

# ECHELON<sup>™</sup> 0.3% Granular Herbicide on Fertilizer

For pre-emergence and early post-emergence control of crabgrass, selected annual grasses, sedges and annual broadleaf weeds in turf sites - residential and institutional lawns, athletic fields, commercial sod farms, golf course dsides, utility right of ways, railways and industrial areas By Wt. fairways and roughs, roads ACTIVE INGREDIENT AUTIVE INGREDIENT: Sulfentrazone: N-[2,4-dichloro-5-[4-(difluoromethyl-4,5-dihydro-3-methyl-5-oxo-1H-1,2,4-triazo1-1 y]]pheny]]methanesulfonamide Prodiamine: [N3,N3-Di-n-propy]-2,4-dinitro- 6-(trifluoromethyl)-m phenylenediamine OTHER INGREDIENTS: Total: General Information Turf Use Instructions Echelon is a selective pre-emergence and post-emergence herbicide for control of crabgrass, annual grass and broadleaf weeds and sedges in turf sites including residential and institutional lawns, athletic fields, commercial sod farms, golf course fairways and roughs, roadsides, utility right-of-ways, railways and industrial areas. Echelon is a granular formulation containing 0.003 lbs. of active ingredient per pound of formulated product. The mode of action of Echelon herbicide involves uptake by both weed roots and shoots of existing weeds and prevention of growth by newly emerged used seedlings ... 0.1% .... 0.2% ... 99.7% 100.0% Contains 0.003 pounds of active ingredient per pound of product U. S. Patent No. 4.818.275 growth by newly emerged weed seedlings. Specific Use Instructions in Turfgrass Established Turf: This product may be used on seeded, sodded or sprigged turgrasses that are well established. First application of this product can be made following the second mowing providing the grass has developed into a uniform stand with a good root system. Turf injury may result from application of this product on turf that is not well established or **| 8-0-**4 has been weakened by stresses such as unfavorable weather conditions, disease, chemical or mechanical influences. Broadcast Echelon with suitable application equipment to ensure uniform coverage over the treatment area. A drop or rotary spreader designed to apply granular herbicide or insecticide is the preferred application of this product. Calibrate rotary spreader designed to apply granular herbicide or insecticide is the preferred application of this product. Calibrate application equipment prior to application. Consult manufacturer's operation manual for proper calibration and operation of application equipment. Apply 2.87 to 8.60 pounds per 1,000 square feet to control broadleaf weeds and grasses. See Table 1 for application rates based on turf grasses.
When applied as directed under the conditions described, the following established grasses are tolerant to Echelon herbicide at the recommended use rates in a range from 0.250 to 1.125 lb. ai/acre (83 to 375 pounds/acre or 1.91 to 8.6 pounds/1,000 sq. ft.). Do not exceed 1.125 lb. ai/acre (375/acre) per calendar year.

- Call or poison control center or doctor for treatment advice.
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. IF IN EYES a body this product on contain directed of one may rate recede on this recede callwards may recent management of the maximum application rate per turf type or 1.125 lbs. ai/acre (375 pounds/acre), whichever is lower.
3 Echelon may be applied more than once per year if needed as long as total amount applied does not exceed the maximum application rate per turf type or 1.125 lbs. ai/acre (375 pounds/acre), whichever is lower.
• Use of this product on certain cultivars of Chewings Fescue, Fine Fescue or Tall Fescue cultivars may result in undesirable injury.
• Echelon application may cause temporary discoloration to explosed leaf surfaces on certain cultivars of zoysiagrass. Treated turfgrass will recover with new growth. Discolored leaf fissue will be removed with mowing. To reduce potential for discoloration, do not apply Echelon on turfgrass that is weakened by weather, mechanical, chemical, disease or other related stress. Maintain proper cultural practices such as adequate moisture and fertility levels to promote healthy turf arrowth Call a poison control center or doctor for treatment advice. Call a poison control center or doctor immediately for treatme Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor SWALLOWED Do not give anything by mouth to an unconscious person. HOTLINE NUMBER Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-{800}-331-3148 for Emergency Medical Treatment Information. For Information Regarding the Use of this Product Call 1-800-321-1FMC (1362). PRECAUTIONARY STATEMENTS Hazards to Humans (and Domestic Animals) growth. • Echelon has demonstrated tolerance on both cool and warm season turfgrasses. However, not all varieties and or cultivars have been evaluated. Turfgrass managers desiring to treat newly released varieties should first apply Echelon to a small area prior to treatment of larger areas. Table 1A. Applications for St. Augustine Grass – Application of Echelon to St. Augustine Grass may cause temporary discoloration to exposed leaf surfaces of St. Augustine grass. Treated Turfgrass will recover with new growth and discolored leaf tissue will be removed with mowing. CAUTION Causes moderate eye irritation. Harmful if inhaled, swallowed, or absorbed through skin. Avoid breathing dust. Do not get on skin, in eyes or on clothing. Prolonged or frequently repeated skin contact while mixing or handling may cause allergic reactions in certain individuals. Wash thoroughly with soap and water after handling and before eating, drinking, chewing Do not apply Echelon to St. Augustine grass if temporary discoloration cannot be accepted.

Personal Protective Equipment (PPE) St. Augustine Applicators and other handlers must wear long-sleeved shirt and long pants, waterproof gloves, and shoes plus socks. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use 45-60 days later 45 - 60 days later 45 - 60 days later 45 - 60 days later 45 – 60 days later Table 2: Common Name Scientific Name detergent and hot water. Keep and wash PPE separately from other laundry (Echinochloa crus-galli) Barnyardgrass User Safety Recommendations: Bluegrass annual 1 (Poa annua) - Users should remove clothing immediately if product gets inside. Then wash thoroughly and put on clean clothing. Environmental Hazards Carpetweed (Mollugo verticillata) Environmental nazaros This product is toxic to marine/estuarine invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to terrestrial and aquatic plants in neighboring areas. Do not contaminate water when disposing of equipment wash waters or rinsate. <u>Groundwater advisory</u>: Sulfentrazone is known to leach through soil into groundwater under certain conditions as a result of label use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, result of label use. Carolina Geranium Geranium carolinianum Chickweed, common 2 (Stellaria media) Chickweed, mousear (from seed) (Cerastium vulgatum) Crabgrass (large, Smooth) 3 (Digitaria spp.) Crowfootgrass (Dactyloctenium aegyptium. may result in groundwater contamination. may result in groundwater contamination. Do not use on coarse soils classified as sand which have less than 1% organic matter. Surface water advisory: Sulfentrazone can contaminate surface water through spray drift. Under some conditions, sulfentrazone may also have a high potential for runoff into surface water (primarily via dissolution in runoff water), for several to many months post-application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlying extremely shallow groundwater, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas over-lying tile drainage systems that drain to surface waters. Cupgrass, Woolly (Eriochloa villosa) Foxtails, Annual (Setaria spp..) Goosegrass 4 (Eleusine indica) Hairy Bittercress Cardamine hirsuta Henbit 2 (Lamium amplexicaule ) Itchgrass (Rottboellia exaltata) DIRECTIONS FOR USE Knotweed, prostrate (Polygonum aviculare) It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product through any type of irrigation system. Do not apply this product in a way that will contact workers Kochia (Kochia scoparia) Kyllinga, greer (Kyllinga brevifolia) or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation. Kyllinga, false ( Kyllinga gracillima) Lam quarters dium album Agricultural Use Requirements Lovegrass (Eragrostis spp.) Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency Nutsedge, yellow (Cyperus esculentus) Pancium (Texas,Fall) (Panicum spp.) assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted entry interval. These requirements only apply to uses of this product that are Pigweed, Redroot (Amaranthus retroflexus) Purslane, Common (Portulaca oleracea) covered by the Worker Protection Standard. (Richardia scabra L., Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: Coveralls over long-sleeved shirt and long pants, chemical-resistant gloves made of any waterproof material, and shoes plus socks. Pusley, Florida Sedge, globe (Cyperus globulosus) Sedge, cylindrica (Cyperus retrorsus) Sedge, Surinam (Cyperus surinar Non-Agricultural Use Requirements The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Re-entry Statement: Do not allow people (other then applicator) or pets on treatment area during application. Do not enter treatment area until dust has settled. Sedge, Texas (Cyperus polystachyos) Shephardspurse 2 (Capsella bursa-pastoris Signalgrass, broadleaf (Brachiaria playphylla) Speedwel (Veronica spp.) Sprangletop (Leptochola spp.) Spurge, prostrat (Euphorbia h STORAGE AND DISPOSAL Witchgrass (Panicum capillare L.) Do not contaminate water, food or feed by storage or disposal <u>Pesticide Storage</u>: Store product in original container only, away from other pesticides, fertilizer, food or feed. Reseal open bag by folding top down and securing. Store in a cool, dry place and avoid excess heat. <u>Splill</u>: In case of spill, avoid contact, isolate area and keep out animals and unprotected persons. **Confine spills. Call FMC (800) 331-3148**. Woodsorrel, yellow (from Seed) (Oxalis stricta) Poa annua is a winter annual. Applications of Echelon should be made in August or September to established, nor verseeded turf before Poa Annua germinates. Consult local Cooperative Extension Service for more specific pplications timings for your local area since August and September are approximate timings. applica 2: Apply Echelon in late summer, fall or winter before weed germinates for control. To confine spill: If liquid, dike surrounding area or absorb with sand, cat litter or commercial clay. If dry material, cover to 3: Crabgrass control in cool season grasses from fall application: prevent dispersal. Place damaged package in a holding container. Identify contents. <u>Pesticide Disposal:</u> If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional office for Areas where the ground is subject to winter freezes. Echelon may be applied in the fall at rates listed in Table 1 (83-250 pounds per acre) for cool season grasses when soil temperatures are below 50F, but prior to the ground freezing. This will provide control of crabgrass the following spring. 4: In areas of extended growing season and heavy pressure weed control will be enhanced by second application of Echelon 60 - 90 days after initial application.

guidance. <u>Container Disposal:</u> Paper and Plastic Bags: Non-refillable. Do not reuse or refill this container. Completely empty bag into application equipment. Then offer for recycling, if available, or dispose of empty bag in a sanitary landfill or by incineration, or by burning. Do not burn unless allowed by state or local authorities. If burned, stay out of smoke.

### days after initial application. **NET Weight 50 LBS (22.67 KG)**

Lbs. Product/A	North	Transition	South	
83 - 125	3	3	3	
190 - 250	4	4	4	
375	6	5	5	
Sod Production				

ended that sod be established for at least six (6) months before an application of Echelon herbicide. Do not apply this product within three (3) months of harvest. Other Use Precautions:

Do not apply to golf course putting greens or tees. Do not use on turgrasses other than those listed on this label.

Do not use on turgrasses other than those listed on this label. Do not graze or feed livestock forage cut from areas treated with Echelon herbicide.

Do not graze or leed livestock forage cut from areas treated with Echelon herbicide. Do not apply directly to landscape ornamentals or ornamental beds. Do not apply to areas where dichondra, colonial bentgrass, velvet bentgrass or annual bluegrass (*Poa annua*) are *desirable* species. Do not apply to creeping bentgrass if mowing height is less than 0.5 inch. Do not apply to newly set sod until the sod has rooted and exposed edges have grown in. Do not apply with adjuvants or surfactants.

Additional Use Instructions

Additional Use Instructions Railroad Rights-of-Way: Controls many weeds and maintains bare ground on railroad rights-of-way, including railroad yrads, railroad crossings and railroad bridge abutments. Highway, Roadside, Pipeline and Utility Rights-of-Way: Controls many weeds and maintains bare ground in highway, roadside, pipeline and utility rights-of-way. Such areas would include, but are not limited to, guardrails, road shoulders, electric utility substations, pipeline pumping stations, around electric transmission towers, around distribution line poles plus other areas where complete vegetation control is desired. Industrial Areas, Fence Rows and Other Non-crop Sites: Controls weeds and maintains bare ground in industrial areas including production facilities, tank farms, storage areas, parking areas, lumber yards, airports, military installations, along fence rows, and in similar non-crop sites where complete vegetation control is needed.

Method and Rate of Application for Additional Uses For residual control of germinating weeds in non-crop land, apply as a broadcast treatment at 250 to 375 pounds of product (0.75 to 1.125 pounds active ingredient) per acre by ground in a suitable granular applicator.

DO NOT apply Echelon Herbicide to soils classified as sand with less than 1% Organic Matter. Timing

For best results, apply Echelon alone or in combination with other herbicides for residual control of weeds in late summer, fall, or early spring to insure adequate moisture for soil activation.

#### Weeds Controlled

Echelon when applied at 250 to 375 pounds per acre, will control the following weeds in non-cropland areas (Table 5). Use the higher labeled rates to extend length of control. Use the higher rates on sites with fine soil textures and on sites with more than 2% organic matter.

Table 5: Weeds controlled from pre- emergence application to bare ground prior to weed seed germination
