NOTES

Multimedia devices compatibility with MEDIA SYSTEM TOUCH / MEDIA SYSTEM COLOUR

USB CONSOLE

/ There are some slow-responding multimedia devices which stop working for a certain length of time and may even freeze if overloaded.

/ When playing some multimedia devices, it can take some time for them to be read (due to their high capacity, numerous files and a complex data structure, many folders and sub-folders, non-playable files, etc.).

/ The time it takes to start playing is determined by the multimedia device connected. If the start-up process (reading the contents) takes over a certain length of time, the following situation can occur:

1. The multimedia device will not start.
2. You need to re-select the audio source from the SOURCE menu in order to play the multimedia device.
3. You need to physically disconnect and connect the multimedia device.

/ **Warning:** Do not use memory card adapters, USB extension cables or USB hubs.

/ Multimedia devices that use the MTP protocol are not supported. Incompatibilities have been detected in multimedia devices that support both protocols (MTP/MSC), as they are not capable of correctly switching to MSC protocol.

/ **Warning:** The maximum length of a USB multimedia device connected to the car's port is 55mm, with the glove compartment closed.

/ In the user manual you will find information about using your MEDIA SYSTEM TOUCH / MEDIA SYSTEM COLOUR, as well as its playlist and the audio formats it supports.

IPOD CONSOLE

/ Apple models (iPhone, iPad and iPod) are not compatible with the USB port and must be connected through the AUX-IN multimedia socket.

SD CARD SLOT

/ In the user manual you will find information about using your MEDIA SYSTEM TOUCH / MEDIA SYSTEM COLOUR, as well as its playlist and the audio formats it supports.

Multimedia devices compatibility with MEDIA SYSTEM PLUS / NAVI SYSTEM

USB CONSOLE

/ There are some slow-responding multimedia devices which stop working for a certain length of time and may even freeze if overloaded.

/ When playing some multimedia devices, it can take some time for them to be read (due to their high capacity, numerous files and a complex data structure, many folders and sub-folders, non-playable files, etc.).

/ The time it takes to start playing is determined by the multimedia device connected. If the start-up process (reading the contents) takes over a certain length of time, the following situation can occur:

1. The multimedia device will not start.
2. You need to re-select the audio source from the SOURCE menu in order to play the multimedia device.
3. You need to physically disconnect and connect the multimedia device.

/ **Warning:** Do not use memory card adapters, USB extension cables or USB hubs.

/ Connections to new Apple models are compatible with the adaptor (MD823ZM/A) or 0.2m adapting cable (MD824ZM/A) of Apple's 30 pin Lightning connector.

/ These results are valid for USB devices that are connected to the MEDIA IN multimedia interface via an original SEAT USB adapter.

/ In the user manual you will find information about using your MEDIA SYSTEM PLUS / NAVI SYSTEM, as well as its playlist and the audio formats it supports.

IPOD CONSOLE

/ These results are valid for USB devices that are connected to the MEDIA IN multimedia interface via an original SEAT USB adapter.

/ In the user manual you will find information about using your MEDIA SYSTEM PLUS / NAVI SYSTEM, as well as its playlist and the audio formats it supports.

SD CARD SLOT

/ In the user manual you will find information about using your MEDIA SYSTEM PLUS / NAVI SYSTEM, as well as its playlist and the audio formats it supports.
