DiGital HD-Video-Recorder

User manual

Congratulations!

This Digital HD-Video-Recorder is a new generation of Sagemcom receiver dedicated to Digital Cable Television and equipped with a hard disk. With this technological advantage, you can make digital audio/video recordings.

Once you have connected your Digital HD-Video-Recorder and performed the initial installation, you will be able to watch and enjoy all the cable TV and radio channels which are not scrambled and you are entitled to. You can update your Digital HD-Video-Recorder if new functions or services become available.

The Sagemcom Digital HD-Video-Recorder follows a continuous development strategy. Therefore, we reserve the right to make changes and improvements to the product described in this user manual without any prior notice.

This product complies with EMC directive 89/336/EEC.

CE marking:

The CE marking certifies that the product complies with the essential requirements of the Directive 1999/5/EC concerning radio equipment and telecommunication equipment, and of Directives 2006/95/EC concerning safety, 2004/108/EC concerning electromagnetic compatibility and ErP 2009/125/EC concerning ecodesign requirements, defined by the European Parliament and Council to minimize electromagnetic interferences, ensure the safety of users and their equipment and protect their health, and minimize the impact of products on the environment.

The CE declaration of conformity can be viewed in the support section of the Sagemcom site www.sagemcom.com, or it can be obtained from the following address:

Read this first!

For your safety and comfort, we urge you to carefully read the **Safety recommendations** on page 3 before attempting use.

This document makes use of symbols designed to help the reader identify the information supplied:

Symbol	Definition
	Indicates important safety information.
	Failure to respect these notes may lead to serious or even fatal injury. Read these notes carefully. You will find them in the Safety section of this manual.
	Indicates important safety information.
	Failure to respect these notes may lead to minor to moderate injury, or damage to the apparatus or equipment. Read these notes carefully. You will find them in the Safety section of this manual.
Important	Indicates points to be read with special attention when using the device, and explanations of probable reception issues. Read these explanations carefully.
Note Note	Indicates additional explanations about device functions, and instructions for resolving user errors.

Safety recommendations

Use of the Digital HD-Video-Recorder is subject to safety measures designed to protect users and their environment.

Where to put your Digital HD-Video-Recorder?

In order to guarantee the correct operation of your Digital HD-Video-Recorder, you must:

- place it indoors to protect it from lightning, rain, and sun rays,
- place it in a dry and well ventilated area,
- keep it away from heat sources such as radiators, candles, lamps, etc.
- protect it from dampness, place it on a flat surface from where it will not fall off and children don't have access to,
- do not place anything on top of your Digital HD-Video-Recorder (as it would restrict ventilation): the ventilation slots located on the casing prevent your Digital HD-Video-Recorder from overheating. If you place the Digital HD-Video-Recorder in a compartment, leave a space of at least 10 cm on each side and 20 cm on the front and back of the Digital HD-Video-Recorder,
- connect it directly to the mains with the provided cords, the socket must be near the Digital HD-Video-Recorder and easy to access. The use of an extension cable (with multi-points) is not recommended.

Warnings and safety instructions

NEVER OPEN THE DIGITAL HD-VIDEO-RECORDER! YOU RISK GETTING AN ELECTRIC SHOCK.

• Use only the power cord supplied with the Digital HD-Video-Recorder to connect it to the mains. Other practice may be dangerous.

• Connect the Digital HD-Video-Recorder to the mains in accordance with the installation instructions in this document and the indications mentioned on the identification label (voltage, current, frequency of electricity network).

- As a precaution, in case of danger, the mains adapters act as a disconnecting mechanism for the 230V power supply. That is why it is imperative that you connect the Digital HD-Video-Recorder to a power outlet located nearby and easily accessible.
- The Digital HD-Video-Recorder must be used within a temperature range of between 0 °C and 40 °C.
- You must imperatively connect the power cord to the Digital HD-Video-Recorder before connecting the power cord to the power socket.
- To avoid short-circuits (fire or electrocution hazard), do not expose your Digital HD-Video-Recorder to dampness. Do not place any object containing liquid (vase for example) on the appliance. The Digital HD-Video-Recorder must not be splashed with liquid. If liquid is dropped, dripped onto the Digital HD-Video-Recorder, unplug it immediately from the mains and consult your supplier.
- Take care not to allow liquids or metal objects to enter the Digital HD-Video-Recorder through the ventilation slots.
- Avoid reconnecting the Digital HD-Video-Recorder after it has been subjected to large changes in temperature.
- The Digital HD-Video-Recorder must be disconnected from mains supply (from the power outlet or rear panel) before any modification of connection between TV, VCR or antenna.
- In the event of a storm, it is advisable to unplug the antenna. Even if the Digital HD-Video-Recorder and the television set are disconnected from the power supply, lightning can still damage them.
- Only a personnel approved by the manufacturer can repair the Digital HD-Video-Recorder. The nonobservance of these safety precautions can result in forfeiture of the guarantee.

Batteries

Batteries are easily swallowed by young children. Do not allow young children to play with the remote control.

To avoid damaging the remote control, only use identical batteries or batteries of equivalent type. The batteries provided are not rechargeable.

Interference

Do not place the Digital HD-Video-Recorder near appliances that may cause electromagnetic interferences (for example loudspeakers). This could affect Digital HD-Video-Recorder operation and distort the picture or sound.

Hard disk

This unit contains a hard disk. Before unplugging and moving the Digital HD-Video-Recorder, please wait for the unit to go into standby mode and make sure that there are no recordings in progress.

Cleaning the Digital HD-Video-Recorder

The outer casing of the Digital HD-Video-Recorder can be cleaned with a soft and dry cloth. Do not use any type of abrasive pad, scouring powder or solvents, such as alcohol or turpentine, as they could damage the surface of the Digital HD-Video-Recorder.

Environment

Preservation of the environment is an essential concern of the manufacturer. The desire of the manufacturer is to operate systems observing the environment and consequently it has decided to integrate environmental performances in the life cycle of its products, from manufacturing to commissioning, use and elimination.

Meaning of logos present on the product or its packaging

The crossed-out dustbin sign stuck on the product or its accessories means that at the end of its life, the product is subject to selective collection and must not be thrown away in unsorted household waste.

The looped arrow sign means that the packaging may be recycled and must not be disposed of with household waste.

The green logo means that a financial contribution is paid to an approved national organisation to improve packaging recovery and recycling infrastructures.

The logo with three arrows shown on the plastic parts means that they may be recycled and that LA they must not be disposed of with household waste.

Product recycling and disposal

To facilitate recycling, please respect the sorting rules set up locally for this kind of waste.

If your product contains batteries, they must be disposed of at appropriate collection points.

European regulations ask you to dispose of products belonging to the family of electrical and electronic equipments $(\underline{\mathbb{A}})$ selectively:

- At the collection points made available to you locally (drop-off centre, selective collection, etc.),
- At sales points in the event of the purchase of similar equipment.

In this way you can participate in the re-use and upgrading of Electrical and Electronic Equipment Waste, which can have an effect on the environment and human health.

European Directive on Waste Electrical and Electronic Equipment (WEEE)

In the context of sustainable development, the reduction of wastes to be eliminated by reusing, recycling, composting and energy recovery is strongly advised.

In order to comply with this directive which is applicable to EEEs sold after 13/08/2005, your Digital HD-Video-Recorder will be taken back free of charge and recycled by the distributor of the EEE within the limits of the quantity and types of equipment bought from them. These appliances which contain substances potentially dangerous to human health and the environment will be recycled.

Directive on the Restriction of use of certain hazardous substances in electronic equipment (ROHS)

Your Digital HD-Video-Recorder along with the batteries supplied comply with the directive relating to the RoHS – dangerous materials such as lead, mercury or cadmium are not used. This avoids environmental hazards and any risks to the health of personnel at the recycling centres. The batteries of the remote control can be removed simply.

Note: When the batteries of the remote control are worn out, please dispose of them at a collection point and not with household waste.

Electrical consumption of the Digital HD-Video-Recorder

To reduce the consumption of your Digital HD-Video-Recorder, you are recommended to place it in standby mode when not in use. We recommend you to turn off the Digital HD-Video-Recorder or unplug it from the mains if you will not be using it for a prolonged period of time.

1 Product Overview

With the device you can receive all TV and radio programs and record programs which are not scrambled or you are entitled to.

1.1 Package contents

The package of your new device includes:

ltem	Description
1	Digital HD-Video-Recorder
2	Power cord
3	Remote control with 2 batteries (AAA)
4	HDMI lead for connection to the HDTV
5	Antenna cable to connect to the cable network
6	Quick installation guide
7	WLAN-Stick and cable

1.2 Elements and functionalities: Front side of the device

Item	Description	ltem	Description
1	lid / slot of the smartcard reader	7	STOP button
	Open the cover and insert the smartcard into the slot with the gold chip facing downwards		Stopping a recording, stop the timeshift mode and return to live program
2	TV/radio button	8	REWIND button
	Switch between TV and radio channelsGreen: radio mode active		Rewind, switch to other day in the electronic program guide (EPG)
			 "Blinks green: Rewinding
3	MENU button	9	PLAY/PAUSE button
	Access to Digital HD-Video-Recorder menus		Play / pause recording, switch to time-shifted mode
			Green: Plays (in live mode)Flashes green: Pausing
4	ZURÜCK button	10	FORWARD button
	Return to the previous screen or mode		Fast forward, switch to other day in the electronic program guide (EPG)
			 Flashes green: Fast forward
5	OK button	11	RECORD button
	Display the channel list, confirm a selection		 Record a program Red: Now recording* Green: Recording prepared*
			* both in operation and standby mode
6	NAVIGATION buttons	12	STANDBY button
	Browsing pages or menus		Switch to Standby/Wake up from standby
			Red: Device in standbyGreen: Device is running

1.3 Elements and functionalities: Back side of the device

ltem	Description	Item	Description
13	On/Off switch	20	HDMI DIGITAL VIDEO AUDIO connector
14	Power supply connector	21	DIGITAL AUDIO connector (Optical S/PDIF)
15	Ethernet port (RJ45)	22	SCART connector (to TV)
16	USB port * * This port supplies power to attached devices.	23	SCART connector (to VCR or DVD Recorder)
17	USB port for WLAN-Stick	24	Cable signal input
18	Analog AUDIO connectors (ANALOG AUDIO L/R) to Hi-fi system or TV	25	Cable signal output
19	Analog VIDEO connector (FBAS)		

1.4 Remote control

Batteries

The remote control needs two batteries (AAA) to operate. The direction to insert the batteries is labeled in the battery compartment. The batteries are not rechargeable.

2 Connections to the network and connecting additional devices

Check if the package is complete before installing the Digital HD-Video-Recorder (see chapter 1.1, **Package contents**).

Make sure that the devices to be connected (Digital HD-Video-Recorder, TV, VCR ...) are disconnected from the power supply.

2.1 Connection to the cable network

To make sure that your Digital HD-Video-Recorder can receive all the cable TV and radio channels which are not scrambled and you are entitled to, you must check first of all that your home is connected to cable network.

2.1.1 RF Cable connection

- 1. Connect the antenna cable input of the Digital HD-Video-Recorder with the antenna socket (antenna cable provided).
- 2. Connect the antenna cable output of the Digital HD-Video-Recorder with the antenna socket of the TV or VCR/DVD Recorder (antenna cable not provided).

2.2 Connection to TV

Note

If you have a TV with HDMI[®] port, please use only the HDMI[®] cable to connect the Digital HD-Video-Recorder to TV.

2.2.1 Connection to High Definition TV with HDMI® port

In order to take advantage of high-definition television (HDTV), connect the HDMI[®] port on your Digital HD-Video-Recorder through the HDMI[®] cable (provided) to the HDMI ® port on your HD TV.

2.2.2 Connect to a standard definition TV with SCART connection

Connect the TV SCART connector on the Digital HD-Video-Recorder through a SCART cable (not provided) with a free SCART socket on your TV.

2.2.3 Connect to a standard definition TV with audio / video connection (RCA)

- 1. Use an audio / video cable (not supplied) to connect the analog VIDEO (CVBS) on the back of your Digital HD-Video-Recorder to the VIDEO socket on your TV.
- 2. Connect the two analog AUDIO terminals (ANALOG AUDIO L / R) of the Digital HD-Video-Recorder to the AUDIO connectors on the TV.

2.3 Connection to the internet

With an internet connection you have numerous other offers from Kabel Deutschland. To use them, connect your Digital HD-Video-Recorder to the internet, either through the wireless stick or via a network cable (LAN cable).

2.3.1 Internet connection via wireless stick

Slide the WLAN-Stick into the USB port for the WLAN dongle below the Network connector (RJ45). If the Digital HD-Video-Recorder is connected to the power supply after all devices were connected, the wireless stick automatically starts. You may be prompted to enter the necessary data later.

2.3.2 Internet connection via network cable

If you wish to connect your Digital HD-Video-Recorder to the internet using a network cable with RJ45 connectors (LAN cable), plug in such a network cable (not provided) into the network port (RJ45) on the back of the Digital HD-Video-Recorder. Plug the other end of the network cable to a free network connection to your internet router. You may be prompted to enter the necessary data later.

2.4 Connection to the VCR / DVD recorder

Connect the VCR SCART connector on the back of your Digital HD-Video-Recorder with a free SCART socket on your VCR-/DVD-Recorder (cable not provided).

Note

If your VCR / DVD recorder has more than one SCART socket, select the TV or EXT1 port.

2.5 Connection with a home cinema amplifier

Some programs are broadcast with DTS or DOLBY DIGITAL sound. To fully enjoy this high sound quality it is recommended to connect your Digital HD-Video-Recorder via the optical S / PDIF connection with a home cinema amplifier.

Use an optical S / PDIF cable (not supplied) to connect the DIGITAL AUDIO port of the Digital HD-Video-Recorder to the DIGITAL AUDIO port of the home cinema amplifier.

RCI88

2.6 Connection to a hi-fi unit

To enjoy digital broadcasts in high sound quality and to listen to radio channels with switched off TV, connect the two analog AUDIO terminals (ANALOG AUDIO L / R) of the Digital HD-Video-Recorder to the AUDIO terminals of your hi-fi system (cable not provided). This is only possible if you do not use the two analog AUDIO terminals (ANALOG AUDIO L / R) of the Digital HD-Video-Recorder for connecting a TV.

2.7 Powering On / Off the Digital HD-Video-Recorder

You have all the equipment (Digital HD-Video-Recorder, TV, VCR) connected? Connect the Digital HD-Video-Recorder to the power network and turn it on. To turn on the Digital HD-Video-Recorder proceed as follows:

- 1. Make sure that the power switch "On / Off" on the back of the Digital HD-Video-Recorder is set to "Off" (position 0).
- 2. Now connect the power cord to the power connector of the Digital HD-Video-Recorder.
- 3. Plug the power cord into a power outlet near the equipment so you can easily access it.
- 4. Press the "On / Off" button to switch the Digital HD-Video-Recorder on (position I).

The initial installation of your Digital HD-Video-Recorder will start automatically.

If you need to turn off the Digital HD-Video-Recorder (for example, before a long period without using it), proceed as follows:

- 1. Make sure that no recordings take place (Rec button on the front is red) or are prepared (the Rec button on the front glows green). Stop the recording when necessary (see chapter 5, **Recording a program**).
- 2. Press the STANDBY button on the remote control or on the front of the Digital HD-Video-Recorder to switch the Digital HD-Video-Recorder to standby mode.
- **3.** Press the "on / off" switch on the back of the Digital HD-Video-Recorder to turn off the Digital HD-Video-Recorder (position O).
- **4.** Unplug the power cord from the socket.

3 Initial installation

If the Digital HD-Video-Recorder is plugged in and turned on for the first time, the installation wizard starts.

- Turn on your TV. If your TV does not automatically recognize the connected and powered Digital HD-Video-Recorder, select the AV source to your TV (HDMI ®, analog or SCART AUDIO / VIDEO connector), on which the TV is currently connected to the Digital HD-Video-Recorder.
- 2. Open the cover of the smartcard reader on the front of the Digital HD-Video-Recorder. Slide the smartcard into the card slot. The smartcard must be inserted with the chip facing down.

3.1 Preparation: Device checks the device settings

The following tests are performed by the installation wizard automatically. Your intervention is not required normally.

The Digital HD-Video-Recorder searches for the cable signal. If no signal is detected, make sure that the

antenna cable is properly connected. If the test has been interrupted, press $o\kappa$ on your remote control to proceed with the installation.

If the Digital HD-Video-Recorder does not find a signal, contact the customer service of Kabel Deutschland.

The Digital HD-Video-Recorder verifies that you have inserted the smartcard into the device. You received a smartcard from Kabel Deutschland, insert it into the smartcard reader. The smartcard must be

inserted with the gold chip facing down. If you do not have the smartcard at hand, press [ok] on the remote control to continue the installation without smartcard. Until you use the smartcard, you can only use free channels.

The Digital HD-Video-Recorder automatically searches the cable network for new and improved software for your Digital HD-Video-Recorder. If new software is available, the Digital HD-Video-Recorder downloads it and reboots.

3.2 Language settings

The default language for the operation of your Digital HD-Video-Recorder is German. If you want to set a different language,

press o_{pt} on the remote control. You can choose between the languages German, English, Turkish and Russian. Use the keys to select a language and confirm your selection by pressing ok.

Note

The assignment of the o_{pt} button on your remote changes depending on the steps you perform. During installation, the current function assignment of the o_{pt} button always appears at the bottom right on your television screen.

3.3 The five steps of the installation wizard

In five steps, the installation wizard will guide you through the installation. Please follow the instructions on the screen carefully. If necessary, react with your remote control. Simply use the keys \blacktriangle , \checkmark around the

button $\left[\circ \kappa \right]$ and then confirm your selection by pressing $\left[\circ \kappa \right]$.

3.3.1 Step 1: Channel search

The Digital HD-Video-Recorder automatically checks the cable for TV and radio channels and stores them in places 101 to 999.

During the search you see a video introduction to the use and main functions of the device. You can stop this video at any

time by pressing the stop button • on the remote control. After the completion of the channel search, the total number of

TV and radio channels is displayed in the installation screen.

Exit the channel search by pressing $| \circ \kappa$

3.3.2 Step 2: Set up favorite channels

The channel search normally finds several hundred channels. You can now set up your favorite channels and their place in the list of favorite channels. Places 1 to 100 are reserved for

your favorites. To begin, press

Note

If you do not want to create a list now, skip this menu. You can later press

Menü on your remote to enter the main menu. Then select **Settings** first,

then **Favorites** (see chapter 7.5, **Favorites**). By choosing **Add** the list of TV channels is displayed. You can now create your favorites list as described. Without a favorites list the positions 1 to 100 remain unassigned.

- The list of TV channels is displayed. Now proceed by pressing the keys ▲, ▼ or the P+ / P- button on your remote control to browse through the channel list and select which channel you want to add to your favorites list. If you want to add a channel to your favorites list, press or while the yellow marker is on the name of the channel. The selection is indicated by a green check mark next to the channel name.
- 2. If your list is complete, press ◀ on the remote control. A window appears in which you are prompted to confirm your selection. By pressing or you store your entire favorite list.
- To change the order of the channels in your favorites list, move down with the arrow key ▼ to the entry Rearrange. Your favorites are displayed. Do you want to move a channel in the favorites list, press or while the yellow marker is on the program's name. Now the program can be moved using the keys ▲, ▼.
- **4.** To complete sorting, press the arrow button **∢**. Confirm the selected order of your favorites list by pressing or .

3.3.3 Step 3: Setting up an internet connection

Note

If you are connected to the internet you can use the Kabel Deutschland's online video store "Select Video". This service is not yet available everywhere in Germany. Furthermore, by using an internet connection you can review previous searches.

On the TV screen you see how to connect the Digital HD-Video-Recorder to the internet. Select how to connect to the internet using the keys \blacktriangle , \checkmark on the remote control: via the provided wireless stick or via a network cable (LAN cable) (with network cable, continue with step 2).

Note

If you do not want to connect the Digital HD-Video-Recorder to the internet at

the moment, use the arrow button \mathbf{v} and $| \circ \mathbf{k} |$ on your remote control to select Proceed to step 4: Select Energy Save Mode.

1. If you want to connect via the WLAN-Stick, make sure that the WLAN-Stick is plugged into the USB port for WLAN-Stick under the network connector (RJ45) on the back of the Digital HD-Video-Recorder and that the WLAN key is at hand. The wireless key is a string in the form of a password that protects access to your wireless internet access from unauthorized third parties. The wireless key is usually found in the documentation of your wireless router, the wireless access point to the internet. It is strongly discouraged to operate a wireless internet access in Germany without

() Kabel Deutschlar

connection anytime nenu "Settings".

d information on data acy via "Opt".

Connect the receiver to the Internet lease connect the Digital Receiver to the Internet to use the Video-on-Demand service Select Video* manage your recordings via the Program Manager on

ed to step 4: Select Energy Save Mode

protection by a wireless key for reasons of data protection, data security and for legal liability.

Now select the yellow highlighted line Via the Kabel

Deutschland wireless LAN stick by pressing | or | on your

remote to establish an encrypted connection between WLAN-Stick and wireless router using a WLAN key.

You have additionally the option of selecting **Continue with WPS** using the arrow key **▼** on your remote control. WPS stands for Wi-Fi Protected Setup and is another technology for establishing wireless connections, but with lower level safety.

If wireless networks are in range, they are now displayed. Choose with the keys \blacktriangle , \checkmark on the remote control, with which wireless network to connect the Digital HD-Video-Recorder. When the name of the

network is highlighted in yellow, select this network pressing or on your remote.

Now, an on-screen keyboard is displayed to type the WLAN key. The wireless key is usually between 8 and 63 characters long and can consist of numbers, letters and special characters. Usually you have to to distinguish between lowercase and uppercase letters. To enter the WLAN key, move the yellow highlight using the four keys ▲, ▼, ◀, ▶ on your remote control to the first character of the Wi-Fi key,

and then press $|o\kappa|$ on your remote control. The character appears in the input line on the screen keyboard. Enter all characters of the wireless key. Use the ABC field in the screen keyboard and press

on your remote to set the lowercase letters shown in the screen keyboard to uppercase if ОК

necessary. Use the field **!&?** in the on-screen keyboard and press on your remote to display the special characters available. If the key is entered completely and correctly, finish the input via the field **Input ready** on the on-screen keyboard and press or your remote control. Now, the Digital HD-Video-Recorder checks the network and internet connection.

If the Digital HD-Video-Recorder is connected to the internet, the message **The internet connection has been set up** appears. In addition, the LED light flashes on the wireless stick.

 If you choose to connect via a network cable (LAN cable), check if the network cable is connected to the Digital HD-Video-Recorder and to the router as shown in chapter 2.3.2, Internet connection via

network cable. Press \checkmark and $\bigcirc \ltimes \bigcirc$ on your remote control to select **Via a LAN cable**. The device will automatically establish an internet connection.

If the internet connection is lost, it can be established later pressing <u>Menü</u> on your remote control and selecting **Settings** (see chapter 7.2.5, **Internet**).

3.3.4 Step 4: Select energy mode

In the fourth step you decide whether your Digital HD-Video-Recorder consumes less energy overall but starts slowly, or if you wish a rapid operation of the Digital HD-Video-Recorder but want to take into account a higher overall energy consumption of the device. Select one of the modes: **Active**, **Quick Start** and **Keep Standard**.

The default is the **Standard** mode, it causes the lowest power consumption and a longer start-up phase.

The **Active** mode has the highest power consumption and keeps the equipment ready at any time.

The Quick Start mode allows you to choose the times at which the device remains in Active mode and

when it falls into the Standard mode. Use the keys \blacktriangle , \checkmark and press \bigcirc on your remote control to select one of the specified modes.

If you have selected the **Quick Start** mode, enter the start time, for example 1 7 0 0 for 17:00 hrs (=5 p.m.), using the number buttons on your remote control.

Use the arrow button v and press or on your remote control, to select for how many hours the Digital

HD-Video-Recorder mode shall remain active. Use the arrow button \checkmark and press $\bigcirc \ltimes$ on your remote control to choose on which days this mode should be active, for example, **Daily** or only on **Mondays**, **Wednesdays** and **Sundays**.

Save your settings pressing [Zurück] on your remote.

The message **The Energy Mode has been selected** appears on the TV screen, confirm it pressing or your remote.

You may press <u>Menü</u> on your remote control and **Settings** at any time to change the power mode later (see chapter 7.2.4, **Energy settings**).

3.3.5 Step 5: Summary

After choosing the power saving mode in step 5, you receive a summary of the successful installation. Now you will see a list of the settings you have made during the installation.

Now press $\bigcirc K$ on your remote to confirm the yellow marked field **Watch TV** and go to the TV program.

Installation Step 5: Summary		() Kabel Deutschland
The installation was succe You have set up: - List of your favorite channels:	essful. _{Yes}

4 Basic functions

4.1 Selecting a TV channel

4.1.1 Using P+/P- or 0-9

To change channels press the **P+** or **P-** button on the remote control or enter the channel number directly using the numeric keys on the remote control. You can also switch to the last viewed channel using the button $\boxed{zurück}$.

4.1.2 Program information bar

Each time you change the channel, the program information bar appears on the TV screen. It can also be displayed while watching a program by pressing \bigcirc or using the four keys \blacktriangle , \blacktriangledown , \blacklozenge , \blacklozenge , \blacklozenge .

The program information bar shows you the current program and the program for the coming 2 hours at a glance.

Use the keys \triangleleft and \triangleright to scroll through the information regarding the current program and upcoming programs. You can display the time and the transparency of the information bar pressing \bigcirc on your remote and Settings, System set-up, Picture, OSD Transparency (see chapter 7.2.3.6, OSD Transparency).

Press Recording a program).

4.1.3 Using the channel list

During a program you can display the program information bar by pressing $\bigcirc \mathsf{K}$ on your remote control or using the four keys \blacktriangle , \blacktriangledown , \triangleleft , \blacktriangleright .

Press \blacktriangle or \checkmark to display the channel list.

Press \blacktriangle and \checkmark to scroll through the channel list (I). The program information bar shows the broadcast data for the selected channel (J).

To switch to a channel in the list, mark it with the buttons \blacktriangle or \checkmark , then press $\bigcirc \kappa$.

4.1.3.1 List of favorites

If you have favorite channels you watch frequently, you can add them to your TV favorites list in the program information bar: your favorites are listed first for faster selection (channels 1 to 100 depending on the number of favorites). The main channel list follows, from channel number 101 to 999 depending on the number of channels found in the cable network.

For more information about creating and managing favorites, see chapter 7.5, Favorites.

4.1.3.2 Categories

To allow easy access to channels in a particular category, proceed as follows: press the yellow button on the remote control, select a category using the buttons \blacktriangle or \checkmark and press $\bigcirc \kappa$. The Channel list now shows the first channel in the selected category.

4.1.4 Detailed program information

To view more information about a program, press Info. Depending on availability, a detailed description of the program is displayed.

•
Elefant, Tiger und Co.
Die Doku-Soap berichtet vom Alltag der Zootiere und der Arbeit der Tierpfleger, Kuratoren und Tierärzte im Zoologischen Garten in Leipzig, einem der ältesten Tierparks Deutschlands. Nachrichten/Info, Dokumentation Themen, Natur

Use the keys **P+** or **P-** to scroll through the information pages.

Depending on the mission, you can select different actions within the information page:

Action	Description
Watch	View the program.
Watch in HD	Watch the channel in HD if you have an activation for the selected channel.
Record	Start / stop recording the program.
Channel to favorites	Add the channel broadcasting the program to the Favorites.
Record series	Start recording the program and all future episodes of the series or cancel the recording of the show and all future episodes.

Use the buttons \blacktriangle or \blacktriangledown to select an action and press \bigcirc to confirm.

To close the program information screen and move to the last viewed program, press Info or Exit

4.2 Volume settings

Note

The following settings affect the sound that can be heard on TV, but not on the VCR SCART connector, on the analog AUDIO connector (ANALOG AUDIO L / R) for Hi-fi system and on the DIGITAL AUDIO port.

4.2.1 Volume

Adjust the volume using the volume buttons on your remote control. If you want to increase the volume, press *I*+. If you want to decrease the volume, press *I*-.

4.2.2 Mute

If you want to mute the sound heard on the TV, use the button \checkmark . Pressing \checkmark again turns the sound on again.

4.3 Language settings for audio and subtitles and selection of option channels

To record a specific option channel, select it in the options bar, and start recording by pressing the button $\boxed{\text{Rec}}$. If you switch to another channel while recording, the selection of the option channel will be lost, instead the main channel is recorded.

4.4 Teletext

You can view teletext pages with additional information on television programs, if this service is supplied by the channel.

Press to open the teletext page for the channel you are watching.

To make teletext pages appear transparent so that you can track the current program in the background,

press 📃 again.

To scroll through the teletext pages, either select a page using the number buttons on your remote control or press the **P+** or **P-** button on the remote control.

If the channel provides more screen options and services, select them using the color keys on the remote control.

To change back to the program from the teletext pages press and Exit .

4.5 Time-shifted playback

The Digital HD-Video-Recorder automatically stores the TV or radio program you are watching / listening temporarily (depending on the channel and the program 60 to 120 minutes).

Through this temporary storage you may always pause, rewind and watch / listen again from that point.

To view the time-shifted playback of the current program, press \checkmark or $\square \triangleright$. While you are rewinding, fast forwarding or viewing the playback, the time interval between the recorded and the current broadcast is displayed in the program information bar.

Note

When you switch to another channel the recording of the previously selected program is deleted.

4.5.1 Pause / Time shift playback

Stop the playback of a program without missing anything by pressing	[Ⅱ►]]. To continue t	he current
program from the point of interruption, press 🔲 🕨 again.			

4.5.2 Rewind

Return to an earlier point in the program of the selected channel by pressing	•	. The distance between
---	---	------------------------

the current and deferred radiation increases. By repeatedly pressing \checkmark the rewind speed increases up to 30 times the normal speed.

You may rewind up to 2 hours if you have switched to that channel at least 2 hours before and have not changed the channel in between.

4.5.3 Fast Forward

While you view a time-shift playback, you may fast forward by pressing \blacktriangleright . The distance between the current and deferred radiation decreases. By repeatedly pressing \blacktriangleright the forward speed increases to up to 30 times the normal speed. If you continue fast-forwarding, you will eventually get back to the current program.

4.5.4 Leaving / stopping time-shift playback

4.6 Listen to radio

The radio mode offers the same features as the TV mode.

Press TV/Radio on your remote to switch between TV mode and radio mode. On the TV screen the selected channel and the current program are displayed.

If you press ok or one of the keys \blacktriangle , \blacktriangledown , \blacklozenge , \blacklozenge , \blacklozenge on the remote, the channel information is displayed as in TV mode.

Α	Day of broadcast	Е	Current and next program
В	Channel number and name	F	Channel category
С	Title, start time and end time of the broadcast	G	Choose category
D	Elapsed time	Η	Show options for this programn

4.6.1 Selecting a radio channel

Press **P+** or **P-** on the remote control to change channels or enter a channel number using the numeric keys on the remote.

Use the keys \triangleleft , \triangleright to scroll through information regarding current and upcoming program.

Press \blacktriangle or \checkmark to display the radio channel list. As in TV mode, you may create a list of favorites among the radio channels (see chapter 7.5, **Favorites**).

4.6.2 Categories and other options in radio mode

Each time you change the radio channel the program information bar appears. If you press the yellow button on your remote now, you can quickly reach the first channel of a particular category, for example **News** where categories are available for the program.

Press [Info] to display detailed information about a program.

Press Opt to see more options, if available for the current radio program.

5 Recording a program

Your digital Digital HD-Video-Recorder has a hard disk on which you can store programs to view them at a time of your choice. Recording programs work similar to a video recorder.

You can simultaneously:

Note

- · record 3 programs and watch another program or
- record 4 shows and watch one of them or
- watch a program in time-shift mode and record 3 other programs or
- view a recorded program and record up to 4 additional programs.

5.1 Record current programs

To record a broadcast (TV or radio), press [Rec]. You can press [Rec] at any time: while watching a TV program or after selecting a program in the program information bar (see chapter 4.1.2), in the EPG (see chapter 6.1), or in the search results (see chapter 6.2).

📢 Today	▶ 17:30	18:00 18:30	19:00
Eurosport	Information u	Information unavailable	
	16:00-18:00 Info	rmation unavailable	
	All channels	📃 Categories	Opt Options

- In the program information bar and in the program preview a program that you are currently recording or have prepared for recording is marked red. More information can be found in chapter 4.1.2, **Program information bar**.
- The Digital HD-Video-Recorder records a program automatically to the scheduled end of the program announced in the EPG. Does the schedule change, you may miss a part of the program.
- If you watch the program already for a certain time (up to 2 hours) without changing channels, the Digital HD-Video-Recorder automatically records it from the switch-on until you change the channel or turn off the Digital HD-Video-Recorder.
- If the recording of a program overlaps in time with more than three other recordings, you are prompted to resolve the overlap.
- If you record a program using the button [Rec], you can change the channel or put the Digital HD-Video-Recorder into standby mode without affecting the recording.

	To record an option channel, set the main channel, select an option channel
	from the options bar and then start recording by pressing Rec. If you switch to
	another channel while recording, the selection of the option channel will be lost,
\ \	instead the main channel is recorded.

In Live TV mode it is possible to stop the program pressing | **II** ightarrow and rewind it

by pressing (see chapter 4.5, **Time-shifted playback**). If you record the current program, this function is no longer available.

If a program is not approved for minors, the recording will automatically be PIN-protected. You must enter the Parental Control PIN to replay it from the list of recordings (see chapter 5.3, **View and manage your recordings**).

To stop recording a current program, switch to the program you are recording. Select the program from the program information bar (see chapter 4.1.2, **Program information bar**). Then press \square or \square .

Confirm the cancellation pressing $[\circ \kappa]$.

5.2 Preparing recordings

You can prepare upcoming programs for recording. To record a broadcast (TV or radio) press [Rec]. You

can press at any time to prepare a recording: while watching a TV program or after selecting a program in the program information bar (see chapter 4.1.2), in the EPG (see chapter 6.1), or in the search results (see chapter 6.2). You can change or delete prepared recordings from the menu **Recordings** (see chapter 5.3.2, **Editing recordings**).

- In the program information bar and in the program preview a program that you have prepared for recording is marked red. More information can be found in chapter 4.1.2, **Program information bar**.
- The Digital HD-Video-Recorder records a program automatically to the scheduled end of the program announced in the EPG. Does the schedule change you may miss a part of the program.
- If you prepare a program for recording and the program is part of a series, you may be asked if you want to record the episode in question or all the episodes of the series.
- If the recording of a program overlaps in time with more than three other recordings, you are prompted to resolve the overlap.
- If you have prepared a program for the recording, you can change the channel or put the Digital HD-Video-Recorder into standby mode without affecting the recording.

Note

To record an option channel, set the main channel, select an option channel

Menü

If you switch to another channel while recording, the selection of the option

channel will be lost, instead the main channel is recorded.

from the options bar and then start recording by pressing

If a program is not approved for minors, the recording will automatically be PIN-protected. You must enter the Parental Control PIN to replay it from the list of recordings (see chapter 5.3, **View and manage your recordings**).

If you prepare a program for recording, the Digital HD-Video-Recorder automatically checks if time and channel of the program are stored properly so that the recording is properly prepared.

The Digital HD-Video-Recorder usually detects start time and end time of the recording you prepare automatically. If too few or no information is available for the program to be recorded, the Digital HD-Video-Recorder offers to determine the details of the recording manual.

You can also prepare a recording of a channel for a self-selected period manually. Simply press

on your remote and select Settings, Recordings, Recording with the keys \blacktriangle , \checkmark and $\circ \kappa$

Timer All events			O Kabel Deutschland
ZDF HD		7.Nov	
	Please enter th Channel Date Start time End time Repeat	ZDF HD 07/11 10:50 : Once Save	

RCI88

Now you can prepare the recording in detail:

- **1.** Select the channel to be recorded. Press \blacktriangle , \checkmark to select **Channel**. Select the **Channel** from the list
 - using \blacktriangle , \checkmark and press $\circ \kappa$
- 2. Enter the date of the recording. Select **Date** with the keys ▲, ▼. Use the number buttons on your remote to insert the date.
- 3. Enter the start and end time of the recording. Press ▲, ▼ to select **Start time**. The marker automatically jumps to the line **End time**. Use the number buttons on your remote to insert the end time.
- 4. Select whether the recording should take place: once or repeatedly. The marker jumps automatically to

the line **Repeat**. By default **Once** is set. To set an automatic repetition of the recording, press or Now select how often you want the recording to take place:

- Once: once at the set time.
- **Daily**: daily at the set time.
- Mon-Fri only: every week day from Monday to Friday at the set time.
- Weekly: weekly from the date set at the set time.
- To protect the recording against accidental erasure, select Lock using the keys ▲, ▼. Select Yes using the keys ▲, ▼.
- 6. Save your settings by selecting **Save** using the keys \blacktriangle , \checkmark and press $[\circ \kappa]$.

Manually prepared recordings are shown with a clock icon in the list of recordings. Manually prepared repeated recordings are stored in a folder that is named with channel name and time of admission records.

To cancel a prepared recording, press Rec . Choose the recording you want to cancel from the list of

recordings using the keys \blacktriangle , \blacktriangledown . Confirm your selection pressing $\circ k$. Press \blacksquare .

5.3 View and manage your recordings

Press Aufnahmen on your remote to see the list of **Recordings**. Check out details of recordings or folders

by selecting the appropriate line using the keys \blacktriangle , \checkmark and press \bigcirc .

All recordings are displayed in the list **Recordings** with their respective record status. Every recording you have canceled remains in the recorded program list until you delete them or until they are automatically deleted unless you have locked it.

You may see the following status messages:

Status	Description	
Recording The program is being recorded.		
Booked	The recording of the program is prepared.	
Series Booked	eries Booked The recording of the series is prepared.	
Recorded	ed The program was recorded, but not yet viewed.	
Partially RecordedThe program was only partially recorded and is incomplete (beca recording was paused and resumed manually or because a problem during the recording, such as loss of the antenna signal).		
Viewed	The recorded program has been viewed.	
Expires in xx days	The program is automatically deleted from the hard disk of the Digital HD- Video-Recorder after the number of days displayed.	

Status	Description		
Failed	 The recording of the program failed (possible reasons are loss of the antenna signal, not enough hard disk space, Digital HD-Video-Recorder was off the grid, etc.). To learn more details, use the keys ▲, ▼ to navigate to the failed recording and press Info. 		

Using the list **Recordings** you may view prepared and current recordings, edit recordings, delete recordings and check the amount of available hard disk space. You can also create folders to organize your recordings.

In the list **Recordings** folders for recorded series are shown first. Below the recordings prepared manually are shown. Then all other recordings are shown. For each line, the following properties are displayed:

- Folder name (for series) or program name
- Channel or date of recording (for manual recordings)
- Folder type, number of recordings contained (in folders) and status of recording

The following icons are used to quickly identify folder and recordings properties:

lcon	Description	
	The folder contains a series whose future episodes are automatically recorded.	
8	 The folder contains a series whose future episodes are not automatically provided for one of the following reasons: The series has expired and there are no further episodes. You have added a few episodes instead of the entire series. You have canceled the recording of the series. 	
۲	The recording was prepared manually.	
	The folder was created manually.	

RCI88

	The folder or the recordings were locked. Locked recordings are not deleted automatically when the disk management works in automatic mode (see chapter 5.3.2, Editing recordings).
Ĭ	To lock / unlock an item, select it with the keys \blacktriangle , \blacktriangledown , press Info and then choose an action.

To exit the list, press Exit

5.3.1 Viewing recorded programs

- Press Aufnahmen on your remote to see the list **Recordings**. Check out details of recordings or folders by selecting the appropriate line using the keys ▲, ▼ and press or .
- 2. Use the keys \blacktriangle , \checkmark to select the recording you want to view, then press $\blacksquare \triangleright$ to play it.

Note

If the recorded program is subject to the protection of minors, enter the Parental Control PIN to view it (see chapter 7.3, **Protection of minors**).

- 3. In Play mode:
 - Press >> on your remote to fast forward, press
 to rewind and
 i) for pausing and restarting playback.
 - Press Opt to set language for audio and subtitles (if available).
 - Press **I** to stop and return to the list **Recordings**.

To exit the list **Recordings** press Exit

5.3.2 Editing recordings

You can edit recordings of individual programs or series.

- **1.** Use \blacktriangle and \blacktriangledown to select the recording you want to edit.
- 2. Press Info
- 3. Select one of the displayed options: Play, Delete, Lock record or Organise and press or

5.3.2.1 Organize recordings: Creating Folders

You can create folders to make it easier to find your recordings. Please note that you can not create subfolders within folders.

- **1.** Use \blacktriangle and \blacktriangledown to select a recording you want to edit. Press \bigcirc
- 2. Press Info
- 3. Select Organise and press
- 4. Select Create Folder and press OK

5. Enter a folder name in the on-screen keyboard using the keys ▲, ▼, ◀, ▶ on your remote. Select the characters to be entered with the keys ▲, ▼, ◀, ▶ and press or. Numbers can also be entered using the numeric keypad on the remote control. You can correct the name of the folder using the key Delete on the on-screen keyboard.

5.3.2.5 Restricting access to recordings and folders

You can protect recordings and folders with a PIN and thus restric access to these recordings or folders. If you want to open a folder or play a recording with Child Lock, the Digital HD-Video-Recorder asks for a PIN code.

- **1.** Use \blacktriangle and \blacktriangledown to select a recording you want to edit. Press
- 2. Select Organise and press
- 3. Select PIN protect or PIN protect folder and press or
- 4. A window appears. Enter your Parental Control PIN.

Please note that you can restrict access to all recordings and folders using **Settings**, **Parental Control**, **PIN for recordings** (see chapter 7.3, **Protection of minors**).

Note

You received the default four-digit PIN number with your smartcard. You can change the default PIN number at any time, see chapter 7.3, **Protection of minors**.

5.3.2.6 Arranging recordings

- 1. Press Aufnahmen on your remote to see the list of recordings. To delete all recordings and folders, press Opt .
- 2. Select the order you prefer. Select Sort A-Z or Sort by duration or Sort by genre using the keys ▲, ▼ and press or .

5.3.2.7 Deleting recordings and folders

- **1.** Use \blacktriangle and \blacktriangledown to select a recording you want to edit. Press $\circ \kappa$
- Use ▲ and ▼ to select Delete or Delete Episodes (appears only if you have selected a series of folder for deletion). Press OK.
- If you selected a single recording or a self-created folder for deletion, a warning message prompts you to confirm the deletion again with the button OK.
- If you selected a series folder for deletion, after selecting Delete you will be prompted to select Delete viewed episodes or Delete folders. Use ▲ and ▼ to select the appropriate option and press or.

5.3.2.8 Deleting all recordings and folders

- 1. Press Aufnahmen on your remote to see the list of recordings. To delete all recordings and folders, press Opt .
- 2. Select Delete all recordings and press [or].
- **3.** A warning message prompts you to confirm the deletion again with **Yes** or abort it with **No**. Select an option and press or .

Note

Please note that locked recordings or folders can not be deleted. The lock must be removed first (see chapter 5.3.2.4, **Locking / Unlocking recordings**).

6 Electronic program guide (EPG), search function and Select Video (video library)

If you are looking for programs that interest you, press ______ on your remote. Now you see the following options:

- **Program Guide**: The electronic program guide (EPG) provides an overview of current and upcoming programs.
- Search: Searches current and upcoming programs by genre and titles that you enter.
- Select Video: Access to the online video Select Video to download a film or broadcast on your Digital HD-Video-Recorder.

6.1 Electronic Program Guide (EPG)

The digital program guide, also known as EPG, offers a preview for most TV and radio channels. You can record programs directly from the EPG (see chapter 5, **Recording a program**). The EPG previews up to 14 days, depending on the channel.

Press Programm on your remote control to open the EPG. Or press Menü and select Program

Guide using the key \checkmark and press $\left[\circ \kappa \right]$ on your remote control.

You can choose to view the digital program guide for the TV or the radio program. To switch between TV and radio press TV/Radio on your remote.

Α	You receive an information on the specific day that is displayed.	С	The period in which the programs are broadcasted. The current period is highlighted with a fine yellow timeline.
В	You receive an information on the specific channels that are displayed. If you select a channel, it is highlighted in yellow, the other channels are gray.	D	Here you can see the broadcasts of the respective channel (list on the left) for the relevant period (time axis above).

For better orientation, the EPG marks the current time with a yellow timeline.

How to use the EPG:

- To select a program or a channel on the current page of the digital program guide press the keys ▲, ▼,
 ◀, ▶ on your remote. Looking for a specific channel and knowing the number of the channel in your favorites? Then you can also enter this number directly using the number buttons on your remote control.
- To browse the EPG, press P+ (one page forward) and P- (one page back) on your remote control.
- To move to the next day, press ▶ . To move to the previous day, press ◀ .
- To view details such as content or performer of a program, select the title of the program with one of the keys ▲, ▼, ◀, ▶ on your remote. As soon as the title of the program appears in yellow, press
- Do you want to leave the digital program guide and watch the program that you selected using the keys ▲, ▼, ◀, ▶ on your remote? Press or.
- Do you want to see programs shown in prime time on the same day from 8 pm? Press Opt
- Do you want a preview exclusively for a particular channel category (e.g. sports)? Simply press the yellow button on your remote control. Select a category using the keys ▲, ▼ on your remote and press or .
- To record a current program or prepare a recording of a program, select it by pressing the keys ▲, ▼,
 - \triangleleft , \blacktriangleright and press \square once the program is highlighted in yellow. For more information on this feature, see chapter 5, **Recording a program**.

To exit the EPG press Programm or Exit on your remote.

6.2 Search

1 🔎

With the search function you can search for any keyword. For example actors, movie titles or different keywords but also by categories such as movies, series, entertainment, etc.

An internet connection is required for using all features within the search function. The results do not only include television broadcasts from the EPG and your recordings, but also the movies of online video library Select Video, if available in your region.

Press Suche on your remote to begin the search.

You can also press M_{enu} on your remote control and then use the four keys \blacktriangle , \blacktriangledown , \blacklozenge , \blacklozenge , to select **Search**.

You are automatically in the keyword search.

6.2.1 Search by keyword

Enter a keyword on the on-screen keyboard:

Select the characters using the four keys ▲, ▼, ◀, ▶ and press or for each character you want to select.

Note

You may enter numbers using the on-screen keyboard as well as using the number buttons on your remote control.

After entering the third letter, the search will start automatically and search results that contain the letters you type.

The list on the right contains results that include your keyword. In the list you find results from the current television program, from your recordings, from the film supply of Select Video and the internet.

By pressing \blacktriangleright on your remote you can now switch to the right window into search results. If you want detailed information about this result, use the keys \blacktriangle , \checkmark to select the search result and press $\bigcirc \kappa$. If you selected a movie title with the arrow keys press $\bigcirc \kappa$. The time of the broadcast is displayed now. If your keyword is an actor name, films with this actor will now display, including broadcast date and channel.

To select a TV program or a rental video from the list press [or] and follow the instructions on the screen

navigating with the four keys \blacktriangle , \blacktriangledown , \blacklozenge , \blacklozenge and confirming with \bowtie

Possibly the list of results has multiple pages. If necessary, move to the next page using \blacktriangle and return to the last page pressing \blacktriangledown .

If you are in the keyword list, you may wish to refine your search. To do this, press ▶ to proceed to the search filters. The filters **Search for keyword**, **Search for title only**, **Search for person only** refine your search. In this case, the search only displays results according to the chosen filter. Use ◀ to move from the list of filters back to the refined search results.

6.2.2 Search by category

In addition, you also have the opportunitiy to search by category such as programs in a particular category (eg, movie or sport).

- **1.** Select **Category** using \blacktriangleleft , \blacktriangleright and press $\circ \lor$ or \blacktriangledown .
- **2.** Select a category from the list using $\mathbf{\nabla}$, $\mathbf{\Delta}$ and press $\mathbf{\nabla}$, $\mathbf{\nabla}$ or \mathbf{D} .
- 3. For some categories more input is needed. E.g. if you select **Spielfilm** as category, another list is displayed in which a subset should be selected, such as **Action**, **Comedy**, **Krimi** etc. Select a subcategory from the list with the ▼, ▲ keys and press or .
- 4. If you want to refine your search, press ► to proceed to the search filters. Filters like Show all, Show TV only, Aufnahmen etc. refine your search. In this case only results according to the chosen filter are

displayed. Select a filter from the list with the \mathbf{v} , \mathbf{A} keys and press or

Note

6.2.3 Search results

In the list of search results all matching programs are displayed with date, time and channel.

Keyword > "Die Simpsons"		Fri 20. Feb	12:30
Search results in TV program (68), recor	dings (11) and Select Video (
(21/5), Der Teufel trägt Nada	Sun, 22.02. 18:10		
(21/6), L wie Loser	Sun, 22.02. 18:40		
(21/7), Die Hexen von Springfield	Mon, 23.02. 18:10		
(21/8), Lebe lieber unbebrudert	Mon, 23.02. 18:40		
(25/18), Vorwärts in die Zukunft	Mon, 23.02. 20:15		
(22/18), Die große Simpsina	Mon, 23.02. 20:45

(21/10), Es war einmal in Springfield	Tue, 24.02. 18:40		
(21/11), Million Dollar Homie	Wed, 25.02, 18:10		

How to use the search results:

- Browse the list of results using \blacktriangle , \blacktriangledown on your remote.
- To browse several pages of a results list press P+ (one page forward) and P- (one page back) on your remote.
- To display details like content or actors select the title of the program using the keys ▲, ▼, ◀, ▶. Is the title marked yellow, press or.
- To record a current program or prepare a recording, select it using ▲, ▼, ◀, ▶ and press as soon as the title is marked yellow.

For more information on this feature, see chapter 5, **Recording a program**.

To leave the search press Suche or Exit on your remote.

6.2.4 Local Search

If you have not established an internet connection	on you can	use the local search. Press	Suche	on your
remote to start the search. You can also press	Menü	on your remote control and	then use	the four
keys \blacktriangle , \blacktriangledown , \blacklozenge , \blacklozenge to select Search .				

6.2.4.1 Title/Actor

You can search for a program by entering the title or the actor name.

- On the Enter keyword tab, select at least three characters by using the four keys ▲, ▼, ◀, ▶ and the OK button on the virtual keyboard.
- Select the List entry on-screen to move to the list of keywords matching to the entered title/actor. If there are no titles or actors listed, the list is disabled.

6.2.4.2 Categories

You can search for a program by category.

- Select Category and press OK or ▶ button.
- For some categories more input is needed. E.g. if you select Spielfilm as category, another list is displayed in which a subset should be selected, such as Action, Comedy, Krimi etc.

• Press $\left[\circ \kappa \right]$ to view search results.

6.3 Select Video (online video library)

Select Video is a video-on-demand service (VoD). It offers videos on demand through the internet and in high diversity. You order and play rental videos via your Digital HD-Video-Recorder, if it is connected to the internet.

6.3.1 Access to Select Video

Select Video is only available if the service is available in your region and you are entitled to. In addition, you have to connect the Digital HD-Video-Recorder to the internet via your router in order to use all features of Select Video (see chapter 7.2.5, **Internet**).

6.3.2 Selection of videos

Press Select Video on your remote to enter the online video store. Alternatively press Menü, select Select Video using the key ▼ and press or on your remote.

You will see a list of several categories such as Highlights, Specials, TV auf Abruf etc. Use the keys A,

▼ to select a category and press or

You will now see the available films or programs in this category. Use the arrow keys to select a movie or
a show. Select a film or a program using \blacktriangleleft , \blacktriangleright . If the item is marked yellow, press \frown . Follow the
instructions on the screen. Navigate using \blacktriangle , \blacktriangledown , \blacklozenge , \blacklozenge and confirm your selection with \frown .

7 Settings []]

Press Menū on your remote. Select Settings using the keys \blacktriangle , \blacktriangledown . Press $\circ \kappa$. Select one of the following options using the keys \blacktriangle , \blacktriangledown :

- 1. System update
- 2. System set-up
- 3. Parental control
- 4. Recordings
- 5. Favorites
- 6. Service
- 7. System check

7.1 System update

Using the settings in **System update** you can configure the software update feature, search for channels, add or remove channels, and reset the Digital HD-Video-Recorder to factory default.

Press	Menü	on your remote.	Use the keys	▲ , ▼ to	select Settings.	. Press Ок	. Select System
		, keys ⊾, ▼:					,

To return to the previous screen and save your changes, press Zurück or **4**.

To exit the menu screen, press Menü or Exit

7.1.1 Software update

You can choose two types of software updates, the two available options are **Automatic** and **Manual**. **Manual** is the default.

If **Automatic** is selected, the Digital HD-Video-Recorder automatically updates its operating software at intervals when it is in standby mode. If **Manual** is selected, you will be prompted to perform the upgrade immediately when a software update is available, or wait until the Digital HD-Video-Recorder is in standby mode or otherwise to refuse.

To change this setting:

1. Press Menü on your remote. Use the keys \blacktriangle , \checkmark to

select Settings. Press ок.

- Use the keys ▲, ▼ to select System update. Press or ▶.
- Use the keys ▲, ▼ to select Software update mode.
 Press or ►.
- 4. Use the keys \blacktriangle , \checkmark to select how the software should be updated: Automatic or Manual.
- **5.** Press $[\circ \kappa]$ to confirm the new setting.

More information on software updates can be found in see chapter 8, Software update.

7.1.2 Search for updated software

You can search for new operating software for your Digital HD-Video-Recorder at any time. This feature is especially useful if you have previously rejected an update that you want to catch up now.

7.1.3 Channel search

Per default the Digital HD-Video-Recorder automatically checks at intervals if new channels are available, and stores them when it is in standby mode.

You can choose two types of channel search, the two available options are **Automatic** and **Manual**. **Automatic** is the default.

If **Automatic** is selected, the Digital HD-Video-Recorder automatically updates its channels list at intervals when it is in standby mode. As soon as an update of the channel list is available you will be prompted to perform the update immediately, to wait until the Digital HD-Video-Recorder is in standby mode or otherwise to refuse, if **Manual** is selected.

To change the setting:

- Press Menü on your remote. Use the keys ▲, ▼ to select Settings. Press or .
- Use the keys ▲, ▼ to select System update. Press or ▶.
- Use the keys ▲, ▼ to select Channel scan Mode.
 Press OK or ►.
- 4. Use the keys \blacktriangle , \checkmark to select, how the channel list should be updated: Automatic or Manual.
- **5.** Press $\circ \kappa$ to confirm the new setting.

7.1.4 Delete additional channels

Use this feature to delete unwanted channels after performing a manual search (described in chapter 7.1.5, **Search additional channels**).

- Press Menü on your remote. Use the keys ▲, ▼ to select Settings. Press ok.
- Use the keys ▲, ▼ to select System update. Press or ▶.
- Use the keys ▲, ▼ to select Delete additional channels.
 Press or ►.

 Press or ▶.
- Determine the output resolution of your HD TV. Use the keys ▲, ▼ to select 576p, 576i, 720p or 1080i. If you use a standard TV, leave the setting to 720p.
- **3.** Press $\bigcirc \circ \lor$ to confirm.
- The Digital HD-Video-Recorder will temporarily switch to the selected resolution. If you do not want to save this

setting, use the keys \blacktriangle , \checkmark to select **No**, press $\bigcirc \mathsf{K}$ and select a different setting. If you want to save

this setting, use the keys \blacktriangle , \blacktriangledown to select **Yes**.

5. Press OK to confirm.

7.2.3.5 Display options for program information bar

Using this setting you can select how long the program information bar should be displayed on the TV screen (for more information see chapter 4.1.2, **Program information bar**).

- **1.** Use the keys \blacktriangle , \blacktriangledown to select **Banner timeout**. Press $\circ \kappa$
 - or 🕨.
- **2.** Use the keys \blacktriangle , \checkmark to select **5 sec** or **10 sec**.
- **3.** Press \circ to confirm.

7.2.3.6 OSD Transparency

Using this setting you can select how transparent menus and messages in the so-called On-Screen Display (OSD) on the TV screen will be displayed.

1. Use the keys \blacktriangle , \blacktriangledown to select **OSD transparency**. Press

ок ог **⊳**.

- Use the keys ▲, ▼ to select None to disable OSD transparency. Use the keys ▲, ▼ to select 10%, 30% or 50%, if you want to soften the image in the background to the respective percentage.
- **3.** Press $\circ \kappa$ to confirm.

7.2.3.7 Startup channel

Select **On**, if the Digital HD-Video-Recorder should always show the Kabel Deutschland channel on startup. Select **Off**, if the Digital HD-Video-Recorder should always show the last viewed channel on startup.

- Use the keys ▲, ▼ to select Start channel. Press or ▶.
- Use the keys ▲, ▼ to select Off, if the Digital HD-Video-Recorder should always show the last viewed channel on startup. Use the keys ▲, ▼ to select On, if the Digital HD-Video-Recorder should always show the Kabel Deutschland channel on startup.
- **3.** Press $\left[\circ \kappa \right]$ to confirm.

Settings System set-up	> Picture > Start channel		Kabel Deutschland
System set-up 1. Language			
2. Audio 3. Picture	Picture 1. TV SCART		
4. Energy settings 5. Internet	2. VCR SCART 3. SCART-switching		
6. Remote Control App	4. HDMI screen resolution 5. Banner timeout	Start channel	
	6. OSD transparency 7. Start channel	1. On 2. Off	

7.2.4 Energy settings

In this menu you decide whether your Digital HD-Video-Recorder consumes less energy overall, but starts slowly, or if you wish a rapid operation of the Digital HD-Video-Recorder, but want to take into account a higher overall energy consumption of the device. Select one of the modes: **Standard**, **Energy Save Mode**, **Quick Start** and **Active**. The default is the **Standard** mode, it causes the lowest power consumption and a longer start-up phase.

To change this setting:

1.	Press Menü on your remote. Use	e the keys \blacktriangle , \blacktriangledown to	Settings System set-up	> Energy settings		Kabel Deutschland
	select Settings . Press ок.		1 bystem apaate	system set-up		
2.	Use the keys \blacktriangle , \checkmark to select System or \triangleright .	set-up. Press ок	3. Parental control 2 4. Recordings 3 5. Favorites 6. Service 5	2. Audio 3. Picture 4. Energy settings 5. Internet 5. Remote Control App	Energy settings 1. Standard 2. Energy Save Mode 3. Quick Start	
3.	Use the keys \blacktriangle , \blacktriangledown to select Energy s	ettings. Press or		l	4. Active	

- or 🕨.
- 4. Use the keys ▲, ▼ to select Standard, Energy Save Mode, Quick Start or Active. Press or Active. A description of the different modes is displayed.

Standard: This mode helps you minimize your energy consumption. For this reason your Digital HD-Video-Recorder takes longer to start and switches off automatically if the remote control is not used. The duration until automatic switch-off can be determined.

- **1.** Use the keys \blacktriangle , \checkmark to select **Standard**.
- **2.** Press or two times.
- 3. Use the keys \blacktriangle , \checkmark to select the time in hours, until the device turns off automatically and press $[\infty]$
- **4.** Use the key $\mathbf{\nabla}$ to select **Confirm** and press $[\circ\kappa]$.

Energy Save Mode: In the Energy Save Mode your Digital HD-Video-Recorder consumes little energy on standby. In contrast to the standard mode the Digital HD-Video-Recorder does not switch off automatically.

- **1.** Use the keys \blacktriangle , \checkmark to select **Energy Save Mode**.
- **2.** Press or two times.

Quick start: In the quick start mode you can set on which days, at what time and for how long your Digital HD-Video-Recorder automatically turns on from standby mode to active mode. The Digital HD-Video-Recorder switches to active mode for the duration you determined.

- **1.** Use the keys \blacktriangle , \checkmark to select **Quick start**.
- **2.** Press [οκ].
- 3. Enter a start time using the number keys of your remote, for example **1 7 0 0** for 17:00 hrs (=5 p.m.).
- **4.** Press $\bigcirc \kappa$ and use the keys \blacktriangle , \checkmark to select, for how many hours the Digital HD-Video-Recorder remains in the **Active** mode. Press $\bigcirc \kappa$.
- 5. Use the keys \blacktriangle , \checkmark to select **Days**. Press $\bigcirc \ltimes$
- 6. Use the keys ▲, ▼ to select the days, on which the device remains in the **Active** mode during the time selected before. Press or for every day you wish to select.
- 7. Press Zurück to save your settings.
- 8. Use the keys \blacktriangle , \checkmark to select **Confirm** and press \bigcirc

Active: In the Active Mode your Digital HD-Video-Recorder is always available and boots within seconds. In this mode the device has the highest power consumption.

- **1.** Use the keys \blacktriangle , \checkmark to select **Active**.
- **2.** Press $\left[\circ \kappa \right]$ two times.

7.2.5 Internet

With an internet connection additional offers from Kabel Deutschland are available. To use them, you need to connect your Digital HD-Video-Recorder to the internet, either through the wireless stick or via a network cable (LAN cable).

Note

Make sure that you have either the wireless stick connected via a USB port OR a LAN cable to the network port on the Digital HD-Video-Recorder (see chapter 2.2, **Connection to TV**).

To set up an internet connection:

7.2.5.1 Setting up a wireless internet connection (Wi-fi)

	Note
	If the network does not appear in the list, you must configure it manually (see section Setting up a wireless internet connection (Wi-fi) manually , page 55).
1.	Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select Settings . Press $\bigcirc \kappa$.
2.	Use the keys \blacktriangle , \blacktriangledown to select System set-up . Press $\bigcirc K$ or \blacktriangleright .
3.	Use the keys \blacktriangle , \blacktriangledown to select Internet . Press $\bigcirc \ltimes$ or \blacktriangleright .
4.	Use the keys \blacktriangle , \blacktriangledown to select Internet set-up . Press $\bigcirc \kappa$.
5.	Use the keys ▲, ▼ to select Via the Kabel Deutschland wireless LAN-Stick or Via a LAI
	Press or .

Using the Kabel Deutschland WLAN-Stick

- **1.** Use the keys \blacktriangle , \checkmark to select Via the Kabel Deutschland wireless LAN-Stick. Press $\circ \kappa$
- 2. Use the keys \blacktriangle , \checkmark to select Continue with security key for wireless LAN or Continue with WPS.

Note

The wireless key is a string in the form of a password that protects access to your wireless internet access from unauthorized third parties. The wireless key is usually found in the documentation of your wireless router, the wireless access point to the internet. It is strongly discouraged to operate a wireless internet access in Germany without protection by a wireless key for reasons of data protection, data security and for legal liability.

You have additionally the option of selecting WPS. WPS stands for Wi-Fi Protected Setup and is another technology for establishing wireless connections, but with lower level safety.

Continue with wireless key

- **1.** Use the keys \blacktriangle , \checkmark to select **Continue with security key for wireless LAN**. Press \bigcirc
- 2. The device now searches for available wireless networks. Use the keys \blacktriangle , \checkmark to select the wireless

network you would like to connect to. Press $\circ \kappa$.

3. Enter your wireless key.

Now an on-screen keyboard is displayed to type the WLAN key. The wireless key is usually between 8 and 63 characters long and can consist of numbers, letters and special characters. Usually you have to distinguish between lowercase and uppercase letters. To enter the WLAN key, move the yellow highlight using the four keys \blacktriangle , \checkmark , \blacklozenge , \blacktriangleright on your remote control to the first character of the
Wi-Fi key, and then press or your remote control. The character appears in the input line on the
screen keyboard. Enter all characters of the wireless key. Use the ABC field in the screen keyboard
and press $\fbox{\sc ok}$ on your remote to set the lowercase letters shown in the screen keyboard to
uppercase if necessary. Use the field !&? in the on-screen keyboard and press or on your remote to
display the special characters available. If the key is entered completely and correctly, finish the input
via the field Input ready on the on-screen keyboard and press or on your remote control.

4. Now, the Digital HD-Video-Recorder checks the network and internet connection. If the Digital HD-Video-Recorder is connected to the internet, the message **The internet connection has been set up** appears. In addition, the LED light flashes on the wireless stick in the color orange.

Continue with WPS

- **1.** Use the keys \blacktriangle , \checkmark to select **Continue with WPS**. Press \bigcirc
- 2. The device detects the internet connection and sets it up automatically. Press $[\propto]$

Note

For a WPS connection your router has to be prepared. The settings for a WPS connection have to be made in the software menu of your router. In addition, some routers ask for WPS activation on the router device itself.

Setting up a wireless internet connection (Wi-fi) manually

Use the manual configuration if your wireless network (Wi-fi) is not visible for security reasons, but allows devices to detect and register. To perform the manual configuration, keep the following information about the network ready: SSID network name, wireless security type and wireless key.

- **1.** Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \bigcirc
- **2.** Use the keys \blacktriangle , \checkmark to select **System set-up**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Internet**. Press $[\circ \kappa]$ or \triangleright .
- 4. Use the keys \blacktriangle , \checkmark to select **Internet set-up**. Press \bigcirc or
- 5. Use the keys \blacktriangle , \checkmark to select Via the Kabel Deutschland wireless LAN-Stick. Press \frown
- 6. The screen for the network selection is displayed. Press Opt to configure a wireless network (Wifi) that is not visible for security reasons.
- 7. Use the keys \blacktriangle , \checkmark to select **SSID**. Press \bigcirc .
- 8. Enter the name of the wireless network (also called SSID) on the on-screen keyboard. To enter the SSID, move the yellow highlight using the four keys ▲, ▼, ◀, ▶ on your remote control to the first character of the SSID, and then press or your remote control. The character appears in the input line on the screen keyboard.

Enter all characters of the wireles key. Use the **ABC** field in the screen keyboard and press $\bigcirc \mathsf{K}$ on your remote to set the lowercase letters shown in the screen keyboard to uppercase if necessary. Use the field **!&?** in the on-screen keyboard and press $\bigcirc \mathsf{K}$ on your remote to display the special characters available. If the key is entered completely and correctly, finish the input via the field **Input ready** on the on-screen keyboard and press $\bigcirc \mathsf{K}$ on your remote control.

- 9. Select Security Type. Press or . Select the type of security used on the network (unsecured, WEP, WPA-PSK or WPA2-PSK) using the keys ▲, ▼. Press or .
- 10. Select Security Key. Press or

Now an on-screen keyboard is displayed to type the WLAN key. The wireless key is usually between 8 and 63 characters long and can consist of numbers, letters and special characters. Usually you have to to distinguish between lowercase and uppercase letters.

11. Use the keys \blacktriangle , \checkmark to select **Save**. Press $\circ \kappa$

Setting up an internet connection via network cable (LAN cable)

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- **2.** Use the keys \blacktriangle , \checkmark to select **System set-up**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Internet**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **4.** Use the keys \blacktriangle , \blacktriangledown to select **Internet set-up**. Press \bigcirc
- **5.** Use the keys \blacktriangle , \checkmark to select **Via a LAN-cable**. Press \bigcirc
- 6. The device detects the internet connection and sets it up automatically. Press

7.2.5.2 Show internet connection settings

With this menu you can view the internet settings of the device.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \bowtie .
- **2.** Use the keys \blacktriangle , \checkmark to select **System set-up**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Internet**. Press $\bigcirc \land \lor$ or \triangleright .
- Use the keys ▲, ▼ to select View settings. Now the settings of the internet connections are displayed.

7.2.5.3 Test internet connection

In this menu you can test your internet connection.

- **1.** Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- **2.** Use the keys \blacktriangle , \checkmark to select **System set-up**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Internet**. Press $\circ \kappa$ or \triangleright .
- **4.** Use the keys \blacktriangle , \blacktriangledown to select **Test connection**. Press \bigcirc
- 5. The Digital HD-Video-Recorder tests the connection and displays the result on the TV screen.

7.2.5.4 Disable internet connection

With this menu you can turn off the internet connection.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\bigcirc \land$
- **2.** Use the keys \blacktriangle , \checkmark to select **System set-up**. Press $\bigcirc \land \lor$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Internet**. Press $[\circ \kappa]$ or \blacktriangleright .
- 4. Use the keys ▲, ▼ to select Switch off. Press or A message is displayed: If you switch off now you will lose all functions using the internet connection. Most important examples are Video-on-Demand (if available) and Keyword Search.
- 5. To turn off the connection press OK two times. To leave the connection turned on press Zurück

7.2.5.5 Privacy

In this menu you can view the privacy information.

- **1.** Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \bigcirc
- **2.** Use the keys \blacktriangle , \checkmark to select **System set-up**. Press $\bigcirc \land \lor$ or \triangleright .

- **3.** Use the keys \blacktriangle , \checkmark to select **Internet**. Press $\frown \kappa$ or \triangleright .
- 4. Use the keys \blacktriangle , \checkmark to select **Data privacy**. Press \bigcirc
- 5. The privacy policy is displayed. Use **P+** and **P-** to browse. Press Zurück to leave this menu.

7.3 Protection of minors

With the **Parental control** menu you can change the PIN protection stored on your smartcard.

If you use the online video library Select Video, you can also:

- Change the Adult PIN
- Protect the purchase of Select Video with your Parental Control PIN
- PIN-protect recordings or
- Suppress the display of the confirmation, including the reference to the terms and conditions before ordering paid services

To return to the previous screen and save your changes, press $\begin{bmatrix} Zurück \end{bmatrix}$ or \blacktriangleleft .

To exit the menu screen press Menü or Exit

7.3.1 Change Parental Control PIN

The Parental Control PIN is used to block access to channels, broadcasts and recordings, which are not suitable for minors. If you switch to channels or programs that are subject to the protection of minors or want to play a recording of such channels or programs, the Digital HD-Video-Recorder asks you to enter the Parental Control PIN. The broadcast or recording will be played back after the correct Parental Control PIN has been entered.

Please note if you change the Parental Control PIN:

- The Parental Control PIN is a four digit code.
- You must first enter the current Parental Control PIN before changing.
- The current Parental Control PIN must match the PIN stored on the smartcard.
- The new Parental Control PIN must be different from the current PIN.
- The new Parental Control PIN must be different from the current Adult PIN, both must not be the same.
- The new PIN must not consist of the same four digits.
- If you enter the wrong PIN three times, access is blocked for ten minutes.

To change the Parental Control PIN:

- Press Menü on your remote. Use the keys ▲, ▼ to select Settings. Press oĸ.
 Use the keys ▲, ▼ to select Parental control. Press oκ
- or ▶.
- 3. Use the keys ▲, ▼ to select Change PIN. Press or ▶.
- **4.** Enter the current four-digit Parental Control PIN using the number keys on the remote control.
- 5. Enter the new four-digit Parental Control PIN.

6. Enter the new four-digit Parental Control PIN again, to protect against typos. If the first and second input match, you will receive confirmation that the Parental Control PIN has been changed successfully.

7.3.2 Change Adult PIN

The Adult PIN protects access to videos in the online video library Select Video, which are only suitable for adults. You can only change the Adult PIN if you use Select Video. Please note that the Adult PIN is always sent by mail and you may have to wait a few days until you can change the Adult PIN on your device.

Note

This function can only be used when the online video library Select Video is available at your address and if you are unlocked for the online video library Select Video.

Please note if you change the Adult PIN:

- The Adult PIN is a four digit code.
- You must first enter the current Adult PIN before changing.
- The current Adult PIN must match the Adult PIN stored.
- The new Adult PIN must be different from the current Adult PIN.
- The new Adult PIN must be different from the current Parental Control PIN, both must not be the same.
- The new Adult PIN must not consist of the same four digits.
- If you enter the wrong PIN three times, access is blocked for ten minutes.

1.	Press Menü on your remote. Use the keys \blacktriangle , \checkmark to	Settings Kabel Deutschland Parental control > Change PIN-18
	select Settings . Press or.	Parental control
2.	Use the keys \blacktriangle , \blacktriangledown to select Parental control . Press $\bigcirc K$	1. Change PIN Change PIN-18 2. Change PIN-16 Please insert your smartcard with the gold chip face 3. PIN VOD purchase down, so that your Parental Control PIN can be verified. 4. PIN for recordings down, so that your parental Control PIN can be verified.
	or .	Current Adult/FSK 18 PIN
3.	Use the keys \blacktriangle , \checkmark to select Change PIN-18 . Press or	Confirm new Adult/FSK 19 PIN

- 4. Enter the current four-digit Adult PIN using the number keys on the remote control.
- 5. Enter the new four-digit Adult PIN.
- 6. Enter the new four-digit Adult PIN again, to protect against typos. If the first and second input match, you will receive confirmation that the Adult PIN has been changed successfully.
- 7. Press Zurück to close the menu window.

7.3.3 PIN request when ordering Select Video

With this setting, you can protect the order of paid programs in the online video library Select Video by first entering the Parental Control PIN. If this is selected, the Digital HD-Video-Recorder prompts you to enter the Parental Control PIN as soon as you order a video in the online video library Select Video.

Note

This function can only be used when the online video library Select Video is available at your address and if you are unlocked for the online video library Select Video. To set up PIN protection:

- Press Menü on your remote. Use the keys ▲, ▼ to select Settings. Press OK.
 Use the keys ▲, ▼ to select Parental control. Press OK or ▶.
- **3.** Use the keys \blacktriangle , \blacktriangledown to select **PIN VoD purchase**. Press or \triangleright .
- 4. Use the keys ▲, ▼ to select **On** (PIN protection activated) or **Off** (PIN protection deactivated). If you select **On**, a window opens. Enter the current Parental Control PIN.
- 5. To turn off the Parental Control PIN protection, use the keys ▲, ▼ to select Off. A window opens. Enter the current Parental Control PIN.

7.3.4 PIN-protect recordings

With this setting, you can protect access to your recordings with the Parental Control PIN.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- 2. Use the keys \blacktriangle , \checkmark to select **Parental control**. Press $\circ \kappa$ or \blacktriangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **PIN VoD recordings**. Press \bigcirc or \blacktriangleright .
- 4. Use the keys ▲, ▼ to select **On** (PIN protection activated) or **Off** (PIN protection deactivated). If you select **On**, a window opens. Enter the current Parental Control PIN.
- 5. To turn off the Parental Control PIN protection, use the keys ▲, ▼ to select Off. A window opens. Enter the current Parental Control PIN.

7.4 Recording settings

The menu **Recordings** lets you prepare recordings manually, manage the Digital HD-Video-Recorder hard disk and set general recording settings.

To return to the previous screen and to save your changes, press Zurück or **4**.

To exit the menu screen, press Menü

7.4.1 Manual Recordings

This menu lets you program manually.

1. Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \circ

or

Exit

- **3.** Use the keys \blacktriangle , \checkmark to select **Recording**. Press \bigcirc or \triangleright .
- 4. Set recording options.

More information about recording functions can be found in see chapter 5, **Recording a program**.

7.4.2 Disk management

This setting allows you to enable or disable the automatic management of the Digital HD-Video-Recorder hard drive.

You can set two values:

- **Manual:** If the hard disk memory is insufficient for new recordings, you will be prompted to add memory by deleting existing recordings. You can continue recording programs as soon as disk space is sufficient.
- Automatic: If the hard disk memory is insufficient for new recordings, the Digital HD-Video-Recorder automatically deletes recordings. You can exclude certain recordings by disabling automatic deletion.

By default the Digital HD-Video-Recorder is set to manual disk management.

To configure disk management:

- **1.** Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- **2.** Use the keys \blacktriangle , \checkmark to select **Recordings**. Press $\bigcirc \land \land$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Manage disk**. Press \bigcirc
- 4. Use the keys \blacktriangle , \checkmark to select Manual or Automatic. Press \bigcirc
- **5.** Press $[\circ \kappa]$ to confirm the settings.

7.4.3 Delete all

With this setting, you can format and reset the hard disk of the Digital HD-Video-Recorder.

Note

If you format the hard drive, all your recordings and manual settings for recordings are lost. Your other settings and your favorite channels are not affected by this operation.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \frown
- **2.** Use the keys \blacktriangle , \checkmark to select **Recordings**. Press $\bigcirc \land \land \land$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Format disk**. Press $[\circ \kappa]$.
- 4. A warning message is displayed.
 - To cancel, use the keys \blacktriangle , \checkmark to select **No**. Press $\bigcirc \land \bigcirc$ or \bigcirc Zurück \bigcirc .
 - To format the hard disk, use the keys ▲, ▼ to select Yes. Press or Zurück

7.4.4 Recording extensions

In this menu you can set recording time extensions that are automatically added to recordings from the EPG. It allows you to set the Digital HD-Video-Recorder in a way that the recording of a program begins before the announced starting time and ends after the announced end time. You can set the following values:

- Manual: Define recording time extensions yourself.
- Automatic: The device automatically adds recording time extensions.

By default, the Digital HD-Video-Recorder is set to **Automatic** mode.

- 1. Press Menü on your remote. Use the keys ▲, ▼ to select Settings. Press or A

- 3. Use the keys \blacktriangle , \checkmark to select **Guard time**. Press $\circ \kappa$
- Use the keys ▲, ▼ to select Manual or Automatic. Press | or |. If you select Manual, define recording 4. time extensions yourself:

Note

In our example, the Digital HD-Video-Recorder will start recording 1 minute before the start time and end it 14 minutes after the end time of the broadcast. To choose the correct entries:

For Start time enter the number of minutes using the number buttons on your remote control. Possible entries are all two-digit numbers from 00 to 99, e.g. 01.

- For **End time** enter the number of minutes using the number buttons on your remote control. Possible entries are all two-digit numbers from 00 to 99, e.g. 14.
- 5. Press $\circ \kappa$ to confirm the new setting.

7.5 Favorites 7.5.1 Add favorites

You can create two separate lists of favorites: for TV channels and radio channels.

- 1. Press on your remote. Use the keys \blacktriangle , \checkmark to Menü select Settings. Press Use the keys \blacktriangle , \checkmark to select **Favorites**. Press $\circ \kappa$ or \triangleright . 2.
- Use the keys \blacktriangle , \checkmark to select Add. Press $\circ \kappa$ or \triangleright . 3.

Depending on the selected mode (radio or television), the list of TV channels or radio channels is displayed.

- Press TV/Radio to specify which type of favorites list you want to create: TV channels or radio channels. 4.
- 5. Select the channels you want to add as favorites. Use the keys $\mathbf{A}, \mathbf{\nabla}$ to select them. Press $\mathbf{O} \mathbf{K}$ for every channel you want to add. Selected channels are now marked.
- To cancel your selection, press or l. To browse the list, press P+ or P-. 6.
- Press or **4**. A confirmation message is displayed. 7. Zurück
- 8. Press or to save your favorites list.

7.7 System Check

The information in these menus are particularly important in cases when you need to contact your cable operator or any other technical service.

Below you find information about the Digital HD-Video-Recorder and its software, smartcard information, as well as a diagnostic program for the operating parameters of the Digital HD-Video-Recorder.

To return to the previous screen and to save your changes, press Zurück or 4.

To exit the menu screen, press Menü Or Exit

7.7.1 Device Info

This menu contains information on your Digital HD-Video-Recorder.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \mathsf{K}$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Device information**, to look up the information on the device.

7.7.2 Smartcard

This menu contains information on your smartcard. To retrieve and display this information, the smartcard must be inserted into the Digital HD-Video-Recorder.

- 1. Press Menü on your remote. Use the keys ▲, ▼ to select Settings. Press or
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \land$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Smartcard**, to look up the information on the smartcard.

7.7.3 TV Signal

This menu contains information about your cable connection and provides an overview of the signal quality of cable frequencies.

- **1.** Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \bigcirc
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- 3. Use the keys \blacktriangle , \checkmark to select **TV signal**, to look up the information on the TV signal.

The following network information is displayed:

- Last channel scan: Date of the last channel scan.
- **TV/radio channels**: Number of stored TV channels and radio channels.
- **Tuner**: Displays the frequency and the modulation of the current channel for each tuner.
- Signal level: Displays the signal quality for each tuner to the current channel.
- BER: Displays the bit error rate of the current channel.
- Network Info: Name of the cable network.

7.7.4 VOD Signal

With this setting you can check the video-on-demand (VoD) connection.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **VOD signal**, to look up the information on the VOD Signal.

7.7.5 HDMI

This menu contains information about a HD-TV connected to the Digital HD-Video-Recorder via HDMI cable.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$.
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \ltimes$ or \triangleright .
- 3. Use the keys \blacktriangle , \checkmark to select **HDMI**, to look up the information on the HDMI cable.

7.7.6 TV picture

This menu contains information about the current TV screen format and SCART equipment.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \bowtie .
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- 3. Use the keys ▲, ▼ to select **TV picture**, to look up the information about the TV screen format and SCART equipment.

7.7.7 Audio

This menu contains information about the audio settings.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$.
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \triangleright .
- **3.** Use the keys \blacktriangle , \checkmark to select **Audio**, to look up the information about the audio settings.

7.7.8 Network settings

This menu contains information about the internet connection via Wi-fi or network cable.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $[\circ \kappa]$.
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \blacktriangleright .
- 3. Use the keys ▲, ▼ to select LAN/WLAN, to look up the information about the internet and network settings.

7.7.9 Back channel

With this setting, you can check the back channel connection.

- **1.** Press Menu on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press \circ
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \blacktriangleright .
- 3. Use the keys ▲, ▼ to select **Back channel**, to look up the information about the return channel connection.
- **4.** Press $\left[\circ \kappa \right]$ to check the return channel. Now details are displayed.

7.7.10 Test IP Connection

With this setting you can check the speed of your internet connection.

- **1.** Press Menü on your remote. Use the keys \blacktriangle , \checkmark to select **Settings**. Press $\circ \kappa$
- **2.** Use the keys \blacktriangle , \checkmark to select **System check**. Press $\bigcirc \land \bigcirc$ or \blacktriangleright .
- 3. Use the keys ▲, ▼ to select **Test IP connection**, to look up the information about the speed of your internet connection.
- **4.** Press or broke the speed of your internet connection. Now the speed of your internet connection is displayed.

7.8 Settings overview

The following table shows an overview of the **Settings** menu and the default settings of the Digital HD-Video-Recorder:

- Default settings are **bold**.
- Grey cells show that the sub menu prompts for an action, for editing or shows data that can not be changed.
- The asterisk (*) shows that the (sub) menu is only available when the Select Video service is enabled and if this service is available at your home port.

8 Software update

By default, the Digital HD-Video-Recorder automatically checks for new software in the cable network and downloads it when it is in standby mode.

Using the menu **Settings**, **System update**, **Search for new software** you can start an automatic search for new Digital HD-Video-Recorder software at any time (see chapter 7.1.1, **Software update**). If you change the update settings, the Digital HD-Video-Recorder asks if you wish to perform the upgrade immediately, wait for the next switch to standby mode or to reject it.

In manual mode, when a new software update is available an alert is displayed:

- To accept the update, use the keys ▲, ▼ to select Yes (Upgrade now). Press or
 The Digital HD-Video-Recorder starts an update. You can use the Digital HD-Video-Recorder only after successful completion of the update:
 - The progress of the update is displayed in the status screen.

- After the update, the Digital HD-Video-Recorder automatically switches back to the previously viewed program.
- To update in standby mode, use the keys ▲, ▼ to select No (Wait for Standby). Press or lock. The Digital HD-Video-Recorder will update the software next time it switches to standby mode.
- To reject the update, use the keys ▲, ▼ to select No (Do not upgrade at all). Press or . The Digital HD-Video-Recorder will not update the software.

Note

Please note, that you may not be able to use technical developments or additional services, if you reject a software update.

9 Universal remote control

The remote control is a universal model. You can program it to control your TV as well. The supported devices are listed in the Brand Code List.

After programming the remote press \fbox to switch from Digital HD-Video-Recorder mode to TV mode. The LED flashes once in short interval. The LED also flashes after each command is transmitted to the TV.

These are the main controls for the direct control of your television:

- Standby/Wake up
- Volume up / down, mute
- Changing channels, keys P+ and P-
- Four arrow keys ▲, ▼, ◀, ▶,
- Access to the TV menu, key

Press Exit to return to Digital HD-Video-Recorder mode.

9.1 Programming the universal remote control

Refer to the brand code list for the right four-digit code for your TV.

Menü

- **1.** Turn on your TV.
- 2. Press wo times.
- 3. Enter the 4-digit code for your TV or the universal code. Make sure that not more than 10 seconds pass between the entry of each number. After entering the first 3 digits the LED flashes one time in short interval. After the fourth digit the LED flashes 2 times short and then remains lit.
- 4. Press (の) until your TV turns off.
- 5. Release the () key.
- 6. Press for 3 seconds to confirm the code.
- 7. Press TV to use your TV.

If you do not see your TV in the code list, please enter the code "0000" in step 3 and keep 0 pressed until your TV turns off. The remote control now starts a search through all the available codes. This process may take some time.

9.2 Selection of the volume control

When a TV code is programmed into the remote, the remote controls the volume of the TV also in Digital HD-Video-Recorder mode (instead of the Digital HD-Video-Recorder's volume). To change, press $\boxed{\text{Exit}}$ and $\boxed{\cancel{x}}$ at the same time for at least 3 seconds. The LED on your remote flashes 2 times.

To switch back to TV control mode, keep 1 and \swarrow pressed at the same time for at least 3 seconds. The LED on your remote flashes 2 times.

9.3 Reading out the 4-digit code

Using this method, you can read out the 4-digit code stored in the remote to control the TV.

- 1. Press the number key 1 and Info at the same time: The LED on your remote shows the first digit of the code by flashing. E.g., if the first number is 9, the LED flashes 9 times. No flashing means 0 (zero).
- 2. Press the number key 2 and Info at the same time for the second digit of the code.
- **3.** Press the number key 3 and Info at the same time for the third digit of the code.
- **4.** Press the number key 4 and Info at the same time for the fourth digit of the code.

9.4 Reset the universal remote control

- 1. Press Menü, and (b) at the same time for at least 3 seconds. The LED on your remote flashes 2 times.
- 2. All codes stored in the remote will be deleted. After restoring the factory settings on your remote, the LED flashes twice again.

10 Troubleshooting

Problem	Solution
The remote control does not work.	 Press (b) to switch to Digital HD-Video-Recorder mode. Point the remote towards the Digital HD-Video-Recorder. Check the batteries and check that the batteries are inserted correctly.
The Digital HD-Video-Recorder displays a black screen or an error message.	Search for channels (see chapter 7.1.4, Delete additional channels).
The picture is frozen and / or blurred.	• Check all connections, the antenna cable, and search for channels again (see chapter 7.1.6, Start a channel scan).
The Digital HD-Video-Recorder cannot find any channels.	 Check the cable connection. Check the antenna signal (see chapter 2, Connections to the network and connecting additional devices). Search for channels (see chapter 7.1.6, Start a channel scan). Check with your cable company for more information about your home connection.
The TV does not recognize the Digital HD-Video-Recorder if he leaves the standby mode.	 Check if your TV is connected to the TV SCART connector (see chapter 2, Connections to the network and connecting additional devices). Select the SCART input on the TV, if necessary.
At some channels, no audio in Home Cinema mode is displayed.	Check whether the Digital HD-Video-Recorder is connected to a Home Cinema amplifier via optical SPDIF connector (see chapter 2, Connections to the network and connecting additional devices).
Black and white video at VCR output (during VCR / DVD recording).	Check that the mode selected for the VCR SCART output type is compatible with your VCR (see chapter 7.2.3, Picture).
At the end of recording a black screen (no video) is displayed.	 If a recording of a broadcast ends, that transmits no interpretable recording video signal (teletext function, fixed image, moving from unencrypted to encrypted transmission, transmission video placeholders, etc.) the recording is stopped, but the time counter continues to the end of the scheduled recording time.
All other problems.	Reset device to factory default (see chapter 7.1.7, Reset to factory default).

11.Support

This product has been designed with great care to ensure the best possible quality. In the unlikely case you have difficulties with the product and need advice or support, you can rely on the best possible help.

For technical problems with the product, you may contact Kabel Deutschland directly:

0800/ 52 666 25 Mon - Sun 0:00 - 24:00 (free of charge from Germany)

12 Explanation of terms

Term	Definition
BER	Bit Error Rate The bit error rate defines the transmission quality from the number of incorrectly transmitted bits.
EPG	Electronic Programme Guide Digital program guide, where you can view the programs, channels and search for content.
FSK	Voluntary self-regulation of the film industry (Freiwillige Selbstkontrolle der Filmwirtschaft) German organization that maintains a movie rating system, which draws on the parental control feature. The Digital HD-Video-Recorder's replays content with classification G-16 or higher only if the parental protection PIN is entered.
Non entitled channels	Channels that are saved in the channel list but can not be displayed because you have no entitlement.
OSD	On Screen Display Menus and messages that are displayed on the screen.
Service Info	Text message that is sent from the channel or cable operator. See chapter 7.6.2, Service messages .
Smartcard	Electronic smartcard to decrypt encrypted digital TV or radio broadcasts. Slide the smartcard with the chip facing downwards into the reader of the Digital HD-Video-Recorder to view programs for which you are unlocked.
Start Channel	Channel on which the Digital HD-Video-Recorder systematically tunes to wherever the Digital HD-Video-Recorder is switched on or woke up after standby.
Timeshift Mode	Time-shift recording mode, which allows to stop and rewind current broadcasts and watch it again.
Video Subchannel	Channels or programs that transfer more than one video channel at a time and offer you the option of choosing from different video channels.
VoD	Video on Demand (Select Video) Interactive services for direct retrieval of a wide range of programs. To use this service, the Digital HD-Video-Recorder must be connected to the internet, Select Video must be available in your region and you must be unlocked for this service.

13 Specifications

TRANSMISSION STANDARDS

IP, DVB-C, MPEG-2, MPEG-4

QUAD CABLE FRONT END

CABLE RF INPUT Input frequency range: 47-862 MHz (8 MHz BW) RF input level: -15 to +15 dBmV RF impedance: 75 Ohms Return loss: <-8dB Noise figure: >8dB Tuning step: 62.5 kHz

RF OUTPUT

Loop through output frequency range: 47-862 MHz

CABLE DEMODULATOR

DVB-C Demodulator Waveform QAM 16,32,64,128,256 Symbol rate: 1 to 6.96 MS/s Roll-off factor: 0.15 Decoder RS (204, 188, 8) De interleaver: 12 x 17 Forney

PROCESSOR AND MEMORIES

Processor: ST 7105 - 800 Mips RAM memory: 256 Mbytes Flash memory: 64 Mbytes EEPROM emulated into Flash

HARD DISK EMBEDDED

320 Gbyte for RCI88-3201 Tbyte for RCI88-1000Scrambled TS recording: AESChipset-HDD pairing

VIDEO DECODING MPEG2

Standard MPEG-2 MP@HL for 50 Hz Input rates (max): 15 Mbit/s

MPEG-4 Part 10 / H.264

- MPEG4 AVC HP@L4 (HD) for 50 Hz Input rates (max): 20 Mbit/s for HP@L4
- MPEG4 AVC HP@L3 (SD) for 50 Hz Input rates (max): 10 Mbit/s for HP@L3

CABAC and CAVLC decoding

Supports all intra/inter prediction modes and block sizes I, P and B picture types

Fidelity range extensions (8x8 Transforms, 8x8 Spatial Prediction Mode, Dynamic Quantization Matrix)

AUDIO DECODING

<u>Stereo 2.0</u>

MPEG-1 layer I & II (Musicam)

MPEG-2 layer II

Mode: Mono, stereo, joint stereo Sampling rates 32, 44.1 or 48 KHz

<u>AC-3</u>

- Originally received bitstream (pass through)
- Two channels PCM down-mixing

E-AC3 and Dolby Pulse

- Two channels PCM down-mixing
- Transcoded in AC-3

HE-AAC stereo

- Two channels PCM

HE-AAC multichannel - Two channels PCM

OUTPUT RESOLUTION FORMAT

For HD broadcast

1280x720 @ 50 Hz (progressive) 1920x1080 @ 25 Hz (interlaced) Unscaled (original format) or scaled 576i and 720p by set up menu Zoom function on HDMI: 4/3, 14/9 zoom, 16/9 zoom and Full screen

For SD broadcast

720x576 @ 50 Hz interlaced Unscaled (original format) or scaled 720p and 1080i by set up menu Zoom function on HDMI: 4/3, 14/9 zoom, 16/9 zoom and Full screen

Format function on TV SCART

4/3 and 16/9 with conversion Pan and Scan, Letter box

SD INPUT/OUTPUT

<u>TV SCART</u>

- Input: CVBS, volume controlled audio R/L
- Output: RGB, CVBS, volume controlled audio R/L, Fast blanking, Slow blanking

<u>AUX SCART</u>

- Input: RGB, CVBS, Fixed Audio R/L, Slow blanking, Fast blanking
- Output: CVBS or S-video, Fixed Audio R/L, Macrovision copy protection 7.0.1

CVBS Out

CVBS output with Macrovision copy protection 7.0.1

HDMI OUTPUT

HDMI version 1.3

HDCP version 1.1

Rely on the (E)EDID HDMI information returned by the display device

<u>AUDIO</u>

- 2 channels PCM in case of MPEG1layer II and Dolby Pulse/HE-AAC stereo
- AC3 or PCM in case of AC3 bitstream
- E-AC3, AC3 or PCM in case of E-AC3 bitstream
- AC-3 or PCM in case of Dolby Pulse/HE-AAC MC (*)
- (*) according to (E)EDID HDMI information

AUDIO OUTPUT

Optical S/PDIF

- 2 channels PCM in case of MPEG1layer II and Dolby Pulse/HE-AAC stereo
- AC3 in case of AC3 bitstream
- E-AC3 in case of E-AC3 bitstream
- AC-3 in case of Dolby Pulse/HE-AAC MC

HiFi and SCART

- Mono stereo in case of MPEG1 layer II

- 2 channels downmix in case of AC3, E-AC3, Dolby Pulse/HE-AAC

ETHERNET 10/100BT

Fully integrated IEEE 802.3/802.3u 10/100 base T-Physical layer

Auto-negotiation 10/100

Full/Half Duplex

Adaptive equaliser

Baseline wander correction

* Optional

CONDITIONAL ACCESS

1 x Smart card reader, ISO/IEC 7816

DATA PORT

- 1 x RS232 through AUX Scart
- 1 x USB 2.0 Host (High Speed)
- 1 x RJ45 (Ethernet 10/100 base T)

FRONT PANEL

- 1 x Smart Card reader
- 1 x IR sensor: 38 kHz
- 14 x Buttons (partly backlit)

REAR PANEL

- 1 x IEC169-2 (female: RF In) 1 x IEC169-2 (male: RF Out) 2 x SCART (TV, AUX) 1 x HDMI 2 x RCA Stereo L/R 1 x RCA CVBS 1 x Optical S/PDIF
- 1 x RJ45 (Ethernet 10/100 base T)
- 2 x USB 2.0 Host (High Speed)
- 1 x Power On/Off switch

POWER SUPPLY

Mains supply voltage: 220-240 V ~50 Hz

Max. Power consumption: < 23 W Standby mode: \leq 1 W in passive mode

PHYSICAL SPECIFICATIONS

- Receiver: - Size (wxdxh): 363x225x50 mm
- Weight: ~1.7 Kg
- Operating temperature: 0°C to +40°C
 Storage temperature: -25°C to +65°C

ACCESSORIES

- 1 x Power cord for internal AC/DC (1.5 m)
- 1 x Remote control
- 2 x 1.5 V Alkaline batteries (AAA type)
- 1 x HDMI cable (2 m)
- 1 x RF cable (2 m)
- 1 x Quick Installation guide
- 1 x User manual
