? As Assistant Engineer.
3. Are you the surveyor by whom the proposed line from Parramatta to Penrith has been surveyed? No; I have not been engaged upon that line until the last few days, when I staked out about four miles. I have had nothing to do, with that exception, with the work between Parramatta and Penrith.
4. Have you been engaged in the survey of the proposed extension from the Parramatta and Penrith line to Windsor? No; I do not know anything of either the Penrith or Windsor line.
5. I believe you have been employed in surveying the Blue Mountain country, with the view of discovering the most practicable route for a railway from the County of Cumberland to the western interior? Yes.
6. When did you commence that survey? In September last year.
7. With an efficient party? With a party of sappers.
8. Is your survey of the mountain country so far completed that you are able to furnish the Committee with information as to the route it is most probable the line will take from the County of Cumberland to the western interior? The survey is complete, with the exception of the survey of the Grose River, which would go from near Richmond to Hartley. There are five miles of that portion of the work done. Owing to its being the winter time, and the consequent flooded state of the river, we were obliged to abandon the work, which will be proceeded with about the middle of next month, and will occupy perhaps three months.
9. At what part of the country did you commence the survey? At Bathurst.
10. And you then worked towards Sydney? To Penrith the line is surveyed.
11. The line from Bathurst to Penrith is surveyed? It is.
12. You have also tried a line to Windsor, have you not? To the head of Grose River.
13. Towards Windsor? Towards Windsor.
14. For what distance along the Bathurst Road would the proposed lines to Penrith or to Windsor be one and the same? I have tried from Bathurst three different lines. The one line by the Fish River, Solitary Creek, Piper's Flat, Lithgow's Valley, Darling's Causeway, the ridge upon which the present Western Road is constructed, between Penrith and Mount Victoria and to Emu Plains,—that is the mountain line.
15. The line you have described to the Committee is practicable? It is practicable.
16. Would it be an expensive line? For perhaps half the distance the works would be rather heavy, but I have not gone into the question of expense yet.
17. How would you ascend from the valley at Hartley to the Mountain range? By Lithgow's Valley, and one of the tributaries of Brown's River, on to the range dividing Dargin's Creek from Brown's River.
18. Brown's River falls into the River Lett? No, into the River Cox.
19. Where is Lithgow's Valley? Lithgow's Valley is a little north of Bowenfels.
20. Then you would ascend the mountains to the north of Mount Victoria? Yes. The reason for so doing is that the low country at that point is so much higher than the Vale of Clwyd, and the mountain level remaining almost the same.
21. You would still have to cross the deep valley of the River Lett? No, that I leave to the south; from Lithgow's Valley I go to Piper's Flat, which is in the north-east direction.
22. Have you a map of the country? I have. (*Witness referred to Sir Thomas Mitchell's three-sheet map.*)
23. The route you have now described crosses Cox's River? Crosses Cox's River very near its source.
24. It keeps entirely to the head of the River Lett? It crosses Dargin's Creek, which is a tributary of the River Lett.
25. You cross a deep gully before you cross Dargin's Creek? There is a valley by Dargin's Creek which, by making the line a little longer, might be avoided.
26. That is one line—will you describe to the Committee the second? The second line is by the Fish River, and Solitary Creek, to the junction of Antonio's Creek.
27. To that point then it is similar to the one you have described? Yes. From that point following the course of Antonio's Creek for a short distance, and crossing the main dividing range near the point where Plumley's line of road intersects it, and following the course of one of the tributaries of Cox's River to the valley of the Cox, and the valley of the Cox to its junction with the River Lett, and the River Lett, by Hartley to Darling's Causeway; from Darling's Causeway the course of the railway would be taken to near Richmond.
28. How far is Darling's Causeway from the head of the Grose? It is at the head—a range dividing the waters of the Grose from those of the River Lett.
29. You spoke of a third line from Bathurst? The other line would be to Piper's Flat common with the first line I described, and crossing the Middle River and the Clarence hilly ranges to Darling's Causeway. That is a line to avoid a tunnel which would be necessary on the line I described last.
30. You have now described three lines of railway, the first is a line of railway from Bathurst to Penrith? Yes.

E. Barton,
Esq.
26 Aug., 1858.

- E. Barton,
Esq.
26 Aug., 1858.
31. The second is a line of railway from Bathurst to Darling's Causeway? Yes.
 32. And the third is a line from Bathurst to Darling's Causeway? Yes.
 33. But the first line you have described from Bathurst to Penrith also runs very near to Darling's Causeway? It runs on the summit of Darling's Causeway throughout its whole length.
 34. That line then would not be available in the event of a railway being carried to Windsor and not to Penrith? It would not.
 35. Either of the two lines you have described as running from Bathurst to Darling's Causeway would be available for a line of railway from Bathurst to Windsor? Yes.
 36. Of these three lines, so far as the country between Bathurst and Hartley is concerned, which do you consider the most favorable? The one by Piper's Flat is the longest; the other one would require a tunnel through the main dividing range. It is a question of expense—I think with the exception of the tunnel, they are about equal; one is as favorable as the other.
 37. As far as Hartley the three lines are about equal? Yes; the Piper's Flat line being the longest.
 38. That is the line you have laid out from Bathurst to Penrith? The line from Bathurst to Penrith.
 39. Then the two lines you have described from Bathurst to Darling's Causeway, so far as the country between Bathurst and Hartley is concerned, are equally favorable with, if not more favorable, than the line from Bathurst to the top of Darling's Causeway, and thence to Penrith? I could not answer that question without going into the matter of the estimate, the cost of the tunnel, and the crossings of Cox's River. The gradients would be favorable.
 40. You are not then in a position fully to answer the question, which is the best line from Bathurst to Hartley, using the latter town as the name of the district? With the exception of the tunnel through the dividing range, the line by Antonio's Creek is the most favorable.
 41. The most favorable of the three? Yes.
 42. Is the line from the top of Darling's Causeway to Penrith a favorable or an unfavorable line? With the exception of the descent from the top of Lapstone Hill to Emu Plains it is favorable, for a mountain country.
 43. But upon it of course there would be very many steep gradients? The gradients are not unfavorable from the top of Lapstone Hill to the head of Lithgow's Valley.
 44. The head of Lithgow's Valley is near to Darling's Causeway? Yes; the descent at the Penrith end would be about one in thirty-five, and there would be a similar descent to Lithgow's Valley, from the range which I described before.
 45. What is the highest point? Blackheath—3,475 feet above Emu Plains.
 46. From that point it would descend towards Lithgow's Valley? It would descend each way towards Lithgow's Valley and Penrith.
 47. Are there many so steep gradients as one in thirty-five? Only the two I have named.
 48. From the point at Blackheath to Lithgow's Valley are the gradients steep? Not with the exception of the one from the mountain into Lithgow's Valley; that would be about one in thirty-five.
 49. What would its length be? About four miles.
 50. What would the length be of the equally steep gradient to which you have alluded on the Penrith side? About two miles and three quarters.
 51. In ascending from Lithgow's Valley to Blackheath you would have a gradient of one in thirty-five, four miles in length? Yes.
 52. Descending to Penrith you have a gradient of one in thirty-five, two miles and three quarters in length? Yes.
 53. With the exception of those two gradients, are there many others which, although not so steep, are steep? The gradients have not been laid down on the sections; I am merely giving them roughly. I think from the top of Lapstone Hill they would be tolerably favorable.
 54. *By Mr. White:* You have not taken a section of the country? I have taken a section, but laying down the gradients is a matter done in the office; I have not yet done it.
 55. *By the Chairman:* Do the two lines you have described, from Bathurst to Darling's Causeway, that is, the lines you have described as the second and third, come to the River Lett at the same point? Yes, to the Lett valley.
 56. Under Darling's Causeway? Then under Darling's Causeway.
 57. Darling's Causeway divides the Lett valley from the valley of the Grose? It does.
 58. Are you aware of the respective altitudes of the valleys of the Lett and of the Grose at this point? About the same.
 59. Then a tunnel through Darling's Causeway to connect the two would be about the level? Yes.
 60. What would be the length of that tunnel? About a mile.
 61. Through sandstone rock? Through sandstone.
 62. Would the tunnelling through sandstone be a very expensive process? Much would depend upon the position of the tunnel and depths of working shafts; it would be the least expensive of any rock tunnelling.
 63. Is there not an instrument lately invented by which the cost of tunnelling has been very much reduced? I believe so.
 64. It is now used on the Sardinian railways? I believe so.
 65. You are not practically acquainted with the nature of that instrument? No; I have not seen it, but I have noticed that such an instrument is at work.
 66. It is used, I believe, in the mountainous country of Italy, which, I believe, resembles in many respects the country of which we are speaking? Yes.
 67. I believe by this instrument the cost of tunnelling has been reduced considerably? I believe so.
 68. Having through this tunnel entered upon the valley of the Grose, you would then be on

a level, I presume, or not very much higher than the Windsor country, I presume? About 2,500 feet above it.

E. Barton,
Esq.

69. But the descent from thence to Windsor, following the valley of the Grose, would of course be gradual? It would be gradual.

26 Aug., 1858.

70. Are you aware of the distance of the valley of the Grose from the confluence of the river with the Hawkesbury? Not from measurement, but from my judgment, having travelled it on foot, I should think about forty-five miles.

71. There is then a rise of 2,500 feet in forty-five miles? Yes.

72. *By Mr. White*: It is a very rough country, is it not, going down the bed of the Grose? Yes; the longitudinal levels are very gradual, but the cross levels are very broken and steep.

73. *By the Chairman*: The valley of the Grose is of course rather tortuous? It is.

74. How far down the valley of the Grose from its head have you surveyed? No distance at all from the head, except over Darling's Causeway into it.

75. You are about to undertake the survey of the valley of the Grose from that point to the confluence of that river with the Hawkesbury? Yes.

76. In what time do you expect to have that completed? About December next.

77. You say you have walked up the valley of the Grose from the confluence with the Hawkesbury to its head? I walked from Darling's Causeway down the Grose to its confluence with the Hawkesbury.

78. You have, then, a general idea of the valley? Yes.

79. And of its capabilities? I could not speak of its capability for the purpose of a railway till the traverse lines have been completed.

80. Is it a wide or a narrow valley? It varies very much; at the head it is rather wide; it narrows towards the Hawkesbury, where it is more circuitous.

81. *By Mr. White*: It is more of the nature of a mountain ravine than of a river? It is.

82. *By the Chairman*: Do you know the other line of railway that has been thought of from Darling's Causeway to Windsor? That known as Bell's Ridge, or Bell's Line; I have tried it, but it is not practicable.

83. That is, I suppose, from the top of Darling's Causeway to Windsor? Darling's Causeway joins the ridge on the same level, and from that junction the line would follow the ridge to near Windsor.

84. When you speak of Windsor, you do not, of course, speak of the town of Windsor merely, but of the district? Yes.

85. *By Mr. White*: The worst portion of Bell's Line lies between Mount Tomah and the town of Richmond? I think the worst portion is Mount Tomah itself, and that portion to the east end of the mountain known as Kurryjong Range.

86. *By the Chairman*: No other line is available from Hartley to Windsor than that line by the valley of the Grose? No, I think not.

87. You are not aware of any other? It depends a good deal upon what gradients are used. The line to Penrith might be available to Windsor by following the valley of the Hawkesbury.

88. That would come into Penrith? Yes, run through Penrith.

89. Would it be possible to avoid the steep descent of Lapstone Hill by keeping along the ridge of the mountains, and descending gradually towards Windsor? That is the way in which I have got my descent. The gradient I have got is one in thirty-five, the corresponding descent of the existing road is about one in twelve.

90. At what point near Penrith do you come out? Near the mouth of the gully known as Wallaby Gully, a little north of the township of Emu.

91. And to gain the gradual ascent you take a detour to the southward, and then turn round to the westward? Yes.

92. And then to the north-west? I join the main ridge near the Pilgrim Inn—Wascoe's.

93. Do you not think it possible to accomplish a better descent by taking a north-easterly course from Wascoe's towards Windsor? I have tried a descent from Springwood, by a range dividing the waters of the Nepean River from those of Grose. I had levelled six or seven miles of that, and found that it would only give a gradient of one in thirteen, so it was abandoned.

94. You do not at the present time consider yourself to be in a position to say whether the line from Darling's Causeway to Penrith, or the line from the head of the Grose to Windsor, the better line over the mountains? The Grose line would be much the better line if the natural bends of the river will allow of curves of the requisite radii. No doubt it would be much better for the gradients.

95. The valley of the Grose is entirely a sandstone country? Entirely.

96. Would it afford a supply of good timber, suitable for railway purposes? Near Govett's Leap there is some splendid blue gum, which would be available for railway purposes.

97. Is the valley called Govett's Leap a portion of the Grose valley? Yes.

98. There is no timber nearer Windsor? Not very much.

99. The Grose near the head is, I suppose, a mountain torrent—it is not a river always running? I should imagine it is; when I was there, which was at the end of the last dry summer, there was always water, even at the head.

100. It is a narrow river all the way down? With the exception of the portion at Govett's Leap, there is rather an extensive flat there.

101. The valley of the Grose has been surveyed five miles upwards from the confluence of the river with the Hawkesbury? Four or five miles.

102. By a detachment of sappers and miners, under your command? Yes.

103. *By Mr. White*: Merely taking sections? Merely taking sections, and fixing the position of levels by traverse lines.

104. *By the Chairman*: So far as that survey has proceeded is it favorable or the reverse? Favorable.

- E. Barton, Esq.
26 Aug., 1858.
105. Are these men still engaged in the work? No; they will be engaged in it as soon as the river is sufficiently low to permit of the work being proceeded with.
106. The spring and summer months are the best adapted to the survey of this valley? Yes, it is the only time when it could be done.
107. Are you aware that it is the intention of the Commissioners to push on the survey rapidly during the spring and summer? Yes, I believe it is.
108. Do you think that by the month of December you will be in a position to furnish the Committee with full information with respect to the adaptability of the Grose valley for a railway line? By that time I shall be able to furnish more reliable information with respect to the Grose valley; it is merely from a cursory tour down it that I now speak.
109. *By Mr. White:* It has been supposed that it would be impossible to form a railway from Penrith to Bathurst that would be practicable without an auxiliary engine? I think it would be quite practicable; a gradient of one in thirty-five is quite practicable; far worse gradients are being worked.
110. Without a stationary engine? Yes. I believe in America there are gradients of one in twenty-two.
111. *By the Chairman:* Have you any further information you wish to afford the Committee? I have not.

Sergeant Henry Quodling called in and examined:—

- Sergeant H. Quodling.
26 Aug., 1858.
1. *By the Chairman:* You are a sergeant in the Royal Engineers—the Sappers and Miners? Yes.
2. Now stationed at Parramatta? Yes.
3. You have been engaged, I believe, upon the proposed line from Parramatta to Penrith? Yes.
4. And also upon the proposed extension from a point upon that line to Windsor? Yes.
5. In what capacity have you been so engaged? As senior non-commissioned officer of the detachment of engineers.
6. What have been your duties? They have been generally to superintend the work; occasionally to lay out portions of the line; to test the work by plotting; to test the levelling; also the value of one portion of the levelling with another; to attend to the accounts; and to hold the correspondence of the detachment.
7. By whom was the line from Parramatta to Penrith laid out? There have been several trial surveys made—one from Fairfield—and some deviations from that line also were laid out; there have been innumerable trial surveys made.
8. By whom? The Sappers and Miners.
9. Under whose command? Partly under Captain Hawkins, when we had an officer, and for a considerable time under mine.
10. You are aware that a line has been finally adopted as the most advisable line from Parramatta to Penrith? That is not the case decidedly; a portion of the line as far as the Blacktown Road has been laid out.
11. Will you look at the plan now before the Committee—this is a plan laid upon the table of the Legislative Assembly by the Government, and shews the extension of the Great Western Railway from Parramatta to Penrith—up to what point has this line been finally approved of? (*The witness referred to the plan.*) To the point at which it is proposed to turn off to Windsor. That (*referring to the plan*) is one point where it has been proposed to deviate, but there is an improved line to which I intend to direct Mr. Whitton's attention, as I think it would save some extensive cuttings.
12. Up to the point at which upon this plan the branch to Windsor diverges, the Parramatta and Penrith line has been finally adopted? Yes.
13. It is yet uncertain whether the line from that point to Penrith may or may not be marked out to the northward of the route marked upon the plan? Yes; it is a modification of this line (*referring to plan*).
14. Following for a short distance the branch to Windsor? Yes.
15. Have you been employed upon the survey of that proposed branch line to Windsor? Yes.
16. What is the distance from that point to the terminus at Windsor? I cannot speak from memory precisely; I should think from twelve to thirteen miles.
17. What is the character of the line? A very excellent line could be obtained, and has been marked off; and I think some improvement might be made even upon that.
18. If the Parramatta and Penrith line were continued a little along that branch line to Windsor, a better point of divergence for the Windsor line could then be discovered? Yes.
19. Making a still better line than that now marked out? Yes; it would be preferable for crossing lands liable to be flooded.
20. Will you describe to the Committee the course this proposed line would take to Windsor from that point? It will run nearly parallel to the Blacktown Road into the Eastern Creek, and then take the western side in a general way past Mr. David Pye's, now Mr. Hay's place, on by Mr. Schofield's, thence to the north of Mr. Blackwell's house, and by a place known as the Frenchman's—this is a very vague description, consequent upon my not having a plan to refer to—thence by Collis', and by Mr. Fitzgerald's boiling down establishment—that diverges far to the westward to avoid the low land in the valley of the South Creek—and terminates at the large open space in front of Windsor Church.
21. You speak of the line you describe as an excellent line? Yes.
22. What do you mean by the term "excellent"? I think there are excellent gradients with no sharp curves whatever. The direction of the line is good, equally so with the Penrith line.

23. Through what kind of country would it pass—is it thickly or thinly timbered? In parts the timber is pretty thick, but it is being cleared pretty fast—there is a good description of timber for splitting, fencing, and shingling. Sergeant
H. Quodling.
24. Is there much good timber on the line for railway purposes? Yes, in abundance—the very best description of timber I should think for the purpose. 26 Aug., 1858.
25. What is the character of the soil generally? The soil generally is not very good I think.
26. As adapted to railway purposes? So far as I am acquainted with it, I think there is plenty of clay for bricks, but I saw very little appearance of stone; there are parts where a sort of gravel might be obtained which would be admirable for roads.
27. For ballasting? No, it is too expensive for ballasting, owing to its extreme hardness, and consequent expense in breaking.
28. You think, upon the whole, this would be a cheap and good line? Yes.
29. Does it pass through much cultivated country? No, not much.
30. It would not then pass through much valuable land? No, I should not think it would, except in the neighbourhood of the town of Windsor.
31. The greater part of the line would pass through land of no particular value? Yes. I do not know that it passes through much Government land.
32. But even if it be private land it is not of much value? No.
33. *By Mr. Parkes:* Do you understand the qualities of soil for agricultural purposes? No.
34. Can you judge of the quality of soil when you see it an uncultivated state? No.
35. *By the Chairman:* Have any other lines been tried to Windsor diverging from the Parramatta and Penrith farther along the line from Rope's Creek or Rooty Hill? No; a line was started from near Hughes' (a publican's) place, on the Western Road, but at that time it was started from the line that was laid out from Fairfield to Penrith.
36. What distance would that line be to Windsor? This line would meet the line I have just described.
37. It would be about the same distance then from Hughes' place? No; it would be some three or four miles further.
38. That would be a longer branch to Windsor than the line of which you have already spoken? The lines are almost identical, from their junction, near the crossing of the Blacktown Road, with the Eastern Creek.
39. Has there been no line from Rope's Creek to Windsor? No.
40. Nor from South Creek to Windsor? No.
41. Nor from the country between Rope's Creek and South Creek to Windsor? No.
42. The two lines of which you have spoken are the only two lines you have tried? Yes; and they to a certain extent were identical.
43. To your knowledge no trial surveys of any kind have been made to Windsor? I am not aware of any but those made by the Royal Engineers.
44. Have you been employed upon the survey of the valley of the Grose? No; Mr. Barton.
45. The sappers who have commenced the survey of that are not under your command? They are to a certain extent.
46. You have not been actually in command of them in the field? No.
47. Were you employed upon the Fairfield line? Occasionally; at every opportunity I could get I was out with the men.
48. Are you aware why that was abandoned? I am not aware of the reason beyond this—that this is by far the preferable line—the line north of the Western Road, leading westward to Penrith.
49. When you say preferable do you mean cheaper? Yes.
50. It also runs through Parramatta town? It runs through the town of Parramatta.
51. The proposed line to Windsor has been entirely done by yourself and the party under your command? Yes.
52. *By Mr. Parkes:* When were you first engaged upon this service? We have been employed upon it at different periods of time during the last two years. My instructions were to find the best line from Fairfield to Penrith, and then from some point on that line to branch into Windsor.
53. And since then from some other point, as shown in this chart? Yes. When it was thought desirable to bring the line through Parramatta I was instructed to get as good a line as I could.
54. That work has been accomplished by you and the party under your command? Yes.
55. The line now in contemplation has been marked out by you? Yes.
56. Have any estimates been formed of the cost of that line? No; that is no part of my duty.
57. Has the quantity of work been estimated—the earth work, bridges, and description of bridges? An approximate estimate.
58. The details upon those points are in the possession of the Railway Commissioners? Yes.
59. From which an estimate could be formed? Approximately.
60. *By the Chairman:* Have you any further information to give the Committee? I am not aware that I could afford any.

THURSDAY, 2 SEPTEMBER, 1858.

Present:—

MR. SMITH,

MR. SUTOR,

MR. WHITE.

T. W. SMITH, Esq., IN THE CHAIR.

John Whitton, Esq., Engineer-in-Chief, called in and examined:—

J. Whitton,
Esq.

2 Sept., 1858.

1. *By the Chairman:* You see before you the chart, laid upon the Table of the House, shewing the proposed railway extension from Parramatta to Penrith? Yes.
2. Upon that chart, at a point a little on the Parramatta side of the eighth mile, is marked a short line indicating the proposed branch to Windsor? There is.
3. Will you inform the Committee if that is a point determined upon after mature consideration and proper survey, or a point which it is supposed from casual observation to be the best from which a line to Windsor can be formed? It is not done from working surveys—it is merely a trial line; but, before the working plans are made, the whole of the country will be examined thoroughly. These are plans got up only sufficiently to shew that a railway could be made from Parramatta to Windsor for a certain amount of money; but deviations will no doubt be made in the execution.
4. Do I understand that this line from Parramatta to Penrith is not ultimately determined upon as the best line? The general line is determined; but, in making the working drawings, deviations may be made with a view to reduce the cost of the work.
5. Then the line diverging to Windsor from a point on the Parramatta and Penrith line is simply a trial line? Yes; the whole of the country has been levelled by the Sappers, and these are the lines laid down from their levels as the best line that can be got, with the most favorable gradients and the least work; but in making the working surveys the cost, if possible, will be reduced.
6. You have spoken of the whole of the country—do you mean on the Parramatta and Penrith line? I mean the whole country between Parramatta and Penrith; levels have been taken for a considerable width.
7. Have you received a report from the party by whom this trial survey has been made of the extension to Windsor? No; I have received no report. I have had the whole of the plans, and have been over the country myself.
8. Judging from the plans, and from your personal observation of the country, what is your opinion of that line? With regard to the cost?
9. Yes? The cost will be a little over £7,000 a mile for the branch.
10. *By Mr. Sutor:* Including rails and all? Yes; but exclusive of the rolling stock and land.
11. *By the Chairman:* What is the distance? Thirteen miles and a-quarter.
12. This line I believe does not run through any valuable land? No, it does not.
13. The line appears to run through properties each large in extent? Yes; assuming the properties to be as described on the plan; but they may have been divided and resold to many owners.
14. I should imagine that where the line runs through a very large property the proprietor would almost give, free of cost, the small piece of land that would be required for the purpose of the railway? That has sometimes been done, but rarely.
15. *By Mr. White:* It would be likely to benefit rather than to deteriorate the estate? The passing of a railway through a large property does increase its value in all cases.
16. *By the Chairman:* I could imagine that a small farmer would demand some compensation, but in a large estate I should think the proprietor would not demand a very considerable sum? It is very difficult to say; sometimes they demand large sums, but occasionally they make a present of the land, although the latter is a rare occurrence.
17. However, the land through which the line would pass is not the most valuable? No.
18. What would be the probable cost of the land, should you think? Very small, I should think. The land required would be from ten to twelve acres per mile.
19. Is there any timber on the line suitable for railway purposes? Yes, there is very good timber.
20. The earth work is not extensive? Very light.
21. Are there any bridges? Yes, a few over creeks.
22. None of any importance? None of any importance.
23. The figures upon which your estimate is based have been, I suppose, submitted to careful revision? Yes; careful estimates have been made from the trial sections, and any alteration that might be made in the work would be to reduce the cost.
24. The cost per mile you have named to the Committee is, therefore, the maximum cost? Yes; assuming that there be no very sudden increase in the price of labor, which might materially affect the cost of the works.
25. Your estimate is based on the present cost of labor? It is.
26. What is the total length of the line from the point at which it diverges from the Penrith and Parramatta line to Windsor? Thirteen miles and a quarter.
27. Have trial surveys been made of any other lines diverging from the Parramatta and Penrith line? Yes, one between Rope's and South Creek, running up the valley of South Creek to Windsor. The land there is very low, and subject to floods; but it would be about a mile shorter than the one branching off at the Blacktown Road.
28. What are the objections to that line? The objection was, that the line would run through low lands in the valley of the South Creek, and be subject to floods.
29. Would the earth work be heavier, or lighter, than on the line you first described? I think the earth work would be a little lighter, but very little. The earth works on the other line

- line are very light. There are few cuttings of more than from eight to ten feet, except at the junction with the Penrith line; but that, I think, we shall avoid by a slight deviation.
30. Are the gradients easy? Very easy; the worst is one in eighty.
31. You are now speaking of the line diverging from the Parramatta and Penrith line, near Blacktown Road? Yes.
32. Reverting to the line to Windsor running from the Parramatta and Penrith Road, at a point between Rope's and South Creek, I understood you to say that the earth work would be lighter upon that road than upon the road first named, but that the line would run through low land liable to flood? I think so; but I am speaking from memory. I believe I abandoned that line principally for the reason that there were high floods at South Creek, and that this would be the more direct line to Parramatta and Sydney.
33. A survey has been made of a line to Penrith and Windsor, diverging from the Parramatta and Liverpool line, near the Fairfield station? Yes.
34. *By Mr. White:* Do you not consider trial surveys of that description a great loss of labor? I do. I think if a practical man were sent over the country he would be able to settle pretty nearly the proper line.
35. Is not the proper plan first to decide where a line shall go, and then to take sections? Yes; and by walking over a country a professional man would see where a line was practicable. It appeared to be desirable to have a station in Parramatta, and after that the object was to determine which would be the cheapest and shortest line to Penrith, and I have no doubt that the line adopted is the best.
36. A man accustomed to read the features of a country can easily determine? Yes.
37. *By the Chairman:* The line from Parramatta to Penrith, running through Parramatta, has been adopted in preference to that from Fairfield? Yes.
38. Do you consider for sufficiently good reasons? I do. It will be much less expensive, in the first instance; it accommodates Parramatta, which the other would not do, and is a more direct line.
39. Upon the map before us we see a third line marked out, running from Parramatta and Liverpool line to Windsor and Penrith, at a point nearer Parramatta than the Fairfield station? Yes.
40. By whom was that plan marked out? By Captain Hawkins, I believe, for the sappers to level.
41. Has that been altogether abandoned? It has.
42. Is your estimate for a double or a single line? A single line altogether, single earth works, and single permanent way.
43. In the event of the Bathurst line being ultimately carried through Windsor, the line could be enlarged so as to form a double line? Undoubtedly; but I think single lines will do for this Colony for the next fifty years. I can see no advantage in making a line with double earth works and single permanent way, as it increases the first cost, and there is a consequent loss of interest on the money so expended, and if the bridges are timber, probably by the time the double line is required they are rotten.
44. I presume, also, that on a future day the line can be enlarged so as to be a double line, as cheaply as if it were originally made so? Yes, and more cheaply; every thing being arranged for a double line, the additional works can be executed without the least difficulty.
45. You would have the assistance of the existing line for carrying earth? Yes; and all the materials for the construction of the permanent way and bridges.
46. Are you conversant with a survey made of the Blue Mountain country to Bathurst? I am not. The whole of the trial sections will come before me, but I have not yet examined them.
47. You are not prepared to say which would be the most favorable route to Bathurst, that running from Penrith to Hartley, or that running from Windsor to Hartley? No, I am not.
48. Is the description of earth on the proposed extension to Windsor favorable to brick-making? I think there is good clay in that district which could be used for that purpose, but timber would be the cheapest to use there.
49. *By Mr. Suttor:* What do you suppose would be the cost of tunnelling—it has been proposed to tunnel for about a mile and a quarter at the head of the Grose? That involves so many questions that it is impossible to say; it will depend upon the strata to be tunnelled through—it may be granite sandstone, or clay.
50. It is sandstone, and could be worked only at the two ends? In England, the cost of tunnelling varies from £40 to £120 a yard. I should say a single tunnel through sandstone here would cost from £60 to £80 a yard.
51. *By the Chairman:* Would you require a shaft to tunnel through a mile and a quarter? If the work were required to be performed rapidly you must have a shaft.
52. I suppose it is the cheapest material through which to tunnel? Yes.
53. As cheap as clay? Better than clay; tunnelling through clay is frequently more expensive and tedious.
54. Has there not been some new machine invented by which the cost of tunnelling has been decreased? Yes; I have heard of it, but have not seen it.
55. It is employed in Sardinia, is it not? Yes; and I believe it was also employed in America.
56. In recent reports of proceedings in the Sardinian Parliament, I think I have seen allusions to the machine as being in use? There is one in use in that country.
57. I suppose the country in which it is used is something like the Blue Mountain country? Yes, and probably more difficult. The works on the line to Bathurst will of course be heavy, but there will be nothing at all impracticable in them.
58. At what time is the survey of the valley of the Grose to be completed? I think it may be completed about December next, or the beginning of the next year.
59. So soon as that is completed you will be in a position to say which you consider the

J. Whitton,
Esq.

2 Sept., 1858.

most favorable line to Bathurst? I shall go over the whole of the trial lines which appear practicable, and then decide which is the most economical line.

69. About what time do you think you will be in a position to afford the information to the Committee? Probably about next April or May.

61. Not before then? I do not think so.

62. We should not require to know which would be the most favorable line through to Bathurst, but which would be the most favorable line to Hartley? If that were all that might be decided probably in a month after the completion of the surveys.

63. Is Mr. Barton to be employed in the continuation of the survey? Yes.

64. Every exertion is to be made during the coming spring and summer to complete the survey of the valley of the Grose? Yes.

65. *By Mr. White:* It is a very rough place to survey? I believe it is.

66. *By the Chairman:* Have you been up the valley of the Grose? I have not; but I intend to do so should the trial sections appear favorable.

67. At the present time the people of Windsor do not use the Parramatta railway? Not much for goods traffic; having travelled from Windsor to Parramatta it is scarcely worth while to unload the drays and send the goods by railway to Sydney, as the teams would have to wait for the return loading.

68. Do you think it probable they would use the Penrith and Parramatta line unless they had a branch line to Windsor? I do not think they would.

69. Then the extension of the line to Windsor would have the effect of throwing into the Parramatta and Penrith line the Windsor traffic? Yes; and, although the traffic on the branch might not be sufficient to justify the making of the line, still the additional traffic which would pass over the main line might make the branch remunerative.

70. We have it in evidence that the Windsor district is not cultivated to its fullest extent, but that, in the event of a cheap and easy transit to market being established, the products would be increased? I have no doubt they would; the land in that neighbourhood appears to be very favorable for agricultural purposes, and I have no doubt the value of property would be considerably increased.

71. I suppose you are now tolerably well acquainted with the County of Cumberland? Tolerably well.

72. Do you know any other district in the County of Cumberland equal to Windsor? I think I have not seen any land in Cumberland equal to that about Richmond and Windsor.

73. There is a quantity of good land lying in a small compass? Yes; it appears to be very fine land.

74. Are you aware if there be any quarries of metal suitable to the repair of Sydney streets? Not on the extension to Windsor, but on the extension to Penrith, at Prospect Hill.

75. *By Mr. White:* It is not far off to the quarries at Pennant Hills? No; a communication might be made with them. A branch might also be laid down to the Prospect quarries, which are not more than a mile and a-half from the Penrith line.

1858-9.

THURSDAY, 23 DECEMBER, 1858

Present:—

Mr. SMITH,
Mr. WHITE,Mr. DALLEY,
Mr. PLUNKETT.

T. W. SMITH, Esq., IN THE CHAIR.

Captain B. H. Martindale, R. E., Commissioner for Railways, called in and examined:—

1. *By the Chairman:* You are aware that during the last Session we examined Mr. Whitton with regard to the progress that had been made in the surveys for railways towards Penrith and Windsor? I am aware that Mr. Whitton was examined, but I know nothing of the nature of his examination.
2. Since that time, September 1858, has any thing been done with regard to the survey of the line diverging from the Parramatta and Penrith line to Windsor? Nothing.
3. Then the only survey of that line that you have at present is the one made by the sappers and miners some time since? Yes.
4. Have you received a report upon that survey? No.
5. Has not a report been made? I am not aware of any report having been made.
6. A rough plan has been made, has it not? The line has been laid down on a plan, and the sections have been laid down, but there has been no report received—at least I have received no report.
7. Neither verbally nor in writing? I have had conversations with Mr. Whitton and Sergeant Quodling about the line; I have talked the matter over with them, discussing the question as to the probable expense of the line—whether it would pay to make it, and whether the best line had been selected; in fact, discussing the question generally.
8. From the tenor of your conversations with Mr. Whitton and Sergeant Quodling, what is your opinion as to the proposed branch line from the Parramatta and Penrith line to Windsor, as to its expensive or inexpensive character? I believe an inexpensive line could be constructed.
9. *By Mr. White:* A single or a double line? Either. The country is favorable.
10. What would be the probable expense per mile for a single line? The total estimated cost is £108,000 for 13½ miles, or about £8,000 a mile, including an assumed sum for land.
11. *By Mr. Plunkett:* Do you find that the claims for land are generally extravagant or otherwise? As a rule they are high; many of them are very high.
12. Do you not think that in many instances these properties are benefited instead of being deteriorated? Under the former Act that benefit was allowed for in determining the amount of compensation to be paid; but it is not so under the new Act, as the land is to be paid for without any reference to any alteration in its value arising from the railway. The Committee are, I presume, aware that claims are not paid as made; the land taken is valued, and, if necessary, recourse is had to arbitration.
13. *By the Chairman:* In point of fact there has been no more work done upon the line leading from the proposed point of divergence on the Parramatta and Penrith line than had been accomplished last September? Nothing more has been done.
14. And the opinion you now give the Committee as to the inexpensive character and probable cost of the line is founded upon information you have obtained from Mr. Whitton and Sergeant Quodling? Yes; and any deviation from the present line will be in diminution of the estimated cost, and not in excess of it—not taking the land into consideration.
15. I believe the land through which this proposed line would run is not very valuable? I can give no opinion as to the value of the land.
16. Have trial surveys also been made to Windsor from South Creek or from Rope's Creek? I think not; but I know that a very large part of that country has been explored at different times.
17. At the time it was contemplated to run the Western line from Fairfield to Penrith it was intended to run a branch to Windsor diverging from Eastern Creek or South Creek? I am aware that a line was surveyed from Fairfield to Penrith; but if it had been adopted the whole western traffic would have had to pass over a longer mileage to reach Sydney, although the actual line to be constructed might have been a little shorter.
18. We have also been told that a line along either of these valleys would be over country liable to floods and rather soft? That is so.
19. But the proposed line from the Parramatta and Penrith line would be over a hard, firm, and sound country? Over a very good country.
20. As at present advised, you are inclined to think that will be the best line to Windsor? Yes, as at present advised; but the Committee are aware that if the line to Bathurst should be taken along the valley of the Grose it might affect the direction of the line to Windsor.
21. In speaking of the line diverging from the eighth milestone on the Parramatta and Penrith line to Windsor as the best, you speak of it presuming that it will be merely a branch to Windsor? Yes.
22. A more available line might be adopted—a better or more suitable line—if it be found that the line to Windsor is not to be a branch line, but a portion of the Great Western Trunk Railway? There might be—without speaking positively.

Capt. B. H.
Martindale,
R.E.

23 Dec., 1858.

Capt. B. H.
Martindale,
R.F.

23 Dec., 1858.

23. Will you inform the Committee what progress has been made in the survey of the valley of the Grose River since we last assembled? The sappers are now at work in the Grose Valley, but I have no very recent report of the progress made. The last I heard was, that they were cutting a path for themselves to work along. They will not leave the Grose now—weather permitting—till the survey is completed.*

24. When do you expect it to be completed? In three or four months perhaps; but it depends a great deal upon the weather, and the difficulties the parties may have to encounter. I cannot name any certain time.

25. When we last met we were led to believe that the work might be completed by the month of December? The rain prevented the sappers entering the valley till about a month or six weeks ago.

26. Do I understand that nothing has been done towards the survey of the valley of the Grose River beyond the clearing of a pathway? Nothing when last I heard.

27. When did you last hear? About a fortnight or three weeks ago. Mr. Barton is to proceed to the Grose on Saturday next, to inspect the parties at work.

28. Has the party been under his orders, or acting under the orders of a non-commissioned officer? Under Mr. Barton's general instructions, but under the immediate superintendence of non-commissioned officers.

29. *By Mr. Plunkett*: What has the party been doing? The last I heard of the parties was that they were cutting a pathway along the valley of the Grose, to bring necessaries along. It is a very rugged tract of country—everything has to be carried on men's backs.

30. I perceive by the evidence of Mr. Whitton and Mr. Barton that, knowing all these obstructions were to be met, they calculated with some certainty that about this time the survey of that line would be completed—has anything particular occurred, that was unforeseen, to obstruct the operations, since they were examined? The Sappers have been employed making the working surveys for the Western and Southern lines for some time past. Once or twice during that time I have inquired when the parties could resume work in the valley of the Grose, and have been informed that it was not yet fit for men to enter. It is a valley that becomes flooded with the rains, and cannot, therefore, be entered for some time after rain. Mr. Whitton probably anticipated getting the men earlier into the valley than was found practicable.

31. *By the Chairman*: Have you traversed the valley of the Grose yourself? I have not. I intended to have done so last week, but was prevented by other duties.

32. Have you visited the Kurryjong district? No; I intended to have gone there after visiting the Grose, but I was prevented.

33. We were informed by Mr. Barton that three railway lines had been surveyed from Bathurst to the Hartley country, either of which were available, and that from Hartley to the County of Cumberland probably two routes would be found available, one running from a point near Hartley to Penrith, and the other passing through a tunnel under Darling's Causeway, and opening out on the valley of the Grose, down that valley to Windsor? I believe the probable lines to Bathurst might at present be reduced to two, one running in the general direction of the main road, and *via* Darling's Causeway, Piper's Flats, and the Fish River, to Bathurst—the other by the valley of the Grose, through a tunnel under the Causeway, and then by Piper's Flats and the Fish River, to Bathurst.

34. That we were prepared to expect, from the nature of Mr. Barton's evidence. At the time he was examined he seemed to consider that the line by the present main road and the line by the Grose would be the only two available routes over the mountains to Hartley? That is the present opinion.

35. And from Hartley to Bathurst he thought there might be two? The Fish River line is considered the best.

36. Have you traversed the proposed line, running nearly parallel with the existing main road? I have been over the mountain road itself, and have ridden over part of the country traversed by the proposed line.

37. Do you think it a practicable line? Yes. There is a bad gradient up this side of the Blue Mountains, and a bad gradient on the other side. Those are the two main objections to that line.

38. From those objections the line by the Grose River would be free if a tunnel were carried through Darling's Causeway? It would.

39. To what objections would the Grose line be open? It is a question whether the character of the valley admits of the necessary curves for a railway, without the construction of an undue number of bridges, involving heavy expense.

40. Of what description would the works along the valley of the Grose be—would there be many bridges to make? I understand that the Grose is a very tortuous stream, running at the bottom of a ravine, and if it should prove necessary constantly to cross and recross the stream the expenditure would be large. I understand, too, that the waters rise very high in the Valley of the Grose in times of flood. The question between a line by the Grose and by the present main road will be, to a certain extent, a question of comparative expense.

41. *By Mr. White*: The Grose is the receptacle for the waters from a large amount of mountain country—in fact, a mountain torrent? It is.

42. *By Mr. Plunkett*: Will the survey that is now making set the question as to the expense of these respective lines at rest? It will; it is the last trial survey necessary to be made in order to decide the direction of the main line to Bathurst.

43. *By the Chairman*: Is there not a new boring machine now used for tunnels, the use of which might facilitate the making of the tunnel through Darling's Causeway? I have read of it, but I have never seen it at work.

44. It is used in Sardinia? Yes.

45.

* While revising this evidence, I have received a report that ten miles of track has been made, and about four miles of survey completed.

Capt. B. H.
Martindale,
R.E.

23 Dec., 1858.

45. Are you aware of the cost? I am not.
46. The tunnel through Darling's Causeway would be, I believe, a mile and a quarter in length? Thereabouts.
47. There is nothing impracticable in a tunnel of that length? Nothing.
48. It would be through sandstone rock, would it not? Yes.
49. The Blue Mountain country is all of sandstone formation? Yes.
50. Have you any chart or tracing of the valley of the Grose with you? Here is a small tracing showing the different lines that have been surveyed, and which it is proposed to survey. (*The witness produced the same. Vide separate Appendix B.*)
51. On this chart there are four lines marked across the mountains into the Hartley country? Yes.
52. Will you describe those lines, and what has been done with each of them? I would suggest to the Committee that it might save their time were I to hand in a memorandum giving general information with respect to these lines. (*The witness handed in the same. Vide Appendix A*)
53. It appears from the memorandum you have handed in that the proposed railway to Bathurst must be taken up the Grose valley, or along a line following as nearly as possible the present line of road over the mountains? To the Darling Causeway—Yes.
54. But you are not yet able to say which of those lines should be adopted? No.
55. At what time do you expect to be able to decide that point? As soon as the survey of the Grose is completed, and the information obtained worked out.
56. *By Mr. Plunkett*: Can you not give any idea of the time? I cannot. I am told it is a most impracticable country to work in.
57. Could you say six months? If I were to fix a time I might very probably be wrong; but the Committee may depend on this, no time will be lost in getting the work completed. The parties will not leave the valley now, if weather permits, until the survey is finished.
58. *By the Chairman*: In the early part of your evidence you said that, should the route by the Grose be adopted, the Windsor line might thus become the main line to the western interior, and that it might then be thought advisable to run the line to Windsor by a different route from that now deemed most advisable for a mere branch line? Possibly it might.
59. Why so—why would not the line you now propose for a branch line answer equally well as the trunk line? A shorter line, or a better line, might be found to connect the main line and the Grose valley. Questions would then arise as to how far such shorter or better line would be sufficient for Windsor, or how far it might be worth while to make a circuit for the convenience of Windsor, or to have a short branch to Windsor. It would be the Commissioner's duty to lay before the higher authorities information on these and similar questions, and the exact line to be followed would, I presume, be determined by the Legislature.
60. *By Mr. Plunkett*: What is the general principle acted upon in England and elsewhere with respect to trunk lines—is it to go in the nearest possible way, without deviations, to great towns, or to make bends? To go wherever there is a probability of making a railway pay.
61. *By the Chairman*: I imagine that in this instance the best plan would be to go round by Windsor? Possibly.
62. And for this reason, amongst others, that so soon as the line is made to Windsor you have your terminus in the midst of a populous district? That would of course be a consideration.
63. You have, I believe, visited the Windsor country? Yes.
64. You are aware that it is a very extensive farming district of a very fertile character? Yes.
65. In a petition presented by me in the early part of last Session the produce of the district is enumerated? I have seen the petition.
66. They describe their produce as consisting of "not less than 2,250 tons of hay, 1,125 tons of straw, 244,832 bushels, or about 6,120 tons of grain, 200 tons of potatoes, besides an incalculable quantity of poultry, pigs, fruit, dairy, and other produce;" and the witnesses examined by the Committee all considered the quantity of produce here stated as short of the actual quantity raised; but without going beyond these figures, at what do you estimate the probable revenue of a branch line of railway from Windsor to the Parramatta and Penrith line, at your present rates of carriage? Premising that the estimate I am about to give is only approximate, I estimate the traffic on that branch at £11,000 a year.
67. Taking as your data the quantity of produce named in the petition? Yes; and judging of the passenger traffic by the passenger traffic on the existing line.
68. What would be the working expenses of the branch line? The working expenses, reckoning them at £1,200 a mile, would be £15,600 a year for the branch itself.
69. Giving credit to the Windsor branch for the cost of conveying the Windsor produce and passengers to Sydney, what would be the revenue derived from it? The estimate I made for the Windsor branch, taking it in connection with the main line, was about £24,500 a year; and the working expenses £17,800, including the additional cost of working the main line. That would leave a net income of £6,700 a year, giving 5·7 per cent interest on a capital of £108,000.
70. It would pay that rate of interest, even supposing neither the produce of the district nor the passenger traffic increase? The estimate is calculated on the statements contained in the petition from Windsor, as far as the goods traffic is concerned; and as regards passengers, it is based on the existing passenger traffic along the present line, and must of course only be taken for what it is worth.
71. Any excess of produce raised in the Windsor district and conveyed by railway over that now raised and conveyed by the road would be an additional source of revenue to the line? Yes. The Committee would perhaps wish that the actual estimate I have made should be handed in, so that those gentlemen who have local knowledge may judge whether it is a fair estimate or not. (*The witness handed in the same. Vide Appendix B.*)

Capt B. H. Martindale, F.R.S.
29 Dec., 1858.

72. I think we might very reasonably anticipate a considerable increase in the goods traffic and in the passenger traffic also? I have taken the passenger traffic tolerably high. The goods traffic I have no doubt would increase. There is this to be said in favor of a branch to Windsor, that at present the Windsor traffic does not travel by railway; it is not worth the while of the carriers to unload at Parramatta; but there is no question that if there was a railway to Windsor the traffic would all be conveyed by railway.

73. Then, in a financial point of view, you think the formation of this line would be beneficial to the existing line? Certainly. If I were the chairman of a company owning the Sydney and Parramatta line I should have no hesitation in recommending the company to make the Windsor branch; but I should not recommend, with the present traffic, a separate company to make the branch itself.

74. You think the proprietors (either the Government or a company) of the existing line would be amply repaid for the cost of constructing the branch line? Leaving aside the political question of the Government making branch lines at all, I think it would pay the public to make a branch line to Windsor; if the Main Western line should not pass sufficiently near it to secure the traffic.

APPENDIX A.

The whole of the country between Bathurst and the Nepean, or Hawkesbury, has been explored—to the north as far as the Turon River, Capertee, the Wolgan, and the Colo Rivers; and to the south as far as Lowe's Hill, the sources of Antonio's Creek, and Lowther Park (on the main dividing range,) the Cox and the Warragamba Rivers; and also from the confluence of the Wollondilly with the Cox, *via* the Wollondilly, or Burragorang, and the Nattai Rivers, to Picton.

Two lines have been surveyed from Bathurst to Piper's Flats near Walerawang,—one, *via* the Fish River and Solitary Creek, to a common point (A) on Piper's Flats; the other by Green Swamp, Redbank, the range dividing the Winburndale Creek and the Turon River waters from the Fish River, through Gowe's Gap, in the main range, to the same point in Piper's Flats.

From Piper's Flats a line has also been surveyed, *via* the head of the Cox River, Kangaroo Creek, the range dividing the Colo River waters from the Cox and Middle River waters, to Dargan's Creek, near its intersection with Bell's Track.

Also, from Dargan's Creek, *via* the Darling's Causeway, to Mount Victoria, thence, *via* the range dividing the waters of the Grose River from the Cox, to Penrith.

From the common point (A) in Piper's Flats, a line has been surveyed, *via* the Middle River, Coerwal, Lithgow's Valley, to Dargan's Creek, to join the Darling's Causeway line previously described.

From near Coerwal, passing through the Clarence Hill Range, and by Mount Clarence, following up the valley of the River Lett to the Darling's Causeway, and through the Darling's Causeway, into the head of the Grose River.

From the Fish River line, at a point near where the Antonio's Creek joins Solitary Creek, a line has been surveyed, *via* Antonio's Creek, crossing the main dividing range, where it is intersected by the "Middle," or Plumley's Line of Road, and following the valley of the Cox River down to its junction with the River Lett, and the valley of the Lett up to join the line surveyed from Coerwal into the Grose (already described) near Collet's old Public House.

Bell's Line has been surveyed from Bowenfels to Richmond, and the Western Road, from Penrith to Bathurst.

B. H. M.

APPENDIX B.

Estimate of probable Receipts and Expenditure on the Windsor Branch Line.

RECEIPTS.

Passenger Traffic:—

	Passengers.	Miles.	Rate $\frac{1}{2}$ mile.	Receipts $\frac{1}{2}$ Month.	Receipts $\frac{1}{2}$ annum.
1st Class ...	230	$\times 13$	$\times 3\frac{1}{2}$ d.	= 43 12 1	
2nd Class ...	444	$\times 13$	$\times 3$ d.	= 72 8 0	
3rd Class ...	2,720	$\times 13$	$\times 2$ d.	= 294 13 4	

£410 8 5 $\times 12$ = 4,925 1 0

Horses, Carriages, and Dogs (say) 400 0 0

Goods:—

	Tons.	Miles.	Rate $\frac{1}{2}$ mile.	Receipts $\frac{1}{2}$ annum.
1st Class ...	3,375	$\times 13$	$\times 3$ d.	= 548 8 9
2nd Class ...	9,320	$\times 13$	$\times 6$ d.	= 2,090 0 0
Poultry, Pigs, Fruit, &c. (say) ...				1,000 0 0

4,577 8 9 = 4,577 8 9

Miscellaneous (say) 1,000 0 0

10,902 9 9

Say ... £11,000 0 0

EXPENDITURE.

Working expenses, 13 miles; at £1,200 per annum ... 15,600 0 0

Interest on £108,000, at 5 per cent. ... 5,400 0 0

21,000 0 0

Annual deficit £10,000 0 0

But, taken in connection with the Main Line, the result would be very different:—

Traffic on Branch, as above	Receipts p annum.	11,000 0 0
Additional Passenger Traffic, Main Line:—		
Passengers. Miles. Rate p Mile. Receipts p Month.		
1st Class ... 115 \times 22 \times 3 $\frac{1}{2}$ d. =		36 17 11
2nd Class ... 222 \times 22 \times 3d. =		61 1 0
3rd Class ... 1,360 \times 22 \times 2d. =		249 6 8
		347 5 7 \times 12 = 4,167 7 0
Horses, Carriages, and Dogs (say)		350 0 0
Goods, as above		6,054 2 6
Poultry, Pigs, Fruit, &c. (say)		1,500 0 0
Miscellaneous (say)		1,500 0 0
		24,571 9 6
	Say ...	£24,500 0 0

Capt. E. H. Martindale, R.E.
23 Dec., 1858.

EXPENDITURE.

Working Expenses, as above	15,600 0 0
Additional on Main Line	2,200 0 0
Interest, as above	5,400 0 0
	23,200 0 0
Estimated Receipts	24,500 0 0
	Balance, Cr. £1,300 0 0

B. H. M.

N.B.—The amount of grain annually transported from Windsor to Sydney is stated to be 244,832 bushels, or 6,120 tons, giving 40 bushels to the ton. Taking the distance by railway at 35 miles, and the charge at 6d. per ton per mile, the railway charge per bushel would be 5 $\frac{1}{2}$ d.

William Pitt Wilshire, Esq., called in and examined:—

1. *By the Chairman*: You reside in Sydney? Yes.
2. Are you a surveyor by profession? No, not by profession.
3. An amateur? I do not even profess to be an amateur. I have read a good deal and inquired about such matters.
4. You are acquainted with the Kurryjong district? Yes.
5. You desire to submit to the Committee a plan for a proposed line of railway through the Kurryjong district? I marked two lines on this plan, but that near Mount Tabrag I am satisfied is impracticable, and I have wholly abandoned it. Here is a plan of the lines which, omitting the above-named, I think would be worth consideration. (*The witness produced the plan referred to.*)
6. The line which you have marked on the chart submitted to the Committee is not a line actually surveyed by you, but one that you conceive might be found to be practicable—is that the case? I have not surveyed it, but it is a line I am thoroughly acquainted with. I had stock running there for many years, but not at present, and I am thoroughly acquainted with the country. All the ranges are low on this side of Weeny Creek. There is not a mountain on the whole line until Tomah is reached, which is about 6 miles westerly beyond my plan.
7. I perceive that this proposed line crosses the Hawkesbury to the north of Windsor, runs through the Wilberforce Common, crosses the Currency and Billong Creeks, then goes on across Weeny Creek to a place called Bilpin, about 7 miles from Mount Tomah? Yes.
8. What is the other chart you have? The other is a mere hypothetical section, not from any survey. (*The witness produced the same.*)
9. *By Mr. Dalley*: Drawn from your knowledge of the country more than anything else? Not exactly. I took the height of Mount Tabrag from a letter published in a newspaper, but I have since been informed that the elevation of Bilpin shewn here is 1,700 feet instead of 1,500 feet. However, a difference of 200 feet in that position would not affect the practicability of the line, even if my information on that point be found correct.
10. *By the Chairman*: The plan and section you submit to the Committee are both in a certain degree hypothetical—not tested by actual surveys? Not tested by actual surveys with a view to ascertain their practicability for a railway.
11. You speak of your intimacy with the Kurryjong district—the climate, I believe, is most salubrious there? It is a very fine climate.
12. And, in the event of there being ready communication with Sydney, it is likely to become a place of residence with those desiring a country home? Yes.
13. It is well adapted for such a purpose? Yes; it is well adapted for sanatoriums for invalids.
14. The scenery is picturesque, as well as the climate salubrious? Yes, very much so.
15. Have you lived at the Kurryjong? I lived there for twelve years.
16. Do you hold property there? Only a life interest in a small property.
17. In a memorandum you have given to me you speak of large quantities of timber, especially blue gum and sassafras? Yes; in the country immediately above the Kurryjong.
18. Is that timber growing in localities from which it could be conveyed to the railway? It cannot be conveyed unless the railway goes in the direction I say, because there is a very steep mountain; which is the great obstacle now. They cannot bring the timber, except in small quantities; the road is too bad.

W.P. Wilshire Esq.
23 Dec., 1858.

- W.P. Wilshire, Esq.
23 Dec., 1858.
19. Could it be taken to a railway running up the Grose valley? No; it would be utterly impossible, I believe.
20. There is a range between the Kurryjong and the valley of the Grose, is there, or between it and the valleys in which you have seen this timber growing? I see there are ranges indicated by the chart, but I very much doubt whether a road could be made fit for carrying timber on those ridges. I know from personal observation, and from general report, that the country is very much broken about the Grose valley—the water courses are very tortuous, and it is intersected with ravines, rocks, and sandy tracts, that are very obstructive for railways.
21. Do none of the valleys in which this timber grows fall into the Grose valley? It not only grows in the valleys, but in the highest elevations. Some of the valleys fall into the Grose, others do not; there is a fall on the other side where there are large quantities of timber.
22. Could not this timber be brought to Richmond? They do bring it in small quantities. It now supplies the districts of Richmond and Windsor only.
23. In the event of there being a railway from Richmond to Sydney, would it not pay to cart it to Richmond and send it by train to Sydney? The cartage is a very serious thing; they have to pay five shillings a hundred to cart it to Richmond or Windsor, and, when you have to pay the railway afterwards, I doubt whether it would pay.
24. Is there much good land in the Kurryjong? The Kurryjong itself is very fine land indeed; but there is a large quantity of land not located—six or eight thousand acres have been granted above the mountain but abandoned, owing to the badness of the mountain road; only one or two old men are left in charge. I have come to the conclusion that there is a large quantity of valuable land that would be available if roads be formed and bridges constructed.
25. The Kurryjong, I believe, has rather gone back than improved of late—a number of farms have been allowed to become fallow? In some parts, but they go on clearing and improving other parts, so as to avail themselves of new land.
26. You think the Kurryjong would support a very large population had they the means of conveying produce cheaply to the Sydney market? No doubt about it. It is very fine land.

ADDENDUM.

1. I am acquainted with the laws of motion as applied to railway travelling, and the principles on which that motion is regulated by curves and gradients. I am aware that sharp curves are frequently unavoidable in striking through mountainous districts, and that the motion must be checked in such localities—only a walking pace being admissible in some cases. Any mountain ranges may be penetrated by railways; but the cost must be considered. In all such configurations of country the watercourses are tortuous, and to follow such courses in the construction of railway lines must necessarily involve great outlay of money, by reason of deep side cuttings, tunnelling, and throwing viaducts across the tributaries, and they frequently have their sources in a *cul de sac*. This especially applies to the Grose River. It will, therefore, be found economical to abandon such watercourses, and resort to the spurs branching through, and in connexion with, the mountain systems. These spurs are frequently many miles in length, with only slight undulations along their summits. In the line I have suggested, I have availed myself of about 20 miles along one of these spurs projecting from Mount Tomah to Weeny Creek; and the same principle may be pursued to reach the plateau of the western country lying beyond that point.

2. Cheap wood bridges, such as those of Germany, possess advantages over iron in a climate where contraction and expansion rapidly alternate.

3. Unless the plan of operations herein indicated be followed out, the construction of railways will be limited, if not wholly impossible, from the great cost, and the advantages derivable therefrom in great measure lost to the Colony.

W. P. WILSHIRE.

SEPARATE APPENDIX.

A.

Windsor, July 17th, 1858.

Dear Sir,

In reply to your letter of date the 15th, we beg to furnish you with such statistical information as we can, of a reliable nature, also to enclose our Police Office Return of agricultural proceeds for the years 1856 and 1857. In comparing the returns of the two years you will perceive a great difference, explicable by the visitation of a flood; you may, therefore, base your calculations upon the proceeds of the former year as the average yield. So that the Police Return will be—of grain about 336,000, instead of 244,833, as stated in the petition to His Excellency alluded to by you. Upon re-perusing the petition you will find the other statements to be such as we verily believe to be true, so that our immediate position is one (without reference to the impetus which a rail will give, and the new character of interests arising therefrom,) which should, in justice, give us no ordinary claim to the best consideration of the House.

The country between Windsor and Parramatta presents no engineering difficulties, and is well supplied with excellent timber for the purpose.

We beg, dear Sir, to subscribe ourselves,

Yours faithfully,
THOS. TEBBUTT.
JOHN DAWSON.
HENRY DAY.

To

Thomas Whistler Smith, Esq., M. P.

No. 1.
RETURN of Agriculture in the Police District of Windsor, for the Year ending 31 March, 1857.

SKETCH referred to in CAPTAIN MARTINDALE'S Evidence.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

TELEGRAPHIC COMMUNICATION.

(DESPATCHES RELATIVE TO—BETWEEN EUROPE AND AUSTRALIA.)

Ordered by the Legislative Assembly to be Printed, 30 March, 1859.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 22 March, 1859, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ Copies of any Despatches which he may have received from
 “ Her Majesty’s Government on the subject of Electric
 “ Communication between Australia and Europe, and of any
 “ answers returned to the same; also, of any correspondence
 “ on the same subject between the Government of this
 “ Colony and the Governments of the other Australian
 “ Colonies.”

Mr. Hay.)

TELEGRAPHIC COMMUNICATION.

No. 1.

LORD STANLEY to GOVERNOR SIR W. T. DENISON, K.C.B.

(Circular.)

Downing-street,
29 May, 1858.

SIR,

I transmit, for your information, the copy of a letter from Mr. Lionel Gisborne, relative to a project which he has in view for effecting a telegraphic communication, by way of India, with Australia. I also annex copies of a correspondence between this department and the India Board on the subject; and I shall be glad to be favoured with any remarks which may occur to you on a question which, it is almost superfluous to add, promises to be of the utmost importance to the interests of the Colony under your Government.

I have, &c.,
STANLEY.

GOVERNOR

SIR W. T. DENISON, K.C.B.,
&c., &c., &c.,
New South Wales.

[Enclosure 1 in No. 1.]

Downing-street,
8 April, 1858.

Sir,

I am directed by Lord Stanley to transmit to you, for the consideration of the Commissioners for the affairs of India, the enclosed copy of a letter from Mr. L. Gisborne on the question of a telegraphic communication, by way of India, with Australia. Mr. Gisborne's plan is, 1st., to endeavour to obtain from the Indian Government a contract for the line from Tenasserim (where it could join the Indian telegraphic system) to Penang and Singapore.

2nd. From thence, with the aid of a subsidy of which he states that he has already obtained the promise from the Dutch Government, to carry it (without aid from England or from any Colony) to the north coast of Australia.

3rd. To induce the Governments of the various Australian Colonies to carry it on down the east coast to Moreton Bay, and thence to Melbourne.

Each part of this plan is dependent for success on the success of the rest.

I am to request that you will express Lord Stanley's opinion that the execution of this project, if it can be successfully carried into effect, would confer great benefits on Australia and the Empire, and that on this ground his Lordship begs to recommend it to the consideration of the Commissioners for the affairs of India, with whom, however, it must rest to decide on its feasibility and also its expediency, so far as regards India. Should they find sufficient grounds to authorise the execution of the Indian part of the work, Lord Stanley will be prepared to recommend the plan to the Australian Governments, but without the concession of exclusive privileges or the expectation of assistance from Imperial Funds, neither of which objects, it is to be observed, are asked for in the proposal in the shape in which it is at present submitted.

I am, &c.,
H. MERIVALE.

Sir G. Clerk, K.C.B.

[Sub-Enclosure.]

6 Duke-street, Adelphi, (W. C.),
20 March 1858.

My Lord,

On the 12th of October last I addressed a communication to Her Majesty's Colonial Minister upon the question of telegraphic communication with Australia.

Your Lordship favoured me with an interview upon this matter, during the course of this morning.

The two points I am desirous of calling your Lordship's attention to are:—

1. That the Indian Government should give an assurance that they will execute a telegraphic line between their possessions in the Continent of India and Singapore.

2. That when such an assurance is given, your Lordship will communicate to the Australian Government the project I have had the honor to submit, and will place me in a position to negotiate the execution of it through the Australian Government.

I have, &c.,
LIONEL GISBORNE.

The Right Honorable
Lord Stanley.

[Enclosure

[Enclosure 2 in No. 1.]

India Board,
24 May, 1858.

Sir,

The Commissioners for the affairs of India have communicated with the Court of Directors of the East India Company on the subject of your letter of the 8th ultimo, recommending, by order of the Secretary of State for the Colonies, to the consideration of this Board a plan proposed by Mr. Lionel Gisborne for a telegraphic line to Australia—one portion of the plan being that the Government of India shall, at their own cost, carry the line from the Continent of India to Singapore; and I am instructed to transmit to you, for the information of Lord Stanley, a copy of a letter, dated the 18th instant, which the Board have received from the India House, and a copy of a Despatch on the subject, which will be sent to the Governor General of India in Council by the mail of the 25th.

I am, &c.,

GEORGE CLERK.

Herman Merivale, Esq.,
&c., &c., &c.

[Sub-Enclosure.]

East India House,
18 May, 1858.

Sir,

The Court of Directors of the East India Company have had under consideration Sir George Clerk's letter of the 13th ultimo, with its enclosed letter from the Colonial Office, and its accompaniment regarding a scheme proposed by Mr. Lionel Gisborne for effecting telegraphic communication, by way of India, with Australia—one of the proposals connected with the project being, that the Indian Government should give an assurance that they will execute a telegraph line between their possessions on the Continent of India and Singapore.

2. In considering this important proposition, the Court have, with the Board, assumed that the main object of the undertaking is to connect Australia with England by means of the telegraph. The first obvious step towards the attainment of that object is the completion of telegraphic communication between this country and India, and it appears to the Court that it would be premature to adopt measures in regard to a line beyond India, while the question as to the manner in which the European line of telegraph is to be extended to India is still undecided.

3. Having made these preliminary observations, the Court desire me to state, that it would afford them much pleasure to promote the project now brought to their notice in such a manner as should be consistent with the interests of India. The Court would observe, however, that the section which it is proposed should be executed by the Government of India would be an extensive and difficult undertaking, and they are unable to pass a judgment upon its feasibility or cost, without a previous survey of the coast, and without a report by the local authorities upon the question. They accordingly propose at once to invite the consideration of the Government of India to the subject.

I have, &c.,

J. D. DICKINSON.

The Secretary
of the Indian Board.

COPY of a letter from the Court of Directors of the East India Company to the Governor General of India in Council.

May, 1858.

1. We forward in the packet copy of a letter, and of its enclosures, which has been received from the Board of Commissioners for the affairs of India, and of our reply thereto, regarding a scheme proposed by Mr. Lionel Gisborne for effecting telegraphic communication, by way of India, with Australia.

2. You will observe that one of the proposals is that the Government of India should undertake the construction of a line from the point on the eastern coast of the Bay of Bengal, where the Indian system terminates, to Singapore. We desire, therefore, that you will take such steps as may enable you to form a judgment upon the cost and feasibility of this section, and report your opinion to us as soon as practicable.

No. 2.

THE SECRETARY OF STATE FOR THE COLONIES to GOVERNOR SIR W. DENISON.
(Circular.)

Downing-street,
27 July, 1858.

Sir,

With reference to my predecessor's circular Despatch of the 29th May, forwarding for any remarks which might occur to you, copies of communications which had passed between this Office and the Commissioners for the affairs of India, relative to a plan proposed by Mr. Lionel Gisborne for laying down a telegraphic line of communication, by way of India, between this country and Australia, I transmit herewith, for your information, copies of a further correspondence which has passed upon the subject.

Mr. Gisborne,
8 June, 1858.
C. O. to India
Board, 23 June,
1858.
India Board,
17 July, 1858.
C. O. to Mr.
Gisborne.

I have, &c.,

E. B. LYTTON.

GOVERNOR SIR WILLIAM DENISON, K.C.B.,
&c., &c., &c.

[Enclosure

[Enclosure 1 in No. 2.]

Downing-street,
22 June, 1858.

Sir,

8 June, 1858.

With reference to your letter of the 24th ultimo, I am directed by Secretary Sir Edward Bulwer Lytton to transmit to you, for the consideration of the Commissioners for the affairs of India, the enclosed copy of a letter from Mr. Lionel Gisborne, submitting some remarks on the subject of the conclusion signified on the subject of that part of his proposed line of telegraphic communication from England to Australia, which lies between the Continent of India and Singapore.

Sir George Clerk.

I am, &c.,

H. MERIVALE.

[Sub-Enclosure.]

6, Duke-street, Adelphi,
8 June, 1858.

My Lord,

I have the honor to acknowledge your Lordship's letter of the 3rd instant, enclosing correspondence with the Board of Control and H. E. I. Co., upon the subject of telegraphic extension to Australia.

Mr. Dickinson in his letter of the 18th of May, states—after acknowledging the importance of the project and the desire of the H. E. I. Co. to see it carried out—"The Court would observe, however, that the section which it is proposed should be executed by the Government of India would be an extensive and difficult undertaking, and they are unable to pass a judgment upon its feasibility or cost without a previous survey of the coast, and without a report by the local authorities upon the question. They accordingly propose at once to invite the consideration of the Government of India to the subject."

I would observe that the proposed communication between the continent of India and Singapore is not difficult, and that there exists all the information upon the subject necessary to decide the feasibility and cost. The chart sent herewith shows that detailed soundings, &c., exist the whole way between Rangoon and Singapore, and there exists at the Hydrographical Office most detailed charts of the places where it is proposed to land the cable. My estimate for the whole line between Tenasserim and Singapore is under £150,000, and I am prepared to find a responsible contractor to execute it for that sum, *at his own risk*, as far as laying the cable and handing it over to the H. E. I. Co. in an efficient working state.

I am unaware of any length of cable laid in a sea where, judging from the charts and the reports of mariners, such remarkable facilities exist as in the reach between Tenasserim and Singapore.

I had the honor of informing Lord Stanley at the interview he favoured me with, that the concession granted by the Netherland Government was limited in time for carrying out its provisions, and that I am under engagement to that Government to send without delay to Australia to negotiate the extension of the telegraph within that Colony.

A reference of the Singapore section to the Governor General in India will delay the question for many months, and, I respectfully submit, without any practical object being attained towards prosecuting the Australian project.

The Dutch Government, with the same charts and information before them as the H. E. I. Co. have access to, admitted the feasibility and importance of the *whole* question, and gave the necessary facilities for carrying out their link. It appears that your Lordship's department are prepared to recommend the same course to the Australian Colonies; all I ask is that the H. E. I. Co. shall, when the whole project is ripe, undertake to carry out the portion which specially comes under their control.

Should the Court consider the Singapore telegraph of such importance *per se*, as to warrant them to have it carried out at *once*, I am prepared to undertake it through responsible contractors; but my proposition to Lord Stanley was that the Court should decide upon doing their section when the remainder of the Australian line was finally in hand, his Lordship remarking most truly in his letter of the 8th of April, 1858, that "each part of this plan is dependent for success on the success of the rest."

What I am desirous of obtaining is an assurance from Her Majesty's Government, or the Honorable Court, to the Australian Authorities that the Singapore section shall not remain unmade as a link in the Australian and China Telegraph.

I have, &c.,

The Right Honorable
The Earl of Carnarvon.

LIONEL GISBORNE.

Downing-street,
July, 1858.

Sir,

17 July, 1858.

With reference to my letter of the 22nd ultimo, in which you were informed that a copy of your further letter of the 8th June, relative to the execution of that part of your proposed line of telegraphic communication from England to Australia which lies between the Continent of India and Singapore, had been referred for the consideration of the Commissioners for the affairs of India, I am directed by Secretary Sir E. Bulwer Lytton to transmit, for your information, a copy of the answer which has been returned on the subject by that Board.

I am, &c.,

Lionel Gisborne, Esq.

CARNARVON.

[Enclosure

TELEGRAPHIC COMMUNICATION.

[Enclosure 2 in No. 2.]

India Board,
17 July, 1858.

Sir,

With reference to the communication which you made to this Board on the 22nd ultimo, I am desired by the Commissioners for the affairs of India to transmit, for the information of the Secretary of State for the Colonies, a copy of a letter, dated the 14th instant, which has been received from the Court of Directors of the East India Company respecting the plan of Mr. Lionel Gisborne for a telegraphic line between England and Australia, by way of Rangoon and Singapore.

I am, &c.,

GEORGE CLERK.

H. Merivale, Esq.

[Sub-Enclosure.]

East India House,
14 July, 1858.

Sir,

I have laid before the Court of Directors of the East India Company Sir George Clerk's letter of the 26th ultimo, transmitting copy of a letter which has been addressed by Mr. Lionel Gisborne to the Colonial Office, in consequence of that department having forwarded to him a copy of my letter of the 18th May, regarding his scheme for telegraphic communication with Australia by way of India.

2. The Court were given to understand by the enclosures to Sir George Clerk's letter of the 13th April, that the main object of Mr. Gisborne's scheme was to establish telegraphic communication between Australia and this country, and that a part of his plan was to "obtain from the Indian Government a contract for a line from Tenasserim to Penang and Singapore."

3. The Court desire me to state that, notwithstanding Mr. Gisborne's statement as to the easy nature of that part of the undertaking, they do not feel in a position to enter into arrangements for the execution of a work of this description without a previous communication with the Government of India, with the view of obtaining the report of their Superintendent of Electric Telegraphs, or of some competent officer upon the subject, and it did not appear to them that the time employed in obtaining a reply to that reference could delay the completion of a work, which is to form the continuation of one to India, for the construction of which arrangements have not yet been made.

4. As, however, it appears from Mr. Gisborne's letter now under notice that the concession granted to him by the Netherlands Government is limited in time, and is conditional upon an assurance that the link between Rangoon and Singapore will not be left undone, the Court cannot hesitate to express their opinion, that when measures have been matured for making such remaining portions of the line as may be required to complete the telegraphic communication between this country and Australia, it would be the duty of the Indian Government to take steps for the simultaneous construction of that part of the line which lies within its jurisdiction.

I have, &c.,

J. D. DICKINSON.

The Secretary, India Board.

No. 3.

SIR W. DENISON to THE SECRETARY OF STATE FOR THE COLONIES.

(No. 138.)

Government House,
Sydney, 28 September, 1858.

SIR,

I have the honor to acknowledge the receipt of a Circular Despatch, dated 29 May last, from your predecessor, transmitting a letter from Mr. Lionel Gisborne, relative to the establishment of telegraphic communication, *via* India, between England and Australia, together with copies of other correspondence on the same subject.

I brought the subject under the consideration of my Executive Council, and I forward herewith the Minutes of the Proceedings with relation to it; by which it will be seen that the Council, while fully appreciating the advantages to be derived from the establishment of a line of telegraph between England, India, and Australia, are not at present prepared to express an opinion upon the scheme submitted by Mr. Gisborne.

I have, &c.,

W. DENISON.

THE RIGHT HONORABLE

SIR E. BULWER LYTTON, BART.

TELEGRAPHIC COMMUNICATION.

[Enclosure in No. 3.]

PROCEEDINGS of the Executive Council with respect to Telegraphic Communication with Australia, via India.

Extract from Minute No. 58-35, dated 30th August, 1858.

Present:—

HIS EXCELLENCY THE GOVERNOR GENERAL.
 THE HONORABLE THE VICE-PRESIDENT OF THE COUNCIL.
 THE HONORABLE THE COLONIAL TREASURER.
 THE HONORABLE THE SECRETARY FOR LANDS AND PUBLIC WORKS.

HIS EXCELLENCY the Governor General lays before the Council a Despatch from the Right Honorable the Secretary of State for the Colonies, forwarding the copy of a letter from Mr. Lionel Gisborne, relative to a project which he has in view for effecting a telegraphic communication with Australia, via India, and also copies of a correspondence which has passed between the Colonial Office and the India Board on the subject.

2. In this Despatch Lord Stanley expresses a wish to be favored with the views of His Excellency the Governor General upon Mr. Gisborne's project, which is stated to be as follows:—

- 1st. To obtain from the Indian Government a contract for the line from Tenasserim—(where it could join the Indian telegraphic system)—to Penang and Singapore.
 - 2nd. From thence, with the aid of a subsidy, of which it is stated that a promise has been already obtained from the Dutch Government to carry it, (without aid from England or from any Colony), to the north coast of Australia; and,
 - 3rd. To induce the Australian Colonies to carry it on down the east coast to Moreton Bay, and thence to Melbourne.
3. The Council cannot fail to perceive the great advantages which would accrue to this, and the Australian Colonies generally, from the establishment of such a communication as that proposed by Mr. Gisborne; but, until more fully informed as to the details of his scheme—the success of which appears to be dependent on a good many contingencies—they are not in a position to express any opinion as to its feasibility, nor are they prepared to pledge the Colony to co-operate with him in the undertaking. If, however, it be again submitted to them in a more matured state, it shall have their most careful consideration.

A. ORPEN MORIARTY,
 Clerk of the Council.

No. 4.

SIR W. DENISON to THE SECRETARY OF STATE FOR THE COLONIES.

(No. 157.)

Government House,
 Sydney, 27 October, 1858.

SIR,

I have the honor to acknowledge the receipt of your Circular Despatch, dated 27th July, enclosing copies of further correspondence between the Commissioners for the affairs of India and the Colonial Office, on the subject of the plan proposed by Mr. Lionel Gisborne for laying down a telegraphic line of communication between England and Australia, by way of India.

From this it would appear that the Indian Government is prepared to take steps for the construction of that part of the line which lies within its jurisdiction, when measures have been matured for making the remainder.

It will now be for Mr. Gisborne to develop his plan, and to enable the Government to submit his schemes to the Legislatures of the different Australian Colonies.

A line of electric telegraph will be, in the course of a few weeks, completed between Sydney, Melbourne, and Adelaide. Preparations have been made for extending this across Bass' Strait to Hobart Town, in Tasmania; so that any line carried down either the east or west coast to Sydney, or to Adelaide, will communicate with all parts of these Colonies.

Until, however, Mr. Gisborne submits the details of his scheme, it is, of course, impossible that the Governments of the Australian Colonies can express any opinion upon it.

I have, &c.,

W. DENISON.

THE RIGHT HONORABLE

SIR E. BULWER-LYTTON, BART.

1858-9.

Legislative Assembly.
NEW SOUTH WALES.

TELEGRAPHIC COMMUNICATION.

(LETTER RELATIVE TO ESTABLISHMENT OF BETWEEN ENGLAND AND AUSTRALIA.)

Ordered by the Legislative Assembly to be Printed, 30 March, 1859.

C. PEEL, ESQ., to THE COLONIAL SECRETARY.

*Red Sea and India Telegraph Company, (Limited),
62, Moorgate-street, E. C.,
London, 15 January, 1859.*

SIR,

I am instructed by the Directors of the Red Sea and India Telegraph Company, (Limited), to submit for your information the following statement of the steps which have been taken to promote the establishment of telegraphic communication between England and the Australian Colonies, and at the same time to solicit the assistance of your Government in the promotion of that most important work.

2. This Company was originally formed nearly two years ago, for the purpose of constructing a telegraph, in the first instance, to India, and eventually to Australia and China; and circulars to this effect were forwarded at the time to the principal firms in Sydney and Melbourne.

3. The first portion of this comprehensive scheme is now in active progress, Her Majesty's Government having granted an unconditional guarantee of $4\frac{1}{2}$ per cent. for 50 years on the capital required to complete the line from Alexandria to Kurrachee, in Seinde, where it joins the Indian telegraphic system. The cable is in course of manufacture, and will, it is hoped, be laid, and in full operation, by the end of the present year.

4. Mindful of the ulterior object, which they have always had in view, the Directors had no sooner secured the co-operation of Her Majesty's Government in the Indian line, than they submitted to the Treasury a proposition for the extension of the telegraph system of the Indian Government from Singapore to Australia and China.

5. At the same time they have ventured, solely upon public grounds, to urge upon Her Majesty's Government the expediency of keeping the whole communication between this country and the Colonies in English hands, by the establishment of a direct line from Falmouth to Alexandria, the advantages of which over the course at present adopted are too obvious to require further comment.

6. The Directors are most anxious to see this principle adopted and carried into effect, either by themselves or by some other body enjoying the confidence of the Imperial and Colonial Governments, as they feel convinced that it is only by a cordial co-operation with these authorities that the whole system of telegraphic communication with the Eastern Hemisphere can be placed upon a satisfactory basis.

7. They are aware that numerous schemes for a telegraph to Australia have been propounded, both by public companies and by private individuals, whose independent action, so far from promoting the object in view, has considerably complicated the question, and thereby retarded its final settlement.

8. They have themselves abstained from making any appeal to the public on the subject, and the object of this communication is to place your Government in possession of the present state of the telegraph question as regards this company, with a view to preventing the possible adoption of any incomplete scheme before the final decision of the Home Government is made known.

9. I am further instructed to solicit the favor of your communicating to the Directors the general views of your Government upon this subject; and informing them at the same time whether—in the event of this most important work being entrusted to the Red Sea and India Telegraph Company—it would be willing to assist the undertaking, either by granting a guarantee upon the capital required, or in any other manner which may be considered most conducive to the interests of the Colony.

10. A copy of this communication has been transmitted to the First Lord of the Treasury, the Secretary of State for the Colonies, and the Secretary of State for India.

I have, &c.,

CH. PEEL,

Secretary.

THE HONORABLE

THE SECRETARY TO THE GOVERNMENT
OF NEW SOUTH WALES,
Sydney.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

Legislative Assembly.

NEW SOUTH WALES.

ROADS AND BRIDGES OF THE COLONY.
(RETURNS RELATIVE TO CONSTRUCTION AND REPAIRS OF.)

Ordered by the Legislative Assembly to be Printed, 19 January, 1859.

RETURN to an Order made by the Honorable the Legislative Assembly of New South Wales, dated 1 October, 1858, That there be laid upon the Table of this House,—

Returns shewing :—

- “ (1.) All sums of money appropriated for the construction or repairs of Roads and Bridges, in the several Districts of the Colony, from the 1st July, 1856, to the 30th June, 1858.
- “ (2.) The names of the different Wardens, Road Trusts, or other persons entrusted with the expenditure of the said several sums of money; and the names of the different districts and places in each on which such moneys have been expended.
- “ (3.) The balance of any moneys unappropriated still in the hands of the Government and not applied to such purposes.”

(Mr. Gordon.)

4	9	{ " Main Western Road, via Canterbury and Saltpan Creek, to George's River }	90		
5	19	" St. Leonard's to Pitt Water	133		
4	2	" Manly Cove to Pitt Water Road. (Northerly)	20		
4	2	" Manly Cove to Pitt Water Road, at Balgowlah	20		
4	15	" St. Leonard's to Pennant Hills... ..	150		
4	4	" Onion's Point to road from Parramatta to Bedlam Ferry	40		
			901	3,600 901	4,501

* NOTES:—

The Classification of Roads is not made alone with reference to their relative importance, but has been influenced by the extent of repair required and the amount of money recently expended upon them.

Where the Road Tolls pass to the Consolidated Revenue, Parliament will be asked to vote the respective amounts for the repair of such Roads.

ROADS OF NEW SOUTH WALES.

1858-9.

Legislative Assembly,

NEW SOUTH WALES.

MAIN NORTHERN ROAD.

(ESTIMATE PROPOSED FOR CERTAIN BRIDGES.)

Ordered by the Legislative Assembly to be Printed, 8 March, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of the Town of Singleton, the Village of Camberwell, and others interested in the Extension, with economy, of Railways to the North-western interior,—

HUMBLY SHEWETH :—

That your Petitioners, as landholders, by grant, by purchase, or by lease, or otherwise as householders, are entitled to the consideration of the Representatives of the Colony, where their interests are likely to be affected by official power guided by official cupidity.

That your Petitioners see with concern in the estimated expenditure of the Department of Lands and Public Works for the present year the sum of £22,850, as an item devoted to the improvement of the Main North Line of Road.

That among the items of that item are the following :—

For the construction of a Bridge over Falbrook	£2,300
Ditto ditto Foybrook	300
Ditto ditto at Apple-tree Flat	200
Ditto ditto Sandy Creek	450
Ditto ditto Murrurundi	1,300
Bridges over Creeks to Murrurundi Gap	600
Ditto ditto Bendermeer	1,200
To divert Road to meet Bridge at Falbrook	300
Making a Total of			...
			£26,650

That your Petitioners are particularly desirous of drawing the attention of your Honorable House to the first and last sums above quoted, as compared with the others.

Your Petitioners, therefore, respectively solicit the attention of your Honorable House to the following facts :—

1st. That a bridge at Falbrook, seven miles in a north-westerly direction from the Singleton crossing of the River Hunter, is unnecessary until the bridge for Railway extension is thrown across the river at that point. If bridges are to be built over the minor drains

of the country they should be built *consecutively* as the Railway requires them. To build bridges over Falbrook, or Foybrook, at present, if it is the intention of the Government to carry on the Railway to the interior, would be an unwarrantable waste of public means.

2nd. That the Village of Camberwell, bounded on the west by the waters of Falbrook, is a Government township, planned and marked out by Mr. Surveyor White some twenty years ago; that the allotments of the township adjoining the *leading* thoroughfares of the country, which pass through it, realised high prices as sites for inns, hostleries, stores, &c., and the Government of the day, benefited by these prices. The Petitioners, therefore, venture to hope that the Honorable House will bear out their view, that it is *scarcely* fair to the parties who *have made these improvements to change the line of road* then determined by authority, before inquiring whether official influence, to enhance the value of private property, has not had much to do with the contemplated change of road line, and the situation of the bridge, for which the sum of £2,600 is placed on the Estimates of the current year now before you.

Your Petitioners consequently pray that your Honorable House will not pass the sum of £6,650, placed on the Estimates of this year by the Minister of Lands and Public Works, for the purpose of building bridges which will be thoroughly useless to the country when Railway extension reaches the several points referred to in the Petition

And the Petitioners, as in duty bound, will ever pray.

[Here follow 94 Signatures.]

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

ROAD FROM APPIN TO WOLLONGONG.
(STATEMENT OF SUMS EXPENDED UPON.)

Ordered by the Legislative Assembly to be Printed, 15 February, 1859.

RETURN to *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 14 December, 1858, That there be laid upon the Table of this House :—

“ A Return of all moneys voted or appropriated to repair or
“ improve the Road leading from Appin to Wollongong from
“ 1st January, 1851, to 31st December, 1857 ; also, a Return,
“ shewing in detail all moneys expended during the same
“ period.”

(*Mr. Flood.*)

ROAD FROM APPIN TO WOLLONGONG.

A RETURN of the APPROPRIATION and EXPENDITURE on Account of the Road leading from Appin to Wollongong, from 1st January, 1851, to 31st December, 1857.

Legislative Assembly.
NEW SOUTH WALES.

BILLABONG DAMS.

(REPORT UPON FROM THE COMMISSIONER OF CROWN LANDS.)

Ordered by the Legislative Assembly to be Printed, 23 March, 1859.

THE COMMISSIONER OF CROWN LANDS, MURRUMBIDGEE, to THE CHIEF COMMISSIONER
OF CROWN LANDS.

*Murrumbidgee District,
Crown Lands Office,
Deniliquin, 1 March, 1859.*

SIR,

In conformity with instructions received from you, I do myself the honor to forward a Report upon the formation of Dams for retaining water supply on the Billabong Creek.

In your letter of instructions you inform me that the Honorable the Secretary for Lands and Public Works hopes that I may be able to suggest some scheme which will be acceptable to all parties. It is quite impossible to devise any such code of regulations. There has now been so much private feeling enlisted on the subject that the mere approval of one person would ensure the opposition of others. When persons have been actually tried for riot, and when cross-actions for false imprisonment and civil actions for damage are all in progress at once, it is quite impossible even to hope that any private arrangements can be carried out. The scheme which I have proposed may have the negative success of completely pleasing none—the best proof of its fitness.

I have not allowed any portion of my recommendation to become known. Would the Honorable Secretary allow them to be published, and see fit to act upon them, I think something might be done towards allaying the disturbances in the district.

I have, &c.,

CHARLES G. N. LOCKHART,

THE CHIEF COMMISSIONER OF CROWN LANDS,
Sydney.

Commissioner of Crown Lands.

*Murrumbidgee District,
Crown Lands Office,
24 February, 1859.*

Sir,

The Billabong Creek, in the Murrumbidgee Pastoral District, takes its rise in the Hume River Ranges, about sixty miles north-east from Albury, and after a course of two hundred and forty miles nearly west, and equi-distant between the Hume and the Murrumbidgee Rivers, at a village known as Moulamein, falls into the Edward, an anabranch of the Hume River.

The upper portion of the Billabong watershed, say for eighty miles from its source, is merely fair grazing land, but the lower portion is very superior pastoral country. On it ordinary sheep are fattened in two months, and oxen in from eight to twelve. In fact, the lower Billabong is altogether used as fattening pasture for the Victorian market. It thus affords an excellent market for store stock from the Northern Districts, gives a quick and highly remunerative return to the local station holder, and enables him at any time to dispose of his stock should pasturage or water fail. The greater number of the runs on the Lower Billabong are fenced in.

27 Stations.—
2,134 square miles.
165,000 sheep.
8,680 cattle.

In Appendix marked A is a Return of stations on the Billabong, names of occupants, their area and estimated grazing capabilities. This grazing capability would be very much greater were there any permanent supply of water. In many cases heavy losses have occurred from the failure of water supply in the creek; and although by merely taking in stock to fatten the runs are more easily cleared in the event of scarcity than when there are breeding herds, yet the want of a safe supply of water is a serious drawback to the prosperity of the district. I may mention that for a period of seven years after the Hume River was settled, the Billabong Creek did not flow across the Port Phillip and Sydney road, only thirty miles from its source. In other seasons the creek runs down perhaps only sixty, eighty, or one hundred miles. I am only aware of its having run down its whole course three times since the year 1846. I would beg leave to call particular attention to this partial flow of the creek. This circumstance led to the formation of dams by each settler in succession, as stations were taken up from above downwards. It is impossible that dams could have been built *before* the stations were occupied, but as each station was taken up, so soon was a dam erected on it, to save that water which otherwise would have run waste. The first stations on the Billabong were formed about the year 1838—the whole creek was taken up by the year 1846. The dam on Mr. De Saily's Coree Station, which prominently figured in the late disputes, I know to have been in existence in 1849, at which period there was as large a supply of water retained as there is now in it.

It is a matter which admits of no doubt that from the very first a system of damming has obtained on the Billabong Creek; as also, that had such not been the case, the Colony of New South Wales would have been many hundreds of thousands of pounds poorer, and the risk and expense of travelling would have been greatly increased.

At the same time it is very clear that the custom of erecting dams may be very much abused. In order to secure a full supply, the dam may be elevated too high, throwing water out of the bed of the creek and wasting it. There may be no care taken of the surplus water. The neighbouring run may be seriously damaged by malice or by carelessness. It appears to be a case where the Legislature or the Executive may fairly interfere, and establish a simple code of regulations by which the interests of individuals may be protected, and the supply of water economised. A precedent for this interference on the part of the Government is to be found in the Gold Field Regulations. To encourage enterprise, to protect the industrious, and to preserve order, it has been found absolutely necessary to regulate the water supply by codes of Regulations, in the first place emanating from the Executive. In like manner I consider that for pastoral purposes dams, to retain water, may be erected under certain regulations, which having been duly complied with, the pastoral occupant should be as effectually protected as is the miner in his water right.

Arms. Picks, shovels,
mining tools.

It would also appear to be advisable, for the sake of public order, that these regulations should be as speedily as possible drawn up. The example of large bands of armed men successfully enforcing their views of justice by destroying the ostensible property of others, is at least a very dangerous one, especially in the interior, where the civil power is of course physically weak.

It appears to be plain, that if a proper system of damming were once introduced—a system by which the water would reach from dam to dam—very little rain would suffice to keep up the supply at each station. Any water over and above the daily consumption and evaporation poured into the creek at its source *should* find its way along the creek to the Edward River. This could not, of course, be practically realized, but should be kept in view as the model possibility. No code of regulations can at once realize the full benefit to be ultimately obtained from them. Those that are agreed upon must therefore be most rigidly enforced.

7 Stations—395 square
miles. 3,500 sheep. 1,440
cattle.

In drawing up special regulations for persons wishing to erect dams on the Billabong Creek, it is necessary to remember that there is a great difference in the cross sectional area of that creek *above* and *below* the junction of the Columba therewith. The Billabong, as it proceeds from its source across the vast alluvial plain, gradually decreases in volume. During the first 40 miles of its course its cross section may average 80 feet by 14, the channel having amply supplied waterholes. But from thence down to the junction of the Columba, the section is merely that of a canal, about 40 feet wide by 8 feet deep. There are no waterholes or natural reservoirs, and on this portion of the creek dams are of greater necessity than on any other. The stations included are from 9 to 15—in Appendix A—that is from Mohonga to Cockiejetong inclusively. Without dams I do not think that three months supply of water could be depended upon.

Below the junction of the Columba, the area of the cross section increases considerably. The Columba is a channel, by which, and by the Yanko, the overflow of the River Murrumbidgee is carried into the Billabong, scouring out and deepening its channel, and forming deep and tolerably lasting waterholes.

Above the junction of the Columba Creek there are erected a considerable number of dams, and, as they are built disproportionately high to the very low banks, they have wasted a large amount of water, by turning it out on to the plains to find its way back to the creek, as it best may, after great losses by evaporation and absorption. To this cause do I chiefly attribute the loss of water complained of by station holders on the lowest part of the creek, and to prevent which waste all regulations should tend. In fact, it should be made evident that it is a matter of favour to obtain liberty to dam a channel common to all, and which favour can only be granted on certain stringent conditions.

5 Stations—471 square
miles. 40,000 sheep.
7 Stations—833 square
miles. 66,000 sheep.

The dams below the Columba Creek have not *wasted* so much water as those above, although they have, of course, *retained* much more. The water has not been turned out on to the plain, but it is complained of, and I think correctly, that after the water is raised to a certain height, much is lost by percolation through the alluvium. Stations numbered 16, 17, 18, 19, 20, were thus plentifully supplied with water hitherto, whilst the holders of the stations on the remainder of the lower creek were occasionally reduced to great straits,
and

and in last spring cut down these dams and also the frame work of one another's dams. In doing this considerable numbers of armed men were assembled, apparently with the purpose of overawing any idea of resistance. None of the dams above the Columba Creek were removed. Picks, shovels, mining tools.

In the case of *all* dams on the creek I have observed that the escapes for overflow of water are merely cut into the soil, or anabranches are used. These anabranches are again dammed when the creek begins to run sluggishly, throwing, in some instances, broad shallow streams of water out on to the flats. One condition which, I think, should be insisted on, is, that these escapes should all be made of timber, zinc, sheet iron, or similar substance, in order to guard against absorption, or the washing out of huge gulphs of soil into the sluggish running Billabong to fill up its waterholes. These escapes must be built on a specified section, so as to allow the surplus water to escape rapidly with a full stream. I have no doubt that parties interested will complain greatly of the expense of this condition, but I trust their representations will be taken no notice of. The supply of water which is secured to them allows of their accumulating rapid fortunes, and this condition is necessary in order to allow every one to have a chance of obtaining a share of the scarce water supply.

I would also propose that the Yanko and the Columba, two tributaries to the Billabong, should be proclaimed as water frontage for Governmental purposes. I have already recommended that this step should be taken, for the protection of the public, as well as of those settlers who so handsomely subscribed, and expended £9,000 in introducing the Murrumbidgee by the Yanko and Columba to the Billabong. My book, containing copy of my letter being at Tumut, I cannot at present refer to the date; what I foresaw, however, has already happened. *Non*-subscribers have dammed the Columba Creek, so as to give their own runs full supply of water, and have prevented it running on to the Billabong. One dam placed to divide the water, at the cost of the subscribers, has been cut away in order to serve a private purpose. I append a sketch of the two creeks referred to. Appendix B.
(Not printed.)

I, of course, cannot say in what manner it will be proper to proceed in giving effect to any code of regulations which the Government may consider proper; I presume that a Bill will be necessary—laying down certain principles, and under which authority will be conveyed to the Executive to publish local regulations, which will have the advantage of being amendable from time to time. I have therefore stated shortly the contents of the various clauses of the Bill as they appear necessary to me, and local regulations at more length.

It will be observed that I recommend that no dam should be erected without the written consent of some officer appointed to grant the same; that such officer should have power to remove any dam erected without such consent, and that any offences may be summarily disposed of before a Bench of Magistrates—in fact, much the same regulations as are in force on the Gold Fields. It will also be necessary for the officer appointed to have power to enforce the due fulfilment of conditions, and therefore to enter upon and inspect any dams or escapes. This demands the existence of a certain fitness on the part of the officer employed for the proper exercise of this discretionary power; if such fitness does not at any time exist, a remedy is obvious. There is a very much greater power entrusted to Commissioners on the Gold Fields, who have been very successful in their administrative duties in most instances. It will also be observed, that I propose the employment of a ranger on the Billabong Creek and its tributaries; this person might also be sworn in as special constable. The expense would be light, and, taking into consideration the increased rent placed on squatting runs, may be probably acceded to. This ranger might also act as sheep inspector.

In arriving at these conclusions, I have been greatly assisted by information afforded to me by Mr. District Surveyor Adams. He proposes that a survey of the section and cross-section of the creek on each run should be made, at an expense of about £2 per mile, and that thereon a certain fixed quantity of water should be allotted to each run. Though practically expensive, no doubt this would be the most correct principle to proceed upon. I am afraid however that it is too artistic for the rough-and-ready style of squatting pursuits. I append a copy of Mr. Adams' communication. I gather from Mr. Adams that above the Columba Creek the fall in the Billabong is 2 feet 6 inches per mile, and below the Columba that the fall is about 1 foot 6 inches. By a section of the Yanko which I have seen, the fall along that tributary averages 1 foot per mile; along the Columba it will be about 1 foot 6 inches. Appendix C.

I have also received from Mr. W. A. Broadribb a printed prospectus, which has received the approval of five station holders. These proposed regulations are in the spirit of fairness, and I have had no difficulty in adopting them where not inconsistent with the general principles laid down by me as above. The one grand feature which I would advise should be insisted on is in them completely ignored: There must be no escape water from a dam allowed to run through alluvial soil; it should be carried off quickly in an artificial lead, to supply the station immediately below. When once the water has run through, *then* the dams may be allowed to be heightened, but to be again on a certain day opened up to the fixed maximum height. Appendix D.

In furnishing this report and the heads of proposed regulations, I do myself the honor to state, that I shall not be in the slightest degree mortified should they be rejected in toto. The subject admits of so many different views, according to the personal interests of parties concerned, that it is not at all probable that my proposals will meet with any general approval. The water privileges are too valuable to be lightly parted with; some will think they are unjustly shortened, others will think that too great privileges are yet left to dam holders; I may safely say, however, that I am impartial in the matter, which no one who obtains audience from the Honorable Secretary on the subject can be.

I should feel much obliged if this report and the proposed regulations could be published, for the satisfaction of those gentlemen whom I have consulted on the matter.

I have, &c.,

CHARLES G. N. LOCKHART,
C. C. L.

The Chief Commissioner of Crown Lands,
Sydney.

APPENDIX A.

RETURN shewing Stations and Occupants on Billabong Creek; Areas and Capabilities.

No.	STATION.	OCCUPANT.	AREA. Square Miles.	GRAZING CAPABILITIES.		REMARKS.

APPENDIX C.

Albury, 15 February, 1858.

Dear Sir,

In reference to the Billabong dams, and as far as my profession is concerned, I see but one plan of settling the disputes, and that is by allowing each settler to retain a certain measurement of water.

This can only be arrived at by having a section and cross sections of the whole of that part of the creek made where dams are required, from which sections it will be easy at any time to see the height that would be required to retain the given quantity. The settler having retained his quantum, it would then rest with him to economise it. Cost of survey, &c., £2 per mile.

As I have a very great objection to interfering with any matters that are more properly within the province of the Commissioner, I should not allude to any of the other plans suggested; however, if you wish to have my concurrence in what you recommend, you could send me a sketch of it, so that I could say I was in communication with the Commissioner.

I enclose a list of the dams above Coonargo.

I shall not report on the dams until this day week, so that if you wish to communicate by return of post you will have time.

I remain, &c.,

P. ADAMS.

Chas. Lockhart, Esq.,
Commissioner of Crown Lands.

APPENDIX D.

WE, the undersigned, Settlers and Stockholders, having stations on the Billabong Creek under lease or license from the Government of New South Wales, do hereby severally, for ourselves and our respective executors and administrators, mutually agree to, and with each other respectively, our respective executors and administrators, in the manner following:—

First.—That any settler on the Billabong Creek may be at liberty to erect dams across that creek of the height of four feet each dam above the level of the bed of the creek where the said dams are erected, and no more; provided there shall be a distance of, at least, four miles in a straight line between each dam. And also provided, that in no instance shall the water be forced to flow over the banks of the creek, or out of the main channel, except on any part where an anabranch is used for the purpose of a race, and does not exceed the distance of one half mile from its effluence to its junction with the main stream.

Second.—That in consequence of the narrow formation of the Billabong Creek between the Mohango Station and Mr. John Broughton's (now Broughton and Walker's) station, inclusive on the said creek, the occupants between these two stations shall be allowed to erect dams three miles apart, and the same height as before mentioned, provided that in no instance shall the water be forced to flow over the banks of the creek on either side, or out of the main channel, except in any part where an anabranch is used for the purposes of a race, and does not exceed the distance of one half mile from its effluence to its junction with the main stream.

Third.—When and so often as the water has in any season run through the whole course of the creek to its junction with the back water of the Edward River, then each party shall be at liberty to raise his dam or dams eighteen inches higher; when every dam so raised shall be full, then the party whose dam shall be full shall be at liberty to raise his dam eighteen inches still higher, and so on in the same ratio from time to time, always under the restriction that the water in no instance shall be forced by these means over the banks of the creek on either side, or out of the main channel, except in any part where an anabranch is used for the purposes of a race, and does not exceed the distance of one half mile from its effluence to its junction with the main stream.

Fourth.—These increased heights shall be reduced every year to the level of the water in each dam on the 1st of April; but in the event of the water having lowered in any dams so reduced between the 1st of April of each year and the time the water flows to each dam, then, when water begins to flow, the dam shall be further reduced to the level of the water, but not below the original four feet.

Fifth.—With reference to to the first clause, it is further agreed that a creek frontage shall be construed to mean both sides; and when one side only is licensed to any party, two miles of creek frontage shall reckon as one; also, that no party shall be confined to the exact four miles between any two dams, provided that in the extent of his creek frontage the average distance shall not be less than four miles.

In witness whereof the said parties have hereunto set their hands, the twenty-ninth day of December, one thousand eight hundred and fifty-eight.

ROBERT DUN & CO., Couargo.
WM. A. BRODRIBB, North Wanganella.
PATRICK BROUGHAM, North Curragunung.
F. & GEORGE DESAILLY, Coree.
WILLIAM BROUGHTON, Yathong.

An Act to regulate the erection of Dams, for the purpose of retaining water in watercourses only occasionally running in Pastoral Districts of the Colony.

WHEREAS it is expedient to regulate the manner in which dams shall be erected, for the purpose of retaining water in watercourses only occasionally running in the pastoral districts of the Colony: Be it therefore enacted, &c., &c.

1. Interpretation clause of technical term. if necessary.
2. The Executive to have power to make rules and regulations for this purpose for any particular district or watercourse, if necessary, with power to amend the same, or repeal previous ones. Rules to be laid before Parliament and published in *Gazette*.
3. Officers may be appointed with authority with all necessary assistance to remove any dam not erected in conformity with the regulations, to make orders as to the altering or completing of any dam, and to prosecute for any breach of regulations.
4. Such officer or person appointed under his hand and seal may enter upon any enclosure for the purpose of examining any dam.
5. Any person obstructing such officer in the execution of his duty, or neglecting to obey any order to alter, complete, or uphold any such dam, such order being under the hand and seal of such officer, may be fined not exceeding £50 at the nearest Court of Petty Sessions.
6. Any person not being such officer or his assistant, who shall injure or destroy any dam shall be guilty of misdemeanor, and, at the discretion of the Judge, may be fined not more than £500, or imprisoned for any period not to exceed two years.

Local Regulations (proposed) to be observed in damming watercourses in the Murrumbidgee District.

I.—BILLABONG CREEK.

1. Any occupant of station on the Billabong Creek wishing to erect a dam thereon, or to be continued in occupation of any dam already existing, must obtain the written consent of the officer appointed to grant the same.
2. Below the junction of the Columba with the Billabong Creek such dams may be erected across the channel of the said creek, for the purpose of retaining water of a height not more than four feet above the general level of the creek, for one half-mile below the spot where the said dam is erected.
3. There shall only be one such dam for each four miles of creek frontage held by the said applicant, to be measured as the crow flies.
4. Above the junction of the Columba with the Billabong Creek such dams may be erected across the channel of the said creek, for the purpose of retaining water of a height not more than five feet above the general level of the creek, for one half-mile below the spot where the said dam is erected.
5. There shall be only one such dam for each three miles of creek frontage held by the said applicant, to be measured as the crow flies.
6. The term "creek frontage" shall be construed as meaning that both sides of the creek are occupied by the applicant. Where only one bank of the creek is held by the applicant, two miles of such frontage shall be held as equal to one mile of "creek frontage."
7. In no case shall any water be turned out of the ordinary channel of the creek by any dam erected. Where necessary, side embankments shall be formed for the purpose of confining the water within the ordinary channel of the creek.
8. For the purpose of providing for the free escape of surplus water from all such dams, a sluice or floodgate shall be provided at each such dam at the level of the water, as set forth in clauses 2 and 4; such sluice escape or floodgate shall be at least 24 feet in width, with sides at least 4 feet high; bottom and sides to be water-tight, if built of timber, the same shall be sawn timber properly fitted.
9. No dam shall be allowed to turn any surplus water through or over soil, until the sluice or flood escape be running off full.
10. When in any season the River Murrumbidgee has run by the Yanko, or by the Columba, or by both, through the Billabong Creek to the Edward River for four clear days; or when in any season the Billabong Creek has run through its whole course for four clear days, notice to that effect shall be served in succession, from the lowest station upwards, upon each occupant through whose frontage the said creek may have flowed, by the officer appointed for that purpose, or by his assistant. Upon the receipt of such notice, all sluice escapes or floodgates may be closed, with the proviso that no water be forced out of the channel of the main creek, nor shall any depth of water greater than 7 feet below the junction of the Columba, nor greater than 6 feet above the said junction, be retained in any such closed dam.
11. All sluice escapes or floodgates shall be re-opened on the 1st day of September in each year, so as to reduce the height of water in each dam to the original maximum level, as set forth in clauses 2 and 4.
12. Should it at any time before the 1st day of September in any year appear advisable to the occupant of any run to open the sluice escape or floodgate of any of his dams, 12 hours notice at least before it is opened shall be given to the occupant of the dam next below.

BILLABONG DAMS.

7

II.—COLUMBA AND YANKO CREEKS.

1. No permanent dams shall be erected on these tributaries to the Billabong Creek.
2. Temporary dams may be erected with the sanction of the officer appointed for that purpose, on the following conditions :—
 - (1.) That the head of water shall not be more than three feet. Measurements and distances as on the Billabong Creek below the junction of the Columba.
 - (2.) No such dam shall be erected in any year until the water has run for one clear calendar month into the Billabong Creek.
 - (3.) All such temporary dams shall be removed on the 1st day of August in each year, and the site levelled to the ordinary level of the creek, so that no impediment shall exist to the flow of the water into the Billabong.

III.—OTHER WATER COURSES.

1. Any persons wishing to obtain the privilege of continuing dams already in existence, or to erect others, shall furnish particulars of the site—the depth of water proposed to be retained—the natural flow of the creek—to the officer appointed to grant such permission ; when, if no objection of a public nature exists, they will obtain permission to occupy or erect such actual or proposed dam, under conditions as to the escape of surplus water.

Legislative Assembly.

NEW SOUTH WALES.

MR. WILLIAM WEAVER.

(CORRESPONDENCE WITH THE EXECUTIVE GOVERNMENT.)

Ordered by the Legislative Assembly to be Printed, 16 February, 1859.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 17 December, 1858, praying that His Excellency the Governor General would be pleased to cause to be laid upon the Table of this House,—

“ Copies of all Correspondence that may have taken place
 “ between the Executive Government and the late Colonial
 “ Architect, Mr. William Weaver, relating to a Report and
 “ the Evidence taken before a Select Committee of the
 “ Legislature, appointed on the 7th August, 1855, to
 “ inquire into and report upon the present state of the
 “ Colonial Architect’s Department; also, Copies of all
 “ Correspondence touching the resignation of Mr. Weaver
 “ as Colonial Architect.”

(*Mr. Flood.*)

SCHEDULE.

I.—*Correspondence relating to Coghlan's Fraud in Erection of Dead House.*

	PAGE.
1. W. Elyard, Esq., to Crown Law Officers, respecting fraud committed in connexion with the Dead House. 7 December, 1855	3
2. Minute of the Executive Council, with respect to the Report of the Assembly Committee on the Colonial Architect's Department. Confirmed, 18th December, 1855	3
3. W. Elyard, Esq., to the Attorney General on subject of Fraud, Dead House. 28 December, 1855	4
4. Ditto to Colonial Architect on same subject. 28 December, 1855	4
5. Civil Crown Solicitor to ditto, for information on the above subject. 27 February, 1856	4
6. Colonial Architect to Civil Crown Solicitor, in reply. 28 February, 1856	5
7. W. Elyard, Esq., to Colonial Architect censuring his conduct in not giving information on the above subject. 17 March, 1856	5
8. Colonial Architect to W. Elyard, Esq., in reply. 19 March, 1856	5
9. W. Elyard, Esq., to A. Dawson, Esq., appointing him one of a Board to measure work done at the Dead House. 17 March, 1856	6
10. Ditto to Captain Ward, appointing Mr. Trickett to the same duty. 17 March, 1856	6
11. Ditto to Civil Crown Solicitor, apprising him of the above. 17 March, 1856	6
12. Report of the Board appointed to measure work at the Dead House. 28 March, 1856	7
13. W. Elyard, Esq., to Civil Crown Solicitor, transmitting above Report. 3 April, 1856	8
14. Civil Crown Solicitor to W. Elyard, Esq., stating that the matter has been settled. 18 June, 1856	8

II.—*Correspondence respecting Mr. Weaver's Resignation of the Office of Colonial Architect.*

1. Colonial Architect to the Colonial Secretary, respecting his advance account with Joint Stock Bank. 17 October, 1855	9
2. Colonial Architect to Colonial Secretary, transmitting letter from Auditor General respecting Architect's application for an advance of £2,000 for "Roads." 17 October, 1855	10
3. W. Elyard, Esq., to Colonial Architect, in reply. 25 October, 1855	11
4. Ditto to ditto, respecting expenditure in excess of Estimate. 25 October, 1855	12
5. Colonial Architect to Colonial Secretary, in reply, and tendering his resignation. 6 November, 1855	12
6. W. Elyard, Esq., to Colonial Architect, unsatisfactory state of accounts. 7 November, 1855. 13	13
7. Ditto to ditto, stating that the Governor General has accepted his resignation; but Colonial Architect to arrange his accounts. 12 November, 1855	14
8. Colonial Architect to Colonial Secretary, in reply, and requesting to be relieved from duty early. 29 November, 1855	14
9. W. Elyard, Esq., to Colonial Architect—will be relieved of his duties in a short time. 1 December, 1855	15
10. Ditto to ditto, requesting him to hand over to Mr. Dawson the charge of the Department, &c., on 1st April, 1856. 31 March, 1856	15

MR. WILLIAM WEAVER.

I.—CORRESPONDENCE RELATING TO COGHLAN'S FRAUD IN ERECTION OF DEAD HOUSE.

No. 1.

W. ELYARD, ESQ., to THE CROWN LAW OFFICERS.

(No. 895.)

*Colonial Secretary's Office,
Sydney, 7 December, 1855.*

GENTLEMEN,

Referring to the Report of the Committee of the Legislative Council on the Colonial Architect's Department, of which a copy is enclosed, and in which allusion is made to an over-payment of £140 to the Contractor for building a Dead House, I am directed by His Excellency the Governor General to inform you, that it appears to His Excellency that the first person to be punished in this case is the Contractor himself, that is, that he should be called upon, and made, to render back the amount which he has received beyond that to which he was fairly entitled. Mr. Coghlan is the Contractor referred to, and His Excellency thinks that legal steps should *at once* be taken to compel him to disgorge his ill-got gains.

2. But His Excellency requests that you will report your opinion as to the best mode of dealing with Coghlan.

I have, &c.,

W. ELYARD.

THE HONORABLE

THE ATTORNEY GENERAL, and
THE SOLICITOR GENERAL.

No. 2.

*PROCEEDINGS of the Executive Council, on the 10th December, 1855, with respect to
a Report on the Colonial Architect's Department.*

Minute No. 55-44.

His Excellency the Governor General lays before the Council an Address, dated the 27th ultimo, from the Legislative Council, in which they transmit a copy of the Report of the Select Committee appointed to inquire into the state of the Colonial Architect's Department, and request that His Excellency will take immediate steps for carrying into effect the recommendations therein contained.

2. The only recommendations either stated or implied in this Report are—

1st. The dismissal of the Chief Clerk, for reasons which, though not alleged in the Report, may be inferred from statements made by some of the witnesses examined by the Committee.

2nd. That the Government will, so far as it has the means, put a stop to the numerous abuses which (according to the Report) are proved to exist in the Department.

These abuses are also left to be inferred; and—

3rd. That until the Department can be reorganized no public works but such as are absolutely required shall be undertaken.

3. With respect to the first point, the Governor General gives the Council to understand that he has already answered the Address, by apprising the Legislative Council of his intention to institute a proper inquiry into the charges preferred against Mr. Chapman, the Chief Clerk, and this, perhaps, is the only answer that the Address demands at present.

4. The Council, however, find it stated in the Report and Evidence, that in one particular instance which came under the cognizance of the Committee, namely, the erection of the Dead House near the Old Water Police Office, an overcharge of about £140, out of £167, was made by the Contractor, and paid on certificates from Messrs. Corby and Kemp.

The

The Council, therefore, advise that the whole of the papers be transmitted to the Honorable the Attorney General, in order that he may take such steps as he may deem proper, as well for the recovery of the amount fraudulently obtained by the Contractor, Mr. Coghlan, as for the punishment of those who may have participated in the fraud.

MICHL. FITZPATRICK,

Clerk of the Council.

Executive Council Office,

Sydney, 15 December, 1855.

55-293

No. 3.

W. ELYARD, Esq., to THE ATTORNEY GENERAL.

(No. 962.)

Colonial Secretary's Office,

Sydney, 28 December, 1855.

SIR,

Referring to my letter, No. 895, of the 7th instant, addressed to yourself and the Solicitor General, respecting an over-payment of £140 to the Contractor for building a Dead House; I am now directed by His Excellency the Governor General, under the advice of the Executive Council, to transmit to you the whole of the papers connected with this matter, in order that you may take such steps as you may deem proper, as well for the recovery of the amount fraudulently obtained by the Contractor, Mr. Coghlan, as for the punishment of those who may have participated in the fraud.

2. The Colonial Architect has been requested to furnish you with any papers in reference to this matter in his possession, and such information as you may require.

I have, &c.,

THE ATTORNEY GENERAL.

W. ELYARD.

No. 4.

W. ELYARD, Esq., to THE COLONIAL ARCHITECT.

(No. 667.)

Colonial Secretary's Office'

Sydney, 28 December, 1855.

SIR,

The whole of the papers which were in this department connected with the construction of the Dead House, near Campbell's Wharf, having been transmitted to the Attorney General, in order that steps may be taken for the recovery of the amount fraudulently obtained by the Contractor, Mr. Coghlan, and the punishment of those who may have participated in the fraud, I do myself the honor to request that you will furnish that officer with any papers which may be in your possession with reference to this matter, and such other information as he may require.

I have, &c.,

THE COLONIAL ARCHITECT.

W. ELYARD.

No. 5.

THE CIVIL CROWN SOLICITOR to THE COLONIAL ARCHITECT.

(No. 56-62.)

Civil Crown Solicitor's Office,

Sydney, 27 February, 1856.

SIR,

Referring to my conversation with you a few days ago on the subject of the offer of £70 made by Mr. Coghlan in settlement of the action which has been brought by the Government against him to recover the over-payment of £140 made to him for building a Dead House, when you stated your inability to offer any advice thereon,—I do myself the honor to inform you, that having submitted this matter to the Attorney General, he has stated that he cannot advise therein without knowing whether the excavations and works, claimed in deduction of the amount sought to be recovered were or were not made, and whether the charges now made for them be reasonable; and I am instructed by the Attorney General to request that you will, with as little delay as possible, furnish me with your Report thereon.

I have, &c.,

W. W. BILLYARD,

THE COLONIAL ARCHITECT.

Civil Crown Solicitor.

No. 6

THE COLONIAL ARCHITECT to THE CIVIL CROWN SOLICITOR.

(No. 56-88.)

*Colonial Architect's Office,
Sydney, 28 February, 1856.*

SIR,

In reply to your letter of yesterday's date, respecting the value of excavations and works claimed in reduction of the amount conceded to be over-paid to Thomas Coghlan for erecting a Dead House at Campbell's Wharf, I do myself the honor to state that, as these works were performed previous to my taking office, and whilst I was absent from Sydney; and as moreover there is now no officer in the department who has any knowledge of the matter, I am unable to afford you any information on the subject.

Mr. E. T. Blackett, the late Colonial Architect, and Mr. Richard Lambeth, late Clerk of Works—the gentlemen who were in office at the time—are, I conceive, the proper persons to apply to respecting these works.

I have, &c.,

WM. WEAVER,

THE CIVIL CROWN SOLICITOR.

Colonial Architect.

No. 7.

W. ELYARD, Esq., to THE COLONIAL ARCHITECT.

(No. 76.)

*Colonial Secretary's Office,
Sydney, 17 March, 1856.*

SIR,

With reference to your letter of the 28th ultimo, No. 88, addressed to the Civil Crown Solicitor, relative to the Dead House near Campbell's Wharf, I am directed by the Governor General to inform you, that in his opinion you are bound to give every information in your power with relation to that matter; and His Excellency is not pleased that you have declined to do so.

2. Mr. Dawson has however, in conjunction with Mr. Trickett, been instructed to measure the work at the Dead House, and Mr. Coghlan will be allowed an opportunity of waiting upon those gentlemen, to point out the excavations for which he claims payment.

I have, &c.,

W. ELYARD.

THE COLONIAL ARCHITECT.

No. 8.

THE COLONIAL ARCHITECT to THE COLONIAL SECRETARY.

(No. 56-60.)

*Colonial Architect's Office,
Sydney, 19 March, 1856.*

SIR,

With reference to your letter of the 17th instant, No. 76, relative to my letter to the Civil Crown Solicitor on the subject of the Dead House near Campbell's Wharf, informing me that it is my duty to give every information in my power with respect to that matter, and that His Excellency the Governor General is not pleased that I have declined to do so,—

2. I do myself the honor to point out that the information required of me by the Civil Crown Solicitor was as to the quantity and value of excavations and works alleged by Coghlan to have been performed by him. I beg to state that I am, and have been, quite willing to afford to the Government all the information which it is possible for any person to arrive at subsequently to the completion of the works; but as I am aware that a portion of Coghlan's claim is for excavations made and filled in before the actual commencement of the building, and on a different site to that which it at present occupies, I conceive it to be out of the power of any person who was not present to measure it before filling in to be able to state what quantity of work was so performed, or what would be a fair allowance for it. This work was performed, as I stated to Mr. Billyard, before my entering upon office, and during my absence from Sydney; and as moreover there is no officer now in the department

who had any supervision over it, it appears to me to be impossible for me, or any other person, to afford the information required, excepting the persons under whose directions the work was done, and to whom I referred the Civil Crown Solicitor.

THE HONORABLE
THE COLONIAL SECRETARY.

I have, &c.,
WM. WEAVER,
Colonial Architect.

No. 9.

W. ELYARD, ESQ., to A. DAWSON, ESQ.

(No. 75.)

*Colonial Secretary's Office,
Sydney, 17 March, 1856.*

SIR,

I am directed by His Excellency the Governor General to inform you that certain papers connected with the Dead House near Campbell's Wharf, have been transmitted to Captain Ward, R. E., with a request that, in conjunction with you, Mr. Trickett may be instructed to measure the work at that building.

2. Mr. Coghlan, who was the Contractor for the erection of the Dead House, will be requested by the Civil Crown Solicitor to attend on the survey on such day as Mr. Trickett and yourself may appoint for the purpose; in the event, however, of Mr. Coghlan's refusal to attend, the measurement is to proceed.

A. DAWSON, ESQ.

I have, &c.,
W. ELYARD.

W. ELYARD, ESQ., to CAPTAIN WARD, R. E.

(No. 44.)

*Colonial Secretary's Office,
Sydney, 17 March, 1856.*

SIR,

With reference to previous correspondence respecting the Dead House near Campbell's Wharf, I am directed by His Excellency the Governor General to transmit to you the enclosed papers connected with this matter, and to request that, in conjunction with Mr. Dawson, to whom a communication on the subject has been addressed, Mr. Trickett may be instructed to measure the work at the Dead House.

2. Mr. Coghlan will be requested by the Civil Crown Solicitor to attend on the survey on such day as Mr. Trickett and Mr. Dawson may appoint for the purpose; in the event, however, of Mr. Coghlan's refusal to attend, the measurement is to proceed.

CAPTAIN WARD, R. E.,
&c., &c., &c.

I have, &c.,
W. ELYARD.

No. 11.

W. ELYARD, ESQ., to THE CIVIL CROWN SOLICITOR.

(No. 217.)

*Colonial Secretary's Office,
Sydney, 17 March, 1856.*

SIR,

With reference to the case of the Attorney General v. Coghlan, for the recovery of an over-charge for the Dead House near Campbell's Wharf, I am directed by His Excellency the Governor General to inform you that Mr. Dawson, in conjunction with Mr. Trickett, to whom all the papers connected with this case have been transmitted, has been desired to measure the work at the Dead House, and to request that you will call upon Mr. Coghlan to attend the survey, for the purpose of pointing out to those gentlemen the whole of the work for which he claims payment, on such day as they may appoint.

2. In the event of Mr. Coghlan's refusal to attend the measurement is to proceed, and the action brought for the difference between the amount paid to him and that really due.

THE CIVIL CROWN SOLICITOR.

I have, &c.,
W. ELYARD.

No. 12.

REPORT of the Board appointed to measure Work at the Dead House.

Sydney, 28 March, 1856.

SIR,

In obedience to the instructions contained in your letters of the 17th instant, No. 110 A, and requesting us to measure the work at the Dead House, and stating that Mr. Coghlan would be requested by the Civil Crown Solicitor to attend on the survey, on such days as we may appoint for the purpose;—

2. We have now the honor to inform you that we have measured the said works in the presence of Mr. Coghlan, and found that the measurements and valuations of the extra works to the building, as well as the provision of a deal table and drain, to agree nearly with the estimate formerly made by Mr. Trickett, as stated in his evidence before the Select Committee of the Legislative Council on the Colonial Architect's Office, on the 4th September, 1855. But with regard to the excavation made for this building, upon a site that was originally fixed upon by the Colonial Architect, and afterwards abandoned and the excavations filled up, there is a great discrepancy in the measurements of Mr. Trickett and the extent of the work made out by Mr. Coghlan. The measurements of Mr. Trickett were taken from information given him by Mr. Lambeth (who was formerly a Clerk of Works in the Colonial Architect's Office, and who put the building in hand), and amounts to $14\frac{3}{4}$ cubic yards, whilst the measurement taken upon Mr. Coghlan's evidence amounts to $41\frac{1}{2}$ cubic yards; but as Mr. Coghlan is the only person from whom we could obtain any information on this subject we are inclined to believe, from a careful examination of the ground, and the features it probably presented when the building was commenced, that his statement is somewhat exaggerated, and in corroboration of this opinion we would beg to refer to the evidence of Mr. Blackett, the late Colonial Architect, before the Select Committee of the Legislative Council, in which that gentleman states that the extra excavations is not more than thirty-five yards altogether. Mr. Blackett has also informed us, since our inspection of the work, that his measurement is ample, and no more ought to be allowed Mr. Coghlan for the work.

3. Another item of extras claimed by Mr. Coghlan is for the removal of a heap of rubbish from the site of the present building—amounting, by his statement, to 40 cubic yards; but from information obtained from Mr. Blackett this work is very much over-estimated. It appears, however, that some such rubbish was removed by Mr. Coghlan, and for which we would recommend that an allowance be made to a fair extent.

4. We have endeavoured to gain every information upon this subject from persons in the Colonial Architect's Office, and from Mr. Lambeth, but with the exception of the foregoing information from Mr. Blackett, and the evidence of Mr. Coghlan, we have been unable to gain sufficient information upon which to form a correct estimate of the work actually performed.

5. Under the circumstances above stated we would recommend that the following items of extra work be allowed Mr. Coghlan, which we consider to be a fair and just remuneration for all and every description of work performed by him, viz. :—

EXTRAS IN FOUNDATIONS.	£	s.	d.
$9\frac{3}{4}$ yards excavating, @ 6s.	2	18	8
2 perches of stone work, @ 80s.	8	0	0
Deal Table and Drain, as per estimate of Mr. Trickett	20	11	8
Excavating on first site, 25 cubic yards, @ 6s.	7	10	0
Clearing away rubbish from present site, 10 yards @ 3s. ...	1	10	0
	<hr/>		
	£40	10	4
	<hr/>		

We have, &c.,

ALEXR. DAWSON,
J. TRICKETT.THE HONORABLE
THE COLONIAL SECRETARY.

No. 13.

W. ELYARD, Esq., to THE CIVIL CROWN SOLICITOR.

(No. 245.)

*Colonial Secretary's Office,
Sydney, 3 April, 1856.*

SIR,

With reference to my letter No. 217 of the 17th ultimo, apprising you of the appointment of a Board for the purpose of measuring the work at the Dead House, near Campbell's Wharf, I am now directed by His Excellency the Governor General to transmit to you the Report of the Board, from which it would appear that Mr. Coghlan, the Contractor, is indebted to the Government to the extent of £126 9s. 8d., and to request that proceedings may be at once instituted for the recovery of this amount.

2. I have the honor to enclose all the papers connected with this case, and to request that they may be returned when done with.

I have, &c.,

W. ELYARD,

(for the Colonial Secretary.)

THE CIVIL CROWN SOLICITOR.

No. 14.

THE CIVIL CROWN SOLICITOR to THE COLONIAL SECRETARY.

(No. 56-123.)

*Civil Crown Solicitor's Office,
Sydney, 13 June, 1856.*

SIR,

Referring to your letter of the 3rd April last, No. 245, transmitting Report of the Board appointed for the purpose of measuring the work at the Dead House, and instructing me to proceed against Mr. Coghlan for the recovery of £126 9s. 8d., I do myself the honor to inform you, that Mr. Coghlan has paid me £86 12s. 6d. in discharge of this claim, which sum the Attorney General thought should be accepted under the circumstances disclosed in the accompanying statement. I have paid the amount into the Colonial Treasury.

I have, &c.,

W. W. BILLYARD,

Civil Crown Solicitor.

THE HONORABLE

THE COLONIAL SECRETARY.

Attorney General v. Coghlan.

(Extra work at Dead House.)

Since this matter was laid before the Attorney General for the consideration of Coghlan's proposal to pay £70 in discharge of this action, a survey of the work has, by direction of His Excellency the Governor General, been made by Mr. Dawson and Mr. Trickett, from whose report (sent herewith,) it would appear that the over payments to Coghlan amount to £126 9s. 8d., being £13 10s. 4d. less than the amount for which the action was brought.

Mr. Martin (Coghlan's Attorney) has now increased his offer to £86 12s. 6d., which he arrives at, as follows:—

Coghlan claims for the table *alone* £34, which he states was the price agreed on between him and the Colonial Architect, and refers me to Corby's evidence, p. 47, Report Committee Legislative Council, questions 15, 16, and to Kemp's evidence, p. 51, questions 12 to 22 in support of his statement, and to Mr. Weaver's examination, p. 4, 9, Nos 82 to 88, from which it appears that the table was valued by him and two of his officers at £35.

For the drain, cess-pit, and piping he claims £15, and refers me to Corby's evidence, p. 47, questions 12, 13, 14, and to question 12 of Kemp's evidence, p. 51, and to the certificate of the Colonial Architect, p. 60, that the rates were the most reasonable for which the works, &c. could be procured at the time they were stipulated for.

For

For these two items then Coghlan claims	£49 0 0
The amount allowed by the Board for these items is £20 11s. 8d.	
He states also that he is prepared to prove that £15 is the fair value of the drain.	
The next item is for excavating. The quantity claimed by Coghlan, and admitted by the Board, is 39 $\frac{3}{4}$ yards. The price claimed per yard is 10s.; the price allowed by the Board is 6s., at the rate claimed is.....	17 7 6
The next item is for stone-work, which is admitted by the Board ...	8 0 0
Then there is the item for clearing away rubbish, for which Coghlan claims 40 yards at 3s.—the Board allowing only 10 yards at 3s. With respect to this charge, Coghlan refers to Mr. Weaver's evidence, p. 4, and to his certificate, p. 60. The claim under this head is	6 0 0
	<hr/>
	80 7 6
The total amount of charge for Extras was	167 0 0
	<hr/>
Amount now offered by Coghlan	86 12 6
being less than the amount found due on the report of the Board by the sum of	39 17 2
	<hr/>
Amount now sought to be recovered	£126 9 8
	<hr/>

Assuming that Coghlan is correct with respect to his claim for the table and drain, the difference between the amount claimed and that admitted will then be only £11 8s. 10d.

Under these circumstances, and looking generally to the evidence contained in the Legislative Council Report, and considering that the witnesses will no doubt give the same evidence before a Jury which they have already given to the Council, it is submitted for the Attorney General's consideration whether it will not be advisable to accept Coghlan's offer.

Should it be rejected, he has determined to pay the amount into Court.

I am of opinion, under all circumstances, it is better to take the sum now offered, £86 12s. 6d., than to continue the proceedings for the difference.

J. H. PLUNKETT,
Attorney General.
May 21, 1856.

II.—CORRESPONDENCE RESPECTING MR. WEAVER'S RESIGNATION OF THE OFFICE OF COLONIAL ARCHITECT.

No. 1.

THE COLONIAL ARCHITECT to THE COLONIAL SECRETARY.

(No. 55-316.)

Colonial Architect's Office,
Sydney, 17 October, 1855.

SIR,

I do myself the honor to transmit a communication received from the Manager of the Australian Joint Stock Bank, referring to the state of my Public Advance Account with that institution. In forwarding this letter, I beg to state that on the 11th instant I applied to the Auditor General, in the usual form, for an advance of £2,000 to be placed to my credit in this Bank, to enable me to pay wages, &c., of the parties employed on the roads. This sum had not been paid in at the date of Mr. Wrench's letter; and the account has been overdrawn, as therein shewn, in consequence of several urgent claims being presented in the interval.

2. The regulation which requires that the amount of unadjusted accounts must not exceed £1,000 at the time of applying for a further advance was, on this occasion, not only complied with, but the final quarterly adjustment has been made, and the vouchers furnished.

3. As the delay between the application for an advance and its payment into the Bank frequently extends to a week, and sometimes more, it has often been necessary either to overdraw my account at the Bank or to suspend payment of any claims that might be presented in the meantime; this latter course would be productive of serious inconvenience. Although making every exertion to keep the Bank in funds for the purpose, I have frequently been compelled to overdraw, and have been held personally responsible by the Bank for the amount paid in excess; to this however the Manager now objects, unless the Govern-

ment will identify the account as a public one, and pay interest on every overdraft which may arise. I beg therefore to suggest that instructions may be given for expediting payment of my advances, and that I may be authorised to comply with Mr. Wrench's request.

THE HONORABLE
THE COLONIAL SECRETARY,
&c., &c., &c.

I have, &c.,
WM. WEAVER,
Colonial Architect.

[Enclosure in No. 1.]

Australian Joint Stock Bank.
Sydney, 16 October, 1855.

Sir,

I have the honor to call your attention to your public account with this Bank, which at present is £440 2s. 1d. overdrawn, and to request that you will please make early arrangements for causing an amount to be paid in to put it in cash.

As I notice that this account is frequently on the wrong side, I must beg your especial attention to the matter, for, although this Bank is desirous of treating all Government accounts with liberality, we cannot undertake to make such repeated and large advances without the sanction of the Government identifying the debt as contracted on their behalf, and also subject to the current rate of interest.

The three months for which I agreed to work your account free of interest having long since expired, I beg now to withdraw from that arrangement,

Wm. Weaver, Esq.,
Colonial Architect.

And remain, &c.,
E. WRENCH,
Manager.

No. 2.

THE COLONIAL ARCHITECT to THE COLONIAL SECRETARY.

(No. 55-317.)

Colonial Architect's Office,
Sydney, 17 October, 1855.

SIR,

I do myself the honor to transmit a communication received from the Auditor General, referring to an application for an advance of £2,000 for "Roads," made by me on the 11th instant; and in doing so I beg to bring under the notice of His Excellency the Governor General the system under which advances of this kind have been made to me, to enable me to pay wages, and other claims against this Department, as authorized by your letter of the 16th September, 1854, No. 299.

2. The advances, which are therein limited to £2,000 each, are applied for by me from time to time, as required. The rule laid down is, that at the time of each application the unadjusted accounts shall not amount to more than £1,000; the final adjustment being made quarterly, within fourteen days after the expiration of each quarter.

3. From the enclosed letter and personal communication on the subject with the Auditor General, I find he considers it necessary that, in making future applications for such advances, I should state the *specific purposes* to which it is intended to appropriate the sum asked for. I have already pointed out to the Auditor General the utter impossibility of forming even an approximate estimate of the number and nature of the claims that may be made against my Department within any given time, these claims being of necessity very numerous and constantly fluctuating.

4. It will, I conceive, be apparent that it is impossible for me to foresee, more especially with regard to works in the interior, the number and amount of the accounts that will be presented to me; and the restrictions required by the Auditor General will entirely defeat the original object in making these advances, which was to enable the head of this Department to meet promptly all claims within a certain limit, namely, £150 each, and thereby remove the source of a great deal of dissatisfaction amongst tradesmen and others, which previously existed.

5. Considering that the regulation proposed by the Auditor General would involve a large amount of labor, could not be carried out within any degree of accuracy, and would, moreover, tend greatly to impede the works in the Department, I beg to request that officer may be instructed to dispense with it, and that advances for public works may be made as heretofore.

THE HONORABLE
THE COLONIAL SECRETARY.

I have, &c.,
WM. WEAVER,
Colonial Architect.

[Enclosure

[Enclosure 1 in No. 2]

(No. 795.)

*Audit Office, Sydney,
16 October, 1855.*

Sir,

I have the honor to inform you that the sum of £2,000 last applied for by you is now payable at the Colonial Treasury, and to request that in all future applications you will have the goodness to explain the circumstances under which the advances are asked for.

The Colonial Architect.

I have, &c.,
JOHN STIRLING.

[Enclosure 2 in No. 2.]

(No. 299.)

*Colonial Secretary's Office,
Sydney, 16 September, 1854.*

Sir,

The acting Auditor General having been instructed to prepare a Warrant for the advance to you of £3,000, to enable you to pay wages and other claims against your Department, I am directed by the Governor General to request that you will, on or before the 30th instant, render to the Audit Office satisfactory accounts of this and any previous outstanding advances.

2. As the expenditure of considerable sums of public money passes through the hands of the Colonial Architect, I am directed to acquaint you that your successor will be required to give security to the Government, himself in a £1,000 and two sureties in £500 each; and to request that you will invite Mr. Weaver to submit for approval the names of his proposed sureties

3. In conclusion, I have the honor to transmit to you a Paper of Regulations to be observed by the Colonial Architect with respect to the disbursement of public moneys entrusted to him, which you will have the goodness to hand over to Mr. Weaver, when he receives charge of the Department, for his future guidance.

The Colonial Architect.

I have, &c.,
W. ELYARD.

No. 3.

W. ELYARD, Esq., to THE COLONIAL ARCHITECT.

(No. 553.)

*Colonial Secretary's Office,
Sydney, 25 October, 1855.*

SIR,

With reference to your letter of the 17th instant, No. 55-317, enclosing one from the Acting Auditor General, stating that £2,000 last applied for by you for the repair of roads is now payable at the Colonial Treasury, and requesting that in all future applications you will state the circumstances under which the advances are asked for,—I am directed by His Excellency the Governor General to inform you that, for the reasons stated by you, it will be unnecessary to enter into the explanation required by the above officer, of which he has been duly apprised. I am however to point out, that you will be held responsible that the payments do not in any case exceed the amount voted for the work.

THE COLONIAL ARCHITECT.

I have, &c.,
W. ELYARD.

[Enclosure in No. 3.]

*Colonial Secretary's Office,
Sydney, 25 October, 1855.*

Sir,

With reference to your letter of the 16th instant, No. 795, apprising the Colonial Architect that £2,000 applied for by him for the repair of roads is now payable at the Colonial Treasury, and requesting that in all future applications he will state the circumstances under which the advances are asked for,—I am directed by His Excellency the Governor General to transmit the copy of a letter received from that officer, and to inform you that, for the reasons therein stated, it will not be necessary to enter into the explanation in question. It has however been pointed out to the Colonial Architect, that he will be held responsible that the payments do not in any case exceed the amount voted for the work.

The Acting Auditor General.

I have, &c.,
W. ELYARD.

No. 4.

W. ELYARD, ESQ., to THE COLONIAL ARCHITECT.

(No. 552.)

*Colonial Secretary's Office,
Sydney, 25 October, 1855.*

SIR,

The Acting Auditor General having submitted accounts of disbursements made by you, and forwarded to his office in adjustment of advances made to you from the Colonial Treasury, I am directed to inform you that the above officer has been apprised that the Governor General cannot sanction items in excess of the estimate; I am at the same time to point out to you that you have no right to order works to be executed without special authority, and to warn you, that if you direct the execution of works upon your own responsibility you will have to pay for them.

I have, &c.,

W. ELYARD.

THE COLONIAL ARCHITECT.

No. 5.

THE COLONIAL ARCHITECT to THE COLONIAL SECRETARY.

(No. 55-340A)

*Colonial Architect's Office,
Sydney, 6 November, 1855.*

SIR,

I do myself the honor to acknowledge the receipt of your letters of the 25th ultimo, Nos. 552 and 553, relative to disbursements made by me on account of works carried out in this Department, in the first of which I am instructed that His Excellency the Governor General cannot sanction items in excess of the estimate, and pointing out that I have no right to order works to be executed without special authority, warning me also, that if I direct the execution of works upon my own responsibility I shall have to pay for them; the second of your communications apprising me that I shall be held responsible that the payments do not, in any case, exceed the amount voted for the work.

2. Having given these instructions my best consideration, I take leave to submit, for His Excellency's consideration, that the having to apply for special authority for very many works which are continually occurring will of itself defeat the usefulness of the Department, and will be productive of a delay which, in many cases, must prove most injurious, and even mischievous, and tend generally to impede the working of the Department.

3. Referring to that portion of your letter which holds me responsible that the expenditure on the various works shall not in any case exceed the *sum voted*, and informs me that the Governor General cannot sanction items in excess of the *estimate*, I feel bound to point out that, practically, it will be found impossible to carry out this instruction, inasmuch as no one can foresee what changes of circumstances or fluctuations in the labor market may occur between the framing of an estimate and the execution of a work, or even during its progress, to effect its cost; but bearing in mind that the *estimate* as originally made by myself is liable to be altered and reduced to any extent by the Legislature, the difficulty is increased to an utter impossibility. The instruction itself, moreover, amounts to requiring from me a guarantee of every estimate that is framed, which is more than is required of professional men in any other part of the world, much less in a country where the labor market has, during the current year, varied little less than fifty per cent.

4. Feeling, therefore, that it would be idle for me to profess to conform to these instructions, that it is utterly impossible satisfactorily to carry on the work of the Department under them, and that they amount in effect to a withdrawal of that confidence which must be accorded to the head of this department, I regret to have to request that His Excellency will be pleased to relieve me of a responsibility which, under such circumstances, I am not prepared for, and to accept my resignation of the appointment I now hold.

I have, &c.,

WM. WEAVER,

Colonial Architect.

THE HONORABLE

THE COLONIAL SECRETARY,

&c., &c., &c.

No. 6.

W. ELYARD, ESQ., to THE COLONIAL ARCHITECT.

(No. 586.)

*Colonial Secretary's Office,
Sydney, 7 November, 1855.*

Sir,

The Governor General having had under his consideration your letter of the 29th ultimo, addressed to the Auditor General, respecting the sums expended by you on certain works, therein referred to, in excess of the amounts provided for them by the Public Works Loan Act, I am directed to inform you that your explanation is very unsatisfactory.

2. His Excellency desires me to state, that you are not authorized to plunge the Government into expenses for which no provision is made; and in the case of the Bathurst Bridge, you should at once have made known the effect which the increased cost of the timber would have produced, so that a vote could have been taken for the amount, or the work stopped.

3. His Excellency instructs me also to inform you, that the fencing for the other buildings alluded to in your communication should have appeared on the Estimates, and, if not provided for, should not have been executed.

4. In conclusion, I am to intimate to you that the Governor General will not look over such carelessness for the future.

I have, &c.,

THE COLONIAL ARCHITECT.

W. ELYARD.

[Enclosure 1 in No. 6.]

(No. 788.)

*Audit Office, Sydney,
13 October, 1855.*

Sir,

I do myself the honor to inform you that, inclusively of the accounts received from your office this morning, the expenditure for the following works exceeds the provision made for them by the Act 18 Victoria, No. 35, viz. :—

Bridge, Macquarie River, Bathurst	£568 18 7
Bridge, Paddy's River... ..	196 13 6
Watch House, Balmain	18 9 7
Watch House, Darlinghurst	96 10 9
Watch House, North Shore	49 0 9

and to request that you will have the goodness to explain, at your earliest convenience, in what way these expenses have been provided for.

I have, &c.,

Wm. Weaver, Esq.,
Colonial Architect.

JOHN STIRLING.

[Enclosure 2 in No. 6.]

*Colonial Architect's Office,
Sydney, 29 October, 1855.*

Sir,

In reply to your letter of the 13th instant, No. 788, with reference to the expenditure on certain works enumerated therein, I do myself the honor to state, with reference to the first item—the Bridge over Macquarie River, Bathurst—the outlay has exceeded the Votes; this excess has arisen from the timber having cost considerably more than was estimated. At the time the estimate was prepared every information it was possible to obtain was procured, a large per-centage was left for contingencies, and every precaution taken to avoid exceeding the sum available; it was found, however, in this, as in many other cases of works in the interior, that circumstances, which it was impossible to foresee, occurred during the progress of the Bridge. The work being well advanced, the workmen under engagement, and all other arrangements made, it was not possible to stop it without great loss and inconvenience, but every practicable reduction has been made to keep the outlay within the narrowest limits.

An excess has also occurred in the case of the Bridge over Paddy's River. This arises entirely from an accident, a considerable portion of the sawn timber having been destroyed by bush fires whilst awaiting removal from the saw-pits, and it consequently had to be replaced.

As regards the other works enumerated by you, according to the account kept in this office, the sums properly chargeable to the respective Votes for the buildings are as follows:—

				Amount granted.
Watch House, Balmain	£1,167	8	4	... £1,200
Ditto, Darlinghurst	1,856	5	9	... 2,150
Ditto, North Shore	1,202	4	7	... 1,200

In addition to these amounts there are expenses for fencing at the buildings, as follows:—

Watch House, Balmain.....	£51	1	3
Ditto, Darlinghurst	138	18	3
Ditto, North Shore	99	7	6

These expenses, it is considered, should be defrayed out of the Vote of £1,500 for repairs to Buildings and Fencing—Police, within Settled Districts.

I have, &c.,

WM. WEAVER,
Colonial Architect.

The Acting Auditor General.

No. 7.

W. ELYARD, ESQ., to THE COLONIAL ARCHITECT.

(No. 588.)

Colonial Secretary's Office,

Sydney, 12 November, 1855.

SIR,

Having laid before the Governor General your letter of the 6th instant, No. 55-340A, respecting the execution of works in your Department, I am directed to inform you that His Excellency considers you have taken a wrong view of the circumstances connected with your present position, and of the effect of his instructions, as communicated to you by my letters of the 25th ultimo, Nos. 552 and 553.

2. The Governor General does not at all propose to bind you down to the accuracy of your estimates. He well knows that circumstances may often occur which will put all calculation at defiance; but he does expect, and will always insist upon the strict adherence of the Colonial Architect to these general rules, without which that officer's responsibility to the Government becomes a farce; and His Excellency cannot permit you, without any authority from him, to exceed upon any particular work the amount which has been voted for that work by the Legislative Council.

3. His Excellency directs me also to state, that the proper course for you to pursue on such occasions is to report the causes of such anticipated excess, and to take his instructions thereupon. You would thus become exonerated from all responsibility, which would then rest upon His Excellency.

4. By acting as you have done, you have committed the Government to an outlay upon various works beyond the amount sanctioned by the Council; and this is a degree of confidence which the Governor General is not disposed to place in any individual.

5. With regard to the concluding paragraph of your letter, tendering your resignation of the office of Colonial Architect, I am commanded by His Excellency to inform you that he has no wish to retain your services; but before he can accept of your resignation he must be fully satisfied as to the position of all the public works under your charge, and the state of the accounts; for, I am to add, the Governor General cannot permit an officer to saddle the Government with heavy responsibilities, and then to evade his fair share of these by resigning his office.

I have, &c.,

THE COLONIAL ARCHITECT.

W. ELYARD.

No. 8.

THE COLONIAL ARCHITECT to THE COLONIAL SECRETARY.

(No. 352.)

Colonial Architect's Office,

Sydney, 29 November, 1855.

SIR,

In attention to your letter of the 12th instant, No. 588, informing me that before His Excellency the Governor General can accept my resignation he must be fully satisfied as to the position of all the public works under my charge,—

2. I do myself the honor to transmit, for His Excellency's information, a return shewing all the works now in progress, their state, the funds provided, and the expenditure incurred in each case.

3. With reference to the state of my accounts, I would suggest that this may be more readily arrived at by a reference to the Audit Office. I may however state, that I have strictly complied with the regulations of that Department, having adjusted my accounts to the end of last quarter within the prescribed time.

4. With reference to the former portion of your letter, I regret to find I have misunderstood the effect of His Excellency's instructions, and that I have not pursued a proper course in completing works, in one or two instances involving an expenditure in excess of the Votes, without specially reporting the same to the Government, a course which I should have been most willing to follow had I been aware that it was His Excellency's wish. In carrying on to completion the works referred to, I merely exercised a discretionary power which I was aware had been acted upon by my predecessor in similar cases.

5. I refer with pain to the last paragraph of your letter, for I much regret to think that His Excellency the Governor General should consider me capable of resigning my office for the motive therein attributed, and I beg you will assure His Excellency that I am quite prepared to bear all and any amount of responsibility that properly attaches itself to me during my occupation of this, or any other office. I would here take leave to suggest that it would be most desirable, to prevent further misconception, that the extent of that responsibility should be more defined than it is at present.

6. As, however, I can no longer carry on the duties of the Department to my own satisfaction, I shall be glad to be relieved of them at the earliest convenient period.

I have, &c.,

THE HONORABLE
THE COLONIAL SECRETARY.

WM. WEAVER,
Colonial Architect.

No. 9.

W. ELYARD, ESQ., to THE COLONIAL ARCHITECT.

(No. 617.)

*Colonial Secretary's Office,
Sydney, 1 December, 1855.*

Sir,

In acknowledging the receipt of your letter of the 29th ultimo, No. 352, respecting the public works under your charge, I am directed by the Governor General to inform you, with reference to the last paragraph of your communication, that His Excellency hopes to be able to relieve you from your duties before long.

I have, &c.,

THE COLONIAL ARCHITECT.

W. ELYARD.

(No. 103.)

*Colonial Secretary's Office,
Sydney, 31 March, 1856.*

SIR,

I am directed to inform you that His Excellency the Governor General has been pleased, with the advice of the Executive Council, to appoint A. Dawson, Esquire, to the situation of Colonial Architect from the 1st April next, and to request that you will have the goodness to deliver over to him the charge of your Department, Office Books, &c., on the above date.

I have, &c.,

WILLIAM WEAVER, ESQ.

Legislative Assembly.

NEW SOUTH WALES.

VACCINATION.

(REPORT OF MEDICAL ADVISER FOR 1858.)

Ordered by the Legislative Assembly to be Printed, 22 March, 1859.

THE MEDICAL ADVISER TO THE GOVERNMENT to THE COLONIAL SECRETARY.

Parramatta, 10 March, 1859.

SIR,

I do myself the honor to furnish, for the information of the Government, the general Return of the number of persons vaccinated at the different Government Vaccine Institutions during the year 1858, distinguishing the age and sex.

2. The total number of successful vaccinations amounts to eleven hundred and seventy-four, being less than one-third of the number vaccinated in 1857, and less than two-thirds of the number vaccinated in Sydney alone in one quarter (the last) of that year. Dr. Rutter vaccinated eighteen hundred persons in the last quarter of 1857.

3. I annex in the margin the numbers vaccinated in each year since 1853 inclusive, by which it appears that the average annual number of persons vaccinated is a little over two thousand; and as the average number of children annually born has been over ten thousand, it is clear that, so far as public vaccination is concerned, four-fifths of the community are left unprotected; and, as these are probably of the classes most liable to infection, it is equally clear that if small-pox were introduced so as to become epidemic, a very fearful tribute of lives would be exacted, not less perhaps than five thousand in Sydney alone; for small-pox spares none but the vaccinated, and of the number attacked twenty per cent. die, and a large percentage of the survivors bear traces all their lives, either in disfiguring scars—the least dangerous result—or in blindness, or in internal injury.

4. It is impossible to contemplate such a probability without feeling that strict preventive means are necessary. A little has been done this year (1859) by the re-appointment of Vaccinators in Parramatta, Windsor, and Goulburn; but as the number of births is annually increasing, it is not likely that these three appointments will do much more than keep up the present proportion of protection.

5. The average cost per case of the vaccinations, including Sydney, is four shillings $4s. 9\frac{1}{2}d.$ and nine-pence half-penny, varying from a little under half-a-crown at Newcastle to a little over twelve shillings at Bathurst.

1853.....	2,885
1854.....	1,842
1855.....	961
1856.....	1,523
1857.....	3,640
1858.....	1,174
	<hr/>
	6)12,028
	<hr/>
	2,004 $\frac{1}{2}$
	<hr/>

6. A philanthropic wish has been expressed, and an attempt has been made, to introduce a Bill for compulsory vaccination; and there can be little doubt that such a measure would be of great service in the towns, where small-pox is most to be expected and dreaded. In country districts, where population is thinly scattered, it would be difficult to enforce; but then small-pox does not so easily spread where there is little communication.

7. If I may venture to propose a plan in the meantime, it would be to change the mode of payment from a fixed sum to a payment per successful case. Let one Vaccinator be appointed to a district, say one in every principal town; by appointing only one he would be assured of a sufficient number of cases. Vaccination cannot be successfully carried on except when there is a sufficient number of children to allow choice of cases. It is not every vesicle which is fit to reproduce the disease, but a choice enables the Vaccinator to ensure success.

8. If a retaining fee of five pounds a year were given to each Vaccinator, to cover postage, advertisements, &c., and then if half-a-crown per case were given by the Government, I believe that a much larger amount of protection would be given for the same money, and that the cost per case would not be so large as it is now.

9. If this plan were adopted, and Vaccinators appointed in Liverpool, Camden, or Campbelltown, Braidwood, Queanbeyan, Yass, &c., to the south; Singleton, Murrurundi, Tamworth, Armidale, &c., to the north,—it is probable, nay certain, that a very large amount of vaccinations—the arrears of former years—would be performed even in the first year, and provision should be made accordingly. The expense might be considerable, but there would be something to shew for it, and, if proper precautions were taken, the payments would be in proportion to the safety of the Colony from an invasion of small-pox.

I have, &c.,

R. GREENUP,
Medical Adviser to the Government.

THE HONORABLE
THE COLONIAL SECRETARY.

1858-9.

Legislative Assembly.

NEW SOUTH WALES.

BUSINESS OF SOAP BOILING IN SYDNEY.

(PETITION FROM CERTAIN SOAP BOILERS.)

Ordered by the Legislative Assembly to be Printed, 3 February, 1859.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Soap Boilers in the City of Sydney,—

SHEWETH :—

That whereas an Act was passed by the Legislature of New South Wales, in the year of our Lord 1849, intituled, No. 42, "*An Act to amend the Law relating to the licensing of Slaughter Houses within the City and Suburbs of Sydney, and for the prevention of other nuisances within the same,*" in which it is declared that from and after the first day of January, 1860, the business of soap boiling shall not be carried on in the City of Sydney.

Your Petitioners humbly desire to represent to your Honorable House that they know of no just grounds on which this law should be enforced, the manufacture of soap being of a most healthy nature, and no complaints ever having been made against the calling which are not amply provided for in other enactments.

That no inconvenience has ever arisen to the Citizens on account of this calling.

That soap boiling has not been prohibited in London, Liverpool, Glasgow, or Dublin, nor in any other towns of Great Britain or Ireland.

That if the law be put in force against it, and the manufacture be removed from the City, a great loss will be sustained by the manufacturers; that the manufacture of soap for export will be greatly retarded, inasmuch as the price will be greatly enhanced in consequence of the additional carriage of tallow and other commodities which enter into the manufacture of soap, to the works out of town, and the carriage of the manufactured articles back again; besides which, they will have to keep up two establishments—one in the City and one out of it.

Your Petitioners humbly pray your Honorable House to take the foregoing allegations into your consideration, and repeal that portion of said Act that refers to soap boiling, or render your Petitioners such relief as your Honorable House shall deem meet.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 5 Signatures.]

1858-9.

4. Under Secretary for Lands and Public Works, in reply. 30 April, 1858.....	11

FORT MACQUARIE AND GARDEN ISLAND.

CORRESPONDENCE RELATIVE TO OCCUPATION OF FORT MACQUARIE BY NAVAL
AUTHORITIES.

No. 1.

THE COLONIAL SECRETARY to CAPTAIN ERSKINE, R.N.

*Colonial Secretary's Office,
Sydney, 16 June, 1851.*

SIR,

I am desired by the Governor General to transmit herewith, for your information, the accompanying copy of a Despatch, with its enclosures, which His Excellency has received from the Secretary of State, and in which, at the instance of the Lords of the Admiralty, His Lordship directs the use of Fort Macquarie to be reserved for Her Majesty's Naval Service. The necessary directions have accordingly been given, in order that the instructions of Earl Grey may be acted on.

I have, &c.,

E. DEAS THOMSON.

CAPTAIN ERSKINE, R.N.,

H. M. S. "Havannah,"

Senior Naval Officer

on the Australian Station.

[Enclosure 1 in No. 1.]

Military.—No. 45.

*Downing-street,
11 November, 1850.*

Sir,

Referring to the instructions which I addressed to you under date of the 21st of November in last year, No. 30, Military, relating to the transfer to the Colony of New South Wales of the Barracks and all Military Buildings and lands, I transmit herewith for your information copies of a letter and of its enclosure which I have received from the Board of Admiralty, conveying the request of the Lords Commissioners that in any arrangements which may be made with a view to carry into execution my instructions above referred to, the use of Fort Macquarie, between Sydney Cove and Farm Cove, may be secured to Her Majesty's ships for depositing their stores, &c., for such ships as may require them to refit at Port Jackson.

I have to instruct you to make arrangements accordingly for securing Fort Macquarie and its enclosure to the Naval Department.

Although I scarcely apprehend the Fort Macquarie will, under these instructions, have been transferred to the Colonial Government, yet I must remind you that Her Majesty's Government have, under my instructions above mentioned, expressly reserved to themselves the power of resuming possession of any of the buildings which it has been proposed to transfer. In other respects you will, I doubt not, be fully aware of the importance in the interest of the Colony of affording to the Naval Department of Her Majesty's Service every encouragement to form establishments at Sydney.

I have, &c.,

GREY.

Governor Sir Charles A. Fitz Roy,

&c., &c., &c.,

New South Wales.

[Enclosure 2 in No. 1.]

Admiralty, 4 November, 1850.

Sir,

My Lords Commissioners of the Admiralty having been informed that it is in contemplation to transfer the forts and buildings in New South Wales, at present in charge of the Ordnance Department, into the hands of the local Government, I am commanded by their Lordships to request you will state to Earl Grey that Fort Macquarie, at the point of land which separates Sydney Cove from Farm Cove, is most advantageously situated for the use of Her Majesty's ships and vessels refitting at Port Jackson, and, in the event of any considerable augmentation of the Naval Force in that quarter of the world, might be indispensable for Her Majesty's Naval Service.

By

By the permission of the Commanding Royal Engineer, the enclosure in question has hitherto been made use of by Her Majesty's ships refitting at the port, and from its proximity to the anchorage and the immediate vicinity of the stone pier from which the shipping procure their requisite supplies of water, My Lords consider that it would be for the interests of Her Majesty's Service to retain the use of the Fort in question for Naval purposes, and to secure to the Crown possession of the property, with a view to the construction of a Naval Depot, should such be required hereafter.

By the accompanying copy of a letter from the Colonel of Engineers on the spot, it appears that, in a defensive point of view, the occupation of the Fort by the Naval Department would be desirable, and, under these circumstances, though My Lords are unwilling, at the present moment, to incur any expense for the maintenance of the Fort and tenure of the enclosure, they request that Earl Grey will, in any arrangements that may be made, bear in mind the requirements of the Naval Service, and secure to Her Majesty's ships the use of the Fort, as heretofore, for depositing stores, &c., when occasion may require them to refit at Port Jackson.

Herman Merivale, Esq.,
&c., &c., &c.

I am, &c.,
W. A. B. HAMILTON.

[Sub-Enclosure.]

Royal Engineer's Office,
Sydney, 11 May, 1850.

Sir,

In reply to your letter of the 10th instant, in which you hint that the possession of Fort Macquarie would be very advantageous to Her Majesty's Naval Service in this quarter of the globe, for purposes of refitting, &c., and call for my opinion with reference to its eligibility for that purpose, in comparison with its utility as a defence,—

I have the honor to observe, that, as there appears to be a great probability that the protection of Sydney harbourward will be thrown almost entirely upon the Navy, the occupation of Fort Macquarie by that branch of Her Majesty's Service would be desirable even in a defensive point of view, and there can be no question whatever that it would be a great accommodation in the way of affording refitting facilities.

Captain Erskine,
Senior Naval Officer,
Australian Station.

I have, &c.,
F. BADDELEY, R.E.,
Lt.-Colonel.

No. 2.

THE BRIGADE MAJOR to THE COLONIAL SECRETARY.

Brigade Office, Sydney,
4 December, 1856.

SIR,

I have the honor to enclose a copy of a correspondence that has taken place between the Senior Naval Officer and the Colonel Commanding the Troops, on the occupation of Fort Macquarie by the Royal Navy; and I am instructed to state that Colonel Bloomfield begs most strongly to recommend that a suitable situation may be provided by the Colonial Government to enable the Navy to form an Establishment, to meet the exigencies of the Service, in lieu of Fort Macquarie, as the Fort is part of the Scheme of the Inner Defences of Port Jackson, consequently it would be improper that so essential a post should be left without a Garrison.

I have &c.,
THE HONORABLE AUGUSTUS. F. JENNER,
THE COLONIAL SECRETARY. M.B.
&c., &c., &c.

[Enclosure 1 in No. 2.]

Her Majesty's Ship "Juno" at
Sydney, 29 November, 1856.

Sir,

I beg leave to acknowledge the receipt of your letter dated November 28, in which you express a desire that I should not press for the occupation of Fort Macquarie at present, and giving me two reasons why the reversion of the Fort to the Navy would be attended with inconvenience to the Military Department.

I would not trouble you with any further communication on the subject, were it not that great inconvenience will be suffered by Her Majesty's ships, should they be altogether deprived of that spot of ground, to carry out the operations indispensably required in course of service at the Head Quarters of the Station, and which was so positively secured to the Navy by Earl Grey's letter of November, 1850.

Your

Your first objection implies a permanent retention of Fort Macquarie, which was never contemplated, and, in fact, expressly guarded against by the terms of Captain Fitzgerald's letter. It can therefore hardly be expected that I should acquiesce in an arrangement which has a tendency to cripple the resources of the Navy on this distant Station.

In requesting you to take this case again into your consideration, I disclaim all intention of pressing the claims of one Service to the prejudice of another. The grant of any other situation convenient for forming an establishment would meet the exigencies of the Naval Service equally well, and would, I conceive, meet the sanction and approval of My Lords Commissioners of the Admiralty, if secured as fully as Fort Macquarie is at present.

I have, &c.,

STEPHEN G. FREEMANTLE,
Captain and Senior Naval Officer in Australia.

Colonel H. K. Bloomfield,
Commandant,
&c., &c., &c.,
Brigade Office.

(True Copy.)

AUGUSTUS F. JENNER,
M. B.

[Enclosure 2 in No 2.]

Brigade Office,
Sydney, 28 November, 1856.

Sir,

I have the honor of acknowledging the receipt of your letter of the 27th instant, requesting to be informed when it will be convenient to restore Fort Macquarie to the Naval Department; and, in reply, I beg to state that it will be particularly inconvenient to the Army Branch of the Service to hand over the building, &c., for the following reasons:—

1st. The Fort is part of the scheme of the Inner Defences of Port Jackson; and, secondly, the Fort is garrisoned by the Royal Artillery, and relieves the Victoria Barracks, now in a very crowded state, of a certain portion of those for whom additional accommodation would be required.

I trust under these circumstances you will not press your claim for possession at present.

I have, &c.,

H. K. BLOOMFIELD, Col.
Commanding Troops.

Captain Freemantle,
Senior Officer, Royal Navy,
Port Jackson.

(True Copy.)

AUGUSTUS F. JENNER,
M. B.

[Enclosure 3 in No. 2.]

Her Majesty's Ship "Juno," at
Sydney, 27 November, 1856.

Sir,

I beg leave to call your attention to a letter from my predecessor, Captain Fitzgerald, dated October 18th, 1854, relating to the temporary occupation by a detachment of the 11th Regiment of Fort Macquarie; and to request that you will have the goodness to inform me when it will be convenient to restore the Fort to the Naval Department, agreeably to the letter of Her Majesty's Secretary of State for the Colonies, dated 11th November, 1850.

I have, &c.,

STEPHEN G. FREEMANTLE,
Captain and Senior Naval Officer in Australia.

Colonel H. K. Bloomfield,
Commandant,
&c., &c., &c.,
Brigade Office.

(True Copy.)

AUGUSTUS F. JENNER,
M. B.

GARDEN ISLAND.—OCCUPATION OF.

No. 1.

THE COLONIAL SECRETARY to THE SENIOR NAVAL OFFICER.

Colonial Secretary's Office,
Sydney, 8 December, 1856.

SIR,

With reference to the correspondence that has passed between you and the Colonel commanding the Troops, respecting the occupation of Fort Macquarie by the Royal Navy, I am directed to point out to you that it would be a serious inconvenience to the Military to be compelled to hand over the Fort to the Navy at present, and that such an arrangement would, in time of war, be altogether incompatible with the system which has been pursued for the defence of the Harbour.

I

I am directed to add, that the Government will gladly make any arrangements for the convenience of the Navy which you may think advisable, and to suggest that a part, or the whole, of Garden Island, might be given over for the use of the Navy, in lieu of Fort Macquarie.

I have, &c.,

CAPTAIN FREEMANTLE, R. N.,
Senior Naval Officer.

W. ELYARD.

No. 2.

THE SENIOR NAVAL OFFICER to THE COLONIAL SECRETARY.

*Her Majesty's Ship "Juno," at
Sydney, 9 December, 1856.*

SIR,

I have the honor to acknowledge the receipt of your letter of the 8th instant, with reference to the occupation of Fort Macquarie, in which, on the part of the Government, you suggest that a part, or the whole, of Garden Island, should be given over for the use of the Navy, in lieu of Fort Macquarie. I beg leave to inform you, in reply, that I am perfectly willing to acquiesce in the proposal of the Government, of course with the understanding that Garden Island is to be secured to the Naval Department in the same manner as the Fort now is; and therefore I think it desirable that there should be no division of Garden Island, but that the Naval Authorities will be bound not to erect any buildings or works on that part of the island which might be required hereafter for adding to the Defences of the Harbour.

This arrangement must be considered as subject to the approval of My Lords Commissioners of the Admiralty, without whose sanction I feel myself unauthorised to act finally.

I have, &c.,

THE HONORABLE

STEPHEN G. FREEMANTLE.

HENRY WATSON PARKER, M.P.,
&c., &c., &c.,
Colonial Secretary.

MEMO.

Colonel Barney should perhaps see this, as well in his capacity of Surveyor General as having charge practically of the Fortifications.

Yes.

Blank cover, 16 December, 1856.

M. F.

COLONEL BARNEY'S REPORT.

I see no objection to the occupation of Garden Island for Naval purposes. The portion of the island that may possibly be required hereafter for the Defences is the elevated ground at the northern end of the island. This part, therefore, I think, should not be built upon by the Navy.

GEO. BARNEY,

18 Dec., 1856.

No. 3.

THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to THE PRINCIPAL UNDER SECRETARY.

*Department of Lands and Public Works,
Sydney, 22 December, 1856.*

SIR,

In returning to you the accompanying papers on the subject of the proposed substitution of Garden Island for Fort Macquarie for the use of the Navy, I am directed to apprise you, for the information of the Honorable the Colonial Secretary, that Colonel Barney, R. E., to whom the papers were referred, as well in his capacity of Surveyor General as having charge practically of the Fortifications, states that the portion of the

FORT MACQUARIE AND GARDEN ISLAND.

island which may possibly be required hereafter for Defences is the elevated ground at the northern end of the island; this part, therefore, he is of opinion, should not be built upon by the Navy.

THE UNDER SECRETARY,
Colonial Secretary's Office.

I have, &c.,
MICHL. FITZPATRICK.

No. 4.

THE PRINCIPAL UNDER SECRETARY to THE SENIOR NAVAL OFFICER.

Colonial Secretary's Office,
Sydney, 31 December, 1856.

SIR,

With reference to your letter of the 9th instant, in which you express your willingness to acquiesce in the proposal of the Government to substitute Garden Island for Fort Macquarie for the use of the Navy—the Naval Authorities binding themselves not to erect any buildings or works on that part of the island which might be required hereafter for adding to the Defences of the Harbour,—I am directed to transmit the enclosed copy of a communication from the Secretary for Lands and Public Works, from which it appears that the portion which may possibly be required hereafter for that purpose is the elevated ground at the northern end of the island, and to remark that it is not imagined that there will be any wish on the part of the Navy to erect buildings on that spot.

See No. 3 in
Schedule.

CAPTAIN FREEMANTLE, R. N.,
Senior Naval Officer.

I have, &c.,
W. ELYARD.

No. 5.

THE SENIOR NAVAL OFFICER to THE COLONIAL SECRETARY.

Her Majesty's Ship "Juno," at
Sydney, 5 January, 1857.

SIR,

I have to acknowledge the receipt of your letter, dated 31st ultimo, enclosing a report from the Department of Public Works relative to Garden Island, and, should the proposed transfer be carried into effect, I will take proper precautions that the portion of the island therein described shall be reserved for the purpose of any Military Defences which may hereafter be projected. At the same time, I beg leave to call your attention to my not having as yet received any direct intimation that Garden Island has been *bona fide* handed over to the Royal Navy, on the same footing as Fort Macquarie, which I shall be glad to be furnished with at your convenience, in order that the transaction may be submitted to My Lords Commissioners of the Admiralty, for their consideration and sanction.

THE HONORABLE
HENRY WATSON PARKER, M. P.,
&c., &c., &c.,
Colonial Secretary.

I have, &c.,
STEPHEN G. FREEMANTLE.

No. 6.

THE PRINCIPAL UNDER SECRETARY to THE SENIOR NAVAL OFFICER.

Colonial Secretary's Office,
Sydney, 10 January, 1857.

SIR,

In acknowledging the receipt of your letter of the 5th instant, relative to the portion of Garden Island being substituted for Fort Macquarie for the use of the Navy, I am directed to inform you, with reference to my communication of the 31st ultimo, that the portion of the above island which is not likely to be required for the purpose of any Military Defences that may hereafter be projected will be reserved by the Government for the use of the Navy, on the same footing as Fort Macquarie was reserved for a like purpose.

CAPTAIN FREEMANTLE, R. N.,
Senior Naval Officer.

I have &c.,
W. ELYARD.

No. 7.

THE PRINCIPAL UNDER SECRETARY to THE UNDER SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Colonial Secretary's Office,
Sydney, 10 January, 1857.*

SIR,

In acknowledging the receipt of your letter of the 22nd ultimo, I am directed to state, for the information of the Secretary for Lands and Public Works, that the Senior Naval Officer has been apprised, in reply to a communication from him of the 5th instant, of which I enclose a copy, that the portion of Garden Island not likely to be required for any Military Defences that may hereafter be projected, will be reserved by the Government for the use of the Navy, on the same footing as Fort Macquarie was reserved for a like purpose. See No. 5 in Schedule.

I have, &c.,

THE UNDER SECRETARY
FOR LANDS AND PUBLIC WORKS.

W. ELYARD.

No. 8.

THE PRINCIPAL UNDER SECRETARY to THE SENIOR NAVAL OFFICER.

*Colonial Secretary's Office,
Sydney, 28 August, 1857.*

SIR,

Referring to the correspondence which took place last year between your predecessor and this Office relative to the substitution of such portion of Garden Island as may not be required for military defences, for Fort Macquarie, as a place for the deposit of stores for such vessels of the Royal Navy as may require to refit at Port Jackson,—I am directed to forward herewith the copy of a Despatch from the Secretary of State, covering the copy of a communication from the Secretary to the Lords Commissioners of the Admiralty, and notifying his concurrence in their Lordships' approval of the arrangement above alluded to.

I have, &c.,

CAPTAIN LORING, R. N.,
H. M. Ship "Iris,"

W. ELYARD.

In command of the Australian Station.

[Enclosure 1 in No. 8.]

(No. 65.)

*Downing-street,
2 June, 1857.*

Sir,

I have to acknowledge the receipt of your Despatch No. 43, of the 28th February, with copies of a correspondence which had passed between the Senior Naval Officer on the Australian Station and the local authorities, respecting the substitution of Garden Island for Fort Macquarie as a place for the deposit of stores for such vessels as may require to refit at Port Jackson.

The enclosed is a copy of the reply from the Secretary to the Lords Commissioners of the Admiralty, to whom your Despatch was referred, and I concur in their Lordships approval of the arrangements.

I have, &c.,

Governor Sir Wm. Denison, K.C.B.,
&c., &c. &c.,
New South Wales.

H. LABOUCHERE.

[Enclosure 2 in No. 8.]

Admiralty, 25 May, 1857.

Sir,

Having received and laid before My Lords Commissioners of the Admiralty your letter of the 23rd instant, enclosing copy of a Despatch from the Governor of New South Wales, with copies of a correspondence which had passed between the Senior Naval Officer on that Station and the local authorities, respecting the substitution of Garden Island for Fort Macquarie as a place for the deposit of stores for such vessels as may require to refit at Port Jackson, and requesting to be informed whether My Lords concur in this arrangement,—

I am commanded by their Lordships to acquaint you, for the information of Mr. Secretary Labouchere, that they approve of the arrangements.

I am, &c.,

H. Merivale, Esq.,
Colonial Office.

W. G. ROMAINE.

No. 9.

THE PRINCIPAL UNDER SECRETARY to UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

*Colonial Secretary's Office,
Sydney, 28 August, 1857.*

SIR,

Referring to my letter of the 10th January last, I am directed to enclose, for the information of the Secretary for Lands and Public Works, a copy of a Despatch from the Secretary of State, communicating the approval of the Home Authorities to the substitution of Garden Island for Fort Macquarie as a place for the deposit of stores for such vessels of the Royal Navy as may require to refit at Port Jackson.

See enclosures
to No. 8.

I have, &c.,

THE UNDER SECRETARY
FOR LANDS AND PUBLIC WORKS.

W. ELYARD.

No. 10.

THE SENIOR NAVAL OFFICER to THE GOVERNOR GENERAL.

*"Iris," at Sydney,
26 August, 1857.*

SIR,

I have the honor to acquaint you that I have received a letter from My Lords Commissioners of the Admiralty, approving of the arrangements made by Captain Freemantle, of H.M.S. "Juno," relative to the substitution of Garden Island in lieu of Fort Macquarie for Naval purposes.

As in delivering over Garden Island to the Naval Authorities it has been stipulated that "buildings or works are not to be erected on that part of the island which might be required hereafter for adding to the Defences of the Harbour," I think it advisable that certain boundaries should be agreed upon between myself and the Commandant of the Troops within which no Naval building shall be erected.

And as for many reasons it is desirable that the full advantage of the insular character of the place should be secured to the Naval Service, I think it advisable that it should be distinctly understood that no person can be permitted to land or remain on Garden Island contrary to the regulations of the Senior Naval Officer, except for Military purposes connected with the Defences of the Harbour.

I have &c.,

HIS EXCELLENCY

SIR W. DENISON, K. C. B.,
Governor General,
New South Wales.

W. LORING,

Captain in Command
of the Australian Station.

No. 11.

THE PRINCIPAL UNDER SECRETARY to THE SENIOR NAVAL OFFICER.

*Colonial Secretary's Office,
Sydney, 31 August, 1857.*

SIR,

In acknowledging the receipt of your letter of the 26th instant, respecting the substitution of Garden Island for Fort Macquarie, for Naval purposes,—

I am directed to inform you, that a reference has been made to the Secretary for Lands and Public Works, with a view to a report being obtained from Colonel Barney, R.E., on the subject of the marking off the portion of the island that may possibly be required for works of defence.

2. With respect to your remark on the subject, I am directed to state that it will of course be in your power to make any such regulations as you may think proper as to landing on the island, &c.

I have &c.,

CAPTAIN LORING R.N.

H.M. ship "Iris,"
In Command of the Australian Station.

W. ELYARD.

No. 12.

THE PRINCIPAL UNDER SECRETARY to THE UNDER SECRETARY FOR LANDS AND
PUBLIC WORKS.

*Colonial Secretary's Office,
Sydney, 29 August, 1857.*

SIR,

Referring to my letter of the 28th instant, I am directed to enclose, for the information of the Secretary for Lands and Public Works, a copy of a communication from Captain Loring, of H.M.S. "Iris," in command of the Australian Station, on the subject of the substitution of Garden Island for Fort Macquarie for Naval purposes; and to state that the Governor General thinks that arrangements had better be made to mark off the portion of the island which may probably be required for works of defence. See No. 10 in Schedule.

2. I am further to request that you will invite Mr. Secretary Hay to cause Colonel Barney to be instructed to report upon the subject.

I have, &c.,
W. ELYARD.

THE UNDER SECRETARY
FOR LANDS AND PUBLIC WORKS.

Ask Colonel Barney to report, as requested.

M. F.
B. C. 1 September.

COLONEL BARNEY'S REPORT.

Sydney, 10 November, 1857.

Sir,

With reference to the instruction conveyed by your B. C. of 1st September last, on the subject of marking off the portion of Garden Island which it appears necessary should be reserved for Defences,—

I have now the honor to enclose a tracing of Garden Island, taken from a plan prepared by the officers of H. M. S. "Herald," upon which I have marked a line, A B, and to suggest that the portion of the island to the northward of that line be reserved for Defences. At the same time it occurs to me that Government should hold the power of resuming the whole island, should circumstances arise to render such a course necessary.

I have, &c.,
GEO. BARNEY,
Lieut.-Col.

This may perhaps be approved, and the line marked on the ground approved.

JOHN R.
23 March.

Returned to Colonel Barney for this purpose.

M. F.
B. C. 24 March, 1858.

Line marked on the ground, and Captain Loring, commanding H. M. S. "Iris," supplied with a copy of the tracing.

G. B.
4 May, 1858.

No. 13.

THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to THE PRINCIPAL UNDER
SECRETARY.

*Department of Lands and Public Works,
Sydney, 8 May, 1858.*

SIR,

In reference to your letter of the 29th August last, No. 293, respecting the substitution of Garden Island for Fort Macquarie for Naval purposes, and the marking off of a portion thereof, which may probably be required for works of defence,—

I am now directed to inform you that, under the suggestion of Colonel Barney, R.E., the Secretary for Lands and Public Works has approved of that portion of Garden Island

lying north to a line marked A and B in the enclosed tracing, being reserved for purposes of defence:

2. Colonel Barney, I am to add, reports, that the line alluded to has been marked on the ground, and a copy of the tracing supplied to Captain Loring, of H. M. S. "Iris."

I have, &c.,

THE PRINCIPAL UNDER SECRETARY.

MICHL. FITZPATRICK.

No. 14.

THE PRINCIPAL UNDER SECRETARY to THE SENIOR NAVAL OFFICER.

*Colonial Secretary's Office,
Sydney, 12 May, 1858.*

SIR,

Referring to my letter of the 31st August last, I am now directed to inform you that it appears, from a communication received from the Department of Lands and Public Works, that the line shewing the portion of Garden Island which is to be reserved for purposes of defence has been marked on the ground, and that a copy of the tracing shewing such line has been supplied to you by Colonel Barney, R. E.

I have, &c.,

CAPTAIN LORING, R. N.,

W. ELYARD.

H. M. Ship "Iris,"

In Command of the Australian Station.

COTTAGE ON GARDEN ISLAND.—ERECTION OF.

No. 1.

THE SENIOR NAVAL OFFICER to THE GOVERNOR GENERAL.

*"Iris," at Sydney,
15 April, 1858.*

SIR,

[*Extract.*]

In exchanging Fort Macquarie for Garden Island, for the use of Her Majesty's Ships on this Station, I find much inconvenience owing to there being no cottage or guard-room to shelter the people whom I find it necessary to leave there at night. At Fort Macquarie the tower over the gateway answered this purpose very well.

I request that you will take this subject into your favorable consideration, and bring it to the notice of your Executive Council, in order that a sum of money may be placed at my disposal for the purpose of erecting a small cottage or guard-house on the island.

I have, &c.,

HIS EXCELLENCY

WILLIAM LORING,

SIR W. DENISON, K. C. B.,

Captain in Command

&c., &c., &c.,

of the Australian Station.

Governor General,

New South Wales.

No. 2.

THE PRINCIPAL UNDER SECRETARY to THE SENIOR NAVAL OFFICER.

*Colonial Secretary's Office,
Sydney, 27 April, 1858.*

SIR,

[*Extract.*]

With reference to your letter of the 15th instant, I am directed by the Colonial Secretary to inform you, that His Excellency the Governor General has brought under the notice of the Executive Council the following matters which have been submitted for the consideration of the Government in your communication:—

2. In the first place, you expressed a wish that sufficient means might be placed at your disposal for the erection of a small cottage or guard-house on Garden Island, for the accommodation

accommodation of working parties, and the men you have found it necessary to leave in charge of the forge and other stores landed from the "Iris" during her stay in port; this accommodation having formerly been provided in the tower at Fort Macquarie, but necessarily withdrawn when the Fort was required for Colonial purposes, and Garden Island used in lieu thereof.

3. These questions having been duly considered by the Government, I am directed to inform you, in respect to the first of them, that a sum of £200 will be placed upon the Supplementary Estimate for 1858 to be submitted to the local Legislature, for the purpose of erecting the necessary building on Garden Island.

CAPTAIN LORING, R. N.,
H. M. S. "Iris,"
In Command of the Australian Station.

I have, &c.,
W. ELYARD.

No. 3.

THE PRINCIPAL UNDER SECRETARY to THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS.

*Colonial Secretary's Office,
Sydney, 27 April, 1858.*

SIR,

I am directed to request that you will move the Honorable the Secretary for Lands and Public Works to cause a sum of £200 to be placed on the Supplementary Estimate for 1858 for the erection of a cottage on Garden Island for the accommodation of Naval working parties, and the man whom Captain Loring has found it necessary to leave in charge of the forge and other stores landed from H. M. Ship "Iris" during her stay in port.

I have, &c.,
W. ELYARD.

THE UNDER SECRETARY
FOR LANDS AND PUBLIC WORKS.

No. 4.

THE UNDER SECRETARY FOR LANDS AND PUBLIC WORKS to THE PRINCIPAL UNDER SECRETARY.

*Department of Lands and Public Works,
Sydney, 30 April, 1858.*

SIR,

In acknowledging the receipt of your letter of the 27th instant, I am directed to inform you, that the Honorable the Secretary for Lands and Public Works has been pleased to cause the sum of two hundred pounds to be placed on the Supplementary Estimates for 1858, for the erection of a cottage on Garden Island, for the accommodation of Naval working parties, &c., in accordance with the request contained in your letter above alluded to.

I have, &c.,
MICHL. FITZPATRICK.

THE PRINCIPAL UNDER SECRETARY.

Legislative Assembly.
NEW SOUTH WALES.

WYNYARD SQUARE.

(PETITION FROM LANDED PROPRIETORS, &c.)

Ordered by the Legislative Assembly to be Printed, 29 March, 1859.

To the Honorable the Members of the House of Assembly, in Parliament assembled.

The Petition of Landed Proprietors and Residents in the vicinity of Wynyard Square, in the City of Sydney,—

RESPECTFULLY SHEWETH,—

That about ten years ago several of your Petitioners became purchasers of land in that locality from the Government, at a public sale, for which land they paid very high prices.

That several of your Petitioners have also erected large and costly buildings thereon.

That at such time when your Petitioners became purchasers as aforesaid, a plan was exhibited, by which it was shewn that it was intended to form a public square in front of several of the allotments so offered for sale.

That several of your Petitioners were thereby induced, not only to purchase, but to give high prices for these allotments so situated in Wynyard Square.

That, notwithstanding so many years have elapsed, and notwithstanding some verbal promises by a former Government to carry out the first intentions to form a public square in the place named, and notwithstanding the rights of the purchasers in respect hereof, the ground has not been formed into a public square even up to this time, and not only so, that by reason of it having been for some time past the depository for the street sweepings and other filth, it has become a public and dangerous nuisance, and has very much depreciated the value of property in the vicinity.

Your Petitioners, therefore, humbly pray that your Honorable House will take these grievances into your consideration, and render your Petitioners that justice in the premises which all the facts of the case may upon due inquiry be found to entitle them to.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 39 signatures.]
