ROYAL BOTANIC GARDEN EDINBURGH FLORILEGIUM: List of Plants (revised June 2019)

Notes

Plants chosen for their association with RBGE, by name or its staff; their particular value in a glasshouse; their scientific value; or horticultural value. Some subjects are in commercial cultivation and can be obtained from nurseries.

Aeschynanthus (Gesneriaceae) is a National Collection at RBGE. Members of the Zingiberaceae are subjects of ongoing scientific research at RBGE. It is possible many subjects can be found in other botanic gardens in other parts of the world.

If painting in areas where the subject is distributed in the wild, it is strongly encouraged that you consult with your local botany authorities first. Artists wishing to take on any on the list are asked to let the Artist Coordinator know Sarah Howard -<u>Florilegium@rbge.org.uk</u> She will direct you to a member of RBGE staff, who will be happy to help you with specimens, descriptions etc. Facilities are being made available at RBGE for artists painting their subject in UK.

Species	Family	Distribution	Comment
Aeschynanthus burtii Mendum	Gesneriaceae	Sulawesi	Collection and naming reflects 3 generations
	desheriaeeae		RBGE staff
Aeschynanthus mendumiae D.J.	Gesneriaceae	South Asia	Named after former RBGE Botanist and Botanical
Middleton			artist Dr.Mary Mendum
Aeschylanthus citrinus	Gesneriaceae	Sulawesi	Unusual yellow flower. Only cultivated at RBGE
Mendum&S.Scott			
Archontophoenix cunninghamae	Aracaceae	Australia	In Temperate Palm House, RBGE
Argyranthemum 'Logan Pompom'	Compositae		Logan Botanic Garden??
Beaucarnea recurvate	Asparagaceae	Eastern Mexico	In RBGE Arid House. 'Ponytail Palm'
Begonia mendumae M.Hughes	Begoniaceae	Sulawesi	Named after former RBGE Botanist and Botanical
			artist Dr.Mary Mendum
<i>Begonia stevei</i> M.Hughes	Begoniaceae	Sulawesi	Named After Steve Scott former RBGE
			Horticulturist
<i>Betula utilis</i> D.Don var.	Betulaceae		Original plant grown on Inverleith site, but has
jacquemontii (Spach) Winkl.			since died. We have 2 young trees and there's a
'Inverleith'			Mature tree at Benmore
Billolivia moelleri	Gesneriaceae	Vietnam	Named for Bill Burt, Olive Hilliard, Michael
			Moeller
Brownea grandiceps	Fabaceae	South America	Plants & People House, RBGE. 'Rose of Venezuela'

Burbidgea schizocheila	Zingiberaceae	Sabah, Borneo	August flowering RBGE, Genus Named after a former botanist at the Garden Brinsley Burbidge
Ceanothus 'Edinburgh'	Rhamnaceae		Originated in the Edinburgh Botanic Garden around 1934 among seedlings of C. austromontanus and was distributed under that name. It is clearly a hybrid, with C. griseus (C. thyrsiflorus var. griseus) as one parent (E. Kemp in Gard. Chron., 24th June 1961). Also known as "Edinensis".
Clematis 'Bill Mackenzie' Chayamaritia smitinandii	Gesneriaceae	Thailand and ?Laos	Growing on Alpine house Wall - Named after a Former Student aged 24 he became a student at the Edinburgh Botanic Garden. The Twenties and Thirties were heady times to be gardening there, for George Forrest was bringing back seed of new rhododendrons and primulas from his journeys in Yunnan, in China; Frank Kingdon Ward was sending seed of meconopsis, gentians and lilies from his plant-hunting trips in China, Burma and Tibet. It was MacKenzie's job, as deputy foreman in the propagation department, to raise all these new plants from the plant hunters' seed. The first plants ever seen in cultivation at the botanic garden of the famous blue Himalayan poppy, Meconopsis betonicifolia) were coaxed into flower by MacKenzie's patient care. later curator of Chelsea Physic Garden. New genus
(B.L.Burtt) D.J.Middleton			
Cupressus cashmeriana	Cupressaceae	Eastern Himalaya, India	National tree Bhutan. Widely grown in cultivation, Temperate Lands Glasshouse, RBGE With milder winters we now can grow this species outside in the garden
Curcuma colorata	Zingiberaceae	Vietnam	Spring flowering, RBGE
Cycas circinalis	Cycadaceae	South India	Orchid & Cycad House, RBGE

Cycas rumphii	Cycadaceae	Indonesia, New Guinea, Christmas Is	Orchid & Cycad House, RBGE
Cyrtandra sp.nov.(candy stripe)	Gesneriaceae	Papua endemic	Unusual pink and white stripe flowers. Successful
			horticulture keeps sp. alive at RBGE
Cyrtandra serratifolia H.J.Atkins	Gesneriaceae	Sulawesi endemic	Only cultivated at RBGE. Subject of research on
			biogeography and forest health
Dendrobium Inverleith grex	Orchidaceae		Edin.Bot.Gdn. 1931 - registered (RHS)
			Dendrobium Cassiope × Dendrobium regium
Dierama 'Logan Ballerina'	Iridaceae		
Escallonia 'Edinburgh'	Escalloniaceae		
Escallonia × exoniensis 'Balfourii'	Escalloniaceae		Raised by Sir Isaac Bailey Balfour at the
			Edinburgh Botanic Garden by crossing 'a
			particularly fine form of E. rubra' with E. rosea. It
			is a graceful evergreen 10 ft or more high, with
			drooping twigs, the flowers blush-tinted white,
			resembling those of E. rosea in their columnar
			shape and the short limb of each petal.
Etlingera maingayi	Zingiberaceae	Malaysian Peninsular	Malay Rose, first named by Dr. Rosemary
			Margaret Smith – was RBGE's Ginger expert in the
			1980's has since passed away
Etlingera orbiculata	Zingiberaceae	endemic to North Sulawesi	
Etlingera polycarpa	Zingiberaceae	Sulawesi	
Fagus sylvatica L. 'Dawyck'	Fagaceae		The original tree of this well-known fastigiate
rugus sylvulicu L. Dawyck	ragaceae		variety grows in the garden of Lt-Col. A. Balfour at
			Dawyck, Peeblesshire, and now measures 82 × 8 ft
			(1966). It is believed to have originated in the
			woods there and to have been moved to its
			present position by the house around the middle
			of the last century, at which time the property belonged to the Nasmyth family. The tree first
			came to notice early this century when F. R. S. Balfour, the new owner of Dawyck, distributed
			scions to Kew and other gardens, around 1907.
			Scions were also given to Herr Hesse, of Weener,

		Henever W I Deep first described it in Cand
		Hanover, W. J. Bean first described it in Gard. Chron., 1907 i, p. 149). Incidentally, Dr Hesse
		named it 'Dawyckii', but this is unacceptable and
		the cultivar name 'Dawyck' is universally used it
		was his firm in 1912 that first distributed it
		commercially.
<i>Fagus sylvatica</i> L. 'Dawyck Gold'	Fagaceae	With the habit of 'Dawyck', but with the leaves
		golden when young and again in autumn. A
		seedling of 'Dawyck' with 'Zlatia' as the probable
		pollen-parent.
		In 1969 about 100 viable nuts were collected
		from a tree of 'Dawyck' growing in the
		Trompenburg Arboretum, Rotterdam. Of the
		seedlings sixty-three were common beech; the
		others were of the 'Dawyck' habit, twenty-five of
		them green-leaved, four purple-leaved and eight
		golden-leaved. From these were selected 'Dawyck
		Purple' and 'Dawyck Gold' (J. R. P. van Hoey-
		Smith, Journ. R.H.S., Vol. 98, pp. 206-7 (1973)).
		Both these clones were put into commerce in
		Britain by Messrs Hillier. Planted around 1975 in
		the Hillier Arboretum, both are about 25 ft high
		(1986). 'Dawyck Purple' is of narrower, more
		open habit than 'Dawyck Gold'.
Fagus sylvatica L. 'Dawyck	Fagaceae	Like the above, this has the habit of 'Dawyck', but
Purple		the leaves are a good deep purple.
*		In 1969 about 100 viable nuts were collected
		from a tree of 'Dawyck' growing in the
		Trompenburg Arboretum, Rotterdam. Of the
		seedlings sixty-three were common beech; the
		others were of the 'Dawyck' habit, twenty-five of
		them green-leaved, four purple-leaved and eight
		golden-leaved. From these were selected 'Dawyck
		Purple' and 'Dawyck Gold' (J. R. P. van Hoey-
		Smith, Journ. R.H.S., Vol. 98, pp. 206-7 (1973)).

<i>Fuchsia megallanica</i> Lam. 'Logan Woods'	Onagraceae		Both these clones were put into commerce in Britain by Messrs Hillier. Planted around 1975 in the Hillier Arboretum, both are about 25 ft high (1986). 'Dawyck Purple' is of narrower, more open habit than 'Dawyck Gold'.
Gentiana 'Inverleith'	Gentianiaceae		Bred by Bill Mackenzie, at 24, he became a student at the Edinburgh Botanic Garden. The Twenties and Thirties were heady times to be gardening there, for George Forrest was bringing back seed of new rhododendrons and primulas from his journeys in Yunnan, in China; Frank Kingdon Ward was sending seed of meconopsis, gentians and lilies from his plant-hunting trips in China, Burma and Tibet. It was MacKenzie's job, as deputy foreman in the propagation department, to raise all these new plants from the plant hunters' seed. The first plants ever seen in cultivation at the botanic garden of the famous blue Himalayan poppy, Meconopsis betonicifolia) were coaxed into flower by MacKenzie's patient care. later curator of Chelsea Physic Garden
Globba winitii	Zingiberaceae	Thailand, Myanmar	Dancing Ladies Ginger
Gymnospermium albertii	Bereridaceace	Uzbeckistan, Tajikistan, Turkmenistan,	1980 1820 Flowers Jan/ Feb
Hemerocallis x 'Logan'	Hemerocallidaceae		
Howea forsteriana	Arecaceae	Lord Howe Island	Grows in Temperate Palm House, RBGE
Iris acutiloba longitepala	Iridaceae	Iran	2005 1477 White April/ May
Iris aff. viearia	Iridaceae	Iran	2016 0233 Lilac/ multi
Iris off. tadzhikorum	Iridaceae	Tajikistan	Blueish early Feb/March
Iris paradoxa forma mirabilis	Iridaceae	Tajikistan	2005 1486 Bumble bee colour April/ May
Iris popovii	Iridaceae	Tajikistan	Redish/ pink Early
Iris zaprijagajewii	Iridaceae	Tajikistan	Feb/ March
Jasminum officinale L. 'Inverleith'	Oleaceae		

Lathyrus aphaca	Leguminosae/Faba ceae	Europe / Mediterranean	Long history of research at RBGE Flowers May / June (annual)
Lathyrus japonicus	Leguminosae/Faba ceae	Temperate N. Hemisphere	In nursery – UK rarity we help conserve (perennial – wild near Dundee coast)
Lathyrus niger	Leguminosae/Faba ceae	Europe / Mediterranean	Long history of research at RBGE (perennial)
Lathyrus nissolia	Leguminosae/Faba ceae	Europe / Mediterranean	Long history of research at RBGE (annual)
Lathyrus ochrus	Leguminosae/Faba ceae	Europe	Long history of research at RBGE (annual)
Lathyrus pannonicus	Leguminosae/Faba ceae	Europe / Mediterranean	Long history of research at RBGE (perennial)
<i>Lathyrus</i> species – many available on request	Leguminosae/Faba ceae		
Lepidozamia hopei	Cycadaceae	Queensland, Australia	Grows in Orchid & Cycad House, RBGE
Kaempferia elegans	Zingiberaceae	East and South Asia	Malaysia
Magnolia hodgsonii	Magnoliaceae	Himalayas and SE Asia	Grows in Temperate Lands Glasshouse RBGE
Meconopsis 'Inverleith'	Papaveraceae		
Monolophus bracteatus	Zingiberaceae	Laos	
Nothofagus antarctica (G.Forst.) Oerst. 'Benmore'	Nothofagaceae		

Olea tsoongii	Oleaceae	China	Grows in RBGE Temperate Lands Glasshouse
Oreocharis synergia W.H.Chen,	Gesneriaceae	Yunnan, China	Celebrates long partnership between RBGE/China
Y.M.Shui& Mich.Möller			in epithet 'synergia'
Palaquium gutta	Sapotaceae	South Asia	Temperate House, RBGE
Passiflora 'Inverleith'	Passifloraceae		
<i>Persicaria amplexicaulis</i> (D.Don) Ronse Decr. 'Inverleith'	Polygonaceae		
<i>Phygelius</i> x <i>rectus</i> Coombes 'Logan Queen'	Scrophulariaceae		
<i>Pinus sylvestris</i> L. 'Argentea Inverleith'	Pinaceae		
Pleuranthodium peekelii	Zingiberaceae	Bougainville	
<i>Primula allionii</i> Loisel. 'Edinburgh'	Primulaceae		
Prunus x dawyckensis Sealy	Rosaceae		Original tree still grows at Dawyck
<i>Rhododendron gardenia</i> Schltr. 'Jennifer Jean'	Ericaceae		Named after George Argents Daughter?
Rhododendron 'Logan Delight'	Ericaceae		
Rhododendron 'Logan Surprise'	Ericaceae		
Rhododendron loranthiflorum Sleumer ssp loranthiflorum 'Dick Shaw'	Ericaceae		It is named after Richard (Dick) Shaw, formerly assistant curator at the Benmore Botanic Garden, then curator at Kew and finally Edinburgh. Dick was a fiery character who took a lively interest in the Vireya Collection and scientific collections in general when he was in charge.
<i>Rhododendron macgregoriae</i> F. Muell. 'Paddy Woods'	Ericaceae		It is named after Patrick Woods the collector, botanist and horticulturist at the Royal Botanic Garden Edinburgh. He went on several expeditions to SE Asia collecting plants, took a great interest and published on rhododendrons and orchids.
<i>Rhododendron macgregoriae</i> F. Muell. 'Tom Grieve'	Ericaceae		It is named after Thomas Grieve, a dedicated plantsman who worked in South America for

			much of his life but returned to Britain as a gardener at the Royal Botanic Garden Edinburgh. He was in charge of the Vireya Collection for a number of years and was the first person to persuade Rhododendron saxifragoides to flower.
Rhododendron mendumiae Argent	Ericaceae	Philippines	Named after former Botanist and Botanical Artist Mary Mendum
<i>Rhododendron montroseanum</i> Davidian 'Benmore'	Ericaceae		
Rhododendron 'Ne Plus Ultra'	Ericaceae		
Rhopalostylis sapida	Arecaceae	New Zealand	Grows in Temperate Palm House, RBGE
Sobralia 'Inverleith' grex	Orchidaceae		Edin.Bot.Gdn. 1926 - registered (RHS) Sobralia lowii × Sobralia xantholeuca
Somrania albiflora D.J.Middleton	Gesneriaceae	Thailand	New genus described from cultivated plants collected sterile but brought to flower at RBGE
Streptocarpus rexii Lindl.	Gesneriaceae	South Africa	Genus type species. Subject of first genomic map in the genus
Streptocarpus papangae Humbert	Gesneriaceae	Madagascar endemic	Unusual morphology. Pink and white forms
Streptocarpus nobilis C.B.Clarke	Gesneriaceae	West Africa	Shows cleistogamy, very rare in genus
Streptocarpus schliebenii Mans.	Gesneriaceae	Tanzania endemic	Only in cultivation RBGE. Key to redefinition of geo-botanical distribution of genus
Streptocarpus grandis N.E.Br.	Gesneriaceae	South Africa	Unifoliate and subject of major genetic studies
Streptocarpus bullatus Mansf.	Gesneriaceae	3 locations only	Endangered IUCN
Sutherlandia frutescens (L.) R.Br	Leguminosae	South Africa	The genus Sutherlandia was named after James Sutherland, 1639-1719, first Superintendent of the Edinburgh Botanic Garden Fynbos. Traditional medicine
Sutherlandia montana Phillips&R.A.Dyer	Leguminosae	South Africa	The genus Sutherlandia was named after James Sutherland, 1639-1719, first Superintendent of the Edinburgh Botanic Garden
Taraxacum pankhurstianum A.J.Richards& C.C.Ferguson- Smyth	Compositae	St Kilda, Scotland	Named after 1 of RBGE's former Botanists Richar Pankhurst and is One of the most rare of Scottish plants

<i>Thunia</i> 'Inverleith' Thunia <i>veitchiana</i> Rchb.f. x <i>bensoniae</i> Hook.f.	Orchidaceae	India, S. Asia	Thunia Inverleith Edin.Bot.Gdn. 2006 and is a hybrid of Thunia x veitchiana and Thunia bensoniae .
Tulipa tarda	Liliaceae	Central Asia	2013 0625A Yellow with green stripe
Tulipa zenaidae	Liliacae	Central Asia	2013 0622 Red/ orange
Viburnum × bodnantense 'Charles Lamont'			Named after a Former Assistant Curator at the Royal Botanic Garden, Edinburgh, The cross was first made in 1933, by Charles Lamont (d. 1949), Assistant. And consists of a group of hybrids between V. farreri (V. fragrans) and V. grandiflorum.
Zingiber newmanii Theilade&Mood	Zingiberaceae	Malaysia	Named after Dr. Mark Newman, Botanist RBGE
Zingiber thorelii	Zingiberaceae	Cambodia
