

17 MAR 2010

Ms Lynn Lovelock
Clerk of the Parliaments
Legislative Council
Parliament House
Sydney NSW 2000

Dear Ms Lovelock

Request for Papers – Tillegra Dam – Further Order (25 February 2010)

I refer to the resolutions of the Legislative Council under Standing Order 52 made on 25 February 2010, concerning Tillegra Dam – Further Order (25 February 2010).

I am now delivering to you the documents referred to in resolution 3.

The documents have been obtained from the Hunter Water Corporation.

Enclosed at **Annexure A** is a certification letter from the Hunter Water Corporation indicating that, to the best of their knowledge, all documents held and covered by the terms of the resolution have been provided.

Enclosed at **Annexure B** is the index of all non-privileged documents that have been provided in response to the resolution.

In accordance with Item 5(a) of Standing Order 52, those documents for which a claim for privilege has been made have been separately indexed and the case for privilege has been noted.

Enclosed at **Annexure C** is the index of all privileged documents and a submission in support of the case for privilege.

Should you require any clarification or further assistance please do not hesitate to contact Ms Rachel McCallum, Acting Executive Director, Legal Branch on (02) 9228 5543.

Yours sincerely

Brendan O'Reilly
Director General

Ms Rachel McCallum
Acting Executive Director, Legal Branch
Department of Premier and Cabinet
Level 37, Governor Macquarie Tower
1 Farrer Place
SYDNEY NSW 2000

Dear Ms McCallum

**RE: STANDING ORDER 52 – ORDER FOR PAPERS – TILLEGRA DAM –
RESOLUTION NO. 3**

I refer to your letter dated 1 March 2010 and Standing Order 52 which requested information regarding the Tillegra Dam and the H250 Plan: Securing Our Water Future.

I certify to the best of my knowledge all documents held by the Hunter Water Corporation and covered by the terms of the resolution have been provided. The documents have been provided in confidence and I request that you both receive and deal with the documents in confidence. Documents have also been provided which are subject to legal professional privilege and as such the privilege has not been waived.

Privilege documents have been classified in the following categories:

Legal Professional Privilege

These documents include confidential communications between the Corporation and its legal advisers including documents, agreements, negotiations and strategies for dispute resolution.

Commercial-In-Confidence

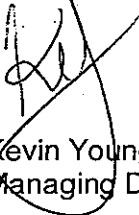

These are documents held in the strictest confidence, and include reports, background papers, tender documents and tender assessments, including award of tenders which, if disclosed, may prejudice the interests of third parties and the ongoing financial performance of the Corporation. Also includes agreements, drafts and ongoing negotiations between the Corporation and third parties which may include confidentiality clauses and which, if disclosed:

- a) may be a breach of agreement; or
- b) may prejudice the interests of a third party.

A submission in support for claim of confidentiality and privilege by the Hunter Water Corporation is enclosed.

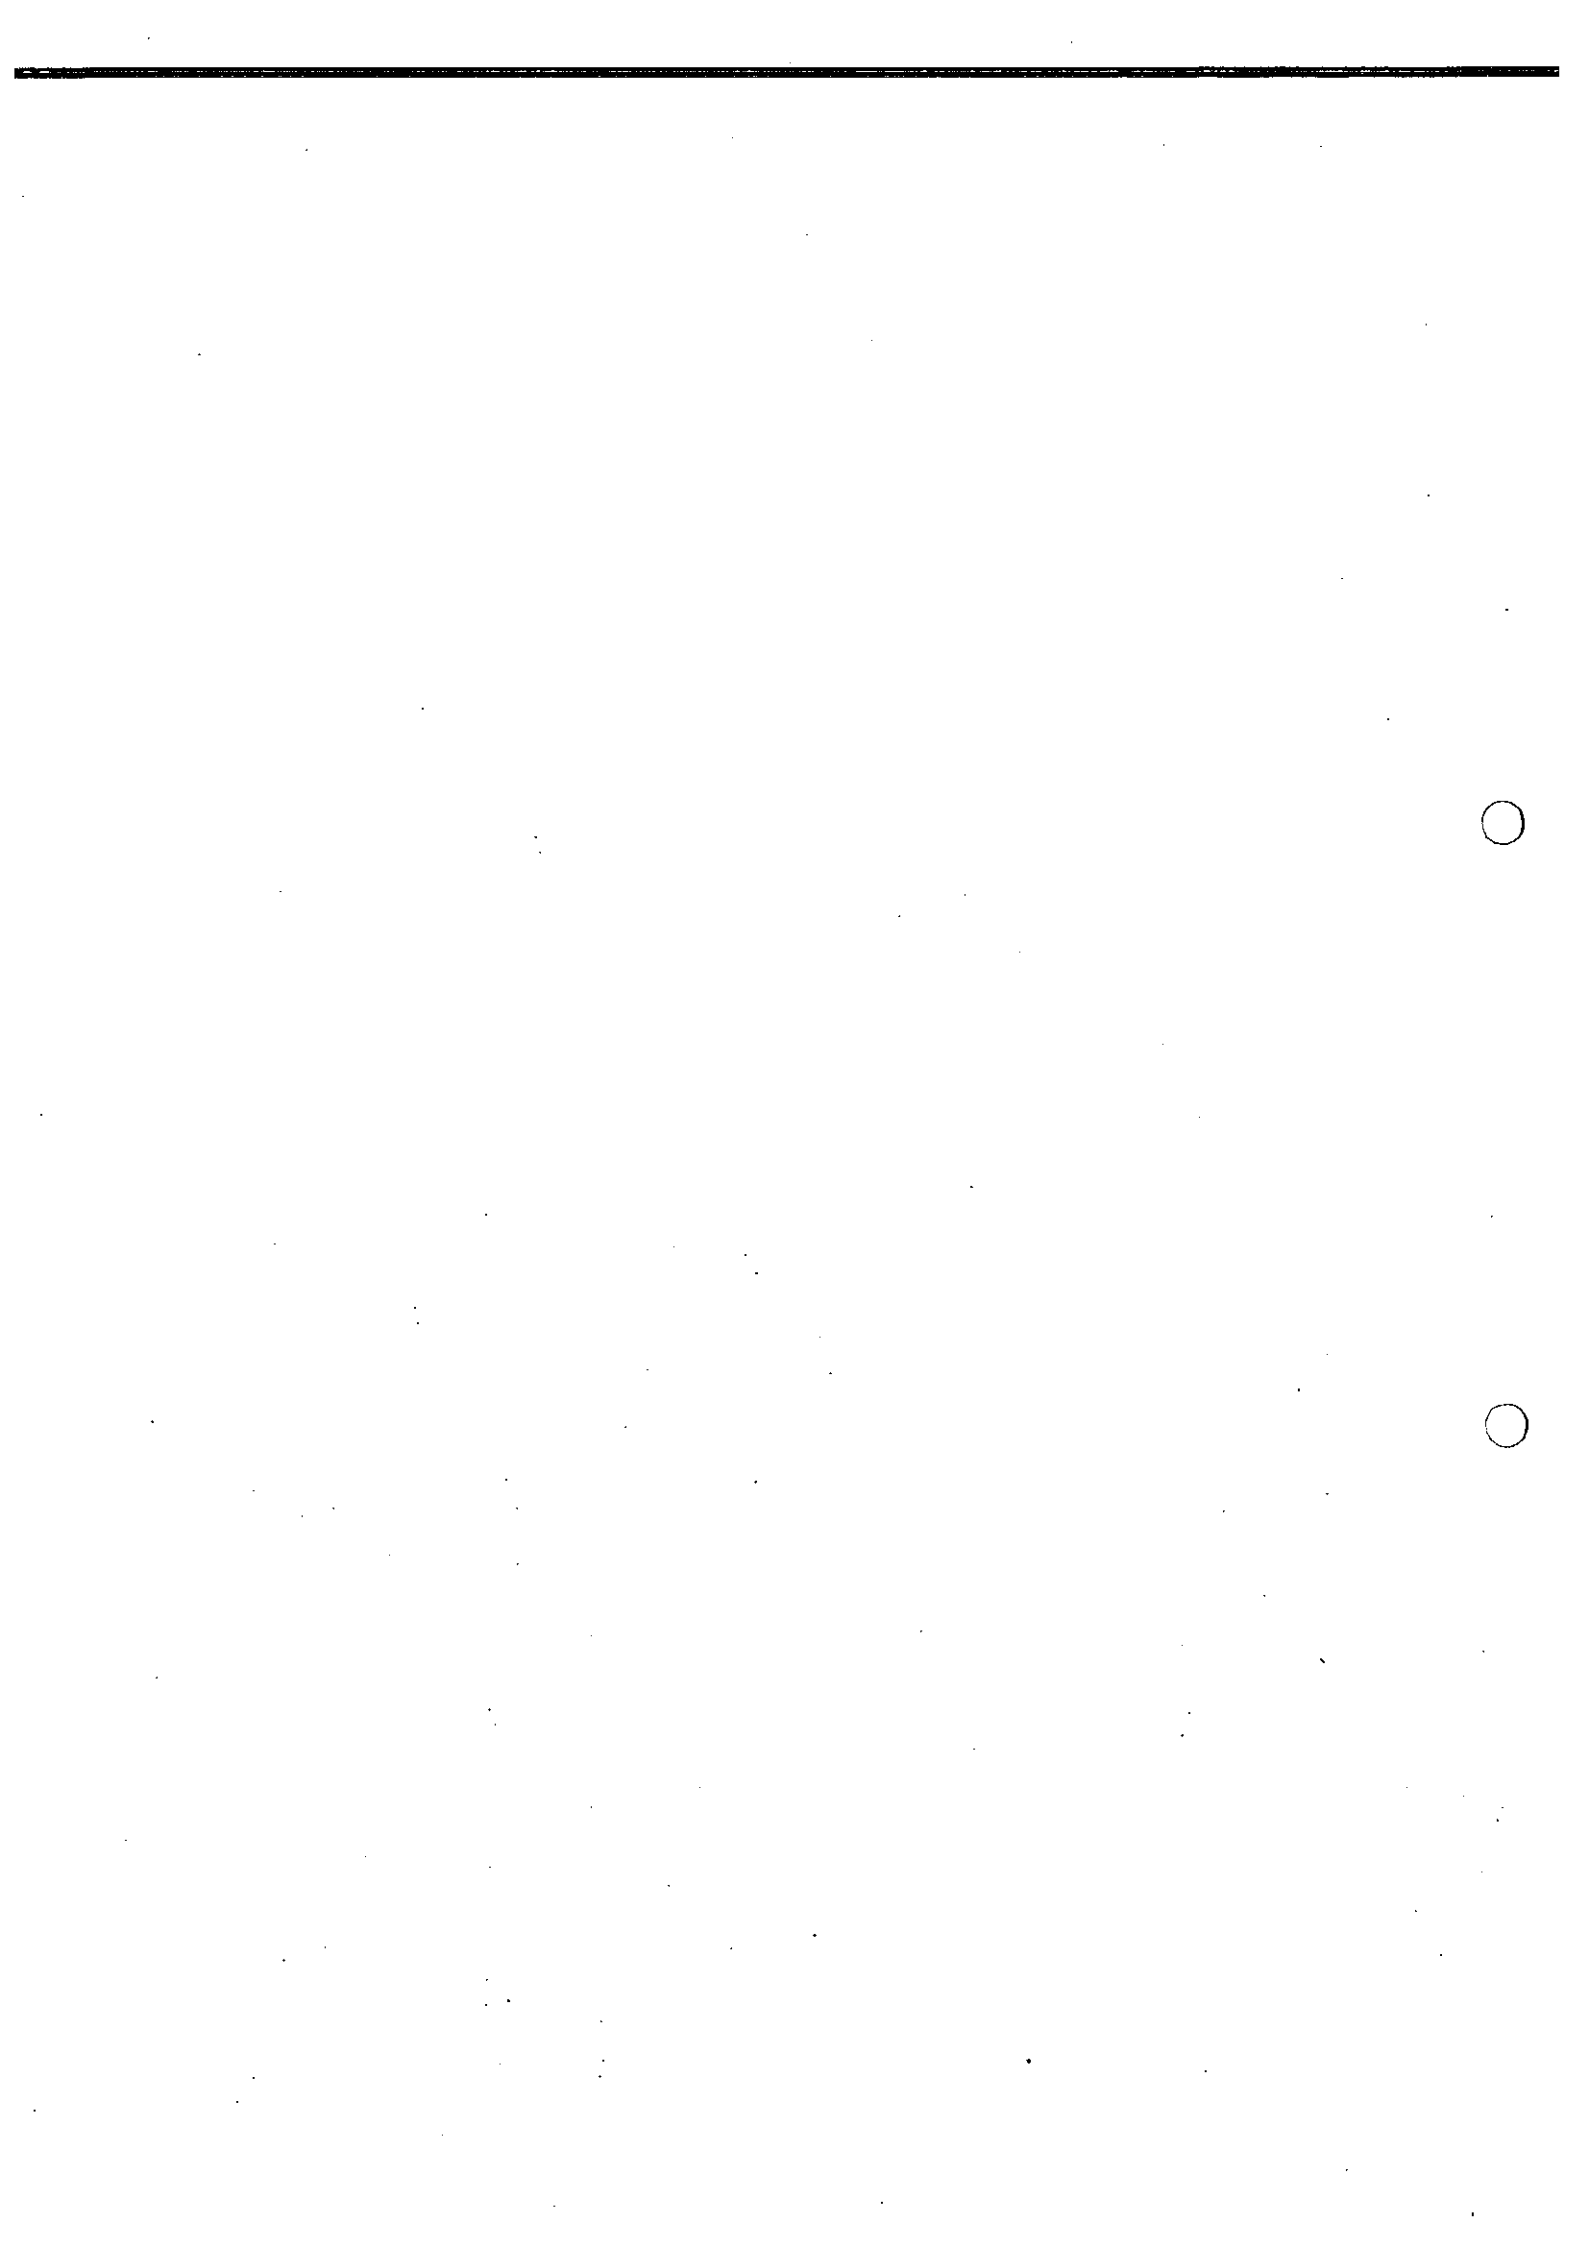

Yours sincerely

A handwritten signature in black ink, appearing to read 'Kevin Young', written over a circular stamp or mark.

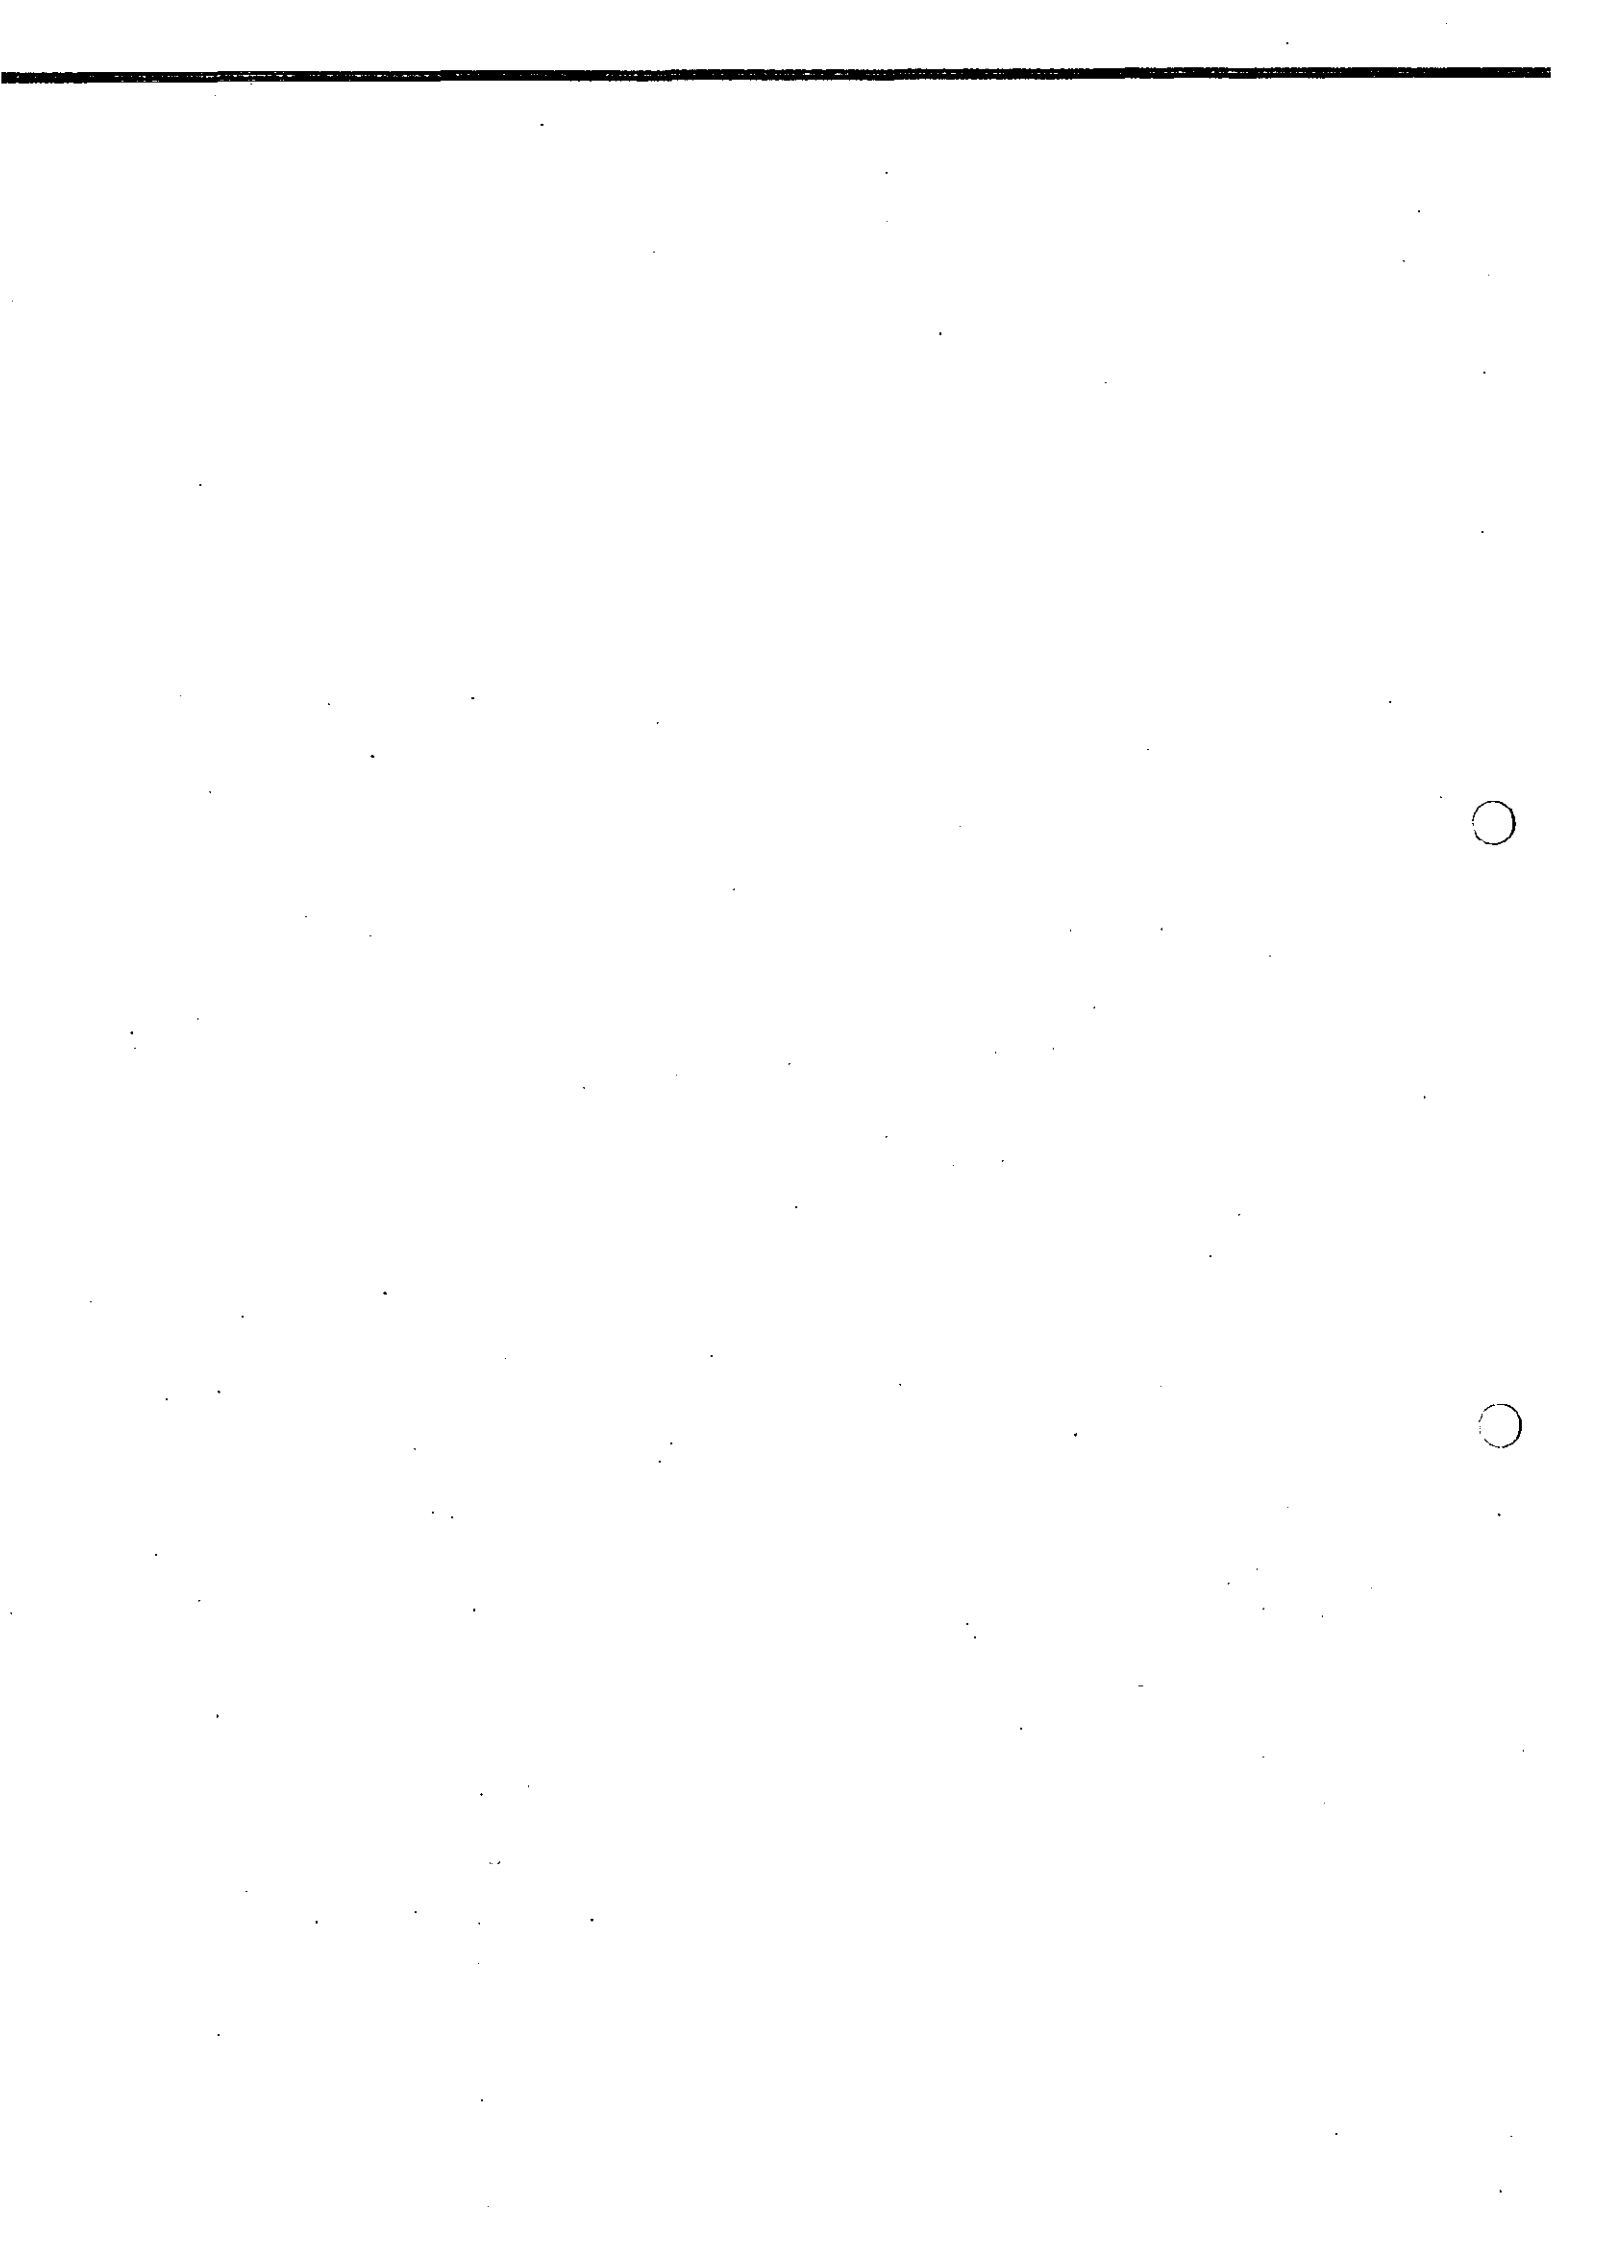

Kevin Young
Managing Director

SUBMISSION IN SUPPORT OF CLAIM FOR CONFIDENTIALITY AND PRIVILEGE BY THE HUNTER WATER CORPORATION

Documents have been provided which are subject to legal professional privilege and as such the privilege has not been waived. This is also the case for commercial-in-confidence information that has been provided.

Claims for legal professional privilege

It is submitted that those documents marked in the index as "Legal Professional Privilege" include legal advice and should not be made public. Legal professional privilege can be claimed on communications between a client and a lawyer which are confidential and are for the dominant purpose of:

- a) giving or receiving legal advice; or
- b) for use in legal proceedings.

Some of the documents included are emails and letters between HWC and Blake Dawson Solicitors. As these communications constitute legal advice, they are subject to legal professional privilege and so access to these documents needs to remain confidential.

Claims for commercial-in-confidence privilege

It is submitted that those documents marked in the index as "Commercial-In-Confidence" pertain to HWC's budgeting process to deal with land acquisitions and project costs. The public interest of releasing this information is to be weighed against the affect that the release of this information may have on the financial affairs of HWC along with the flow on impact that this may have to the general public. If the land purchase prices were to be released this could be used as a bargaining tool by landowners when negotiating with HWC to obtain higher prices. If that were to occur it may result in HWC needing to increase water and sewerage costs to recover unbudgeted losses through escalation costs due to projects being delayed as a result of protracted negotiations with landholders and potentially increased land purchase costs.

It is submitted that a range of documents associated with land acquisitions which have been negotiated directly between the landholder and their agents and Hunter Water can be claimed for "Commercial-in-Confidence" privilege. The commercial terms of all such land acquisitions are subject to Deed of Confidentiality between the landowner, Hunter Water and any directly affected third party. As such the release of such documents could result in Hunter Water being in breach of the Deed of Confidentiality resulting in an action for breach of contract.

In weighing the public interest in the decisions of agencies being open to public scrutiny HWC has considered the major function of HWC which is to operate a successful business and the effect that the release of the business and financial information may have on the business affairs of HWC. This is of increasing significance given the introduction of the *Water Industry Competition Act 2006*. The release of this information could diminish the commerciality of HWC as its competitors would be able to use this information to identify any budget issues or opportunities that it could use to its advantage against HWC.

HWC's competitors currently are from the private sector which is not exposed to the same level of openness in its dealings. This creates an unfair advantage to HWC's competitors and potential competitors. As stated above, the release of the information may have a flow on impact to HWC's customers if HWC's budget and financial information is released to the public. On balance, HWC is of the view that there is a greater public interest in maintaining the confidentiality of the budgeting information contained within the documents identified.

The release of preliminary budgets, estimates, projections and forecasts for the construction of Tillegra Dam and associated projects, and HWC revenue streams would provide competitors with information that would have an adverse affect on the business of HWC. Competitors would be in a position to take advantage of the planning and analysis undertaken at considerable cost to HWC to compete against HWC for the supply of alternate water sources and infrastructure.

Furthermore, the release of information in a preliminary stage would be extremely misleading as it is not based on full information which will distort the information and give the public false information upon which HWC and the Minister have made decisions.

Some of the financial information relates to projections for years to come and does not consider all the variables. Furthermore the pricing structure is set by IPART after public consultation. The information that is made available to the public covers a shorter period of time and is based on full information. Premature release of this information would have a negative impact on the community and could potentially affect future pricing and provide competitors with valuable information in which to compete against HWC for business.

HWC has expended considerable internal resources to develop preliminary costings, develop forecasting models and develop budgets for the construction of Tillegra Dam and associated projects, and HWC revenue streams. This information is inherently valuable to HWC as it guides future investigations, projects and budgets. The information is kept secret and is only disclosed to officers within HWC who are directly responsible with the decision making process or technical processes relating to the construction of Tillegra dam and associated projects, and revenue streams within the business of HWC or the minister.

In terms of any public interest in releasing the preliminary budgets, estimates, projections and forecasts for the construction of Tillegra Dam and associated projects, and forecast HWC revenue streams, HWC is of the view that this is outweighed by the detriment to HWC and the community which would result from releasing such preliminary financial information, which was prepared for internal purposes only, which is incomplete, which could be open to misinterpretation and use by HWC's commercial competitors to the detriment of HWC's financial affairs.

Detailed budget figures reveal how much HWC is expecting (and has allowed in their budget) to pay for the construction of Tillegra Dam and associated projects. It would adversely affect HWC's financial interests if these amounts were released. If third parties had access to this information they could alter their pricing structure accordingly when HWC eventually calls for tenders to complete the works. This will affect the profitability of HWC as it would not be obtaining services at a competitive value. It is in the public interest that HWC deliver their services to the community in the most efficient and cost-effective manner as possible. Since the release of this information would affect the financial interests of HWC in such an adverse way, then it is not in the public interest to release since the cost will ultimately be passed on to the community at large.

The documents to which access has been provided also contain references to information which was obtained through business negotiations and discussions. Third parties provide their business information to HWC on the understanding that it has been provided as commercial in confidence information. In this regard I note that HWC's procurement policy expressly states in relation to the documents provided through any tender and contract process at paragraph 4.8:

'The Corporation will not disclose to another tenderer any confidential or proprietary information relating to a tender provided by a tenderer. This includes, but is not limited to, information concerning intellectual property and commercial-in-confidence information.'

Arguably, disclosure of this information, if it reached other potential tenderers, would amount to a breach in confidence and HWC would be exposed to a risk of legal proceedings for such a breach.

Third parties would be at risk of having their trade secrets, pricing strategies, and commercial in confidence information disclosed to the public. This information is of commercial value to these organisations, as it has been developed over a long period and has involved the investment of time, money and expertise of their own specialists. The information's value would be diminished if it were made available to competitors, who could use it when competing for future work contracts. This would not only be likely to adversely affect the third parties' business, but would deter some, perhaps most, potential tenderers to the detriment of HWC. For a tender process to be most effective it is critical that HWC have appropriate and documented information upon which to select a tenderer.

This would amount to a prejudice to the supply of information to HWC, in that some potential tenderers may not submit their business information and those who do so will request confidentiality agreements and/or to document the minimum requirements of what was discussed and to support this information with verbal information that cannot be disclosed to the public or its competitors.

The public interest has been considered in disclosing third party business information and on balance the public interest is not served by disclosing this information. The public interest is served in ensuring that HWC respects confidentiality, continues to receive as many competitive tenders as possible, and has well documented information on which to assess tenders submitted. The public interest also lies in HWC being able to have confidential discussions with other businesses about projects of interest.
