ABOUT  
PYRAMIS

Pyramis Metallourgia A.E. is a Greek multinational company producing integrated kitchen and bathroom solutions. Founded in 1959, it is based on an industrial estate just outside Thessaloniki, with over 30.000 m<sup>2</sup> dedicated to manufacturing facilities, warehousing and administration.

PYRAMIS is one of the leading producers of stainless steel sinks, with a production capacity of over 1.5 million sinks annually. Almost 97% of production is exported.

Simply following its legacy and vision, and utilizing the company's long-term experience, PYRAMIS added to the group production facilities a new contemporary production plant of granite sinks.

The new factory, which is located in an industrial area in Northern Greece, represents an initial investment of more than **€1,000,000** and its initial annually production capacity can exceed **40,000** sinks. Combining high quality materials, advanced research capabilities and the most technologically advanced machinery, PYRAMIS is expanding its range of er with a wider assortment of granite sinks.

ABOUT  
PYRAMIS

The Design, Production and Sales of Stainless Steel Sinks and Pantries all have **ISO 9001** Quality Management System and **ISO 14001** Environmental Management System certifications. The company is certified according to **OHSAS 18001** Human Resources Management for its Safety and Health Management System and has also been assessed by the **ICAP** Group as one of the "**Strongest Companies in Greece**", verifying its creditworthiness.

In the context of **Corporate Social Responsibility**, Pyramis Metallourgia A.E. incorporates social and environmental actions into its business activities that go well beyond what is required by current European legislation. These actions relate to human resources, customers, suppliers, partners, end consumers, protection of the environment, as well as support for the community and particularly for socially vulnerable groups.

| PYRAMIS' products are exported to **65** countries all over the world, owning 9 subsidiaries in **Romania, Germany, United Kingdom, Italy, Poland, Bulgaria, Russia, United Arab Emirates and Czech Republic**. Moreover, PYRAMIS is a leader in the Greek Market and its products are well known for more than 50 years to the Greek family.

STAINLESS  
STEEL SINKS

> **Stainless Steel Finish**

A variety of stainless steel finishes is available. PYRAMIS range of stainless steel finishes include **satín**, **polished**, **linen** and **brushed**.

> **Article Number**

The PYRAMIS nine digits article number designates a particular sink, with its own unique specifications and packaging.

Finish	Ar. Number	Tap Holes	Waste	Packaging
POLISHED	<b>123456789</b>	1 Tap Hole	Ø92mm	1 Item/ Carton Box

> **Bowl Position / Tap Holes**

The left or right hand position of the bowl in an installed sink defines the sink as left hand or right hand. In the case of two-bowl sinks with one large and one smaller bowl, the position of the larger bowl defines the sink as a left or right hand.

**1 Tap hole:** Indicates that a sink is offered with one tap hole for the installation of the tap, and the position of the bowl defines the sink as either right or left hand.

**1+1 Tap holes:** The sink can be installed in reverse, and be either a left or right hand bowl. The tap hole located at the back of the sink, is for the tap installation, whilst the second tap hole at the front can be covered with a tap hole cover, or can be used for the installation of an automatic waste valve. (Pop-up waste valve).

**2 Tap holes:** They are the one next to the other, which means that the sink is not reversible. The one aperture is for the tap and the other will normally be used for a soap dispenser or an automatic waste valve (pop-up waste valve). Alternatively the 2 tap holes can be used for bridge-type taps or 2 separate taps.

> **Waste Valves**

The number used to define the type of waste valve is the diameter of the outflow. Sinks are available with **52mm**, **60mm**, **92mm** diameter or **square** outflow (depending on the model).

> **Overflow**

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

> **Suitable waste valves & siphons**

Within the catalogue presentation of an individual sink model, you can find the drawing of the suitable waste valve and siphon according to the specifications of the codes that appear. PYRAMIS provides both regular and space saver siphons, as well as manual and pop up waste valves. You can check for the suitable waste kit in the tables of pages 132-138.

> **Packaging**

There are two different types of packaging, either in a carton box or in a sleeve. Carton boxes could include the waste valve, siphon and in some cases accessory/ies suitable to the packed sink. Sleeve packaging includes only the sink. Suitable waste valve(s) and siphon should be ordered separately.

> Cut Out Drawing

Is a detailed guide which helps the accurate cutting of the worktop. It includes the cutout length, width and corner radius of the relevant model for inset, undermount or flushmount fitting.

> Siphon Installation Drawing

Gives you detailed information and measurements about how the space under the sink looks like after the installation of the siphon.

> Inset

The rim of the sink after installation appears on the worktop.

> Onset

**4 Sides Down:**  
The onset sink is formatted in a way that all four perimetric edges, are folded down.

**3 Sides Down:**  
Three of the four sides are folded down and the fourth, which is located on the back edge of the sink, is folded up in order to create an up-stand against the wall.

> Wall Mounted

Wall mounted sinks for limited spaces.

> Onset Bending Types

**British Roll Front Edge:**  
Onset Sink with rounded front edge.

**British Square Front Edge:**  
Onset Sink with squared front edge.

> Undermount

The rim of the sink appears underneath the worktop.

> Flushmount

The rim of the sink appears at exactly the same level with the worktop.

> Factory Fitted Seal

PYRAMIS Stainless Steel Sinks for inset installation are provided with a pre-installed sealant of polyurethane underneath the sink, thus, the installation of an inset sink becomes much easier and friendlier since, the sealant that is already installed provides time-saving compared to other sealing methods. Look out for the model in the catalogue with the EASYFIX™ logo.

*Pyragranite sinks are manufactured from 80% natural quartz (silica) which is the hardest and strongest component of granite, while the remaining 20% of the mixture, consists of resins and other substances that assist in binding the grains of quartz and help to achieve excellent color appearance of the surface of the sink.*

PYRAGRANITE  
SINKS

### > Variety of colors

Depending on the design of your kitchen, you can choose from a wide variety of colors. classic colors that stimulate natural granite, soft shades for a more modest effect or colors with metallic luster can upgrade your kitchen area.

### > The high purity quartz (99.7%) mixed with high quality resins ensures:

- **Heat Resistance:** The sink will stay perfect even if it comes in contact with objects that their temperature reaches 280° C.
- **Shock resistance:** The sink doesn't break even if an object that weighs 1Kgr drops from height of 70cm.
- **Resistance to chemicals:** The sink does not discolor even if it comes in contact with strong chemical cleaners.
- **Easy to clean:** Coffee or red wine leaves no stain, just rinse the sink with water.
- **Scratching resistance:** The high percentage of mineral charges present in the mixture makes Pyragranite sinks very resistant to scratches, marks and wear.

### > Antibacterial protection

For even greater safety, the composition of Pyragranite sinks provides protection against bacteria. Bacteria can cause mould, stains and bad smells. The enrichment of the composition with silver ions makes the surface of the sink, perfectly healthy and suitable to come in contact with food.

### > Certificates

Pyragranite sinks are certified by internationally recognized organizations including NSF / ANSI (National Sanitation Foundation / American National Standards Institute), IAPMO (Standard Product Development), ITS (Intertek Testing Service), IANESCO LABORATOIRE D'ANALYSES ET D'ESSAIS EN CHIMIE DE L'OUEST and they are all marked by CE.

As proof of the exceptional quality materials, Pyragranite Sinks carry a Lifetime Guarantee.

KITCHEN  
TAPS

Manufactured according to the highest specifications, the PYRAMIS kitchen taps are characterized by pioneering design and outstanding durability. This new range offers you a variety of design options with a choice of materials and finishes to perfectly suit your kitchen.

**> Finish**

The use of the best galvanic products of the market, the application of a Nickel thickness between 14 and 15 micron and chrome thickness between 0.25 and 0.30 micron and the application of the most high standards, controlled by the external international Laboratory Galvanofinish, permit to obtain high quality finishing and to increase the life expectancy. Choose a tap of shimmering chrome or steel to combine it with your stainless sink or a colored one to create the perfect combination with your granite sink.

**> Pure Water Process**

The production method of PYRAMIS faucets involves an extra galvanization process which is called Pure Water Process and prevents any leach of toxic metals as Lead and Nickel in drinking water.

As it has been thoroughly demonstrated, Lead is toxic for ingestion: this means that the greatest risk, connected with its leaching, concerns faucets used to supply drinking water (lavatory and kitchen faucets). Nickel is a toxic metal which is responsible of many allergies caused by its contact with human skin. For this reason its leaching from all kinds of faucets could be dangerous. Due to these reasons many countries have imposed a reduction of metals leaching in drinking water to prevent chronic disease.

> Colors & Types

> Certified raw material

The chemical composition of the brass used for PYRAMIS taps complies with high international standards, ensuring potable water, high performance and great aesthetic value.

> Water and energy saving

The adoption of a new type of cartridges make possible to optimize consumption and avoid useless energy overloads. PYRAMIS offers three different types of water mixing cartridges controlling the flow of water and do not allow it to exceed 12 l/m.

> Aerators with flow reducers

Modern aerators are equipped with flow limiters, small devices installed to the tap and by mixing water with air allow up to 30% water saving, while obtaining a better flow jet (same power with no spurts).

> Ceramic discs

The maximum durability of the product but also a very pleasant feeling during everyday use of a PYRAMIS tap, is achieved by the ceramic discs of the cartridges that controlling the flow of hot or cold water with just a gentle motion of the handle.

> Components made of non-toxic materials

All kitchen taps components are made of non toxic materials, which are environmental friendly, have excellent mechanical properties and are also approved for use in contact with hot and cold potable water (NSF, WRc, KTW, DVGW).

*Excellent design, high performance and functionality, compose the strong characteristics of PYRAMIS cookerhoods. Delicate lines, high quality materials and flawless finish upgrade your kitchen. The advanced functions and high extraction rates offer a healthy, clean and odorless environment, creating the ideal conditions for daily home cooking.*

#### > Choose the right cookerhood for your kitchen

PYRAMIS offers you the proper choice of cookerhoods for your kitchen, in terms of suction capacity according to:

- the size of your kitchen
- the size of the cooking area
- the number and size of cooking zone

We calculate the volume of the room in cubic meters and then we multiply it by 12. (An effective cooker hood should refresh the air in the kitchen 12 times per hour).

#### **Example:**

Kitchen room dimensions: 6 meters long, 3 meters wide and 2,5 meters high.  
The volume of the kitchen room is equal to length x width x height:  $6 \times 3 \times 2,5 = 45\text{m}^3$ .  
Bearing in mind the fact that the air in the kitchen should be refreshed 12 times per hour, then the extraction rate required should be  $12 \times 45\text{m}^3 = 540\text{m}^3$ .

So the recommended cooker hood should have extraction capacity at least **540m<sup>3</sup>/h**.

## Characteristics

### > Peripheral Absorption

Available in selected models both in the Elegant and the Premium series. Peripheral absorption produces an increasing air speed that reduces the leakage of odours outside the extraction perimeter of the hood.

### > Control Panel Options

The choices vary according to the cookerhood model. Touch controls, push buttons and electronic switches ensure the ease of use and the excellent aesthetical results.

### > Lamps

All models feature halogen lamps, except for some elegant models which feature LED lamps.

### > Low noise level

PYRAMIS cooker hoods keep the noise levels low, creating ideal home conditions. Noise level is measured in db and PYRAMIS cooker hoods levels are equal to a "quiet living room"!

### > Clean Air Function

Available in all models of the Elegant and Premium series. This useful function refreshes the air automatically. The cookerhood will activate at speed level 1, when switched off, for ten minutes every hour. Following the 10-minute operation, the motor will automatically de-activate and a LED display button will remain on until the process repeats. By pressing any key, other than the hood light, the hood will immediately resume its normal function.

### > Carbon filters

Carbon filters bind any substances in the absorbed air before it is then extracted or re-circulated. Their saturation depends on the level and time of use, type of cooking and the frequency that the metal filters are cleaned. They cannot be cleaned or repaired, they can only be replaced when necessary.

### > Intensive function

Available in all models of the Elegant and Premium series. The intensive function offers a fourth, stronger speed, for 10 minutes. By pressing the relevant (to the model) button for two seconds, the intensive function will be activated. At the end of the activation period, the hood automatically resumes its initial speed. If the function needs to be interrupted within the ten-minute timeframe, the button just needs to be pressed again.

### > Metal filters

Metal filters have two functions: they protect the inner parts of the cooker hood by preventing the absorbed grease and fumes from harming the fan or the motor and they add to the aesthetics of the cooker hood. They are easy to remove from their casings and can be washed by hand, or in the dishwasher (recommended).

*PYRAMIS ovens, thanks to their technological advancement and multiple options of functions, ensure always the best results in cooking!*

*The excellent design and the high quality of materials, in combination to the multiple program functions and ergonomic accessories, appoint PYRAMIS ovens as the ideal choice for the preparation of meals in the kitchen.*

*PYRAMIS corresponding to the contemporary requests of the market for more efficient and price sensitive products, introduces a new range of ovens PYRAMIS Ecoline. Five ovens of excellent design and performance, cover all the needs of contemporary living and cooking.*

○ ————— ○

### Functions

	Food warmer		Top & bottom heat		Top & bottom heating and fan
	Automatic program for cooking pizza		Top heat		Top heating and fan
	Automatic program for toasting bread		Bottom heat		Bottom heating and fan
	Automatic program for cooking roast chicken		Fan & circular heating element		Grill
	Warning indicator when the oven light is on		Top heating, fan & circular heating element		Fan & grill
	Quick defrost		Bottom heating, fan & circular heating element		Top heating & grill
	Delicate defrost		Gratin		Top heating, grill & fan

○ ————— ○

---

## Characteristics

### > Push-Pull Buttons

For greater safety.

### > Touch Controls

The new touch control panel is very easy to use and only a light touch is enough for its activation.

### > Accessories & Fittings

Telescopic runners, side racks, trays and grids that help make cooking easier.

### > Triple or double glass doors with removable inner glass

The new triple or double glass doors are designed to ensure absolute heat isolation and therefore better energy and cost efficiency. The inner crystal is full glass and can be easily removed and cleaned.

### > Digital Auto Programmer

This programmer allows the oven to turn on and off automatically. It is fitted with clock, timer and child lock.

### > Anti-Spot Treatment

A special coat on the stainless steel and glass parts of the ovens that keeps the safety glass, handles and stainless steel frames spotlessly clean.

### > Cooling Fan

All Pyramid ovens have a cooling fan system which cools the outer part of the oven while cooking.

### > True Fan

True Fan is a new system which enables better circulation of hot air within the oven so that the desired temperature is reached more rapidly thus saving energy. Time taken to cook multiple dishes on different shelf levels is now the same as cooking a single dish on a single shelf with True Fan cooking.

### > Minute Minder

This useful mechanical device alerts the user to the end of cooking time without switching off the oven.

### > Digital End-Cooking Programmer

It allows the ovens to switch off at the pre-set desired time. It includes clock, timer and child lock.

### > Easy to Clean

A special formula on the inner cavity of the oven prevents any food splatters from sticking and therefore they can be easily removed.

### > Analogue Clock With End-Cooking Programmer

An analogue clock which can be preset to switch off cooking.

### > Energy Class A

All PYRAMIS ovens feature A-ratings for energy efficiency.

*PYRAMIS hobs reflect the high aesthetics in your kitchen adding to the stylish choices and contemporary design. They combine advanced technology with excellent quality and can accompany any PYRAMIS oven. They are offered in a variety of types and styles. Ceramic, gas or induction, the PYRAMIS hob range guarantees immaculate performance that covers your every need and brings out your creativity in the kitchen.*

## Functions

### > Timer

An electronic timer enables you to select a pre-set cooking time. When the time is up, the hob automatically switches off.

### > Touch controls

The modern touch control panel is very easy to use and reacts even in to slightest touch.

### > Residual heat indicator

A red digital indicator that warns that the hob is still hot.

### > O.S.D

The Overflow Safety Device locks and switches the hob off, if any fluids should overflow on to the hob's surface.

### > Safety lock

All hob functions can be locked to ensure that no power is supplied to the hob. The function is activated by pressing the lock button for 3 consecutive seconds.

### > Booster zone

Speeds up the cooking time by applying a higher level of heating for (5 min), offering more intense and rapid cooking. Activate it by selecting level 9 at the desired cooking zone and then press "+", the letter "P" will appear on the display .

### > Rheostatic buttons

The rheostatic buttons provide exact regulation of the cooking temperature.

## Characteristics

### > Beveled Hobs

In beveled hobs, the design keeps up with the technological advancement, offering a frameless option of high aesthetics.

### > New inox frame

Its flat design is perfectly combined with the minimal aesthetics of the PYRAMIS hobs. It applies perfectly on the kitchen worktop and contributes to the style of the PYRAMIS stainless steel sink, oven, cooker hood and refrigerator.

### > Touch controls

They react on the slightest and lightest touch making the hob very easy to use.

## Induction Hob

The induction hob is based on the natural phenomenon of induction, which converts electromagnetic energy into heat. When an electric current is activated, inductors beneath the hob's surface react when a ferrous pan is situated above. The heat is produced directly into the cookware, while the ceramic surface of the induction hob remains cool.

Thus the boiling time can be reduced up to 50% in comparison to conventional electro-ceramic hobs and therefore cost and energy can be satisfactorily saved. Also, induction hobs are very easy to clean because any food splatters never burn on to the cool surface, so are very simply wiped off.

### > Faster

The heat is delivered directly into the cookware without wasting time in heating the ceramic surface of the hob first. Cooking time is satisfactorily reduced.

### > More cost effective

90% of the absorbed energy is converted into heat directly on the cookware. As soon as the cookware is drawn away the conversion stops immediately without any energy wastage.

### > Safer

The heat is produced only if ferrous metallic cookware is placed on the hob. So the surrounding temperature of the ceramic hob remains low, thus avoiding accidents or burns.

### > Smarter

The induction hob automatically adjusts the amount of energy required to the diameter of the cookware. Because less energy is used for a small pan than for a larger frying pan, the hob is smarter and more efficient.

DISHWASHERS

*PYRAMIS dishwasher spoil you with their ergonomic operation and advanced technology. They offer a wide range of programs with perfect performance and stunning results as well as absolute energy and water efficiency.*

**Program Functions**

**> Rinse**  
Pans and dishes requiring rinsing and drying.

**> Pre-wash**  
Pans and dishes that require extra washing.

**> Delicate**  
Dishes or glasses that require standard cleaning.

**> Quick**  
Dishes with light dirt.

**> Bio**  
Dishes that require standard cleaning.

**> Eco (\*) EN 50242**  
Dishes with normal dirt, washed immediately after use.

**> Normal**  
Normally dirty dishes, including dried-on residues.

**> Daily**  
Dishes with normal dirt, washed immediately after use.

**> Super**  
Very dirty pans and dishes, even dried-on dirt.

**> Intensive**  
Normally soiled pans and dishes, including dried-on residues.

## Characteristics

### > Basket with adjustable sections

The pull-out baskets are on telescopic runners, making them easy to use pull-out while firmly in place. Further adjustable glass and plate supports provide absolute flexibility when filing the dishwasher with plates and cookware.

### > Multiple choice of detergent

All PYRAMIS dishwashers can accommodate all types of tablets or dust detergent for superior washing results.

### > Aqua Stop System

This protects your machine from leakages of water or damages to the interior pipes. Especially necessary in built-in models in order to secure your kitchen from flooding.

### > Program Functions

Fully electronic and easy to use, PYRAMIS dishwashers feature up to 10 programs that will safely and responsibly clean glasses, plates and pans, whether they are lightly soiled or require more intensive cleaning.

### > Upper basket adjustable in height

The upper basket can be adjusted in height, even when fully loaded, in order to accommodate larger plates or pans in the lower basket.

### > Energy efficiency class & +

They ensure low energy and water consumption and therefore require less time and money for their operation. Moreover they contribute to the protection of the environment.

## REFRIGERATORS

---

*The improvement of technology, the decrease of energy consumption and the increase of the efficiency are the requirements that every PYRAMIS refrigerator qualifies. The high quality materials like stainless steel, the energy class A+ in all models and the ergonomic accessories make the PYRAMIS refrigerators your number one choice.*

---

### Functions

#### > "Super" function

This function automatically lowers the temperature of the freezer significantly to ensure a rapid deep-freezing process of fresh foods, while preserving all their vitamins and nutritional values.

#### > Freezer and refrigerator thermostats

The temperature inside the freezer and the refrigerator compartments is very easy to control simply by adjusting the relevant thermostat at the desired level from 1-5. For the most efficient function of the fridge it is suggested to use levels 2-4 according to seasonal variations and your requirements.

#### > No Frost

NO FROST technology saves time as you never need to manually defrost your fridge. Defrosting takes place automatically through the constant circulation of cold air, inside the freezer and the refrigerator compartment. In this way the humidity is kept in the ideal level for food preservation.

---

---

## Characteristics

### > Climatic Class

From Subnormal (100-320 F) to tropical (180-320 F). All models provide the appropriate class for Continental or standard Northern climates. Selected models are equipped with a wider range of classes, covering a broader range of temperatures.

### > Quality standards

All models are provided with steel panels and are electrostatically painted to remain unaltered. Insulation materials and removable shelves provide maximum and flexible storage space.

### > Stainless Steel Door

All PYRAMIS refrigerators have stainless steel doors which offer great aesthetics and long-term durability. The stainless steel doors are anti-spot treated to ensure they remain stainless during everyday use.

### > Environmentally safe

The coolant used in PYRAMIS refrigerators is isobutane (R 600a). The refrigerant gas includes no harmful chemicals and is free of CFC.

### > Silent function

All PYRAMIS refrigerators have a maximum noise level of 44db, which ensures your kitchen is always peaceful.

### > Odor and humidity control filter

It keeps unpleasant odors from spreading inside the refrigerator while it keeps the humidity in the ideal level.

### > Standard Characteristics

Accessories are provided as standard for all models: a kit for adjusting the door opening, hinges, food containers, spatula and ice box.

### > Energy efficiency class A+

All PYRAMIS refrigerators are + energy efficient according to the EU directives. This results to huge possibilities of saving energy and money but also to the protection of the environment.

---

### > Freezer and Refrigerator thermostat

It is possible to manually adjust the inner temperature of the refrigerator and freezer compartments according to your preference and needs.

### > Stainless Steel handles

They add to the style and aesthetics of the refrigerator while they offer immaculate resistance and stability through time.

### > Bottle holder

A practical solution to keep your bottles from sliding when opening or closing the refrigerator's door.

### > Function light indicators

They confirm the effective function of the cooling product.

### > Vegetable drawer

For easy and effective storage of fresh fruit and vegetables.

### > Electronic display

For easier setting and observing, the ideal temperature inside the refrigerator, in order to make sure that your food is freshly preserved for longer time.

Free Standing Freezer Refrigerator FSG 185

Ar. Number

**031001002**

Dimensions: 185x60x65cm

Inox door & with "antispot" treatment

3 adjustable tempered glass shelves

2 vegetables drawers

Capacity: 335 lt

Refrigerator: 245 lt

Freezer: 90 lt

Energy efficiency class: A+

Energy consumption: 0,87 kW/ 24h

Climatic class: Normal

Noise level: 45dB

4 Star rating

Automatic defrosting

Multiflow cooling system

Reversible door

Free Standing Freezer Refrigerator FSE 200

Ar. Number

031000702

Dimensions: 200x60x60cm

Inox door & inox frame with "antispot" treatment

3 adjustable tempered glass shelves

2 vegetables drawers

Capacity: 338 lt

Refrigerator: 224 lt

Freezer: 114 lt

Energy efficiency class: A+

Energy consumption: 1 kW/ 24h

Climatic class: Normal

Noise level: 44dB

Function light indicator

4 Star rating

Automatic refrigerator defrosting

Multiflow cooling system

Reversible door

Built-In Refrigerator-Freezer BBI 177

Ar. Number

031000802

Dimensions: 177x54x55cm

3 adjustable tempered glass shelves

2 vegetables drawers

Capacity: 276 lt

Refrigerator: 201 lt

Freezer: 75 lt

Energy efficiency class: A+

Energy consumption: 0,75 kW/ 24h

Climatic class: Normal

Noise level: 41dB

Temperature rise warning

4 Star rating

Automatic defrosting

Multiflow cooling system

Reversible door

*PYRAMIS Minikitchens are compact kitchen units that provide all the advantages of a fully integrated and practical kitchen; just on a smaller scale. They offer the ideal solution for offices, holiday homes, dormitories, rented rooms and studio apartments.*

*PYRAMIS Minikitchens incorporate a PYRAMIS 18/10 stainless steel sink, built-in hobs, a refrigerator with a 4\* freezer and a wooden or metallic storage cabinet. They are designed for absolute space effectiveness and are made using quality materials with a CE certification.*

### Minikitchen

#### > Sink

PYRAMIS Stainless Steel Sink 18/10, with SPARTA bowl and drainer.

#### > Switches

Very easy to use and to clean.

#### > Hobs

The PYRAMIS Minikitchen is offered with electric, ceramic or gas hobs.

#### > Fridge - Freezer

A quality 4 star refrigerator with 140 litre capacity. It has adjustable shelves and automatic defrost in the refrigerator compartment.

### Pantry

PYRAMIS stainless steel sink 18/10, of high quality, with bowl and SPARTA drainer, in two different sizes, with two electric hobs 180 and 150mm diameter each.

PANTRY 1B 1D 2 UNEQUAL ELECTRIC HOBS 100x60x5,5cm

Pantry Dimensions: 1000 x 600 x 55mm  
 Bowl Dimensions: 340 x 400 x 150mm  
 Minimum Base Unit: 45cm

Finish	Ar. Number	Bowl Position	Waste Valve	Packaging
SMOOTH	140113901	Reversible	Ø60mm	Sleeve

**Built-In Hobs**

- 1 Rapid Cooking Plate 145mm, 1500W
- 1 Normal Cooking Plate 180mm, 1500W
- Ready to plug in
- Silicon Safety Cable
- Function Light Indicator
- 2 Switches of 7 Levels

**Accessories**

**4 Sides Down**

**Suitable Waste Fittings**

**Proposed Tap**

PANTRY 1B 1D 2 UNEQUAL ELECTRIC HOBS 120x60x5,5cm

Pantry Dimensions: 1200 x 600 x 55mm  
 Bowl Dimensions: 340 x 400 x 150mm  
 Minimum Base Unit: 45cm

Finish	Ar. Number	Bowl Position	Waste Valve	Packaging
