Notice of Benefit Change: Effective May 15, 2017
Express Scripts' Smart90 Walgreens Network

The Trustees of the SAG-AFTRA Health Plan (Plan) are pleased to inform you of a change to the prescription drug benefits that are administered by Express Scripts. Starting May 15, 2017, you will have the option to fill your long-term prescriptions at one of more than 8,000 Walgreens Network pharmacies. Here's how the Express Scripts' Smart90 Walgreens Network benefit will work:

- You can either have your long-term medications (those taken for 90 days or more) delivered by mail from the Express Scripts home delivery pharmacy or you may use any Walgreens Network pharmacy for up to a 90 day supply.
- You will have the same 90 day copay whether filling through the Express Scripts home delivery pharmacy or through one of the Walgreens Network pharmacies.
- If you continue to fill 30 day supplies of your long-term medication after the first two fills, you will pay 100% of the prescription drug's cost.
- The Smart90 Walgreens Network offers pharmacists onsite at more than 8,000 pharmacies nationwide, including Walgreens, Duane Reade and Happy Harry's.
- If you are currently using the Express Scripts home delivery pharmacy and wish to switch to the Smart90 Walgreens Network, you will need to obtain a new prescription from your physician and bring it to a participating Walgreens Network pharmacy.
- Participants from the former SAG-Producers Health Plan who received a long-term prescription prior to December 31, 2016 can continue to fill those prescriptions at any participating retail pharmacy through June 30, 2017. However, beginning July 1, 2017, those long-term prescriptions will need to be filled using the Express Scripts home delivery service or a Walgreens Network pharmacy in order to avoid paying 100% of the cost of the medication.
- This change does not affect your retail pharmacy benefits. You can continue to fill your prescriptions which are only needed on a short-term basis (less than 90 days) at the network pharmacy of your choice.

For more information about this benefit, please call the Express Scripts' Smart90 Walgreens Network customer service line at (866) 890-1419 or log in at express-scripts.com/90day to find your nearest Walgreens Network pharmacy.

More information about the Plan's prescription drug benefit is available on pages 73-80 of the Summary Plan Description, available at www.sagaftraplans.org/health.

Please keep this notice about changes to your benefits with your other important medical documents. The changes also affect the Summary of Benefits and Coverage (SBC), which will be updated effective May 15, 2017.
