Adobe Dreamweaver CS5.5 software is a comprehensive professional toolset for designing and deploying compelling websites and mobile applications. Using powerful coding tools or the state-of-the-art visual interface, create advanced sites and applications using HTML5, CSS3, and jQuery support for desktops, phones, and tablets.

## Top reasons to upgrade to Adobe Dreamweaver CS5.5

**NEW jQuery Mobile integration**—Add advanced interactivity with jQuery code hinting. jQuery is the industry-standard JavaScript library, making it simple to add a wide range of interactivity to web pages. Get a jump start with starter templates for mobile phones.

**NEW Native Android™ and Apple iOS apps with PhoneGap integration**—Build and package native apps for Android and iOS. Convert your existing HTML to a mobile phone application within Dreamweaver using the open source PhoneGap framework.

**ENHANCED Multiscreen Preview panel**—Design for smartphones, tablets, and personal computers with the Multiscreen Preview panel. With media query support, developers can style and visualize rendering for a range of devices in a single panel.

**NEW FTPS and FTPES support**—Deploy files more securely with enhanced FTP support. Dreamweaver CS5.5 now adds native support for the FTPS and FTPES protocols.

**NEW W3C validation**—Use the World Wide Web Consortium's own online validation service to help ensure the accuracy of your standards-based web designs.

**ENHANCED CSS3 and HTML5 support**—Style with the CSS panel, updated to support the new CSS3 rules. Design view now supports media queries, applying different styles as you adjust the screen dimensions. Code for the future with HTML5, with code hinting and Design view rendering support. Live View now includes support for <video> (with QuickTime) and <svg> tags.

**ENHANCED Cutting-edge Live View rendering**—Check your page with Live View, now with an updated WebKit rendering engine. Preview designs for multiple devices with real-time media query support. HTML5 and CSS3 capabilities and enhancements make designing for mobile devices even more efficient.

**ENHANCED Subversion® support**—Store your files more securely with support for Subversion software, which has been updated to the version 1.7 protocol.

**ENHANCED CSS inspection**—Visually display the CSS box model in detail, and easily toggle CSS properties without reading code or needing to use a separate utility.

## System requirements

### Windows\*

- Intel® Pentium® 4 or AMD Athlon® 64 processor
- Microsoft® Windows XP with Service Pack 2 (Service Pack 3 recommended); Windows Vista® Home Premium, Business, Ultimate, or Enterprise with Service Pack 1; or Windows 7
- 512MB of RAM
- 1GB of available hard-disk space for installation; additional free space required during installation (cannot install on removable flash storage devices)
