“Self-Medicating with Research Chemicals: An Anthropological Exploration of an Online Drug Forum”

This is a forum for students, researchers, and everyone who is interested in the study of health and illness in different cultural/social settings. We host senior students and scholars who present their current research projects. The aim is to discuss and analyze new theories and themes of medical anthropology and to learn more about international developments in the area of culture, health, and healthcare. In order to obtain credit points, students must attend at least five out of the six lectures and write a 1-2 page summary of four of the lectures. For further information please contact Vicky Kosmidis: vasiliki.kosmidis@sai.uni-heidelberg.de
