

seca elegantia 815

Elegant, just as its name suggests.

- 29-millimetre-high LCD figures. For easy reading.
- Four additional steel pins in the handle. For extra stability.
- Precise weighing. For weighty people up to 180 kilograms.
- Step-off function. For weighing without switching on scales.
- More than 165 years of experience. For maximum precision.
- From the global market leader for medical weighing and measuring.

seca elegantia 815:

Strong advantages,
elegantly packaged.

Take a look at the design: this wave shape is not only unusually elegant, but also practical. It forms a handle, making the seca elegantia 815 easy to pick up. For easy carrying or easy cleaning.

A gentle wave, even for tough use.

This scale is something quite special, for it is not only beautifully designed, but also cleverly engineered. It has a big display which leans towards the viewer as if balanced on a wave. Its gently rounded weighing platform is kind to toes. This scale always stays in form, even when its owner weighs up to 180 kilograms.

A low platform, even for big feet.

The weighing platform is extremely stable and, unlike other scales, beautifully flat. This means that even people with large feet can weigh themselves with ease and comfort. Incidentally, it is just as easy to read the measuring results. Thanks to a slightly raised display with LCD figures measuring 29 millimetres.

Strength under any circumstance.

At seca, only the highest-quality materials are put to use. ABS thermoplastic (acrylonitrile-butadiene-styrene), for example, is easy to clean and resistant to impacts, shocks and all commercially available cleaning and disinfecting products. What sets the seca elegantia 815 apart is its combination of robustness and an extremely refined and elegant image. You see, even the most convincing arguments are always beautifully packaged in a seca.

29-millimetre LCD
figures for easy
reading.

The elegant wave shape serves as a handle.
