Introduction

Understanding your customers and their needs are the first steps in being able to propose an effective, efficient and professional HP printing solution. Not all customers are the same; they work in different vertical markets, have different needs and therefore require different solutions.

You need to provide a quick and professional response to customer requests to provide solutions to their printing needs. This product guide gives information on the different market verticals, typical applications and printing needs with an easy-to-use format to help you select the right product.

The HP large format printer range is divided into two product segments: Technical and Graphics. Each segment serves different market verticals, and there is a range of products designed and developed to provide a product solution for each of these markets.

Definitions of the vertical markets are detailed within the Technical and Graphics pages and an icon, to visually represent each of the markets, appears on the relevant product pages to assist you in your solution selection.

Vertical Markets–Technical

AEC/CAD

Architecture, engineering and construction (AEC) use computer-aided design (CAD) software for large construction new build or refurbishment projects. This vertical market also encompasses property management, real estate companies and public sector, for projects such as school architecture and facilities departments.

GIS

Geographic information systems (GIS) refer to the wide range of technologies, products and services that enable users to perform computerised analysis and display of geo-relational data. Submarkets within this market include utilities, telecoms or mining companies and government.

Office

With an increase in the number of companies bringing their print requirements in-house, from large corporates to small businesses, the demand is for a cost-effective solution whilst maintaining professional performance from their in-house printers.

M-CAD

There are various submarkets within the Mechanical Computer–Aided Design (M-CAD) sector including aerospace, automotive/naval manufacture that require sophisticated printing solutions.

Retail

No matter the size of the store, retailers need to create internal communications to inform and update their staff as well as powerful communication materials to grab the attention of their customers.

Education

Within each education authority and private sector, there are schools, colleges and universities bringing their print requirements in-house as well as offering superb printing facilities for their students to use.

Typical Applications

AEC/CAD
- Highly detailed technical drawings
- Renderings for bids, reviewing designs and obtaining client approval
- Project specifications

Office
- Project plans
- Signage
- Client presentations

M-CAD
- Mechanical design
- Industrial design
- Facilities management diagrams

Retail
- Customer information and announcement signs
- Branding
- Point-of-purchase material

GIS
- Detailed thematic maps with geoscientific data and thermal imagery
- Technical drawings
- Rendering

Education
- Information and announcement signs
- Projects, art and design workshops
- Facilities management projects

Professional Photographers

To stay competitive, professional photographers need to respond to today's fast-paced digital market whether they are within commercial market segments such as advertising and industrial or social segments such as weddings and advanced amateurs.

Signage Printers

Signage printers represent an important market for large format printer products. The HP range has the ability to provide the professional day-to-day needs of the customer increasing the efficiency of their operations and boosting earning potential.

Graphic Designers

Freelancers, small and medium-sized graphic design studios, advertising agencies and corporations with in–house graphic design departments make up this vertical market.

Fine Artists

The customer within this market vertical demands spectacular image quality from a printer to bring acceptance of their photographic prints as an art form.
Final prints will be sold to clients, collectors and museums as fine art photography at premium prices.

Typical Applications

Professional Photographres

- Digital colour proofing
- Portfolio/self-promotion
- Albums and photo frames

Signage Printers

- Information and announcement signs
- Point-of-purchase material
- Customer posters and flyers

Graphic Designers

- Concept development and final presentation
- Digital colour proofing
- Posters, banners and displays

Fine Artists

- Final prints sold to clients
- Portfolio for self-promotion
- Exhibitions

HP Designjet Z6100 Photo Printer series

vivera HP INKS

When it comes to speed, quality, and consistency, this HP Large Format Designjet is hard to beat—with up to 105.4 m^2 of output per hour, outstanding quality with HP Vivera pigment inks, and breakthrough consistency with an embedded Spectrophotometer[1].

- Up to 23.4 m^2/hr for glossy, (fast mode) and up to 105.4 m^2/hr for plain paper
- Outstanding image quality with 8 HP 775ml Vivera® inks
- Fade resistance for over 200 years 2
- 256 and 512 MB RAM, 40 GB hard disk
- Embedded Spectrophotometer
- Supports longer, heavier media rolls: up to 175m/20kg
- Optical Media Advance Sensor
- Roll feed, automatic cutter, bin
