# SIXTY 2

This new Sixty aims at creating a New Style.

Its transparent design shadows the technology complexity of the product. The device appears to be so easy to use, that anyone would immediately understands it is a phone.

Smartlight effect: a green light blinks when you receive an incoming call from a person registered in your directory, let's say a relative; orange blinking means somebody unknown; if red appears, it means a hidden caller identity. Up to you to hang up or not.

## CHARACTERISTICS

### DISPLAY
2'' Full graphic TFT display with backlight
