### Abstract

The parasitic plant *Bdalophytum oxylepis* is recorded for the first time in the state of Chiapas. This species is endemic to Mexico, previously known from a few localities in the states of Jalisco, Michoacán, and Oaxaca. This new record increases to 2 the number of species of *Bdalophytum* in Chiapas and in the region covered by the project Flora Mesoamericana.

### Keywords

Chiapas, Central Depression, endemic species, parasitic plant.
