TANZANIA WILDLIFE CORRIDORS ASSESSMENT,  
PRIORITIZATION, AND ACTION PLAN

"Appendix D"

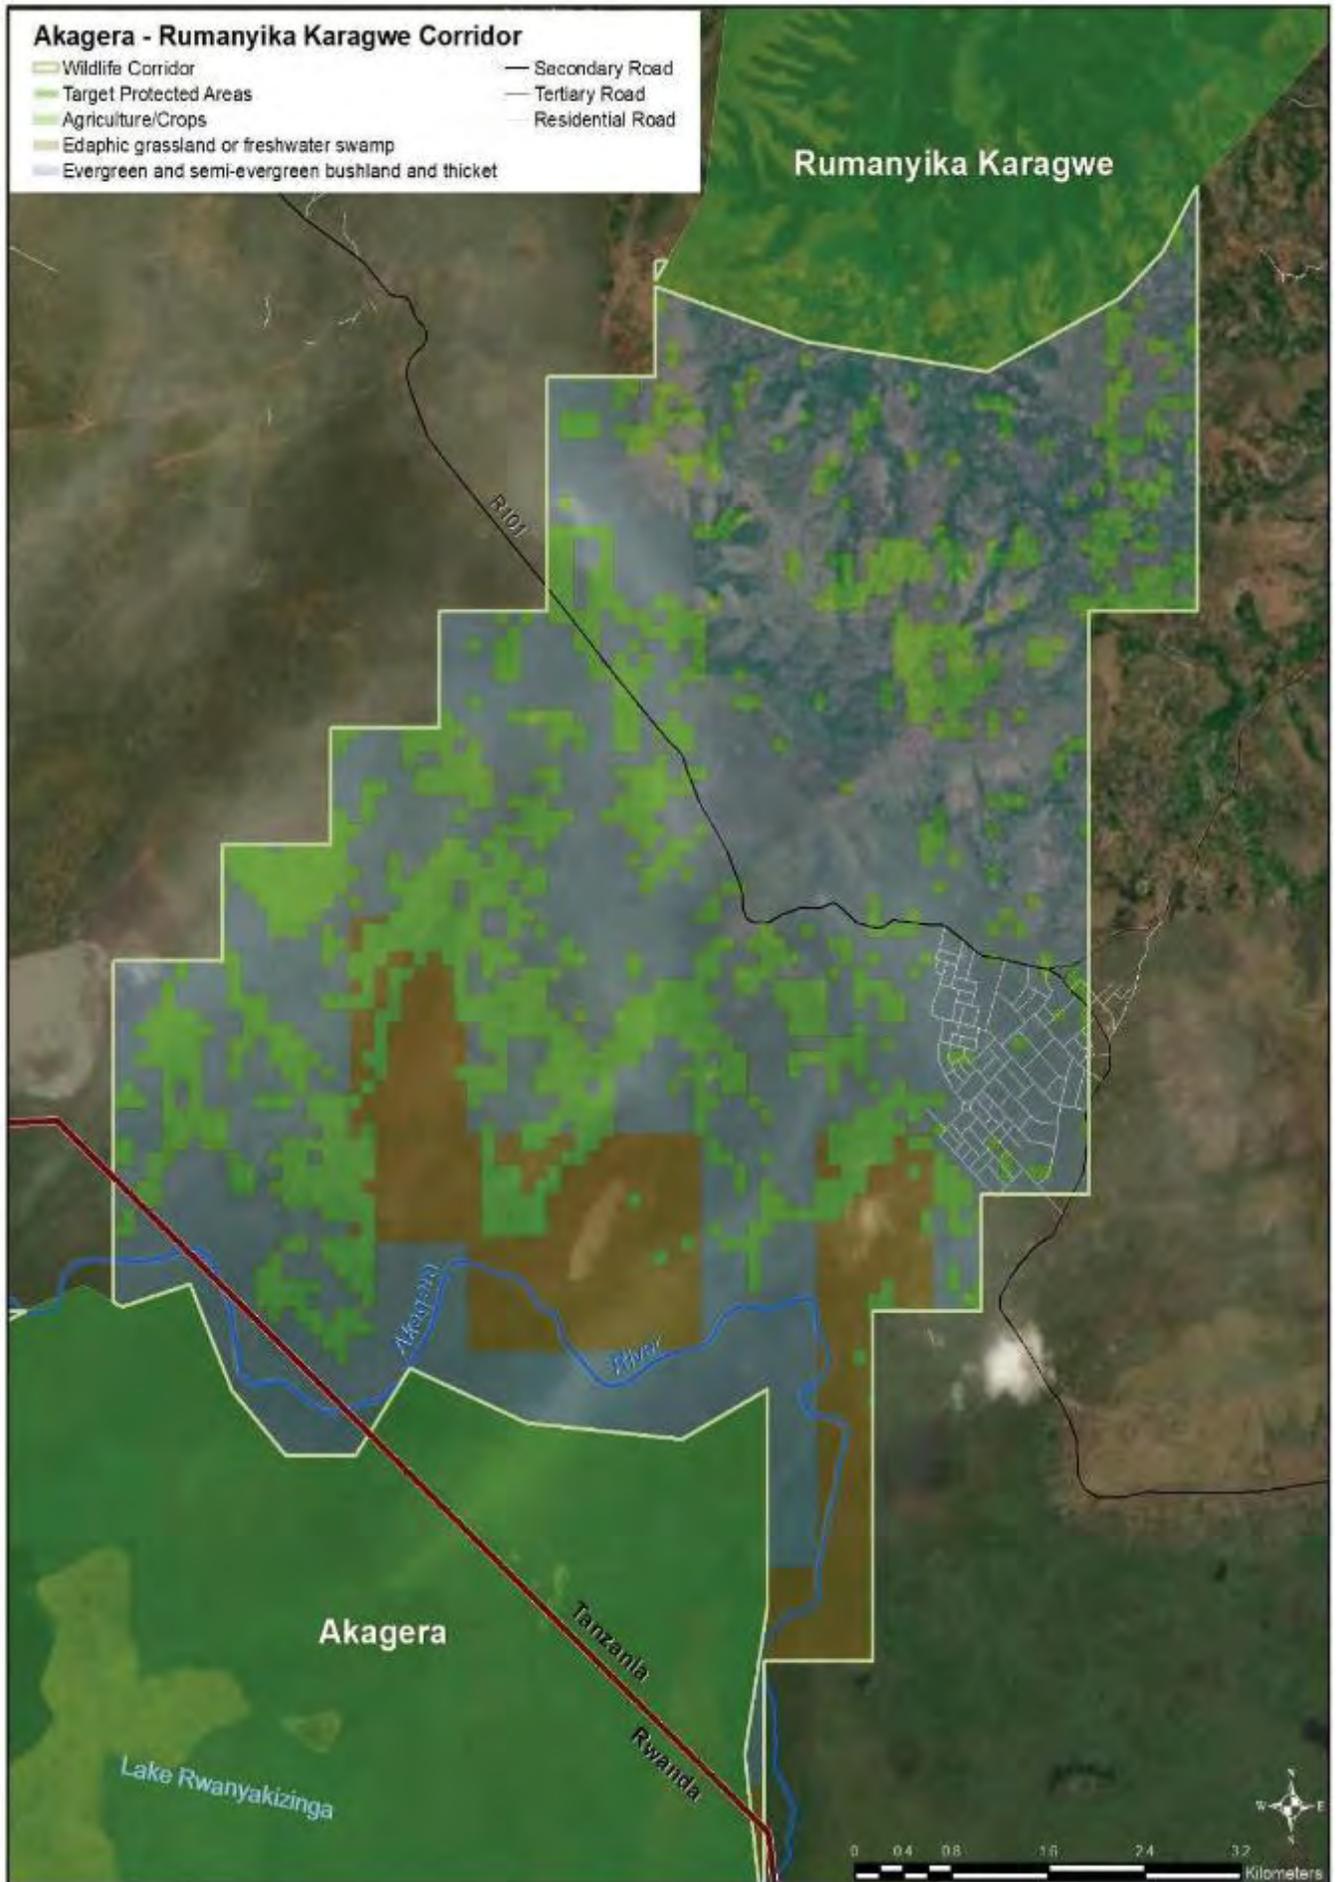

2022 - 2026

## Results Summaries for Each Individual Corridor, with Detailed Maps

The purpose of this section is to provide detailed information for each corridor that may assist working group members with implementation. The maps and tables in this chapter were purposefully not given figure or table numbers to allow working group members, or anyone working on corridor implementation, to easily utilize the maps and tables in other endeavors, such as activities listed in the Priority Corridor Action Plan in Section 5, grant applications for conducting research, or activities related to community engagement for corridor implementation. The following information is provided for each corridor:

- A summary table with the results of all the analyses for each corridor.
- A fine-scale vegetation map using a “potential vegetation map of eastern Africa” developed by van Breugel et al. (2015b) (<http://vegetationmap4africa.org/Data.html>) updated to account for habitat conversion to agriculture, settlements and other developed areas using Copernicus Global Land Service 100 m data for agriculture and urban land cover in Africa for 2018 (Buchhorn et al. 2019; <https://africa.lcviewer.vito.be/download>). Other data included on the corridor maps includes transportation and infrastructure (i.e., Hoima-Tanga Pipeline); rivers, streams, and water bodies (lakes and wetlands); and villages, towns and cities in the vicinity. Note on the maps - only the target protected areas linking the corridors are displayed on the corridor maps in Appendix D; bright green within the corridor boundaries depicts agricultural land cover.
- A table of vegetation and land cover in each corridor (van Breugel et al. 2015b, Buchhorn et al. 2019).
- A table of IUCN listed species whose range overlaps each corridor.

Akagera (Rwanda) – Rumanyika Karagwe

Summary of Results for Conservation Value Criteria for Akagera – Rumanyika Karagwe					
Species of conservation value in the pair of protected areas connected by the corridor	# IUCN Species	# Endemic Species	# Nationally Significant Species		
	58	2	11		
Globally Important Biodiversity Hotspots and Ecoregions	Hotspot & Global 200 Area (ha)	Total Area of Pair (ha)	% of Pair		
	0	126,645	0		
Size of Protected Areas Connected by the Corridor	Size Class 1 (ha)	Size Class 2 (ha)	Size Categories		
	102,091	24,554	Small - Small		
Habitat Quality in the Corridor	Corridor Area (ha)	% Natural	% Converted	Agriculture (ha)	Settlement (ha)
	5598	75	25	1398	0
Corridor Importance to Facilitate Wildlife Movements Driven by Climate Change	Average Value PA Pair	Minimum Elevation	Maximum Elevation	Elevation Range	Relative Value of the corridor
	25.0	1260	1866	606	18
Scientific Evidence that Wildlife Use the Corridor	# IUCN Species	Additional Species (TAWIRI)	# Species	Movement Data Source for Bonus Points	
	50	0	50	TANAPA working reports	
Freshwater Features Add Value to the Corridor	Rivers & Streams length (m)	Lakes & Wetlands length (m)	Freshwater Features Total (m)	LCP Length	Proportion
	11676	3473	15149	9372	162%
Summary of Results for Vulnerability Criteria					
Vulnerability to Habitat Conversion	Corridor Area (ha)	% Natural	% Converted	Agriculture (ha)	Settlement (ha)
	5598	75	25	1398	0
Human Influence in Buffer Around Corridor	Minimum	Maximum	Range	Sum	Mean
	2.13	100	97.87	14035.73	51.984
Existing & Planned Infrastructure Density	Corridor Area km <sup>2</sup>	km of linear infrastructure	km of linear infrastructure per km <sup>2</sup>	Mean Density	Maximum
	55.98	31.812	0.5683	0.503	8.829
Threat from Invasive Species	Invasive Species Count				
	0				
Human Wildlife Conflict (HWC) Severity	HWC Incidents 2017-2020	HWC Threat Score	# of Districts		
	0	1	1		

## Vegetation and Land Cover Akagera – Rumanyika Corridor (Sources: van Bruegel et al. 2015 and Buchhorn et al. 2019)

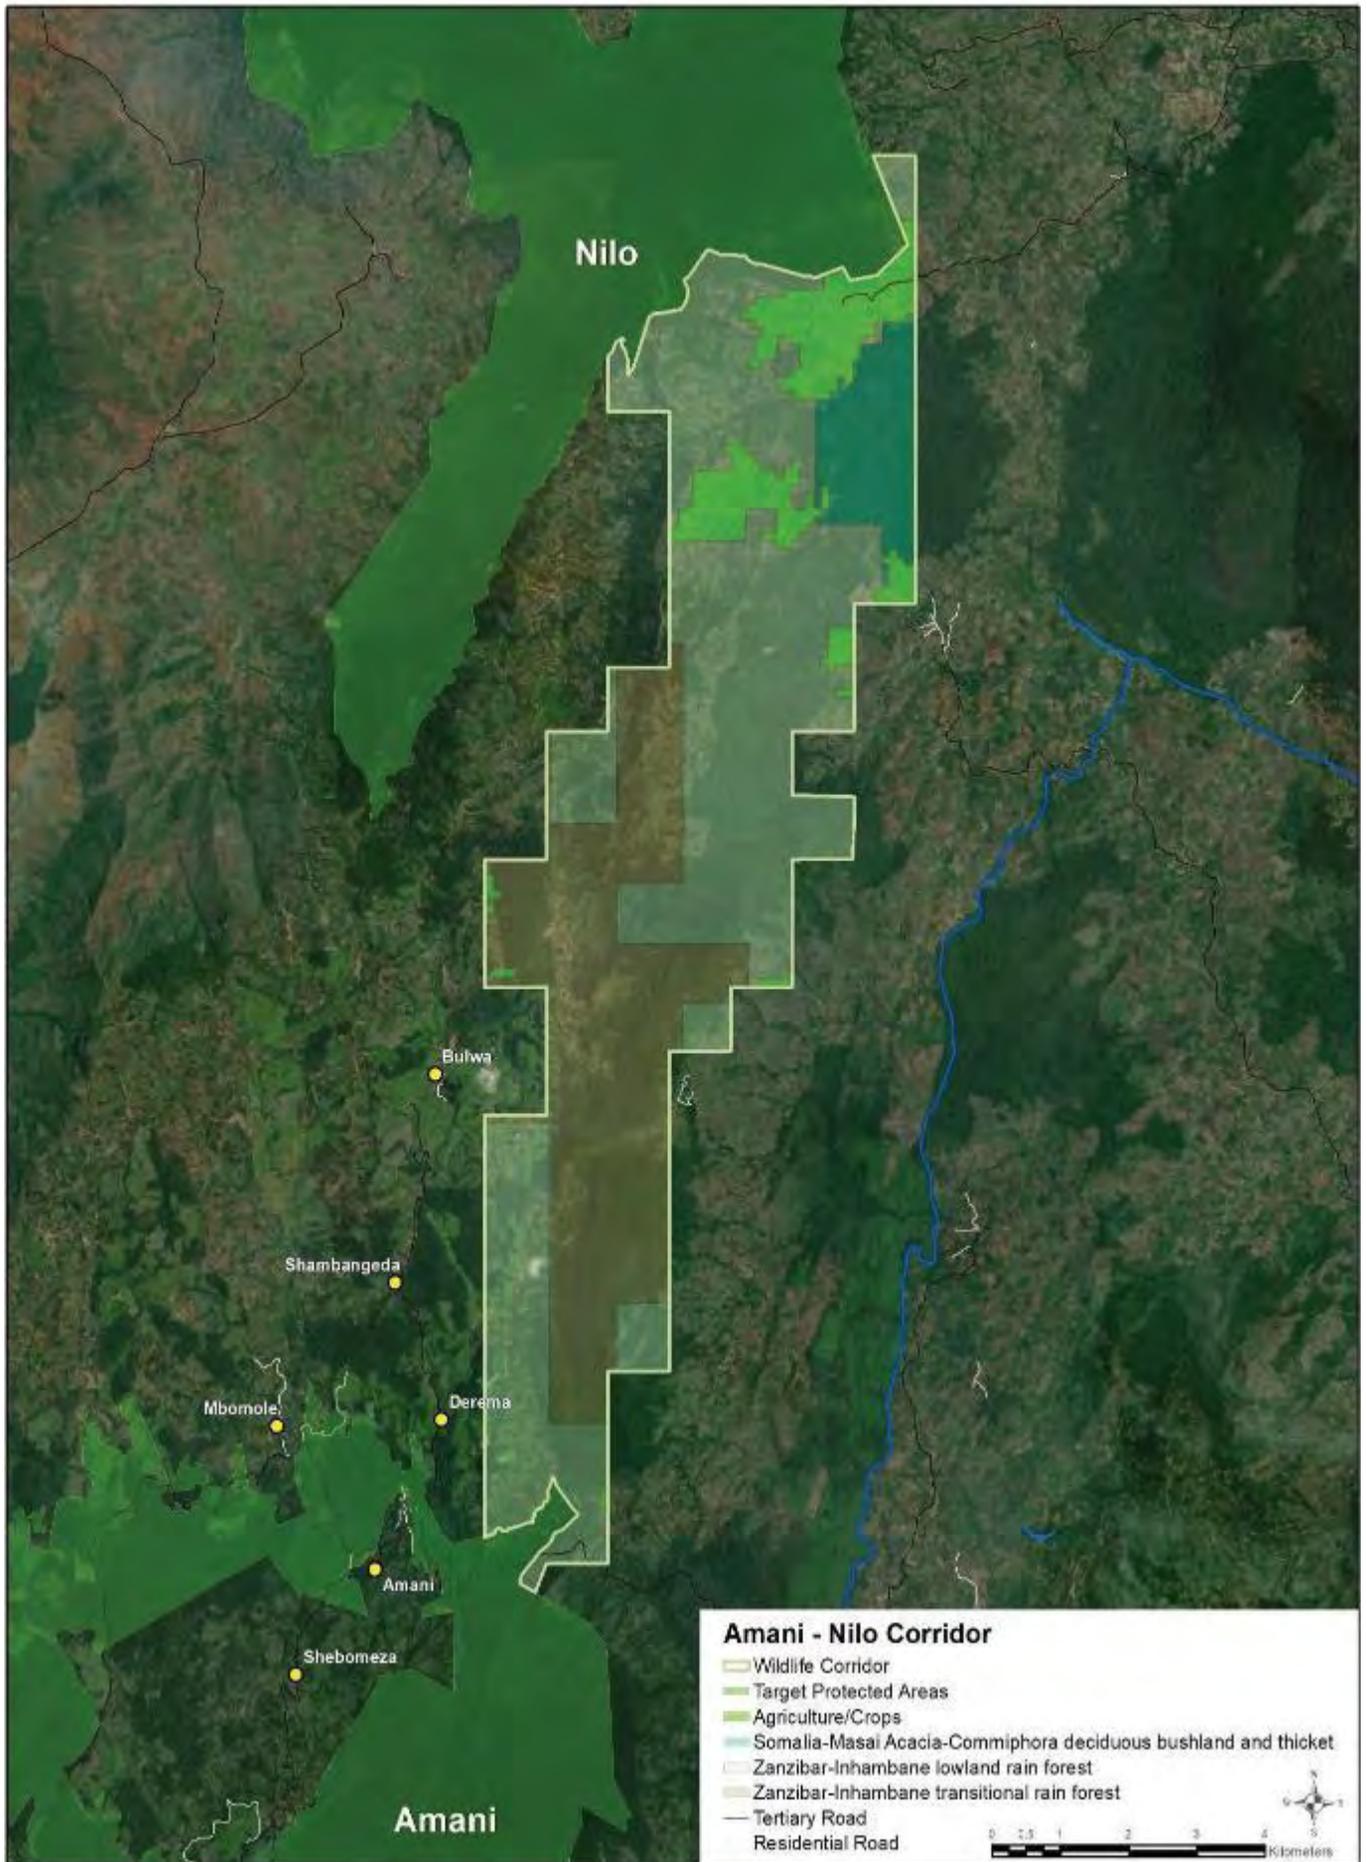

Vegetation / Land Cover Type	Hectares
Evergreen and semi-evergreen bushland and thicket	3,491
Edaphic grassland on drainage-impeded, seasonally flooded soils or freshwater swamp	708
Agriculture/Crops	1398

## IUCN listed species whose range overlap the Akagera – Rumanyika Karagwe Corridor
