

FRESHWATER FISH LIST

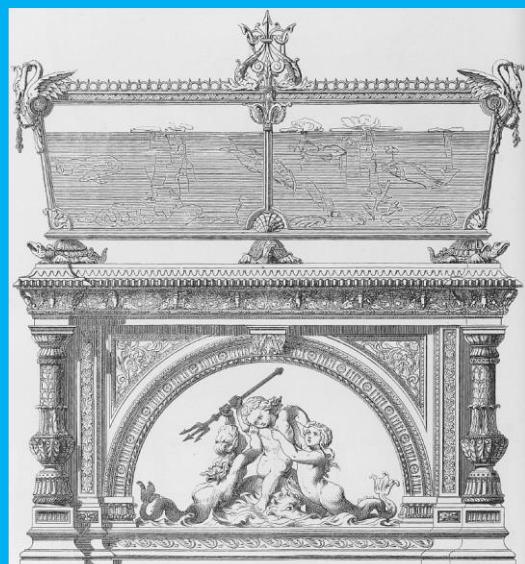

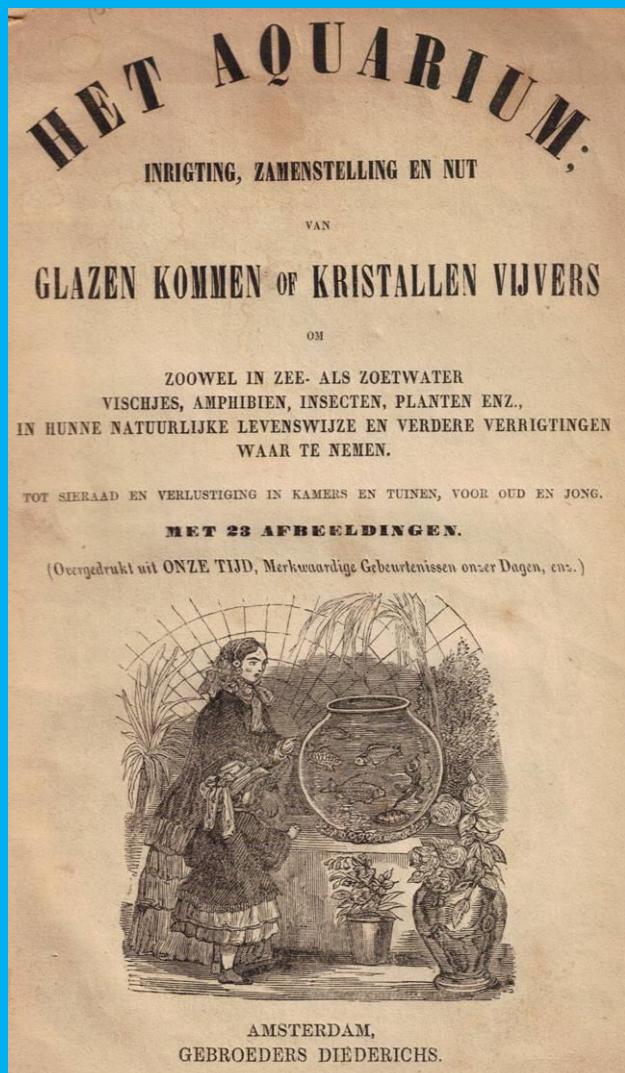

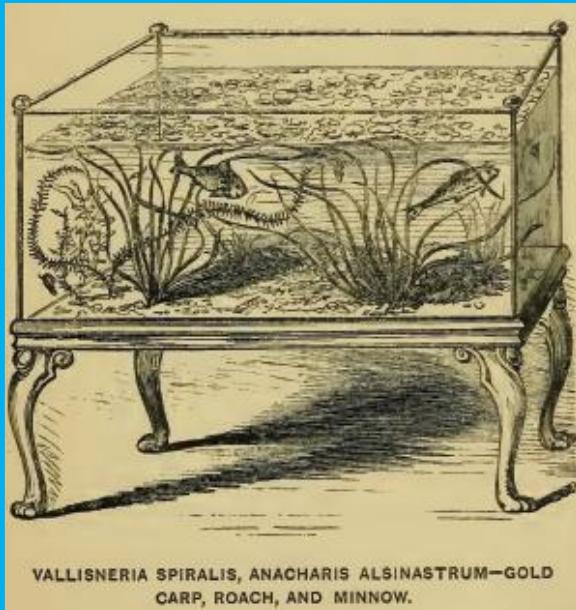

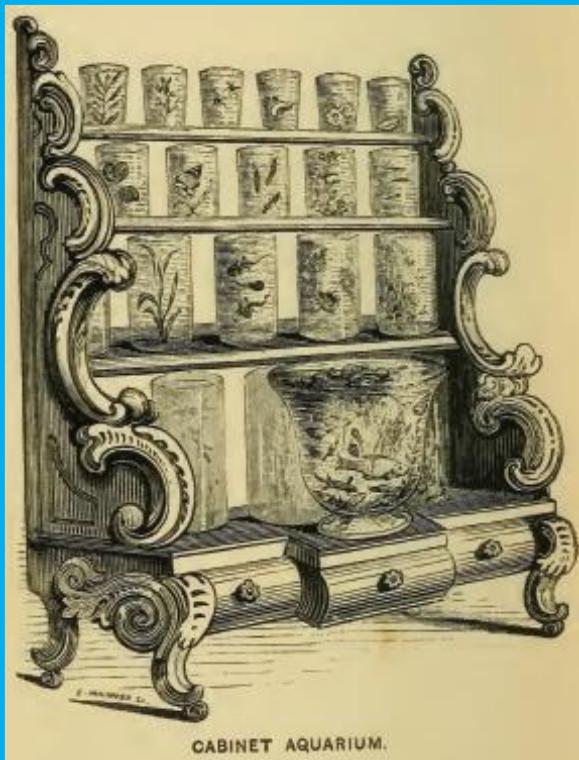

an alphabetic scientific name list of the world's freshwater fishes and an overview of the scientific names used in the aquarium literature

Dr. Richard van der Laan

Preface

During more than forty years my brother and I tried to keep up with the aquaristic literature and to stay up to date with the scientific names of the freshwater fishes. Over the years we collected many scientific and common names. With the publication of Bill Eschmeyer's *Catalog of Fishes* we could check our list and with the help of some recent regional freshwater fish checklists we could transfer our data to the present list.

Apart from the historical overview of the freshwater fishes available to the aquarium hobby during the last century (or at least the scientific names used by aquarists), it proved more and more intriguing to try to identify the described fish in question (although it was not always possible). Also keeping track of the numerous name changes (made necessary by scientific research) was a tremendous challenge.

To reach some kind of ordering, the classification of the fishes needed to be studied too. This part of the zoological science is also rapidly changing.

With the alphabetical list one can locate the currently valid scientific name, the correct spelling of that name and the position of the species in the zoological classification system. Also one can check if there has been any confusion with the name. With the references one can see the occurrence of the scientific names in the aquarium hobby during the last century.

Although the aquarium histories are different in the various countries (in 2006, the 200th anniversary of Roßmässler, German aquarists already celebrated 150 years of keeping aquaria and freshwater fishes!), there was a somewhat simultaneous development through exchange of data and / or of aquarium fishes. Because a lot of aquarium fish descriptions and figures were copied, it has not been possible to track the occurrence of the aquarium fish species in certain countries.

I would like to thank my brother Paul van der Laan, who worked with me over such a long period of time on the "fish name problem" and of course many loving kisses to my wife Hana for caring for us during that work.

I am indebted to Harro Hieronimus for his correction of the German text and for making the publication of this work possible.

For the 14th edition I added many names of newly described species and some new citations, corrected many mistakes and updated the Dutch language bibliography. Special thanks to Herman Meeus for helping me with the Flemish aquarium history.

With the excellent books of Ad Konings I could correct the cichlid names from Lake Malawi and Lake Tanganyika. And, new in the 15th edition, I highlighted all the unknown species in red, to improve clarity.

Finally, for the 16th edition, I was able to cite the instalments of the famous work of Holly, Meinken and Rachow with the publication dates recently researched by Axel Zarske and Heinz Berkenkamp.

This updated 17th edition will probably be the last edition of the **Freshwater Fish List**. Work on the CAS Catalog of Fishes database is likely to consume all my spare time in the future.

I hope we have made a useful list for every-one who is trying to connect some aquaristic article or book reference with a scientific fish name.

Richard van der Laan, ALMERE, The Netherlands, January 2016.

Dedication

We would like to dedicate this work to all those ichthyologists who have shared or who are sharing their knowledge with the (name-struggling) aquarists.

J. R. Norman (1931), A History of Fishes, p.370:

The question of nomenclature is an important one, and unfortunately there is still considerable diversity of opinion as to the correct scientific name to be applied even to our commonest food-fishes. It may well be asked why it should be necessary to give scientific names at all. The reason is that vernacular or common names, although convenient, are by no means precise, and are frequently used in a very loose manner. The same name may be given to two or more totally different fishes in different parts of the country or in various regions of the world; or, as is even more common, the same species may be known by quite different names in various localities. The name "whiting," for example, is not only applied to the well-known food-fish of the Cod family (*Gadus merlangus*), but also to various kinds of fresh-water fishes. Conversely, the following names, among others, are all used for the Sea Trout (*Salmo trutta*) in various parts of the British Isles, while the non-migratory members of this very variable species have received as many vernacular names again: Orange Fin, Black Tail, Phinock, Salmon Trout, Truff, Scurf, Sewen, Bull Trout, Grey Trout, and Round Tail. The names of Peal and Bull Trout are used in some parts of the country for the Trout (*S. trutta*), but in others to the Salmon. Another good reason for the use of scientific names is the fact that of the fifteen thousand odd species of fish known to-day probably less than half have a common name in any language. There are nearly a hundred species of Cichlids in Lake Tanganyika alone, but very few of them are distinguished by the natives under a particular name, and the same species will perhaps be given one name by one tribe and a totally different one by another. It is agreed, therefore, that, in order to obtain precision and to avoid any chance of confusion, it is necessary to give every species of fish a scientific name. In the words of Dr. Regan, the name of an animal "is a clue to all that is known or that has been recorded in literature about its structure, habits, economic importance or anything else; without the correct name we are in the dark and the conclusions we arrive at may be founded on erroneous grounds." It not infrequently happens that two

SUMMARY

An alphabetic list with the scientific names of all known recent freshwater fish species is presented. Also listed are the English and Dutch vernacular names in use for freshwater fishes and the various English (common) names of the freshwater aquarium fishes.

The aim of this publication is six-fold:

- to list the currently valid and correctly written scientific name of every recent freshwater fish species;
- to stimulate the use of correctly written scientific names;
- to list Dutch and some frequently used English vernacular names of freshwater aquarium fishes and freshwater aquacultural fishes;
- to list some scientific names wrongly used by aquarists;
- to present some aquarium book citations;
- to present an overview of the freshwater and brackish water fishes recorded during the last century in various aquarium books.

Although many scientific names are likely to change with scientific progress, we nevertheless present the list of currently valid scientific names now. This current list can already be used for finding the currently valid names and the correct spelling of these names. Further it cites the use of the names in the aquarium literature and the list also provides an overview of the known species of freshwater fish.

We hope the freshwater fish name list will stimulate the use of correctly written scientific names and bring some stabilization in the use of common names.

Zusammenfassung

Eine alphabetische Liste mit den wissenschaftlichen Namen aller rezenten Süßwasserfische der Welt ist zusammengestellt worden. Auch werden die vielfach verwendeten holländischen und englischen Namen erwähnt.

Diese Veröffentlichung hat einen mehrfachen Zweck, nämlich:

- das Erstellen einer Liste mit richtig geschriebenen Namen für jede rezente Süßwasserfischart;
- den Gebrauch von richtig geschriebenen wissenschaftlichen Namen zu propagieren;
- die Erwähnung vielfach verwendetener englischer und holländischer Namen von Süßwasserfischen und wirtschaftlich genutzten Süßwasserfischen;
- einige wissenschaftliche Namen, welche in der Fachliteratur falsch verwendet sind, zu erfassen;
- einige Aquaristik-Fachbuchzitate aufzulisten;
- die Präsentation einer Übersicht von Süßwasser- und Brackwasserfischarten, welche während des letzten Jahrhunderts in vielen Aquarienbüchern genannt sind.

Obwohl viele wissenschaftlichen Namen noch möglicherweise geändert werden (durch ständige Recherchen), ist es jedoch wichtig die Liste jetzt zu präsentieren. Mit dieser Liste kann man sich schon die heute gültigen Namen und die richtige Rechtschreibung dieser Namen merken. Ebenso kann man sich die Benutzung der Namen in der aquaristische Literatur ermitteln und gleichzeitig bekommt man eine Übersicht über die heute anerkannten Süßwasserfischarten der Welt.

Wir hoffen dass diese Namenliste der Süßwasserfische die richtige Schreibung der wissenschaftlichen Namen fördert und die Verwendung einigermaßen standarisierter holländischer und englischer Namen der Aquarienfische unterstützt.

Samenvatting

Een alfabetische lijst met de wetenschappelijke namen voor alle recente zoetwatervissoorten van de wereld is opgesteld. Verder worden de veelgebruikte Nederlandse namen voor enige zoetwatervissen vermeld, alsmede enige Engelse namen van veelvoorkomende zoetwateraquariumvissen en van de, voor consumptie gekweekte, zoetwatervissen.

Het doel van deze lijst is zesvoudig:

- het vermelden van de nu geldige en juist geschreven wetenschappelijke naam voor iedere recente soort zoetwatervis;
- het gebruik van correct gespelde wetenschappelijke namen te stimuleren;
- het vermelden van Nederlandse namen en enige veelgebruikte Engelse namen voor zoetwateraquariumvissen en voor consumptie gekweekte zoetwatervissen;
- het vermelden van enige wetenschappelijke namen die door aquariumhouders verkeerd gebruikt werden;
- het vermelden van enige verwijzingen naar aquariumboeken;
- het geven van een overzicht van de zoetwater- en brakwateraquariumvissen die in de laatste honderd jaar vermeld werden in diverse aquariumboeken.

Hoewel vele wetenschappelijke namen nog gewijzigd zullen worden door voortschrijdend wetenschappelijk onderzoek, lijkt het ons toch nuttig om een lijst met de nu geldige wetenschappelijke namen te presenteren. Behalve de nu geldige namen en de juiste spelling van deze namen, kan de lijst ook gebruikt worden om de gebruikte namen in de aquariumliteratuur te achterhalen. Verder geeft de opsomming ook een overzicht van de al bekende soorten zoetwatervis.

We hopen dat de zoetwatervis-naamlijst zal bijdragen aan het juist schrijven van de wetenschappelijke namen en het gebruik van enigszins gestandaardiseerde Nederlandse namen zal stimuleren.

INDEX	939

CHAPTER ONE INTRODUCTION

In this publication¹ it is attempted to list alphabetically the scientific names of all the freshwater fish species in the world. In this work a freshwater fish is a fish species that does not spend all of its life in marine and occasionally brackish water.

The listed freshwater fishes include²:

- **primary freshwater fishes**, groups which have evolved in freshwaters since the early teleosts moved into them, are confined to them and cannot tolerate seawater (the strictly freshwater fishes; for example of, Dipnoiformes, Polypteridae, Osteoglossiformes, the Otophysi excluding the secondarily marine species, Esocidae, or Percopsiformes);
- **secondary freshwater fishes**, groups now confined to freshwater but of estuarine / marine origin and relatively tolerant of seawater for short periods (for example of, Potamotrygonidae, Cichlidae, Cyprinodontiformes, Bedotiidae, Melanotaeniidae or Adrianichthyidae);
- **freshwater representatives** of “marine families” (**primary-like freshwater fishes**, for example of, Clupeidae, Engraulidae, Pristigasteridae, Pellonidae, Belonidae, Sciaenidae, Gobioidei or Tetraodontidae);
- fish species of “secondary freshwater fish families” living in a **hyperhaline** (waters with salinity >40 ppt) or **highly alkaline** environment (not marine; for example of, Cyprinodontidae, Mugilidae or Cichlidae);
- **diadromous fishes** making regular migrations from salt to freshwater or vice versa at different stages of the life history³. For example: some **anadromous** species (breeding in freshwater and growing up and maturing in the sea) of Petromyzontidae, Acipenseridae, Clupeidae, Salmonidae or Osmeridae; some **cataudromous** species (breeding in seawater and growing up and maturing in freshwater) of Anguillidae, Mugilidae or Kuhliidae; some **amphidromous** species (breeding in freshwater, the larvae feed and grow at sea followed by the returning of the juveniles to freshwater, where they mature and spawn) of Galaxiidae, Prototroctinae, Syngnathidae, Eleotridae, Butidae, Sicydiinae, Ambassidae or Cheimarrichthyidae;
- some **euryhaline members** of **marine families** (the freshwater/seawater-tolerant fishes; for example of, Atheriniformes, Mugilidae, Gerreidae, Haemulidae, Lutjanidae, Pomacentridae, Sillaginidae, Sparidae, Gobioidei or Pleuronectoidei).

The names of freshwater sharks (Carcharhinidae) and freshwater sawfishes (Pristidae) have been omitted.

In the case of the fishes occurring in **brackish waters** we have somewhat arbitrarily drawn a boundary between listed “freshwater species” (= occurring in fresh and brackish waters or occurring in fresh, brackish and marine waters) and excluded **marine species** which enter only very sporadically bays, mangrove estuaries and tidal creeks and rivers (this decision may be somewhat biased by our aquaristic

¹ This publication is disclaimed for purposes of Zoological Nomenclature in accordance with the International Code of Zoological Nomenclature, Fourth Edition, Articles 8.3 and 8.4. No new names or nomenclatural changes are available from statements in this publication.

Watanabe *et al.* 2014, Tropical and temperate freshwater amphidromy: a comparison between life history characteristics of Sicydiinae, ayu, sculpins and galaxiids. *Reviews in Fish Biology and Fisheries*, **24** (1): 1-14.

mind).

We list most species recorded in Eschmeyer's online Catalog⁴ with the notation [Habitat: freshwater, brackish, marine] and we list some species with the Catalog notation [Habitat: brackish, marine].

The estuarine species belonging to, Acanthuridae, Albulidae, Antennariidae, Arripidae, Balistidae, Carangidae, Chaetodontidae, Chanidae, Congridae, Dactyloscopidae, Diodontidae, Drepanidae, Elopidae, Ephippididae, Girellidae, Gymnuridae, Harpadontidae, Hexagrammidae, Hippocampinae, Kyphosidae, Labridae, Labrisomidae, Leiognathidae, Leptobramidae, Leptoscopidae, Lobotidae, Megalopidae, Mullidae, Muraenesocidae, Myliobatidae, Platyccephalidae, Pseudochromidae, Rhinopteridae, Scombridae, Scorpaenidae, Serranidae, Siganidae, Sphyraenidae, Synanceiidae, Synodontidae, Triacanthidae, Trichiuridae, Tripterygiidae and Urolophidae are understood by us as **marine**, so their names do **not** appear in the list.

According to our somewhat broad definition of freshwater fishes about sixteen thousand living species of freshwater fish are already described (we list more than $1.6 \cdot 10^4$ currently considered valid scientific species names). In 1970 Cohen reported an estimate of 8,390 species⁵. Nelson (1976, p. 3) reported 6,851 freshwater species, in 1994 (p. 5) he reported the following numbers: 9,966 freshwater species and 10,465 species using freshwater and in 2006 (p. 5) he stated 11,952 freshwater species and 12,457 species using freshwater.

Lévêque *et al.*⁶ report for the year 2005: 12,740 species in freshwater and 15,062 species in fresh and brackish waters.

It is estimated that more than thousand species of freshwater fish still have to be described^{7,8}.

The aquarium hobby has expanded tremendously over the past 60 years with millions of hobbyists worldwide. This generates a large aquarium trade, over 1 billion ornamental fishes comprising more than 4000 freshwater and 1400 marine species are traded internationally each year! And this trade also generates an effect on natural populations⁹. Also the aquarium trade is one of the main vectors of non-native species introduction in natural aquatic systems worldwide.

Although a lot of hobbyists do not care much about the names of their fishes (or give them nick-names), a large and still growing group of serious hobbyists are giving great care to the scientific names they use.

This is especially true for the aquarists who specialize in certain fish groups like catfishes, killifishes or cichlids. Besides the scientific name they often add the locality name where the fishes came from, so making it possible to keep the different strains of fishes pure.

Keeping strains of fishes pure is especially vital for those fishes who are extirpated in the wild and maybe some day can be returned to a suitable habitat in the wild. See for example the International Killifish Conservation Program <http://ikcp.killi.org> (or www.pupfish.net/dsac) or more examples in Maceda-Veiga, A. *et al.* 2014⁹.

For all those purposes it is very important to communicate with the correct (and the same!) names. Maybe the list can also be of any use in defining fishes as ornamental or not¹⁰. We hope our list is of some use to the serious aquarist.

1.1 Scientific names

A **scientific name** is a name proposed in the context of zoological nomenclature for scientific purpose and **correctly** described according to the *International Code of Zoological Nomenclature* as an **available** name. Scientific names published after 1 January 2000 must adhere to the fourth edition of this Code¹¹ to be available. This zoological Code describes a number of rules to name an animal taxon, in our case a fish species, fish genus or fish family. There are rules for the nomenclatural availability, rules for the taxonomic allocation and rules for the nomenclatural validity of a particular taxon.

Nowadays everybody agrees that biology requires a precise, coherent and simple system for the naming of organisms to be used internationally, dealing both with the nomenclatural terms and with the scientific names that are applied to the individual taxonomic groups of organisms. To cover all kinds of organisms, whether prokaryotic or eukaryotic (bacteria, fungi, plants or animals), fossil or non-fossil, and of fossil traces of organism (ichnotaxa), a new draft for a **BioCode**¹² was published in 2011. The BioCode initiative represents a concerted effort, by biologists intimately involved in the operation of the current system of separate codes¹³, to devise a unified approach to the future naming of organisms of all kinds. This need has become pressing in view of common issues that the separate organismal codes now have to address, consequent on the rapid changes taking place in global informatics, database architecture, molecular systematics and ecology, and electronic publication.

Once accepted the code will give rules for the naming of all organisms.

A **taxon** is a grouping of organisms (a classificatory unit) under a given name. The taxon is the classificatory concept (see further) and the name is the label, by which a taxon can be unambiguously designated.

The scientific name serves as a tool for the storage and retrieval of the biological and non-biological information attached to the taxon.

The scientific name of a species is a combination of two Latin or latinized names (a **binomen**). The first name is called the generic name (a **genus-group name**) and the second the specific name (a **species-group name**, also known as the species epithet). Both names must be written in italics. Generic names must always begin with a capital letter; specific names must always begin with a lower-case letter. In the latinized names no diacritic marks, apostrophes, dieresis or hyphens can be used (except if the first element is a Latin letter used to denote descriptively a character of the taxon: *y-ophorus* and *x-punctatus* as stated by article 32.5.2.4.3 of the Code¹¹).

Some specific names commemorate people. These so called **patronymys** normally end in —ae if named for a woman (i.e., Trewavas → *trewavasae*), end in —i if named for a man (i.e., Günther → *guentheri*) or —ii in some old names formed from the latinized name of a man (i.e., Cuvier → *cuvieri* and Cuvierius → *cuvierii*), end in —orum if named for men (or woman and man) and end in —arum if named for women. However, these special endings (suffixes) are just recommendations and language sensitive, therefore they should never be emended. So the original spelling of a specific name based on a personal name must not be changed¹⁴.

If the specific name is a Latin adjective or participle in the nominative singular, it must agree in **gender** with the generic name (article 31.2 of the Code¹¹). So an **adjective** can change with gender (and it can have different terminations) and a **noun** can not. If the original describer did not indicate whether he or she regarded the specific name as a noun or as an adjective and the evidence of usage is not decisive, the name is to be treated as a noun in apposition to the genus name (article 31.2.2 of the Code¹¹). Then the spelling of the specific name is not changed if it is combined with a generic name of a different gender. For instance if the gender is **masculine** the specific name would be *maculatus*, if **feminine** *maculata* and if **neuter** *maculatum* (e.g., *pulcher*, *pulchra* and *pulchrum*; *gracilis*, *gracilis* and *gracile*;

¹¹ International Commission on Zoological Nomenclature 1999, *International Code of Zoological Nomenclature*, 4th ed., International Trust for Zoological Nomenclature, London, UK, 306 pp. [www.nhm.ac.uk/hosted-sites/iczn/code/]

¹² <http://www.mapress.com/bionomina/content/2011/f/bn0003p044.pdf>

¹³ Besides the zoological code, there are codes for naming plants (the botanical code), cultivated plants (the cultivated plants code), bacteria (the bacteriological code) and viruses (the virological code).

¹⁴ Dubois, A. 2007, Genitives of species and subspecies nomina derived from personal names should not be emended. *Zootaxa*, 1550: 49-68.

—ensis, —ensis and —ense; —alis, —alis and —ale; —fer, —fera and —ferum). Changes in the generic name are so reflected in the specific name, for instance *Aphyosemion nigerianum* (neuter) and *Fundulopanchax nigerianus* (masculine). The gender of the genera can be found in Eschmeyer's *Catalog of Fishes*⁴.

Sometimes **subspecies** are distinguished and a **subspecific name** is added forming a **trinomen**, for example *Fundulopanchax mirabilis mirabilis* (the **nominotypical taxon**, the oldest name) and *Fundulopanchax mirabilis moensis*.

Some authors do not believe in subspecies. They think subspecies are just populations of a species (geographical units, sometimes called races or strains) or, if judged different, separate species and do not use a trinomen. Biological species concepts tend to emphasize continuity, favoring recognition of geographic variation at the subspecific level, while more recent phylogenetic species concepts emphasize divergence, favoring recognition of geographic variants as full species. So the adhered **species taxon concept**¹⁵ leads to differences in species recognition.

A **fish species** is a segment of a population-level lineage that is separate from other such lineage segments as indicated by one or more of various possible criteria (e.g., distinguishability, reproductive isolation, monophyly, exclusivity, etc.). A **lineage** is a series of fishes that form a single unbroken and unbranched sequence of ancestors and descendants.

Most ichthyologists agree more or less with the biological, the phylogenetic or the evolutionary species taxon (= the unit used to describe biodiversity in nature).

A **biological fish species** is a group of actually or potentially interbreeding natural fish populations which are genetically isolated from other such groups of fishes.

A **phylogenetic fish species** is the smallest recognizable organismal unit in a phylogenetic genealogy. It is a diagnosable sample of (observed or inferred) life cycles, represented by exemplars, hypothesized to attach to the same node in a cladogram, and which are not structured into other similarly diagnosable clusters (so the fish species are exclusive).

A **cladogram** is a dichotomous phylogenetic tree that branches repeatedly, suggesting the classification of fishes (or molecules) based on the time sequence in which evolutionary branches arise. The endpoints of the branches represent specific species of fishes. It is used to illustrate phylogenetic relationships and to show points at which various fish species have diverged from common ancestral forms.

An **evolutionary fish species** is an entity composed of fishes that maintain its identity from other entities through time and over space and that has its own independent evolutionary fate and historical tendencies.

Some authors more or less combine the latter two and recognize as species: geographically bounded sets of populations that are distinct in morphological traits or are reproductively isolated from congeners, with or without corresponding molecular divergence.

In any case all share the fundamental idea that fish species are segments of lineages at the population level of biological organization (the truly theoretical evolutionary species concept) and the fish species is considered as a terminal in a phylogeny. A **phylogeny** is the history of the evolution of a given lineage of fishes.

Furthermore the taxon concept must offer a method of recognizing and delimiting species taxa. See Kottelat (1997), Turner¹⁶, Kullander¹⁷, de Pinna¹⁸, Seegers¹⁹ and *Fish and Fisheries* 3 issue 3 (September 2002) for further discussion.

¹⁵ Bock, W. J. 2004, Species: the concept, category and taxon. *Journal of Zoological Systematics and Evolutionary Research*, **42**: 178-190.

¹⁶ Turner, G. F. 1999, What is a fish species? *Reviews in Fish Biology and Fisheries*, **9**: 281-297.

¹⁹ Seegers, L. 2004, Die Evolution der Sodacichliden in Ostafrika 4: Der Artbegriff. *Aquaristik Fachmagazin*, **36** (2) Nr. 176: 55-60.

Maybe a unified concept of species²⁰ can bring more coherence in the future, or not²¹. Because recognition of species taxa depends on many arbitrary decisions (especially when dealing with broad geographical and temporal ranges) the taxa can be treated differently, so the scientific names of the various freshwater fishes can vary according to different opinions.

Atypical species which may or may not be the same as the typical species are sometimes named with the abbreviations **cf.** (conferre = looks like) or **sp. aff.** (species affinis = closely related species) between the generic and the specific name, for example *Crenicichla* sp. aff. *regani*. These names are listed by us under the typical names (*Crenicichla regani*).

The scientific name is sometimes followed by a name (or names) and date. These are the surname(s) of the original author(s) (the **describer(s)**) and the **year of publication** of that species description. We use a comma interposed between the name(s) and the date (as is still usual in ichthyology). We list up to four describers, if more we list the first describer followed by *et al.* (= and others). If the original description was published in an article or book with different authors, the name of the describer(s) can be followed by the authors of the publication. For instance Cuvier in Cuvier & Valenciennes, 1829. This makes the retrieval of the original publication easier. The publication date given is the **actual date** of the published description (as far as can be ascertained), which can be different from the date on the publication. This makes retrieval of the original publication more difficult.

In the name list we only mention the actual describer(s) and the year of the publication (to save space). The citation of the original description of most fishes can nowadays easily be found in Eschmeyer's *Catalog of Fishes*⁴. We list Agassiz as the author of the new fish species names in Spix & Agassiz 1829/1831 (following Kottelat²², except the case of *Cynodon* Spix, 1829, see opinion 2012 of the IZN) and we use Bloch, 1801 or Schneider, 1801 (and three times Forster, 1801) conform Karrer *et al.*²³ and Kottelat (2013). We use Rafinesque-Schmaltz, 1810 following Wheeler (1988) and Dubois (2008).²⁴

If the species was described in a **different genus**, then the name(s) of the describer(s) and the year of publication must be written **between parentheses**. No parentheses are used if the generic name was not written correctly.

In the list the currently considered valid species names are highlighted in **bold**.

Sometimes a **genus** is split up in subgenera and the name of the **subgenus** is written after the genus name between parentheses, for instance *Austrolebias* (*Argolebias*) and *Austrolebias* (*Austrolebias*). *Austrolebias* Costa, 1998 is the oldest name (created by Costa in 1998; *Argolebias* by Costa in 2008) and this taxon is then called the **nominotypical subgenus**, usually simply written as *Austrolebias*. However, some workers prefer to separate a **monophyletic group** (= a taxon comprised of two or more fish species that includes the ancestral fish species and all and only the descendants of that ancestral fish species) as a genus and don't use the subgenus notation.

If the genus in the list has been written between single quotation marks, for instance '*Hypseobrycon*' (for the American tetras not belonging to the genus *Hypseobrycon* sensu stricto), it means that the genus is known to be polyphyletic and has to be split up in monophyletic genera, however this has not yet been done. In the (near?) future the listed species will probably be assigned to other genera.

Genus-group names are singular in usage in a formal grammatical sense, for instance "Aphanianus is found in ..." but "the species of Aphanianus are found in ...". **Family-group names** are plural in usage in a formal grammatical sense, for instance "Cyprinidae are found in ..." or "the species of the Poeciliidae have been ...".

In the name list currently **valid genera** have been highlighted in **bold**, followed by a statement (written between brackets) to which family and subfamily the genus has been assigned. It is wise to realize that the classification of fishes is in a state of flux and many changes in the classification are expected in the near future. Also a lot of species and genera remain to be described (Lundberg *et al.* 2000⁷, Reis *et al.* 2003⁸). The biodiversity of aquatic habitats ranks among the most poorly known, especially in tropical and subtropical regions. This lack of knowledge includes the basic systematics, taxonomy and phylogenetic relationships of the fishes and their ecologies.

↔ behind a **genus** name in the list means a lot of shifting of species between the genera has occurred. So if you are looking for a particular specific name it is wise to look under the other genus name(s) too.

A group of closely related species is sometimes called a **species group** or **species complex** (the taxon **supraspecies** might be used for this category, see chapter 2). The oldest species name is commonly used to designate such a group, for example the *sexfasciatus* species group of the genus *Epiplatys*.

Scientific names need to be changed as taxonomic insight changes. If a species is found to belong to another genus, **the first name** changes. As we have already remarked, sometimes the ending of the second name must be changed too to agree in gender.

If an older scientific name has been discovered (caused by synonymisation of two names or when an older available name has been found) **the second name** changes (the older name is given **priority**).

Further the scientific name must be unique to the animal kingdom (so a newly created name must never have been used before; the existence of a name can nowadays easily be checked on uio.mbl.edu/NomenclatorZoologicus/ or www.organismnames.com). If there are two exactly the same names, then one name must be changed.

See Kottelat (1997) for an explanation of the scientific naming of fishes.

Maybe it will be possible in the future to achieve more name-stability by making a list of available names²⁵ (article 79 of the Code¹¹).

Man uses several categories (called **taxa**; the plural of **taxon**, a grouping of organisms) to express the relationships of living organisms. A conception of all those relationships is called a **classification**. A **biological classification** depicts the phylogenetic (genealogical) relationships between organisms. The modern system of classification is the hierarchical system proposed in the eighteenth century by Carl von Linné (also known by his Latin name Carolus Linnaeus). Species are classified in the Linnaean system on the basis of an evaluation of their anatomical similarities and differences. These discrete characters have to be homologous, independent and variable. Anatomically similar species are grouped together in a common taxonomic category (a **rank**) and separated from those that are anatomically different. Therefore, taxonomic relationship is based on degree of structural similarity.

Ranking is the placement of a taxon in the appropriate category in the hierarchy of categories. It is important to understand that categorical ranks are kinds and not taxa. So when we refer to the family Characidae, we are referring to a particular taxon (*Charax* and relatives) ranked as a family and not to the categorical rank of family.

A taxonomic category can be assigned to a nomenclatural rank as regulated by the Code¹¹ (the **ranked categories**, for example: species, genus, family) or not (**unranked categories**, for example: species group, sibling species, variety, morph, plesion).

The **natural classification** of a group is the classification supported by the greatest agreement of the character state distributions. The goal of classification is the organization of knowledge. The function of a classification is the same as that of names and nomenclature, namely a tool for information retrieval and for safeguarding understanding of the relationships between organisms.

Systematics is the science of organic diversity. It is the study of the kinds and diversity of organisms and of the relationships between them. In systematics the search of monophyletic units and of sister group relationships is an important part of primary research. The derived hypotheses of the interrelations between species are subject to falsification and to change.

In contrast, **classifications** are a secondary step, as they are derived from such hypotheses. Classifications are sometimes based on different philosophies, which permit different solutions as to

²⁵ Eschmeyer, W. N. 2003, *Introduction to the series Annotated Checklists of Fishes*, California Academy of Sciences Annotated Checklists of Fishes No. 1, 5 pp.

how results in the fields of **taxonomy** (a specialized branch of biology which studies the rules and procedures used in describing, naming and classifying species) and **phylogenetics** (the evolutionary relationships between organisms) can be transposed into a **taxonomic system**.

Also the taxonomic system should display a kind of robustness, so that every new discovery or hypothesis should not be liable to modify the whole system. Thus classifications can be different (note that the **generic classification** is directly reflected in the scientific name!) and the classification is constantly changing by ongoing research. Particularly the subtribe, tribe and subfamily allocations vary a lot. See chapter two for the adopted classification of the various freshwater fishes.

A **taxon** above the species level (genus, subtribe, tribe, supertribe, subfamily, family, superfamily, suborder, order) must consist of one word and must begin with a capital letter. A genus-group name (a generic or subgeneric name) is written in italics, the names of the other ranks are normally written.

A **genus-group name** has a **type species** and a **family-group name** (a name in the family-series: superfamily, family, subfamily, supertribe, tribe or subtribe) has a **type genus**. The **typified higher taxon names** are formed from the **stem** of the type genus name (the genitive without its case-ending) plus a **suffix** (= a special ending). Subtribe: +ina, tribe: +ini, (supertribe: +idi, not regulated by the Code), subfamily: +inae, family: +idae, superfamily: +oidea [and as usual in fishes: suborder: +oidei, order: +iformes, but these suffixes are not regulated by article 29.2 of the code¹¹].

Rules for the determination of the stem of the type genus are described in article 29.3 of the Code¹¹.

For example, *Cyprinus* → stem: Cyprin → Cyprinina, Cyprinini, Cyprinidi, Cyprininae, Cyprinidae, Cyprinoidea, Cyprinoidei, Cypriniformes; *Charax* → stem: Charac → Characina, Characini, Characidi, Characinae, Characidae, Characoidea, Characoidei, Characiformes; *Petromyzon* → stem: Petromyzont → Petromyzontidae; *Cynolebias* → stem: Cynolebi → Cynolebiinae; *Poecilia* → stem: Poecili → Poeciliidae; *Rhoadsia* → stem: Rhoadsi → Rhoadsiini.

Family-group names must also be formed according to the International Code of Zoological Nomenclature (articles 11.7, 13 and 29)¹¹. The name can be followed by the first author(s) who coined that name and the year of publication. The tracking down of the first author of a certain family-group name is a difficult job as one has to check a huge amount of literature and there are various opinions on the subject. Beginning with 2000 the author of a new family-group name must give a citation of the name of the type genus (according to article 16.2)¹¹ and, to make retrieval easier, it is highly recommended to mark the name as new. A family-group name first published after 1930 and before 1961, which has been rejected by an author with the help of article 13 of the former code (the third edition; mostly if the name was not accompanied by a description) after 1960 and before 2000, is not available. Furthermore the family-group name does not need to be the oldest synonym and the name of the type genus does not have to be valid anymore (of course it must be based on an available name and not a homonym, article 39)¹¹.

Stability of family names is very important (family names are among the most widely used of all technical names for fishes!), so a name in general acceptance and the prevailing spelling of that name (articles 29.3.1.1 & 29.5)¹¹ have to be kept in usage (so we use Eleotridae and not Eleotrididae), although it is not always easy to retrieve which spelling is in prevailing usage (Schilbeidae / Schilbidae or —chromidinae / —chrominae). Some workers prefer grammatically correct names (derived from the correct stem of the Greek or Latin generic name art. 29.3¹¹); e.g., Myliobatidiformes in stead of Myliobatiformes, Engraulididae in stead of Engraulidae, —glanidinae in stead of —glaninae, Macrotrematinae in stead of Macrotreminae.

Sadly the term usage of names (or **prevailing spelling**) is a difficult concept in nomenclature²⁶. It is certainly not wise to change a widely used family name. According to article 29.4¹¹ the original spelling of a family-group name should, from 1999 on, not be changed.

The history of **family-group names** (as we now use them) goes back to the early 19th century. See the review of Cuvier on Collection Building²⁷ for the family names used by early workers on fish classification. Many scientific family names were published by Rafinesque-Schmaltz (1810) and

²⁶ Dubois, A. 2005, Proposed rules for the incorporation of nomina of higher-ranked zoological taxa in the International Code of Zoological Nomenclature. 1. Some general questions, concepts and terms of biological nomenclature. *Zoosystema*, **27** (2): 365–426.

²⁷ Pietsch, T. (Ed.) 1995: Georges Cuvier 1828, *Historical Portrait of the Progress of Ichthyology, from its Origins to Our Own Time*, Johns Hopkins University Press, Baltimore, US, 366 pp.

Rafinesque (1815), Risso (1827), Bonaparte (1831–1838), Bleeker (1859, 1862 and 1863) and Günther (1868). In chapter two we will mention the various family-group name creators. See also the publication of Gill²⁸ for some notes on namers of families.

With the fourth edition of the Code¹¹ some rules on the availability of **family-group names** from the third edition of the Code were changed and formerly invalid usage became valid. As the family-group name must be clearly used to denote a suprageneric taxon, before 1900 may be stated in a not latinized form and before 1930 the name could be proposed without a differentiating definition, there is room for different opinions on the authorship and date of the family-group names.

The **principle of coordination** of the Code (article 36)¹¹ states the same authorship and date for every rank of the **family-group name**. In the adopted classification (chapter two) the current family-group names are listed with their authors and year of publication. A preliminary list by W. N. Eschmeyer can be consulted on the web: <http://research.calacademy.org/>.

The names of the families are also listed in chapter 3, followed by their position in the classification, so the unfamiliar reader can trace the place of the family in the classification or he / she can check the index.

The other **higher rank names** (suborder, order, superorder and class, the **upper uninominal group-names**) are not regulated by the zoological Code (at least not yet^{26,29}). The new BioCode¹² provides some rules for the higher rank **typified** names. If the Biocode comes into force, we must use for a **class** the ending –opsida, for a **subclass** the ending -zoidae, for an **order** the ending –ales and for a **suborder** –ineae (the suffixes for typified fish order and suborder names now widely in use are –iformes, resp. –oidei). The **non-typified names**, e.g. Vertebrata or Chondrichthyes, remain unaltered. In the adopted classification (chapter two) the higher rank names are sometimes followed by the surname(s) of (a) scientist(s) (and year of publication) who recently (re)defined the higher taxon and arranged the families under the mentioned suborder or order.

A **clade** is a group of fish species comprising a common ancestor and **all** of its descendants (a **monophyletic** group by definition). Unfortunately sometimes a clade (defined in a phylogenetic context) cannot be equated with a **formal taxonomic rank**, so it cannot be named with the current rank-based Code as mentioned above. A solution would be the use of the **PhyloCode**³⁰ (a phylogenetic code of biological nomenclature, see www.ohiou.edu/phylocode or www.phylonames.org).

Maybe it will be possible in the future with this code to name species and clades as biological entities in a phylogenetic context. With this naming system the name of a fish species or of a fish clade would never change. However, the phylocode is still heavily debated, see for instance Dubois²⁶, Minelli³¹, Kraus³², and references therein. Another solution could be a compromise, i.e., naming of the clades of life with the phylocode and naming the species (and the other code-regulated ranks) with the ICZN Code³³.

1.2 Common names

A **vernacular name** is a name proposed in a language and used for general purposes. It is a name with a general meaning. These names are known as **common names** and many fish species have several. Common names are not capitalized in text use except for those elements that are proper names (for example: salmon or European salmon). A proposal to treat a common name as a proper noun and to write it accordingly with capitals was made (Nelson 2006, p. 2). When capitalized the common name would convey recognition as a distinct, individual biological entity and the capitals would emphasize the name in a text. However, it is still common use to write the common names in lower case.

In some countries a committee on names of fishes has been installed who can select a certain name as the **preferred common name**.

Names treated by us as preferred common names are the names defined in the following publications:

- Robins, C. R. et al. 1991, *World Fishes Important to North Americans exclusive of species from the Continental Waters of the United States*, Special Publication 21, American Fisheries Society, Bethesda, Maryland, US, 243 pp.
- Nelson, J. S. et al. 2004, *Common and Scientific Names of Fishes from the United States, Canada, and Mexico*, 6th ed., American Fisheries Society, Special Publication 29, Bethesda, Maryland, US, 386 pp. (with corrections: Copeia 2006 (3): 559-562).
- *Standard Names of Australian Fishes*, CSIRO Marine Research / Fisheries Research and Development Corporation / Seafood Services Australia, 2005 (draft 18 November 2004)
- Kottelat, M. & J. Freyhof 2007, *Handbook of European Freshwater Fishes*, Publications Kottelat, Cornol, CH, 646 pp.
- Fricke, R., M. Bilecenoglu & H. M. Sari 2007, *Annotated checklist of fish and lamprey species (Gnathostomata and Petromyzontomorphi) of Turkey, including a Red List of threatened and declining species*, Stuttgarter Beiträge zur Naturkunde, Serie A (Biologie), Nr. 706: 1-169 (plus additions in Çiçek, Birecikligil & Fricke 2015).
- Leunda, P. M. et al. 2009, *International Standardization of Common Names for Iberian Endemic Freshwater Fishes*, Limnetica, **28** (2): 189-202.
- Matamoros, W. A., J. F. Schaefer & B. R. Kreiser 2009, *Annotated checklist of the freshwater fishes of continental and insular Honduras*, Zootaxa, 2307: 1-38.

and some of the names used by Venkateswarlu 1984, Whitehead 1985 (FAO-names), Whitehead et al. 1988 (FAO-names), Allen 1991, Eccles 1992 (FAO-names), Rainboth 1996 (FAO-names), Seegers 1996, Reshetnikov et al. 1997, Bussing 1998, de Vos, Snoeks & Thys van den Audenaerde 2001, Konurbaev & Timirkhanov 2003, Seegers et al. 2003, Taphorn 2003, Chen & Chang 2005, Ocock et al. 2006, Scott et al. 2006, Anna Mercy et al. (2007), Seegers 2008, Vidthayanan 2008, Hanel, Plíštil & Novák 2009, Hensen, Ploeg & Fosså 2010³⁴, plus some frequently used **FAO-names** (= a name in use by the Food and Agriculture Organization of the United Nations).

In the list the **common names** are written after the scientific name and placed between double quotation marks (""). After the preferred common name and some English names used by aquarists, the common names of Japanese freshwater fishes in Japanese (from Shiino 1972, Yuma et al. 1998 and Sakai et al. 2001) and the preferred common names of Mexican freshwater fishes in Spanish (from Nelson et al. 2004) are mentioned. At last we will mention the Dutch (or South African) name.

More common names can readily be found on the Internet, for instance at FishBase [Froese, R. & D. Pauly (eds.) 2013, **FishBase**, World Wide Web electronic publication: www.fishbase.org/search.php]. This database contains more than 302,100 common names in over 100 languages and is still growing. Some dictionaries and encyclopedias with fish names are mentioned in: G. H. Bell & D. B. Rhodes 1994, *A Guide to the Zoological Literature*, Libraries Unlimited, Englewood, Colorado, US, pp. 179.

Multilingual common names for **European freshwater fishes** can also be found in: M. Blanc, P.

³⁴ Hensen, R. R., A. Ploeg & S. A. Fosså 2010, *Standard names for freshwater fishes in the Ornamental Aquatic Industry*, Ornamental Fish International Educational Publication 5, OFI, Maarssen, The Netherlands, 145 pp. [it is a pity the authors did not find time to standardize the common names too!]

Bănărescu, J.-L. Gaudet & J.-C. Hureau 1971, *European Inland Water Fish (A multilingual catalogue)*, Fishing News (Books) Ltd / FAO, London, 24+ pp. and in V. E. Sokolov 1989, *Dictionary of animal names in five languages: Latin, Russian, English, German and French*, Volume Fishes, Russky Yazyk Publ., Moscow, 733 pp.

English, French, German and Russian names can further be found in the "Freshwater Fishes of Europe" serial work and in Ladiges & Vogt (1965). Seeley (1886) and Bauch (1963) also list a lot of common names. Albanian names can be found in Rakaj & Flloko (1995); Croatian names in Zupančič (2008); Czech names in Reiser (1996), Hanel & Novák (2000-2009), Hanel & Andreska (2011) and Plíštil (2012); Dutch names in Nijssen & de Groot (1987); Finnish names in Koli (1994, 1998) and in Varjo, Koli & Dahlström (2004); French names in Belloc (1899) and Keith & Allardi (2001); Greek names in Economidis (1995); Hungarian names in Botta (1985) and Sevcik & Erős (2008); Italian names in Bruno (1987), Bianco (1995) and Zerunian (2004); Norwegian names in Petron (1999); Portuguese names in Amaça (1996), Costa Pereira (1995) and Leunda *et al.* (2009); Russian names in Nikolski (1957); Slovenian names in Svetina & Verce (1969), Povž (1995), Povž *et al.* (1998) and Zupančič (2008); Spanish names in Lozano (1964), Costa Pereira (1995), Elvira (1995) and Leunda *et al.* (2009); Swedish names in Kullander (1999); Turkish names in Balık (1995) and Fricke, Bilecenoglu & Sari (2007).

Variants in spelling of the **English names** (for example, rednose, red-nose, rednosed, red-nosed) are not considered as separate names and have been excluded from the list. Furthermore simplicity in names is favoured, as already outlined by the committee on names of fishes of the American Fisheries Society / American Society of Ichthyologists and Herpetologists (Nelson *et al.* 2004). Hyphens, suffixes and apostrophes have been omitted except when they are orthographically essential (for example, blue-eye, white-edge, fin-eater, silver-yellow) or join two fish names, neither of which represents the fish in question, into a single name (eel-catfish, pike-characin, shark-catfish, shark-minnow, trout-cod or trout-perch). Compounded modifying words have usually been treated as **singular nouns** in apposition with a group name (as already stated we use no hyphens, for example, spottail shiner, redeye tetra). Plural modifiers have usually been treated in adjectival form (for example, blackbanded sunfish, redstriped eartheater) unless the plural nature is obvious (for example, twospot astyanax, threespot tilapia). For instance the following reductions were made: blackfinned → blackfin, bluebellied → bluebelly, bluetailed → bluetail, bluntheaded → blunthead, eightbanded → eightband, goldeneared → goldenear, hognosed → hognose, longfinned → longfin, redtopped → redtop, shortnosed → shortnose, sixbarred → sixbar, tworayed → tworay, yellowcheeked → yellowcheek, etc.. As a pronunciation aid we use ~s's in stead of ~s', for example Myers's Hatchetfish.

In general the **order of the common names** is: preferred name (English), aquaristic name(s) (English), Japanese name (Japanese), Mexican name (Spanish), Brazilian name (Portuguese) and Dutch names (Dutch). For example: "rainbow trout / Steelhead Trout / Redband Trout / Niji-masu / trucha arco iris / Truta-arco-íris / Amerikaanse regenboogforel". Preferred names are written in lower case as explained above (ram cichlid, Buenos Aires tetra). English names used by aquarists are written beginning with capitals (Butterfly Cichlid, Redtail Tetra).

Dutch names of aquarium fishes always begin with a capital because there are no preferred Dutch names (Antennebaarsje, Ruitenvlekzalm, Rode rio, Gele Kongozalm). For fishes of South Africa we give the Dutch-like "Afrikaanse" name. The Dutch names given by Bleeker and contemporaries in the nineteenth century are no longer in use and are not listed³⁵.

Many **aquarium fishes** do not have a Dutch name, because in general aquarists in the Netherlands use the scientific names. We tried to list all the Dutch common names in use, we disregard some curious new names coined by translators (because these names are seldom adopted by aquarists).

To save space only the frequently used **English** and **Dutch names** of the more general freshwater aquarium fishes and of the freshwater fishes used in aquaculture are cross-referenced. With the pdf-version it does not matter, as one can simply find a name in the text with the help of the computer [Find].

German names of aquarium fishes are not given because they have already been listed in many

³⁵ Jacques Pellegrin once complained that the aquarists did not use the old common names as proposed by La Cepède, Cuvier, etc., but those early French names were also not adopted by aquarists.

publications (see for instance the books of Arnold & Ahl, Kramer & Weise, Krebs, Riehl & Baensch, Stallknecht, Sterba and the various Aqualog reference fish of the world books).

Czech names of aquarium fishes can be found in Hanel & Novák (2001-2009) and on www.biolib.cz.

Danish names of aquarium fishes can be found in Laursen (1949) and in Schiøtz & Christensen (1968).

Finnish names of aquarium fishes can be found in Varjo (1982) and in Varjo, Koli & Dahlström (2004).

French names of aquarium fishes can be found in Angel (1946), Beck (1950), Copin (1960), Langel-Kretchmar (1972), Rousselet-Blanc (1975), Maitre-Allain (1992) and Allain *et al.* (2003).

Hungarian names of aquarium fishes can be found in Horn & Zsilinszky (1970, 1988).

Portuguese names of aquarium fishes can be found in de Oliveira (1977) and Santos (1987).

Russian names of aquarium fishes can be found in Machlin (1966).

Slovenian names of aquarium fishes can be found in Jerič (1984).

Spanish names of aquarium fishes can be found in Cánovas & Puigcerver (2002) (some native fish names used in Argentina can be found in Lahille 1922 and Achenbach & Bonetto 1957).

Swedish names of aquarium fishes can be found in Aurell, Jacobsson & Lindgren (1953, 1968) and in Fohrman (2004).

The big advantage of common names is that they can be stabilized. Hopefully the list will contribute to that goal. A lot of aquarium fishes already have common names, so there is no real need to create more names (which can lead to confusion).

We have selected a few **aquarium and freshwater fish books** that will allow the reader to look back on more than hundred years of keeping and admiring freshwater aquarium fishes. We have selected some important books on aquarium and freshwater fishes to cover more or less the last century, taking in account their credibility and their general access (some books available to every-one by the Internet <http://www.biodiversitylibrary.org/>; some books were published in various languages and then the other language-editions can be consulted instead of the cited edition).

Unfortunately it was not possible to check if all the identifications are correct. When in doubt the illustration was given a greater value than the description.

Sadly many illustrations were copied, so then we had to assume the used name was correct.

Regrettably many “**waste-basket**” names which are probably used for various fish species exist, for instance: *Potamotrygon motoro*, *Characidium fasciatum*, *Chilodus punctatus*, *Leporinus fasciatus*, *Semaprochilodus taeniurus*, *Charax gibbosus*, *Creagrutus beni*, *Roeboides microlepis*, *Myleus rubripinnis*, *Serrasalmus rhombeus*, *Hoplias malabaricus*, *Cobitis taenia*, *Megalechis thoracata*, *Hypostomus commersoni*, *Hypostomus plecostomus*, *Hypostomus punctatus*, *Ancistrus dolichopterus*, *Ancistrus hoplogenys*, *Farlowella acus*, *Otocinclus affinis*, *Rineloricaria parva*, *Bunocephalus coracoideus*, *Malapterurus electricus*, *Chaca chaca*, *Pimelodella gracilis*, *Kryptopterus bicirrhosus*, *Mystus vittatus*, *Pimelodus clarias*, *Sorubim lima*, *Gymnotus carapo*, *Eigenmannia virescens*, *Poecilia sphenops*, *Aequidens pulcher*, *Cichla ocellaris*, *Cichlasoma facetum*, *Crenicichla saxatilis*, *Geophagus surinamensis*, *Hemichromis bimaculatus*, *Satanoperca jurupari*, *Mogurnda mogurnda*, *Brachygobius nunus*, *Brachygobius xanthozonus*.

With the **citations** the reader can at least notice the occurrence of some scientific names during a century of keeping freshwater aquarium fishes. See for some more citations the Master Index of Freshwater Fishes: www.webcityof.com/mifftitl.htm or check the vivarium-databases³⁶ for many German periodicals.

³⁶ Seehaus, T. & J. Robel 2001, *Die Datenbank der deutschsprachigen Periodika*, cd-rom [see www.aqua-terra-net.de/ATLI2/atli.htm]; Maleck, W. & D. Schuster 2004, VILAUS: Vivaristisches Literatur-Auskunftsysteem, VDA, DE.

One of the pioneers of the aquarium hobby, Ph. H. Gosse (in 1853 / 1854), was also troubled by names [by the way, the word **aquarium** was occasionally used for a water container in a green house or garden ("an ornamental piece of water") since at least 1808 and in some scientific studies as early as 1673]:

THE NAME.

A neat, easily pronounced and easily remembered, significant, and expressive term is so advantageous, that it is worth taking some trouble to select the best. For the subject of this volume some have chosen the word Vivarium, and I have myself occasionally used it. The only objection to it is that it lacks distinctness of signification. It literally means any inclosure in which living animals are kept; and the ancients used it to signify a park, a rabbit-warren, and a fish-pond; indeed, I am not sure whether our word "warren," is not "Vivarium" Saxonised. Thus it is quite as applicable to the whole Zoological Garden as to any particular house, yard or tank in it.

To avoid this indefiniteness others have used the term Aqua-vivarium. The objection to this is its awkward length and uncouthness, which render it unsuitable for a popular exhibition or domestic amenity.

I have adopted the word AQUARIUM, as being free from the objections which lie against the other two, while it possesses the neatness of the former, and the definiteness of the latter. The term had already been in use among the botanists, to designate the tanks in which aquatic plants were reared; and the employment of the same term for our tanks is not forbidden by the character of the service to which they are put, since this is not an alteration, but only an extension.

1.3 Examples from the list

The various entries in the list are explained in the following examples. Typical listings (between square brackets) are as follows:

[**Abbottina** Jordan & Fowler, 1903 (CYPRINIDAE>Gobioninae)]

The genus *Abbottina* is now considered as valid and was described by Jordan & Fowler in 1903, belongs to the family Cyprinidae and has been assigned to the subfamily Gobioninae.

[**Abbottina rivularis** (Basilewsky, 1855) (Aquarien Atlas Band 3 (1991):168) "Chinese false gudgeon / Tsuchifuki"]

The species *Abbottina rivularis* is currently regarded as valid and was described by Basilewsky in 1855, but in a different genus so the name of the author (Basilewsky) and the year of publication (1855) must be placed between parentheses. The fish has been mentioned by Riehl & Baensch in 1991 (see the list of references in chapter 3 for the full reference) on page 168.

If the cited author(s) used a different scientific name for a species, their name is given at the beginning of the citation. **Spelling errors** (e.g. **gender mistakes**, -us or -a or -um or -fer or -ferum) made in the references are **omitted**, only a **different** scientific name is mentioned.

The English preferred common name (no capital letter F and G) and the Japanese vernacular name are listed.

[*Abbottina sinensis* → *Abbottina rivularis*]

The species *Abbottina sinensis* is no longer considered valid, the holotype (or the lectotype or neotype) is thought to belong to the species *Abbottina rivularis*. The available name *Abbottina sinensis* is regarded as a synonym of the name *Abbottina rivularis*.

[*Anacyrtus* → *Charax*] means species of the genus *Anacyrtus* can be found under *Charax*. In most cases (not always!) this means the former genus (*Anacyrtus*) has been accepted as a synonym of the latter (*Charax*).

sp. means a species; ssp. means a subspecies; spp. means more than one species.

[**Genus sp. Xxx**] means the species is still **undescribed** (so not formally named) or it is not known which already published scientific name belongs to the mentioned fish.

Although we admit that it has little use of listing these names without a literature reference, we hope to provide an identification in the future. These names are already in use by some workers and hopefully the identification is in progress.

[**Genus spp.**] means any species of the genus.

We use the same notation as the International Union for the Conservation of Nature (IUCN) to categorize the freshwater fishes with a great risk of global **extinction**:

- **EW** behind the scientific name in the list means the species is **extirpated** in the wild, but it still exists as a captive population.
- **E** behind the scientific name in the list (and sometimes behind a common name) means the species (or local race) has been extirpated in the wild and the species is **extinct**.
- **E?** means the species is believed to be extirpated in the wild.

Sadly many freshwater fishes are becoming more and more at risk of **extinction**³⁷ (sometimes even

³⁷ Harrison, I. J. & M. L. J. Stiassny 1999, The quiet crisis: a preliminary listing of the freshwater fishes of the world that are extinct or ‘missing in action’, p. 271-331 in R. D. E. MacPhee (ed.), *Extinctions in Near Time*, Kluwer/Plenum press, New York, US, 433 pp.; Duncan, J. R. & J. L. Lockwood 2001, Extinction in a field of bullets: a search for causes in the decline of the world’s freshwater fishes. *Biological Conservation*, **102**: 97-105; Collares-Pereira, M. J., I. G. Cowx & M. M. Coelho (eds.) 2002, *Conservation of freshwater fishes: Options for the future*, Fishing News Books, Oxford, UK, 462 pp.; Dudgeon, D. et al. 2005, Freshwater biodiversity: importance, threats, status and conservation challenges. *Biological Reviews*: 1-20; Editorial 2010, Conservation of Fishes. *Journal of Fish Biology*, **76**: 2003-2008; Alofs, K. M. et al. 2014, Mind the

caused by “aquarists”!³⁸). See for the courageous work of the International Union for Conservation of Nature and Natural Resources about freshwater fish biodiversity: <http://iucn.org>.

Hybridization³⁹ between two species is listed with the help of a **hybrid formula** (an expression consisting of the names of two taxa separated by a multiplication sign, designating a fish of hybrid origin), as: species 1 x species 2 with the parental species in alphabetical order; hybridization between a hybrid and a species as: (species 1 x species 2) x species 3. We can not follow a convention of naming the male or female first (species 1), because with most intercrossings (for instance in Poeciliidae) the particular order of the hybridization(s) is not known.

If a ‘scientific looking’ name is not **italicized** and written beginning with **Capitals**, then the identification of the species was wrong. The used ‘Scientific Name’ in the aquarium literature was incorrect and the species is mentioned under its valid scientific name.

For instance:

[*Aphyosemion Beauforti* → *Fundulopanchax gularis*

Aphyosemion beauforti → *Aphyosemion cameronense*]

This means aquarists used the name *Aphyosemion Beauforti* for a strain of *Fundulopanchax gularis*.

The name *Aphyosemion beauforti* (the ‘true’ beauforti) is a **junior synonym** of the (older) name *Aphyosemion cameronense*. Both described species are now considered as one species, the names are synonyms (the name *Aphyosemion cameronense* is called the **senior synonym**).

Wrongly used L-numbers are listed as [“Lxxx”].

In some rare cases the oldest name of a set of synonyms is not the valid name. The Code (1999)¹¹ states that the **principle of priority** is to be used to promote stability and not upset long-accepted names. Therefore, in accordance with that principle, the application of reversal of precedence of two names and the continuation of the **prevailing usage** of a younger synonym is allowed when two conditions are met (article 23.9)¹¹: (1) a name has not been used as valid since 1899, and (2) the valid name has been used as such in at least 25 works, published by at least 10 authors during the past 50 years, encompassing a span of not less than 10 years. If both conditions apply, then the older name is invalid and qualified as a **nomen oblitum** (a forgotten name, not valid), whereas the younger synonym is valid and qualified as a **nomen protectum** (a protected name, accepted as valid). As we have already mentioned before, the procedure is somewhat tedious.

There can be a second reason why a ‘scientific looking’ name has not been italicized and written beginning with capitals. Namely if the species has not been correctly described according to the Code¹¹ (then the name is called a **nomen nudum** and such a name is unavailable) or if the name has already been used for another species (then the name is called a **homonym** and such a name is not valid). In both cases the wrong name has to be replaced by a valid name.

[African knifefish → *Xenomystus nigri*

African Kuhli → *Amphilophus platychir*]

The name African knifefish is the preferred common name of the species *Xenomystus nigri*. The name African Kuhli is the aquarist’s name of the species *Amphilophus platychir*.

[Afrikaanse glasmeerval → *Parailia pellucida*

Afrikaanse karperzalmen → Alestidae]

(information) gap: the importance of exploration and discovery for assessing conservation priorities for freshwater fish. *Diversity and Distributions*, **20** (1): 107-113.

³⁸ McDowall, R. M. 2004, Shoot first, and then ask questions: a look at aquarium fish imports and invasiveness in New Zealand. *New Zealand Journal of Marine and Freshwater Research*, **38**: 503-510; Ishikawa, T. & K. Tachihara 2014, Introduction history of non-native freshwater fish in Okinawa-jima Island: ornamental aquarium fish pose the greatest risk for future invasions. *Ichthyological Research*, **61**: 17-26.

³⁹ See for a review: Scribner, K. T., K. S. Page & M. L. Bartron 2001, Hybridization in freshwater fishes: a review of case studies and cytonuclear methods of biological inference. *Reviews in Fish Biology and Fisheries*, **10**: 293-323.

The name Afrikaanse glasmeerval is the Dutch name of the species *Parailia pellucida*. The name Afrikaanse karperzalmen is the Dutch name of the family Alestidae.

The Dutch and English names of the more general freshwater aquarium fishes are cross-referenced as well as the English names of the freshwater fishes used in aquaculture.

[Toxotidae (archerfishes / Schützenfische / schuttersvissen) (PLEURONECTIFORMES)]

The scientific family-names are recorded in the list (in blue print) with the English, German and Dutch common names and its systematic placement in the classification.

The list can of course be used in connection with other books and magazines. The search is mostly straightforward. Just look up the used scientific name in the list. The name can still be valid or you can find a reference to the current name. Then proceed by identifying the species with the given references.

Computer assisted searches with the help of the Acrobat Find function [Ctrl + f] (and maybe followed by [Enter] to find the next location) can locate all the words quickly. E.g., searching L 1 [Find L 1] leads to the beginning of the L-words and searching L1 [Find L1] leads to *Pterygoplichthys joselimaianus* in the text (of course [Find L1] locates L10 and L11 and L101 etc.).

With very old literature (before 1928) searching takes a bit longer, because to save space we did not list every possible combination of genus and species names.

For instance one is reading the "Sonderheft zum 25. Jahrgang" of the "Blätter für Aquarien- und Terrarienkunde" published in 1915. On page 49 an interesting article by A. Landeck on the sexual dimorphism of the then known aquarium fishes begins.

From page 52 of the Sonderheft onwards the aquarium fishes are arranged alphabetically. Most current scientific names can easily be traced.

The used name "Acantophthalmus Kuhlii C. & V." leads via *Acanthophthalmus* to *Pangio semicincta* (Fraser-Brunner, 1940), notice some question marks so the identification is not certain! According to the list the name *Acanthophthalmus Kuhlii* was used for this species from approximately 1925 until 1954. The species *Pangio kuhlii* (Valenciennes, 1846) (the 'true' Kuhlii) was probably in the hobby from about 1935 onwards. Furthermore *Pangio semicincta* can even be a synonym of *Pangio kuhlii*. So then we would have one species with the name *Pangio kuhlii* (Valenciennes, 1846).

The used name "Acara bimaculata Gthr." leads to *Cichlasoma bimaculatum* (Linnaeus, 1758) (the name was used from 1907 until 1914), but there are two question marks, so the identification of the species is very uncertain.

On page 57 of the Sonderheft: "Fundulus gularis Boul. var. gelb" can be traced with some effort. Not in *Fundulus* [there is: *Fundulus gularis* → *Fundulopanchax gularis*, but gelb/yellow?], so maybe in *Fundulopanchax* or [↔] in the other genera? The name gulare can be found in *Aphyosemion*, which also leads to *Fundulopanchax* or directly found as gularis in *Fundulopanchax*. Note the changing spelling as gulare and gularis!

Finally one arrives at *Fundulopanchax (Gularopanchax) gularis* (Boulenger, 1902). According to the list *Fundulus gularis* was used from 1907 until 1923.

"Fundulus gularis Boul. var. blau" can be found by reading the *Fundulopanchax* section and finding the entree under *Fundulopanchax sjostedti* (Lönnberg, 1895). According to the list Fundulus Gularis Blau was used from 1907 until 1925.

On page 58 of the Sonderheft:

"G. (Gasterosteus) spinachia L." is treated by us as marine and not in the list.

"G. (Girardinus) januarius Hensel früher G. caudimaculatus Hensel, neuerdings als Phalloceros caudomaculatus bestimmt" leads to *Phalloceros caudimaculatus* (Hensel, 1868). The combination Girardinus januarius leads to: Girardinus Januarius → *Phalloceros caudimaculatus* and *Girardinus*

januarius → *Phalloptychus januarius*, so there was made some error in the naming. The real *caudimaculatus* species is listed by the names: *Girardinus caudimaculatus* from 1904 until 1917, *Glaridodon Januarius* in 1910, *Glaridichthys Januarius* from 1911 until 1913 and *Phalloptychus Januarius* in 1914. It is not the species *Phalloptychus januarius*! [In the next article of the same Sonderheft the name *Glaridichthys januarius* was used, so an error was made in the generic name or it was still judged as correct and the name lingered on in 1915, as it did in Innes 1917.]

On page 59 of the Sonderheft: *Haplochilus* spp. can with a little effort be found under *Aphyosemion*, *Epiplatys*, *Oryzias*, *Aplocheilus*, *Micropanchax* and *Aplocheilichthys* (with a number of misidentifications).

On page 61 of the Sonderheft: “L. (= *Leporinus*) Natleri” is not in the list, but a *Leporinus nattereri* is in the list, mentioned in Bade (1925), so maybe that species was meant (it is uncertain if the species was ever in the hobby).

On page 63 of the Sonderheft: “*Parosphromenus Deissneri Blkr.*” does not lead to the recent misidentifications nor to the true *Parosphromenus deissneri* (there are no references in the early twenties), but instead leads to *Pseudosphromenus dayi* (Engmann, 1909). It is mentioned under the name *Parosphromenus deißneri Blkr.?* in Stansch (1914) on page 71.

In the book of Jäger 1868⁴⁰ (the man who founded one of the first public aquaria in Europe and wrote one of the first German books on the maintenance of aquaria) the used German common names must first be translated into English and then the scientific names can be found. On page 284 the author mentions the “Goldfisch, der Karpfen, die Schleie, Karausche, Rothauge, Wetterfisch und Hecht” as suitable for the freshwater aquarium. A dictionary (or a German book on freshwater fishes) leads to goldfish, carp, tench, crucian carp, roach, weatherfish and pike. Consulting the list leads to the correct scientific names: *Carassius auratus*, *Cyprinus carpio*, *Tinca tinca*, *Carassius carassius*, *Rutilus rutilus*, *Misgurnus fossilis* and *Esox lucius*.

On page 370 the names “Stör (*Acipenser sturio*)” and “Hausen (*Acipenser huso*)” were used, consulting the list leads to the same names *Acipenser sturio* and *Acipenser huso*.

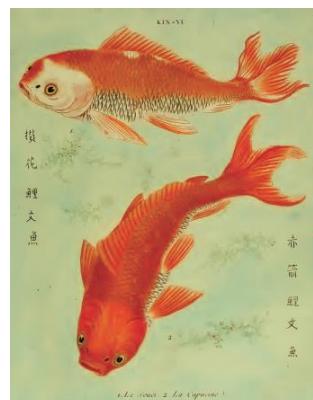

On page 375 Jäger mentions the propagation in the aquarium of “Weißfische, Karpfen und Barsch”. Apart from the first word the scientific names *Cyprinus carpio* and *Perca fluviatilis* can simply be found by the already described method.

The same approach must be taken with the names used by Müller 1856 (*Aquarium, Belehrung und Anleitung*). He finds the following fishes suitable for the aquarium: Goldfisch, Goldkarpfen, Elrits, Barsch, Weißfisch, kleine Gründling, Kaulkopf, Flußkarpfen and Strömling.

Another example comes from A. Hellbach [about 1907?], *Das Zimmer-Aquarium und seine Einrichtung*, Fiederer, Nürnberg, DE, 62 pp., or from the second edition [about 191?]: *Das Zimmer-Aquarium und seine Einrichtung*, 2. Auflage, Offenstadt & Fiederer, Nürnberg, DE, 48 pp.

From page 35 (second edition page 24) on some typical ‘historic’ aquarium fishes are described: die Karpfen (*Cyprinus*) [with the help of the list the currently correct scientific name is: *Cyprinus carpio*], der Goldfisch (*Carassius auratus*) [list: *Carassius auratus*], der Teleskopfisch (*Carassius auratus* var. *macrophthalmus*) [list: *Carassius auratus*], der Schleierschwanz-Goldfisch (*Carassius auratus* var. *japonicus bicaudatus*) [list: *Carassius auratus*], der Großflosser (*Macropodus viridi-auratus*) [list: *Macropodus opercularis*], der Gurami (*Oosphromenus olfax*) [list: *Oosphromenus goramy*], etc.

The first freshwater aquarium fish:

⁴⁰ Jäger, G. 1868, *Das Leben im Wasser und das Aquarium*, Vereinsbuchhandlung, Hamburg, DE, 384 pp.

1.4 Genus and species validity

We have checked all the scientific names against Eschmeyer's Catalog⁴ and we generally follow their conclusions.

Also the citation of the original description and comments on the validity can be found there.

The freshwater fishes described up to January 2016 have been listed.

Genus and species validity and freshwater occurrence were further checked with the following literature:

- Achenbach, G. M. & A. A. Bonetto 1957, Nota acerca de los nombres vernaculos de peces en el Parana Medio. *Anales del Museo Provincial de Ciencias Naturales "Florentino Ameghino"*, No. 2 Zoologia: 3-11.

The freshwater fishes of some regions of the world are reasonably known, however for other regions (some parts of Africa and Asia) it is difficult to find an accurate list of valid species. It would also be very helpful if colour-illustrated freshwater fish guides were available for these regions.

DE ORDE VAN DE TANDKARPERTJES VI

Even family-group names have been proposed in aquaristic publications, for instance in a journal (Profundulidi Hoedeman & Bronner June 1951 in Het Aquarium, 22 (No. 1): 6-10):

CYPRINODONTIFORMES BERG, 1940
door J. J. Hoedeman en F. J. Bronner

Zoals was te verwachten, is er op de eerste serie artikelen in deze reeks veel door de lezers gereageerd, en wel op volkomen verschillende wijze. Dit brengt nog weer eens naar voren, dat het voor de redactie, alsook voor de schrijvers, lang niet altijd een eenvoudige opgave is, iets te brengen, dat tenminste door een groot aantal lezers ten volle wordt gewaardeerd. We hebben met deze serie artikelen willen bereiken, dat naderhand de ingebonden

jaargangen een naslagwerk op de Tandkarper-tjes zouden bevatten.

Het aantal lezers, dat wel zeer met de opzet was ingenomen, is een dusdanig groot percentage, dat het ons voorkomt er goed aan te doen de besprekingen voort te zetten.

In jrg 21, pag. 4 gaven we 'n inleiding en daarop aansluitend een overzicht van de orde; we vervolledigen op pagina 26 met de voor de aquariumhouders belangrijke groep (Poecilotoidea) en bespreken achtereenvolgens alle eierleggende tandkarpers uit de onderfamilie Cyprinodontinae, in de wetenschap bekend, echter

maar weinig bekend (slechts enkele soorten) in liefhebberskringen. In de gevuldte opzet was het onvermijdelijk, hier ook de vissen te noemen, die nog nooit werden ingevoerd. Mocht zulks in de naaste toekomst wel geschieden, dan is gemakkelijk aan de hand van het gebodene 'na te gaan, welke soorten het kunnen zijn.

Van de Eierleggende soorten rest ons nu nog te bespreken de onderfamilies Fundulinae, Lamprichthyinae, en de families Orestiidae en Adrianichthyidae.

Onderfamilie: Fundulinae Jordan & Gilbert, 1882

Van de Cyprinodontinae (jrg. 21, p. 26 e.v.) onderscheiden de tot deze groep samen te brengen geslachten zich door de puntige, snijtandachtige tanden, conisch van vorm, en ook is steeds een wandbeen (parietale) aanwezig. Overigens onderscheiden ze zich vnl. in de meer langgerakte vorm van de Cyprinodonts. Gelukkig is dit een onderfamilie, waaraan voor de schrijvers wat meer eer valt te behalen, immers zijn er talrijke bekende soorten onder, reeds tientallen van jaren dankbare pleegkinderen van vele aquariumhouders. Over het algemeen zijn het kleurige vissen, niet groot, levendig, veelal typisch en belangwekkend in hun levensverrichtingen, en vrijwel zonder uitzondering gemakkelijk tot voortplanting te brengen.

De leden van deze onderfamilie verdelen we, teneinde een duidelijker beeld van hun verwantschap te verkrijgen, over een aantal geslachtsgroepen.

Geslachtsgroep Profundulidi *).

In fig. 18 is het verspreidingsgebied voor deze nieuwe geslachtsgroep aangegeven, welke de geslachten *Profundulus*, *Valencia* en *Adinia* omvat. Deze oogenschijnlijk wonderlijke verspreiding laat zich wellicht duidelijker verklaren aan de hand van het kaartje (jrg. 21, pag. 6), daarbij aannemend, dat het aangegeven gebied één geheel vormde, zonder een zee of oceaan als barrière. Het gebied, in het kaartje gestippeld, kan een brede zoetwaterstroom of uitgestrekt moerasgebied zijn geweest.

Geslacht: Profundulus Hubbs, 1924.

Hoewel weinig door liefhebbers gehouden, is dit geslacht van de drie hiervoor genoemde nog het bekendste. Al de tot nu toe beschreven soorten zijn zeer levendig en de beschrijving van *P. punctatus* geldt dan ook volledig voor de andere soorten.

and in an aquariumbook: *Aquarien Atlas Band 3*
(*Chiloglanidinae Riehl & Baensch 1990*, but unfortunately,
without a description of the new taxon):

Fam.: Mochocidae
Unterfam.: Chiloglanidinae

Chiloglanis deckenii
Schwanzfleck-Stromschnellenwels
Syn.: *Synodontis eurystomus*
Vork.: Ostafrika: Kenia und Tansania, bevorzugt in schnellfließenden Gewässern.
Erstinf.: Unbekannt, sicher jedoch von SEEGERS 1985.
GU.: Geschlechtsreife ♀♀ sind fülliger.
Soz. V.: Friedlicher, geselliger Fisch.
Hält. B.: Gut gefilterte, bepflanzte und mit einigen Moorkienwurzeln versehene Becken mit einem pH-Wert zwischen 6 und 7,2 und einer Härte nicht über 15° dGH.
ZU: Nicht bekannt.
FU: H, O; Algen, Aufwuchs, Flockenfutter, Lebendfutter (lebend und gefroren).
Bes.: Die Artzugehörigkeit der abgebildeten Art ist nicht ganz gesichert, innerhalb der Gattung besteht derzeit noch erhebliche systematische Verwirrung.
T: 20–26° C, L: 7 cm, BL: 60 cm, WR: m, SG: 2–3

Chiloglanis cf. neumanni

Ostafrikanischer Stromschnellenwels

Syn.: Keine, da evtl. noch unbeschriebene Art.

Vork.: Ostafrika: Tansania, meist in schnellfließenden Gewässern.

Erstinf.: Unbekannt, diese Fundortform 1987 durch SEEGERS.

GU.: Ausgewachsene ♀♀ sind fülliger.

Soz. V.: Friedlicher, geselliger Fisch, der sich auch an kleinsten anderen Fischen nicht vergreift.

Hält. B.: Obwohl die meisten *Chiloglanis*-Arten bevorzugt in schnellfließenden Gewässern vorkommen, konnte z.B. SEEGLERS sie auch schon in fast stehenden Gewässern und sogar Sümpfen feststellen. Daher sind sie sehr anpassungsfähig an die verschiedensten Verhältnisse. Allerdings ist in jedem Fall eine gute Filterung anzuraten, die für eine gewisse Strömung sorgt. Moorkienholz, Pflanzen und ein dunkler Bodengrund sollten die Einrichtung bilden. pH-Wert 6–7,5, Härte bis 15° dGH.

T: 20–26° C, L: 5 cm, BL: 60 cm, WR: m, SG: 2–3

The naming process (names as well as classification) was always on the mind of the serious hobbyists. For instance Christian Brüning (1911) in the Wochenschrift:

Wie steht es nun mit den wissenschaftlichen Namen überhaupt?

Viele stehen in gar keiner Beziehung zu den Fischen, wie z. B. Fitzroyia und Jenynsia. Sie sind abgeleitet von Personennamen und manchmal ein Verlegenheitsprodukt der Autoren. Es ist auch schon vorgekommen, daß ein liebenswürdiger Gatte ein Tier nach dem Namen seiner kleinen Frau benannte.

Oft sind die Namen nicht zutreffend. Anabantidae (= Kletterer) können nicht klettern, und die Osphromenidae, die Regan jetzt in diese Familie

lineinbringt, erst recht nicht. Die Osphromenidae (= Riecher) können nicht riechen und verdanken ihren Namen einem Irrtum.

Vielfach kommt es vor, daß ein und derselbe Gelehrte einem und demselben Fische verschiedene Namen gegeben hat, wie z. B. bei Poecilia reticulata, welche folgende Namen führt:

Poecilia reticulata Pet.,
Girardinus reticulatus Günth. und
Girardinus guppyi Günth.,
Poecilia vandepolli Lidth. und
Poecilia vandepolli var. arubensis Lidth.,
Heterandria guppis Jord.,
Poecilia branneri Eigenm.

Das erklärt sich durch die verschiedenen Heimorte des Fisches. Oft aber stoßen wir auf große Meinungsverschiedenheiten, wie z. B. über Gambusia holbrooki, welche Garman als besondere Art aufstellt, und die Jordan und Evermann nicht als solche anerkennen wollen, sondern behaupten, der Fisch sei identisch mit Gambusia patruelis.

Manchmal steigen dem Liebhaber auch Zweifel auf, ob die Untersuchungen eines Fachgelehrten zu einem richtigen Resultat geführt haben. So gibt es einen blauen und einen gelben Fundulus gularis Boul. Beide werden wissenschaftlich nur unter einem Namen geführt und als eine und dieselbe Art betrachtet, setzt man aber ein Weibchen vom blauen mit einem Männchen vom gelben Fundulus zusam-

In Paris there were already a lot of fish selling shops in 1861:

MARCHANDS DE POISSONS, D'APPAREILS DE PISCICULTURE ET D'USTENSILES DE PÊCHE

BOUTIGNY, Palais-Royal, galerie Montpensier, 18. Boules à Poissons et petits aquariums de salon.

CARBONNIER, quai de la Mégisserie, 60. Maison spéciale pour tous les appareils de pisciculture et aquariums de toutes dimensions..

CHAPEL, rue de Nazareth, 41.

DEVEAUX, quai de la Mégisserie, 68.

GANNE, rue Saint-Denis, 171.

LEUNE, 29, rue des Deux-Ponts, 31 (île Saint-Louis).

MORICEAU et BLANCHARD, quai de la Mégisserie, 66 bis.

MONTIGNAC, rue Saint-Honoré, 414.

SAVOURÉ, rue du Cloître-Saint-Jacques, 10

1.5 Aquarium history

The goldfish (*Carassius auratus*) was probably the first freshwater aquarium fish, kept in aquarium-like vessels in China since at least 1548 (Balon 2006; Chen 1955; Hervey & Hems 1968; Matsui 1976). After their introduction in Japan (1616 or maybe already in 1502, Matsui 1976) they were introduced in Europe in the 17th century as ornamental pond fishes (they arrived in Portugal in 1691; maybe they reached England in 1692), already bred in Holland in 1765 (the Oranda goldfish) and a little later in the 18th century goldfish were already kept indoors. In 1872 one of the first varieties, the telescope goldfish (cyprin télescope / poisson télescope / long-tsing-ya), already developed in China, was introduced in France (Carbonnier 1872a).

From the beginning of the 19th century various inland fishes of Europe (loaches, minnows, sticklebacks, etc.) were kept in glass or porcelain containers, which were later called **aquaria** (Warington 1854 & 1855; Hibberd 1856; Lankester 1856; Noel Humphreys 1857; Roßmäßler 1857; Sowerby 1857; Butler 1858; Edwards 1858; Prévost 1861; Wood 1868; Taylor 1876; Jacobs 1964; Atz 1971; Hamlin 1986). The possession of an aquarium (or drawing-room fish-pond) became very fashionable in England, France and Germany in the second half of the nineteenth century, about 1855 till 1880. There was even a slight aquarium mania in England between 1855 and 1860 (Hibberd 1860), accompanied by a lot of shops selling everything for the aquarium. See for instance the list of Lloyd 1858 for an overview of all the aquarium related things that could be bought in that period.

Gradually the number of true aquarium-keepers grew and at the end of the 19th century the hobby, after a slight decrease in popularity, definitively started to grow (Klee 2003; Brunner 2011; Hohl 2001; Hohl 2011) and there came about a never ending stream of exotic fishes for the hobbyist. Furthermore, the keeping of aquaria managed to do a lot of cultural work (Hamera, 2011).

At the very start some labyrinth fishes were imported [there was already an import of a “poisson combattant” (= ? *Betta smaragdina* / *Betta splendens*) by Jäger from Saigon / Cochinchine at the end of 1863 and again in January 1864, see *Bulletin de la Société Impériale Zoologique d’Acclimatation* (2^e série), 1864, 1: 145-146, but the fishes probably died due to the cold weather in Marseille, see Der Thiergarten 1864, 1(3): 62-63], the paradise fish *Macropodus opercularis* in 1869 (Poisson de Paradis / Macropode de la Chine; Carbonnier 1869a & 1872b, Lefebvre 1877) [Schneider & Whitney 1957 called 1868 the “birthday of the Tropical Fish Hobby”], *Trichogaster lalius* in 1873 (Colise de l’Inde / arc-en-ciel from Calcutta; Carbonnier 1873, 1874b, 1876), then *Anabas testudineus* (Anabas from Calcutta; Carbonnier 1874a; and also *Parambassis* sp.⁴¹), again “poissons combattants” in 1874? (= ? *Betta smaragdina* / *Betta splendens*; from Cochinchine / Saigon; Bordas 1875, Renard 1875) and soon followed by many other fishes from all continents (Dürigen 1897, Bade 1898, Klee 2003; Hohl 2011).

In 1876 for instance, *Macropodus opercularis*⁴² and the telescope goldfish were kept in Germany (Gilsenbach 1956); in 1887 supplemented by *Osphronemus goramy*, *Hoplisoma paleatum* (?; see below) and the fringetail goldfish (Gilsenbach 1956).

In 1878 the following fishes were kept in France⁴³: *Osphronemus goramy*, *Macropodus opercularis*, *Anabas testudineus*, *Parambassis* sp. (“poissons dits transparents du Bengale” = ? *Parambassis baculis*), some goldfish varieties, “*Fundula cyprinodonta*” imported from North-America in 1871 (Carbonnier 1875) [= *Umbra pygmaea*, Gill 1906b or = not an American species, Breder & Rosen 1966 pp. 136], “Doras from Buenos-Ayres” (= ? *Pterodoras granulosus*) [already reproduced in France], *Silurus glanis* from the Danube, *Ameiurus catus* (or ? *Ameiurus nebulosus*), “Callichthes from Brasil” = ? *Callichthys callichthys* [the name “*Callichthys fasciatus*” as used later by Carbonnier 1880 and 1881 does not exist, perhaps there was some confusion with a paper of Jobert⁴⁴ published in that same year, which described the habits of

⁴¹ Anonymous 1876, Poissons de l’Inde [L’Ambasse ranga ou poisson transparent / L’Anabas ou poisson grimpeur]. *Magasin Pittoresque* 44: 276-277.

⁴² Fernandez-Harburg, A. 1924, Das Aquarium, seine Entstehung, Geschichte und Bedeutung. *Wochenschrift für Aquarien- und Terrarienkunde*, 21 (4): 64-65.

⁴³ Raveret-Wattel, C. 1879, Rapport sur la Pisciculture à l’Exposition Universelle de 1878. *Bulletin de la Société d’Acclimatation*, (3^e série), 6: 137-146.

⁴⁴ 1878, Rapport sur un Mémoire de M. Jobert, relatif à la respiration aérienne de quelques Poissons du Brésil. *Comptes rendus hebdomadaires des séances de l’Académie des Sciences*, 86: 935-938.

Callichthys asper (= *Callichthys callichthys*) from Rio de Janeiro or was this a different fish species? Later on, 1880-1881, there were reports of a fish called *Callichthys fasciatus* from La Plata (Carbonnier 1881, 1881a, 1881b), that could be *Hoplisoma paleatus*, *Misgurnus fossilis*, *Cobitis taenia*, *Umbra krameri*, "Silver Bass from Canada" = *Morone chrysops*, Rock Bass = *Ambloplites rupestris*, "Salmonides de la Plata".

In 1880 the *Cyprinodon* of Spain (= ? *Aphanius fasciatus* or *Aphanius iberus*) was bred in the aquarium (Carbonnier 1881b).

The names and the aquarium history of the freshwater fishes were researched with the listed references in chapter three and further checked with the following literature (§ 1.5.1 and 1.5.2), together with the **Dutch language aquarium literature** in the Appendix.

We also added to our literature list some important aquarium books, that we hope to see one day, to make our overview of the early aquarium literature more complete.

Ida Mellen was also troubled by names in 1918:

Aquarist Versus Aquarian

IDA M. MELLEN

Secretary, New York Public Aquarium

What is the correct title for a person who understands the management of aquaria? For some years this has been a vexed question. *Aquarian*, *Aquarium-keeper*, *Aquarist*, and other names have been given. A similar difficulty accompanied the selection of a word to describe a receptacle or building containing live aquatic plants and animals, *aquavivarium* and other names having been used before *aquarium* was finally settled upon.

The euphonius and unique name of "Aquarial Garden" was bestowed upon an aquarium opened in Boston in 1860. Professor E. S. Morse, President of the Boston Society of Natural History, thinks it may have been suggested by Agassiz, who was greatly interested in the institution. The *Leisure Hour* of 1864 states that Agassiz "may frequently be seen walking towards the Boston Aquarial Gardens." As the histories and guide-books of Boston covering that period tell very little about the opening of the Aquarial Garden, it is interesting to learn from Professor Morse that the exhibition consisted of "individual aquaria round the hall, and in the centre a huge tank, in which seals, a shark and other animals were displayed. Afterwards a group of Africans, Zulus, Hottentots and other negroes danced and sang on the stage."

Such awkward words as *aquavivarium* and *aquarium-keeper* are not likely to become popular. A book in our Aquarium library, published sixty years ago in London, is entitled *The Aquarian Naturalist*. This is typically English. From

old American dictionaries we learn that Aquarians were members of an heretical Christian sect that flourished about the middle of the eighteenth century and were so called because they used only water at the Lord's Supper. Murray's *English Dictionary*, at present the standard dictionary in England, gives this definition, and also defines *Aquarian* as "One who keeps an aquarium." It also states that the word has been used, though rarely, as an adjective, an article in the *Intellectual Observer* for 1863 being entitled "Aquarian Principles."

The word *Aquarist* was adopted some years ago by the New York Aquarium. In perfectly correct form, probably, it should be *Aquariist*; but the contraction is preferable. The publishers of the *Century Encyclopedia*, conferring with the officers of the Aquarium on the subject several years ago, stated that in view of our adoption of the word, its usage would be regarded as established, and they purposed inserting it in the next issue of their encyclopedia. This has not yet been printed.

Mr. W. A. Poyser, editor of *AQUATIC LIFE*, revived the word *Aquarian* in 1916, and has since used it in his magazine, though he also uses *Aquarist*.

Mr. Poyser advised the writer last summer that he had received intelligence of the formation of an astrological society in Boston for the purpose of studying mental, moral and physical effects of planets on human beings. As the world was passing through the portion of the universe dominated by the sign Aquarius,

1.5.2 Aquarium magazines

We used the following aquarium magazines for tracking down fish species and names (the consulted volumes / issues are written between square brackets [], titles and volumes are highlighted in **bold**).

All the volumes of

In **Dutch**: '**Aqua-Terra** (NL)' [1936 – 1946], '**Het Aquarium** (NBAT, NL)' [1930 – 2016-01-03], '**Ons Aquarium** (NL)' [1934 – 1939], '**Aquarium & Terrarium Hobbyist** (NL)' [1994 – 1996], '**Barbus** (Antwerpen, BE)' [1 (1946-1947)], '**Cichlidae** (BCV, BE)' [1975 – 1981], '**Natuurgenot in Huis** (Floralia, Assen, NL)' [1 (1913) – 2 nr. 2 (1914)], '**N. V. C. Periodiek / Cichlidae** (NVC, NL)' [1975 – 2016-01-03], '**Ons Eigen Blad** (Floralia, Assen, NL)' [1 (1909) – 4 (1912)], '**Tijdschrift voor Aquarium- en Terrariumkunde** (NL)' [1922 – 1934].

In **English**: '**Aqualog News** (Rodgau, DE)' [1996 – 2016-01-03].

In **French**: '**Aquarium, revue pour favoriser le développement de l'aquariophilie** (Paris, FR)' [1 (Jan. 1934) – 3 (1936) no. 31/32], '**Notre Aquarium, revue mensuelle pour la vulgarisation de l'aquariophilie** (Liège, BE / Paris, FR)' [1 (1951) – 3 (1953) no. 10], '**L'aquarium et les Poissons** (Société Métropolitaine d'Éditions Artistiques, Paris, FR)' [1 (1951) – 7 No.11 (1957)], '**La pisciculture française section Aquariophilie-Aquariologie** (Paris, FR)' [1966 – 1973; réédition 1974 Centre de Documentation du Cercle aquariophile de Nancy]

In **German**: '**Amazonas** (Natur und Tier, DE)' [2005 – 2016-01-03]. '**Aqua Aktuell** (Müssen, DE)' [1977 – 1979], '**Aqua Terra / Aquaterra** (VSAT, CH; united with *Das Aquarium*)' [1 (1964) – 10 (1973) Nr. 3], '**Aquarien Magazin** (Kosmos, DE)' [1967 – March 1988], '**Aquarien Terrarien** (DDR)' [1954 – 1989], '**Die Aquarien und Terrarien Zeitschrift** (DATZ, DE)' [1948 – 2016-01-03], '**Der Aquarienfreund** (Wilhelmshaven, DE)' [1972 – 1977], '**Aquaristik Aktuell / Aquaristik** (Ettlingen, DE)' [1994 – 2016-01-03], '**Das Aquarium, die Fachzeitschrift des Naturfreundes** (Berlin, DE)' [1 (1927) – 18 no. 2 (1944)], '**Das Aquarium** (DE; united with *Amazonas*)' [1967 – Nr. 438 (dec. 2005)], '**Aquarium Heute** (Aquadocumeta, DE; united with *Aquaristik*)' [1983 – 2001], '**Tetra Informationen aus der Aquaristik** (1968 – Nr. 13 (1971)) / **Tatsachen und Informationen aus der Aquaristik** (Nr. 14 (1971) – Nr. 62 (1983)) / **TI international** (Nr. 63 (1983) – Nr. 142 (1998)) / **Aquaristik Fachmagazin** (Nr. 143 (1998) – Nr. 161 (2001)) / **Aquaristik Fachmagazin mit Aquarium Heute** (Nr. 162 (2001) – now) (DE)' [1968 – 2016-01-03], '**Tropische Fische** (Tropische Fische, Essen, DE; 1961 – 1964)' [1 (1961) – 4 (1964)].

We further checked **some volumes / issues** of the following magazines (volumes / Banden are highlighted in **bold**).

In **Czech**: '**Akvárium a Terárium / Akvárium Terárium** (1958 – 2009)' [1 (1958) – 17 (1974), some issues], '**Akvaristické Listy** (1921 – 1951)' [18 (1946/47) – 23 (1951)].

In **Danish**: '**Dansk Akvarietblad** (DK; 1945 – 1971)' [1947 – 1967].

In **Dutch**: '**Aquariumwereld** (BBAT, BE; 1949 – now)' [1 (1948/49) – 51 (1998)], '**Aquaterra** (Bandoeng, Nederlandsch-Indië; 1933 – ?)' [1933 – 1935], '**Killi-Kontakt / Killi Kontakt** (BKV, BE; 1972 – 1979 and 1991 – now)' [3 (1975) – 7 (1979), 19 (1991) – 43 (2015)], '**Killi Nieuws** (KFN, NL; 1972 – now)' [1972 – 2011], '**OVB-Bericht** (OVB, NL; 1978 – 2005)' [8 (1986) – 2005], '**T I'H (Feiten en informaties uit de aquariumwereld)** (NL; 1975 – 198?)' [1 no. 1 (1975) – 9 no. 35 (1983)], '**Waterweelde** (NL; 1951 – 1962)' [1 (1951/52) – 11 (1961/62)].

In **English**:

'**The World Aquarist** (World Federation of Aquarists; 1955 – 1957)' [1 (4) Dec. 1955 – 2 (3) July 1957].

Australia: '**Finchat** (Aquarium Society of Victoria, AU; 1956 – 2009)' [19 (1971) no. 6], '**Fishes of Sahul** (ANGFA, AU; 1983 – now)' [13 (1999) – 2016-01-03].

Canada: '**Canadian Fish Fanciers** (Toronto, CA; 1974 – 198?)' [1 (1974) – 5 (1978)].

New-Zealand: '**The Dominion Aquarist and Pondkeeper** (NZ; 1942 – 1953)' [6 (1947) – 11 (1953)].

Great-Britain: '*The Amateur Aquarist* (I (1) May 1924 – I (3) July 1924) / *Amateur Aquarist & Reptilian Review* (I (4) August 1924 – II (8) winter 1927) / *The Aquarist & Pond-keeper* / *The Aquarist & Pondkeeper* (III (1) spring 1928 – 2000) / *Today's Fishkeeper* (2001 – Aug. 2005) (UK)' [1 (1924) – 48 (1983) and various issues], '*Aquarium Digest International* (Tetra, UK/DE; 1972 – 19?)' [1 no. 1 (1972) – 6 no. 19 (1978)], '*Cichlidae* (BCA, UK; 1975 – now)' [1 (1975) – 5 (1981)], '*Killi-News* (BKA, UK; 1967 – now)' [no. 97 (1973) – no. 180 (1980)], '*PetFish monthly (the practical fishkeeping magazine)* (UK; 1966 – 1978) / *Practical Fishkeeping* (EMAP, UK; Dec. 1978 – now)' [1 (1966) – Dec. 1980, and 1990 – 2016-01-03], '*Popular Fish Keeping* (Kelsey, UK; July/Aug. 2013 – now)' [some issues], '*Water Life (A weekly paper devoted to the study of every thing which lives in or near the water)* (UK; June 9, 1936 – 1939)' [1 (1936), 3 (1937) and 4 (1938)], '*Water Life and Aquaria World* (UK; 1946 – 1957)' [new series 1 (1946) – 12 no. 5 (Oct. 1957); '*Fishkeeping and Water Life* (UK; 1957 – 1958)' [new issue 13 no. 1 (Nov. 1957) – 13 no. 14 (Dec. 1958)].

USA: '*American Currents* (NANFA; 1973 – now)' [1 (1973) – 7 (1980)], '*The Aquarium* (Mulertt, Cincinnati / New York; 1878 – 1881 Cincinnati, 1892 – 1897 New York)' [III (1892) no. 25 – IV (1895) no. 37; IV (1896) no. 39 – IV (1897) no. 43], '*The Aquarium* (Philadelphia; 1912 – 1914)' [I (1912) – II jan. The periodical **Zeitschrift für aquaristische Literatur** (Verlag Natur & Wissenschaft, DE) [1 (1998) – 2016-01-03] was used for the dating of some aquaristic literature.

We hope the name list will stimulate the use of correctly written scientific names, present an overview of the (still) existing freshwater fishes, record their citation in the aquarium literature and bring some stabilization in the use of common names.

We did our best to present all the correct names, but of course the big problem remains, namely the correct identification of the animals.

CHAPTER TWO A CLASSIFICATION OF THE FRESHWATER FISHES OF THE WORLD

Introduction

A **classification** of the living freshwater fishes is presented (40 orders, 205 families and 2,264 valid genera according to our definition of freshwater fishes), with a listing of the valid genera in the lowest rank and common names for some higher taxa (the order of the common names is Dutch / German / English). The author of a family-group name is listed at one rank only (mostly at the family or subfamily rank) to avoid repetitions as the author is according to the Code of Zoological Nomenclature⁴⁵ also the author of the other family-group ranks (superfamily ending: -oidea, family ending: -idae, subfamily ending: -inae, tribe ending: -ini, subtribe ending: -ina).

See Berra (2001) for a description and the geographical distribution of the families and for the pronunciation of the scientific family names.

{Ma} (= million years = million years before present) behind a rank name represents the estimate minimum age of that rank by the oldest fossils, although this could be somewhat ambiguous⁴⁵.

Dating according to the International Stratigraphic Chart (International Commission on Stratigraphy: www.stratigraphy.org).

Most fossil data from Benton (1993). For example known from the **Pliocene** {>5 Ma}; **Miocene** {>23 Ma}; **Oligocene** {Chattian >28 Ma, Rupelian >34 Ma}; **Eocene** {Priabonian >38 Ma, Bartonian >40 Ma, Lutetian >49 Ma, Ypresian >56 Ma}; **Paleocene** {Thanetian >59 Ma, Selandian >62, Danian >66 Ma}; **Cretaceous** {**Upper Cretaceous**: Maastrichtian >71 Ma, Campanian >84 Ma, Santonian >86 Ma, Coniacian >89 Ma, Turonian >94 Ma, Cenomanian >100 Ma; **Lower Cretaceous**: Albian >112 Ma, Aptian >125 Ma, Barremian >130 Ma, Hauterivian >136 Ma, Valanginian >140 Ma, Berriasian >146 Ma}; **Jurassic** {>200 Ma}; **Triassic** {>251 Ma}; **Permian** {>299 Ma}; **Carboniferous** {>359 Ma}; **Devonian** {>416 Ma}.

{age} behind a family-group name means an *approximate* age calculated by DNA research with the help of the mitochondrial genome molecular clock of bony fishes with a value of about $7 \cdot 10^{-4}$ – $3 \cdot 10^{-2}$ substitutions / {(site)·(million years)} or 0.4–2.6% divergence / million years depending on the gene studied; or calculated by multiple calibration with the help of the fossil record⁴⁵. For examples of such a **calibration** see Genner *et al.* 2007, Nakatani *et al.* 2011 or Saitoh *et al.* 2011. Beware, there is a **substantial error** in the estimates!⁴⁶. Or the age is based upon the well established sister group (both of the same age). For the sake of simplicity we give the mean age and neglect the credibility ranges.

The classification of fishes is a very active field of research and many changes in the classification are expected in the near future.

Einleitung

Es folgt eine systematische Gliederung der rezenten Süßwasserfische (die von uns berücksichtigten Süßwasserfische werden in insgesamt 40 Ordnungen, 205 Familien und 2264 gültige Gattungen) eingeteilt. Die heute gültig anerkannten Gattungen werden bei der niedrigsten Rangordnung aufgelistet, meistens Familie (Endung: -idae), Unterfamilie (Endung: -inae), Gattungsgruppe (Sippe oder Tribus, Endung: -ini) oder Subtribus (Endung: -ina). Auch werden die holländischen, deutschen und englischen Namen der verschiedene Gruppen erwähnt.

Der Autor eines Familiengruppennamens wird nur einmal erwähnt (meistens hinter dem Familien- oder Unterfamilienamen). Dieser Autor ist nach dem Internationalen Code für Zoologische Nomenklatur¹¹ zugleich Autor der übrige Ränge des Familiengruppennamens (Überfamilie, Familie, Unterfamilie und Gattungsgruppe).

Berra (2001) beschreibt die Familien, erwähnt die angelsächsische Aussprache der wissenschaftlichen Familiennamen und beschreibt die natürliche Verbreitung der Familien auf der Erde.

{Ma} hinter einem Familiengruppennamen ist eine Schätzung in Millionen Jahre Alter mittels der ältesten Fossilien. Die meisten Angaben stammen von Benton (1993).

{age} hinter einem Familiengruppennamen ist das Durchschnittsalter berechnet mit Hilfe der DNA-Forschung oder das Alter basiert auf der ausreichend überprüften Schwestergruppe (beide das gleiche Alter).

Die systematische Gliederung der Fische ist ein sehr lebhaftes Forschungsgebiet und es wird noch viele Änderungen geben.

Inleiding

Hierna volgt een systematische indeling naar verwantschap (classificatie) van de recente zoetwatervissen (40 orden, 205 families en 2264 geldige geslachten volgens onze definitie van zoetwatervissen). Bij deze indeling naar verwantschap worden de geldige geslachten vermeld in de laagste categorie, meestal familie (uitgang: -idae), onderfamilie (uitgang: -inae), geslachtsgroep (uitgang: -ini) of ondergeslachtsgroep (uitgang -ina).

De auteur van een familiegroepsnaam wordt slechts vermeld achter één familiennaam (meestal achter de familie- of onderfamilieaanduiding). Deze auteur is volgens de Code voor Zoölogische Nomenclatuur¹¹ tegelijkertijd de auteur van alle rangen van de familiegroepsnaam (superfamilie-, familie-, onderfamilie- en geslachtsgroepnaam). Achter de wetenschappelijke groepsnaam worden tussen haakjes de Nederlandse, Duitse en Engelse naam gegeven.

Zie Berra (2001) voor een beschrijving en de geografische verspreiding van de families en voor de Angelsaksische uitspraak van de wetenschappelijke familienamen.

{Ma} achter een groepsnaam is de schatting van de ouderdom in miljoenen jaren met behulp van de oudste fossielen. De meeste gegevens komen uit Benton (1993).

{age} achter een groepsnaam is de gemiddelde leeftijd berekend met behulp van DNA-onderzoek of het betekent een schatting van de leeftijd met behulp van de goed vastgestelde zustergroep (beide even oud).

De classificatie van de vissen is een zeer actief onderzoeksgebied en er zullen nog vele veranderingen volgen.

The **fish classification, common names** and the **age data** were taken from the following literature⁴⁷:

Particularly the cichlids of the Great Lakes of Africa are a prime target of evolutionary research:

Outline of the freshwater fish classification

SUPERKINGDOM: EUKARYOTA (EUKARYOTEN) ► KINGDOM: ANIMALIA (meercellige dieren / Vielzellige Tiere / Metazoa) {>550 Ma} ► **SUBKINGDOM: BILATERIA** ► **INFRAKINGDOM: DEUTEROSTOMIA (NIEUWMONDIGEN / NEUMÜNDERN)** {>515 Ma} ► **Phylum: CHORDATA (ANIMALS WITH A NOTOCHORD)** {>514 Ma Early Cambrian} ► **1**

1 Subphylum Vertebrata / Craniata (gewervelde dieren / Wirbeltiere / animals with backbones / animals with arcualia) {>457 Ma}

1a Infraphylum AGNATHA: **Petromyzontiformes**

2 Infraphylum GNATHOSTOMATA (kaakdieren / animals with jaws)

2a Petaclass CHONDRICHTHYES: **Myliobatiformes**

3 Megaclass OSTEICHTHYES (beenvissen / bony fishes)

3a Teraclass SARCOPTERYGII: **Dipnoiformes**

4a Class **CLADISTEI**: **Polypteriformes**

4 Class ACTINOPTERI: **Acipenseriformes, Lepisosteiformes, Amiiformes**

5 Infraclass TELEOSTEI

5a Cohort ELOPOMORPHA: **Anguilliformes**

5b Cohort OSTEOGLOSSOMORPHA: **Hiodontiformes, Osteoglossiformes**

5c Cohort OTOMORPHA: **Clupeiformes, Gonorynchiformes, Cypriniformes, Gymnotiformes, Characiformes, Siluriformes**

6 Cohort EUTELEOSTEOMORPHA

6a Division PROTACANTHOPTERYGII: **Lepidogalaxiiformes, Galaxiiformes, Salmoniformes, Osmeriformes**

7 Subsection ACANTHOMORPHATA

7a Division PARACANTHOMORPHACEAE: **Percopsiformes, Gadiformes**

8 Subdivision PERCOMORPHACEAE: **Ophidiiformes, Batrachoidiformes, Gobiiformes, Syngnathiformes, Synbranchiformes, Anabantiformes, Pleuronectiformes, Cichliformes, Atheriniformes, Beloniformes, Cyprinodontiformes, Mugiliformes, Blenniiformes, Uranoscopiformes, Spariformes, Tetraodontiformes, Centrarchiformes, Perciformes.**

A fish assigned to the order Myliobatiformes is also a part of **1 Vertebrata, 2 Gnathostomata** and **2a Chondrichthyes**. It is **not** a part of **1a Petromyzontomorpha**.

A fish assigned to the order Cypriniformes is also a part of **1 Vertebrata, 2 Gnathostomata, 3 Osteichthyes, 4 Actinopteri, 5 Teleostei** and **5c Otomorpha**. It is **not** a part of **1a Petromyzontomorpha**, nor of **2a Chondrichthyes**, nor of **3a Sarcopterygii**, nor a part of **5a and 5b**.

In zoology the following descending Linnaean hierarchy of categories (**primary ranks**) can be used to classify animals: regnum > phylum > classis > cohort > section > division > series > ordo > familia > tribus > genus > species.

Modifying these ranks with *super* (above) and *sub* (below) and sometimes *infra* (between) leads to the following *descending* hierarchy, as used by most ichthyologists to describe the result of more than 500 million years of evolution (the vernacular names of the frequently used ranks in the order: Dutch / German / English): regnum (rijk / Reich / kingdom) > subregnum (onderrijk / Unterreich / subkingdom) > superphylum (superstam / Überstamm / **superphylum**) > phylum (stam / Stamm / **phylum**) > infraphylum (tussenstam / Infrastamm / **infraphylum**) > superclassis (superklasse / Überklasse / **superclass**) > classis (klasse / Klasse / **class**) > subclassis (onderklasse / Unterklassen / **subclass**) > infraclassis (infraklasse / Infraklasse / **infraclass**) > megacohort > supercohort > **cohort** > **subcohort** > infracohort > **section** >

subsection > division > subdivision > series > subseries > superordo (superorde / Überordnung / superorder) > ordo (orde / Ordnung / order) > subordo (onderorde / Unterordnung / suborder) > superfamilia (superfamilie / Überfamilie / superfamily) > familia (familie / Familie / family) > subfamilia (onderfamilie / Unterfamilie / subfamily) > supertribus (supergeslachtsgroep / Übersippe / supertribe) > tribus (geslachtsgroep / Sippe / tribe) > subtribus (ondergeslachtsgroep / Untersippe / subtribe) > supergenus (supergeslacht / Übergattung / supergenus) > genus (geslacht / Gattung / genus) > subgenus (ondergeslacht / Untergattung / subgenus) > supraspecies [supra to avoid confusion with the evolutionary category superspecies] (supersoort / Überart / supraspecies) > SPECIES (SOORT / ART / SPECIES) > subspecies (ondersoort / Unterart / subspecies).

The **bold** highlighted ranks are used by us in the freshwater fish classification. After the scientific higher taxon names we list the common names used in the literature (in the order: Dutch / German / English).

Because of rank uncertainties in the Class series we sometimes use the unranked term **clade** to designate some of these higher categories. See Nelson (2006) for more class-series names and Wiley & Johnson (in Nelson, Schultze & Wilson 2010) and Betancur-R, Wiley, Bailly, Miya, Lecointre & Ortí (2014) (http://www.deepfin.org/Classification_v3.htm) for a modern systematic treatment of the teleosts.

We list the currently considered valid genera in the lowest rank (mostly subfamily, tribe or subtribe).

The **SPECIES CATEGORY** is the fundamental level in the Linnaean hierarchy used to describe the diversity of biological organisms (see § 1.1). Species (and sister taxa) are the only taxa directly comparable in a biological manner. So a family in Cyprinoidei has nothing to do with a family in Characoidei, nor has Cyprinoidei some direct relation with Characoidei. Also remember that the classification in tribes, subfamilies, etc. is a quite arbitrarily decision and very vulnerable to change.

The currently used valid scientific names of the freshwater fish species are listed in chapter 4.

All the scientific names can, if one wish, be transferred to English vernacular names as follows:

- **Tribes (-ini)**: change the ending to singular *in* or plural *ins*, for example Characini to characin fishes or characins;
- **Subfamilies (-inae)**: change the ending to singular *ine* or plural *ines*, for example Characinae to characine fishes or characines;
- **Families (-idae)**: change the ending to singular *id* or plural *ids*, for example Characidae to characid fishes or characids;
- **Superfamilies (-oidea)**: change the ending to singular *ide* or plural *ides*, for example Characoidea to characide fishes or characides;

and the following taxon name endings not yet regulated by the Code¹¹ (see also Wiley & Johnson in Nelson, Schultze & Wilson 2010, p. 124):

- **Suborders (-oide)**: change the ending to singular *oid* or plural *oids*, for example Characoidei leads to characoid fishes or characoids; [in a new proposal a suborder would be ending in *iformi*, but the vernacular ending could still be *oid* or *oids*]
- **Orders (-iformes)**: change the ending to singular *iform* or plural *iforms*, for example Characiformes leads to characiform fishes or characiforms;
- **Superorders (maybe -zoidae or -omorpha {or -iphysae or -omorphae or -imorphae or -ae})**: change the ending to singular *zoid* or *morph* or plural *zoids* or *morphs*;
- **Classes (maybe -opsida or -omorphes or -ii)**: change the ending to singular *opsid* or *omorph* or plural *opsids* or *omorphs*;
- **Superclasses (maybe -omorphi)**: change the ending to singular *omorphi* or change the plural to *omorphis*.

Again we must emphasize that many changes in the classification of the fishes are expected in the near future and that there are different opinions on the subject.

1a **infraphylum: Agnatha** {>359 Ma Famennian / Carboniferous; age 450 Ma}

class: **Cephalaspidomorphi** (PRIKKEN / RUNDMÄULER / LAMPREYS) {>359 Ma Carboniferous}

Petromyzontiformes (PRIKACHTIGEN / RONDBEKKEN / NEUNAUGENARTIGE / RUNDMÄULER / LAMPREYS / PETROMYZONTIFORM FISHES) *sensu* Berg, 1940 {>280 Ma Permian; age 390–470 Ma}

Mordaciidae Gill, 1893 (zuidelijke topoogprikken / zuidelijke prikken / Südliche Neunaugen / southern topeyed lampreys / southern hemisphere lampreys): *Mordacia* Gray, 1851.

Geotriidae Gill, 1893 (buidelprikken / zuidelijke gestreepte prikken / Australische Neunaugen / southern striped lampreys / pouched lampreys) {age 220–280 Ma}: *Geotria* Gray, 1851.

Petromyzontidae Bonaparte, 1831 (prikken / Neunaugen / Northern Hemisphere lampreys) {age 220–280 Ma}

Petromyzontinae: *Caspiomyzon* Berg, 1906; *Ichthyomyzon* Girard, 1858; *Petromyzon* Linnaeus, 1758.

Lampetrinae Fowler, 1958

Entosphenini Vladkov, 1972 (Noordamerikaanse prikken / Nordamerikanische Neunaugen / North American lampreys): *Entosphenus* Gill, 1862; *Tetrapleurodon* Creaser & Hubbs, 1922.

Lampetrini (Euraziatische prikken / Eurasische Neunaugen / Eurasian lampreys): *Eudontomyzon* Regan, 1911; *Lampetra* Bonnaterre, 1788; *Lethenteron* Creaser & Hubbs, 1922.

2 **infraphylum: GNATHOSTOMATA (vertebraten met kaken / kaakmondigen / Quermäuler / Kiefermäuler / jawed vertebrates)** {>421 Ma Ordovician; age 500–515 Ma}

Superclass 2a: **CHONDRICHTHYES** Huxley, 1880 (KRAAKBEENVISSEN / KRAAKBEENVINNIGEN / KNORPELFISCHE / CARTILAGINOUS FISHES) {>416 Ma Devonian; age 462 Ma}

class: **ELASMOBRANCHII** Bonaparte, 1838 (haaien en roggen / plaatkieuwigen / Plattenkiemer / sharks and rays / elasmobranchs) {>334 Ma Carboniferous}

superorder: **BATOIDEA** Bridge, 1910 (rogachtigen / Rochen / rays) {>125 Ma Aptian; age 200–230 Ma}

Myliobatiformes (VLEERMUISROGACHTIGEN / STEKELROGACHTIGEN / ADELAARSROGACHTIGEN / VLEUGELROGACHTIGEN / ADLERROCHENARTIGE / STACHELROCHENARTIGE / STINGRAYS / EAGLE RAYS / MYLIOBATIFORM FISHES) *sensu* Carvalho, Maisey & Grande, 2004 {>86 Ma Santonian}

MYLIOBATOIDEI (VLEERMUISROGVERWANTEN / PIJLSTAARTROGVERWANTEN / ADLERROCHENVERWANDTE / MYLIOBATOID FISHES) *sensu* Nishida, 1990

Dasyatoidea (pijlstaartrogverwanten / Stachelrochenverwandte / benthic rays / dasyatides) {>86 Ma Upper Cretaceous}

Dasyatidae Jordan & Gilbert, 1879 (stekelroggen / pijlstaartroggen / Stechrochen / Stachelrochen / whiptail stingrays) {>50 Ma Early Eocene}

Dasyatinae [this subfamily includes not listed marine genera]: *Dasyatis* Rafinesque-Schmaltz, 1810; *Himantura* Müller & Henle, 1837; *Urogymnus* Müller & Henle, 1837.

Pastinachinae Roberts, 2007 (flagtailed stingrays): *Makararaja* Roberts, 2007; *Pastinachus* Rüppell, 1828.

Potamotrygonidae Garman, 1877 (rivierstekelroggen / zoetwaterroggen / Süßwasserrochen / freshwater stingrays / river stingrays) {>41 Ma Middle Eocene; age 19 Ma}: *Heliotrygon* Carvalho & Lovejoy, 2011; *Paratrygon* Duméril, 1865; *Plesiotrygon* Rosa, Castello & Thorson, 1987; *Potamotrygon* Garman, 1877.

3 Megaclass: OSTEICHTHYES (beenvissen / Knochenfische / Beinfische / bony fishes) Bonaparte, 1838 {>419 Ma Devonian; age 528 Ma}

3a teraclass: **SARCOPTERYGII** (KWASTVINNIGEN / SPIERVINNIGEN / MUSKELFLOSSER / LOBE-FINNED FISHES / FLESHY-FINNED FISHES) Romer, 1955 {>421 Ma Early Devonian; age 425–436 Ma}

class: **DIPNOTETRAPODOMORPHA** (longvissen en viervoetigen / salamandervissen en viervoetigen / Lungfische und Vierfüßler / lungfishes and tetrapods) {>408 Ma Devonian; age 420 Ma}

superorder: **CERATODONTIMORPHA** (longvissen / dubbelademers / Doppelatmer / Lurchfische / lungfishes) *sensu* Cloutier & Ahlberg, 1996 {>408 Ma Devonian; age 390 Ma }

Ceratodontiformes (LONGVISACHTIGEN / LUNGENFISCHARTIGE / LUNGFISHES / DIPNOIFORM FISHES / CERATODONTIFORM FISHES) *sensu* Cloutier, 1990 {>359 Ma Carboniferous} [numerous extinct families] **CERATODONTOIDEI** [many extinct families]

Neoceratodontidae Schultz, 1948 (Australische longvissen / Australische Lungenfische / Australian lungfishes) {>251 Ma Early Triassic}: *Neoceratodus* Castelnau, 1876.

LEPIDOSIRENOIDEI {>100 Ma Middle Cretaceous}

Lepidosirenidae Bonaparte, 1841 (longvissen / salamandervissen / slijkvissen / Lungenfische / Molchfische / lungfishes / mud sirens) {>84 Ma Campanian; age 103 Ma}: *Lepidosiren* Fitzinger, 1837; *Protopterus* Owen, 1839.

4 teraclass: **ACTINOPTERYGII** (STRAALVINNIGEN / STRAHLENFLOSSER / RAY-FINNED FISHES) Cope, 1871 {>421 Ma Early Devonian; age 395 Ma}

class: **CLADISTEI** {>390 Ma Devonian; age 383 Ma}

Polypteriformes (VEELVINNIGEN / KWASTVINSNOEKACHTIGEN / FLÖSSELHECHTARTIGE / FLÖSSLER / POLYPTERIFORM FISHES) *sensu* McAllister, 1968 {>390 Ma Devonian; age 380 Ma}

Polypteridae Bonaparte, 1835 (kwastvinsnoeken / wimpelalen / Flösselhechte / bichirs) {>100 Ma Cenomanian; age 19 Ma}: *Erpetoichthys* Smith, 1865; *Polypterus* La Cepède, 1803.

class: **ACTINOPTERI** {>378 Ma Givetian; age 383 Ma}

4-1 subclass: **CHONDROSTEI** (kraakbeensteuren / chondrosteans) {>121 Ma Lower Yixian; age 350–377 Ma}

Acipenseriformes (STEURACHTIGEN / STÖRARTIGE / KNORPELSCHMELZSCHUPPER / ACIPENSERIFORM FISHES) *sensu* Berg, 1940 {>200 Ma Early Jurassic}

ACIPENSEROIDEI (STEURVERWANTEN / STÖRVERWANDTE / ACIPENSEROID FISHES) *sensu* Grande & Bemis, 1991

Polyodontidae Bonaparte, 1835 (veeltandigen / Löffelstöre / Vielzähner / paddlefishes) {>121 Ma Lower Yixian; age 192 Ma}

Polyodontinae (lepelsteuren / peddelvissen / Schaufelrüssler)

Polyodontini (Amerikaanse lepelsteuren / Amerikanische Schaufelrüssler / American paddlefishes) {age 68 Ma}: *Polyodon* La Cepède, 1797.

Psephurini Grande & Bemis, 1991 (Aziatische lepelsteuren / Asiatische Schaufelrüssler / Asian paddlefishes) {age 68 Ma}: *Psephurus* Günther, 1873.

Acipenseridae Bonaparte, 1831 (steuren / Echte Störe / Rüsselstöre / sturgeons) {>121 Ma Lower Yixian; age 192 Ma}: *Acipenser* Linnaeus, 1758; *Scaphirhynchus* Heckel, 1836.

4-2 subclass: **NEOPTERYGII** (nieuwvinnigen / Neuflosser) *sensu* Regan, 1923 {>318 Ma
Mississippian; age 365 Ma}

infraclass: **HOLOSTEI** {>250 Ma Induan / Lower Triassic; age 323 Ma}

Lepisosteiformes (GLANSSCHUBBIGEN / BEENGANOÏDEN / KNOCHENHECHTARTIGE / LEPISOSTEIFORM FISHES / SEMIONOTIFORM FISHES) *sensu* Gayet, Meunier & Werner, 2002 {>245 Ma Middle Anisian; age 320 Ma} [order also known as Semionotiformes]

LEPISOSTEOIDEI (BEENSNOEKVERWANTEN / KNOCHENHECHTVERWANDTE / RAUTENSCHMELZSCHUPPER / LEPISOSTEOID FISHES) *sensu* Gosline, 1952

Lepisosteidae Agassiz, 1832 (beensnoeken / kaaimansnoeken / Knochenhechte / Kaimanfische / gars) {>94 Ma Cretaceous}: *Atractosteus* Rafinesque, 1820; *Lepisosteus* La Cepède, 1803.

Amiiformes (MODDERSNOEKACHTIGEN / KAHLHECHTARTIGE / RUND SCHMELZSCHUPPER / AMIIFORM FISHES) *sensu* Grande & Bemis, 1998 {>284 Ma Sakmarian; age 320 Ma}

AMIOIDEI (MODDERSNOEKVERWANTEN / KAHLHECHTVERWANDTE / AMIOID FISHES) {>151 Ma late Jurassic}

Amiidae Bonaparte, 1831 (moddersnoeken / Kahlhechte / Schlammfische / bowfins) {>146 Ma Berriasian}

Amiinae (real bowfins) {>100 Ma Cenomanian}: *Amia* Linnaeus, 1766.

5 infraclass: **TELEOSTEI** (echte beenvissen / Höhere Knochenfische / Echte Knochenfische / Neu-Knochenfische / modern bonyfishes / teleosts) *sensu* Wiley & Johnson, 2010 {>250 Ma Induan / Lower Triassic; age 310–323 Ma}

5a cohort: **ELOPOMORPHA** (TARPONACHTIGEN / TARPUNÄHNLICHE / TARPONLIKE FISHES) *sensu* Chen *et al.*, 2013 {>151 Ma Kimmeridgian; age 283 Ma}

Anguilliformes (BUIKVINLOZEN / AALACHTIGEN / PALINGACHTIGEN / AALARTIGE / EELS / ANGUILLIFORM FISHES) *sensu* Chen *et al.*, 2013 {>112 Ma Albian; age 116 Ma} [suborders tentative]

MURAENOIDEI (MOERAALVERWANTEN / MURÄNVERWANDTE / MURAENOID FISHES) *sensu* Chen *et al.*, 2013 {age 76 Ma}

Muraenidae Rafinesque, 1815 (murenen / moeralen / Muränen / morays / moray eels) {>56 Ma Ypresian; age 60 Ma} [this family includes a not listed marine subfamily]

Muraeninae {age 56 Ma} [this subfamily includes not listed marine genera]: *Gymnothorax* Bloch, 1795; *Strophidon* McClelland, 1844.

ANGUILLOIDEI (AALVERWANTEN / AALVERWANDTE / ANGUILLOID FISHES) *sensu* Chen *et al.*, 2013 {>56 Ma Ypresian; age 81 Ma}

Moringuidae Gill, 1885 (spaghetti-alen / wormpalingen / Spaghetti-aale / Wurmaale / spaghetti eels) [this family includes a not listed marine genus]: *Moringua* Gray, 1831.

Anguillidae Rafinesque-Schmaltz, 1810 (alen / palingen / Echte Aale / Flussaale / freshwater eels) {>48 Ma Lutetian / Eocene; age 17 Ma}: *Anguilla* Garsault, 1764.

CONGROIDEI (ZEEPALINGVERWANTEN / MEERAALVERWANDTE / CONGROID EELS) *sensu* Chen *et al.*, 2013 {age 86 Ma}

Ophichthidae Günther, 1870 (wormalen / slangalen / Schlangenaale / snake & worm eels / shrimp eels / sand eels) {>71 Ma Maastrichtian; age 57 Ma} [this family includes a not listed marine subfamily]

Ophichthinae (staartvinloze slangalen / Schlangenaale ohne Schwanzflosse / snake eels) [this subfamily includes not listed marine genera]: *Dalophis* Rafinesque-Schmaltz, 1810; *Lamnostoma* Kaup, 1856; *Ophichthus* Thunberg, 1789; *Pisodonophis* Kaup, 1856; *Stictorhinus* Böhlke & McCosker, 1975; *Yirrkala* Whitley, 1940.

5b cohort: **OSTEOGLOSSOMORPHA** (BEENTONGACHTIGEN / KNOCHENZÜNGLERÄHNLICHE / BONYTONGUE-LIKE FISHES) *sensu* Wiley & Johnson, 2010 {>151 Ma Kimmeridgian; age 274 Ma}

Hiodontiformes (MAANOOGACHTIGEN / MONDAUGENARTIGE / HIODONTIFORM FISHES) *sensu* Hilton, 2003 {>130 Ma Barremian; age 225 Ma}

Hiodontidae Valenciennes, 1847 (maanogen / tandharingen / Mondaugen / Zahnheringe / mooneyes) {>56 Ma Eocene}: *Hiodon* Lesueur, 1818.

Osteoglossiformes (BEENTONGACHTIGEN / KNOCHENZÜNGLERARTIGE / OSTEOGLOSSIFORM FISHES / BONYTONGUES) *sensu* Wilson & Murray, 2008 {>146 Ma Early Cretaceous; age 225 Ma}

OSTEOGLOSSOIDEI (BEENTONGVERWANTEN / KNOCHENZÜNGLERVERWANDTE / OSTEOGLOSSOID FISHES) {>100 Ma Cenomanian or ? Early Cretaceous; age 200 Ma}

Pantodontoidea (African butterfly fishes)

Pantodontidae Peters, 1876 (vlindervissen / Schmetterlingsfische / freshwater butterfly fishes) {>100 Ma Cenomanian; age 182 Ma}: *Pantodon* Peters, 1876.

Osteoglossoidea (beentongvissen) {age 182 Ma}

Osteoglossidae Bonaparte, 1845 (beentongen / Knochenzüngler / bonytongues / arowanas / osteoglossids) {>112 Ma Albian; age 180 Ma}: *Osteoglossum* Cuvier, 1829; *Scleropagus* Günther, 1864.

Arapaimidae Bonaparte, 1846 (arapaimas / Arapaimas / heterotidids / arapaimids) {>125 Ma Aptian; age 180 Ma}: *Arapaima* Müller, 1843; *Heterotis* Ruppell, 1828.

Mormyroidea (nijlsnoekachtigen / radarvissen / Nilhechtähnliche / mormyroids) {age 160 Ma}

Gymnarchidae Bleeker, 1859 (nijlsnoeken / Großnilhechte / Nilaale / aba's / gymnarchids) {>5 Ma late Miocene; age 150 Ma}: *Gymnarchus* Cuvier, 1829.

Mormyridae Bonaparte, 1831 (olifantsvissen / Nilhechte / elephantfishes / mormyrids / snout fishes) {>5 Ma late Miocene; age 150 Ma}

Petrocephalinae Gill, 1862 (walvis-olifantsvissen / Boxernilhechte / whale elephantfishes / petrocephalines): *Petrocephalus* Marcusen, 1854.

Mormyrinae (tapirvissen / Nasennilhechte / mormyrines): *Boulengeromyrus* Taverne & Géry, 1968; *Brevimyrus* Taverne, 1971; *Brienomyrus* Taverne, 1971; *Campylomormyrus* Bleeker, 1874; *Cyphomyrus* Myers, 1960; *Genyomyrus* Boulenger, 1898; *Gnathonemus* Gill, 1863; *Heteromormyrus* Steindachner 1866; *Hippopotamyrus* Pappenheim, 1906; *Hyperopisus* Gill, 1862; *Isichthys* Gill, 1863; *Ivindomyrus* Taverne & Géry, 1975; *Marcusenius* Gill, 1862; *Mormyrops* Müller, 1843; *Mormyrus* Linnaeus, 1758; *Myomyrus* Boulenger, 1898; *Paramormyrops* Taverne, Thys van den Audenaerde & Heymer 1977; *Pollimyrus* Taverne, 1971; *Stomatorhinus* Boulenger, 1898.

Notopteroidea (mesvissen van de oude wereld / Alte Welt Messerfische / Old World knifefishes) {age 160 Ma}

Notopteridae Bleeker, 1851 (mesvissen van de oude wereld / Eigentliche Messerfische / Alte Welt Messerfische / featherfin knifefishes / featherbacks / Old World knifefishes) {>100 Ma Cenomanian / Middle Cretaceous; age 160 Ma}

Notopterinae (Aziatische mesvissen / chitala's / Asiatische Messerfische / asiatic featherbacks) {>73 Ma Upper Cretaceous; age 133 Ma}: *Chitala* Fowler, 1934; *Notopterus* La Cepède, 1800.

Xenomystinae Greenwood, 1963 (Afrikaanse mesvissen / Afrikanische Messerfische / african featherbacks) {age 133 Ma}: *Papyrocranus* Greenwood, 1963; *Xenomystus* Günther, 1868.

5c cohort: **OTOMORPHA** sensu Wiley & Johnson, 2010 {>151 Ma Tithonian; age 251–265 Ma}

subcohort: **CLUPEI** sensu Wiley & Johnson, 2010 {>151 Ma Tithonian; age 265 Ma}

Clupeiformes (HARINGACHTIGEN / HERINGSARTIGE / HERINGSFISCHE / CLUPEIFORM FISHES / HERRINGLIKE FISHES) sensu Lavoué et al., 2007 {>125 Ma Barremian / Early Cretaceous; age 226 Ma}

DENTICIPITOIDEI (KOPTANDIGEN / STACHELHERINGSVERWANDTE / DENTICIPITOID FISHES) sensu Greenwood, 1960 {age 225 Ma}

Denticipitidae Clausen, 1959 (koptandharingen / stekelharingen / Stachelheringe / Süßwasserheringe / denticle herrings) {>38 Ma Oligocene; age 140 Ma}: *Denticeps* Clausen, 1959.

CLUPEOIDEI (HARINGVERWANTEN / HERINGSVERWANDTE / CLUPEOID FISHES) sensu Grande, 1985 {>100 Ma Cenomanian; age 150 Ma}

Clupeoidea (clupeides) {>112 Ma Albian-Aptian; age 110 Ma}

Pristigasteridae Bleeker, 1872 (zaagbuikharingen / Sägebauchheringe / longfin herrings / pristigasterids) {>71 Ma late Cretaceous} [this family includes not listed marine genera]: *Odontognathus* La Cepède, 1800; *Pristigaster* Cuvier, 1816; *Raonda* Gray, 1831.

Pellonidae Gill, 1861 (pellona's / pellonas) [this family includes not listed marine genera]: *Euplatygaster* Fowler, 1934; *Ilisha* Richardson, 1846; *Neosteus* Norman, 1923; *Pellona* Valenciennes, 1847.

Clupeidae Cuvier, 1816 (haringen / Heringe / herrings & shads) [this family includes a not listed marine subfamily; some subfamilies tentative]

Clupeinae {>74 Ma Campanian / Maastrichtian; age 95 Ma} [this subfamily includes not listed marine genera]

Clupeini (echte haringen / Eigentliche Heringe / herrings) {age 70 Ma} [this tribe includes not listed marine genera]: *Herklotischthys* Whitley, 1951.

Hyperlophini Ogilby, 1897 (zandsprotten / Sandsprotten / double-armoured freshwater herrings) {age 50 Ma}: *Hyperlophus* Ogilby, 1892; *Potamalosa* Ogilby, 1897.

Dorosomatinae Gill, 1861 (zoetwaterharingen / Süßwasserheringe / freshwater herrings) {>62 Ma Middle Paleocene; age 95 Ma} [this subfamily includes not listed marine genera]

Ehiravini Deraniyagala, 1929 (Indische zoetwaterharingen / Indische Sandsprotten / Indian freshwater herrings) {age 95 Ma}: *Clupeichthys* Bleeker, 1855; *Clupeoides* Bleeker, 1851; *Clupeonella* Kessler, 1877; *Corica* Hamilton, 1822; *Dayella* Talwar & Whitehead, 1971; *Ehirava* Deraniyagala, 1929; *Gilchristella* Fowler, 1935; *Minyclupeoides* Roberts, 2008; *Sauvagella* Bertin, 1940; *Spatelломорфа* Bertin, 1946; *Sundasalanx* Roberts, 1981.

Alosini Svetovidov, 1952 (elften / Finten / shads) {age 25 Ma}: *Alosa* Garsault, 1764.

Congothriissini Poll, 1964: *Congothrissa* Poll, 1964.

Pellonulini Svetovidov, 1952 (Afrikaanse zoetwaterharingen / Afrikanische Süßwasserheringe / African freshwater herrings) {age 55 Ma}: *Cynothrissa* Regan, 1917; *Ethmalosa* Regan, 1917; *Laeviscutella* Poll, Whitehead & Hopson, 1965; *Limnothrissa* Regan, 1917; *Microthrissa* Boulenger, 1902; *Nannothrissa* Poll, 1965; *Odaxothrissa* Boulenger, 1899; *Pellonula* Günther, 1868; *Potamothrissa* Regan, 1917; *Sierrathrissa* Thys van den Audenaerde, 1969; *Stolothrissa* Regan, 1917; *Thratidion* Roberts, 1972.

Anodontostomatini Herre, 1933 {age 50 Ma}: *Anodontostoma* Bleeker, 1849; *Clupanodon* La Cepède, 1803; *Gonialosa* Regan, 1917; *Gudusia* Fowler, 1911; *Konosirus* Jordan & Snyder, 1900; *Nematalosa* Regan, 1917; *Tenualosa* Fowler, 1934.

"South American dorosomatins" {age 30 Ma}: *Platanichthys* Whitehead, 1968; *Ramnogaster* Whitehead, 1965; *Rhinosardinia* Eigenmann, 1912.

Dorosomatini Gill, 1861 (spiermaagharingen / gizzard shads) {age 30 Ma}: *Dorosoma* Rafinesque, 1820; *Sardinella* Valenciennes, 1847.

Engraulioidea (engraulides) {>50 Ma Ypresian; age 110 Ma}

Engraulidae Gill, 1861 (ansjovissen / Sardellen / anchovies / engraulids) {>50 Ma Ypresian; age 70 Ma}

Engraulinae (Nieuwe Wereld ansjovissen / engraulines) {>23 Ma Miocene / Burdigalian; age 60 Ma} [this subfamily includes not listed marine genera]: *Amazonsprattus* Roberts, 1984; *Anchoa* Jordan & Evermann, 1927; *Anchovia* Jordan & Evermann, 1895; *Anchoviella* Fowler, 1911; *Cetengraulis*

Günther, 1868; *Jurengraulis* Whitehead, 1988; *Lycengraulis* Günther, 1868; *Pterengraulis* Günther, 1868; *Stolephorus* La Cepède, 1803.

Coiliinae Bleeker, 1872 (Oude Wereld ansjovissen / old world engraulines) {age 60 Ma} [this subfamily includes a not listed marine genus]: *Coilia* Gray, 1830; *Lycothrissa* Günther, 1868; *Setipinna* Swainson, 1839; *Thrissina* Jordan & Seale, 1925.

subcohort: **OSTARIOPHYSI** sensu Wiley & Johnson, 2010 {>151 Ma Tithonian; age 207 Ma}

section: **ANOTOPHYSA** {>126 Ma Barremian; age 205 Ma}

Gonorynchiformes (ZANDVISACHTIGEN / SANDFISCHARTIGE / GONORYNCHIFORM FISHES / MILKFISHES) sensu Grande & Poyato-Ariza, 1999 {>126 Ma Aptian / Early Cretaceous; age 220 Ma}

GONORYNCHOIDEI (MELKVISVERWANTEN / RÜSSELSALMVERWANDTE / MILCHFISCHVERWANDTE / GONORYNCHOID FISHES) sensu Grande & Poyato-Ariza, 1999 {>71 Ma Maastrichtian; age 183 Ma}

Kneriidae Günther, 1868 (oor- en moddervissen / Schlankfische / kneriids / African freshwater gonorynchiforms) {>46 Ma Lutetian / Middle Eocene; age 122 Ma}

Phractolaeminae Boulenger, 1901 (moddervissen / Afrikanische Schlammfische / snake mudheads / phractolaemines) {age 121 Ma}: *Phractolaemus* Boulenger, 1901.

Kneriinae (oorvissen / Ohrenfische / shellears / earfishes) {>46 Ma Lutetian; age 37 Ma}

Kneriini {>46 Ma Lutetian; age 24 Ma}: *Kneria* Steindachner, 1866.

Cromeriini Boulenger, 1904 (larfvissen / Larvenfische / cromeriins / miniaturized earfishes) {age 24 Ma}: *Cromeria* Boulenger, 1901; *Grasseichthys* Géry, 1964; *Parakneria* Poll, 1965.

section: **OTOPHYSA** (VISSEN MET HET ORGAAN VAN WEBER / FISCHE MIT WEBERSCHEN APPARAT / EAR-BLADDER FISHES / WEBERIAN APPARATUS FISHES) {>126 Ma Barremian; age 153–214 Ma}

superorder: **CYPRINIPHYSAE**

Cypriniformes (KARPERACHTIGEN / KARPENFISCHARTIGE / CARPS / CYPRINIFORM FISHES) {>62 Ma Ypresian / Early Paleocene; age 118–159 Ma}

CYPRINOIDEI (KARPERVERWANTEN / KARPENFISCHVERWANDTE / CYPRINOID FISHES) {>66 Ma Danian; age 156 Ma}

Cyprinoidea

Psilorhynchidae Hora, 1926 (bergkarpers / Himalaya algeneters / spoelgrondels / Zitterschmerlen / Himalaja Bärblinge / Gonzo-Bärblinge / mountain carps / torrent fishes / stone carps) {age 46 Ma}: *Psilorhynchus* McClelland, 1838.

Cyprinidae Rafinesque, 1815 (karperfamilie / Karpfenfische / Weißfische / minnows & carps / cyprinids) {>56 Ma Ypresian / Early Eocene; [subfamilies and tribes tentative]}

Probarbinae Yang et al., 2015 (primitive cyprinids): *Catlocarpio* Boulenger, 1898; *Probarbus* Sauvage, 1880.

Labeoninae Bleeker, 1859 (lipkarpers / Lippenbarben / labeonines) {>14 Ma Middle Miocene; age 82 Ma} [tribes tentative]:

Parapsilorhynchini Babu Rao & Yazdani, 1978: *Diplocheilichthys* Bleeker, 1859; *Longanalus* Li, 2006; *Neorohita* Fowler, 1937; *Parapsilorhynchus* Hora, 1921; *Protolabeo* Zhang, Zhao & An, 2010; *Sinilabeo* Rendahl, 1932.

Labeonini (lipkarpers / Lippenbarben / labeonins): *Bangana* Hamilton, 1822; *Cirrhinus* Oken, 1817; *Gymnostomus* Heckel, 1843; *Incilabeo* Fowler, 1937; *Labeo* Cuvier, 1816;

Schismatorhynchos Bleeker, 1855.

Garrini Bleeker, 1863 (raspelbarbelen / zuiglipkarpers / Saugbarben / suckerbarbs): *Garra* Hamilton, 1822; *Gonorhynchus* McClelland, 1839; *Paracrossochilus* Popta, 1904.

“Osteochilus clade”: *Barbichthys* Bleeker, 1860; *Crossocheilus* Kuhl & van Hasselt, 1823; *Epalzeorhynchos* Bleeker, 1855; *Henicorhynchus* Smith, 1945; *Labiobarbus* van Hasselt, 1823; *Lobocheilos* Bleeker, 1853; *Osteochilus* Günther, 1868; *Thynnichthys* Bleeker, 1860.

“Semilabeo clade” (Chinese lipkarpers / Chinesische Saugbarben / Chinese suckerbarbs): *Ageneiogarra* Garman, 1912; *Cophecheilus* Zhu, Zhang, Zhang & Han, 2011; *Discogobio* Lin, 1931; *Hongshuia* Zhang, Qiang & Lan, 2008; *Linichthys* Zhang & Fang, 2005; *Mekongina* Fowler, 1937; *Parqianlabeo* Zhao et al., 2014; *Parasinilabeo* Wu, 1939; *Placocheilus* Wu, 1977; *Pseudocrossocheilus* Zhang & Chen, 1997; *Pseudogyrinocheilus* Fang, 1933; *Ptychidio* Myers, 1930; *Qianlabeo* Zhang & Chen, 2004; *Rectoris* Lin, 1935; *Semilabeo* Peters, 1881; *Sinigarra* Zhang & Zhou, 2012; *Sinocrossocheilus* Wu, 1977; *Stenorynchoacrum* Huang, Yang & Chen, 2014; *Vinagarra* Nguyen & Bui, 2009.

Torinae Karaman, 1971: *Arabibarbus* Borkenhagen, 2014; *Barbopsis* Di Capriacco, 1926; *Carasobarbus* Karaman, 1971; *Hypselobarbus* Bleeker, 1860; *Labeobarbus* Rüppell, 1835; *Lepidopygopsis* Raj, 1941; *Mesopotamichthys* Karaman, 1971; *Naziritor* Mirza & Javed, 1985; *Neolissochilus* Rainboth, 1985; *Osteochilichthys* Hora, 1942; *Pterocapoeta* Günther, 1902; *Sanagia* Holly, 1926; *Tor* Gray, 1834; *Varicorhinus* Rüppell, 1835.

Smiliogastrinae Bleeker, 1863 (barbeeltjes / barbs / systemins) {age 58 Ma}: *Barbodes* Bleeker, 1859; *Barboides* Brüning, 1929; *Caecobarbus* Boulenger, 1921; *Chagunius* Smith, 1938; *Clypeobarbus* Fowler, 1936; *Coptostomabarbus* David & Poll, 1937; *Dawkinsia* Pethiyagoda, Meegaskumbura & Maduwage, 2012; *Desmopuntius* Kottelat, 2013; *Eechathalakenda* Menon, 1999; *Enteromius* Cope 1867; *Haludaria* Pethiyagoda, 2013; *Hampala* Kuhl & van Hasselt, 1823; *Oliotius* Kottelat, 2013; *Oreichthys* Smith, 1933; *Osteobrama* Heckel, 1843; *Pethia* Pethiyagoda, Meegaskumbura & Maduwage, 2012; *Prolabeo* Norman, 1932; *Prolabeops* Schultz, 1941; *Pseudobarbus* Smith, 1841; *Puntigrus* Kottelat, 2013; *Puntius* Hamilton, 1822; *Rothee* Sykes, 1839; *Sahyadria* Raghaven et al., 2013; *Striuntius* Kottelat, 2013; *Systomus* McClelland, 1838; *Xenobarbus* Norman, 1923.

Cyprininae (karpers en barbelen / Barbenähnliche / Kärfplinge / barbines / cyprinines) {>55 Ma Eocene; age 82 Ma}

Rohteichthyini Günther, 1868 (Aziatische barbelen / Asiatische Barben / asiatic barbs) {age 68 Ma}: *Albulichthys* Bleeker, 1859; *Amblyrhynchichthys* Bleeker, 1859; *Anematicichthys* Bleeker, 1859; *Balantiocheilos* Bleeker, 1859; *Barbodes* Bleeker, 1859; *Barbonymus* Kottelat, 1999; *Cosmochilus* Sauvage, 1878; *Cyclocheilichthys* Bleeker, 1859; *Cyclocheilos* Bleeker, 1859; *Discherodontus* Rainboth, 1989; *Eirmotus* Schultz, 1959; *Hypsibarbus* Rainboth, 1996; *Kalimantania* Bănărescu, 1980; *Laocypris* Kottelat, 2000; *Mystacoleucus* Günther, 1868; *Parasikukia* Doi, 2000; *Poropuntius* Smith, 1931; *Puntioplites* Smith, 1929; *Rohteichthys* Bleeker, 1860; *Sawbwa* Annandale, 1918; *Scaphognathops* Smith, 1945; *Sikukia* Smith, 1931; *Troglocyclocheilus* Kottelat & Bréhier, 1999.

Cyprinini (karpers / cyprins) {>23 Ma Miocene; age 68 Ma}: *Aaptosyax* Rainboth, 1991; *Carassioides* Oshima, 1926; *Carassius* Jarocki, 1822; *Cyprinus* Linnaeus, 1758; *Luciocyprinus* Vailant, 1904; *Paraspinibarbus* Chu & Kottelat, 1989; *Parator* Wu, Yang, Yue & Huang, 1964; *Procypris* Lin, 1933; *Sinibarbus* Sauvage, 1874; *Sinocyclocheilus* Fang, 1936; *Typhlobarbus* Chu & Chen, 1982.

Acrossocheilini Yang et al., 2015: *Acrossocheilus* Oshima, 1919; *Folifer* Wu, 1977; *Onychostoma* Günther, 1896.

Spinibarbini Yang et al., 2015: *Spinibarbichthys* Oshima, 1926; *Spinibarbus* Oshima, 1919.

Schizothoracini McClelland, 1842 (schneeuwbarbelen / Schneebarben / snow barbels / snow carps / snow trouts / primitive schizothoracins / oreinins / coldwater barbs) {>23 Ma Miocene; age 11 Ma}: *Aspiorhynchus* Kessler, 1879; *Percocypris* Chu, 1935; *Schizopyge* Heckel, 1848; *Schizothorax* Heckel, 1838.

Barbini Bleeker, 1859 (barbelen / Barben / barbels / barbins) {>23 Ma Miocene; age 60 Ma}: *Aulopyge* Heckel, 1841; *Barbus* Cuvier & Cloquet, 1816; *Caecocypris* Banister & Bunni, 1980; *Capoeta* Valenciennes, 1842; *Cyprinion* Heckel, 1843; *Kantaka* Hora, 1942; *Luciobarbus* Heckel, 1843; *Scaphiodonichthys* Vinciguerra, 1890; *Schizocypris* Regan, 1914; *Semiplotus* Bleeker, 1860.

Schizopygopsini Mirza, 1991 (spleetbarbelen / Schlitzkarpfen / mountain barbels / specialized schizothoracins): *Chuanchia* Herzenstein, 1891; *Diptychus* Steindachner, 1866; *Gymnocypris* Günther, 1868; *Gymnodiptychus* Herzenstein, 1892; *Oreinus* McClelland, 1838; *Oxygymnocypris*

Tsao, 1964; *Platypharodon* Herzenstein, 1891; *Ptychobarbus* Steindachner, 1866; *Schizopygopsis* Steindachner, 1866.

Leuciscidae Bonaparte, 1835 (voorns / Eigentliche Weißfische / leuciscids) {>34 Ma Rupelian; age 83-90 Ma}

Danioninae Bleeker, 1863 (danio's / Bärblinge / danionines / rasborine fishes) {>55 Ma Eocene; age 30-50 Ma}

Chedrini Bleeker, 1863 (Afro-aziatische forelbarbelen / Forellebärblinge / troutbarbs / bariliines): *Barilius* Hamilton, 1822; *Bengala* Gray, 1834; *Cabdio* Hamilton, 1822; *Chelaethiops* Boulenger, 1899; *Engraulicypris* Günther, 1894; *Esomus* Swainson, 1839; *Leptocypris* Boulenger, 1900; *Luciosoma* Bleeker, 1855; *Malayochela* Bănărescu, 1968; *Mesobola* Howes, 1984; *Nematabramis* Boulenger, 1894; *Neobola* Vinciguerra, 1895; *Opsaridium* Peters, 1854; *Opsarius* McClelland, 1839; *Raiamas* Jordan, 1919; *Rastrineobola* Fowler, 1936; *Salmostoma* Swainson, 1839; *Securicula* Günther, 1868; *Thryssocypris* Roberts & Kottelat, 1984.

Danionini (dolio's / Danios / chelins / danionins) {age 32 Ma}: *Betadevario* Pramod et al., 2010; *Brachydanio* Weber & de Beaufort, 1916; *Celestichthys* Roberts, 2007; *Chela* Hamilton, 1822; *Danio* Hamilton, 1822; *Danionella* Roberts, 1986; *Devario* Heckel, 1843; *Inlecypris* Howes, 1980; *Laubuka* Bleeker, 1859; *Microdevario* Fang et al., 2009; *Microrasbora* Annandale, 1918; *Paedocypris* Kottelat, Britz, Tan & Witte, 2005.

Sundadanionini Mayden & Chen, 2010: *Fangfangia* Britz, Kottelat & Tan, 2012; *Sundadanio* Kottelat & Witte, 1999.

Rasborini Günther, 1868 (rasbora's / Rasboras / rasborins): *Amblypharyngodon* Bleeker, 1860; *Boraras* Kottelat & Vidhayanon, 1993; *Brevibora* Liao, Kullander & Fang, 2010; *Horadandia* Deraniyagala, 1943; *Kottelatia* Liao, Kullander & Fang, 2010; *Pectenocypris* Kottelat, 1982; *Rasbora* Bleeker, 1859; *Rasboroides* Brittan, 1954; *Rasbosoma* Liao, Kullander & Fang, 2010; *Trigonopoma* Liao, Kullander & Fang, 2010; *Trigonostigma* Kottelat & Witte, 1999.

Leptobarbinae Bleeker, 1864: *Leptobarbus* Bleeker, 1859.

Xenocypridinae Günther, 1868 (Chinese voorns / Oostaziatische voorns / zwartbuksnepen / Schwarzbauchnasen / xenocypridines / xenocyprinines / East Asian cyprinins / cultrines) {>38 Ma Oligocene; age 102 Ma} [tribes uncertain]

Opsariichthyini Rendahl, 1928 (Oostaziatische danio's) {age 79 Ma}: *Candidia* Jordan & Richardson, 1909; *Nipponocypris* Chen, Wu & Hsu, 2008; *Opsariichthys* Bleeker, 1863; *Parazacco* Chen, 1982; *Xenocyprionides* Chen 1982.

Oxygastrini Fowler, 1951 (Aziatische kielvoorns) {age 79 Ma}: *Aphyocypris* Günther, 1868; *Araiocyparis* Conway & Kottelat, 2008; *Gymnodanio* Chen & He, 1992; *Hemigrammocypris* Fowler, 1910; *Macrochirichthys* Bleeker, 1860; *Metzia* Jordan & Thompson, 1914; *Oxygaster* van Hasselt, 1823; *Parachela* Steindachner, 1881; *Paralaubuca* Bleeker, 1864; *Rasborichthys* Bleeker, 1859.

Hypophthalmichthyini Günther, 1868 (Chinese graskarpers / Chinese snoekvoorns / bighead carps / elopichthyins / Chinese grass carps / ctenopharyngodon) {>14 Ma middle Miocene; age 8 Ma }: *Atrilinea* Chu, 1935; *Ctenopharyngodon* Steindachner, 1866; *Elopichthys* Bleeker, 1860; *Hypophthalmichthys* Bleeker, 1860; *Luciobrama* Bleeker, 1870; *Mylopharyngodon* Peters, 1881; *Ochetobius* Günther, 1868.

Squaliobarbini Rainboth, 1991 (squaliobarbins) {>14 Ma middle Miocene}: *Squaliobarbus* Günther, 1868.

Xenocypridini (Chinese kielvoorns / Kielweißfische / true xenocyprins / xenocyprinins) {age 9 Ma}: *Distoechodon* Peters, 1881; *Plagiognathops* Berg 1907; *Pseudobrama* Bleeker, 1870; *Xenocypris* Günther, 1868.

Culrina Kryzanowsky, 1947 (Chinese brasems / kielvoorns / Kielkarpfenfische / Chinesische Brachsen / cultrins) {>23 Ma Early Miocene}: *Anabarilius* Cockerell, 1923; *Ancherythroculter* Yih & Wu, 1964; *Chanodichthys* Bleeker, 1860; *Culter* Basilewsky, 1855; *Ischikauia* Jordan & Snyder, 1900; *Longiculter* Fowler, 1937; *Megalobrama* Dybowski, 1872; *Parabramis* Bleeker, 1864; *Pogobrama* Luo, 1995; *Sinibrama* Wu, 1939.

"Hemiculter clade" [sensu Dai & Yang, 2003] (slanke Chinese kielvoorns / Langgestreckte Kielweißfische / hemicultrins / elongate cultrins): *Hainania* Koller, 1927; *Hemiculter* Bleeker, 1860; *Hemiculterella* Warpachowski, 1887; *Pseudohemiculter* Nichols & Pope, 1927; *Pseudolaubuca* Bleeker, 1864; *Toxabramis* Günther, 1873.

Tanichthyini Mayden & Chen, 2010 (Chinese danio's / Kardinalfische / mountain minnows):
Tanichthys Lin, 1932.

Acheilognathinae Bleeker, 1863 (bittervoorns / Bitterlinge / bitterlings) {>23 Ma Early Miocene; age 20 Ma}: *Acheilognathus* Bleeker, 1859; *Paratanakia* Chang, Chen & Mayden, 2014; *Pseudorhodeus* Chang, Chen & Mayden, 2014; *Rhodeus* Agassiz, 1832; *Tanakia* Jordan & Thompson, 1914.

Tincinae Jordan, 1878 (zeelten / Schleien / tenches) {>30 Ma Early Oligocene / Rupelian; age 83 Ma}: *Tinca* Garsault, 1764.

Gobioninae Bleeker, 1863 (karpergrondels / Gründlinge / gobionines) {>50 Ma Eocene; age 64 Ma} [tribes uncertain]

“Hemibarbus-Squalidus clade” [sensu Tang et al. 2011] (hemibarbines) {age 58 Ma}: *Belligobio* Jordan & Hubbs, 1925; *Hemibarbus* Bleeker, 1860; *Squalidus* Dybowski, 1872.

Sarcocheilichthyini Kryzankowsky, 1947 {>32 Ma Early Oligocene; age 57 Ma}: *Coreius* Jordan & Starks, 1905; *Coreoleuciscus* Mori, 1935; *Gnathopogon* Bleeker, 1860; *Gobiocypris* Ye & Fu, 1983; *Ladislavia* Dybowski, 1869; *Paracanthobrama* Bleeker, 1865; *Paraleucogobio* Berg, 1907; *Pseudopungtungia* Mori, 1935; *Pseudorasbora* Bleeker, 1860; *Pungtungia* Herzenstein, 1892; *Rhinogobio* Bleeker, 1870; *Sarcocheilichthys* Bleeker, 1860.

Gobionini (riviergrondels / geuvels / Flußgründlinge / Schmerlengründlinge / bottom-dwelling gobionins / gobionins) {age 54 Ma}

Gobiobotiina Mori, 1933: *Gobiobotia* Kreyenberg, 1911; *Xenophysogobio* Chen & Cao, 1977.

Gobionina: *Gobio* Cuvier, 1816; *Mesogobio* Bănărescu & Nalbant, 1973; *Romanogobio* Bănărescu, 1961.

Armatogobionina Kryzankowsky, 1947 (Oost-aziatische riviergrondels / Ostasiatische Schmerlengründlinge / East-asian gobionins / pseudogobiins / pseudogobionids): *Abbottina* Jordan & Fowler, 1903; *Biwia* Jordan & Fowler, 1903; *Huigobio* Fang, 1938; *Microphysogobio* Mori, 1934; *Platysmacheilus* Lo, Yao & Chen, 1977; *Pseudogobio* Bleeker, 1860; *Saurogobio* Bleeker, 1870.

Leuciscinae (voorns / witvissen / Eigentliche Weißfische / leuciscines) {>34 Ma Rupelian; age 83 Ma} [tribes uncertain]

Phoxinini Bleeker, 1863 (elritsen / Elritzen / chubs & minnows / phoxinines) {>23 Ma Miocene; age 63 Ma}: *Oreoleuciscus* Warpachowski, 1889; *Phoxinus* Rafinesque, 1820; *Pseudaspis* Dybowski, 1869.

Leuciscini (witvissen / Weißfische / daces) {>30 Ma Rupelian; age 65 Ma}

“Pachychilon clade” {age 33 Ma}: *Pachychilon* Steindachner, 1882.

“primitive leuciscins clade” {> 19 Ma Early Miocene; age 29-37 Ma}: *Delminichthys* Freyhof et al., 2006; *Leucalburnus* Berg, 1916; *Notemigonus* Rafinesque, 1819; *Pelasgus* Kottelat & Freyhof, 2007.

Leuciscina (snoekwitvissen / Hechtweißfische / eurasian daces) {> 19 Ma Early Miocene; age 28 Ma}: *Aspiolucius* Berg, 1907; *Leuciscus* Cuvier, 1816; *Pelecus* Agassiz, 1835.

“Alburnoides clade” {age 27 Ma}: *Alburnoides* Jeitteles, 1861.

Abramina Dybowski, 1862 (brasems / Brachsen / breams) {age 26 Ma}: *Abramis* Cuvier, 1816; *Acanthobrama* Heckel, 1843; *Capoetobrama* Berg, 1916; *Mirorex* Goren, Fishelson & Trewavas, 1973; *Vimba* Fitzinger, 1873.

Chondrostomina Agassiz, 1855 (kraakbeenlipkarpers / alvers / chondrostomine fishes) {> 19 Ma Early Miocene; age 25 Ma}: *Achondrostoma* Robalo et al., 2006; *Alburnus* Rafinesque, 1820; *Anaecypris* Collares-Pereira, 1983; *Chondrostoma* Agassiz, 1832; *Iberochondrostoma* Robalo et al., 2006; *Leucaspis* Heckel & Kner, 1858; *Leucos* Heckel, 1843; *Parachondrostoma* Robalo et al., 2006; *Petroleuciscus* Bogutskaya, 2002; *Phoxinellus* Heckel, 1843; *Protochondrostoma* Robalo et al., 2006; *Pseudochondrostoma* Robalo et al., 2006; *Pseudophoxinus* Bleeker, 1860; *Rutilus* Rafinesque, 1820; *Sarmarutilus* Bianco & Ketmaier, 2014; *Scardinus* Bonaparte, 1837; *Squalius* Bonaparte, 1837; *Telestes* Bonaparte, 1837; *Tropidophoxinellus* Stephanidis, 1974.

Laviniini Bleeker, 1863 (western chubs) {age 52 Ma}

Chrosomina Jordan, 1878: *Chrosomus* Rafinesque, 1820.

Laviniina {> 12 Ma Middle Miocene}: *Eremichthys* Hubbs & Miller, 1948; *Gila* Baird & Girard, 1853; *Hesperoleucus* Snyder, 1913; *Klamathella* Miller, 1945; *Lavinia* Girard, 1854; *Mylopharodon* Ayres, 1855; *Orthodon* Girard, 1856; *Ptychocheilus* Agassiz, 1855; *Relictus* Hubbs

& Miller, 1972; *Siphateles* Cope, 1883.

Plagopterini Cope, 1874 (creek chubs / CC-Plagopterin clade) {age 52 Ma}: *Couesius* Jordan, 1878; *Hemitremia* Cope, 1870; *Lepidomeda* Cope, 1874; *Margariscus* Cockerell, 1909; *Meda* Girard, 1856; *Plagopterus* Cope, 1874; *Rhynchocypris* Günther, 1889; *Semotilus* Rafinesque, 1820; *Stypondon* Garman, 1881.

Pogonichthyini Girard, 1858 (North American minnows & shiners / OPM clade)

Pogonichthyina (*Mylocheilus* clade) {> 7 Ma late Miocene; age 44 Ma}: *Clinostomus* Girard, 1856; *Iotichthys* Jordan & Evermann, 1896; *Mylocheilus* Agassiz, 1855; *Pogonichthys* Girard, 1854; *Richardsonius* Girard, 1856;

Exoglossina Jordan, 1877: *Exoglossum* Rafinesque, 1818; *Oregonichthys* Hubbs, 1929; *Pararhinichthys* Stauffer, Hocutt & Mayden, 1997; *Rhinichthys* Agassiz, 1849; *Tiaroga* Girard, 1856.

Campostomina Jordan, 1877: *Campostoma* Agassiz, 1855; *Nocomis* Girard, 1856.

Hybognathina Jordan, 1878 (shiners / *Platygobio*-shiner clade) {age 44 Ma} [Graodontinae Jordan 1877 forgotten name]: *Agosia* Girard, 1856; *Alburnops* Girard, 1856; *Algansea* Girard, 1856; *Codoma* Girard, 1856; *Cyprinella* Girard, 1856; *Dionda* Girard, 1856; *Erimonax* Jordan, 1924; *Erimystax* Jordan, 1882; *Evarra* Woolman, 1894; *Graodus* Günther, 1868; *Hudsonius* Girard, 1856; *Hybognathus* Agassiz, 1855; *Hybopsis* Agassiz, 1854; *Luxilus* Rafinesque, 1820; *Lythrurus* Jordan, 1876; *Macrhybopsis* Cockerell & Allison, 1909; *Minielius* Jordan, 1888; *Notropis* Rafinesque, 1818; *Opsopoeodus* Hay, 1881; *Phenacobius* Cope, 1867; *Pimephales* Rafinesque, 1820; *Platygobio* Gill, 1863; *Pteronotropis* Fowler, 1935; *Stypondon* Garman, 1881; *Tampichthys* Schönhuth et al., 2008.

COBITOIDEI (MODDERKRUIPERVERWANTEN / SCHMERLENVERWANDTE / COBITOID FISHES) {>66 Ma Danian; age 156 Ma}

Catostomidae Agassiz, 1850 (karperzuigers / zuigkarpers / Sauger / Saugkarpen / suckers / catostomid fishes) {>66 Ma Danian / Early Paleocene; age 145 Ma}

Myxocyprininae Fowler, 1958 (Aziatische karperzuigers / Asiatische Sauger / Asian suckers) {age 76 Ma}: *Myxocyprinus* Gill, 1878.

Ictiobinae Bleeker, 1863 (buffelzuigers / Büffelsauger / ictiobine suckers / buffalo fishes) {>56 Ma Ypresian; age 68 Ma}: *Carpoides* Rafinesque, 1820; *Ictiobus* Rafinesque, 1820.

Cycleptinae Gill, 1861 (cycleptine suckers) {>56 Ma Ypresian; age 68 Ma}: *Cycleptus* Rafinesque, 1819.

Catostominae (kamtand-karpers / catostomine suckers) {>23 Ma Middle Miocene}

Erimyzontini Hubbs, 1930: *Erimyzon* Jordan, 1876; *Minytrema* Jordan, 1878.

Catostomini (western American suckers) {>10 Ma late Miocene; age 54 Ma}: *Catostomus* Lesueur 1817; *Chasmistes* Jordan, 1878; *Deltistes* Seale, 1896; *Xyrauchen* Eigenmann & Kirsch, 1889.

Thoburniini Hubbs, 1930: *Hypentelium* Rafinesque, 1818; *Thoburnia* Jordan & Snyder, 1917.

Moxostomatini Bleeker, 1863 (redhorse & jumprock suckers) {age 54 Ma}: *Moxostoma* Rafinesque, 1820.

Gyrinocheilidae Gill, 1905 (zuigmodderkruipers / algeneters / Saugschmerlen / Algenfresser / sucking loaches / algae eaters / gyrinocheilids) {age 152 Ma}: *Gyrinocheilus* Vaillant, 1902.

Botiidae Berg, 1940 (tropische modderkruipers / Prachtschmerlen / botiines / pointface loaches) {age 143 Ma}

Leptobotiinae Nalbant, 2002 (Oostaziatische prachtmadderkruipers / Ostasiatische Prachtschmerlen / Schlankprachtschmerlen / Chinese pointface loaches / diploid botiines) {age 121 Ma}: *Leptobotia* Bleeker, 1870; *Parabotia* Dabry de Thiersant, 1872.

Botiinae (prachtmadderkruipers / Prachtschmerlen / beautiful loaches / tetraploid botiines) {age 121 Ma}: *Ambastaia* Kottelat, 2012; *Botia* Gray, 1831; *Chromobotia* Kottelat, 2004; *Sinibotia* Fang, 1936; *Syncrossus* Blyth, 1860; *Yasuhikotakia* Nalbant, 2002.

Vaillantellidae Nalbant & Bănărescu, 1977 (langvinmodderkruipers / Langflossenschmerlen / longfin loaches) {age 143 Ma}: *Vaillantella* Fowler, 1905.

Cobitidae Swainson, 1838 (doorngrondels / Schmerlen / Steinbeißer / Dorngrundeln / spined loaches / bluntface loaches / cobitids) {>23 Ma Miocene / Middle Miocene; age 134 Ma}:

Cobitinae (Euraziatische doorngrondels / noordelijke doorngrondels / Eurasische Dorngrundeln / spined loaches / northern cobitines) {age 106 Ma}: *Bibarba* Chen & Chen, 2007; *Cobitis* Linnaeus, 1758; *Kichulchoia* Kim, Park & Nalbant, 1999; *Koreocobitis* Kim, Park & Nalbant, 1997; *Microcobitis* Bohlen & Harant, 2011; *Misgurnus* La Cepède, 1803; *Niwaella* Nalbant, 1963; *Paralepidocephalus* Tchang, 1935; *Protocobitis* Yang & Chen, 1993; *Sabanejewia* Vladykov, 1929.

“southern cobitines” (Zuidaziatische doorngrondels / Südasiatische Dorngrundeln / southern cobitines) {age 106 Ma}: *Aperioptus* Richardson, 1848; *Acantopsis* van Hasselt, 1823; *Canthophrys* Swainson, 1838; *Kottelatlimia* Nalbant, 1994; *Lepidocephalichthys* Bleeker, 1863; *Lepidocephalus* Bleeker, 1858; *Neoeucirrhichthys* Bănărescu & Nalbant, 1968; *Pangio* Blyth, 1860; *Theriodes* Kottelat, 2012.

Balitoridae Swainson, 1839 (platte grondels / balitoriden / Karpfenschmerlen / Plattschmerlen / suckerbody hillstream loaches / hillstream and river loaches / balitorids) {age 134 Ma} [subfamilies tentative]

Barbuccinae Kottelat, 2012 (scooter loaches): *Barbucca* Roberts, 1989.

Gastromyzontinae Fowler, 1905 (zuignapvissen / Flossensauger / Hillstream loaches / gastromyzontines) [tribes tentative]

Parhomalopterini Chen, 1980: *Annamia* Hora, 1932; *Liniparhomaloptera* Fang, 1935; *Parhomaloptera* Vaillant, 1902; *Plesiomyzon* Zheng & Chen, 1980; *Yaoshania* Yang et al., 2012.

Pseudogastromyzontini Silas, 1953 (vacuümglijders / suckerbelly loaches): *Beaufortia* Hora, 1932; *Erromyzon* Kottelat, 2004; *Formosania* Oshima, 1919; *Paraprotomyzon* Pellegrin & Fang, 1935; *Protomyzon* Hora, 1932; *Pseudogastromyzon* Nichols, 1925; *Sewellia* Hora, 1932; *Vanmanenia* Hora, 1932.

Gastromyzontini (zuignapvissen van Borneo / Borneo-Karpfenschmerlen / Bornean suckerbelly loaches / gastromyzontins): *Gastromyzon* Günther, 1874; *Glaniospis* Boulenger, 1899; *Hypergastromyzon* Roberts, 1989; *Katibasia* Kottelat, 2004; *Neogastromyzon* Popa, 1905.

Serpenticobitinae Kottelat, 2012 (slangenmodderkruipers / snake loaches): *Serpenticobitis* Roberts, 1997.

Balitorinae (steenkruipers / zuigvinvissen / Plattschmerlen / Flossensaugern / balitorines / flat loaches)

Homalopteroidini Randall & Page 2015: *Homalopteroides* Fowler, 1905; *Homalopterula* Fowler, 1940.

Balitorini (lizard loaches): *Balitora* Gray, 1830; *Balitoropsis* Smith, 1945; *Bhavania* Hora, 1920; *Cryptotora* Kottelat, 1998; *Ghatsa* Randall & Page, 2015; *Hemimyzon* Regan, 1911; *Homaloptera* van Hasselt, 1823; *Jinshaia* Kottelat & Chu, 1988; *Lepturichthys* Regan, 1911; *Metahomaloptera* Chang, 1944; *Neohomaloptera* Herre, 1944; *Pseudohomaloptera* Silas, 1953; *Sinogastromyzon* Fang, 1930; *Travancoria* Hora, 1941.

Ellopostomatidae Bohlen & Šlechtová, 2009 (blokhoofdmodderkruipers / Schlürfschnuten / Nippeschmerlen / square-head loaches): *Ellopostoma* Vaillant, 1902.

Nemacheilidae Regan, 1911 (modderkruipers / Bachschmerlen / brook loaches / stone loaches / nemacheilids) {>15 Ma Miocene / Middle Miocene; age 124 Ma}

Lefuiniae Prokofiev, 2010 {age 103 Ma}: *Aborichthys* Chaudhuri, 1913; *Lefua* Herzenstein, 1888; *Oreonectes* Günther, 1868.

Yunnanilinae Prokofiev, 2010: *Eonemachilus* Berg, 1938; *Heminoemacheilus* Zhu & Cao, 1987; *Micronemacheilus* Rendahl, 1944; *Paranemacheilus* Zhu, 1983; *Petriuchthys* Menon, 1987; *Protonemacheilus* Yang & Chu, 1990; *Traccatichthys* Freyhof & Serov, 2001; *Yunnanilus* Nichols, 1925.

Triplophysinae Prokofiev, 2010 (bermpjes / noordelijke baardgrondels / Nordliche Bachschmerlen /

northern stone loaches) {>15 Ma Miocene}: *Barbatula* Linck, 1790; *Hedinichthys* Rendahl, 1933; *Indotriphophysa* Prokofiev, 2010; *Labiatophysa* Prokofiev, 2010; *Qinghaichthys* Zhu, 1981; *Tarimichthys* Prokofiev, 2010; *Triplophysa* Rendahl, 1933.

Nemacheilinae (beekmodderkruipers / zuidelijke baardgrondels / Südliche Bachschmerlen / southern stone loaches / nemacheilins) {age 103 Ma}: *Acanthocobitis* Peters, 1861; *Afronemacheilus* Golubtsov & Prokofiev, 2009; *Claea* Kottelat, 2011; *Draconectes* Kottelat, 2012; *Dzihunia* Prokofiev, 2001; *Homatula* Nichols, 1925; *Ilamnemacheilus* Coad & Nalbant, 2005; *Indoreonectes* Rita & Bănărescu, 1978; *Iskandaria* Prokofiev, 2009; *Longischistura* Bănărescu & Nalbant, 1995; *Mesonoemacheilus* Bănărescu & Nalbant, 1982; *Nemacheilus* Bleeker, 1863; *Nemachilichthys* Day, 1878; *Neonoemacheilus* Zhu & Guo, 1985; *Oxynoemacheilus* Bănărescu & Nalbant, 1966; *Paracanthocobitis* Grant, 2007; *Paracobitis* Bleeker, 1863; *Paraschistura* Prokofiev, 2009; *Physoschistura* Bănărescu & Nalbant, 1982; *Pteronemacheilus* Bohlen & Šlechtová, 2011; *Schistura* McClelland, 1838; *Sectoria* Kottelat, 1990; *Seminemacheilus* Bănărescu & Nalbant, 1995; *Speonectes* Kottelat, 2012; *Sphaerophysa* Cao & Zhu, 1988; *Sundoreonectes* Kottelat, 1990; *Troglocobitis* Parin, 1983; *Tuberoschistura* Kottelat, 1990; *Turcinoemacheilus* Bănărescu & Nalbant, 1964.

superorder: **CHARACIPHYSAE** (MESVISACHTIGEN, KARPERZALMACHTIGEN EN MEER-VALACHTIGEN / MESSERAALARTIGE, SALMLERARTIGE UND WELSARTIGE / GYMNOTIFORM, CHARACIFORM AND SILURIFORM FISHES) {>112 Ma Albian; age 136-184 Ma}

Gymnotiformes (AMERIKAANSE MESVISACHTIGEN / MESSERAALARTIGE / NEUE WELT MESSERFISCHE / AMERIKANISCHE MESSERFISCHE / GYMNOTIFORM FISHES) *sensu* Albert, 2001 {>23 Ma Miocene; age 71-88 Ma}

GYMNOTOIDEI (MESAALVERWANTEN / MESSERAALVERWANDTE / GYMNOTOID FISHES) *sensu* Albert, 2001

Gymnotidae Rafinesque, 1815 (mesalen / Messeraale / gymnotid eels / carapos)

Electrophorinae Gill, 1872 (sidderalen / Zitteraale / Elektrische Aale / electric knifefishes / electric eels): *Electrophorus* Gill, 1864.

Gymnotinae (naaktrugmesvissen / Echte Messeraale / nakedback knifefishes) {age 56 Ma}: *Gymnotus* Linnaeus, 1758.

STERNOPYGOIDEI (GLASMESVISVERWANTEN / GLASMESSERFISCHVERWANDTE / STERNOPYGOID FISHES)

Rhamphichthyoidea (rhamphichthyide eels)

Rhamphichthyidae Regan, 1911

Rhamphichthyinae (langsnavelmesalen / langsnuitsmesalen / Langschnabel-Messerfische / sand knifefishes): *Gymnorhamphichthys* Ellis, 1912; *Iracema* Triques, 1996; *Rhamphichthys* Müller & Troschel, 1848.

Steatoginae Albert, 2001 (rattenstaartmesvissen / Rattenschwanz-Messerfische / rattail knifefishes): *Hoplopogon* Hoedeman, 1962; *Steatogenys* Boulenger, 1898.

Hypopomidae Eigenmann, 1912 (bonde mesalen / kortsnuitsmesalen / Kurzschnabel-Messerfische / bluntnose knifefishes / hypopomid knifefishes)

Hypopominae: *Akawaio* Maldonado-Ocampo *et al.*, 2013; *Brachyhypopomus* Mago-Leccia, 1994; *Hypopomus* Gill, 1864.

Microsternarchinae Albert, 2001 (electric knifefishes): *Microsternarchus* Fernández-Yépez, 1968; *Procerusternarchus* Cox Fernandes, Nogueira & Alves-Gomes, 2014; *Racenisia* Mago-Leccia, 1994.

Sternopygoidea (Amerikaanse mesalen / sternopygide eels)

Sternopygidae Cope, 1871 (glasmesvissen / glasmesalen / Glasmesserfische / glass knifefishes) {>11 Ma late Miocene; age 143 Ma}

Sternopyginae (stomkopmesalen): *Sternopygus* Müller & Troschel, 1848.

Eigenmanninae Mago-Leccia, 1978 (glasmesalen): *Archolaemus* Korringa, 1970; *Distocyclus* Mago-Leccia, 1978; *Eigenmannia* Jordan & Evermann, 1896; *Rabdolichops* Eigenmann & Allen, 1942.

Apterontidae Jordan, 1923 (koevissen / staartvinmesalen / Schwanzflossen-Messeraale / Apterontiden / ghost knifefishes) {age 143 Ma}

Sternarchorhamphinae Albert, 2001: *Orthosternarchus* Ellis, 1913; *Sternarchorhamphus* Eigenmann, 1905.

Apterontinae (zeekoevissen / Seekuhfische / Seekuhhaale) [tribes tentative]

Adontosternarchini Mago-Leccia, 1978: *Adontosternarchus* Ellis, 1912.

Apterontini: *Apterontotus* La Cepède, 1800; *Parapterontotus* Albert, 2001.

Sternarchorhynchini Mago-Leccia, 1978 (tapirmesvissen / Schnabel-Messeraale / trunk knifefishes): *Platyurosternarchus* Mago-Leccia, 1994; *Sternarchorhynchus* Castelnau, 1855.

Sternarchellini Albert, 2001: *Compsaraia* Albert, 2001; *Pariosternarchus* Albert & Crampton, 2006; *Porotergus* Ellis, 1912; *Sternarchella* Eigenmann, 1905; *Sternarchogiton* Eigenmann, 1905; *Tembeassu* Triques, 1998.

Characiformes (KARPERZALMACHTIGEN / SALMLERARTIGE / CHARACIFORM FISHES) *sensu* Oliveira et al., 2011 {>100 Ma Cenomanian; age 100-108 Ma}

CITHARINOIDEI (PRIMITIEVE KARPERZALMACHTIGEN / GERADSALMLERVERWANDTE / CITHARINOID FISHES) {>45 Ma Eocene; age 90 Ma}

Distichodontidae Günther, 1864 (Afrikaanse karperzalmen en snavelzalmen / hoogrugzalmen / Karpfen- und Schnabelsalmmer / distichodontids) {>5 Ma late Miocene; age 67 Ma}: *Belonophago* Giltay, 1929; *Distichodus* Müller & Troschel, 1844; *Eugnathichthys* Boulenger, 1898; *Hemistichodus* Pellegrin, 1900; *Ichthyborus* Günther, 1864; *Mesoborus* Pellegrin, 1900; *Microstomatichthys* Nichols & Griscom, 1917; *Nannaethiops* Günther, 1872; *Nannocharax* Günther, 1867; *Paradistichodus* Pellegrin, 1922; *Paraphago* Boulenger, 1899; *Phago* Günther, 1865; *Xenocharax* Günther, 1867.

Citharinidae Günther, 1864 (ruitzalmen / Geradsalmmer / citharinids) {>1 Ma Early Pleistocene} [= ? Distichodontidae]: *Citharidium* Boulenger, 1902; *Citharinops* Daget, 1962; *Citharinus* Cuvier, 1816.

CHARACOIDEI (KARPERZALMVERWANTEN / SALMLERVERWANDTE / CHARACOID FISHES) {age 93-113 Ma} [superfamilies tentative]

Erythrinioidea

Alestidae Günther, 1864 (grondzalmen / crenuchids)

Crenuchinae (prachtzalmen / bronzalmen / Segelflossensalmmer / Prachtsalmmer / crenuchines): *Crenuchus* Günther, 1863; *Poecilocharax* Eigenmann, 1909.

Characidiinae Fowler, 1932 (bodemzalmen / grondzalmen / Grundsalmmer / Bodensalmmer / Zwergpfeilsalmmer / South American darters): *Ammocrypta* Weitzman & Kanazawa, 1976; *Characidium* Reinhardt, 1867; *Elachocharax* Myers, 1927; *Geryichthys* Zarske, 1997; *Klausewitzia* Géry, 1965; *Leptocharacidium* Buckup, 1993; *Melanocharacidium* Buckup, 1993; *Microcharacidium* Buckup, 1993; *Odontocharacidium* Buckup, 1993; *Skiocharax* Presswell, Weitzman & Bergquist, 2000.

Erythrinidae

Alestidae Cockerell, 1910 (Afrikaanse karperzalmen / zwermzalmen / Schwärmsalmmer / Echte Afrikanische Salmmer / African characins / alestids) {>56 Ma Early Eocene / Ypresian; age 54 Ma} [subfamilies tentative]:

“*Brycinus* clade” (grote Afrikaanse karperzalmen / große Afrikanische Salmmer / large-bodied African tetras): *Brycinus* Valenciennes, 1850.

Bryconaeothiopinae Hoedeman, 1951: *Brachyalestes* Günther, 1864; *Bryconaeothiops* Günther, 1873.

Petersiinae Poll, 1967 (Afrikaanse tetras / Congo-zalmen / Kongosalmer / African tetras)

[Clupeocharacinae Pellegrin, 1926 / Alestopetersiinae Hoedeman, 1951 forgotten names]:

Alestopetersius Hoedeman, 1951; *Bathyaeothiops* Fowler, 1949; *Clupeocharax* Pellegrin, 1926;

Nannopetersius Hoedeman, 1956; *Petersius* Hilgendorf, 1894; *Phenacogrammus* Eigenmann, 1907; *Tricuspidalestes* Poll, 1967.

Alestinae: *Alestes* Müller & Troschel, 1844; *Bryconalestes* Hoedeman, 1951; *Hydrocynus* Cuvier, 1816; *Ladigesia* Géry, 1968; *Micralestes* Boulenger, 1899; *Rhabdalestes* Hoedeman, 1951.

Hepsetidae Hubbs, 1939 (Afrikaanse snoekzalmen / Afrikanische Hechtsalmmer / African pike characids / African pikes / hepsetids) {>71 Ma Maastrichtian; age 72 Ma}: *Hepsetus* Swainson, 1838.

Erythrinidae Valenciennes, 1847 (forelzalmen / Forellensalmmer / Raubsalmmer / Tigersalmmer / trahiras / wolf fishes) {>23 Ma Early Miocene; age 61 Ma}: *Erythrinus* Scopoli, 1777; *Hoplerythrinus* Gill, 1896; *Hoplias* Gill, 1903.

Parodontotoidea

Parodontidae Eigenmann, 1910 (rotszalmen / Felsensalmmer / Algensalmmer / darter tetra's / parodontids) {>23 Ma Early Miocene}: *Apareiodon* Eigenmann, 1916; *Parodon* Valenciennes, 1850; *Saccodon* Kner, 1863.

Cynodontidae Eigenmann, 1903 (zabeltandzalmen / Säbelzahnsalmes / Bandsalmes / sabertoothed characids / cynodontids / wolf tetras) {>14 Ma Middle Miocene}: *Cynodon* Spix, 1829; *Hydrolycus* Müller & Troschel, 1844; *Rhaphiodon* Agassiz, 1829.

Chilodontidae Eigenmann, 1903 (zilverkopstaanders / Silberkopfsteher / headstanders / chilodontids): *Caenotropus* Günther, 1864; *Chilodus* Müller & Troschel, 1844.

Anostomidae Günther, 1864 (anostomiden / kopstaanders / Engmaulsalmes / Kopfsteher / toothed headstanders / headstanders / anostomids) {>23 Ma Early Miocene}: *Abramites* Fowler, 1906; *Anostomoides* Pellegrin, 1908; *Anostomus* Scopoli, 1777; *Gnathodolus* Myers, 1927; *Hypomasticus* Borodin, 1929; *Laemolyta* Cope, 1872; *Leporellus* Lütken, 1875; *Leporinus* Agassiz, 1829; *Petulanos* Sidlauskas & Vari, 2008; *Pseudanos* Winterbottom, 1980; *Rhytidodus* Kner, 1858; *Sartor* Myers & Carvalho, 1959; *Schizodon* Agassiz, 1829; *Synaptolaemus* Myers & Fernández-Yépez, 1950.

Prochilodontidae Eigenmann, 1909 (bocachico's / nachtzalmen / Nachtsalmes / flannelmouth characiforms / prochilodontids) {>12 Ma Middle Miocene}: *Ichthyoelephas* Posada Arango, 1909; *Prochilodus* Agassiz, 1829; *Semaprochilodus* Fowler, 1941.

Curimatidae Gill, 1858 (barbeelzalmen / brede zalmen / Breitlingssalmes / Barbensalmes / toothless characiforms / curimatids): *Curimata* Bosc, 1817; *Curimatella* Eigenmann & Eigenmann, 1889; *Curimatopsis* Steindachner, 1876; *Cyphocharax* Fowler, 1906; *Potamorhina* Cope, 1878; *Psectrogaster* Eigenmann & Eigenmann, 1889; *Pseudocurimata* Fernández-Yépez, 1948; *Steindachnerina* Fowler, 1906.

Serrasalmidae Bleeker, 1859 (schijf- en zaagbuikzalmen / Scheiben- und Sägesalmes / serrasalmids / piranhas and allies) {>66 Ma Danian / late Cretaceous; age 68 Ma}: *Acnodon* Eigenmann, 1903; *Catoprion* Müller & Troschel, 1844; *Colossoma* Eigenmann & Kennedy, 1903; *Metynnis* Cope, 1878; *Mylesinus* Valenciennes, 1850; *Myleus* Müller & Troschel, 1844; *Myloplus* Gill, 1896; *Mylossoma* Eigenmann & Kennedy, 1903; *Ossubtus* Jégu, 1992; *Paramyloplus* Norman, 1929; *Piaractus* Eigenmann, 1903; *Pristobrycon* Eigenmann, 1915; *Prosomyleus* Géry, 1972; *Pygocentrus* Müller & Troschel, 1844; *Pygopristis* Müller & Troschel, 1844; *Serrasalmus* La Cepède, 1803; *Tometes* Valenciennes, 1850; *Utiaritichthys* Miranda Ribeiro, 1937.

Hemiodontidae Bleeker, 1859 (zilverzalmen / tandarme zalmkarpers / penseelvissen / Halbzähner / Keulensalmes / hemiodontids)

Anodontinae Bleeker, 1859 (lange zalmen / Langsalmes / anodontines): *Anodus* Cuvier, 1829; *Micromischodus* Roberts, 1971.

Hemiodontinae (slanke zalmen / Schlanksalmes / hemiodontines)

Hemiodontini (hemiodontins): *Hemiodus* Müller, 1842.

Bivibranchiini Eigenmann, 1912 (graafzalmen / Grabsalmes / Gründelsalmes / sandsuckers): *Argonectes* Böhlke & Myers, 1956; *Bivibranchia* Eigenmann, 1912.

Characoidea (characides)

Ctenoluciidae Schultz, 1944 (snoekzalmen / Hechtsalmes / pike-characids) {>71 Ma Maastrichtian}: *Arnoldichthys* Myers, 1926; *Boulengerella* Eigenmann, 1903; *Ctenolucius* Gill, 1861.

Lebiasinidae Gill, 1889 (spatzalmachtigen / Schlanksalmes / lebiasinids) {>71 Ma Maastrichtian}

Lebiasininae (leverzalmen / Zwergraubsalmes / lebiasinas): *Lebiasina* Valenciennes, 1847.

Pyrrhulininae Bleeker, 1859

“Derhamia clade”: *Derhamia* Géry & Zarske, 2002.

Pyrrhulinini

Pyrrhulinina (spatzalmen / Spritzsalmes / splashing tetra's): *Copeina* Fowler, 1906; *Copella* Myers, 1956; *Pyrrhulina* Valenciennes, 1846.

Nannostomina Eigenmann, 1909 (spitsbekzalmpjes / potloodzalmpjes / Bleistiftfische / pencilfishes): *Nannostomus* Günther, 1872.

Chalceidae Fowler, 1958 (grootschubkarperzalmen / chalceids): *Chalceus* Cuvier, 1818; *Lepidarchus* Roberts, 1966.

Triportheidae Fowler, 1940 {age 44 Ma}

Triportheinae (gekielde karperzalmen / keeled characids) {age 27 Ma}: *Lignobrycon* Eigenmann & Myers, 1929; *Triportheus* Cope, 1872.

Agoniatinae Bleeker, 1859 (haringzalmen / ansjoviszalmen / Heringssalmes / Anchovissalmes / agoniatines) {age 26 Ma}: *Agoniates* Müller & Troschel, 1845; *Clupeacharax* Pearson, 1924; *Engraulisoma* Castro, 1981.

Gasteropelecidae Bleeker, 1859 (bijlzalmen / Beilbauchfische / freshwater hatchetfishes) {age 44 Ma}: *Carnegiella* Eigenmann, 1909; *Gasteropeleucus* Scopoli, 1777; *Thoracocharax* Fowler, 1907.

Bryconidae Eigenmann, 1912 (Lachssalmes / bryconids) {>33 Ma late Oligocene; age 47 Ma}: *Brycon* Müller & Troschel, 1844; *Chilobrycon* Géry & de Rham, 1981; *Salminus* Agassiz, 1829.

Iguanodectidae Eigenmann, 1909 (slanke karperzalmen / Iguanodectinen / iguanodectids): *Bryconops* Kner, 1858; *Iguanodectes* Cope, 1872; *Piabucus* Oken, 1817.

Acestrorhynchidae Eigenmann, 1912 (roofzalmen / Raubsalmes / pike characids / acestrorhynchids)

Acestrorhynchinae (barracudazalmen / Barrakuda-salmes / Spindelsalmes / pike characids / acestrorhynchines) {>14 Ma Middle Miocene; age 41 Ma}: *Acestrorhynchus* Eigenmann & Kennedy, 1903.

Heterocharacinae Géry, 1966: *Gnathocharax* Fowler, 1913; *Heterocharax* Eigenmann, 1912; *Hoplocharax* Géry, 1966; *Lonchogenys* Myers, 1927; *Priocnemis* Weitzman & Vari, 1987.

Roestinae Lucena & Menezes, 1998 (wolfzalmen / Wolfsalmes / biting tetras): *Gilbertolus* Eigenmann, 1907; *Roestes* Günther, 1864.

Characidae Latreille, 1825 (karperzalmafamilie / Echte Amerikanische Salmes / characids) {>38 Ma Oligocene; age 56 Ma} [subfamilies and tribes tentative]

“Spintherobolus clade”: *Amazonspinther* Bührnheim, Carvalho, Malabarba & Weitzman, 2008; *Spintherobolus* Eigenmann, 1911.

Stethaprioninae Eigenmann, 1907 (stekelzalmen / “Tetragonopterinae”)

Rhoadsiini Fowler, 1911 (broedverzorgende zalmen / Brutpflegende Salmes / rhoadsins):

Astyanacinus Eigenmann, 1907; *Astyanax* Baird & Girard, 1854; *Carlana* Strand, 1928; *Ctenobrycon* Eigenmann, 1908; *Inpaichthys* Géry & Junk 1977; *Nematobrycon* Eigenmann, 1911; *Oligosarcus* Günther, 1864; *Parastremma* Eigenmann, 1912; *Psellogrammus* Eigenmann, 1908; *Rhoadsia* Fowler, 1911.

Stygichthyini Géry, 1972: *Coptobrycon* Géry, 1966; *Deuterodon* Eigenmann, 1907; *Erythrocharax* Netto-Ferreira et al., 2013; *Jupiaba* Zanata, 1997; *Macropsobrycon* Eigenmann, 1915; *Myxiops* Zanata & Akama, 2004; *Parecbasis* Eigenmann, 1914; *Probolodus* Eigenmann, 1911; *Stygichthys* Brittan & Böhlke, 1965.

Pristellini Géry & Boutière, 1964 (tetra's / minizalmpjes / Tetras / Blanksalmes / American tetras): *Aphyodite* Eigenmann, 1912; *Axelrodia* Géry, 1965; *Brittanichthys* Géry, 1965; *Bryconella* Géry, 1965; *Hasemania* Ellis, 1911; *Hemigrammus* Gill, 1858; *Hypessobrycon* Durbin, 1908; *Moenkhausia* Eigenmann, 1903; *Nematocharax* Weitzman; Menezes & Britski, 1986; *Paracheirodon* Géry, 1960; *Parapristella* Géry, 1964; *Petitella* Géry & Boutière, 1964; *Pristella* Eigenmann, 1908; *Thayeria* Eigenmann, 1908.

Stethaprionini (discuszalmen / stekelzalmen / Stachelsalmes / silver dollar tetras / stethaprionines): *Brachychalcinus* Boulenger, 1892; *Gymnocorymbus* Eigenmann, 1908; *Orthopinna* Reis, 1989; *Poptella* Eigenmann, 1908; *Stethaprion* Cope, 1870; *Stichonodon* Eigenmann, 1903.

Gymnocharacini Eigenmann, 1909 (wisselzalmen / Wechselsalmes / “Tetragonopterinae”): *Bario* Myers, 1940; *Dectobrycon* Zarske & Géry, 2006; *Ectrepopterus* Fowler, 1943; *Grundulus* Valenciennes, 1846; *Gymnocharacinus* Steindachner, 1903; *Gymnotichthys* Fernández-Yépez, 1950; *Hollandichthys* Eigenmann, 1910; *Pseudochalceus* Kner, 1863; *Rachoviscus* Myers, 1926; *Schultzites* Géry, 1964.

Scisorini Fowler, 1958 [most genera *incertae sedis*]: *Atopomesus* Myers, 1927; *Genycharax* Eigenmann, 1912; *Leptobrycon* Eigenmann, 1915; *Microschromobrycon* Eigenmann, 1915; *Mixobrycon* Eigenmann, 1915; *Oligobrycon* Eigenmann, 1915; *Oxybrycon* Géry, 1964; *Scisor*

Günther, 1864; *Serrabrycon* Vari, 1986; *Thriissobrycon* Böhlke, 1953; *Tucanoichthys* Géry & Römer, 1997; *Tyttocharax* Géry, 1973.

Characinae (characines) {>23 Ma Early Miocene}:

Exodontini Fowler, 1958: *Bryconexodon* Géry, 1980; *Exodon* Müller & Troschel, 1844; *Roeboexodon* Géry, 1959.

Tetragonopterini Gill, 1858 (tetragonopterins): *Tetragonopterus* Cuvier, 1816.

Characini (echte karperzalmen / Fluß-Schakalen / characins)

Characina: *Charax* Scopoli, 1777; *Roeboides* Günther, 1864.

Cynopotamina Cockerell, 1915: *Acanthocharax* Eigenmann, 1912; *Acstrocephalus*

Eigenmann, 1910; *Cynopotamus* Valenciennes, 1850; *Galeocharax* Fowler, 1910.

Phenacogasterina Mattox & Toledo-Piza, 2012: *Phenacogaster* Eigenmann, 1907.

Aphyocharacini Eigenmann, 1909 (slanke zalmpjes / glaszalmpjes / Aphyocharacinen / glass characins / aphyocharacins): *Aphyocharacidium* Géry, 1960; *Aphyocharax* Günther, 1868; *Leptagoniates* Boulenger, 1887; *Paragoniates* Steindachner, 1876; *Phenagoniates* Eigenmann & Wilson, 1914; *Prionobrama* Fowler, 1913; *Xenagoniates* Myers, 1942.

Pseudocheirodontini Mariguela et al., 2013 (trans-Andean cheirodontins): *Nanocheirodon* Malabarba, 1998; *Pseudocheirodon* Meek & Hildebrand, 1916.

Cheirodontini Eigenmann, 1915 (cheirodontins): *Cheirodon* Girard, 1855; *Heterocheirodon* Malabarba, 1998; *Prodontocharax* Eigenmann & Pearson, 1924; *Saccoderma* Schultz, 1944.

Compsurini Malabarba, Weitzman & Burns, 1998 (internbevruchtende zalmpjes / inseminating cheirodontins / compsurins / small tetras): *Acinocheirodon* Malabarba & Weitzman, 1999; *Compsura* Eigenmann, 1915; *Ctenocheirodon* Malabarba & Jerep, 2012; *Holoshesthes* Eigenmann, 1903; *Kolpotocheirodon* Malabarba & Weitzman, 2000; *Odontostilbe* Cope, 1870; *Serrapinnus* Malabarba, 1998.

Stevardiinae Gill, 1858 (stevardiines)

Eretmobryconini Thomaz, Arcila, Ortí & Malabarba, 2015: *Eretmobrycon* Fink, 1976; *Markiana* Eigenmann, 1903.

Xenurobryconini Myers & Böhlke, 1956 (xenurobryconins): *Iotabrycon* Roberts, 1973; *Ptychocharax* Weitzman, Fink, Machado-Allison & Royero, 1994; *Scopaeocharax* Weitzman & Fink, 1985; *Tyttocharax* Fowler, 1913; *Xenurobrycon* Myers & Miranda Ribeiro, 1945.

“Argopleura clade”: *Argopleura* Eigenmann, 1913.

Glandulocaudini Eigenmann, 1914 (breedstaartzalmen / glandulocaudines) {age 2.5 Ma}:

Glandulocauda Eigenmann, 1911; *Lophiobrycon* Castro, Ribeiro, Benine & Melo, 2003;

Mimagoniates Regan, 1907.

Stevardiini (klierstaartzalmkopers / Drüsensalmmer / corynopomins): *Chrysobrycon* Weitzman & Menezes, 1998; *Corynopoma* Gill, 1858; *Gephyrocharax* Eigenmann, 1912; *Hysteronotus* Eigenmann, 1911; *Pseudocorynopoma* Perugia, 1891; *Pterobrycon* Eigenmann, 1913.

Hemibryconini Géry, 1966 (hemibryconins): *Acrobrycon* Eigenmann & Pearson, 1924; *Hemibrycon* Günther, 1864.

Creagrunini Miles, 1943 (creagrunins): *Carlastyanax* Géry, 1972; *Creagrutus* Günther, 1864.

Diapomini Eigenmann, 1909: *Attonitus* Vari & Ortega, 2000; *Aulixidens* Böhlke, 1952; *Bryconacidnus* Myers, 1929; *Bryconamericus* Eigenmann, 1907; *Caiapobrycon* Malabarba & Vari, 2000; *Ceratobranchia* Eigenmann, 1914; *Cyanogaster* Mattox et al., 2013; *Diapoma* Cope, 1894; *Knodus* Eigenmann, 1911; *Lepidocharax* Ferreira, Menezes & Quagio-Grassiotto, 2011; *Microgenys* Eigenmann, 1913; *Monotocheirodon* Eigenmann & Pearson, 1924; *Othonocheirodus* Myers, 1927; *Phallobrycon* Menezes, Ferreira & Netto-Ferreira, 2009; *Piabarchus* Myers, 1928; *Piabina* Reinhardt, 1867; *Planaltina* Böhlke, 1954; *Rhinobrycon* Myers, 1944; *Rhinopetitia* Géry, 1964.

Landonini Weitzman & Menezes, 1998 (caudal sac characins): *Landonia* Eigenmann & Henn, 1914.

Phenacobryconini Weitzman & Menezes, 1998: *Phenacobrycon* Eigenmann, 1922.

Trochilocharacini Zarske, 2010: *Trochilocharax* Zarske, 2010.

Siluriformes (MEERVALACHTIGEN / WELSARTIGE / SILURIFORM FISHES) *sensu* Greenwood et al., 1966 {>84 Ma Campanian; age 97-117 Ma}

LORICARIOIDEI (LORICARIOID FISHES) *sensu* Sullivan, Lundberg & Hardman, 2006 {>58 Ma late Paleocene}

Trichomycteridae Bleeker, 1858 (minimeervallen / Schmerlenwelse / pencil catfishes)

Copionodontinae de Pinna, 1992: *Copionodon* de Pinna, 1992; *Glaphyropoma* de Pinna, 1992.

Trichogeninae Isbrücker, 1986: *Trichogenes* Britski & Ortega, 1983.

Trichomycterinae {>5 Ma Pliocene}: *Bullockia* Arratia, Chang, Menu-Marque & Rojas, 1978;

Eremophilus Humboldt, 1805; *Hatcheria* Eigenmann, 1909; *Ituglanis* Costa & Bockmann, 1993;

Rhizosomichthys Miles, 1943; *Scleronema* Eigenmann, 1918; *Silvinichthys* Arratia, 1998;

Trichomycterus Valenciennes, 1832.

Glanapteryginae Myers, 1944: *Glanapteryx* Myers, 1927; *Listrura* de Pinna, 1988; *Pygidianops* Myers, 1944; *Typhlobelus* Myers, 1944.

Sarcoglanidinae Myers & Weitzman, 1966 (zandmeervalletjes / psammophilous catfishes):

Ammoglanis Costa 1994; *Malacoglanis* Myers & Weitzman, 1966; *Microcambeva* Costa & Bockmann, 1994; *Sarcoglanis* Myers & Weitzman, 1966; *Stauroglanis* de Pinna, 1989; *Stenolicmus* de Pinna & Starnes, 1990.

Tridentinae Eigenmann, 1918: *Miuroglanis* Eigenmann & Eigenmann, 1889; *Tridens* Eigenmann & Eigenmann, 1889; *Tridensimilis* Schultz, 1944; *Tridentopsis* Myers, 1925.

Stegophilinae Günther, 1864 (parasiterende meervallen / Schmarotzerwelse / parasitic catfishes):

Acanthopoma Lütken, 1892; *Apomatoceros* Eigenmann, 1922; *Haemomaster* Myers, 1927;

Henonemus Eigenmann & Ward, 1907; *Homodiaetus* Eigenmann & Ward, 1907; *Megalocentor* de Pinna & Britski, 1991; *Ochmacanthus* Eigenmann, 1912; *Pareiodon* Kner, 1855; *Pseudostegophilus* Eigenmann & Eigenmann, 1889; *Schultzichthys* Dahl, 1960; *Stegophilus* Reinhardt, 1859.

Vandelliinae Bleeker, 1862 (bloeddrinkende meervallen / candirus / vandelliines / hematophagous catfishes): *Paracanthopoma* Giltay, 1935; *Paravandellia* Miranda Ribeiro, 1912; *Plectrochilus* Miranda Ribeiro, 1917; *Vandellia* Valenciennes, 1846.

Nematogenyidae Bleeker, 1862 (wormmeervallen / Wurmwelse / mountain catfishes / nematogenyid catfishes / worm catfishes) {>23 Ma Miocene}: *Nematogenys* Girard, 1855.

Callichthyidae Bonaparte, 1835 (pantsermeervallen / Schwienewelse / Panzerwelse / callichthyid armored catfishes) {>59 Ma late Paleocene / Thanetian; age 67 Ma}

Callichthyinae (kwi-kwi's / Schwienewelse / callichthyines) {age 59-64 Ma}

Callichthyni: *Callichthys* Scopoli, 1777; *Leptoplosternum* Reis, 1997; *Megalechis* Reis, 1997.

Dianemini Hoedeman, 1952: *Dianema* Cope, 1871; *Hoplosternum* Gill, 1858.

Corydoradinae Hoedeman, 1952 (stofzuigmeervallen / Panzerwelse / corys) {>23 Ma Miocene; age 59-64 Ma}

Corydoradini (zadelsnuitpantsermeervallen / spitskoppantsermeervallen / Sattelschnauzpanzerwelse / Spitzkopfpanzerwelse / saddle-snout corys) {age 30 Ma}: *Corydoras* La Cepède, 1803.

Aspidoradini Hoedeman, 1952 (corydorasjes) {age 30 Ma}: *Aspidoras* Ihering, 1907;

Gastrodermus Cope, 1878; *Hoplisoma* Swainson, 1838; *Scleromystax* Günther, 1868.

Scolopacidae Bailey & Baskin, 1976 (dwergdoornmeervallen / Zwergdornwelse / spiny dwarf catfishes): *Scolopax* Bailey & Baskin, 1976.

Astroblepidae Bleeker, 1862 (bergmeervallen / Andenwelse / climbing catfishes / Andes catfishes): *Astroblepus* Humboldt, 1805.

Loricariidae Rafinesque, 1815 (harnasmeervallen / Harnischwelse / suckermouth armored catfishes / mailed catfishes) {>38 Ma late Eocene / late Oligocene; age 85–90 Ma}

Lithogeninae Gosline, 1947 (rotsmeervallen / klimmende harnasmeervallen / Felsenwelse / climbing armored catfishes): *Lithogenes* Eigenmann, 1909.

Delturinae Armbruster, Reis & Pereira, 2006 (primitieve harnasmeervallen / Primitivsaugwelse / primitive suckermouth catfishes): *Delturus* Eigenmann & Eigenmann, 1889; *Hemipsilichthys* Eigenmann & Eigenmann, 1889; *Upsilodus* Miranda Ribeiro, 1924.

Rhinelepinidae Armbruster 2004: *Pogonopoma* Regan, 1904; *Pseudorhinelepis* Bleeker, 1862; *Rhinelepis* Agassiz, 1829.

Loricariinae (Hexenwelse / loricariines)

Harttiini Boeseman, 1971 (combtoothed loricariines): *Cteniloricaria* Isbrücker & Nijssen 1979;

Harttia Steindachner, 1876; *Harttiella* Boeseman, 1971.

Loricariini (zweepstaartharnasmeervallen / Fadenharnischwelse / loricariins)

Farlowellina Fowler, 1958 (steurharnasmeervallen / Störharnischwelse / sturgeon loricariines / stickcatfishes): *Aposturisoma* Isbrücker, Britski, Nijssen & Ortega, 1983; *Farlowella* Eigenmann & Eigenmann, 1889; *Lamontichthys* Miranda Ribeiro, 1939; *Pterosturisoma* Isbrücker & Nijssen, 1978; *Sturisoma* Swainson, 1838; *Sturisomatichthys* Isbrücker & Nijssen, 1979.

Loricariina (zweepstaartharnasmeervallen / Fadenharnischwelse / loricariins): *Brochiloricaria* Isbrücker & Nijssen, 1979; *Crossoloricaria* Isbrücker, 1979; *Dasyloricaria* Isbrücker & Nijssen, 1979; *Dentectus* Martín Salazar, Isbrücker & Nijssen, 1982; *Fonchiiloricaria* Rodriguez, Ortega & Covain, 2011; *Furcodontichthys* Rapp Py-Daniel, 1981; *Hemiodontichthys* Bleeker, 1862; *Limatulichthys* Isbrücker & Nijssen, 1979; *Loricaria* Linnaeus, 1758; *Loricariichthys* Bleeker, 1862; *Metaloricaria* Isbrücker, 1975; *Paraloricaria* Isbrücker, 1979; *Planiloricaria* Isbrücker, 1971; *Proloricaria* Isbrücker, 2001; *Pseudohemiodon* Bleeker, 1862; *Pseudoloricaria* Bleeker, 1862; *Pyxiloricaria* Isbrücker & Nijssen, 1984; *Reganella* Eigenmann, 1905; *Rhadinoloricaria* Isbrücker & Nijssen, 1974; *Ricola* Isbrücker & Nijssen, 1978; *Rineloricaria* Bleeker, 1862; *Spatuloricaria* Schultz, 1944.

Hypoptopomatinae Eigenmann & Eigenmann, 1890 (oorzeefmeervallen / Ohrgitterharnischwelse / Ohrgitterwelse / cascudinhos) {age 50 Ma}: *Chauliocheilos* Martins et al., 2014; *Gymnotocinclus* Carvalho, Lehmann A. & Reis, 2008; *Plesiotopoma* Reis, Pereira & Lehmann A., 2012; *Rhinolekos* Martins & Langeani, 2011.

Hypoptopomatini: *Acestridium* Haseman, 1911; *Hypoptopoma* Günther, 1868; *Niobichthys* Schaefer & Provenzano, 1998; *Otocinclus* Cope, 1871; *Oxyropsis* Eigenmann & Eigenmann, 1889.

Neoplecostominae Regan, 1904 (neoplecostomines) {age 37–46 Ma}: *Hirtella* Pereira et al., 2014; *Isbrueckerichthys* Derijst, 1996; *Kronichthys* Miranda Ribeiro, 1908; *Neoplecostomus* Eigenmann & Eigenmann, 1888; *Pareiorhaphis* Miranda Ribeiro, 1918; *Pareiorhina* Gosline, 1947; *Pseudotocinclus* Nichols, 1919.

Otothyrinae Schaefer, 1991 {age 46 Ma}: *Corumbataia* Britski, 1997; *Curculionichthys* Roxo et al., 2015; *Epauctionotus* Reis & Schaefer, 1998; *Eurycheilichthys* Reis & Schaefer, 1993; *Hisonotus* Eigenmann & Eigenmann, 1889; *Lampiella* Isbrücker, 2001; *Microlepidogaster* Eigenmann & Eigenmann, 1889; *Nannoplecostomus* Ribeiro, Lima & Pereira, 2012; *Otothyris* Myers, 1927; *Otothyropsis* Ribeiro, Carvalho & Melo, 2005; *Parotocinclus* Eigenmann & Eigenmann, 1889; *Pseudotothyris* Britski & Garavello, 1984; *Schizolecis* Britski & Garavello, 1984.

Hypostominae Kner, 1853 (zuigmeervallen / Saugmaulharnischwelse / suckermouth catfishes)

Clade "Chaetostoma": *Andeancistrus* Lujan, Meza-Vargas & Barriga-Salazar, 2015; *Chaetostoma* Tschudi, 1846; *Cordylancistrus* Isbrücker, 1980; *Dolichancistrus* Isbrücker, 1980; *Leptoancistrus* Meek & Hildebrand, 1916; *Transancistrus* Lujan, Meza-Vargas & Barriga-Salazar, 2015.

Ancistrini Kner, 1854 (clownzuigmeervallen / Ancistrinen): *Ancistrus* Kner, 1854; *Corymbophanes* Eigenmann, 1909; *Dekeyseria* Rapp Py-Daniel, 1985; *Guyanancistrus* Isbrücker, 2001; *Hoplancistrus* Isbrücker & Nijssen, 1989; *Lasiancistrus* Regan, 1904; *Lithoxancistrus* Isbrücker, Nijssen & Cala, 1988; *Neblinichthys* Ferraris, Isbrücker & Nijssen, 1986; *Paulasquama* Armbruster & Taphorn, 2011; *Pseudolithoxus* Isbrücker & Werner, 2001; *Soromonichthys* Lujan & Armbruster, 2011.

Clade "Pseudancistrus": *Pseudancistrus* Bleeker, 1862.

Clade "Lithoxus": *Exastilithoxus* Isbrücker & Nijssen, 1979; *Lithoxus* Eigenmann, 1910.

Clade "Acanthicus": *Acanthicus* Agassiz, 1829; *Leporacanthicus* Isbrücker & Nijssen, 1989; *Megalancistrus* Isbrücker, 1980; *Pseudacanthicus* Bleeker, 1862.

Clade "Hemiancistrus": *Baryancistrus* Rapp Py-Daniel, 1989; *Hemiancistrus* Bleeker, 1862; *Panaqolus* Isbrücker & Schraml, 2001; *Panaque* Eigenmann & Eigenmann, 1889; *Parancistrus* Bleeker, 1862; *Spectracanthicus* Isbrücker & Nijssen, 1987.

Hypostomini: *Hypostomus* La Cepède, 1803; *Pterygoplichthys* Gill, 1858.

Clade "Peckoltia": *Ancistomus* Isbrücker & Seidel, 2001; *Aphanotorulus* Isbrücker & Nijssen, 1983; *Etsaputu* Lujan, Armbruster & Rengifo, 2011; *Hypancistrus* Isbrücker & Nijssen, 1991; *Isorineloricaria* Isbrücker, 2000; *Micracanthicus* Lujan & Armbruster, 2011; *Peckoltia* Miranda Ribeiro, 1912; *Scobinancistrus* Isbrücker & Nijssen, 1989.

DIPLOMYSSTOIDEI *sensu* Sullivan, Lundberg & Hardman 2006

Diplomystidae Eigenmann, 1890 (primitieve meervallen / oermeervallen / Primitivwelse / diplomystid catfishes / Patagonian catfishes / velvet catfishes) {>84 Ma Campanian}: *Diplomystes* Bleeker, 1858.

SILUROIDEI (SILUROID FISHES) *sensu* Sullivan, Lundberg & Hardman, 2006 {>84 Ma Campanian; age 75-86 Ma}

Cetopoidea

Cetopsidae Bleeker, 1858 (cetopsids)

Helogeninae Regan, 1911 (Fähnchenwelse / helogeneid catfishes / marbled catfishes): *Helogenes* Günther, 1863.

Cetopsinae (walvismeeervallen / whalelike catfishes / cetopsines):

Cetopsidiini de Pinna, Ferraris & Vari, 2007: *Cetopsisidium* Vari, Ferraris & de Pinna, 2005.

Denticetopsini de Pinna, Ferraris & Vari, 2007: *Denticetopsis* Ferraris, 1996.

Cetopsini: *Cetopsis* Agassiz, 1829; *Paracetopsis* Bleeker, 1862.

Plotosidae Bleeker, 1858 (puntstaartmeervallen / palingstaartmeervallen / Aalschwanzwelse / Spitzschwanzwelse / eeltail catfishes / tandans / catfish eels) [this family includes not listed marine genera]: *Anodontiglanis* Rendahl, 1922; *Cnidoglanis* Günther, 1864; *Euristhmus* Ogilby, 1899; *Neosiluroides* Allen & Feinberg, 1998; *Neosilurus* Steindachner, 1867; *Oloplotosus* Weber, 1913; *Paraplotosus* Bleeker, 1863; *Plotosus* La Cepède, 1803; *Porochilus* Weber, 1913; *Tandanus* Mitchell, 1838.

Chacidae Bleeker, 1858 (grootbekmeervallen / Großkopfwelse / Großmaulwelse / squarehead catfishes / frogmouth catfishes): *Chaca* Gray, 1831.

Bagroidea

Lacantuniidae Rodiles-Hernández, Hendrickson & Lundberg, 2005 (Chiapas meervallen / Chiapas Welse / Chiapas catfishes) {age 81-83 Ma}: *Lacantunia* Rodiles-Hernández, Hendrickson & Lundberg, 2005.

Bagridae Bleeker, 1858 (stekelmeervallen / Stachelwelse / Bagriden / bagrid catfishes) {>56 Ma Early Eocene; age 59 Ma}

Bagriniae: *Bagrichthys* Bleeker, 1857; *Bagroides* Bleeker, 1851; *Bagrus* Bosc, 1816; *Batasio* Blyth, 1860; *Hemibagrus* Bleeker, 1862; *Hemileiocassis* Ng & Lim, 2000; *Hyalobagrus* Ng & Kottelat, 1998; *Leiocassis* Bleeker, 1857; *Mystus* Scopoli, 1777; *Nanobagrus* Mo, 1991; *Olyra* McClelland, 1842; *Pseudomystus* Jayaram, 1968; *Sperata* Holly, 1939; *Sundolyra* Ng et al., 2015; *Tachysurus* La Cepède, 1803.

Ritinae Bleeker, 1862 [or as a family ?]: *Rita* Bleeker, 1853.

Horabagridae Jayaram, 2006 (Aziatische stekelmeervallen / Asiatische Stachelwelse / imperial catfishes / Asian schilbids): *Horabagrus* Jayaram, 1955; *Pachypterus* Swainson, 1838; *Platytropius* Hora, 1937; *Pseudeutropius* Bleeker, 1862.

Ailiidae Bleeker, 1858 (Aziatische glasmeervallen / Asiatische Glaswelse / Asian schilbeids): *Ailia* Gray, 1830; *Clarias* Swainson, 1838; *Eutropichthys* Bleeker, 1862; *Laides* Jordan, 1919; *Proeutropiichthys* Hora, 1937; *Silonia* Swainson, 1838.

Sisoroidea (sisorides)

Akysidae Gill, 1861 (beekmeervallen / Strömungswelse / stream catfishes / Asian banjo catfishes / warty catfishes)

Akysinae: *Akysis* Bleeker, 1858; *Pseudobagarius* Ferraris, 2007.

Parakysinae Roberts, 1989 (wrattenmeervallen / Warzenwelse / parakysid catfishes / pustulous catfishes)

Parakysini: *Parakysis* Herre, 1940.

Acrochordonichthyini de Pinna, 1996: *Acrochordonichthys* Bleeker, 1857; *Breitensteinia* Steindachner, 1881.

Amblycipitidae Day, 1873 (slanke meervallen / Schlankwelse / Asiatische Schmerlenwelse / torrent catfishes / loach catfishes) [some genera in Akysidae?]: *Amblyceps* Blyth, 1858; *Liobagrus* Hilgendorf,

1878; *Nahangbagrus* Nguyen & Vo, 2005; *Xiurenbagrus* Chen & Lundberg, 1995.

Sisoridae Bleeker, 1858 (Aziatische stroomversnelingsmeervallen / zuigmeervallen / Saugwelse / sisoid catfishes / Asian hillstream catfishes) {>23 Ma Early Miocene}

Glyptosterninae Gill, 1861 (Aziatische zuigmeervallen / Haftwelse / sucking catfishes / Asian sucker catfishes / glyptosternoids) {age 6-8 Ma}: *Chimarrichthys* Sauvage, 1874; *Creteuchiloglanis* Zhou, Li & Thomson, 2011; *Exostoma* Blyth, 1860; *Glaridoglanis* Norman, 1925; *Glyptosternon* McClelland, 1842; *Myersglanis* Hora & Silas, 1952; *Oreoglanis* Smith, 1933; *Parachiloglanis* Wu, He & Chu, 1981; *Pareuchiloglanis* Pellegrin, 1936; *Pseudecheneis* Blyth, 1860; *Pseudexostoma* Chu, 1979.

Sisorinae (sisorines)

Bagariini Günther, 1864: *Bagarius* Bleeker, 1853, *Glyptothonax* Blyth, 1860.

Erethistini Bleeker, 1862 (nachtuilmeervallen / Nacht falterwelse / moth catfishes): *Ayarnangra* Roberts, 2001; *Caelatoglanis* Ng & Kottelat, 2005; *Conta* Hora, 1950; *Erethistes* Müller & Troschel, 1849; *Erethistoides* Hora, 1950; *Pseudolaguvia* Misra, 1976.

Sisorini (sisorins)

Sisorina: *Sisor* Hamilton, 1822.

Nangrina de Pinna 1996: *Gagata* Bleeker, 1858; *Gogangra* Roberts, 2001; *Nangra* Day, 1877.

Siluroidea

Siluridae Rafinesque, 1815 (Euraziatische meervallen / Echte Welse / sheet catfishes / silurid catfishes) {>11 Ma Middle Miocene / Tortonian}: *Belodontichthys* Bleeker, 1857; *Ceratoglanis* Myers, 1938; *Hemisilurus* Bleeker, 1857; *Kryptopterus* Bleeker, 1857; *Micronema* Bleeker, 1857; *Ompok* La Cepède, 1803; *Phalacronotus* Bleeker, 1857; *Pinniwallago* Gupta, Jayaram & Hajela, 1981; *Pterocryptis* Peters, 1861; *Silurichthys* Bleeker, 1856; *Silurus* Linnaeus, 1758; *Wallago* Bleeker, 1851; *Wallagonia* Myers, 1938.

Kryptoglanidae Britz, Kakkassery & Raghavan, 2014 (Indiaasche grotmeervallen / Indian cave catfishes): *Kryptoglanis* Vincent & Thomas, 2011.

Doradoidea (doradides) {>112 Ma; age 93-96 Ma}

Aspredinidae Adams, 1854 (braadpanmeervallen / banjomeervallen / Bratpfannenwelse / Banjowelse / Plattekopfwelse / banjo catfishes) {age 65 Ma}: *Acanthobunocephalus* Friel, 1995; *Amaralia* Fowler, 1954; *Aspredinichthys* Bleeker, 1858; *Aspredo* Scopoli, 1777; *Bunocephalus* Kner, 1855; *Dupouyichthys* Schultz, 1944; *Ernstichthys* Fernández-Yépez, 1953; *Hoplomyzon* Myers, 1942; *Micromyzon* Friel & Lundberg, 1996; *Platystacus* Bloch, 1794; *Pseudobunocephalus* Friel, 2008; *Pterobunocephalus* Fowler, 1943; *Xyliphius* Eigenmann, 1912.

Auchenipteridae Bleeker, 1862 (camouflagemeervallen / Trugdornwelse / Falsche Dornwelse / auchenipterid catfishes)

Centromochlinae Bleeker, 1862: *Centromochlus* Kner, 1857; *Gelanoglanis* Böhlke, 1980; *Glanidium* Lütken, 1874; *Tatia* Miranda Ribeiro, 1911.

Auchenipterinae

Pseudauchenipterini Bleeker, 1862: *Asterophysus* Kner, 1857; *Liosomadoras* Fowler, 1940; *Pseudauchenipterus* Bleeker, 1862; *Pseudotatia* Mees, 1974; *Tocantinsia* Mees, 1974.

Trachelyopterini Bleeker, 1858 (drijfhoutmeervallen / driftwood catfishes): *Auchenipterichthys* Bleeker, 1862; *Parauchenipterus* Bleeker, 1862; *Trachelyichthys* Mees, 1974; *Trachelyopterichthys* Bleeker, 1862; *Trachelyopterus* Valenciennes, 1840; *Trachycorystes* Bleeker, 1858.

Auchenipterini: *Ageneiosus* La Cepède, 1803; *Auchenipterus* Valenciennes, 1840; *Entomocorus* Eigenmann, 1917; *Epapterus* Cope, 1878; *Pseudepapterus* Steindachner, 1915; *Spinipterus* Akama & Ferraris, 2011; *Tetranematicthys* Bleeker, 1862; *Tympanopleura* Eigenmann, 1912.

Doradidae Bleeker, 1858 (doornmeervallen / Dornwelse / thorny catfishes) {>65 Ma Maastrichtian}

Wertheimerinae Birindelli, 2014 (Oost-Braziliaanse doornmeervallen / Eastern Brazil thorny cats): *Franciscodoras* Eigenmann, 1925; *Kalyptodoras* Higuchi, Britski & Garavello, 1990; *Wertheimeria* Steindachner, 1876.

Astrodonadinae Higuchi, Birindelli, Sousa & Britski, 2007 (veerbaarddraad-doornmeervallen / fimbriate-barbel thorny cats): *Acanthodoras* Bleeker, 1862; *Agamyxis* Cope, 1878; *Amblydoras* Bleeker, 1862; *Anadoras* Eigenmann, 1925; *Astrodonas* Bleeker, 1862; *Hypodoras* Eigenmann, 1925; *Scorpidoras* Eigenmann, 1925.

Doradinae

“Centrochir clade”: *Centrochir* Agassiz, 1829; *Platydoras* Bleeker, 1862.

“Lithodoras clade”: *Centrodoras* Eigenmann, 1925; *Doraops* Schultz, 1944; *Lithodoras* Bleeker, 1862; *Megalodoras* Eigenmann, 1925; *Pterodoras* Bleeker, 1862.

“Rhinodoras clade”: *Orinocodoras* Myers, 1927; *Rhinodoras* Bleeker, 1862; *Rhynchodoras* Klausewitz & Rössel, 1961.

Doradini: *Anduzedoras* Fernández-Yépez, 1968; *Doras* La Cepède, 1803; *Hassar* Eigenmann & Eigenmann, 1888; *Hemidoras* Bleeker, 1858; *Leptodoras* Boulenger, 1898; *Nemadoras* Eigenmann, 1925; *Ossancora* Birindelli & Sabaj Pérez, 2011; *Oxydoras* Kner, 1855; *Tenellus* Birindelli, 2014; *Trachydoras* Eigenmann, 1925.

Pimelodoidea {age 80 Ma}

“Conorhynchos clade”: *Conorhynchos* Bleeker, 1858.

Heptapteridae Gill, 1861 (grondelantennemeervallen / Grundel-Antennenwelse / heptapterid catfishes / heptapterids) {age 80 Ma}: *Acentronichthys* Eigenmann & Eigenmann, 1889; *Brachyglanis* Eigenmann, 1912; *Brachyrhamdia* Myers, 1927; *Cetopsorhamdia* Eigenmann & Fisher, 1916; *Chasmocranus* Eigenmann, 1912; *Gladioglanis* Ferraris & Mago-Leccia, 1989; *Goeldiella* Eigenmann & Norris, 1900; *Heptapterus* Bleeker, 1858; *Horiomyzon* Stewart, 1986; *Imparfinis* Eigenmann & Norris, 1900; *Leptorhamdia* Eigenmann, 1918; *Mastiglanis* Bockmann, 1994; *Myoglanis* Eigenmann, 1912; *Nannoglanis* Boulenger, 1887; *Nemuroglanis* Eigenmann & Eigenmann, 1889; *Pariolius* Cope, 1872; *Phenacorhamdia* Dahl, 1961; *Pimelodella* Eigenmann & Eigenmann, 1888; *Rhamdella* Eigenmann & Eigenmann, 1888; *Rhamdia* Bleeker, 1858; *Rhamdioglanis* Ihering, 1907; *Rhamdiopsis* Haseman, 1911; *Taunayia* Miranda Ribeiro, 1918.

Phreatobiidae Reichel, 1927 (ondergrondse meervallen / cistern catfishes) {age 40 Ma}: *Phreatobius* Goeldi, 1905.

Pimelodidae Bonaparte, 1835 (antennemeervallen / Antennenwelse / long-whiskered catfishes / antenna catfishes / pimelodids) {>23 Ma Miocene; age 56 Ma} [subfamilies tentative]

“primitive pimelodids” (phractocephaline catfishes) {>23 Ma Miocene}: *Leiarius* Bleeker, 1862; *Phractocephalus* Agassiz, 1829; *Steindachneridion* Eigenmann & Eigenmann, 1919; *Zungaropsis* Steindachner, 1908.

Sorubinae Swainson, 1838 (spatelmeevallen / reuzenspatelmeevallen / Spatelwelse / Riesen-Antennenwelse / shovelnosed catfishes / sorubimine catfishes / sorubimines / goliath catfishes) {age 38 Ma}: *Brachyplatystoma* Bleeker, 1862; *Hemisorubim* Bleeker, 1862; *Hypophthalmus* Cuvier, 1829; *Platynematichthys* Bleeker, 1858; *Platysilurus* Haseman, 1911; *Platystomatichthys* Bleeker, 1862; *Pseudoplatystoma* Bleeker, 1862; *Sorubim* Cuvier, 1829; *Sorubimichthys* Bleeker, 1862; *Zungaro* Bleeker, 1858.

Calophysinae Eigenmann, 1890 (snoekantennemeervallen / Hechtantennenwelse / calophysines) {age 35 Ma}: *Aguarunichthys* Stewart, 1986; *Calophysus* Müller & Troschel, 1842; *Cheirocerus* Eigenman, 1917; *Luciopimelodus* Eigenmann & Eigenmann, 1888; *Megalonema* Eigenmann, 1912; *Pimelodina* Steindachner, 1876; *Pinirampus* Bleeker, 1858.

Pimelodinae (antennemeervallen / pimelodines) {age 31 Ma}: *Bagropsis* Lütken, 1874; *Bergiaria* Eigenmann & Norris, 1901; *Duopalatinus* Eigenmann & Eigenmann, 1888; *Exallodontus* Lundberg, Mago-Leccia & Nass, 1991; *Iheringichthys* Eigenmann & Norris, 1900; *Parapimelodus* La Monte, 1933; *Pimelabditus* Parisi & Lundberg, 2009; *Pimelodus* La Cepède, 1803; *Propimelodus* Lundberg & Parisi, 2002.

Pseudopimelodidae Fernández-Yépez & Antón, 1966 (gemarmerde dwergmeervallen / Marmorwelse / bumblebee catfishes / dwarf marbled catfishes / pseudopimelodid catfishes) {>22 Ma Burdigalian; age 48 Ma}: *Batrochoglanis* Gill, 1858; *Cephalosilurus* Haseman, 1911; *Cruciglanis* Ortega-Lara & Lehmann, 2006; *Lophiosilurus* Steindachner, 1877; *Microglanis* Eigenmann, 1912; *Pseudopimelodus* Bleeker, 1858.

Clarioidea

Clariidae Bonaparte, 1845 (kieuwzakmeervallen / roofmeervallen / Sackkiemer / Froschwelse / Raubwelse / Kiemensackwelse / Büschelwelse / Froschwelse/ airbreathing catfishes / labyrinth catfishes / walking catfishes / gillsac catfishes) {>38 Ma Eocene; age 56-123 Ma}: *Channallabes* Günther, 1873; *Clariallabes* Boulenger, 1900; *Clarias* Scopoli, 1777; *Clariooides* Teugels, 1982; *Dinotopterus* Boulenger, 1906; *Dolichallabes* Poll, 1942; *Encheloclarias* Myers, 1937; *Gymnallabes* Günther, 1867; *Heterobranchus* Geoffroy St. Hilaire, 1809; *Horaglanis* Menon, 1950; *Phagorus* McClelland, 1844; *Platyallabes* Poll, 1977; *Platyclarias* Poll, 1977; *Tanganikallabes* Poll, 1943; *Uegitglanis* Gianferrari, 1923.

Heteropneustidae Hora, 1936 (Aziatische kieuwzakmeervallen / Kiemensackwelse / South Asian airsac catfishes): *Heteropneustes* Müller, 1840.

Arioidea {>68 Ma Early Maastrichtian; age 77 Ma}

Ariidae Bleeker, 1858 (zeemeervallen / Maulbrüterwelse / Kreuzwelse / sea catfishes / forktail catfishes / crucifix catfishes / ariids) {>84 Ma Campanian; age 77 Ma} [this family includes two not listed marine subfamilies]

Ariinae (brakwatermeervallen / ariins) {age 64 Ma} [this subfamily includes not listed marine genera]: *Amissidens* Kailola, 2004; *Amphiarius* Marceniuk & Menezes, 2007; *Arius* Valenciennes, 1840; *Batrachocephalus* Bleeker, 1846; *Brustarius* Herre, 1935; *Carlarius* Marceniuk & Menezes, 2007; *Cathorops* Jordan & Gilbert, 1883; *Cephalocassis* Bleeker, 1857; *Cinetodus* Ogilby, 1898; *Cochlefelis* Whitley, 1941; *Cryptarius* Kailola, 2004; *Doiichthys* Weber, 1913; *Genidens* Castelnau, 1855; *Hemiaricus* Bleeker, 1862; *Ketengus* Bleeker, 1847; *Nedystoma* Ogilby, 1898; *Nemapteryx* Ogilby, 1908; *Neoarius* Castelnau, 1878; *Notarius* Gill, 1863; *Osteogeneiosus* Bleeker, 1846; *Pachyula* Ogilby, 1898; *Plicofollis* Kailola, 2004; *Potamarius* Hubbs & Miller, 1960; *Potamosilurus* Marceniuk & Menezes, 2007; *Sciades* Müller & Troschel, 1849.

Anchariidae Glaw & Vences, 1994 (Malagasiche meervallen / Madagaskar Welse / Malagasy catfishes / anchariid catfishes) {age 77 Ma}: *Ancharius* Steindachner, 1880; Gogo Ng & Sparks, 2005.

Astroglanididae Mo, 1991 (Zuidafrikaanse meervallen / rotsmeervallen / Felsenwelse / Südafrikanische Welse / Südelse / austroglanidid catfishes / rock catfishes): *Astroglanis* Skelton, Risch & de Vos, 1984.

Pangasiidae Bleeker, 1858 (haaimeervallen / reuzenmeervallen / Riesenwelse / Haiwelse / pangasiid catfishes / shark catfishes) {? >38 Ma Eocene; age 76 Ma}: *Helicophagus* Bleeker, 1857; *Pangasianodon* Chevey, 1931; *Pangasius* Valenciennes, 1840; *Pseudolais* Vaillant, 1902.

Ictaluroidea (ictalurides) {age 70-85 Ma}

Cranoglanididae Myers, 1931 (Chinese meervallen / Chinesische Welse / armorhead catfishes / Chinese catfishes): *Cranoglanis* Peters, 1881.

Ictaluridae Gill, 1861 (katmeervallen / Katzenwelse / North American freshwater catfishes) {>63 Ma Early Paleocene / Thanetian; age 41 Ma}: *Ameiurus* Rafinesque, 1820; *Ictalurus* Rafinesque, 1820; *Noturus* Rafinesque, 1818; *Prietella* Carranza, 1954; *Pylodictis* Rafinesque, 1819; *Satan* Hubbs & Bailey, 1947; *Trogloglanis* Eigenmann, 1919.

clade “Big Africa”

Amphilidae Regan, 1911 (Afrikaanse stroomversnellingsmeervallen / kuilwangmeervallen / Bergwelse / Kaulquappenwelse / Afrikaansche Harnischwelse / mountain catfishes / African hillstream catfishes / loach catfishes)

Amphiliiinae (amphiliiin catfishes): *Amphilius* Günther, 1864; *Paramphilius* Pellegrin, 1907.

Doumeinae Regan, 1911 (slanke Afrikaanse stroomversnellingsmeervallen / Afrikaansche Peitschenwelse / doumein catfishes / African armoured catfishes): *Andersonia* Boulenger, 1900; *Belonoglanis* Boulenger, 1902; *Congoglanis* Ferraris, Vari & Skelton, 2011; *Doumea* Sauvage, 1879; *Phractura* Boulenger, 1900; *Trachyglanis* Boulenger, 1902.

Leptoglaninae Roberts, 2003 (zandbabertjes / sand catlets / leptoglanid catfishes): *Dolichamphilius* Roberts, 2003; *Leptoglanis* Boulenger, 1902; *Psammophiletria* Roberts, 2003; *Tetracamphilius* Roberts, 2003; *Zaireichthys* Roberts, 1967.

Malapteruridae Bleeker, 1858 (siddermeervallen / Zitterwelse / Elektrische Welse / electric catfishes): *Malapterurus* La Cepède, 1803; *Paradoxoglanis* Norris, 2002.

Mochokidae Regan, 1912 (baardmeervallen / Mochokiden / Fiederbartwelse / mochokid catfishes / squeakers / upside-down catfishes) {>34 Ma Early Oligocene}

Mochokinae (rugzwemmers / rugzwemmende meervallen / Fiederbartwelse / squeakers) {>23 Ma Early Miocene; age 35 Ma}: *Acanthocleithron* Nichols & Griscom, 1917; *Microsynodontis* Boulenger, 1903; *Mochokiella* Howes, 1980; *Mochokus* Joannis, 1835; *Synodontis* Cuvier, 1816.

Chiloglanidinae Vigliotta, 2008 (zuigmondbaardmeervallen / Afrikaanse zuigmeervallen / Afrikasaugwelse / African suckermouths / suckermouthed mochokids)

Chiloglanidini (insektenetende zuigmondbaardmeervallen / invertebrates-eating African suckermouths): *Chiloglanis* Peters, 1868.

Atopochilini Vigliotta, 2008 (omnivore zuigmondbaardmeervallen / algenschrapende Afrikaanse zuigmeervallen / omnivorous African suckermouths): *Atopochilus* Sauvage, 1879; *Atopodontus* Friel & Vigliotta, 2008; *Euchilichthys* Boulenger, 1900.

Claroteidae Bleeker, 1862 (Afrikaanse stekelmeervallen / Claroteiden / Afrikanische Stachelwelse / claroteid catfishes) {>59 Ma Early Eocene; age 48 Ma}

Claroteinae (knormeervallen / Grunzwelse / grunters) {>46 Ma Eocene}: *Amarginops* Nichols & Griscom, 1917; *Bathybagrus* Bailey & Stewart, 1984; *Chrysichthys* Bleeker, 1858; *Clarotes* Kner, 1855; *Gephyroglanis* Boulenger, 1899; *Lophiobagrus* Poll, 1942; *Phyllumenmus* Boulenger, 1906.

Achenoglanidinae Jarayam, 1966 (stofzuigermeervallen / Flachkopfwelse / flatnose catfishes) {>5 Ma late Miocene}: *Achenoglanis* Günther, 1865; *Notoglanidium* Günther, 1903; *Parauchenoglanis* Boulenger, 1911.

Schilbeidae Bleeker, 1858 (Afrikaanse glasmeervallen / botermeervallen / Eigentliche Glaswelse / Afrikanische Glaswelse / schilbeid catfishes / butter catfishes / schilbids) {>5 Ma late Miocene; age 20 Ma}: *Irvineia* Trewavas, 1943; *Parailia* Boulenger, 1899; *Pareutropius* Regan, 1920; *Schilbe* Oken, 1817; *Siluranodon* Bleeker, 1858.

6 cohort: **EUTELEOSTEOMORPHA** sensu Wiley & Johnson, 2010 {>151 Ma Tithonian; age 271 Ma}

6a division: **PROTACANTHOPTERYGII** sensu Zaragueta-Bagils et al., 2002 {>146 Ma Cretaceous; age 270 Ma}

Lepidogalaxiiformes (SALAMANDERVISACTIGEN / LEPIDOGALAXIIFORM FISHES) sensu Betancur-R. et al., 2013 {age 232 Ma}

Lepidogalaxiidae Rosen, 1974 (salamandervissen / Salamanderfische / salamanderfishes): *Lepidogalaxias* Mees, 1961.

Galaxiiformes (ZUIDELIJKE FORELACHTIGEN / HECHTLINGEARTIGE / GALAXIIFORM FISHES) sensu Betancur-R. et al., 2013 {age 148 Ma}

GALAXIOIDEI (ZUIDELIJKE FORELVERWANTEN / HECHTLINGEVERWANDTE / GALAXIOID FISHES) sensu Li et al., 2010

Galaxiidae Müller, 1845 (zuidelijke snoekforellen / Hechtlinge / galaxiids) {>71 Ma late Cretaceous; age 30 Ma}

Aplochitoninae Günther, 1864 (forelsnoeken / Forellenhechtlinge / peladillos / aplochitonines): *Aplochiton* Jenyns, 1842; *Lovettia* McCulloch, 1915.

Galaxiinae (zuidelijke forellen / white bait and mudfishes): *Brachygalaxias* Eigenmann, 1928; *Galaxias* Cuvier, 1816; *Galaxiella* McDowall, 1978; *Neochanna* Günther, 1867; *Paragalaxias* Scott, 1935.

Salmoniformes (ZALMACHTIGEN / LACHSFISCHARTIGE / LACHSÄHNLICHEN / SALMONIFORM FISHES)

sensu Ishiguro et al., 2003 {>84 Ma Campanian; age 97 Ma}

ESOCOIDEI (SNOEKACHTIGEN / HECHTARTIGE / ESOCIFORM FISHES) *sensu* Wilson & Williams, 2010 {>78 Ma upper Campanian; age 97 Ma}

Esocidae Rafinesque, 1815 {>78 Ma upper Campanian; age 66 Ma}

Esocinae (snoeken / Hechte / pikes) {age 56 Ma}: *Esox* Linnaeus, 1758; *Novumbra* Schultz, 1929.

Dalliinae Jordan, 1885 (Fächerfische / blackfishes) {>49 Ma Lutetian}: *Dallia* Bean, 1880.

Umbridae Bonaparte, 1845 (hondsvissen / Hundsfische / mudminnows) {>65 Ma Palaeocene; age 66 Ma}: *Umbra* Kramer, 1777.

SALMONOIDEI (ZALMVERWANTEN / LACHSFISCHVERWANDTE / SALMONOID FISHES) *sensu* Sandford, 2000 {age 59 Ma}

Coregonidae Bonaparte, 1845 (houtingen / Renken / Maränen / whitefishes) {>5 Ma Pliocene; age 47 Ma}: *Coregonus* Linnaeus, 1758; *Prosopium* Jordan, 1878; *Stenodus* Richardson, 1837.

Thymallidae Gill, 1885 (vlagzalmen / Äschen / graylings) {>56 Ma Ypresian; age 47 Ma}: *Thymallus* Linck, 1790.

Salmonidae Jarocki / Schinz, 1822 (zalmfamilie / Lachsfische / Lachsähnliche / trouts, salmons and chars) {>56 Ma Ypresian; age 34 Ma}

Brachymystacinae Tchernavin, 1923 (chars & lenoks): *Brachymystax* Günther, 1866; *Hucho* Günther, 1866.

Salmoninae (zalmen en forellen / Lachsartige / trouts and salmons) {>25 Ma Miocene; age 22 Ma}: *Oncorhynchus* Suckley, 1861; *Parahucho* Vladykov, 1963; *Salmo* Linnaeus, 1758; *Salvelinus* Richardson, 1837.

Osmeriformes (SPIERINGACHTIGEN / STINTEARTIGE / OSMERIFORM FISHES) *sensu* Betancur-R. et al., 2013 {age 129 Ma}

OSMEROIDEI (SPIERINGVERWANTEN / STINTEVERWANDTE / OSMEROID FISHES) *sensu* Li et al., 2010 {>71 Ma late Cretaceous}

Retropinnidae Gill, 1862 (Nieuwzeelandse snoekforellen / Neuseelandlachse / southern white-bait / New Zealand white-bait / New Zealand smelts) {>1 Ma Middle Pleistocene}

Prototroctinae Hubbs, 1952 (zuiderse smelten / southern graylings): *Prototroctes* Günther, 1864.

Retropinninae (zuidelijke spieringen / Finten / southern smelts / New Zealand trouts): *Retropinna* Gill, 1862.

Osmeridae Regan, 1913 (spieringen / Stinte / smelts / osmerids) {>59 Ma Thanetian; age 39 Ma}

Osmerinae (echte spieringen / Echte Stinte / smelts) [this subfamily includes two not listed marine genera]: *Hypomesus* Gill, 1862, *Osmerus* Linnaeus, 1758; *Spirinchus* Jordan & Evermann, 1896; *Thaleichthys* Girard, 1858.

Plecoglossinae Bleeker, 1859 (ayu's / Ayus / ayu fishes) {>10 Ma late Miocene; age 33 Ma}: *Plecoglossus* Temminck & Schlegel, 1846.

Salanginae Bleeker, 1859 (noedelvissen / Nudelfische / icefishes / noodlefishes / Chinese white-bait) {age 14–21 Ma}

Protosalangini Wakiya & Takahasi, 1937: *Neosalangichthys* Fu et al., 2012; *Protosalanx* Regan, 1908.

Salangini: *Parasalanx* Regan, 1908; *Salangichthys* Bleeker, 1860; *Salanx* Cuvier, 1816.

subcohort: **NEOTELEOSTEI** (MODERNE BEENVISSEN / NEUZEITLICHE KNOCHENFISCHE / MODERN BONY FISHES) *sensu* Wiley & Johnson, 2010 {>130 Ma Barremian; age 183 Ma} [7 + 8]

7 subsection: **ACANTHOMORPHATA** (STEKELVINNER / STACHELFLOSSER / SPINY-RAYED FISHES / ACANTHOMORPHS) *sensu* Li *et al.*, 2009 {>98 Ma Cenomanian; age 163 Ma} [this clade includes many orders of marine fishes]

7a division: **PARACANTHOMORPHACEAE** *sensu* Grande, Borden & Smith, 2013 {>98 Ma Cenomanian; age 134 Ma}

Percopsiformes (ZALMBAARSACHTIGEN / BARSCHLACHSARTIGE / PERCOPSIFORM FISHES) {>98 Ma Cenomanian; age 70 Ma} *sensu* Springer & Johnson, 2004

PERCOPSOIDEI (FORELBAARSACHTIGEN / BARSCHLACHSARTIGE / PERCOPSOID FISHES) {age 70 Ma}

Percopsidae Agassiz, 1850 (forelbaarzen / zalmbarzen / baarszalmen / Barschlachse / trout perches and sand rollers) {>56 Ma Ypresian; age 70 Ma}: *Percopsis* Agassiz, 1849.

AMBLYOPSOIDEI (HOLENVISACHTIGEN / BLINFISCHARTIGE / AMBLYOPSOID FISHES) {age 70 Ma}

Aphredoderidae Bonaparte, 1845 (piratenbaarzen / piraatbaarzen / Piratenbarsche / pirate perches) {>38 Ma Priabonian; age 50 Ma}: *Aphredoderus* Lesueur, 1833.

Amblyopsidae Bonaparte, 1845 (holenvissen / olmen / blinde vissen / blinde baarszalmen / Blindfische / Nordamerikanische Höhlenfische / cavefishes) {age 50 Ma}: *Amblyopsis* DeKay, 1842; *Chologaster* Agassiz, 1853; *Forbesichthys* Jordan, 1929; *Speoplatyrrhinus* Cooper & Kuehne, 1974; *Troglichthys* Eigenmann, 1899; *Typhlichthys* Girard, 1859.

Gadiformes (KABELJAUWACHTIGEN / KEELVINNER / DORSCHARTIGE / GADIFORM FISHES) *sensu* Endo, 2002 {>71 Ma late Cretaceous; age 90 Ma}

GADOIDEI (KABELJAUWVERWANTEN / DORSCHVERWANDTE / GADOID FISHES) *sensu* Endo, 2002

Gadidae Rafinesque-Schmaltz, 1810 (kabeljauwen / schelvissen / Dorschfische / Schellfische / codfishes) {>34 Ma Rupelian} [this family includes not listed marine subfamilies]:

Lotinae Bonaparte, 1835 (kwabalen / Quappen / cuskfishes / hakes & burbots) {>34 Ma Rupelian} [this subfamily includes not listed marine genera]: *Lota* Oken, 1817.

Gadinae (kabeljauwen / Dorsche / cods) [this subfamily includes not listed marine genera]:

Microgadus Gill, 1865.

Division: **EUACANTHOMORPHACEA** *sensu* Johnson & Patterson, 1993

8 subdivision: **PERCOMORPHACEAE** {>100 Ma Cenomanian; age 133 Ma} [the relationship of the following series is somewhat controversial]

Series: **Ophidiaria** [Ophidiiformes] + **Batrachoidaria** [Batrachoidiformes] + **Gobiaria** [Gobiiformes] + **Syngnatharia** [Syngnathiformes] + **Pelagiaria** [no freshwater species] + **Anabantaria** [Synbranchiformes, Anabantiformes] + **Carangaria** [Pleuronectiformes] + **Ovalentaria** [Cichliformes, Atheriniformes, Beloniformes, Cyprinodontiformes, Mugiliformes, Blenniiformes] + **Eupercaria** [Uranoscopiformes, Spariformes, Tetraodontiformes, Centrarchiformes, Perciformes]

Ophidiiformes (SLANGVISACTIGEN / EINGEWEIDEFISCHE / CUSK-EELS) *sensu* Nielsen, Cohen, Markle & Robins, 1999

BYTHITOIDEI (BROTULA-VERWANTEN / BROTULA-VERWANDTE / OPHIDIOID FISHES / BYTHITOID FISHES)

Bythitidae Gill, 1861 (levendbarende brotulas / naaldvissen / Lebendgebärende Brotulas / viviparous brotulas) {>84 Ma Campanian}

Bythitinae [this subfamily includes not listed marine genera]: *Lucifuga* Poey, 1858.

Brosmophycinae Gill, 1862 [this subfamily includes a not listed marine tribe]

Dinematichthyini Whitley, 1928 [this tribe includes not listed marine genera]: *Ogilbia* Jordan & Evermann, 1898.

Batrachoidiformes (STEENVISACTIGEN / FROSCHFISCHARTIGE / BATRACHOIDIFORM FISHES) *sensu* Wiley & Johnson, 2010 {age 40 Ma}

Batrachoididae Jordan, 1896 (paddevissen / kikvorsvissen / Froschfische / toadfishes) {>56 Ma Ypresian} [this family includes a not listed marine subfamily]

Thalassophryninae Miranda Ribeiro, 1915 (giftige tweestekelpaddevissen / Krötenfische / venomous toadfishes / twospine toadfishes): *Daector* Jordan & Evermann, 1898; *Thalassophryne* Günther, 1861.

Batrachoidinae (driestekelpaddevissen van de nieuwe wereld / Amerikanische Dreistachel-froschfische / New World threespine toadfishes) {>25 Ma Miocene} [this subfamily includes not listed marine genera]: *Batrachoides* La Cepède, 1800; *Potamobatrachus* Collette, 1995.

Halophryninae Greenfield, Winterbottom & Collette, 2008 (driestekelpaddevissen van de oude wereld / Indische Dreistachelfroschfische / Old World threespine toadfishes) {>14 Ma Middle Miocene} [this subfamily includes not listed marine genera]: *Allenbatrachus* Greenfield, 1997; *Batrachomoeus* Ogilby, 1908; *Halophryne* Gill, 1863.

Gobiiformes (ZEEGRONDELACHTIGEN / GRUNDELARTIGE / MEERGRUNDELARTIGE / GOBIIFORM FISHES) *sensu* Thacker, 2009 {age 102 Ma}

KURTOIDEI *sensu* Thacker, 2009 {age 102 Ma}

Kurtidae Bleeker, 1859 (verpleegvissen / kambaarzen / Kurter / nurseryfishes / forehead brooders): *Kurtus* Bloch, 1786.

Apogonidae Günther, 1859 (kardinaalbaarzen / Kardinalbarsche / cardinalfishes) {>86 Ma Santonian} [this family includes not listed marine subfamilies]

Apogoninae [this subfamily includes not listed marine tribes]

Glossamiini Fraser & Mabuchi, 2014: *Glossamia* Gill, 1863; *Yarica* Whitley, 1930.

Zoramiiini Fraser & Mabuchi, 2014 [this tribe includes a not listed marine genus]: *Fibramia* Fraser & Mabuchi, 2014.

GOBIOIDEI (ZEEGRONDELVERWANTEN / GRUNDELVERWANDTE / MEERGRONDELVERWANDTE / GOBIOID FISHES)
sensu Thacker, 2009 {age 102 Ma}

Odontobutoidea

Rhyacichthyidae Jordan, 1905 (riviergrondels / Schmerlengrundeln / loach gobies) {age 98 Ma}: *Protogobius* Watson & Pollabauer, 1998; *Rhyacichthys* Boulenger, 1901; *Terateleotris* Shibukawa, Iwata & Viravong, 2001.

Odontobutidae Hoese & Gill, 1993 (zoetwaterslaapgrondels / Süßwasserschläfergrundeln / freshwater sleepers / odontobutids) {>5 Ma Pliocene; age 98 Ma}: *Micropercops* Fowler & Bean, 1920; *Neodontobutis* Chen, Kottelat & Wu, 2002; *Odontobutis* Bleeker, 1874; *Percottus* Dybowski, 1877; *Sineleotris* Herre, 1940.

Milyeringidae Whitley, 1945 (zoetwatergrottengrondels / Süßwasser-Höhlengrundeln / freshwater cave gobies) {age 77 Ma}: *Milyeringa* Whitley, 1945; *Typhleotris* Petit, 1933.

Eleotroidea

Eleotridae Bonaparte, 1835 (slaapgrondels / Schläfergrundeln / sleepers / gudgeons / bullies) {>34 Ma Rupelian; age 92 Ma} [this family includes not listed marine genera]: *Allomogurnda* Allen, 2003; *Belobranchus* Bleeker, 1856; *Bunaka* Herre, 1927; *Dormitator* Gill, 1861; *Eleotris* Scopoli, 1777; *Giuris* Sauvage, 1880; *Gobiomorphus* Gill, 1863; *Gobiomorus* La Cepède, 1800; *Guavina* Bleeker, 1874; *Hemieleotris* Meek & Hildebrand, 1916; *Hypseleotris* Gill, 1863; *Kimberleyeleotris* Hoese & Allen, 1987; *Leptophilypnion* Roberts, 2013; *Leptophilypnus* Meek & Hildebrand, 1916; *Microphilypnus* Myers, 1927; *Mogurnda* Gill, 1863; *Philypnodon* Bleeker, 1874; *Ratsirakia* Maugé, 1984; *Tateurndina* Nichols, 1955.

Butidae Bleeker, 1874 (Afro-aziatische slaapgrondels / gudgeons) {>38 Ma Oligocene; age 99 Ma}: *Bostrychus* La Cepède, 1801; *Butis* Bleeker, 1856; *Incara* Rao, 1971; *Kribia* Herre, 1946; *Odonteleotris* Gill, 1863; *Ophiocara* Gill, 1863; *Oxyeleotris* Bleeker, 1874; *Parviparma* Herre, 1927; *Pogoneleotris* Bleeker, 1875; *Prionobutis* Bleeker, 1874.

Gobioidea

Gobionellidae Bleeker, 1874 (zoet- en brakwatergrondels / Brackwassergrundeln / gobionellids) {>38 Ma Priabonian; age 49 Ma} [subfamilies and tribes tentative]

"sand gobies" {age 38 Ma} [this clade includes not listed marine genera]: *Economidichthys* Bianco, Bullock, Miller & Roubal, 1987; *Hyrcanogobius* Iljin, 1928; *Knipowitschia* Iljin, 1927; *Pomatoschistus* Gill, 1863.

Brachygobiinae Bleeker, 1874 (mugilogobiins) {age 49 Ma} [this subfamily includes a not listed marine genus]: *Brachygobius* Bleeker, 1874; *Caecogobius* Berti & Ercolini, 1991; *Chlamydogobius* Whitley, 1930; *Eugnathogobius* Smith, 1931; *Gobiopterus* Bleeker, 1874; *Hemigobius* Bleeker, 1874; *Mistichthys* Smith, 1902; *Mugilogobius* Smitt, 1900; *Pandaka* Herre, 1927; *Pseudogobiopsis* Koumans, 1935; *Pseudogobius* Popa, 1922; *Redigobius* Herre, 1927; *Stigmatogobius* Bleeker, 1874; *Tamanka* Herre, 1927; *Tasmanogobius* Scott, 1935; *Wuhanlinigobius* Huang, Zeehan & Chen, 2014.

Tridentigerinae Gill, 1859 (Northern Pacific lineage / acanthogobiins) {age 38 Ma} [this clade includes not listed marine genera]: *Acanthogobius* Gill, 1859; *Chaenogobius* Gill, 1859; *Clevelandia* Eigenmann & Eigenmann, 1888; *Eucyclogobius* Gill, 1862; *Gillichthys* Cooper, 1864; *Gymnogobius* Gill, 1863; *Leucopsarion* Hilgendorf, 1880; *Luciogobius* Gill, 1859; *Papuligobius* Chen & Kottelat, 2003; *Rhinogobius* Gill, 1859; *Tridentiger* Gill, 1859; *Typhlogobius* Steindachner, 1879.

Gobionellinae (dwerggrondels / Zwergrundeln / dwarf gobies) {age 38 Ma}

Gobionellini [this tribe includes not listed marine genera]: *Awaous* Valenciennes, 1837; *Ctenogobius* Gill, 1858; *Evorthodus* Gill, 1859; *Gobioides* La Cepède, 1800; *Gobionellus* Girard, 1858; *Oligolepis* Bleeker, 1874; *Oxyurichthys* Bleeker, 1857; *Parawaous* Watson, 1993; *Pseudorhinogobius* Zhong & Wu, 1998; *Stenogobius* Bleeker, 1874.

Sicydiini Gill, 1860 (eilandgrondeltjes / tandlipgrondels / Lippenzahngrundeln / Inselgrundeln / sicydiine Grundeln / rock-climbing gobies / cling gobies / island gobies) {age 6-12 Ma}: *Akihito* Watson, Keith & Marquet, 2007; *Cotylopus* Guichenot, 1863; *Lentipes* Günther, 1861; *Parasicydium* Risch, 1980; *Sicydium* Valenciennes, 1837; *Sicyopterus* Gill, 1860; *Sicyopus* Gill, 1863; *Smilosicyopus* Watson, 1999; *Stiphodon* Weber, 1895.

Oxudercinae Günther, 1861 (slijkgroندels / slijkspringers / Schlammgrundeln / Schlammspringer / mudskippers / oxudercines) {age 38 Ma} [this subfamily includes not listed marine genera]

Oxudercini: *Apocryptes* Valenciennes, 1837; *Apocryptodon* Bleeker, 1874; *Boleophthalmus* Valenciennes, 1837; *Oxuderces* Eydoux & Souleyet, 1850; *Parapryptes* Bleeker, 1874; *Periophthalmodon* Bleeker, 1874; *Periophthalmus* Bloch, 1801; *Pseudapryptes* Bleeker, 1874;

Scartelaos Swainson, 1839; *Zappa* Murdy, 1989.

Amblyopini Günther, 1861 (aalgrondels / Aalgrundeln / eel gobies / mud-burrowing gobies / amblyopines / amblyopine gobies) [this tribe includes not listed marine genera]: *Brachyamblyopus* Bleeker, 1874; *Caragobius* Smith & Seale, 1906; *Gymnoamblyopus* Murdy & Ferraris, 2003; *Odontamblyopus* Bleeker, 1874; *Paratrypauchen* Murdy, 2008; *Pseudotrypauchen* Hardenberg, 1931; *Taeniodes* La Cepède, 1800; *Trypauchen* Valenciennes, 1837; *Trypauchenichthys* Bleeker, 1860; *Trypauchenopsis* Volz, 1903.

Gobiidae Cuvier, 1816 (zeegrondels / Meergrundeln / Haftgrundeln / Grundeln / gobies / transverse gobiids) {>38 Ma Priabonian / Late Eocene; age 49 Ma} [subfamilies, tribes and clades tentative]

“inshore gobies” (kust zeegrondels / inshore gobies) {age 46 Ma} [this clade includes not listed marine genera]: *Bathygobius* Bleeker, 1878; *Glossogobius* Gill, 1859; *Psammogobius* Smith, 1935; *Schismatogobius* de Beaufort, 1912.

“lagoon gobies” (lagune zeegrondels / lagoon gobies) {age 36 Ma} [this clade includes not listed marine genera]: *Acentrogobius* Bleeker, 1874; *Afurcagobius* Gill, 1993; *Amoya* Herre, 1927; *Aulopareia* Smith, 1945; *Drombus* Jordan & Seale, 1905; *Exyrias* Jordan & Seale, 1906; *Favonigobius* Whitley, 1930; *Gobiopsis* Steindachner, 1861; *Istigobius* Whitley, 1932; *Porogobius* Bleeker, 1874; *Silhouettea* Smith, 1959; *Yongeichthys* Whitley, 1932.

Gobiodontinae Bleeker, 1874 (kuifzeegrondels / dartfishes and flapcrested gobies / hovering gobies) {age 48 Ma} [this subfamily includes not listed marine genera]

Clade (flapjeskop zeegrondels / flapheaded gobies) {age 42 Ma}: *Mangarinus* Herre, 1943.

Clade (gekuifde zeegrondels / crested gobies) {age 47 Ma}: *Cristatogobius* Herre, 1927; *Gladiogobius* Herre, 1933; *Lophogobius* Gill, 1862.

Ptereleotrinae Bleeker, 1875 (torpedo-grondels / dart-gobies) {age 44 Ma}: *Parioglossus* Regan, 1912.

Gobiinae (Middelandse Zee en Atlantische zeegrondels / Europeesche en Afrikaanse zeegrondels / Mediterranean and Eastern Atlantic gobies / transverse gobies) {>38 Ma Eocene; age 45 Ma} [this subfamily includes not listed marine genera]: *Chromogobius* de Buen, 1930; *Croilia* Smith, 1955; *Ebomegobius* Herre, 1946; *Gobius* Linnaeus, 1758; *Nematogobius* Boulenger, 1910.

Benthophilinae Beling & Iljin, 1927 (Ponto-Caspian gobies) {age 42 Ma}

Benthophilini (padgrondels / tadpole gobies / benthophilins) {age 10 Ma} [this tribe includes a not listed marine genus]: *Benthophiloides* Beling & Iljin, 1927; *Benthophilus* Eichwald, 1831; *Caspisoma* Iljin, 1927.

Neogobiini Neilson & Stepien, 2009 (neogobiins) {age 5-6 Ma}: *Neogobius* Iljin, 1927.

Ponticolini Neilson & Stepien, 2009 (ponticolins) {age 5 Ma} [this tribe includes a not listed marine genus]: *Babka* Iljin, 1927; *Mesogobius* Bleeker, 1874; *Padogobius* Berg, 1932; *Ponticola* Iljin, 1927; *Proterorhinus* Smitt, 1900.

Gobiosomatinae Birdsong, 1975 (Amerikaanse zeegrondels / American seven-spined gobies) {age 45 Ma} [this tribe includes not listed marine genera]: *Gobiosoma* Girard, 1858; *Microgobius* Poey, 1876.

Syngnathiformes (ZEENAALDACHTIGEN / SEENADELARTIGE / SYNGNATHIFORM FISHES) *sensu*
Betancur-R. et al., 2013 / Song et al., 2014 {age 95 Ma}

SYNGNATHOIDEI (TROSKIEUWIGEN / SEENADELVERWANDTE / BÜSCHELKIMER / SYNGNATHOID FISHES) *sensu*
Betancur-R. et al., 2013 / Song et al., 2014

Syngnathidae Bonaparte, 1831 (zeenaalden en zeepaardjes / Seenadeln und Seepferdchen / pipefishes and seahorses) {>56 Ma Ypresian; age 40 Ma} [this family includes a not listed marine subfamily]

Syngnathinae (zeenaalden / Seenadeln / pipefishes and flagtail pipefishes) [this subfamily includes not listed marine genera]: *Doryichthys* Kaup, 1856; *Enneacampus* Dawson, 1981; *Hippichthys* Bleeker, 1849; *Ichthyocampus* Kaup, 1853; *Microphis* Kaup, 1853; *Nerophis* Rafinesque-Schmaltz, 1810; *Pseudophallus* Herald, 1940; *Syngnathus* Linnaeus, 1758.

CALLIONYMOIDEI (PITVISVERWANTEN / LEIERFISCHVERWANDTE / CALLIONYMOID FISHES) *sensu* Gosline, 1970
Callionymidae Bonaparte, 1831 (pitvissen / Leierfische / Spinnenfische / dragonets) {>56 Ma Ypresian; age 27 Ma} [this family includes not listed marine genera]: *Callionymus* Linnaeus, 1758; *Repomucenus* Whitley, 1931; *Tonlesapia* Motomura & Mukai, 2006.

Synbranchiformes (KORTSTAARTALEN / KURZSCHWANZAALARTIGE / SYNBRANCHIFORM FISHES) *sensu*
Betancur-R. et al., 2013 {73 Ma}

MASTACEMBELOIDEI (STEKELAALVERWANTEN / STACHELAALVERWANDTE / PFEILSCHNABELVERWANDTE / MASTACEMBELOID EELS) {age 19 Ma}

Chaudhuriidae Annandale, 1918 (moerasstekelalen / regenwormalen / Regenwurmaale / Erdwurmstachelaale / earthworm eels / dwarf eels): *Bihunichthys* Kottelat & Lim, 1994; *Chaudhuria* Annandale, 1918; *Chendol* Kottelat & Lim, 1994; *Garo* Yazdani & Talwar, 1981; *Nagaichthys* Kottelat & Lim, 1991; *Pillaia* Yazdani, 1972.

Mastacembelidae Swainson, 1839 (stekelalen / Stachelaale / Pfeilschnäbel / spiny-eels): *Caecomastacembelus* Poll, 1958; *Macrognathus* La Cepède, 1800; *Mastacembelus* Scopoli, 1777; *Sinobdella* Kottelat & Lim, 1994.

INDOSTOMOIDEI (BUISBEKSTEKELBAARSVERWANTEN / RÖHRENSCHNÄBELVERWANDTE / INDOSTOMOID FISHES) {age 67 Ma}

Indostomidae Prashad & Mukerji, 1929 (buisbekstekelbaarzen / stekelbuisbekvissen / Süßwasser Röhrenschnäbel / indostomids / armored sticklebacks): *Indostomus* Prashad & Mukerji, 1929.

SYNBRANCHOIDEI (KIEUWSPLEETAALVERWANTEN / KIEMENSCHLITZAALVERWANDTE / SYNBRANCHOID FISHES) *sensu* Rosen & Greenwood, 1976 {age 67 Ma}

Synbranchidae Bonaparte, 1835 (kieuwspleetalen / proest-alen / Kiemenschlitzaaale / Kurzschwanzaale / swamp-eels)

Macrotrematinae Rosen & Greenwood, 1976 (primitieve kieuwspleetalen / Primitiv-Kiemenschlitzaaale / primitive swamp-eels): *Macrotrema* Regan, 1912.

Synbranchinae (moerasalen / Sumpfaale / swamp-eels / marsh-eels / ditch eels): *Monopterus* La Cepède, 1800; *Ophisternon* McClelland, 1844; *Synbranchus* Bloch, 1795

Anabantiformes (LABYRINTVISACHTIGEN / KLETTERFISCHARTIGE / ANABANTIFORM FISHES) *sensu* Collins, Britz & Rüber, 2015 {age 70 Ma}

NANDOIDEI (AZIATISCHE BAARSJESVERWANTEN / NANDOID FISHES) {age 64 Ma}

Pristolepididae Regan, 1913 (Indische bladvissen / catopra's / Tiger-Nanderbarsche / pristolepidids / mudperches / Asian sunfishes / tiger nandids): *Pristolepis* Jerdon, 1848.

Nandidae Bleeker, 1852 (Aziatische baarsjes / Aziatische dwergbaarzen / Nander / Asian leaffishes / nandids) {>71 Ma Upper Cretaceous}

Nandinae (nanderbaarzen / Nanderbarsche / nandines): *Nandus* Valenciennes, 1831.

Badinae Barlow, Liem & Wickler, 1968 (blauwe baarsjes / Blaubarsche / chameleon fishes / badises) {age 47 Ma}: *Badis* Bleeker, 1853; *Dario* Kullander & Britz, 2002.

CHANNOIDEI (SLANGENKOPVISVERWANTEN / SLANGENKOPFVERWANDTE / CHANNOID FISHES) *sensu* Britz in Wiley & Johnson, 2010 {age 64 Ma}

Channidae Fowler, 1934 (slangenkopvissen / Schlangenkopffische / Schlangenköpfe / snakeheads) {>56 Ma Ypresian / Early Eocene; age 84–110 Ma}: *Channa* Scopoli, 1777; *Parachanna* Teugels & Daget, 1984.

ANABANTOIDEI (LABYRINTVISVERWANTEN / KLETTERFISCHVERWANDTE / LABYRINTHFISCHE / LABYRINTH-FISHES) *sensu* Rüber, Britz & Zardoya, 2006 {age 63 Ma}

Anabantidae Bonaparte, 1831 (klimbaarzen / Kletterfische / Buschfische / climbing gouramies / climbing perches) {age 33–50 Ma}

Anabantinae (Aziatische klimbaarzen / Kletter-Buschfische / Asiatische Kletterfische / Asiatic climbing perches) {age 28–45 Ma}: *Anabas* Cloquet, 1816.

Ctenopomatinae Cambray, 1997 (Afrikaanse klimbaarzen / Blatt-Buschfische / Buschfische / African climbing perches) {age 33 Ma}: *Ctenopoma* Peters, 1844; *Microctenopoma* Norris, 1995; *Sandelia* Castelnau, 1861.

Helostomatidae Gill, 1872 (kussende goerami's / zoenvissen / zoengoerami's / Buckelmäuler / Küssende Guramis / kissing gouramies) {age 60 Ma}: *Helostoma* Cuvier, 1829.

Osphronemidae van der Hoeven, 1832 (labyrintvissen / Fadenfische / Guramis / gouramies) {>56 Ma Eocene; age 60 Ma}

Belontiinae Liem, 1962 (kamstaartgoerami's / eilandkempvissen / Inselmakropoden / combtail gouramies) {age 28–37 Ma}: *Belontia* Myers, 1923.

Osphroneminae (reuzengoerami's / spijsgoerami's / Riesenguramis / giant gouramies) {>38 Ma Oligocene; age 28–37 Ma}: *Osphronemus* La Cepède, 1801.

Luciocephalinae Bleeker, 1852 (snoekkopgoerami's / draadgoerami's / Hechtköpfe / pikeheads / spiral egg gouramies) {age 20–31 Ma}: *Ctenops* McClelland, 1845; *Luciocephalus* Bleeker, 1850; *Parasphaerichthys* Prashad & Mukerji, 1929; *Sphaerichthys* Canestrini, 1860.

Trichogastrinae Bleeker, 1879 (paradijsvissen / Großflosser / paradise fishes) {age 20–31 Ma}

Trichogastrini (draadgoerami's / echte goerami's / Fadenguramis / threadfishes): *Trichogaster* Bloch, 1801; *Trichopodus* La Cepède, 1801.

Macropodusini Hoedeman, 1948 (kempvissen / Kampffische und Makropoden / fighting fishes): *Betta* Bleeker, 1849; *Macropodus* La Cepède, 1801; *Malpulutta* Deraniyagala, 1937; *Parosphromenus* Bleeker, 1877; *Pseudosphromenus* Bleeker, 1879; *Trichopsis* Canestrini, 1860.

Pleuronectiformes *sensu* Chen, Bonillo & Lecointre, 2003 (carangimorphs) {age 78 Ma} [or Carangiformes, suborders tentative]

POLYNEMOIDEI (DRAADVINVERWANTEN / FEDERFLOSSENVERWANDTE / FÄDLER / POLYNEMOID FISHES)

Polynemidae Rafinesque, 1815 (draadvinnen / Federflossenfische / Fadenflosser / threadfins) {>19 Ma Early Miocene / Burdigalian} [this family includes not listed marine genera]: *Eleutheronema* Bleeker, 1862; *Leptomelanosoma* Motomura & Iwatsuki, 2001; *Parapolynemus* Feltes, 1993; *Polydactylus* La Cepède, 1803; *Polynemus* Linnaeus, 1758.

CARANGOIDEI (HORSMAKREELVERWANTEN / BASTAARDMAKREELVERWANTEN / STACHELMAKRELEVERWANDTE / CARANGOID FISHES / JACKS & POMPANOS) {>71 Ma late Cretaceous; age 75 Ma}

Toxotidae Bleeker, 1859 (schuttermessen / Schützenfische / archerfishes / blowgun fishes / blowpipe fishes) {>49 Ma Lutetian; age 55 Ma}: *Toxotes* Cloquet, 1816.

Centropomidae Poey, 1867 (zeesnoeken / Riesenbarsche / snooks / robalos) {>49 Ma Ypresian; age 58 Ma}

Centropominae (zeesnoeken / Riesenbarsche / snooks / robalos): *Centropomus* La Cepède, 1802.

Latinae Jordan, 1888 (reuzebaarzen / Süßwasser-Riesenbarsche / giant perches) {>49 Ma late Ypresian} [this subfamily includes a not listed marine genus]: *Lates* Cuvier, 1828.

PLEURONECTOIDEI (PLATVISSEN / SCHOLLENVERWANDTE / PLATTFISCHE / FLOUNDERS) *sensu* Chanet, 2003 {>56 Ma Ypresian; age 54 Ma} [this suborder contains a marine superfamily Psettodoidea]

Soleoidea

“Tehrinectes clade” (primitieve platvissen / primitive flounders / Primitiv-Plattfische / Chinese brills): *Tehrinectes* Günther, 1862.

Achiridae Rafinesque, 1815 (Amerikaanse tongen / Schollen / American soles) {>5 Ma Pliocene} [this family includes not listed marine genera]: *Achirus* La Cepède, 1802; *Apionichthys* Kaup, 1858; *Catathyridium* Chabanaud, 1928; *Hypoclinemus* Chabanaud, 1928; *Trinectes* Rafinesque, 1832.

Rhombosoleidae Regan, 1910 (Zuidpacifische platvissen / Südpazifische Flundern / South Pacific flounders / rhombosoleids) [this family includes not listed marine genera]: *Rhombosolea* Günther, 1862.

Cynoglossidae Jordan, 1888 (hondstongen / Hundszungen / tongue soles / tonguefishes) [this family includes a not listed marine subfamily]

Cynoglossinae (hookedsnout tongue soles) [this subfamily includes a not listed marine genus]: *Cynoglossus* Hamilton, 1822.

Soleidae Bonaparte, 1833 (tongen / Zungen / soles) {>49 Ma Lutetian} [this family includes not listed marine genera]: *Achiroides* Bleeker, 1851; *Brachirus* Swainson, 1839; *Dagetichthys* Stauch & Blanc, 1964; *Leptachirus* Randall, 2007; *Pardachirus* Günther, 1862; *Synclidopus* Chabanaud, 1943.

Pleuronectoidea

Bothidae Smitt, 1892 (grieten / botten / Butten / lefteye flounders / sand flounders / brills) {>56 Ma Ypresian} [this family includes not listed marine genera, uncertain family status, probably polyphyletic]: *Citharichthys* Bleeker, 1862; *Paralichthys* Girard, 1858; *Pseudorhombus* Bleeker, 1862.

Pleuronectidae Rafinesque, 1815 (platvissen / schollen / Rechtsaugenflunder / Schollen / righteye flounders) {>38 Ma Early Oligocene} [this family includes not listed marine subfamilies]

Pleuronectinae (botten en schollen / true flounders) [this subfamily includes not listed marine tribes]

Pleuronectini {>25 Ma Miocene} [this tribe includes not listed marine genera]: *Kareius* Jordan & Snyder, 1900; *Liopsetta* Gill, 1864; *Platichthys* Girard, 1854; *Pleuronectes* Linnaeus, 1758.

8a series: **OVALENTARIA** *sensu* Smith & Near, 2012 (fishes with demersal, adhesive eggs) {age 94 Ma}

Superorders: **Cichlomorphae + Atherinomorphae + Mugilomorphae + Blenniomorphae**

superorder: **CICHLOMORPHAE**

Cichliformes {>46 Ma Early Eocene; age 94 Ma}

Polycentridae Gill, 1858 (Afrikaanse en Zuidamerikaanse bladvissen / Afrikanische und Südamerikanische Blattfische / Afro-American leaffishes): *Afronandus* Meinken, 1955; *Monocirrhus* Heckel, 1840; *Polycentropsis* Boulenger, 1901; *Polycentrus* Müller & Troschel, 1849.

Cichlidae Bonaparte, 1835 (cichliden / Buntbarsche / cichlids) {>45 Ma Early Eocene / Eocene; age 57–60 Ma} [some subfamilies / tribes / subtribes tentative]

Etroplinae Kullander, 1998 (Indische & Malagassische cichliden / Indische und Madagaskar Buntbarsche / Malagasy and South Asian cichlids / Indian & Madagascan cichlids) {age 36-50 Ma}: *Etroplus* Cuvier, 1830; *Paretroplus* Bleeker, 1868; *Pseudetroplus* Bleeker, 1862.

Ptychochrominae Sparks, 2004 (Malagassische cichliden / Madagaskar Buntbarsche / Malagasy cichlids / ptychochromines) {age 38-48 Ma}: *Katria* Stiassny & Sparks, 2006; *Oxylapia* Kiener & Maugé, 1966; *Paratilapia* Bleeker, 1868; *Ptychochromis* Steindachner, 1880; *Ptychochromoides* Kiener & Maugé, 1966.

Pseudocrenilabrinae Fowler, 1934 (Afrikaanse cichliden / Afrikanische Buntbarsche / African cichlids) {>45 Ma Bartonian; age 44-60 Ma}

Heterochromidini Kullander, 1998 (primitieve Afrikaanse cichliden / primitive african cichlids) {>23 Ma Early Miocene or ? Oligocene; age 60 Ma}: *Heterochromis* Regan, 1922.

Tylochromini Poll, 1986 (tylochromins) {>38 Ma Early Oligocene; age 29–56 Ma}: *Tylochromis* Regan, 1920.

“Hemichromis clade” (cichliden van West- en Centraal-Afrika / West- und Zentral-afrikanische Cichliden / West and Central African cichlids) (hemichromins) {age 38–56 Ma}: *Anomalochromis* Greenwood, 1985; *Hemichromis* Peters, 1858.

“Pelmatochromis clade” (pelmatochromins) {age 30–40 Ma}: *Pelmatochromis* Steindachner, 1894; *Pterochromis* Trewavas, 1973.

“Chromidotilapia clade” (chromidotiliapine cichliden / West-Afrikaanse dwergcichliden / Chromidotiliapinen Cichliden / chromidotilapiins) {age 38–40 Ma}: *Benitochromis* Lamboj, 2001; *Chromidotilapia* Boulenger, 1898; *Congochromis* Stiassny & Schliewen, 2007; *Divandu* Lamboj & Snoeks, 2000; *Enigmatochromis* Lamboj, 2009; *Limbochromis* Greenwood, 1987; *Nanochromis* Pellegrin, 1904; *Parananochromis* Greenwood, 1987; *Pelvicachromis* Thys van den Audenaerde, 1968; *Teleogramma* Boulenger, 1899; *Thysochromis* Daget, 1988.

Etiini Dunz & Schliewen, 2013 {age 28-35 Ma}: *Eti* Schliewen & Stiassny, 2003.

Oreochromini Dunz & Schliewen, 2013 (muilbroedende tilapias / Maulbrütende Tilapien / mouthbrooding tilapiins) {>23 Ma Early Miocene; age 16-21 Ma}: *Alcolapia* Thys van den Audenaerde, 1969; *Danakilia* Thys van den Audenaerde, 1969; *Iranocichla* Coad, 1982; *Konia* Trewavas, 1972; *Myaka* Trewavas, 1972; *Oreochromis* Günther, 1889; *Pungu* Trewavas, 1972; *Sarotherodon* Rüppell, 1852; *Stomatelia* Trewavas, 1962; *Tristramella* Trewavas, 1942.

Coptodonini Dunz & Schliewen, 2013: *Coelotilapia* Dunz & Schliewen, 2013; *Coptodon* Gervais, 1853; *Gobiocichla* Kanazawa, 1951; *Heterotilapia* Thys van den Audenaerde, 1969.

Pelmatolapiini Dunz & Schliewen, 2013: *Pelmatolapia* Thys van den Audenaerde, 1969.

Tilapiini Hoedeman, 1947 (tilapiins)

Tilapiina: *Chilochromis* Boulenger, 1902; *Congolapia* Dunz, Vreven & Schliewen, 2012; *Tilapia* Smith, 1840.

Steatocranina Dunz & Schliewen, 2013: *Steatocranus* Boulenger, 1899.

Bathybatini Poll, 1986 {age 7–8 Ma}: *Bathybates* Boulenger, 1898; *Hemibates* Regan, 1920; *Trematocara* Boulenger, 1899.

Boulengerochromini Takahashi, 2003 (reuzencichliden / Riesenbuntbarsche / giant cichlids) {age 7–8 Ma}: *Boulengerochromis* Pellegrin, 1904.

Lamprologini Poll, 1986 {age 7–8 Ma}: *Altolamprologus* Poll, 1986; *Julidochromis* Boulenger,

1898; *Lamprologus* Schilthuis, 1891; *Lepidiolamprologus* Pellegrin, 1904; *Neolamprologus* Colombé & Allgayer, 1985; *Telmatochromis* Boulenger, 1898; *Variabilichromis* Colombé & Allgayer, 1985.

Cyprichromini Poll, 1986 (haringcichliden / sardine cichlids) {age 5 Ma}: *Cyprichromis* Scheuermann, 1977; *Paracyprichromis* Poll, 1986.

Perissodini Poll, 1986 (schubbeneters / scale-eating cichlids / lepidophagous cichlids) {age 5 Ma}: *Haplotaxodon* Boulenger, 1906; *Perissodus* Boulenger, 1898.

Benthochromini Takahashi, 2003 {age 5 Ma}: *Benthochromis* Poll, 1986.

Cyphotilapiini Takahashi, 2003 {age 5 Ma}: *Cyphotilapia* Regan, 1920, *Trematochromis* Poll, 1987.

Limnochromini Poll, 1986 {age 5 Ma}: *Baileychromis* Poll, 1986; *Greenwoodochromis* Poll, 1983; *Limnochromis* Regan, 1920; *Reganochromis* Whitley, 1929; *Tangachromis* Poll, 1981; *Triglachromis* Poll & Thys van den Audenaerde, 1974.

Ectodini Poll, 1986 (veervincichliden / featherfins) {age 5 Ma}: *Aulonocranus* Regan, 1920; *Callochromis* Regan, 1920; *Cunningtonia* Boulenger, 1906; *Cyathopharynx* Regan, 1920; *Ectodus* Boulenger, 1898; *Gnathochromis* Poll, 1981; *Grammatotria* Boulenger, 1899; *Lestradea* Poll, 1943; *Ophthalmotilapia* Pellegrin, 1904; *Xenotilapia* Boulenger, 1899.

Eretmodini Staack, 1977 (brandingscichliden / Grundelbuntbarsche / goby cichlids) {age 7–8 Ma}: *Eretmodus* Boulenger, 1898; *Spathodus* Boulenger, 1900; *Tanganicodus* Poll, 1950.

“Orthochromis clade” (grondelcichliden / Malagarasi River cichlids) {age 5–6 Ma}: *Orthochromis* Greenwood, 1954.

Pseudocrenilabrini (haplochromine cichlids) {? Pliocene; age 5–6 Ma}

“*Haplochromis pectoralis* clade” {age 5–6 Ma}: *Ctenochromis* Pfeffer, 1893.

Pseudocrenilabrina (tipspotted-analfin haplochromins) {age 5 Ma}: *Pseudocrenilabrus* Fowler, 1934.

“Schwetzochromis clade” (serranochromins / Angola, Congo & South African haplochromins / Congolese haplochromines & serranochromine flock) {age 4 Ma}: *Chetia* Trewavas, 1961; *Cyclopharynx* Poll, 1948; *Pharyngochromis* Greenwood, 1979; *Sargochromis* Regan, 1920; *Schwetzochromis* Poll, 1948; *Serranochromis* Regan, 1920.

“*Astatoreochromis* clade” sensu Salzburger *et al.*, 2005 {age 4 Ma}: *Astatoreochromis* Pellegrin, 1904.

Tropheina Poll, 1986 (Lake Tanganyika haplochromins) {age 3–4 Ma}: *Interochromis* Yamaoka, Hori & Kuwamura, 1999; *Limnotilapia* Regan, 1920; *Lobochilotes* Boulenger, 1915; *Petrochromis* Boulenger, 1898; *Pseudosimochromis* Nelissen, 1977; *Simochromis* Boulenger, 1898; *Tropheus* Boulenger, 1898.

Haplochromina Hoedeman, 1947 (modern haplochromins / Maternale Maulbrüter / maternal mouthbrooders / ocellated eggspot Haplochromini) {age 4 Ma}

“Lake Victoria region super flock clade” [lakes Victoria, Kyoga, Rukwa, Kivu, Albert, George, Edward] & East African riverine species {age 4 Ma}: *Astatotilapia* Pellegrin, 1904; *Haplochromis* Hilgendorf, 1888; *Lithochromis* Lippitsch & Seehausen, 1998; *Mbipia* Lippitsch & Seehausen, 1998; *Neochromis* Regan, 1920; *Pundamilia* Seehausen & Lippitsch, 1998; *Pyxichromis* Greenwood, 1980; *Schubotzia* Boulenger, 1914; *Thoracochromis* Greenwood, 1979.

“Lake Malawi species flock clade” {age 1–4 Ma}: *Abactochromis* Oliver & Arnegard, 2010; *Alticorpus* Stauffer & McKaye, 1988; *Aristochromis* Trewavas, 1935; *Aulonocara* Regan, 1922; *Buccochromis* Eccles & Trewavas, 1989; *Caprichromis* Eccles & Trewavas, 1989; *Champschromis* Boulenger, 1915; *Chilotilapia* Boulenger, 1908; *Copadichromis* Eccles & Trewavas, 1989; *Corematodus* Boulenger, 1897; *Ctenopharynx* Eccles & Trewavas, 1989; *Cyathochromis* Trewavas, 1935; *Cynotilapia* Regan, 1922; *Cyrtocara* Boulenger, 1902; *Dimidiochromis* Eccles & Trewavas, 1989; *Diplotaxodon* Trewavas, 1935; *Docimodus* Boulenger, 1897; *Exochochromis* Eccles & Trewavas, 1989; *Fossorochromis* Eccles & Trewavas, 1989; *Genyochromis* Trewavas, 1935; *Gephyrochromis* Boulenger, 1901; *Hemitaeniochromis* Eccles & Trewavas, 1989; *Hemitilapia* Boulenger, 1902; *Iidotropheus* Oliver & Loiselle, 1972; *Labeotropheus* Ahl, 1926; *Labidochromis* Trewavas, 1935; *Lethrinops* Regan, 1922; *Lichnochromis* Trewavas, 1935; *Maylandia* Meyer & Foerster, 1984; *Melanochromis* Trewavas, 1935; *Mchenga* Stauffer & Konings, 2006; *Mylochromis* Regan, 1920; *Naevochromis* Eccles & Trewavas, 1989; *Nimbochromis* Eccles & Trewavas, 1989; *Nyassachromis* Eccles & Trewavas, 1989; *Otopharynx* Regan, 1920; *Pallidochromis* Turner, 1994; *Petrotilapia* Trewavas, 1935; *Placidochromis* Eccles & Trewavas, 1989; *Protomelas*

Eccles & Trewavas, 1989; *Pseudotropheus* Regan, 1922; *Rhamphochromis* Regan, 1922; *Sciaenochromis* Eccles & Trewavas, 1989; *Stigmatochromis* Eccles & Trewavas, 1989; *Taeniochromis* Eccles & Trewavas, 1989; *Taeniolethrinops* Eccles & Trewavas, 1989; *Tramitichromis* Eccles & Trewavas, 1989; *Trematocranus* Trewavas, 1935; *Tropheops* Trewavas, 1984; *Tyrannochromis* Eccles & Trewavas, 1989.

Cichlinae (Amerikaanse cichliden / Amerikanische Buntbarsche / Neotropical cichlids / American cichlids) {>40 Ma Eocene; age 29-63 Ma}

Cichlini (pauwoogbaarzen / Pfauenaugebarsche / peacock basses) {>23 Ma Miocene; age 47 Ma}: *Cichla* Bloch, 1801.

Retroculini Kullander, 1998 (stroomversnelling-aardeters / Retroculine Buntbarsche / retroculins / cataract earth-eaters) {? >23 Ma Miocene; age 47-58 Ma}: *Retroculus* Eigenmann & Bray, 1894.

Astronotini Hoedeman, 1947 (oscars) {age 60 Ma}: *Astronotus* Swainson, 1839.

Chaetobranchini Fernández-Yépez, 1951 (kieuwzeefcichliden / Chaetobranchine Cichliden / chaetobranchine cichlids) {age 18 Ma}: *Chaetobranchopsis* Steindachner, 1875; *Chaetobranchus* Heckel, 1840.

Geophagini Haseman, 1911 (geophagins) {>49 Ma Early Eocene; age 52 Ma}

Geophagina (Geophagine Cichliden / geophagine cichlids / microgeophagins & crenicarats & geophagins) {>49 Ma Early Eocene}: *Biotodoma* Eigenmann & Kennedy, 1903; *Crenicara* Steindachner, 1875; *Dicrossus* Steindachner, 1875; *Geophagus* Heckel, 1840; *Gymnogeophagus* Miranda Ribeiro, 1918; *Mikrogeophagus* Meulengracht-Madsen, 1968.

“apistogrammins & guianacarins clade” (Zuid-Amerikaanse dwergcichliden / dwarf cichlids): *Apistogramma* Regan, 1913; *Guianacara* Kullander & Nijssen 1989; *Mazarunia* Kullander, 1990; *Satanoperca* Günther, 1862; *Taeniacara* Myers, 1935.

Acarichthyina Kullander, 1998 (Acarichthyine Cichliden): *Acarichthys* Egenmann 1912; *Biotoecus* Eigenmann & Kennedy, 1903.

Crenicichlina Fernández-Yépez, 1951 (snoekcichliden / Hechtichliden / Crenicichline Cichliden / crenicichline cichlids / pike cichlids) {>23 Ma Miocene}: *Crenicichla* Heckel, 1840; *Teleocichla* Kullander, 1988.

Cichlasomatini Kullander, 1998 (cichlasomins) {>42 Ma Eocene; age 42 Ma}

Cichlasomatina: *Aequidens* Eigenmann & Bray, 1894; *Cichlasoma* Swainson, 1839; *Krobia* Kullander & Nijssen, 1989.

“andinoacarins & nannacarins clade” (andinoacarine cichlids & nannacarine cichlids) {age >19 Ma}: *Acaronia* Myers, 1940; *Andinoacara* Musilová, Říčan & Novák, 2009; *Bujurquina* Kullander, 1986; *Cleithracara* Kullander & Nijssen, 1989; *Ivanacara* Römer & Hahn, 2006; *Laetacara* Kullander, 1986; *Nannacara* Regan, 1905; *Rondonacara* Ottoni & Mattos, 2015; *Tahuantinsuyo* Kullander, 1986.

Heroini Kullander, 1998 (herosachtige cichliden / Heroine Cichliden / heroins) {>49 Ma Early Eocene; age 40 Ma} [Therapsini?:]

Heroina (grote Zuid-Amerikaanse cichliden / South American heroins): *Heros* Heckel, 1840; *Hoplarchus* Kaup 1860; *Hypselecara* Kullander, 1986; *Mesonauta* Günther, 1862; *Pterophyllum* Heckel, 1840; *Sympodus* Heckel, 1840; *Uaru* Heckel, 1840.

Therapsina Allgayer, 1989 (noordelijke Midden-Amerikaanse cichliden / Northern Central American cichlids / astatheroins / herichthyins) {age 16 Ma}: *Astatheros* Pellegrin, 1904; *Chiapaheros* McMahan & Piller, 2015; *Cincelichthys* McMahan & Piller, 2015; *Herichthys* Baird & Girard, 1854; *Herotilapia* Pellegrin, 1904; *Kihniichthys* McMahan & Matamoros, 2015; *Maskaheros* McMahan & Piller, 2015; *Mesoheros* McMahan & Chakrabarty, 2015; *Nosferatu* De la Maza-Benignos et al., 2015; *Oscura* McMahan & Chakrabarty, 2015; *Paraneetroplus* Regan, 1905; *Rheoheros* McMahan & Matamoros, 2015; *Theraps* Günther, 1862; *Thorichthys* Meek, 1904; *Tomocichla* Regan, 1908; *Trichromis* McMahan & Chakrabarty, 2015; *Vieja* Fernández-Yépez, 1969.

“Australoheroins clade” (zuidelijke cichliden / southern cichlids): *Australoheros* Říčan & Kullander, 2006.

Archocentrina Allgayer, 2001 (zuidelijke Midden-Amerikaanse cichliden / Southern Central American cichlids & Caribbean Island cichlids): *Amatitlania* Schmitter-Soto, 2007; *Amphilophus* Agassiz, 1859; *Archocentrus* Gill, 1877; *Caquetaia* Fowler, 1945; *Cryptoheros* Allgayer, 2001; *Hypsophrys* Agassiz, 1859; *Nandopsis* Gill, 1862; *Parachromis* Agassiz, 1859; *Petenia* Günther, 1862.

superorder: **ATHERINOMORPHAE** {>55 Ma Ypresian; age 77 Ma} [= Atherinea (Atheriniformes) + Cyprinodontea (Beloniformes + Cyprinodontiformes)]

Atheriniformes (KOORNAARVISACHTIGEN / ÄHRENFISCHARTIGE / SILVERSIDES) *sensu* Dyer & Chernoff, 1996 {age 71 Ma}

ATHERINOPSOIDEI (NIEUWE WERELD KOORNAARVISVERWANTEN / NEUWELTLICHE ÄHRENFISCHVERWANDTE / ATHERINOPSOID FISHES)

Atherinopsidae Fitzinger, 1873 (koornaarvissen van de nieuwe wereld / Neuweltliche Ährenfische / New World silversides) {age 37 Ma} [this family includes the not listed marine subfamily Notocheirinae]

Atherinopsinae (neotropische koornaarvissen / neotropical silversides) {age 27 Ma} [this subfamily includes a not listed marine tribe]

Sorgentinini Pianta de Risso & Risso, 1953 (Zuidamerikaanse koornaarvissen / Südamerikanische Ährenfische / Southamerican silversides): *Basilichthys* Girard, 1855; *Odontesthes* Evermann & Kendall, 1906.

Menidiinae Schultz, 1948 (koornaarvissen van de Golf van Mexico / Gulf of México silversides) {age 27 Ma} [this subfamily includes the not listed marine genus *Melanorhinus*]: *Labidesthes* Cope, 1870; *Membras* Bonaparte, 1836; *Menidia* Bonaparte, 1836; *Xenomelaniris* Schultz, 1948.

ATHERINOIDEI (OUDE WERELD KOORNAARVISVERWANTEN / ALTWELTLICHE ÄHRENFISCHVERWANDTE / ATHERINOID FISHES)

Phalostethidae Regan, 1916 (dwergaarvissen / Zwergährenfische / phalostethids)

Dentatherininae Patten & Ivantsoff, 1983 (grijptandkoornaarvissen / Fangzahn-Ährenfische / tusked silversides): *Dentatherina* Patten & Ivantsoff, 1983.

Phalostethinae (keelphallusvissen / dwergaarvissen / Kehlphallusfische / priapum fishes)

Phalostethini: *Phalostethus* Regan, 1913; *Phenacostethus* Myers, 1928.

Neostethini Aurich, 1937: *Neostethus* Regan, 1916.

Gulaphallini Aurich, 1937: *Gulaphallus* Herre, 1925.

Atherinidae Risso, 1827 (koornaarvissen / Altweltliche Ährenfische / old world silversides) {>56 Ma Ypresian}

Atherinomorinae Dyer & Chernoff, 1996 (zilverflanken) [this subfamily includes not listed marine genera]: *Alepidomus* Hubbs, 1944; *Atherinomorus* Fowler, 1903; *Teramulus* Smith, 1965.

Atherininae: *Atherina* Linnaeus, 1758; *Atherinason* Whitley, 1934; *Atherinosoma* Castelnau, 1872; *Kestratherina* Pavlov, Ivantsoff, Last & Crowley, 1988; *Leptatherina* Pavlov, Ivantsoff, Last & Crowley, 1988.

Craterocephalinae Dyer & Chernoff, 1996 (Australische koornaarvissen / Australian silversides) {age 79 Ma} [this subfamily includes a not listed marine genus]: *Craterocephalus* McCulloch, 1912; *Sashatherina* Ivantsoff & Allen, 2011.

Bleheratherininae Aarn & Ivantsoff, 2009 (Nieuw-Caledonische koornaarvissen / New Caledonian silversides): *Bleheratherina* Aarn & Ivantsoff, 2009.

Bedotiidae Jordan & Hubbs, 1919 (Malagatische regenboogvissen / Madagaskar-Ährenfische / Malagasy rainbowfishes) {age 52 Ma}: *Bedotia* Regan, 1903; *Rheocles* Jordan & Hubbs, 1919.

Melanotaeniidae Gill, 1894 (regenboogvissen / Regenbogenfische / rainbowfishes) {age 52 Ma}

Iriatherininae Aarn & Ivantsoff, 1997 (sluierregenboogvissen / Prachtregenbogenfische / threadfin rainbowfishes): *Iriatherina* Meinken 1974.

Melanotaeniinae (regenboogvissen / Regenbogenfische / regenboogzalmen): *Chilatherina* Regan, 1914; *Glossolepis* Weber, 1907; *Melanotaenia* Gill, 1862; *Pelangia* Allen, 1998; *Rhadinocentrus* Regan, 1914.

“Cairnsichthys clade” (Queensland regenboogvissen / Queensland Regenbogenfische / Queensland rainbowfishes): *Cairnsichthys* Allen, 1980.

Pseudomugilidae Kner, 1867 (blauwoogjes / Blauaugen / blue-eyes) {age 52 Ma}

Pseudomugilinae: *Kiunga* Allen, 1983; *Pseudomugil* Kner, 1866.

Scaturiginichthyinae Ivantsoff, Unmack, Saeed & Crowley, 1991: *Scaturiginichthys* Ivantsoff, Unmack, Saeed & Crowley, 1991.

Telmatherinidae Munro, 1958 (Celebes-regenboogvissen / Celebes-zeilvissen / Sonnenstrahlfische / Celebes-Regenbogenfische / sailfin silversides / Celebes rainbowfishes) {age 19 Ma}: *Kalyptatherina* Saeed & Ivantsoff, 1991; *Marosatherina* Aarn, Ivantsoff & Kottelat, 1998; *Paratherina* Kottelat, 1990; *Telmatherina* Boulenger, 1897; *Tominanga* Kottelat, 1990.

Beloniformes (GEEPACHTIGEN / HORNHECHTARTIGE / BELONIFORM FISHES) {age 71 Ma}

ADRIANICHTHYOIDEI (RIJSTVISVERWANTEN / SCHAUFELKÄRPFLINGVERWANDTE / ADRIANICHTHYOID FISHES)

Adrianichthyidae Weber, 1913 (rijstvisjes / Sulawesische rijstvisjes / schoffeltandkarpers / Reiskärpflinge / Schaufelkärpflinge / adrianichthyids / medakas / ricefishes) {>25 Ma Miocene}: *Adrianichthys* Weber, 1913; *Oryzias* Jordan & Snyder, 1906.

EXOCETOIDEI (GEEPVERWANTEN / HORNHECHTVERWANDTE / EXOCETOID FISHES / BELONOID FISHES) {age 44 Ma}

Exocoetoidea (vliegendevisverwanten)

Hemiramphidae Gill, 1859 (bastaardgepen / halfsnavelbekken / Halbschnäbler / halfbeaks) {>49 Ma Lutetian; age 44 Ma} [= ? Exocoetidae; this family includes not listed marine genera]: *Arrhamphus* Günther, 1866; *Hyporhamphus* Gill, 1859; *Melapedalion* Fowler, 1934; *Rhynchorhamphus* Fowler, 1928.

Belonoidea

Zenarchopteridae Fowler, 1934 (internbevruchtende bastaardgepen / Halbschnäbler mit inneren Begattung / internally fertilized halfbeaks / freshwater halfbeaks / livebearer halfbeaks) {age 44 Ma}: *Dermogenys* Kuhl & van Hasselt, 1823; *Hemirhamphodon* Bleeker, 1865; *Nomorhamphus* Weber & de Beaufort, 1922; *Tondanichthys* Collette, 1995; *Zenarchopterus* Gill, 1864.

Belonidae Bonaparte, 1835 (gepen / Hornhechte / needlefishes / green gars) {>49 Ma Lutetian} [this family includes not listed marine subfamilies]

Beloninae [this subfamily includes not listed marine genera]: *Belonion* Collette, 1966; *Dorybelone* Fowler, 1944; *Potamorrhaphis* Günther, 1866; *Pseudotylosurus* Fernández-Yépez, 1948.

Strongylurinae Fowler, 1925 [this subfamily includes not listed marine genera]: *Strongylura* Broié, 1824; *Xenentodon* Regan, 1911.

Cyprinodontiformes (TANDKARPERACHTIGEN / ZAHNKÄRPFLINGARTIGE / TOOTHED CARPS) sensu Rosen & Parenti, 1981 {>59 late Paleocene; age 72–90 Ma}

APLOCHEILOIDEI (PRACHTTANDKARPERVERWANTEN / PRACHTKÄRPFLINGVERWANDTE / APLOCHEILOID FISHES) sensu Parenti, 1981 {>6 Ma Upper Miocene; age 72–90 Ma}

Aplocheiloidea (aplocheilides)

Aplocheilidae Bleeker, 1859 (tandkarpers van de oude wereld / Altweltliche Zahnkärpflinge / Asian rivulines / aplocheilids / Panchax family) {age 72–90 Ma}: *Aplocheilus* McClelland, 1838; *Pachypanchax* Myers, 1933.

Nothobranchioidea (nothobranchiides)

Nothobranchiidae Garman, 1895 (prachtandkarpers / Prachtkärpflinge / Old World rivulins / African rivulines) {age 72–90 Ma}

Nothobranchiinae (prachtvaandragers / Prachtkärpflinge) {age 40 Ma}

Nothobranchiini: *Fundulosoma* Ahl, 1924; *Nothobranchius* Peters, 1868; *Pronothobranchius* Radda, 1969.

Aphyosemini Huber, 2000 (poeljuwelen): *Aphyosemion* Myers, 1924; *Foerschichthys* Scheel & Romand, 1981; *Fundulopanchax* Myers, 1924.

Adamansini Huber, 2007: *Fenerbahce* Özdi̇kmen et al., 2006.

Epiplatinae Huber, 2000 {age 40 Ma}

Epiplatini (snoekjes / Hechtlinge / panchax's): *Epiplatys* Gill, 1862.

Callopanchini Huber, 2000 (roloffia's / Roloffia-Arten / Upper Guinean killies / callopanchacins): *Archiaphyosemion* Radda, 1977; *Callopanchax* Myers, 1933; *Nimbapanchax* Sonnenberg & Busch, 2009; *Scriptaphyosemion* Radda & Pürzl, 1987.

'Rivulidae' Myers, 1925 (Amerikaanse tandkarpers / Amerikanische Zahnkärpflinge / New World rivulines / rivulid killifishes)

Kryptolebiatinae Costa, 2004 (primitive rivulines): *Kryptolebias* Costa, 2004.

Cynolebiinae Hoedeman, 1961 (parelkillivissen / Fächerfische / pearl killifishes / cynolebiasines)

{age 14 Ma}

Cynolebiini (parelvissen / pearlfishes / cynolebiatins / cynolebiasins) {age 13 Ma}: *Austrolebias* Costa, 1998; *Cynolebias* Steindachner, 1876; *Hypselebias* Costa, 2006; *Nematolebias* Costa, 1998; *Ophthalmolebias* Costa, 2006; *Simpsonichthys* Carvalho, 1959; *Spectrolebias* Costa & Nielsen, 1997; *Xenurolebias* Costa, 2006.

Cynopoecilini Costa, 1990 (dwergparelvissen / Zwergfächerfische / dwarf pearlfishes / cynopoecilins) {age 13 Ma}: *Campellolebias* Vaz-Ferreira & Sierra, 1974; *Cynopoecilus* Regan, 1912; *Leptolebias* Myers, 1952; *Mucurilebias* Costa, 2014; *Notholebias* Costa, 2008.

Rivulinae (beektandkarpers / Bachlinge / rivulines) [tribes / subtribes tentative]

Rivulini (rivulins): *Laimosemion* Huber, 1999; *Prorivulus* Costa, 2004; *Rivulus* Poey, 1860.

Plesiolebiini Costa, 1990 (plesiolebiatins / plesiolebiasins): *Maratecoara* Costa, 1995;

Papiliolebias Costa 1998; *Pituna* Costa, 1989; *Plesiolebias* Costa, 1989; *Stenolebias* Costa, 1995. "melanorivuline clade": *Anablepsoides* Huber, 1992; *Atlantirivulus* Costa, 2008; *Cynodonichthys* Meek, 1904; *Melanorivulus* Costa, 2006.

Rachoviini Costa, 1990 (rachoviines) {age 18 Ma}: *Gnatholebias* Costa, 1998; *Llanolebias* Hrbek & Taphorn, 2008; *Micromoerma* Costa, 1998; *Millerichthys* Costa, 1995; *Moema* Costa, 1989; *Neofundulus* Myers, 1924; *Pterolebias* Garman, 1895; *Rachovia* Myers, 1927; *Renova* Thomerson & Taphorn, 1995; *Terranatos* Taphorn & Thomerson, 1978; *Trigonectes* Myers, 1925.

CYPRINODONTOIDEI (TANDKARPERVERWANTEN / ZAHNKARPENVERWANDTE / CYPRINODONOID FISHES) sensu Parenti, 1981 {>59 late Paleocene}

Valencioidea (valenciides) {>34 Ma Lower Oligocene}

Valenciidae Parenti, 1981 (Zuid-Europese tandkarpertjes / Südeuropäische Kärpfplinge / Valencia toothcarps / European killifishes / valenciids): *Valencia* Myers, 1928.

Funduloidea (fundulides)

Fundulidae Günther, 1866 (killivissen / Kärpfplinge / topminnows & killifishes / fundulid killifishes) {>14 Ma Middle Miocene / Langhian; age 37 Ma}: *Fundulus* La Cepède, 1803; *Leptolucania* Myers, 1924; *Lucania* Girard, 1859.

Cyprinodontidae Wagner, 1828 (Eierleggende tandkarpers / Eierlegende Zahnkärpfplinge / pupfishes) {>34 Ma Oligocene / Rupelian}

Cubanichthyinae Parenti, 1981: *Cubanichthys* Hubbs, 1926; *Yssolebias* Huber, 2012.

Orestiadinae Bleeker, 1859 (Andes tandkarpers / Südamerikanische Hochlandkärpfplinge / Andenkärpfplinge): *Orestias* Valenciennes, 1839.

Cyprinodontinae

Aphaniini Hoedeman, 1949 {>25 Ma Miocene}: *Aphanius* Nardo, 1827.

Cyprinodontini {>7 Ma late Miocene; age 20 Ma}: *Cualac* Miller, 1956; *Cyprinodon* La Cepède, 1803; *Floridichthys* Hubbs, 1926; *Garmanella* Hubbs, 1936; *Jordanella* Goode & Bean, 1879; *Megupsilon* Miller & Walters, 1972.

Profundulidae Hoedeman & Bronner, 1951 (Midden-Amerikaanse killivissen / Mittelamerikanische Kärpfplinge / Middle American killifishes) {age 26 Ma}: *Profundulus* Hubbs, 1924; *Tlaloc* Alvarez & Carranza, 1951.

Goodeidae Jordan & Gilbert, 1883 (hooglandtandkarpers / Zwischenkärpfplinge / splitfins / goodeids) {>14 Ma Middle Miocene}

Empetrichthyinae Jordan, Evermann & Clark, 1930 (Noord-Amerikaanse poeltandkarpers / Nordamerikanische Quellkärpfplinge / springfishes) {>14 Ma Middle Miocene; age 12 Ma}: *Crenichthys* Hubbs, 1932; *Empetrichthys* Gilbert, 1893.

Goodeinae (Mexicaanse tandkarpers / Hochlandkärpfplinge / goodeines) {>11 Ma late Miocene; age 11,5 Ma}

Characodontini Regan, 1907 {age 10,5 Ma}: *Characodon* Günther, 1866.

Ilyodontini Doadrio & Domínguez, 2004 {age 9,5 Ma}: *Allodontichthys* Hubbs & Turner, 1939; *Ilyodon* Eigenmann, 1907; *Xenotaenia* Turner, 1946.

Girardinichthyini Hubbs & Turner, 1939 {age 9 Ma}: *Allotoca* Hubbs & Turner, 1939; *Girardinichthys* Bleeker, 1860; *Neotoca* Hubbs & Turner, 1939; *Skiffia* Meek, 1902.

Goodeini {age 8 Ma}: *Ataeniobius* Hubbs & Turner, 1939; *Goodea* Jordan, 1880.

Chapalichthyini Doadrio & Domínguez, 2004 {age 7 Ma}: *Alloophorus* Hubbs & Turner, 1939; *Ameca* Miller & Fitzsimons, 1971; *Chapalichthys* Meek, 1902; *Xenoophorus* Hubbs & Turner, 1939;

Xenotoca Hubbs & Turner, 1939; Zoogeneticus Meek, 1902.

Poecilioidea

Anablepidae Bonaparte, 1831 {>25 Ma Miocene}

Oxyzygonectinae Parenti, 1981: *Oxyzygonectes* Fowler, 1916.

Anablepinae (Vieraugen und Linienkäpfinge / four-eyed fishes and onesided livebearers / four-eyed fishes and jenynsiids): *Anableps* Scopoli, 1777; *Jenynsia* Günther, 1866.

Poeciliidae Bonaparte, 1831 (poeciliids) {>59 Ma Thanetian; age 37–77 Ma}

Aplocheilichthyinae Myers, 1928 (brakwaterlichtoogjes / Brackwasser Leuchtaugenkäpfinge / brackish-water lampeyes / banded lampeyes): *Aplocheilichthys* Bleeker, 1863.

Procatopodinae Fowler, 1916 (lichtoogvisjes / Leuchtaugenkäpfinge lampeyes) {>34 Ma Lower Oligocene}

Fluviphylacini Roberts, 1970 (Amerikaanse lichtoogjes / Amerikanische Leuchtaugenkäpfinge / American lampeyes): *Fluviphylax* Whitley, 1965.

Procatopodini (Afrikaanse lichtoogvisjes / Afrikanische Leuchtaugenkäpfinge / African lampeyes) {>34 Ma Lower Oligocene}: *Aapticheilichthys* Huber, 2011; *Hylopanchax* Poll & Lambert, 1965; *Hypsopanchax* Myers, 1924; *Laciris* Huber, 1981; *Lacustricola* Myers, 1924; *Lamprichthys* Regan, 1911; *Micropanchax* Myers, 1924; *Pantanodon* Myers, 1955; *Plataplochilus* Ahl, 1928; *Platypanchax* Ahl, 1928; *Poropanchax* Clausen, 1967; *Procatopus* Boulenger, 1904; *Rhexipanchax* Huber, 1999.

Poeciliinae (eilevendbarende tandkarpers / levendbarende tandkarpers / Lebendgebärende Zahnkäpfinge / livebearers / poeciliines / gambusinos) {age 44–77 Ma}

Xenodexiini Hubbs, 1950 (Guatemala tandkarpetjes / Guatemalan poeciliins) {age 68 Ma}: *Xenodexia* Hubbs, 1950.

Tomeurini Eigenmann, 1912 (eileggende tandkarpetjes / Eierkäpfinge / facultative viviparous poeciliins): *Tomeurus* Eigenmann, 1909.

Cnesterodontini Hubbs, 1924: *Cnesterodon* Garman, 1895; *Phalloceros* Eigenmann, 1907; *Phalloptychus* Eigenmann, 1907; *Phallotorynus* Henn, 1916.

Poeciliini (poeciliins) {age 30 Ma}: *Acanthophacelus* Eigenmann, 1907; *Limia* Poey, 1854; *Micropoecilia* Hubbs, 1926; *Pamphorichthys* Regan, 1913; *Poecilia* Bloch, 1801.

Girardinini Hubbs, 1924 (Cubaanse tandkarpetjes / Kubanische Zahnkäpfinge / Cuban topminnows) {age 44–77 Ma}: *Dactylophallus* Howell Rivero & Rivas, 1944; *Girardinus* Poey, 1854; *Glaridichthys* Garman, 1896; *Quintana* Hubbs, 1934; *Toxus* Eigenmann, 1903.

Heterandriini Hubbs, 1924 {age 44–77 Ma} [subtribes tentative]

Heterandriina: *Heterandria* Agassiz, 1853; *Poeciliopsis* Regan, 1913; *Pseudopoecilia* Regan, 1913.

Scolichthyina Rosen, 1967: *Neoheterandria* Henn, 1916; *Scolichthys* Rosen, 1967; *Xenophallus* Hubbs, 1924.

Alfarina Hubbs, 1924: *Alfaro* Meek, 1912; *Pseudoxiphophorus* Bleeker, 1859.

Priapichthyina Lucinda & Reis, 2005: *Priapichthys* Regan, 1913.

Brachyrhaphina Lucinda & Reis, 2005: *Brachyrhaphis* Regan, 1913; *Phallichthys* Hubbs, 1924.

Priapellini Ghedotti, 2000: *Priapella* Regan, 1913.

Gambusiini Gill, 1889: *Belonesox* Kner, 1860; *Carlhubbsia* Whitley, 1951; *Gambusia* Poey, 1854; *Xiphophorus* Heckel, 1848.

superorder: **MUGILOMORPHAE** {age 90 Ma}

Mugiliformes (HARDERACHTIGEN / MEERÄSCHENARTIGE / MULLETS) sensu Wainwright et al., 2012

Embiotocidae Agassiz, 1853 (surfbaarzen / brandingsbaarzen / Brandungsbarsche / Strandfische / surfperches) {>5 Ma late Miocene} {age 12 Ma} [this family includes not listed marine subfamilies]

Embiotocinae (Tulebarsche / embiotocines) [this subfamily includes not listed marine genera]: *Cymatogaster* Gibbons, 1854; *Hysterocarpus* Gibbons, 1854.

Pomacentridae Bonaparte, 1831 (rifbaarzen / anemoonvissen / Riffbarsche / Demoisellen / damselfishes) {age 137? Ma} [this family includes not listed marine subfamilies]

Stegastinae Cooper, Smith & Westneat, 2009 (primitive damselfishes) [this subfamily includes not listed marine genera]: *Stegastes* Jenyns, 1840.

Pomacentrinae [this subfamily includes a not listed marine tribe]

Pomacentrini [this tribe includes not listed marine genera]: *Neopomacentrus* Allen, 1975.

Ambassidae Klunzinger, 1870 (glasbaarzen / Glasbarsche / glass perches / glass perchlets / Asiatic glassfishes) {>86 Ma Santonian; age 87 Ma} [this family includes not listed marine genera]: *Ambassis* Cuvier, 1828; *Chanda* Hamilton, 1822; *Denariusa* Whitley, 1948; *Gymnochanda* Fraser-Brunner, 1955; *Paradoxodacna* Roberts, 1989; *Parambassis* Bleeker, 1874; *Tetracentrum* Macleay, 1883.

Mugilidae Jarocki, 1822 (harders / Meeräischen / grey mullets) {>38 Ma Priabonian; age 44 Ma}

Myxinae Whitley 1951: *Myxus* Günther, 1861; *Neomyxus* Steindachner, 1878.

Mugilinae: *Agonostomus* Bennett, 1832; *Cestraeus* Valenciennes, 1836; *Chaenomugil* Gill, 1863; *Mugil* Linnaeus, 1758.

Rhinomugilinae Xia, Durand & Fu 2016

Trachystomaini Xia, Durand & Fu 2016 (Australische harders): *Aldrichetta* Whitley, 1945; *Gracilimugil* Whitley, 1941; *Trachystoma* Ogilby, 1888.

Rhinomugilini Xia, Durand & Fu 2016: *Rhinomugil* Gill, 1863.

Squalomugilini Xia, Durand & Fu 2016: *Ellochelon* Whitley, 1930; *Plicomugil* Schultz, 1953; *Squalomugil* Ogilby, 1908.

Crenimugilini Xia, Durand & Fu 2016 (Indo-Pacificische harders / Indo-Pacific mullets): *Crenimugil* Schultz, 1946; *Osteomugil* Luther, 1982; *Paramugil* Ghasemzadeh, Ivantsoff & Aarn, 2004.

“Chelon clade”: *Chelon* Artedi, 1793; *Neochelon* Durand et al., 2012; *Oedalechilus* Fowler, 1903; *Parachelon* Durand et al., 2012; *Planiliza* Whitley, 1945; *Pseudomyxus* Durand et al., 2012.

superorder: **BLENNIOMORPHAE**

Blenniiformes (SLIJMVISACHTIGEN / SCHLEIMFISCHARTIGE / BLENNIIFORM FISHES) *sensu* Wainwright et al., 2012 {age 82 Ma} [suborders tentative]

BLENNIOIDEI (SLIJMVISVERWANTEN / SCHLEIMFISCHVERWANDTE / BLENNIOD FISHES / TROPICAL BLENNIOIDS) *sensu* Springer, 1993 {>49 Ma Lutetian} [relationship of the suborder uncertain]

Blenniidae Rafinesque-Schmaltz, 1810 (naakte slijmvissen / Schuppenlose Schleimfische / blennies) {>49 Ma Lutetian}

Blenniinae (kamtand-slijmvissen / Kammzahnschleimfische / combtooth blennies) [this subfamily includes not listed marine genera]

Blenniini (rotsspringertjes / rockhoppers): *Lupinoblennius* Herre, 1942; *Salaria* Forskål, 1775.

Omobranchini Springer, 1968 (brandingsslijmvissen / Brandungschleimfische / tide blennies):

Haptogenys Springer, 1972; *Omobranchus* Valenciennes, 1836; *Omx* Springer, 1972.

Nemophini Kaup, 1858 (sabeltand-slijmvissen / Säbelzahnschleimfische / sabertoothed blennies): *Meiacanthus* Norman, 1944.

Phenablenniini Springer & Smith-Vaniz, 1972: *Phenablennius* Springer & Smith-Vaniz, 1972.

Salariinae Gill, 1859 [this subfamily includes not listed marine genera]: *Hypsoblennius* Gill, 1861; *Salarias* Cuvier, 1816.

GOBIESOCOIDEI (SCHILDBUIKEN / SCHILDVISSEN / ZUIGVISVERWANTEN / SCHILDBAUCHVERWANDTE / SCHILDFISCHE / GOBIESOCOID FISHES) *sensu* Patterson & Rosen, 1989

Gobiesocidae Bleeker, 1859 (zuigvissen / Schildbäuche / Ansauger / clingfishes) [this family includes not listed marine genera]

Gobiesocinae: *Gobiesox* La Cepède, 1800.

Eupercaria [systematic position of the families uncertain]

Gerreidae Bleeker, 1859 (mojarra's / mojarras / silverbiddies) {>56 Ma Ypresian} [this family includes not listed marine genera]: *Dapterus* Ranzani, 1842; *Eucinostomus* Baird & Girard, 1855; *Eugerres* Jordan & Evermann, 1927; *Gerres* Quoy & Gaimard, 1824.

Haemulidae Gill, 1885 (grunts) {>86 Ma Santonian} [this family includes a not listed marine subfamily] **Haemulinae** (diklipvissen / sweetlips) [this subfamily includes not listed marine genera]: *Orthopristis* Girard, 1858; *Pomadasys* La Cepède, 1802.

Lutjanidae Gill, 1861 (snappers / Schnapper / snappers and fusiliers) {>49 Ma Lutetian} [this family includes not listed marine subfamilies]

Lutjaninae (lutjanines) {age 35 Ma} [this subfamily includes not listed marine genera]: *Lutjanus* Bloch, 1790.

Monodactylidae Jordan & Evermann, 1898 (zilverbladvissen / bladvinnigen / Flossenblätter / Silberflossenblätter / moonies / fingerfishes / moonfishes / butterfly-fishes / batfishes / kitefishes) {>49 Ma Lutetian} [this family includes a not listed marine genus]: *Monodactylus* La Cepède, 1801.

Moronidae Jordan & Evermann, 1896 (zeebaarzen / Weißbarsche / striped basses / white basses) {>49 Ma Lutetian / Eocene} [this family includes a not listed marine genus]: *Dicentrarchus* Gill, 1860; *Morone* Mitchell, 1814.

Scatophagidae Gill, 1883 (argusvissen / Argusfische / scats / spadefishes) {>49 Ma Lutetian}: *Scatophagus* Cuvier, 1831; *Selenotoca* Myers, 1936.

Sciaenidae Cuvier, 1829 (trommelvissen / ombervissen / Umberfische / Krächser / Trommlerfische / croakers and drums) {>28 Ma Chattian / Miocene; age 27 Ma} [this family includes not listed marine subfamilies]

Sciaeninae {>23 Ma Miocene; age 27 Ma} [this subfamily includes not listed marine genera]: *Aplodinotus* Rafinesque, 1819; *Leiostomus* La Cepède, 1802; *Sciaenops* Gill, 1863.

Pachyurinae Sasaki, 1989 (Zuidamerikaanse trommelvissen / Südamerikanische Umberfische / Southamerican croakers) {>23 Ma Miocene; age 21 Ma}: *Pachypops* Gill, 1861; *Pachyurus* Agassiz, 1831; *Petilipinnis* Casatti, 2002.

Stelliferinae Darovec, 1983 {>23 Ma Miocene; age 22 Ma} [this subfamily includes not listed marine genera]: *Bairdiella* Gill, 1861; *Stellifer* Oken, 1817.

Micropogoniinae Sasaki, 1989 {>23 Ma Miocene}: *Micropogonias* Bonaparte, 1831.

Cynoscioninae Trewavas, 1962 [this subfamily includes a not listed marine tribe]

Cynoscionini {>23 Ma Miocene} [this tribe includes not listed marine genera]: *Cynoscion* Gill, 1861; *Plagioscion* Gill, 1861.

Kathalini Lal Mohan, 1972 [this tribe includes not listed marine genera]: *Boesemania* Trewavas, 1977.

Otolithoidinae Lal Mohan, 1972: *Sciaenoides* Blyth, 1860.

Otolithinae Gill, 1861 (weak fishes / queen fishes) [this subfamily includes not listed marine tribes]

Bahabini Chu, Lo & Wu, 1963: *Bahaba* Herre, 1935.

Argyrosomini Chu, Lo & Wu, 1963 [this tribe includes not listed marine genera]: *Protonibeia* Trewavas, 1971.

Pseudotolithini Trewavas, 1962: *Pseudotolithus* Bleeker, 1863.

Nibeini Trewavas, 1977 [this tribe includes not listed marine genera]: *Aspericorvina* Fowler, 1934; *Dendrophysa* Trewavas, 1964; *Nibea* Jordan & Thompson 1911.

Johniini Bleeker, 1876: *Johnius* Bloch, 1793.

Sillaginidae Richardson, 1846 (witte sillago-baarzen / wittebaarzen / Weißbarsche / sillagos / whittings / smelt-whittings) [this family includes a not listed marine genus]: *Sillaginops* Kaga, 2013; *Sillaginopsis* Gill, 1861, *Sillago* Cuvier, 1816.

Uranoscopiformes (HEMELKIJKERS / STERRENKIJKERS / HIMMELSGUCKER / STERNGUCKER / STARGAZERS) *sensu* Betancur-R. et al., 2013 {age 87 Ma}

URANOSCOPOIDEI (STERRENKIJKERSVERWANTEN / HIMMELSGUCKERVERWANDTE / URANOSCOPOID FISHES)

Leptoscopoidea

Cheimarrichthyidae Regan, 1913 (stroomversnelingsbaarzen / Nieuwzeelandse krokodilvissen / torrent perches / New Zealand torrentfishes) {>28 Ma Chattian}: *Cheimarrichthys* Haast, 1874.

Spariformes (ZEEBRASEMACHTIGEN / BRASSENARTIGE / SPARIFORM FISHES) {age 75 Ma}

LOBOTOIDEI (TIJGERBAARSVERWANTEN / TIGERBARSCHAVERWANDTE / LOBOTOID FISHES)

Datnioididae Fowler, 1931 (tijgerbaarzen / Tigerbarsche / tigerperches) [= ? Lobotidae Gill, 1861]: *Datnioides* Bleeker, 1854.

SPAROIDEI (ZEEBRASEMVERWANTEN / BRASSENVERWANDTE / SPAROID FISHES) *sensu* Carpenter & Johnson, 2002

Sparidae Rafinesque, 1818 (zeebrasems / Brassen / seabreams / porgies) {>56 Ma Ypresian} [this family includes not listed marine genera]: *Acanthopagrus* Peters, 1855; *Archosargus* Gill, 1865; *Lagodon* Holbrook, 1855; *Rhabdosargus* Fowler, 1933; *Sparus* Linnaeus, 1758.

Tetraodontiformes (KOGLVISACTIGEN / VASTKAKIGEN / HAFTKIEFER / KUGELFISCHARTIGE / TETRAODONTIFORM FISHES / PLECTOGNATHS) *sensu* Betancur-R. et al., 2013 {>83 Ma lower Campanian; age 77–94 Ma}

TETRAODONTOIDEI (KOGLVISVERWANTEN / VASTKAKIGEN / HAFTKIEFER / KUGELFISCHVERWANDTE / TETRAODONTOID FISHES) *sensu* Santini & Tyler, 2003 {>50 Ma Ypresian; age 70 Ma}

Tetraodontidae Bonaparte, 1831 (kogelvissen / Kugelfische / Vierzähner / puffers / blowfishes / globe-fishes) {>35 Ma Lower Oligocene; age 35–52 Ma} [this family includes not listed marine genera]

“Takifugu clade” (Pacifische kogelvissen / Pazifik-Kugelfische / Pacific puffers) {age 26 Ma}: *Marilyna* Hardy, 1982; *Takifugu* Abe, 1950.

Tetraodontinae {age 34 Ma}

Colomesini Gill, 1884 (Atlantische kogelvissen / Atlantische Kugelfische / Atlantic puffers) {age 31 Ma}: *Colomesus* Gill, 1884; *Lagocephalus* Swainson, 1839; *Sphoeroides* Anonymous, 1798.

Tetraodontini (Afrikaanse en Aziatische kogelvissen / Afrikanische und Asiatische Kugelfische / African and Asian puffers) {age 20 Ma}: *Auriglobus* Kottelat, 1999; *Carinotetraodon* Benl, 1957; *Chelonodontops* Smith, 1958; *Chonerhinos* Bleeker, 1854; *Dichotomyctere* Duméril, 1855; *Leiodon* Swainson, 1839; *Pao* Kottelat, 2013; *Tetraodon* Linnaeus, 1758.

Centrarchiformes (ZONNEBAARSACHTIGEN / SONNENBARSCHARTIGE / CENTRARCHIFORM FISHES) {>35 Ma late Eocene-Oligocene; age 61 Ma} *sensu* Betancur-R. et al., 2014

PEMPHEROIDEI

Lateolabracidae (Aziatische zeebaarzen / Aziatische zaagbaarzen / Asian basses / Asian seaperches): *Lateolabrax* Bleeker, 1857.

TERAPONTOIDEI

Kuhliidae Jordan & Evermann, 1896 (dwergbaarzen / Kuhlien / Flaggenbarsche / flagtails / aholeholes / mountain basses) {>56 Ma Ypresian}: *Kuhlia* Gill, 1861.

Terapontidae Richardson, 1842 (tijgervissen / tijgerbaarzen / Tigerfische / Grunzbarsche / terapon-perches / terapon-grunters) {>28 Ma Chattian} [this family includes not listed marine genera]: *Amniataba* Whitley, 1943; *Bidyanus* Whitley, 1943; *Datnia* Cuvier, 1829; *Hannia* Vari, 1978; *Hephaestus* De Vis, 1884; *Lagusia* Vari, 1978; *Leiopotherapon* Fowler, 1931; *Pingalla* Whitley, 1955; *Scortum* Whitley, 1943; *Syncomistes* Vari, 1978; *Terapon* Cuvier, 1816; *Variichthys* Allen, 1993.

PERCALATOIDEI

Clade ?: *Percalates* Ramsay & Ogilby, 1887.

PERCICHTHYOIDEI

Percichthyidae Jordan & Eigenmann, 1890 (primitievebaarzen / zaagbaarzen / Dorschbarsche / primitive perches / temperate perches) {>59 Ma Thanetian; age 61 Ma} [maybe this family includes not listed marine genera, the family is polyphyletic]: *Bostockia* Castelnau, 1873; *Gadopsis* Richardson, 1848; *Guyu* Pusey & Kennard, 2001; *Maccullochella* Whitley, 1929; *Macquaria* Cuvier, 1830; *Nannatherina* Regan, 1906; *Nannoperca* Günther, 1861; *Percichthys* Girard, 1855; *Percilia* Girard, 1855.

CENTRARCHOIDEI

Centrarchidae Bleeker, 1859 (zonnebaarzen / Sonnenbarsche / sunfishes and freshwater basses) {>35 Ma late Eocene-Oligocene; age 54 Ma}

Elassomatinae Jordan, 1877 (dwergzonnebaarzen / Zwergbarsche / Zwergschwarzbarsche / pygmy sunfishes / dwarf sunfishes) {age 43 Ma}: *Elassoma* Jordan, 1877.

Centrarchinae {>16 Ma Miocene; age 43 Ma}: *Acantharchus* Gill, 1864; *Ambloplites* Rafinesque, 1820; *Archoplites* Gill, 1861; *Centrarchus* Cuvier, 1829; *Enneacanthus* Gill, 1864; *Pomoxis* Rafinesque, 1818.

Lepominae Gill, 1864 {>16 Ma Miocene; age 23 Ma}: *Lepomis* Rafinesque, 1819; *Micropterus* La Cepède, 1802.

Siniperidae Jordan & Richardson, 1910 (Chinese zeesnoeken / Chinesische Riesenbarsche / Chinese snooks) {>23 Ma Miocene; age 54 Ma}: *Coreoperca* Herzenstein, 1896; *Siniperca* Gill, 1862.

Perciformes (BAARSACHTIGEN / BARSCHARTIGE / PERCHLIKE FISHES / PERCIFORM FISHES) {>84 Ma Campanian}

PERCOIDEI (BAARSVERWANTEN / BARSCHVERWANDTE / PERCOID FISHES) *sensu* Smith & Craig, 2007 {>71-84 Ma Maastrichtian / Campanian}

Percidae Rafinesque, 1815 (zoetwaterbaarzen / Echte Barsche / perches) {>34 Ma Rupelian}

Percinae {age 20 Ma}: *Gymnocephalus* Bloch, 1793; *Perca* Linnaeus, 1758; *Percarina* Nordmann, 1840.

Lucioperca Jordan & Evermann, 1896

Luciopercini (snoekbaarzen / Zander / pikeperches) {age 25 Ma}: *Sander* Oken, 1817.

Romanichthyini Dumitrescu, Bănărescu & Stoica, 1957 (Donau-baarzen / Donau-barsche / Danube perches) {age 25 Ma}: *Romanichthys* Dumitrescu, Bănărescu & Stoica, 1957; *Zingel* Cloquet, 1817.

Etheostomatinae Agassiz, 1850 (Amerikaanse zoetwaterbaarzen / springbaarzen / Amerikaanse grondbaarzen / Amerikanische Barsche / darters & logperches): *Ammocrypta* Jordan, 1877; *Crystallaria* Jordan & Gilbert, 1885; *Etheostoma* Rafinesque, 1819; *Nothonotus* Putnam, 1863; *Percina* Haldeman, 1842.

NOTOTHENIOIDEI (IJSVISVERWANTEN / ANTARCTISCHE VISSEN / ANTARKTISFISCHVERWANDTE / ANTARCTIC BLENNIES / NOTOTHENIODS) *sensu* Balushkin, 2000 {>66 Ma Danian, age 71Ma}

Pseudaphritidae McCulloch, 1929 (ijsvissen / catadromous icefishes / congollis) {age 45–65 Ma}: *Pseudaphritis* Castelnau, 1872.

SCORPAENOIDEI (SCHORPIOENVISVERWANTEN / PANERWANGEN / SCORPIONFISCHVERWANDTE / PANZERWANGEN / DRACHENKOPFVERWANDTE / SCORPAENOID FISHES / SCORPIONFISHES) *sensu* Imamura, 2004

Tetrapogonidae Smith, 1949 (zeilvinschorpioenvissen / Wespenfische / Segelflossen-Scorpionfische / waspfishes / sailback scorpionfishes) [this family includes not listed marine subfamilies, subfamilies tentative]

Tetrapogoninae (Napoleonvissen) [this subfamily includes not listed marine genera]: *Tetrapoge* Günther, 1860.

Vespiculinae Mandrytsa, 2001 [this subfamily includes not listed marine genera]: *Neovespicula* Mandrytsa, 2001; *Trichosomus* Swainson, 1839.

Centropogoninae Fowler, 1938 [this subfamily includes not listed marine genera]: *Notesthes* Ogilby, 1903.

GASTEROSTEOIDEI (STEKELBAARSVERWANTEN / STICHLINGSVERWANDTE / GASTEROSTEOID FISHES) *sensu* Johnson & Patterson, 1993 {>71 Ma Maastrichtian; age 161 Ma }

Gasterosteidae Bonaparte, 1831 (stekelbaarzen / Stichlinge / sticklebacks) {>16 Ma Middle Miocene} [this family includes a not listed marine genus]: *Apeltes* DeKay, 1842; *Culaea* Whitley, 1950; *Gasterosteus* Linnaeus, 1758; *Pungitius* Coste, 1848.

COTTOIDEI (DONDERPADVERWANTEN / GROPPENVERWANDTE / COTTOID FISHES) *sensu* Imamura & Yabe, 2002

Cottidae Bonaparte, 1831 (donderpadden / Groppen / sculpins) {>34 Ma Rupelian}: *Abyssocottus* Berg, 1906; *Asprocottus* Berg, 1906; *Batrachocottus* Berg, 1903; *Cephalocottus* Gratzianov, 1907; *Clinocottus* Gill, 1861; *Comephorus* La Cepède, 1800; *Cottinella* Berg, 1907; *Cottocomephorus* Pellegrin, 1900; *Cottopsis* Girard, 1850; *Cottus* Linnaeus, 1758; *Cyphocottus* Sideleva, 2001; *Leocottus* Taliev, 1955; *Leptocottus* Girard, 1854; *Limnocottus* Berg, 1906; *Megalocottus* Gill, 1861; *Mesocottus* Gratzianov, 1907; *Myoxocephalus* Tilesius, 1811; *Neocottus* Sideleva, 1982; *Paracottus* Taliev, 1949; *Procottus* Gratzianov, 1902; *Trachidermus* Heckel, 1837; *Uranidea* DeKay, 1842.

CHAPTER FOUR FRESHWATER FISH NAMES

A

A 1 *Apirogramma taeniata*
 A 2 *Apirogramma taeniata*
 A 3 *Apirogramma taeniata*
 A 4 *Apirogramma taeniata*
 A 5 *Apirogramma taeniata*
 A 6 *Apirogramma taeniata*
 A 7 *Apirogramma taeniata*
 A 8 *Apirogramma taeniata*
 A 9 *Apirogramma taeniata*
 A 10 *Apirogramma taeniata*
 A 11 *Apirogramma* sp. Wangenflecken
 A 12 *Apirogramma resticulosa*
 A 13 *Apirogramma resticulosa*
 A 14 *Apirogramma resticulosa*
 A 15 *Apirogramma resticulosa*
 A 16 *Apirogramma resticulosa*
 A 17 *Apirogramma resticulosa*
 A 18 *Apirogramma rubrolineata*
 A 19 *Apirogramma rubrolineata*
 A 20 *Apirogramma tucurui*
 A 21 *Apirogramma piauiensis*
 A 22 *Apirogramma* sp. Araguaia
 A 23 *Apirogramma* sp. Araguaia
 A 24 *Apirogramma* sp. Araguaia
 A 25 *Apirogramma* sp. Paru
 A 26 *Apirogramma caetei*
 A 27 *Apirogramma caetei*
 A 28 *Apirogramma caetei*
 A 29 *Apirogramma caetei*
 A 30 *Apirogramma caetei*
 A 31 *Apirogramma caetei*
 A 32 *Apirogramma* sp. Macapá
 A 33 *Apirogramma pleurotaenia*
 A 34 *Apirogramma* sp. Mosaik
 A 35 *Apirogramma urteagai*
 A 36 *Apirogramma* sp. Jabuti
 A 37 *Apirogramma* sp. Xingu
 A 38 *Apirogramma* sp. Vielfleck
 A 39 *Apirogramma* sp. Peixoto
 A 40 *Apirogramma* sp. Parati
 A 41 *Apirogramma* sp. Parati
 A 42 *Apirogramma* sp. Chao
 A 43 *Apirogramma* sp. Itaparaná
 A 44 *Apirogramma* sp. Winkelfleck
 A 45 *Apirogramma* sp. Winkelfleck
 A 46 *Apirogramma ortmanni*
 A 47 *Apirogramma ortmanni*
 A 48 *Apirogramma ortmanni*
 A 49 *Apirogramma ortmanni*
 A 50 *Apirogramma gossei*
 A 51 *Apirogramma gossei*
 A 52 *Apirogramma paulmuelleri*
 A 53 *Apirogramma* sp. São Gabriel
 A 54 *Apirogramma* sp. Rotporen
 A 55 *Apirogramma regani*
 A 56 *Apirogramma* sp. Trombetas
 A 57 *Apirogramma* sp. Barcelos
 A 58 *Apirogramma geisleri*
 A 59 *Apirogramma geisleri*
 A 60 *Apirogramma geisleri*
 A 61 *Apirogramma geisleri*

A 62 *Apirogramma* sp. Gelbwangen
 A 63 *Apirogramma acrensis*
 A 64 *Apirogramma* sp. Rio Candeias
 A 65 *Apirogramma* sp. Jaru
 A 66 *Apirogramma* sp. Rio Xipamanu
 A 67 *Apirogramma* sp. Amapá
 A 68 *Apirogramma* sp. Amapá
 A 69 *Apirogramma* sp. Amapá
 A 70 *Apirogramma* sp. Amapá
 A 71 *Apirogramma* sp. Amapá
 A 72 *Apirogramma moae*
 A 73 *Apirogramma eunotus*
 A 74 *Apirogramma eunotus*
 A 75 *Apirogramma eunotus*
 A 76 *Apirogramma cinilabra*
 A 77 *Apirogramma* sp. Schwanzstreifen
 A 78 *Apirogramma* sp. Nadelstreifen
 A 79 *Apirogramma* sp. Tahuayo
 A 80 *Apirogramma* sp. Schwarzbrust
 A 81 *Apirogramma* sp. Orangestreifen
 A 82 *Apirogramma* sp. Nanay
 A 83 *Apirogramma cruzi*
 A 84 *Apirogramma* sp. Caquetá
 A 85 *Apirogramma* sp. Putumayo

Anostomoides passionis Santos & Zuanon, 2006
Anostomus Scopoli, 1777 (ANOSTOMIDAE) ↔ *Laemolyta* / *Pseudanos* / *Schizodon*
Anostomus anostomus (Linnaeus, 1758) (Arnold (1934a):86, Peters (1934):257, Innes (1935):147, Mellen & Lanier (1935):99, Stoye (1935):184, Arnold & Ahl (1936):128, Beirens (1938):161, Rachow in HMR (1939):415, Arnold (1949a):9, Ladiges (1950):40, Meinken (1950):14, Hervey & Hems (1952):123, Brymer (1954):133, Hoedeman (1954):87, Ladiges (1954):107, Axelrod & Schultz (1955):172, Hoedeman (1956):551, Innes (1956):192, Veldhuizen (1956):32, Schneider & Whitney (1957):284, Vogt (1957):22, Vorderwinkler (1957):6, Makino (1958):17, McInerny & Gerard (1959):225, Sterba (1962):188, Whiteman (1962):32, McInerny & Gerard (1966):225, Exotic Tropical Fishes (1967):39, Ghadially (1969):159, Schiøtz & Dahlstrøm (1971):44, Hoedeman (1974):603, de Oliveira (1977):131, van Ramshorst (1977):134, Géry (1978):183, Aquarien Atlas (1982):234, Varjo (1982):140, Axelrod's Atlas (1989):125, Sterba (1990):181, Roman (1992):127, Mills (1993):85, Sakurai, Sakamoto & Mori (1993):33, Cánovas & Puigcerver (2002):40, Dawes (2002):190) "striped headstander / Striped Anostomus / Small Roundmouth Characin / Gestreepte kopstaander / Prachtkopstaander / Grote kopstaander"
Anostomus anostomus longus → *Anostomus longus*

Anostomus brevior Géry, 1961 (Géry (1978):183, Sterba (1990):181)
Anostomus fasciatus → *Schizodon fasciatus*
Anostomus garmani → *Laemolyta garmani*
Anostomus gracilis → *Pseudanos gracilis*
Anostomus intermedius → *Petulanos intermedius*
Anostomus longus Géry, 1961 (*Anostomus anostomus longus* Géry (1978):183, Sterba (1990):181, Cánovas & Puigcerver (2002):41)
Anostomus personai → *Laemolyta fasciata*
Anostomus plicatus → *Petulanos plicatus*
Anostomus spiloclistron → *Petulanos spiloclistron*
Anostomus taeniatus → *Laemolyta taeniata*
Anostomus ternetzi Fernández-Yépez, 1949 (van Ramshorst (1977):135, Géry (1978):183, Aquarien Atlas (1982):236, Axelrod's Atlas (1989):122, Sterba (1990):181, Roman (1992):128, Mills (1993):85, Cánovas & Puigcerver (2002):42, Dawes (2002):190) "redmouth headstander / Ternetz's Anostomus / Ternetz's Headstander / Ternetz-kopstaander"
Anostomus trimaculatus → *Pseudanos trimaculatus*
Ansiovissen → *Engraulidae*
Ansorge's Characin → *Nannaethiops ansorgii*
Ansorge's Congo Tetra → *Nannopetersius ansorgii*
Ansorge's Neolebias → *Nannaethiops ansorgii*
Antenna Bagrid → *Mystus castaneus*
Antennebaars(je) → *Mikrogeophagus ramirezi*
Antennemeervallen → *Pimelodidae*
Anthurus Crenicichla → *Crenicichla anthurus*
Anton's Piranha → *Pristobrycon striolatus*
Apoparua Cichlid → *Bujurquina apoparauana*
Aoria → *Mystus* / → *Sperata*
Aorichthys → *Sperata*
Apareiodon Eigenmann, 1916 (PARODONTIDAE) ↔ *Parodon* / *Saccodon*
Apareiodon affinis (Steindachner, 1879) ?(Santos (1987):35, Graça & Pavanelli (2007):27, Almirón et al. (2015):55; *Parodon affinis* Géry (1978):206, Aquarien Atlas Band 2 (1985):318, Axelrod's Atlas (1989):126, Sakurai, Sakamoto & Mori (1993):33; Leporinus Arcus Hoedeman (1956):552; Characidium Fasciatum Exotic Tropical Fishes (1967):170) "Paraguay Darter Tetra / Canivete"
Apareiodon agmatus Taphorn, López-Fernández & Bernard, 2008
Apareiodon argenteus Pavanelli & Britski, 2003
Apareiodon caquetae → *Parodon pongoensis*
Apareiodon calcante Pavanelli & Britski, 2003
Apareiodon davisii Fowler, 1941 (*Parodon davisii* Géry (1978):206)
Apareiodon gransabana Starnes & Schindler, 1993 (*Parodon gransabana* Aquarien Atlas Band 5 (1997):77)
Apareiodon guyanensis → *Parodon guyanensis*
Apareiodon hasemani Eigenmann, 1916 (*Parodon hasemani* Géry (1978):206)
Apareiodon ibitiensis Campos, 1944 (Géry (1978):206, Aquarien Atlas Band 6 (2002):226; *Parodon mogiguacuensis* Géry (1978):206)
Apareiodon itapicuruensis Eigenmann & Henn, 1916 (*Parodon itapicuruensis* Géry (1978):206)

Aristochromis Trewavas, 1935
 (CICHLIDAE>Pseudocrenilabrinae)
Aristochromis christyi Trewavas, 1935 (Staeck (1983):223, Aquarien Atlas Band 2 (1985):834, Axelrod (1993):173, Turner (1996):147, Aquarien Atlas Band 5 (1997):728, Konings (2001):118, Konings (2007):125)
Aristochromis Lombardoi → *Otopharynx lithobates*
Aristoteles-meerval → *Silurus aristotelis*
Arius Valenciennes, 1840 (ARIIDAE>Ariinae) ↔
Amissidens / *Amphiaricus* / *Ancharius* / *Brustiarius* / *Carlarius* / *Cathorops* / *Cinetodus* / *Cochlefelis* / *Cryptarius* / *Hemiaricus* / *Nedystoma* / *Nemapteryx* / *Notarius* / *Plicofollis* / *Potamarius* / *Sciades*
Arius acrocephalus → *Sciades latirostris*
Arius acutirostris Day, 1877 (Burgess (1989):168, Vidthayanon, Termvidchakorn & Pe (2005):114)
Arius africanus Günther, 1867 (Burgess (1989):168, Seegers (2008):526) "African sea catfish / African Crucifix Catfish"
Arius agassizii → *Cathorops agassizii*
Arius aguadulce → *Cathorops aguadulce*
Arius arenarius (Müller & Troschel, 1849) "sand catfish"
Arius arenatus → *Cathorops arenatus*
Arius arius (Hamilton, 1822) (Burgess (1989):168, Vidthayanon, Termvidchakorn & Pe (2005):113) "jella / Threadfin Sea Catfish / Hamilton's Catfish"
Arius armiger → *Nemapteryx armiger*
Arius australis → *Neoarius graeffei*
Arius berneyi → *Neoarius berneyi*
Arius brevibarbis → *Gogo brevibarbis*
Arius brevirostris → *Hemiaricus harmandi*
Arius brunellii Zolezzi, 1939 (Seegers (2008):527) "Somali sea catfish / Somali Crucifix Catfish"
Arius burmanicus → *Cochlefelis burmanica*
Arius caelatus → *Arius nenga*
Arius carinatus → *Cinetodus carinatus*
Arius Catfish → *Sciades seemanni*
Arius cleptolepis → *Neoarius berneyi*
Arius coues Hyrtl, 1859 (Burgess (1989):168) "Tigris barbelled catfish"
Arius crassilabris → *Pachyula crassilabris*
Arius danielsi → *Cochlefelis danielsi*
Arius dispar Herre, 1926 (Burgess (1989):168) "fleshysnout catfish"
Arius doriae → *Cephalocassis melanochir*
Arius festinus Ng & Sparks, 2003 (Seegers (2008):528) "Sofia sea catfish / Sofia Crucifix Catfish"
Arius fissus → *Cathorops arenatus*
Arius froggatti → *Cinetodus froggatti*
Arius gagora (Hamilton, 1822) (Burgess (1989):168) "gagora sea catfish"
Arius graeffei → *Neoarius graeffei*
Arius grandoculis → *Potamarius grandoculis*
Arius guatemalensis → *Sciades guatemalensis*
Arius jatius (Hamilton, 1822) (Burgess (1989):168; *Hemipimelodus jatius* Vidthayanon, Termvidchakorn & Pe (2005):116) in *Cephalocassis* ?
Arius jella Day, 1877 (Burgess (1989):169) = ? *Arius gagora*
Arius jordani → *Sciades seemanni*
Arius latirostris → *Potamosilurus latirostris*
Arius leptaspis → *Sciades leptaspis*
Arius leptonotacanthus Bleeker, 1849 (Burgess (1989):169) "smoothspined sea catfish / Smooth-spine Sea Catfish"
Arius macronotacanthus Bleeker, 1846 (Burgess (1989):169) "large-spined catfish"
Arius maculatus (Thunberg, 1792) (Burgess (1989):169, Tekriwal & Rao (1999):111, Atack (2006):68, Vidthayanon (2008):152; *Hemipimelodus bicolor* Vidthayanon (2008):156) "spotted sea catfish / Spotted Catfish / Spotted Shark Catfish / Bicolor Sea Catfish"
Arius madagascariensis Vaillant, 1894 (Burgess (1989):169, Seegers (2008):531) "Madagascar sea catfish / Madagascar Crucifix Catfish"
Arius malabaricus Day, 1877 (Burgess (1989):169) "Malabar sea catfish"
Arius manillensis Valenciennes, 1840 (*Arius manillensis* Burgess (1989):169) "Philippines sea catfish"
Arius microcephalus Bleeker, 1855 (Burgess (1989):169, Atack (2006):70; *Arius sciurus* Burgess (1989):169) "squirrelhead catfish"
Arius midgleyi → *Neoarius midgleyi*
Arius nenga (Hamilton, 1822) (Burgess (1989):169, Atack (2006):72; ? *Arius caelatus* Franke (1985):298, Burgess (1989):168, Vidthayanon (2008):150) "engraved catfish / Thickspine Catfish / Engraved Sea Catfish" in *Nemapteryx* ?
Arius nox → *Brustiarius nox*
Arius pleurops → *Cathorops agassizii*
Arius sagor → *Sciades sagor*
Arius seemanni → *Sciades seemanni*
Arius solidus → *Brustiarius solidus*
Arius sona → *Hemiaricus sona*
Arius spatula → *Cochlefelis spatula*
Arius stirlingi → *Nemapteryx armiger*
Arius stormii → *Hemiaricus stormii*
Arius subrostratus Valenciennes, 1840 (Burgess (1989):169)
Arius sumatranaus (Bennett, 1830) (Burgess (1989):169)
Arius Taylori → *Potamosilurus taylori*
Arius taylori → *Cathorops taylori*
Arius uncinatus Ng & Sparks, 2003 (Seegers

- (2008):533) "Andrapongy sea catfish / Andrapongy Crucifix Catfish"
- Arius utik Bleeker, 1846** (*Arius utik* Burgess (1989):170) "lowly sea catfish / Arius Oetik"
- Arius venosus Valenciennes, 1840** (Burgess (1989):170, Vidthayanon (2008):154) "veined catfish"
- Arizona Poeciliid → *Poeciliopsis occidentalis*
- Arkansas darter → *Etheostoma cragini*
- Arkansas saddled darter → *Etheostoma euzonum*
- Armoured Bichir → *Polypterus delhezi*
- Armoured Catfish → *Callichthys callichthys* / → *Megalechis picta* / → *Megalechis thoracata* / → *Leptoplosternum* spp.
- Arnold's Cichlid → *Thysochromis ansorgii*
- Arnold's Killie → *Fundulopanchax arnoldi*
- Arnold's Killifish → *Epiplatys dageti*
- Arnold's Lyretail → *Fundulopanchax arnoldi*
- Arnold's Redeye Characin → *Arnoldichthys spilopterus*
- Arnold's Sucker Catfish → *Otocinclus arnoldi*
- Arnold's Tetra → *Pseudocheirodon arnoldi*
- Arnolds roodoogzalm → *Arnoldichthys spilopterus*
- Arnoldichthys Myers, 1926** (CTENOLUCIIDAE)
