*Everything starts  
with an idea.*

*However, if the idea just stays on paper, it remains an idea.*

*So, we decided to turn  
our ideas into reality.*

## 50 years of history

1959

The Company is founded by Mr. Alexandros Bakatselos.  
The first workshop covers an area of 110 sq. m.

1962

The production of metal-frame furniture commences.  
The facilities cover an area of 4,500 sq. m.

1968

The production of stainless steel sinks commences.

1969

First export shipment is dispatched. Destination: Italy.

1972

The Company moves to its current location.  
Current facilities cover an area of 286,000 sq. m.

1977

The production of cookware commences.

1997

The production line for monoblock sinks installed.

1997-

Investments of more than 43 million in state of the art robotics  
and automated equipment.

2007

1999-

Subsidiaries are established in Poland, Germany, United Kingdom, Romania, Russia, Bulgaria, Italy, U.A.E. and India.

2008

2009

Pyramis celebrates its 50th anniversary.

50 YEARS

## PYRAMIS PRODUCT PORTFOLIO

With 50 years of history in the kitchen industry, Pyramis offers one of the most extensive ranges of products: a wide collection of sinks, taps and electrical appliances, especially designed to be the focal point of any kitchen by combining practical features with stunning visual impact.

The redesign of the PYRAMIS cookware collection compliments Pyramis proposition for the kitchen.

### KITCHEN FITTINGS

- Stainless Steel Sinks
- Pyragranite Sinks
- Kitchen Taps

### KITCHEN APPLIANCES

- Cookerhoods
- Hobs
- Ovens
- Microwave Ovens
- Dishwashers
- Refrigerators

## COOKWARE

- Stainless Steel Pots & Pans
- Aluminum Pots & Pans

## PROJECT FITTINGS & APPLIANCES

- Pantries
- Minikitchens
- Drip Trays

## BATHROOM FITTINGS & APPLIANCES

- Bathtubs
- Hydro & Air Massage Systems
- Bath Taps
- Stainless Steel Washbasins
- Waterheaters
- Solar Heating

*The reality turned out to be a success and gave rise to many more wonderful ideas.*

## QUALITY AND ENVIRONMENT

### Product quality

Pyramis has always viewed quality as one of its priorities. The company is dedicated to providing the outmost quality and excellence in all its products and services which meet or exceed the expectations of its customers. Thanks to these essential factors Pyramis has gained its competitive edge.

Every PYRAMIS product features **CE certification**.

### Environmental system

With the same philosophy as for its quality system, Pyramis is dedicated to the protection of the environment and therefore is certified according to both **EMAS and ISO 14001 environmental certificates**. The EMAS certification is voluntary and highlights the company's commitment to ecological preservation. The environment is a fundamental concern for Pyramis and a key component of its planning strategies. This transcends all business areas and ensures that the manufacturing methods and products are all environmentally friendly. Pyramis is committed to providing its customers with the highest possible satisfaction, including taking effective action for the protection of the natural world.

### Quality system

Pyramis acknowledges that supplying quality products means focusing only on reliable materials and timeless design, so that the price of the product reflects its **true value**. Pyramis adopts a vast range of performance indicators, at every company level, to ensure that the product delivered to the user meets all his expectations.

Pyramis is **ISO 9001:2000 certified**, ensuring high standards of quality for its products and processes.

## TECHNOLOGY AND AUTOMATION

The “Pyramis manufacturing process” incorporates technology, automation, and high production capacity. It includes a wide range of production equipment including presses, laser machines, welding robots and automatic welding and folding machines. All machinery is maintained in excellent condition to ensure continuous and consistent production.

Automation in combination with our highly skilled employees provide for an annual production volume of more than 1,200,000 sinks, while our intelligent logistics system meets the total needs of our customers worldwide.

*The ideas were rewarded  
and the reality reflected even more growth.*

## PYRAMIS WORLDWIDE

Today, Pyramis brand enjoys prestige and credibility all over the world. The company exports its products to more than 50 countries in all continents, and has established an efficient exports sales network with nine subsidiaries. Targeted and effective distribution and organisational network, products developed in compliance with the tastes and requirements of different cultures, as well as communication policies aiming at full recognition of the brand and its corporate benefits have been used to achieve growing success in international markets.

## PYRAMIS, a company of the future

Perhaps no one could expect a family business established in Thessaloniki to enjoy the scope and prestige of a multinational company, not to mention that the company still remains under the leadership of the Greek men that set the business up in the first place, a characteristic that turns Pyramis into a truly modern company with sophisticated know-how.

Since 1959, the year of Pyramis establishment, the world has changed significantly. Nevertheless some things still remain the same:

Things such as our passion for perfection. Our persistence and our optimism, even under unfavourable conditions. Our devotion to our values and our aims. The need to transcend our limits every day. The love for our work and the respect for our customers, our suppliers and our staff.

Our guiding principle that everything can be further improved is the starting point of all our actions. Be it our products or our services, or our company's environment, or ourselves. Because, after all, what we have to offer is more than kitchen and bathroom products. It is the dream that our lives and our world can become more beautiful. This will be the source of power and success for Pyramis in the next 50 years!

*50 years later, what was once an idea on paper  
has now become a definite reality -  
a big business with a bright future.  
It's amazing what you can do with an idea.....*

# Analysis of Stainless Steel Sinks' Characteristics

## Stainless steel finish

A variety of stainless steel finishes includes brushed steel, smooth, linen and microlinen. Brushed steel is the finish of Tetragon models.

smooth

linen

microlinen

brushed

## Article number

The PYRAMIS nine digits article number designates a particular sink, with its own unique specifications and packaging.

SMOOTH	107146730	2 Tap Holes	Ø92mm	1 Item/Carton Box
--------	-----------	-------------	-------	-------------------

## Bowl position

The left or right hand position of the bowl in an installed sink defines the sink as left hand or right hand. In the case of two-bowl sinks with one large and one smaller bowl, the position of the larger bowl defines the sink as a left or right hand.

## Tap hole(s)

**1+1 Tap holes:** The sink can be installed in reverse, and be either a left or right hand bowl. The tap hole located at the back of the sink, is for the tap installation, whilst the second tap hole at the front can be covered with a tap hole cover, or can be used for the installation of an automatic waste valve. (Pop-up waste valve).

**1 Tap hole:** Indicates that a sink is offered with one tap hole for the installation of the tap, and the position of the bowl defines the sink as either right or left hand.

**2 Tap holes:** They are the one next to the other, which means that the sink is not reversible. The one aperture is for the tap and the other will normally be used for a soap dispenser or an automatic waste valve (pop-up waste valve). Alternatively the 2 tap holes can be used for bridge-type taps or 2 separate taps.

## Waste valves

The number used to define the type of waste valve is the diameter of the outflow. Sinks are available with 52mm, 60mm or 92mm diameter outflow (depending on the model).

## Packaging

There are two different types of packaging, either in a carton box or in a sleeve. Carton boxes could include the waste valve, siphon and in some cases accessory/ies suitable to the packed sink. Sleeve packaging includes only the sink, and the suitable waste valve(s) and siphon should be ordered separately.

## Overflow

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

## Waste valves & siphon

Within the catalogue presentation of an individual sink model, you can find the drawing of the suitable waste valve and siphon according to the specifications of the codes that appear. PYRAMIS provides both regular and space saver siphons, as well as regular and pop up waste valves. You can check for the suitable waste kit in the tables of pages 122-126.

## Installation

### Cut Out Drawing

Is a detailed guide which helps the accurate cutting of the worktop. It includes the cutout length, width and corner radius of the relevant model for Inset, Undermount or Flushmount fitting.

### Siphon Installation Drawing

Gives you detailed information and measurements about how the space under the sink looks like after the installation of the siphon.

### Installation Profile

Illustrates, according to the different installation types, the way that the sink sits on the worktop.

## Installation Types

### Inset

The rim of the sink after installation appears on the worktop.

### Flushmount

The rim of the sink appears at exactly the same level with the worktop.

### Undermount

The rim of the sink appears underneath the worktop.

## Bending Types of Onset Sinks

### 4 Sides Down

The onset sink is formatted in a way that all four perimetric edges, are folded down.

### 3 Sides Down

In this case, three of the four sides are folded down and the fourth, which is located on the back edge of the sink, is folded up in order to create an upstand against the wall.

### British Roll Front Edge

Describes the front edge of a British Onset Sink which is rounded.

### British Square Front Edge

Is the second version of British Onset Sinks where the front edge is squared.

### Cleaning Products for Stainless Steel Sinks Characteristics

Most contemporary kitchens feature stunning and fashionable stainless steel products, whether they are sinks or electrical appliances. However, over time, scratches, spots, stains, soap scum and hardwater marks may appear.

The solution to keeping your stainless steel products shiny as new is the PYRAMIS "Shiny Sinks" stainless steel cleaning product set, consisting of a special cream and a cloth appropriate for the everyday care of your sink and appliances.

PYRAMIS "Shiny Sinks" is formulated to easily remove tough dirt, stains, soap scum and hardwater marks from any stainless steel or chromed surface in your kitchen. With continued use, PYRAMIS "Shiny Sinks" will also progressively recover any scratches and prevent limescale build up. Additionally, the special Microfibre Cloth will remove any grease and impurities from stainless steel surfaces without requiring detergent.

# STUDIO SERIES

ELEGANT

STAINLESS STEEL SINKS

*The highest quality materials have been used to create this exceptional, yet functional sink series.*

*A tight corner radius of just 14mm and a generous bowl depth of 200mm provide unequalled space.*

*The pure, minimalistic recessed drainer design is both practical and elegant.*

*A stunning range of suitably combined accessories adds to the overall aesthetic.*

# CRYSTALON SERIES

ELEGANT

*PYRAMIS offers a revolutionary new approach to the sink with its beautiful CRYSTALON series. Breaking away from traditional concepts, this combines high quality tempered glass of 8mm and 18/10 stainless steel bowls.*

→ **PYRAMIS CRYSTALON Sinks** in white colour are made of a special type of thermally toughened glass called **Extra White** which is characterized by a low iron oxide content. Its distinctive composition produces a higher light transmittance and avoids the green-tinge, inherent in ordinary float glass.

→ The **CRYSTALON** sink is available with a complete range of matching accessories.

→ The stunning look of the beautiful tempered glass drainer is perfectly complemented by smart stainless steel bowls: each with a small corner radius of 14mm.

### STAINLESS STEEL SINKS ACCESSORIES

#### Suitable for Bowl 30x34cm

**525002701**  
Steel Basket  
for Bowl 30x34cm

#### Suitable for Bowl 36,5x33,5cm

**525003001**  
Wooden Chopping Board  
for Bowl 36,5x33,5cm

**525004101**  
Steel Basket  
for Bowl 36,5x33,5cm

**525000701**  
White Basket  
for Bowl 36,5x33,5cm

#### Suitable for Welded Bowl 34x40cm

**525004701**  
Wooden Chopping Board  
for Welded Bowl 34x40cm

**525004201**  
Steel Basket  
for Welded Bowl 34x40cm

**525000401**  
White Basket  
for Welded Bowl 34x40cm

#### Suitable for Monoblock Bowl 34x40cm

**525004801**  
Wooden Chopping Board  
for Monoblock Bowl 34x40cm

**525002801**  
Steel Basket  
for Monoblock Bowl 34x40cm

#### Suitable for Bowls 40x40cm, 45x40cm & 50x40cm

**525005201**  
Wooden Chopping Board  
for Bowl 40x40/45/50cm

**525004001**  
Steel Basket  
for Bowl 40x40cm

#### Suitable for Bowl Ø36cm

**525004901**  
Wooden Chopping Board  
for Bowl Ø36cm

#### Suitable for Bowl Ø38,5cm

**525003301**  
Wooden Chopping Board  
for Bowl Ø38,5cm

**525002901**  
Steel Basket  
for Bowl Ø38,5cm

**525000501**  
White Basket  
for Bowl Ø38,5cm

#### Titan

**525005601**  
Wooden  
Chopping Board  
for Titan Series

**100055001**

**525000101**

**525005401**  
Steel Basket  
for Titan

Suitable stainless steel & transparent colander for the Titan chopping board

## Celeste

**525005101**  
Wooden Chopping Board  
for Celeste

**525005001**  
Steel Basket  
for Celeste

## Glass Chopping Boards

**043000201**  
Glass Chopping Board  
for Crystalon, Astris,  
Tetragon & Istros

**043000601**  
Glass Chopping Board  
for Studio

## Steel Colander

**043000701**  
Steel Colander  
for Studio, Crystalon, Astris,  
Tetragon & Istros

## Suitable for Welded Bowl 16,5x29x12cm

**100060001**  
Steel Colander  
for Welded Bowl  
16,5x29x12cm

**525000201**  
Transparent Colander  
for Welded Bowl  
16,5x29x12cm

## Suitable for Welded Bowl 13,5x26x10cm

**100055001**  
Steel Colander  
for Welded Bowl  
13,5x26x10cm

**525000101**  
Transparent Colander  
for Welded Bowl  
13,5x26x10cm

## Suitable for Sparta

**525000801**  
Transparent Colander  
for Sparta

## Soap Dispenser

**028101001**  
Soap Dispenser

# PYRAGRANITE

## Pyragranite Sinks

Having established a worldwide reputation for production excellence in the stainless steel sinks sector, we have been able to utilise our long-term experience to develop alternative products to provide you with a greater choice.

Having estimated the rising demand of granite sinks and with the benefit of our advanced research capabilities, PYRAMIS has created an extensive range of granite sinks in a variety of colours, shapes and dimensions.

### **The patented molding method of PYRAGRANITE sinks**

We use an internationally patented molding method called GPS system. This method features an advanced self hardening composite material molding technology for kitchen sinks. The unique advantage of this is the even distribution of the components in the whole mass of the sink on the top, centre and bottom.

### **Composition of PYRAGRANITE sinks**

- More than 80% Quartz (commonly known as natural granite)
- Bigger dimension of Quartz crystals diameter
- Only 20% of Acrylic, Additives and Pigments

### **Quality Systems & Certificates**

The production of PYRAGRANITE sinks is certified according to EN 13310 European Union Norm for thermosetting composite sinks, ISO 9001 & ISO 14001.

## The Attributes of new PYRAGRANITE range

### Durability:

#### To Thermal Shock

After 1000 repetitions in Temperature alternations it was identified that the sink did not present any change on the surface, as breaks or exfoliations.

#### To Drastic Chemical Substances

On a cleaned area of the sink a drop of a test solution was deposited and was left to act for a period of 16 hours. No chromatic change or any deterioration to the surface was present.

#### To Hot Surfaces

For around 20 minutes, a cylindrical tank at 180°C was placed on the sink and no change to the surface was noticed.

#### To Sharp Objects

Surface does not get scratched from sharp metallic objects, such as forks.

## Material Types & Colours

### Granite Type Colours

The chemical proposition derives from natural granite granules that represent almost the 80% of the mass, with the rest being colorless resin.

The desired colouring of the finished product is obtained through an accurate choice of granite particles of a particular colour. It preserves the visual and texture effect of the natural stone.

### Metal Type Colours

The unique advantage of Metal sinks is that metal particles are added to the natural granite and acrylic resin composite to confer an outstanding aesthetic finish.

By adding different metallic components to the composition, a number of stylish effects are achieved and all perfectly complement stainless steel appliances in the kitchen.

# Kitchen Taps

Manufactured according to the highest specifications, the new PYRAMIS kitchen taps collection is characterized by pioneering design and outstanding durability.

This new range offers you a variety of design options with a choice of materials and finishes to perfectly suit your kitchen.

KITCHEN TAPS

## Features and Properties

All PYRAMIS kitchen mixer taps are manufactured according to ISO 9001:2000 and all are covered by a five year guarantee against any manufacturing defects and the non-proper operation of the valve mechanism.

All models are suitable for dynamic water pressure min=0.5 bar to max= 5.0 bar.

Each model has ceramic disc cartridges that are specially manufactured to ensure efficient function and maintain longevity.

## bathroom taps

*The new distinctive range of PYRAMIS bathroom taps features exceptional design attributes and each model is made using the highest quality production standards. Available in classic or modern styles to suit all preferences, each tap can be perfectly combined with PYRAMIS stainless steel washbasins or bathtubs.*

### **Pop Up Valve**

*All basin models have a pop up valve that seals and opens the outflow with one effortless movement.*

### **Level Water Flow**

*In selected models, there are two predetermined water flows (high-low) that ensure the optimum efficiency of water quantity and temperature.*

### **Ceramic Disc Mechanism**

*Each model has ceramic disc mechanism, specially manufactured to provide longest life and efficient function.*

### **Features and Properties**

*All PYRAMIS bathroom taps are manufactured according to ISO 9001:2000 and all are covered by a five year guarantee against any manufacturing defects and non-proper operation of the valve mechanism.*

### **Dynamic Pressure Conditions**

*All taps are suitable for dynamic water pressure min= 0.5 bar to max= 5.0 bar.*

# Cookerhoods

*With a wide choice of styles to suit all tastes and pockets, the new range of PYRAMIS cooker hoods offers superior quality and powerful performance.*

*Featuring clean lines, classy curves and carefully chosen materials, all models offer advanced extraction levels to ensure a clean and odour-free environment.*

## Characteristics

### Peripheral Absorption

Available in selected models both in the Elegant and the Premium series. Peripheral absorption produces an increasing air speed that reduces the leakage of odours outside the extraction perimeter of the hood.

### Halogen lamps

All models of the Elegant & Premium series feature halogen lamps, which are encased in a glass cover (not in a plastic cover which is sensitive to temperature and age alteration).

### Touch controls, electronic and sliding buttons.

Dependent on your choice of hood, the controls are designed to be easy to use and add to the overall aesthetics, whether in our high-end or more basic models.

### Clean Air Function

Available in all models of the Elegant and Premium series. This useful function refreshes the air automatically, when switched off. For ten minutes every hour, the hood will activate at speed level 1. Following the 10-minute operation, the motor will automatically de-activate and a LED display button will remain on until the process repeats. By pressing any key, other than the hood light, the hood will immediately resume its continued activation.

### Carbon filters

Carbon filters bind any substances in the absorbed air before it is then extracted or re-circulated. Their saturation depends on the level of use: time of use, type of cooking and the frequency that the metal filters are cleaned. They cannot be cleaned or repaired, they can only be replaced when necessary.

### Intensive function

Available in all models of the Elegant and Premium series. The intensive function offers a fourth, stronger speed, for 10 minutes. By pressing the relevant button (to the model) for two seconds, the intensive function will be activated. At the end of the activation period, the hood automatically resumes its initial speed. If the function needs to be interrupted within the ten-minute timeframe, the button just needs to be pressed again.

### Metallic filters

Metallic filters have two functions: they protect the inner parts of the cooker hood by preventing the absorbed grease and fumes from harming the fan or the motor and they add to the aesthetics of the cooker hood. They are easy to remove from their casings and can be washed by hand, or in the dishwasher (recommended).

# Ovens

For 2009, PYRAMIS offers an entirely new range of advanced ovens that incorporate attractive Italian design and deliver superior functionality. There is a wide choice of independent and combined electric ovens together with two gas ovens and two microwave ovens.

They all feature multiple functions and enhanced accessories and they are manufactured under the strictest quality standards.

OVENS

## Functions

Food warmer

Automatic program for cooking pizza

Automatic program for toasting bread

Automatic program for cooking chicken and roast potatoes

Warning indicator when the oven light is on

Quick defrost

Delicate defrost

Bottom heat

Top heat

Top and bottom heat

Bottom heating fan

Top and bottom heating and fan

Fan

Grill

Fan & Grill

## Characteristics

### Push-pull buttons

For greater safety.

### Touch controls

The new touch control panel is very easy to use and easy to activate with a light touch.

### Parts and Accessories

Telescopic runners, side racks, trays and grids that help make cooking easier.

### Triple or double glass doors with removable inner glass.

The new triple or double glass doors are designed to ensure absolute heat isolation and therefore better energy and cost efficiency. The inner crystal is full glass and can be easily removed and cleaned.

### Digital Auto Programmer

This programmer allows the oven to turn on and off automatically. It is fitted with clock, timer and child lock it is possible to pre-set automatic switch-on and switch-off times.

### Anti-Spot Treatment

A special coat on the stainless steel and glass parts of the ovens that keeps the safety glass, handles and stainless steel frames spotlessly clean.

### Cooling Fan

All Pyramis ovens have a cooling fan system which cools the outer part of the oven while cooking, thus ensuring the oven is safer to use.

### True Fan

True Fan is a new system which enables better circulation of hot air within the oven so that the desired temperature is reached more rapidly thus saving energy. Time taken to cook multiple dishes on different shelf levels is now the same as cooking a single dish on a single shelf with True Fan cooking.

### Minute Minder

This useful mechanical device alerts the user to the end of cooking time without switching off the oven.

### Digital end-cooking programmer

It allows the ovens to switch off at the pre-set desired time. It includes clock, timer and child lock.

### Easy to Clean

A special formula on the inner cavity of the oven prevents any food splatters from sticking and therefore they can be easily removed.

### Analogue clock with end-cooking programmer

An analogue clock which can be preset to switch off cooking.

### Energy class A

Most ovens in the new PYRAMIS range feature A-ratings for energy efficiency.

# Hobs

Offering a wealth of styles, and a range of different hob types, the PYRAMIS Hobs range provides ultimate flexibility in the kitchen. Developed to complement the new PYRAMIS ovens and cooker hoods, there is a choice of ceramic, gas or induction hobs to provide perfect cooking

combinations. Supreme performance and attractive aesthetics together with advanced technologies and increased functionality comprise our new range of hobs for the contemporary kitchen.

## Functions

### Timer

An electronic timer enables you to select a pre-set cooking time. When the time is up, the hob automatically switches off.

### Residual heat indicator

A red digital indicator that warns that the hob is still hot.

### Touch controls

The modern touch control panel is very easy to use and reacts even in to slightest touch.

### Safety lock

All hob functions can be locked to ensure that no power is supplied to the hob. The function is activated by pressing the lock button for 3 consecutive seconds.

### O.S.D

The Overflow Safety Device locks and switches the hob off, if any fluids should overflow on to the hob's surface.

### Rheostatic buttons

The rheostatic buttons provide exact regulation of the cooking temperature.

## Characteristics

### Bevelled Edges

Bevelled edges on frameless hobs offer an impeccable form of design with a beautiful finish.

### Stainless steel frame

Its straight-cut design adds to the aesthetic of the hobs. It fits perfectly to the worktop and further complements any stainless steel appliances or sinks.

### Touch controls

Most PYRAMIS ceramic hobs are equipped with touch control panels. They are easy to use and the hob is easy to clean.

## Induction Hob

The induction hob is based on the natural phenomenon of induction, which converts electromagnetic energy into heat. When an electric current is activated, inductors beneath the hob's surface react when a ferrous pan is situated above. The heat is produced directly into the cookware, while the ceramic surface of the induction hob remains cool.

Thus the boiling time can be reduced up to 50% in comparison to conventional electro-ceramic hobs and therefore cost and energy can be satisfactorily saved. Also, induction hobs are very easy to clean because any food splatters never burn on to the cool surface, so are very simply wiped off.

### Faster

The heat is delivered directly into the cookware without wasting time in heating the ceramic surface of the hob first. Cooking time is satisfactorily reduced.

### More cost effective

90% of the absorbed energy is converted into heat directly on the cookware. As soon as the cookware is drawn away the conversion stops immediately without any energy wastage.

### Safer

The heat is produced only if ferrous metallic cookware is placed on the hob. So the surrounding temperature of the ceramic hob remains low, thus avoiding accidents or burns.

### Smarter

The induction hob automatically adjusts the amount of energy required to the diameter of the cookware. Because less energy is used for a small pan than for a larger frying pan, the hob is smarter and more efficient.

# Dishwashers

The advanced technology and supreme effectiveness of PYRAMIS dishwashers ensures that every model delivers

maximum performance using the minimum consumption levels.

Fully electronic and easy to use, PYRAMIS dishwashers feature up to 10 programs that will safely and responsibly clean glasses, plates and pans, whether they are lightly soiled or require more intensive cleaning.

## Characteristics

### Basket with adjustable sections

The pull-out baskets are on telescopic runners, making them easy to use pull-out while firmly in place. Further adjustable glass and plate supports provide absolute flexibility when filing the dishwasher with plates and cookware.

### Multiple choice of detergent

All PYRAMIS dishwashers can accommodate all types of tablets or dust detergent for superior washing results.

### Aqua Stop System

This protects your machine from leakages of water or damages to the interior pipes. Especially necessary in built-in models in order to secure your kitchen from flooding.

### Upper basket adjustable in height

The upper basket can be adjusted in height, even when fully loaded, in order to accommodate larger plates or pans in the lower basket.

**Energy efficiency class A & B**

## Program Functions

### Rinse

Pans and dishes requiring rinsing and drying.

### Delicate

Dishes or glasses that require standard cleaning.

### Bio

Dishes that require standard cleaning.

### Normal

Normally dirty dishes, including dried-on residues.

### Super

Very dirty pans and dishes, even dried-on dirt.

### Pre-wash

Pans and dishes that require extra washing.

### Quick

Dishes with light dirt.

### Eco (\*) EN 50242

Dishes with normal dirt, washed immediately after use.

### Daily

Dishes with normal dirt, washed immediately after use.

### Intensive

Normally soiled pans and dishes, including dried-on residues.

# Freezers - Refrigerators

The new PYRAMIS range of cooling products includes seven attractive freezer refrigerators. They all feature low energy consumption and functional accessories.

The stainless steel surfaces are treated with an antispot treatment that helps them stay spotlessly clean.

## Functions

### ECO function (in models FSA 186 & FSD 200 NO FROST)

The special ECO function in the refrigerator compartment ensures that only the optimum energy is used to preserve foods in both the fridge and freezer compartments at ideal temperatures. It is activated by turning the control switch to 'E' and a blue light will indicate that the function is in use.

### Super function

This function automatically lowers the temperature of the freezer significantly to ensure a rapid deep-freezing process of fresh foods, while preserving all their vitamins and nutritional values.

### Freezer and refrigerator thermostats

The temperature inside the freezer and the refrigerator compartments is very easy to control simply by adjusting the relevant thermostat at the desired level from 1-5. For the most efficient function of the fridge it is suggested to use levels 2-4 according to seasonal variations and your requirements.

### No Frost

NO FROST technology saves time as you never need to manually defrost your fridge. Defrosting takes place automatically through the constant circulation of cold air, inside the freezer and the refrigerator compartment. In this way the humidity is kept in the ideal level for food preservation.

## Characteristics

### Climatic Class

From Subnormal (100-320 F) to Tropical (180-320 F). All models provide the appropriate class for Continental or standard Northern climates. Selected models are equipped with a wider range of classes, covering a broader range of temperatures.

### Quality standards

All models are provided with steel panels and are electrostatically painted to remain unaltered. Insulation materials and removable shelves provide maximum and flexible storage space.

### Environmentally safe

The coolant used in PYRAMIS refrigerators is isobutane (R 600a). The refrigerant gas includes no harmful chemicals and is free of CFC.

### Stainless Steel Door

All PYRAMIS refrigerators have stainless steel doors which offer great aesthetics and long-term durability. The stainless steel doors are anti-spot treated to ensure they remain stainless during everyday use.

### Energy Efficiency Class A & A+

All PYRAMIS cooling products are A or A+ rated for energy according to European Union directives.

### Silent function

All PYRAMIS refrigerators have a maximum noise level of 44db, which ensures your kitchen is always peaceful.

### Freezer and Refrigerator thermostat

It is possible to manually adjust the inner temperature of the refrigerator and freezer compartments according to your preference and needs.

### Icematic

This function allows you to have ready-made ice-cubes, simply by emptying the iceboxes into the special drawer with a rotational movement.

### Compartment 0° C

This compartment ensures the temperature remains constant at 0°C, for perfect preservation of meat, fish and other sensitive foodstuffs.

### Vegetable drawer

For easy and effective storage of fresh fruit and vegetables.

### Bottle holder

A practical solution to keep your bottles from sliding when opening or closing the refrigerator's door.

### Function light indicators

They confirm the effective function of the cooling product.

•Accessories are provided as standard for all models: a kit for adjusting the door opening, hinges, food containers, spatula and ice box.

# Minikitchens-Pantries

PYRAMIS Minikitchens are concentrated compact kitchen units that provide all the advantages of a fully integrated and practical kitchen; just on a smaller scale. They offer the ideal solution for offices, holiday homes, dormitories, rented rooms and studio apartments.

PYRAMIS mini-kitchens incorporate a PYRAMIS 18/10 stainless steel sink, built-in hobs, a refrigerator with a 4\* freezer and a wooden or metallic storage cabinet. They are designed for absolute space effectiveness and are made using quality materials with a CE certification.

## Minikitchens

### Switches

Very easy to use and to clean.

### Hobs

The PYRAMIS Minikitchen is offered with electric, ceramic or gas hobs.

### Fridge-Freezer

A quality 4 star refrigerator at 220V, with 50Hz frequency and 140 litre capacity. It has adjustable shelves and automatic defrost in the refrigerator compartment.

### Pantry

High tech 18/10 stainless steel sink, with bowl and a drainer and 2 hobs.
