**Environmental Hazards**

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. To protect the environment, DO NOT allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn will help to prevent run-off to water bodies or drainage systems.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

- DO NOT apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. DO NOT allow people or pets to enter the treated area until dusts have settled.

The product is intended for residential use.

This product controls a wide range of listed lawn weeds which includes dandelion, chickweed, knotweed, plantain, henbit, spurge and many others commonly found in home lawns. Retreatment may be necessary if (a) lawn is heavily overrun by weeds, or, (b) if adverse low moisture conditions prevail and weeds are in a state of poor growth. If necessary make a second application after 30 days. For use on established warm season turfgrasses - includes bermudagrass, centipedegrass, and zoysia grass.

For use on established cool season turfgrasses - includes Kentucky bluegrass, perennial ryegrass, tall fescue, and turf-type tall fescues.

**Use Restrictions**

DO NOT apply this product on carpetgrass, dichondra, St. Augustinegrass, or established turf containing desirable clovers.

DO NOT apply this product to newly seeded grasses until well-established or after the second or third mowing.

Reseeding or overseeding areas may occur three (3) weeks after the application of this product.

DO NOT use this product on or in close proximity to desirable plants and do not spread granules onto exposed root systems or adventitious shoots (rhizomes) within the drip line of the roots of desirable trees and shrubs, since injury may result.

DO NOT use this product on flowers, vegetables, groundcovers, gardens or landscape plantings which includes shrubs and trees. Do not exceed specified dosage for any area and do not apply this product within the drip-line or over surface roots of trees, shrubs, and other ornamentals.

DO NOT apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans.

DO NOT apply directly to or near water, storm drains, gutters, sewers, or drainage ditches. Do not apply within 25 feet of rivers, fish ponds, lakes, streams, reservoirs, marshes, estuaries, bays, and oceans. DO NOT apply when windy. Apply this product directly to your lawn, and sweep any product landing on the driveway, sidewalk, gutter, or street back onto the treated area. To prevent product run-off, do not over water the treated area(s) to the point of runoff or apply when raining or when rain is expected that day.

**How Much To Apply**

The maximum broadcast application rate is 2.0 pounds of product per 1,000 sq.ft. per application. The maximum number of broadcast applications is limited to 2 per year with a minimum of 30 days between applications. The maximum seasonal rate is 4.0 pounds of product per 1,000 sq.ft.

**When To Apply**

Apply when listed broadleaf weeds are actively growing in spring or early fall.

Apply when the air is calm to ensure uniform coverage and do not spread granules onto flowers, vegetables, and ornamental shrubbery.

**Application Instructions**

1. Mow lawn to normal height 1 to 2 days before application.
2. Water lawn thoroughly at least 1 day before application to sustain moisture until the next watering (see step 5).
3. Apply when listed weeds are young and actively growing, preferably in the morning when dew is on the grass. If grass is not moist at time of application, sprinkle lightly with water to allow the granules to adhere and remain on the leaf surface of the weeds.
4. Do not apply when temperatures are consistently above 90 F.
5. Do not wash this product from weed leaves for 1 to 2 days after application. After 1 to 2 days, thoroughly water the lawn.

**Spreader Directions**

**Determining Your Lawn's Square Footage:** To determine how much of this product to apply, you must determine the square footage of your lawn. An easy way to do this is to walk the length of your lawn, figuring that one pace equals approximately 3 feet. Do the same with the width of the lawn. Then multiply the length by the width to arrive at the total. Make sure you subtract the square footage of your home and driveway when calculating the total square footage of your lawn. If your lawn has an irregular shape, try dividing it up into a number of square areas. Calculate the square footage for each area, then add the figures together to reach your total lawn size.

**Spreader Tips:** The two main types of spreaders are the Drop Spreader, which drops the material straight down the width of the spreader as you push, and the Broadcast Spreader (also known as a rotary), which throws the material from the spreader.

**Drop Spreader:** (See Fig. A) First make two passes along the top of the area you'll be covering. Then make two passes along the bottom area. Then move back and forth along the long part of the lawn. On each pass, as you reach the strips at the top and bottom of the area to be covered, shut off the spreader. It's also important to shut off the spreader when you are stopped.

**Broadcast Spreader:** (See Fig. B) Apply in a single pass by starting on the outside border and apply in a circular path working toward the center.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.  
**Pesticide Storage:** Store this product only in its original container in a cool, dry, locked place out of the reach of children and animals. **Pesticide Disposal and Container Handling:** Nonrefillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
