

reMYND is a biopharmaceutical company focused on the development of treatments against protein-misfolding disorders, with two business units:

- ✦ The Drug Discovery and Development (DDD) unit, driving our own pipeline of disease-modifying treatments against diabetes, Alzheimer's, Parkinson's and orphan diseases
- ✦ The CRO unit, a world-wide leader of preclinical Alzheimer's disease contract research in our proprietary transgenic mouse models

Open Position: Quality, Health, Safety and Environment (QHSE) Manager

Your role

To support the expansion of reMYND's activities at the DDD and CRO units:

- ✦ Maintaining and further implementing the quality system including:
 - Process, method and training standardisation and validation.
 - Formulation and/or approval of standard operating procedures (SOPs) for existing and new biochemical, IHC, cell culture and in vivo as well as QA procedures, and corresponding training procedures
 - Change control, deviation and CAPA management
 - Quality control oversight: coordinating review and approval of in-vivo and in-vitro studies from start to finish (protocols, documentation, data analyses and reports); study- and process-based quality inspections
 - Management of lab and facility equipment
- ✦ Maintaining and further implementing the occupational health and safety system including:
 - Management of safety, admission and emergency procedures, and of the chemical and MSDS databases
 - Periodic risk assessments and corresponding update of the global prevention and year action plans
 - Coordination and follow-up of the CAPAs as defined by the year action plan
- ✦ Maintaining and further implementing security and business resilience measures (e.g. recovery plans, access and alarm procedures)
- ✦ Maintaining environment-related procedures and reports (e.g., waste procedures)
- ✦ Support further professionalization in terms of animal health and welfare (AAALAC) standards
- ✦ Providing induction and classical QHSE training sessions
- ✦ Planning your own activities on a weekly basis in order to deliver the results, managing a Quality associate and Working in a team of equally minded colleagues

Your background, skills and attitude

- ✦ Holder of Master's or PhD degree in biology, bio-medical sciences or biotechnology
- ✦ Previous experience in a QHSE position within the biotech industry
- ✦ A results oriented, outgoing attitude with a high level of energy; able to work closely in a team; eager to learn
- ✦ Familiar with MS Office with a profound knowledge of Excel; knowledge of Graphpad Prism is a plus
- ✦ Fluent in Dutch and English
