SAP: SO – Update Shipment Status Workflow

```
Begin            List of Shipping      Select / Highlight      Select Check       Tap "Update
Transaction      Docs Displays         Document                Boxes              Shipment"

                                                               Check In
                                                               Load End
                                                               Load Start
                                                               Completed

End
Update
```

FSOUS0200 SO – Update Shipment Status

This application displays a panel list of shipments and associated statuses, so the user may see or modify the statuses.

Description of Workflow

First user will see a list of shipment documents. As the user clicks through the list the check boxes below will reflect which statuses have been set.

The user can check or uncheck any of the statuses and tap the **Update Shipment** button to reset the shipment to the new status values.

The arrow in the upper left corner will take the user back to the menu.

Technical Information

This lists the tables used for validations, searches and defaults by prompt.

Prompt	Table
lstShip	VTTK
App Update	BAPI_SHIPMENT_CHANGE
