Preface

During more than forty years my brother and I tried to keep up with the aquaristic literature and to stay up to date with the scientific names of the freshwater fishes. Over the years we collected many scientific and common names. With the publication of Bill Eschmeyer's *Catalog of Fishes* we could check our list and with the help of some recent regional freshwater fish checklists we could transfer our data to the present list.

Apart from the historical overview of the freshwater fishes available to the aquarium hobby during the last century (or at least the scientific names used by aquarists), it proved more and more intriguing to try to identify the described fish in question (although it was not always possible). Also keeping track of the numerous name changes (made necessary by scientific research) was a tremendous challenge.

To reach some kind of ordering, the classification of the fishes needed to be studied too. This part of the zoological science is also rapidly changing.

With the alphabetical list one can locate the currently valid scientific name, the correct spelling of that name and the position of the species in the zoological classification system. Also one can check if there has been any confusion with the name. With the references one can see the occurrence of the scientific names in the aquarium hobby during the last century.

Although the aquarium histories are different in the various countries (in 2006, the 200th anniversary of Roßmäßler, German aquarists already celebrated 150 years of keeping aquaria and freshwater fishes!), there was a somewhat simultaneous development through exchange of data and / or of aquarium fishes. Because a lot of aquarium fish descriptions and figures were copied, it has not been possible to track the occurrence of the aquarium fish species in certain countries.

I would like to thank my brother Paul van der Laan, who worked with me over such a long period of time on the "fish name problem" and I am forever in debt to my wife Hana for caring for us during that work.

I am indebted to Harro Hieronimus for his correction of the German text and for making the publication of this work possible.

For the 14th edition I added many names of newly described species and some new citations, corrected many mistakes and updated the Dutch language bibliography. Special thanks to Herman Meeus for helping me with the Flemish aquarium history.

With the excellent books of Ad Konings I could correct the cichlid names from Lake Malawi and Lake Tanganyika. And, new in the 15th edition, I highlighted all the unknown species in red, to improve clarity. For the 16th edition, I was able to cite the instalments of the famous work of Holly, Meinken and Rachow with the publication dates recently researched by Axel Zarske and Heinz Berkenkamp.

At last I could read the first Australian aquarium book by Albert Gale, *Aquarian Nature Studies and economic fish farming*, and use it in the list to record the first 'Australian' aquarium fishes.

The updated 20th edition contains again, besides many new species, some new references to more accurately document the occurrence of the names of the freshwater fish species in the aquarium world, especially references to the early German aquarium literature (thanks to the courtesy of Bernd Poßeckert).

This twenty-ninth edition contains, besides many new species names, new references and some changes in the classification.

I hope we have made a useful list for every-one who is trying to connect some aquaristic article or book reference with a scientific freshwater fish name.

Richard van der Laan, ALMERE, The Netherlands, June 2020.

Dedication

We would like to dedicate this work to all those ichthyologists who have shared or who are sharing their knowledge with the (name-struggling) aquarists.

J. R. Norman (1931), A History of Fishes, p.370:

The question of nomenclature is an important one, and unfortunately there is still considerable diversity of opinion as to the correct scientific name to be applied even to our commonest food-fishes. It may well be asked why it should be necessary to give scientific names at all. The reason is that vernacular or common names, although convenient, are by no means precise, and are frequently used in a very loose manner. The same name may be given to two or more totally different fishes in different parts of the country or in various regions of the world; or, as is even more common, the same species may be known by quite different names in various localities. The name "whiting," for example, is not only applied to the well-known food-fish of the Cod family (*Gadus merlangus*), but also to various kinds of fresh-water fishes. Conversely, the following names, among others, are all used for the Sea Trout (*Salmo trutta*) in various parts of the British Isles, while the non-migratory members of this very variable species have received as many vernacular names again: Orange Fin, Black Tail, Phinock, Salmon Trout, Truff, Scurf, Sewen, Bull Trout, Grey Trout, and Round Tail. The names of Peal and Bull Trout are used in some parts of the country for the Trout (*S. trutta*), but in others to the Salmon. Another good reason for the use of scientific names is the fact that of the fifteen thousand odd species of fish known to-day probably less than half have a common name in any language. There are nearly a hundred species of Cichlids in Lake Tanganyika alone, but very few of them are distinguished by the natives under a particular name, and the same species will perhaps be given one name by one tribe and a totally different one by another. It is agreed, therefore, that, in order to obtain precision and to avoid any chance of confusion, it is necessary to give every species of fish a scientific name. In the words of Dr. Regan, the name of an animal "is a clue to all that is known or that has been recorded in literature about its structure, habits, economic importance or anything else; without the correct name we are in the dark and the conclusions we arrive at may be founded on erroneous grounds." It not infrequently happens that two

SUMMARY

An alphabetic list with the scientific names of all known recent freshwater fish species is presented. Also listed are the English and Dutch vernacular names in use for freshwater fishes and the various English (common) names of the freshwater aquarium fishes.

The aim of this publication is six-fold:

- to list the currently valid and correctly written scientific name of every recent freshwater fish species;
- to stimulate the use of correctly written scientific names;
- to list Dutch and some frequently used English vernacular names of freshwater aquarium fishes and freshwater aquacultural fishes;
- to list some scientific names wrongly used by aquarists;
- to present some aquarium book citations;
- to present an overview of the freshwater and brackish water fishes recorded during the last centuries in various aquarium books.

Although many scientific names are likely to change with scientific progress, we nevertheless present the list of currently valid scientific names now. This current list can already be used for finding the currently valid names and the correct spelling of these names. Further it cites the use of the names in the aquarium literature and the list also provides an overview of the known species of freshwater fish.

We also provide the largest freshwater aquarium fish bibliography ever published.

We hope the freshwater fish name list will stimulate the use of correctly written scientific names and bring some stabilization in the use of common names.

Zusammenfassung

Eine alphabetische Liste mit den wissenschaftlichen Namen aller rezenten Süßwasserfische der Welt ist zusammengestellt worden. Auch werden die vielfach verwendeten holländischen und englischen Namen erwähnt.

Diese Veröffentlichung hat einen mehrfachen Zweck, nämlich:

- das Erstellen einer Liste mit richtig geschriebenen Namen für jede rezente Süßwasserfischart;
- den Gebrauch von richtig geschriebenen wissenschaftlichen Namen zu propagieren;
- die Erwähnung vielfach verwendeter englischer und holländischer Namen von Süßwasserfischen und wirtschaftlich genutzten Süßwasserfischen;
- einige wissenschaftliche Namen, welche in der Fachliteratur falsch verwendet sind, zu erfassen;
- einige Aquaristik-Fachbuchzitate aufzulisten;
- die Präsentation einer Übersicht von Süßwasser- und Brackwasserfischarten, welche während der letzten Jahrhunderten in vielen Aquarienbüchern genannt sind.

Obwohl viele wissenschaftlichen Namen noch möglicherweise geändert werden (durch ständige Recherchen), ist es jedoch wichtig die Liste jetzt zu präsentieren. Mit dieser Liste kann man sich schon die heute gültigen Namen und die richtige Rechtschreibung dieser Namen merken. Ebenso kann man sich die Benutzung der Namen in der aquaristische Literatur ermitteln und gleichzeitig bekommt man eine Übersicht über die heute anerkannten Süßwasserfischarten der Welt.

Wir bieten auch die größte Süßwasser-Aquarienfische Bibliographie jemals veröffentlicht.

Wir hoffen dass diese Namenliste der Süßwasserfische die richtige Schreibung der wissenschaftlichen Namen fördert und die Verwendung einigermaßen standarisierter holländischer und englischer Namen der Aquarienfische unterstützt.

Samenvatting

Een alfabetische lijst met de wetenschappelijke namen voor alle recente zoetwatervissoorten van de wereld is opgesteld. Verder worden de veelgebruikte Nederlandse namen voor enige zoetwatervissen vermeld, alsmede enige Engelse namen van veelvoorkomende zoetwataquariumvissen en van de, voor consumptie gekweekte, zoetwatervissen.

Het doel van deze lijst is zesvoudig:

- het vermelden van de nu geldige en juist geschreven wetenschappelijke naam voor iedere recente soort zoetwatervis;
- het gebruik van correct gespelde wetenschappelijke namen te stimuleren;
- het vermelden van Nederlandse namen en enige veelgebruikte Engelse namen voor zoetwataquariumvissen en voor consumptie gekweekte zoetwatervissen;
- het vermelden van enige wetenschappelijke namen die door aquariumhouders verkeerd gebruikt werden;
- het vermelden van enige verwijzingen naar aquariumboeken;
- het geven van een overzicht van de zoetwater- en brakwataquariumvissen die in de laatste honderdzestig jaar vermeld werden in diverse aquariumboeken.

Hoewel vele wetenschappelijke namen nog gewijzigd zullen worden door voortschrijdend wetenschappelijk onderzoek, lijkt het ons toch nuttig om een lijst met de nu geldige wetenschappelijke namen te presenteren. Behalve de nu geldige namen en de juiste spelling van deze namen, kan de lijst ook gebruikt worden om de gebruikte namen in de aquariumliteratuur te achterhalen. Verder geeft de opsomming ook een overzicht van de al bekende soorten zoetwatervis.

Wij hebben ook de grootste zoetwataquariumvis bibliografie samengesteld die ooit gepubliceerd is.

We hopen dat de zoetwatervis-naamlijst zal bijdragen aan het juist schrijven van de wetenschappelijke namen en het gebruik van enigszins gestandaardiseerde Nederlandse namen zal stimuleren.

INDEX -----1093

CHAPTER ONE INTRODUCTION

In this publication¹ it is attempted to list alphabetically the scientific names of all the freshwater fish species in the world. In this work a freshwater fish is a fish species that does not spend all of its life in marine and occasionally brackish water.

The listed freshwater fishes include²:

- **primary freshwater fishes**, groups which have evolved in freshwaters since the early teleosts moved into them, are confined to them and cannot tolerate seawater (the strictly freshwater fishes; for example of, Dipnoiformes, Polypteridae, Osteoglossiformes, the Otophysi excluding the secondarily marine species, Esocidae, Percopsiformes, and Polycentridae);
- **secondary freshwater fishes**, groups now confined to freshwater but of estuarine / marine origin and relatively tolerant of seawater for short periods (for example of, Potamotrygoninae, Cichlidae, Cyprinodontiformes, Bedotiidae, Melanotaeniidae or Adrianichthyidae);
- **freshwater representatives** of “marine families” (**primary-like freshwater fishes**, for example of, Clupeidae, Engraulidae, Pristigasteridae, Belonidae, Sciaenidae, Gobioidi or Tetraodontidae);
- fish species of “secondary freshwater fish families” living in a **hyperhaline** (waters with salinity >40 ppt) or **highly alkaline** environment (not marine; for example of, Cyprinodontidae, Mugilidae or Cichlidae);
- **diadromous fishes** making regular migrations from salt to freshwater or vice versa at different stages of the life history³. For example: some **anadromous** species (breeding in freshwater and growing up and maturing in the sea) of Petromyzontidae, Acipenseridae, Clupeidae, Salmonidae or Osmeridae; some **catadromous** species (breeding in seawater and growing up and maturing in freshwater) of Anguillidae, Mugilidae, Kuhliidae or *Percalates*; some **amphidromous** species (breeding in freshwater, the larvae feed and grow at sea followed by the returning of the juveniles to freshwater, where they mature and spawn) of Galaxiidae, Prototroctinae, Syngnathidae, Eleotridae, Butidae, Sicydiinae, Ambassidae or Cheimarrichthyidae;
- some **euryhaline members of marine families** (the freshwater/seawater-tolerant fishes; for example of, Atheriniformes, Mugilidae, Gerreidae, Haemulidae, Lutjanidae, Pomacentridae, Sillaginidae, Sparidae, Gobioidi or Pleuronectoidei).

The names of ‘freshwater’ sharks (Carcharhinidae / Stegostomatidae), ‘freshwater’ rays (Rhinidae) and ‘freshwater’ sawfishes (Pristidae) have been omitted.

In the case of the fishes occurring in **brackish waters** we have somewhat arbitrarily drawn a boundary between listed “freshwater species” (= occurring in fresh and brackish waters or occurring in fresh, brackish and marine waters) and excluded **marine species** which enter only very sporadically bays, mangrove estuaries and tidal creeks and rivers (this decision may be somewhat biased by our aquaristic mind).

We list most species recorded in Eschmeyer’s online Catalog⁴ with the notation [Habitat: freshwater, brackish, marine] and we list some species with the Eschmeyer’s Catalog notation [Habitat: brackish, marine].

The estuarine species belonging to, Acanthuridae, Albulidae, Antennariidae, Arripidae, Balistidae, Carangidae, Chaetodontidae, Chanidae, Congridae, Dactyloscopidae, Diodontidae, Drepanidae, Elopidae, Ehippididae, Girellidae, Gymnuridae, Harpadontidae, Hexagrammidae, Kraemeriidae, Kyphosidae,

¹ This publication is disclaimed for purposes of Zoological Nomenclature in accordance with the International Code of Zoological Nomenclature, Fourth Edition, Articles 8.3 and 8.4. No new names or nomenclatural changes are available from statements in this publication.

² See for a list of “freshwater fish families”: P. J. Darlington 1957, *Zoogeography: the geographical distribution of animals*, Wiley, New York, US, p. 102-122; T. M. Berra 2001, *Freshwater Fish Distribution*, Academic Press, San Diego, US, 604 pp.

³ See for definitions: R. M. McDowall 1997, The evolution of diadromy in fishes (revisited) and its place in phylogenetic analysis. *Reviews in Fish Biology and Fisheries*, **7**: 443-462; R. M. McDowall 2004, Ancestry and amphidromy in island freshwater fish faunas. *Fish and Fisheries*, **5**: 75-85; R. M. Parenti 2008, Life history patterns and biogeography: an interpretation of diadromy in fishes. *Annals of the Missouri Botanical Garden*, **95**: 232-247; S. Watanabe *et al.* 2014, Tropical and temperate freshwater amphidromy: a comparison between life history characteristics of Sicydiinae, ayu, sculpins and galaxiids. *Reviews in Fish Biology and Fisheries*, **24** (1): 1-14.

⁴ Fricke, R., W. N. Eschmeyer & R. van der Laan (editors) 2020, *Eschmeyer’s Catalog of Fishes: GENERA, SPECIES, REFERENCES*, California Academy of Sciences, electronic version (3 January 2020): <http://researcharchive.calacademy.org>

Labridae, Labrisomidae, Leiognathidae, Leptobramidae, Leptoscopidae, Lobotidae, Megalopidae, Mullidae, Muraenesocidae, Myliobatidae, Platycephalidae, Pseudochromidae, Rhinopteridae, Scombridae, Scorpaenidae, Serranidae, Siganidae, Sphyrnidae, Synodontidae, Triacanthidae, Trichiuridae, Tripterygiidae and Urolophidae are understood by us as **marine**, so their names do **not** appear in the list.

According to our somewhat broad definition of freshwater fishes, nearly **eighteen thousand** living species of freshwater / brackish water fishes are already described (current count: **17,839**) and all listed as currently considered valid species in chapter 4.

Nelson (1976, p. 3) reported **6,851** freshwater species, in 1994 (p. 5) he reported the following numbers: **9,966** freshwater species and **10,465** species using freshwater and in 2006 (p. 5) he stated **11,952** freshwater species and **12,457** species using freshwater. Lévêque *et al.*⁵ report for the year 2005: **12,740** species in freshwater and **15,062** species in fresh and brackish waters. Tedesco *et al.* 2017 report 40% of 33,500 fish species as freshwater species (= 13,420 species; they also refer to **14,953** species visiting freshwater)⁶. Leroy *et al.* 2019 report 11,295 species from *strictly* freshwater⁷.

Furthermore, it is estimated that more than thousand species of freshwater fish still have to be described^{8,9}.

The aquarium hobby has expanded tremendously over the past 60 years with millions of hobbyists worldwide. This generates a large aquarium trade (about US \$15–30 billion each year); over 1 billion ornamental fishes comprising more than **five thousand** freshwater (in 1909 there were about 326 species available to the hobbyist, Klunzinger 1909) and 1400 marine species are traded internationally each year!¹⁰. And this trade also generates an effect on natural populations. Furthermore, the aquarium trade can contribute to the non-native species introduction in natural aquatic systems worldwide¹⁰.

Although a lot of hobbyists do not care much about the names of their fishes (or give them nick-names), a large and still growing group of serious hobbyists are giving great care to the scientific names they use. This is especially true for the aquarists who specialize in certain fish groups like catfishes, killifishes or cichlids. Besides the scientific name they often add the locality name where the fishes came from, so making it possible to keep the different strains of fishes pure.

Keeping strains of fishes pure is especially vital for those fishes who are extirpated in the wild and maybe some day can be returned to a suitable habitat in the wild. See Maceda-Veiga *et al.* 2016 and Welz 2019¹⁰.

For all those purposes it is very important to communicate with the correct (and the same!) names.

Maybe the list can also be of any use in defining fishes as ornamental or not¹¹.

We hope our list is of some use to the serious aquarist.

1.1 Scientific names

A **scientific name** is a name proposed in the context of zoological nomenclature for scientific purpose and **correctly** described according to the *International Code of Zoological Nomenclature* as an **available** name. Scientific names published after 1 January 2000 must adhere to the fourth edition of this *Code*¹² to be available. This zoological *Code* describes a number of rules to name an animal taxon, in our case a fish species, fish genus or fish family. There are rules for the nomenclatural availability, rules for the taxonomic allocation and rules for the nomenclatural validity of a particular taxon.

Nowadays everybody agrees that biology requires a precise, coherent and simple system for the naming of organisms to be used internationally, dealing both with the nomenclatural terms and with the scientific names that are applied to the individual taxonomic groups of organisms. To cover all kinds of organisms, whether prokaryotic or eukaryotic (bacteria, fungi, plants or animals), fossil or non-fossil, and of fossil traces of organism (ichnotaxa), a new draft for a *BioCode*¹³ was published in 2011. The *BioCode* initiative represents a concerted effort, by biologists intimately involved in the operation of the current system of separate codes¹⁴, to devise a unified approach to the future naming of organisms of all kinds. This need has become pressing in view of common issues that the separate organismal codes now have to address, consequent on the rapid changes taking place in global informatics, database architecture, molecular systematics and ecology, and electronic publication. Once accepted the code will give rules for the naming of all organisms.

A **taxon** is a grouping of organisms (a classificatory unit) under a given name. The taxon is the classificatory concept (see further) and the name is the label, by which a taxon can be unambiguously designated. The scientific name serves as a tool for the storage and retrieval of the biological and non-biological information attached to the taxon.

The scientific name of a species is a combination of two Latin or latinized names (a **binomen**). The first name is called the generic name (a **genus-group name**) and the second the specific name (a **species-group name**, also known as the species epithet). Both names must be written in italics. Generic names must always begin with a capital letter; specific names must always begin with a lower-case letter. In the latinized names no diacritic marks, apostrophes, dieresis or hyphens can be used (except if the first element is a Latin letter used to denote descriptively a character of the taxon: *y-ophorus* and *x-punctatus* as stated by Article 32.5.2.4.3 of the *Code*¹²).

Some specific names commemorate people. These so called **patronyms** normally end in *—ae* if named for a woman (i.e., Trewavas → *trewavasae*), end in *—i* if named for a man (i.e., Günther → *guentheri*) or *—ii* in some old names formed from the latinized name of a man (i.e., Cuvier → *cuvieri* and Cuvierius → *cuvierii*), end in *—orum* if named for men (or woman and man) and end in *—arum* if named for women. However, these special endings (suffixes) are just recommendations and language sensitive, therefore they should not be emended. So it is probably better not to change the original spelling of a specific name based on a personal name¹⁵. Consult the book of John Wright¹⁶ for an amusing introduction to scientific nomenclature.

If the specific name is a Latin adjective or participle in the nominative singular, it must agree in **gender** with the generic name (Article 31.2 of the *Code*¹²). So an **adjective** can change with gender (and it can have different endings) and a **noun** can not (and must not). If the original describer did not indicate whether he or she regarded the specific name as a noun or as an adjective and the evidence of usage is not decisive, the name is to be treated as a noun in apposition to the genus name (Article 31.2.2 of the *Code*¹²). Then the spelling of the specific name is not changed if it is combined with a generic name of a different gender.

For instance if the gender is **masculine** the specific name would be *maculatus*, if **feminine** *maculata* and if **neuter** *maculatum* (e.g., *pulcher*, *pulchra* and *pulchrum*; *gracilis*, *gracilis* and *gracile*; *—ensis*, *—ensis* and *—ense*; *—alis*, *—alis* and *—ale*; *—fer*, *—fera* and *—ferum*, but *afer*, *afra* and *afrum*), see for more explanation Schmettkamp (1985). Changes in the generic name are so reflected in the specific name, for instance *Aphyosemion nigerianum* (neuter) and *Fundulopanchax nigerianus* (masculine). The gender of the genera

¹² International Commission on Zoological Nomenclature 1999, *International Code of Zoological Nomenclature*, 4th ed., International Trust for Zoological Nomenclature, London, UK, 306 pp. [www.nhm.ac.uk/hosted-sites/iczn/code/]

¹³ <http://www.mapress.com/bionomina/content/2011/f/bn00003p044.pdf>

¹⁴ Besides the zoological code, there are codes for naming plants (the botanical code), cultivated plants (the cultivated plants code), bacteria (the bacteriological code) and viruses (the virological code).

¹⁵ Dubois, A. 2007, Genitives of species and subspecies nomina derived from personal names should not be emended. *Zootaxa*, 1550: 49-68.

¹⁶ Wright, J. 2014, *The naming of the shrew*, Bloomsbury, London, UK, 303 pp.

can be found in the *Catalog of Fishes*⁴.

Sometimes **subspecies** are distinguished and a **subspecific name** is added forming a **trinomen**, for example *Fundulopanchax mirabilis mirabilis* (the **nominotypical taxon**, the oldest name) and *Fundulopanchax mirabilis moensis*.

Some authors do not believe in subspecies. They think subspecies are just populations of a species (geographical units, sometimes called races or strains) or, if judged different, separate species and do not use a trinomen.

The scientific name is sometimes followed by a name (or names) and date, as a shortened bibliographic reference. These are the surname(s) of the original author(s) (the **describer(s)**) and the **year of publication** of that species description. We use a comma interposed between the name(s) and the date (as is still usual in ichthyology). We list up to three describers, if more we list the first describer followed by *et al.* (= and others).

If the original description was published in an article or book with different authors, the name of the describer(s) can be followed by the authors of the publication. For instance Cuvier in Cuvier & Valenciennes, 1829. This makes the retrieval of the original publication easier. The publication date given is the **actual date** of the published description (as far as can be ascertained), which can be different from the date on the publication. This makes retrieval of the original publication more difficult.

In the name list we only mention the actual describer(s) (the person responsible for the new name) and the year of the publication (to save space). The citation of the original description of most fishes can nowadays easily be found in Eschmeyer's *Catalog of Fishes*⁴. We list Agassiz as the author of the new fish species names in Spix & Agassiz 1829/1831 (following Kottelat¹⁷, except the case of *Cynodon* Spix, 1829, see opinion 2012 of the ICZN) and we use Bloch, 1801 or Schneider, 1801 (and three times Forster, 1801) conform Karrer *et al.*¹⁸ and Kottelat (2013). We use Rafinesque-Schmaltz, 1810 following Wheeler (1988) and Dubois (2008).¹⁹

If the species was described in a **different genus**, then the name(s) of the describer(s) and the year of publication must be written **between parentheses**. No parentheses are used if the generic name was not written correctly.

The biological nomenclature has slowly changed over the past two centuries and, although we nowadays have a fairly extended *Code*¹², the nomenclatural problems concerning old nomina are sometimes very complicated. In many cases a more detailed terminology than that of the *Code* is called for. The technical nomenclatural terms that can be used are the following.

Term {etymology of the term G: Greek, L: Latin}: short definition. Antonym (= opposite word), if relevant. **Code: equivalent term** used in the *Code*¹², if available.

Apograph {G: ἀπό (*apo*), 'away from, far from'; γράφω (*grapho*), 'I write'}: a category of aponym: any subsequent paragraph of a hoplonym. Antonym: protograph. **Code: subsequent spelling.**

Aponym {G: ἀπό (*apo*), 'away from, far from'; ὄνομα (*onoma*), 'name'}: any subsequent paronym of a protonym, modified in spelling, rank and/or, if relevant, onymorph. Antonym: protonym. **Code: no term.**

Binomen (plural **binomina**) {L: *bis*, 'twice'; *nomen*, 'name'}: nomen of rank species, composed of two terms, the generic substantive and the specific epithet. **Code: binomen.**

Distagmonym {G: διαταγμός (*distagmos*), 'doubt, uncertainty'; ὄνομα (*onoma*), 'name'}: nomen that has *not* had a universal or significant use in scientific literature after 31 December 1899 (i.e., that did not appear in at least 25 works, published by at least 10 authors in the immediately preceding 50 years and encompassing a span of not less than 10 years). **Code: nomen oblitum.**

Epithet: specific or subspecific nomen, never bearing a capital, being part of a binomen or trinomen. **Code: species-group name.**

¹⁷ Kottelat, M. 1988, Authorship, dates of publication, status and types of Spix and Agassiz's Brazilian fishes. *Spixiana*, **11** (1): 69-93.

¹⁸ Karrer, C., P. J. P. Whitehead & H.-J. Paepke 1994, Bloch & Schneider's Systema Ichthyologiae, 1801: History and Authorship of Fish Names. *Mitteilungen aus dem Zoologischen Museum in Berlin*, **70** (1): 99-111.

¹⁹ a) Wheeler, A. C. 1988, An appraisal of the Zoology of C. S. Rafinesque. *Bulletin of Zoological Nomenclature*, **45** (1): 6-12; b) Dubois, A. 2008, Authors of zoological publications and nomina are signatures, not persons. *Zootaxa*, 1771: 63-68.

Ergotaxonomy {G: ἔργον (*ergon*), ‘work, action’; τάξις (*taxis*), ‘order, arrangement’; νόμος (*nomos*), ‘law, rule’}: any classification considered valid in a certain work by a given author. *Code*: no term.

Eugraph {G: εὖ (*eu*), ‘well, easily’; γράφω (*grapho*), ‘I write’}: correct spelling of a nomen for a given taxon in a given ergotaxonomy. Because of the Principle of Nomography, this spelling may be imposed by the *Code* to a given nomen, superseding its protograph if necessary, in two situations: [1] mandatory spelling correction (‘justified emendation’) because the protograph is an ‘incorrect original spelling’; [2] mandatory ending correction (‘mandatory change’) because the ending of the protograph must be corrected as a result of a change combination in the species-series or of rank in the family-series. Antonym: nothograph. *Code*: **correct original spelling**, justified emendation, mandatory change.

Exoplonym {G: ἔξοπλος (*exoplos*), ‘disarmed’; ὄνομα (*onoma*), ‘name’}: hoplonym permanently invalidated, either as a result of the Rules of the *Code* or of a specific action of the Commission under its Plenary Power. *Code*: no term.

Hoplonym {G: ὄπλον (*hoplon*), ‘tool, arm, weapon’; ὄνομα (*onoma*), ‘name’}: nomenclaturally available nomen according to the Rules of the *Code*. *Code*: **available name**.

Nomen (plural **nomina**) {L: *nomen*, ‘name’}: a scientific name as defined and regulated by the *Code*. *Code*: **scientific name**.

Nomography {G: νόμος (*nomos*), ‘law’; γράφω (*grapho*), ‘I write’}: a Principle according to which a spelling (eugraph) is imposed to a given nomen, superseding its protograph if necessary. *Code*: no term.

Nothapograph {G: νόθος (*nothos*), ‘wrong, illegitimate’; ἀπό (*apo*), ‘away from, far from’; γράφω (*grapho*), ‘I write’}: subsequent nothograph for a given taxon at a given rank in a given ergotaxonomy. *Code*: **incorrect original spelling**.

Nothograph {G: νόθος (*nothos*), ‘wrong, illegitimate’; γράφω (*grapho*), ‘I write’}: incorrect spelling of a nomen for a given taxon in a given ergotaxonomy. *Code*: **incorrect spelling**.

Nothoprotograph {G: νόθος (*nothos*), ‘wrong, illegitimate’; πρῶτος (*protos*), ‘first, earliest’; γράφω (*grapho*), ‘I write’}: original nothograph for a given taxon at a given rank in a given ergotaxonomy. *Code*: **incorrect original spelling**.

Onymorph {G: ὄνομα (*onoma*), ‘name’; μορφή (*morphe*), ‘form, shape’}: any particular association between genus-series substantive(s) and species-series epithet(s). *Code*: no term.

Parograph {G: παρά (*para*), ‘near, beside, along’; γράφω (*grapho*), ‘I write’}: a category of paronym: any spelling, either original (protograph) or subsequent (apograph), ever used in the literature for a nomen. *Code*: no term.

Paronym {G: παρά (*para*), ‘near, beside, along’; ὄνομα (*onoma*), ‘name’}: any of the appearances of a nomen, either original (protonym) or subsequent (aponym), and concerning its spelling, rank and/or, if relevant, onymorph. *Code*: no term.

Protograph {G: πρῶτος (*protos*), ‘first, earliest’; γράφω (*grapho*), ‘I write’}: a category of protonym: original paragraph of a nomen in the publication where it was originally introduced. Antonym: apograph. *Code*: **original spelling**.

Protonym {G: πρῶτος (*protos*), ‘first, earliest’; ὄνομα (*onoma*), ‘name’}: original spelling, rank and/or, if relevant, onymorph of a nomen. Antonym: aponym. *Code*: no term.

Substantive: generic or subgeneric nomen, always bearing a capital, being part of a binomen or trinomen. *Code*: generic name, **genus name**, name of a genus.

Trinomen (plural **trinomina**) {L: *tres*, ‘three’; *nomen*, ‘name’}: nomen of rank subspecies, composed of three terms, the generic substantive and the specific and subspecific epithets. *Code*: trinomen.

An English translation of a fish’s generic and specific name (the so-called *etymology*) and an explanation how this name applies to the fish in question is provided for many species by Scharpf and Lazara with their [The ETYFish Project](#).

Biological species concepts tend to emphasize continuity, favoring recognition of geographic variation at the subspecific level, while more recent phylogenetic species concepts emphasize divergence, favoring recognition of geographic variants as full species. So the adhered **species taxon concept**²⁰ leads to differences in species recognition.

A **fish species** is a segment of a population-level lineage that is separate from other such lineage segments as indicated by one or more of various possible criteria (e.g., distinguishability, reproductive isolation, monophyly, exclusivity, etc.). A **lineage** is a series of fishes that form a single unbroken and unbranched

²⁰ Bock, W. J. 2004, Species: the concept, category and taxon. *Journal of Zoological Systematics and Evolutionary Research*, **42**: 178-190.

sequence of ancestors and descendants.

Most ichthyologists agree more or less with the **biological**, the **phylogenetic** or the **evolutionary species taxon** (= the unit used to describe biodiversity in nature).

A **biological fish species** is a group of actually or potentially interbreeding natural fish populations which are genetically isolated from other such groups of fishes.

A **phylogenetic fish species** is the smallest recognizable organismal unit in a phylogenetic genealogy. It is a diagnosable sample of (observed or inferred) life cycles, represented by exemplars, hypothesized to attach to the same node in a cladogram, and which are not structured into other similarly diagnosable clusters (so the fish species are exclusive). A **cladogram** is the result of a cladistic analyses and figured as a dichotomous phylogenetic tree that branches repeatedly, suggesting the classification of fishes (or molecules) based on the time sequence in which evolutionary branches arise. The endpoints of the branches represent specific species of fishes. It is used to illustrate phylogenetic relationships and to show points at which various fish species have diverged from common ancestral forms.

An **evolutionary fish species** is an entity composed of fishes that maintain its identity from other entities through time and over space and that has its own independent evolutionary fate and historical tendencies. Some authors more or less combine the latter two and recognize as species: geographically bounded sets of populations that are distinct in morphological traits or are reproductively isolated from congeners, with or without corresponding molecular divergence.

In any case all share the fundamental idea that fish species are segments of lineages at the population level of biological organization (the truly theoretical evolutionary species concept) and the fish species is considered as a terminal in a phylogeny. A **phylogeny** is the history of the evolution of a given lineage of fishes.

Furthermore the **taxon concept** must offer a method of recognizing and delimiting species taxa. See Kottelat (1997), Turner²¹, Kullander²², de Pinna²³, Seegers²⁴ and *Fish and Fisheries* **3** issue 3 (September 2002) for further discussion.

Maybe a unified concept of species²⁵ can bring more coherence in the future, or not²⁶.

Because recognition of species taxa depends on many arbitrary decisions (especially when dealing with broad geographical and temporal ranges) the taxa can be treated differently, so the scientific names of the various freshwater fishes can vary according to different opinions.

Atypical species which may or may not be the same as the typical species are sometimes named with the abbreviations **cf.** (conferre = looks like) or **sp. aff.** (species affinis = closely related species) between the generic and the specific name, for example *Crenicichla* sp. aff. *regani*. These names are listed by us under the typical names (*Crenicichla regani*).

In the list the currently considered valid species names are highlighted in **bold**.

²⁶ Dubois, A. 2011, Species and "strange species" in zoology: Do we need a "unified concept of species"? *Comptes Rendus Palevol*, **10**: 77-94.

Sometimes a **genus** is split up in subgenera and the name of the **subgenus** is written after the genus name between parentheses, for instance *Austrolebias (Argolebias)* and *Austrolebias (Austrolebias)*. *Austrolebias* Costa, 1998 is the oldest name (created by Costa in 1998; *Argolebias* by Costa in 2008) and this taxon is then called the **nominotypical subgenus**, usually simply written as *Austrolebias*. However, some workers prefer to separate a **monophyletic group** (= a taxon comprised of two or more fish species that includes the ancestral fish species and all and only the descendants of that ancestral fish species) as a genus and don't use the subgenus notation.

If the genus in the list has been written between single quotation marks, for instance '*Hyphessobrycon*' (for the American tetras not belonging to the genus *Hyphessobrycon* sensu stricto), it means that the genus is known to be polyphyletic and has to be split up in monophyletic genera, however this has not yet been done. In the (near?) future the listed species will probably be assigned to other genera.

Genus-group names are singular in usage in a formal grammatical sense, for instance "*Aphanius* is found in ..." but "the species of *Aphanius* are found in ...". **Family-group names** are plural in usage in a formal grammatical sense, for instance "Cyprinidae are found in ..." or "the species of the Poeciliidae have been ...".

In the name list currently **valid genera** have been highlighted in **bold**, followed by a statement (written between brackets) to which family and subfamily the genus has been assigned. It is wise to realise that the classification of fishes is in a state of flux and many changes in the classification are expected in the near future. Also, a lot of species and genera remain to be described (Lundberg *et al.* 2000⁷, Reis *et al.* 2003⁸). The biodiversity of aquatic habitats ranks among the most poorly known, especially in tropical and subtropical regions. This lack of knowledge includes the basic systematics, taxonomy and phylogenetic relationships of the fishes and their ecologies.

↔ behind a **genus** name in the list means a lot of shifting of species between the genera has occurred. So, if you are looking for a particular specific name it is wise to look under the other genus name(s) too.

A group of closely related species is sometimes called a **species group** or **species complex** (the taxon **supraspecies** might be used for this category, see chapter 2). The oldest species name is commonly used to designate such a group and it is suggested to use non-italicized and capitalized names for species groups, for example the *Sexfasciatus* species group of the genus *Epiplatys*.

Scientific names need to be changed as taxonomic insight changes. If a species is found to belong to another genus, **the first name** changes. As we have already remarked, sometimes the ending of the second name must be changed too to agree in gender.

If an older scientific name has been discovered (caused by synonymisation of two names or when an older available name has been found) **the second name** changes (the older name is given **priority**).

Furthermore, the scientific name must be unique to the animal kingdom (so a newly created name must never have been used before; the existence of a name can nowadays easily be checked by the Internet (Google or with the help of a more 'zoological' search engine). If there are two exactly the same names in use, then one name must be changed.

See Kottelat (1997) for an explanation of the scientific naming of fishes.

Maybe it will be possible in the future to achieve more name-stability by making a list of available names²⁷ (Article 79 of the *Code*¹²).

²⁷ Eschmeyer, W. N. 2003, *Introduction to the series Annotated Checklists of Fishes*, California Academy of Sciences Annotated Checklists of Fishes No. 1, 5 pp.

Man uses several categories (called **taxa**; the plural of **taxon**, a grouping of organisms at any specified level) to express the relationships of living organisms. A conception of all those relationships is called a **classification**.

A **biological classification** depicts the phylogenetic (genealogical) relationships between organisms. The modern system of classification is the hierarchical system proposed in the eighteenth century by Carl von Linné (also known by his Latin name Carolus Linnaeus). Species are classified in the Linnaean system on the basis of an evaluation of their anatomical similarities and differences. These discrete characters have to be homologous, independent and variable. Anatomically similar species are grouped together in a common taxonomic category (a **rank**) and separated from those that are anatomically different. Therefore, taxonomic relationship is based on degree of structural similarity.

Ranking is the placement of a taxon in the appropriate category in the hierarchy of categories. It is important to understand that categorical ranks are kinds and not taxa. So when we refer to the family Characidae, we are referring to a particular taxon (*Charax* and relatives) ranked as a family and not to the categorical rank of family.

A taxonomic category can be assigned to a nomenclatural rank as regulated by the *Code*¹² (the **ranked categories**, for example: species, genus, family) or not (**unranked categories**, for example: species group, sibling species, variety, morph, plesion).

The **natural classification** of a group is the classification supported by the greatest agreement of the character state distributions. The goal of classification is the organization of knowledge. The function of a classification is the same as that of names and nomenclature, namely a tool for information retrieval and for safeguarding understanding of the relationships between organisms.

Systematics is the science of organic diversity. It is the study of the kinds and diversity of organisms and of the relationships between them. In systematics the search of monophyletic units and of sister group relationships is an important part of primary research. The derived hypotheses of the interrelations between species are subject to falsification and to change.

In contrast, **classifications** are a secondary step, as they are derived from such hypotheses. Classifications are sometimes based on different philosophies, which permit different solutions as to how results in the fields of **taxonomy** (a specialized branch of biology which studies the rules and procedures used in describing, naming and classifying species) and **phylogenetics** (the evolutionary relationships between organisms) can be transposed into a **taxonomic system**. Taxonomy will always be a work in progress.

The taxonomic system should display a kind of robustness, so that every new discovery or hypothesis should not be liable to modify the whole system. Thus classifications can be different (note that the **generic classification** is directly reflected in the scientific name!) and the classification is constantly changing by ongoing research. Particularly the subtribe, tribe and subfamily allocations vary a lot. See chapter two for the adopted classification of the various freshwater fishes.

A **taxon** above the species level (genus, subtribe, tribe, supertribe, subfamily, family, superfamily, suborder, order) must consist of one word and must begin with a capital letter. A genus-group name (a generic or subgeneric name) is written in italics, the names of the other ranks are normally written.

A **genus-group name** has a **type species** and a **family-group name** (a name in the family-series: superfamily, family, subfamily, supertribe, tribe or subtribe) has a **type genus**.

The **typified higher taxon names** are formed from the **stem** of the type genus name (the genitive without its case-ending) plus a **suffix** (= a special ending). Subtribe: +ina, tribe: +ini, (supertribe: +idi, not regulated by the *Code*), subfamily: +inae, family: +idae, superfamily: +oidea [and as usual in fishes: suborder: +oidei, order: +iformes, but these suffixes are not regulated by Article 29.2 of the *Code*¹²].

Rules for the determination of the stem of the type genus are described in Article 29.3 of the *Code*¹².

For example, *Cyprinus* → stem: Cyprin → Cyprinina, Cyprinini, Cyprinidi, Cyprininae, Cyprinidae, Cyprinoidea, Cyprinoidei, Cypriniformes; *Charax* → stem: Charac → Characina, Characini, Characidi, Characinae, Characidae, Characoidea, Characoidei, Characiformes; *Petromyzon* → stem: Petromyzont → Petromyzontidae; *Cynolebias* → stem: Cynolebi → Cynolebiinae; *Poecilia* → stem: Poecili → Poeciliidae; *Rhoadsia* → stem: Rhoadsi → Rhoadsiini.

All these **family-group names** must also be formed according to the *International Code of Zoological Nomenclature* (Articles 11.7, 13 and 29)¹². The name can be followed by the first author(s) who coined that name and the year of publication. The tracking down of the first author of a certain family-group name is a difficult job as one has to check a huge amount of literature and there are various opinions on the subject. Beginning with 2000 the author of a new family-group name must give a citation of the name of the type genus (according to Article 16.2)¹² and, to make retrieval easier, it is highly recommended to mark the name as new. A family-group name first published after 1930 and before 1961, which has been rejected by an author with the help of Article 13 of the former *Code* (the third edition; mostly if the name was not accompanied by a description) after 1960 and before 2000, is not available. Furthermore the family-group name does not need to be the oldest synonym and the name of the type genus does not have to be valid anymore (of course it must be based on an available name and not a homonym, Article 39)¹².

Stability of family names is very important (family names are among the most widely used of all technical names for fishes!), so a name in general acceptance and the prevailing spelling of that name (Articles 29.3.1.1 & 29.5)¹² have to be kept in usage (so we use Eleotridae and not Eleotrididae), although it is not always easy to retrieve which spelling is in prevailing usage (Schilbeidae / Schilbidae or —chromidinae / —chrominae). Some workers prefer grammatically correct names (derived from the correct stem of the Greek or Latin generic name Art. 29.3¹²); e.g., Myliobatidiformes in stead of Myliobatiformes, Engraulididae in stead of Engraulidae, —glanidinae in stead of —glaninae, Macrotrematinae in stead of Macrotreminae.

Sadly, the term usage of names (or **prevailing spelling**) is a difficult concept in nomenclature²⁸. It is certainly not wise to change a widely used family name. According to Article 29.4¹² the original spelling of a family-group name should, from 1999 on, not be changed.

The history of **family-group names** (as we now use them) goes back to the early 19th century. See the review of Cuvier on Collection Building²⁹ for the family names used by early workers on fish classification. Many scientific family names were published by Rafinesque-Schmaltz (1810) and Rafinesque (1815), Risso (1827), Bonaparte (1831–1838), Bleeker (1859, 1862 and 1863) and Günther (1868). See also the publication of Gill³⁰ for some notes on namers of families.

In chapter two we report the creators of the various family-group names in use for freshwater fishes.

With the fourth edition of the *Code*¹² some rules on the availability of **family-group names** from the third edition of the *Code* were changed and formerly invalid usage became valid. As the family-group name must be clearly used to denote a suprageneric taxon, before 1900 may be stated in a not latinized form and before 1930 the name could be proposed without a differentiating definition, there is room for different opinions on the authorship and date of the family-group names. All family-group names used in Fishes are listed in Eschmeyer's Catalog of Fishes⁴.

The **principle of coordination** of the *Code* (Article 36)¹² states the same authorship and date for every rank of the **family-group name**. In the adopted classification (chapter two) the current family-group names are listed with their authors and year of publication only once (at the highest rank), so we list Characidae Latreille, 1825 and we don't add Latreille, 1825 to Characinae and Characini.

The names of the families are also listed in chapter 4, followed by their position in the classification, so the unfamiliar reader can trace the place of the family in the classification or he / she can check the index.

²⁸ Dubois, A. 2005, Proposed rules for the incorporation of nomina of higher-ranked zoological taxa in the International Code of Zoological Nomenclature. 1. Some general questions, concepts and terms of biological nomenclature. *Zoosystema*, **27** (2): 365-426.

²⁹ Pietsch, T. (Ed.) 1995: Georges Cuvier 1828, *Historical Portrait of the Progress of Ichthyology, from its Origins to Our Own Time*, Johns Hopkins University Press, Baltimore, US, 366 pp.

³⁰ Gill, T. N. 1889, On the classification of the mail-cheeked fishes. *Proceedings of the United States National Museum*, **11** (no. 756): 567-592 [namers of families on p. 591-592].

The other **higher rank names** (suborder, order, superorder and class, the **upper uninominal group-names**) are not regulated by the zoological *Code*¹² (at least not yet^{28,31}). The new BioCode (as mentioned before)¹³ provides some rules for the higher rank **typified** names. If the Biocode comes into force, we must use for a **class** the ending –opsida, for a **subclass** the ending -zoidae, for an **order** the ending –ales and for a **suborder** –inae (the suffixes for typified fish order and suborder names now widely in use are –iformes, resp. –oidei). The **non-typified names**, e.g. Vertebrata or Chondrichthyes, remain unaltered.

In the adopted classification (chapter two) the higher rank names are sometimes followed by the surname(s) of (a) scientist(s) (and year of publication) who recently (re)defined the higher taxon and arranged the families under the mentioned suborder or order.

A **clade** is a group of fish species comprising a common ancestor and **all** of its descendants (a **monophyletic** group by definition). Unfortunately sometimes a clade (defined in a phylogenetic context) cannot be equated with a **formal taxonomic rank**, so it cannot be named with the current rank-based Code as mentioned above. A solution would be the use of the **PhyloCode**³² (a phylogenetic code of biological nomenclature, see <https://www.ohio.edu/phylocode/> or www.phylonames.org).

Maybe it will be possible in the future with this code to name species and clades as biological entities in a phylogenetic context. With this naming system the name of a fish species or of a fish clade would never change. However, the phylocode is still heavily debated, see for instance Dubois²⁸, Minelli³³, Kraus³⁴, and references therein. Another solution could be a compromise, i.e., naming of the clades of life with the phylocode and naming the species (and the other code-regulated ranks) with the ICZN Code³⁵.

There has already been much effort to revise the Code, probably to be introduced in a new edition of the Code³⁶

1.2 Common names

A **vernacular name** is a name proposed in a language and used for general purposes. It is a name with a general meaning. These names are known as **common names** and many fish species have several. Common names are not capitalized in text use except for those elements that are proper names (for example: salmon or European salmon). A proposal to treat a common name as a proper noun and to write it accordingly with capitals was made and has been accepted by the American Fisheries Society in 2013). When capitalized the common name would convey recognition as a distinct, individual biological entity and the capitals would emphasize the name in a text. However, it is still common use to write the common names in lower-case.

In some countries a committee on names of fishes has been installed who can select a certain name as the **preferred common name**.

Names treated by us as preferred common names are the names defined in the following publications:

- Robins, C. R. *et al.* 1991, *World Fishes Important to North Americans exclusive of species from the Continental Waters of the United States*, Special Publication 21, American Fisheries Society, Bethesda, Maryland, US, 243 pp.
- Nelson, J. S. *et al.* 2004, *Common and Scientific Names of Fishes from the United States, Canada, and Mexico*, 6th edition, American Fisheries Society, Special Publication 29, Bethesda, Maryland, US, 386 pp. (with corrections: *Copeia* 2006 (3): 559-562; see also the 7th edition 2013).
- *List of standardised Australian fish names*, CSIRO Marine Research / Fisheries Research and Development Corporation / Seafood Services Australia, 2005 (draft 18 November 2004 and update; <http://www.marine.csiro.au/caab/namelist.htm>)
- Kottelat, M. & J. Freyhof 2007, *Handbook of European Freshwater Fishes*, Publications Kottelat, Cornol, CH, 646 pp.
- Fricke, R., M. Bilecenoglu & H. M. Sari 2007, *Annotated checklist of fish and lamprey species (Gnathostomata and Petromyzontomorphi) of Turkey, including a Red List of threatened and declining species*, Stuttgarter Beiträge zur Naturkunde, Serie A (Biologie), Nr. 706: 1-169 (plus additions in Çiçek, Birecikligil & Fricke 2015 and Çiçek *et al.* 2018).
- Leunda, P. M. *et al.* 2009, *International Standardization of Common Names for Iberian Endemic Freshwater Fishes*, *Limnetica*, **28** (2): 189-202.
- Matamoros, W. A., J. F. Schaefer & B. R. Kreiser 2009, *Annotated checklist of the freshwater fishes of continental and insular Honduras*, *Zootaxa*, 2307: 1-38.
- Page, L. M., H. Espinosa-Pérez, L. T. Findley, C. R. Gilbert, R. N. Lea, N. E. Mandrak, R. L. Mayden, and J. S. Nelson 2013. *Common and scientific names of fishes from the United States, Canada, and Mexico*, 7th edition, American Fisheries Society, Special Publication 34, Bethesda, Maryland, US.

and some of the names used by Venkateswarlu 1984, Whitehead 1985 (FAO-names), Whitehead *et al.* 1988 (FAO-names), Allen 1991, Eccles 1992 (FAO-names), Rainboth 1996 (FAO-names), Seegers 1996, Reshetnikov *et al.* 1997, Bussing 1998, de Vos, Snoeks & Thys van den Audenaerde 2001, Konurbaev & Timirkhanov 2003, Seegers *et al.* 2003, Taphorn 2003, Chen & Chang 2005, Ocock *et al.* 2006, Scott *et al.* 2006, Anna Mercy *et al.* (2007), Seegers 2008, Vidthayanon 2008, Hanel, Plíšťil & Novák 2009, Hensen, Ploeg & Fosså 2010³⁷, plus some frequently used **FAO-names** (= a name in use by the Food and Agriculture Organization of the United Nations).

In the list the **common names** are written after the scientific name and placed between double quotation marks ("). After the preferred common name and some English names used by aquarists, the common names of Japanese freshwater fishes in Japanese (from Shiino 1972, Yuma *et al.* 1998 and Sakai *et al.* 2001) and the preferred common names of Mexican freshwater fishes in Spanish (from Nelson *et al.* 2004) are mentioned. At last we will mention the Dutch (or South African) name.

More common names can readily be found on the Internet, for instance at FishBase [Froese, R. & D. Pauly (editors) 2013, **FishBase**, World Wide Web electronic publication: www.fishbase.org/search.php]. This database contains more than 324 thousand common names in over 100 languages and is still growing. Also the deeply fish website lists numerous common names (<http://deeplyfish.com>).

Some dictionaries and encyclopedias with fish names are mentioned in: G. H. Bell & D. B. Rhodes 1994, A

³⁷ Hensen, R. R., A. Ploeg & S. A. Fosså 2010, *Standard names for freshwater fishes in the Ornamental Aquatic Industry*, Ornamental Fish International Educational Publication 5, OFI, Maarssen, The Netherlands, 145 pp. [it is a pity the authors did not find time to standardize the common names too!]

Guide to the Zoological Literature, Libraries Unlimited, Englewood, Colorado, US, pp. 179.

Multilingual common names for **European freshwater fishes** can also be found in: M. Blanc, P. Bănărescu, J.-L. Gaudet & J.-C. Hureau 1971, *European Inland Water Fish (A multilingual catalogue)*, Fishing News (Books) Ltd / Food and agriculture organization of the United Nations, London / Rome, 24+ pp. and in V. E. Sokolov 1989, *Dictionary of animal names in five languages: Latin, Russian, English, German and French*, Volume Fishes, Russky Yazyk Publ., Moscow, 733 pp.

English, French, German and Russian names can further be found in the "Freshwater Fishes of Europe" serial work and in Ladiges & Vogt (1965). Seeley (1886) and Bauch (1963) also list a lot of common names. Albanian names can be found in Rakaj & Filloko (1995); Croatian names in Zupančič (2008); Czech names in Reiser (1996), Hanel & Novák (2000-2009), Hanel & Andreska (2011) and Plíštil (2012); Dutch names in Nijssen & de Groot (1987); Finnish names in Koli (1994, 1998) and in Varjo, Koli & Dahlström (2004); French names in Belloc (1899) and Keith & Allardi (2001); Greek names in Economidis (1995); Hungarian names in Botta (1985) and Sevcsik & Erős (2008); Italian names in Bruno (1987), Grimaldi & Manzoni (1990), Bianco (1995) and Zerunian (2004); Norwegian names in Pethon (1999); Portuguese names in Amaça (1996), Costa Pereira (1995) and Leunda *et al.* (2009); Russian names in Nikolski (1957); Slovenian names in Svetina & Verce (1969), Povž (1995), Povž *et al.* (1998) and Zupančič (2008); Spanish names in Lozano (1964), Costa Pereira (1995), Elvira (1995) and Leunda *et al.* (2009); Swedish names in Kullander (1999); Turkish names in Balik (1995) and Fricke, Bilecenoglu & Sari (2007).

Variants in spelling of the **English names** (for example, rednose, red-nose, rednosed, red-nosed) are not considered as separate names and have been excluded from the list. Furthermore simplicity in names is favoured, as already outlined by the committee on names of fishes of the American Fisheries Society / American Society of Ichthyologists and Herpetologists (Nelson *et al.* 2004). Hyphens, suffixes and apostrophes have been omitted except when they are orthographically essential (for example, blue-eye, white-edge, fin-eater, silver-yellow) or join two fish names, neither of which represents the fish in question, into a single name (eel-catfish, pike-characin, shark-catfish, shark-minnow, trout-cod or trout-perch). Compounded modifying words have usually been treated as **singular** nouns in apposition with a group name (as already stated we use no hyphens, for example, spottail shiner, redeye tetra). Plural modifiers have usually been treated in adjectival form (for example, blackbanded sunfish, redstriped eartheater) unless the plural nature is obvious (for example, twospot astyanax, threespot tilapia).

For instance the following reductions were made: blackfinned → blackfin, bluebellied → bluebelly, bluetailed → bluetail, bluntheaded → blunthead, eightbanded → eightband, goldeneared → goldenear, hognosed → hognose, longfinned → longfin, redtopped → redtop, shortnosed → shortnose, sixbarred → sixbar, tworayed → tworay, yellowcheeked → yellowcheek, etc..

As a pronunciation aid we use ~s's in stead of ~s', for example Myers's Hatcherfish.

In general the **order of the common names** is: preferred name (English), aquaristic name(s) (English), Japanese name (Japanese), Mexican name (Spanish), Brazilian name (Portuguese) and Dutch names (Dutch). For example: "rainbow trout / Steelhead Trout / Redband Trout / Niji-masu / trucha arco iris / Truta-arco-iris / Amerikaanse regenboogforel". Preferred names are written in lower-case as explained above (ram cichlid, Buenos Aires tetra). English names used by aquarists are written beginning with capitals (Butterfly Cichlid, Redtail Tetra).

Dutch names of aquarium fishes always begin with a capital because there are no preferred Dutch names (Antennebaarsje, Ruitenvlekozalm, Rode rio, Gele Kongozalm). For fishes of South Africa we give the Dutch-like "Afrikaanse" name. The Dutch names given by Bleeker and contemporaries in the nineteenth century are no longer in use and are not listed³⁸.

Many **aquarium fishes** do not have a Dutch name, because in general aquarists in the Netherlands use the scientific names. We tried to list all the Dutch common names in use, we disregard some curious new names coined by translators (because these names are seldom adopted by aquarists).

To save space only the frequently used **English** and **Dutch names** of the more general freshwater aquarium fishes and of the freshwater fishes used in aquaculture are cross-referenced. With the pdf-version it does not matter, as one can simply find a name in the text with the help of the computer [Find].

German names of aquarium fishes are not given because they have already been listed in many publications

³⁸ Jacques Pellegrin once complained that the aquarists did not use the old common names as proposed by Lacepède, Cuvier, etc., but those early French names were also not adopted by aquarists.

(see for instance the books of Arnold & Ahl, Kramer & Weise, Krebs, Riehl & Baensch, Stallknecht, Sterba and the various Aqualog reference fish of the world books).

Czech names of aquarium fishes can be found in Hanel & Novák (2001-2009) and on www.biolib.cz.

Danish names of aquarium fishes can be found in Laursen (1949) and in Schiøtz & Christensen (1968).

Finnish names of aquarium fishes can be found in Varjo (1982) and in Varjo, Koli & Dahlström (2004).

French names of aquarium fishes can be found in Angel (1946), Beck (1950), Copin (1960), Langel-Kretchmar (1972), Rousselet-Blanc (1975), Maitre-Allain (1992) and Allain *et al.* (2003).

Hungarian names of aquarium fishes can be found in Horn & Zsilinszky (1970, 1988).

Portuguese names of aquarium fishes can be found in de Oliveira (1977) and Santos (1987).

Russian names of aquarium fishes can be found in Peshkov (1961), (Machlin (1966) and Kochetov (1989).

Slovenian names of aquarium fishes can be found in Jerič (1984).

Spanish names of aquarium fishes can be found in Cánovas & Puigcerver (2002) (some native fish names used in Argentina can be found in Lahille 1922 and Achenbach & Bonetto 1957).

Swedish names of aquarium fishes can be found in Aurell, Jacobsson & Lindgren (1953, 1968) and in Fohrman (2004).

The big advantage of common names is that they can be stabilized. Hopefully the list will contribute to that goal. A lot of aquarium fishes already have common names, so there is no real need to create more names (which can lead to confusion).

We have selected a few **aquarium** and **freshwater fish books** that will allow the reader to look back on more than hundred years of keeping and admiring freshwater aquarium fishes. We have selected some important books on aquarium and freshwater fishes to cover more or less the last century, taking in account their credibility and their general access (some books available to every-one by the Internet <http://www.biodiversitylibrary.org/>; some books were published in various languages and then the other language-editions can be consulted instead of the cited edition).

Unfortunately it was not possible to check if all the identifications are correct. When in doubt the illustration was given a greater value than the description.

Sadly many illustrations were copied, so then we had to assume the used name was correct.

Regrettably many **“waste-basket” names** which are probably used for various fish species exist, for instance: *Potamotrygon motoro*, *Characidium fasciatum*, *Chilodus punctatus*, *Leporinus fasciatus*, *Semaprochilodus taeniurus*, *Charax gibbosus*, *Creagrutus beni*, *Roeboides microlepis*, *Myleus rubripinnis*, *Serrasalmus rhombeus*, *Hoplias malabaricus*, *Cobitis taenia*, *Megalechis thoracata*, *Hypostomus commersoni*, *Hypostomus plecostomus*, *Hypostomus punctatus*, *Ancistrus dolichopterus*, *Ancistrus hoplogenyis*, *Farlowella acus*, *Otocinclus affinis*, *Rineloricaria parva*, *Bunocephalus coracoideus*, *Malapterurus electricus*, *Chaca chaca*, *Pimelodella gracilis*, *Kryptopterus bicirrhis*, *Mystus vittatus*, *Pimelodus clarias*, *Sorubim lima*, *Gymnotus carapo*, *Eigenmannia virescens*, *Poecilia sphenops*, *Aequidens pulcher*, *Cichla ocellaris*, *Cichlasoma facetum*, *Crenicichla saxatilis*, *Geophagus surinamensis*, *Hemichromis bimaculatus*, *Satanoperca jurupari*, *Mogurnda mogurnda*, *Brachygnathus nusus*, *Brachygnathus xanthozona*.

With the **citations** the reader can at least notice the occurrence of some scientific names during a century of keeping freshwater aquarium fishes. See for some more citations the Master Index of Freshwater Fishes: www.webcityof.com/miffitil.htm or check the vivarium-databases³⁹ for many German periodicals.

³⁹ Seehaus, T. & J. Robel 2001, *Die Datenbank der deutschsprachigen Periodika*, cd-rom [see www.aqua-terra-net.de/ATLI2/atli.htm]; Maleck, W. & D. Schuster 2004, *VILAUUS: Vivaristisches Literatur-Auskunfts-system*, VDA, DE.

*One of the pioneers of the aquarium hobby, Ph. H. Gosse (in 1853 / 1854), was also troubled by names [by the way, the word **aquarium** was occasionally used for a water container in a green house or garden ("an ornamental piece of water") since at least 1808 and in some scientific studies as early as 1673]:*

THE NAME.

A neat, easily pronounced and easily remembered, significant, and expressive term is so advantageous, that it is worth taking some trouble to select the best. For the subject of this volume some have chosen the word Vivarium, and I have myself occasionally used it. The only objection to it is that it lacks distinctness of signification. It literally means any inclosure in which living animals are kept; and the ancients used it to signify a park, a rabbit-warren, and a fish-pond; indeed, I am not sure whether our word "warren," is not "Vivarium" Saxonised. Thus it is quite as applicable to the whole Zoological Garden as to any particular house, yard or tank in it.

To avoid this indefiniteness others have used the term Aqua-vivarium. The objection to this is its awkward length and uncouthness, which render it unsuitable for a popular exhibition or domestic amenity.

I have adopted the word **AQUARIUM**, as being free from the objections which lie against the other two, while it possesses the neatness of the former, and the definiteness of the latter. The term had already been in use among the botanists, to designate the tanks in which aquatic plants were reared; and the employment of the same term for our tanks is not forbidden by the character of the service to which they are put, since this is not an alteration, but only an extension.

1.3 Examples from the list

The various entries in the list are explained in the following examples. Typical listings (between square brackets) are as follows:

[***Abbottina* Jordan & Fowler, 1903** (CYPRINIDAE>Gobioninae)]

The genus *Abbottina* is now considered as valid and was described by Jordan & Fowler in 1903, belongs to the family Cyprinidae and has been assigned to the subfamily Gobioninae.

[***Abbottina rivularis* (Basilewsky, 1855)** (Aquarien Atlas Band 3 (1991):168) "Chinese false gudgeon / Tsuchifuki"]

The species *Abbottina rivularis* is currently regarded as valid and was described by Basilewsky in 1855, but in a different genus so the name of the author (Basilewsky) and the year of publication (1855) must be placed between parentheses. The fish has been mentioned by Riehl & Baensch in 1991 (see the list of references in chapter 3 for the full reference) on page 168.

If the cited author(s) used a different scientific name for a species, their name is given at the beginning of the citation. **Spelling errors** (e.g. **gender mistakes**, -us or -a or -um or -fer or -ferum) made in the references are **omitted**, only a **different** scientific name is mentioned.

The English preferred common name (no capital letter F and G) and the Japanese vernacular name are listed.

[*Abbottina sinensis* → *Abbottina rivularis*]

The species *Abbottina sinensis* is no longer considered valid, the holotype (or the lectotype or neotype) is thought to belong to the species *Abbottina rivularis*. The available name *Abbottina sinensis* is regarded as a synonym of the name *Abbottina rivularis*.

[*Anacyrtus* → *Charax*] means species of the genus *Anacyrtus* can be found under *Charax*. In most cases (not always!) this means the former genus (*Anacyrtus*) has been accepted as a synonym of the latter (*Charax*).

sp. means a species; ssp. means a subspecies; spp. means more than one species.

[**Genus sp. Xxxx**] means the species is still **undescribed** (so not formally named) or it is not known which already published scientific name belongs to the mentioned fish.

Although we admit that it has little use of listing these names without a literature reference, we hope to provide an identification in the future. These names are already in use by some workers and hopefully the identification is in progress.

[*Genus* spp.] means any species of the genus.

We use the same notation as the International Union for the Conservation of Nature (IUCN) to categorize the freshwater fishes with a great risk of global **extinction**:

- EW behind the scientific name in the list means the species is **extirpated** in the wild, but the species still exists as a captive population.
- E behind the scientific name in the list (and sometimes behind a common name) means the species (or local race) has been extirpated in the wild and the species is **extinct**.
- E? (or EW?) means the species is possibly extinct or extirpated in the wild.

Sadly many freshwater fishes are becoming more and more at risk of **extinction**⁴⁰ (sometimes even caused

⁴⁰ Harrison, I. J. & M. L. J. Stiassny 1999, The quiet crisis: a preliminary listing of the freshwater fishes of the world that are extinct or 'missing in action', p. 271-331 in R. D. E. MacPhee (ed.), *Extinctions in Near Time*, Kluwer/Plenum press, New York, US, 433 pp.; Duncan, J. R. & J. L. Lockwood 2001, Extinction in a field of bullets: a search for causes in the decline of the world's freshwater fishes. *Biological Conservation*, **102**: 97-105; Collares-Pereira, M. J., I. G. Cowx & M. M. Coelho (editors) 2002, *Conservation of freshwater fishes: Options for the future*, Fishing News Books, Oxford, UK, 462 pp.; Dudgeon, D. *et al.* 2005, Freshwater biodiversity: importance, threats, status and conservation challenges. *Biological Reviews*: 1-20; Editorial 2010, Conservation of Fishes. *Journal of Fish Biology*, **76**: 2003-2008; Alofs, K. M. *et al.* 2014, Mind the (information) gap: the importance of exploration and discovery for assessing conservation priorities for freshwater fish. *Diversity and Distributions*, **20** (1): 107-113; Dias, M. S. *et al.* 2017, Anthropogenic stressors and riverine fish extinctions. *Ecological Indicators*, **79**: 37-46.

by “aquarists”!⁴¹). See the website for the courageous effort of the [International Union for Conservation of Nature and Natural Resources](http://www.iucn.org) on freshwater fish biodiversity: <http://iucn.org>.

Hybridization⁴² between two species is listed with the help of a **hybrid formula** (an expression consisting of the names of two taxa separated by a multiplication sign, designating a fish of hybrid origin), as: species 1 x species 2 with the parental species in alphabetical order; hybridization between a hybrid and a species as: (species 1 x species 2) x species 3.

We can not follow a convention of naming the male or female first (species 1), because with most intercrossings (for instance in Poeciliidae) the particular order of the hybridization(s) is not known.

If a ‘scientific looking’ name is not **italicized** and written beginning with **Capitals**, then the identification of the species was wrong. The used ‘Scientific Name’ in the aquarium literature was incorrect and the species is mentioned under its valid scientific name.

For instance:

[Aphyosemion Beauforti → *Fundulopanchax gularis*

Aphyosemion beauforti → *Aphyosemion cameronense*]

This means aquarists used the name Aphyosemion Beauforti for a strain of *Fundulopanchax gularis*.

The name *Aphyosemion beauforti* (the ‘true’ beauforti) is a **junior synonym** of the (older) name *Aphyosemion cameronense*. Both described species are now considered as one species, the names are synonyms (the name *Aphyosemion cameronense* is called the **senior synonym**).

Wrongly used L-numbers are listed as [“Lxxx”].

In some rare cases the oldest name of a set of synonyms is not the valid name. The Code (1999)¹² states that the **principle of priority** is to be used to promote stability and not upset long-accepted names. Therefore, in accordance with that principle, the application of reversal of precedence of two names and the continuation of the **prevailing usage** of a younger synonym is allowed when two conditions are met (Article 23.9)¹²: (1) a name has not been used as valid since 1899, and (2) the valid name has been used as such in at least 25 works, published by at least 10 authors during the past 50 years, encompassing a span of not less than 10 years. If both conditions apply, then the older name is invalid and qualified as a **nomen oblitum** (a forgotten name, not valid), whereas the younger synonym is valid and qualified as a **nomen protectum** (a protected name, accepted as valid). As we have already mentioned before, the procedure is somewhat tedious.

There can be a second reason why a ‘scientific looking’ name has not been italicized and written beginning with capitals. Namely if the species has not been correctly described according to the Code¹² (then the name is called a **nomen nudum** and such a name is unavailable) or if the name has already been used for another species (then the name is called a **homonym** and such a name is not valid). In both cases the wrong name has to be replaced by a valid name.

[African knifefish → *Xenomystus nigri*

African Kuhli → *Amphilius platyichir*]

The name African knifefish is the preferred common name of the species *Xenomystus nigri*. The name African Kuhli is the aquarist’s name of the species *Amphilius platyichir*.

[Afrikaanse glasmaerval → *Parailia pellucida*

Afrikaanse karperzalmen → Alestidae]

The name Afrikaanse glasmaerval is the Dutch name of the species *Parailia pellucida*. The name Afrikaanse karperzalmen is the Dutch name of the family Alestidae.

⁴¹ McDowall, R. M. 2004, Shoot first, and then ask questions: a look at aquarium fish imports and invasiveness in New Zealand. *New Zealand Journal of Marine and Freshwater Research*, **38**: 503-510; Ishikawa, T. & K. Tachihara 2014, Introduction history of non-native freshwater fish in Okinawa-jima Island: ornamental aquarium fish pose the greatest risk for future invasions. *Ichthyological Research*, **61**: 17-26.

⁴² See for a review: Scribner, K. T., K. S. Page & M. L. Bartron 2001, Hybridization in freshwater fishes: a review of case studies and cytonuclear methods of biological inference. *Reviews in Fish Biology and Fisheries*, **10**: 293-323.

The Dutch and English names of the more general freshwater aquarium fishes are cross-referenced as well as the English names of the freshwater fishes used in aquaculture.

[[Toxotidae \(archerfishes / Schützenfische / schuttersvissen\) \(CARANGIFORMES>Toxotoidei\)](#)]

The scientific family-names are recorded in the list (in blue print) with the English, German and Dutch common names and its systematic placement in the classification.

The list can of course be used in connection with other books and magazines. The search is mostly straightforward. Just look up the used scientific name in the list. The name can still be valid or you can find a reference to the current name. Then proceed by identifying the species with the given references.

Computer assisted searches with the help of the Acrobat **Find** function [**Ctrl + f**] (and maybe followed by [Enter] to find the next location) can locate all the words quickly. E.g., searching L 001 [Find L 001] leads to the beginning of the L-numbers and searching L001 [Find L001] leads to *Pterygoplichthys joselimaianus* in the text; [Find L01] locates the species L010 – L019; [Find L1] locates the species L101 – L199.

With very old literature (before 1928) searching takes a bit longer, because we did not list every possible combination of genus and species names to save space.

For instance one is reading the “**Sonderheft** zum 25. Jahrgang” of the “Blätter für Aquarien- und Terrarienkunde” published in 1915. On page 49 an interesting article by A. Landeck on the sexual dimorphism of the then known aquarium fishes begins.

From page 52 of the Sonderheft onwards the aquarium fishes are arranged alphabetically. Most current scientific names can easily be traced.

The used name “*Acanthopthalmus Kuhlii* C. & V.” leads via *Acanthopthalmus* to *Pangio semicineta* (Fraser-Brunner, 1940), notice some question marks so the identification is not certain! According to the list the name *Acanthopthalmus Kuhlii* was used for this species from approximately 1925 until 1954. The species *Pangio kuhlii* (Valenciennes, 1846) (the ‘true’ *Kuhlii*) was probably in the hobby from about 1935 onwards. Furthermore *Pangio semicineta* can even be a synonym of *Pangio kuhlii*. So then we would have one species with the name *Pangio kuhlii* (Valenciennes, 1846).

The used name “*Acara bimaculata* Gthr.” leads to *Cichlasoma bimaculatum* (Linnaeus, 1758) (the name was used from 1907 until 1914), but there is a question mark, so the identification of the species is uncertain.

On page 57 of the Sonderheft: “*Fundulus gularis* Boul. var. gelb” can be traced with some effort. Not in *Fundulus* [there is: *Fundulus gularis* → *Fundulopanchax gularis*, but gelb/yellow?], so maybe in *Fundulopanchax* or [↔] in the other genera? The name *gulare* can be found in *Aphyosemion*, which also leads to *Fundulopanchax* or directly found as *gularis* in *Fundulopanchax*. Note the changing ending of *gulare* and *gularis*, necessary to agree in gender with the genus (neuter and masculine, see paragraph 1.1).

Finally one arrives at *Fundulopanchax (Gularopanchax) gularis* (Boulenger, 1902). According to the list *Fundulus gularis* was used from 1907 until 1923. The name *Fundulus gularis* was also misapplied for *Fundulopanchax (Paludopanchax) arnoldi* (Boulenger, 1908) in 1907 [as *Fundulus Gularis* in the list!].

“*Fundulus gularis* Boul. var. blau” can be found by reading the *Fundulopanchax* section and finding the entree under *Fundulopanchax sjostedti* (Lönnberg, 1895). The common name blue gularis also directs to *Fundulopanchax sjostedti* (Lönnberg, 1895). According to the list *Fundulus Gularis* (Blau) was used from 1907 until 1924.

On page 58 of the Sonderheft:

“G. (*Gasterosteus*) *spinachia* L.” is treated by us as marine and not in the list.

“G. (*Girardinus*) *januarius* Hensel früher G. *caudimaculatus* Hensel, neuerdings als *Phalloceros caudomaculatus* bestimmt” leads to *Phalloceros caudimaculatus* (Hensel, 1868). The combination *Girardinus januarius* leads to: *Girardinus Januarius* → *Phalloceros caudimaculatus* and *Girardinus januarius* → *Phalloptychus januarius*, so there was made some error in the naming. The real *caudimaculatus* species is listed by the names: *Girardinus Decemmaculatus* from 1901–1902, *Girardinus caudimaculatus* from 1904 until 1917, *Glaridodon Januarius* in 1910, *Glaridichthys Januarius* from 1911 until 1913 and *Phalloptychus Januarius* in 1914. It is not the species *Phalloptychus januarius*! [In the next article of the same Sonderheft

the name *Glaridichthys januarius* was used, so an error was made in the generic name or it was still judged as correct and the name lingered on in 1915, as it did in Innes 1917.]

On page 59 of the Sonderheft: *Haplochilus* spp. can with a little effort be found under *Aphyosemion*, *Epiplatys*, *Oryzias*, *Aplocheilus*, *Micropanchax* and *Aplocheilichthys* (with a number of misidentifications).

On page 61 of the Sonderheft: “L. (= *Leporinus*) Natleri” is not in the list, but a *Leporinus nattereri* is in the list [now correctly named *Anostomoides nattereri*], mentioned by Brüning, Innes (1917) and Bade (1924), so maybe that species was meant (?? = very uncertain if the species was ever in the hobby).

On page 63 of the Sonderheft: “*Parosphromenus Deissneri Blkr.*” does not lead to the recent misidentifications nor to the true *Parosphromenus deissneri* (there are no references in the early twenties), but instead leads to *Pseudosphromenus dayi* (Engmann, 1909). It is mentioned under the name *Parosphromenus deißneri Blkr.?* in Stansch (1914) on page 71.

In the book of **Jäger 1868**⁴³ (the man who founded one of the first public aquaria in Europe and wrote one of the first German books on the maintenance of aquaria) the used German common names must first be translated into English and then the scientific names can be found. On page 284 the author mentions the “Goldfisch, der Karpfen, die Schleie, Karausche, Rothauge, Wetterfisch und Hecht” as suitable for the freshwater aquarium. A dictionary (or a German book on freshwater fishes) leads to goldfish, carp, tench, crucian carp, roach, weatherfish and pike. Consulting the list leads to the correct scientific names: *Carassius auratus*, *Cyprinus carpio*, *Tinca tinca*, *Carassius carassius*, *Rutilus rutilus*, *Misgurnus fossilis* and *Esox lucius*.

On page 370 the names “Stör (*Acipenser sturio*)” and “Hausen (*Acipenser huso*)” were used, consulting the list leads to the same names *Acipenser sturio* and *Acipenser huso*.

On page 375 Jäger mentions the propagation in the aquarium of “Weißfische, Karpfen und Barsch”. Apart from the first word the scientific names *Cyprinus carpio* and *Perca fluviatilis* can simply be found by the already described method.

The same approach must be taken with the names used by **Müller 1856** (*Aquarium, Belehrung und Anleitung*). He finds the following fishes suitable for the aquarium: Goldfisch, Goldkarpfen, Elrits, Barsch, Weißfisch, kleine Gründling, Kaulkopf, Flußkarpfen and Strömling.

Another example comes from A. **Hellbach** [about 1907 / 1908], *Das Zimmer-Aquarium und seine Einrichtung*, Fiederer, Nürnberg, DE, 62 pp., or from the second edition [about 191?]: *Das Zimmer-Aquarium und seine Einrichtung*, 2. Auflage, Offenstadt & Fiederer, Nürnberg, DE, 48 pp.

From page 35 on (second edition page 24) some typical ‘historic’ aquarium fishes are described: die Karpfen (*Cyprinus*) [with the help of the list the currently correct scientific name is: *Cyprinus carpio*], der Goldfisch (*Carassius auratus*) [list: *Carassius auratus*], der Teleskopfisch (*Carassius auratus* var. *macrophthalmus*) [list: *Carassius auratus*], der Schleierschwanz-Goldfisch (*Carassius auratus* var. *japonicus bicaudatus*) [list: *Carassius auratus*], der Großflosser (*Macropodus viridi-auratus*) [list: *Macropodus opercularis*], der Gurami (*Osphromenus olfax*) [list: *Osphronemus goramy*], etc.

The first freshwater aquarium fish:

⁴³ Jäger, G. 1868, *Das Leben im Wasser und das Aquarium*, Vereinsbuchhandlung, Hamburg, DE, 384 pp.

1.4 Genus and species validity

We have checked all the scientific names against **Eschmeyer's Catalog of Fishes**⁴ and we generally follow their conclusions. Also the citation of the original description and comments on the validity can be found there.

The freshwater fishes described up to June 2020 have been listed.

Genus and species validity and freshwater occurrence were further checked with the references in chapter 3 and with following literature:

- Achenbach, G. M. & A. A. Bonetto 1957, Nota acerca de los nombres vernaculos de peces en el Parana Medio. *Anales del Museo Provincial de Ciencias Naturales "Florentino Ameghino"*, No. 2 Zoologia: 3-11.

The freshwater fishes of some regions of the world are reasonably known, however, for other regions (some parts of Africa and Asia) it is still difficult to find an accurate list of valid species.

It would also be very helpful if more colour-illustrated freshwater fish guides were available for these regions.

DE ORDE VAN DE TANDKARPERTJES VI

CYPRINODONTIFORMES BERG, 1940

door J. J. Hoedeman en F. J. Bronner

Even family-group names have been proposed in aquaristic publications, for instance in a journal (*Profundulidi* Hoedeman & Bronner June 1951 in *Het Aquarium*, 22 (No. 1): 6-10):

Zoals was te verwachten, is er op de eerste serie artikelen in deze reeks veel door de lezers gereageerd, en wel op volkomen verschillende wijze. Dit brengt nog weer eens naar voren, dat het voor de redactie, alsook voor de schrijvers, lang niet altijd een eenvoudige opgave is, iets te brengen, dat tenminste door een groot aantal lezers ten volle wordt gewaardeerd. We hebben met deze serie artikelen willen bereiken, dat naderhand de ingebonden

jaargangen een naslagwerk op de Tandkarpertjes zouden bevatten.

Het aantal lezers, dat wel zeer met de opzet was ingenomen, is een dusdanig groot percentage, dat het ons voorkomt er goed aan te doen de besprekingen voort te zetten.

In jrg 21, pag. 4 gaven we 'n inleiding en daarop aansluitend een overzicht van de orde; we vervolgden op pagina 26 met de voor de aquariumhouders belangrijke groep (*Poecilioidea*) en bespraken achtereenvolgens alle eierleggende tandkarpers uit de onderfamilie *Cyprinodontinae*, in de wetenschap bekend, echter

maar weinig bekend (slechts enkele soorten) in liefhebberskringen. In de gevolgde opzet was het onvermijdelijk, hier ook de vissen te noemen, die nog nooit werden ingevoerd. Mocht zulks in de naaste toekomst wel geschieden, dan is gemakkelijk aan de hand van het gebodene na te gaan, welke soorten het kunnen zijn.

Van de Eierleggende soorten rest ons nu nog te bespreken de onderfamilies *Fundulinae*, *Lamprichthyinae*, en de families *Orestiidae* en *Adrianichthyidae*.

Onderfamilie: Fundulinae Jordan & Gilbert, 1882

Van de *Cyprinodontinae* (jrg. 21, p. 26 e.v.) onderscheiden de tot deze groep samen te brengen geslachten zich door de puntige, snij-tandachtige tanden, conisch van vorm, en ook is steeds een wandbeen (parietale) aanwezig. Overigens onderscheiden ze zich vnl. in de meer langgerekte vorm van de *Cyprinodonts*. Gelukkig is dit een onderfamilie, waaraan voor de schrijvers wat meer eer valt te behalen, immers zijn er talrijke bekende soorten onder, reeds tientallen van jaren dankbare pleegkinderen van vele aquariumhouders. Over het algemeen zijn het kleurige vissen, niet groot, levendig, veelal typisch en belangwekkend in hun levensverrichtingen, en vrijwel zonder uitzondering gemakkelijk tot voortplanting te brengen.

De leden van deze onderfamilie verdelen we, teneinde een duidelijker beeld van hun verwantschap te verkrijgen, over een aantal geslachtsgroepen.

Geslachtsgroep Profundulidi *

In fig. 18 is het verspreidingsgebied voor deze nieuwe geslachtsgroep aangegeven, welke de geslachten *Profundulus*, *Valencia* en *Adinia* omvat. Deze ogenschijnlijk wonderlijke verspreiding laat zich wellicht duidelijker verklaren aan de hand van het kaartje (jrg. 21, pag. 6), daarbij aannemend, dat het aangegeven gebied één geheel vormde, zonder een zee of oceaan als barrière. Het gebied, in het kaartje gestippeld, kan een brede zoetwaterstroom of uitgestrekt moerassengebied zijn geweest.

Geslacht: Profundulus Hubbs, 1924.

Hoewel weinig door liefhebbers gehouden, is dit geslacht van de drie hiervoor genoemde nog het bekendste. Al de tot nu toe beschreven soorten zijn zeer levendig en de beschrijving van *P. punctatus* geldt dan ook volledig voor de andere soorten.

and in an aquariumbook: *Aquarien Atlas Band 3* (*Chiloglanidinae* Riehl & Baensch 1990, but unfortunately, without a description of the new taxon):

Fam.: Mochocidae	Fiedert
Unterfam.: Chiloglanidinae	
<hr/>	
<i>Chiloglanis deckenii</i> Schwanzfleck-Stromschnellenwels Syn.: <i>Synodontis euryostomus</i> Vork.: Ostafrika: Kenia und Tansania, bevorzugt in schnellfließenden Gewässern. Ersteinf.: Unbekannt, sicher jedoch von SEEGERs 1985. GU.: Geschlechtsreife ♀♀ sind fülliger. Soz. V.: Friedlicher, geselliger Fisch. Hält. B.: Gut gefilterte, bepflanzte und mit einigen Moorkienwurzeln versehene Becken mit einem pH-Wert zwischen 6 und 7,2 und einer Härte nicht über 15° dGH. ZU: Nicht bekannt. FU: H, O; Algen, Aufwuchs, Flockenfutter, Lebendfutter (lebend und gefroren). Bes.: Die Artzugehörigkeit der abgebildeten Art ist nicht ganz gesichert, innerhalb der Gattung besteht derzeit noch erhebliche systematische Verwirrung. T: 20–26° C, L: 7 cm, BL: 60 cm, WR: m, SG: 2–3	PET
<i>Chiloglanis cf. neumanni</i> Ostafrikanischer Stromschnellenwels Syn.: Keine, da evtl. noch unbeschriebene Art. Vork.: Ostafrika: Tansania, meist in schnellfließenden Gewässern. Ersteinf.: Unbekannt, diese Fundortform 1987 durch SEEGERs. GU.: Ausgewachsene ♀♀ sind fülliger. Soz. V.: Friedlicher, geselliger Fisch, der sich auch an kleinsten anderen Fischen nicht vergreift. Hält. B.: Obwohl die meisten <i>Chiloglanis</i> -Arten bevorzugt in schnellfließenden Gewässern vorkommen, konnte z.B. SEEGERs sie auch schon in fast stehenden Gewässern und sogar Sümpfen feststellen. Daher sind sie sehr anpassungsfähig an die verschiedensten Verhältnisse. Allerdings ist in jedem Fall eine gute Filterung anzuraten, die für eine gewisse Strömung sorgt. Moorkienholz, Pflanzen und ein dunkler Bodengrund sollten die Einrichtung bilden. pH-Wert 6–7,5, Härte bis 15° dGH. T: 20–26° C, L: 5 cm, BL: 60 cm, WR: m, SG: 2–3	BOULEN
396	

1.5 Freshwater aquarium history

The goldfish (*Carassius auratus*) was probably the first freshwater aquarium fish, kept in aquarium-like vessels in China since at least 1548 (Balon 2006; Hervey & Hems 1968; Matsui 1976), but possibly since the Chinese Song dynasty (960–1279, Chen 1955). After their introduction in Japan (16th century or maybe already in 1502, Matsui 1976) they were introduced in Europe in the 17th century as ornamental pond fishes (they arrived in Portugal in 1691; maybe they reached England in 1692), already bred in Holland in 1765 (the Oranda goldfish) and a little later in the 18th century goldfish were already kept indoors. In 1872 one of the first varieties, the telescope goldfish (cyprin télescope / poisson télescope / long-tsing-ya), already developed in China, was introduced in France (Carbonnier 1872a).

From the beginning of the nineteenth century various inland fishes of Europe (loaches, minnows, sticklebacks, etc.) were kept in glass or porcelain containers (which were later called **aquaria**) for leisure and study (Warrington [the founder of the freshwater aquarium] 1854 & 1855; Hibberd 1856; Lankester 1856; Humphreys 1857; Roßmähler 1857; Sowerby 1857; Butler 1858; Edwards 1858; Prévost 1861; Olcin 1867; Wood 1868; Taylor 1876; Jacobs 1964; Atz 1971; Hamlin 1986). Also the start of the study of *evolutionary biology* (and indeed the subject *Biology*) in the second half of the nineteenth century prompted the keeping of aquatic plants and animals alive for study and that could be done with the help of aquaria.

The possession of an aquarium (or drawing-room fish-pond) became very fashionable in England, France and Germany in the second half of the nineteenth century, about 1855 till 1880. There was even a slight aquarium mania in England between 1855 and 1860 (Hibberd 1860) and in France (Lorenzi 2009), accompanied by a lot of shops selling everything for the aquarium. See for instance the list of William A. Lloyd (1815-1880) from the year 1858 for an overview of all the aquarium related things, commercially available at that time.

Gradually the number of true aquarium-keepers grew and at the end of the 19th century the hobby, after a slight decrease in popularity, definitively started to grow (Klee 2003; Brunner 2011; Hohl 2001; Hohl 2011, Novák *et al.* 2020) and there came about a never ending stream of exotic fishes for the hobbyist. Currently, the total number of freshwater aquarium fish species is estimated at 6,700 species (Novák *et al.* 2020). Furthermore, the keeping of aquaria managed to do a lot of cultural work (Hamera, 2011).

At the very start some labyrinth fishes were imported [there was already an import of a “poisson combattant” (= ? *Betta smaragdina* / *Betta splendens*) by Jäger from Saigon / Cochinchine at the end of 1863 and again in January 1864, see *Bulletin de la Société Impériale Zoologique d'Acclimatation* (2^e série), 1864, 1: 145-146, but the fishes probably died due to the cold weather in Marseille, see *Der Thiergarten* 1864, 1(3): 62-63], the paradise fish *Macropodus opercularis* in 1869 (Poisson de Paradis / Macropode de la Chine; Carbonnier 1869a & 1872b, Lefebvre 1877) [Schneider & Whitney 1957 called 1868 the “birthday of the Tropical Fish Hobby”], *Trichogaster lalius* in 1873 (Colise de l'Inde / arc-en-ciel from Calcutta; Carbonnier 1873, 1874b, 1876), then *Anabas testudineus* (Anabas from Calcutta; Carbonnier 1874a; and also *Parambassis* sp.⁴⁴), again “poissons combattants” in 1874? (= ? *Betta smaragdina* / *Betta splendens*; from Cochinchine / Saigon; Bordas 1875, Renard 1875) and soon followed by many other fishes from all continents (Dürigen 1897, Bade 1898, Klee 2003; Hohl 2011, Novák *et al.* 2020).

In 1876 for instance, *Macropodus opercularis*⁴⁵ and the telescope goldfish were kept in Germany (Gilsenbach 1956); in 1887 supplemented by *Osphronemus goramy*, *Hoplisoma paleatum* (? , see below) and the fringetail goldfish (Gilsenbach 1956).

In 1878 the following fishes were kept in France⁴⁶: *Osphronemus goramy*, *Macropodus opercularis*, *Anabas testudineus*, *Parambassis* sp. (“poissons dits transparents du Bengale” = ? *Parambassis baculis*), some goldfish varieties, “*Fundula cyprinodonta*” imported from North-America in 1871 (Carbonnier 1875) [= *Umbra pygmaea*, Gill 1906b or = not an American species, Breder & Rosen 1966 pp. 136], “Doras from Buenos-Ayres” (= ? *Pterodoras granulatus*) [already reproduced in France], *Silurus glanis* from the Danube, *Ameiurus catus* (or ? *Ameiurus nebulosus*), “Callichthes from Brasil” = ? *Callichthys callichthys* [the name “*Callichthys fasciatus*” as used later by Carbonnier 1880 and 1881 does not exist, perhaps there was some

⁴⁴ Anonymous 1876, Poissons de l'Inde [L'Ambasse ranga ou poisson transparent / L'Anabas ou poisson grimpeur]. *Magasin Pittoresque* 44: 276-277.

⁴⁵ Fernandez-Harburg, A. 1924, Das Aquarium, seine Entstehung, Geschichte und Bedeutung. *Wochenschrift für Aquarien- und Terrarienkunde*, 21 (4): 64-65.

⁴⁶ Raveret-Wattel, C. 1879, Rapport sur la Pisciculture a l'Exposition Universelle de 1878. *Bulletin de la Société d'Acclimatation*, (3^e série), 6: 137-146.

confusion with a paper of Jobert⁴⁷ published in that same year, which described the habits of *Callichthys asper* (= *Callichthys callichthys*) from Rio de Janeiro or was this a different fish species? Later on, 1880-1881, there were reports of a fish called *Callichthys fasciatus* from La Plata (Carbonnier 1881, 1881a, 1881b), that could be *Hoplisoma paleatum*], *Misgurnus fossilis*, *Cobitis taenia*, *Umbrina krameri*, "Silver Bass from Canada" = *Morone chrysops*, Rock Bass = *Ambloplites rupestris*, "Salmonides de la Plata". In 1880 the *Cyprinodon* of Spain (= ? *Aphanius fasciatus* or *Aphanius iberus*) was bred in the aquarium (Carbonnier 1881b).

The names and the aquarium history of the freshwater fishes were researched with the listed references in chapter three and further checked with the following literature (§ 1.5.1-4), together with the **Dutch language freshwater aquarium literature** in the Appendix.

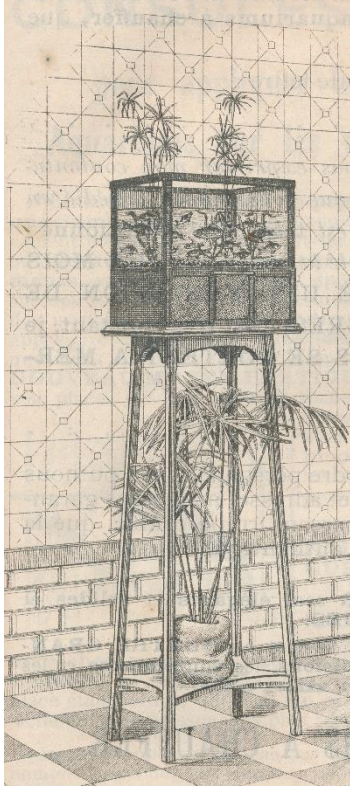

We also added to our literature list some important aquarium books, that we hope to see one day, to make our overview of the early aquarium literature more complete.

See for a bibliography of early literature dealing with aquarium plants: C. O. Masters 1966, *The Aquarium*, 35 (5): 26-28.

AQUARIUMS A CHAUFFER

Pour Poissons vivant en eau tempérée de 15° C. à 30° C.

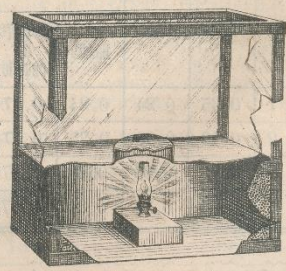

Pour être agréable à nos, de plus en plus nombreux clients, amateurs de Poissons d'aquariums à eau tempérée, nous avons définitivement établi toute une série d'AQUARIUMS A CHAUFFER, bien compris, FORT JOLIS et QUI FONCTIONNENT ADMIRABLEMENT, dans lesquels tout aussi bien et aussi facilement que nous-mêmes, il leur est possible maintenant — SANS AUCUNE INSTALLATION SPÉCIALE — de pouvoir tenir et ÉLEVER EN APPARTEMENTS CHAUFFÉS OU NON, toutes les espèces de poissons qui leur plairont ; depuis les petits Girardinus d'espèces variées, Gambusias, Danios réros, les magnifiques POISSONS-ÉPÉE, « *Xiphophorus helleri* » jusque les CHANCHITOS divers, les Macro-podes, les HEMI-CHROMIS et les FONDULES GULARIS ou autres.

En un mot, grâce à nos AQUARIUMS A CHAUFFER, tout le monde soit en serre froide ou chaude, soit en appartement quelconque CHAUFFÉ OU NON, peut être certain de tenir facilement et en excellente santé SANS PRÉOCCUPATIONS ET SANS SOINS SPÉCIAUX TOUTES LES ESPÈCES de Poissons d'aquariums à eau tempérée, dans lesquelles on rencontre de si MERVEILLEUSES VARIÉTÉS soit comme formes soit comme coloris et qu'à juste titre les plus grands naturalistes ont qualifiés de JOYAUX VIVANTS.

LE CHAUFFAGE de nos aquariums à chauffer c'est la simplicité même, car il se fait au moyen d'une petite lampe à pétrole ordinaire ; c'est le dispositif même de notre système de chauffe qui est REMARQUABLE, parce qu'il assure une CHALEUR RÉGULIÈRE à tel degré qu'on veut la tenir, SANS AUCUN SOIN ET SANS AUCUNE SURVEILLANCE, avec une variation de température qui n'atteindra pas deux degrés de différence en hausse ou en baisse, sur 24 heures de marche.

C'est donc un heureux problème résolu!

Aquarium à chauffer « Coupe »

Carbonnier wrote in an appendix of his book on fish farming in 1864 (one of the first "aquarium" publications in French):

On donne le nom d'aquarium à un réservoir ou bassin, sorte de vivier à dimensions restreintes, dans lequel vivent et prospèrent des végétaux et des animaux aquatiques, des poissons, etc., etc.

Ida May Mellen (1877-1970) was also troubled by names in 1918:

1.5.2 Freshwater aquarium magazines

We used the following aquarium magazines for tracking down fish species and names. The consulted volumes / issues are written between square brackets [], titles and volumes are highlighted in **bold**, issues between round brackets ().

All the volumes:

In **Dutch** (see also the Dutch bibliography): '**Aqua-Terra** (NL)' [1936 – 1946], '**Het Aquarium** (Nederlandse Bond Aqua Terra, NL)' [1930 up to the present], '**Ons Aquarium** (NL)' [1934 – 1939], '**Aquarium & Terrarium Hobbyist** (NL)' [1994 – 1996], '**Barbus** (Antwerpen, BE)' [1 (1946-1947)], '**Cichlidae** (Belgische Cichliden Vereniging, BE)' [1975 – 1981], '**Natuurgenot in Huis** (Floralia, Assen, NL)' [1 (1913) – 2 (2) (1914)], '**N. V. C. Periodiek / Cichlidae** (Nederlandse Vereniging van Cichlidenliefhebbers, NL)' [1975 up to the present], '**Ons Eigen Blad** (Floralia, Assen, NL)' [1 (1909) – 4 (1912)], '**Tijdschrift voor Aquarium- en Terrariumkunde** (NL)' [1922 – 1934], '**Waterweelde** (Unie van Aquariumhouders, NL)' [1 (1951/'52) – 12 (1) (March 1962)].

[1909 – 1912], '*Taschenkalender für Aquarienfrende* (1909 – 1926) / *Taschenkalender für Aquarien- und Terrarienfrende* (Gustav Wenzel & Sohn, Braunschweig, DE; 1927 – 1954; usage of "Jahrgänge" from 25 (1933) onwards)' [1912, 1913, 1915, 1920 – 1927, 1929, 1931, 1932, 25 (1933) – 38 (1954)], '*Wels Jahrbuch* (Bede Verlag, Kollnburg, DE; 1993 – 1994)' [1993, 1994].

The periodical *Zeitschrift für aquaristische Literatur* (Verlag Natur & Wissenschaft, DE) [1 (1998) up to the present] was used for the dating of some aquaristic literature.

1.5.4 Catalogues of firms selling aquarium fishes

Some catalogues of animal shops selling fishes (and aquarium literature) were also checked:

Aquarium Boucher 1934, *Catalogue*, Boulevard Voltaire 200, Paris, FR, 8 pp.

Aquarium Stock Company 1932, *Tropical Fishes and Aquarium Supplies, special 20th anniversary (1912-1932) price list*, New York City, US, 16 pp.

L'aquarium moderne 1934, Boulevard de Strasbourg 60, Paris, FR, 8 pp.

L'aquarium tropical 1934, *Catalogue general*, Boulevard Malesherbes 50, Paris, FR, 16 pp.

Aquarium Warehouse 1858, *A list with descriptions, illustrations, and prices of whatever relates to Aquaria*, Aquarium Warehouse / W. Alford Lloyd, London, UK, 162 pp.

Beldt's Aquarium 1934, *Catalog / price list*, 2141 Crescent Avenue, St. Louis, Missouri, US, 34 pp. [1936 48 pp.; 1938 52 pp.]

Bétrémieux 1913, *Poissons de repeuplement et d'aquariums (Toutes espèces Européennes et Exotiques)*, Bétrémieux (Pisciculture - importateur et éleveur), Roubaix, FR, 104 pp.

Chimaira, *Der Katalog*, Chimaira Buchhandlungsgesellschaft, Frankfurt am Main, DE, from 2014 yearly.

Dagry Frères 1934, *Prix Courant Établissement de Pisciculture*, Quay du Louvre 20, Paris, FR, loose pamphlets.

Flatters & Garnett Ltd. 1965, *Progress Report No. 42*, Flatters & Garnett Ltd., Manchester, UK, 10 pp.

Glaschker 1929, *Katalog A. Glaschker Versandhaus für Aquarien und Aquarien-Zubehör, Terrarien, Tiere, Pflanzen, Vogelkäfige und verwandte Artikel*, Versandhaus A. Glaschker, Leipzig, DE, 120 pp.

Hermann Härtel 193?, *Hermann Härtel Zierfisch-Grosszüchterei (Versandhaus für Aquarien Utensilien und Futter für Zierfischzucht u. Pflege, Import u. Export)*, Hermann Härtel Zierfisch-Grosszüchterei, Dresden, DE, 120 pp.

La Pisciculture moderne 1934, *Poissons aquariums verrerie accessoires*, Avenue Gambetta 21, Paris, FR, 8 pp.

Reboul 1934, *Poissons exotiques (aquariums tout les accessoires)*, Rue du Faubourg 30, Montmartre, Paris, FR, 16 pp.

Hans Schmidt Tierimport 192?, *Aquarien-Fische (Katalog 1)*, Hans Schmidt Tierimport Abteilung Aquarium, Hamburg-Altona, DE, 20 pp.

Scholze & Pöttschke 193?, *Terrarien - Aquarien - Hilfsmittel*, Scholze & Pöttschke Zoologische Grosshandlung, Berlin, DE, 120 pp.

Vereinigte Zierfisch-Züchtereien 1912, *Haupt-Katalog (Weihnachten 1912)*, Vereinigte Zierfisch-Züchtereien / Margarete Kuhnt, Conradshöhe bei Tegel-Berlin, DE, 128 pp.

La vie silencieuse 1934, Maison Finot, Rue Michel-Chasles, Paris, FR, 15 pp.

ZAJAC 1994, *Aquaristischer Orientierungskatalog '94*, Zoo Zajac Duisburg, DE, 186 pp.

ZAJAC, *Katalog (Das Einkaufsparadies für Tierfreunde)*, Zoo Zajac Duisburg, DE, from 2010 yearly.

Zoo-Haus Hugo Schmidt 1972/74, *Alles für den Aquarianer 7 (Versand in alle Welt)*, Helmut Schmidt, Lünen, DE, 256 pp.

Zoo-Haus Hugo Schmidt 1977/78, *Alles für den Aquarianer 8 (Versand in alle Welt)*, Helmut Schmidt, Lünen, DE, 264 pp.

We hope the name list will stimulate the use of correctly written scientific names, present an overview of the (still) existing freshwater fishes, record their citation in the aquarium literature and bring some stabilization in the use of common names.

We did our best to present all the correct names, but of course the big problem remains, namely the correct identification of the animals.

CHAPTER TWO A CLASSIFICATION OF THE FRESHWATER FISHES OF THE WORLD

Introduction

A **classification** of the living freshwater fishes is presented (49 orders, 222 families and 2,366 valid genera according to our definition of freshwater fishes), with a listing of the valid genera in the lowest rank and common names for some higher taxa (the order of the common names is Dutch / German / English).

The author of a family-group name is listed at one rank only (mostly at the family or subfamily rank) to avoid repetitions as the author is according to the Code of Zoological Nomenclature¹² also the author of the other family-group ranks (superfamily ending: –oidea, family ending: –idae, subfamily ending: –inae, tribe ending: –ini, subtribe ending: –ina).

See Berra (2001) for a description and the geographical distribution of the families and for the pronunciation of the scientific family names.

{**Ma**} (= million years ago = million years before present) behind a taxon name represents the estimate minimum age of that taxon by the oldest fossils, although this could be somewhat ambiguous⁴⁸ (particularly in those groups which produced very few fossils).

Dating according to the International Stratigraphic Chart (International Commission on Stratigraphy: www.stratigraphy.org). In this system the geological formations and stratigraphic units employ the terms “Upper” and “Lower”, e.g. Lower Cretaceous of South America. The adjectives “early” and “late” are used to refer to the age of taxa.

Triassic			Jurassic				Cretaceous						Paleogene			Neogene			Quaternary																													
Lower	Middle	Upper	Lower	Middle	Upper	Lower	Upper	Paleocene	Eocene	Oligocene	Miocene	Pliocene	Pleistocene	Holocene																																		
Olenekian	Anisian	Ladinian	Carnian	Norian	Rhaetian	Hettangian	Sinemurian	Pliensbachian	Toarcian	Bajocian	Bathonian	Callovian	Oxfordian	Kimmeridgian	Tithonian	Berriasian	Valanginian	Hauterivian	Barremian	Aptian	Albian	Cenomanian	Turonian	Coniacian	Santonian	Campanian	Maastrichtian	Danian	Selandian	Thanetian	Ypresian	Lutetian	Bartonian	Priabonian	Rupelian	Chattian	Aquitanian	Burdigalian	Langhian	Serravallian	Tortonian	Messinian	Zanclean	Piacenzian	Gelasian	Calabrian	Middle	Upper

Most fossil data are taken from Benton (1993). For example fossils known from the **Pliocene** (>5 Ma); **Miocene** (>23 Ma); **Oligocene** {Chattian >28 Ma, Rupelian >34 Ma}; **Eocene** {Priabonian >38 Ma, Bartonian >40 Ma, Lutetian >49 Ma, Ypresian >56 Ma}; **Paleocene** {Thanetian >59 Ma, Selandian >62, Danian >66 Ma}; **Cretaceous** {**Upper Cretaceous**: Maastrichtian >71 Ma, Campanian >84 Ma, Santonian >86 Ma, Coniacian >89 Ma, Turonian >94 Ma, Cenomanian >100 Ma; **Lower Cretaceous**: Albian >112 Ma, Aptian >125 Ma, Barremian >130 Ma, Hauterivian >136 Ma, Valanginian >140 Ma, Berriasian >146 Ma}; **Jurassic** (>200 Ma); **Triassic** (>251 Ma); **Permian** (>299 Ma); **Carboniferous** (>359 Ma); **Devonian** (>416 Ma).

{**age**} behind a family-group name means an *approximate* age calculated by DNA research with the help of the mitochondrial genome molecular clock of bony fishes, age expressed in **myr** (= million years) [with a value of about 7.10^{-4} – 3.10^{-2} substitutions / {(site)·(million years)} or 0.1–2.5% divergence / million years depending on the gene studied] or calculated by multiple calibration with the help of the fossil record⁴⁸. For examples of such a **calibration** see Genner *et al.* 2007, Nakatani *et al.* 2011, Saitoh *et al.* 2011 or Near *et al.* 2012. Beware, there is a **substantial error** in the estimates!⁴⁹.

⁴⁸ Benton, M. J. & F. J. Ayala 2003, Dating the tree of life. *Science*, **300**: 1698-1700; Zaragüeta Bagils, R., H. Lelièvre & P. Tassy 2004, Temporal paralogy, cladograms, and the quality of the fossil record. *Geodiversitas*, **26** (3): 381-389; Near, T. J., D. I. Bolnick & P. C. Wainwright 2004, Investigating phylogenetic relationships of sunfishes and black basses (Actinopterygii: Centrarchidae) using DNA sequences from mitochondrial and nuclear genes. *Molecular Phylogenetics and Evolution*, **32** (1): 344-357; Heads, M. 2005, Dating nodes on molecular phylogenies: a critique of molecular biogeography. *Cladistics*, **21**: 62-68; Hurley, I. A. *et al.* 2007, A new time-scale for ray-finned fish evolution. *Proceedings of the Royal Society B*, **274**: 489-498; Azuma, Y. *et al.* 2008, Mitogenomic evaluation of the historical biogeography of cichlids toward reliable dating of teleostean divergences. *BMC Evolutionary Biology*, **8**: 215; Avise, J. C. & J. Liu 2011, On the temporal inconsistencies of Linnean taxonomic ranks. *Biological Journal of the Linnean Society*, **102**: 707-714; Near, T. J. *et al.* 2012, Resolution of ray-finned fish phylogeny and timing of diversification. *Proceedings of the National Academy of Sciences of the United States of America*, **109** (34): 13698-13703; Parham, J. F. *et al.* 2012, Best practices for justifying fossil calibrations. *Systematic Biology*, **61**: 1-14.

⁴⁹ Pulquério, M. J. F. & R. A. Nichols 2007, Dates from the molecular clock: how wrong can we be? *Trends in Ecology and Evolution*, **22**: 180-184.

Or the age is based upon the well established sister group (both of the same age). For the sake of simplicity we give the mean age and neglect the credibility ranges.

The classification of fishes is a very active field of research and many changes in the classification are expected in the near future (see Betancur-R *et al.* 2017).

Einleitung

Es folgt eine systematische Gliederung der rezenten Süßwasserfische (die von uns berücksichtigten Süßwasserfische werden in insgesamt 49 Ordnungen, 222 Familien und 2366 gültige Gattungen) eingeteilt. Die heute gültig anerkannten Gattungen werden bei der niedrigsten Rangordnung aufgelistet, meistens Familie (Endung: -idae), Unterfamilie (Endung: -inae), Gattungsgruppe (Sippe oder Tribus, Endung: -ini) oder Subtribus (Endung: -ina). Auch werden die holländischen, deutschen und englischen Namen der verschiedene Gruppen erwähnt.

Der Autor eines Familiengruppenamens wird nur einmal erwähnt (meistens hinter dem Familien- oder Unterfamiliennamen). Dieser Autor ist nach dem Internationalen Code für Zoologische Nomenklatur¹² zugleich Autor der übrige Ränge des Familiengruppenamens (Überfamilie, Familie, Unterfamilie und Gattungsgruppe).

Berra (2001) beschreibt die Familien, erwähnt die angelsächsische Aussprache der wissenschaftlichen Familiennamen und beschreibt die natürliche Verbreitung der Familien auf der Erde.

{**Ma**} hinter einem Familiengruppenamen ist eine Schätzung in Millionen Jahre Alter mittels der ältesten Fossilien. Die meisten Angaben stammen von Benton (1993).

{**age**} hinter einem Familiengruppenamen ist das Durchschnittsalter berechnet mit Hilfe der DNA-Forschung oder das Alter basiert auf der ausreichend überprüften Schwestergruppe (beide das gleiche Alter); **myr** bedeutet Durchschnittsalter in Millionen von Jahren.

Die systematische Gliederung der Fische ist ein sehr lebhaftes Forschungsgebiet und es wird noch viele Änderungen geben.

Inleiding

Hierna volgt een systematische indeling naar verwantschap (classificatie) van de recente zoetwatervissen (49 orden, 222 families en 2366 geldige geslachten volgens onze definitie van zoetwatervissen). Bij deze indeling naar verwantschap worden de geldige geslachten vermeld in de laagste categorie, meestal familie (uitgang: -idae), onderfamilie (uitgang: -inae), geslachtsgroep (uitgang: -ini) of ondergeslachtsgroep (uitgang: -ina).

De auteur van een familiegroepsnaam wordt slechts vermeld achter één familienaam (meestal achter de familie- of onderfamilie-aanduiding). Deze auteur is volgens de Code voor Zoölogische Nomenclatuur¹² tegelijkertijd de auteur van alle rangen van de familiegroepsnaam (superfamilie-, familie-, onderfamilie- en geslachtsgroepsnaam). Achter de wetenschappelijke groepsnaam worden tussen haakjes de Nederlandse, Duitse en Engelse naam vermeld.

Zie Berra (2001) voor een beschrijving en de geografische verspreiding van de families en voor de Angelsaksische uitspraak van de wetenschappelijke familienamen.

{**Ma**} achter een groepsnaam is de schatting van de ouderdom in miljoenen jaren met behulp van de oudste fossielen. De meeste gegevens komen uit Benton (1993).

{**age**} achter een groepsnaam is de gemiddelde leeftijd berekend met behulp van DNA-onderzoek of het betekent een schatting van de leeftijd met behulp van de goed vastgestelde zustergroep (beide even oud), **myr** betekent gemiddelde leeftijd in miljoenen jaren.

De classificatie van de vissen is een zeer actief onderzoeksveld en er zullen nog vele veranderingen volgen.

The **fish classification, common names** and the **age data** were taken from the following literature⁵⁰:

Particularly the cichlids of the Great Lakes of Africa are a prime target of evolutionary research:

Outline of the freshwater fish classification

SUPERKINGDOM: EUKARYOTA (EUKARYOTEN) ▶ **KINGDOM: ANIMALIA** (meercellige dieren / Vielzellige Tiere / Metazoa) {>550 Ma} ▶ **SUBKINGDOM: BILATERIA** ▶ **INFRAKINGDOM: DEUTEROSTOMIA** (NIEUWMONDIGEN / NEUMÜNDERN) {>515 Ma} ▶ **Phylum: CHORDATA** (RUGGESTRENGDIEREN / ANIMALS WITH A NOTOCHORD / RÜCKENMARKTIERE) {>514 Ma early Cambrian} ▶ **1**

1 Subphylum CRANIOTA (gewervelde dieren / Wirbeltiere / animals with backbones / animals with arcualia) {>457 Ma}

1a Superclass Petromyzontomorphi: **Petromyzontiformes**

2 Infraphylum GNATHOSTOMATA (kaakdieren / Kiefermäuler / animals with jaws)

2a Superclass CHONDRICHTHYES: **Myliobatiformes**

3 Megaclass OSTEICHTHYES (beenvissen / Knochenfische / bony fishes)

3a Superclass SARCOPTERYGII: **Dipnoiformes**

4a Class **CLADISTEI**: **Polypteriformes**

4 Class ACTINOPTERI: **Acipenseriformes, Lepisosteiformes, Amiiformes**

5 Infraclass TELEOSTEI

5a Cohort ELOPOMORPHA: **Anguilliformes**

5b Cohort OSTEOGLOSSOMORPHA: **Hiodontiformes, Osteoglossiformes**

5c Cohort OTOMORPHA: **Clupeiformes, Gonorynchiformes, Cypriniformes, Gymnotiformes, Characiformes, Siluriformes**

6 Cohort EUTELEOSTEOMORPHA

6a Division PROTACANTHOPTERYGII: **Lepidogalaxiiformes, Galaxiiformes, Salmoniformes, Esociformes, Osmeriformes**

7 Subsection ACANTHOMORPHATA

7a Division PARACANTHOMORPHACEAE: **Percopsiformes, Gadiformes**

8 Subdivision

PERCOMORPHACEAE: **Ophidiiformes, Batrachoidiformes, Syngnathiformes, Kurtiformes, Gobiiformes, Synbranchiformes, Anabantiformes, Carangiformes, Cichliformes, Atheriniformes, Beloniformes, Cyprinodontiformes, Mugiliformes, Gobiesociformes, Blenniiformes, Acropomatiformes, Gerreiformes, Uranoscopiformes, Lutjaniformes, Lobotiformes, Spariformes, Tetraodontiformes, Centrarchiformes, Scorpaeniformes, Perciformes.**

A fish assigned to the order Myliobatiformes is also a part of **1** Vertebrata, **2** Gnathostomata and 2a Chondrichthyes. It is **not** a part of 1a Petromyzontomorphi.

A fish assigned to the order Cypriniformes is also a part of **1** Vertebrata, **2** Gnathostomata, **3** Osteichthyes, **4** Actinopteri, **5** Teleostei and 5c Otomorpha. It is **not** a part of 1a Petromyzontomorphi, nor of 2a Chondrichthyes, nor of 3a Sarcopterygii, nor a part of 5a and 5b.

In zoology the following descending Linnaean hierarchy of categories (**primary ranks**) can be used to classify animals: regnum > phylum > classis > cohort > section > division > series > ordo > familia > tribus > genus > species.

Modifying these ranks with *super* (above) and *sub* (below) and sometimes *infra* (between) leads to the following *descending* hierarchy, as used by most ichthyologists to describe the result of more than 500 million years of evolution (the vernacular names of the frequently used ranks in the order: Dutch / German / English): regnum (rijk / Reich / kingdom) > subregnum (onderrijk / Unterreich / subkingdom) > superphylum (superstam / Überstamm / **superphylum**) > phylum (stam / Stamm / **phylum**) > **infraphylum (tussenstam / Infrastamm / infraphylum)** > superclassis (superklasse / Überklasse / **superclass**) > **classis (klasse / Klasse / class)** > subclassis (onderklasse / Unterklasse)

/ **subclass**) > **infraclassis** (Infraklasse / **Infraklasse** / **infraclass**) > megacohort > supercohort > **cohort** > **subcohort** > infracohort > **section** > **subsection** > **division** > **subdivision** > **series** > subseries > **superordo** (superorde / Überordnung / **superorder**) > **ordo** (orde / Ordnung / **order**) > **subordo** (onderorde / Unterordnung / **suborder**) > **superfamilia** (superfamilie / Überfamilie / **superfamily**) > **familia** (familie / Familie / **family**) > **subfamilia** (onderfamilie / Unterfamilie / **subfamily**) > supertribus (supergeslachtsgroep / Übersippe / supertribe) > tribus (geslachtsgroep / Sippe / **tribe**) > subtribus (ondergeslachtsgroep / Untersippe / **subtribe**) > supergenus (supergeslacht / Übergattung / supergenus) > genus (geslacht / Gattung / **genus**) > subgenus (ondergeslacht / Untergattung / subgenus) > supraspecies [supra to avoid confusion with the evolutionary category superspecies] (supersoort / Überart / supraspecies) > **SPECIES (SOORT / ART / SPECIES)** > subspecies (ondersoort / Unterart / subspecies).

The **bold** highlighted and colored ranks are used by us in the freshwater fish classification here after. Besides these scientific higher taxon names, we list some common names as used today in the literature (in the order: Dutch / German / English).

Because of rank uncertainties in the **Class series** we sometimes use the unranked term **clade** to designate some of these higher categories. See Wiley & Johnson (in Nelson, Schultze & Wilson 2010), Nelson, Grande & Wilson (2016) and Betancur-R et al. (2017) for a modern systematic treatment of the teleosts.

We list the currently considered valid genera in the lowest rank (mostly subfamily, tribe or subtribe).

The **SPECIES CATEGORY** is the fundamental level in the Linnaean hierarchy used to describe the diversity of biological organisms (see § 1.1). Species (and sister taxa) are the only taxa directly comparable in a biological manner. So a family in Cyprinoidei has nothing to do with a family in Characoidei, nor has Cyprinoidei some direct relation with Characoidei. Also remember that the classification in subtribes, tribes, subfamilies, etc. is a quite arbitrarily decision and very vulnerable to change.

The currently used valid scientific names of the freshwater fish species are listed in chapter 4.

All the scientific family-group names can, if one wish, be transferred to English vernacular names as follows:

- **Tribes** (-*ini*): change the ending to singular *in* or plural *ins*, for example Characini to characin fishes or characins;
- **Subfamilies** (-*inae*): change the ending to singular *ine* or plural *ines*, for example Characinae to characine fishes or characines;
- **Families** (-*idae*): change the ending to singular *id* or plural *ids*, for example Characidae to characid fishes or characids;
- **Superfamilies** (-*oidea*): change the ending to singular *ide* or plural *ides*, for example Characoidea to characide fishes or characides;

and the following taxon name endings not yet regulated by the Code¹¹ (see also Wiley & Johnson in Nelson, Schultze & Wilson 2010, p. 124):

- **Suborders** (-*oides*): change the ending to singular *oid* or plural *oids*, for example Characoidei leads to characoid fishes or characoids; [in a new proposal a suborder would be ending in *iformi*, but the vernacular ending could still be *oid* or *oids*]
- **Orders** (-*iformes*): change the ending to singular *iform* or plural *iforms*, for example Characiformes leads to characiform fishes or characiforms;
- **Superorders** (maybe -*zoidae* or -*omorpha* {or -*iphysae* or -*omorphae* or -*imorphae* or -*ae*): change the ending to singular *zoid* or *morph* or plural *zoids* or *morphs*;
- **Classes** (maybe -*opsida* or -*omorphes* or -*ii*): change the ending to singular *opsid* or *omorph* or plural *opsids* or *omorphs*;
- **Superclasses** (maybe -*omorphi*): change the ending to singular *omorphi* or change the plural to *omorphis*.

Again we must emphasize that many changes in the classification of the fishes are expected in the near future and that there are different opinions on the subject.

1a Superclass: **PETROMYZONTOMORPHI** (kopschildvisachtigen) {>359 Ma Famennian / Carboniferous; age 450 myr}

Class: **PETROMYZONTIDA** (prikken / rundmäuler / lampreys) {>359 Ma Carboniferous}

Petromyzontiformes (PRIKACHTIGEN / RONDBEKKEN / NEUNAUGENARTIGE / RUNDMÄULER / LAMPREYS / PETROMYZONTIFORM FISHES) {>280 Ma Permian; age 390–470 myr}

Mordaciidae Gill, 1893 (zuidelijke topoogprikken / zuidelijke prikken / Südliche Neunaugen / southern topeyed lampreys / southern hemisphere lampreys): *Mordacia* Gray, 1851.

Geotriidae Gill, 1893 (buidelprikken / zuidelijke gestreepte prikken / Australische Neunaugen / southern striped lampreys / pouched lampreys) {age 220–280 myr}: *Geotria* Gray, 1851.

Petromyzontidae Bonaparte, 1831 (prikken / Neunaugen / Northern Hemisphere lampreys) {age 220–280 myr}

Petromyzontinae: *Caspiomyzon* Berg, 1906; *Ichthyomyzon* Girard, 1858; *Petromyzon* Linnaeus, 1758.

Lampetrinae Fowler, 1958 (lampreien)

Entosphenini Vladykov, 1972 (Noord-Amerikaanse prikken / Nordamerikanische Neunaugen / North American lampreys): *Entosphenus* Gill, 1862; *Tetrapleurodon* Creaser & Hubbs, 1922.

Lampetrini (Euraziatische prikken / Eurasische Neunaugen / Eurasian lampreys):

Eudontomyzon Regan, 1911; *Lampetra* Bonnaterre, 1788; *Lethenteron* Creaser & Hubbs, 1922.

2 infraphylum: **GNATHOSTOMATA** (vertebraten met kaken / kaakmondigen / Quermäuler / Kiefermäuler / jawed vertebrates) {>421 Ma Ordovician; age 500–515 myr}

2a Superclass: **CHONDRICHTHYES** Huxley, 1880 (KRAAKBEENVISSEN / KRAAKBEENVINNIGEN / KNORPELFISCHE / CARTILAGINOUS FISHES) {>416 Ma Devonian; age 410 myr}

Class: **ELASMOBRANCHII** Bonaparte, 1837 (haaien en roggen / plaatkieuwigen / Plattenkiemer / Haie und Rochen / sharks and rays / elasmobranchs) {>334 Ma Carboniferous; age 305 myr}

superorder: **BATOIDEA** Bridge, 1910 (rogachtigen / Rochen / rays) {>125 Ma Aptian; age 210 myr}

Myliobatiformes (VLEERMUISROGACHTIGEN / STEKELROGACHTIGEN / ADELAARSROGACHTIGEN / VLEUGELROGACHTIGEN / ADLERROCHENARTIGE / STACHELROCHENARTIGE / EAGLE RAYS / MYLIOBATIFORM FISHES) {>100 Ma early Cretaceous; age 90 myr}

MYLIOBATOIDEI (VLEERMUISROGVERWANTEN / PIJLSTAARTROGVERWANTEN / ADLERROCHENVERWANDTE / MYLIOBATOID FISHES / STINGRAYS) {>100 Ma early Cretaceous; age 76 myr}

Dasyatoidea Jordan & Gilbert, 1879 (pijlstaartrogverwanten / Stachelrochenverwandte / bentic rays / dasyatides) {>100 Ma early Cretaceous; age 60 myr}

Dasyatidae Jordan & Gilbert, 1879 (stekelroggen / pijlstaartroggen / Stechrochen / Stachelrochen / whiptail stingrays) {>100 Ma early Cretaceous} [this family includes a not listed marine subfamily]

Dasyatinae (stekelroggen / stingrays) [this subfamily includes not listed marine genera]:

Hemitrygon Müller & Henle, 1838; *Hypanus* Rafinesque, 1818.

Urogymninae Gray 1851 (zweepstaartroggen / whiprays) {age 98 myr} [this subfamily includes not listed marine genera]: *Brevitrygon* Last, Naylor & Manjaji-Matsumoto, 2016; *Fluvitrygon* Last, Naylor & Manjaji-Matsumoto, 2016; *Fontitrygon* Last, Naylor & Manjaji-Matsumoto, 2016; *Himantura* Müller & Henle, 1837; *Pateobatis* Last, Naylor & Manjaji-Matsumoto, 2016; *Urogymnus* Müller & Henle, 1837.

Hypolophinae Stromer, 1910 (vlagstaartstekelroggen / koestaartstekelroggen / flagtail stingrays / cowtail stingrays): *Makararaja* Roberts, 2007; *Pastinachus* Rüppell, 1829.

Potamotrygonidae Garman, 1877 (Amerikaanse stekelroggen / Amerikanische Stachelrochen / American stingrays) {>41 Ma Eocene; age 34–43 myr}

Styracurinae Carvalho, Loboda & da Silva 2016 (zweepstaartstekelroggen / whiptail stingrays): *Styracura* Carvalho, Loboda & da Silva 2016.

Potamotrygoninae (rivierstekelroggen / zoetwaterroggen / Süßwasserrochen / freshwater stingrays / river stingrays) {>41 Ma Middle Eocene; age 19 myr}: *Heliotrygon* Carvalho & Lovejoy, 2011; *Paratrygon* Duméril, 1865; *Plesiotrygon* Rosa, Castello & Thorson, 1987; *Potamotrygon* Garman, 1877.

3 Megaclass: **OSTEICHTHYES** (BEENVISSEN / KNOCHENFISCHE / BEINFISCHE / BONY FISHES) Bonaparte, 1838 {>419 Ma Devonian; age 528 myr}

3a Superclass: **SARCOPTERYGII** (KWASTVINNIGEN / SPIERVINNIGEN / MUSKEL-FLOSSER / LOBE-FINNED FISHES / FLESHY-FINNED FISHES) Romer, 1955 {>421 Ma early Devonian; age 425–436 myr}

Class: **DIPNOTETRAPODOMORPHA** (longvissen en viervoetigen / salamandervissen en viervoetigen / Lungfische und Vierfüßler / lungfishes and tetrapods) {>408 Ma Devonian; age 420 myr}

superorder: **CERATODONTAE** (longvissen / dubbelademers / Doppelatmer / Lurchfische / lungfishes) {>408 Ma Devonian; age 390 myr}

Ceratodontiformes (LONGVISACHTIGEN / LUNGENFISCHARTIGE / LUNGFISHES / DIPNOIFORM FISHES / CERATODONTIFORM FISHES) {>359 Ma Carboniferous} [numerous extinct families]

CERATODONTOIDEI [many extinct families]

Neoceratodontidae Schultz, 1948 (Australische longvissen / Australische Lungenfische / Australian lungfishes) {>251 Ma early Triassic}: *Neoceratodus* Castelnau, 1876.

LEPIDOSIRENOIDEI {>100 Ma Middle Cretaceous}

Lepidosirenidae Bonaparte, 1841 (longvissen / salamandervissen / slijkvissen / amfibische vissen / Lungenfische / Molchfische / Lurchfische / lungfishes / mud sirens) {>100 Ma Cenomanian; age 120 myr}: *Lepidosiren* Fitzinger, 1837; *Protopterus* Owen, 1839.

4 Superclass: **ACTINOPTERYGII** (STRAALVINNIGEN / STRAHLENFLOSSER / RAY-FINNED FISHES) Cope, 1871 {>421 Ma early Devonian; age 379 myr}

Class: CLADISTIA {>390 Ma Devonian; age 379 myr}

Polypteriformes (VEELVINNIGEN / KWASTVINSNOEKACHTIGEN / FLÖSSELHECHTARTIGE / FLÖSSLER / POLYPTERIFORM FISHES) {>390 Ma Devonian; age 379 myr}

Polypteridae Bonaparte, 1835 (kwastvinsnoeken / wimpelalen / Flösselhechte / bichirs) {>100 Ma Cenomanian}: *Erpetoichthys* Smith, 1865; *Polypterus* Lacepède, 1803.

Class: ACTINOPTERI {>378 Ma Givetian; age 379 myr}

4-1 subclass: CHONDROSTEI (kraakbeensteuren / kraakbeenganoïden / chondrosteans) {>121 Ma Lower Yixian; age 350–377 myr}

Acipenseriformes (STEURACHTIGEN / STÖRARTIGE / KNORPELSCHMELZSCHUPPER / ACIPENSERIFORM FISHES) {>200 Ma early Jurassic}

ACIPENSEROIDEI (STEURVERWANTEN / STÖRVERWANDTE / ACIPENSEROID FISHES)

Polyodontidae Bonaparte, 1835 (veeltandigen / Löffelstöre / Vielzähler / paddlefishes) {>121 Ma Lower Yixian; age 204 myr}

Polyodontinae (lepelsteuren / peddelvissen / Schaufelrüssler / paddlefishes)

Polyodontini (Amerikaanse lepelsteuren / Amerikanische Schaufelrüssler / American paddlefishes) {age 68 myr}: *Polyodon* Lacepède, 1797.

Psephurini Grande & Bemis, 1991 (Aziatische lepelsteuren / Asiatische Schaufelrüssler / Asian paddlefishes) {age 68 myr}: *Psephurus* Günther, 1873.

Acipenseridae Bonaparte, 1831 (steuren / Echte Störe / Rüsselstöre / sturgeons) {>121 Ma Lower Yixian; age 204 myr}: *Acipenser* Linnaeus, 1758; *Scaphirhynchus* Heckel, 1836.

4-2 subclass: NEOPTERYGII (nieuwvinnigen / Neuflosser) {>318 Ma Mississippian; age 365 myr}

infraclass: HOLOSTEI (beenganoïden) {>250 Ma Induan / Lower Triassic; age 323 myr}

Amiiformes (MODDERSNOEKACHTIGEN / KAHLHECHTARTIGE / RUNDSCHMELZSCHUPPER / AMIIFORM FISHES) {>284 Ma Sakmarian; age 320 myr}

AMIOIDEI (MODDERSNOEKVERWANTEN / KAHLHECHTVERWANDTE / AMIOID FISHES) {>151 Ma late Jurassic}

Amiidae Bonaparte, 1831 (moddersnoeken / Kahlhechte / bowfins) {>146 Ma Berriasian}

Amiinae (echte moddersnoeken / Schlammfische / real bowfins) {>100 Ma Cenomanian}: *Amia* Linnaeus, 1766.

Lepisosteiformes (GLANSSCHUBBIGEN / BEENSNOEKACHTIGEN / KNOCHENHECHTARTIGE / LEPISOSTEIFORM FISHES / SEMIONOTIFORM FISHES) {>245 Ma Middle Anisian; age 320 myr} [order also known as Semionotiformes]

LEPISOSTEOIDEI (BEENSNOEKVERWANTEN / KNOCHENHECHTVERWANDTE / RAUTENSCHMELZSCHUPPER / LEPISOSTEOID FISHES)

Lepisosteidae Agassiz, 1832 (beensnoeken / kaaimansnoeken / Knochenhechte / Kaimanfische / gars) {>94 Ma Cretaceous}: *Atractosteus* Rafinesque, 1820; *Lepisosteus* Lacepède, 1803.

5 infraclass: TELEOSTEI (echte beenvissen / Höhere Knochenfische / Echte Knochenfische / Neu-Knochenfische / modern bonyfishes / teleosts) {>252 Ma Induan / Lower Triassic; age 299–310 myr}

5a cohort: **ELOPOMORPHA** (TARPONACHTIGEN / TARPUNÄHNLICHE / TARPONLIKE FISHES) {>151 Ma Kimmeridgian; age 283 myr}

Anguilliformes (BUIKVINLOZEN / AALACHTIGEN / PALINGACHTIGEN / AALARTIGE / EELS / ANGUILLIFORM FISHES) {>112 Ma Albian; age 99–116 myr} [suborders tentative]

MORINGUOIDEI (SPAGHETTI-AALVERWANTEN / SPAGHETTI-AALVERWANDTE / MORINGUOID FISHES) {>56 Ma Ypresian; age 81 myr}

Moringuidae Gill, 1885 (spaghetti-alen / wormpalingen / Spaghetti-aale / Wurmaale / spaghetti eels) [this family includes a not listed marine genus]: *Moringua* Gray, 1831.

ANGUILLOIDEI (AALVERWANTEN / AALVERWANDTE / ANGUILLOID FISHES) {>56 Ma Ypresian; age 81 myr}

Anguillidae Rafinesque-Schmaltz, 1810 (alen / palingen / Echte Aale / Flussaale / freshwater eels) {>48 Ma Lutetian / Eocene; age 17 myr}: *Anguilla* Paula von Schrank, 1798.

MURAENOIDEI (MOERAALVERWANTEN / MURÄNVERWANDTE / MURAENOID FISHES) {age 76 myr}

Muraenidae Rafinesque, 1815 (murenen / moeralen / Muränen / morays / moray eels) {>56 Ma Ypresian; age 60 myr} [this family includes a not listed marine subfamily]

Muraeninae {age 56 myr} [this subfamily includes not listed marine genera]: *Gymnothorax* Bloch, 1795; *Strophidon* McClelland, 1844.

CONGROIDEI (ZEEPALINGVERWANTEN / MEERAALVERWANDTE / CONGROID EELS) {age 86 myr}

Ophichthidae Günther, 1870 (wormalen / slangalen / Schlangenaale / snake & worm eels / shrimp eels / sand eels) {>71 Ma Maastrichtian; age 57 myr} [this family includes a not listed marine subfamily]

Ophichthinae (staartvinloze slangalen / Schlangenaale ohne Schwanzflosse / snake eels) [this subfamily includes not listed marine genera]: *Dalophis* Rafinesque-Schmaltz, 1810; *Lamnostoma* Kaup, 1856; *Ophichthus* Thunberg, 1789; *Pisodonophis* Kaup, 1856; *Stictorhinus* Böhlke & McCosker, 1975; *Yirrkala* Whitley, 1940.

5b cohort: **OSTEOGLOSSOMORPHA** (BEENTONGVISACHTIGEN / KNOCHENZÜNGLERÄHNLICHE / BONYTONGUE-LIKE FISHES) {>151 Ma Kimmeridgian; age 274 myr}

Hiodontiformes (MAANOOGACHTIGEN / MONDAUGENARTIGE / HIODONTIFORM FISHES) {>130 Ma Barremian; age 225 myr}

Hiodontidae Valenciennes, 1847 (maanogen / tandharingen / Mondaugen / Zahnheringe / mooneyes) {>56 Ma Eocene}: *Hiodon* Lesueur, 1818.

Osteoglossiformes (BEENTONGACHTIGEN / KNOCHENZÜNGLERARTIGE / OSTEOGLOSSIFORM FISHES / BONYTONGUES) {>146 Ma early Cretaceous; age 225 myr}

OSTEOGLOSSOIDEI (BEENTONGVERWANTEN / KNOCHENZÜNGLERVERWANDTE / OSTEOGLOSSOID FISHES) {>100 Ma Cenomanian or ? early Cretaceous; age 200 myr}

Pantodontoidea Peters, 1876 (African butterfly fishes)

Pantodontidae Peters, 1876 (vlindervissen / Schmetterlingsfische / freshwater butterfly fishes) {>100 Ma Cenomanian; age 148 myr}: *Pantodon* Peters, 1876.

Osteoglossoidea Bonaparte, 1845 (beentongvissen) {age 182 myr}

Osteoglossidae Bonaparte, 1845 (beentongen / Knochenzünger / bonytongues / arowanas / osteoglossids) {>112 Ma Albian; age 110 myr}: *Osteoglossum* Cuvier, 1829; *Scleropages* Günther, 1864.

Arapaimidae Bonaparte, 1846 (arapaimas / Arapaimas / heterotidids / arapaimids) {>125 Ma Aptian; age 110 myr}: *Arapaima* Müller, 1843; *Heterotis* Rüppell, 1828.

Mormyroidea Bonaparte, 1831 (nijlsnoekachtigen / radarvissen / Nilhechtähnliche / mormyroids) {age 110 myr}

Gymnarchidae Bleeker, 1859 (nijlsnoeken / Großnilhechte / Nilaale / aba's / gymnarchids) {>5 Ma late Miocene; age 110 myr}: *Gymnarchus* Cuvier, 1829.

Mormyridae Bonaparte, 1831 (olifantsvissen / Nilhechte / elephantfishes / mormyrids / snoutfishes) {>5 Ma late Miocene; age 110 myr}

Petrocephalinae Gill, 1862 (walvis-olifantsvissen / Boxernilhechte / whale elephantfishes / petrocephalines): *Petrocephalus* Marcusen, 1854.

Mormyrinae (tapirvissen / Nasennilhechte / mormyrines): *Boulengeromyrus* Taverne & Géry, 1968; *Brevimyrus* Taverne, 1971; *Brienomyrus* Taverne, 1971; *Campylomormyrus* Bleeker, 1874; *Cryptomyrus* Sullivan, Lavoué & Hopkins, 2016; *Cyphomyrus* Myers, 1960; *Genyomyrus* Boulenger, 1898; *Gnathonemus* Gill, 1863; *Heteromormyrus* Steindachner, 1866; *Hippopotamyrus* Pappenheim, 1906; *Hyperopisus* Gill, 1862; *Isichthys* Gill, 1863; *Ivindomyrus* Taverne & Géry, 1975; *Marcusenius* Gill, 1862; *Mormyrops* Müller, 1843; *Mormyrus* Linnaeus, 1758; *Myomyrus* Boulenger, 1898; *Paramormyrops* Taverne, Thys van den Audenaerde & Heymer 1977; *Pollimyrus* Taverne, 1971; *Stomatorhinus* Boulenger, 1898.

Notopteroidea Bleeker, 1851 (mesvissen van de oude wereld / Alte Welt Messerfische / Old World knifefishes) {age 130 myr}

Notopteridae Bleeker, 1851 (mesvissen van de oude wereld / Eigentliche Messerfische / Alte Welt Messerfische / featherfin knifefishes / featherbacks / Old World knifefishes) {>100 Ma Cenomanian / Middle Cretaceous; age 130 myr}

Notopterinae (Aziatische mesvissen / chitala's / Asiatische Messerfische / asiatic featherbacks) {>73 Ma Upper Cretaceous; age 133 myr}: *Chitala* Fowler, 1934; *Notopterus* Lacepède, 1800.

Xenomystinae Greenwood, 1963 (Afrikaanse mesvissen / Afrikanische Messerfische / african featherbacks) {age 133 myr}: *Papyrocranus* Greenwood, 1963; *Xenomystus* Günther, 1868.

Supercohort **Clupecocephala** [Otomorpha + Euteleosteomorpha] {age 176–210 myr}

5c cohort: **OTOMORPHA** {>151 Ma Tithonian; age 176–200 myr}

subcohort: **CLUPEI** {>134 Ma Hauterivian-Barremian; age 176 myr}

Clupeiformes (HARINGACHTIGEN / HERINGSARTIGE / HERINGSFISCHE / CLUPEIFORM FISHES / HERRINGLIKE FISHES) {>125 Ma Barremian / early Cretaceous; age 226 myr}

DENTICIPITOIDEI (KOPTANDIGEN / STACHELHERINGSVERWANDTE / DENTICIPITOID FISHES) {age 135 myr}

Denticipitidae Clausen, 1959 (koptandharingen / stekelharingen / Stachelheringe / Süßwasserheringe / denticle herrings) {>34 Ma Oligocene; age 135 myr}: *Denticeps* Clausen, 1959.

CLUPEOIDEI (HARINGVERWANTEN / HERINGSVERWANDTE / CLUPEOID FISHES) {>100 Ma Cenomanian; age 150 myr}

Clupeoidea Cuvier, 1816 (clupeides) {>112 Ma Albian-Aptian; age 110 myr}

Pristigasteridae Bleeker, 1872 (zaagbuikharingen / Sägebauchheringe / longfin herrings / pristigasterids) [this family includes not listed marine genera]: *Euplatygaster* Fowler, 1934; *Ilisha* Richardson, 1846; *Neosteus* Norman, 1923; *Odontognathus* Lacepède, 1800; *Pellona* Valenciennes, 1847; *Pristigaster* Cuvier, 1816; *Raconda* Gray, 1831.

Clupeidae Cuvier, 1816 (haringen / Heringe / herrings & shads) [this family includes a not listed marine subfamily; some subfamilies tentative]

Clupeinae {>74 Ma Campanian / Maastrichtian; age 95 myr} [this subfamily includes not listed marine genera]

Clupeini (echte haringen / Eigentliche Heringe / herrings) {age 70 myr} [this tribe includes not listed marine genera]: *Ramnogaster* Whitehead, 1965.

Hyperlophini Ogilby, 1897 (zandsprotten / Sandsprotten / double-armoured freshwater herrings) {age 50 myr}: *Hyperlophus* Ogilby, 1892; *Potamalosa* Ogilby, 1897.

Ehiravinae Deraniyagala, 1929 (Indische zoetwaterharingen / Indische Sandsprotten / Indian freshwater herrings) {>74 Ma Campanian / Maastrichtian; age 95 myr}: *Clupeichthys* Bleeker, 1855; *Clupeoides* Bleeker, 1851; *Clupeonella* Kessler, 1877; *Corica* Hamilton, 1822; *Dayella* Talwar & Whitehead, 1971; *Ehirava* Deraniyagala, 1929; *Gilchristella* Fowler, 1935; *Minyclupeoides* Roberts, 2008; *Sauvagella* Bertin, 1940; *Spratellomorpha* Bertin, 1946, *Sundasalanx* Roberts, 1981.

Alosinae Svetovidov, 1952 (elften / Finten / shads) {>74 Ma Campanian / Maastrichtian; age 25 myr} [this tribe includes not listed marine genera]: *Alosa* Garsault, 1764.

Dorosomatinae Gill, 1861 (zoetwaterharingen / Süßwasserheringe / freshwater herrings) {>62 Ma Middle Paleocene; age 95 myr} [this subfamily includes not listed marine genera]

Congothrissini Poll, 1964: *Congothrissa* Poll, 1964.

Pellonulini Svetovidov, 1952 (Afrikaanse zoetwaterharingen / Afrikanische Süßwasserheringe / African freshwater herrings) {age 50 myr}: *Cynothrissa* Regan, 1917; *Laeviscutella* Poll, Whitehead & Hopson, 1965; *Limnothrissa* Regan, 1917; *Microthrissa* Boulenger, 1902; *Nannothrissa* Poll, 1965; *Odaxothrissa* Boulenger, 1899; *Pellonula* Günther, 1868; *Potamothrissa* Regan, 1917; *Sierrathrissa* Thys van den Audenaerde, 1969; *Stolothrissa* Regan, 1917; *Thrattidion* Roberts, 1972.

Anodontostomatini Herre, 1933 {age 50 myr}: *Anodontostoma* Bleeker, 1849; *Clupanodon* Lacepède, 1803; *Gonialosa* Regan, 1917; *Gudusia* Fowler, 1911; *Konosirus* Jordan & Snyder,

1900; *Nematalosa* Regan, 1917; *Tenuialosa* Fowler, 1934.

“South American dorosomatins clade” {age 30 myr}: *Platanichthys* Whitehead, 1968;

Rhinosardinia Eigenmann, 1912.

Dorosomatini Gill, 1861 (spiermaagharingen / gizzard shads) {age 30 myr}: *Dorosoma*

Rafinesque, 1820; *Ethmalosa* Regan, 1917; *Herklotsichthys* Whitley, 1951; *Hilsa* Regan, 1917;

Sardinella Valenciennes, 1847.

Engraulioidea Gill, 1861 (engraulides) {>50 Ma Ypresian; age 110 myr}

Engraulidae Gill, 1861 (ansjovissen / Sardellen / anchovies / engraulids) {>50 Ma Ypresian; age 70 myr}

Engraulinae (Nieuwe Wereld ansjovissen / engraulines) {>23 Ma Miocene / Burdigalian; age 60 myr} [this subfamily includes not listed marine genera]: *Amazonsprattus* Roberts, 1984; *Anchoa* Jordan & Evermann, 1927; *Anchovia* Jordan & Evermann, 1895; *Anchoviella* Fowler, 1911; *Cetengraulis* Günther, 1868; *Jurengraulis* Whitehead, 1988; *Lycengraulis* Günther, 1868; *Pterengraulis* Günther, 1868; *Stolephorus* Lacepède, 1803.

Coiliinae Bleeker, 1872 (Oude Wereld ansjovissen / old world engraulines) {age 60 myr} [this subfamily includes a not listed marine genus]: *Coilia* Gray, 1830; *Lycotryssa* Günther, 1868; *Setipinna* Swainson, 1839; *Thryssa* Cuvier, 1829.

subcohort: **OSTARIOPHYSI** {>151 Ma Tithonian; age 153 myr}

section: **Anotophysa** {>126 Ma Barremian; age 205 myr}

Gonorynchiformes (ZANDVISACHTIGEN / SANDFISCHARTIGE / GONORYNCHIFORM FISHES / MILKFISHES) {>145 Ma early Cretaceous; age 164 myr}

GONORYNCHOIDEI (MELKVISVERWANTEN / RÜSSELSALMVERWANDTE / MILCHFISCHVERWANDTE / GONORYNCHOID FISHES) {>99 Ma Cenomanian; age 152 myr}

Kneriidae Günther, 1868 (oor- en moddervissen / Schlankfische / kneriids / African freshwater gonorynchiforms) {>46 Ma Lutetian / Middle Eocene; age 122 myr}

Phractolaeminae Boulenger, 1901 (moddervissen / Afrikanische Schlammfische / snake mudheads / phractolaemines) {age 121 myr}: *Phractolaemus* Boulenger, 1901.

Kneriinae (oorvissen / Ohrenfische / shellears / earfishes) {>46 Ma Lutetian; age 37 myr}

Kneriini {>46 Ma Lutetian; age 24 myr}: *Kneria* Steindachner, 1866; *Parakneria* Poll, 1965.

Cromeriini Boulenger, 1904 (larfvissen / Larvenfische / cromeriins / miniaturized earfishes / paedomorphic earfishes) {age 24 myr}: *Cromeria* Boulenger, 1901; *Grasseichthys* Géry, 1964.

section: **Otophysa** (VISSEN MET HET ORGAAN VAN WEBER / FISCHE MIT WEBERSCHEN APPARAT / EAR-BLADDER FISHES / WEBERIAN APPARATUS FISHES) {>125 Ma Barremian; age 133 – 154 myr}

superorder: CYPRINIPHYSAE

Cypriniformes (KARPERACHTIGEN / KARPFFENFISCHARTIGE / CARPS / CYPRINIFORM FISHES) {>62 Ma Ypresian / early Paleocene; age 85–99 myr}

CATOSTOMOIDEI (KARPERZUIGERVERWANTEN / SAUGERVERWANDTE / CATOSTOMOID FISHES) {>66 Ma Danian; age 87–95 myr}

Catostomidae Agassiz, 1850 (karperzuigers / zuigkarpers / Sauger / Saugkarpfen / suckers / catostomid fishes) {>62 Ma Late Cretaceous / early Paleocene; age 63 myr}

Myxocyprininae Fowler, 1958 (Aziatische karperzuigers / Asiatische Sauger / Asian suckers) {>49 Ma early-middle Eocene; age 62 myr}: *Myxocyprinus* Gill, 1877.

Cycleptinae Gill, 1861 (blauwe zuigers / blue suckers / cycleptine suckers) {>56 Ma Ypresian; age 52 myr}: *Cycleptus* Rafinesque, 1819.

Ictiobinae Bleeker, 1863 (buffelzuigers / Büffelsauger / ictiobine suckers / buffalo fishes) {>56 Ma Ypresian; age 50 myr}: *Carpiodes* Rafinesque, 1820; *Ictiobus* Rafinesque, 1820.

Catostominae (kamtand-karpers / catostomine suckers) {>23 Ma Middle Miocene; age 34 myr}

Erimyzontini Hubbs, 1930 {age 30 myr}: *Erimyzon* Jordan, 1876; *Minytrema* Jordan, 1878.

Catostomini (western American suckers) {>10 Ma late Miocene; age 30 myr}: *Catostomus* Lesueur 1817; *Chasmistes* Jordan, 1878; *Deltistes* Seale, 1896; *Pantosteus* Cope, 1875.

Thoburniini Hubbs, 1930 {age 21 myr}: *Hypentelium* Rafinesque, 1818; *Thoburnia* Jordan & Snyder, 1917.

Moxostomatini Bleeker, 1863 (redhorse & jumprock suckers) {age 21 myr}: *Moxostoma* Rafinesque, 1820.

GYRINOCHHEILOIDEI (ZUIGMODDERKRUIPERVERWANTEN / SAUGSCHMERLENVERWANDTE / SUCKING LOACHES) {age 87 myr}

Gyrinocheilidae Gill, 1905 (zuigmodderkruipers / algeneters / Saugschmerlen / Algenfresser / sucking loaches / algae eaters / gyrinocheilids) {age 75 myr}: *Gyrinocheilus* Vaillant, 1902.

COBITOIDEI (MODDERKRUIPERVERWANTEN / SCHMERLENVERWANDTE / COBITOID FISHES)

Botiidae Berg, 1940 (tropische modderkruipers / Prachtschmerlen / botiines / pointface loaches) {age 61 myr}

Leptobotiinae Nalbant, 2002 (Oostaziatische prachtmodderkruipers / Ostasiatische Prachtschmerlen / Schlankprachtschmerlen / Chinese pointface loaches / diploid botiines) {age 121 myr}: *Leptobotia* Bleeker, 1870; *Parabotia* Dabry de Thiersant, 1872.

Botiinae (prachtmodderkruipers / Prachtschmerlen / beautiful loaches / tetraploid botiines) {age 121 myr}: *Ambastaiia* Kottelat, 2012; *Botia* Gray, 1831; *Chromobotia* Kottelat, 2004; *Sinibotia* Fang, 1936; *Syncrossus* Blyth, 1860; *Yasuhikotakia* Nalbant, 2002.

Vaillantellidae Nalbant & Bănărescu, 1977 (langvinmodderkruipers / Langflossenschmerlen / longfin loaches) {age 56 myr}: *Vaillantella* Fowler, 1905.

Cobitidae Swainson, 1838 (doorngrondels / echte modderkruipers / Steinbeißer / Dorngrundeln / Schmerlen / spined loaches / bluntnose loaches / cobitids) {>14 Ma Miocene; age 50 myr}:

“southern cobitines” (Zuid-Aziatische doorngrondels / Südasiatische Dorngrundeln / southern cobitines): *Acantopsis* van Hasselt, 1823; *Acanthopsoides* Fowler, 1934; *Canthophrys* Swainson, 1838; *Kottelatlimia* Nalbant, 1994; *Lepidocephalichthys* Bleeker, 1863; *Lepidocephalus* Bleeker, 1858; *Neoeucirrhichthys* Bănărescu & Nalbant, 1968; *Pangio* Blyth, 1860; *Theriodes* Kottelat, 2012.

Cobitinae (Euraziatische doorngrondels / noordelijke doorngrondels / Eurasiatische Dorngrundeln / spined loaches / northern cobitines): *Bibarba* Chen & Chen, 2007; *Cobitis* Linnaeus, 1758; *Koreocobitis* Kim, Park & Nalbant, 1997; *Microcobitis* Bohlen & Harant, 2011; *Misgurnus* Lacepède, 1803; *Paralepidocephalus* Tchang, 1935; *Protocobitis* Yang & Chen, 1993; *Sabanejewia* Vladykov, 1929.

Barbuccidae Kottelat, 2012 (scooter modderkruipers / Geisterschmerlen / scooter loaches / fire-eyed loaches): *Barbucca* Roberts, 1989.

Gastromyzontidae Fowler, 1905 (zuignapvissen / Flossensauger / hillstream loaches / gastromyzontids) [subfamilies tentative]

Parhomalopterinae Chen, 1980: *Annamia* Hora, 1932; *Liniparhomaloptera* Fang, 1935; *Parhomaloptera* Vaillant, 1902; *Plesiomyzon* Zheng & Chen, 1980; *Yaoshania* Yang *et al.*, 2012.

Pseudogastromyzontinae Silas, 1953 (vacuümglijders / Fransenmäuler / stream loaches / suckerbelly loaches): *Beaufortia* Hora, 1932; *Erromyzon* Kottelat, 2004; *Formosania* Oshima, 1919; *Paraprotomyzon* Pellegrin & Fang, 1935; *Protomyzon* Hora, 1932; *Pseudogastromyzon* Nichols, 1925; *Sewellia* Hora, 1932; *Vanmanenia* Hora, 1932.

Gastromyzontinae (zuignapvissen van Borneo / Borneo-Karpfenschmerlen / Bornean suckerbelly loaches / gastromyzontins): *Gastromyzon* Günther, 1874; *Glanioptis* Boulenger, 1899; *Hypergastromyzon* Roberts, 1989; *Katibasia* Kottelat, 2004; *Neogastromyzon* Popta, 1905.

Serpenticobitidae Kottelat, 2012 (slangenmodderkruipers / Schlangenschmerlen / snake loaches / serpent loaches): *Serpenticobitis* Roberts, 1997.

Balitoridae Swainson, 1839 (platte grondels / balitoriden / Plattschmerlen / sucker-body hillstream loaches / river loaches / balitorids) {age 46 myr}

Homalopteroidinae Randall & Page 2015 (platte steenkruipers / flat loaches): *Homalopteroides* Fowler, 1905; *Homalopterula* Fowler, 1940.

Balitorinae (steenkruipers / stone loaches / lizard loaches): *Balitora* Gray, 1830; *Balitoropsis* Smith, 1945; *Bhavana* Hora, 1920; *Cryptotora* Kottelat, 1998; *Ghatsa* Randall & Page, 2015; *Hemimyzon* Regan, 1911; *Homaloptera* van Hasselt, 1823; *Jinshaia* Kottelat & Chu, 1988; *Lepturichthys* Regan, 1911; *Metahomaloptera* Chang, 1944; *Neohomaloptera* Herre, 1944; *Pseudohomaloptera* Silas, 1953; *Sinogastromyzon* Fang, 1930; *Travancoria* Hora, 1941.

Ellopostomatidae Bohlen & Šlechtová, 2009 (blokhoofdmodderkruipers / Schlürfschnuten / Störschmerlen / Nippschmerlen / square-head loaches): *Ellopostoma* Vaillant, 1902.

Nemacheilidae Regan, 1911 (modderkruipers / Bachschmerlen / brook loaches / stone loaches / nemacheilids) {>12 Ma Miocene; age 46 myr} [subfamilies tentative]

Lefuinae Prokofiev, 2010 {age 29–36 myr}: *Lefua* Herzenstein, 1888; *Oreonectes* Günther, 1868; *Troglonectes* Zhang, Zhao & Tang, 2016.

Yunnanilinae Prokofiev, 2010: *Eonemachilus* Berg, 1938; *Heminoemacheilus* Zhu & Cao, 1987; *Micronemacheilus* Rendahl, 1944; *Paranemachilus* Zhu, 1983; *Petruichthys* Menon, 1987; *Protonemacheilus* Yang & Chu, 1990; *Traccatichthys* Freyhof & Serov, 2001; *Yunnanilus* Nichols, 1925.

Triplophysinae Prokofiev, 2010 (bermpjes / noordelijke baardgrondels / Nordliche Bachschmerlen / northern stone loaches) {>12 Ma Miocene; age 24 myr}: *Barbatula* Linck, 1790; *Claea* Kottelat, 2011; *Homatula* Nichols, 1925; *Labiatoophysa* Prokofiev, 2010; *Triplophysa* Rendahl, 1933; *Tuberoschistura* Kottelat, 1990.

Nemacheilinae (beekmodderkruipers / zuidelijke baardgrondels / Südliche Bachschmerlen / southern stone loaches / nemacheilins / West & South Asian nemacheilids) {age 36 myr}: *Aborichthys* Chaudhuri, 1913; *Acanthocobitis* Peters, 1861; *Afronemacheilus* Golubtsov & Prokofiev, 2009; *Draconectes* Kottelat, 2012; *Dzihunia* Prokofiev, 2001; *Eidinemacheilus* Hashemzadeh Segherloo, Ghaedrahmati & Freyhof, 2016; *Hedinichthys* Rendahl, 1933; *Indoreonectes* Rita & Bănărescu, 1978; *Iskandaria* Prokofiev, 2009; *Kayahschistura* Kottelat & Grego, 2020; *Longischistura* Bănărescu & Nalbant, 1995; *Malihkaia* Kottelat, 2017; *Mesonoemacheilus* Bănărescu & Nalbant, 1982; *Mustura* Kottelat, 2018; *Nemacheilus* Bleeker, 1863; *Nemachilichthys* Day, 1878; *Neonoemacheilus* Zhu & Guo, 1985; *Oxyneoemacheilus* Bănărescu & Nalbant, 1966; *Paracanthocobitis* Grant, 2007; *Paracobitis* Bleeker, 1863; *Paraschistura* Prokofiev, 2009; *Physoschistura* Bănărescu & Nalbant, 1982; *Pteronemacheilus* Bohlen & Šlechtová, 2011; *Rhyacoschistura* Kottelat, 2019; *Sasanidus* Freyhof *et al.*, 2016; *Schistura* McClelland, 1838; *Sectoria* Kottelat, 1990; *Seminemacheilus* Bănărescu & Nalbant, 1995; *Speonectes* Kottelat, 2012; *Sphaerophysa* Cao & Zhu, 1988; *Sundoreonectes* Kottelat, 1990; *Troglocobitis* Parin, 1983; *Turcinoemacheilus* Bănărescu & Nalbant, 1964.

CYPRINOIDEI (KARPERVERWANTEN / KARPFFENFISCHVERWANDTE / CYPRINOID FISHES) {>66 Ma Danian; age 87 myr}

Paedocyprididae Mayden & Chen, 2010 (dwergkarpertjes / minikarpertjes / tiny carps): *Paedocypris* Kottelat, Britz, Tan & Witte, 2005.

Psilorhynchidae Hora, 1926 (bergkarpers / Himalaya algeneters / spoelgrondels / Spindelschmerlen / Zitterschmerlen / Himalaya-Bärblinge / Gonzo-Bärblinge / mountain carps / torrent fishes / stonecarps) {age 46 myr}: *Psilorhynchus* McClelland, 1838.

Cyprinidae Rafinesque, 1815 (karperfamilie / Karpfenfische / carps / cyprinids) {>56 Ma Ypresian / early Eocene; age 62 myr} [subfamilies and tribes tentative]

Labeoninae Bleeker, 1859 (lipkarpers / Lippenkarpfen / lip carps / labeonines) {>14 Ma Middle Miocene; age 22–82 myr} [tribes tentative]

Parapsilorhynchini Babu Rao & Yazdani, 1978: *Diplocheilichthys* Bleeker, 1860; *Longanalus* Li, 2006; *Parapsilorhynchus* Hora, 1921; *Protolabeo* Zhang, Zhao & An, 2010; *Sinilabeo* Rendahl, 1932.

Labeonini (labeo's / Fransenlipper / Lippenbarben / lip carps / mud carps / labeonins): *Altigena* Burton, 1934, *Bangana* Hamilton, 1822; *Cirrhinus* Oken, 1817; *Decorus* Zheng, Chen & Yang, 2019; *Gymnostomus* Heckel, 1843; *Incisilabeo* Fowler, 1937; *Labeo* Cuvier, 1816; *Schismatorhynchus* Bleeker, 1855; *Speolabeo* Kottelat, 2017.

Garrini Bleeker, 1863 (raspelbarbelen / zuiglipkarpers / Saugbarben / suckerbarbs / log suckers): *Ceratogarra* Kottelat, 2020; *Garra* Hamilton, 1822; *Paracrossochilus* Popta, 1904; *Tariqilabeo* Mirza & Saboohi, 1990.

“Osteochilus clade” (lipbarbelen / Lippenbarben / fringelip barbs / lip barbs): *Barbichthys* Bleeker, 1860; *Crossocheilus* Kuhl & van Hasselt, 1823; *Epalzeorhynchus* Bleeker, 1855; *Henicorhynchus* Smith, 1945; *Labiobarbus* van Hasselt, 1823; *Lobocheilos* Bleeker, 1853; *Osteochilus* Günther, 1868; *Thynnichthys* Bleeker, 1860.

“Semilabeo clade” (Chinese lipkarpers / Chinesische Saugbarben / Chinese suckerbarbs): *Ageneiogarra* Garman, 1912; *Cophecheilus* Zhu *et al.*, 2011; *Discogobio* Lin, 1931; *Fivepearlus* Li *et al.* 2017; *Hongshuia* Zhang, Qiang & Lan, 2008; *Lanlabeo* Yao, He & Peng, 2018; *Linichthys* Zhang & Fang, 2005; *Mekongina* Fowler, 1937; *Paraqianlabeo* Zhao *et al.*, 2014; *Parasinilabeo* Wu, 1939; *Placocheilus* Wu, 1977; *Prolixicheilus* Zheng, Chen & Yang, 2016; *Pseudocrossocheilus* Zhang & Chen, 1997; *Pseudogyrirocheilus* Fang, 1933; *Ptychidio* Myers, 1930; *Qianlabeo* Zhang & Chen, 2004; *Rectoris* Lin, 1935; *Semilabeo* Peters, 1881; *Sinigarra* Zhang & Zhou, 2012; *Sinocrossocheilus* Wu, 1977; *Stenorynchoacrum* Huang, Yang & Chen, 2014; *Vinagarra* Nguyen & Bui, 2009; *Zuojiangia* Zheng *et al.*, 2018.

Probarbinae Yang *et al.*, 2015 (primitive cyprinids): *Catlocarpio* Boulenger, 1898; *Probarbus* Sauvage, 1880.

Torinae Karaman, 1971 (grote barbelen / Große Barben / large barbs) {age 24 myr}: *Acapoeta* Cockerell, 1910; *Arabibarbus* Borkenhagen, 2014; *Barbopsis* Di Caporiacco, 1926; *Carasobarbus* Karaman, 1971; *Hypselobarbus* Bleeker, 1860; *Labeobarbus* Rüppell, 1835; *Lepidopygopsis* Raj, 1941; *Mesopotamichthys* Karaman, 1971; *Naziritor* Mirza & Javed, 1985; *Neolissochilus* Rainboth, 1985; *Osteochilichthys* Hora, 1942; *Pterocapoeta* Günther, 1902; *Sanagia* Holly, 1926; *Tor* Gray, 1834.

Smiliogastrinae Bleeker, 1863 (barbeeltjes / small barbs / systomins) {age 58 myr}: *Amatolacypris* Skelton, Swartz & Vreven, 2018; *Barbodes* Bleeker, 1859; *Barboides* Brüning, 1929; *Caecobarbus* Boulenger, 1921; *Chagunius* Smith, 1938; *Cheilobarbus* Smith, 1841; *Clypeobarbus* Fowler, 1936; *Coptostomabarbus* David & Poll, 1937; *Dawkinsia* Pethiyagoda, Meegaskumbura & Maduwage, 2012; *Desmopuntius* Kottelat, 2013; *Eechathalakenda* Menon, 1999; *Enteromius* Cope, 1867; *Haludaria* Pethiyagoda, 2013; *Hampala* Kuhl & van Hasselt, 1823; *Namaquacypris* Skelton, Swartz & Vreven, 2018; *Oliotius* Kottelat, 2013; *Oreichthys* Smith, 1933; *Osteobrama* Heckel, 1843; *Pethia* Pethiyagoda, Meegaskumbura & Maduwage, 2012; *Prolabeo* Norman, 1932; *Prolabeops* Schultz,

1941; *Pseudobarbus* Smith, 1841; *Puntigrus* Kottelat, 2013; *Puntius* Hamilton, 1822; *Rohtee* Sykes, 1839; *Sahyadria* Raghaven *et al.*, 2013; *Sedercypris* Skelton, Swartz & Vreven, 2018; *Striuntius* Kottelat, 2013; *Systemus* McClelland, 1838; *Xenobarbus* Norman, 1923.

Cyprininae (karpers en barbelen / Kärpflinge / barbines / cyprinines) {>55 Ma Eocene; age 24–82 myr}

Cyprinini (karpers / cyprins) {>38 Ma late Eocene; age 22–68 myr}: *Aptosyax* Rainboth, 1991; *Carassioides* Oshima, 1926; *Carassius* Jarocki, 1822; *Cyprinus* Linnaeus, 1758; *Luciocyprinus* Vaillant, 1904; *Paraspinibarbus* Chu & Kottelat, 1989; *Parator* Wu *et al.*, 1964; *Procypris* Lin, 1933; *Pseudosinocyclocheilus* Zhang & Zhao, 2016; *Sinibarbus* Sauvage, 1874; *Sinocyclocheilus* Fang, 1936; *Typhlobarbus* Chu & Chen, 1982.

Rohteichthyini Günther, 1868 (Aziatische barbelen / Asiatische Barben / asiatic barbs) {age 20–68 myr}: *Albulichthys* Bleeker, 1859; *Amblyrhynchichthys* Bleeker, 1859; *Balantiocheilos* Bleeker, 1859; *Barbonymus* Kottelat, 1999; *Cosmochilus* Sauvage, 1878; *Cyclocheilichthys* Bleeker, 1859; *Cyclocheilos* Bleeker, 1859; *Discherodontus* Rainboth, 1989; *Eirmotus* Schultz, 1959; *Hypsibarbus* Rainboth, 1996; *Kalimantania* Bănărescu, 1980; *Laocypris* Kottelat, 2000; *Mystacoleucus* Günther, 1868; *Parasikukia* Doi, 2000; *Poropuntius* Smith, 1931; *Puntioplites* Smith, 1929; *Rohteichthys* Bleeker, 1860; *Sawbwa* Annandale, 1918; *Scaphognathops* Smith, 1945; *Sikukia* Smith, 1931; *Troglocyclocheilus* Kottelat & Bréhier, 1999.

Acrossocheilinae Yang *et al.*, 2015 (Oostaziatische barbelen / Ostasiatische Barben / East Asian barbs) {age 14 myr}: *Acrossocheilus* Oshima, 1919; *Folifer* Wu, 1977; *Onychostoma* Günther, 1896.

Barbinae Bleeker, 1859 (barbelen / Barben / barbels / barbines) {>50 Ma Middle Eocene; age 24–60 myr}: *Aulopyge* Heckel, 1841; *Barbus* Daudin, 1805; *Caecocypris* Banister & Bunni, 1980; *Capoeta* Valenciennes, 1842; *Cyprinion* Heckel, 1843; *Kantaka* Hora, 1942; *Luciobarbus* Heckel, 1843; *Scaphiodonichthys* Vinciguerra, 1890; *Schizocypris* Regan, 1914; *Semiplotus* Bleeker, 1860.

Spinibarbinae Yang *et al.*, 2015 (gedoornde barbelen / Stachelbarben / spine barbs) {age 14 myr}: *Spinibarbichthys* Oshima, 1926; *Spinibarbus* Oshima, 1919.

Schizothoracinae McClelland, 1842 (sneeuwbarbelen / Schneebarben / snow barbels / snow carps / snow trouts / primitive schizothoracins / oreinins / coldwater barbs) {>34 Ma Oligocene; age 16 myr}: *Aspiorhynchus* Kessler, 1879; *Oreinus* McClelland, 1838; *Percocypris* Chu, 1935; *Schizopyge* Heckel, 1848; *Schizothorax* Heckel, 1838.

Schizopygopsinae Mirza, 1991 (bergbarbelen / spleetbarbelen / Schlitzkarpfen / mountain barbels / specialized schizothoracins) {>33 Ma Middle Oligocene; age 10 myr}: *Diptychus* Steindachner, 1866; *Gymnodiptychus* Herzenstein, 1892; *Oxygymnocypris* Tsao, 1964; *Ptychobarbus* Steindachner, 1866; *Schizopygopsis* Steindachner, 1866.

Sundadanionidae Mayden & Chen, 2010 (minidanio's / tiny danios): *Fangfangia* Britz, Kottelat & Tan, 2012; *Sundadanio* Kottelat & Witte, 1999.

Danionidae Bleeker, 1863 (danio's / Bärblinge / Schlankbärblinge / danionids / rasborine fishes) {>55 Ma Eocene; age 30–50 myr}

Esominae Tan & Armbruster 2018 (vliegbarbelen / Flugbarben / flying barbs): *Esomus* Swainson, 1839.

Chedrinae Bleeker, 1863 (Afro-aziatische forelbarbelen / Forellebärblinge / troutbarbs / bariliines): *Barilius* Hamilton, 1822; *Bengala* Gray, 1834; *Cabdio* Hamilton, 1822; *Chelaethiops* Boulenger, 1899; *Engraulicypris* Günther, 1894; *Leptocypris* Boulenger, 1900; *Luciosoma* Bleeker, 1855; *Malayochela* Bănărescu, 1968; *Nematabramis* Boulenger, 1894; *Neobola* Vinciguerra, 1895; *Opsaridium* Peters, 1854; *Opsarius* McClelland, 1838; *Raiamas* Jordan, 1919; *Rastrineobola* Fowler, 1936; *Salmostoma* Swainson, 1839; *Securricula* Günther, 1868; *Thryssocypris* Roberts & Kottelat, 1984.

Rasborinae Günther, 1868 (rasbora's / Rasboras / rasborines): *Amblypharyngodon* Bleeker, 1860; *Boraras* Kottelat & Vidthayanon, 1993; *Brevibora* Liao, Kullander & Fang, 2010; *Horadandia* Deraniyagala, 1943; *Kottelatia* Liao, Kullander & Fang, 2010; *Pectenocypris* Kottelat, 1982; *Rasbora* Bleeker, 1859; *Rasboroides* Brittan, 1954; *Rasbosoma* Liao, Kullander & Fang, 2010; *Trigonopoma* Liao, Kullander & Fang, 2010; *Trigonostigma* Kottelat & Witte, 1999.

Danioninae (danio's / Danios / chelins / danionines) {age 32 myr}: *Betadevario* Pramod *et al.*, 2010; *Brachydanio* Weber & de Beaufort, 1916; *Celestichthys* Roberts, 2007; *Chela* Hamilton, 1822; *Danio* Hamilton, 1822; *Danionella* Roberts, 1986; *Devario* Heckel, 1843; *Inlecycpris* Howes, 1980; *Laubuka* Bleeker, 1859; *Microdevario* Fang *et al.*, 2009; *Microrasbora* Annandale, 1918.

Leptobarbidae Bleeker, 1864 (apollobarbelen / cigar barbs): *Leptobarbus* Bleeker, 1859.

Xenocyprididae Günther, 1868 (Aziatische voorns / zwartbuiksnepen / Schwarzbauchnasen / xenocypridids / East Asian minnows / cultrines) {>50 Ma Middle / Upper Eocene; age 102 myr}

Opsariichthyinae Rendahl, 1928 (Oostaziatische danio's / opsariichthyins) {age 79 myr}: *Candidia* Jordan & Richardson, 1909; *Nipponocypris* Chen, Wu & Hsu, 2008; *Opsariichthys* Bleeker, 1863; *Parazacco* Chen, 1982; *Xenocyprionides* Chen, 1982.

Xenocypridinae Günther, 1868 (Oostaziatische voorns / zwartbuiksnepen / Schwarzbauchnasen / xenocypridines / keeled minnows / cultrines) {>50 Ma Middle / Upper Eocene; age 102 myr} [tribes uncertain]

Oxygastrini Fowler, 1951 (Aziatische kielvoorns / Aziatische Kielkarpfenfische / oxygastrines) {age 79 myr}: *Aphyocypris* Günther, 1868; *Araiocypris* Conway & Kottelat, 2008; *Gymnodanio* Chen & He, 1992; *Hemigrammocycpris* Fowler, 1910; *Macrochirichthys* Bleeker, 1860; *Metzia* Jordan & Thompson, 1914; *Oxygaster* van Hasselt, 1823; *Parachela* Steindachner, 1881; *Paralaubuca* Bleeker, 1864; *Rasborichthys* Bleeker, 1859.

Hypophthalmichthyini Günther, 1868 (Chinese graskarpers / Chinese snoekvoorns / bighead carps / elopichthyins / Chinese grass carps / ctenopharyngodons) {>14 Ma Middle Miocene; age 8 Ma}: *Atrilinea* Chu, 1935; *Ctenopharyngodon* Steindachner, 1866; *Elopichthys* Bleeker, 1860; *Hypophthalmichthys* Bleeker, 1860; *Luciobrama* Bleeker, 1870; *Mylopharyngodon* Peters, 1881; *Ochetobius* Günther, 1868.

Squaliobarbini Rainboth, 1991 (Chinese slankvoorns / squaliobarbins) {>14 Ma Middle Miocene}: *Squaliobarbus* Günther, 1868.

Xenocypridini (Chinese kielvoorns / Kielweißfische / xenocypridins) {age 9 myr}

Xenocypridina (true xenocypridins): *Distoechodon* Peters, 1881; *Plagiognathops* Berg 1907; *Pseudobrama* Bleeker, 1870; *Xenocypris* Günther, 1868.

Cultrina Kryzanowsky, 1947 (Chinese brasems / kielvoorns / Kielkarpfenfische / Chinesische Brachsen / cultrins) {>23 Ma early Miocene}: *Anabarilius* Cockerell, 1923; *Ancherythroculter* Yih & Wu, 1964; *Chanodichthys* Bleeker, 1860; *Culter* Basilewsky, 1855; *Ischikauia* Jordan & Snyder, 1900; *Longiculter* Fowler, 1937; *Megalobrama* Dybowski, 1872; *Parabramis* Bleeker, 1864; *Pogobrama* Luo, 1995; *Sinibrama* Wu, 1939.

"Hemiculter clade" [*sensu* Dai & Yang, 2003] (slanke Chinese kielvoorns / Langgestreckte Kielweißfische / hemicultrins / elongate cultrins): *Hainania* Koller, 1927; *Hemiculter* Bleeker, 1860; *Hemiculterella* Warpachowski, 1888; *Pseudohemiculter* Nichols & Pope, 1927; *Pseudolaubuca* Bleeker, 1864; *Toxabramis* Günther, 1873.

Tincidae Jordan, 1878 (zeelten / Schleien / tenches) {>34 Ma early Oligocene / Rupelian; age 83 myr}: *Tinca* Garsault, 1764.

Acheilognathidae Bleeker, 1863 (bittervoorns / Bitterlinge / bitterlings) {>23 Ma early Miocene; age 20 myr}: *Acheilognathus* Bleeker, 1859; *Paratanakia* Chang, Chen & Mayden, 2014; *Pseudorhodeus*

Chang, Chen & Mayden, 2014; *Rhodeus* Agassiz, 1832; *Sinorhodeus* Li, Liao & Arai, 2017; *Tanakia* Jordan & Thompson, 1914.

Gobionidae Bleeker, 1863 (karpergrondels / Gründlinge / gudgeons / gobionids) {>50 Ma Middle Eocene; age 64 myr} [subfamilies / tribes uncertain]

“Hemibarbus-Squalidus clade” [*sensu* Tang *et al.* 2011] (primitieve grondels / hemibarbins) {age 58 myr}: *Belligobio* Jordan & Hubbs, 1925; *Hemibarbus* Bleeker, 1860; *Squalidus* Dybowski, 1872.

Sarcocheilichthyinae Kryzanowsky, 1947 {>34 Ma early Oligocene; age 57 myr}: *Coreius* Jordan & Starks, 1905; *Coreoleuciscus* Mori, 1935; *Gnathopogon* Bleeker, 1860; *Gobiocypris* Ye & Fu, 1983; *Ladislavia* Dybowski, 1869; *Paracanthobrama* Bleeker, 1864; *Paraleucogobio* Berg, 1907; *Pseudopungtungia* Mori, 1935; *Pseudorasbora* Bleeker, 1860; *Pungtungia* Herzenstein, 1892; *Rhinogobio* Bleeker, 1870; *Sarcocheilichthys* Bleeker, 1860.

Gobioninae (riviergrondels / geuvels / Flußgründlinge / Schmerlengründlinge / bottom-dwelling gobionins / gobionins) {age 54 myr}

Gobiobotiini Mori, 1933: *Gobiobotia* Kreyenberg, 1911; *Xenophysogobio* Chen & Cao, 1977.

Gobionini: *Gobio* Cuvier, 1816; *Mesogobio* Bănărescu & Nalbant, 1973; *Romanogobio* Bănărescu, 1961.

Armatogobionini Kryzanowsky, 1947 (Oost-aziatische riviergrondels / Ostasiatische Schmerlengründlinge / East Asian gobionins / pseudogobiins / pseudogobionids): *Abbottina* Jordan & Fowler, 1903; *Biwia* Jordan & Fowler, 1903; *Microphysogobio* Mori, 1934; *Platysmacheilus* Lu, Luo & Chen, 1977; *Pseudogobio* Bleeker, 1860; *Saurogobio* Bleeker, 1870.

Tanichthyidae Mayden & Chen, 2010 (Chinese danio's / Kardinalfische / mountain minnows): *Tanichthys* Lin, 1932.

Leuciscidae Bonaparte, 1835 (witvissen / Weißfische / minnows / leuciscids) {>34 Ma Rupelian; age 62 myr}

Pseudaspininae Bogutskaya, 1990 (Verre Oosten voorns / Far East Asian leuciscines) {>30 Ma middle Oligocene}: *Oreoleuciscus* Warpachowski, 1889; *Pseudaspilus* Dybowski, 1869; *Rhynchocypris* Günther, 1889.

Laviniinae Bleeker, 1863 (western chubs) {>31 Ma middle Oligocene; age 52 myr}

Chrosomini Jordan, 1878: *Chrosomus* Rafinesque, 1820.

Laviniini {>12 Ma Middle Miocene}: *Acrocheilus* Agassiz, 1855; *Eremichthys* Hubbs & Miller, 1948; *Evarra* Woolman, 1894; *Gila* Baird & Girard, 1853; *Hesperoleucus* Snyder, 1913; *Klamathella* Miller, 1945; *Lavinia* Girard, 1854; *Mylopharodon* Ayres, 1855; *Orthodon* Girard, 1856; *Ptychocheilus* Agassiz, 1855; *Relictus* Hubbs & Miller, 1972; *Siphateles* Cope, 1883.

Plagopterinae Cope, 1874 (creek chubs / CC-Plagopterin clade) {age 52 myr}: *Couesius* Jordan, 1878; *Hemitremia* Cope, 1870; *Lepidomeda* Cope, 1874; *Margariscus* Cockerell, 1909; *Meda* Girard, 1856; *Plagopterus* Cope, 1874; *Semotilus* Rafinesque, 1820.

Leuciscinae (voorns / Eigentliche Weißfische / minnows / leuciscines) {>34 Ma Rupelian / early-middle Oligocene; age 33 myr} [tribes uncertain]

Leuciscini (snoekwitvissen / Hechtweißfische / eurasiatic daces) {>19 Ma early Miocene; age 28 myr}: *Leuciscus* Cuvier, 1816; *Pelecus* Agassiz, 1835.

“primitive leuciscins clade” {>19 Ma early Miocene; age 29–37 myr}: *Delminichthys* Freyhof *et al.*, 2006; *Leucalburnus* Berg, 1916; *Notemigonus* Rafinesque, 1819; *Pachychilon* Steindachner, 1882; *Pelagus* Kottelat & Freyhof, 2007.

“Alburnoides clade” {age 27 myr}: *Alburnoides* Jeitteles, 1861, *Tropidophoxinellus* Stephanidis, 1974.

Abramini Dybowski, 1862 (brasems / Brachsen / Brachsenkarpfen / breams) {age 26 myr}: *Abramis* Cuvier, 1816; *Acanthobrama* Heckel, 1843; *Alburnus* Rafinesque, 1820; *Ballerus*

Heckel, 1843; *Blicca* Heckel, 1843; *Capoetobrama* Berg, 1916; *Leucaspius* Heckel & Kner, 1857; *Mirogrex* Goren, Fishelson & Trewavas, 1973; *Scardinius* Bonaparte, 1837; *Vimba* Fitzinger, 1873.

Chondrostomini Agassiz, 1855 (kraakbeenlipkarpers / alvers / Nasen / chondrostomine fishes) {>19 Ma early Miocene; age 25 myr}: *Achondrostoma* Robalo *et al.*, 2007; *Anaocypris* Collares-Pereira, 1983; *Chondrostoma* Agassiz, 1832; *Iberochondrostoma* Robalo *et al.*, 2007; *Leucos* Heckel, 1843; *Parachondrostoma* Robalo *et al.*, 2007; *Petroleuciscus* Bogutskaya, 2002; *Phoxinellus* Heckel, 1843; *Protochondrostoma* Robalo *et al.*, 2007; *Pseudochondrostoma* Robalo *et al.*, 2007; *Pseudophoxinus* Bleeker, 1860; *Rutilus* Rafinesque, 1820; *Sarmarutilus* Bianco & Ketmaier, 2014; *Squalius* Bonaparte, 1837; *Telestes* Bonaparte, 1837.

Phoxininae Bleeker, 1863 (elritsen / Elritzen / phoxinines) {>23 Ma Miocene; age 63 myr}: *Phoxinus* Rafinesque, 1820.

Pogonichthyinae Girard, 1858 (North American minnows & shiners / OPM clade) {age 33 myr}

Pogonichthyini (Mylocheilus clade) {>7 Ma late Miocene; age 44 myr}: *Clinostomus* Girard, 1856; *lotichthys* Jordan & Evermann, 1896; *Mylocheilus* Agassiz, 1855; *Pogonichthys* Girard, 1854; *Richardsonius* Girard, 1856.

Exoglossini Jordan, 1877: *Exoglossum* Rafinesque, 1818; *Oregonichthys* Hubbs, 1929; *Rhinichthys* Agassiz, 1849; *Tiaroga* Girard, 1856.

Campostomini Jordan, 1877 (stonerollers and chubs): *Campostoma* Agassiz, 1855; *Nocomis* Girard, 1856.

Hybognathini Jordan, 1878 (shiners / Platygobio-shiner clade) {age 44 myr} [Graodontinae Jordan, 1877 forgotten name]: *Agosia* Girard, 1856; *Alburnops* Girard, 1856; *Algansea* Girard, 1856; *Codoma* Girard, 1856; *Cyprinella* Girard, 1856; *Dionda* Girard, 1856; *Erimonax* Jordan, 1924; *Erimystax* Jordan, 1882; *Graodus* Günther, 1868; *Hudsonius* Girard, 1856; *Hybognathus* Agassiz, 1855; *Hybopsis* Agassiz, 1854; *Luxilus* Rafinesque, 1820; *Lythrurus* Jordan, 1876; *Macrhybopsis* Cockerell & Allison, 1909; *Miniellus* Jordan, 1882; *Notropis* Rafinesque, 1818; *Opsopoeodus* Hay, 1881; *Phenacobius* Cope, 1867; *Pimephales* Rafinesque, 1820; *Platygobio* Gill, 1863; *Pteronotropis* Fowler, 1935; *Stypodon* Garman, 1881; *Tampichthys* Schönhuth *et al.*, 2008.

superorder: CHARACIPHYSAE (mesvisachtigen, karperzalmachtigen en meervalachtigen / Messeraalartige, Salmierartige und Welsartige / gymnotiform, characiform and siluriform fishes) {>125 Ma Aptian; age 97–119 myr}

Characiformes (KARPERZALMMACHTIGEN / SALMLERARTIGE / CHARACIFORM FISHES) {>100 Ma Cenomanian; age 100–108 myr}

CITHARINOIDEI (PRIMITIEVE KARPERZALMMACHTIGEN / GERADSALMLERVERWANDTE / CITHARINOID FISHES) {>46 Ma Eocene; age 90 myr}

Citharinidae Günther, 1864 (ruitzalmen / Geradsalmier / lutefishes / moon fishes / citharinids) {>1 Ma early Pleistocene; age 79 myr}: *Citharidium* Boulenger, 1902; *Citharinops* Daget, 1962; *Citharinus* Cuvier, 1816.

Distichodontidae Günther, 1864 (Afrikaanse karperzalmen en snavelzalmen / hoogrugzalmen / Karpfen- und Schnabelsalmier / distichodontids) {>5 Ma late Miocene; age 79 myr} [= ? Citharinidae]: *Belonophago* Giltay, 1929; *Distichodus* Müller & Troschel, 1844; *Eugnathichthys* Boulenger, 1898; *Ichthyoborus* Günther, 1864; *Mesoborus* Pellegrin, 1900; *Microstomatichthyoborus* Nichols & Griscom, 1917; *Monostichodus* Vaillant, 1886; *Nannaethiops* Günther, 1872; *Nannocharax* Günther, 1867; *Paradistichodus* Pellegrin, 1922; *Paraphago* Boulenger, 1899; *Phago* Günther, 1865; *Xenocharax* Günther, 1867.

CHARACOIDEI (KARPERZALMVERWANTEN / SALMLERVERWANDTE / CHARACOID FISHES) {>71 Ma Maastrichtian; age 93–113 myr} [superfamilies tentative]

Crenuchoidea Günther, 1864

Crenuchidae Günther, 1864 (grondzalmen / Grundsalmier / crenuchids)

Crenuchinae (prachtzalmen / bronzzalmen / Segelflossensalmier / Prachtsalmier / crenuchines / sailfin tetras): *Crenuchus* Günther, 1863; *Poecilocharax* Eigenmann, 1909.

Characidiinae Fowler, 1932 (bodenzalmen / grondzalmen / Bodensalmier / Zwergpfeilsalmier / South American darters): *Ammocryptocharax* Weitzman & Kanazawa, 1976; *Characidium* Reinhardt, 1867; *Elachocharax* Myers, 1927; *Klausewitzia* Géry, 1965; *Leptocharacidium* Buckup, 1993; *Melanocharacidium* Buckup, 1993; *Microcharacidium* Buckup, 1993; *Odontocharacidium* Buckup, 1993; *Skiotocharax* Presswell, Weitzman & Bergquist, 2000.

Alestoidea Cockerell, 1910 {age 72 myr}

Incertae edis: *Arnoldichthys* Myers, 1926; *Lepidarchus* Roberts, 1966.

Hepsetidae Hubbs, 1939 (Afrikaanse snoekzalmen / Afrikaanse Hechtsalmier / African pike characids / African pikes / hepsetids) {>71 Ma Maastrichtian; age 72 myr}: *Hepsetus* Swainson, 1838.

Alestidae Cockerell, 1910 (Afrikaanse karperzalmen / zwermzalmen / Schwarmsalmier / Echte Afrikaanse Salmier / African characins / alestids) {>56 Ma early Eocene / Ypresian; age 63 myr} [subfamilies tentative]:

“Brycinus clade” (grote Afrikaanse karperzalmen / grote Afrikaanse Salmier / large-bodied African tetras): *Brycinus* Valenciennes, 1850.

Bryconaethiopinae Hoedeman, 1951: *Brachyalestes* Günther, 1864; *Bryconaethiops* Günther, 1873.

Petersiinae Poll, 1967 (Afrikaanse tetras / Congo-zalmen / Kongosalmier / Lappensalmier / African tetras) [Clupeocharacinae Pellegrin, 1926 / Alestopetersiinae Hoedeman, 1951 forgotten names]: *Alestopetersius* Hoedeman, 1951; *Bathyaethiops* Fowler, 1949; *Clupeocharax* Pellegrin, 1926; *Nannopetersius* Hoedeman, 1956; *Petersius* Hilgendorf, 1894; *Phenacogrammus* Eigenmann, 1907; *Tricuspidalestes* Poll, 1967.

Alestinae {>56 Ma early Eocene}: *Alestes* Müller & Troschel, 1844; *Alestion* Roberts, 2019; *Bryconalestes* Hoedeman, 1951; *Hydrocynus* Cuvier, 1816; *Ladigesia* Géry, 1968; *Micralestes* Boulenger, 1899; *Rhabdalestes* Hoedeman, 1951.

Erythrinioidea Valenciennes, 1847

Tarumaniidae de Pinna *et al.*, 2017 (modderzalmpjes / muckfishes): *Tarumania* de Pinna *et al.*, 2017.

Erythrinidae Valenciennes, 1847 (forelzalmen / roofzalmen / Forellensalmier / Raubsalmier / Tigersalmier / trahiras / wolf fishes) {>23 Ma early Miocene; age 61 myr}: *Erythrinus* Scopoli, 1777; *Hoplerythrinus* Gill, 1896; *Hoplias* Gill, 1903.

Curimatoidea Gill, 1858

Cynodontidae Eigenmann, 1903 (zabeltanzalmen / wolfzalmen / Säbelzahnsalmler / Bandsalmler / Wolfssalmler / sabertoothed characids / cynodontids / dogtooth characins / wolf tetras) {>14 Ma Middle Miocene; age 63 – 74 myr}: *Cynodon* Spix, 1829; *Hydrolycus* Müller & Troschel, 1844; *Rhaphiodon* Agassiz, 1829.

Hemiodontidae Bleeker, 1859 (zilverzalmen / lange zalmen / tandarme zalmkarpers / slanke zalmen / penseelvissen / Halbzähler / Keulensalmler / Schlanksalmler / Barbensalmler / Langsalmler / hemiodontids) {age 70 myr}: *Anodus* Cuvier, 1829; *Argonectes* Böhlke & Myers, 1956; *Bivibranchia* Eigenmann, 1912; *Hemiodus* Müller, 1842; *Micromischodus* Roberts, 1971.

Serrasalminae Bleeker, 1859 (schijf- en zaagbuikzalmen / Scheiben- und Sägesalmler / serrasalmids / piranhas and allies) {>55 Ma Eocene; age 70 myr}

Colossomatinae *in press* (laagland pacus / Riesenpacus / lowland pacus) {age 45 myr}:

Colossoma Eigenmann & Kennedy, 1903; *Mylossoma* Eigenmann & Kennedy, 1903; *Piaractus* Eigenmann, 1903.

Myleinae Eigenmann, 1903 (schijfzalmen / hoogland pacus / Scheibensalmler / upland pacus) {age 24 myr}: *Acnodon* Eigenmann, 1903; *Mylesinus* Valenciennes, 1850; *Myleus* Müller & Troschel, 1844; *Myloplus* Gill, 1896; *Ossubtus* Jégu, 1992; *Tometes* Valenciennes, 1850; *Utiaritichthys* Miranda Ribeiro, 1937.

Serrasalminae (zaagbuikzalmen / Sägesalmler / piranhas) {age 24 myr}: *Catoprion* Müller & Troschel, 1844; *Metynnus* Cope, 1878; *Pygocentrus* Müller & Troschel, 1844; *Pygopristis* Müller & Troschel, 1844; *Serrasalmus* Lacepède, 1803.

Parodontidae Eigenmann, 1910 (rotszalmen / Felsensalmler / Algensalmler / darter tetras / scrapeteeths / parodontids) {>23 Ma early Miocene}: *Apareiodon* Eigenmann, 1916; *Parodon* Valenciennes, 1850; *Saccodon* Kner, 1863.

Prochilodontidae Eigenmann, 1909 (bocachico's / nachtzalmen / Großlippensalmler / Nachtsalmler / bocachicos / flannelmouth characiforms / prochilodontids) {>12 Ma Middle Miocene}: *Ichthyoelephas* Posada Arango, 1909; *Prochilodus* Agassiz, 1829; *Semaprochilodus* Fowler, 1941.

Chilodontidae Eigenmann, 1903 (zilverkopstaanders / Silberkopfsteher / Lippensalmler / headstanders / chilodontids): *Caenotropus* Günther, 1864; *Chilodus* Müller & Troschel, 1844.

Curimatidae Gill, 1858 (barbeelzalmen / brede zalmen / Breitlingssalmler / Barbensalmler / toothless characiforms / detritivorous characiforms / curimatids): *Curimata* Bosc, 1817; *Curimatella* Eigenmann & Eigenmann, 1889; *Curimatopsis* Steindachner, 1876; *Cyphocharax* Fowler, 1906; *Potamorhina* Cope, 1878; *Psectrogaster* Eigenmann & Eigenmann, 1889; *Pseudocurimata* Fernández-Yépez, 1948; *Steindachnerina* Fowler, 1906.

Anostomidae Günther, 1864 (anostomiden / kopstaanders / Engmaulsalmler / Kopfsteher / toothed headstanders / headstanders / anostomids) {>23 Ma early Miocene}: *Abramites* Fowler, 1906; *Anostomoides* Pellegrin, 1909; *Anostomus* Scopoli, 1777; *Gnathodolus* Myers, 1927; *Hypomasticus* Borodin, 1929; *Laemolyta* Cope, 1872; *Leporellus* Lütken, 1875; *Leporinus* Agassiz, 1829; *Megaleporinus* Ramirez, Birindelli & Galetti, 2017; *Petulanos* Sidlauskas & Vari, 2008; *Pseudanos* Winterbottom, 1980; *Rhytiodus* Kner, 1858; *Sartor* Myers & Carvalho, 1959; *Schizodon* Agassiz, 1829; *Synaptolaemus* Myers & Fernández-Yépez, 1950.

Characoidea Latreille, 1825 (characides)

Ctenoluciidae Schultz, 1944 (snoekzalmen / Amerikaanse snoekzalmen / Hechtsalmler / pike-characins) {>71 Ma Maastrichtian}: *Boulengerella* Eigenmann, 1903; *Ctenolucius* Gill, 1861.

Lebiasinidae Gill, 1889 (spatzalmachtigen / Schlanksalmler / lebiasinids) {>71 Ma Maastrichtian}

Lebiasininae (leverzalmen / Zwergraubsalmler / lebiasinas): *Lebiasina* Valenciennes, 1847.

Pyrrhulininae Bleeker, 1859

“Derhamia clade”: *Derhamia* Géry & Zarske, 2002.

Pyrrhulinini

Pyrrhulinina (spatzalmen / Spritzsalmler / splashing tetras): *Copeina* Fowler, 1906; *Copella*

Myers, 1956; *Pyrrhulina* Valenciennes, 1846.

Nannostomina Eigenmann, 1909 (spitsbekzalmpjes / potloodzalmpjes / Bleistiffische / Ziersalmler / pencilfishes): *Nannostomus* Günther, 1872.

Chalceidae Fowler, 1958 (grootschubkarperzalmen / Glanzsalmler / tucanfishes / chalceids): *Chalceus* Cuvier, 1818.

Bryconidae Eigenmann, 1912 (bijzalmen / tandzalmen / Beißsalmler / Lachssalmler / bryconids / dorados / piabanhas / South American trouts) {>34 Ma late Oligocene; age 47 myr}: *Brycon* Müller & Troschel, 1844; *Chilobrycon* Géry & de Rham, 1981; *Salminus* Agassiz, 1829.

Iguanodectidae Eigenmann, 1909 (slanke karperzalmen / Iguanodectinen / iguanodectids): *Bryconops* Kner, 1858; *Iguanodectes* Cope, 1872; *Piabucus* Oken, 1817.

Acestrorhynchidae Eigenmann, 1912 (roofzalmen / Raubsalmler / pike characids / acestrorhynchids)

Acestrorhynchinae (barracudazalmen / Barrakuda-salmler / Spindelsalmler / freshwater barracudas / pike characins / acestrorhynchines) {>14 Ma Middle Miocene; age 41 myr}: *Acestrorhynchus* Eigenmann & Kennedy, 1903.

Heterocharacinae Géry, 1966: *Gnathocharax* Fowler, 1913; *Heterocharax* Eigenmann, 1912; *Hoplocharax* Géry, 1966; *Lonchogenys* Myers, 1927; *Priocharax* Weitzman & Vari, 1987.

Roestinae Lucena & Menezes, 1998 (wolfzalmen / Hundssalmler / biting tetras): *Gilbertolus* Eigenmann, 1907; *Roestes* Günther, 1864.

Gasteropelecidae Bleeker, 1859 (bijzalmen / Beilbauchfische / freshwater hatchetfishes) {age 44 myr}: *Carnegiella* Eigenmann, 1909; *Gasteropelecus* Scopoli, 1777; *Thoracocharax* Fowler, 1907.

Triportheidae Fowler, 1940 (hatchet characins / elongate hatchetfishes) {>34 Ma late Oligocene; age 44 myr}

Clupeocharacinae Fowler, 1958 (ansjoviszalmen / Anchovissalmler / anchovie characins): *Clupeocharax* Pearson, 1924; *Engraulisoma* Castro, 1981.

Triportheinae (gekielde karperzalmen / keeled characines) {>34 Ma late Oligocene; age 27 myr}: *Triportheus* Cope, 1872.

Agoniatinae Bleeker, 1859 (haringzalmen / Heringsalmler / herring characins / agoniatines) {age 26 myr}: *Agoniatas* Müller & Troschel, 1845; *Lignobrycon* Eigenmann & Myers, 1929.

Characidae Latreille, 1825 (karperzalmfamilie / Echte Amerikanische Salmler / characids) {>34 Ma Eocene / Oligocene; age 56 myr} [subfamilies tentative]

Spintherobolinae Miranda, 2018 (piquiras): *Amazonspinther* Bührnheim *et al.*, 2008; *Atopomesus* Myers, 1927; *Spintherobolus* Eigenmann, 1911.

Stethaprioninae Eigenmann, 1907 (tetra's / Tetras / American tetras / "Tetragonopterinae") [tribes tentative]

Stethaprionini (discuszalmen / stekelzalmen / Diskussalmler / Stachelsalmler / silver dollar tetras / stethaprionins): *Brachychalcinus* Boulenger, 1892; *Gymnocorymbus* Eigenmann, 1908; *Orthospinus* Reis, 1989; *Poptella* Eigenmann, 1908; *Stethaprion* Cope, 1870; *Stichonodon* Eigenmann, 1903.

Pristellini Géry & Boutière, 1964 (tetra's / Tetras / "Tetragonopterinae"): *Aphyodite* Eigenmann, 1912; *Axelrodia* Géry, 1965; *Brittanichthys* Géry, 1965; *Bryconella* Géry, 1965; *Coptobrycon* Géry, 1966; *Deuterodon* Eigenmann, 1907; *Ectrepopterus* Fowler, 1943; *Erythrocharax* Netto-Ferreira *et al.*, 2013; *Gymnotichthys* Fernández-Yépez, 1950; *Hasemania* Ellis, 1911; *Hemigrammus* Gill, 1858; *Hyphessobrycon* Durbin, 1908; *Jupiaba* Zanata, 1997; *Makunaima* Terán, Benitez & Miranda, 2020; *Moenkhausia* Eigenmann, 1903; *Nematocharax* Weitzman, Menezes & Britski, 1986; *Paracheiroidon* Géry, 1960; *Parapristella* Géry, 1964; *Parecbasis* Eigenmann, 1914; *Petitella* Géry & Boutière, 1964; *Phycocharax* Ohara, Miranda & Lima 2017; *Pristella* Eigenmann, 1908; *Stygichthys* Brittan & Böhlke, 1965.

Gymnocharacini Eigenmann, 1909 (wisselzalmen / Wechselsalmler / "Tetragonopterinae"): *Andromakhe* Terán, Benitez & Miranda, 2020; *Astyanax* Baird & Girard, 1854; *Bario* Myers, 1940; *Carlana* Strand, 1928; *Ctenobrycon* Eigenmann, 1908; *Dectobrycon* Zarske & Géry, 2006; *Grundulus* Valenciennes, 1846; *Gymnocharacinus* Steindachner, 1903; *Hollandichthys* Eigenmann, 1910; *Inpaichthys* Géry & Junk 1977; *Nematobrycon* Eigenmann, 1911; *Oligosarcus*

Günther, 1864; *Parastremma* Eigenmann, 1912; *Psalidodon* Eigenmann, 1911; *Psellogrammus* Eigenmann, 1908, *Pseudochalceus* Kner, 1863; *Rachoviscus* Myers, 1926; *Rhoadsia* Fowler, 1911; *Schultzites* Géry, 1964; *Scissor* Günther, 1864; *Thayeria* Eigenmann, 1908, *Zygogaster* Eigenmann, 1913.

Genera *incertae sedis* in Characidae: *Genycharax* Eigenmann, 1912; *Leptobrycon* Eigenmann, 1915; *Mixobrycon* Eigenmann, 1915; *Oligobrycon* Eigenmann, 1915; *Oxybrycon* Géry, 1964; *Serrabrycon* Vari, 1986; *Thrissobrycon* Böhlke, 1953; *Tucanoichthys* Géry & Römer, 1997; *Tyttobrycon* Géry, 1973.

Characinae (characines) {>23 Ma early Miocene} [tribes and subtribes tentative]

Exodontini Fowler, 1958 (toothy characins): *Bryconexodon* Géry, 1980; *Exodon* Müller & Troschel, 1844; *Roebroexodon* Géry, 1959.

Tetragonopterini Gill, 1858 (tetragonopterins): *Tetragonopterus* Cuvier, 1816.

Characini (echte karperzalmen / Fluß-Schakalen / characins)

Characina: *Charax* Scopoli, 1777; *Roeboides* Günther, 1864.

Cynopotamina Cockerell, 1915: *Acanthocharax* Eigenmann, 1912; *Acestrocephalus* Eigenmann, 1910; *Cynopotamus* Valenciennes, 1850; *Galeocharax* Fowler, 1910.

Phenacogasterina Mattox & Toledo-Piza, 2012: *Microchemobrycon* Eigenmann, 1915; *Phenacogaster* Eigenmann, 1907.

Aphyocharacini Eigenmann, 1909 (slanke zalmpjes / glaszalmpjes / Aphyocharacinen / glass characins / aphyocharacins): *Aphyocharacidium* Géry, 1960; *Aphyocharax* Günther, 1868; *Leptagoniates* Boulenger, 1887; *Paragoniates* Steindachner, 1876; *Phenagoniates* Eigenmann & Wilson, 1914; *Prionobrama* Fowler, 1913; *Xenagoniates* Myers, 1942.

Protocheiroidontini Vari, Melo & Oliveira, 2016: *Protocheiroidon* Vari, Melo & Oliveira 2016.

Pseudocheiroidontini Mariguela *et al.*, 2013 (trans-Andean cheiroidontins): *Nanocheiroidon* Malabarba, 1998; *Pseudocheiroidon* Meek & Hildebrand, 1916.

Cheiroidontini Eigenmann, 1915 (cheiroidontins): *Cheiroidon* Girard, 1855; *Heterocheiroidon* Malabarba, 1998; *Prodontocharax* Eigenmann & Pearson, 1924; *Saccoderma* Schultz, 1944.

Compsurini Malabarba, Weitzman & Burns, 1998 (internbevruchtende zalmpjes / Zwergsalmler / inseminating cheiroidontins / compsurins / small tetras): *Acinocheiroidon* Malabarba & Weitzman, 1999; *Compsura* Eigenmann, 1915; *Ctenocheiroidon* Malabarba & Jerep, 2012; *Holoshesthes* Eigenmann, 1903; *Kolpotocheiroidon* Malabarba & Weitzman, 2000; *Macropsobrycon* Eigenmann, 1915; *Odontostilbe* Cope, 1870; *Serrapinnus* Malabarba, 1998.

Stevardiinae Gill, 1858 (stevardiines)

Eretmobryconini Thomaz, Arcila, Ortí & Malabarba, 2015: *Eretmobrycon* Fink, 1976; *Markiana* Eigenmann, 1903.

Xenurobryconini Myers & Böhlke, 1956 (xenurobryconins): *Iotabrycon* Roberts, 1973; *Ptychocharax* Weitzman, Fink, Machado-Allison & Royero, 1994; *Scopaeocharax* Weitzman & Fink, 1985; *Tyttocharax* Fowler, 1913; *Xenurobrycon* Myers & Miranda Ribeiro, 1945.

Glandulocaudini Eigenmann, 1914 (breedstaartzalmen / glandulocaudines) {age 2.5 myr}: *Glandulocauda* Eigenmann, 1911; *Lophobrycon* Castro *et al.*, 2003; *Mimagoniates* Regan, 1907.

Stevardiini (klierstaartzalmlers / Drüsensalmler / corynopomins): *Argopleura* Eigenmann, 1913; *Chrysobrycon* Weitzman & Menezes, 1998; *Corynopoma* Gill, 1858; *Gephyrocharax* Eigenmann, 1912; *Hysteronotus* Eigenmann, 1911; *Pseudocorynopoma* Perugia, 1891; *Pterobrycon* Eigenmann, 1913; *Varicharax* Vanegas-Ríos *et al.*, 2020.

Hemibryconini Géry, 1966 (hemibryconins): *Acrobrycon* Eigenmann & Pearson, 1924; *Hemibrycon* Günther, 1864.

Creagrutini Miles, 1943 (creagrutins): *Carlasthanax* Géry, 1972; *Creagrutus* Günther, 1864.

Diapomini Eigenmann, 1909: *Attonitus* Vari & Ortega, 2000; *Aulixidens* Böhlke, 1952; *Bryconacidnus* Myers, 1929; *Bryconamericus* Eigenmann, 1907; *Caiapobrycon* Malabarba & Vari, 2000; *Ceratobranchia* Eigenmann, 1914; *Cyanogaster* Mattox *et al.*, 2013; *Diapoma* Cope, 1894; *Knodus* Eigenmann, 1911; *Lepidocharax* Ferreira, Menezes & Quagio-Grassiotto, 2011; *Microgenys* Eigenmann, 1913; *Monotocheiroidon* Eigenmann & Pearson, 1924; *Othonocheiroidus* Myers, 1927; *Phallobrycon* Menezes, Ferreira & Netto-Ferreira, 2009; *Piabarchus* Myers, 1928; *Piabina* Reinhardt, 1867; *Planaltina* Böhlke, 1954; *Rhinobrycon* Myers, 1944; *Rhinopetitia* Géry, 1964.

Landonini Weitzman & Menezes, 1998 (caudal sac characins): *Landonia* Eigenmann & Henn, 1914.

Phenacobryconini Weitzman & Menezes, 1998: *Phenacobrycon* Eigenmann, 1922.

Trochilocharacini Zarske, 2010: *Trochilocharax* Zarske, 2010.

Gymnotiformes (AMERIKAANSE MESVISACHTIGEN / MESSERAALARTIGE / NEUE WELT MESSERFISCHE / AMERIKANISCHE MESSERFISCHE / GYMNOTIFORM FISHES) {>23 Ma Miocene; age 29 myr}

Apteronotidae Jordan, 1923 (koevissen / staartvinmesalen / Schwanzflossen-Messeraale / Apteronotiden / caudal-fin knifefishes / ghost knifefishes) {age 143 myr}

Sternarchorhamphinae Albert, 2001 (langsnuitmesvissen / Langschnautz-Messeraale / longsnout knifefishes): *Orthosternarchus* Ellis, 1912; *Sternarchorhamphus* Eigenmann, 1905.

Apteronotinae (zeekoevissen / Seekuhfische / Seekuhaale / ghost knifefishes) [tribes tentative]

Sternarchorhynchini Mago-Leccia, 1978 (tapirmesvissen / Schnabel-Messeraale / trunk knifefishes): *Platyurosternarchus* Mago-Leccia, 1994; *Sternarchorhynchus* Castelnau, 1855.

Adontosternarchini Mago-Leccia, 1978: *Adontosternarchus* Ellis, 1912.

Apteronotini: *Apteronotus* Lacepède, 1800; *Compsaraia* Albert, 2001; *Megadontognathus* Mago-Leccia, 1994; *Melanosternarchus* Bernt *et al.*, 2018; *Parapteronotus* Albert, 2001; *Pariosternarchus* Albert & Crampton, 2006; *Porotergus* Ellis, 1912; *Sternarchella* Eigenmann, 1905; *Sternarchogiton* Eigenmann, 1905; *Tembeassu* Triques, 1998; *Tenebrosternarchus* Bernt *et al.*, 2020.

Sternopygidae Cope, 1871 (rattenstaartmesvissen / Rattenschwanz-Messerrfische / rattail knifefishes) {>23 Ma Miocene; age 143 myr}

Sternopyginae (glasmesalen): *Sternopygus* Müller & Troschel, 1849.

Eigenmanninae Mago-Leccia, 1978 (glasmesvissen / Glasmesserfische / glass knifefishes): *Archolaemus* Korrington, 1970; *Distocyclus* Mago-Leccia, 1978; *Eigenmannia* Jordan & Evermann, 1896; *Rabdolichops* Eigenmann & Allen, 1942.

Gymnotidae Rafinesque, 1815 (mesalen / Messeraale / gymnotid eels / carapos) {age 61 myr}

Electrophorinae Gill, 1872 (sidderalen / Zitteraale / Elektrische Aale / electric knifefishes / electric eels) {age 50 myr}: *Electrophorus* Gill, 1864.

Gymnotinae (naaktrugmesvissen / Echte Messeraale / nakedback knifefishes) {age 50 myr}: *Gymnotus* Linnaeus, 1758.

Rhamphichthyidae Regan, 1911 (mesalen / painted knifefishes)

Rhamphichthyinae (langsnavelmesalen / langsnuitmesalen / Langschnabel-Messerrfische / sand knifefishes): *Gymnorhamphichthys* Ellis, 1912; *Iracema* Triques, 1996; *Rhamphichthys* Müller & Troschel, 1849.

Steatoginae Albert, 2001 (stompkopmesalen / bluntnose knifefishes): *Hypopygus* Hoedeman, 1962; *Steatogenys* Boulenger, 1898.

Hypopomidae Eigenmann, 1912 (bonte mesalen / Bunte-Messerrfische / grass knifefishes / hypopomid knifefishes)

Hypopominae: *Akawaio* Maldonado-Ocampo *et al.*, 2014; *Brachyhypopomus* Mago-Leccia, 1994; *Hypopomus* Gill, 1864.

Microsternarchinae Albert, 2001 (kortsnuitmesalen / Kurzschnabel-Messerrfische / shortsnout knifefishes): *Microsternarchus* Fernández-Yépez, 1968; *Procerusternarchus* Cox Fernandes, Nogueira & Alves-Gomes, 2014; *Racenisia* Mago-Leccia, 1994.

Siluriformes (MEERVALACHTIGEN / WELSARTIGE / SILURIFORM FISHES) {>94 Ma Turonian-Santonian; age 74–86 myr}

DIPLOMYSTOIDEI

Diplomystidae Eigenmann, 1890 (primitieve meervallen / oermeervallen / Primitivwelse / Zweibartelwelse / diplomystid catfishes / Patagonian catfishes / velvet catfishes) {>84 Ma Campanian}; *Diplomystes* Bleeker, 1858.

CETOPSOIDEI

Cetopsidae Bleeker, 1858 (cetopsids)

Helogeninae Regan, 1911 (vlagmeervallen / Fähnchenwelse / helogeneid catfishes / marbled catfishes): *Helogenes* Günther, 1863.

Cetopsinae (walvismeervallen / Walähnliche Welse / whalelike catfishes / cetopsines)

Cetopsidiini de Pinna, Ferraris & Vari, 2007: *Cetopsidium* Vari, Ferraris & de Pinna, 2005.

Denticetopsini de Pinna, Ferraris & Vari, 2007: *Denticetopsis* Ferraris, 1996.

Cetopsini: *Cetopsis* Agassiz, 1829; *Paracetopsis* Bleeker, 1862.

LORICARIOIDEI (LORICARIOID FISHES) {>58 Ma late Paleocene}

Nematogenyidae Bleeker, 1862 (wormmeervallen / Wurmwelse / mountain catfishes / nematogenyid catfishes / worm catfishes) {>23 Ma Miocene}: *Nematogenys* Girard, 1855.

Trichomycteridae Bleeker, 1858 (minimeervallen / meervalletjes / Schmerlenwelse / pencil catfishes) {age 125 myr}

Copionodontinae de Pinna, 1992: *Copionodon* de Pinna, 1992; *Glaphyropoma* de Pinna, 1992.

Trichogeninae Isbrücker, 1986: *Trichogenes* Britski & Ortega, 1983.

Trichomycterinae {>5 Ma Pliocene}: *Bullockia* Arratia *et al.*, 1978; *Cambeva* Katz *et al.*, 2018; *Eremophilus* Humboldt, 1805; *Hatcheria* Eigenmann, 1909; *Ituglanis* Costa & Bockmann, 1993; *Rhizosomichthys* Miles, 1943; *Scleronema* Eigenmann, 1918; *Silvinichthys* Arratia, 1998; *Trichomycterus* Valenciennes, 1832.

Microcambeviniae Costa, Henschel & Katz, 2020 (Atlantische Kust verschuilmeervalletjes / Atlantic Forest trichomycterids): *Listrura* de Pinna, 1988; *Microcambeva* Costa & Bockmann, 1994.

Glanapteryginae Myers, 1944 (verschuilmeervalletjes / Versteckwelse / burrowing catfishes / psammophilous catfishes): *Ammoglanis* Costa 1994; *Glanapteryx* Myers, 1927; *Malacoglanis* Myers & Weitzman, 1966; *Potamoglanis* Henschel *et al.*, 2018; *Pygidianops* Myers, 1944; *Sarcoglanis* Myers & Weitzman, 1966; *Stauroglanis* de Pinna, 1989; *Stenolicmus* de Pinna & Starnes, 1990; *Typhlobelus* Myers, 1944.

Tridentinae Eigenmann, 1918: *Miuroglanis* Eigenmann & Eigenmann, 1889; *Tridens* Eigenmann & Eigenmann, 1889; *Tridensimilis* Schultz, 1944; *Tridentopsis* Myers, 1925.

Stegophilinae Günther, 1864 (parasiterende meervallen / Schmarotzerwelse / parasitic catfishes): *Acanthopoma* Lütken, 1892; *Apomatoceros* Eigenmann, 1922; *Haemomaster* Myers, 1927; *Henonemus* Eigenmann & Ward, 1907; *Homodiaetus* Eigenmann & Ward, 1907; *Megalocentor* de Pinna & Britski, 1991; *Ochmacanthus* Eigenmann, 1912; *Pareiodon* Kner, 1855; *Pseudostegophilus* Eigenmann & Eigenmann, 1889; *Schultzichthys* Dahl, 1960; *Stegophilus* Reinhardt, 1859.

Vandelliinae Bleeker, 1862 (bloeddrinkende meervallen / candirus / vandelliines / hematophagous catfishes): *Paracanthopoma* Giltay, 1935; *Paravandellia* Miranda Ribeiro, 1912; *Plectrochilus* Miranda Ribeiro, 1917; *Vandellia* Valenciennes, 1846.

Callichthyidae Bonaparte, 1835 (pantsermeervallen / Schwielenwelse / Panzerwelse / callichthyid armored catfishes) {>56 Ma Eocene; age 55–64 myr}

Callichthyinae (kwi-kwi's / Schwielenwelse / callichthyines) {age 55–64 myr}

Callichthyini: *Callichthys* Scopoli, 1777; *Lepthoplosternum* Reis, 1997; *Megalechis* Reis, 1997.

Dianemini Hoedeman, 1952: *Dianema* Cope, 1871; *Hoplosternum* Gill, 1858.

Corydoradinae Hoedeman, 1952 (stofzuigmeervallen / Panzerwelse / corys) {>56 Ma Eocene; age 55–64 myr}

Corydoradini (zadelsnuitpantsermeervallen / spitskoppantsermeervallen / Sattelschnauz-panzerwelse / Spitzkopfpantzerwelse / saddle-snout corys) {age 30 myr}: *Corydoras* Lacepède, 1803.

Aspidoradini Hoedeman, 1952 (corydorasjes / stofzuigertjes) {age 30 myr}: *Aspidoras* Ihering, 1907; *Gastrodermus* Cope, 1878; *Hoplisoma* Swainson, 1838; *Scleromystax* Günther, 1864.

Scoloplacidae Bailey & Baskin, 1976 (dwerghoornmeervallen / Zwergdornwelse / Glattdornwelse / spiny dwarf catfishes): *Scoloplax* Bailey & Baskin, 1976.

Astroblepidae Bleeker, 1862 (bergmeervallen / Andenwelse / Himmelsguckerwelse / climbing catfishes / Andean hillstream catfishes / Andes catfishes): *Astroblepus* Humboldt, 1805.

Loricariidae Rafinesque, 1815 (harnasmeervallen / Harnischwelse / suckermouth armored catfishes / mailed catfishes) {>23 Ma Miocene; age 65 myr}

Lithogeninae Gosline, 1947 (rotsmeervallen / klimmende harnasmeervallen / Felsenwelse / climbing armored catfishes): *Lithogenes* Eigenmann, 1909.

Delturinae Armbruster, Reis & Pereira, 2006 (primitieve harnasmeervallen / Primitivsaugwelse / primitive suckermouth catfishes) {age 59 myr} : *Delturus* Eigenmann & Eigenmann, 1889; *Hemipsilichthys* Eigenmann & Eigenmann, 1889; *Upsilodus* Miranda Ribeiro, 1924.

Rhinelepininae Armbruster 2004 (rhinelepine plecós) {age 47 myr}: *Pogonopoma* Regan, 1904; *Pseudorhinelepis* Bleeker, 1862; *Rhinelepis* Agassiz, 1829.

Loricariinae (Hexenwelse / mailed catfishes / loricariines) {age 42 myr}

Harttiini Boeseman, 1971 (combtoothed loricariines): *Cteniloricaria* Isbrücker & Nijssen 1979; *Harttia* Steindachner, 1876; *Harttiella* Boeseman, 1971.

Loricariini (zweepstaartharnasmeervallen / Fadenharnischwelse / loricariins)

Farlowellina Fowler, 1958 (steurharnasmeervallen / Störharnischwelse / sturgeon loricariines / stickcatfishes): *Aposturisoma* Isbrücker *et al.*, 1983; *Farlowella* Eigenmann & Eigenmann, 1889; *Lamontichthys* Miranda Ribeiro, 1939; *Pterosturisoma* Isbrücker & Nijssen, 1978; *Sturisoma* Swainson, 1838; *Sturisomatichthys* Isbrücker & Nijssen, 1979.

Loricariina (zweepstaartharnasmeervallen / Fadenharnischwelse / loricariins): *Brochiloricaria* Isbrücker & Nijssen, 1979; *Crossoloricaria* Isbrücker, 1979; *Dasylicaria* Isbrücker & Nijssen, 1979; *Dentectus* Martín Salazar, Isbrücker & Nijssen, 1982; *Fonchiiloricaria* Rodriguez, Ortega & Covain, 2011; *Furcodontichthys* Rapp Py-Daniel, 1981; *Hemiodontichthys* Bleeker, 1862; *Limatulichthys* Isbrücker & Nijssen, 1979; *Loricaria* Linnaeus, 1758; *Loricariichthys* Bleeker, 1862; *Metaloricaria* Isbrücker, 1975; *Paraloricaria* Isbrücker, 1979; *Planiloricaria* Isbrücker, 1971; *Proloricaria* Isbrücker, 2001; *Pseudohemiodon* Bleeker, 1862; *Pseudoloricaria* Bleeker, 1862; *Pyxiloricaria* Isbrücker & Nijssen, 1984; *Reganella* Eigenmann, 1905; *Rhadinoloricaria* Isbrücker & Nijssen, 1974; *Ricola* Isbrücker & Nijssen, 1978; *Rineloricaria* Bleeker, 1862; *Spatuloricaria* Schultz, 1944.

Hypoptopomatinae Eigenmann & Eigenmann, 1890 (oorzeefmeervallen / Ohrgitterharnischwelse / Ohrgitterwelse / cascudinhos) {age 36 myr}: *Chauliocheilos* Martins *et al.*, 2014; *Lampiella* Isbrücker, 2001.

Hypoptopomatini (dwergharnasmeervallen / hypoptopomatins) {age 50 myr}: *Acestridium* Haseman, 1911; *Hypoptopoma* Günther, 1868.

“Otocinclus clade” (dwerghoornmeervallen): *Leptotocinclus* Delapieve, Lehmann & Reis, 2017; *Nannoptopoma* Schaefer, 1996; *Nannoxyropsis* Delapieve, Lehmann & Reis, 2017; *Niobichthys* Schaefer & Provenzano, 1998; *Otocinclus* Cope, 1871; *Oxyropsis* Eigenmann & Eigenmann, 1889.

“Corumbataia clade”: *Corumbataia* Britski, 1997; *Curculionichthys* Roxo *et al.*, 2015; *Microplecostomus* Silva *et al.*, 2016; *Nannoplecostomus* Ribeiro, Lima & Pereira, 2012.

Otothyriini Schaefer, 1991 (dwergharnasmeervalletjes / Brustharnischwelse) {age 50 myr}: *Otothyris* Myers, 1927; *Parotocinclus* Eigenmann & Eigenmann, 1889; *Pseudotothyris* Britski & Garavello, 1984; *Schizolecis* Britski & Garavello, 1984.

Neoplecostomini Regan, 1904 (neoplecostomines) {age 50 myr}: *Euryochus* Pereira & Reis, 2017; *Hirtella* Pereira *et al.*, 2014; *Isbrueckerichthys* Derijst, 1996; *Kronichthys* Miranda Ribeiro, 1908; *Neoplecostomus* Eigenmann & Eigenmann, 1888; *Pareiorhaphis* Miranda Ribeiro, 1918; *Pareiorhina* Gosline, 1947; *Plesioptopoma* Reis, Pereira & Lehmann A., 2012; *Pseudotocinclus* Nichols, 1919.

Hisonotini Roxo & Silva, 2019: *Epactionotus* Reis & Schaefer, 1998; *Eurycheilichthys* Reis & Schaefer, 1993; *Hisonotus* Eigenmann & Eigenmann, 1889; *Microlepidogaster* Eigenmann & Eigenmann, 1889; *Otothyropsis* Ribeiro, Carvalho & Melo, 2005; *Rhinolekos* Martins & Langeani, 2011.

Hypostominae Kner, 1853 (zuigmeervallen / Saugmaulharnischwelse / Schmiedewelse / suckermouth catfishes) {age 36 myr}

Chaetostomatini Fowler, 1958: *Andeancistrus* Lujan, Meza-Vargas & Barriga Salazar, 2015; *Chaetostoma* Tschudi, 1846; *Cordylancistrus* Isbrücker, 1980; *Dolichancistrus* Isbrücker, 1980; *Leptoancistrus* Meek & Hildebrand, 1916; *Transancistrus* Lujan, Meza-Vargas & Barriga Salazar, 2015.

Ancistrini Kner, 1854 (clownzuigmeervallen / Ancistrinen): *Ancistrus* Kner, 1854; *Araichthys* Zawadzki, Bifi & Mariotto, 2016; *Corymbophanes* Eigenmann, 1909; *Cryptancistrus* Fisch-Muller, Mol & Covain, 2018; *Dekeyseria* Rapp Py-Daniel, 1985; *Guyanancistrus* Isbrücker, 2001; *Hopliancistrus* Isbrücker & Nijssen, 1989; *Lasiancistrus* Regan, 1904; *Lithoxancistrus* Isbrücker, Nijssen & Cala, 1988; *Neblinichthys* Ferraris, Isbrücker & Nijssen, 1986; *Paulasquama* Armbruster & Taphorn, 2011; *Pseudolithoxus* Isbrücker & Werner, 2001; *Soromonichthys* Lujan & Armbruster, 2011; *Yaluwak* Lujan & Armbruster, 2019.
clade "Pseudancistrus": *Pseudancistrus* Bleeker, 1862.

Lithoxini Isbrücker, 1980 (dwergzuigmeervallen / small suckermouth catfishes): *Avalithoxus* Lujan, Armbruster & Lovejoy, 2018; *Exastilithoxus* Isbrücker & Nijssen, 1979; *Lithoxus* Eigenmann, 1910; *Paralithoxus* Boeseman, 1982.

Acanthicini Bleeker, 1862: *Acanthicus* Agassiz, 1829; *Leporacanthicus* Isbrücker & Nijssen, 1989; *Megalancistrus* Isbrücker, 1980; *Pseudacanthicus* Bleeker, 1862.

Spectracanthicini Isbrücker & Nijssen, 1989: *Baryancistrus* Rapp Py-Daniel, 1989; *Hemiancistrus* Bleeker, 1862; *Panaqolus* Isbrücker & Schraml, 2001; *Panaque* Eigenmann & Eigenmann, 1889; *Parancistrus* Bleeker, 1862; *Pseudoqolus* Lujan *et al.*, 2017; *Spectracanthicus* Isbrücker & Nijssen, 1987.

Hypostomini: *Hypostomus* Lacepède, 1803; *Pterygoplichthys* Gill, 1858.

clade "Peckoltia": *Ancistomus* Isbrücker & Seidel, 2001; *Aphanotorulus* Isbrücker & Nijssen, 1983; *Hypancistrus* Isbrücker & Nijssen, 1991; *Isorineloricaria* Isbrücker, 1980; *Peckoltia* Miranda Ribeiro, 1912; *Scobinancistrus* Isbrücker & Nijssen, 1989.

SILUROIDEI (SILUROID FISHES) {>84 Ma Campanian; age 97 myr}

Plotosidae Bleeker, 1858 (puntstaartmeervallen / palingstaartmeervallen / Aalschwanzwelse / Spitzschwanzwelse / Korallenwelse / eeltail catfishes / tandans / catfish eels) [this family includes not listed marine genera]: *Anodontiglanis* Rendahl, 1922; *Cnidoglanis* Günther, 1864; *Euristhmus* Ogilby, 1899; *Neosiluroides* Allen & Feinberg, 1998; *Neosilurus* Steindachner, 1867; *Oloplotosus* Weber, 1913; *Paraplotosus* Bleeker, 1863; *Plotosus* Lacepède, 1803; *Porochilus* Weber, 1913; *Tandanus* Mitchell, 1838.

Chacidae Bleeker, 1858 (grootbekmeervallen / Großkopfwelse / Großmaulwelse / squarehead catfishes / frogmouth catfishes): *Chaca* Gray, 1831.

Bagroidea Bleeker, 1858

Bagridae Bleeker, 1858 (stekelmeervallen / Stachelwelse / Bagriden / bagrid catfishes) {>56 Ma early Eocene; age 59 myr}

Bagrinae: *Bagrichthys* Bleeker, 1857; *Bagroides* Bleeker, 1851; *Bagrus* Bosc, 1816; *Batasio* Blyth, 1860; *Hemibagrus* Bleeker, 1862; *Hemileiocassis* Ng & Lim, 2000; *Hyalobagrus* Ng & Kottelat, 1998; *Leiocassis* Bleeker, 1857; *Mystus* Scopoli, 1777; *Nanobagrus* Mo, 1991; *Olyra* McClelland, 1842; *Pseudomystus* Jayaram, 1968; *Sperata* Holly, 1939; *Sundolyra* Ng *et al.*, 2015; *Tachysurus* Lacepède, 1803.

Ritinae Bleeker, 1862 (ritas) {>5 Ma Pliocene} [or as a separate family ?]: *Rita* Bleeker, 1853.

Horabagridae Jayaram, 2006 (Aziatische stekelmeervallen / Aziatische Stachelwelse / imperial catfishes / sun catfishes / Asian schilbids): *Horabagrus* Jayaram, 1955; *Pachypterus* Swainson, 1838; *Platytrapius* Hora, 1937; *Pseudeutropius* Bleeker, 1862.

Ailliidae Bleeker, 1858 (Aziatische glasmeervallen / Aziatische Glaswelse / Asian schilbeids): *Ailia* Gray, 1830; *Clupisoma* Swainson, 1838; *Eutropiichthys* Bleeker, 1862; *Laides* Jordan, 1919;

Proeutropiichthys Hora, 1937; *Silonia* Swainson, 1838.

Sisoroidea Bleeker, 1858 (sisorides)

Akysidae Gill, 1861 (beekmeervallen / Strömungswelse / Flußwelse / stream catfishes / Asian banjo catfishes / warty catfishes)

Akysinae (wespmeevallen / Wespenwelse / wasp catfishes): *Akysis* Bleeker, 1858; *Pseudobagarius* Ferraris, 2007.

Parakysinae Roberts, 1989 (wrattenmeervallen / Warzenwelse / parakysid catfishes / pustulous catfishes / warty catfishes)

Parakysini: *Parakysis* Herre, 1940.

Acrochordonichthyini de Pinna, 1996: *Acrochordonichthys* Bleeker, 1857; *Breitensteinia* Steindachner, 1881.

Amblycipitidae Day, 1873 (slanke meervallen / Bachwelse / Schlankwelse / Asiatische Schmerlenwelse / torrent catfishes / loach catfishes): *Amblyceps* Blyth, 1858; *Liobagrus* Hilgendorf, 1878; *Nahangbagrus* Nguyen & Vo, 2005; *Xiurenbagrus* Chen & Lundberg, 1995.

Sisoridae Bleeker, 1858 (Aziatische stroomversnellingsmeervallen / zuigmeervallen / Gebirgswelse / Saugwelse / sisorid catfishes / Asian hillstream catfishes) {>23 Ma early Miocene}

Glyptosterninae Gill, 1861 (Aziatische zuigmeervallen / Haftwelse / sucking catfishes / Asian sucker catfishes / mountain catfishes / glyptosternoids) {age 12 myr}: *Chimarrichthys* Sauvage, 1874; *Creteuchiloglanis* Zhou, Li & Thomson, 2011; *Exostoma* Blyth, 1860; *Glaridoglanis* Norman, 1925; *Glyptosternon* McClelland, 1842; *Myersglanis* Hora & Silas, 1952; *Oreoglanis* Smith, 1933; *Parachiloglanis* Wu, He & Chu, 1981; *Pareuchiloglanis* Pellegrin, 1936; *Pseudecheneis* Blyth, 1860; *Pseudexostoma* Chu, 1979.

Sisorinae (sisorines)

Bagariini Günther, 1864 {>14 Ma Miocene; age 11 myr}: *Bagarius* Bleeker, 1853, *Glyptothorax* Blyth, 1860.

Erethistini Bleeker, 1862 (nachtuilmeervallen / motmeervallen / Mottenwelse / Nachtfalterwelse / moth catfishes): *Ayarnangra* Roberts, 2001; *Caelatoglanis* Ng & Kottelat, 2005; *Conta* Hora, 1950; *Erethistes* Müller & Troschel, 1849; *Erethistoides* Hora, 1950; *Pseudolaguvia* Misra, 1976.

Sisorini (sisorins)

Sisorina: *Sisor* Hamilton, 1822.

Nangrina de Pinna 1996: *Gagata* Bleeker, 1858; *Gogangra* Roberts, 2001; *Nangra* Day, 1877.

Siluroidea Rafinesque, 1815

Siluridae Rafinesque, 1815 (Euraziatistische meervallen / Echte Welse / sheet catfishes / silurid catfishes) {>23 Ma Miocene}: *Belodontichthys* Bleeker, 1857; *Ceratoglanis* Myers, 1938; *Hemisilurus* Bleeker, 1857; *Kryptopterus* Bleeker, 1857; *Micronema* Bleeker, 1857; *Ompok* Lacepède, 1803; *Phalacronotus* Bleeker, 1857; *Pinniwallago* Gupta, Jayaram & Hajela, 1981; *Pterocryptis* Peters, 1861; *Silurichthys* Bleeker, 1856; *Silurus* Linnaeus, 1758; *Wallago* Bleeker, 1851; *Wallagonia* Myers, 1938.

Kryptoglanidae Britz, Kakkassery & Raghavan, 2014 (Indiasche grotmeervallen / Rätselwelse / Indian cave catfishes): *Kryptoglanis* Vincent & Thomas, 2011.

Aspredinoidea Adams, 1854 (doradides) {>112 Ma; age 93–96 myr}

Aspredinidae Adams, 1854 (braadpanmeervallen / banjomeervallen / koekepanmeervallen / Bratpfannenwelse / Banjowelse / Plattkopfwelse / banjo catfishes) {age 65 myr}:

Pseudobunocephalinae Carvalho *et al.*, 2018 (spitsmond-braadpanmeervallen / terminal-mouth banjo catfishes): *Acanthobunocephalus* Friel, 1995; *Pseudobunocephalus* Friel, 2008.

Hoplomyzontinae Fernández-Yépez, 1950 (minibraadpanmeervallen / small banjo catfishes): *Dupouyichthys* Schultz, 1944; *Ernstichthys* Fernández-Yépez, 1953; *Hoplomyzon* Myers, 1942; *Micromyzon* Friel & Lundberg, 1996.

Aspredininae (banjomeervallen / Banjowelse / banjo cats)

Aspredinini (palingstaart-banjomeervallen / eeltail banjo cats): *Aspredinichthys* Bleeker, 1858;

Aspredo Scopoli, 1777; *Platystacus* Bloch, 1794.

Bunocephalini Bleeker, 1858 (braadpanmeervallen / banjo's): *Amaralia* Fowler, 1954; *Bunocephalus* Kner, 1855; *Pterobunocephalus* Fowler, 1943; *Xyliphius* Eigenmann, 1912.

Auchenipteridae Bleeker, 1862 (camouflagemeervallen / houtmeervallen / Trugdornwelse / Falsche Dornwelse / auchenipterid catfishes)

Centromochlinae Bleeker, 1862 (dwergdrijfthoutmeervallen / dwarf driftwood catfishes / intromittant organ catfishes)

Gelanoglanini Calegari, Vari & Reis, 2019 (minidrijfthoutmeervallen / mini driftwood catfishes): *Ferrarissoaresia* Grant, 2015; *Gelanoglanis* Böhlke, 1980.

Pseudotatiini Calegari, Vari & Reis, 2019: *Pseudotatia* Mees, 1974.

Centromochlini: *Centromochlus* Kner, 1858; *Duringlanis* Grant, 2015; *Gephyromochlus* Hoedeman, 1961.

Glanidiini Calegari, Vari & Reis, 2019: *Balroglanis* Grant, 2015; *Glanidium* Lütken, 1874; *Tatia* Miranda Ribeiro, 1911.

Auchenipterinae (drijfthoutmeervallen / driftwood catfishes)

Liosomadoradini Calegari, Vari & Reis, 2019: *Liosomadoras* Fowler, 1940.

Trachelyopterini Bleeker, 1858 (drijfthoutmeervallen / driftwood cats)

Trachycorystina Miranda Ribeiro, 1911: *Tocantinsia* Mees, 1974; *Trachycorystes* Bleeker, 1858.

Auchenipterichthyina Calegari, Vari & Reis, 2019: *Auchenipterichthys* Bleeker, 1862; *Trachelyichthys* Mees, 1974; *Trachelyopterichthys* Bleeker, 1862.

Trachelyopterina: *Spinipterus* Akama & Ferraris, 2011; *Trachelyopterus* Valenciennes, 1840.

Asterophysini Bleeker, 1862: *Asterophysus* Kner, 1858.

Auchenipterini: *Auchenipterus* Valenciennes, 1840; *Entomocorus* Eigenmann, 1917; *Epapterus* Cope, 1878; *Pseudauchenipterus* Bleeker, 1862; *Pseudepapterus* Steindachner, 1915.

Ageneiosini Bleeker, 1862 (platkopmeervallen / Bartellose Welse / Flatnose catfishes / Slopehead catfishes / Duck catfishes): *Ageneiosus* Lacepède, 1803; *Tetranematichthys* Bleeker, 1862; *Tympanopleura* Eigenmann, 1912.

Doradidae Bleeker, 1858 (doornmeervallen / Dornwelse / thorny catfishes) {>65 Ma Maastrichtian}

Wertheimerinae Birindelli, 2014 (Oost-Braziliaanse doornmeervallen / Eastern Brazil thorny cats): *Franciscodoras* Eigenmann, 1925; *Kalyptodoras* Higuchi, Britski & Garavello, 1990; *Wertheimeria* Steindachner, 1877.

Astrodoradinae Higuchi, Birindelli, Sousa & Britski, 2007 (gevekte doornmeervallen / spotted thorny cats): *Acanthodoras* Bleeker, 1862; *Agamyxis* Cope, 1878; *Amblyodoras* Bleeker, 1862; *Anadoras* Eigenmann, 1925; *Astroodoras* Bleeker, 1862; *Hypodoras* Eigenmann, 1925; *Scorpiodoras* Eigenmann, 1925.

Doradinae (thorny cats)

“Centrochir clade”: *Centrochir* Agassiz, 1829; *Platyodoras* Bleeker, 1862.

“Lithodoras clade”: *Centroodoras* Eigenmann, 1925; *Doraops* Schultz, 1944; *Lithodoras* Bleeker, 1862; *Megalodoras* Eigenmann, 1925; *Pterodoras* Bleeker, 1862.

“Rhinodoras clade”: *Orinocodoras* Myers, 1927; *Rhinodoras* Bleeker, 1862; *Rhynchodoras* Klausewitz & Rössel, 1961.

Doradini (veerbaard-doornmeervallen / fimbriate-barbel thorny cats): *Anduzedoras* Fernández-Yépez, 1968; *Doras* Lacepède, 1803; *Hassar* Eigenmann & Eigenmann, 1888; *Hemidoras* Bleeker, 1858; *Leptodoras* Boulenger, 1898; *Nemadoras* Eigenmann, 1925; *Ossancora* Sabaj Pérez & Birindelli, 2011; *Oxyodoras* Kner, 1855; *Tenellus* Birindelli, 2014; *Trachydoras* Eigenmann, 1925.

Pimelodoidea Bonaparte, 1835 {>23 Ma Miocene; age 80 myr}

“Conorhynchos clade”: *Conorhynchos* Bleeker, 1858.

Heptapteridae Gill, 1861 (grondelantennemeervallen / Grundel-Antennenwelse / three-barbeled catfishes / heptapterid catfishes / heptapterids) {age 80 myr}: *Acentronichthys* Eigenmann & Eigenmann, 1889; *Brachyglanis* Eigenmann, 1912; *Brachyrhamdia* Myers, 1927; *Cetopsorhamdia* Eigenmann & Fisher, 1916; *Chasmocranus* Eigenmann, 1912; *Gladioglanis* Ferraris & Mago-Leccia, 1989; *Goeldiella* Eigenmann & Norris, 1900; *Heptapterus* Bleeker, 1858; *Horiomyzon* Stewart, 1986;

Imparfinis Eigenmann & Norris, 1900; *Leptorhamdia* Eigenmann, 1918; *Mastiglanis* Bockmann, 1994; *Myoglanis* Eigenmann, 1912; *Nannoglanis* Boulenger, 1887; *Nemuroglanis* Eigenmann & Eigenmann, 1889; *Pariolius* Cope, 1872; *Phenacorhamdia* Dahl, 1961; *Pimelodella* Eigenmann & Eigenmann, 1888; *Rhamdella* Eigenmann & Eigenmann, 1888; *Rhamdia* Bleeker, 1858; *Rhamdioglanis* Ihering, 1907; *Rhamdiopsis* Haseman, 1911; *Taunayia* Miranda Ribeiro, 1918.

Phreatobiidae Reichel, 1927 (ondergrondse meervallen / cistern catfishes) {age 40 myr}: *Phreatobius* Goeldi, 1905.

Pimelodidae Bonaparte, 1835 (antennemeervallen / Antennenwelse / long-whiskered catfishes / antenna catfishes / pimelodids) {>23 Ma Miocene; age 56 myr} [subfamilies tentative]

“primitive pimelodids / basal pimelodids” (phractocephaline catfishes) {>23 Ma Miocene; age 56 myr}: *Leirius* Bleeker, 1862; *Phractocephalus* Agassiz, 1829; *Steindachneridion* Eigenmann & Eigenmann, 1919; *Zungaropsis* Steindachner, 1908.

Sorubinae Swainson, 1838 (spatelmeervallen / reuzenspatelmeervallen / Spatelwelse / Riesen-Antennenwelse / shovel-nosed catfishes / sorubimine catfishes / sorubimines / goliath catfishes) {age 38 myr}: *Brachyplatystoma* Bleeker, 1862; *Hemisorubim* Bleeker, 1862; *Hypophthalmus* Cuvier, 1829; *Platynemichthys* Bleeker, 1858; *Platysilurus* Haseman, 1911; *Platystomatichthys* Bleeker, 1862; *Pseudoplatystoma* Bleeker, 1862; *Sorubim* Cuvier, 1829; *Sorubimichthys* Bleeker, 1862; *Zungaro* Bleeker, 1858.

Calophysinae Eigenmann, 1890 (snoekantennemeervallen / Hecht-Antennenwelse / calophysines) {age 35 myr}: *Aguarunichthys* Stewart, 1986; *Calophysus* Müller & Troschel, 1842; *Cheirocerus* Eigenmann, 1917; *Luciopimelodus* Eigenmann & Eigenmann, 1888; *Megalonema* Eigenmann, 1912; *Pimelodina* Steindachner, 1877; *Pinirampus* Bleeker, 1858.

Pimelodinae (antennemeervallen / Fettwelse / long-whiskered cats / pimelodines) {age 31 myr}: *Bagropsis* Lütken, 1874; *Bergiaria* Eigenmann & Norris, 1901; *Duopalatinus* Eigenmann & Eigenmann, 1888; *Exallodontus* Lundberg, Mago-Leccia & Nass, 1991; *Iheringichthys* Eigenmann & Norris, 1900; *Parapimelodus* LaMonte, 1933; *Pimelabditus* Lundberg & Parisi, 2009; *Pimelodus* Lacepède, 1803; *Propimelodus* Lundberg & Parisi, 2002.

Pseudopimelodidae Fernández-Yépez & Antón, 1966 (gemarmerde dwergmeervallen / Marmorwelse / bumblebee catfishes / dwarf marbled catfishes / pseudopimelodid catfishes) {>22 Ma Burdigalian; age 48 myr}: *Batrochoglanis* Gill, 1858; *Cephalosilurus* Haseman, 1911; *Cruciglanis* Ortega-Lara & Lehmann, 2006; *Lophosilurus* Steindachner, 1877; *Microglanis* Eigenmann, 1912; *Pseudopimelodus* Bleeker, 1858; *Rhyacoglanis* Shibatta & Vari, 2017.

Clarioidea Bonaparte, 1845

Clariidae Bonaparte, 1845 (kieuwzakmeervallen / roofmeervallen / Sackkiemer / Froschwelse / Raubwelse / Kiemensackwelse / Büschelwelse / Froschwelse/ airbreathing catfishes / labyrinth catfishes / walking catfishes / gillsac catfishes) {>50 Ma Middle Eocene; age 56 myr}: *Channallabes* Günther, 1873; *Clariallabes* Boulenger, 1900; *Clarias* Scopoli, 1777; *Clarioides* Teugels, 1982; *Dinopterus* Boulenger, 1906; *Dolichallabes* Poll, 1942; *Encheloclarias* Myers, 1937; *Gymnallabes* Günther, 1867; *Heterobranchus* Geoffroy St. Hilaire, 1809; *Horaglanis* Menon, 1950; *Phagorus* McClelland, 1844; *Platyallabes* Poll, 1977; *Platyclarias* Poll, 1977; *Pseudotanganikallabes* Wright, 2017; *Tanganikallabes* Poll, 1943; *Uegitglanis* Gianferrari, 1923.

Heteropneustidae Hora, 1936 (Aziatische kieuwzakmeervallen / Kiemensackwelse / South Asian airsac catfishes): *Heteropneustes* Müller, 1840.

Arioidea Bleeker, 1858 {>68 Ma early Maastrichtian; age 77 myr}

Ariidae Bleeker, 1858 (zeemeervallen / Kreuzwelse / Maulbrüterwelse / sea catfishes / forktail catfishes / crucifix catfishes / ariids) {>84 Ma Campanian; age 77 myr} [this family includes two not listed marine subfamilies]

Ariinae (brakwatermeervallen / Löffelmaulwelse / ariins) {>40 Ma Bartonian / Middle Eocene; age 64 myr} [this subfamily includes not listed marine genera]: *Amissidens* Kailola, 2004; *Amphiarus* Marceniuk & Menezes, 2007; *Ariopsis* Gill, 1861; *Arius* Valenciennes, 1840; *Batrachocephalus*

Bleeker, 1846; *Brustarius* Herre, 1935; *Carlarius* Marceniuk & Menezes, 2007; *Cathorops* Jordan & Gilbert, 1883; *Cephalocassis* Bleeker, 1857; *Chinchaysuyo* Marceniuk *et al.*, 2019; *Cinetodus* Ogilby, 1898; *Cochlefelis* Whitley, 1941; *Cryptarius* Kailola, 2004; *Doiichthys* Weber, 1913; *Genidens* Castelnau, 1855; *Hemiaris* Bleeker, 1862; *Ketengus* Bleeker, 1847; *Nedystoma* Ogilby, 1898; *Nemapteryx* Ogilby, 1908; *Neoarius* Castelnau, 1878; *Notarius* Gill, 1863; *Osteogeneiosus* Bleeker, 1846; *Pachyula* Ogilby, 1898; *Paragenidens* Marceniuk *et al.*, 2019; *Plicofollis* Kailola, 2004; *Potamarius* Hubbs & Miller, 1960; *Potamosilurus* Marceniuk & Menezes, 2007; *Sciades* Müller & Troschel, 1849.

Anchariidae Glaw & Vences, 1994 (Malagasische meervallen / Madagaskar Welse / Malagasy catfishes / anchariid catfishes) {age 77 myr}: *Ancharius* Steindachner, 1880; *Gogo* Ng & Sparks, 2005.

Austroglanididae Mo, 1991 (Zuidafrikaanse meervallen / rotsmeervallen / Felsenwelse / Südafrikanische Welse / Südwelse / austroglanidid catfishes / rock catfishes): *Austroglanis* Skelton, Risch & de Vos, 1984.

Pangasiidae Bleeker, 1858 (haaimeervallen / reuzenmeervallen / Riesenwelse / Haiwelse / pangasiid catfishes / shark catfishes) {>23 Ma Miocene; age 76 myr}: *Helicophagus* Bleeker, 1857; *Pangasianodon* Chevey, 1931; *Pangasius* Valenciennes, 1840; *Pseudolais* Vaillant, 1902.

Ictaluroidea Gill, 1861 (ictalurides) {>59 Ma Thanetian; age 65 myr}

Cranoglanididae Myers, 1931 (Chinese meervallen / Panzerkopfwelse / Chinesische Welse / armorhead catfishes / Chinese catfishes / helmet catfishes): *Cranoglanis* Peters, 1881.

Ictaluridae Gill, 1861 (katmeervallen / Katzenwelse / North American freshwater catfishes) {>59 Ma Thanetian; age 41 myr}: *Ameiurus* Rafinesque, 1820; *Ictalurus* Rafinesque, 1820; *Noturus* Rafinesque, 1818; *Prietella* Carranza, 1954; *Pylodictis* Rafinesque, 1819; *Satan* Hubbs & Bailey, 1947; *Trogloglanis* Eigenmann, 1919.

clade "Big Africa"

Lacantuniidae Rodiles-Hernández, Hendrickson & Lundberg, 2005 (Chiapas meervallen / Chiapas Welse / Chiapas catfishes) {age 81–83 myr}: *Lacantunia* Rodiles-Hernández, Hendrickson & Lundberg, 2005.

Amphiliidae Regan, 1911 (Afrikaanse stroomversnellingsmeervallen / kuilwangmeervallen / Bergwelse / Kaulquappenwelse / Afrikanische Harnischwelse / African mountain catfishes / African hillstream catfishes / loach catfishes)

Amphiliinae (amphiliin catfishes): *Amphilius* Günther, 1864; *Paramphilius* Pellegrin, 1907.

Doumeinae Regan, 1911 (slanke Afrikaanse stroomversnellingsmeervallen / Afrikanische Peitschenwelse / doumein catfishes / African armoured catfishes): *Andersonia* Boulenger, 1900; *Belonoglanis* Boulenger, 1902; *Congoglanis* Ferraris, Vari & Skelton, 2011; *Doumea* Sauvage, 1879; *Phractura* Boulenger, 1900; *Trachyglanis* Boulenger, 1902.

Leptoglaninae Roberts, 2003 (zandbabertjes / sand catlets / leptoglanid catfishes):

Dolichamphilius Roberts, 2003; *Leptoglanis* Boulenger, 1902; *Psammophiletria* Roberts, 2003; *Tetracamphilius* Roberts, 2003; *Zaireichthys* Roberts, 1968.

Malapteruridae Bleeker, 1858 (siddermeervallen / Zitterwelse / Elektrische Welse / electric catfishes): *Malapterurus* Lacepède, 1803; *Paradoxoglanis* Norris, 2002.

Mochokidae Regan, 1912 (baardmeervallen / Mochokiden / Fiederbartwelse / mochokid catfishes / squeakers / upside-down catfishes) {>38 Ma Priabonian}

Mochokinae (rugzwemmers / rugzwemmende meervallen / Fiederbartwelse / squeakers) {>23 Ma early Miocene; age 35 myr}: *Acanthocleithron* Nichols & Griscom, 1917; *Microsynodontis* Boulenger, 1903; *Mochokiella* Howes, 1980; *Mochokus* Joannis, 1835; *Synodontis* Cuvier, 1816.

Chiloglanidinae Vigliotta, 2008 (zuigmondbaardmeervallen / Afrikaanse zuigmeervallen / Afrikaaugwelse / African suckermouths / suckermouthed mochokids)

Chiloglanidini (insektenetende zuigmondmeervallen / invertebrates-eating African suckermouths): *Chiloglanis* Peters, 1868.

Atopochilini Vigliotta, 2008 (omnivore zuigmondmeervallen / algenschrapende Afrikaanse zuigmeervallen / omnivorous African suckermouths): *Atopochilus* Sauvage, 1879; *Atopodontus* Friel & Vigliotta, 2008; *Euchilichthys* Boulenger, 1900.

Claroteidae Bleeker, 1862 (Afrikaanse stekelmeervallen / Claroteiden / Afrikanische Stachelwelse / claroteid catfishes) {>59 Ma Thanetian; age 48 myr}

Claroteinae (knormeervallen / Grunzwelse / grunTERS) {>46 Ma Eocene}: *Amarginops* Nichols & Griscom, 1917; *Bathybagrus* Bailey & Stewart, 1984; *Chrysichthys* Bleeker, 1858; *Clarotes* Kner, 1855; *Gephyroglanis* Boulenger, 1899; *Lophiobagrus* Poll, 1942; *Phyllonemus* Boulenger, 1906.

Auchenoglanidinae Jayaram, 1966 (stofzuigermeervallen / Flachkopfwelse / flatnose catfishes) {>5 Ma late Miocene}: *Auchenoglanis* Günther, 1865; *Notoglanidium* Günther, 1903; *Parauchenoglanis* Boulenger, 1911.

Schilbeidae Bleeker, 1858 (Afrikaanse glasmaeervallen / botermeervallen / Eigentliche Glaswelse / Afrikanische Glaswelse / schilbeid catfishes / butter catfishes / schilbids) {>5 Ma late Miocene; age 20 myr}: *Irvineia* Trewavas, 1943; *Parailia* Boulenger, 1899; *Pareutropius* Regan, 1920; *Schilbe* Oken, 1817; *Siluranodon* Bleeker, 1858.

6 cohort: **EUTELEOSTEOMORPHA** {>156 Ma Kimmeridgian; age 200 myr}

6a division: **PROTACANTHOPTERYGII** {>146 Ma Cretaceous; age 200 myr}

Lepidogalaxiiformes (SALAMANDERVISACHTIGEN / LEPIDOGALAXIIFORM FISHES) {age 200 myr}

Lepidogalaxiidae Rosen, 1974 (salamandervissen / Salamanderfische / salamanderfishes): *Lepidogalaxias* Mees, 1961.

Salmoniformes (ZALMACHTIGEN / LACHSFISCHARTIGE / LACHSÄHNLICHEN / SALMONIFORM FISHES) {>84 Ma Campanian; age 97 myr}

Thymallidae Gill, 1885 (vlagzalmen / Äschen / graylings) {>56 Ma Ypresian; age 52 myr}: *Thymallus* Linck, 1790.

Coregonidae Bonaparte, 1845 (houtingen / Renken / Maränen / whitefishes) {>5 Ma Pliocene; age 47 myr}: *Coregonus* Linnaeus, 1758; *Prosopium* Jordan, 1878; *Stenodus* Richardson, 1837.

Salmonidae Jarocki / Schinz, 1822 (zalmfamilie / Lachsische / Lachsähnliche / trouts, salmon and chars) {>56 Ma Ypresian; age 59 myr}

Brachymystacinae Tchernavin, 1923 (chars & lenoks) {age 38 myr}: *Brachymystax* Günther, 1866; *Hucho* Günther, 1866.

Salmoninae (zalmen en forellen / Lachsartige / trouts and salmon) {>25 Ma Miocene; age 38 myr}: *Oncorhynchus* Suckley, 1861; *Parahucho* Vladykov, 1963; *Salmo* Linnaeus, 1758; *Salvelinus* Richardson, 1837.

Esociformes (SNOEKACHTIGEN / HECHTARTIGE / ESOCIFORM FISHES) {>84 Ma Campanian; age 97 myr}

Esocidae Rafinesque, 1815 {>84 Ma Campanian; age 66 myr}

Esocinae (snoeken / Hechte / pikes) {age 56 myr}: *Esox* Linnaeus, 1758; *Novumbra* Schultz, 1929.

Dalliinae Jordan, 1885 (Fächerfische / blackfishes) {>49 Ma Lutetian}: *Dallia* Bean, 1880.

Umbridae Bonaparte, 1845 (hondsvissen / Hundsfische / mudminnows) {>65 Ma Palaeocene; age 66 myr}: *Umbra* Kramer, 1777.

Galaxiiformes (ZUIDELIJKE FORELACHTIGEN / HECHTLINGEARTIGE / GALAXIIFORM FISHES) {>71 Ma Maastrichtian; age 148 myr}

GALAXIOIDEI (ZUIDELIJKE FORELVERWANTEN / HECHTLINGEVERWANDTE / GALAXIOID FISHES)

Galaxiidae Müller, 1845 (zuidelijke snoekforellen / Hechtlinge / galaxiids) {>71 Ma late Cretaceous; age 30 myr}

Aplochitoninae Günther, 1864 (forelsnoeken / Forellenhechtlinge / peladillos / aplochitonines): *Aplochiton* Jenyns, 1842; *Lovettia* McCulloch, 1915.

Galaxiinae (zuidelijke forellen / white bait and mudfishes) {>23 Ma early Miocene}: *Brachygalaxias* Eigenmann, 1928; *Galaxias* Cuvier, 1816; *Galaxiella* McDowall, 1978; *Neochanna* Günther, 1867; *Paragalaxias* Scott, 1935.

Osmeriformes (SPIERINGACHTIGEN / STINTEARTIGE / OSMERIFORM FISHES) {age 129 myr}

OSMEROIDEI (SPIERINGVERWANTEN / STINTEVERWANDTE / OSMEROID FISHES) {>71 Ma late Cretaceous}

Osmeridae Regan, 1913 (spieringen / Stinte / smelts / osmerids) {>59 Ma Thanetian; age 39 myr}

Osmerinae (echte spieringen / Echte Stinte / smelts) [this subfamily includes two not listed marine genera]: *Hypomesus* Gill, 1862, *Osmerus* Linnaeus, 1758; *Spirinchus* Jordan & Evermann, 1896; *Thaleichthys* Girard, 1858.

Plecoglossinae Bleeker, 1859 (ayu's / Ayus / ayu fishes) {>10 Ma late Miocene; age 33 myr}: *Plecoglossus* Temminck & Schlegel, 1846.

Salanginae Bleeker, 1859 (noedelvissen / Nudelfische / icefishes / noodlefishes / Chinese white-bait) {age 14–21 myr}

Protosalangini Wakiya & Takahasi, 1937: *Neosalangichthys* Fu *et al.*, 2012; *Protosalanx* Regan, 1908.

Salangini: *Parasalanx* Regan, 1908; *Salangichthys* Bleeker, 1860; *Salanx* Cuvier, 1816.

RETROPINNOIDEI (ZUIDELIJKE SNOEKFORELVERWANTEN / SOUTHERN OSMEROID FISHES)

Retropinnidae Gill, 1862 (Nieuwzeelandse snoekforellen / Neuseelandlachse / southern white-bait / New Zealand white-bait / New Zealand smelts) {>1 Ma Middle Pleistocene}

Prototroctinae Hubbs, 1952 (zuiderse smelten / southern graylings): *Prototroctes* Günther, 1864.

Retropinninae (zuidelijke spieringen / Finten / southern smelts / New Zealand trouts): *Retropinna* Gill, 1862.

subcohort: **NEOTELEOSTEI** (MODERNE BEENVISSEN / NEUZEITLICHE KNOCHENFISCHE / MODERN BONY FISHES) {>130 Ma Barremian; age 170 myr} [7 + 8]

7 subsection: **ACANTHOMORPHATA** (STEKELVINNIGEN / STACHELFLOSSER / SPINY-RAYED FISHES / ACANTHOMORPHS) {>112 Ma Albian; age 150 myr} [this clade includes many orders of marine fishes]

7a division: **PARACANTHOPTERYGII** {>98 Ma Cenomanian; age 134 myr}

Percopsiformes (ZALMBAARSACHTIGEN / BARSCHLACHSARTIGE / PERCOPSIFORM FISHES) {>66 Ma Danian; age 70 myr}

PERCOPSOIDEI (FORELBAARSACHTIGEN / BARSCHLACHSARTIGE / PERCOPSOID FISHES) {age 70 myr}

Percopsidae Agassiz, 1850 (forelbaarzen / zalmbaarzen / baarszalmen / Barschlachse / trout perches and sand rollers) {>56 Ma Ypresian; age 70 myr}: *Percopsis* Agassiz, 1849.

AMBLYOPSOIDEI (HOLENVISSACHTIGEN / BLINDFISCHARTIGE / AMBLYOPSOID FISHES) {age 70 myr}

Aphredoderidae Bonaparte, 1845 (piratenbaarzen / piraatbaarzen / Piratenbarsche / pirate perches) {>38 Ma Priabonian; age 50 myr}: *Aphredoderus* Lesueur, 1833.

Amblyopsidae Bonaparte, 1845 (holenvissen / olmen / blinde vissen / blinde baarszalmen / Blindfische / Nordamerikanische Höhlenfische / cavefishes) {age 50 myr}: *Amblyopsis* DeKay, 1842; *Chologaster* Agassiz, 1853; *Forbesichthys* Jordan, 1929; *Speoplatyrhinus* Cooper & Kuehne, 1974; *Troglichthys* Eigenmann, 1899; *Typhlichthys* Girard, 1859.

Gadiformes (KABELJAUWACHTIGEN / KEELVINNIGEN / DORSCHARTIGE / GADIFORM FISHES) {>71 Ma late Cretaceous; age 90 myr}

GADOIDEI (KABELJAUWVERWANTEN / DORSCHVERWANDTE / GADOID FISHES)

Gadidae Rafinesque-Schmaltz, 1810 (kabeljauwen / schelvissen / Dorschfische / Schellfische / codfishes) {>34 Ma Rupelian / Oligocene } [this family includes not listed marine subfamilies]:

Lotinae Bonaparte, 1835 (kwabalen / Quappen / cuskfishes / hakes & burbot) {>34 Ma Rupelian / Oligocene} [this subfamily includes not listed marine genera]: *Lota* Oken, 1817.

Gadinae (kabeljauwen / Dorsche / cods) {>34 Ma Rupelian / Oligocene} [this subfamily includes not listed marine genera]: *Microgadus* Gill, 1865.

division: **ACANTHOPTERYGII** {>100 Ma Cenomanian; age 140 myr}

8 **subdivision: PERCOMORPHACEAE** {>100 Ma Cenomanian; age 125 myr} [the relationship of the following series is somewhat controversial]

series: **Ophidiaria** [Ophidiiformes] + **Batrachoidaria** [Batrachoidiformes] + **Syngnatharia** [Syngnathiformes] + **Pelagiaria** [no freshwater species] + **Gobiaria** [Gobiiformes] + **Anabantaria** [Synbranchiformes, Anabantiformes] + **Carangaria** [Carangiformes] + **Ovalentaria** [Cichliformes, Atheriniformes, Beloniformes, Cyprinodontiformes, Mugiliformes, Blenniiformes] + **Eupercaria** [Gerreiformes, Uranoscopiformes, Lutjaniformes, Lobotiformes, Spariformes, Tetraodontiformes, Centrarchiformes, Perciformes]

Ophidiiformes (SLANGVISACHTIGEN / EINGEWEIDEFISCHE / CUSK-EELS) {>56 Ma Ypresian}

BYTHITOIDEI (LEVENDBARENDE BROTULA-VERWANTEN / LEBENDGEBÄRENDE BROTULA-VERWANDTE / BYTHITOID FISHES) {>34 Ma Rupelian}

Bythitidae Gill, 1861 (levendbarende brotulas / naaldvissen / Lebendgebärende Brotulas / viviparous brotulas) {>34 Ma Rupelian}: *Lucifuga* Poey, 1858.

Dinematichthyidae Whitley, 1928 [this family includes not listed marine genera]: *Ogilbia* Jordan & Evermann, 1898; *Typhlias* Hubbs, 1938.

Batrachoidiformes (KIKVORSVISACHTIGEN / FROSCHFISCHARTIGE / BATRACHOIDIFORM FISHES) {>16 Ma middle Miocene; age 40 myr}

Batrachoididae Jordan, 1896 (paddevissen / kikvorsvissen / Froschfische / toadfishes) {>16 Ma middle Miocene} [this family includes a not listed marine subfamily]

Thalassophryinae Miranda Ribeiro, 1915 (giftige tweestekelpaddevissen / Krötenfische / venomous toadfishes / twospine toadfishes): *Daector* Jordan & Evermann, 1898; *Thalassophryne* Günther, 1861.

Batrachoidinae (driestekelpaddevissen van de nieuwe wereld / Amerikanische Dreistachel-froschfische / New World threespine toadfishes) [this subfamily includes not listed marine genera]: *Batrachoides* Lacepède, 1800; *Potamobatrachus* Collette, 1995.

Halophryinae Greenfield, Winterbottom & Collette, 2008 (driestekelpaddevissen van de oude wereld / Indische Dreistachelfroschfische / Old World threespine toadfishes) [this subfamily includes not listed marine genera]: *Allenbatrachus* Greenfield, 1997; *Batrachomoeus* Ogilby, 1908; *Halophryne* Gill, 1863.

Kurtiformes (VERPLEEGVISACHTIGEN / KURTERARTIGE / KURTIFORM FISHES) {age 102 myr}

KURTOIDEI (VERPLEEGVISVERWANTEN / KURTERVERWANDTE / KURTOID FISHES) {age 102 myr}

Kurtidae Bleeker, 1859 (verpleegvissen / kambaarzen / Kurter / nurseryfishes / forehead brooders): *Kurtus* Bloch, 1786.

APOGONOIDEI (KARDINAALBAARSVERWANTEN / KARDINALBARSCHVERWANDTE / APOGONOID FISHES)

Apogonidae Günther, 1859 (kardinaalbaarzen / Kardinalbarsche / cardinalfishes) {>49 Ma Lutetian} [this family includes not listed marine subfamilies]

Apogoninae [this subfamily includes not listed marine tribes]

Glossamiini Fraser & Mabuchi, 2014: *Glossamia* Gill, 1863; *Yarica* Whitley, 1930.

Zoramiini Fraser & Mabuchi, 2014 [this tribe includes a not listed marine genus]: *Fibramia* Fraser & Mabuchi, 2014.

Gobiiformes (ZEEGRONDELACHTIGEN / GRUNDELARTIGE / MEERGRUNDELARTIGE / GOBIIFORM FISHES)
{age 102 myr}

GOBIOIDEI (ZEEGRONDELVERWANTEN / GRUNDELVERWANDTE / MEERGRUNDELVERWANDTE / GOBIOID FISHES) {>34 Ma Rupelian; age 102 myr}

Rhyacichthyoidea Jordan, 1905

Rhyacichthyidae Jordan, 1905 (riviergrondels / Schmerlengrundeln / Flußgrundeln / loach gobies)
{age 47 myr}: *Protogobius* Watson & Pöllabauer, 1998; *Rhyacichthys* Boulenger, 1901; *Terateleotris* Shibukawa, Iwata & Viravong, 2001.

Odontobutidae Hoese & Gill, 1993 (zoetwaterslaapgrondels / Süßwasserschläfergrundeln / Asian freshwater sleepers / odontobutids) {>5 Ma Pliocene; age 47 myr}: *Microdous* Li *et al.*, 2018; *Micropercops* Fowler & Bean, 1920; *Neodontobutis* Chen, Kottelat & Wu, 2002; *Odontobutis* Bleeker, 1874; *Perccottus* Dybowski, 1877; *Sineleotris* Herre, 1940.

Eleotroidea Bonaparte, 1835

Milyeringidae Whitley, 1945 (zoetwatergrottengrondels / Süßwasser-Höhlengrundeln / freshwater cave gobies) {age 53 myr}: *Milyeringa* Whitley, 1945; *Typhleotris* Petit, 1933.

Eleotridae Bonaparte, 1835 (slaapgrondels / Schläfergrundeln / sleepers / gudgeons / bullies) {>34 Ma Rupelian; age 46 myr} [this family includes not listed marine genera]: *Allomogurnda* Allen, 2003; *Belobranchnus* Bleeker, 1856; *Bunaka* Herre, 1927; *Caecieleotris* Walsh & Chakrabarty, 2016; *Dormitator* Gill, 1861; *Eleotris* Scopoli, 1777; *Giuris* Sauvage, 1880; *Gobiomorphus* Gill, 1863; *Gobiomorus* Lacepède, 1800; *Guavina* Bleeker, 1874; *Hemieleotris* Meek & Hildebrand, 1916; *Hypseleotris* Gill, 1863; *Kimberleyeleotris* Hoese & Allen, 1987; *Leptophilypnion* Roberts, 2013; *Leptophilypnus* Meek & Hildebrand, 1916; *Microphilypnus* Myers, 1927; *Mogurnda* Gill, 1863; *Philypnodon* Bleeker, 1874; *Ratsirakia* Maugé, 1984; *Tateurndina* Nichols, 1955.

Butidae Bleeker, 1874 (Afro-aziatische slaapgrondels / gudgeons) {>34 Ma Oligocene; age 46 myr}: *Bostrychus* Lacepède, 1801; *Butis* Bleeker, 1856; *Incara* Rao, 1971; *Kribia* Herre, 1946; *Odonteleotris* Gill, 1863; *Ophiocara* Gill, 1863; *Oxyeleotris* Bleeker, 1874; *Parviparma* Herre, 1927; *Pogoneleotris* Bleeker, 1875; *Prionobutis* Bleeker, 1874.

Gobioidea Cuvier, 1816

Oxudercidae Günther, 1861 (zoet- en brakwatergrondels / Brackwassergrundeln / gobionellids) {>38 Ma Priabonian; age 49 myr} [subfamilies and tribes tentative]

Clade "sand gobies" {>15 Ma Sarmatian / Middle Miocene; age 26 myr}: *Economidichthys* Bianco *et al.*, 1987; *Knipowitschia* Iljin, 1927; *Ninnigobius* Whitley, 1951; *Orsinigobius* Gandolfi, Marconato & Torricelli, 1986; *Pomatoschistus* Gill, 1863.

Brachygobiinae Bleeker, 1874 (mugilogobiins) {age 49 myr} [this subfamily includes a not listed marine genus]: *Brachygobius* Bleeker, 1874; *Caecogobius* Berti & Ercolini, 1991; *Chlamydogobius* Whitley, 1930; *Eugnathogobius* Smith, 1931; *Gobiopterus* Bleeker, 1874; *Hemigobius* Bleeker, 1874; *Mistichthys* Smith, 1902; *Mugilogobius* Smitt, 1900; *Pandaka* Herre, 1927; *Pseudogobiopsis* Koumans, 1935; *Pseudogobius* Popta, 1922; *Redigobius* Herre, 1927; *Stigmatogobius* Bleeker, 1874; *Tamanka* Herre, 1927; *Tasmanogobius* Scott, 1935; *Wuhanlinigobius* Huang, Zeehan & Chen, 2014.

Tridentigerinae Gill, 1859 (havengrondeltjes / Hafengrundeln / Northern Pacific gobies / acanthogobiins) {> 34 Ma Oligocene; age 38 myr} [this clade includes not listed marine genera]: *Acanthogobius* Gill, 1859; *Chaenogobius* Gill, 1859; *Clevelandia* Eigenmann & Eigenmann, 1888; *Eucyclogobius* Gill, 1862; *Gillichthys* Cooper, 1864; *Gymnogobius* Gill, 1863; *Leucopsarion* Hilgendorf, 1880; *Luciogobius* Gill, 1859; *Papuligobius* Chen & Kottelat, 2003; *Rhinogobius* Gill, 1859; *Tridentiger* Gill, 1859; *Typhlogobius* Steindachner, 1879.

Gobionellinae Bleeker, 1874 (dwergrondels / Zwerggrundeln / dwarf gobies) {age 38 myr}

Gobionellini [this tribe includes not listed marine genera]: *Awaous* Valenciennes, 1837; *Ctenogobius* Gill, 1858; *Evorthodus* Gill, 1859; *Gobioides* Lacepède, 1800; *Gobionellus* Girard, 1858; *Oligolepis* Bleeker, 1874; *Oxyurichthys* Bleeker, 1857; *Parawaous* Watson, 1993; *Stenogobius* Bleeker, 1874.

Sicydiini Gill, 1860 (eilandgrondeltjes / tandlipgrondels / Lippenzahngrundeln / Inselgrundeln / sicydiine Grundeln / rock-climbing gobies / cling gobies / island gobies) {age 6–12 myr}: *Akihito*

Watson, Keith & Marquet, 2007; *Cotylopus* Guichenot, 1863; *Lentipes* Günther, 1861; *Parasicydium* Risch, 1980; *Sicydium* Valenciennes, 1837; *Sicyopterus* Gill, 1860; *Sicyopus* Gill, 1863; *Smilosicyopus* Watson, 1999; *Stiphodon* Weber, 1895.

Oxudercinae (slijkgrondels / Schlammgrundeln / oxudercines) {age 38 myr} [this subfamily includes not listed marine genera]

Oxudercini (slijkspringers / Schlammspringer / mudskippers): *Apocryptes* Valenciennes, 1837; *Apocryptodon* Bleeker, 1874; *Boleophthalmus* Valenciennes, 1837; *Oxuderces* Eydoux & Souleyet, 1850; *Parapocryptes* Bleeker, 1874; *Periophthalmodon* Bleeker, 1874; *Periophthalmus* Bloch & Schneider, 1801; *Pseudapocryptes* Bleeker, 1874; *Scartelaos* Swainson, 1839; *Zappa* Murdy, 1989.

Amblyopini Günther, 1861 (aalgrondels / Aalgrundeln / Bandgrundeln / eel gobies / mud-burrowing gobies / amblyopines / amblyopine gobies) [this tribe includes not listed marine genera]: *Brachyamblyopus* Bleeker, 1874; *Caragobius* Smith & Seale, 1906; *Gymnoamblyopus* Murdy & Ferraris, 2003; *Odontamblyopus* Bleeker, 1874; *Paratrypauchen* Murdy, 2008; *Pseudotrypauchen* Hardenberg, 1931; *Taenioides* Lacepède, 1800; *Trypauchen* Valenciennes, 1837; *Trypauchenichthys* Bleeker, 1860; *Trypauchenopsis* Volz, 1903.

Gobiidae Cuvier, 1816 (zeegrondels / Meergrundeln / Haftgrundeln / Grundeln / gobies / transverse gobiids) {>38 Ma Priabonian / Late Eocene; age 49 myr} [subfamilies, tribes and clades tentative]

“inshore gobies” (kust zeegrondels / inshore gobies) {age 46 myr} [this clade includes not listed marine genera]: *Bathygobius* Bleeker, 1878; *Dotsugobius* Shibukawa, Suzuki & Senou 2014; *Glossogobius* Gill, 1859; *Mizogobius* Geetakumari & Vishwanath, 2012; *Psammogobius* Smith, 1935; *Schismatogobius* de Beaufort, 1912.

“lagoon gobies” (lagune zeegrondels / lagoon gobies) {age 36 myr} [this clade includes not listed marine genera]: *Acentrogobius* Bleeker, 1874; *Afurcagobius* Gill, 1993; *Amoya* Herre, 1927; *Aulopareia* Smith, 1945; *Drombus* Jordan & Seale, 1905; *Exyrias* Jordan & Seale, 1906; *Favonigobius* Whitley, 1930; *Gobiopsis* Steindachner, 1861; *Istigobius* Whitley, 1932; *Porogobius* Bleeker, 1874; *Silhouettea* Smith, 1959; *Yongeichthys* Whitley, 1932.

Gobiodontinae Bleeker, 1874 (kuifzeegrondels / dartfishes and flapcrested gobies / hovering gobies) {age 48 myr} [this subfamily includes not listed marine genera]

Clade (flapjeskop zeegrondels / flapheaded gobies) {age 42 myr} [this clade includes not listed marine genera]: *Mangarinus* Herre, 1943.

Clade (gekuifde zeegrondels / crested gobies) {age 47 myr} [this clade includes not listed marine genera]: *Cristatogobius* Herre, 1927; *Gladiogobius* Herre, 1933; *Lophogobius* Gill, 1862.

Ptereleotriini Bleeker, 1875 (torpedo-grondels / dart-gobies) {age 44 myr} [this tribe includes not listed marine genera]: *Parioglossus* Regan, 1912.

Gobiinae (Middelandse Zee en Atlantische zeegrondels / Europeesche en Afrikaanse zeegrondels / Mediterranean and Eastern Atlantic gobies / transverse gobies) {>38 Ma Eocene; age 45 myr} [this subfamily includes not listed marine genera]: *Chromogobius* de Buen, 1930; *Croilia* Smith, 1955; *Ebomegobius* Herre, 1946; *Gobius* Linnaeus, 1758; *Millerigobius* Bath, 1973; *Nematogobius* Boulenger, 1910.

Benthophilinae Beling & Ilijn, 1927 (Ponto-Caspian gobies) {>15 Ma Sarmatian / Middle Miocene; age 42 myr}

Benthophilini (padgrondels / tadpole gobies / benthophilins) {age 10 myr} [this tribe includes a not listed marine genus]: *Benthophiloides* Beling & Ilijn, 1927; *Benthophilus* Eichwald, 1831; *Caspiosoma* Ilijn, 1927.

Neogobiini Neilson & Stepien, 2009 (neogobiins) {age 5–6 myr}: *Neogobius* Ilijn, 1927.

Ponticolini Neilson & Stepien, 2009 (ponticolins) {age 5 myr} [this tribe includes a not listed marine genus]: *Babka* Ilijn, 1927; *Mesogobius* Bleeker, 1874; *Padogobius* Berg, 1932; *Ponticola* Ilijn, 1927; *Proterorhinus* Smitt, 1900.

Gobiosomatinae Birdsong, 1975 (Amerikaanse zeegrondels / American seven-spined gobies) {age 45 myr} [this subfamily includes not listed marine genera]: *Gobiosoma* Girard, 1858; *Microgobius* Poey, 1876.

Syngnathiformes (ZEENAALDACHTIGEN / SEENADELARTIGE / SYNGNATHIFORM FISHES) {>49 Ma Lutetian; age 95 myr}

SYNGNATHOIDEI (TROSKIEUWIGEN / SEENADELVERWANDTE / BÜSCHELKIEMER / SYNGNATHOID FISHES) {>49 Ma Lutetian; age 80 myr}

Syngnathidae Bonaparte, 1831 (zeenaalden en zeepaardjes / Seenadeln und Seepferdchen / pipefishes and seahorses) {>49 Ma Lutetian; age 40 myr} [this family includes a not listed marine subfamily]

Nerophinae Kaup, 1853 (lichaambroedende zeenaalden / trunk-brooding pipefishes) {>34 Ma Rupelian}: *Microphis* Kaup, 1853; *Nerophis* Rafinesque-Schmaltz, 1810.

Syngnathinae (staartbroedende zeenaalden / Seenadeln / tail-brooding pipefishes and flagtail pipefishes) {>34 Ma Rupelian} [this subfamily includes not listed marine genera]: *Doryichthys* Kaup, 1856; *Enneacampus* Dawson, 1981; *Hippichthys* Bleeker, 1849; *Ichthyocampus* Kaup, 1853; *Pseudophallus* Herald, 1940; *Syngnathus* Linnaeus, 1758.

CALLIONYMOIDEI (PITVISVERWANTEN / LEIERFISCHVERWANDTE / CALLIONYMOID FISHES)

Callionymidae Bonaparte, 1831 (pitvissen / Leierfische / Spinnenfische / dragonets) {>56 Ma Ypresian; age 27 myr} [this family includes not listed marine genera]: *Callionymus* Linnaeus, 1758; *Repomucenus* Whitley, 1931; *Tonlesapia* Motomura & Mukai, 2006.

Synbranchiformes (KORTSTAARTALEN / KURZSCHWANZAALARTIGE / SYNBRANCHIFORM FISHES) {age 73 myr}

MASTACEMBELOIDEI (STEKELAALVERWANTEN / STACHELAALVERWANDTE / PFEILSCHNABELVERWANDTE / MASTACEMBELOID EELS) {age 44 myr}

Chaudhuriidae Annandale, 1918 (moerasstekelalen / regenwormalen / Regenwurmaale / Erdwurmstachelaale / earthworm eels / dwarf eels): *Bihunichthys* Kottelat & Lim, 1994; *Chaudhuria* Annandale, 1918; *Chendol* Kottelat & Lim, 1994; *Garó Yazdani* & Talwar, 1981; *Nagaichthys* Kottelat & Lim, 1991; *Pillaia* Yazdani, 1972; *Pillaiaabrachia* Britz, 2016.

Mastacembelidae Swainson, 1839 (stekelalen / Stachelaale / Pfeilschnäbel / spiny-eels) {age 44 myr}: *Macrognathus* Lacepède, 1800; *Mastacembelus* Scopoli, 1777; *Sinobdella* Kottelat & Lim, 1994.

INDOSTOMOIDEI (BUISEKSTEKELBAARSVERWANTEN / RÖHRENSCHNÄBELVERWANDTE / INDOSTOMOID FISHES) {age 67 myr}

Indostomidae Prashad & Mukerji, 1929 (buisbekstekelbaarzen / stekelbuisbekvissen / Süßwasser Röhrenschnäbel / Stachelröhrenmäuler / indostomids / armored sticklebacks): *Indostomus* Prashad & Mukerji, 1929.

SYNBRANCHOIDEI (KIEUWSPLEETAALVERWANTEN / KIEMENSCHLITZAALVERWANDTE / SYNBRANCHOID FISHES) {age 67 myr}

Synbranchidae Bonaparte, 1835 (kieuwspleetalen / proest-alen / slikalen / Kiemenschlitzaaale / Kurzschanzaale / swamp-eels)

Macrotrematinae Rosen & Greenwood, 1976 (primitieve kieuwspleetalen / Primitiv-Kiemenschlitzaaale / primitive swamp-eels): *Macrotrema* Regan, 1912.

Synbranchinae (moerasalen / Sumpfaale / swamp-eels / marsh-eels / ditch eels): *Monopterus* Lacepède, 1800; *Ophichthys* Swainson, 1839; *Ophisternon* McClelland, 1844; *Synbranchus* Bloch, 1795.

Anabantiformes (LABYRINTVISACHTIGEN / KLETTERFISCHARTIGE / ANABANTIFORM FISHES) {>56 Ma Ypresian; age 59 myr}

NANDOIDEI (AZIATISCHE BAARSJESVERWANTEN / NANDOID FISHES) {age 59 myr}

Pristolepididae Regan, 1913 (Indische bladvisen / catopra's / Tiger-Nanderbarsche / Sägeschuppenbarsche / pristolepidids / mudperches / Asian sunfishes / tiger nandids): *Pristolepis* Jerdon, 1848.

Nandidae Bleeker, 1852 (Aziatische baarsjes / Aziatische dwergbaarzen / Nander / Asian leaffishes / nandids) {>56 Ma Cretaceous; age 47 myr}

Nandinae (nanderbaarzen / Nanderbarsche / nandines) {age 47 myr}: *Nandus* Valenciennes, 1831.

Badinae Barlow, Liem & Wickler, 1968 (blauwe baarsjes / Blaubarsche / chameleon fishes / badises) {age 47 myr}: *Badis* Bleeker, 1853; *Dario* Kullander & Britz, 2002.

CHANNOIDEI (SLANGENKOPVISVERWANTEN / SLAGENKOPFVERWANDTE / CHANNOID FISHES) {>56 Ma Ypresian; age 64 myr}

Channidae Fowler, 1934 (slangenkopvisen / Schlangenkopffische / Schlangenköpfe / snakeheads) {>56 Ma Ypresian / early Eocene; age 47 myr}: *Aenigmachanna* Britz *et al.*, 2019; *Channa* Scopoli, 1777; *Parachanna* Teugels & Daget, 1984.

ANABANTOIDEI (LABYRINTVISVERWANTEN / KLETTERFISCHVERWANDTE / LABYRINTHISCHE / LABYRINTH-FISHES) {>45 Ma Early Eocene; age 51 myr}

Anabantidae Bonaparte, 1831 (klimbaarzen / Kletterfische / Buschfische / climbing gouramies / climbing perches) {> 33 Ma Chattian, upper Oligocene; age 47 myr}

Anabantinae (Aziatische klimbaarzen / Kletter-Buschfische / Asiatische Kletterfische / Asiatic climbing perches) {> 33 Ma Chattian, upper Oligocene; age 40 myr}: *Anabas* Cloquet, 1816.

Ctenopomatinae Cambray, 1997 (Afrikaanse klimbaarzen / Blatt-Buschfische / Buschfische / African climbing perches) {age 40 myr}: *Ctenopoma* Peters, 1844; *Microctenopoma* Norris, 1995; *Sandelia* Castelnau, 1861.

Helostomatidae Gill, 1872 (kussende goerami's / zoenvissen / zoengoerami's / Buckelmäuler / Küssende Guramis / kissing gouramies) {age 47 myr}: *Helostoma* Cuvier, 1829.

Osphronemidae van der Hoeven, 1832 (labyrintvisen / Fadenfische / Guramis / gouramies) {>38 Ma Priabonium / Eocene; age 47 myr}

Belontiinae Liem, 1962 (kamstaartgoerami's / eilandkempvisen / Inselmakropoden / combtail gouramies) {age 38 myr}: *Belontia* Myers, 1923.

Osphroneminae (reuzengoerami's / spijsgoerami's / Riesenguramis / giant gouramies) {>34 Ma Oligocene; age 38 myr}: *Osphronemus* Lacepède, 1801.

Trichogastrinae Bleeker, 1879 (paradijsvisen / Großflosser / paradise fishes) {age 42 myr}

Trichogastrini (draadgoerami's / echte goerami's / Fadenguramis / threadfishes) {age 42 myr}: *Trichogaster* Bloch, 1801; *Trichopodus* Lacepède, 1801.

Macropodusini Hoedeman, 1948 (kempvisen / Kampffische und Makropoden / fighting fishes) {age 42 myr}: *Betta* Bleeker, 1849; *Macropodus* Lacepède, 1801; *Malpulutta* Deraniyagala, 1937; *Parosphromenus* Bleeker, 1877; *Pseudosphromenus* Bleeker, 1879; *Trichopsis* Canestrini, 1860.

Luciocephalinae Bleeker, 1852 (snoekkopgoerami's / Hechtköpfe / pikeheads / spiral egg gouramies) {>38 Ma Eocene; age 34 myr}: *Ctenops* McClelland, 1845; *Luciocephalus* Bleeker, 1850; *Parasphaerichthys* Prashad & Mukerji, 1929; *Sphaerichthys* Canestrini, 1860.

series **CARANGARIA** (HORSMAKREELACHTIGEN / BASTAARDMAKREELARTIGE / STACHELMAKRELEARTIGE / CARANGOID FISHES / JACKS & POMPANOS) {>56 Ma Ypresian; age 66 myr}

Carangiformes (carangimorphs) {>49 Ma Lutetian; age 71 myr} [this order includes three not listed marine suborders]

CENTROPOMOIDEI (ZEESNOEKVERWANTEN / RIESENBARSCHEVERWANDTE / SNOOKS)

Latidae Jordan, 1888 (reuzebaarzen / Süßwasser-Riesenbarsche / giant perches) {>34 Ma Late Eocene} [this subfamily includes two not listed marine genera]: *Lates* Cuvier, 1828.

Centropomidae Poey, 1867 (zeesnoeken / Riesenbarsche / snooks / robalos) {>23 Ma Miocene; age 58 myr}: *Centropomus* Lacepède, 1802.

POLYNEMOIDEI (DRAADVINGEN / FEDERFLOSSENVERWANDTE / THREADFINS)

Polynemidae Rafinesque, 1815 (draadvinnen / Federflossenfische / Fadenflosser / threadfins) {>19 Ma early Miocene / Burdigalian; age 61 myr} [this family includes not listed marine genera]: *Eleutheronema* Bleeker, 1862; *Leptomelosoma* Motomura & Iwatsuki, 2001; *Parapolynemus* Feltes, 1993; *Polydactylus* Lacepède, 1803; *Polynemus* Linnaeus, 1758.

PLEURONECTOIDEI (PLATVISSEN / SCHOLLENVERWANDTE / PLATTFISCHE / FLOUNDERS) {>49 Ma Lutetian; age 61 myr} [this infraorder contains many marine families]

Achiroidea Rafinesque, 1815 {>46 Ma Eocene}

Achiridae Rafinesque, 1815 (Amerikaanse tongen / Schollen / American soles) {>5 Ma Pliocene} [this family includes not listed marine genera]: *Achirus* Lacepède, 1802; *Apionichthys* Kaup, 1858; *Catathyridium* Chabanaud, 1928; *Hypoclinemus* Chabanaud, 1928; *Trinectes* Rafinesque, 1832.

Rhombosoleidae Regan, 1910 (Zuidpacifische platvissen / Südpazifische Flundern / South Pacific flounders / rhombosoleids) [this family includes not listed marine genera]: *Rhombosolea* Günther, 1862.

Cynoglossidae Jordan, 1888 (hondstongen / Hundszungen / tongue soles / tonguefishes) [this family includes a not listed marine subfamily]

Cynoglossinae (hooked snout tongue soles) [this subfamily includes a not listed marine genus]:

Cynoglossus Hamilton, 1822.

Soleidae Bonaparte, 1833 (tongen / Zungen / soles) {>49 Ma Lutetian} [this family includes not listed marine genera]: *Achiroides* Bleeker, 1851; *Brachirus* Swainson, 1839; *Dagetichthys* Stauch & Blanc, 1964; *Leptachirus* Randall, 2007; *Pardachirus* Günther, 1862; *Synclidopus* Chabanaud, 1943; *Typhlachirus* Hardenberg, 1931.

Pleuronectoidea Rafinesque, 1815 {>56 Ma Ypresian; age 52 myr}

“Tephrinectes clade” (primitieve platvissen / primitive flounders / Primitiv-Plattfische / Chinese brills): *Tephrinectes* Günther, 1862.

Bothidae Smitt, 1892 (grieten / botten / Butten / lefteye flounders / sand flounders / brills) {>56 Ma Ypresian} [this family includes not listed marine genera, uncertain family status, probably polyphyletic]: *Citharichthys* Bleeker, 1862; *Paralichthys* Girard, 1858; *Pseudorhombus* Bleeker, 1862.

Pleuronectidae Rafinesque, 1815 (platvissen / schollen / Rechtsaugenflundern / Schollen / righteye flounders) {>34 Ma early Oligocene} [this family includes not listed marine subfamilies]

Pleuronectinae (botten en schollen / true flounders) [this subfamily includes a not listed marine tribe]

Pleuronectini {>25 Ma Miocene} [this tribe includes not listed marine genera]: *Liopsetta* Gill, 1864; *Platichthys* Girard, 1854; *Pleuronectes* Linnaeus, 1758.

TOXOTOIDEI (SCHUTTERSVISVERWANTEN / SCHÜTZENFISCHVERWANDTE / ARCHERS) [this suborder includes a not listed marine family]

Toxotidae Bleeker, 1859 (schuttervissen / Schützenfische / archerfishes / blowgun fishes / blowpipe fishes) {>49 Ma Lutetian; age 55 myr}: *Toxotes* Cloquet, 1816.

8a series: **OVALENTARIA** (vissen met zinkende, kleverige eieren / fishes with demersal, adhesive eggs) {age 110 myr} [superorders: **Mugilomorphae** + **Blenniomorphae** + **Cichlomorphae** + **Atherinomorphae**]

Ambassidae Klunzinger, 1870 (glasbaarzen / Glasbarsche / glass perches / glass perchlets / Asiatic glassfishes) {>86 Ma Santonian; age 87 myr} [this family includes not listed marine genera]: *Ambassis* Cuvier, 1828; *Chanda* Hamilton, 1822; *Denariusa* Whitley, 1948; *Gymnochanda* Fraser-Brunner, 1955; *Paradoxodacna* Roberts, 1989; *Parambassis* Bleeker, 1874; *Tetracentrum* Macleay, 1883.

superorder: **MUGILOMORPHAE** {age 90 myr}

Mugiliformes (HARDERACHTIGEN / MEERÄSCHENARTIGE / MULLET)S)

Mugilidae Jarocki, 1822 (harders / Meeräschen / grey mullets) {>38 Ma Priabonian; age 44 myr}
Myxinae Whitley 1951: *Myxus* Günther, 1861; *Neomyxus* Steindachner, 1878.

Mugilinae: *Agonostomus* Bennett, 1832; *Cestraeus* Valenciennes, 1836; *Chaenomugil* Gill, 1863; *Mugil* Linnaeus, 1758.

Rhinomugilinae Xia, Durand & Fu 2016

Trachystomains Xia, Durand & Fu 2016 (Australische harders / South-west Pacific mullets): *Aldrichetta* Whitley, 1945; *Gracilmugil* Whitley, 1941; *Trachystoma* Ogilby, 1888.

Rhinomugilini Xia, Durand & Fu 2016 (India harders / India mullets): *Rhinomugil* Gill, 1863.

Squalomugilini Xia, Durand & Fu 2016: *Ellochelon* Whitley, 1930; *Plicomugil* Schultz, 1953; *Squalomugil* Ogilby, 1908.

Crenimugilini Xia, Durand & Fu 2016 (Indo-pacifische harders / Indo-Pacific mullets):

Crenimugil Schultz, 1946; *Osteomugil* Luther, 1982; *Paramugil* Ghasemzadeh, Ivantsoff & Aarn, 2004.

“Chelon clade“: *Chelon* Artedi, 1793; *Neochelon* Durand et al., 2012; *Oedalechilus* Fowler, 1903; *Parachelon* Durand et al., 2012; *Planiliza* Whitley, 1945; *Pseudomyxus* Durand et al., 2012.

Pomacentridae Bonaparte, 1831 (rifbaarzen / anemoonvissen / Riffbarsche / Demoisellen / damselfishes) {>49 Ma Lutetian; age ?137 myr} [this family includes not listed marine subfamilies]

Stegastinae Cooper, Smith & Westneat, 2009 (primitive damselfishes) [this subfamily includes not listed marine genera]: *Stegastes* Jenyns, 1840.

Pomacentrinae (koraaljuffertjes) [this subfamily includes a not listed marine tribe]

Pomacentrini [this tribe includes not listed marine genera]: *Neopomacentrus* Allen, 1975.

superorder: **BLENNIOMORPHAE**

Gobiesociformes (ZUIGVISACHTIGEN / SCHILDBAUCHARTIGE / GOBIESOCIFORM FISHES) {age 45 Ma}

GOBIESOCOIDEI (SCHILDBUIKEN / SCHILDVISSEN / ZUIGVISVERWANTEN / SCHILDBAUCHVERWANDTE / SCHILDFISCHE / GOBIESOCOID FISHES)

Gobiesocidae Bleeker, 1859 (zuigvissen / Schildbäuche / Ansauger / clingfishes) {age 45 Ma} [this family includes not listed marine genera]

Gobiesocinae: *Gobiesox* Lacepède, 1800.

Blenniiformes (SLIJMVISACHTIGEN / SCHLEIMFISCHARTIGE / BLENNIIFORM FISHES) {>49 Ma Lutetian; age 60 myr} [suborders tentative]

BLENNIOIDEI (SLIJMVISVERWANTEN / SCHLEIMFISCHVERWANDTE / BLENNIOID FISHES / TROPICAL BLENNIOIDS) {>49 Ma Lutetian; age 60 myr} [relationship of the suborder uncertain]

Blenniidae Rafinesque-Schmaltz, 1810 (naakte slijmvissen / Schuppenlose Schleimfische / blennies) {>49 Ma Lutetian}

Blenniinae (kamtand-slijmvissen / Kammzahnschleimfische / combtooth blennies) [this subfamily includes many not listed marine genera]

Blenniini (rotsspringertjes / Felsenspringer / rockhoppers): *Lupinoblennius* Herre, 1942; *Salarias* Forsskål, 1775.

Omobranchini Springer, 1968 (brandingsslijmvissen / Brandungschleimfische / tide blennies): *Haptogenys* Springer, 1972; *Omobranchus* Valenciennes, 1836; *Omox* Springer, 1972.

Nemophini Kaup, 1858 (sabeltand-slijmvissen / Säbelzahnschleimfische / sabertoothed blennies): *Meiacanthus* Norman, 1944.

Phenablenniini Springer & Smith-Vaniz, 1972: *Phenablennius* Springer & Smith-Vaniz, 1972.

Salariinae Gill, 1859 (salariid blennies) [this subfamily includes not listed marine genera]: *Hypsoblennius* Gill, 1861; *Salarias* Cuvier, 1816.

Embiotocidae Agassiz, 1853 (surfbaarzen / brandingsbaarzen / Brandungsbarsche / Strandfische / surfperches) {>8 Ma Miocene; age 12 myr} [this family includes not listed marine subfamilies]

Embiotocinae (Tulebarsche / embiotocines) [this subfamily includes not listed marine genera]: *Cymatogaster* Gibbons, 1854; *Hysterocarpus* Gibbons, 1854.

superorder: CICHLOMORPHAE

Cichliformes (CICHLIDENACHTIGEN / BUNTBARSCHARTIGE / CICHLID FISHES) {>46 Ma early Eocene; age 94 myr}

Polycentridae Gill, 1858 (Afrikaanse en Zuid-Amerikaanse bladvissen / Afrikanische und Südamerikanische Blattfische / Afro-American leaffishes) {age 90 myr}: *Afronandus* Meinken, 1955; *Monocirrhus* Heckel, 1840; *Polycentropsis* Boulenger, 1901; *Polycentrus* Müller & Troschel, 1849.

Cichlidae Bonaparte, 1835 (cichliden / bonte baarzen / Buntbarsche / cichlids) {>45 Ma early Eocene / Eocene; age 90 myr} [some subfamilies / tribes / subtribes tentative]

Etiopliinae Kullander, 1998 (Indische & Malagasische cichliden / Indische und Madagaskar Buntbarsche / Malagasian and South Asian cichlids / Indian & Madagascan cichlids) {age 90 myr}: *Etioplus* Cuvier, 1830; *Paretroplus* Bleeker, 1868; *Pseudetroplus* Bleeker, 1862.

Ptychochrominae Sparks, 2004 (Malagasische cichliden / Madagaskar Buntbarsche / Malagasy cichlids / ptychochromines) {age 86 myr}: *Katria* Stiassny & Sparks, 2006; *Oxylapia* Kiener & Maugé, 1966; *Paratilapia* Bleeker, 1868; *Ptychochromis* Steindachner, 1880; *Ptychochromoides* Kiener & Maugé, 1966.

Pseudocrenilabrinae Fowler, 1934 (Afrikaanse cichliden / Afrikanische Buntbarsche / African cichlids) {>45 Ma early Eocene; age 84 myr}

Heterochromidini Kullander, 1998 (primitieve Afrikaanse cichliden / primitive african cichlids) {>34 Ma Oligocene; age 60 Ma}: *Heterochromis* Regan, 1922.

Tylochromini Poll, 1986 (tylochromins) {>34 Ma early Oligocene; age 29–56 myr}: *Tylochromis* Regan, 1920.

- “Chromidotilapia clade” (kersenbuikjes / chromidotilapiine cichliden / West-Afrikaanse dwergcichliden / Chromidotilapiinen Cichliden / chromidotilapiïns) {age 38–40 myr}: *Benitochromis* Lamboj, 2001; *Chromidotilapia* Boulenger, 1898; *Congochromis* Stiassny & Schliewen, 2007; *Divandu* Lamboj & Snoeks, 2000; *Enigmatochromis* Lamboj, 2009; *Limbochromis* Greenwood, 1987; *Nanochromis* Pellegrin, 1904; *Parananochromis* Greenwood, 1987; *Pelvicachromis* Thys van den Audenaerde, 1968; *Teleogramma* Boulenger, 1899; *Thysochromis* Daget, 1988; *Wallaceochromis* Lamboj, Trummer & Metscher, 2016.
- “Hemichromis clade” (cichliden van West- en Centraal-Afrika / West- und Zentral-afrikanische Cichliden / West and Central African cichlids) (hemichromins) {>46 Ma Eocene; age 38–56 myr}: *Anomalochromis* Greenwood, 1985; *Hemichromis* Peters, 1858.
- “Pelmatochromis clade” (pelmatochromins) {>23 Ma Miocene; age 30–40 myr}: *Pelmatochromis* Steindachner, 1894; *Pterochromis* Trewavas, 1973.
- Etiini** Dunz & Schliewen, 2013 {>11 Ma middle-to-late Miocene; age 28–35 myr}: *Etia* Schliewen & Stiassny, 2003.
- Coptodonini** Dunz & Schliewen, 2013 {>5 Ma Pliocene}: *Coelotilapia* Dunz & Schliewen, 2013; *Coptodon* Gervais, 1853; *Gobiocichla* Kanazawa, 1951; *Heterotilapia* Regan, 1920; *Paragobiocichla* Schliewen & Weiss, 2019.
- Pelmatolapiïni** Dunz & Schliewen, 2013: *Pelmatolapia* Thys van den Audenaerde, 1969.
- Oreochromini** Dunz & Schliewen, 2013 (muilbroedende tilapias / Maulbrütende Tilapien / mouthbrooding tilapiïns) {>13 Ma middle Miocene; age 23 myr}: *Danakilia* Thys van den Audenaerde, 1969; *Iranocichla* Coad, 1982; *Konia* Trewavas, 1972; *Myaka* Trewavas, 1972; *Oreochromis* Günther, 1889; *Pungu* Trewavas, 1972; *Sarotherodon* Rüppell, 1852; *Stomatepia* Trewavas, 1962; *Tristramella* Trewavas, 1942.
- Tilapiïni** Hoedeman, 1947 (tilapiïns) {age 31 myr}: *Chilochromis* Boulenger, 1902; *Congolapia* Dunz, Vreven & Schliewen, 2012; *Tilapia* Smith, 1840.
- Steatocranini** Dunz & Schliewen, 2013: *Steatocranus* Boulenger, 1899.
- Boulengerochromini** Takahashi, 2003 (reuzencichliden / Riesenbuntbarsche / giant cichlids) {age 29 myr}: *Boulengerochromis* Pellegrin, 1904.
- Bathybatini** Poll, 1986 (bathybatine cichlids) {age 21 myr}: *Bathybates* Boulenger, 1898; *Hemibates* Regan, 1920; *Trematocara* Boulenger, 1899.
- Lamprologini** Poll, 1986 {age 24 myr}: *Altolamprologus* Poll, 1986; *Julidochromis* Boulenger, 1898; *Lamprologus* Schilthuis, 1891; *Lepidiolamprologus* Pellegrin, 1904; *Neolamprologus* Colombé & Allgayer, 1985; *Telmatochromis* Boulenger, 1898; *Variabilichromis* Colombé & Allgayer, 1985.
- Cyphotilapiïni** Takahashi, 2003 {age 14 myr}: *Cyphotilapia* Regan, 1920, *Trematochromis* Poll, 1987.
- Limnochromini** Poll, 1986 {age 11 myr}: *Baileychromis* Poll, 1986; *Greenwoodochromis* Poll, 1983; *Limnochromis* Regan, 1920; *Reganochromis* Whitley, 1929; *Tangachromis* Poll, 1981; *Triglachromis* Poll & Thys van den Audenaerde, 1974.
- Ectodini** Poll, 1986 (veervincichliden / featherfins) {age 14 myr}: *Asprottilapia* Boulenger, 1901; *Aulonocranus* Regan, 1920; *Callochromis* Regan, 1920; *Cunningtonia* Boulenger, 1906; *Cyathopharynx* Regan, 1920; *Ectodus* Boulenger, 1898; *Gnathochromis* Poll, 1981; *Grammatotria* Boulenger, 1899; *Lestradea* Poll, 1943; *Ophthalmotilapia* Pellegrin, 1904; *Xenotilapia* Boulenger, 1899.
- Cyprichromini** Poll, 1986 (haringcichliden / sardine cichlids) {age 10 myr}: *Cyprichromis* Scheuermann, 1977; *Paracyprichromis* Poll, 1986.

Perissodini Poll, 1986 (schubbeneters / scale-eating cichlids / lepidophagous cichlids) {age 6 myr}: *Haplotaxodon* Boulenger, 1906; *Perissodus* Boulenger, 1898.

Benthochromini Takahashi, 2003 {age 5 myr}: *Benthochromis* Poll, 1986.

Eretmodini Staeck, 1977 (brandingscichliden / Grundelbuntbarsche / goby cichlids) {age 8 myr}: *Eretmodus* Boulenger, 1898; *Spathodus* Boulenger, 1900; *Tanganicodus* Poll, 1950.

“Malagarasi *Orthochromis* clade” (grondelcichliden / Malagarasi River cichlids) {age 5–6 myr}: *Orthochromis* Greenwood, 1954.

Pseudocrenilabrini (haplochromissen / haplochromine cichlids) {? Pliocene; age 17 myr}

“Haplochromis pectoralis clade” {age 5–6 myr}: *Ctenochromis* Pfeffer, 1893.

“Schwetzochromis clade” (serranochromins / southern-central African lineage including the Lake Fwa cichlids / Angola, Congo & South African haplochromins / Congolese haplochromines & serranochromine flock) {age 13 myr}: *Chetia* Trewavas, 1961; *Cyclopharynx* Poll, 1948; *Pharyngochromis* Greenwood, 1979; *Sargochromis* Regan, 1920; *Schwetzochromis* Poll, 1948; *Serranochromis* Regan, 1920.

Pseudocrenilabrina (tipspotted-analfin haplochromines) {age 12 myr}: *Lufubuchromis* Schedel *et al.*, 2020; *Palaeoplex* Schedel *et al.*, 2020; *Pseudocrenilabrus* Fowler, 1934.

“Astatoreochromis clade” *sensu* Salzburger *et al.*, 2005 {age 4 myr}: *Astatoreochromis* Pellegrin, 1904.

Tropheina Poll, 1986 (Lake Tanganyika haplochromines) {age 9 myr}: *Interochromis* Yamaoka, Hori & Kuwamura, 1998; *Limnotilapia* Regan, 1920; *Lobochilotes* Boulenger, 1915; *Petrochromis* Boulenger, 1898; *Pseudosimochromis* Nelissen, 1977; *Simochromis* Boulenger, 1898; *Tropheus* Boulenger, 1898.

Haplochromina Hoedeman, 1947 (modern haplochromins / Maternale Maulbrüter / maternal mouthbrooders / ocellated eggspot haplochromins) {age 9 myr}

“Lake Malawi species flock clade” {age 4 myr}: *Abactochromis* Oliver & Arnegard, 2010; *Alticorpus* Stauffer & McKaye, 1988; *Aristochromis* Trewavas, 1935; *Aulonocara* Regan, 1922; *Buccochromis* Eccles & Trewavas, 1989; *Caprichromis* Eccles & Trewavas, 1989; *Champsochromis* Boulenger, 1915; *Chilotilapia* Boulenger, 1908; *Chindongo* Li, Konings & Stauffer, 2016; *Copadichromis* Eccles & Trewavas, 1989; *Corematodus* Boulenger, 1897; *Ctenopharynx* Eccles & Trewavas, 1989; *Cyathochromis* Trewavas, 1935; *Cynotilapia* Regan, 1922; *Cyrtocara* Boulenger, 1902; *Dimidiochromis* Eccles & Trewavas, 1989; *Diplotaxodon* Trewavas, 1935; *Docimodus* Boulenger, 1897; *Exochochromis* Eccles & Trewavas, 1989; *Fossorochromis* Eccles & Trewavas, 1989; *Genyochromis* Trewavas, 1935; *Gephyrochromis* Boulenger, 1901; *Hemitaeniochromis* Eccles & Trewavas, 1989; *Hemitylapia* Boulenger, 1902; *Iodotropheus* Oliver & Loiselle, 1972; *Labeotropheus* Ahl, 1926; *Labidochromis* Trewavas, 1935; *Lethrinops* Regan, 1922; *Lichnochromis* Trewavas, 1935; *Maylandia* Meyer & Foerster, 1984; *Mchenga* Stauffer & Konings, 2006; *Melanochromis* Trewavas, 1935; *Mylochromis* Regan, 1920; *Naevochromis* Eccles & Trewavas, 1989; *Nimbochromis* Eccles & Trewavas, 1989; *Nyassachromis* Eccles & Trewavas, 1989; *Otopharynx* Regan, 1920; *Pallidochromis* Turner, 1994; *Petrotilapia* Trewavas, 1935; *Placidochromis* Eccles & Trewavas, 1989; *Protomelas* Eccles & Trewavas, 1989; *Pseudotropheus* Regan, 1922; *Rhamphochromis* Regan, 1922; *Sciaenochromis* Eccles & Trewavas, 1989; *Stigmatochromis* Eccles & Trewavas, 1989; *Taeniochromis* Eccles & Trewavas, 1989; *Taeniolethrinops* Eccles & Trewavas, 1989; *Tramitichromis* Eccles & Trewavas, 1989; *Trematocranus* Trewavas, 1935; *Tropheops* Trewavas, 1984; *Tyrannochromis* Eccles & Trewavas, 1989.

“Lake Victoria region superflock [lakes Victoria, Kyoga, Rukwa, Kivu, Albert, George, Edward] & East African riverine species clade” (LVRS) {age 1 myr}: *Astatotilapia* Pellegrin, 1904; *Haplochromis* Hilgendorf, 1888; *Lithochromis* Lippitsch & Seehausen, 1998; *Mbipia* Lippitsch & Seehausen, 1998; *Neochromis* Regan, 1920; *Pundamilia* Seehausen & Lippitsch, 1998; *Pyxichromis* Greenwood, 1980; *Schubotzia* Boulenger, 1914; *Thoracochromis* Greenwood, 1979.

Cichlinae (Amerikaanse cichliden / Amerikanische Buntbarsche / Neotropical cichlids / American cichlids) {>45 Ma Casamayoran / Eocene; age 84 myr}

Cichlini (pauwoogbaarzen / Pfauenaugenbarsche / peacock basses) {>23 Ma Miocene; age 47 myr}: *Cichla* Bloch, 1801.

Retroculini Kullander, 1998 (stroomversnelling-aardeters / Retroculine Buntbarsche / retroculins / cataract earth-eaters) {age 47–58 myr}: *Retroculus* Eigenmann & Bray, 1894.

Astronotini Hoedeman, 1947 (oscar) {age 60 myr}: *Astronotus* Swainson, 1839.

Chaetobranchini Fernández-Yépez, 1951 (kieuwzeeffcichliden / Chaetobranchine Cichliden / chaetobranchine cichlids) {age 18 myr}: *Chaetobranchopsis* Steindachner, 1875; *Chaetobranchus* Heckel, 1840.

Geophagini Haseman, 1911 (Geophaginen / geophagins) {>49 Ma early Eocene; age 52 myr}

Geophagina (Geophagine Cichliden / Geophaginen und Crenicarinen / geophagine cichlids / microgeophagins & crenicarats & geophagins) {>49 Ma early Eocene}: *Biotodoma* Eigenmann & Kennedy, 1903; *Crenicara* Steindachner, 1875; *Dicrossus* Steindachner, 1875; *Geophagus* Heckel, 1840; *Gymnogeophagus* Miranda Ribeiro, 1918; *Mikrogeophagus* Meulengracht-Madsen, 1968.

“guianacarins clade” (Guyana dwergcichliden / Guyana Zwergbuntbarsche / Guyana dwarf cichlids) {age 50 myr}: *Guianacara* Kullander & Nijssen 1989; *Mazarunia* Kullander, 1990.

“apistogrammins clade” (Zuid-Amerikaanse dwergcichliden / Südamerikanische Zwergbuntbarsche / Zwergcichliden / dwarf cichlids) {age 50 myr}: *Apistogramma* Regan, 1913; *Satanoperca* Günther, 1862; *Taeniacara* Myers, 1935.

Acarichthyina Kullander, 1998 (Acarichthyine Cichliden): *Acarichthys* Egenmann 1912; *Biotocus* Eigenmann & Kennedy, 1903.

Crenicichlina Fernández-Yépez, 1951 (snoekcichliden / Hechtcichliden / Crenicichline Cichliden / crenicichline cichlids / pike cichlids) {>45 Ma early Eocene}: *Crenicichla* Heckel, 1840; *Teleocichla* Kullander, 1988.

Cichlasomatini Kullander, 1998 (cichlasomins) {>35 Ma early Eocene; age 42 myr}

“nannacarines clade” (nannacarine cichlids): *Cleithracara* Kullander & Nijssen, 1989; *Ivanacara* Römer & Hahn, 2006; *Nannacara* Regan, 1905.

“andinoacarines clade” (andinoacarine cichlids): *Acaronia* Myers, 1940; *Andinoacara* Musilová, Říčan & Novák, 2009; *Bujurquina* Kullander, 1986; *Laetacara* Kullander, 1986; *Rondonacara* Ottoni & Mattos, 2015; *Tahuantinsuyoa* Kullander, 1986.

Cichlasomatina {>23 Ma Miocene}: *Aequidens* Eigenmann & Bray, 1894; *Cichlasoma* Swainson, 1839; *Krobia* Kullander & Nijssen, 1989.

Therapsini Allgayer, 1989 (herosachtige cichliden / Heroine Cichliden / heroins) {>45 Ma early Eocene; age 40 myr}

Heroina Kullander, 1998 (grote Zuid-Amerikaanse cichliden / South American heroins): *Heros* Heckel, 1840; *Hoplarchus* Kaup 1860; *Hypselecara* Kullander, 1986; *Mesonauta* Günther, 1862; *Pterophyllum* Heckel, 1840; *Symphysodon* Heckel, 1840; *Uaru* Heckel, 1840.

“Astatheroines clade” (astatheroines): *Astatheros* Pellegrin, 1904; *Criboheros* Říčan & Piálek, 2016; *Herotilapia* Pellegrin, 1904; *Rocio* Schmitter-Soto, 2007; *Tomocichla* Regan, 1908.

“Australoheroines clade” (zuidelijke cichliden / southern cichlids): *Australoheros* Říčan & Kullander, 2006.

Archocentrina Allgayer, 2001 (zuidelijke Midden-Amerikaanse cichliden / Southern Central American cichlids & Caribbean Island cichlids / amphiphines): *Amatitlania* Schmitter-Soto, 2007; *Amphilophus* Agassiz, 1859; *Archocentrus* Gill, 1877; *Caquetaia* Fowler, 1945; *Chortiheros* Říčan & Dragová, 2016; *Cryptoheros* Allgayer, 2001; *Darienheros* Říčan & Novák, 2016; *Heroina* Kullander, 1996; *Hypsophrys* Agassiz, 1859; *Isthmoheros* Říčan & Novák, 2016; *Kronoheros* Říčan & Piálek, 2016; *Mayaheos* Říčan & Piálek, 2016; *Neetroplus* Günther, 1867; *Panamius* Schmitter-Soto, 2007; *Parachromis* Agassiz, 1859; *Petenia* Günther, 1862; *Talamancaheros* Říčan & Novák, 2016.

Therapsina (noordelijke Midden-Amerikaanse cichliden / Northern Central American cichlids / herichthyines) {>12 Ma late Miocene; age 17 myr}: *Chiapaheros* McMahan & Piller, 2015; *Chocoheros* Říčan & Piálek, 2016; *Chuco* Fernández-Yépez, 1969; *Cincelichthys* McMahan & Piller, 2015; *Herichthys* Baird & Girard, 1854; *Kihnichthys* McMahan & Matamoros, 2015; *Maskaheros* McMahan & Piller, 2015; *Mesoheros* McMahan & Chakrabarty, 2015; *Nandopsis* Gill, 1862; *Oscura* McMahan & Chakrabarty, 2015; *Paraneetroplus* Regan, 1905; *Rheoheros* McMahan & Matamoros, 2015; *Theraps* Günther, 1862; *Thorichthys* Meek, 1904; *Trichromis* McMahan & Chakrabarty, 2015; *Vieja* Fernández-Yépez, 1969; *Wajpamheros* Říčan & Piálek, 2016.

superorder: ATHERINOMORPHAE {>55 Ma Ypresian; age 77 myr} [Beloniformes + Atheriniformes + Cyprinodontiformes]

Beloniformes (GEEPACHTIGEN / HORNHECHTARTIGE / BELONIFORM FISHES) {>49 Ma Lutetian; age 71 myr}

ADRIANICHTHYOIDEI (RIJSTVISVERWANTEN / SCHAUFELKÄRPFLINGVERWANDTE / ADRIANICHTHYOID FISHES)

Adrianichthyidae Weber, 1913 (rijstvisjes / Sulawesische rijstvisjes / schoffeltandkarpers / glastandkarpers / Reiskärpflinge / Schaufelkärpflinge / adrianichthyids / medakas / ricefishes) {>23 Ma Miocene}: *Adrianichthys* Weber, 1913; *Oryzias* Jordan & Snyder, 1906.

EXOCOETOIDEI (GEEPVERWANTEN / HORNHECHTVERWANDTE / EXOCOETOID FISHES / BELONOID FISHES) {>49 Ma Lutetian; age 44 myr}

Exocoetoidea Risso, 1827 (vliegendevisverwanten) {>49 Ma Lutetian}

Hemiramphidae Gill, 1859 (bastaardgepen / halfsnavelbekken / Halbschnäbler / halfbeaks) {>49 Ma Lutetian; age 44 myr} [this family includes not listed marine genera]: *Arrhamphus* Günther, 1866; *Hyporhamphus* Gill, 1859; *Melapedalion* Fowler, 1934; *Rhynchorhamphus* Fowler, 1928.

Belonoidea Bonaparte, 1835

Zenarchopteridae Fowler, 1934 (internbevruchtende bastaardgepen / Halbschnäbler mit inneren Begattung / internally fertilized halfbeaks / freshwater halfbeaks / livebearer halfbeaks) {age 44 myr}: *Dermogenys* Kuhl & van Hasselt, 1823; *Hemirhamphodon* Bleeker, 1865; *Nomorhamphus* Weber & de Beaufort, 1922; *Tondanichthys* Collette, 1995; *Zenarchopterus* Gill, 1864.

Belonidae Bonaparte, 1835 (gepen / Hornhechte / needlefishes / green gars) {>49 Ma Lutetian} [this family includes not listed marine subfamilies]

Beloninae [this subfamily includes not listed marine genera]: *Belonion* Collette, 1966; *Dorybelone* Fowler, 1944; *Potamorrhaphis* Günther, 1866; *Pseudotylosurus* Fernández-Yépez, 1948.

Strongylurinae Fowler, 1925 [this subfamily includes not listed marine genera]: *Strongylura* Broié, 1824; *Xenentodon* Regan, 1911.

Atheriniformes (KOORNAARVISACHTIGEN / ÄHRENFISCHARTIGE / SILVERSIDES) {age 71 myr}

ATHERINOPSOIDEI (NIEUWE WERELD KOORNAARVISVERWANTEN / NEUWELTLICHE ÄHRENFISCHVERWANDTE / ATHERINOPSOID FISHES)

Atherinopsidae Fitzinger, 1873 (koornaarvissen van de nieuwe wereld / Neuweltliche Ährenfische / New World silversides) {age 37 myr} [this family includes the not listed marine subfamily Notocheirinae]

Atherinopsinae (neotropische koornaarvissen / neotropical silversides) {age 27 myr} [this subfamily includes a not listed marine tribe]

Sorgentinini Pianta de Risso & Risso, 1953 (Zuid-Amerikaanse koornaarvissen / Südamerikanische Ährenfische / Southamerican silversides): *Basilichthys* Girard, 1855; *Odontesthes* Evermann & Kendall, 1906.

Menidiinae Schultz, 1948 (koornaarvissen van de Golf van Mexico / Gulf of Mexico silversides) {age 27 myr} [this subfamily includes the not listed marine genus *Melanorhinus*]: *Labidesthes* Cope, 1870; *Membras* Bonaparte, 1836; *Menidia* Bonaparte, 1836; *Xenomelaniris* Schultz, 1948.

ATHERINOIDEI (OUDE WERELD KOORNAARVISVERWANTEN / ALTWELTLICHE ÄHRENFISCHVERWANDTE / ATHERINOID FISHES)

Phallostethidae Regan, 1916 (dwergaarvissen / Zwergährenfische / phallostethids)

Dentatherininae Patten & Ivantsoff, 1983 (grijptandkoornaarvissen / Fangzahn-Ährenfische / tusked silversides): *Dentatherina* Patten & Ivantsoff, 1983.

Phallostethinae (keelphallusvissen / dwergaarvissen / Kehlphallusfische / priapum fishes)

Phallostethini: *Phallostethus* Regan, 1913; *Phenacostethus* Myers, 1928.

Neostethini Aurich, 1937: *Neostethus* Regan, 1916.

Gulaphallini Aurich, 1937: *Gulaphallus* Herre, 1925.

Atherinidae Risso, 1827 (koornaarvissen / Altweltliche Ährenfische / Old World silversides) {>56 Ma Ypresian}

Atherinomorinae Dyer & Chernoff, 1996 (zilverflanken / tropical silversides / hardhead silversides) [this subfamily includes not listed marine genera]: *Alepidomus* Hubbs, 1944; *Atherinomorus* Fowler, 1903; *Doboatherina* Sasaki & Kimura, 2019; *Teramulus* Smith, 1965.

Atherininae (koornaarvissen / silversides / hardyheads / sand smelts): *Atherina* Linnaeus, 1758; *Atherinason* Whitley, 1934; *Atherinosoma* Castelnau, 1872; *Kestratherina* Pavlov *et al.*, 1988; *Leptatherina* Pavlov *et al.*, 1988.

Craterocephalinae Dyer & Chernoff, 1996 (Australische koornaarvissen / hardyheads / Australian silversides) {age 79 myr} [this subfamily includes a not listed marine genus]: *Craterocephalus* McCulloch, 1912; *Sashatherina* Ivantsoff & Allen, 2011.

Bleheratherininae Aarn & Ivantsoff, 2009 (Nieuw-Caledonische koornaarvissen / New Caledonian silversides): *Bleheratherina* Aarn & Ivantsoff, 2009.

Bedotiidae Jordan & Hubbs, 1919 (Malagasische regenboogvissen / Madagaskar-Ährenfische / Malagasy rainbowfishes) {age 52 myr}: *Bedotia* Regan, 1903; *Rheocles* Jordan & Hubbs, 1919.

Melanotaeniidae Gill, 1894 (regenboogvissen / Regenbogenfische / rainbowfishes) {age 52 myr}

Iriatherininae Aarn & Ivantsoff, 1997 (sluierregenboogvissen / Prachtregenbogenfische / threadfin rainbowfishes): *Iriatherina* Meinken 1974.

Melanotaeniinae (regenboogvissen / Regenbogenfische / regenboogzalmen): *Chilatherina* Regan, 1914; *Glossolepis* Weber, 1907; *Melanotaenia* Gill, 1862; *Pelangia* Allen, 1998; *Rhadinocentrus* Regan, 1914.

“Cairnsichthys clade” (Queensland regenboogvissen / Queensland Regenbogenfische / Queensland rainbowfishes): *Cairnsichthys* Allen, 1980.

Pseudomugilidae Kner, 1867 (blauwoogjes / Blauaugen / blue-eyes) {age 52 myr}

Pseudomugilinae: *Kiunga* Allen, 1983; *Pseudomugil* Kner, 1866.

Scaturiginichthyinae Ivantsoff, Unmack, Saeed & Crowley, 1991: *Scaturiginichthys* Ivantsoff *et al.*, 1991.

Telmatherinidae Munro, 1958 (Celebes-regenboogvissen / Celebes-zeilvissen / Sonnenstrahlfische / Celebes-Regenbogenfische / sailfin silversides / Celebes rainbowfishes) {age 19 myr}: *Kalyptatherina* Saeed & Ivantsoff, 1991; *Marosatherina* Aarn, Ivantsoff & Kottelat, 1998; *Paratherina* Kottelat, 1990; *Telmatherina* Boulenger, 1897; *Tominanga* Kottelat, 1990.

Cyprinodontiformes (TANDKARPERACHTIGEN / ZAHNKÄRPFINGARTIGE / TOOTHED CARPS) {>59 late Paleocene; age 78 myr}

APLOCHEILOIDEI (PRACHTTANDKARPERVERWANTEN / PRACHTKÄRPFINGVERWANDTE / APLOCHEILOID FISHES) {>6 Ma upper Miocene; age 53–78 myr}

Rivulidae Myers, 1925 (Amerikaanse tandkarpers / Amerikanische Zahnkärpflinge / New World rivulins / rivulid killifishes) {age 53 myr}

Rivulinae (beektandkarpers / Bachlinge / rivulines /) [tribes tentative]

Rivulini (rivulins): *Laimosemion* Huber, 1999; *Prorivulus* Costa, 2004; *Rivulus* Poey, 1860.

Plesiolebiini Costa, 1990 (plesiolebiatins / plesiolebiasins): *Maratecoara* Costa, 1995; *Papiliolebias* Costa 1998; *Pituna* Costa, 1989; *Plesiolebias* Costa, 1989; *Stenolebias* Costa, 1995.

“melanorivuline clade”: *Anablepsoides* Huber, 1992; *Atlantirivulus* Costa, 2008; *Cynodonichthys* Meek, 1904; *Melanorivulus* Costa, 2006.

Neofundulini Costa, 1990 (neofundulins / rachoviins) {age 18 myr}: *Gnatholebias* Costa, 1998; *Llanolebias* Hrbek & Taphorn, 2008; *Micromoema* Costa, 1998; *Millerichthys* Costa, 1995; *Moema* Costa, 1989; *Neofundulus* Myers, 1924; *Pterolebias* Garman, 1895; *Rachovia* Myers, 1927; *Renova* Thomerson & Taphorn, 1995; *Terranatos* Taphorn & Thomerson, 1978; *Trigonectes* Myers, 1925.

Kryptolebiatinae Costa, 2004 (mangrovekilli's / mangrove killifishes / primitive rivulins) {age 35 myr}: *Kryptolebias* Costa, 2004.

Cynolebiinae Hoedeman, 1961 (parekillivissen / Fächerfische / pearl killifishes / cynolebiasines) {age 35 myr}

Cynolebiini (parelvissen / pearlfishes / cynolebiatins / cynolebiasins) {age 25 myr}: *Austrolebias* Costa, 1998; *Cynolebias* Steindachner, 1876; *Hypsolebias* Costa, 2006; *Nematolebias* Costa, 1998; *Ophthalmolebias* Costa, 2006; *Simpsonichthys* Carvalho, 1959; *Spectrolebias* Costa & Nielsen, 1997; *Xenurolebias* Costa, 2006.

Cynopoecilini Costa, 1990 (dwergparelvissen / Zwergfächerfische / dwarf pearlfishes / cynopoecilins) {age 25 myr}: *Campellolebias* Vaz-Ferreira & Sierra de Soriano, 1974; *Cynopoecilus* Regan, 1912; *Leptolebias* Myers, 1952; *Leptopanchax* Costa, 2016; *Mucurilebias* Costa, 2014; *Notholebias* Costa, 2008.

Aplocheilidae Bleeker, 1859 (tandkarpers van de oude wereld / Altweltliche Zahnkärpflinge / Old World rivulins / aplocheilids / Panchax family) {age 37–53 myr}: *Aplocheilus* McClelland, 1838; *Pachypanchax* Myers, 1933.

Nothobranchiidae Garman, 1895 (prachttandkarpers / Prachtkärpflinge / Old World rivulins / African rivulins) {age 37–53 myr}

Nothobranchiinae (prachtvaandragers / Prachtkärpflinge) {age 40 myr}

Nothobranchiini: *Fundulosoma* Ahl, 1924; *Nothobranchius* Peters, 1868; *Pronothobranchius* Radda, 1969.

Aphyosemini Huber, 2000 (poeljuwelen): *Aphyosemion* Myers, 1924; *Foerschichthys* Scheel & Romand, 1981; *Fundulopanchax* Myers, 1924.

Adamansini Huber, 2007: *Fenerbahce* Özdikmen *et al.*, 2006.

Epiplatinae Huber, 2000 {age 40 myr}

Epiplatini (snoekjes / Hechtlinge / panchax's): *Epiplatys* Gill, 1862.

Callopanchini Huber, 2000 (roloffia's / Roloffia-Arten / Upper Guinean killies / callopanchacins): *Archiaphyosemion* Radda, 1977; *Callopanchax* Myers, 1933; *Nimbapanchax* Sonnenberg & Busch, 2009; *Scriptaphyosemion* Radda & Pürzl, 1987.

CYPRINODONTOIDEI (TANDKARPERVERWANTEN / ZAHNKARPFENVERWANDTE / CYPRINODONTOID FISHES)
{>34 Rupelian; age 53–78 myr} [superfamilies tentative]

Pantanodontoidea Myers, 1955

Pantanodontidae Myers, 1955 (oostkust killivissen / Ostküsten-Leuchtaugenfische / spine killifishes)
{age 33–78 myr}: *Pantanodon* Myers, 1955.

Cyprinodontoidea Wagner, 1828

Cyprinodontidae Wagner, 1828 (Eierleggende tandkarpers / Eierlegende Zahnkärpflinge / pupfishes)
{>34 Ma Rupelian; age 39–50 myr}

Cubanichthyinae Parenti, 1981 (eiland killivissen / island pupfishes): *Cubanichthys* Hubbs, 1926;
Yssolebias Huber, 2012.

Cyprinodontinae {>7 Ma late Miocene; age 44–50 myr}: *Cualac* Miller, 1956; *Cyprinodon*
Lacepède, 1803; *Floridichthys* Hubbs, 1926; *Garmanella* Hubbs, 1936; *Jordanella* Goode & Bean,
1879; *Megupsilon* Miller & Walters, 1972.

Fundulidae Günther, 1866 (killivissen / Kärpflinge / Bodenkärpflinge / topminnows & killifishes /
fundulid killifishes) {>34 Ma Oligocene; age 35 myr}: *Fundulus* Lacepède, 1803; *Leptolucania* Myers,
1924; *Lucania* Girard, 1859.

Orestiidae Bleeker, 1859 (Andes tandkarpers / Südamerikanische Hochlandkärpflinge /
Andenkärpflinge / Bergseekärpflinge / Andean killifishes) {>12 Ma Lower Miocene}: *Orestias*
Valenciennes, 1839; *Pseudorestias* Arratia *et al.*, 2017.

Goodeoidea Jordan & Gilbert, 1883

Profundulidae Hoedeman & Bronner, 1951 (Midden-Amerikaanse killivissen / Mittelamerikanische
Kärpflinge / Middle American killifishes) {age 37 myr}: *Profundulus* Hubbs, 1924; *Tlaloc* Álvarez &
Carranza, 1951.

Goodeidae Jordan & Gilbert, 1883 (hooglandtandkarpers / Zwischenkärpflinge / splitfins / goodeids)
{>23 Ma Miocene; age 37 myr}

Empetrichthyinae Jordan, Evermann & Clark, 1930 (Noord-Amerikaanse poeltandkarpers /
Nordamerikanische Quellkärpflinge / Wüstenkärpflinge / springfishes and poolfishes) {>14 Ma
Middle Miocene; age 18 myr}: *Crenichthys* Hubbs, 1932; *Empetrichthys* Gilbert, 1893.

Goodeinae (Mexicaanse tandkarpers / hooglandkarpers / Hochlandkärpflinge / Mexican splitfins /
goodeines) {>11 Ma late Miocene; age 18 myr}

Ilyodontini Doadrio & Domínguez, 2004 {age 14 myr}: *Allodontichthys* Hubbs & Turner, 1939;
Ilyodon Eigenmann, 1907; *Xenotaenia* Turner, 1946.

Characodontini Regan, 1907 {age 13 myr}: *Characodon* Günther, 1866.

Girardinichthyini Hubbs & Turner, 1939 {age 11 myr}: *Allotoca* Hubbs & Turner, 1939;
Girardinichthys Bleeker, 1860; *Neotoca* Hubbs & Turner, 1939; *Skiffia* Meek, 1902.

Goodeini {age 11 myr}: *Ataeniobius* Hubbs & Turner, 1939; *Goodea* Jordan, 1880.

Zoogoneticini Hubbs, 1924 {age 11 myr}: *Allophorus* Hubbs & Turner, 1939; *Ameca* Miller &
Fitzsimons, 1971; *Chapalichthys* Meek, 1902; *Xenoophorus* Hubbs & Turner, 1939; *Xenotoca*
Hubbs & Turner, 1939; *Zoogoneticus* Meek, 1902.

Poecilioidea Bonaparte, 1831 {>33 Ma Lower Stampien / Lower Oligocene}

Valenciidae Parenti, 1981 (Zuid-Europese tandkarpertjes / Südeuropäische Kärpflinge / Valencia
toothcarps / European killifishes / valenciids) {>34 Ma Lower Oligocene; age 18 myr}: *Valencia* Myers,
1928.

Aphaniidae Hoedeman, 1949 (Oosterse killivissen / Orientkärpflinge / Oriental killifishes) {>17 Ma
Lower Miocene; age 18 myr}: *Aphaniops* Hoedeman, 1951; *Aphanius* Nardo, 1827; *Paraphanius*

Esmaeili *et al.*, 2020.

Procatopodidae Fowler, 1916 (Afrikaanse lichteogvisjes / Afrikanische Leuchtaugenkärpflinge / African lampeyes) {>34 Ma Lower Oligocene; age 32 myr}

Aplocheilichthyinae Myers, 1928 (brakwaterlichtoogjes / Brackwasser Leuchtaugenkärpflinge / brackish-water lampeyes / banded lampeyes) {age 30 myr}: *Aplocheilichthys* Bleeker, 1863.

Procatopodinae (lichtoogvisjes / Leuchtaugenkärpflinge / lampeyes) {>34 Ma Lower Oligocene; age 30 myr}: *Apticheilichthys* Huber, 2011; *Congopanchax* Poll, 1971; *Hylopanchax* Poll & Lambert, 1965; *Hypsopanchax* Myers, 1924; *Laciris* Huber, 1981; *Lacustricola* Myers, 1924; *Lamprichthys* Regan, 1911; *Micropanchax* Myers, 1924; *Plataplochilus* Ahl, 1928; *Platypanchax* Ahl, 1928; *Poropanchax* Clausen, 1967; *Procatopus* Boulenger, 1904; *Rhexipanchax* Huber, 1999.

Fluviophylacidae Roberts, 1970 (Amerikaanse lichteogvisjes / Amerikanische Leuchtaugenkärpflinge / American lampeyes): *Fluviophylax* Whitley, 1965.

Poeciliidae Bonaparte, 1831 (poeciliids) {>59 Ma Thanetian; age 62–67 myr}

Xenodexiinae Hubbs, 1950 (Guatemala tandkarpertjes / Guatemala Zahnkärpflinge / Guatemalan poeciliids) {age 53 myr}: *Xenodexia* Hubbs, 1950.

Tomeurinae Eigenmann, 1912 (eileggende tandkarpertjes / Eierkärpflinge / facultative viviparous poeciliids) {age 48 myr}: *Tomeurus* Eigenmann, 1909.

Poeciliinae (eilevendbarende tandkarpers / levendbarende tandkarpers / Lebendgebärende Zahnkärpflinge / livebearers / poeciliines / gambusinos) {age 43–48 myr}

Cnesterodontini Hubbs, 1924 {age 43 myr}: *Cnesterodon* Garman, 1895; *Phalloceros* Eigenmann, 1907; *Phalloptychus* Eigenmann, 1907; *Phallotorynus* Henn, 1916.

Poeciliini (poeciliins) {age 41 myr}: *Acanthophaelus* Eigenmann, 1907; *Micropoecilia* Hubbs, 1926; *Pamphorichthys* Regan, 1913; *Poecilia* Bloch, 1801.

Girardinini Hubbs, 1924 (Cubaanse tandkarpertjes / Kubanische Zahnkärpflinge / Cuban topminnows) {age 40 myr}: *Dactylophallus* Howell Rivero & Rivas, 1944; *Girardinus* Poey, 1854; *Glardichthys* Garman, 1896; *Quintana* Hubbs, 1934; *Toxus* Eigenmann, 1903.

Heterandriini Hubbs, 1924 {age 37 myr}: *Alfaro* Meek, 1912; *Brachyrhaphis* Regan, 1913; *Heterandria* Agassiz, 1853; *Hiatirhaphis* Huber, 2019; *Neoheterandria* Henn, 1916; *Phallichthys* Hubbs, 1924; *Poeciliopsis* Regan, 1913; *Priapichthys* Regan, 1913; *Pseudopoecilia* Regan, 1913; *Pseudoxiphophorus* Bleeker, 1859; *Xenophallus* Hubbs, 1924.

Belonesocini Bleeker, 1864 {age 37 myr}: *Belonesox* Kner, 1860; *Carlhubbsia* Whitley, 1951; *Gambusia* Poey, 1854; *Heterophallus* Regan, 1914; *Priapella* Regan, 1913; *Scolichthys* Rosen, 1967; *Xiphophorus* Heckel, 1848.

Anablepsidae Bonaparte, 1831 {>25 Ma Miocene; age 30–67 myr}

Oxyzygonectinae Parenti, 1981 (witogen / Weißaugen / white-eyes) {age 28–60 myr}: *Oxyzygonectes* Fowler, 1916.

Anablepsinae (vierogen en lijntandkarpers / Vieraugen und Linienkärpflinge / four-eyed fishes and onesided livebearers / four-eyed fishes and jenynsiids) {>12 Ma Lower Miocene; age 28–60 myr}

Anablepsini (vieroogvissen / Vieraugen / four-eyed fishes): *Anableps* Scopoli, 1777.

Jenynsiini Günther, 1866 (lijnkarpertjes / lijntandkarpers / Linienkärpflinge / onesided livebearers): *Jenynsia* Günther, 1866.

series: Eupercaria [systematic position of some families uncertain]

Monodactylidae Jordan & Evermann, 1898 (zilverbladvisseren / bladvinnigen / Flossenblätter / Silberflossenblätter / moonies / fingerfishes / moonfishes / butterfly-fishes / batfishes / kitefishes) {>49 Ma Lutetian} [this family includes a not listed marine genus]: *Monodactylus* Lacepède, 1801.

Sillaginidae Richardson, 1846 (witte sillago-baarzen / witte baarzen / Weißbarsche / sillagos / whittings / smelt-whittings) [this family includes a not listed marine genus]: *Sillaginops* Kaga, 2013; *Sillaginopsis* Gill, 1861, *Sillago* Cuvier, 1816.

Acropomatiformes

Lateolabracidae Ghedotti, Davis & Smith, 2018 (Aziatische zeebaarzen / Aziatische zaagbaarzen / Asian basses / Asian seaperches) {>23 Ma Aquitanian / Miocene}: *Lateolabrax* Bleeker, 1857.

Gerreiformes

Gerreidae Bleeker, 1859 (mojarra's / mojarras / silverbiddies) {>56 Ma Ypresian} [this family includes not listed marine genera]: *Diapterus* Ranzani, 1842; *Eucinostomus* Baird & Girard, 1855; *Eugerres* Jordan & Evermann, 1927; *Gerres* Quoy & Gaimard, 1824.

Uranoscopiformes (HEMELKIJKERS / STERRENKIJKERS / HIMMELSGUCKER / STERNGUCKER / STARGAZERS) {age 87 myr}

URANOSCOPOIDEI (STERRENKIJKERSVERWANTEN / HIMMELSGUCKERVERWANDTE / URANOSCOPOID FISHES)
Leptoscopoidea Gill, 1859

Cheimarrichthyidae Regan, 1913 (stroomversnellingsbaarzen / Nieuwzeelandse krokodilvissen / torrent perches / New Zealand torrentfishes) {>28 Ma Chattian}: *Cheimarrichthys* Haast, 1874.

Moronidae Jordan & Evermann, 1896 (zeebaarzen / Weißbarsche / striped basses / white basses) {>49 Ma Lutetian / Eocene} [this family includes a not listed marine genus]: *Dicentrarchus* Gill, 1860; *Morone* Mitchill, 1814.

Acanthuriformes (DOKTERVISACHTIGEN / DOKTORFISCHARTIGE / SURGEONFISHES)

Lobotidae Gill, 1861 (tijgerbaarzen / Tigerbarsche / tigerperches) [this family includes not listed marine genera]: *Datnioides* Bleeker, 1854.

Scatophagidae Gill, 1883 (argusvissen / Argusfische / scats / spadefishes) {>49 Ma Lutetian}: *Scatophagus* Cuvier, 1831; *Selenotoca* Myers, 1936.

Lutjaniformes (GROMBAARSACHTIGEN / GRUNZER UND SCHNAPPER)

Haemulidae Gill, 1885 (grombaarzen / Grunzer / grunts) {>86 Ma Santonian} [this family includes a not listed marine subfamily]

Haemulinae (diklipvissen / Schweinsfische / Süßlippen / sweetlips) [this subfamily includes not listed marine genera]: *Orthopristis* Girard, 1858; *Pomadasys* Lacepède, 1802.

Lutjanidae Gill, 1861 (snappers / Schnapper / snappers and fusiliers) {>49 Ma Lutetian} [this family includes not listed marine subfamilies]

Lutjaninae (lutjanines) {age 35 myr} [this subfamily includes not listed marine genera]: *Lutjanus* Bloch, 1790.

Sciaenidae Cuvier, 1829 (trommelvissen / ombervissen / Umberfische / Krächser / Trommlerfische / Schattenfische / croakers and drums) {>28 Ma Chattian / Miocene; age 27 myr} [this family includes not listed marine subfamilies]

Sciaeninae {>23 Ma Miocene; age 27 myr} [this subfamily includes not listed marine genera]:

Aplodinotus Rafinesque, 1819; *Leiostomus* Lacepède, 1802; *Sciaenops* Gill, 1863.

“**Pachyurinae**” [preoccupied in weevils, name invalid] (Zuid-Amerikaanse trommelvissen / Südamerikanische Umberfische / Southamerican croakers) {>23 Ma Miocene; age 27 myr}:

Pachypops Gill, 1861; *Pachyurus* Agassiz, 1831; *Petilipinnis* Casatti, 2002.

Stelliferinae Darovec, 1983 {>23 Ma Miocene; age 22 myr} [this subfamily includes not listed marine genera]: *Bairdiella* Gill, 1861; *Stellifer* Oken, 1817.

Micropogoniinae Sasaki, 1989 {>23 Ma Miocene}: *Micropogonias* Bonaparte, 1831.

Cynoscioninae Trewavas, 1962 [this subfamily includes a not listed marine tribe]

Cynoscionini {>23 Ma Miocene} [this tribe includes not listed marine genera]: *Cynoscion* Gill, 1861; *Plagioscion* Gill, 1861.

Kathalini Lal Mohan, 1972 [this tribe includes not listed marine genera]: *Boesemani* Trewavas, 1977.

Otolithoidinae Lal Mohan, 1972: *Sciaenoides* Blyth, 1860.

Otolithinae Gill, 1861 (weak fishes / queen fishes) [this subfamily includes not listed marine tribes]

Bahabini Chu, Lo & Wu, 1963: *Bahaba* Herre, 1935.

Argyrosomini Chu, Lo & Wu, 1963 [this tribe includes not listed marine genera]: *Argyrosomus* De la Pylae 1835; *Protonibea* Trewavas, 1971.

Pseudotolithini Trewavas, 1962: *Pseudotolithus* Bleeker, 1863.

Nibeini Trewavas, 1977 [this tribe includes not listed marine genera]: *Aspericorvina* Fowler, 1934; *Dendrophysa* Trewavas, 1964; *Nibea* Jordan & Thompson 1911.

Johniini Bleeker, 1876: *Johnius* Bloch, 1793.

Spariformes (ZEEBRASEMÄCHTIGEN / MEERBRASSENARTIGE / SPARIFORM FISHES) {>56 Ma Ypresian; age 75 myr}

SPAROIDEI (ZEEBRASEMVERWANTEN / MEERBRASSENVERWANDTE / SPAROID FISHES)

Sparidae Rafinesque, 1818 (zeebrasems / Meerbrassen / seabreams / porgies) {>56 Ma Ypresian} [this family includes not listed marine genera]: *Acanthopagrus* Peters, 1855; *Archosargus* Gill, 1865; *Lagodon* Holbrook, 1855; *Rhabdosargus* Fowler, 1933; *Sparus* Linnaeus, 1758.

Tetraodontiformes (KOGELVISÄCHTIGEN / VASTKÄKIGEN / HAFTKIEFER / KUGELFISCHARTIGE / TETRAODONTIFORM FISHES / PLECTOGNATHS) {>100 Ma Cenomanian; age 91–111 myr}

TETRAODONTOIDEI (KOGELVISVERWANTEN / VASTKÄKIGEN / HAFTKIEFER / KUGELFISCHVERWANDTE / TETRAODONTOID FISHES) {>49 Ma Lutetian; age 90 myr}

Tetraodontidae Bonaparte, 1831 (kogelvissen / Kugelfische / Vierzähler / puffers / blowfishes / globe-fishes) {>34 Ma Lower Oligocene; age 70 myr} [this family includes not listed marine genera]

“Takifugu clade” (Pacifische kogelvissen / Pazifik-Kugelfische / Pacific puffers) {age 26 myr}:

Marilyna Hardy, 1982; *Takifugu* Marshall & Palmer, 1950.

Tetraodontinae {age 34 myr}

Colomesini Gill, 1884 (Atlantische kogelvissen / Atlantische Kugelfische / Atlantic puffers) {age 31 myr}: *Colomesus* Gill, 1884; *Lagocephalus* Swainson, 1839; *Sphoeroides* Anonymous, 1798.

Tetraodontini (Afrikaanse en Aziatische kogelvissen / Afrikanische und Asiatische Kugelfische / African and Asian puffers) {age 20 myr}: *Auriglobus* Kottelat, 1999; *Carinotetraodon* Benl, 1957; *Chelonodontops* Smith, 1958; *Chonerhinos* Bleeker, 1854; *Dichotomyctere* Duméril, 1855; *Leiodon* Swainson, 1839; *Pao* Kottelat, 2013; *Tetraodon* Linnaeus, 1758.

Centrarchiformes (ZONNEBAARSACHTIGEN / SONNENBARSCHARTIGE / CENTRARCHIFORM FISHES)
{>61 Ma Paleocene; age 61 myr}

PERCALATOIDEI (AUSTRALIAN BASSES)

“Percalates clade”: *Percalates* Ramsay & Ogilby, 1887.

PERCICHTHYOIDEI (ZAAGBAARSVERWANTEN)

Percichthyidae Jordan & Eigenmann, 1890 (primitieve baarzen / zaagbaarzen / Dorschbarsche / primitive perches / temperate perches) {>30 Ma Oligocene to early Miocene; age 61 myr}:
Maccullochella Whitley, 1929; *Macquaria* Cuvier, 1830; *Percichthys* Girard, 1855.

Perciliidae Jordan 1923 (schubloze-onderkaak baarzen / scaleless maxilla perches): *Bostockia* Castelnau, 1873; *Gadopsis* Richardson, 1848; *Nannatherina* Regan, 1906; *Nannoperca* Günther, 1861; *Percilia* Girard, 1855.

TERAPONTOIDEI (TIJGERVISVERWANTEN)

Kuhliidae Jordan & Evermann, 1896 (dwergbaarzen / Kuhlien / Flaggenbarsche / Kuhliden / flagtails / aholeholes / mountain basses) {>56 Ma Ypresian}: *Kuhlia* Gill, 1861.

Terapontidae Richardson, 1842 (tjgervissen / tigerbaarzen / Tigerfische / Grunzbarsche / terapon-perches / terapon-grunters) {>28 Ma Chattian} [this family includes not listed marine genera]:
Amniataba Whitley, 1943; *Bidyanus* Whitley, 1943; *Datnia* Cuvier, 1829; *Hannia* Vari, 1978; *Hephaestus* De Vis, 1884; *Lagusia* Vari, 1978; *Leiopotherapon* Fowler, 1931; *Pingalla* Whitley, 1955; *Scortum* Whitley, 1943; *Syncomistes* Vari, 1978; *Terapon* Cuvier, 1816; *Variichthys* Allen, 1993.

CENTRARCHOIDEI (ZONNEBAARSVERWANTEN)

Centrarchidae Bleeker, 1859 (zonnebaarzen / Sonnenbarsche / sunfishes and freshwater basses)
{>34 Ma Oligocene; age 54 myr}

Elassomatinae Jordan, 1877 (dwergzonnebaarzen / Zwergbarsche / Zwergschwarzbarsche / pygmy sunfishes / dwarf sunfishes) {age 43 myr}: *Elassoma* Jordan, 1877.

Centrarchinae {>16 Ma Miocene; age 43 myr}: *Acantharchus* Gill, 1864; *Ambloplites* Rafinesque, 1820; *Archoplites* Gill, 1861; *Centrarchus* Cuvier, 1829; *Enneacanthus* Gill, 1864; *Pomoxis* Rafinesque, 1818.

Lepominae Gill, 1864 {>16 Ma Miocene; age 23 myr}: *Lepomis* Rafinesque, 1819; *Micropterus* Lacepède, 1802.

Sinipercidae Jordan & Richardson, 1910 (Chinese zeesnoeken / Chinese baarzen / Chinesische Riesenbarsche / Chinese snooks) {>20 Ma Miocene; age 53 myr}: *Coreoperca* Herzenstein, 1896; *Siniperca* Gill, 1862.

Scorpaeniformes (SCHORPIOENVISACHTIGEN / SCORPIONFISCHE / SCORPIONFISHES)

SCORPAENOIDEI (SCHORPIOENVISVERWANTEN / PANZERWANGEN / SCORPIONFISCHVERWANDTE / PANZERWANGEN / DRACHENKOPFVERWANDTE / SCORPAENOID FISHES) {>34 Ma Rupelian}

Synanceiidae Swainson, 1839 (steenvissen / Steinfische / stonefishes) [this family includes not listed marine subfamilies, subfamilies tentative]

Tetraroginae Smith, 1949 ((zeilvinschorpioenvissen / Wespenfische / Segelflossen-Scorpionfische / waspfishes / sailback scorpionfishes) [this subfamily includes not listed marine genera]:
Neovespicula Mandrytsa, 2001; *Notesthes* Ogilby, 1903; *Tetraroge* Günther, 1860; *Trichosomus* Swainson, 1839.

Perciformes (BAARSACHTIGEN / BARSCHARTIGE / PERCHLIKE FISHES / PERCIFORM FISHES) {>59 Ma Thanetian}

PERCOIDEI (BAARSVERWANTEN / BARSCHVERWANDTE / PERCOID FISHES) {>71-84 Ma Maastrichtian / Campanian}

Percidae Rafinesque, 1815 (baarzen / Echte Barsche / perches) {>34 Ma Rupelian}

Percinae (zoetwater baarzen / freshwater perches) {age 20 myr}: *Gymnocephalus* Bloch, 1793; *Perca* Linnaeus, 1758; *Percarina* Nordmann, 1840.

Luciopercinae Jordan & Evermann, 1896 (pikeperches and Danube perches)

Luciopercini (snoekbaarzen / Zander / pikeperches) {age 25 myr}: *Sander* Oken, 1817.

Romanichthyini Dumitrescu, Bănărescu & Stoica, 1957 (Donau-baarzen / Donau-barsche / Danube perches) {age 25 myr}: *Romanichthys* Dumitrescu, Bănărescu & Stoica, 1957; *Zingel* Cloquet, 1817.

Etheostomatinae Agassiz, 1850 (Amerikaanse zoetwaterbaarzen / springbaarzen / Amerikaanse grondbaarzen / Springbarsche / Amerikanische Barsche / North American darters / darters & logperches): *Ammocrypta* Jordan, 1877; *Crystallaria* Jordan & Gilbert, 1885; *Etheostoma* Rafinesque, 1819; *Nothonotus* Putnam, 1863; *Percina* Haldeman, 1842.

NOTOTHENIOIDEI (IJSVISVERWANTEN / ANTARCTISCHE VISSSEN / ANTARKTISFISCHVERWANDTE / ANTARCTIC BLENNIES / NOTOTHENIOIDS) {>66 Ma Danian, age 71 myr}

Pseudaphritidae McCulloch, 1929 (katadrome ijsvissen / Congollis / catadromous icefishes / congollis) {age 45–65 myr}: *Pseudaphritis* Castelnau, 1872.

COTTOIDEI (DONDERPADACHTIGEN)

INFRAORDER GASTEROSTEALES (STEKELBAARSVERWANTEN / STICHLINGSVERWANDTE / GASTEROSTEOID FISHES) {>71 Ma Maastrichtian; age 161 myr}

Gasterosteidae Bonaparte, 1831 (stekelbaarzen / Stichlinge / sticklebacks) {>16 Ma Middle Miocene} [this family includes a not listed marine genus]: *Apeltes* DeKay, 1842; *Culaea* Whitley, 1950; *Gasterosteus* Linnaeus, 1758; *Pungitius* Coste, 1848.

INFRAORDER COTTALES (DONDERPADVERWANTEN / GROPPENVERWANDTE / COTTOID FISHES) {>34 Ma Rupelian}

Cottidae Bonaparte, 1831 (donderpadden / Groppen / sculpins) {>34 Ma Rupelian}: *Abyssocottus* Berg, 1906; *Asprocottus* Berg, 1906; *Batrachocottus* Berg, 1903; *Cephalocottus* Gratzianov, 1907; *Clinocottus* Gill, 1861; *Comephorus* Lacepède, 1800; *Cottinella* Berg, 1907; *Cottocomephorus* Pellegrin, 1900; *Cottopsis* Girard, 1850; *Cottus* Linnaeus, 1758; *Cyphocottus* Sideleva, 2001; *Leocottus* Taliev, 1955; *Leptocottus* Girard, 1854; *Limnocottus* Berg, 1906; *Megalocottus* Gill, 1861; *Mesocottus* Gratzianov, 1907; *Myoxocephalus* Tilesius, 1811; *Neocottus* Sideleva, 1982; *Paracottus* Taliev, 1949; *Procottus* Gratzianov, 1902; *Rheopresbe* Jordan & Starks, 1904; *Trachidermus* Heckel, 1837; *Uranidea* DeKay, 1842.
