NOTES

USB CONSOLE

/ Only external storage media or USB mass storage media (Mass Storage Device) 2.0 compliant USB specification.

/ The partition of an external data medium must conform to the FAT16 file system (<2 GB) or FAT32 (> 2 GB) (FAT: File Allocation Table).

/ Some multimedia devices may take longer to load due to multiple files, folders and subfolders or due to non-reproducible content. The playback start time is influenced by the connected device. If it exceeds a certain time during the initialization process (read content) it may be necessary to select the audio source via MEDIA menu to play the device.

/ The folder structure on the external storage medium should not exceed a depth of eight levels of folders. A folder should contain no more than 1,000 files.

/ MEDIA IN (CUP / USB Port) offers a standard USB voltage of 5 volts. The maximum intensity is limited to 1000 mA.

/ The use of USB extension cables and USB Hub (USB hub) can cause malfunctions.

/ If an external storage medium is divided into multiple partitions, only the first partition with compatible audio files will be played.

/ Do not use adapters for memory cards, their use may cause errors during operation.

/ To manage external storage device, see the manufacturer's instruction manual.

/ Medium / high volume level of the external device is recommended for clear sound via the MEDIA IN (CUP / USB Port).

/ Find information on audio formats and playlists for your MEDIA IN (CUP / USB port) in the user manual.

IPOD CONSOLE

/ New Apple devices have to be disconnected (Lightening connection) along with the Lightening connector adaptor (MD823ZM/A) of the original SEAT IPOD cable. If this is not done correctly, the radio/combi screen showing the song information may become blocked and not respond. Change source or disconnect adaptor.

/ Connections to new Apple models are compatible with the adaptor (MD823ZM/A) or 0.2m adapting cable (MD824ZM/A) of Apple's 30 pin Lightening connector.

/ Find information on audio formats and playlists for your MEDIA IN (CUP / USB port) in the user manual.

SD CARD SLOT

/ Consult user manual for usage information, media and audio formats for your SEAT Media System 2.1 browser.
