(Nine languages: English, French, German, Spanish, Italian, Russian, Chinese [traditional and simplified], Korean, Japanese)
• OS : Windows 2000, Windows XP or Windows Vista
• CPU : Pentium III or higher
• Memory : 256 MB minimum (512 MB or more recommended)
• Hard Disk space : 100 MB minimum (1 GB or more recommended)
• CD-ROM drive
• Internet Explorer 5.0 or later

* DirectX 9.0 or later and Windows Media Player 9.0 or later are required to play the movies.
* The OS must be preinstalled and updated to the latest version.
* Operation is not guaranteed on all computers meeting the system requirements.
* The system requirements describe the minimum environment for playing and editing movies.

The versions of Internet Explorer, Windows Media Player and DirectX required for use of "ACDSee for PENTAX 3.0" are not included in the provided CD-ROM (S-SW81). Visit the following sites to download necessary items and install/update them on your computer.

• Internet Explorer
http://www.microsoft.com/windows/products/winfamily/ie/default.mspx
• Windows Media Player
http://www.microsoft.com/windows/products/winfamily/mediaplayer/default.mspx
• DirectX
http://www.microsoft.com/windows/directx/default.mspx

Macintosh System Requirements

● **USB connection**
• OS : Mac OS X (Ver. 10.1.2 - 10.5) (The OS must be preinstalled and updated to the latest version.)
• USB port must be standard equipment

● **Application Software**

<ACDSee 2 for Mac>
(Six languages: English, French, German, Spanish, Italian, Japanese)
• OS : Mac OS X (ver. 10.3 - 10.5)
• CPU : Power Macintosh 233 MHz or higher
• Memory : 8 MB minimum
• Hard Disk space : 6 MB minimum
• CD-ROM drive, QuickTime 4.0 or later

* The OS must be preinstalled and updated to the latest version.
* Operation is not guaranteed on all computers meeting the system requirements.

Windows — Step 2

Installing the Software

Install the image viewing/managing/editing software (ACDSee for PENTAX 3.0).

> **Caution** • Make sure your Windows PC meets the system requirements before installing the software.
> • When multiple accounts have been setup in Windows 2000, Windows XP or Windows Vista, log on with an account that has administrative rights before installing the software.

1 **Turn your Windows PC on.**

2 **Insert the CD-ROM (S-SW81) into the CD-ROM drive.**
The language selection screen of "PENTAX Software Installer" appears.

> **If you are using Windows Vista**
> When the [AutoPlay] screen appears, display the language selection screen following the steps below.
> 1) Click [Run setup.exe].
> 2) Click [Allow].
> The language selection screen appears.

> **If the language selection screen of "PENTAX Software Installer" does not appear**
> Display the language selection screen following the steps below.
> 1) Double-click [My Computer] on the desktop.
> 2) Double-click the [CD-ROM drive (S-SW81)] icon.
> 3) Double-click the [Setup.exe] icon.

3 **Choose a language from the displayed screen.**
The "ACDSee for PENTAX 3.0" installation screen appears.

4 **Click [Install].**
Setup screen appears. Follow the on-screen guidance and enter the registration information.

5 **Click [Finish].**
"ACDSee for PENTAX 3.0" installation is complete. Then click [Exit] on the installation screen to close the window, and reboot your Windows PC.

Macintosh — Step 2

Installing the Software

Install the image viewing/managing software (ACDSee 2 for Mac).

1 **Turn your Macintosh on.**

2 **Insert the CD-ROM (S-SW81) in the CD-ROM drive.**

3 **Double-click the CD-ROM (S-SW81) icon.**

4 **Double-click the [ACDSee Install] icon.**
The language selection screen of "PENTAX Software Installer" appears.
Double-click the [Master Installer] icon to display the language selection screen.

5 **Choose a language from the displayed screen.**
The "ACDSee 2 for Mac" installer screen appears.

6 **Click [Install].**
The setup screen appears. Follow the on-screen guidance to input registration information and install the software.

7 **When the screen shown on the right appears, click [Yes].**

8 **Click [Close].**
"ACDSee 2 for Mac" installation is complete. Then click [Exit] on the installation screen to close the window.

Windows, Macintosh — Step 3

Setting Up Your Digital Camera

Setting the USB Connection Mode to [PC]

Make sure to set the USB Connection mode before connecting your camera to the computer. You cannot perform the following setting if the camera is connected to your computer or a printer with the USB cable.

1 **Press the MENU button.**

2 **Press the four-way controller (▶) to display the [🔧 Setting] menu.**

3 **Use the four-way controller (▲ ▼) to select [USB Connection].**

4 **Press the four-way controller (▶).**
A pull-down menu appears.

5 **Use the four-way controller (▲ ▼) to select [PC].**

6 **Press the OK button.**

```
🔧 Setting          2/3
USB Connection  PC
Video Out       PictBridge
Brightness Level
Power Saving    5sec
Auto Power Off  3min
Quick Zoom      □
MENU Cancel        OK OK
```

Product Registration on the Internet

In order to better serve you, we request that you complete the product registration. Thank you for your cooperation.

If your computer is connected to the Internet, please click [Product Registration] on the setup screen in **Step 2**. A world map for Internet Product Registration is displayed.

Click the displayed country or region and then follow the instructions to register your product.
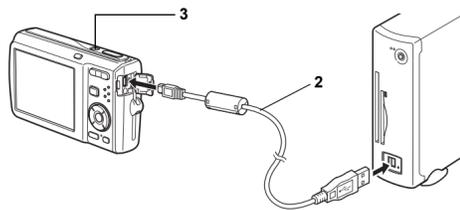

> **memo** Only customers in countries and regions displayed on the software installation screen can register their products on the Internet Product Registration.

Transferring Images to a Windows PC

Connecting the Camera and Windows PC

1 **Turn your Windows PC on.**

2 **With your camera turned off, connect it to your Windows PC using the supplied USB cable.**
Connect the terminal of the AV cable with ⇦ pointing toward the ◀ on the PC/AV terminal of the camera.
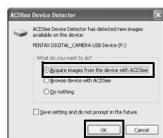

3 **Turn your camera on.**
The "Device Detector" screen appears automatically.
If the "Device Detector" screen does not appear, display and copy the images following the steps in "When the Device Detector screen does not appear".

memo The self-timer lamp blinks while the camera is connected to a Windows PC with the USB cable.

Transferring Images

memo If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transmitted to your Windows PC.

4 **Confirm that [Acquire images from the device with ACDSee] is checked and click [OK].**

5 **Click [Next].**

6 **Select an image to copy and click [Next].**

7 **Specify [File names] and [Destination folder], and click [Next].**
The image is copied to the Windows PC.

8 **Click [Finish].**
The "ACDSee for PENTAX 3.0" browser starts.

When the Device Detector screen does not appear

4 **Double-click the [ACDSee for PENTAX 3.0] icon on the desktop.**

5 **Click [My Computer].**

**6** **Double-click [Removable Disk].**

memo If the SD Memory Card has a volume label, the volume label name appears instead of [Removable Disk]. A new unformatted SD Memory Card may show the manufacturer name or model number.

7 **Double-click the [DCIM] folder.**
Images are stored in folders named by the shooting date ("XXX_0707" for July 7. "XXX" is a three-digit number.).
If [Standard] is selected for [Folder Name] in the [⚒ Setting] menu, a folder named "XXXPENTX" (XXX is a three-digit folder number) is displayed and images are stored here.

---

8 **Select the folders you want to copy to the Windows PC.**

Select the folder (s)

9 **Select [Copy To Folder...] from the [Edit] menu.**
The "Copy Files" screen appears.

10 **Specify the destination folder.**

11 **Click [OK].**
The folders or images are copied to the Windows PC.

Disconnecting the Camera from Your Windows PC

1 **Double-click the 📇 [Safely Remove Hardware] icon in the task bar.**
The "Safely Remove Hardware" screen appears.

2 **Select [USB Mass Storage Device] and click [Stop].**
The "Stop a Hardware device" screen appears.

3 **Select [USB Mass Storage Device] and click [OK].**
A message appears indicating that the hardware can be safely removed.

4 **Click [OK].**

5 **Disconnect the USB cable from your Windows PC and the camera.**

memo • If the camera (removable disk) is being used by an application such as "ACDSee for PENTAX 3.0", the camera cannot be disconnected until the application is closed.
• The camera will automatically switch to the Playback Only mode when the USB cable is disconnected from your Windows PC or the camera.

Transferring Images to a Macintosh

Connecting the Camera and Macintosh

1 **Turn your Macintosh on.**

2 **With your camera turned off, connect it to your Macintosh using the supplied USB cable.**
If there is no SD Memory Card in the camera, the images stored in the built-in memory will be transmitted to your Macintosh.

3 **Turn your camera on.**
The camera is recognized as [NO_NAME] on the desktop.

NO_NAME

memo • If the SD Memory Card has a volume label, the volume label name appears instead of [NO_NAME]. A new unformatted SD Memory Card may show the manufacturer name or model number. Volume label name can be changed.
• The self-timer lamp blinks while the camera is connected to a Macintosh with the USB cable.

Transferring Images

4 **Specify a save location, make sure that [Launch ACDSee] is checked, and click [Download].**
After images are copied to your Macintosh, the browser for "ACDSee 2 for Mac" starts.

memo • When [Delete images from device] is checked, images are deleted from the camera after transfer is complete.
• Even if camera images are not transferred, they can be directly displayed on the Macintosh from a camera connected to the Macintosh.

Disconnecting the Camera from Your Macintosh

1 **Drag [NO_NAME] on the desktop to the trash.**
If the SD Memory Card has a volume label, drag the icon of that name to the trash.

2 **Disconnect the USB cable from your Macintosh and the camera.**

memo • If the camera (removable disk) is being used by an application such as "ACDSee 2 for Mac", the camera cannot be disconnected until the application is closed.
• The camera will automatically switch to the Playback Only mode when the USB cable is disconnected from your Macintosh or the camera.

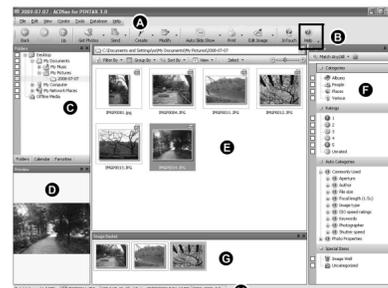

Using "ACDSee for PENTAX 3.0"

"ACDSee for PENTAX 3.0" lets you view, edit, manage, search for, share, and print images.

Starting "ACDSee for PENTAX 3.0"

1 **Double-click the [ACDSee for PENTAX 3.0] icon on the desktop.**
ACDSee starts and the main window, which is called the browser, appears.

ACDSee Browser Interface

A Menu bar
You can access the various menu commands.
B Toolbar
Provides quick access to shortcuts for frequently used tasks and functions.
C Folders pane
Displays the configuration of folders in your computer. When you browse a folder, the contents of the folder appear in the File List pane.
D Preview pane
Displays a preview of the image or media file currently selected in the File List pane. You can change the size of the preview image or play back the media file.
E File List pane
Displays the contents of the currently selected folder or the results of the most recent search (the file or folder that matches the search item). It is the only pane that always appears in the browser and it cannot be hidden or closed.
F Category pane
Displays a list of categories and priorities. By dragging and dropping files from the File List pane to here, you can set category and priority for files.
G Image Basket pane
Displays files selected in the File List pane. By choosing images and files and putting them in the Image Basket pane, you can use the editing and creating functions on images from different folders and categories.
H Status bar
Displays information and properties for the selected file.

Viewing Images

1 **Select and click the folder containing the image you want to view in the Folders pane of the ACDSee browser.**
Images are displayed in the File List pane.

2 **Select and double-click the image you want to view in the File List pane.**
The selected image is displayed with the viewer.
With the viewer, you can enlarge/reduce the display size of the image or edit the image. You can also play back movies or sound files.

Viewer

ACDSee Quick View

The image is displayed on the "ACDSee Quick View" screen if you double-click the image file directly from Windows without starting ACDSee. (You cannot play back or display the file with ACDSee even if you double-click a movie or sound file.)
You can also enlarge/reduce the display size of the image on the "ACDSee Quick View" screen.
Click [Full Viewer] on the "ACDSee Quick View" screen to switch the display to the viewer.
Click [Photo Manager] to switch the display to the ACDSee browser.

ACDSee Quick View

Details on How to Use "ACDSee for PENTAX 3.0"

You can find more information on how to use "ACDSee for PENTAX 3.0" by using the help pages.

1 **Click the [?] icon at the top right of the screen.**
The help screen appears.

2 **Double-click the desired topic.**

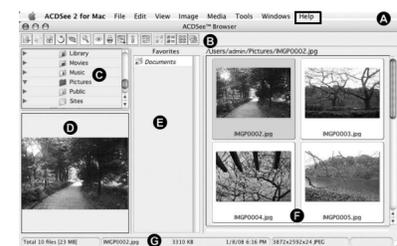

Using "ACDSee 2 for Mac"

"ACDSee 2 for Mac" lets you display and manage images.

Starting "ACDSee 2 for Mac"

1 **Double-click the [ACDSee] folder inside the [Applications] folder.**

2 **Double-click the [ACDSee 2 for Mac] icon.**
ACDSee starts and the main window, which is called the browser, appears.

ACDSee Browser Interface

A Menu bar
You can access the various menu commands.
B Toolbar
Provides quick access to shortcuts for frequently used tasks and functions.
C Folders pane
Displays the configuration of folders in your computer. When you browse a folder, the contents of the folder appear in the File List pane.
D Preview pane
Displays a preview of the image or media file currently selected in the File List pane. You can change the size of the preview image or play back the media file.
E Favorites pane
You can add frequently used items (folders, etc.).
F File List pane
Displays the contents of the currently selected folder or the results of the most recent search (the file or folder that matches the search item). It is the only pane that always appears in the browser and it cannot be hidden or closed.
G Status bar
Displays information and properties for the selected file.

Viewing Images

1 **Select and click the folder containing the image you want to view in the Folders pane of the ACDSee browser.**
Images are displayed in the File List pane.

2 **Select and double-click the image you want to view in the File List pane.**
The selected image is displayed with the viewer.
With the viewer, you can enlarge/reduce the display size of the image.

Details on How to Use "ACDSee 2 for Mac"

You can find more information on how to use "ACDSee 2 for Mac" by using the help pages.

1 **Select [ACDSee 2 for Mac] from [Help] on the menu bar.**
The help screen appears.

2 **Click the desired topic.**
