

Analog Gateways

Modular VoIP Gateways that fit any need

“ The beronet Gateway proved itself to be a robust and fail-proof carrier grade system from day one, handling up to 5000 calls per day. ”

Ercan Yapalak, IT Department Zehnder GmbH

OVERVIEW

beronet Modular VoIP Gateways hold up to two modules. Fully expandable, the devices can be custom built for any potential need. Powered by beronet OS you can add SBC licenses to turn your modular VoIP Gateway into a session border controller. With Apps you can transform a Modular VoIP Gateway into a Survival Branch Appliance or Mini-Appliance.

BREAKOUT BOX OR CABLES

Our 16 FXS VoIP Gateway comes with two options; a gateway and a breakout box or a gateway and patch cables. If you plan to use the device with lots of phones and fax machines in the same room, then the breakout box is right for you.

However if you plan on installing this in a building with analog cabling, you may want to consider the patch cables. Check with your customer to see if there is a patch panel for their analog extensions. If there is – the cables are probably the best choice for you.
