

Turnip Greens

[TP7-500 - Alamo Turnips](#)

33 days. Brassica rapa. (F1) This early maturing plant produces high yields of quality turnips roots and turnips greens. It has excellent flavor and delicious greens. Yields are up to 50% greater than standard turnip greens. Quick growing too, only 33 days! The plant has the ability for multiple cuts. Grown for tops only. An excellent choice for home gardens and market growers. Disease Resistant: TuMV.

[TP4-500 - Golden Ball Turnips](#)

55 days. Brassica rapa. Open Pollinated. The plant produces good yields of 3 to 4" turnips. The skin is yellow and the flesh is yellow. Very flavorful, sweet, tender, and mild. Nice type for mashing! Both tops and roots are good and tasty. Keeps well, will store until spring. Excellent choice for home gardens. An heirloom dating back to 1859. United States Department of Agriculture, NSL 6109.

[TP1-500 - Purple Top White Globe Turnip Seeds](#)

57 days. Brassica rapa. Open Pollinated. Purple Top White Globe Turnip. The plant produces good yields of 4 to 6" diameter turnips. They are deliciously sweet and tender. Roots are white on the bottom and bright purple on top. Best when harvested when roots are 4 to 6". Leaves can be used as greens. Stores well. Excellent choice for home gardens. An heirloom variety dating back to pre-1880. United States Department of Agriculture, NSL 6119.

[TP8-500 - All Top Turnips](#)

35 days. Brassica rapa. (F1) This early maturing plant produces high yields of quality turnip greens. Very flavorful. The plant produces large smooth green leaves with sturdy stems. Roots are not edible. Grown for tops only. Perfect greens for salads. An excellent choice for home gardens and market growers. Disease Resistant: TuMV.

[TP6-500 - Just Right Turnips](#)

1960 All-America Selections Winner!

50 days. Brassica rapa. (F1) This early maturing plant produces good yields of 4 ½ to 6" diameter turnips. The skin and flesh are pure white! It has mild flavored roots and delicious greens. Extremely cold tolerant. Stores well. Will store until spring. Sow in summer/fall for fall/winter harvests. It is not recommended for spring sowing because of a tendency to bolt early. Excellent choice for home gardens and market growers.

[TP9-500 - Shogoin Turnip Seeds](#)

42 days. Brassica rapa. Open Pollinated. Shogoin Turnips. The plant produces good yields of 6 to 8" diameter turnips. The tops are tender and can be used as greens. Roots are crisp and firm and are best when harvested when young at 3 to 4". Perfect for soups, salads, or stir-fries. Also good for pickling! Thrives in hot dry weather. Grown commercially for greens. An excellent choice for home gardens, market growers, and open field production. United States Department of Agriculture, NSL 37048. A variety from Japan.

TP3-500 - Tokyo Cross Turnip Seeds

1969 All-America Selections Winner!

35 days. Brassica rapa. (F1) Tokyo Cross Turnip. This early maturing plant produces good yields of 2 to 6" diameter high-quality pure white turnips. The white flesh is firm, crisp, mild, and flavorful. Excellent pickling variety. Leaves are delicious and used as greens. Easy to grow and can be sown from spring to fall. They are cold-tolerant and also slow to bolt. An excellent choice for home gardens and market growers.

TP11-500 - Topper Turnips

36 days. Brassica rapa. (F1) This early maturing plant produces heavy yields of high-quality dark green turnip greens. It takes 80 days for roots to develop. Greens grow 28" tall. Roots can be eaten. Highly bolt resistance. Vigorous re-growth ability! The plant can have up to three harvests in addition to the first harvest. An excellent choice for home gardens and market growers. United States Department of Agriculture, PI 662790. Disease Resistant: TuMV.

TP12-100 - White Lady Turnip Seeds

35 days. Brassica rapa. (F1) White Lady Turnip. This early maturing plant produces good yields of 2 ½ to 3" diameter bright green turnip greens. The pure white roots are tender, sweet, and delicious. You can harvest roots at any time and they will not become woody. The leaves are virtually free of pubescence and can be used as greens. Bolt Resistant. Excellent choice for home gardens and market growers.
