Epson **SureColor SC-S70600 (10C)**

The Epson SureColor SC-S70600 is Epson's first 64-inch (162.6cm) printer to support white and metallic ink simultaneously, enabling creative print makers, specialist sign makers and professional display printers to expand their service portfolios.

High-quality prints are assured with the combination of Epson's UltraChrome GSX Ink and proven Micro Piezo TFP printhead, which delivers clarity, fine detailing and smooth blends at resolutions of up to 1440 x 1440dpi.
Along with traditional process colours, the GSX ink set includes light cyan, light magenta and light black ink to generate ultra-smooth tonal gradations and neutral greyscales. GSX also includes a range of special colours such as white, metallic silver, orange and orange plus.
White, metallic and orange inks further boosts performance, versatility and scope of production whether producing simple signage or high-end displays and décor. The advanced formula of our Ultrachrome GSX inks provides excellent durability with lightfastness up to three years outdoors without lamination*.

NEW for 2015 - Orange Plus ink
This latest addition to our Ultrachrome GSX range enhances the ability to print bright, saturated colours, offering a significant improvement over our existing orange ink.

NEW for 2015 - Orange Plus ink
Users can cost-effectively print vivid colours, solid whites and special metallic effects on clear film, vinyl, canvas, photographic paper and a range of popular banner substrates, all at up to 64-inch (162.6cm) width. Prints are lightfast for up to three years outdoors without lamination*.

NEW for 2015 - Orange Plus ink
When using 8 colours, the SC-S70600 prints at up to 26.8m2/hour (high-speed mode), and at up to 4.0m2/hour with metallic ink enabled.

KEY FEATURES

- **High-quality**
  Micro Piezo TFP printhead
- **Wide gamut**
  8/10-colour ink-set
- **Light black ink**
  Enhanced greyscales
- **Easy media loading**
  One-person jack system
