Gobio latus Anikin, 1905 "Issyk Kul gudgeon"
Gobio lepidolaemus Kessler, 1872 "Turkestan gudgeon"
Gobio liaoensis → Gobio cynocephalus
Gobio lingyuanensis → Gobio minulus
Gobio lozanoi Doadrio & Madeira, 2004 (Kottelat & Freyhof (2007):95) "Pyrenean gudgeon / Iberian Gudgeon"
Gobio macrocephalus Mori, 1930 "Korean gudgeon"
Gobio maeandricus Naseka, Erk'akan & Küçük, 2006 "İşıklı gudgeon"
Gobio meridionalis Xu, 1987
Gobio microlepidotus Battalgil, 1942 "Beyşehir gudgeon"
Gobio minutus Nichols, 1925
Gobio obtusirostris Valenciennes, 1842 (Kottelat & Freyhof (2007):96) "Danube gudgeon / Zuidelijke riviergrondel"
Gobio occitaniae Kottelat & Persat, 2005 (Kottelat & Freyhof (2007):97) "Languedoc gudgeon"
Gobio ohridanus Karaman, 1924 (Kottelat & Freyhof (2007):97) "Ohrid gudgeon"
Gobio rivularis → Abottina rivularis
Gobio sakaryaensis Turan et al., 2012 "Sakarya gudgeon"
Gobio sarmaticus Berg, 1949 (Kottelat & Freyhof (2007):98) "Ukrainian gudgeon"
Gobio shansiensis → Romanogobio rivuloides
Gobio sibiricus Nikolskii, 1936 "Siberian gudgeon"
Gobio skardarensis Karaman, 1936 (Kottelat & Freyhof (2007):99) "Skadar gudgeon"
Gobio soldatovi Berg, 1914 (Gobio gobio soldatovi Aquarien Atlas Band 3 (1991):217; ? Gobio gobio tungussicus Aquarien Atlas Band 3 (1991):218) "Pacific gudgeon / Amur Gudgeon / Soldatov's Gudgeon / Lena River Gudgeon"
Gobio sp. Biga "Biga Anatolian Gudgeon"
Gobio sp. Bilecik "Bilecik Anatolian Gudgeon"
Gobio sp. Tisza

Gobio tauricus Vasil'eva, 2005 "Chernaya River Gudgeon"	Gobioides La Cepède, 1800 (GOBIONELLIDAE>Gobionellinae) [this genus includes not listed marine species]
Gobio tenuicorpus Mori, 1934 (Aquarien Atlas Band 3 (1991):218) "Amur whitefin gudgeon / Eastern Whitefin Gudgeon"	Gobioides africanus (Giltay, 1935)
Gobio tumenensis (Chang, 1980)	<i>Gobioides ansorgii</i> → <i>Gobioides sagitta</i>
<i>Gobio tungussicus</i> → <i>Gobio soldatovi</i>	Gobioides broussonetii La Cepède, 1800 (Varjo (1982):208, Aquarien Atlas Band 2 (1985):1090, Axelrod's Atlas (1989):75, Goldstein (2000):396, Monks (2006):137) "violet goby / Dragon Fish / Dragon Goby / gobio violeta"
<i>Gobio uranoscopus</i> → <i>Romanogobio uranoscopus</i>	Gobioides grahamae Palmer & Wheeler, 1955 (Aquarien Atlas Band 3 (1991):984)
<i>Gobio uranoscopus stankoi</i> → <i>Romanogobio elimeius</i>	Gobioides peruanus (Steindachner, 1880) (Aquarien Atlas Band 3 (1991):984, Jiménez-Prado et al. (2015):363) "Peruvian eelgoby / Peruvian Goby / Blue Eelgoby"
<i>Gobio ussuriensis</i> → <i>Squalidus chankaensis</i>	Gobioides sagitta (Günther, 1862) "West African eelgoby"
Gobio volgensis Vasil'eva et al., 2008 "Volga gudgeon"	<i>Gobioides unicolor</i> → <i>Gobioides grahamae</i>
Gobiobotia Kreyenberg, 1911 (LEUCISCIDAE>Gobioninae) ↔ <i>Xenophysogobio</i>	Gobiomorphus Gill, 1863 (ELEOTRIDAE) ↔ <i>Allomogurnda</i>
Gobiobotia (Progobiobotia) abbreviata Fang & Wang, 1931	Gobiomorphus alpinus Stokell, 1962 "Tarndale bully"
Gobiobotia brevibarba Mori, 1935	Gobiomorphus australis (Krefft, 1864) (Aquarien Atlas Band 2 (1985):1064, Leggett & Merrick (1987):208, Allen (1989):187, Axelrod's Atlas (1989):723, Allen, Midgley & Allen (2002):290; <i>Krefftius australis</i> Stead (1906):184) "striped gudgeon"
Gobiobotia brevirostris Chen & Cao, 1977	Gobiomorphus basalis (Gray, 1842) (Aquarien Atlas Band 5 (1997):1018) "Cran's bully"
Gobiobotia cheni Bănărescu & Nalbant, 1966 (Chen & Chang (2005):132) "Taiwan eightbarbel gudgeon / Taiwan Eightwhisker Gudgeon"	Gobiomorphus breviceps (Stokell, 1939) (Aquarien Atlas Band 5 (1997):1018) "upland bully"
Gobiobotia filifer (Garman, 1912)	Gobiomorphus cotidianus McDowall, 1975 (Aquarien Atlas Band 5 (1997):1020) "common bully"
Gobiobotia (Progobiobotia) guilingensis Chen, 1989	Gobiomorphus coxii (Krefft, 1864) (Allen (1989):188, Axelrod's Atlas (1989):728, Allen, Midgley & Allen (2002):291) "Cox's gudgeon"
Gobiobotia homalopteroidea Rendahl, 1932	Gobiomorphus hubbsi (Stokell, 1959) "bluegill bully"
<i>Gobiobotia intermedia</i> → <i>Gobiobotia kolleri</i>	Gobiomorphus huttoni (Ogilby, 1894) (Aquarien Atlas Band 5 (1997):1022) "redfin bully"
Gobiobotia jiangxiensis Zhang & Liu, 1995	Gobiomorus La Cepède, 1800 (ELEOTRIDAE) [this genus includes a not listed marine species]
Gobiobotia kolleri Bănărescu & Nalbant, 1966 (?)	Gobiomorus dormitor La Cepède, 1800 (Aquarien Atlas Band 5 (1997):1024, Goldstein (2000):404) "bigmouth sleeper / Giant Goby / Sand Guabine / guavina bocón / guavina del Atlántico"
<i>Gobiobotia intermedia</i> Chen & Chang (2005):138 "Kaoping eightbarbel gudgeon"	Gobiomorus maculatus (Günther, 1859) (Aquarien Atlas Band 5 (1997):1026, Jiménez-Prado et al. (2015):350) "Pacific sleeper / dormilón manchado / Guavina manchado / guavina del Pacífico"
Gobiobotia longibarba Fang & Wang, 1931	Gobiomorus polylepis Ginsburg, 1953 "finescale sleeper / guavina cristalina"
Gobiobotia macrocephala Mori, 1935	<i>Gobionellidae</i> (gobionellids / Brackwassergrundeln / zoet- en brakwatergrondels) (GOBIIFORMES>Gobiodei)
Gobiobotia meridionalis Chen & Cao, 1977	Gobionellus Girard, 1858 (GOBIONELLIDAE>Gobionellinae) [this genus includes a not listed marine species] ↔ <i>Ctenogobius</i>
Gobiobotia naktongensis Mori, 1935	Gobionellus daguae (Eigenmann, 1918) "choco goby"
Gobiobotia nicholsi Bănărescu & Nalbant, 1966	Gobionellus microdon (Gilbert, 1892) (Jiménez-Prado et al. (2015):365) "palmtail goby / Gobio de Manglar / gobio cola de palma"
Gobiobotia pappenheimi Kreyenberg, 1911 "eightwhisker gudgeon"	Gobionellus occidentalis (Boulenger, 1909) "delta goby"
Gobiobotia paucirastella Zheng & Yan, 1986	
Gobiobotia tungi Fang, 1933	
Gobiobotia yuanjiangensis Chen & Cao, 1977	
<i>Gobiochromis</i> → <i>Steatocranus</i>	
Gobiocichla Kanazawa, 1951 (CICHLIDAE>Pseudocrenilabrinae)	
Gobiocichla' brevimanus (Boulenger, 1911) (<i>Tilapia brevimanus</i> Axelrod (1993):537, Aquarien Atlas Band 4 (1995):690, Lamboj (2004):69)	
Gobiocichla' busumana (Günther, 1903) ?(<i>Tilapia busumana</i> Aquarien Atlas Band 2 (1985):1000, Axelrod (1993):537, Linke & Staek (1994b):195, Linke & Staek (2002):228, Lamboj (2004):70) "Bosumtwi Tilapia / Birim Tilapia"	
Gobiocichla ethelwynnae Roberts, 1982 (Axelrod (1993):454, Aquarien Atlas Band 6 (2002):890, Lamboj (2004):32)	
Gobiocichla' irvinei (Trewavas, 1943) (<i>Steatocranus irvinei</i> Aquarien Atlas Band 3 (1991):872, Axelrod (1993):491, Linke & Staek (1994b):181, Linke & Staek (2002):214, Lamboj (2004):59) "Volta Torrent Cichlid"	
Gobiocichla' pra (Dunz & Schliewen, 2010) (Tilapia Busumana) "Pra tilapia"	
Gobiocichla wonderi Kanazawa, 1951 (Axelrod (1960b):22, Axelrod (1993):454, Lamboj (2004):33)	
Gobiocypris Ye & Fu, 1983 (LEUCISCIDAE>Gobioninae)	
Gobiocypris rarus Ye & Fu, 1983 "Chinese rare minnow"	

- Gobionellus oceanicus (Pallas, 1770)** (Goldstein (2000):397) "highfin goby / Sharpfin Goby / madrejuile flecha"

"Lucombe bulldog"

Marcusenius macrolepidotus (Peters, 1852)
(Aquarien Atlas Band 2 (1985):1144, Aquarien Atlas Band 4 (1995):810; *Gnathonemus macrolepidotus* Arnold (1938):69, Schreitmüller (1938):73, Holly in HMR (1940):450, Arnold (1949a):48, Beck (1950):155, Veldhuizen (1955):18, Sterba (1962):70, Exotic Tropical Fishes (1967):297, van Ramshorst (1977):126) "bulldog / Zambezi Bulldog / Scaly Mormyrid / Largescale Elephantnose / Shortnose Elephantnose"

Marcusenius macrophthalmus (Pellegrin, 1924)

Marcusenius mento (Boulenger, 1890)

Marcusenius meronai Bigorne & Paugy, 1990

Marcusenius monteiri (Günther, 1873)

Marcusenius moorii (Günther, 1867) (*Gnathonemus moorii* Poll (1953):11, Sterba (1962):70, van Ramshorst (1977):127, Varjo (1982):121, Sterba (1990):51) "Roundnose Elephantfish"

Marcusenius multisquamatus Kramer & Wink, 2013
"Cunene bulldog"

Marcusenius nigripinnis → *Pollimyrus nigripinnis*

Marcusenius ntemensis (Pellegrin, 1927)
Marcusenius nyasensis → *Marcusenius livingstonii*

Marcusenius paucisquamatus → *Marcusenius moorii*

Marcusenius pongolensis (Fowler, 1934) "South African bulldog / Southern Bulldog / Snavelvis"

Marcusenius rheni → *Marcusenius victoriae*

Marcusenius rudebeckii → *Pollimyrus isidori*

Marcusenius sanagaensis Boden, Teugels & Hopkins, 1997

Marcusenius schilthuisiae (Boulenger, 1899)
(Sakurai, Sakamoto & Mori (1993):283; *Gnathonemus schilthuisiae* Hoedeman (1954):47, Veldhuizen (1955):19, Lambert (1960):9, Sterba (1962):72, Dutta (1966):74, Ghadially (1969):142, Schiøtz & Dahlstrøm (1971):20, Hoedeman (1974):713, van Ramshorst (1977):128, Aquarien Atlas Band 2 (1985):1142, Sterba (1990):51) "Elephanttrunk Fish / Schilthuis's Elephantnose / Schilthuis' tapirvis"

Marcusenius senegalensis (Steindachner, 1870)
(Aquarien Atlas Band 6 (2002):1080)

Marcusenius senegalensis gracilis → *Marcusenius senegalensis*

Marcusenius senegalensis pfaffi → *Marcusenius senegalensis*

Marcusenius sp. Malindi "Sabaki stonebasher"

Marcusenius sp. Tana "Tana bulldog"

Marcusenius sp. Turkwell "Turkana stonebasher"

Marcusenius stanleyanus (Boulenger, 1897)
(*Gnathonemus stanleyanus* Poll (1953):15, Sterba (1962):72, Sterba (1990):51) "Stanley Falls Elephantnose"

Marcusenius thomasi (Boulenger, 1916)

Marcusenius ussleri (Günther, 1867)

Marcusenius victoriae (Worthington, 1929) "Victoria stonebasher"

Margariscus Cockerell, 1909
(LEUCISCIDAE>Leuciscinae)

Margariscus margarita (Cope, 1867) (Goldstein (2000):151; *Semotilus margarita* Thompson (1985):96; *Margariscus margarita athabascae* Goldstein (2000):151; *Margariscus margarita koelzi* Goldstein (2000):151) "pearl dace / Harvey Lake Pearl Dace"

Margariscus nachtriebi (Cox, 1896) (*Margariscus margarita nachtriebi* Goldstein (2000):151) "northern pearl dace / Nachtrieb Dace"

Margined Killie → *Aphyosemion celiae*

Margined madtom → *Noturus insignis*

Margined Rivulus → *Kryptolebias caudomarginatus*

Maria Mouthbreeder → *Bujurquina mariae*

Maria's Acara → *Bujurquina mariae*

Maria's Otocinclus → *Otocinclus mariae*

Mariae Dwarf Cichlid → *Apistogramma mendezi*

Marilyn's Pencilfish → *Nannostomus marilynae*

Marilyna Hardy, 1982 (TETRAODONTIDAE) [this genus includes not listed marine species]

Marilyna meraukensis (de Beaufort, 1955) (Aqualog 16 (2001):77) "Merauke toadfish"

Marine Catfish → *Plotosus lineatus*

Marinka → *Schizothorax argentatus*

Marjorie's hardyhead → *Craterocephalus marjoriae*

Marked Otocinclus → *Hisonotus notatus*

Markiana Eigenmann, 1903
(CHARACIDAE>Stevardiinae)

Markiana geayi (Pellegrin, 1908) (Géry (1978):455, Roman (1992):184) "redbelly tetra"

Markiana nigripinnis (Perugia, 1891) (Arnold (1939):70, Rachow in HMR (1942):671, Arnold (1949a):64, Veldhuizen (1956):47, Sterba (1962):112, Géry (1978):455, Sterba (1990):109, Aquarien Atlas Band 4 (1995):106; Orangeflossensalmes Arnold (1938):70) "orangefin characin / Stumptail Tetra / Orangefin Tetra / Oranjevinzalm"

Marlier's Julie → *Julidochromis marlieri*

Marmerbijlzalm → *Carnegiella strigata*

Marmergoerami → *Trichopodus trichopterus*

Marmergrondel → *Oxyeleotris marmorata*

Marmorated Rivulus → *Kryptolebias marmoratus*

Marmoratus Medakafish → *Oryzias marmoratus*

Maroni (cichlide) → *Cleithacara maronii*

Maroni eartheater → *Geophagus harreri*

Marosatherina Aarn, Ivantsoff & Kottelat, 1998
(TELMATHERINIDAE)

Marosatherina ladigesi (Ahl, 1936) (Dawes (2002):253, Aqualog 13 (2002):62; *Telmatherina ladigesi* Arnold & Ahl (1936):424, Arnold (1936):116, Beirens (1938):203, Kramer & Weise (1943):237, Arnold (1949a):105, Aurell, Jacobsson & Lindgren (1949):362, Laursen (1949):152, Werner (1949):197, Beck (1950):237, Rachow in HMR (1950):806, Hervey & Hems (1952):301, Kramer & Weise (1952):240, Brymer (1954):234, Ladiges (1954):plate 24, Axelrod & Schultz (1955):525, Hoedeman (1956):672, Meinken (1956):49, Vogt (1957):48, Makino (1958):60, McInerny & Gerard (1959):452, Sterba (1962):810, McInerny & Gerard (1966):452, Exotic Tropical Fishes (1967):578, Aurell, Jacobsson & Lindgren (1968):362, Schiøtz & Dahlstrøm (1971):126, Hoedeman (1974):718, de Oliveira (1977):245, van Ramshorst (1977):390, Aquarien Atlas (1982):824, Varjo (1982):187, Sterba (1990):617, Mills (1993):195, Sakurai, Sakamoto & Mori (1993):264, Cánovas & Puigcerver (2002):469)

"Celebes Rainbowfish / Celebes Sailfish / Celebes-zeilvis / Zonnestraalvis"

Marsh Killifish → *Fundulus confluentus*

Martha's antennemeerval → *Rhamdia marthae*

Martha's Catfish → *Rhamdia marthae*

Martinique Rivulus → *Anablepsoides cryptocallus*

Mary River Glassfish → *Ambassis marianus*

Mary's Cichlid → *Bujurquina mariae*

Maryland darter → *Etheostoma sellare*

Maskaheros McMahan & Piller, 2015

(CICHLIDAE>Cichlinae)

Maskaheros argenteus (Allgayer, 1991)

(*Cichlasoma argenteum* Conkel (1993):163; *Vieja argentea* Aquarien Atlas Band 4 (1995):702, Aqualog 5 (1996b):61, Die Buntbarsche Amerikas Band 1 (1998):403; *Cichlasoma* sp. Nemacheilus rubidipinnis mandalayensis → *Paracanthocobitis mandalayensis*
Nemacheilus saravacensis Boulenger, 1894
 (Vereinigte Zierfisch-Züchterien (1923):60, Ahl (1932):55, Arnold (1933b):135, Arnold & Ahl (1936):227, Arnold (1949a):73, Beck (1950):117; ? Nemachilus Fasciatus Rachow (1928):222, Stoye (1932):195, Stoye (1935):253, Holly in HMR (1938):257, Werner (1949):124, Hervey & Hems (1952):212) "Barred Loach / Gestreepte doornoog"
Nemacheilus selangoricus Duncker, 1904
 (Hoedeman (1956):602, Hoedeman (1974):431, Aquarien Atlas Band 2 (1985):352, Ott (2000):162; *Nemacheilus kuiperi* Exotic Tropical Fishes (1967):440, Sterba (1990):326; *Nemacheilus Fasciatus* Schneider & Whitney (1957):373; *Nemacheilus* sp. McInerny & Gerard (1959):316, McInerny & Gerard (1966):316) "fighting loach / Malayan Grey-banded Loach / Grayband Loach / Graybanded Sand-loach / Kuiper's Loach / Maleisisch bermpje"
Nemacheilus shebbearei → *Schistura scaturigina*
Nemacheilus sijuensis → *Mesonoemacheilus sijuensis*
Nemacheilus sinuatus → *Paracanthocobitis mooreh*
Nemacheilus smithi → *Paracobitis smithi*
Nemacheilus spiniferus Kottelat, 1984
Nemacheilus starostini → *Paracobitis starostini*
Nemacheilus stigmofasciatus Arunachalam & Muralidharan, 2009
Nemacheilus stolickai → *Triplophysa stolickai*
Nemacheilus strauchii → *Triplophysa strauchii*
Nemacheilus sturanyi → *Barbatula sturanyi*
Nemacheilus subfuscus (McClelland, 1839)

Nemacheilus tebo Hadiaty & Kottelat, 2009
Nemacheilus thai → *Schistura nicholsi*
Nemacheilus tigris → *Oxynoemacheilus tigris*
Nemacheilus translineatus → *Nemacheilus selangoricus*
Nemacheilus triangularis → *Mesonoemacheilus triangularis*
Nemacheilus troglocataractus Kottelat & Géry, 1989
Nemacheilus tuberigum Hadiaty & Siebert, 2001
Nemacheilus urophthalmus → *Paracanthocobitis urophthalma*
Nemacheilus variegatus → *Homatula variegatus*
Nemachilichthys Day, 1878
(NEMACHEILIDAE>Nemacheilinae)
Nemachilichthys rueppelli (Sykes, 1839) (Tekriwal & Rao (1999):93, Anna Mercy et al. (2007):133) "Rüppell's loach / Mongoose Loach / Longsnout Loach"
Nemachilichthys shimogensis → *Nemachilichthys rueppelli*
Nemadoras Eigenmann, 1925
(DORADIDAE>Doradinae) ↔ *Hemadoras* / *Nemadoras* / *Tenellus*
Nemadoras bachi → *Nemadoras humeralis*
Nemadoras cristinae Sabaj Pérez et al., 2014
Nemadoras elongatus (Boulenger, 1898) (Burgess (1989):218; *Opsodoras parallelus* Burgess (1989):222)
Nemadoras hemipeltis (Eigenmann, 1925)
(*Opsodoras hemipeltis* Burgess (1989):222)
Nemadoras humeralis (Kner, 1855) (*Opsodoras humeralis* Burgess (1989):222, Aquarien Atlas Band 5 (1997):302; *Nemadoras bachi* Burgess (1989):224)
Opsodoras orthacanthus → *Hemadoras stuebelii*
Opsodoras parallelus → *Nemadoras elongatus*
Nemapteryx Ogilby, 1908 (ARIIDAE>Ariinae) [this genus includes not listed marine species]
Nemapteryx armiger (De Vis, 1884) (*Arius armiger* Burgess (1989):168, Allen, Horte & Renyaan (2000):48; *Arius stirlingi* Axelrod's Atlas (1989):636, Burgess (1989):169) "copper catfish / Threadfin Catfish / Stirling's Hardhead Catfish"
Nematabramis Boulenger, 1894
(LEUCISCIDAE>Danioninae)
Nematabramis alestes (Seale & Bean, 1907)
Nematabramis borneensis Inger & Chin, 1962
Nematabramis everetti Boulenger, 1894
Nematabramis steindachnerii Popta, 1905
Nematalosa Regan, 1917
(CLUPEIDAE>Dorosomatinae) [this genus includes not listed marine species]
Nematalosa arabica Regan, 1917 "Arabian gizzard shad"
Nematalosa come (Richardson, 1846) "hairback herring / Western Pacific Gizzard Shad / Ryukyu-dorokui"
Nematalosa erebi (Günther, 1868) (Aquarien Atlas Band 2 (1985):1062, Allen (1989):26, Axelrod's Atlas (1989):685, Allen, Midgley & Allen (2002):65; *Dorosoma erebi* Stead (1906):27) "bony bream / Australian River Gizzard Shad / Bony Herring"
Nematalosa flyensis Wongratana, 1983 "Fly River herring / Fly River Gizzard Shad"
Nematalosa galathea Nelson & Rothman, 1973 "galathea gizzard shad"

Nematalosa japonica Regan, 1917 "Japanese gizzard shad / Japanese Threadfin Shad / Dorokui"
Nematalosa nasus (Bloch, 1795) (Ranjit Daniels (2002):64) "yellow gizzard shad / Bloch's Gizzard Shad"
Nematalosa papuensis (Munro, 1964) (Axelrod's Atlas (1989):633) "Strickland River herring / Strickland River Gizzard Shad / Goldencheek Herring"
Nematalosa sp. Yamur (Allen, Horte & Renyaan (2000):35) "Yamur bony bream"
Nematalosa vlaminghi (Munro, 1956) "Perth herring / Western Australian Gizzard Shad"
Nematobrycon Eigenmann, 1911
(CHARACIDAE>Stethaprioninae)
Nematobrycon Amphiloxus → *Nematobrycon lacortei*
Nematobrycon amphiloxus → *Nematobrycon palmeri*
Nematobrycon lacortei Weitzman & Fink, 1971 (van Ramshorst (1977):177, Géry (1978):386, Aquarien Atlas (1982):304, Varjo (1982):132, Axelrod's Atlas (1989):159, Sterba (1990):111, Sakurai, Sakamoto & Mori (1993):35, Cánovas & Puigcerver (2002):120, Dawes (2002):207, Chevoleau (2013b):40; Rainbow Tetra Dutta (1966):59; *Nematobrycon Amphiloxus* Exotic Tropical Fishes (1967):433) "rainbow tetra / Rainbow Emperor Tetra / Smaragdkeizertetra / Diamantkeizertetra / Rode keizertetra / Roodoog-keizertetra"
Nematobrycon palmeri Eigenmann, 1911 (Dutta (1966):58, McInerny & Gerard (1966):505, Exotic Tropical Fishes (1967):435, Schiøtz & Dahlstrøm (1971):40, Hoedeman (1974):677, de Oliveira (1977):124, van Ramshorst (1977):178, Géry (1978):386, Aquarien Atlas (1982):304, Varjo (1982):131, Axelrod's Atlas (1989):159, Sterba (1990):111, Mills (1993):82, Sakurai, Sakamoto & Mori (1993):35, Cánovas & Puigcerver (2002):121, Dawes (2002):207, Chevoleau (2013b):39; *Nematobrycon amphiloxus* van Ramshorst (1977):177) "emperor tetra / Golden Emperor Tetra / Black Emperor Tetra / Keizertetra / Blauwe Keizertetra"
Nematobrycon sp. Géry (Axelrod's Atlas (1989):161) "Géry's Emperor Tetra"
Nematocentris → *Melanotaenia*
Nematocharax Weitzman, Menezes & Britski, 1986
(CHARACIDAE>Stethaprioninae)
Nematocharax costai → *Nematocharax venustus*
Nematocharax venustus Weitzman, Menezes & Britski, 1986 (Aquarien Atlas Band 5 (1997):70) "Ultra Sailfin Tetra"
Nematogenyidae (worm catfishes / Wurmwelse / wormmeervallen) (SILURIFORMES>Loricarioidei)
Nematogenys Girard, 1855 (NEMATOGENYIDAE)
Nematogenys inermis (Guichenot, 1848) (Burgess (1989):310, Wels Atlas Band 1 (2002):752) "worm catfish / Wormmeerval"
Nematogobius Boulenger, 1910
(GOBIIDAE>Gobiinae) [this genus includes a not listed marine species]
Nematogobius maindroni (Sauvage, 1880)
(Aquarien Atlas Band 4 (1995):772)
Nematolebias Costa, 1998
(RIVULIDAE>Cynolebiinae)
Nematolebias catimbau Costa, Amorim & Aranha, 2014
Nematolebias papilliferus Costa, 2002 (Aqualog 14

(2000+):193, Costa (2009):129)

Nematolebias whitei (Myers, 1942) (Cánovas & Puigcerver (2002):506, Costa (2009):129; *Cynolebias whitei* Meinken in HMR (1965):1285, Exotic Tropical Fishes (1967):247, Hoedeman (1974):796, Terceira (1974):65, Aquarien Atlas (1982):554, Lazara (1984):58, Axelrod's Atlas (1989):269, Sterba (1990):488, Costa (1995):43, Wildekamp (1995):258, Dawes (2002):267; *Simpsonichthys whitei* Aqualog 14 (2000):187; *Pterolebias elegans* "Rio pearlfish / White's Pearlfish"

Nematopoma searlesi → *Corynopoma riisei*

Nemuroglanis Eigenmann & Eigenmann, 1889 (HEPTAPTERIDAE)

Nemuroglanis furcatus Ribeiro, Pedroza & Rapp Py-Daniel, 2011

Nemuroglanis lanceolatus Eigenmann & Eigenmann, 1889 (Burgess (1989):277)

Nemuroglanis mariai (Schultz, 1944) (*Heptapterus mariai* Burgess (1989):276)

Nemuroglanis pauciradiatus Ferraris, 1988

Neoarius Castelnau, 1878 (ARIIDAE>Ariinae)

Neoarius augustus (Roberts, 1978) (*Arius augustus* Burgess (1989):168) "shortbarbel catfish"

Neoarius australis → *Neoarius graeffei*

Neoarius berneyi (Whitley, 1941) (*Arius berneyi* Aquarien Atlas Band 2 (1985):434, Sands (1985):15, Leggett & Merrick (1987):106, Allen (1989):48, Axelrod's Atlas (1989):681, Burgess (1989):168, Allen, Midgley & Allen (2002):70) "highfin catfish / Berney's Catfish / Berney's Shark Cat"

Neoarius graeffei (Kner & Steindachner, 1867) (*Hexanematicthys graeffei* Aquarien Atlas Band 2 (1985):434; *Arius graeffei* Sands (1985):26, Leggett & Merrick (1987):104, Axelrod's Atlas (1989):636, Burgess (1989):168, Aquarien Atlas Band 3 (1991):297, Allen, Horte & Renyaan (2000):42, Allen, Midgley & Allen (2002):71, Monks (2006):147; *Galeichthys australis* Stead (1906):40) "blue catfish / Lesser Salmon Catfish / Blue Salmon Catfish / Graeffe's Salmon Catfish / Australian Shark Catfish"

Neoarius midgleyi (Kailola & Pierce, 1988) (*Arius midgleyi* Allen (1989):54, Burgess (1989):170, Allen, Midgley & Allen (2002):73) "silver cobbler / Shovelnose Catfish"

Neoarius pectoralis (Kailola, 2000) "sawspine catfish"

Neoatherina → *Melanotaenia*

Neoatherina australis → *Melanotaenia splendida australis*

Neobarynotus → *Cyclocheilichthys*

Neobola Vinciguerra, 1895 (LEUCISCIDAE>Danioninae)

Neobola bottegoi Vinciguerra, 1895 "Somalian sardine"

Neobola fluviatilis (Whitehead, 1962) "Athi sardine"

Neobola spinifer → *Mesobola spinifer*

Neobola stellae (Worthington, 1932) "Lake Turkana minnow / Turkana Minnow"

Neoborus → *Ichthyborus*

Neoceratodontidae (Australian lungfishes / Australische Lungenfische / Australische longvissen) (DIPNOIFORMES)

Neoceratodus Castelnau, 1876 (NEOCERATODONTIDAE)

Neoceratodus forsteri (Krefft, 1870) (Stead (1906):229, Ahl (1932):33, Arnold & Ahl (1936):21, Beirens (1938):208, Angel (1946):55, Holly in HMR (1954):922, Ladiges (1954):164, Sterba (1962):847, Hoedeman (1974):307, Lüling (1979):4, Aquarien Atlas Band 2 (1985):206, Allen (1989):23, Axelrod's Atlas (1989):736, Sterba (1990):883, Allen, Midgley & Allen (2002):55; *Ceratodus forsteri* Bade (1907):334, Bade (1925):222, Bade (1931):396; *Ceratodus microlepis* Bade (1907):335, Bade (1931):397) "Australian lungfish / Queensland Lungfish / Barramunda / Burnett Salmon / Australische longvis"

Neochanna Günther, 1867 (GALAXIIDAE)

Neochanna apoda Günther, 1867 "brown mudfish"

Neochanna burrowsius (Phillipps, 1926) "Canterbury mudfish"

Neochanna cleaveri (Scott, 1934) (*Galaxias cleaveri* Aquarien Atlas Band 2 (1985):1078, Allen (1989):36, Allen, Midgley & Allen (2002):97) "Tasmanian mudfish"

Neochanna diversus Stokell, 1949 "black mudfish"

Neochanna heleios Ling & Gleeson, 2001 "Northland mudfish"

Neochanna rekohua (Mitchell, 1995) "Chatham Island galaxias"

Neochelon Durand et al., 2012 (MUGILIDAE)

Neochelon falcipinnis (Valenciennes, 1836) (*Mugil falcipinnis* Goffin (1909):136, Ahl (1932):76, Arnold (1933b):134, Arnold & Ahl (1936):426, Arnold (1949a):71; *Chelon falcipinnis* Sterba (1962):812, Sterba (1990):812) "sicklefin mullet"

Neochromis Regan, 1920 (CICHLIDAE>Pseudocrenilabrinae)

Neochromis gigas Seehausen & Lippitsch, 1998 (*Haplochromis (Neochromis)* sp. giant scraper Seehausen (1996):83) "Haplochromis Giant Scraper"

Neochromis greenwoodi Seehausen & Bouton, 1998 (*Haplochromis (Neochromis)* sp. velvet black Seehausen (1996):70, James (2002):62) "Velvet Black / Haplochromis Velvet Black"

Neochromis nigricans (Boulenger, 1906) (Aquarien Atlas Band 2 (1985):960, Smith (2001):73; *Haplochromis nigricans* Staek (1977):248, Axelrod (1993):409, Cánovas & Puigcerver (2002):701, James (2002):62) "Haplochromis sp. Entebbe"

Neochromis omnicaeruleus Seehausen & Bouton, 1998 (*Haplochromis (Neochromis)* sp. blue scraper Seehausen (1996):74) "Haplochromis Blue Scraper"

Neochromis rufocaudalis Seehausen & Bouton, 1998 (*Haplochromis (Neochromis)* Nigricans Seehausen (1996):67) "Haplochromis Nigricans"

Neochromis simotes (Boulenger, 1911) (*Haplochromis (Neochromis)* simotes Seehausen (1996):89) "Haplochromis Nigricans Uganda"

Neochromis sp. Bihuru scraper (*Haplochromis* sp. Bihuru scraper Seehausen (1996):79)

Neochromis sp. black nigricans (*Haplochromis* sp. black nigricans Seehausen (1996):70)

Neochromis sp. black tail giant scraper (*Haplochromis* sp. black tail giant scraper Seehausen (1996):86)

Neochromis sp. cross dresser (*Haplochromis* sp. cross dresser Seehausen (1996):90) "Haplochromis Nigricans"

Neochromis sp. Jinja big scraper (*Haplochromis* sp. Jinja big scraper Seehausen (1996):90)

- Neochromis* sp. **Jinja blue scraper**
Neochromis sp. **Juma scraper** (*Haplochromis* sp. *Juma scraper* Seehausen (1996):75)
- Neochromis* sp. **kruising** (*Haplochromis* sp. *kruising* Seehausen (1996):84)
- Neochromis* sp. **Labeo scraper** (*Haplochromis* sp. *Labeo scraper* Seehausen (1996):82)
- Neochromis* sp. **large eye nigricans** (*Haplochromis* sp. *large eye nigricans* Seehausen (1996):131)
- Neochromis* sp. **large scale nigricans** (*Haplochromis* sp. *large scale nigricans* Seehausen (1996):87)
- Neochromis* sp. **long black** (*Haplochromis* sp. *long black* Seehausen (1996):79)
- Neochromis* sp. **Madonna**
- Neochromis* sp. **red anal nigricans** (*Haplochromis* sp. *red anal nigricans* Seehausen (1996):90)
- Neochromis* sp. **red tail giant scraper** (*Haplochromis* sp. *red tail giant scraper* Seehausen (1996):86)
- Neochromis* sp. **slender scraper** (*Haplochromis* sp. *slender scraper* Seehausen (1996):89)
- Neochromis* sp. **unicuspid scraper** (*Haplochromis* sp. *unicuspid scraper* Seehausen (1996):82)
- Neochromis* sp. **Vesi scraper** (*Haplochromis* sp. *Vesi scraper* Seehausen (1996):75)
- Neochromis* sp. **yellow anal scraper** (*Haplochromis* sp. *yellow anal scraper* Seehausen (1996):78)
- Neocottus Sideleva, 1982** (COTTIDAE)
- Neocottus thermalis Sideleva, 2002** "thermal water sculpin"
- Neocottus werestschagini** (Taliev, 1935) "crumbly sculpin"
- Neodontobutis** Chen, Kottelat & Wu, 2002 (ODONTOBUTIDAE)
- Neodontobutis aurarmus** (Vidthayanon, 1995)
- Neodontobutis hainanensis** (Chen, 1985)
- Neodontobutis macropectorialis** (Mai, 1978)
- Neodontobutis ngheanensis** Nguyen & Nguyen, 2011
- Neodontobutis tonkinensis** (Mai, 1978)
- Neoeucirrhichthys** Bănărescu & Nalbant, 1968 (COBITIDAE)
- Neoeucirrhichthys maydelli** Bănărescu & Nalbant, 1968 (Shrestha (2008):138) "Golpara Loach"
- Neofundulus** Myers, 1924 (RIVULIDAE>Rivulinae)
- Neofundulus acutirostratus** Costa, 1992
- Neofundulus aureomaculatus** Costa, 2015
- Neofundulus guaporensis** Costa, 1988
- Neofundulus ornatipinnis** Myers, 1935 (Lazara (1984):107, Aquarien Atlas Band 5 (1997):554, Aqualog 14 (2000):114) "Ornate Longfin"
- Neofundulus paraguayensis** (Eigenmann & Kennedy, 1903) (Lazara (1984):108, Sterba (1990):496, Aquarien Atlas Band 5 (1997):554, Aqualog 14 (2000):114) "Paraguayan Longfin"
- Neofundulus parvipinnis** Costa, 1988 (Aquarien Atlas Band 5 (1997):556, Aqualog 14 (2000):114) "Smallfin Longfin"
- Neofundulus rubrofasciatus** Costa, 2015

- Parancistrus vicinus* → *Parancistrus aurantiacus*
- Paraneetroplus Regan, 1905** (CICHLIDAE>Cichlinae)
↔ Vieja
- Paraneetroplus bulleri Regan, 1905** (Aquarien Atlas
Band 3 (1991):840, Axelrod (1993):614, Conkel
(1993):185, Aqualog 5 (1996b):39, Staeck & Linke
(1996):141, Die Buntbarsche Amerikas Band 1
(1998):417) "Sarabia cichlid / Buller's Cichlid /
Almoloya Bulleri / Jaltepec Bulleri / mojarra del
Sarabia"
- Paraneetroplus gibbiceps (Steindachner, 1864)**
(Aquarien Atlas Band 4 (1995):664, Aqualog 5
(1996b):52, Die Buntbarsche Amerikas Band 1
(1998):419; *Herichthys gibbiceps* Axelrod (1993):579; ?
Paraneetroplus omonti Aquarien Atlas Band 4
(1995):668, Aqualog 5 (1996b):52, Die Buntbarsche
Amerikas Band 1 (1998):420) "Teapa cichlid /
Gibbiceps Neetroplus / Tulija Neetroplus / mojarra del
Teapa"
- Paraneetroplus nebuliferus (Günther, 1860)**

(Aquarien Atlas Band 4 (1995):666, Aqualog 5 (1996b):52, Die Buntbarsche Amerikas Band 1 (1998):421; *Cichlasoma nebuliferum* Conkel (1993):159; *Herichthys nebulifer* Axelrod (1993):593 "Papaloapan cichlid / Nebulifer Cichlid / mojarra del Papaloapan"

Paraneetroplus omonti → *Paraneetroplus gibbiceps*

Paranemachilus Zhu, 1983
(NEMACHEILIDAE>Yunnanilinae)

Paranemachilus genilepis Zhu, 1983

Paranemachilus pingguoensis Gan, 2013

Paranothobranchius → *Nothobranchius*

Parapetenia → *Parachromis* / → *Nandopsis*

Paraphago Boulenger, 1899 (DISTICHODONTIDAE)

Paraphago Rostratus → *Mesoborus crocodilus*

Paraphago rostratus Boulenger, 1899 (Goffin (1909):128, Géry (1978):91, Aquarien Atlas Band 2 (1985):232) "Striped Fin-eater"

Paraphoxinus → *Phoxinellus*

Parapimelodus La Monte, 1933
(PIMELODIDAE>Pimelodinae)

Parapimelodus nigribarbis (Boulenger, 1889)

Parapimelodus valencienni (Lütken, 1874)
(Burgess (1989):265, Almirón et al. (2015):211; *Pimelodus spegazzinii* Burgess (1989):280)

Paraplotosus Bleeker, 1863 (PLOTOSIDAE) [this genus includes two not listed marine species]

Paraplotosus albilibris (Valenciennes, 1840)
(Burgess (1989):180; marine species?) "whitelip catfish"

Parapocryptes Bleeker, 1874
(GOBIONELLIDAE>Oxudercinae)

Parapocryptes maculatus (Oshima, 1926)

Parapocryptes rictuosus (Valenciennes, 1837)
"pointedtail goby"

Parapocryptes serperaster (Richardson, 1846)
(Axelrod's Atlas (1989):609, Aquarien Atlas Band 3 (1991):998, Atack (2006):159, Monks (2006):208) "serpent mudskipper / Mudrill Skipper / Slim Mudskipper"

Parapoecilia → *Pamphorichthys*

Parapolynemus Feltes, 1993 (POLYNEMIDAE)

Parapolynemus verekeri (Saville-Kent, 1889)
"streamer threadfin / Dwarf Paradise Fish"

Parapristella Géry, 1964
(CHARACIDAE>Stethaprioninae)

Parapristella aubynei (Eigenmann, 1909) (Géry (1978):487)

Parapristella georgiae Géry, 1964 (Géry (1978):487, Axelrod's Atlas (1989):181) "Plain Jane"

Parapristella sp. Dusky (Axelrod's Atlas (1989):175) "Dusky Plain Jane"

Paraprotomyzon Pellegrin & Fang, 1935
(BALITORIDAE>Gastromyzontinae)

Paraprotomyzon bamaensis Tang, 1997

Paraprotomyzon lungkowensis Xie, Yang & Gong, 1984

Paraprotomyzon multifasciatus Pellegrin & Fang, 1935

Paraprotomyzon niulanjiangensis Lu, Lu & Mao, 2005

Parapsilorhynchus Hora, 1921
(CYPRINIDAE>Labeoninae)

Parapsilorhynchus discophorus → *Parapsilorhynchus tentaculatus*

Parapsilorhynchus elongatus Singh, 1994

Parapsilorhynchus prateri Hora & Misra, 1938

Parapsilorhynchus tentaculatus (Annandale, 1919)
"Ratnagiri minnow / Khandalla Minnow / Dwarf Indian Bloodfin Garra"

Parapteronotus Albert, 2001
(APTERONOTIDAE>Apterontinae) ↔ *Apterontus*

Parapteronotus bonapartii (Castelnau, 1855)
(*Apterontus bonapartii* Mago-Leccia (1994):29; *Apterontus anas* Mago-Leccia (1994):28; *Apterontus hasemani* Mago-Leccia (1994):29) "Dragon Knife"

Parapteronotus hasemani → *Parapteronotus bonapartii*

Paraqianlabeo Zhao et al., 2014
(CYPRINIDAE>Labeoninae)

Paraqianlabeo lineatus Zhao et al., 2014
Paraquay Acara → *Bujurquina vittata*

Pararashbora → *Aphyocyparis*

Pararectoris → *Parasinilabeo*

Pararhinichthys Stauffer, Hocutt & Mayden, 1997
(LEUCISCIDAE>Leuciscinae)

Pararhinichthys bowersi (Goldsborough & Clark, 1908) (Goldstein (2000):126) "cheat minnow"

Pararhynchobdella → *Sinobdella*

Parasalanx Regan, 1908 (OSMERIDAE>Salanginae)

Parasalanx ariakensis (Kishinouye, 1902) "Ariake icefish / Ariake-shirauwo"

Parasalanx brachyrostralis (Fang, 1934)

Parasalanx cuvieri (Valenciennes, 1850) "noodle-fish / Whitebait"

Parasalanx prognathus (Regan, 1908)

Paraschistura Prokofiev, 2009
(NEMACHEILIDAE>Nemacheilinae)

Paraschistura abdolii Freyhof et al., 2015

Paraschistura alepidota (Mirza & Bănărescu, 1970)

Paraschistura alta (Nalbant & Bianco, 1998)

Paraschistura aredvii Freyhof et al., 2015 "Zohreh River loach"

Paraschistura bampurensis (Nikolskii, 1900)

Paraschistura chrysicristinae (Nalbant, 1998)
"Upper Tigris loach / Batman Crested Loach"

Paraschistura cristata (Berg, 1898) (*Barbatula cristata* Aquarien Atlas Band 5 (1997):86; *Nemacheilus cristatus*) "Turkmenistan loach / Crested Stone Loach / Turkmenian Stone Loach"

Paraschistura delvarii Mousavi-Sabet & Eagderi, 2015 "Mond loach"

Paraschistura hormuzensis Freyhof et al., 2015

Paraschistura ilamensis Vatandoust & Eagderi, 2015 "Ilam loach"

Paraschistura kessleri (Günther, 1889)
(*Nemacheilus kessleri* Axelrod's Atlas (1989):93, Aquarien Atlas Band 3 (1991):278; *Schistura sargadensis* Aquarien Atlas Band 5 (1997):102) "Sarhad loach / Kessler's Loach"

Paraschistura lepidocaulis (Mirza & Nalbant, 1981)

Paraschistura lindbergi (Bănărescu & Mirza, 1965)

Paraschistura microlabra (Mirza & Nalbant, 1981)

Paraschistura montana (McClelland, 1838)
?(*Schistura montana* Aquarien Atlas Band 5 (1997):94; *Nemacheilus kangrae* Aquarien Atlas Band 5 (1997):92) "Punjab Loach"

Paraschistura naseeri (Ahmad & Mirza, 1963)

Paraschistura naumannii Freyhof et al., 2015

Paraschistura nielseni (Nalbant & Bianco, 1998)

- "Persian Gulf loach / Nielsen Loach"
Paraschistura pakistanica (Mirza & Bănărescu, 1969)
Paraschistura pasatigris Freyhof et al., 2015 "Karun River loach"
Paraschistura prashari (Hora, 1933)
Paraschistura punjabensis (Hora, 1923)
Paraschistura susiani Freyhof et al., 2015
Paraschistura turcmenica (Berg, 1932)
Paraschistura turcomana (Nikolskii, 1947)
Parasicydium Risch, 1980
(GOBIONELLIDAE>Gobionellinae)
Parasicydium bandama Risch, 1980
Parasikukia Doi, 2000 (CYPRINIDAE>Cyprininae)
Parasikukia maculata Doi, 2000
Parasilurus → Silurus
Parasinilabeo Wu, 1939 (CYPRINIDAE>Labeoninae)
Parasinilabeo assimilis Wu & Yao, 1977
Parasinilabeo longibarbus Zhu, Lan & Zhang, 2006
Parasinilabeo longicorpus Zhang, 2000
Parasinilabeo longiventralis Huang, Chen & Yang, 2007
Parasinilabeo maculatus Zhang, 2000
Parasinilabeo microps (Su, Yang & Cui, 2001)
Parasiterende meervallen → Stegophilinae
Paraspheerichthys Prashad & Mukerji, 1929
(OSPHRONEIDAE>Luciocephalinae)
Paraspheerichthys lineatus Britz & Kottelat, 2002
(Aqualog 6 (1997+):128, Linke (2013):225) "Honey Chocolate Gourami / Dwarf Chocolate Gourami"
Paraspheerichthys ocellatus Prashad & Mukerji, 1929 (Vierke (1978):144, Vierke (1986):74, Axelrod's Atlas (1989):622, Sterba (1990):868, Aquarien Atlas Band 3 (1991):662, Aqualog 6 (1997):76, Linke (1998):118, Dawes (2002):242, Vidhayanon, Termvidchakorn & Pe (2005):146, Linke (2013):226) "eyespot gourami / Burmese Chocolate Gourami / False Chocolate Gourami / Burmese chocolate-gourami / Pauwooggoerami"
Paraspiniabarbus Chu & Kottelat, 1989
(CYPRINIDAE>Cyprininae)
Paraspiniabarbus allopleurus → *Poropuntius allopleurus*
Paraspiniabarbus macracanthus (Pellegrin & Chevey, 1936)
Parasqualidus → *Squalidus*
Parastegophilus → *Pseudostegophilus*
Parastremma Eigenmann, 1912
(CHARACIDAE>Stethaprioninae)
Parastremma album Dahl, 1960 (Géry (1978):538)
Parastremma pulchrum Dahl, 1960 (Géry (1978):538)
Parastremma sadina Eigenmann, 1912 (Géry (1978):538, Aquarien Atlas Band 4 (1995):77)
Parasyngnathus → *Hippichthys*
Paratanakia Chang, Chen & Mayden, 2014
(LEUCISCIDAE>Acheilognathinae)
Paratanakia himantegus (Günther, 1868)
(Paracheilognathus himantegus Aquarien Atlas Band 5 (1997):192; Tanakia himantegus Chen & Chang (2005):150) "Taiwan bitterling"
Paratheraps → Vieja
Paratherina Kottelat, 1990 (TELMATHERINIDAE)
Paratherina cyanea Aurich, 1935 (Aqualog 13 (2002):62) "Blue Celebes Rainbowfish"
Paratherina labiosa Aurich, 1935 (Aqualog 13 (2002):63) "Thicklip Celebes Rainbowfish"
Paratherina striata Aurich, 1935 "Striped Celebes Rainbowfish"
Paratherina wolterecki Aurich, 1935 (Aqualog 13 (2002):63) "Woltereck's Celebes Rainbowfish"
Paratilapia Bleeker, 1868
(CICHLIDAE>Ptychochrominae)
Paratilapia bleekeri Sauvage, 1891 (Aquarien Atlas Band 5 (1997):902; Paratilapia Polleni Aquarien Atlas Band 4 (1995):669) "Marakely"
Paratilapia polleni Bleeker, 1868 (Staeck (1977):78, Axelrod (1993):559, Aquarien Atlas Band 4 (1995):668, Aquarien Atlas Band 5 (1997):903, Dawes (2002):111) "Fiamanga"
Paratilapia sp. All Black
Paratilapia sp. Betsileo-Hochland "Ambalavao Paratilapia"
Paratilapia sp. East
Paratilapia sp. Fianarantsoa
Paratilapia sp. Fony
Paratilapia sp. Ifasy
Paratilapia sp. Ihotry
Paratilapia sp. Maralambo
Paratilapia sp. Ostküste
Paratilapia sp. Ranomafana
Paratilapia sp. Small Spot
Paratilapia sp. Südwest
Paratilapia sp. Unterer Nordwesten
Paratilapia typus → *Paratilapia polleni*
Parator Wu, Yang, Yue & Huang, 1964
(CYPRINIDAE>Cyprininae)
Parator zonatus (Lin, 1935)
Paratrygon Duméril, 1865 (POTAMOTRYGONIDAE)
↔ *Potamotrygon*
Paratrygon aiereba (Müller & Henle, 1841) (Santos (1987):21, Aqualog 15 (2000):126; *Elipesurus strongylopterus* Santos (1987):22) "Discus Ray / Disceus / Manzana Ray / Ceja Ray / Aiereba / P57"
Paratrygon laticeps → *Potamotrygon motoro*
Paratrypauchen Murdy, 2008
(GOBIONELLIDAE>Oxudercinae)
Paratrypauchen microcephalus (Bleeker, 1860)
Parauchenipterus Bleeker, 1862
(AUCHENIPTERIDAE>Auchenipterinae)
Parauchenipterus ceratophy whole (Kner, 1857)
Parauchenipterus galeatus (Linnæus, 1766)
(Aquarien Atlas Band 2 (1985):444, Franke (1985):206, Axelrod's Atlas (1989):212, Burgess (1989):242, Sterba (1990):372, Roman (1992):99, Aquarien Atlas Band 5 (1997):236, Sands (1997):30, Graça & Pavanelli (2007):175; *Trachycorystes galeatus* Santos (1987):96; *Trachelyopterus galeatus* Casciotta, Almirón & Bechara (2003):136, Almirón et al. (2015):234;? *Trachycorystes* sp. Arnold (1937):77; *Trachycorystes glaber* Arnold (1949a):109, Sterba (1962):366;? *Callichthys* sp. McInerny & Gerard (1959):347, McInerny & Gerard (1966):347) "Starry Woodcat / Driftwood Catfish / Anujá / Cabeça-de-ferro"
Parauchenipterus insignis peloichthys →
Parauchenipterus peloichthys
Parauchenipterus paseae → *Parauchenipterus galeatus*
Parauchenipterus porosus (Eigenmann & Eigenmann, 1888)

Parauchenipterus striatulus (Steindachner, 1877)
 (Franke (1985):207, Burgess (1989):242, Sterba (1990):372; *Trachycorystes striatulus* Vereinigte Zierfisch-Züchtereien (1923):80, Ahl (1932):58, Arnold (1933b):157, Arnold & Ahl (1936):256, Holly in HMR (1940):509, Arnold (1949a):109, Veldhuizen & Werner (1955):11, Sterba (1962):366, Santos (1987):107) "singing catfish / Cangati"

Parauchenoglanis Boulenger, 1911

(CLAROTEIDAE>Auchenoglanidinae) ↔
Notoglanidium

Parauchenoglanis ahli (Holly, 1930) (Seegers (2008):109; *Auchenoglanis ahli* Burgess (1989):71) "Ahli's flatnose catfish"

Parauchenoglanis altipinnis (Boulenger, 1911)
 (Seegers (2008):110; *Auchenoglanis altipinnis* Burgess (1989):71) "sailfin flatnose catfish"

Parauchenoglanis ansorgii → *Anaspidoglanis macrostoma*

Parauchenoglanis balayi (Sauvage, 1879) (Seegers (2008):111; *Auchenoglanis balayi* Burgess (1989):71, Aquarien Atlas Band 5 (1997):244; *Auchenoglanis guirali* Burgess (1989):71; *Auchenoglanis pietschmanni* Burgess (1989):71; *Auchenoglanis ubangensis* Burgess (1989):71) "Gabon flatnose catfish"

Parauchenoglanis boutchangai → *Anaspidoglanis boutchangai*

Parauchenoglanis buettikoferi (Popa, 1913)
 (Seegers (2008):112; *Auchenoglanis buettikoferi* Burgess (1989):71) "Nigerian flatnose catfish"

Parauchenoglanis fasciatus → *Parauchenoglanis monkei*

Parauchenoglanis grandis → *Parauchenoglanis punctatus*

Parauchenoglanis guirali → *Parauchenoglanis balayi*

Parauchenoglanis guttatus → *Parauchenoglanis monkei*

Parauchenoglanis iturii → *Parauchenoglanis punctatus*

Parauchenoglanis longiceps (Boulenger, 1913)

(Seegers (2008):113; *Auchenoglanis longiceps* Burgess (1989):71; *Auchenoglanis maculosus* Burgess (1989):71) "longhead flatnose catfish"

Parauchenoglanis macrostoma → *Anaspidoglanis macrostoma*

Parauchenoglanis maculosus → *Parauchenoglanis longiceps*

Parauchenoglanis monkei (Keilhack, 1910)

(*Auchenoglanis monkei* Burgess (1989):71;
Parauchenoglanis guttatus Franke (1985):229, Sands (1985):82, Axelrod's Atlas (1989):413, Burgess (1989):44; *Auchenoglanis fasciatus* Burgess (1989):71;
Parauchenoglanis loennbergi Seegers (2008):112; ?
Arius sp. Vereinigte Zierfisch-Züchtereien (1923):75)
 "dotted catfish / Spotted Flatnose Catfish / African Flathead Catfish"

Parauchenoglanis ngamensis (Boulenger, 1911)

(Seegers (2008):114; *Auchenoglanis ngamensis* Sands (1985):50, Burgess (1989):44, Aquarien Atlas Band 3 (1991):304, Dawes (2002):133) "Zambezi grunter / Largemouth Bagrid / Ngami Vacuum-mouthed Catfish / Bigmouth Spiny Catfish / Zambezi-knorbaber"

Parauchenoglanis pantherinus (Pellegrin, 1929)

(Seegers (2008):114; *Auchenoglanis pantherinus* Burgess (1989):71) "panther flatnose catfish / Panther Vacuum-mouthed Catfish"

Parauchenoglanis pietschmanni → *Parauchenoglanis balayi*

Parauchenoglanis pulcher → *Parauchenoglanis balayi*
Parauchenoglanis punctatus (Boulenger, 1902)

(Seegers (2008):115; *Auchenoglanis punctatus* Lambert (1960):23, Burgess (1989):71, Aquarien Atlas Band 4 (1995):231; *Auchenoglanis grandis* Burgess (1989):71; *Auchenoglanis iturii* Burgess (1989):71; ?
Arius sp. Vereinigte Zierfisch-Züchtereien (1923):75)
 "dotted flatnose catfish / African Spotted Spiny Catfish"
Parauchenoglanis ubangensis → *Parauchenoglanis balayi*

Paravandellia Miranda Ribeiro, 1912

(TRICHOMYCTERIDAE>Vandelliinae)
Paravandellia magdalena → *Paravandellia phaneronema*

Paravandellia oxyptera Miranda Ribeiro, 1912

(Burgess (1989):324, Graça & Pavanelli (2007):110, Almirón et al. (2015):146; *Branchioica bertoni* Burgess (1989):317, Wels Atlas Band 1 (2002):818; *Paravandellia teaguei* Burgess (1989):317; *Vandellia hematophaga* Santos (1987):106, Burgess (1989):319)

Paravandellia phaneronema (Miles, 1943) (Burgess (1989):324; *Paravandellia magdalena* Burgess (1989):324)

Paravandellia teaguei → *Paravandellia oxyptera*
Paravandellia wieneri → *Plectrochilus wieneri*

Parawaous Watson, 1993

(GOBIONELLIDAE>Gobionellinae)

Parawaous megacephalus (Fowler, 1905)

Parazacco Chen, 1982

(LEUCISCIDAE>Xenocypridinae) = ? *Candidia*

Parazacco asperus → *Parazacco fasciatus*

Parazacco fasciatus (Koller, 1927)

Parazacco spilurus (Günther, 1868) "predaceous chub"

Parazacco vuquangensis → *Parazacco fasciatus*

Pardachirus Günther, 1862 (SOLEIDAE) [this genus includes not listed marine species]

Pardachirus poropterus (Bleeker, 1851) "mottled sole / Estuary Sole"

Pardiglanis → *Clarotes*

Pardilla-blankvoorn → *Iberochondrostoma lemmingii*

Parecbasis Eigenmann, 1914

(CHARACIDAE>Stethaproninae)

Parecbasis cyclolepis Eigenmann, 1914 (Géry (1978):590)

Scatophagidae (scats / Argusfische / argusvissen) (LOPHIIFORMES?)
Scatophagus Cuvier, 1831 (SCATOPHAGIDAE)
Scatophagus argus (Linnaeus, 1766) (Bade (1907):536, Reuter (1912):64/66, Heller & Ulmer in Zernecke (1913):254, Stansch (1914):22, Bahr (1916):55, Innes (1917):92, Brüning (1919):147, Innes (1921):94, Rachow (1922a):46, Vereinigte Zierfisch-Züchterei (1923):250, Bade (1925):208, Innes (1926):275, Rachow (1928):230, Schreitmüller (1928):164, Bade (1931):731, Rachow (1931):161, Ahl (1932):83, Stoye (1932):198, Arnold (1933b):152, Kuijper & van der Noort (1934):172, Ladiges (1934):204, Peters (1934):381, Holly in HMR (1935):79, Innes (1935):422, Mellen & Lanier (1935):288, Stoye (1935):256, Arnold & Ahl (1936):459, Beirens (1938):211, Angel (1946):108, Arnold (1949a):99, Aurell, Jacobsson & Lindgren (1949):398, Laursen (1949):118, Werner (1949):205, Beck (1950):209, Hervey & Hems (1952):340, Ladiges (1953):37, Brymer (1954):234, Axelrod & Schultz (1955):590, Innes (1956):480, Meinken (1956):108, Schneider & Whitney (1957):484, Makino (1958):42, McInerny & Gerard (1959):458, Sterba (1962):654, McInerny & Gerard (1966):458, Exotic Tropical Fishes (1967):552, Aurell, Jacobsson & Lindgren (1968):398, Schiøtz & Dahlstrøm (1971):142, de Oliveira (1977):204, van Ramshorst (1977):371, Aquarien Atlas (1982):810, Varjo (1982):189, Leggett & Merrick (1987):204, Axelrod's Atlas (1989):602, Sterba (1990):669, Pethiyagoda (1991):228, Mills (1993):194, Sakurai, Sakamoto & Mori (1993):262, Tekriwal & Rao (1999):118, Allen, Midgley & Allen (2002):351, Cánovas & Puigcerver (2002):585, Dawes (2002):289, Atack (2006):144, Monks (2006):67, Anna Mercy et al. (2007):207, Vidthayanon (2008):206; *Ephippus argus* Stead (1906):136; *Scatophagus ornatus* Beirens (1938):212, Hervey & Hems (1952):341, Schneider & Whitney (1957):485; *Scatophagus atromaculatus* Sakurai, Sakamoto & Mori (1993):262; *Scatophagus argus atromaculatus* Monks (2006):67; *Scatophagus Argus Macrospilus* Bahr (1916):56; *Scatophagus Argus Rubrifrons* Bahr (1916):56, Ladiges (1954):71, Exotic Tropical Fishes (1967):553, Tekriwal & Rao (1999):118; *Scatophagus Rubrifrons* Peters (1934):381) "spotted scat / Scat / Argus Fish / Spotted Butterfish / Red Scat / Ruby Scat / Red Argus / Hundred-eyed Muck-eater / Spotted Scat / Tiger Scat / Spotted Butterfish / Kurohoshi-manju-dai / Argusvis / Honderd-ogenvis"
Scatophagus atromaculatus → *Scatophagus argus*
Scatophagus fasciatus → *Scatophagus tetracanthus*
Scatophagus multifasciatus → *Selenotoca multifasciata*
Scatophagus ornatus → *Scatophagus argus*
Scatophagus papuensis → *Selenotoca multifasciata*
Scatophagus Rubrifrons → *Scatophagus argus*
Scatophagus semistrigatus → *Selenotoca multifasciata*
Scatophagus Semistrigigena → *Selenotoca multifasciata*
Scatophagus Tetracanthus → *Selenotoca multifasciata*
Scatophagus tetracanthus (La Cepède, 1802) (Holly in HMR (1937):137, Hervey & Hems (1952):341,

Brymer (1954):235, Ladiges (1954):67, Axelrod & Schultz (1955):591, Meinken (1956):109, Schneider & Whitney (1957):485, Sterba (1962):656, van Ramshorst (1977):372, Aquarien Atlas (1982):810, Axelrod's Atlas (1989):602, Sterba (1990):671, Monks (2006):67; *Scatophagus fasciatus* Ladiges (1934):206, Beirens (1938):212, Beck (1950):209) "African scat / Silver Scat / Banded Scat / Scatty / Vierstekelige argusvis / Gestreepte argusvis"

Scaturiginichthys Ivantsoff, Unmack, Saeed & Crowley, 1991

(PSEUDOMUGILIDAE>Scaturiginichthyinae)

Scaturiginichthys vermeilipinnis Ivantsoff, Unmack, Saeed & Crowley, 1991 (Allen (1995):172, Allen, Midgley & Allen (2002):170, Aqualog 13 (2002):46, Tappin (2010):410, Boeck (2012):61) "redfin blue-eye"

Schaakbordcichlide → *Dicrossus maculatus* / → *Julidochromis marlieri*

Schaakbordkambaars → *Dicrossus filamentosus*

Schaarvisje → *Rasbora trilineata*

Schall's Synodontis → *Synodontis schall*

Schaller's Croaking Gourami → *Trichopsis schallerae*

Schaller's Mouthbrooder → *Betta schallerae*

Scheefstaander → *Thayeria obliqua*

Scheel's Lampeye → *Micropanchax scheeli*

Schele pos → *Gymnocephalus cernuus*

Schenga → *Distichodus schenga*

Schieraal → *Anguilla anguilla*

Schijfbaars → *Enneacanthus chaetodon*

Schijfzalmen → *Myleinae*

Schijvenbaars → *Enneacanthus chaetodon*

***Schilbe Oken, 1817* (SCHILBEIDAE)**

Triphlophysa stewarti (Hora, 1922)
Triphlophysa stolickai (Steindachner, 1866)
 (Nemacheilus stolickai Aquarien Atlas Band 2 (1985):354) "Tibetan stone loach / Stoliczka's Loach"
Triphlophysa strauchii (Kessler, 1874) (Nemacheilus strauchii Aquarien Atlas Band 2 (1985):354;
Diplophysoides strauchii ulacholicus Aquarien Atlas Band 6 (2002):256) "spotted thicklip loach"
Triphlophysa tanggulaensis (Zhu, 1982)
Triphlophysa tianeensis Chen, Cui & Yang, 2004
Triphlophysa tibetana (Regan, 1905)
Triphlophysa turpanensis Wu & Wu, 1992
Triphlophysa ulacholica (Anikin, 1905) "spotted Issyk-kul loach"
Triphlophysa uranoscopus (Kessler, 1872)
Triphlophysa venusta Zhu & Cao, 1988
Triphlophysa waisihani Cao & Zhang, 2008 "Ili River loach"
Triphlophysa wuweiensis (Li & Chang, 1974)
Triphlophysa xiangshuингensis Li, 2004
Triphlophysa xiangxiensis (Yang, Yuan & Liao, 1986)
Triphlophysa xichangensis Zhu & Cao, 1989
Triphlophysa xingshanensis (Yang & Xie, 1983)
Triphlophysa xiqiensis Ding & Lai, 1996
Triphlophysa yajiangensis Yan, Sun & Guo, 2015
Triphlophysa yaopeizhii Xu, Zhang & Cai, 1995
Triphlophysa yunnanensis Yang, 1990
Triphlophysa zhaoi Prokofiev, 2006
Triphlophysa zhenfengensis Wang & Li, 2001
 Tripod Cichlid → *Triglachromis otostigma*
Tripotheridae (keeled characids / gekielde karperzalmen) (CHARACIFORMES>Characoidei)
Tripothereus Cope, 1872
 (TRIPORTHEIDAE>Tripotherinae)
Tripothereus albus Cope, 1872 (Géry (1978):343, Aquarien Atlas Band 2 (1985):248, Axelrod's Atlas (1989):153) "yellowtail hatchetfish / Yellowfin Hatchetfish / Pretty Chalcinus"
Tripothereus amazonensis → *Tripothereus auritus*
Tripothereus angulatus (Agassiz, 1829) ?(Axelrod & Schultz (1955):266, Géry (1978):343, Aquarien Atlas (1982):244, Axelrod's Atlas (1989):151, Sterba (1990):65, Roman (1992):160, Sakurai, Nakamoto & Mori (1993):35, Dawes (2002):213; ? *Chalcinus angulatus* Arnold (1936):95, Arnold (1949a):25, Sterba

(1962):91) "Giant Hatchetfish / Dusky Narrow Hatchetfish / Grote bijlvis"

***Triportheus auritus* (Valenciennes, 1850)**
(*Chalcinus* sp. Vereinigte Zierfisch-Züchterei
(1923):164; ? *Chalcinus elongatus* Rachow (1928):26, Ahl (1932):38, Stoye (1932):129, Arnold (1933b):103, Peters (1934):265, Innes (1935):132, Stoye (1935):172, Arnold & Ahl (1936):51, Rachow in HMR (1938):264, Arnold (1949a):26, Hervey & Hems (1952):129, Brymer (1954):164, Ladiges (1954):112, Sterba (1962):91; *Triportheus elongatus* Exotic Tropical Fishes (1967):595, Géry (1978):343, Sterba (1990):65) "elongate hatchetfish / Goitre Characin / Slender Hatchetfish / Slanke kropzalm"

***Triportheus brachipomus* (Valenciennes, 1850)**
"Guyana Hatchetfish"

Triportheus cruzi → *Triportheus auritus*

***Triportheus culter* (Cope, 1872)** (Géry (1978):343)

***Triportheus curtus* (Garman, 1890)**
Triportheus elongatus → *Triportheus auritus*
Triportheus flavus → *Triportheus angulatus*

***Triportheus guentheri* (Garman, 1890)** (Géry (1978):343)

***Triportheus magdalena* (Steindachner, 1878)**
(Géry (1978):343)

***Triportheus nematurus* (Kner, 1858)** (Graça & Pavanelli (2007):75, Almirón et al. (2015):110; ? *Chalcinus nematurus* Sterba (1962):91; *Triportheus paranensis* Géry (1978):343, Aquarien Atlas Band 6 (2002):101) "Paraguay Hatchetfish"

***Triportheus orinocensis* Malabarba, 2004**

***Triportheus pantanensis* Malabarba, 2004**
Triportheus paranensis → *Triportheus nematurus*

 Wallago → *Wallago attu*
Wallago Bleeker, 1851 (SILURIDAE)
Wallago attu (Schneider, 1801) (Aquarien Atlas Band 2 (1985):578, Sands (1985):169, Burgess (1989):85, Pethiyagoda (1991):156, Sands (1997):104, Tekriwal & Rao (1999):103, Ranjit Daniels (2002):176, Vidthayanon, Termvidchakorn & Pe (2005):88, Shrestha (2008):154, Vidthayanon (2008):130)
 "wallago / Great White Sheatfish / Helicopter Catfish / Killer Catfish / Boal / Shark Catfish / Killer Shark / Freshwater Shark / Helicoptermeerval / Jaagmeerval"
Wallago nebulosus → *Wallagonia leerii*
Wallago tweediei → *Wallagonia leerii*
Wallagonia Myers, 1938 (SILURIDAE)
Wallagonia leerii (Bleeker, 1851) (*Wallago leerii* Sands (1985):154, Burgess (1989):85; *Wallago tweediei* Burgess (1989):86) "Giant Malayan Catfish"
Wallagonia maculatus (Inger & Chin, 1959)
(*Wallago maculatus* Sands (1985):154, Burgess (1989):85) "Giant Bornean Catfish"
Wallagonia micropogon (Ng, 2004) (*Wallago micropogon* Vidthayanon (2008):132) "Asiatic wels"
 Waller → *Silurus glanis*
 Walleye → *Sander vitreus*
 Walvismeervallen → *Cetopsinae*
 Wami tilapia → *Oreochromis urolepis*
 Wanmor Goby → *Mugilogobius valigouva*
 Wapenstekelaal → *Mastacembelus favus*
 Ward's Goby → *Prionobutis wardi*
 Warmouth → *Lepomis gulosus*
 Waroo → *Uaru amphiacanthoides*
 Warpaint shiner → *Luxilus coccogenis*
 Warrior darter → *Etheostoma bellator*
 Waser's Mouthbrooder → *Betta waseri*
 Wasp Catfish → *Pseudopimelodus* spp.
 Wasp Goby → *Brachygobius doriae*
 Watawata → *Hypostomus*
Wateina fowleri → *Piaractus brachypomus*
 Water Goldfinch → *Pristella maxillaris*
 Watercress darter → *Etheostoma nuchale*
 Waterhond → *Hepsetus odioe*
 Waterlot's Synodontis → *Synodontis waterloti*
 Watwata Hypostomus → *Hypostomus watwata*
 Wau gudgeon → *Allomogurnda flavimarginata*
 Wavrini Biotodoma → *Biotodoma wavrini*
 Wavy Catfish → *Gastrodermus undulatus*
 Weatherfish → *Misgurnus fossilis*
 Weatherloach → *Misgurnus anguillicaudatus* / → *Misgurnus fossilis*
 Weberogobius → *Mugilogobius*
 Wedge Barb → *Puntius dorsalis*

Wedgespot Cichlid → *Uaru amphiacanthoides*
 Weise's cichlide → *Taeniacara candidi*
 Weise's Dwarf Cichlid → *Taeniacara candidi*
 Weitzman's Catfish → *Hoplisoma weitzmani*
 Welch's Grunter → *Bidyanus welchi*
 Wels (Catfish) → *Silurus glanis*
 Werner's Barb → *Enteromius perince*
 Werner's Panchax → *Apollocheilus dayi wernerii*
 Werners regenboogzalm → *Iriatherina wernerii*
 Werner's Roundtail Killie → *Aphyosemion franzwerneri*
 Werner's Tetra → *Hyphessobrycon wernerii*
Wertheimeria Steindachner, 1877 (DORADIDAE)
Wertheimeria maculata Steindachner, 1877
(Burgess (1989):238)
 West African bichir → *Polypterus retropinnis*
 West African Glass Catfish → *Parailia occidentalis*
 West American Shark Cat → *Scia des seemannii*
 West Australian Pygmy Perch → *Nannoperca vittata*
 West Mexican redhorse → *Moxostoma austrinum*
 West New Guinea Rainbowfish → *Melanotaenia irianjaya*
 Western Archerfish → *Toxotes oligolepis*
 Western Australian grunter → *Leiopotherapon aheneus*
 Western bottlenose mormyrid → *Mormyrus lacerda*
 Western carp gudgeon → *Hypseleotris klunzingeri*
 Western galaxias → *Galaxias occidentalis*
 Western hardyhead → *Atherinosoma wallacei*
 Western Mosquitofish → *Gambusia affinis*
 Western Rainbowfish → *Melanotaenia australis*
 Western sand darter → *Ammocrypta clara*
 Western Splendid Rainbowfish → *Melanotaenia australis*
 Whaleface Marcusenius → *Brienomyrus brachystomus*
 Whalehead Knifefish → *Anodontosternarchus balaenops*
 Whiptail → *Dasyloricaria filamentosa*
 Whiptail banjo catfish → *Platystacus cotylephorus*
 Whiptail catfish → *Farlowella acus*
 Whiptail Catfish → *Farlowella nattereri* / → *Rineloricaria hasemania* / → *Rineloricaria latirostris* / → *Rineloricaria microlepidogaster* / → *Synodontis caudalis*
 Whiptail Loricaria → *Rineloricaria fallax*
 Whiptail Sturgeon → *Acipenser kaufmanni*
 Whiptail Synodontis → *Synodontis caudalis*
 White Amur → *Ctenopharyngodon idella*
 White bass → *Morone chrysops*
 White Butterfly Dwarf Cichlid → *Mikrogeophagus ramirezi*
 White catfish → *Ictalurus catus*
 White Cloud Mountain fish → *Tanichthys albonubes*
 White Cloud Mountain Minnow → *Tanichthys albonubes*
 White Convict Cichlid → *Australoheros facetus*
 White crappie → *Pomoxis annularis*
 White Elizabeth Dwarf Cichlid → *Aristogramma elizabethae*
 White Labido → *Labidochromis joanjohnsonae*
 White perch → *Morone americana*
 White piranha → *Serrasalmus brandtii*
 White sturgeon → *Acipenser transmontanus*
 White sucker → *Catostomus commersonii*
 White Top → *Aulonocara hueseri*
 White's Cynolebias → *Nematolebias whitei*

White's Ilyodon → *Ilyodon whitei*
 White's Pearlfish → *Nematolebias whitei*
 White-edged Peacock → *Aulonocara hueseri*
 White-edged Terror → *Andinoacara stalsbergi*
 White-eye → *Oxyzygonectes dovii* / → *Abramis sapa*
 Whitebarred catfish → *Agamyxis pectinifrons*
 Whitebarred Synodontis → *Synodontis ornatipinnis*
 Whitefin Amur Gudgeon → *Romanogobio tenuicorpus*
 Whitefin Synodontis → *Synodontis caudovittatus*
 Whitelip catfish → *Paraplotosus albilabris*
 Whitepatched splitfin → *Allodontichthys hubbsi*
 Whiterimmed Freshwater Stingray → *Himantura signifer*
 Whiteseam Fighter → *Betta albimarginata*
 Whiteside pencilfish → *Nannostomus bifasciatus*
 Whitespot Belem → *Spectracanthicus punctatissimus*
 Whitespot Doradid → *Agamyxis pectinifrons*
 Whitespot Glyptoperichthys → *Pterygoplichthys joselimaianus*
 Whitespot Tetra → *Aphyocharax nattereri*
 Whitespotted charr → *Salvelinus leucomaensis*
 Whitespotted Cichlid → *Tropheus duboisi*
 Whitespotted clarias → *Phagorus fuscus*
 Whitespotted Pike Cichlid → *Crenicichla saxatilis*
 Whitespotted Spiny-eel → *Mastacembelus favus*
 Whitestar Tetra → *Axelrodia stigmatias*
 Whitestriped Pimelodus → *Pimelodus albofasciatus*
 Whitetail Agassizii → *Apistogramma agassizii*
 Whitetail Belem → *Hoplancistrus tricornis*
 Whitetail Segelwels → *Pterygoplichthys lituratus*
 Whitetail shiner → *Cyprinella galactura*
 Wichmann's Cardinalfish → *Glossamia wickmanni*
 Wickler's Dwarf Cichlid → *Apistogramma steindachneri*
 Widehead sea catfish → *Sciades guatemalensis*
 Widemouth blindcat → *Satan eurystomus*
 Wigglebarbeel → *Trigonostigma heteromorpha*
 Wildekamp's Killie → *Aphyosemion wildekampi*
 Williams's Mbuna → *Pseudotropheus williamsi*
 Wimpelaal → *Erpetoichthys calabaricus*
 Wimpelbarbeel → *Dawkinsia filamentosa* / →
Dawkinsia tambraparniei
 Wimpelpiranha → *Catoprion mento*
 Wimple piranha → *Catoprion mento*
 Winde → *Leuciscus idus*
 Window Cichlid → *Vieja fenestrata*
 Window Hap → *Protomelas fenestratus*
 Windvoorn → *Leuciscus idus*
 Winered Betta → *Betta coccina*
 Winered Fighter → *Betta coccina*
 Winged Danio → *Laubuka laubuka*
 Winged Laubuka → *Laubuka laubuka*
 Winged Piranha → *Catoprion mento*
 Wipstaartloricaria → *Rineloricaria parva*
 Witkopmesaal → *Apteronotus albifrons*
 Witstaarfranjelip → *Epalzeorhynchos munense*
 Witte alver → *Aldburnus albidus*
 Witte zalm → *Stenodus leucichthys*
 Witvingrondel → *Romanogobio albipinnatus*
 Witvissen → *Leuciscinae*
 Woestijntandkarper → *Cyprinodon nevadensis*
 Wolfzalmen → *Cynodontinae*
 Wolgasnoekbaars → *Sander volgensis*
 Wolterstorff's Pearlfish → *Austrolebias wolterstorffi*
 Wood Catfish → *Trachelyopterus insignis*
 Wood's Hap → *Stigmatochromis woodi*

Wormjaw mormyrid → *Campylomyrus tamandua*
 Wormjawed Elephantfish → *Campylomyrus tamandua*
 Wormline Peckoltia → *Peckoltia braueri*
 Wrattenmeervallen → *Erethistini*
 Wray's gambusia → *Gambusia wrayi*
 Wray's Mosquitofish → *Gambusia wrayi*
 Wrestling Half(beak) → *Dermogenys pusilla*
 Wrinklebellied Catfish → *Glyptothorax major*
 Wrinkledbelly torrent catfish → *Glyptothorax major*

AQUARIA.

Si les réservoirs à poissons, comme ceux que nous avons indiqués, peuvent rendre les plus grands services en permettant d'élever en stabulation certaines espèces de poissons, il en est d'autres qui n'ont pas une utilité moins grande pour la science et ont en outre l'avantage d'initier le public à des scènes de la vie animale qui piquent singulièrement sa curiosité ; nous voulons parler des *Aquaria* dont le goût nous vient, comme on sait, de l'Angleterre, où plusieurs personnes se disputent le mérite de leur invention (1). Aux diverses expositions qui se sont succédé à Arcachon, à Boulogne-sur-Mer, à Paris et au Havre, on a pu voir des *Aquaria* très-remarquables, qui constituaient une des grandes attractions de ces expositions et de beaucoup supérieurs à ceux qui existent depuis plusieurs années en Angleterre et en Belgique : mais si ces établissements ont présenté, sur certains points, une supériorité réelle sur le premier *Aquarium* établi en France, au Jardin d'acclimatation du bois de Boulogne, il ne faut pas oublier que celui-ci a été le premier construit sur des proportions inusitées jusqu'alors, que ses successeurs ont profité des perfectionnements indiqués par sa pratique, et que plusieurs d'entre eux, par leur proximité de la mer, se sont trouvés dans des conditions bien plus favorables pour réunir les espèces les plus curieuses, mais aussi les plus délicates. Aucun d'eux cependant n'est aussi parfaitement adapté aux exigences de l'observation que l'*Aquarium* de Concarneau, spécialement créé en vue de favoriser les études d'histoire naturelle. Après avoir, à juste titre, excité l'admiration du public et du monde savant, l'*Aquarium* du bois de Boulogne a subi l'effet de l'inconstance de la mode ; mais il est encore celui dont les détails d'exécution ont été le plus soignés et le mieux aménagés pour l'étude (2).

(1) D'après Gosse, c'est M. Warrington qui eut le premier l'idée d'établir un *aquarium*.

APPENDIX: THE FRESHWATER AQUATIC HOBBY LITERATURE IN THE LOW COUNTRIES

In searching for fish names we read many publications, which contain very interesting information on the growth and change of the aquatic hobby in the Netherlands and Flanders during the last century.

In the Netherlands

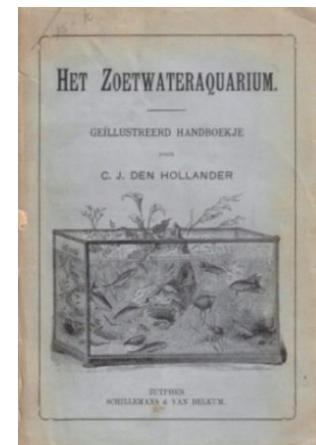

In the Netherlands the keeping of an aquarium started, after some initial acquaintance in the late nineteenth century (anonymous 1857, Roßmäßler 1872, Heimans 1897⁴⁸; we already reported some interesting early articles on the Dutch aquarium hobby in paragraph 1.5.1), to flourish before the First World War following the success of the hobby in Germany (Hohl 2001, Hohl 2011)⁴⁹, in America (Klee 2003) and in the Russian Empire⁵⁰ [out of the late 19th century acclimatization societies in Moscow (*Société des amateurs des aquariums et des terrariums, Moscou*), Saint-Petersburg, Kiev and Odessa (Depp 1897), slowly some collaboration among the aquarists emerged under the guidance of N. F. Zolotnitsky and from 1905 on there was already the famous fish breeding facility of Leo Sheljuzhko].

The popularisation of the hobby in the Dutch speaking countries occurred more or less in the same way as it did in some other countries, for instance in the Ukraine⁵¹, the Czech state⁵² (the Czech aquarium hobby already started at the end of the 19th century!), Australia⁵³ and Poland⁵⁴. The expansion of the hobby in the Dutch speaking countries also resembles the revival of the aquarium hobby in France, where the aquarium hobby became less popular at the end of the 19th century⁵⁵.

In the beginning it was a new pastime for wealthy people. At the end of the 19th century naturalists gradually developed a desire to admire and study the underwater world and that could be done with the help of an aquarium⁵⁶. After some articles dealing with the aquarium and its fishes in various periodicals, the first Dutch aquarium book was written by C. J. den Hollander (living in Nieuwaal near Zaltbommel, one of the first Dutch aquarium hobbyists) and published in 1900.

In The Hague Abbondio Benedictus Sciarone started an aquarium factory in 1896 (the "Eerste Nederlandsche Fabriek van Aquariums" producing aquaria for the living room, the so called "kamer-aquarium") and sold all kinds of aquarium and terrarium supplies (at least until 1924 under the name A. P. A. Sciarone, then they moved to the Molenstraat 67, where he lived until 1942).

⁵⁸ Advertisements in volume 3 of the magazine “*De levende Natuur*” 1898; then working for the Artis Aquarium (Amsterdam), he later went to Antwerp where in the thirties he became in charge of the Zoo’s Aquarium.

⁵⁹ Advertisements in volume 4 of the magazine “*De levende Natuur*” 1899.

At the very beginning of the 20th century many natural history societies were active in the big cities (Amsterdam, The Hague, Leiden, Haarlem, Groningen, Rotterdam, Gouda, Schoonhoven, Utrecht). In 1901 all societies including the Belgian society *Kruidkundig Genootschap Dodonaea* (established in Gent), joined their forces in the *Nederlandsche Natuurhistorische Vereeniging*. This young organization organized their first national show ("Biologische tentoonstelling") from 19 till 28 june 1905 and they had already many aquaria on display⁶⁰. But gradually the need arose for specialized societies.

Triton.

Op de vergadering derzeer vereeniging tot bevordering van Aquarium- en Terrariumkunde van Zaterdag-avond, hield de heer C. H. F. Voorwalt, penningmeester van Triton, een voordracht over de inrichting van een Zoetwater-aquarium.

Na in korte en klare woorden te hebben uiteengezet, wat een aquarium is en een overzicht te hebben gegeven van het verleden der aquarium-liefhebberij hier te lande, oedeelde hij mede hoe een deugdelijk aquarium, meer speciaal een zoetwater-aquarium, moet zijn ingericht. Hij behandelde voorts de verschillende bestanddelen ervan, eerst de levensloze, dan de levende, en deed staaltjes van gene en exemplaren van deze rondgaan ter bezichtiging. Dit wekte veel belangstelling, doch deze nam nog toe, toen de heer V. een aquarium geheel gereed maakte in ongeveer een kwartier tijds. Ten slotte beantwoordde de heer V. verschillende vragen, betreffende het zoetwater-aquarium, tot volkomen bevrediging der weetgierigen.

Met warm applaus werd spreker gedankt en gehuldigd.

The first aquatic societies (also called aquarium, aquarist's or aquarist societies) were formed in Rotterdam (*Antoni van Leeuwenhoek, Vereeniging van Aquarium- en Terrariumliefhebbers*⁶¹, probably February 1908 - 1914) and Amsterdam (*Triton, Vereeniging tot bevordering der Aquarium- en Terrariumkunde*, founded 10 November 1908⁶²; maybe named after one of the first aquarium societies in the world: *Triton Berlin*, Hohl 2001, p. 28).

Also in 1908 the first national organization was founded, the *AA BB CC* or *Algemene Aquarium Bezitters Bond Cyprinus Carpio*⁶³ (in 1910 this organization had already 169 members), in 1916 succeeded by the *B.A.N. or Bond van Aquariumhouders in Nederland*, also known as *Bond van Aquarium- en terrarium-liefhebbers in Nederland*.

In the beginning the pioneering aquarists (already about a hundred in 1909!) and the newly founded aquatic societies tried to help each other with supplies and information. At the beginning of the 20th century the aquarists were mostly keeping coldwater fishes, but already in 1909 quite a few subtropical and tropical fishes were being kept in Dutch aquaria. The livestock and supplies were mainly bought in Germany⁶⁴. In 1909 an 'aquarium' periodical appeared (*Ons Eigen Blad*) by the hand of another pioneer J. H. M. E. (Ernst) Gadiot (who also started an aquatic society in Sittard). So from 1909 on the aquarists could read a national journal dealing with their hobby.

In 1911⁶⁵, besides in Amsterdam (two societies, the second society was *Danio Rerio*) and Rotterdam (also with a second society called *de Exotische Club*), also in Amersfoort (*Aquarium- en Terrariumvereenigingen*), in Sittard (*Vallisneria*), in Antwerp (see further for Flanders) and in Tilburg (*Tilburgsche Aquarium- en Terrarium-Vereeniging*; later called *Rasbora*?) aquatic societies were thriving. Amongst the pioneers were, besides the two men already mentioned, L. A. Butôt (notary in Amsterdam 1915-1924, active as aquarist at least till 1934) and W. J. M. Deutz (1883-1968)⁶⁶. At the beginning of the First World War there were already twelve societies distributed all over the country.

— G. B. Uitgeefster van het Nederlandsch tijdschrift van aquarium- en terrariumkunde, *Ons eigen blad*, is de stoomdrukkerij „Floralia“ te Assen. Een goed adres voor aquarium- en terrariumdieren, mitsgaders planten, is Hanselman, Vluggemanskade almeer. Wilt ge kostbare dieren hebben, schrijft dan aan Scholte und Poetzschke te Berlijn, aan Carl Ziegelkow te Hamburg, of aan de firma Glaschker te Leipzig, maar bedenk dat er aan importeren immer risico verbonden is, alleen al omdat men niet ziet wat men koopt en het geld vooruit moet worden betaald.

⁶⁴ Some well known firms were: Olaf Andersen (Berlin), Paul Stieler (Berlin), Reichelt's Tierexport (Berlin), Vereinigte Zierfisch-Züchterei (Conradshöhe), Alwin Weinoldt (Berlin), A. Glaschker (Leipzig), Arthur Mühlner (Leipzig), Wilhelm Krause (Krefeld), Otto Ulmer (Stuttgart), but also Esportazione Pesci e Reptili (Bologna) and A. Hipp (Saint Petersburg, Russia).

⁶⁵ There is an interesting article of J. Pellegrin about the aquaria of the Dutch family de Visser living in Paris in 1911, *Bulletin de la Société nationale d'Acclimatation de France*, **58**: 502-509.

⁶⁶ Bot, M. 1963, Bij een afscheid. *Het Aquarium*, **33**: 199-200; Bot, M. 1968, In memoriam W. J. M. Deutz. *Het Aquarium*, **39**: 24.

In Rotterdam Teun Hanselman already started selling goldfish in 1906 (and his enterprises expanded into a well known import firm, still in existence after the Second World War) and more shops were soon to be opened to supply the aquarists with their needs.

Shop news in Amsterdam 4 August 1911:

WINKELNIEUWS.

Voor aquariumliefhebbers.

De bekende aquarium-liefhebbers, de heeren Gebrs. Voorwalt, hebben in den tuin van het perceel Ceintuurbaan 290 een inrichting laten bouwen, waarin een dozijn beton-bassins zijn aangebracht, als teeltplaats voor exotische aquaria-vischsoorten. Zij hebben tevens een handelszaak geopend, waar naturalien voor aquarium en terrarium zijn te verkrijgen. Het is de eerste natuurhistorische inrichting in Nederland, die eigen kweekplaatsen heeft. Een zeer fraaie collectie van de meest zeldzame vissjes zijn er te bezichtigen in aquaria en vitrines.

Natuur-historische inrichting.

De liefhebberij voor het bestudeeren van de levende-natuur neemt meer en meer toe. Niet alleen onze jongens, die nog op de schoolbanken zitten, vermeiden zich met hun aquarium of terrarium, ook de ouderen interesseren er zich voor en onder alle standen groeit de belangstelling voor de onderhoudende natuur-historische wetenschap.

De heeren Gebroeders Voorwalt, alhier, voorheen uitsluitend amateurs hebben deze groeiende belangstelling opgemerkt en er hun voordeel medegedaan. Op den Ceintuurbaan 290, bij de Ferdinand Bolstraat hebben zij een Natuur-historische inrichting gevestigd, waar liefhebbers alles kunnen krijgen wat ze nodig hebben om hun aquariums of terrariums in te richten of aan te vullen en te verrijken.

De zaak, welke morgenavond wordt geopend, ziet er keurig netjes uit. Voor aan straat een smaakvol en practisch ingericht magazijn, met goed afgesloten hokjes voor het kruipend gedierte en bassins voor de siervisschen.

De heeren Voorwalt hebben hier een merkwaardige collectie — rijker dan die van Artis — van tropische en sub-tropische siervisschen, in 't geheel wel een 84 soorten, waarvan omstreeks 20 soorten levend barende visschen.

Merkwaardig zijn in deze rijke verzameling de prachtige Chineesche sluervisschen, barbeelen uit Engelsch-Indië, een zwaarddragende visch, de levend barende snoek *Bellinesox Bellissanus*, de Sianeesche strijd-visch, prachtig gekleurde paradijsvisschen, enz. Er zijn soorten bij, welke eerst sedert korten tijd bekend zijn geworden. Van het kruipend gedierte, slangen, hagedissen enz., zijn er omstreeks 30 soorten aanwezig, waaronder een kleine kaaiman en verscheidene slangen.

In het achterhuis is de kweekerij gevestigd, want de heeren Voorwalt voeren niet alleen siervisschen, reptielen, anfibrieën en waterplanten in, zij kweeken ze ook met grote zorgvuldigheid en met een liefde voor de natuur welke 't hun dikwijs moeite geeft afstand te doen van een met zorg gekweekt exemplaar.

Morgen wordt, zoals reeds gezegd, de nieuwe zaak geopend. Des avonds schitterend verlichte aquariums en het grote terrarium in de uitstalhokjes zal ongetwijfeld zeer de belangstelling van de voorbijgangers trekken.

Aquariumvrienden

steeds voorradig Goud-visschen 5 cent, Goudvoorn 10 cent, Zonnebaars 10 cent, Meervallen 10 cent, Bittervoorn 5 cent, Kruiskarper 10 cent, Spiegelkarper 10 cent, Tropische Waterplanten. Vischvoeder Aquariums enz. NIER-OP's Vogel- en Aquariumhandel, Kipstr. 27, Telef. 3487. Bureau van dit Blad.

„Natuurgenot”.

De „Vischerij-Courant” geeft thans een bijblad „Natuurgenot”, gewijd aan aquarium- en terrariumkunde. Als eerste van de reeks van medewerkers vinden we vermeld den heer L. A. Butöt, voorzitter dervereeniging tot bevordering der aquarium- en terrariumkunde „Triton” alhier.

When the supplies from Germany became more difficult to get during the First World War⁶⁷, W. Engels established a shop in Apeldoorn in 1915, selling aquaria, fishes, plants and hobby equipment. He also started breeding his own exotic fishes.

⁶⁷ For an overview of the already available aquarium animals and plants, see for instance the catalogue of Scholze & Pötzschke (Prachtkatalog 1909) or the various catalogues (1908, 1909, 1910, 1911 and especially the Weihnachten 1912 catalogue) of the Vereinigte Zierfisch-Züchterei, Conradshöhe bei Tegel-Berlin (Berta Kuhnt); later published as a book, Stansch 1914.

On 27 January 1918 the national organization *Bond van Vereenigingen van Aquarium- en Terrariumliefhebbers in Nederland* (already founded in 1915) was again revived by the following societies: *Natuurgenot* (Rotterdam, also founded in 1915), *Natuurgenot in Huis* (Schiedam), *de Natuur* (Vlaardingen), *Danio Rerio* (Amsterdam) and *Triton* (Amsterdam). This organization was led by the chairman A. van Essen (Rotterdam), the secretary W. v. d. Most (Schiedam) and the treasurer H. J. Thieller (Breda).

Also in 1918, G. C. Holgen opened the first aquarium shop of The Hague, in the "Vleerstraat" (named "Eerste Haagsche aquariumhuis"), selling everything for the keeping of native and subtropical fishes.

Aquarium- en terrariumliefhebbers.

Op initiatief van de Rotterdamse Vereeniging „Natuurgenot“ is een „Bond van Vereenigingen van Aquarium- en Terrariumliefhebbers“ in Nederland opgericht. Het doel is: het verspreiden van kennis der natuurlijke historie, meer in het bijzonder die, welke betrekking heeft op de aquarium- en terrariumliefhebberij, onder hare leden, doch ook buiten den Bond; het steunen van pogingen, die kunnen leiden tot oplossing van natuurhistorische vraagstukken, het aanwenden van pogingen om terreinen, die uit een natuurhistorisch oogpunt belangrijk zijn te beschermen; het bevorderen van het onderling verkeer tuschen de beoefnaren van aquarium- en terrariumkunde.

Middelen zijn: het uitgeven van een Bondsorgaan, het houden van algemeene vergaderingen, in den regel met tentoonstellingen; het in stand brengen en onderhouden van een natuurhistorische bibliotheek en van verzamelingen; het aankopen van betrekkingen met verenigingen van overeenkomstigen aard, ook buiten Nederland, door het oprichten van een centrale kwekerij voor dieren en planten en door niet uitloven van eerbeprijzen op tentoonstellingen of het op andere wijze steunen daarvan.

Als gewone en verspreide leden kunnen worden aangenomen alle personen, die den leeftijd van 18 jaren bereikt hebben.

De Bond werd opgericht door de heeren: A. van Essen, Rotterdam; W. van der Most Sr., Schiedam; J. F. de Soet, Amsterdam; B. D. Wijsma, Amsterdam; P. L. Buschmann, Vlaardingen; J. P. Dyfers, Rotterdam; H. J. Thieller, Breda.

In the *Nieuwe Rotterdamsche Courant* Saturday 24 July 1920:

In het gebouw Amicitia aan den Goudscherijweg achter houdt de vereeniging van aquarium- en terrarium-liefhebbers Natuurgenot gedurende enkele dagen een tentoonstelling van aquaria, terraria, insectaria enz. De vereeniging Natuurgenot is in 1915 opgericht; gedurende de eerste jaren van haar bestaan is het ledental gestadig aangegroeid en alles voor den wind gegaan. Doch daarna kwamen moeilijkheden en vooral de winter 1918—1919 was een bange tijd. Door gebrek aan verwarmingstoestellen stierven velen van de pleegkinderen der natuurliefhebbers, waar het gevolg van was, dat verschillende kwekers van visschen, insecten en planten den moed lieten zinken. Thans evenwel neemt de belangstelling weer toe; de tentoonstelling levert daarvan het bewijs.

Er is in Amicitia een belangwekkende verzameling bijeengebracht. Op lange tafels zijn de aquaria en terraria tentoongesteld en men ziet er onder deze, die een nauwlettende beschouwing zeer waard blijken. Natuurlijk is niet alles even belangrijk; sommige liefhebbers tonen meer liefhebberij dan kennis van zaken, maar over het algemeen is het tentoongestelde zeer bezienswaardig. In het bijzonder onderscheidt zich de inzending van den heer G. van Kersen, die 22 aquaria met tropische visschen ingezonden heeft. De heer Van Kersen is tot nog toe eigenlijk de enige, die zich niet zoombaar op goed gelijk met de kruising van visschen bezig houdt, doch een op kennis en ervaring berustend stelsel toepast.

Belangwekkend zijn verder o.m. de sluierstaartvissen en in de afdeeling der terraria, de wandelende takken.

Ter opluistering zijn opgezette vogels, twee in werking zijnde doorluchtingsapparaten, lantaarnplaatjes en instrumenten aan de tentoonstelling toegevoegd.

The aquarium hobby grew steadily after 1920, gradually to become a hobby for everyone. On 1 October 1922 a new aquatic periodical was published, the *Tijdschrift voor Aquarium- en Terrariumkunde*, starting with H. J. Thiellier (1884-1931) as editor, shortly afterwards succeeded by W. J. M. Deutz & Marius den Outer and later on by C. van Kersen. This quite good looking magazine was filled with information for the hobbyist.

From the start the *Tijdschrift voor Aquarium- en Terrariumkunde* was the official journal of the aquatic societies in Amsterdam (*Danio Rerio*, *Onderlinge Aquarium- en Terrariumclub De Argus* and *Amsterdamsche Vereeniging ter bevordering der Aquarium- en Terrariumkunde*), Dordrecht (*De Natuur*), The Hague (*De Natuurvriend* 1921 – now named *Scalare*) and Rotterdam (*De Natuur* 1921, chairman W. J. M. Deutz, – the society now named *De Bijlzalm*). Later on it was also enjoyed by hobbyists of for instance the *Eerste Utrechtse Aquarium-Club* and *Natuurgenot* both Utrecht, *Guppyi Sneek*, *Danio Rerio Delft* (1 May 1919 - now), *Natura* in Arnhem, *V.A.T.I.L.*⁶⁸ or *Vereeniging van Aquarium-, Terrarium-, Insectarium-liefhebbers* in Enschede, *De Natuur* in Groningen, *Vivarium* in Eindhoven, *C. J. den Hollander* in Tilburg, *Amicitia* and *De Natuur* in Nijmegen and *De Natuurvriend* in Stadskanaal.

About 1924 there were three aquarium societies in Amsterdam (Amsterdamsche Vereeniging tot bevordering der Aquarium- en Terrariumkunde, *Danio Rerio* and *Aquarium en Terrariumclub Ons Huis*), two in Rotterdam (*De Natuur* and *Natuurgenot*), and one each in Arnhem (*Natura*), Delft (*Danio Rerio*), Dordrecht (*De Natuur*), Enschedé (*V.A.T.I.L.*), 's Gravenhage (*De Natuurvriend*), Groningen (*De Natuur*), Utrecht (*Natuurgenot*) and Zwolle (*Acara*).

For comparison in the small nation Switzerland there was a national organization formed in 1924 with the cooperation of two societies⁶⁹, in the same year the first aquarium society was formed in Ljubljana (Slovenia; Cotič & Vrščaj (1988): 5).

In Great Britain there were also just two societies in 1924, the *British Aquarium Society* (London, founded in 1919) and the *British Aquarists' Association* (B.A.A. founded in 1924⁷⁰). In Great Britain the main upsurge of interest in the aquarium hobby has been since 1945⁷¹.

⁶⁹ Hagenbüchli, F. 1948, Das Kameradschaftstreffen in Zürich. *Aquarium* (VSAT, Schweiz), 3 (11): 129-131.

⁷⁰ Hodge, A. E. 1924, Editorial. *Amateur Aquarist & Reptilian Review*, 1 (6): 54.

⁷¹ Kerr, S. 1951, Twenty-Five Years Ago. *The Aquarist*, 16 (4): 86-87.

After twelve years the *Tijdschrift voor Aquarium- en Terrariumkunde* was united with *Het Aquarium*, which is still being published today, so the publication of this early magazine was the beginning of almost ninety years of solid aquarium information.

The hobby kept growing and by the end of 1930 twenty-five aquatic societies were in full swing⁷². On 16 March 1930 again a national aquatic organization was founded, the *N.B.A.* or the *Nederlandsche Bond van Aquariumhouwers* (from August 1935 onwards known as the *Nederlandsche Bond van Aquarium Vereenigingen*) counting 275 members and this time to stay in business for a long time. In 1933 the *Bond* already counted more than a thousand members⁷³ and despite of (or thanks to ?) the Great Depression the hobby kept expanding.

The national organization still exists today (now under the name *N.B.A.T.* or *Nederlandse Bond Aqua Terra*⁷⁴) with its own journal entitled *Het Aquarium*. The periodical *Het Aquarium* became an important source for all kind of hobby related information. For instance, in October 1935 this journal published the society news (*Vereenigingsberichten*) of *de Nederlandsche Bond van Aquariumhouwers* (although the name of the organization had already been changed!), *de Nederlandse Oost-Indische Aquarium- en Terrarium Vereenigingen* (in 1933 there already appeared an aquaristic journal called *Aquaterra* in the Dutch East-Indies), *de Nederlandse West-Indische*

*Aquarium Vereeniging "Caraïbia"*⁷⁵ and *de Belgische Aquarium- en Terrarium Vereenigingen*.

As we noted before, at the beginning of the 20th century aquarists were mostly dependent on a few animal shops in Germany for their aquatic supplies. In 1914 about fourteen pet shops in the Netherlands existed and in 1935 there were already more than two hundred goldfish-selling shops, some of which were specialized aquatic shops selling a wide range of aquatic supplies⁷⁶.

In June 1935 another periodical *Aqua-Terra* was launched in the Netherlands by a group of hobbyists among

whom was the great inspirator W. J. M. Deutz, who by the way published some interesting articles on the history of the Dutch aquatic hobby, too.⁷⁷ This magazine also contributed a lot to the growth of the aquatic hobby.

⁷² For comparison, in Denmark there was just one aquarium society in 1931 (already founded on 4 May 1915): Unsere Aquarienliebhaberei im Ausland. *Wochenschrift für Aquarium- und Terrarienkunde*, 29 (28): 442.

⁷³ For comparison, a large country like France had about a thousand organized aquarists in 1934, *Revue des Aquariophiles de France*, 1 (1934) no. 5: II.

⁷⁴ Vente, J. 2002, De geschiedenis van de aquariumliefhebberij in Nederland. *Het Aquarium*, 72: 11-16; 47-52; 83-87.

⁷⁵ On Aruba there were no aquarists yet: van de Weg, P. C. 1948, The Hobbyist in Aruba, Dutch West Indies. *The Aquarium*, 17 (10): 218.

⁷⁶ Voorwalt, F. H. 1976, De aquariumliefhebberij in Nederland voor de tweede wereldoorlog en nu. *Het Aquarium*, 47: 172-176.

⁷⁷ Deutz, W. J. M. 1946/1947, De geschiedenis van de Nederlandse Aquariumliefhebberij. *Het Aquarium*, 17: 86-87, 107, 137, 151-152.

Gekomen op de vergadering in
Maart jl. hebben deze heren
zeker een zeer vrijevorderende
taak te vervullen gekregen. Wij
twijfelen er echter niet aan of al
zullen door vredelustig samen-
werken onze bond voeren tot
een voor ons land ongelooflijke
bloei. Hen hieldt voor onze sport
staat hiervoor borg.

VALLINERIA SPIRALIS.

Familie der Hydrocharitaceae.

Dit is wel een van de meest bekende en verspreide aquariumpflanzen. Grotendeels in Amerika en Zuid-Europa en Noord-Italië heeft hij zich in het aquarium rondom de wereld verspreid. De smalle, groenige, levendig groene bladeren door het water rechtstaand gehouden, kunnen bij een goede voeding soms een lengte van 60 cm en meer bereiken. Bij veel licht en volledig waterstand daarvan kunnen de bladeren drieënhalve maal stevig in den bodem wortelen. De wortelbladen zijn fel oranje en maken in het aquarium, vooral bij oppervlak licht een mooi effect, terwijl die plant allen tijd veel zuurstof ontwikkelt.

De plant is zweefhoudend.
Zij vermenigvuldigt zich langs wortelstokken weg door uitlopers.
Deze wortelstokken kunnen dan in bloedsel rondhangen en gemakkelijk van elkaar te onderscheiden. De bladeren der plant bestaan uit een dunne, lichtgroene kalk, welke zich na ontwikkeling der bladen strakst, staand aan den wortelwurzel vasthoudt. Omgeven door een blaasjeslaag, die de kalk tegen indringing water beschermend. Eenzaam om de oppervlakte blijft, splitst dit behuwd en komt de bladen voor bewerking vrij.

De mannelijke bloemen, die evenals door een blaasjeslaag omhulld zijn, zijn zeer kort gesteeld, zodat deze diep onder de oppervlakte hangen. De bloeiwijze der vrouwelijke bladeren vindt plaats, doch de mannelijke bloemen raken van hun stelen loslaten en niet meer de oppervlakte van het water stijgen. Eerst zijn de bloempjes nog gedrongen en kleiner, maar spoedig openen zij zich en drijven als kleine bootes door de wind gedreven, naar de vrouwelijke bloemen.

Hier de beschrijving tot de spiraalvormige steel zich weer in, waarop de rijpende vrucht onder water tussen de bladbundels gehangen wordt.

* * Tegen in 1922 de doekdokkijpje

over de destijds bestaande R.A.N.,

wordt mij namen van aquarien, en

terreinen van de verschillende landen,

een nieuw tijdschrift aangekondigd, het

ouderwets „groene bladje“. Onlangs

welke artikelen was hiervoor nodig, maar

het kon mij niet gevonden worden.

Want het ontvingen. Ik neemde den

heer H. J. Thielker, die in de volle

kracht des levens is heengegaan, uit, het

oogstelartikel te schrijven. Aan hem

gaaf ik de eer, omdat hij zo ongeveer van

de eerste tot de laatste dag van zijn

leefhebberij op die voorgaande traad,

moedige man was op het gebied der criti-

cus op zijn leefhebberij en een zon-

derwets „groene bladje“.

Onlangs was hij overleden.

Want de leefhebberij is gegaan. Thans wil ik

ter nagedachtenis dit artikel aan onzen

onvergetelijken natuureigen wijden en

het ogenblik dat ik dit schrijf, is de dwerg-

gaster lalus, die in alleen nog maar

onder dien ogenen naam kende.

Mischaai vinden wij aanleiding de vis-

tekenen te gebruiken.

De dwerggaster lalus, die in alleen nog

onder dien ogenen naam kende.

With the on-going specialization in the aquatic hobby a need arose for specialists' societies. First for guppy fanciers (NGK or *Nederlandse Guppen Kring* in 1950, the society does not exist anymore) and later followed by societies for killifish fanciers (KFN or *Killi Fish Nederland* in 1972, still publishing their bimonthly periodical *Killi Nieuws*), for cichlid fanciers (NVC or *Nederlandse Vereniging van Cichliden Liefhebbers* in 1975, still publishing their bimonthly periodical *Cichlidae*) and for livebearer fanciers (*Poecilia Nederland* in 1984, publishing their bimonthly periodical *Poecilia News*).

At the end of 1951 attempts⁸⁵ were made to start a Worldwide aquatic society, the *World Federation of Aquarists*⁸⁶. The founding meeting was held in Amsterdam on 23-24 August 1952⁸⁷. Later meetings were held in Innsbrück (24-25 July 1954⁸⁸), in The Hague (13 Aug. 1955⁸⁹) and in Leiden (11-14 July 1957⁹⁰). Even in 1959 and in 1960 some people were still attempting to form a truly World Federation⁹¹.

The federation published a quarterly journal in 1955, *The World Aquarist*. There were famous Dutch aquarists in the editorship, H. C. D. de Wit, and P. J. Merckens. The federation produced four issues in 1955 [1 (1) appeared in January 1955⁹²], 1 (2) in April 1955, 1 (3) in July 1955, 1 (4) in Dec. 1955], 2 (1) was published in February 1956, 2 (2) appeared finally in April 1957⁹³ and 2 (3) in July 1957. The magazine contained a lot of articles written by Dutch authors. Sadly the admirable effort ended due to financial difficulties in 1958.

In 1955 the same international idea was followed on a smaller scale by the foundation of the C.E.V.⁹⁴ (*Confédération européenne des Vivarianer*, Saarbrücken, French Protectorate)⁹⁵. The C.E.V. tried to promote the exchange of information between aquarists in different countries. At a meeting in Essen the *Vereinigung Europäischer Vivarianer* was formed on 14 October 1956⁹⁶, which also cooperated a while with the World Federation of Aquarists⁹⁷. Due to the changing times the C.E.V. also did not survive long, the effort ended in March 1960 (Hohl 2011, p. 106).

A later international attempt was made by the society *Aqua-Terra International* in the seventies.

Now the European corporation is named *E.A.T.A.* or *European Aquaristic and Terraristic Association* (www.eataaquaterra.eu), founded on 26 April 1997.

Furthermore, nowadays we can consult an organization dedicated to the promotion of the fishkeeping hobby worldwide, the *International Federation of Online Clubs*

and *Aquatic Societies* (www.ifocas.org; with over 9,000 aquarist members in over 2,000 organizations spanning over 37 countries!).

From the *Dagblad van Zuidholland en 's Gravenhage*,
24 Oct. 1862:

— In Engeland zijn de schoone en belangwekkende vissen plantenkommen (*aquaria*) altijd nog aan de orde van den dag. Zekere heer Gosse berigt omtrent den aanleg dier kommen het volgende: Wanneer wij van een *aquarium* spreken, dan bedoelen wij daarmede eene kom, die acht tot dertig gallonnen (van 4 $\frac{1}{2}$ kan) water bevat. De heer G. beschrijft zijne grootere kom, als hebbende 2 voet lengte bij 18 duim wijde en even zoo veel duimen diepte met ruim twintig gallonnen inhoud. Is de kom gereed en schoon gemaakt, doordien men haar weken lang dan eens gevuld, dan weder geledigd heeft en haar aan de zon heeft blootgesteld, zoodat alle kalk, olie, vernis, looistof gehel verwijderd zijn, dan moet men het eerst den bodem in orde brengen en beplanten. Eenige ruwe brokken steen, vrij van ijzer en andere metalen, welke het water onzuiver maken, kunnen met cement tot eene boog gebouwd of naar keus op de eene of andere wijze opgehoopt worden. De bodem moet geheel uit lei of uit goed uitgewasschene kleine kiezesteenen bestaan. Gewoon wit zand, zoo lang uitgewasschen tot dat het water geheel helder daarvan afloopt, is eveneens voor den bodem geschikt. Klei- of gewone plantenaarde is voor waterplanten niet noodig en eer schadelijk dan nuttig, daar zij gedurende eenigen tijd het menigvuldige ververschen van het water vereischt, ten einde de oplosbare stoffen te verwijderen en den groei van conserven en van andere gemeene, schadelijke plantensoorten bevordert. Men heeft bevonden, dat waterplanten van allerlei soort, wanneer hare wortels slechts bedekt worden, in kiezesteenen van zelve wortel schieten en bloeijen. De planten moeten zorgvuldig van alle doode deelen gezuiverd, de wortels aan een kleinen steen bevestigd of op den bodem gelegd en met een laag kiesel en zand bedekt worden. Is de bodem beplant, dan moet het water door middel van een gieter of langs de wanden in den vijver gegoten worden, ten einde iedere hevige beweging van den bodem te vermijden. Het water moet zuiver en helder zijn. Rivierwater is het beste; bronwater is ook goed, maar moet eenige dagen voor dat men de visschen in het *aquarium* doet, door de planten minder hard worden gemaakt. Zonneschijn is in alle jaargetijden goed voor het *aquarium*, doch wordt meer vereischt voor *aquaria* van bron- dan van rivierwater. De hoeveelheid door de planten ontwikkelde zuurstof en de groei en de dardelheid der visschen, die daarvan het gevolg is, is veel groter zoolang de zon daarop schijnt. Bij het kiezen der planten voor het *aquarium* moet men op de hoeveelheid zuurstofletten, welke zij ontwikkelen, zoomede op hare duurzaamheid en schoonheid. Als zoodanige waterplanten worden meestal gebruikt, Callitricha, Vallisneria, Ranunculus aquatilis, Hydrocharis en Alisma, als vischsoorten en levende waterbewoners de Cyprinidae, de Cyprinus gibelio (karper) de Cyprinus ruratus (goudvisch) de Cyprinus phoxinus. Voor eene kom van 12 gallon worden gebezigd drie goudvissen drie karpers, twee baarzen, vier grote smerlijnen, zes bleijen, verscheidene slakken, waterkevers, waterspinnen en salamanders. Alles zal nu wel goed gaan en het water helder blijven; doch wanneer de vijver eenige weken gestaan heeft, dan vertoont zich aan den binnenwand van het glas een groen bekledsel, dat zich weldra uitbreidt en het zien der visschen en planten belemmert. Dit bekledsel ontstaat door den groei van eene kleine conservenplant, die men moet vernietigen. Daartoe is de slak het natuurlijke tegenmiddel, daar zij weldra alle zoodanige schadelijke stoffen uitroeft. Slakken klampen zich aan de wanden vast en beletten den groei dier planten. De Lymnea is daaronder de heilzaamste, maar ongelukkigerwijze eet zij daarbij gaten in de jonge takken der grootere planten. Aan enige andere soort van slakken kan met dit verwijt niet doen; de Paludina en Planorbis zijn de eenige, waarop men kan vertrouwen. Zij zullen den groei van schadelijke planten spoedig beletten. Ten einde de helderheid van het water te behouden kan men enige schelpdieren in het zand laten woelen. Met deze voorzorgen zal eene goed geslepen kom de oorspronkelijke reinheid langen tijd behouden.

Kijkjes in de Dierenwereld *)

door

P. C. C. DUYZEND.
MET AQUARIUM.

Gekomen zijnde aan de visschen, geschikt voor het Aquarium en welche niet in Nederland voorkomen, begin ik met de Japansche goudvisschen. Reeds sedert duizenden jaren houden de Japannezen en de Chinezen deze visschen in hunne aquariums en vijvers.

De vorm deser waterbewoners wijkt vrij wat af van de gewone goudvissen. De lichaamsvorm is zeer gedrongen en de bulk verbazend dik, terwijl de staart dikwijls waaiervormig is. Bovendien komen nog zeer eigenaardige en fraaie afwijkingen voor, als de Japansche goudvisch met een staart, die als een skuer neerhangt, en de Telescoop-visch, die zich onderscheidt door zijn grote, tamelijk ver uit den kop te voorschijn tredende oogen. De staart van deze laatste vischsoort is waaiervormig.

Deze visschen zijn werkelijk sieraden van een aquarium en sterk genoeg om lang in het leven te worden gehouden. De kleur van bovengenoemde visschen is rood, silver of melkachtig, soms wit-goud geslekt.

Wanneer men boven beschreven visschen bij een naturalien-handelaar bestelt, versnuime men niet tevens op te geven een paar Chineesche Macropoden.

Als aquarium-bewoners staan dese allerfraaiste visschen bovenaan.

Hunne schubben hebben een schoonen paarlemoezaartigen glans, terwijl het geheele lichaam is bedekt met blauwe en roodachtige strepen, verticaal loopend.

* In *Het N. v. d. D.* van 29 Mei.

In Flanders

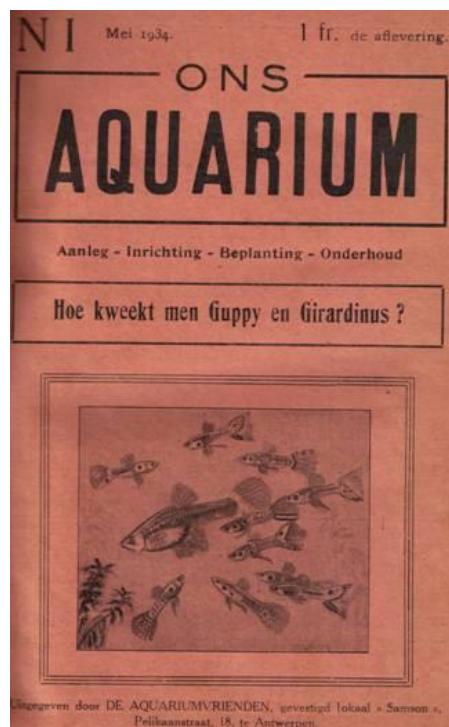

In the Flemish part of Belgium the aquatic hobby also started to grow in the nineteen thirties⁹⁸. In Antwerp there was already an aquatic society in 1909 (*Lotus*⁹⁹, the members could read the Dutch periodical *Ons Eigen Blad*, see above) and one of the first Belgium aquatic booklets was published in Antwerp in 1926. This booklet written by the teacher August Havermans of the 'aangenomen stedelijke Normaalschool' in Antwerp, although dealing only with coldwater aquaria contributed to the popularity of the aquarium. Also the very useful books of L. Beirens (a famous pioneer of the hobby in Belgium, 1865-1947) accelerated the growth of the aquatic hobby.

In 1934 Flanders already counted six aquatic societies (aquariumclubs): *De Guppy* (in Kortrijk), *Nymphaea* (in Gent), *Panchax* (in Moeskroen), *Barbus* (in Deurne), *De Aquariumvrienden* and *Scalare*¹⁰⁰ (both in Antwerp) and the periodical *Ons Aquarium* (1934-1939) became their source of information¹⁰¹.

Another major leap forward was the foundation of a 'national' aquatic organization of Flanders in 1933, the *Bond van Aquarium- en Terrariumhouders van België* (also named *la Fédération des Cercles d'Aquario- et de Terrariophiles de Belgique* or *la Fédération Belge d'Amateurs d'Aquariums et de Terrariums*).

⁹⁸ In Brussels there was already a national society named "L'Aquarium pour tous" (*Société nationale des amateurs d'aquariums & de terrariums*, founded December 1915) that published in 1916 some aquarium leaflets (E. Rousseau, *Courtes notices sur les animaux et plantes d'aquariums et de terrariums*, 46 pp. and in December 1916: *L'Aquarium pour tous*, 32 pp.). Also "Les Naturalistes belges" occupied themselves with aquarium fishes and plants (1926: *Animaux et plantes d'aquariums et terrariums*, 72 pp.). From 1906 on there was already the famous aquarium shop *Aquarium Desbarax* in Brussels, the company itself in existence since 1828. There were also some fish hatcheries (joined in the "Société de Pisciculture de Bruxelles") producing various goldfish varieties in 1911: *Exposition d'Aquiculture. Le Magasin Pittoresque*, 1911: 177-178.

⁹⁹ Adressentafel der Vereine 1909. *Blätter für Aquarien- und Terrarienkunde*, 20 (28): 452.

¹⁰⁰ *Scalare*, Borgerhout already published their periodical: *Maandblad voor aquariumkunde* in 1930.

¹⁰¹ The French speaking Belgium aquarists could also consult the magazine *Le Zoo chez Soi (Revue Mensuelle de la Décoration Vivante)*, published by Antoine Wassenhove (who owned a wholesale pet trade in Brussels) from January 1934 on. Also they could consult the *Revue des Aquariophiles de France* (the official journal of the "Association des Aquariophiles de France"),

On 25 April 1937 the national aquatic organization of Flanders was refounded and the name was changed to *B.B.A.T.H.* or *Belgische Bond van Aquarium- en Terrariumhouders*. Also attending the convention were hobbyists from Brussels (*Les Naturalistes Belges*) and Namur (*La Société des Aquariophyles*). The famous Belgian aquarist, A. Dubois (apothecary in Antwerp), was chosen as chairman. Initially there was some debate on the choice of the official journal for the organization, *Ons aquarium* or a new journal? After some deliberation a new journal had to be made and it was finally published on the 1st of May 1939 with the name *Vivarium*. Sadly the publication had to stop due to the starting war (the last number was published on 15 July 1939).

The Second World War also destroyed the organized aquatic hobby in Belgium.

After the war¹⁰² the hobby came back in existence and soon flourished again. Particularly in Antwerp the hobby became very popular. The

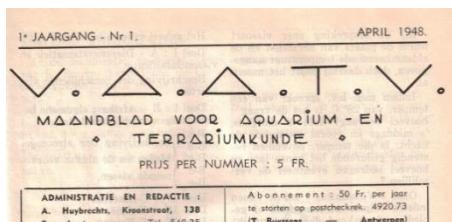

Beschouwingen bij een Geboorte

Waarheidshalve moeten wij toegeven : een geboorte is het eigenlijk niet.
In den goede tijd, toen wij nog niet de wacht moesten houden bij onze gynaecoloog om een kind te krijgen, op de prijslijst van ons magazijn voorkwam met 1,50 Fr., segre en schrijfverdienste frank, heeft « BARBUS » nog de woeide gekend een Maandverslag te bezitten. Wij kunnen dus beter spreken over een hergeboorte, maar... het zal dan ook een hergeboorte zijn in den vollen zin van het woord.

Bewaarde zich bovenstaande Maandverslag hoofdzakelijk tolleden koren inhoudb van de voordrachten in den loop der maand gegeven, zo is thans den opzet een Maandblad niet te geven, vooral bestemd voor eigen kring, waarin, buiten het verslag van de gehouden voordrachten, allelei belangwekkende rubrieken

society *Barbus* in Antwerp started a magazine as the follow-up of the prewar *Vivarium* in December 1946 (*Barbus, maandblad voor aquarium-terrariumkunde*)¹⁰³. The society had more than 300 members in 1947 (the largest of the six Belgian societies at that time¹⁰⁴).

En Welkomstgroet

Eindelijk hebben we dus werkelijk een eigen blad! Het is misschien wel een beetje een beetje wat achterhaald, maar dat is eerst, als diplomaat in wording, het terrein zorgvuldig voorbereiden, moeder of vader lief aanrichten, vele beloften doen, enz. Nu zóó is dit ontstaan, dat al wat met het aq. van dichtbij of van verre in betrekking staat.

Of dat nu alles zoa maar vanzelf gegeven is? Moet gegeleven?

Als ge als kleine jongen een stukje leed, ophouden, dan moet je eerst, als diplomaat in wording, het terrein zorgvuldig voorbereiden, moeder of vader lief aanrichten, vele beloften doen, enz. Nu zóó is dit ontstaan, dat al wat met het aq. van dichtbij of van verre in betrekking staat.

Erst cijferen, herecifferen,

(het kost tegenwoordig geen penischiljetje), een plechtige,

diplomatische « sprach » van den ondervoorzitter, enige aar-

zullen voorkomen als : Veag en Antwerp - Migratierechten - Vlaamskaak - Overzicht van Buitenhandsche tijdschriften - Verschijningsplaatsen - beschrijvingen van vischsoorten - gekakte en mislukte kweken en verder al wat met het aq. van dichtbij of van verre in betrekking staat.

Met ons bladje, hoe klein het ook is, want er is een groot aantal leefhebbers van waar ook, niet alleen zijn mening kunnen bekend maken, doch tevens van de ervaring van anderen kunnen genieten.

Wij zullen dan ook steeds verlan-

digd uitzien naar de volgende uitga-

ve, vermits dan immers steeds het

kontak hervieuld zal worden en

vooral, omdat het een werkje van ons

zelve is.

Moge het een goed onthaal vinden en.... een lang leven tegemoet gaan.

J. KOKELENBERG
Voorzitter der V.A.A.T.V.

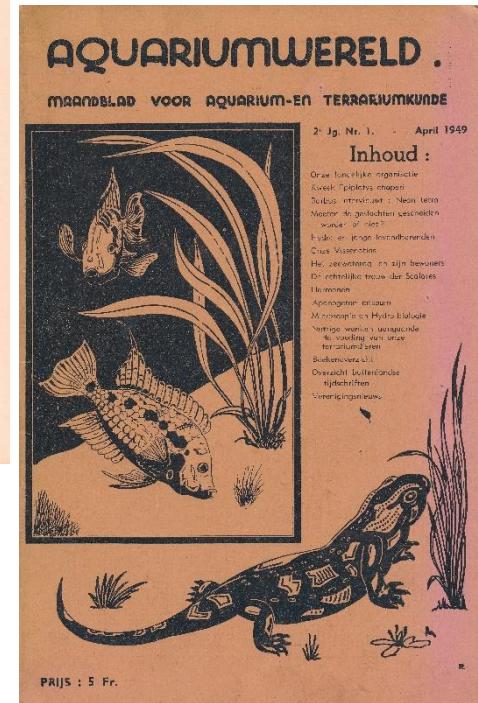

Onze Vissenatlas

Het ligt in die bedoeling van V.A.A.T.V. een « Vissenatlas » uit te geven, waarmede reeds in dit nummer een aangang gemaakt wordt.
Wij U eerst het doel en het waarom van dit werk uitleggen.

Deze atlas van de vissen van de verschillende wateren is in het algemeen goed bekend, doch de levenswijze en voorval het natuurlijk middelen waarin ze vertoeven blijft tot hertoe vaag, alhoewel dit van de

grootste betekenis is voor de verzor-
ging der vissen.

Zoveel is er nog waarover we meer en beter ingelijst willen worden. Immers alles is van belang : soel of trastragomd water, wel of niet be-
vattende zout, temperatuur, water-
gehalten, voorkomende temperaturen,
regenseizoenen en zo meer. Ziedaa-
tal van zaken waarvan wij niet on-
kundig mogen zijn, vooral bij het kweken.

The increasing cooperation of the five aquarium societies in Antwerp (*Antwerpse Aquarium vrienden*, *Barbus*, *Rosaceus*, *Scatophagus argus* and *Sierkweek*) led to the beginning of the magazine *V.A.A.T.V.* and this marked the start of the famous magazine *Aquariumwereld*, which is still being published today.

founded 13th October 1933) also published from January 1934 or they could read the very informative magazine *Aquarium (Paris)*, published from January 1934 - 1937? (the last number I have seen is nr. 31/32, July/August 1936). Later there also appeared the magazine of O. Guarini, *Mon aquarium*, published from 1937 - 1938 in Brussel.

¹⁰² Many companies also suffered badly: M. Carels 1946, Letter from Belgium. *The Aquarium*, 15 (6): 101-102.

¹⁰³ Editor 1947, Publications. *The Aquarist and Pondkeeper*, 12 (3): 76.

¹⁰⁴ Huybrechts, A. 1947, Aquarium keeping in Belgium. *The Aquarist and Pondkeeper*, 12 (5): 126.

Ons laatste Nummer

Met dit nummer eindigt dus het bestaan van « Ons Aquarium ». Wie op de lippen is van wat we hier te Antwerpen beleefd hebben, zal dit beduiden.

Indien we vijf jaren lang met liefde en opoffering de aquariumliefhebbers hebben gedienst, dan blikken we thans met evenveel wal en verschating terug op het moeilijkwerk van een handige bedrijver en lasteraars, die we op onze weg hebben gezien.

Indien vele Antwerpse liefhebbers nu nog niet weten, dat ze om den tuin worden geleid door verdiek handelaars, die niets ontzien om hun doel te bereiken, dan is dat het bewijs, dat ze bedrogen zullen worden.

Thans rest ons nog alleen een sombere taak te verrichten, nl. onzen opvolger te vinden. De taak van de *Scatophagus argus*, die ons in alle omstandigheden bereidwillig ter zide stonden en in 't bijzonder aan de HH. Thérèse, Pieters en Sylvester² aan onze talrijke abonnees uit Mechelen, Brussel, Leuven en de beide Vlaanderen, die ons steeds getrouw bleven.

Eindelijk nemen we, niet zonder leedewezen, afscheid van onze talrijke lezers en vrienden uit Nederland, met wie we steeds de beste en hartstikke betrekkingen onderhielden en die ons roddelen van hun hoogmoedige en dwaze landgenoten van den Duitschen bondschappellen.

Aan allen zeggen we vaarewell!

EN WAT NU?

Alweer heeft de anti-B.B. een laag achter den rug, zoodat de clubs andermaal 5 fr. per lid mogen afdragen voor dit pro-Hollandsch orgaan, dat nog volstrekt niets heeft gepresteerd en een ellendigen dood is beschouwd.

Om het enige Belgisch Aquariumblad z.g. te klederen, heeft een overweldigende verantwoordelijkheid om zijn leugens en leugens — een overvloed aan gesloten berichten over de vissen — te ontdekken en te bestrijden heeft om een vraagtekens om inlichting te beantwoorden en een paar bladzijden ter beschikking stelt om er het nieuws uit Antwerpen in te ontkennen.

Maar, daar is een voorwaarde aan verbonden! Hij moet al 500, zeggen wij, leden hebben om de clubs andermaal 5 fr. per lid te mogen afdragen, al is de afgelopen club niet eens de helft van 500 leden tellen en de anti-B.B. in het afgelopen jaar amper een honderd betstellende leden boekte.

Want die 500 abonnees bereid om een 50-tal leden per jaar te tellen, zullen we niet vinden, dat is een feit.

De ontspeling zal nog groter zijn dan die, welke de B.B. heeft verwekt.

En hoeveel blad dat z.g. eigen(?) vreemd organen bevatten? Eerst 24, zegt hij (*Aqua-Terra* tel. er 24 van dubbel formaat) en als de gekafde heef ik zogenaamd 24 verschillende verschillende bladen.

Achteraf vermenen we zelfs dat de onnozelheden worden wijs gemaakt, dat het blad — evenals *Aqua-Terra* — gekleurde platen zal geven! En zeggen, dat het niet eens fachtaart zijn artikelen illustraties kan met gewone drukplaten laten over den Rijn terreinen te kloppen!

Wie datucht of liever die beledigt de wereld inzond, hoeft ge niet te vragen. Doet veel beloven en weinig geven, de zottekens niet in vreugde leven?

Zóó ging het vroeger ook bij de heroprichting van den B.B. Hij behoefde

201

EEN NIEUWE LENTE, EEN NIEUW UITZICHT

Stilstaan is achteruitgaan. Hoogstnodig moet ons blad in een nieuw kleedje gestoken worden en spijt de moeilijke economische omstandigheden, spijt de geweldig verhoogde papierprijs is de kogel door de kerk. Ten koste van grote financiële offers brengen wij U thans een verjongd blad en wij hopen dat het in de smaak onzer lezers zal vallen en zij de in evenredigheid lichte prijsverhoging die wij moesten toepassen, geredelijk zullen aanvaarden, waarvoor wij hun vooraf dank zeggen.

Maar niet alleen het uitzicht wensten wij te veranderen, ook de inhoud, want bij een nieuwe lente hoort ook een nieuw geluid. Tot nu toe hebben wij ons moeten bepalen de artikels in te lassen die ingezonden werden. Alleen de redactieraad weet hoe schaars zulke kopij steeds is en, indien wij niet herhaaldelijk noodkretsen hebben moeten slaken, dan is zulks dank zij een kleine scharre getrouwe medewerkers, waarvan U de namen regelmatig onderaan de artikels gevonden hebt. Wij zijn hun veel dankbaarheid verschuldigd en wij hopen ook in de toekomst op hun gewaardeerde medewerking te kunnen rekenen.

niet altijd aan de behoefte van het ogenblik: een artikel over verwarming b.v. komt het best van pas bij de aanvang van de winter, terwijl kweken dienen besproken te worden in het voorjaar, bij de aanvang van het daarvoor gunstige seizoen. Daar echter de vrije inzendingen amper voldoende waren om het eerstvolgend nummer te vullen, bleef er de redactieraad geen keus.

Hierin willen wij verandering brengen en bovendien zagen wij gaarne een grotere verscheidenheid van onderwerpen behandeld.

Om dit opzet te verwezenlijken dienen wij over een grotere staf van medewerkers te beschikken en wel op allerlei gebied, want ook de kleuteraars willen wij in de gelegenheid stellen hun gaven nuttig aan te wenden voor onze liefhebberij.

Wij zullen aldus niet meer uitsluitend aangewezen zijn op de vrije inzendingen en artikels kunnen voortbrengen volgens een vooraf uitgewerkte programma.

Langs de verenigingen om menen wij de hand te kunnen leggen op de verlangde medewerkers die, ieder in zijn specialiteit, slechts een paar artikels per jaar zouden op te stellen hebben en wij hopen in de eerstvolgende nummers reeds hun artikels te

called the *Fédération nationale belge des cercles aquariophiles et terrariophiles*, publishing the bimonthly periodical *L'Aquariophile Franco-Belge* (from 1972, edited by aquarists of the *Cercle Aquariophile et Terrariophile Bruxellois "Le Guppy Voile"*)¹⁰⁵.

After the difficult start of the BBAT in the fifties, the organization slowly stabilized its membership. In 1980 the BBAT held their second national aquarium exhibition in Antwerp and the organization counted about four thousand members and 52 societies. In 1984 the *Belgische Bond* coordinated about 50 aquatic societies in Flanders.

The BBAT still exists today and continues to do its best to promote our beautiful hobby (www.bbata.be).

In 1973 the killifish fanciers started the *Belgische Killifish Vereniging* (BKV founded 3rd of March 1973), who published their bimonthly periodical *Killi-Kontakt* until 1980. The journal was for a short period united with the periodical of the Dutch society KFN, but the BKV resumed publishing their own journal from 1991 on). In 1975 some cichlid fanciers joined their forces and formed the Belgian cichlid society (*Belgische Cichliden Vereniging*, who published their bimonthly periodical *Cichlidae* until 1982; the journal was later united with the periodical of the Dutch society NVC). In 1980 the guppy society of Belgium was founded, the *Belgische Guppy Vrienden*.

During the last forty years the aquatic hobby in the Netherlands as well as in Belgium gradually evolved to the well-earned place it now has amongst the animal loving hobbies of today.

¹⁰⁵ Lepomme, P. & A. Bijnens 1977, Ten huize van ... M. van de Weyer. *Aquariumwereld*, 30 (12): 264-267.

¹⁰⁶ Editor 1960, Goede Vaart! *Aquariumwereld*, 13 (1): 1-2.

¹⁰⁷ At the same time various Wallonian societies joined their forces in an organization called *L'Inter-clubs*, publishing their journal *Aqua fauna* (the journal already started in 1970, later edited by aquarists of the "Cardinal Club, Liège"). This magazine still exists today: "*Aqua fauna, la revue de l'Interclubs d'Aquariophilie et d'Ictyologie Francophone de Belgique*".

Also in 1946, M. van de Weyer started his famous firm *Antwerp Aquaria*¹⁰⁵, a firm that became known for its import activity.

The Flemish organization, now to be named BBAT (*Belgische Bond van Aquarium- en Terrariumhouders*), was again acknowledged on 10 April 1949 (and again on 2 October 1949), but with substantial more support. Again inspired by A. Dubois as chairman (he eventually died on 19 May 1975).

In 1951 the *Belgische Bond* helped the French speaking aquarists in publishing a "French version" of the magazine *Aquariumwereld*: *Le Monde Aquariophile*, "Revue mensuelle éditée par la Fédération d'Expression Française des Amateurs d'Aquariums et Terrariums, Organe officiel de la Fédération Belge des Aquario- et Terrariophiles" (the "A.S.B.L."). Due to lack of interest that publication ceased within a year.

In 1960 the *Belgische Bond* published a truly French version of the magazine *Aquariumwereld*, *Aqua-Monde*¹⁰⁶, for the benefit of the French-speaking aquarist in Belgium and Congo, but unfortunately the publication ended in a financial disaster.

Later on the BBAT and the *Waalse Federatie voor Aquarium- en Terrariumhouders* started a truly national cooperation in 1976 (the B. B. C. A. T.). The organization of the French speaking aquarists was

LE ZOO CHEZ SOI

REVUE MENSUELLE
DE LA DECORATION VIVANTE

Editor Provisoire :
Ant. WASSERBOVÉ
Av. des Communes, 26
BRUXELLES

Bruxelles, le 28 Février 1934.

A Sa Majesté Léopold III,

Sire,

Quand Sa Majesté le Roi Albert établit Votre "curriculum scientie", Il demanda à Votre précepteur de Vous initier tout d'abord à la connaissance de la Nature et des êtres qui la peuplent. Plus tard, viendrait la connaissance des Hommes.

Sire,

C'est dans ce but que des Belges ont eu l'audace de créer une nouvelle revue pour faire connaître des mondes qui ne sont dits mystérieux que parce qu'on les ignore : celui des Poissons exotiques, celui des Oiseaux d'ornement et celui des Animaux de terrarium.

Animés d'une ardeur qu'ils puissent dans Votre Royal Exemple, ils la lancent dans le monde entier. Mais ils sont particulièrement heureux de la dédier à l'occasion de Son arrivement au Trône, à Celui qui a su montrer que ce n'était pas déoyer que d'être naturaliste, et qui l'est devenu parce que Son Père bien-aimé avait prévu que l'étude de la Vie des humbles pouvait servir de base à l'étude de la Vie des Hommes.

Sire,

Tous les lecteurs mundiaux du "Zoo chez Soi" veulent uniter Votre Exemple, et nous, fondateurs de cette revue, prions Votre Majesté de nous croire parmi Ses Sujets les plus dévoués.

Le Directeur technique
Ant. Wasserbovè

Le Recteur en chef
J.-A. Lestage

A Sa Majesté Léopold III, Roi des Belges.

The Dutch freshwater aquarium bibliography

To conclude, we present a bibliography of the freshwater aquarium (and aquatic hobby related) literature in the Dutch language, which may be of interest to the reader.

In the beginning of the aquarium hobby (middle 19th century), the information about the freshwater aquarium inhabitants had to be found in all kinds of books. So, we list some early fish books consulted by the pioneer aquarists and pondkeepers. Later on, many aquarium books (general, but also about specific subjects) were published, particularly towards the end of the 20th century.

All publications were published in The Netherlands unless stated otherwise. If we could not find the publication, then the number of pages is not stated. If the number of pages is written between brackets, then the publication is not in our possession.

- 1794-1806 Saakes A. B., *Beknopte natuurlijke historie, of beschrijving en afbeeldingen der voortbrengselen van de drie rijken der natuur [...], alles volgends de oude en latere natuurbeschrijvers [...]*, Antonij Bernard Saakes, Amsterdam, 18 afleveringen met vele visaafbeeldingen / beschrijvingen, bijv.
