Spirinchus Jordan & Evermann, 1896 (OSMERIDAE>Osmerinae) [this genus includes a not listed marine species]
Spirinchus lanceolatus (Hikita, 1913) "Shishamo smelt / Shishamo"
Spirinchus thaleichthys (Ayres, 1860) (*Osmerus thaleichthys* Jordan & Evermann (1902):228) "longfin smelt / Pacific Smelt / Sacramento spiering"
 Spirlin → *Alburnoides bipunctatus*
 Spirobranchus → *Sandelia* / → *Ctenopoma*
 Spitsbekkarperzalm → *Nannostomus eques*
 Spitskopaal → *Anguilla anguilla*
 Spitskopgrondel → *Butis butis*
 Spitssnuitgoerami → *Ctenops nobilis*
 Spitssnuitsteur → *Acipenser stellatus*
 Spitzzalmpje → *Nannostomus beckfordi*
 Spixostoma → *Boulengerella*
 Splash tetra → *Copella arnoldi*
 Splashing Salmlet → *Copella arnoldi*
 Splendid Australian Rainbowfish → *Melanotaenia splendida*
 Splendid danio → *Brachydanio kerri*
 Splendid darter → *Etheostoma barrenense*
 Splendid Killie → *Aphyosemion (Chromaphyosemion) splendopleure*
 Splendid pearlfish → *Leptopanchax splendens*
 Splendid rainbowfish → *Melanotaenia splendida*
 Splendid Snakehead → *Channa lucius*
 Spoonfin Garfish → *Zenarchopterus dispar*
 Spoonhead Whiptail → *Loricariichthys platymetopon*
 Spoonsnout catfish → *Doiichthys novaeguineae*
 Spootooth Sucker Catfish → *Hypostomus plecostomoides*
 Sporeenberg's Killie → *Fundulopanchax sporeenbergi*
 Spot pangasius → *Pangasius larnaudii*
 Spotback corydoras → *Corydoras blochi*
 Spotback loach → *Schistura notostigma*
 Spotbanded scat → *Selenotoca multifasciata*
 Spotcheek cichlid → *Thorichthys maculipinnis*
 Spotface Pike Cichlid → *Crenicichla lenticulata*
 Spotfin betta → *Betta macrostoma*
 Spotfin Cory → *Hoplisoma orphnopterus*
 Spotfin corydoras → *Hoplisoma punctatum*
 Spotfin goby cichlid → *Tanganicodus irsacae*
 Spotfin hatchetfish → *Thoracocharax stellatus*
 Spotfin Killie → *Aphyosemion christyi*
 Spotfin Loach → *Nemacheilus fasciatus*
 Spotfin Rasbora → *Brevibora dorsiocellata*
 Spotfin shiner → *Cyprinella spiloptera*
 Spotfin Spiny-eel → *Macrogathus siamensis*
 Spotfin Synodontis → *Synodontis robbianus*
 Spotfin tetra → *Hyphessobrycon socolofi*
 Spotfin Xenotilapia → *Xenotilapia spilopterus*
 Spthead Hap → *Haplochromis horei*
 Spotlight Mini Cory → *Gastrodermus hastatus*
 Spotline Aspadoras → *Aspidoras lakoi*
 Spotline Killie → *Aphyosemion ogoense*
 Spotline Peacock Cichlid → *Cichla temensis*
 Spotnose Gar → *Lepisosteus platostomus*
 Spotscale barb → *Enteromius holotaenia*
 Spottripe pencilfish → *Nannostomus britskii*
 Spottail → *Brachyalestes imberi*
 Spottail barb → *Enteromius afrovernayi*
 Spottail Barb → *Enteromius poechii*
 Spottail curimata → *Curimatopsis evelynae*
 Spottail darter → *Etheostoma squamiceps*
 Spottail leporinus → *Leporinus melanopleura*
 Spottail Moenkhausia → *Moenkhausia dichroua*
 Spottail Mosquitofish → *Pseudoxiphophorus bimaculatus*
 Spottail Rasbora → *Rasbora caudimaculata*
 Spottail shiner → *Hudsonius hudsonius*
 Spottail Slender Tetra → *Piabucus caudomaculatus*
 Spotted African Catfish → *Synodontis alberti*
 Spotted African Lungfish → *Protopterus dolloi*
 Spotted Amur Barb → *Hemibarbus maculatus*
 Spotted Aspadoras → *Aspidoras fuscoguttatus*
 Spotted barb → *Barbodes binotatus*
 Spotted Barramundi → *Scleropages leichardtii*
 Spotted bass → *Micropterus punctulatus*
 Spotted Belize Platy → *Xiphophorus maculatus*
 Spotted Belize Swordtail → *Xiphophorus hellerii*
 Spotted betta → *Betta picta*
 Spotted blue-eye → *Pseudomugil gertrudae*
 Spotted bonytongue → *Scleropages leichardtii*
 Spotted Bristlenosed Catfish → *Ancistrus hoplogenyis*
 Spotted Bullhead → *Ameiurus serracanthus*
 Spotted Cachorro → *Acestorhynchus falcatus*
 Spotted Cameroon Killie → *Aphyosemion obscurum*
 Spotted Catfish → *Hoplisoma ambiacus* / → *Hoplisoma punctatum*
 Spotted Caudo → *Phalloceros caudimaculatus*
 Spotted Channel Catfish → *Ictalurus punctatus*
 Spotted Characidium → *Characidium steindachneri*
 Spotted Characin → *Copella callolepis*
 Spotted Cichlid → *Vieja maculicauda*
 Spotted Climbing Perch → *Ctenopoma acutirostre*
 Spotted Cochliodon → *Hypostomus oculus*
 Spotted Congo Puffer → *Tetraodon schoutedeni*
 Spotted Copeina → *Copella nattereri*
 Spotted Corycat → *Hoplisoma brevirostre*
 Spotted corydoras → *Hoplisoma ambiacus*
 Spotted Corydoras → *Hoplisoma agassizii* / → *Hoplisoma brevirostre* / → *Hoplisoma melanistius* / → *Hoplisoma schwarzi* / → *Hoplisoma surinamense*

- Spotted Crenicichla → *Crenicichla albopunctata*
 Spotted ctenopoma → *Ctenopoma acutirostre*
 Spotted Curimata → *Steindachnerina elegans*
 Spotted Danio → *Brachydanio nigrofasciatus*
 Spotted darter → *Nothonotus maculatus*
 Spotted Doras → *Agamyxis pectinifrons*
 Spotted Elephantnose → *Marcusenius macrolepidotus angolensis*
 Spotted Epiplatys → *Epiplatys singa*
 Spotted Fire Eel → *Mastacembelus erythrotaenia*
 Spotted Flagtail → *Kuhlia marginata*
 Spotted Flying Fox → *Crossocheilus cobitis*
 Spotted gambusia → *Gambusia affinis*
 Spotted Gambusia → *Gambusia punctata*
 Spotted gar → *Lepisosteus oculatus*
 Spotted Gibbiceps → *Pterygoplichthys gibbiceps*
 Spotted Glass Knife fish → *Hypopomus artedi*
 Spotted goby → *Dormitor maculatus*
 Spotted Goodea → *Characodon encaustus*
 Spotted Gourami → *Trichopodus trichopterus*
 Spotted green pufferfish → *Dichotomyctere nigroviridis*
 Spotted hatchetfish → *Gasteropelecus maculatus*
 Spotted headstander → *Chilodus punctatus*
 Spotted Hillstream Loach → *Gastromyzon punctulatus*
 Spotted hoplo → *Megalechis picta*
 Spotted Hoplo → *Leptoplosternum pectorale*
 Spotted Hypostomus → *Hypostomus punctatus*
 Spotted Killie → *Aphyosemion maculatum*
 Spotted Lampeye → *Lacustricola maculatus*
 Spotted leporinus → *Hypomasticus megalepis*
 Spotted Leporinus → *Leporinus frederici*
 Spotted Livebearer → *Phalloceros caudimaculatus*
 Spotted Medaka → *Oryzias carnaticus*
 Spotted metynnis → *Metynnis maculatus*
 Spotted Metynnis → *Metynnis lippincottianus*
 Spotted Mosquitofish → *Gambusia puncticulata*
 Spotted Mountain Catfish → *Zaireichthys rotundiceps*
 Spotted Mountain Trout → *Galaxias truttaceus*
 Spotted Panchax → *Epiplatys singa*
 Spotted Peckoltia → *Peckoltia brevis*
 Spotted Phago → *Phago loricatus*
 Spotted pike-characin → *Boulengerella maculata*
 Spotted Pimelodella → *Pimelodella picta*
 Spotted Pimelodus → *Pimelodus maculatus*
 Spotted Piranha → *Serrasalmus rhombeus*
 Spotted Pufferfish → *Dichotomyctere nigroviridis*
 Spotted rainbowfish → *Glossolepis maculosa*
 Spotted Raphael Catfish → *Agamyxis pectinifrons*
 Spotted Ricefish → *Oryzias carnaticus*
 Spotted Rasbora → *Boraras maculatus*
 Spotted River Puffer → *Dichotomyctere nigroviridis*
 Spotted Rivulus → *Melanorivulus punctatus*
 Spotted Sailfin Pleco → *Pterygoplichthys punctatus*
 Spotted Sailfin Sucker Catfish → *Pterygoplichthys gibbiceps*
 Spotted scat → *Scatophagus argus*
 Spotted seabass → *Dicentrarchus punctatus*
 Spotted Shovelnose Catfish → *Hemisorubim platyrhynchos*
 Spotted skiffia → *Skiffia multipunctata*
 Spotted Snakehead → *Channa argus* / → *Channa pleurophthalmia* / → *Channa punctata*
 Spotted sorubim → *Pseudoplatystoma corruscans*
 Spotted Spiny-eel → *Macrogynathus pancalus*
 Spotted Squeaker → *Synodontis nigromaculatus*
 Spotted steed → *Hemibarbus maculatus*
 Spotted sucker → *Minytrema melanops*
 Spotted sunfish → *Lepomis punctatus*
 Spotted Synodontis → *Synodontis notatus*
 Spotted Talking Catfish → *Agamyxis pectinifrons*
 Spotted tetra → *Copella nattereri*
 Spotted Thicklip Loach → *Triplophysa strauchii*
 Spotted tilapia → *Pelmatolapia mariae*
 Spotted Vicente Swordtail → *Xiphophorus hellerii*
 Spotted Woodcat → *Auchenipterichthys longimanus*
 Spottedneck Panchax → *Aplocheilichthys spilauchen*
 Spotted sail barb → *Puntius phutunio*
 Spotted tail Mosquitofish → *Pseudoxiphophorus bimaculatus*
 Spratellid → *Barbodes*
Spratellomorpha Bertin, 1946
 (CLUPEIDAE>Ehiravinae)
Spratellomorpha bialalis (Bertin, 1940) "twofin round herring / East African Round Herring"
 Spraying Characin → *Copella arnoldi*
 Springende harder → *Chelon saliens*
 Spuit(karper)zalm → *Copella arnoldi*
Squalalburnus → *Alburnoides* / → *Alburnus*

AQUARIA.

Si les réservoirs à poissons, comme ceux que nous avons indiqués, peuvent rendre les plus grands services en permettant d'élever en stabulation certaines espèces de poissons, il en est d'autres qui n'ont pas une utilité moins grande pour la science et ont en outre l'avantage d'initier le public à des scènes de la vie animale qui piquent singulièrement sa curiosité ; nous voulons parler des *Aquaria* dont le goût nous vient, comme on sait, de l'Angleterre, où plusieurs personnes se disputent le mérite de leur invention (1). Aux diverses expositions qui se sont succédé à Arcachon, à Boulogne-sur-Mer, à Paris et au Havre, on a pu voir des *Aquaria* très-remarquables, qui constituaient une des grandes attractions de ces expositions et de beaucoup supérieurs à ceux qui existent depuis plusieurs années en Angleterre et en Belgique : mais si ces établissements ont présenté, sur certains points, une supériorité réelle sur le premier *Aquarium* établi en France, au Jardin d'acclimatation du bois de Boulogne, il ne faut pas oublier que celui-ci a été le premier construit sur des proportions inusitées jusqu'alors, que ses successeurs ont profité des perfectionnements indiqués par sa pratique, et que plusieurs d'entre eux, par leur proximité de la mer, se sont trouvés dans des conditions bien plus favorables pour réunir les espèces les plus curieuses, mais aussi les plus délicates. Aucun d'eux cependant n'est aussi parfaitement adapté aux exigences de l'observation que l'*Aquarium* de Concarneau, spécialement créé en vue de favoriser les études d'histoire naturelle. Après avoir, à juste titre, excité l'admiration du public et du monde savant, l'*Aquarium* du bois de Boulogne a subi l'effet de l'inconstance de la mode ; mais il est encore celui dont les détails d'exécution ont été le plus soignés et le mieux aménagés pour l'étude (2).

(1) D'après Gosse, c'est M. Warrington qui eut le premier l'idée d'établir un *aquarium*.

(2) Viennot, *Curiosités de l'aquarium* (Bull. de la Soc. d'acclim., t. VIII,

APPENDIX: THE FRESHWATER AQUATIC HOBBY LITERATURE IN THE LOW COUNTRIES

In searching for fish names we read many publications, which contain very interesting information on the growth and change of the aquatic hobby in the Netherlands and Flanders during the last century.

In the Netherlands

In the Netherlands the keeping of an aquarium started, after some initial acquaintance in the late nineteenth century (anonymous 1857, Roßmäßler 1872, Heimans 1897⁵¹). We already have mentioned the beginning of the keeping of aquaria (paragraph 1.5) and reported some interesting early articles on the Dutch aquarium hobby (paragraph 1.5.1).

The Dutch aquarium hobby began to flourish before the First World War following the success of the hobby in Germany (Hohl 2001, Hohl 2011)⁵², in America (Klee 2003) and in the Russian Empire⁵³ [out of the late 19th century acclimatization societies (*Russische Gesellschaft für die Akklimatisation der Tiere und Pflanzen*) some aquarium societies were founded, in Moscow (*Société des amateurs des aquariums et des terrariums / Gesellschaft für Aquarien- und Terrarienfreunde* in 1899, later (in 1905) changed to the *Moskauer Gesellschaft der Aquarien- und Zimmerpflanzenkunde*), but also in Saint-Petersburg, Kiev, Riga and Odessa (Depp 1897). Slowly some collaboration among the Russian aquarists emerged under the guidance of N. F. Zolotnitsky (also seen as Solotnizkiy, 1851-1920) and from 1905 on there was already the famous fish breeding facility of Leo Sheljuzhko].

The popularisation of the hobby in the Dutch speaking countries occurred more or less in the same way as it did in some other countries, for instance in the Ukraine⁵⁴, the Czech state⁵⁵ (the Czech aquarium hobby already started at the end of the 19th century!), Australia⁵⁶ and Poland⁵⁷. The expansion of the hobby in the Dutch speaking countries also resembles the revival of the aquarium hobby in France, where the aquarium hobby became less popular at the end of the 19th century⁵⁸.

In the beginning it was a new pastime for wealthy people. At the end of the 19th century naturalists gradually developed a desire to admire and study the underwater world (“to obtain direct information from Dame Nature’s open volumes”) and that could be done with the help of an aquarium⁵⁹.

After some articles dealing with the aquarium and its fishes in various periodicals (see paragraph 1.5.1 for some references), the first Dutch aquarium book was written by the primary school teacher *C. J. den Hollander* (living in Nieuwaal near Zaltbommel, one of the first Dutch aquarium hobbyists) and published in 1900.

Dagblad van Zuidholland en 's Gravenhage 4 Oct. 1862:

— In Engeland zijn de schoone en belangwekkende vischen en plantenkommen (*aquaria*) altijd nog aan de orde van den dag. Zekere heer Gosse berigt omtrent den aanleg dier kommen het volgende: Wanneer wij van een *aquarium* spreken, dan bedoelen wij daarmede eene kom, die acht tot dertig gallonnen (van 4 1/2 kan) water bevat. De heer G. beschrijft zijne grootere kom, als hebbende 2 voet lengte bij 18 duim wijde en even zoo veel duimen diepte met ruim twintig gallonnen inhoud. Is de kom gereed en schoon gemaakt, doordien men haar weken lang dan eens gevuld, dan weder geledigd heeft en haar aan de zon heeft blootgesteld, zoodat alle kalk, olie, vernis, looistof geheel verwijderd zijn, dan moet men het eerst den bodem in orde brengen en beplanten. Eenige ruwe brokken steen, vrij van ijzer en andere metalen, welke het water onzuiver maken, kunnen met cement tot eene boog gebouwd of naar keus op de eene of andere wijze opgehoopt worden. De bodem moet geheel uit lei of uit goed uitgewasschene kleine kiezelsteenen bestaan. Gewoon wit zand, zoo lang uitgewasschen tot dat het water geheel helder daarvan afloopt, is eveneens voor den bodem geschikt. Klei- of gewone plantenaarde is voor waterplanten niet noodig en eer schadelijk dan nuttig, daar zij gedurende eenigen tijd het menigvuldige ververschen van het water vereischt, ten einde de oplosbare stoffen te verwijderen en den groei van conferven en van andere gemeene, schadelijke plantensoorten bevordert. Men heeft bevonden, dat waterplanten van allerlei soort, wanneer hare wortels slechts bedekt worden, in kiezelsteenen van zelve wortel schieten en bloeijen. De planten moeten zorgvuldig van alle doode deelen gezuiverd, de wortels aan een kleinen steen bevestigd of op den bodem gelegd en met eene laag kiezel en zand bedekt worden. Is de bodem beplant, dan moet het water door middel van een gieter of langs de wanden in den vijver gegoten worden, ten einde iedere hevige beweging van den bodem te vermijden. Het water moet zuiver en helder zijn. Rivierwater is het beste; bronwater is ook goed, maar moet eenige dagen voor dat men de visschen in het *aquarium* doet, door de planten minder hard worden gemaakt. Zonneschijn is in alle jaargetijden goed voor het *aquarium*, doch wordt meer vereischt voor *aquaria* van bron- dan van rivierwater. De hoeveelheid door de planten ontwikkelde zuurstof en de groei en de dartelheid der visschen, die daarvan het gevolg is, is veel grooter zoolang de zon daarop schijnt. Bij het kiezen der planten voor het *aquarium* moet men op de hoeveelheid zuurstof letten, welke zij ontwikkelen, zomede op hare duurzaamheid en schoonheid. Als zoodanige waterplanten worden meestal gebruikt, *Callitriche*, *Vallisneria*, *Ranunculus aquatilis*, *Hydrocharis* en *Alisma*, als vischsoorten en levende waterbewoners de *Cyprinidae*, de *Cyprinus gibelio* (karper) de *Cyprinus ruratus* (goudvisch) de *Cyprinus phoxinus*. Voor eene kom van 12 gallon worden gebezigd drie goudvisschen drie karpers, twee baarzen, vier groote smerlijnen, zes bleijen, verscheidene slakken, waterkevers, waterspinnen en salamanders. Alles zal nu wel goed gaan en het water helder blijven; doch wanneer de vijver eenige weken gestaan heeft, dan vertoont zich aan den binnenwand van het glas een groen bekleedsel, dat zich weldra uitbreidt en het zien der visschen en planten belemmert. Dit bekleedsel ontstaat door den groei van eene kleine confervenplant, die men moet vernietigen. Daartoe is de slak het natuurlijke tegengemiddel, daar zij weldra alle zoodanige schadelijke stoffen uitroeit. Slakken klampen zich aan de wanden vast en beletten den groei dier planten. De *Lymnea* is daaronder de heilzaamste, maar ongelukkigerwijze vreet zij daarbij gaten in de jonge takken der grootere planten. Aan eenige andere soort van slakken kan met dit verwijt niet doen; de *Planorbis* en *Planorbis* zijn de eenige, waarop men kan vertrouwen. Zij zullen den groei van schadelijke planten spoedig beletten. Ten einde de helderheid van het water te behouden kan men eenige schelpdieren in het zand laten woelen. Met deze voorzorgen zal eene goed geslepen kom de oorspronkelijke reinheid langen tijd behouden.

HET AQUARIUM.

Gekomen zijnde aan de visschen, geschikt voor het Aquarium en welke niet in Nederland voorkomen, begin ik met de Japansche goudvisschen. Reeds sedert duizenden jaren houden de Japannezen en de Chineezen deze visschen in hunne aquariums en vijvers.

De vorm dezer waterbewoners wijkt vrij wat af van de gewone goudvisschen. De lichaamsvorm is zeer gedrongen en de buik verbazend dik, terwijl de staart dikwijls waaiervormig is. Bovendien komen nog zeer eigenaardige en fraaie afwijkingen voor, als: de Japansche goudvisch met een staart, die als een sluier neerhangt, en de Telescoop-visch, die zich onderscheidt door zijn groote, tamelijk ver uit den kop te voorschijn tredende oogen. De staart van deze laatste vischsoort is waaiervormig.

Deze visschen zijn werkelijk sieraden van een aquarium en sterk genoeg om lang in het leven te worden gehouden. De kleur van bovengenoemde visschen is rood, silver of melkachtig, soms wit-rood gevlekt.

Wanneer men boven beschreven visschen bij een naturalien-handelaar bestelt, versuime men niet tevens op te geven een paar Chineesche Macro-poden. Als aquarium-bewoners staan dese allerfraaiste visschen bovenaan.

Hunne schubben hebben een schoonen paarlemoerachtigen glans, terwijl het geheele lichaam is bedekt met blauwe en roodschtige strepen, verticaal loopend.

*) Zie *Het N. v. d. D.* van 29. Mei.

Aquarium shops

In The Hague, *Abbondio Benedictus Sciarone* started an aquarium factory in 1896 (*Eerste Nederlandsche Fabriek van Aquariums* producing aquaria for the living room, so called “kamer-aquarium”) and sold all kinds of aquarium and terrarium supplies (at least until 1924 under the name *A. P. A. Sciarone*, afterwards moved to the Molenstraat 67, where the owner lived until 1942).

Aquarium societies

At the very beginning of the 20th century many natural history societies were active in the big cities (Amsterdam, The Hague, Leiden, Haarlem, Groningen, Rotterdam, Gouda, Schoonhoven, Utrecht). In 1901 all societies including the Belgian society *Kruidkundig Genootschap Dodonaea* (established in Gent), joined their forces in the *Nederlandsche Natuurhistorische Vereeniging*. This young organization organized their first national show ("Biologische tentoonstelling") from 19 till 28 June 1905 and there were already many aquaria on display⁶³. But gradually the need arose for specialized societies.

NA DE BIOLOGISCHE TENTOONSTELLING.

't Is al weer voorbij, maar nog lang niet vergeten. Niet bij de ontwerpers en uitvoerders, niet bij de bezoekers. Hoe moeilijk het geweest is, dat weten maar weinigen; hoe mooi het was, gelukkig heel velen. Zoo velen, dat het in getal niet is op te geven, in elk geval zijn het duizenden. Om 't banaal te zeggen: onze tentoonstelling had een verbaasd, haast verbluffend succes.

Nu hier gaan vertellen, wat er te zien en te genieten viel, treft heelemaal geen doel. De geschiedenis van de Biologische kennen onze lezers; dat het plan zoo spoedig en zoo goed tot uitvoering kwam, danken wij aan de jonge, krachtige Natuurhistorische Vereeniging en speciaal aan de Amsterdamsche Afdeling.

Moesten we namen noemen van hen, aan wie voor de uitvoering vooral dank moet worden gebracht, dan zouden we, op gevaar af ondankbaar te zijn, willen vermelden de twee mannen, die zich ontzaglijk veel tijd en moeite hebben getroost in deze voor het heel comité zoo drukke dagen. Het zijn onze J. Jaspers jr. en Dr. J. Th. Oudemans; de overige leden Dr. Heinsius, Dr. Kerbert, Heukels, en o. g. t. niet te na gesproken.

Jaspers was het tenminste nog aan zich verplicht, zijn beste beentje vóór te zetten, want hij behoorde met de beide tegenwoordige redacteurs en Dr. C. Kerbert

tot de oorspronkelijke ontwerpers, hij heeft al vijf jaar geleden heele afleveringen van *D. L. N.* er vol over geschreven; het was voor hem een eerezaak dat de Biologische Tentoonstelling slagen zou. Dr. Oudemans heeft 't vooral in de laatste dagen vóór en in de eerste dagen na de opening van de tentoonstelling benauwend gehad. 't Was Oudemans hier en Oudemans dort en Oudemans überall. Met bewonderenswaardige kalmte en veel overleg heeft hij de honderden inzendingen, die als een stormwind, vrijwel plotseling, zowat alle tegelijk kwamen opzetten, op hun plaats gekregen, en niemand heeft hem ook maar één keer boos of knorrig zien kijken, zelfs niet als hij door tien inzenders te gelijk werd aangeklampt om dit en dat en nog wat anders.

Eén ding heeft het welslagen sterk in de hand gewerkt, dat was, dat het Genootschap N. A. M., het onvolprezene, meedeed; zonder geld is zo iets niet klaar te krijgen, maar ook niet zonder mannetjes; en mannetjes, vele en flinke mannetjes, heeft „Artis“, of laten we nu maar eens voluit zeggen Dr. Kerbert, de tentoonstellingszaal ingestuurd, bij zwermen. Dat zijn de Kaboutertjes geweest, die in twee, drie dagen den boel op pooten hebben getooverd; Pieters, Fijnbeek en ik weet niet hoe ze meer heeten, je had ze moeten zien werken! Een krijtschetsje op den grond van de zaal, een woordje over 't plan — en als je uit school kwam om te beginnen, was 't al drie kwart klaar. „F., daar heb je een scheepsplading ongeschild hout; een

The first aquatic societies (also known by the name aquarium society, aquarist's society or aquarist society; we will use the name **aquarium society**, although among the society members there were probably many terrarium hobbyists) were formed in Rotterdam (*Antoni van Leeuwenhoek, Vereeniging van Aquarium- en Terrariumliefhebbers*⁶⁴, Feb. 1908 – 1914) and Amsterdam (*Triton, Vereeniging tot bevordering der Aquarium- en Terrariumkunde*, founded 10 November 1908⁶⁵; maybe named after one of the first aquatic societies in the world: *Triton Berlin* 1888 – 2015).

Triton.

Op de vergadering dezer vereeniging tot bevordering van Aquarium- en Terrariumkunde van Zaterdag-avond, meldt de heer C. H. F. Voorwalt, penningmeester van Triton, een voordracht over de inrichting van een Zoetwater-aquarium.

Na in korte en klare woorden te hebben uiteengezet, wat een aquarium is en een overzicht te hebben gegeven van het verleden der aquariumliefhebberij hier te lande, oelde hij mede hoe een deugdelijk aquarium, meer speciaal een zoetwater-aquarium, moet zijn ingericht. Hij behandelde voorts de verschillende bestanddeelen ervan, eerst de levenlooze, dan de levende, en deed staaltjes van gene en exemplaren van deze rondgaan ter bezichtiging. Dit wekte veel belangstelling, doch deze nam nog toe, toen de heer V. een aquarium geheel gereed maakte in ongeveer een kwartier tijds. Ten slotte beantwoordde de heer V. verschillende vragen, betreffende het zoetwater-aquarium, tot volkomen bevrediging der weetgierigen.

Met warm applaus werd spreker gedankt en gehuldigd.

⁶³ Heimans, E. 1905, Na de biologische tentoonstelling. *De Levende Natuur*, **10** (4/5): 89-90.

⁶⁴ Pronk, L. S. 1909, Vereeniging van Aquarium- en Terrariumliefhebbers te Rotterdam. *De Levende Natuur*, **14** (1): 20; Adressentafel der Vereine 1909. *Blätter für Aquarien- und Terrarienkunde*, **20** (45): 732.

⁶⁵ [F. M. Lurasco] 1908, Statuten en Huishoudelijk Reglement van "Triton", Vereeniging ter bevordering der Aquarium- en Terrariumkunde te Amsterdam. *De Levende Natuur*, **13** (9): 178-179; Adressentafel der Vereine 1909. *Blätter für Aquarien- und Terrarienkunde*, **20** (44): 712.

Also in 1908 the first national organization was founded, the *AA BB CC* or *Algemene Aquarium Bezitters Bond Cyprinus Carpio*⁶⁶ (in 1910 this organization had already 169 members), in 1916 succeeded by the *B.A.N.* or *Bond van Aquariumhouders in Nederland*, also known as *Bond van Aquarium- en terrarium-liefhebbers in Nederland*. The driving force behind this was *A. van Essen*, chairman of the aquarium society *Natuurgenot*, Rotterdam.

In the beginning the pioneering aquarists (already about a hundred in 1909!) and the newly founded aquarium societies tried to help each other with supplies and information. At the beginning of the 20th century the aquarists were mostly keeping coldwater fishes, but already in 1909 quite a few subtropical and tropical fishes were being kept in Dutch aquaria. The livestock and supplies were mainly bought in Germany⁶⁷.

In 1909 the first 'aquarium' periodical appeared (*Ons Eigen Blad, Tijdschrift door en voor Aquarium- en Terrariumhouders*) by the hand of another pioneer *J. H. M. E. (Ernst) Gadiot* (who also started an aquarium society in Sittard). Sadly he passed away in Sept. 1913, which also meant the end of the *AA BB CC*.

So from 1909 on, the aquarists could read a national journal dealing with their hobby.

Besides this first aquarium journal, aquarists could read interesting articles in the journals *De Levende Natuur* and *De Tropische Natuur* (see paragraph 1.5.1 for many references).

In 1911⁶⁸, besides in Amsterdam (now two societies, the second society was *Danio Rerio*) and Rotterdam (also with a second society called *de Exotische Club*), there were thriving aquarium societies in Amersfoort (*Amersfoortse Aquarium- en Terrariumvereniging*), in Sittard (*Vallisneria*), in Antwerp (see further for Flanders) and in Tilburg (*Tilburgsche Aquarium- en Terrarium-Vereeniging*; later called *Rasbora*)⁶⁹.

Amongst the pioneers were, besides both men already mentioned, *L. A. Butôt* (notary in Amsterdam; active as aquarist at least till 1935) and *Wilhelmus Johannes Marinus (Willem) Deutz* (22 Aug. 1882-1968)⁷⁰.

⁶⁶ [Gadiot] 1909. *Blätter für Aquarien- und Terrarienkunde*, **20** (46): 748; Adressentafel der Vereine 1909. *Blätter für Aquarien- und Terrarienkunde*, **20** (50): 812.

⁶⁷ Some well known German firms were: Olaf Andersen (Berlin), Paul Stieler (Berlin), Reichelt's Tierexport (Berlin), Vereinigte Zierfisch-Züchtereien (Conradshöhe), Alwin Weinoldt (Berlin), A. Glaschker (Leipzig), Arthur Mühlner (Leipzig), Wilhelm Krause (Krefeld), Otto Ulmer (Stuttgart). Other important firms were *Esportazione Pesci e Reptili* (Bologna, Italy) and *A. Hipp* (Saint Petersburg, Russia). See also the *Geschäftlicher Wegweiser in Jahrbuch für Aquarien- und Terrarienfrende II. Jahrgang 1906*, Verlag von Hans Schultze, Dresden, DE, pp. 110-116.

⁶⁸ There is an interesting article of J. Pellegrin about the aquaria of the Dutch family de Visser living in Paris in 1911, *Bulletin de la Société nationale d'Acclimatation de France*, **58**: 502-509.

⁶⁹ Mandée, R. 1910, Vereine in *Jahrbuch für Aquarien- und Terrarienfrende VI Jahrgang*, 133-142.

⁷⁰ Bot, M. 1963, Bij een afscheid. *Het Aquarium*, **33**: 199-200; Bot, M. 1968, In memoriam W. J. M. Deutz. *Het Aquarium*, **39**: 24.

„ONS EIGEN BLAD”.

De titel van ons maandschrift behoeft wel geene verdediging. Het is geschreven uitsluitend voor aquarium- en terrariumhouders en de samenstellers zijn dit voor het meerendeel ook.

De belangen en der lezers en der schrijvers zijn dezelfde.

De hoofdbedoeling bij de uitgave van ons tijdschrift was het bevorderen der aquarium- en terrariumkunde in het algemeen en dit wel voornamelijk door beginnenden zooveel mogelijk den weg te wijzen.

Niets staat zoo zeer de uitbreiding eener liefhebberij in den weg als wel tegenslag in den aanvang.

De beginneling immers, die reeds terstond met moeielijkheden te kampen krijgt, al spruit dit ook meestal voort uit algeheele onbekendheid met de levensvoorwaarden der door hem gehouden dieren, wijt dit niet aan de minder doelmatige behandeling, maar aan de zaak zelve en is voor de liefhebberij niet alleen verloren en niet lichtelijk tot verdere proefneming over te halen, maar zal ook tevens anderen afschrikken door het verhaal van al zijn tegenslagen, onbewust als hij is, dat deze het gevolg zijner misslagen waren.

Voorlichting van den beginner is dus het eerst noodige. Maar daarmede alleen kan niet volstaan worden. Ook den weg dient hem gewezen, afwisseling te verkrijgen. Eentoonigheid doodt iedere belangstelling.

Langzamerhand zal de zoo meergevorderde behoefte gevoelen zijn aquarium of terrarium met meer zeldzame dieren, dieren die andere, soms hoogere eischen stellen, te bevullen. Hij zal willen voorgelicht worden omtrent hunne behandeling, weten waar hij zich deze verschaffen kan.

Deze driedubbele taak zal „Ons Eigen Blad” trachten te vervullen.

Aan onze Lezers.

Nu het 2de nummer verschijnt is het niet ondienstig, misschien zelfs noodig, een woordje vooraf te laten gaan omtrent de ontvangst „Ons eigen Blad” ten deel gevallen.

De ontvangst is geweest, het was te voorzien, gelijk aan die van vele tijdschriften bij hun eerste verschijning, geen onverschillige, doch ook geen, die aan de gekoesterde verwachtingen geheel voldeed.

Betrekkelijk is de belangstelling voor de uitgave „groot” geweest, maar „groot” was niet het aantal belangstellenden, dit had „groot” moeten zijn.

Redenen om te weklagen bestaan er niet, maar om te juichen evenmin. Dankbaarheid is mogelijk, zonder dat men geheel voldaan zij.

„Ons eigen Blad” is geen „dood geboren” geweest; het is ook geen „zwakkeling”, die den dag van morgen niet beleven zal, maar een „stevige bengel” is het ook nog niet.

De kracht om stevig op de been te komen en te kunnen blijven dient nog bijgebracht.

Daartoe is medewerking der lezers noodig en een warmere belangstelling. Belangstelling niet van hier of daar alléén, maar van overal; belangstelling niet van eenigen, maar van allen in geheel Nederland, die met „Ons eigen Blad” tot doel hebben: bevordering der Aquarium- en Terrariumkunde, uitbreiding der liefhebberij.

Eerst dan, wanneer ieder aquarium- of terrariumhouder in Nederland tot onze lezers zal behooren, dan eerst zal „O. E. Bl.” aan zijn doel kunnen beantwoorden en zullen dan ook de lezers met volle recht het blad als „hun” orgaan kunnen beschouwen.

Het worde spoedig zoo.

— G. B. Uitgeverster van het Nederlandsch tijdschrift van aquarium- en terrariumkunde, **Ons eigen blad**, is de stoomdrukkerij „Floralia” te Assen. Een goed adres voor aquarium- en terrariumdieren, mitsgaders planten, is Hanselman, Vlaggemanskade alhier. Wilt ge kostbare dieren hebben, schrijft dan aan Scholze und Poetschko te Berlijn, aan Carl Ziegelkow te Hamburg, of aan de firma Glaschker te Leipzig, maar bedenk dat er aan importeren immer risico verbonden is, alleen al omdat men niet ziet wat men koopt en het geld vooruit moet worden betaald.

OPENING
DER
Permanente Tentoonstelling
VAN DE
**Exotische Club van Aquarium-
en Terrariumliefhebbers**
TE ROTTERDAM.

De tentoonstelling omvat eene uitgebreide collectie Siervisschen van de meest uiteenlopende soorten, waarvan vele met nateelt. De verwarmingsinrichting is zeer practisch en de minst kostbare met totale uitsluiting van reuk en brandgevaar. Complete Patent-Doorluchting van de Firma Kindel & Stössel, Berlin, steeds in werking. De Firma A. Glaschker, Leipzig 25/1, exposeert eenige „Thermocons-Aquaria”, geheel van Glas met Petroleum-Gas-Verwarming. Deze Thermocons — een sieraad in de huiskamer — zijn bij voorkeur geschikt voor Liefhebbers, welke slechts eene beperkte collectie Siervisschen verplegen. Glaschker's nieuw verwarmbaar Aquarium „Thermoplan” van allerpractische vinding, wordt binnenkort geëxposeerd. Het bezoek der tentoonstelling wordt ieder aanvangend liefhebber dringend aanbevolen. Toegangsvrijkaart wordt op schriftelijke aanvraag met 5-cts. postzegel voor antwoord toegezonden door

F. GROENEVELD,
3 v. Oldenbarneveldstraat 19^b, Rotterdam.
ZEGT HET VOORT.

More aquarium shops

In Rotterdam the naturalist *Teun Hanselman* (1851 – 1922) already started selling goldfish in 1906 (Vlaggemanskade 81; his enterprise expanded into a well known import firm *H. Hanselman*, Bergweg 210, led by his son *Hendrik Hanselman* (? – 1940); still in existence after the Second World War, located at Zwaanshals 338) and more shops were soon to be opened to supply the aquarists with their needs.

Shop news in Amsterdam 4 August 1911:

WINKELNIEUWS.

Voor aquariumliefhebbers.

De bekende aquarium-liefhebbers, de heeren Gebrs. Voorwalt, hebben in den tuin van het perceel Ceintuurbaan 290 een inrichting laten bouwen, waarin een dozijn beton-bassius zijn aangebracht als teeltplaats voor exotische aquaria-vischsoorten. Zij hebben tevens een handelszaak geopend, waar naturalien voor aquarium en terrarium zijn te verkrijgen. Het is de eerste natuurhistorische inrichting in Nederland, die eigen kweekplaatsen heeft. Een zeer fraaie collectie van de meest zeldzame vischjes zijn er te bezichtigen in aquaria en vitrines.

30 April 1914:

De Verjaardag van Prinses Juliana.

Als verjaargeschenken ontving Prinses Juliana, naar de „Res.” verneemt, van H. M. de Koningin o.m. een aquarium en een terrarium. H. M. had vooraf den heer A. B. Sciarone ten paleize ontboden om hem te raadplegen, welke planten en dieren het best in beide inrichtingen konden worden geplaatst.

Het aquarium bevat inlandsche waterplanten, goudvisschen, een steenkarper, zeelt, ruischvoorn, bittervoortjes, een grondel, alven, puitaal, watersalamanders, een Amerikaansche dwergmeerval, enz. In het terrarium, met kleine rotspartijen tusschen groene planten, vonden inlandsche zonhagedissen, muurhagedissen, Italiaansche smaragdhagedissen, kleine landschildpadden, boomkikvorschen, vuur- buikpadjes, hazelwormen enz., plaats.

Natuur-historische inrichting.

De liefhebberij voor het bestudeeren van de levende-natuur neemt meer en meer toe. Niet alleen onze jongens, die nog op de schoolbanken zitten, vermeien zich met hun aquarium of terrarium, ook de ouderen interesseeren er zich voor en onder alle standen groeit de belangstelling voor de onderhoudende natuur-historische wetenschap.

De heeren Gebroeders Voorwalt, alhier, voorheen uitsluitend amateurs hebben deze groeiende belangstelling opgemerkt en er hun voordeel medegedaan. Op den Ceintuurbaan 290, bij de Ferdinand Bolstraat hebben zij een Natuur-historische inrichting gevestigd, waar liefhebbers alles kunnen krijgen wat ze noodig hebben om hun aquariums of terrariums in te richten of aan te vullen en te verrijken.

De zaak, welke morgenavond wordt geopend, ziet er keurig netjes uit. Voor aan straat een smaakvol en practisch ingericht magazijn, met goed afgesloten hokjes voor het kruipend gedierte en bassius voor de siervisschen.

De heeren Voorwalt hebben hier een merkwaardige collectie — rijker dan die van Artis — van tropische en sub-tropische siervisschen, in 't geheel wel een 84 soorten, waarvan omstreeks 20 soorten levend barende visschen.

Merkwaardig zijn in deze rijke verzameling de prachtige Chineesche sluiervisschen, barbeelen uit Engelsch-Indië, een zwaarddragende visch, de levend berende snoek *Bellinosa Bellissanus*, de Sianesche strijd-visch, prachtig gekleurde paradijsvisschen, enz. Er zijn soorten bij, welke eerst sedert korten tijd bekend zijn geworden. Van het kruipend gedierte, slangen, hagedissen enz., zijn er omstreeks 30 soorten aanwezig, waaronder een kleine kaaiman en verscheidene slangen.

In het achterhuis is de kweekerij gevestigd, want de heeren Voorwalt voeren niet alleen siervisschen, reptielen, anfibrieën en waterplanten in, zij kweeken ze ook met groote zorgvuldigheid en met een liefde voor de natuur welke 't hun dikwijls moeite geeft afstand te doen van een met zorg gekweekt exemplaar.

Morgen wordt, zooals reeds gezegd, de nieuwe zaak geopend. Des avonds schitterend verlichte aquariums en het groote terrarium in de uitstalkast zal ongetwijfeld zeer de belangstelling van de voorbijgangers trekken.

At the beginning of the First World War there were already twelve aquarium societies distributed all over the country. Many aquarists needed, besides the information provided by the societies and through the reading of books and periodicals (see further for a listing), fishes, plants and equipment.

When the supplies from Germany became more difficult to get during the First World War⁷¹, *Willem Engels* established a shop in Apeldoorn in 1915, selling aquaria, fishes, plants and hobby equipment. He also started breeding exotic fishes. His shop, in the meantime moved to the Diezerstraat 107 Zwolle, became the first mail order aquarium shop with an extensive catalog, existing as a pet shop until 1927 (the company was continued as a fur processing shop).

⁷¹ For an overview of the already available aquarium animals and plants, see for instance the catalogue of Scholze & Pötzschke (Prachtkatalog 1909) or the various catalogues (1908, 1909, 1910, 1911 and especially the Weihnachten 1912 catalogue) of the Vereinigte Zierfisch-Züchtereien, Conradshöhe bei Tegel-Berlin (Berta Kuhnt); also published as a book, Stansch 1914.

IETS OVER DE ADEMHALING BIJ ANABAS SCANDENS.

In den derden jaargang van de *Tropische Natuur* vindt men op blz. 40 een artikel van de hand van den Heer J. SYBRANDI over de *Klimbaars* of *Anabas scandens*. Aan de zeer interessante bijzonderheden, welke dit artikel bevat, zou ik gaarne nog een en ander willen toevoegen. Vooraf echter wil ik den lezer verwittigen, dat ik ook enkele anatomische bijzonderheden moet aanroeren.

Men weet, dat de ademhaling bij de visschen plaats heeft door middel van een afwisselend openen en sluiten van mond- en kieuwholte, waardoor het water, dat in den mond binnendringt, door de kieuwspleten weer naar buiten geperst wordt.

Het mechanisme der ademhaling bij de visschen zullen we hier niet in bijzonderheden nagaan, maar ons beperken tot bovenstaande opmerking, er enkel nog op wijzende, wat trouwens algemeen bekend is, dat de kieuwademhaling der visschen tot gevolg heeft, dat deze dieren in normalen toestand enkel de in het water opgeloste zuurstof kunnen gebruiken, daar ze geen orgaan bezitten, dat zuurstof uit de lucht kan opnemen, zooals b.v. de longen bij de zoogdieren.

Toch zijn er visschen, die een klein gedeelte van hun leven buiten het water kunnen doorbrengen.

Sybrandi wrote about his visit to Amsterdam from the Dutch East-Indies in 1913:

Eenigen tijd later maakte ik toevallig kennis met den heer VOORWALT, die op de Ceintuurbaan een groote kweekerij heeft van exotische siervisschen. De kweekerij bestaat nog niet lang eerst 1½ jaar, maar ze is zeer modern ingericht en getuigt voor de ondernemingsgeest van den oprichter, want hoewel de liefhebberij voor 't kweken van siervisschen in ons land de laatste jaren zeer toegenomen is, getuige de oprichting eener vereeniging van Aquarium vrienden te Rotterdam, die er zelfs een eigen maandblad opnahoudt, heeft ze zich nog lang niet zoo ingeburgerd, als in Duitschland, waar reeds sedert verscheidene jaren dergelijke vereenigingen tot stand kwamen, en waar ook al verschillende grootte kweekerijen van siervisschen bestaan, die zeker even veel aftrek vinden als de kweekerijen van exotische bloemen en planten.

„Natuurgenot“.

De „Visscherij-Courant“ geeft thans een bijblad „Natuurgenot“, gewijd aan aquarium- en terrariumkunde. Als eerste van de reeks van medewerkers vinden we vermeld den heer L. A. Butôt, voorzitter der vereeniging tot bevordering der aquarium- en terrariumkunde „Triton“ alhier.

National organization

On 27 January 1918 the national organization *Bond van Vereenigingen van Aquarium- en Terrariumliefhebbers in Nederland* (already founded in 1915) was again revived by the following societies: *Natuurgenot* (Rotterdam, also founded in 1915), *Natuurgenot in Huis* (Schiedam), *de Natuur* (Vlaardingen), *Danio Rerio* (Amsterdam) and *Triton* (Amsterdam). This organization was led by chairman *A. van Essen* (Rotterdam), secretary *W. van der Most* (Schiedam) and treasurer *H. J. Thieller* (Breda).

Nieuwe Rotterdamse Courant Saturday

24 July 1920:

In het gebouw Amicitia aan den Goudsoerijweg alhier houdt de vereeniging van aquarium- en terrariumliefhebbers *Natuurgenot* gedurende enkele dagen een tentoonstelling van aquaria, terraria, insectaria enz. De vereeniging *Natuurgenot* is in 1915 opgericht; gedurende de eerste jaren van haar bestaan is het ledental gestadig aangegroeid en alles voor den wind gegaan. Doch daarna kwamen moeilijkheden en vooral de winter 1918—1919 was een hange tijd. Door gebrek aan verwarmingstoestellen stierven velen van de pleegkinderen der natuurliefhebbers, waar het gevolg van was, dat verschillende kweekers van vischen, insecten en planten den moed lieten zinken. Thans evenwel neemt de belangstelling weer toe; de tentoonstelling loert daarvan het bewijs.

Er is in Amicitia een belangwekkende verzameling bijeengebracht. Op lange tafels zijn de aquaria en terraria tentoongesteld en men ziet er onder deze, die een nauwlettende beschouwing zeer waard blijken. Natuurlijk is niet alles even belangrijk; sommige liefhebbers toonen meer liefhebberij dan kennis van zaken, maar over het algemeen is het tentoongestelde zeer bezienswaardig. In het bijzonder onderscheidt zich de inzending van den heer *G. van Kersen*, die 22 aquaria met tropische vischen ingezonden heeft. De heer *Van Kersen* is tot nog toe eigenlijk de eenige, die zich niet zomaar op goed geluk met de kruising van vischen bezig houdt, doch een op kennis en ervaring berustend stelsel toepast.

Belangwekkend zijn verder o.m. de sluierstaartvischen en in de afdeling der terraria, de wandelende takken.

Ter opulstering zijn opgezette vogels, twee in werking zijnde doorluchtingsapparaten, lantaarnplaatjes en instrumenten aan de tentoonstelling toegevoegd.

Aquarium- en terrariumliefhebbers.

Op initiatief van de Rotterdamsche Vereeniging „*Natuurgenot*” is een „*Bond van Vereenigingen van Aquarium- en Terrariumliefhebbers*” in Nederland opgericht. Het doel is: het verspreiden van kennis der natuurlijke historie, meer in het bijzonder die, welke betrekking heeft op de aquarium- en terrariumliefhebberij, onder hare leden, doch ook buiten den Bond; het steunen van pogingen, die kunnen leiden tot oplossing van natuurhistorische vraagstukken, het aanwenden van pogingen om terreinen, die uit een natuurhistorisch oogpunt belangrijk zijn te beschermen; het bevorderen van het onderling verkeer tusschen de beoefenaars van aquarium- en terrariumkunde.

Middelen zijn: het uitgeven van een Bondsorgaan, het houden van algemeene vergaderingen, in den regel met tentoonstellingen; het in stand brengen en onderhouden van eene natuurhistorische bibliotheek en van verzamelingen; het aankopen van betrekkingen met vereenigingen van overeenkomstigen aard, ook buiten Nederland, door het oprichten van een centrale kweekerij voor dieren en planten en door het uitloven van eereprijzen op tentoonstellingen of het op andere wijze steunen daarvan.

Als gewone en verspreide leden kunnen worden aangenomen alle personen, die den leeftijd van 18 jaren bereikt hebben.

De Bond werd opgericht door de heeren: *A. van Essen*, Rotterdam; *W. van der Most Sr.*, Schiedam; *J. F. de Soet*, Amsterdam; *B. D. Wijsma*, Amsterdam; *P. L. Buschmann*, Vlaardingen; *J. P. Dyjers*, Rotterdam; *H. J. Thieller*, Breda.

October 1922:

Haagsche Aquarium- en Terrarium-Vereeniging.

Voor Aquariumliefhebbers en belangstellenden geeft bovengenoemde vereeniging op Woensdag den 25sten October 's avonds om 8 uur een Openbare Cursusvergadering in het Nutszaaltje ingang Langebrug met als onderwerp: 1594a

„Het Aquariumleven”

door den Heer *J. GROENEVELD*, uit Scheveningen,

Ter demonstratie zullen verschillende buitenlandse vischen als Paradijsvischen (macropoden), Zwaartvischen (Hiphophoris helleri) Halvemaan-Visch (Pterophyllum Scalare) Zebra Vischsoorten e.a. aanwezig zijn. Entrée 10 cent. HET BESTUUR.

W. J. GERMING
Rembrandtstraat 20 - Rotterdam

The aquarium hobby grew steadily after 1920, gradually to become a hobby for everyone. On 1 October 1922 a new aquatic monthly periodical was published, the *Tijdschrift voor Aquarium- en Terrariumkunde*, starting with *Hermanus Johannes Thiellier* (Breda; 1884 – 1931) as editor, shortly afterwards succeeded by *W. J. M. Deutz & Marius den Outer* (a stenographer and famous inventor from Rotterdam, 1900 – 1985) and later on by *C. van Kersen*. This quite good looking magazine was filled with information for the hobbyist.

Trichogaster Lalius
(met 1 afbeelding)
door
H. J. THIELLIER.

't is altijd moeilijk om uit onze groote collectie visschen één bepaalde soort naar voren te brengen en vooral waar het hier geldt, ons eerste artikel in het nieuwe orgaan. Zoo is de keuze dan gevallen op bovengenoemd vischje, beter bekend onder den naam van dwerggurami, die met de kampvisch wel de kleinste, maar ook de meest gekleurde labyrintvisschen zijn.

Eerst in 1903 gelukte het Sjüve in Hamburg dit vischje uit Oost Indië te importeeren en was er ook hetzelfde jaar reeds nakweek van in Dresden. Een kleurbeschrijving van dit tot 4 à 5 cM. groot wordend vischje te geven is bijna niet mogelijk, maar hebben zij op een donkerrooden grond 12 à 13, schuin naar onder loopende metaalblauwe banden, terwijl de vinnen als bezaaid zijn met rood en blauwe stippe's bij het mannetje en deze bij het vrouwtje vrijwel ontbreken.

Daarbij bezit het mannetje aan de buikvin een prachtig mooie roode zoom, die het vrouwtje ook weer mist. Neemt daarbij nog bij het mannetje de in een punt uitloopende rugvin, die bij het vrouwtje

afgerond is, dan is het geslachtsonderscheid al heel gemakkelijk.

Denkt men nu voor beiden nog de prachtigst mooien glans over het lichaam, die men bedenken kan, dan is dit ontworpen beeld nog minstens 100 % beneden de werkelijkheid, als men tennijste goed soort voor heeft.

Een lastige eigenschap, waarmede men wel degelijk rekening moet houden, bestaat in de schuwheid van deze diertjes. Men kan dit echter vrij goed afwennen en wel door het aquarium heel min te beplanten, zoodat ze zich niet kunnen verschuilen.

Heeft men dit een paar maanden volgehouden dan is de schuwheid beslist verdwenen en storen zij zich niet meer aan kleine veranderingen in hunne omgeving.

En nu komt de fout die vele liefhebbers ten opzichte van dit vischje maken; het voelt zich thuis in het kleinste aquarium, neemt met alle voedsel genoeg etc. En hoewel dit laatste van minder belang is, daar een goed liefhebber toch steeds zooveel mogelijk variatie in voedsel brengt, zoo moet ik toch beslist afkeuren om, zooals velen doen, dit mooie vischje in een te klein aquarium onder te brengen.

Vooral bij de teelt heeft dit een grooten invloed op den groei der jongen en is dit oorzaak dat

From the start the *Tijdschrift voor Aquarium- en Terrariumkunde* was the official journal of the aquarium societies in Amsterdam (*Danio Rerio*, *Onderlinge Aquarium- en Terrariumclub De Argus* and *Amsterdamsche Vereeniging ter bevordering van Aquarium- en Terrariumkunde*), Dordrecht (*De Natuur*), The Hague (*De Natuurvriend* 1921 – the society later called *Scalare*) and Rotterdam (*De Natuur* 1921, chairman *W. J. M. Deutz*, – the society later called *De Bijzalm*).

Later on the journal was also enjoyed by hobbyists of for instance the *Eerste Utrechtse Aquarium-Club* and *Natuurgenot* both in Utrecht, *Guppyi* in Sneek, *Danio Rerio* in Delft (from 1 May 1919 up to the present!), *Natura* in Arnhem, V.A.T.I.L.⁷² or *Vereeniging van Aquarium-, Terrarium-, Insectarium-liefhebbers* in Enschede, *De Natuur* in Groningen, *Vivarium* in Eindhoven, *C. J. den Hollander* in Tilburg, *Amicitia* and *De Natuur* in Nijmegen and *De Natuurvriend* in Stadskanaal.

⁷² Höfer, G. 1923, Ausstellungsberichte. *Wochenschrift für Aquarien- und Terrarienkunde*, 20 (15): 234.

Around 1924, there were three aquarium societies in Amsterdam (*Amsterdamsche Vereeniging ter bevordering van Aquarium- en Terrariumkunde*, *Danio Rerio* and *Aquarium en Terrariumclub Ons Huis*), two in Rotterdam (*De Natuur* and *Natuurgenot*) and The Hague ('s Gravenhage: *De Natuurvriend* and *Vereeniging van Aquaria- en Terrarialiefhebbers Den Haag*), and one each in Arnhem (*Natura*), Delft (*Danio Rerio*), Dordrecht (*De Natuur*), Enschede (*V.A.T.I.L.*), Groningen (*De Natuur*), Utrecht (*Natuurgenot*) and Zwolle (*Acara*).

PSEUDO-XIPHOPHORUS BIMACULATUS
HOOR
G. van Kerssen.
Met 1 afbeelding.

Tegelijkertijd met de *Xiphophorus helleri* werd in 1909 de *Pseudo-xiphophorus bimaculatus* ingevoerd. Zijn vaderland is Mexico. Aan de bovenzijde is het lichaam olifkleurig, aan de onderkant zilverachtig glanzend. De scherp omrande schubben steken hier duidelijk op af. Het voorste buikgedeelte heeft een mooie lichtend groene kleur, waaraan een oranje-achtige vlek aan de kieuen mooi te voorschijn treedt. De vinnen, vooral de rugvin, zijn bruinrood gestreept, hetgeen nog meer uitkomt, als hij de vinnen uitzet, daar de rugvin tamelijk breed is. De teekening is dan net heel fijn kantwerk. De zwart-achtige vlek dicht achter de borstvinnen, alwaar de borstvinnen, alwaar die bij het begin van den staart, hebben de visch den naam *bimaculatus*, d. w. z. twee-

vlekkig, gegeven. Zijn gansche lichaamsvorm, alsook de groote copulatiepen, heeft hij gemeen met de *Gambusia*-soorten. Het is een levendbarende karpersoort; de naam *Pseudo-xiphophorus bimaculatus* betekent: schijn toegevevichte zwaarddrager. Hij heeft dan ook niet veel weg van een zwaarddrager, doch wel van de *Gambusia*-soorten; men noemt hem dan ook wel *Gambusia bimaculata*.

De jongen zijn bij de geboorte zeer groot, ongeveer 1½ c.M. Zij vallen niet, zoals bij de meeste levendbarende karpersoorten, naar den bodem, doch stijgen direct omhoog tusschen het groen. De natuur schijnt hier weer te hulp te komen, daar de jongen tusschen het drifgroen een goede schuilplaats vinden tegen de siechte gewoonte der oude visschen, hun aankomelingen op te eten. De jongen hebben een duidelijke dwarsstreep over het lichaam, welke bij de oudere dieren nog zwak te zien is, en vooral bij den kop duidelijke te voorschijn treedt, terwijl hij naar den staart toe lichter wordt. Tevens is de vlek bij den staart bij de jongen donkerder dan bij de ouden, terwijl het buikgedeelte bij de jongen rosachtig van kleur is.

For comparison, in the small nation Switzerland the national organization (VSAT, Verband schweizerischer Aquarien- und Terrarienevereine) originated from the cooperation of two societies⁷³ in 1924 (already expanded to nine societies in 1935⁷⁴). In the same year the first aquatic society was formed in Ljubljana (Slovenia; Cotič & Vrščaj (1988): 5).

In Great Britain there were also just two societies in 1924, the *British Aquarium Society* (London, founded in 1919) and the *British Aquarists' Association* (B.A.A., founded in 1924⁷⁵). In 1933 Australia followed suit with three societies (Roughley 1933:8). In Great Britain the main upsurge of interest in the aquarium hobby has been since 1945⁷⁶.

Soerabaia, 22 Augustus 1927.

Zeer geachte Heer Baars,

Ik kan niet palaten om U op deze wijze nogmaals mijn erkentelijkheid te betuigen voor Uwe hulp voor het inrichten van mijn zeeaquarium met ontalger, luchtpersapparaat, enz. en voor Uwe goede raadgevingen, ook wat de verzorging van mijn zoetwatervischjes betreft en waaraan ik mijn steeds toenemende belangstelling in mijn alleraardigste diertjes toeschrijf.

Wanneer al uwe proeven met zooveel succes worden be-
loond als Uw ontalger verdient, dan zal dat ook mij recht
veel genoegen doen.

Hoogachtend
Uw dw.
w. g. Tan Tjwie Sing.

A new nation-wide organization

On 16 March 1930 again a national aquatic organization was founded, the *N.B.A.* or the *Nederlandsche Bond van Aquariumhouders* (from 28 August 1931 officially known, by Royal Resolution, as the *Nederlandsche Bond van Aquariumverenigingen*) counting 275 members and this time to stay in business for a long time.

Among the first societies to join the *Nederlandsche Bond van Aquariumhouders* were: *Danio Rerio* (Amsterdam), *De Natuur* (Dordrecht), *Vivarium* (Eindhoven), *De Natuurvriend* (The Hague), *De Natuur* (Haarlem), *Natuurgenot* (Utrecht), *Eerste Utrechtsche Aquarium Club* (Utrecht) and *De Natuur* (Zutphen). As a partial result of the cooperation, the Bond published a new aquarium journal, *Het Aquarium*, to inform its members.

The hobby kept growing and by the end of 1930 twenty-five aquarium societies were in full swing⁷⁷.

In 1933 the *Bond* already counted more than a thousand members⁷⁸ and despite of (or thanks to ?) the Great Depression the hobby kept expanding.

After twelve years the journal *Tijdschrift voor Aquarium- en Terrariumkunde, Flora & Fauna* was united with *Het Aquarium* (and this magazine got as subtitle in November 1934: *Vereenigd met "Flora en Fauna" Maandblad voor Aquarium- en Terrariumkunde*). The latter aquarium journal is still being published today, so the publication of the early magazine (in 1922) was the beginning of almost hundred years of solid aquarium information.

I HET AQUARIUM

⁷⁷ For comparison, in Denmark there was just one aquarium society in 1931 (Kobenhavns Akvarieforening, already founded on 4 May 1915): *Unsere Aquarienliebhaberei im Ausland. Wochenschrift für Aquari- und Terrarienkunde*, **29** (28): 442.

⁷⁸ For comparison, a large country like France had about a thousand organized aquarists in 1934, *Revue des Aquariophiles de France*, **1** (1934) no. 5: II.

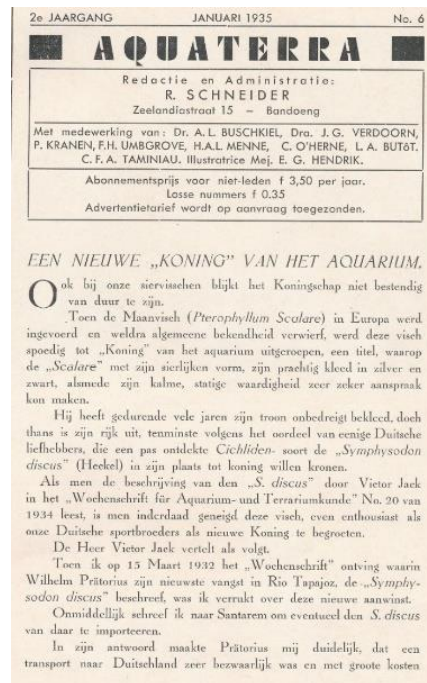

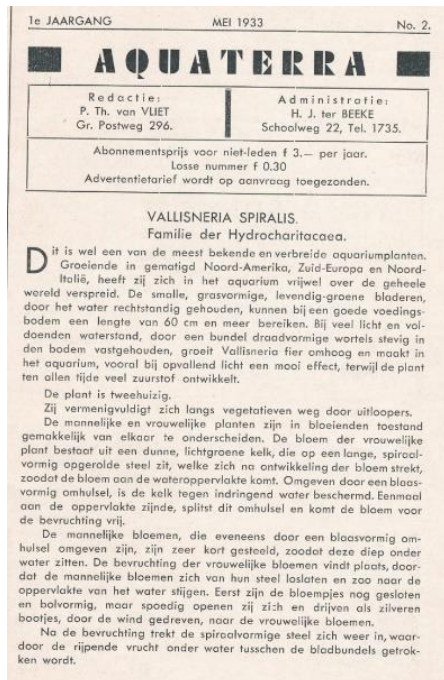

Many shops published their own guides to help people enjoying their fishes (and to minimise discouraging failures and decrease the mortality rate):

The national organization still exists today (now under the name *N.B.A.T.* or *Nederlandse Bond Aqua Terra*⁷⁹) with its own journal entitled *Het Aquarium*. The periodical *Het Aquarium* became an important source for all kind of hobby related information.

In September 1931 the journal got the subtitle *Officieel orgaan van den Ned. Bond van Aquariumhouders, tevens orgaan van de Ned. Oost-Indische Aq. & Terr. Ver. "Aquaterra" en van de Belgische Aquarium- en Terrarium Vereeniging "Scalara"* (the last name should have been *Scalare*, see further at Flanders).

In 1933 there also appeared an aquarium journal called *Aquaterra* in Batavia, Dutch East-Indies.

By October 1935 the society news (*Vereenigingsberichten*) of the following societies were to be found in the journal *Het Aquarium*: *de Nederlandsche Bond van Aquariumhouders* (although the name of the organization had already been changed!), *de Nederlandsche Oost-Indische Aquarium- en Terrarium Vereenigingen*, *de Nederlandsche West-Indische Aquarium Vereeniging "Carabia"*⁸⁰ and *de Belgische Aquarium- en Terrarium Vereenigingen*.

Henk van Laar (1898 – 1955) wrote some small books to inform the workers of a new hobby in the early thirties and especially the book he wrote with *Simon Broekhuizen* (1903 – 1971) in 1933, was one of the first modern looking "tropical aquarium" books published in the Netherlands, for that time full of information for the tropical fish hobbyist.

H. J. Kuijper and *H. van der Noort* together wrote the first "complete" aquarium book in 1932, *Siervisschen*, 292 pages with 24 coloured and 177 black & white pictures, providing information on all aspects of the freshwater aquarium hobby and all the fishes and plants available to the hobbyists. Later, after some problems with the publisher, they published their own version and justifiably called this a 'Handbook of aquarium and terrarium knowledge' (1935). *Kuijper* also started a professional aquarium fish hatchery and trade business.

The spelling of the Dutch language was slightly reformed in 1934. The new spelling "vis" could be used in stead of "visch" (this spelling reform was introduced by law in Flanders in 1946 and in The Netherlands in 1947).

⁷⁹ Vente, J. 2002, De geschiedenis van de aquariumliefhebberij in Nederland. *Het Aquarium*, 72: 11-16; 47-52; 83-87.

⁸⁰ On Aruba there were no serious aquarists yet: van de Weg, P. C. 1948, The Hobbyist in Aruba, Dutch West Indies. *The Aquarium*, 17 (10): 218.

 Roth. — „Die Krankheiten der Aquarienfische und ihre Bekämpfung”, (RM. 3,20).
Bibliothek für Aquarien- und Terrarienkunde. — Een verzameling van talrijke kleine boekjes, die afzonderlijk in den handel verkrijgbaar zijn tegen RM. 0,60 per stuk en waarvan de catalogus gratis op aanvraag verkrijgbaar is bij de firma Gustav Wenzel u. Sohn, Braunschweig.

¹⁾ Bij het ter perse gaan van dit boek bereikte ons het bericht, dat eveneens verschenen is:
 H. v. d. Noort en H. J. Kuijper. — „Siervissen”, Uitgave N.V. Holdert & Co., Amsterdam, 1932 (f 425).

Still more aquarium trade

Already in 1918, G. C. Holgen opened the first aquarium shop of The Hague (*Eerste Haagsche aquarium-huis*) located at the Vleerstraat, selling everything needed for the keeping of native and subtropical fishes.

The continuing growth of the aquarium hobby induced many more shops, particularly in the early thirties.

In Rotterdam there were, besides the already mentioned *Hanselman's Aquarium- en Vogelhandel* (Vlaggemanskade 81, subsequently moved to Bergweg 210 and Gerard Scholtestraat 61), *A. van Doorn* (van Heusdestraat 3), *Joh. Kreuk* (Westerbeekstraat 69), *S. W. Ph. van Meeteren* (Van Oldenbarneveltstraat 41), *A. P. Overwater* (Taanderstraat 49), *1^{ste} Rotterdamsche Tropische Siervisch-Kweekerij* (*J. Limburg*, Gouvernestraat 124, moved to Gaffeldwarsstraat 14), *W. L. van Seters* (Vlietstraat 62, moved to Gedempte Slaak 8), *Siervisch-Gebouw* (*W. J. Germing*, Rembrandtstraat 20), *Siervisschen* (*M. Boschman*, Zwart Janstraat 112^B), *K. Stoorvogel* (Veemarkt 32, moved to Vondelstraat 7^c).

Competing with shops in Amsterdam: *Algemeene Combinatie voor den Siervischhandel* (*J. Th. de Soet & Zn.*, van Ostadestraat 186; later by the name *Siervischhandel Van Ostade*), *Aquariumhuis* (*A. Holgen*, Oude Zijds Achterburgwal 195, moved to Rusland 27), *Aquariumhuis v/h P. J. Numan* (Jacob van Lennepstraat 202), *Aquariumhuis Van Oosten* (*D. van Oosten*, Heerenstraat 15, moved to Cabralstraat 30), *Aquariumhuis De Siervisch* (*A. J. Holgen*, Jacob van Lennepstraat 64), *C. H. Berkhoff* (Pijnackerstraat 30), *Black Molly* (Lutmastraat 189), *De Eerste Nederlandsche Natuur-Historische Vereeniging Gebr. Voorwalt* (Ceintuurbaan 131), *Gebr. Holgen* (Bethaniëndwarsstraat 20), *F. Holgen* (Grimburgwal 2), *J. Holgen* (Veerstraat 71), *Holgen's Aquariumhuis* (1^e Helmerstraat 249), *P. Leevendig* (Ten Katestraat 31), *Natuur-Historische Inrichting S. Coronel Jr.* (Linnaeuskade 14-16; and also at Lembangweg paal 3½, Bandoeng, Dutch East-Indies; later by the name *Siervisschen In- en Exporthandel Amsterdam*), *Natuur Historische Inrichting annex Eerste Nederl. Electr. Aquarium- en Terrariumfabriek* (*Joop Liet*, Leliegracht 48), *Rasbora* (*Fred. C. Swetter Jr.*, Wagenaarstraat 51), *W. H. Seket* (Tollensstraat 65, moved to Ten Katestraat 14-16), *W. J. H. Seket* (Jan Evertsenstraat 8), *Het Tropische Siervisschenhuis* (Albert Cuipstraat 203c).

L. S. Bij het aanschaffen van een aquarium, siervissen, waterplanten, hulpmiddelen zoals filters, luchtpompen, verwarmingsapparaten enz., wijzen wij U op onderstaande adressen, welke door hun jarenlange ervaring, grote sortering en bekende lage prijzen, ook U tot volle tevredenheid kunnen bedienen:

IMPORT **EXPORT**

Een luchtpompje dat 30—40 Watt stroom verbruikt, wordt bij regelmatig gebruik véél te duur. De goedkoopste van een dergelijk apparaat zit dan ook niet in de eerste plaats in de aanschaffingskosten, doch hoofdzakelijk in het stroomverbruik. Eén gulden meer aanschaffingskosten betaalt U maar éénmaal, te hoog stroomverbruik blijft U betalen zoolang U het pompje gebruikt.

Een „JUMBO” gebruikt slechts 2 Watt.
Een „MAGNETO” „ 3½ Watt en zelfs
de sterke „SONJA—BATO” 6 Watt.

Overtuigd U van het stroomverbruik, alvorens U een luchtpompje koopt. Met bovengenoemde merken houdt U een lage electriciteitsrekening. **Met garantie.**

Vraagt onze bijzonder lage prijzen voor celluloid buizen in alle maten.

Paraffinelampen moeten niet in de eerste plaats goedkoop, maar wel in de eerste plaats goed zijn. Een gesoldeerde Paraffinelamp b.v. is niet goed. Paraffinelampen moeten zijn van massief gedreven koper. Wij hebben thans 1000 stuks in bestelling. Vraagt de aanmerkelijk verlaagde prijzen!

ALLEEN VIA DEN HANDEL.

IM- EN EXPORHANDEL „JAVARO”
Tomatenstraat 233 - DEN HAAG - Telefoon 339727.
ALLES OP AQUARIUMGEBIED.

Regelmatig leverbaar DE ORIGINEELE „MAGNETO” AQUARIUM-DOORLICHTERS. Stroomverbruik slechts 2—3 watt.

And many shops in The Hague: *Aquariumhuis* (*G. C. Holgen*, Vleerstraat 48-50, moved to Prinsestraat 69-69a, and another shop at Weimarstraat 36), *Aquariumhuis A. Holgen* (Piet Heinstraat 31), *Aquariumhuis Scalare* (Copernicusstraat 211), *W. Beeuwkes* (Dennenweg 9c), *Flora en Fauna* (*C. A. van Puffelen*, Ammunitiehaven 98), *Landman's Vogel- en Aquariumhandel* (Koningstraat 34), *De Levende Natuur* (*J. H. Another magazine

In June 1935 another periodical **Aqua-Terra** was launched in the Netherlands by a group of hobbyists among whom was the great inspirator *W. J. M. Deutz*, who we mentioned before (he had left his boat and moved to Rottekade 127, Bergschenhoek). By the way, he also published some interesting articles on the history of the Dutch aquatic hobby⁸¹.

The aim of this magazine was to produce, in contrast to *Het Aquarium*, somewhat simpler articles just about keeping (and breeding) fishes and plants. The magazine also contributed a lot to the growth of the aquatic hobby.

ook voor vissen niet te missen!

P. SLUIS N.V., WEESPERKARSPEL

The steadily increase of the aquarium trade also gives a clear indication of the development and importance of the aquarium hobby.

As we noted before, at the beginning of the 20th century the few aquarists were mostly dependent on some animal shops in Germany for their aquatic supplies. In 1914 there were about fourteen pet shops in the Netherlands selling aquarium related animals, plants and equipment. In 1935 there were already more than two hundred goldfish-selling shops. Some of which, already listed above, were specialized aquarium shops selling a wide range of aquatic supplies⁸².

The hobby got another boost by the import of fishes from the Dutch East-Indies during the thirties (for instance by I. K. Berthold Dierenpark "Deli" Medan, Sumatra or by the import firm of Joop Liet (AIRFISH), Leliegracht 48, Amsterdam⁸³, after WOII located at the Argonautenstraat 63).

J. Sybrandi.

Aquariumliefhebbers!

Wanneer U met de Aquariumliefhebberij wilt beginnen, begeeft U dan niet naar den eersten den besten handelaar, ook al lijkt de opzet eener firma nog zo groots.

Laat U inlichten door een vakman!

Dit voorkomt teleurstellingen.

Als jarenlang aquariumbeoefenaar en als een der schrijvers van de boekwerken „Siervisschen“ en „Handboek voor Aquarium- en Terrariumkunde“, meen ik U een bewijs van vertrouwen te kunnen geven.

Ik lever alles op 't gebied van aquaria:

Aquariums, naar elk gewenst model

Benodigheden, op elk gebied

Visvoeder, zowel droog als levend

Inrichten en onderhoud van aquariums, aanleg van vijvers, enz.

Grote sortering siervissen, import en nakweek uit eigen kwekerij

Grote sortering waterplanten uit eigen cultuur

Daar de vissen natuurgetrouw in mijn verwarmde kassen ondergebracht zijn, is elke leverantie gegarandeerd.

Verlangt daarom eerst inlichtingen van H. J. Kuijper, naturalist van de

⁸² Voorwalt, F. H. 1976, De aquariumliefhebberij in Nederland voor de tweede wereldoorlog en nu. *Het Aquarium*, **47**: 172-176.

⁸³ Advertisement in *Wochenschrift für Aquarien- und Terrarienkunde*, **30** (22), 30 May 1933.

Already in their second year (1937), the periodical *Aqua-Terra* was accepted as the official journal of thirty aquarium societies.

In 1939 there were about 4,000 organized aquarium hobbyists.

The periodical *Aqua-Terra* gradually became the official journal of forty-two aquarium societies.

Most of these societies finally joined the *Bond*, but a few organized themselves during the Second World War under the name *Contact-commissie Aqua-Terra* on 15 December 1940.

This *Contact-commissie Aqua-Terra*, with the inspiring members *J. C. M. de Jong*, *M. Bot*, *J. H. Heskens*, *J. J. van der Horst* and *C. Tolmeyer*, did their best to inform the aquarists by publishing (during WOII!) their *Bibliotheek voor Aquarium- en Terrariumliefhebbers*, a series of small informative booklets by the name *Natuurvreugd*.

Due to the growing demand, many booklets were reprinted after the war.

After WWII

The Second World War nearly ruined the organized aquatic hobby, but the aquarists kept doing their best to publish some hobby information. Or with the words of W. T. Innes 1946⁸⁴: ‘all very good magazines in Europe except *Het Aquarium* in Holland have been bombed out or otherwise demolished’.

After WWII the two aquatic organizations merged on 12 May 1946 forming the *Nederlandse Bond Aqua Terra* with 62 societies and 3,140 members⁸⁵. From then on, the hobby flourished again. On 15 October 1948 there were already one hundred aquarium societies (for comparison: a large country like Sweden counted 45 societies and about 2,000 members in 1948⁸⁶, in Finland there were about a dozen societies with thousand members in 1952⁸⁷ and in South Africa there was one society⁸⁸). A directory of many aquarium societies in the world was given by Innes in March 1952 (*The Aquarium*, 21 (3): 75-82), and slightly extended in March 1953 (22 (3): 84-93; (4): 122).

By the time the Bond celebrated its 25th anniversary already 16,112 members had joined the organization⁸⁹. The aquatic hobby became very popular in the fifties⁹⁰ and sixties (at the end of the sixties the *Bond* had about 20,000 members).

In this period some excellent aquarium books were published, it was truly the Golden Age of aquatic literature in the Netherlands. Besides the various books written by *Kasper Werner* and *Jacobus Johannes Hoedeman* (1917 – 1982), the 15 volumes of the *Handboek voor de aquariumliefhebber*, written by various experts, were the best for information retrieval.

K. WERNER.

Also some great aquarium shows were held in that period⁹¹.

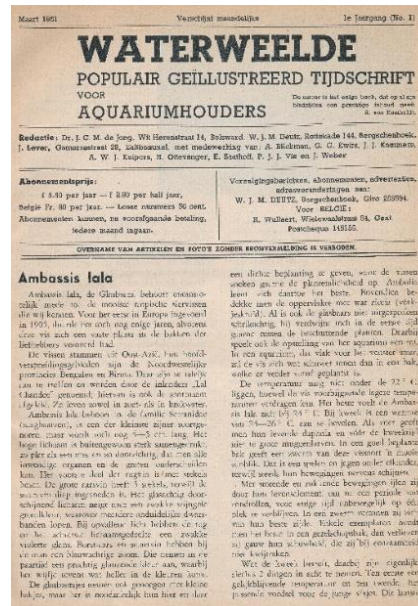

J. J. Hoedeman

In 1951 another periodical by the name *Waterweelde* appeared, edited by *J. C. M. de Jong*, *W. J. M. Deutz* & *J. Lever*. This monthly journal was chosen as the official journal by some aquarium societies (their organization was called the *Unie van Aquariumhouders* or *U.V.A.*, separated from the national *Bond* in Jan. 1951). The first issue (March 1951) had still the title printed as *Aqua-Terra* 11^e jaargang no. 1 on the cover, pointing to a continuation of the earlier published magazine *Aqua-Terra* (see above).

By April 1951 the 25th aquatic society had joined the *Unie*. The magazine⁹² endured until 1962, after which the remaining members of the *Unie* (re)joined the *N.B.A.T.*

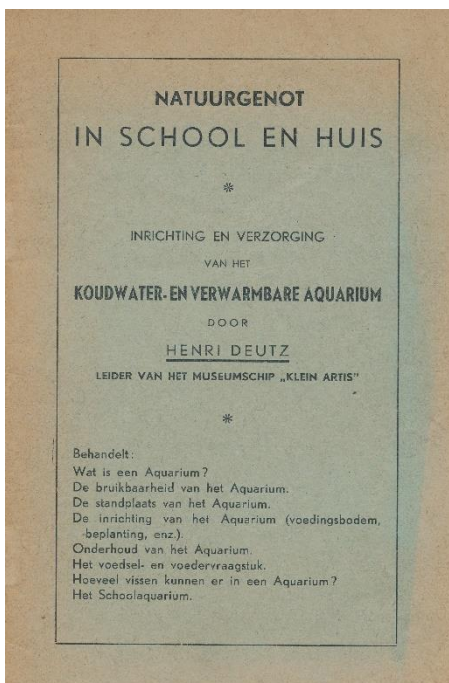

⁸⁴ The Editor's Letter 1946. *The Aquarium*, 15 (1): 13; see also Ter Horst, J. Th. 1945, Report from Holland. *The Aquarium*, 14 (7): 124.
⁸⁵ Dutch Letter 1946. *The Aquarium*, 15 (11): 204-205 [membership exaggerated]. Also two British aquatic journals were revived in 1946, which could with some difficulty be read in Holland: "The Aquarist and Pondkeeper" [beginning with 11 (1) April 1946] "Water Life and aquaria world" [beginning with 1 (1) (New Series) April 1946], see *The Aquarium*, 15 (10): 190-191.
⁸⁶ Steiger, M. 1948, Die Liebhaberei in Schweden. *Aquarium* (VSAT, Schweiz), 3 (3): 36. Also in Finland the aquarium hobby became important after the war: E. Sointu 1950, The Aquarium Hobby in Finland. *The Aquarium Journal*, 21(1): 18-19.
⁸⁷ Berghem, H. 1952, More news from Helsingfors. *Water Life and aquaria world*, 7 (6): 304.
⁸⁸ Rose, N. G. 1953, South Africa's rising interest in the hobby, *Water Life and aquaria world*, 8 (5): 253-255.
⁸⁹ Bot, M. 1955, Vijf en twintig jaar N. B. A. T. *Het Aquarium*, 26 (1): 5-7.
⁹⁰ Perry, F. 1949, Netherlands Progress. *Water Life and aquaria world*, 4 (2): 55-57; Veldhuizen, W. 1953, L'Aquariophilie en Hollande. *L'Aquarium et les Poissons*, 2 (12): 22-23; Géry, J. 1953, L'Aquariophilie en Hollande. *L'Aquarium et les Poissons*, 3 (32): 16-17.
⁹¹ Nichols, H. A. 1950, Aquarium show at the Hague, *The Fish Culturist*, 24 (5): 33-34.
⁹² Yates, R. 1957, Waterweelde. *The Aquarist and Pondkeeper*, 22 (1): 10.

Medewerkers.
 Wij wensen gaarne onze dank te betuigen aan de heren W. J. M. Deutz en M. Bor, voor de geestdrift, waarmee de allereerste opzet door hen werd ontvangen en de stimulerende kracht, die gedurende de moeilijke oorlogsjaren van hen uitging, bij het uitwerken van de gegevens;
 de heren Dr F. P. Koumans en Drs J. M. Lodewijks onze dank voor de spontane bereidheid, waarmee zij het geheel doorlezen en voor de raadgevingen en correcties, die zij nuttig achtten;
 de heren Prof. Dr L. F. de Beaufort, directeur van het Zoologisch Museum te Amsterdam, en Dr F. P. Koumans, conservator aan het Rijksmuseum voor Natuurlijke Historie te Leiden, danken wij ten zeerste voor hun welwillendheid een deel van de tekst te bewerken en tevens voor de medewerking, die wij ondervonden bij het ons ten dienste stellen van de bibliotheken van genoemde musea.
 Voorts onze dank aan de heer M. van Boord, die op zo voortreffelijke wijze de illustraties verzorgt en met veel interesse en hulpvaardigheid onze schetsen en tekeningen corrigeert en
 Drukkerij Gebr. den Oudsten te Lekkerkerk, voor de prima uitvoering en de grote welwillendheid, waarmee aan onze wensen wordt tegemoet gekomen.
 Tenslotte een woord van dank aan allen, die ons verder op enigerlei wijze bij het totstandkomen van deze uitgave behulpzaam zijn geweest.

Amsterdam, Mei 1947. J. J. HOEDEMAN.
 Bolsward, Dr J. C. M. DE JONG.

One person we also must mention is *Mari Henri (Harry) Deutz* (1910 – 19?; son of the famous *W. J. M. Deutz*, already encountered many times above). Living with his father on a houseboat he continued the work of the latter, who already sailed all over the country since 1924 (in the beginning accompanied by *Marius den Outer* organizing the 'De reizende natuur-historische tentoonstelling *De Natuur*'). On board was a little natural history museum gathered together with a little help of various archaeological and natural history museums in the Netherlands. His mission was 'to promote the knowledge of natural history and to pay attention to the nature of the overseas territories'.

He had, besides stuffed animals, some living animals as well as lots of aquaria on board of his boat. In the fifties and early sixties, he travelled with his "museum-boat" *Klein Artis* to many cities in the Netherlands. After docking in a port, school classes and people could visit his collection aboard and in this way he made a great effort to promote the aquarium hobby (and the interest in Biology as well). In Nov. 1962 the museum-boat was closed and had welcomed about one and a half million visitors.

He also published a fine series of booklets called *Natuurgenot in school en huis* (reprinted many times), in a great effort to promote the hobby.

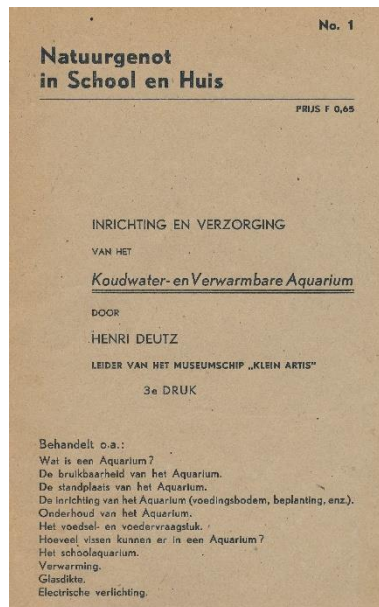

Leerzame avond voor de aquarianten

De Aquarium- en Terrariumvereniging Aqua-Fauna houdt regelmatig contact-avonden in De Amstelbron. En op elke avond prijkt op de agenda een lezing door een of andere aquarium-specialist. Ditmaal sprak de heer Henry Deutz, de eigenaar van het bekende Natuur- en Museumschip Klein Artis. Zijn lezing droeg tot titel: In en om het aquarium.

De heer Deutz vertelde over de belichting en de verwarming van het aquarium, die vooral in de winter van zo groot belang zijn. Over allerlei visvoeder, de daphnia, die je kan innemen als snijbomen, en over de tubifex, kleine wormpjes. Hij kwam ook met een natuurgeneeswijze tegen de zo gevreesde vissen-kwaal, de stippelziekte. Eveneens waarschuwde spr. voor de Blauwe Alg, die veroorzaakt wordt door verkeerde belichting.

Na de pauze vertoonde de heer Deutz een serie dia's. De voorzitter van Aqua-Fauna, de heer F. W. J. Scheffers, had de leiding bij deze leerzame contact-avond.

In maart van het volgend jaar hoopt de heer Henry Deutz weer met zijn bekend Natuur- en Museumschip Klein-Artis naar Schiedam te komen. Het zal dan vijf jaar geleden zijn, dat hij zijn ark in de Lange Haven meerde.

After the sixties the organized aquarium hobby got more in more in competition with other forms of leisure.

Particularly after the seventies, the numbers of members dropped considerable and many aquarium societies were dissolved.

The *Nederlandse Bond Aqua-Terra* published over the years a lot of pamphlets and booklets, and organized numerous symposia and various training courses to stimulate the correct keeping of aquaria.

Ons Gouden Jubileum

Het is 50 jaar geleden, dat een aantal enthousiaste aquariumhouders de handen ineen sloeg om de toen bestaande aquariumverenigingen bijeen te brengen in een landelijke bond. In het begin was alles klein en ging het moeizaam voorwaarts, maar het bondje groeide gestaag. Van driehonderd leden bij het begin ging het via driedulzend, zesduizend, zestienduizend, twintigduizend en vijftienduizend naar het huidige bestand. We kunnen nu aanschouwen wat er uit het eerste initiatief geworden is: Een bond in volle bloei en met een kracht die veel, zeer veel zal kunnen doen.

Wij danken de oprichters en de werkers van het eerste uur, dat zij ons deze N.B.A.T. hebben geschonken. Maar evenzeer de velen, die in de jaren daarna hun krachten en vaak de beste, hebben gegeven om de bond uit te bouwen en meer inhoud te geven aan dit bouwwerk. Vele commissies en werkgroepen hebben ertoe bijgedragen, dat de doelstellingen van de bond werden gerealiseerd en uitgedragen.

Een van de meest sprekende uitingen van de N.B.A.T. is wel het maandblad 'Het Aquarium'. Een blad bekend, tot ver over de landsgrenzen, door vorm en inhoud. Een blad waaraan vele prominenten uit de bond hun medewerking hebben verleend waardoor ons maandblad een duidelijk gezicht kreeg. Vandaag past het, hen hiervoor nogmaals te danken.

De huidige redactieleden, als waardige opvolgers van hun eminente voorgangers, hebben gemeend en ook bewezen, met een jubileumnummer zoals heden voor u ligt, een waardige bijdrage te kunnen leveren aan het 50-jarig jubileum. Dit is geschied met een jubileumnummer, dat de geschiedenis in zal gaan als met een jubileumnummer, dat de stand van aquaristiek in Europa in 1980 beschrijft. Een waarlijk naslagwerk, dat velen, ook na jaren, met graagte zullen lezen en dat steeds zal blijven boeien. Bedankt hiervoor, redaktie!

U ziet: tot veel waren we in staat, maar veel meer kunnen we presteren door de handen ineen te slaan. Vele, zeer vele aquariumliefhebbers zijn nog niet georganiseerd en het is aan u ook hen deel te laten nemen aan de voordelen van de bond. Toon, dat u de bond waardeert en geef uw N.B.A.T. uw steun tot betere beleving van onze liefhebberij.

GEFELICITEERD, GOUDEN N.B.A.T.

Specialist societies

With the on-going specialization in the aquatic hobby a need arose for specialists' societies. First for guppy fanciers (*NGK* or *Nederlandse Guppen Kring* in 1960, the society does not exist anymore) and later followed by societies for killifish fanciers (*KFN* or *Killi Fish Nederland* in Oct. 1972, publishing their bimonthly periodical *Killi Nieuws*), for cichlid fanciers (*NVC* or *Nederlandse Vereniging van Cichliden Liefhebbers* in 1975, publishing their bimonthly periodical *Cichlidae*) and for livebearer fanciers (*Werkgroep levendbarende tandkarpers*, in 1984, publishing their bimonthly periodical *Poecilia nieuws*, now published by the *Vereniging levendbarende zoetwatervissen*).

International outreach

At the end of 1951 attempts⁹³ were made to start a Worldwide aquatic society, the *World Federation of Aquarists*⁹⁴. The founding meeting was held in Amsterdam on 23-24 August 1952⁹⁵. Later meetings were held in Innsbrück (24-25 July 1954⁹⁶), in The Hague (13 Aug. 1955⁹⁷) and in Leiden (11-14 July 1957⁹⁸).

The *World Federation* published a quarterly journal in 1955, *The World Aquarist*. There were famous Dutch aquarists in the editorship, H. C. D. de Wit, and P. J. Merckens. The federation produced four issues in 1955 [1 (1) appeared in January 1955⁹⁹, 1 (2) in April 1955, 1 (3) in July 1955, 1 (4) in Dec. 1955], 2 (1) was published in February 1956, 2 (2) appeared finally in April 1957¹⁰⁰ and 2 (3) in July 1957. The magazine contained a lot of articles written by Dutch authors. Sadly the admirable effort ended due to financial difficulties in 1958.

In 1955 the same international idea was followed on a smaller scale by the foundation of the C.E.V.¹⁰¹ (*Confédération européenne Vivarianer*, Saarbrücken, Saarland, French Protectorate)¹⁰². The C.E.V. tried to promote the exchange of information between aquarists in different countries. At a meeting in Essen the *Vereinigung Europäischer Vivarianer* was formed on 14 October 1956¹⁰³, which also cooperated a while with the World Federation of Aquarists¹⁰⁴. Due to the changing times the C.E.V. also did not survive long, the effort ended in March 1960 (Hohl 2011, p. 106).

Even in 1959 and in 1960 some people were still attempting to form a truly World Federation¹⁰⁵.

A later international attempt was made by the society *Aqua-Terra International* in the seventies.

Now the European corporation is named E.A.T.A. or *European Aquaristic and Terraristic Association* (www.eataaquaterra.eu), founded on 26 April 1997.

Furthermore, nowadays we can consult an organization dedicated to the promotion of the fishkeeping hobby worldwide, the *International Federation of Online Clubs and Aquatic Societies* (www.ifocas.org; with over 9,000 aquarist members in over 2,000 organizations spanning over 37 countries!).

In Flanders

In Antwerp there was already an aquatic society in 1909 called *Lotus* (*Société pour la vulgarisation de l'aquarium et du terrarium*)¹⁰⁶. Some of its society news was published in the section Vereinsnachrichten of the German periodical *Wochenschrift*.

The members could read the Dutch periodical *Ons Eigen Blad*, see above, and the society published some leaflets about the hobby.

One of the first Belgium aquatic booklets was also published in Antwerp in 1926. This booklet was written by the teacher *August Havermans* of the 'aangenomen stedelijke Normaalschool' in Antwerp and, although dealing only with coldwater aquaria, contributed to the popularity of the aquarium.

In the Flemish part of Belgium the aquatic hobby started to grow in the nineteen thirties¹⁰⁷, in more or less the same way as in the Netherlands.

The very useful books of *L. Beirens* (a famous pioneer of the hobby in Belgium, 1865-1947) accelerated the growth of the aquatic hobby.

Early aquarium societies

A major leap forward was the foundation of a 'national' aquatic organization of Flanders in 1933, the *Bond van Aquarium- en Terrariumhouders van België* (also seen as *Bond van Aquaria- en Terrariahouders van België*, *la Fédération des Cercles d'Aquario- et de Terrariophiles de Belgique* or *la Fédération Belge d'Amateurs d'Aquariums et de Terrariums*).

In 1934, Flanders already counted six aquarium societies (*aquariumclubs*): *De Guppy* (in Kortrijk), *Nymphaea* (in Gent), *Panchax* (in Moescroen), *Barbus* (in Deurne), *De Aquariumvrienden* and *Scalare*¹⁰⁸ (both in Antwerp) and the periodical *Ons Aquarium* (1934-1939) became their source of information¹⁰⁹.

¹⁰⁶ Adressentafel der Vereine 1909. *Blätter für Aquarien- und Terrarienkunde*, **20** (28): 452. See also *Wochenschrift* 1914, **11**: 286.

¹⁰⁷ In Brussels there was already a national society named "*L'Aquarium pour tous*" (*Société nationale des amateurs d'aquariums & terrariums et de vulgarisation de l'histoire naturelle*, founded December 1915) that published in 1916 some aquarium leaflets (E. Rousseau, *Courtes notices sur les animaux et plantes d'aquariums et de terrariums*, 46 pp. and in December 1916: *L'Aquarium pour tous*, 32 pp.). Also "*Les Naturalistes belges*" (also founded in 1915) occupied themselves with aquarium fishes and plants (various articles in their magazine and in 1926: *Animaux et plantes d'aquariums et terrariums*, 72 pp.). From 1906 on there was already the famous aquarium shop *Aquarium Desbarax* in Brussels and in the same year a public aquarium was founded by the barons Goffinet in Brussels. There were also some fish hatcheries (joined in the "*Société de Pisciculture de Bruxelles*") producing various goldfish varieties in 1911: Exposition d'Aquiculture. *Le Magasin Pittoresque*, 1911: 177-178.

¹⁰⁸ *Scalare*, Borgerhout already published their periodical *Maandblad voor aquariumkunde* in 1930. The driving force behind the society and journal was *G. H. Paternotte*. As we already noticed before, the society also joined the *Bond*.

¹⁰⁹ The French speaking Belgium aquarists could also consult the magazine *Le Zoo chez Soi* (*Revue Mensuelle de la Décoration Vivante*), published by Antoine Wassenhove (who owned a wholesale pet trade in Brussels) from January 1934 on. Also they could consult the *Revue des Aquariophiles de France* (the official journal of the "*Association des Aquariophiles de France*", founded 13th October 1933) also published from January 1934 or they could read the very informative magazine *Aquarium* (Paris), published from January 1934 - 1937? (the last number I have seen is nr. 31/32, July/August 1936). Later there also appeared the magazine of O. Guarini, *Mon aquarium*, published from 1937 - 1938 in Brussel.

BOND VAN AQUARIUM- EN TERRARIUMHOUDERS VAN BELGIE.

Onder de naam „Bond van Aquaria- en terrariahouders van België” is er, als zuster-afdeeling van den Nederlandschen Bond van Aquariumhouders een groepeering gesticht, welke tot doel heeft samenwerking te bewerken onder de verschillende belgische vereenigingen, wier leden zich bezig houden met het houden van kleindieren.

Het orgaan van deze vereeniging is „Het Aquarium”, waarin de belanghebbenden de verslagen der vergaderingen en mededeelingen zullen treffen.

Het Secretariaat is voorloopig gevestigd in het Bio-Geographisch Instituut der Universiteit van Gent, Lange Meire 14 te Gent. Voor nadere inlichtingen gelieve men zich aan dit adres te melden.

Eene algemeene vergadering der Belgische vereenigingen van Aquariumhouders wordt bevestigd op Zondag 21 Januari a.s. om 14½ uur in het lokaal „Het Damber”, Koormarkt 19 te Gent, ter bespreking: Standregelen van den Bond en allerlei.

Den zelfden dag, doch 's-morgens, om 10 uur, houdt de vereeniging Nymphaea hare maandelijksche wetenschappelijke en openbare vergadering in het auditorium van het Bio-Geographisch Instituut, Lange Meire 14. Mej. Heye zal er een lezing houden over „Het Aquarium in de Scholen.”

Alle aquariumhouders zijn er welkom.

LE ZOO CHEZ SOI

REVUE MENSUELLE
DE LA DÉCORATION VIVANTE

Éditeur-Propriétaire :
M. WASSERHOVE
10, rue Cassinée, 10
BRUXELLES

Bruxelles, le 28 Février 1934.

A Sa Majesté Léopold III.

Sire,

Quand Sa Majesté le Roi Albert établit Votre "cercle" scientifique, il demandait à Votre précepteur de Vous initier tout d'abord à la connaissance de la Nature et des êtres qui la peuplent. Plus tard, s'ouvrait la connaissance des Hommes.

Sire,

C'est dans ce but que des Belges ont eu l'audace de créer une nouvelle revue pour faire connaître des mondes qui au sont des mystères que parce qu'on les ignore : celui des Poissons exotiques, celui des Oiseaux d'ornement et celui des Animaux de terrarium.

Animés d'une ardeur qui se peignent dans Votre Royal Exemple, ils lui lancent dans le monde entier. Mais ils sont particulièrement heureux de lui dédicacer à l'occasion de Son anniversaire au Congo, à Celui qui a su montrer que ce n'était pas dévier que d'être naturaliste, et qui est devenu parce que Son Roi bien-aimé avait prouvé que l'étude de la Vie des humbles pouvait servir de base à l'étude de la Vie des Hommes.

Sire,

Tous les lecteurs mondains du "Les chez Soi" veulent imiter Votre Exemple, et nous, fondateurs de cette revue, prions Votre Majesté de nous croire parmi Ses Sujets les plus dévoués.

Le Directeur technique : M. Wasserhove. Le Rédacteur en chef : J.-A. Lottage.

A Sa Majesté Léopold III, Roi des Belges.

A “national” organization

On 25 April 1937 the national aquatic organization of Flanders was refounded and the name was changed to *B.B.A.T.H.* or *Belgische Bond van Aquarium- en Terrariumhouders*.

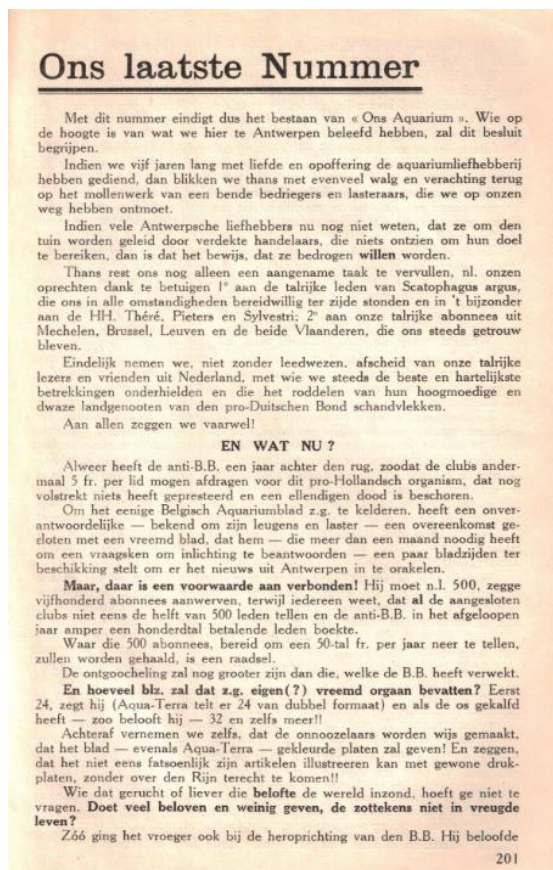

Also attending the convention were hobbyists from Brussels (*Les Naturalistes Belges*, already founded in 1915) and Namur (*La Société des Aquariophyles*).

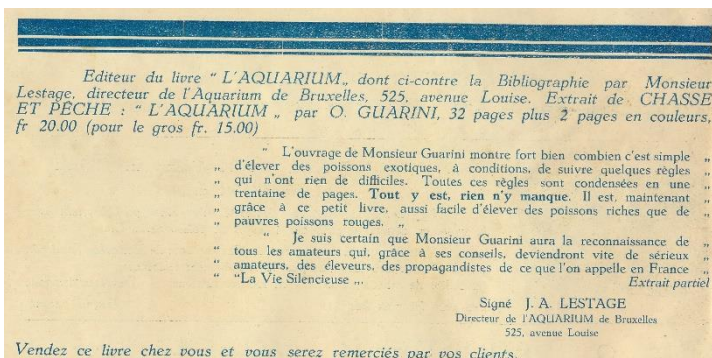

The famous Belgian aquarist, *A. Dubois* (apothecary in Antwerp), was chosen as chairman.

Initially there was some debate on the choice of the official journal for the renewed organization, *Ons aquarium* or a new journal?

After some deliberation it was decided to start a new journal and it was finally published on the 1st of May 1939 with the name *Vivarium*. Sadly that publication had soon to be discontinued due to the starting war (the last number was published on 15 July 1939).

This decision, together with competition with the aquarium journals *Het Aquarium* and *Aqua-Terra* published in the Netherlands (see above), led to the end of the journal *Ons Aquarium* (last issue April 1939).

Aquarium shops

To supply the growing number of hobbyists, many shops started selling fishes, plants and aquarium utensils in the thirties:

Aquariumhandel Gebr. Peeters (Antwerpen), *R. Clerens* (Antwerpen), *A. Dehennin* (Antwerpen), *R. Helskens* (Antwerpen), *Ed. van Hulsen & L. van Mierlo* (Antwerpen), *O. Roelandt* (Antwerpen), *De Siervisch* (Berchem-Groenenhoek), *Siervischhandel F. Daelman* (Berchem), *F. Goedhart* (Berchem / Antwerpen), *J. Muller* (Berchem / Antwerpen), *Sluivervisschen kweekerij "Wakin"* (G. Jacobs, Berchem / Antwerpen), *Tropische Vischhandel* (Fr. de Beukelaer, Berchem / Antwerpen), *V. Vercammen* (Berchem / Antwerpen), *H. Verschueren* (Borgerhout), *Ed. Huybrechts* (Deurne), *Vivarium* (M. Carels & Ch. Wante, Gent), *Cl. Camps* (Mechelen).

Beschouwingen bij een Geboorte

Waarheidshalve moeten wij toegeven : een geboorte is het eigenlijk niet.

In den goeden tijd, toen wij nog niet de wacht moesten houden bij onze gasbranders en een thermometer op de prijslijst van ons magazijn voorkwam met 1.50 Fr., zegge en schrijve anderhalve frank, heeft « BARBUS » nog de wælde gekend een Maandverslag te bezitten. Wij kunnen dus beter spreken over een hergeboorte, maar... het zal dan ook een hergeboorte zijn in den vollen zin van het woord.

Bepaalde zich bovenbedoeld Maandverslag hoofdzakelijk tot den korten inhoud van de voordrachten in den loop der maand gegeven, zoo is thans den opzct een Maandblad uit te geven, vooral bestemd voor eigen kring, waarin, buiten het verslag van de gehouden voordrachten, allerlei belangwekkende rubricken

zullen voorkomen als : Vraag en Aanbod - Magazijnberichten - Vraagbaak - Overzicht van Buitenlandsche tijdschriften - Vereenigingsnieuws - beschrijvingen van vischsoorten - gelukte en mislukte kweeken en verder al wat met het aq. van dichtbij of van verre in betrekking staat.

Of dat nu alles zoo maar van zelf gegaan is ? Moet ge geloovent !

Als ge als kleine jongen een stuk speelgoed verlangde, dan moest ge eerst, als diplomaat in wording, het terrein zorgvuldig voorbereiden, moeder of vader eens lief aankijken, vele beloften doen, enz. Nu zóó is dit ongeveer ook geloovent met ons Maandblad.

Eerst cijferen, hercijferen (het kost tegenwoordig geen peulschilletje), een plechtige, diplomatische « speech » van den ondervoorzitter, eenige aar-

DRIJKERIJ LOMBAERTS, N. V. — SCHOTEN - ANTWERPEN

After WWII

After the war¹¹⁰ the hobby came back in existence and soon flourished again. Particularly in Antwerp the hobby became very popular.

The important society *Barbus* in Antwerp (established in 1933) started a magazine as the follow-up of the pre-war journal *Vivarium* in December 1946 (*Barbus, maandblad voor aquarium-terrariumkunde*)¹¹¹. The society had more than 300 members in 1947 (the largest of the six Belgian societies at that time¹¹²).

The increasing cooperation of the five aquarium societies in Antwerp (*Antwerpse Aquarium vrienden, Barbus, Rosaceus, Scatophagus argus* and *Sierkweek*) led to the beginning of the magazine *V.A.A.T.V., maandblad voor aquarium- en terrariumkunde (Verbroedering der Antwerpse Aquarium en Terrarium Verenigingen*, chairman J. Kokelenberg, 1907 – 1968) in 1948 and this marked the start of the famous magazine *Aquariumwereld*, which is still being published today.

Also in 1946, M. van de Weyer started his famous firm *Aquaria Antwerp*¹¹³ in Aartselaar-Antwerpen, a firm that became known for its import activity.

¹¹⁰ Many companies also suffered badly: Carels, M. 1946, Letter from Belgium. *The Aquarium*, **15** (6): 101-102.

¹¹¹ Editor 1947, Publications. *The Aquarist and Pondkeeper*, **12** (3): 76.

BIJVOEGSEL AAN « AQ. W. » - Nr 1 - 6e Jg.

A new Belgian organization

The Flemish organization, to be named **B.B.A.T.** (*Belgische Bond van Aquarium- en Terrariumhoudersverenigingen*, later changed to *Belgische Bond van Aquarium- en Terrariumhouders*, to *Belgische Bond voor Aquarium- en Terrariumkunde*, to *Belgische Bond van Aquarium- en Terrariumhouders* and finally to *Belgische Bond voor Aquarium- en Terrariumhouders*), started its role in the Belgian aquarium and terrarium world in 1948.

The organization was again acknowledged on 10 April 1949 (and substantiated on 2 October 1949, with much more support). Again the organizing process was inspired by *A. Dubois* as chairman (after many contributions he passed away on 19 May 1975, leaving behind a solid organization).

A somewhat different initiative was made by *F. Temples* in 1950. He wanted to keep access to the hobby accessible and to provide an aquarium society with a shop, where the members could buy hobby-related material and fish at reasonable prices, *De Siervisvriend* at Antwerp (but, according to others, it was a shop with a society). The price of the fish would remain low, because the society would buy the offspring of the fanciers and make them available to the other members.

Kosteloos maandblad van de
AQUARIAHOUDERSVERENIGING

De Siervisvriend

KERSBEEKSTRAAT 12 ANTWERPEN
1963 - AUGUSTUS - Nr. 8

HET WATER

Dit maandblad wordt kosteloos verstrekt aan alle leden.

Voorzitter : L. Carpentier, Kampioenstraat 2, Antwerpen.
Secretaris : F. Tempels, Kersbeekstraat 12, Antwerpen.
Schatbewaarder : A. Ruelle, de Wittestraat 29, Berchem. - P.C. 41.54.87

Kosteloze bijlage van «De Siervisvriend». Januari 1955

VADE'MECUM Nr 1
VAN «DE SIERVISVRIEND»

Cliché «De Siervisvriend» Foto Proefstation

TRICHOGASTER trichopterus, lengte : 10 - 12 cm.
Fam. ANABANTIDAE : ond. fam. Osphroneminae.

Herkomst : Sumatra - Siam. Kaart D - 3/6 - A/B.

Uitzicht : De grondkleur is groenachtig- blauw. Typierend is een donkere vlek in het midden van het lichaam en bij de staartwortel. Het ganse lichaam is met kleine witte puntjes bezet, die bij opvallend licht als parelmoer schitteren.

Temperatuur : 22 - 24° C.

Voedsel : levend en droogvoeder.

In 't aquarium : Geen te klein aquarium. Zeer verdraagzame vis.

Geslacht : De rugvin van M. is langer en spitzer dan die van W.

Kweek : Temperatuur 26° C. Geen te klein kweekaquarium. Waterstand niet te hoog, 18 - 20 cm. Plantensoorten spelen geen rol ; doch het wateroppervlak dicht beleggen met Riccia of andere drijfplantjes. Schuimnest door de M. gemaakt, vindt hierin steun. Zijn de eieren afgelegd, W. verwijderen. Na ongeveer 2 à 3 dagen, volgens temperatuur, komen de jongen uit. Zwemmen de jongen rond, ook de M. verwijderen. Jongbroed opkweken met infusie en naargelang de groei, overgaan tot groter voedsel. Zijn de jongen 15 à 20 dagen oud, waterpeil verlagen en voor goede doorluchting zorgen want nu ontwikkelt zich het Labyrinth. Dus ook temperatuur in en boven het water, zelfde houden. Op dit tijdstip treden ook de meeste sterfgevallen op.

Bewerking G. Van Geenhoven.

EEN NIEUWE LENTE, EEN NIEUW UITZICHT

Stilstaan is achteruitgaan. Hoogstnoodig moest ons blad in een nieuw kleedje gestoken worden en spijt de moeilijke economische omstandigheden, spijt de geweldig verhoogde papierprijzen is de kogel door de kerk. Ten koste van grote financiële offers brengen wij U thans een verjongd blad en wij hopen dat het in de smaak onze lezers zal vallen en zij de in evenredigheid lichte prijsverhoging die wij moesten toepassen, geredelijk zullen aanvaarden, waarvoor wij hun vooraf dank zeggen.

Maar niet alleen het uitzicht wenssen wij te veranderen, ook de inhoud, want bij een nieuwe lente hoort ook een nieuw geluid. Tot nu toe hebben wij ons moeten bepalen de artikels in te lassen die ingezonden werden. Alleen de redactieraad weet hoe schaars zulke kopij steeds is en, indien wij niet herhaaldelijk noodkreten hebben moeten slaken, dan is zulks dank zij een kleine schare getrouwe medewerkers, waarvan U de namen regelmatig onderaan de artikels gevonden hebt. Wij zijn hun veel dankbaarheid verschuldigd en wij hopen ook in de toekomst op hun gewaardeerde medewerking te kunnen rekenen.

Maar de ingezonden kopij voldeed

niet altijd aan de behoefte van het ogenblik; een artikel over verwarming b.v. komt het best van pas bij de aanvang van de winter, terwijl kweken dienen besproken te worden in het voorjaar, bij de aanvang van het daarvoor gunstige seizoen. Daar echter de vrije inzendingen amper voldoende waren om het eerstvolgend nummer te vullen, bleef er de redactieraad geen keus.

Hierin willen wij verandering brengen en bovendien zagen wij gaarne een grotere verscheidenheid van onderwerpen behandeld.

Om dit opzet te verwezenlijken dienen wij over een grotere staf van medewerkers te beschikken en wel op allerlei gebied, want ook de kleuteraars willen wij in de gelegenheid stellen hun gaven nuttig aan te wenden voor onze liefhebberij.

Wij zullen aldus niet meer uitsluitend aangewezen zijn op de vrije inzendingen en artikels kunnen voortbrengen volgens een vooraf uitgewerkt programma.

Langs de verenigingen om menen wij de hand te kunnen leggen op de verlangde medewerkers die, ieder in zijn specialiteit, slechts een paar artikels per jaar zouden op te stellen hebben en wij hopen in de eerstvolgende nummers reeds hun artikels te zullen lezen.

In 1951 the *Belgische Bond* helped the French speaking aquarists in publishing a "French version" of the magazine *Aquariumwereld*: *Le Monde Aquariophile*, "Revue mensuelle éditée par la Fédération d'Expression Française des Amateurs d'Aquariums et Terrariums, Organe officiel de la Fédération Belge des Aquario- et Terrariophiles" (the "A.S.B.L."). Due to lack of interest that publication ceased within a year.

In 1960 the *Belgische Bond* published a truly French version of the magazine *Aquariumwereld*, *Aqua-Monde*¹¹⁴, for the benefit of the French-speaking aquarist in Belgium and Congo, but unfortunately the publication ended in a financial disaster.

Later on the *B.B.A.T.* and the *Waalse Federatie voor Aquarium- en Terrariumhouders* started a truly national cooperation in 1976 (the B. B. C. A. T.). The organization of the French speaking Belgian aquarists was called the *Fédération nationale belge des cercles aquariophiles et terrariophiles*, publishing the bimonthly periodical *L'Aquariophile Franco-Belge* (published from 1972 and edited by aquarists of the *Cercle Aquariophile et Terrariophile Bruxellois "Le Guppy Voile"*)¹¹⁵.

After the difficult start of the *B.B.A.T.* (sometimes seen as *BBAT*) in the fifties, the organization slowly stabilized its membership. In 1980 the *B.B.A.T.* held their second national aquarium exhibition in Antwerp and the organization counted about four thousand members and 52 societies. In 1984 the *Belgische Bond* coordinated about 50 aquarium societies in Flanders.

Also the *B.B.A.T.* published some booklets to inform the hobbyist. Particularly creating the supplements to the journal *Aquariumwereld* over many years greatly helped informing the aquarists with all the knowledge needed to enjoy their hobby.

The *B.B.A.T.* still exists today and continues to do its best to promote our beautiful hobby (www.bbat.be).

¹¹⁴ Editor 1960, Goede Vaart! *Aquariumwereld*, **13** (1): 1-2.

¹¹⁵ At the same time various Wallonian societies joined their forces in an organization called *L'Inter-clubs*, publishing their journal *Aquafauna* (the journal already started in 1970, later edited by aquarists of the "Cardinal Club, Liège"). This magazine still exists today: "*Aquafauna, la revue de l'Interclubs d'Aquariophilie et d'Ichtyologie Francophone de Belgique*".

Bij de uitgave door de B.B.A.T. van deze nieuwe encyclopedische steekkaarten, over alle houdbare levende organismen in onze liefhebberij, kortweg VIVARIUM genoemd, willen wij vooraf enkele toelichtingen verstrekken om deze editie optimaal te kunnen benutten.

Drie punten stellen wij vooral op prijs: kleur, nauwkeurigheid en eenvormigheid. De eerste twee hoeven geen betoog. De eenvormigheid, zowel in de rubrieken als in de presentatie, zal U helpen bij het vlug terugzoeken en het oordeelkundig vergelijken van bepaalde gegevens. Dit streven naar eenvormigheid zal evenwel meebrengen dat, van de onderwerpen waarover zeer veel te schrijven valt, alleen het meest karakteristieke zal kunnen uitgekristalliseerd worden. Het worden dus geen «proza»-stukjes, maar basisinformatie over datgene wat ons samenbindt: de natuur.

Boven een kleurenplaat van het besproken dier of plant worden enkel de geslachts- en soortnaam vermeld welke op het ogenblik van de publicatie algemeen aanvaard worden. Om de uitgave niet te belasten, worden geen ondersoorten afzonderlijk behandeld. In een verre toekomst zal dit misschien toch gebeuren, indien de omstandigheden dit verplichten. Variëteiten komen, in principe, niet aan bod.

De tekst wordt verdeeld over twee kolommen: een smalle, met kleine druk en een brede, met de basistekst.

In de smalle kolom worden alleen de meest merkwaardige punten uit de basistekst gelicht (of aangevuld) om een vlug vergelijk tussen de diverse onderwerpen mogelijk te maken. Voor de vissen begint die kolom met de vinformule, voor zover die ons bekend is. (Voor uitleg over de vinformule: zie Aquariumwereld 34/12.)

In de basistekst worden achtereenvolgens behandeld:

Identiteit: Alleen de orde en de familie worden vermeld, ook hier weerom om overlast te vermijden en omdat de systematiek nogal eens gewijzigd wordt. Die identiteit sluit onmiddellijk aan bij de dubbele rechthoek, onderaan links de eerste bladzijde van elke kaart. Het onderste gedeelte blijft blank voor eventueel uw eigen classificatiesysteem. Het bovenste gedeelte wordt benut voor de systematische indeling welke afzonderlijk zal gepubliceerd worden samen met een passende verzamelmap. De hoofdletter verwijst naar de dierenstam of de plantenafdeling; de kleine letter naar de klasse; het Romeinse cijfer naar de orde; het Arabische cijfer naar de familie.

Voorbeeld: *Macropodus opercularis* Z - h - XXXIV - 151

Z = Chordata of Ruggestengdieren

h = Osteichthyes of Beenvissen

XXXIV = Perciformes of Baarsachtigen

151 = Belontiidae of Goerami's

Many aquarium clubs had joined the B.B.A.T on 2 October 1974 (at the silver jubilee):

MAANDBLAD VOOR AQUARIUM- EN TERRARIUMKUNDE
BELGIE 35 Fr. - BUITENLAND 40 Fr.

In 1973 the killifish fanciers started the *Belgische Killifish Vereniging* (BKV founded 3rd of March 1973), who published their bimonthly periodical *Killi-Kontakt* until 1980. The journal was for a short period united with the periodical of the Dutch society *KFN*, but the *BKV* resumed publishing their own journal from 1991 on).

In 1975 some cichlid fanciers joined their forces and formed the Belgian cichlid society (*Belgische Cichliden Vereniging*, who published their bimonthly periodical *Cichlidae* until 1982; the journal was later united with the periodical of the Dutch society *NVC*).

In 1980 the guppy society of Belgium was founded, the *Belgische Guppy Vrienden*.

During the past hundred years the aquatic hobby in the Netherlands as well as in Belgium gradually evolved to the well-earned place it has reached amongst the animal loving hobbies of today.

Huis van Oranje

Welgemeend en met blijde sympathie
deel ik in Uw vreugde ter gelegenheid van het
zilveren jubileum van de B.B.A.T. wiens activi-
teiten ik zeer waardeer.

Uw belangstelling voor aquarium- en
terrariumkunde brengt U dichterbij de levens-
vormen in het natuurlijk milieu.

Mocht de diepere betekenis van de enge
verbondenheid tussen alles wat leeft, groeit en
het milieu uitmaakt op deze aarde, door U zeer
zeker gevoeld, ook overgedragen worden aan
onze maatschappij, opdat natuurlijk evenwicht en
schoonheid mogen bewaard blijven op onze planeet.

LEOPOLD.

The Dutch freshwater aquarium bibliography

To conclude, we present a bibliography of the freshwater aquarium (and aquatic hobby related) literature in the Dutch language, which may be of interest to the reader.

In the beginning of the aquarium hobby (middle 19th century), the information about the freshwater aquarium inhabitants had to be found in all kinds of books. So, we list some early "fish" books consulted by the pioneer aquarists and pondkeepers. Later on, many aquarium books (general books, but also many on specific subjects) were published, particularly towards the end of the 20th century.

All publications were published in The Netherlands unless stated otherwise. The number of pages is not stated, if the publication was not found. If the number of pages is written between brackets, then the publication is not in our possession.

- 1794-1806 Saakes A. B., *Beknopte natuurlijke historie, of beschrijving en afbeeldingen der voortbrengselen van de drie rijken der natuur [...], alles volgens de oude en latere natuurbeschrijvers [...]*, Antonij Bernard Saakes, Amsterdam, 18 afleveringen met vele visafbeeldingen / beschrijvingen, bijv. Visschen VI: De Goud-Visschen. [18 parts with numerous fish figures and a nice description of the goldfish]

Poecilia Nederland
Atlas van levendbarende tandkarpers

Xiphophorus variatus (MEEK, 1904)

Nederlandse naam: Variatus platy, voor de kweekvormen bestaan vele andere namen zoals papagaai- en Hawaï platy.

Grootte: Vrouwjes tot 5,5; de mannetjes blijven kleiner. De grootte van de mannetjes wordt mede bepaald door het type mannetje. Bij deze soort zijn grote en kleinere mannetjes aanwezig. De grootte is genetisch bepaald en daardoor niet in alle aquariumstammen meer aanwezig.

Temperatuur: Voor de wildvormen van deze soort hoeft de temperatuur niet erg hoog te zijn. Een temperatuur van rond de 20°C is voldoende. De kweekvormen voelen zich prettiger bij een hogere temperatuur.

Verspreiding: De soort leeft in het oosten van Mexico aan de Atlantische kust. Het leefgebied omvat zuidelijk Tamaulipas, oostelijk San Luis Potosi en noordelijk Veracruz en meet ruim 500 kilometer. De hoogte in dit gebied is 30 tot 1.200 meter. Het leefgebied bestaat voornamelijk uit poelen, moerassen en vrijwel stilstaande stroompjes.

Bijzonderheden: De kweek is eenvoudig. Als de kleine jongen vlak na de geboorte voldoende mogelijkheden hebben om zich te verschuilen, blijft er altijd een groot aantal over. Deze platy kan het beste in een groep met verschillende populaties gescheiden te houden om daarmee de natuurlijke vorm in stand te houden.
