EVERYTHING WE DO IS DEFINED BY OUR PASSION FOR SKIING

*Chris Benchetler
Hollywood Bowl, Mammoth, US
N34° 6'43.861" W118° 20'21.398"*

Since 1955, Atomic has sought to connect people with the sport they love through exceptional product experiences. 2020 has been a year of exceptional change but the mountains endure, and skiing is already adapting to reflect an altered landscape. Atomic exists to create products that open up experiences in the mountains to skiers of all levels, across all playgrounds. 2021 will see Atomic release of a range of innovative new products and technologies. From the piste to powder, Redster Revoshock Technology to Maverick all-mountain skis, our products are tested, validated and built to drive the sport forward.

#weareskiing

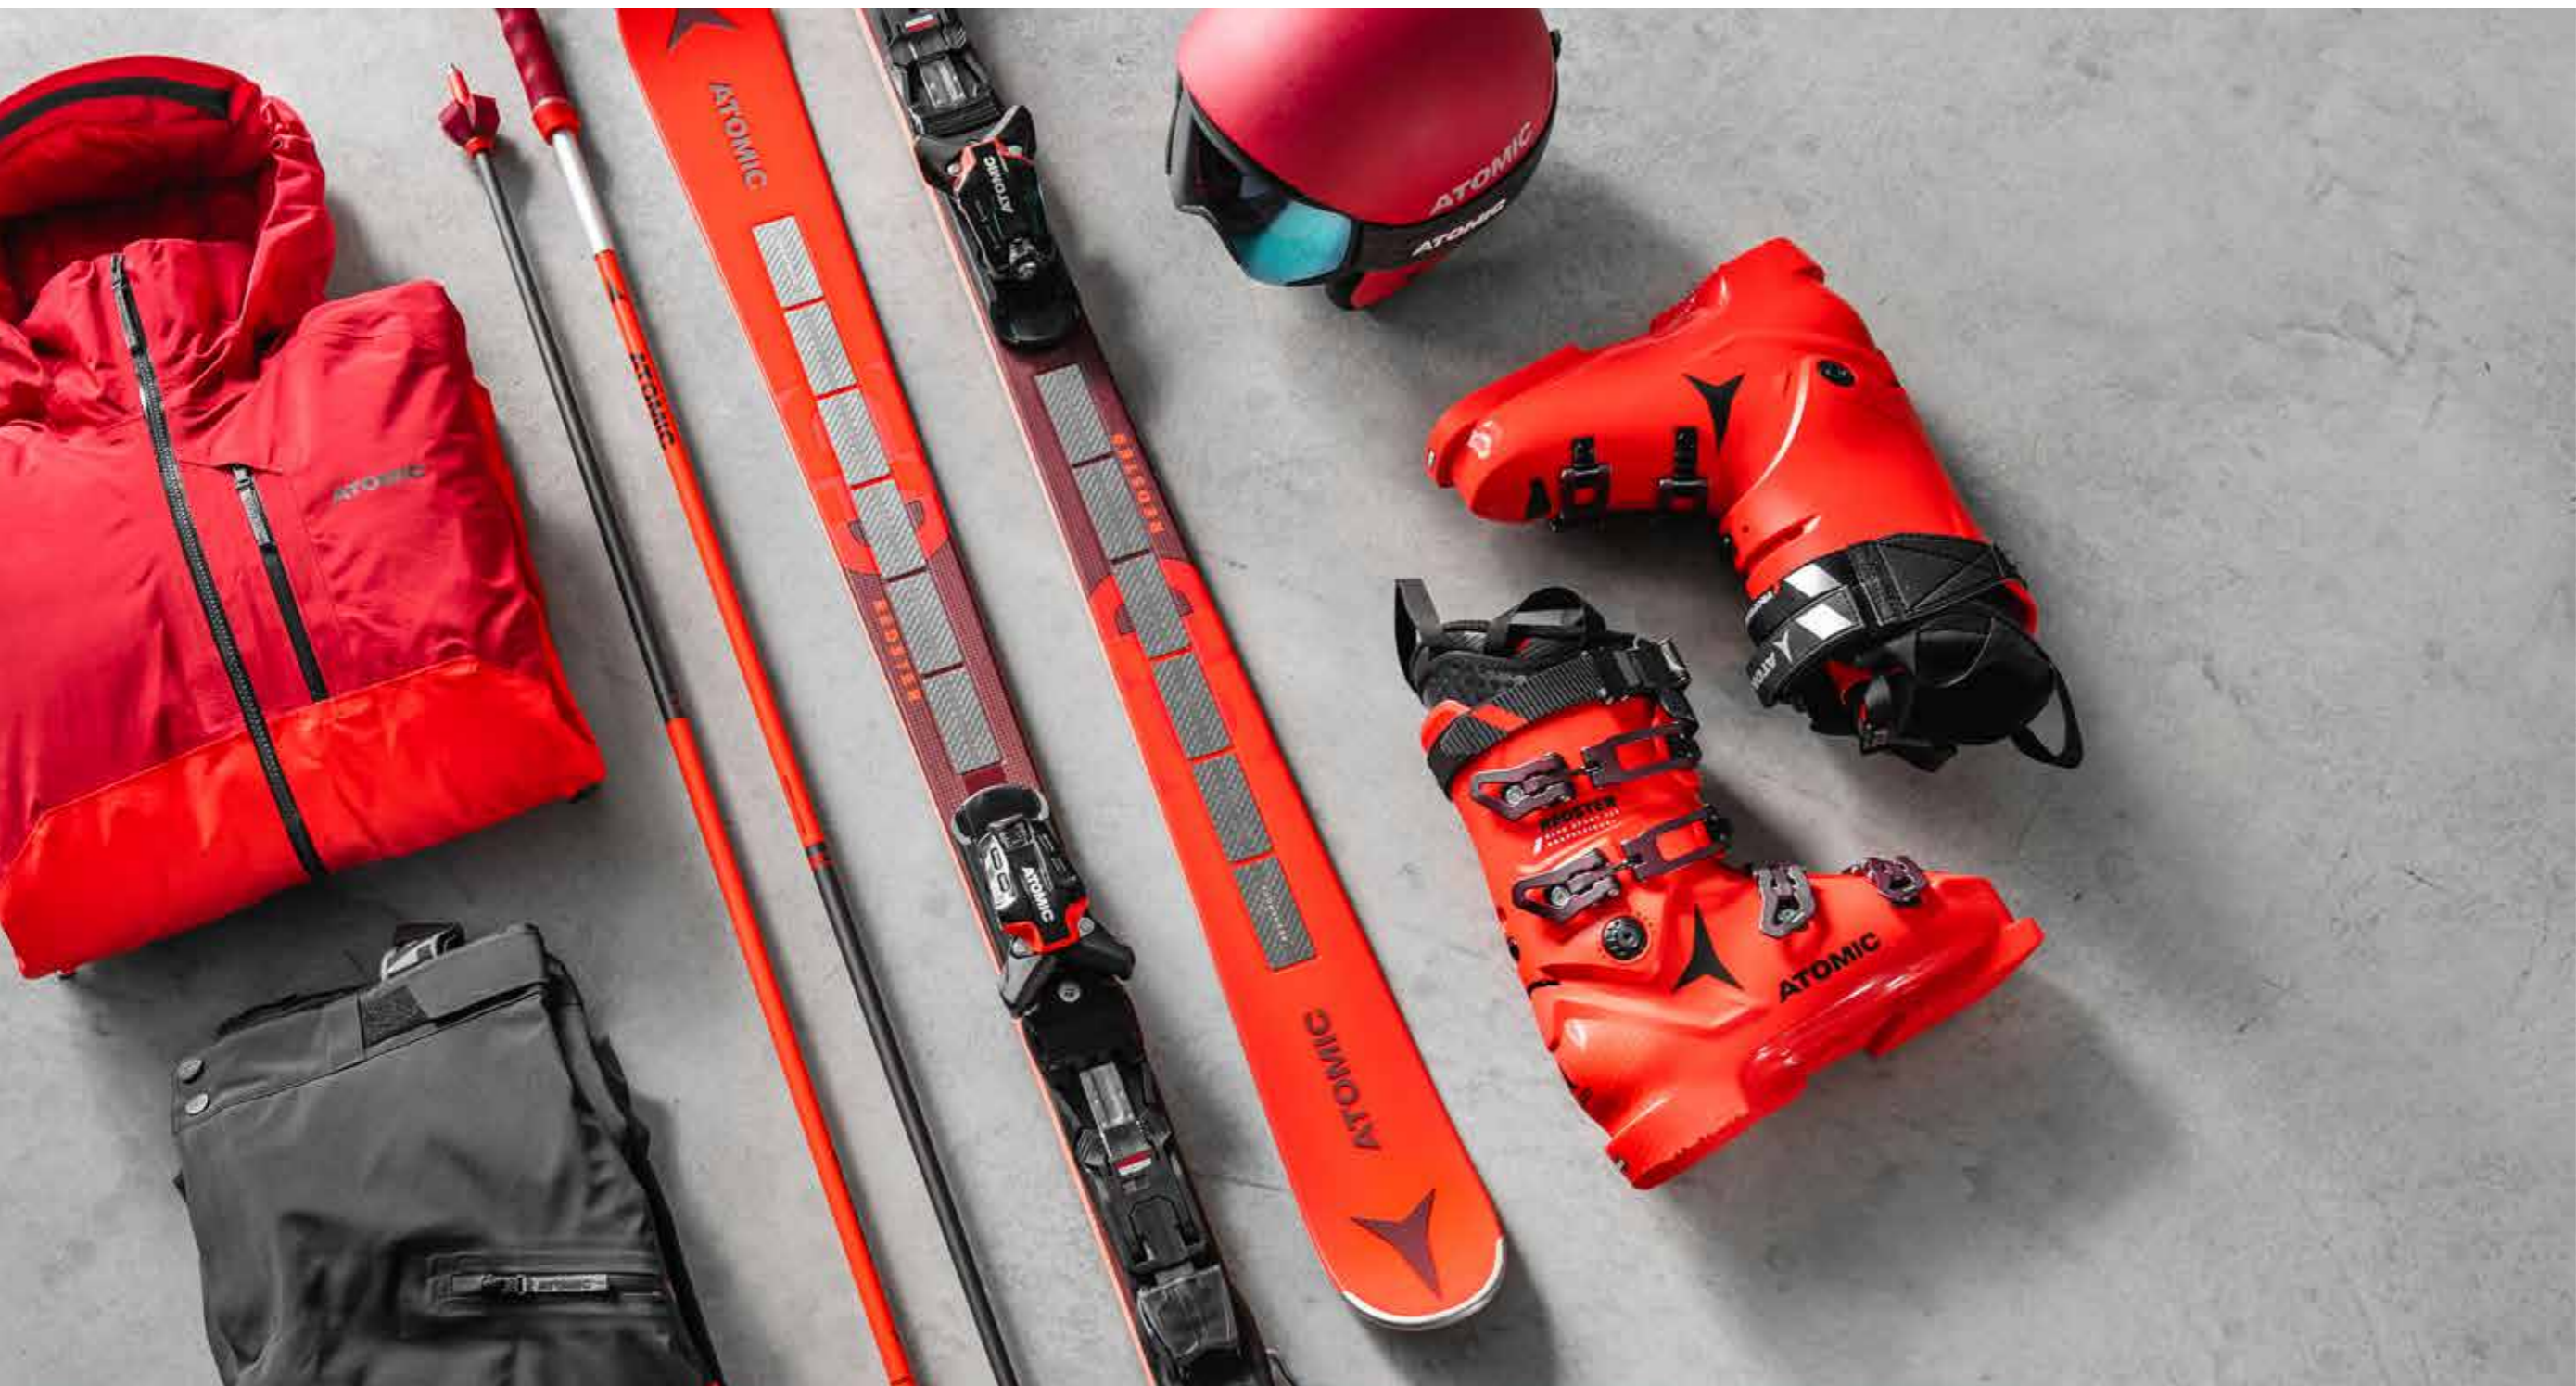

**BORN ON THE
RACE COURSE.
BUILT FOR
THE PISTE.**

Redster features the same technology used by the world's top skiers to give you maximum performance on the piste. Inspired by more than 60 years of Atomic innovation and fueled by record-setting World Cup wins, Redster represents the pinnacle of alpine skiing equipment. From our work with Marcel Hirscher — an athlete renowned for his unwavering approach to perfection — we've reinvented every element of the Redster collection for the tightest lines and fastest times.

The result? A race-proven range of skis, boots, and helmets that allows skiers everywhere to push their personal boundaries and break new ground.

Marcel Hirscher
Mölltal Glacier, Austria

REDSTER G9 REVO

Born on the race course.
Built for the piste.

CONSTRUCTION

TOPSHEET

Revoshock: Redster Revoshock turns unwanted shocks into confidence-building stability and unparalleled acceleration. Structured topsheet: A structured topsheet massively increases durability and gives a high quality finish.

LAMINATE

Titanium Powered: A titanium layer above and below the core creates supreme shock absorption, strong running stability and high torsional flex.

CORE

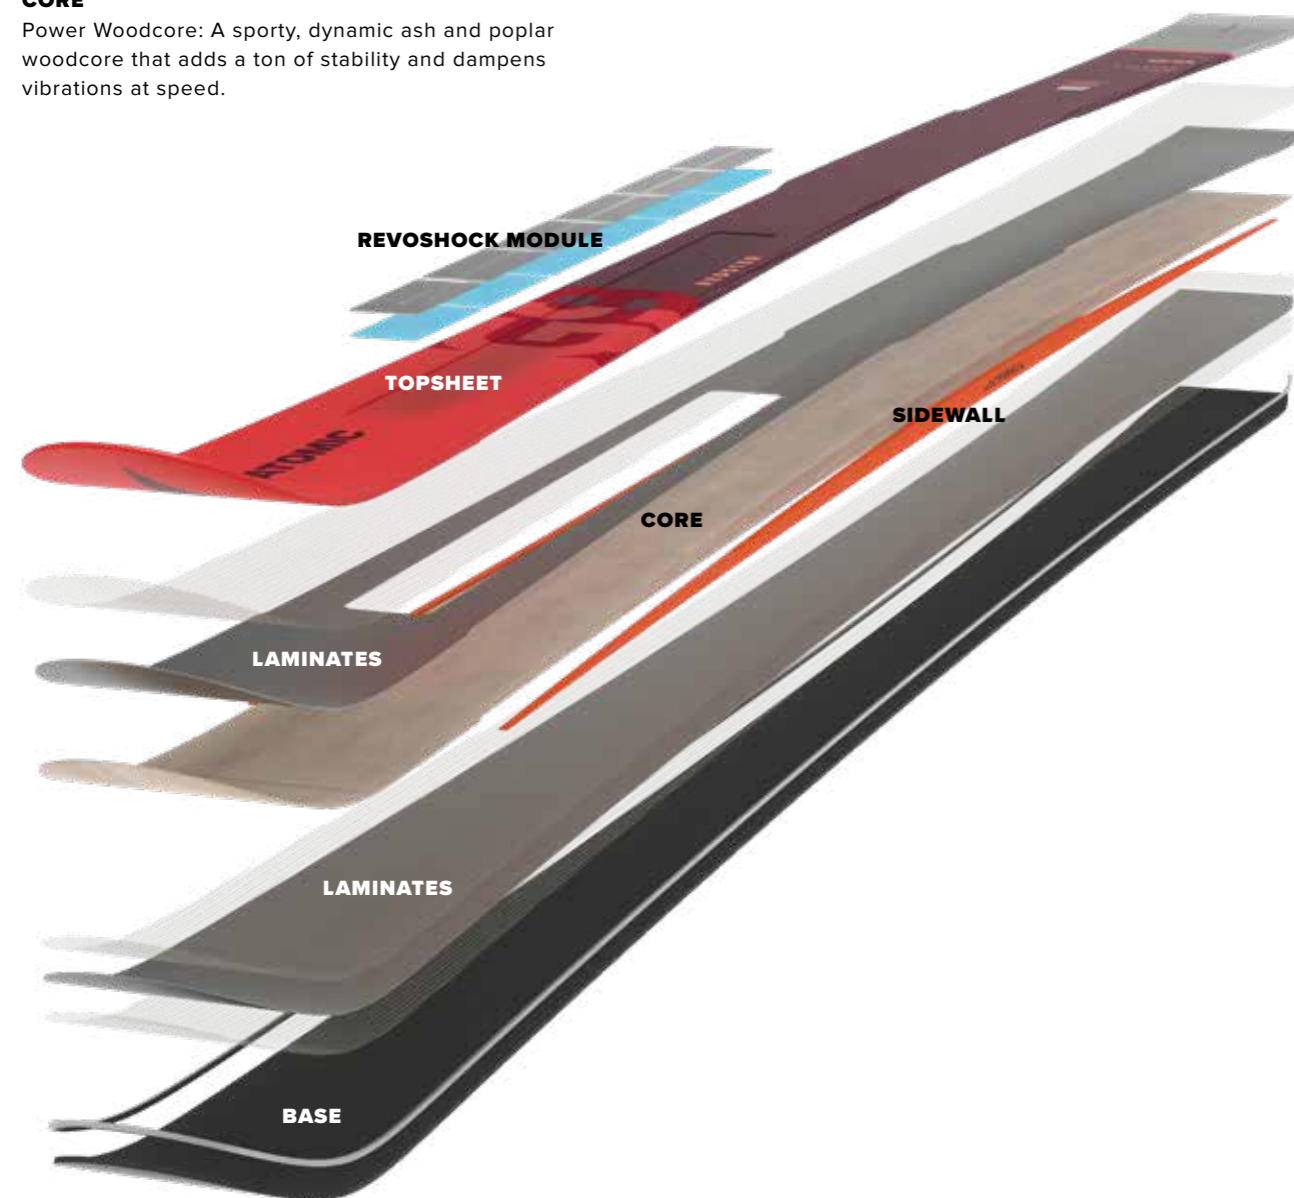

Power Woodcore: A sporty, dynamic ash and poplar woodcore that adds a ton of stability and dampens vibrations at speed.

SIDEWALL

Ultrawall: A robust new sidewall that delivers controlled power transmission, increased edge grip and improved acceleration.

BASE

World Cup Base Finish: World Cup-level grinding means less friction and more speed.

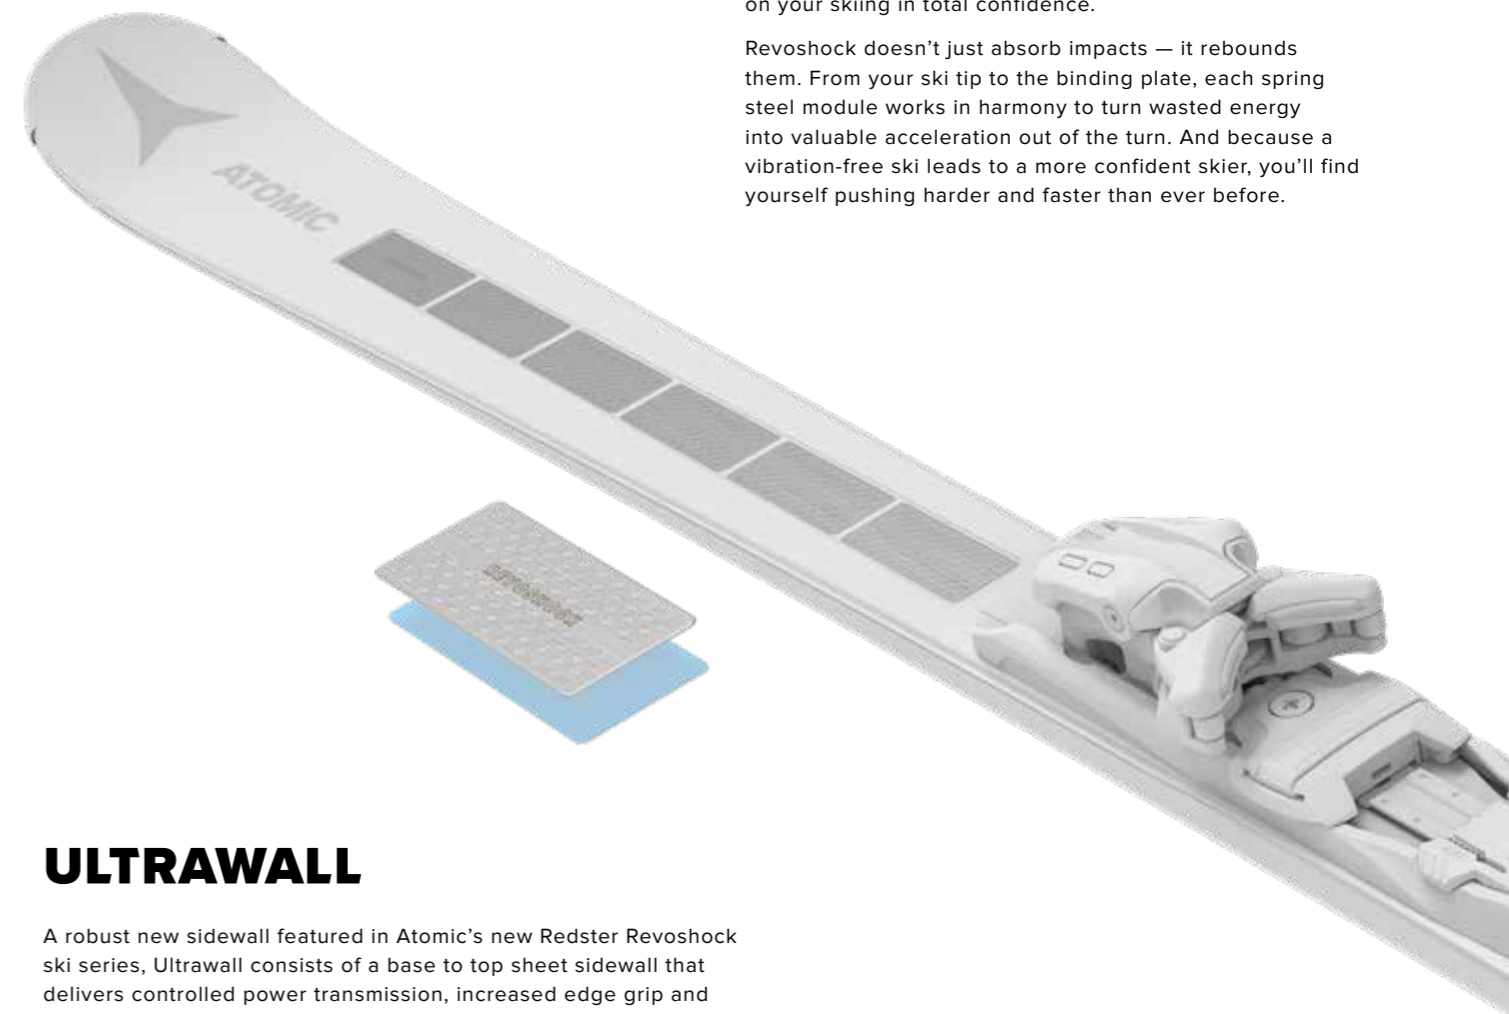

REVOSHOCK MODULE

Utilizing a series of spring steel modules each encased in impact-absorbing elastomer, our revolutionary new Revoshock technology acts like a built-in suspension system for your skis

to block distracting shocks before they reach your feet. So whether you're straight-lining groomers or making fast turns at your limit, the race-proven Redster Revoshock provides a smoother, more precise run — freeing you up to concentrate on your skiing in total confidence.

Revoshock doesn't just absorb impacts — it rebounds them. From your ski tip to the binding plate, each spring steel module works in harmony to turn wasted energy into valuable acceleration out of the turn. And because a vibration-free ski leads to a more confident skier, you'll find yourself pushing harder and faster than ever before.

ULTRAWALL

A robust new sidewall featured in Atomic's new Redster Revoshock ski series, Ultrawall consists of a base to top sheet sidewall that delivers controlled power transmission, increased edge grip and improved acceleration. Finished with a rounded Dura Cap, Ultrawall offers exceptional durability against scratches, dents and dings.

REDSTER HELMET

Born on the race course.
Built to protect.

SUPREME PROTECTION

CARBON RACECASE

The handcrafted Carbon Racecase is supremely stiff, strong and super light. Featuring a multi-directional layup for unrivaled protection and structural stability, it's specifically designed for racing.

ABS RACECASE

The injection-molded ABS Racecase is a stiff and strong shell, designed for guaranteed protection when skiing at speed.

AMID

AMID (Atomic Multi-directional Impact Deflector) is our revolutionary dual-density foam system that provides up to 40% higher impact protection than industry safety standards require.

INSTANT FIT

360° RS FIT SYSTEM

The 360° RS Fit System is height-adjustable and lets you fine-tune the helmet to your head shape and size. Customizable Live Fit pads surround the head with a soft, cushioned layer, offering an instant fit and damping shocks before they can reach the head.

RS FULL CAP LINER

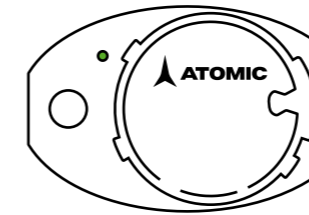

A full cap performance liner that's all in one piece, with 3D-molded ear pads integrated into the liner. For a perfect, comfortable and snug fit.

SMART AND SAFE

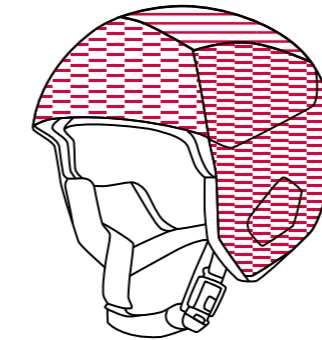

SHOCKSENSE

The Atomic Shocksense impact sensor and its dedicated smartphone app gives you an accurate picture of your helmet's condition and transmits an SOS alert if a crash stops you in your tracks — meaning you're free to push your limits with total confidence in your equipment.

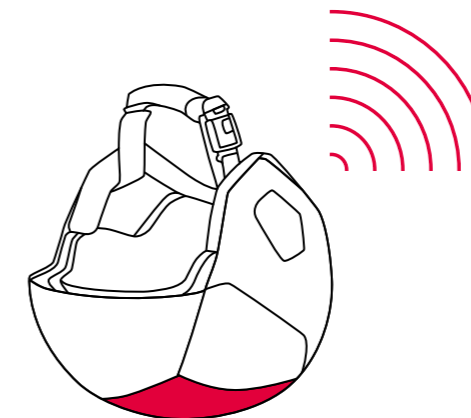

SHOCKSENSE SENSOR

A fully integrated impact sensor for your ski helmet offers state-of-the-art technology to detect the location, force, and severity of helmet impacts and feeds the data into the Atomic Shocksense App.

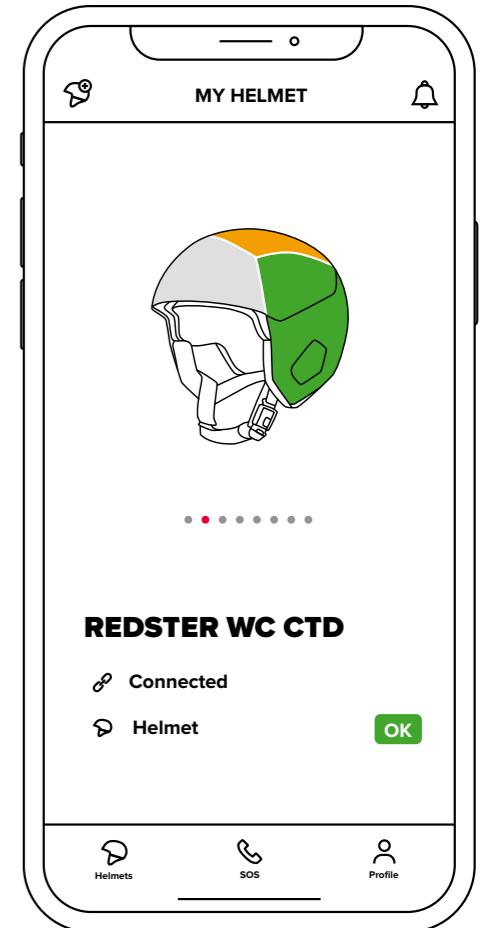

IMPACT ASSESSMENT

With Atomic Shocksense there are five separate impact-detection zones on your helmet. These help to assess the location and force of an impact on the helmet more accurately and safely, and then indicate whether the helmet is still protecting the racer.

SOS ALERT FUNCTION

If the force on your helmet exceeds a certain threshold, the Atomic Shocksense App will send an SOS Alert containing your GPS data to your emergency contacts.

ATOMIC SHOCKSENSE APP

The sensor inside your helmet combines with the Atomic Shocksense App to measure impacts and transmit an SOS alert if needed. The app also tells you the overall status of your helmet — whether it's ok or damaged. This status is based on data from each of the impact-detection zones.

Impacts on your helmet are graded into three colors depending on severity:

- Light
- Medium (assessment required)
- High (replacement required)

BORN ON THE RACE COURSE. BUILT TO PERFORM.

Anton Heldal
Gausta, Norway
N59° 54'47.28" E8° 43'14.98"

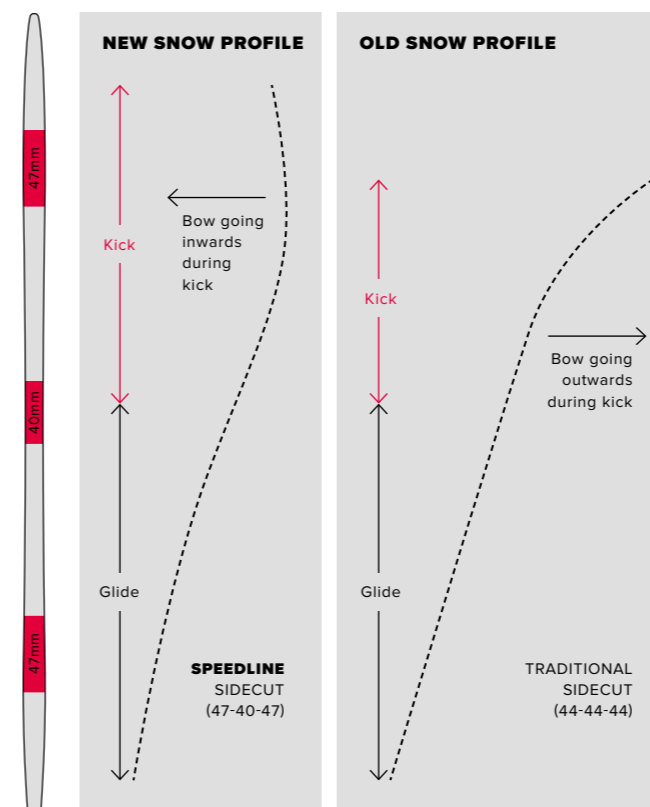

Redster skating skis are designed for maximum performance on the track, and represent the pinnacle of skating ski evolution. Featuring the same Atomic innovations used by the world's top skiers, the Redster S9 Gen S ski offers supreme stride efficiency thanks to a totally redesigned shape, as well as increased control and agility through its shorter body. Together with a new sidewall that eliminates friction in the glide stage, Redster Gen S technology will revolutionize your cross-country experience — from the skate track to the race course.

REDSTER GEN S

Redster Gen S will revolutionize your cross-country experience from the skate track to the race course.

SPEEDLINE

Speedline is our new deeper sidecut with a wider tip and tail (47-40-47mm). In the illustration below you can see the difference. The dashed line is the trace the ski leaves in the snow after each step: Speedline makes this trace curve inwards during the kick and keeps the ski moving forwards for longer (left). The result is a more powerful kick and longer stride, which in turn leads to better stability and a big boost to skiing efficiency.

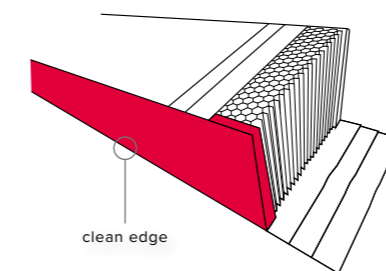

SPEEDSCALE

With the new Speedscale geometry we're offering one unique ski length that eliminates the need for multiple skating ski sizes, while boosting precision, agility and maneuverability.

RACEWALL

Racewall, our new sidewall construction, removes the barrier between ski edge and snow, meaning more direct power transmission, more stability, and faster skiing.

ATOMIC PRO CENTER

ATOMIC PRO CENTER SKI SELECTION
Retailers can now offer the ultimate personalized skis for customers: visit the Atomic Pro Center and choose from the exact same skis as our world-cup athletes, supported by the exact same service team. Select skis to fit an individual customer's profile and get them grinded for their intended snow conditions. Or if you can't come to our Pro Centre in person, our team will find the perfect match on your behalf.

SHEKIS

#sheskis gives a platform to broadcast stories of passion, confidence, authenticity, and community. #sheskis is connecting skiers around the world and giving us a place to talk about what we love.

**DESIGNED IN
NORTH AMERICA.
BUILT IN AUSTRIA.
SKIED EVERYWHERE.**

Developed, tested, and validated in North America, where every mountain attracts a different type of skier and a style that requires unique characteristics in an all-terrain ski, Maverick is the ski that unites all mountains and skiers. Featuring construction technology used by the world's top racers and professional freeride skiers, Maverick blends both ends of the spectrum to create a ski that is both pure groomer performance and playful in the powder.

Test Tour
Colorado, US
N38° 43'30.639" W105° 36'27.78"

TEST TOUR

We worked with 60 testers from across North America to test 145 prototypes in every condition. The result? The definitive all-mountain ski.

KEY TESTING GROUNDS

USA
PACIFIC NORTHWEST – ROCKIES – NEW ENGLAND

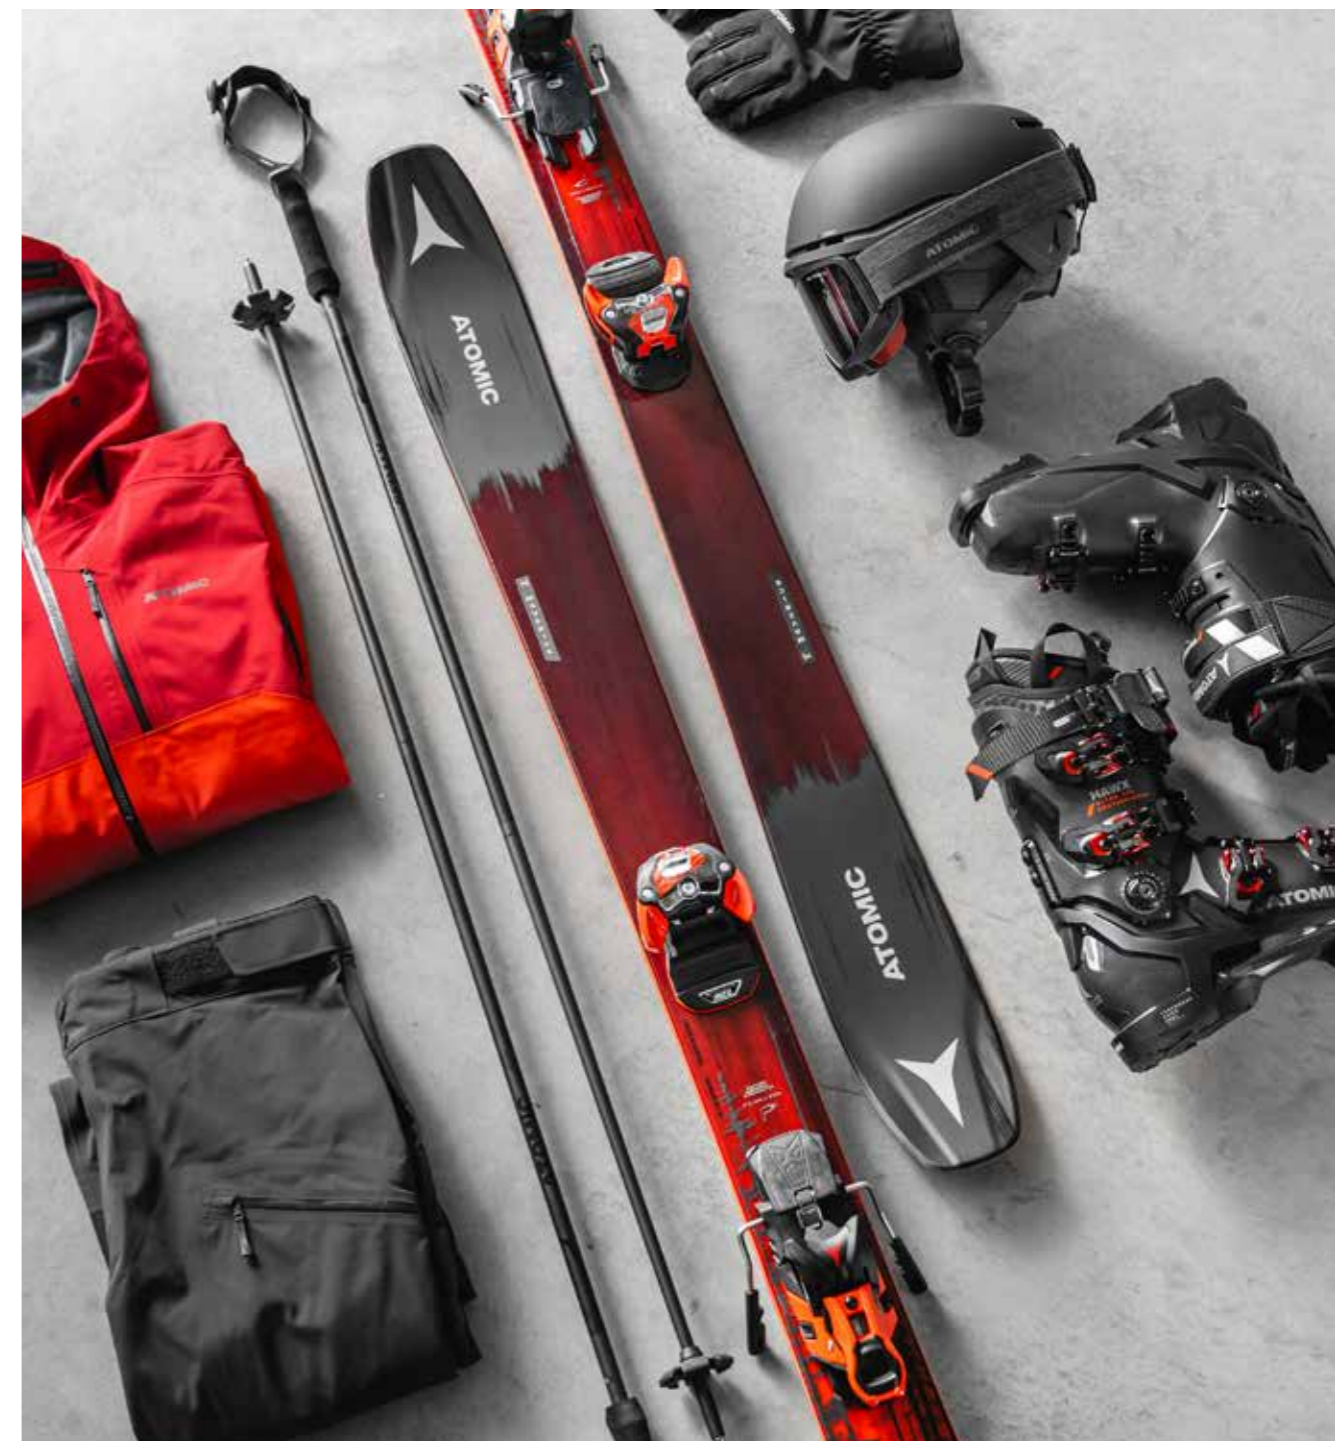

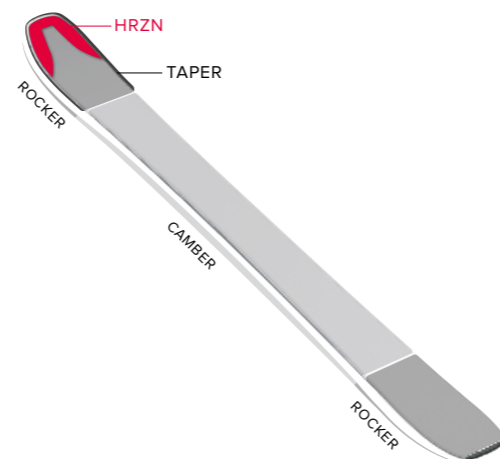

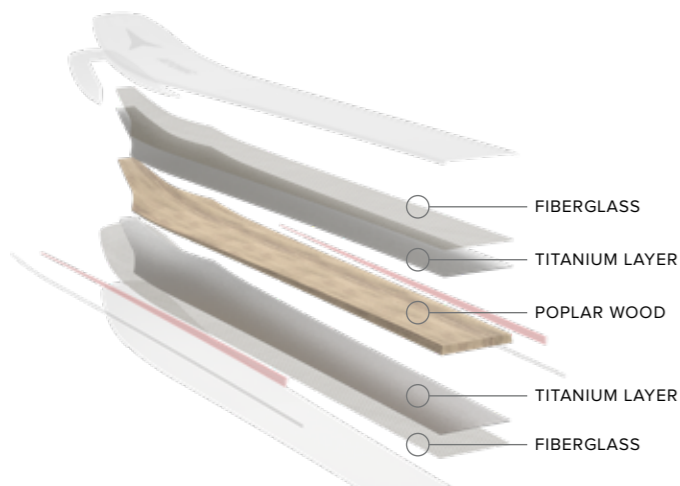

CANADA
BRITISH COLUMBIA – ALBERTA – ONTARIO – QUEBEC

OMATIC CORE

With a versatile all-mountain mindset, Maverick utilizes OMatic construction to create a core that produces the ultimate balance of stiffness and flex throughout the length of the ski. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and titanium layers or carbon inserts (depending on the model) OMatic delivers effortless performance, balance and stability from tip to tail.

FLOW PROFILE

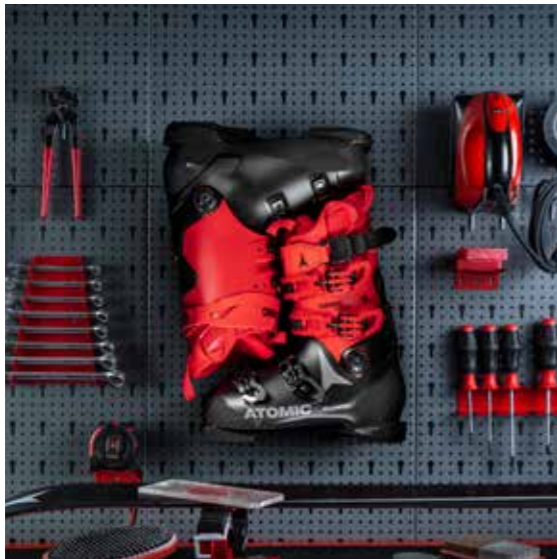

Atomic's new Flow Profile blends the perfect amount of rocker and camber for optimal effective edge contact during every turn. Utilizing the latest generation HRZN Tech Tip, Flow Profile delivers the ideal combination of camber, shovel taper, and tip rocker to create a ski that hooks up on hardpack as well as floats in fresh snow.

BOOTS THAT FIT

No matter how you ski, you'll have a better day in boots that fit. Your boots are your accelerator and your steering wheel, the connection between you and your skis. This connection should be intuitive and comfortable. We set out to make a boot that enhances that connection, a boot that provides performance through comfort. From the new, narrow-fit Hawx Ultra up to the wide-fit Hawx Magna, our Hawx range has a solution for every foot type. There's a reason they're the best-selling ski boot series in the world – unrivaled fit, comfort, and performance.

HAWX FAMILY

HAWX ULTRA
98mm NARROW FIT

HAWX PRIME
100mm MEDIUM FIT

HAWX MAGNA
102mm WIDE FIT

Hawx is the best-selling boot series in the world.

At the core of all these boots is the legendary Hawx feel – a unique combination of fit and balance that works for everyone!

DISCOVER YOUR BACKLAND

The journeys to discover winter backlands are all unique. We search for distant peaks, local skin tracks, and point-to-point tours. When we move away from the lift-line, our gear needs change. Whether you're skiing big mountain lines, charging uphill at your next skimo race or learning the ropes and touring with friends, the Atomic Backland family has you covered, head-to-toe, tip-to-tail with skis, boots, poles, apparel, skins, packs and more. Join us this winter, discover your Backland.

The sport of skiing has defined Atomic since 1955. Everything we produce is informed by an authentic love of the sport and is designed and developed by people obsessed with skiing and innovation. We approach our protection and gear category with the aim to deliver the very best products for all skiers. We focus on providing Instant Fit and Supreme Protection across the category so that everyone can ski in comfort and confidence without distraction. Fit to Protect

REDSTER

REDSTER G9 REVO + X 12 GW

Pro-level performance

Redster Revoshock powers Atomic athletes to the top steps of podiums all around the world. Now, this revolutionary technology is available to you – bringing increased stability and unparalleled acceleration to your skiing.

Stability at any speed

Thanks to Revoshock's impact-absorbing spring steel modules, your skis will be shock-free at any speed, resulting in increased stability on every run.

Confidence to push your limits

With rebound-powered acceleration and no more distracting movement through your skis, you can concentrate on pushing your edges to the limit in total confidence.

CLOUD

CLOUD C14 WB REVO + X 12 GW

Feel the flow

Thanks to Revoshock's impact-absorbing spring steel modules, your skis will be shock-free at any speed, resulting in increased stability – for graceful, flowing, confident skiing.

Your ski, your style

Choose the model to suit you, with Cloud's elegant monochrome styling you get the perfect balance of performance and design. The Cloud series also includes a widebody option – with a slightly wider waist ideal for handling variable piste conditions.

Boost your confidence

Refined Flite Woodcore construction makes Cloud lighter and stronger, providing effortless stability on groomed runs.

MAVERICK

MAVERICK 95 TI

Exact & relaxed

Strong and smooth, Maverick utilizes OMatic Construction to create a core that produces the ultimate balance of stiffness and flex throughout the length of the ski.

Balanced performance

Blending the perfect amount of rocker with camber underfoot for maximum effective edge contact during the entire course of every turn, Flow Profile delivers the ideal combination of shovel taper, tip rocker, and HRZN Tech Tip to create a ski that hooks up on hardpack as well as floats in fresh snow.

Strong power to weight ratio

Just what an all-mountain ski requires and nothing more. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and titanium layers or carbon inserts, OMatic delivers simple, lightweight and seriously sturdy performance.

MAVEN

MAVEN 93 C

Exact & relaxed

Smooth and intuitive, Maven utilizes OMatic Construction to create a core that produces the ultimate balance of stability and flex throughout the length of the ski. The same construction featured in the new Maverick, purposely tuned for women; Maven delivers powerful skiing in every condition.

Balanced performance

Blending the perfect amount of rocker with camber for maximum effective edge contact during the turn, Flow Profile delivers the ideal combination of shovel taper, tip rocker, and HRZN Tech Tip to create a ski that hooks up on hardpack as well as floats in fresh snow.

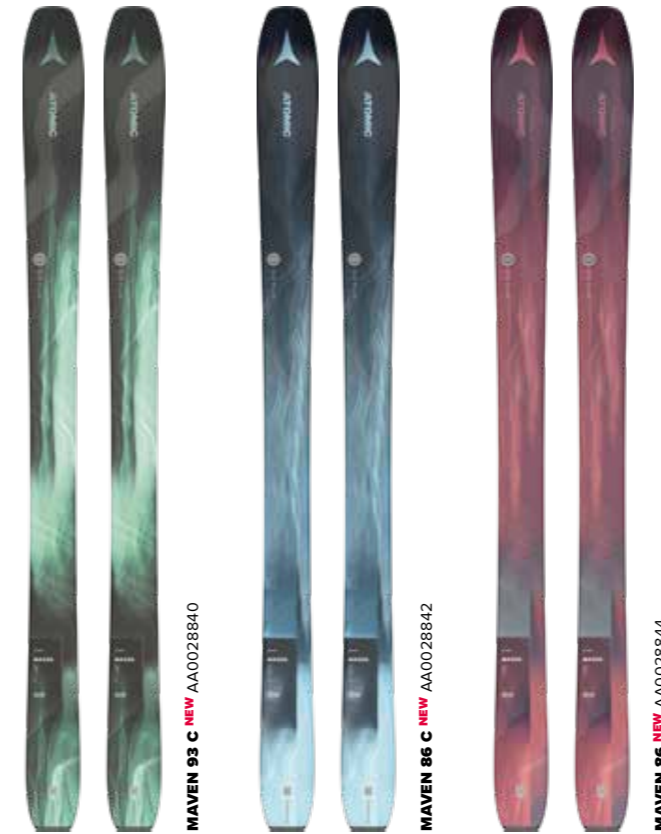

Strong power to weight ratio

Just what an all-mountain women's ski requires and nothing more. Constructed with only essential materials; precision milled poplar wood, lightweight fiberglass and carbon inserts, OMatic delivers simple, lightweight and energetic performance.

Verified by engineers and validated by professional athletes, Atomic bindings have been tested and skied under the most extreme conditions. From Overall World Cup globes to Olympic golds, winning X Games to the Freeride World Tour, descending from earth's highest peaks and crossing Antarctica – Atomic bindings have conquered the roughest racecourses and the toughest mountains. Never settling, we constantly source and test new materials to deliver the most advanced binding technologies that allow skiers to reach the next level in the sport. A perennial favorite trusted on mountains around the globe, the winning legacy of Atomic bindings rests on every skier achieving their best skiing.

GRIPWALK

GripWalk is a sole/binding system that makes walking in ski boots significantly more comfortable, while also reducing the chance of slipping. Yet the GripWalk system also guarantees outstanding on-snow performance.

BENEFITS

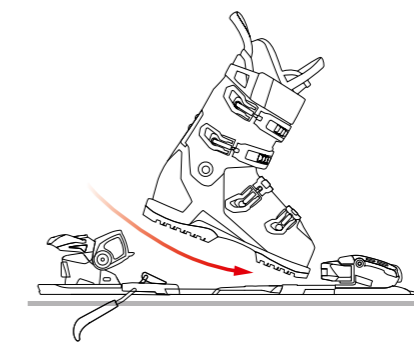

BETTER WALKING, MORE GRIP

A high-profiled slip-resistant sole leads to outstanding grip for walking.

NO HEIGHT ADJUSTEMENT

Simply step-in: Bindings with GripWalk Logo need NO height adjustment – even when used with regular alpine boots and soles.

WALKING COMFORT

Increased walking comfort and improved natural roll thanks to curved rubber sole.

COMPATIBILITY

If a GripWalk logo is visible on the binding, on the sole and on the heel of the ski boot then the binding and boot are compatible. Height adjustment of the binding is not required. Simply step into the binding.

ATOMIC
PROFESSIONAL

Our mission is to drive the sport of skiing forward. For more than 60 years, our equipment has powered professionals and enthusiasts alike to achieve their full potential — from the top step of the World Cup podium to the first chair at the local hill. Inspired by our history and determined to push the limits of performance, we created a range of Redster and Hawx ski boots designed to provide the ultimate skiing experience that you've never had before: the Atomic Professional Series.

The innovative Professional Dual Strap combines two elements together for secure, balanced performance. Elastic shock absorbing portion smooths out choppy terrain and increases damping while static section provides pure power and energy transmission.

Customizable tongue system allows you to select the ideal tongue thickness to suit your needs. Choose between Low Volume (LV) fit, Medium Volume (MV) fit and High Volume (HV) fit for the ultimate interface between shin and liner.

MIMIC PROFESSIONAL

Supreme fit

The result of years of incessant ski boot development for Atomic's top World Cup racers, Mimic Professional injects advanced foam compounds into revolutionary Mimic liner technology to deliver a supremely customized fit with absolute precision.

Unrivaled comfort

Utilizing special foam compounds that precisely fill the space around your foot to create a personalized custom fit, the liner perfectly conforms to the anatomy of your foot and ankle areas eliminating the painful break-in period. Unrivaled comfort and increased warmth allow you to focus on skiing.

Next-level performance

Immediate power and energy transmission from foot to ski. A precise foam-molded fit eliminates all space between the liner and foot / ankle areas while Mimic technology produces an optimal next-to-shell fit. The result is superior power transfer and the ultimate interface between skier and ski boot.

REDSTER PROFESSIONAL

Supreme fit

This highly anatomical, low-volume 96mm last boot features our World Cup-inspired Mimic Professional liner technology. Mimic Professional combines Mimic liner technology with foam injection to produce a liner that contours to the exact shape of your foot for powerful, full gas piste skiing.

Unrivaled comfort

Setting a new standard for all-day comfort, the extremely snug and personalized fit produced by Mimic Professional liner technology creates a perfect interface between foot and boot. The result is a boot that provides unrivaled comfort, warmth and precision no matter what speed you hit.

Pro-level performance

Fast, aggressive, precise skiing has never felt so effortless. The Progressive Race Shell immediately directs energy transfer from boot to ski while the custom Mimic Professional liner eliminates any internal movement for intuitive turn initiation and instant power to the piste.

MIMIC

From first fit ...

This is a boot that feels right from the very start. An anatomically pre-shaped heel and ankle area comfortably secures the foot the moment a skier steps into the boot – and it's only going to get better.

... to your fit.

The heel, ankle and tongue feature a layer of supportive, heat-moldable material. After being softened in the oven, this material mimics the precise shape of your foot, and hardens in that shape for a perfect custom fit.

It's the easy way

The heat-molding process is quick and easy, mess-free and repeatable – giving every boot-fitter the chance to make their customer's day – or entire ski season – with a fit that's as perfect as can be.

HAWX ULTRA PROFESSIONAL

Supreme fit

This narrow, low-volume 98mm last boot features our World Cup-inspired Mimic Professional liner technology. Offering the absolute best fit and foothold, Mimic Professional combines Mimic liner technology with foam injection to produce a liner that contours to the exact shape of your foot.

Unrivaled comfort

Setting a new standard for all-day comfort, the extremely snug and personalized fit produced by Mimic Professional liner technology creates a perfect interface between foot and boot. Rip more groomer laps and chase more powder with easy step-in/step-out, superior warmth and maximum control.

Next-level performance

By starting with the slimmest possible profile then reinforcing critical areas for maximum support, next-generation Prolite technology creates lightweight boots that are 25% more stable than previous models — for agile and supremely powerful skiing.

HAWX ULTRA

Supreme fit

A highly anatomic ski boot featuring our narrow, low volume 98mm last, this boot offers a great fit right out of the box and provides 100% customizable fit and geometry. The revolutionary Mimic liner takes custom fitting to a new level by exactly shaping to you for unmatched foot and ankle hold.

Unrivaled comfort

With fully customizable Mimic liner technology, an entirely new level of comfort, warmth, and responsiveness can be achieved. Combined with lightweight shell construction and easier than ever step-in / step-out, this ski boot sets a new standard for all day, everyday comfort.

Next-level performance

Starting with the slimmest profile possible and then reinforcing critical power transfer zones, our next-generation Prolite technology creates a lightweight ski boot that is 25% more stable than previous models — for agile and supremely powerful skiing.

BOOT TECHNOLOGIES

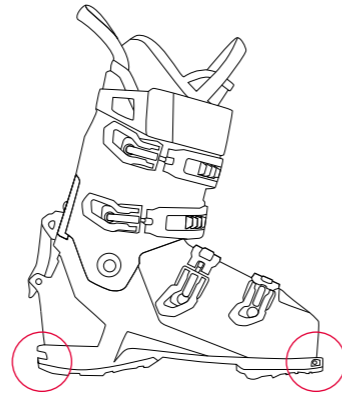

PROLITE

Prolite is a way of building skis and boots that turns traditional thinking on its head. Instead of starting with a standard construction and cutting material away to save weight, Prolite does the opposite. It starts with the slimmest possible profile and then it builds up reinforcements in key areas where strength is needed – like the Energy Backbone down each boot spine and ski edge. The impact of this construction? The lower weight saves energy and makes skiing effortless but also more precise with a tuned-in feel for the snow underfoot. And all the strength is still there when you need it for pushing hard.

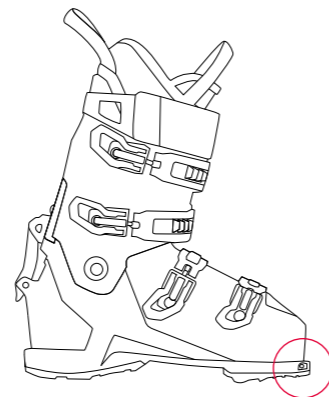

TECH INSERTS

Complete Tech (CT) refers to the boot having tech inserts in both the toe and heel which allow for maximum binding compatibility.

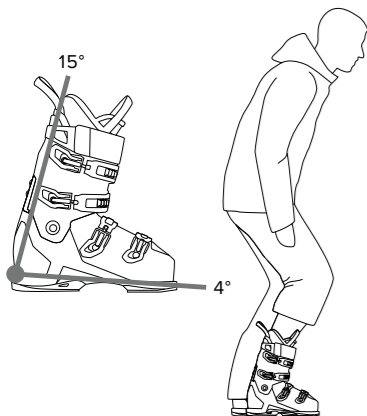

Hybrid Tech (HT) refers to the boot having tech inserts in the toe only which allow for compatibility with hybrid bindings, such as the Atomic Shift MNC.

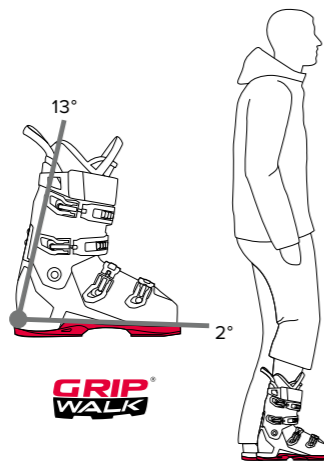

GRIPWALK

ISO 5355 - ON A FLAT SURFACE
Standing on a flat surface, ISO 5355 soles preserve Atomic's athletic stance.

GW - ON A FLAT SURFACE
Standing on a flat surface, GripWalk soles make the geometry more upright and more comfortable.

IN GRIPWALK BINDING
In a GripWalk binding, a GripWalk boot regains Atomic's athletic stance.

BOOT CUSTOMIZATION

Boot customization is about making the shape of the boot mirror the shape of the foot. Sometimes we need to make space for the foot, sometimes we just need to fine tune an already good fit, and sometimes we need to take up excess space. For this reason, we speak about boot customization in terms of Expansion, Optimization, and Reduction.

EXPANSION <<>>

What to do when the foot shape is wider than the shell shape?

MEMORY FIT
Atomic Memory Fit is the ideal customization solution for when the foot is wider than the shell:

Best method for when traditional stretching is too time-consuming, or the area is simply too big

Completely adapts the shells and cuffs to the shape of skier's feet, ankles, and legs

OPTIMIZATION <=>

What to do when the foot shape matches the shell shape?

MIMIC LINER
Atomic Mimic is the ideal customization solution for when the foot shape matches the shell shape:

Completely adapts the ankle area, tongue and calf to the shape of skier's feet, ankles, and legs

REDUCTION >><<

What to do when the foot shape is narrower than the shell shape?

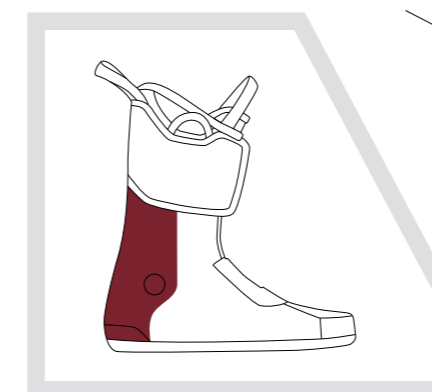

VOLUME REDUCING LEG PAD
The Volume Reducing Leg Pad is designed to take up equal space around the leg, providing a snugger fit, increased comfort and increased shock absorption.

VOLUME REDUCING PAD KIT
Add these pads for reducing excess volume around the ankle area, forefoot and instep area of the liner.

MIMIC PROFESSIONAL

Mimic Professional injects advanced foam compounds into revolutionary Mimic liner technology to create a customized fit that forms around the exact shape of the foot. The result is a liner that delivers the supreme fit, unrivaled comfort, and next-level performance.

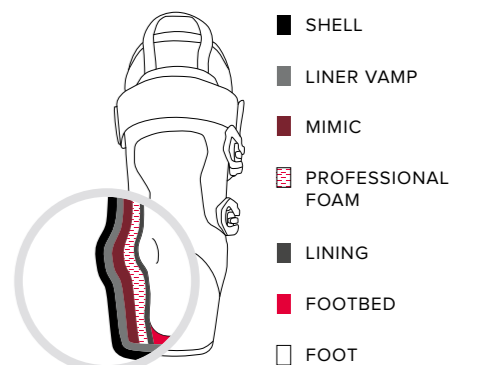

1. HEAT THE MIMIC ZONES IN THE OVEN

2. INJECT PROFESSIONAL FOAM INTO THE LINER

3. MIMIC: NEXT-TO-SHELL FIT; PROFESSIONAL FOAM: NEXT-TO-FOOT FIT

HELMET TECHNOLOGY

CONSUMER JOURNEY HELMETS

All our helmets are designed and engineered by a passionate team of experts here at Atomic HQ in Altenmarkt, Austria: the heart of our brand, in the heart of the Alps. Our work starts with understanding what skiers expect from their helmets. These insights are our guiding light for product development, driven by the world's best athletes using our helmets; the world's best retailers selling them; and by our own experience as skiers:

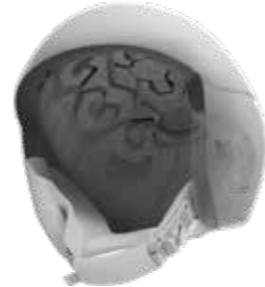

SURPREME PROTECTION

AMID
AMID (Atomic Multi-directional Impact Deflector) is our revolutionary dual-density foam system that provides up to 40% higher impact protection than industry safety standards require.

HOLO CORE
This unique 'egg-carton' construction creates an extended crumple zone for maximized shock absorption. It also comes with ventilation holes so it's cooler and lighter. This means up to 30% higher impact protection than industry safety standards require.

CONSTRUCTION TYPES

HYBRID CONSTRUCTION
Hybrid shells combine the best of both worlds in helmet construction. The upper part is ABS hard-shell for extra stability and protection. The lower part is in-mold to keep the weight down.

IN-MOLD SHELL
In-mold helmets are constructed directly in the mold. The EPS foam is molded into the PC shell, which results in a very safe and light construction.

ABS HARD SHELL
Hard-shell helmets are constructed primarily from ABS plastic. This outer shell gets bonded to the EPS core for a two-piece construction that provides high durability and ultimate high-impact protection.

INSTANT FIT

360° FIT SYSTEM + LIVE FIT
Live Fit pads form a wide band of memory foam that adapts precisely to your head for an instant individual fit. The progressive height-adjustable 360° Fit System lets you fine-tune the helmet to your head size – and also your headshape. It's 100% personalized comfort guaranteed for every skier.

MERINO 3M™ X-STATIC LINING
The Merino 3M™ X-Static Lining is a high-end lining made from merino wool with anti-microbial and anti-odor properties. It regulates your body temperature, keeping you warm on cold days and cool on warm days.

3D MOLDED EARPADS
3D Molded Earpads are shaped especially for comfort and fit, surrounding your ears to keep them warm and protected in all conditions.

VISOR

VISOR ID LENS
ID stands for Integrated Design, meaning the lens edge perfectly meets the curve of the helmet, maximizing your field of vision and offering greater protection against wind and snow.

ADJUSTABLE VISOR SETTING
A visor mounting that works perfectly whether you're wearing glasses or not. Simply pivot the visor and give yourself 8mm more room to accommodate glasses, without compromising field of vision or visor closure.

HD LENS TECHNOLOGY
High-definition contrast lens technology uses crystals in the lens to create incredible snow visibility in all light conditions.

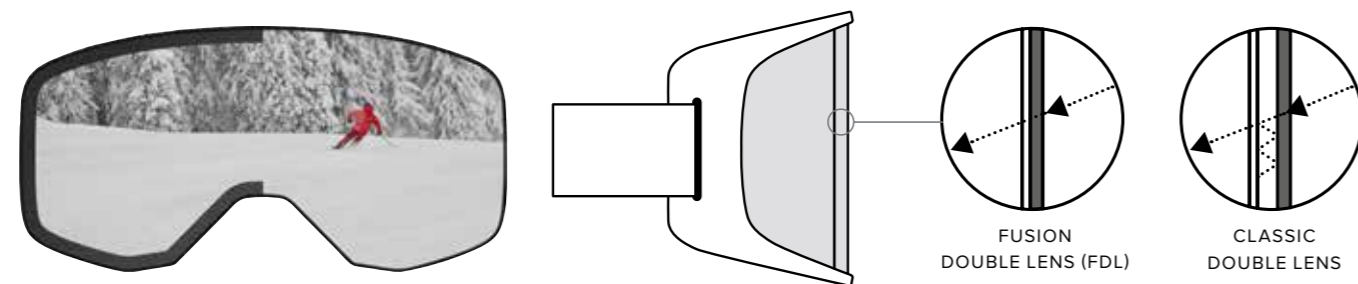

GOGGLE TECHNOLOGY

SEE BETTER. SKI BETTER

FUSION DOUBLE LENS **FDL**

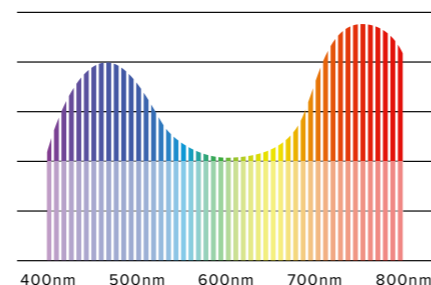

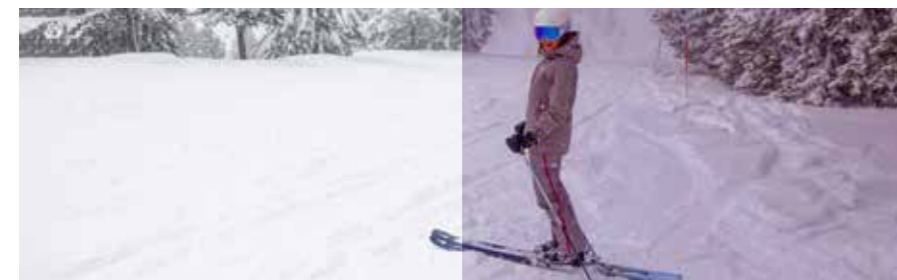

Fusion Double Lens (FDL) is the next-generation for double lens construction: it uses lamination instead of connecting the cylindrical lenses with an additional foam layer. This means an up to 20% larger field of vision compared to a classic double lens construction. And because the two lenses are laminated together, there's no double light refractions, no reflections and no decline in optics due to changes in atmospheric pressure at altitude.

LENS TECHNOLOGIES

HD LENS TECHNOLOGY **HD**

HD lens technology uses crystals in the lens to create incredible snow visibility and high-definition contrast. Our guarantee of crystal clear vision – in all light conditions!

STEREO LENS TECHNOLOGY

Nine layers of high-end mirror coating increase protection from glare and reduce eye fatigue – with the colors and coatings perfectly balanced for 100% clarity.

PHOTOCHROMIC LENS TECHNOLOGY

Our photochromic lenses respond to changing light conditions by adjusting the level of tint. When it's dark they get lighter. When the sun comes out they get darker to protect you from glare.

FLASH LENS TECHNOLOGY

Flash lens technology includes one layer of high-quality mirror coating – for reduced glare, optimized clarity and an enhanced skiing experience.

HYDROPHOBIC LENS COATING

A durable coating that repels moisture, grease and dirt. Water drops roll off and disperse without streaking, while fingerprints can be easily removed.

8X ANTI-FOG INNER LENS COATING

The inner lens of all our FDL lenses offers up to 8x more anti-fog properties than industry standards, withstanding fogging for over 240 seconds in controlled lab tests (vs. the standard test length of 30 seconds).

ANTI-FOG:

FRAME TECHNOLOGIES

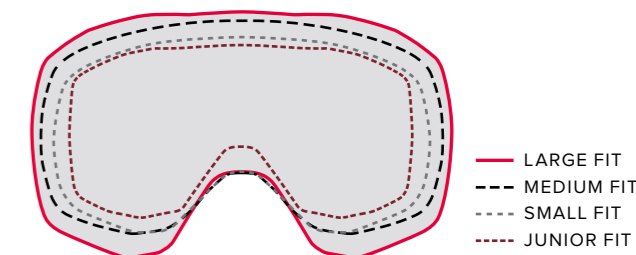

QUICK CLICK SYSTEM

Quick Click Lens is a mechanical system allowing you to change lenses in seconds: when conditions change you click out one lens, click in a new one and you're done.

DIFFERENT FRAME SIZES

As well as different styles, our goggles come in different frame sizes. Ready to fit all face shapes.

OVER THE GLASSES (OTG) COMPATIBLE

OTG and OTG LITE goggles are 'Over the Glasses' compatible, with small grooves in the frame to fit prescription glasses. OTG goggles have a slightly larger frame specially designed for regular glass wearers. OTG LITE goggles have a standard frame ideal for occasional wearers – and anyone else!

DESIGNED TO BE TOGETHER

We've designed the frame shape of our goggles so they fit our helmets perfectly without any gaps. Our top goggles also feature articulated outriggers. These flexible hinges on the side make sure the strap sits nicely around the helmet, and that pressure is evenly distributed across the face to provide a complete seal.

REDSTER

Smart and safe

The Atomic Shocksense impact sensor and its dedicated smartphone app gives you an accurate picture of your helmet's condition — meaning you're free to push your limits with total confidence in your equipment.

Supreme protection

With Shocksense technology to detect and report impacts, our new lightweight Carbon Racecase shell offering improved defense against head injury, and the AMID foam system producing up to 40% higher impact protection than industry safety standards, Redster helmets provide unrivaled levels of safety for every run.

Instant fit

Thanks to our new 360° RS Fit System, Redster helmets are completely customizable to your head shape and size — allowing for 100% personalized comfort, straight out of the box.

FOUR JR

Next-generation protection

The full protection package for young guns: an in-mold shell makes it super strong and light, and the Atomic Holo Core construction absorbs shock like a pro, generating up to 30% higher impact protection than industry standards require.

Comfy and cool

This fit always stays comfy and never gets loose. The size system includes height adjustment for different head shapes and a dial at the back for fine-tuning. Aircon is our most advanced cooling system – keeping you cool by sucking hot air away from the head.

The shape of the future

Thanks to our new 360° RS Fit System, Redster helmets are completely customizable to your head shape and size — allowing for 100% personalized comfort, straight out of the box.

SAVOR BIG RS

Feel closer to the course

The more you see, the more confident you ski. Instead of a foam layer between lenses, the Fusion Double Lens (FDL) is laminated together to create a field of vision up to 20% larger – with no refractions, reflections or fogging. The next step in lens technology.

Race in HD

At high speed it's all about the contrast. HD lens technology uses crystal dye in the lens to enhance contrast to insane levels. Pick out the best racing line in front of you, even in the split second you've got to choose it.

Be prepared

For racers who leave nothing to chance: Savor Big RS goggles come with 2 tinted HD lenses plus a clear lens for night races. The goggles fit the Redster helmet with a perfect seal to stop wind or snow getting in.

AFTERMARKET TECHNICAL SPECIFICATIONS

LENS GUIDE

We sell a range of extra lenses for our goggles: each lens offers a specific combination of tint and technology. In the table below, choose your goggle frame and your model (both in bold). Then see which lens types are available to buy for that specific model.

HD  SILVER HD HD 3-2 	HD  GREEN HD HD 3-2 	HD  RED HD HD 3-2 	HD  PINK/COPPER HD HD 3-2 	HD  BLUE HD HD 2-1 	HD  YELLOW/BLUE HD HD 2-1 	PHOTOCHROMIC  BLUE PHOTO 3-1 VLT: 46-13% 	STEREO  BLACK STEREO CAT. 3 VLT: 13% 	STEREO  RED STEREO CAT. 3 VLT: 13% 	STEREO  BLUE STEREO CAT. 2 VLT: 22% 	
STEREO  SILVER STEREO CAT. 2 VLT: 25% 	STEREO  GREEN STEREO CAT. 2 VLT: 25% 	STEREO  YELLOW STEREO CAT. 2 VLT: 25% 	STEREO  PINK/YELLOW STEREO CAT. 1 VLT: 48% 	STEREO  PINK/BLUE STEREO CAT. 1 VLT: 63% 	STEREO  CLEAR STEREO CAT. 0 VLT: 90% 	FLASH  SILVER FLASH CAT. 2 VLT: 32% 	RENTAL  ROSE CAT. 2 VLT: 35 % 	DO NEW LENSES FIT OLDER FRAMES? Yes, so if you bought Count goggles three years ago, a new lens will fit. There is one exception: Savor lenses only fit Savor frames from 2020/21 season onwards.

DESIGNED TO BE TOGETHER

All our goggles have frames to fit our helmets. And all our helmets are shaped to work with our goggles. That said, there are combinations that just work perfectly.

MORE THAN JUST PRODUCT

TAILOR YOUR OWN RENTAL PROGRAM ACCORDING TO YOUR NEEDS

2. MOUNTING / LABELING

- Pre-mounted bindings
- Pre-equipped with bar codes

4. ADVANCED SHIPPING NOTIFICATION

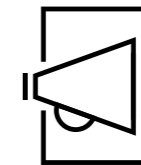

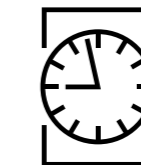

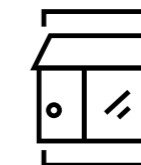

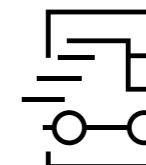

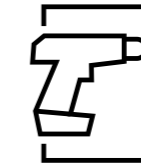

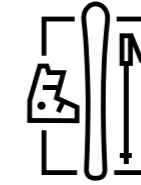

- Provision of all product data for easy uploading into your rental software

6. SHOP IN SHOP TOOLS

- Shop design including displays
 - Staff apparel
 - Boot fitting tools

8. MARKETING SERVICES

- Customer Activation
- Marketing Support
- Rental Dealer Locator

1. PRODUCT

- Select from our broad offer for every type of skiing
- Including products from luxury to economy

3. SHIPPING

- Priority Shipping
- Reduced packaging
- Labeling and packaging tailored to your needs

5. CUSTOM B2B

- Customized designs for skis, helmets and poles

7. AFTER SALES SERVICE

- Spare Parts
- Warranty Management

RENTAL MADE EASY AND FAST

ATOMIC RENTAL

Everything we do at Atomic is to drive skiing forward – from the cutting-edge tech used by our World Cup racers to a youngster's very first set of skis. Rental is a huge part of this journey, so we create equipment specifically for the Rental market, as well as a wide range of other products that will work perfectly for skiers and ski businesses of all types.

EASY AND FAST IN THE SHOP

Easy out, easy in. The Atomic products are a rental shop's dream system with clearly visible size and sole length information on each boot, a color coding system for ski, pole and helmet size. Simple, straightforward, fast.

EASY AND FAST TO WORK WITH

Get customers on the snow quickly. Our wide range of boots lets skiers find a perfect fit fast – and so do our helmets. Durable surfaces on the top sheets, bases and edges and long-lasting components keep gear looking fresh.

EASY AND FAST ON THE SLOPES

Atomic equipment makes every aspect of skiing easy – before or after customers hit the snow, and while they're actually heading downhill. The shapes give skiers of all skill levels the comfort to ski confidently – more fun with less effort. No complaints, no equipment exchanges, more time skiing – and happier customers that come back again and again.

BUILT FOR RENTAL

Lots of skiers love renting because it gives them the chance to try out the latest technology each year. So we're putting loads of time and effort into providing a great rental offer. In fact, we've made sure all our regular inline skis and boots are 100% rental ready. And we offer a range of products specifically tailored for rental, all featuring our latest technical advances.

SKI

TIP PROTECTOR
A stainless steel protector that's screwed in so it's easy to replace and extends the life of the ski.

STRUCTURED TOPSHEET
The highly scratch-resistant topsheet protects the ski from mechanical damage.

ROBUST BASES AND EDGES
Our skis come with sintered bases and Dura Edge technology for more grinding cycles and greater durability.

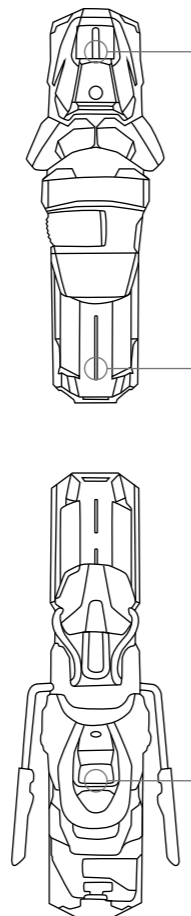

BARCODE HOLDER
A special spot for a barcode on the binding.

BEND-X TECHNOLOGY
A flex zone in the binding area of the Savor 3, Savor 1, Cloud 7 and all Junior models makes it easier to bend the ski using less power. This makes turning easier, even for beginners.

SLANTED SIDEWALLS
A construction with slanted sidewalls that avoids topsheet chipping and reduces scratches on the surface.

BINDING

EASY TO READ DIN VALUES
Lets you read DIN values on toe and heel in a second, then adjust to suit skier's weight, height, age and skiing level.

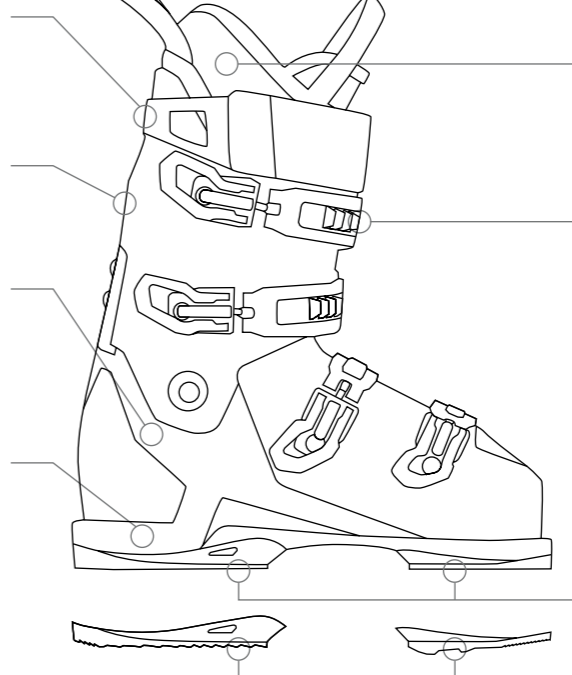

EASY TO MOUNT
Really simple mounting saves you loads of time throughout the season.

TOOLLESS ADJUSTMENT
Easily adjustable sole lengths along with toe and heel components mean you can fine-tune a skier's position on their ski quickly and without tools.

GRIPWALK
Our GripWalk-ready ski bindings are designed with perfectly fitting contact points, ensuring optimal power transfer to the ski and work with regular alpine soles (ISO 5355) as well as GripWalk soles. They need no toe height adjustment and offer a perfect fit and release.

BOOT

BARCODE HOLDERS
Dedicated barcode panels on the boot help the barcode stickers stay put throughout the season.

SIZE AND SOLE LENGTH
Big numbers make it easy to find the right size.

POLYURETHANE SHELLS
Our durable, highly scratch-resistant shells make radiant colors and transparent designs possible.

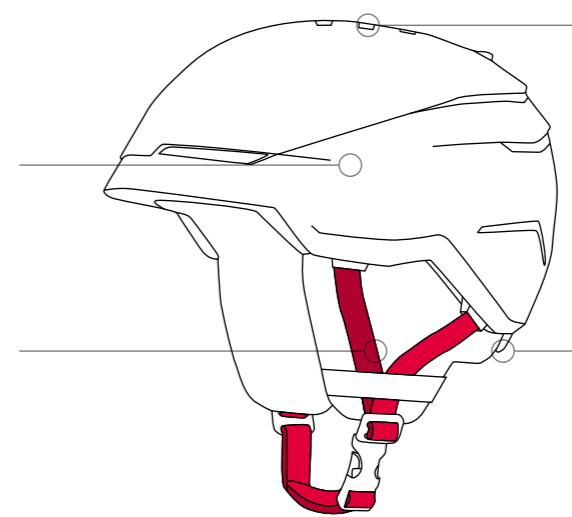

DURABLE SURFACE TEXTURE
A strong finish that improves durability and long-term aesthetics – featured on all Hawx boots.

COMFORTABLE, LONG-LASTING LINERS
Soft and warm liners retain their high-grade appearance and remain extremely comfortable for years.

TOOLLESS ADJUSTABLE BUCKLES
We use buckles featuring adjustable tooth plates that can be easily shifted to fit different leg shapes.

EXCHANGEABLE SOLES
Our rental boots offer exchangeable soles. They can be set up with GripWalk or 5355 Alpine soles.

HELMET

3M™ X-STATIC LINING
This high-performance lining provides unparalleled anti-microbial and anti-odor properties – ideal for rental.

LIVE FIT
Live Fit pads surround the head 360° and instantly mold to different head shapes for an individual fit. They also dampen low-level impacts.

COLOR CODED SIZING
All Atomic helmets are color coded, which makes finding the right size super easy so you can get skiers out of the shop and onto the snow quickly!

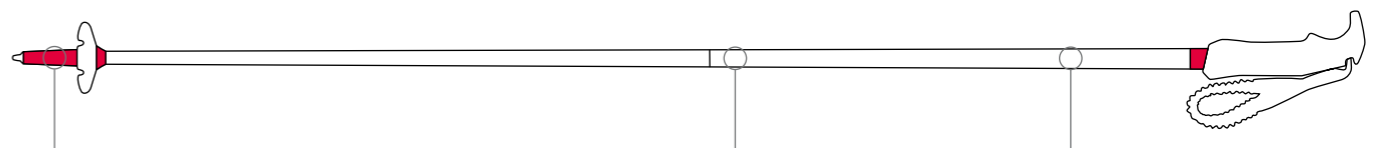

- XS
- S
- M
- L
- XL

ACTIVE AIRCON VENTING
Aircon is our most advanced cooling system. The Holo Core offers wider and more air channels through each layer of the helmet which gives hot air room to escape while manually adjustable vents actively suck heat away from the head.

FIT SYSTEM
Our rental helmets can be manually height-adjusted and fine-tuned using a small dial at the back for an even more precise fit.

§ HELMET INDEMNIFICATION PROGRAM

POLE

COLOR CODED SIZING
All Atomic poles are color coded, which makes finding the right size super easy so you can get skiers out of the shop and onto the snow quickly!

- 70 cm / 95 cm / 120 cm
- 75 cm / 100 cm / 125 cm
- 80 cm / 105 cm / 130 cm
- 85 cm / 110 cm / 135 cm
- 90 cm / 115 cm

LIGHTWEIGHT
We make all our rental poles from composite material or aluminum. Both really light and durable.

HARD-WEARING COMPONENTS
These include more robust tubes, strong baskets and hard-wearing anodized graphics.

CREATE YOUR OWN

CUSTOMIZED ATOMIC EQUIPMENT

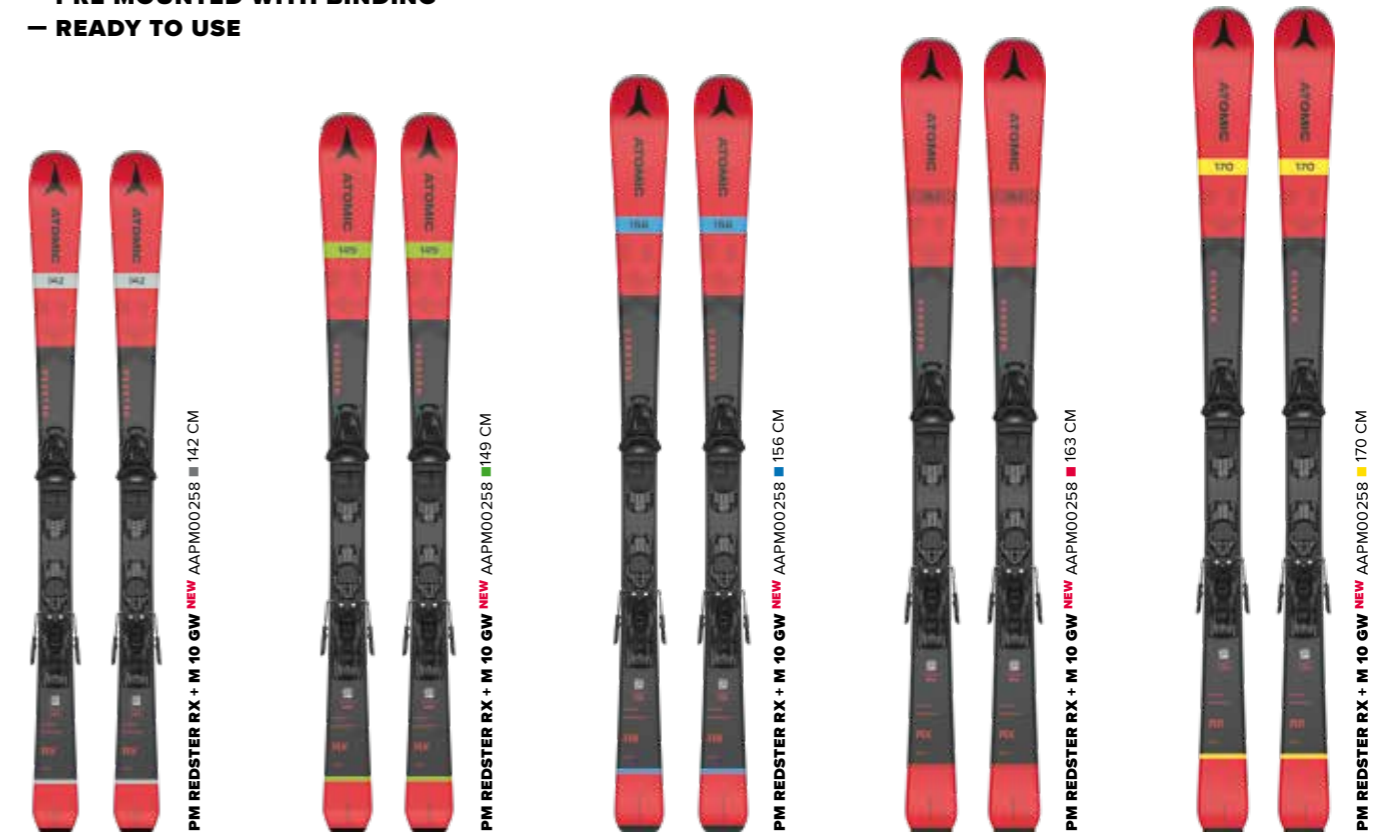

Design your own ski with this easy-to-use tool. Get the same Atomic quality and performance but with your own top sheet design. Create your individual, Atomic quality ski. Moreover, take the possibility to customize helmets and poles, in order to offer a complete range of your own branded products.

CUSTOM STUDIO B2B OPTIONS

- Logo integration or complete design on skis (under consideration of the Atomic branding guidelines)
- Logo integration on helmets and poles
- Lead time 6 months (latest order intake end of June)
- For further information please contact your Sales Rep / CMM / Area Sales Manager

REDSTER

REDSTER S9 GEN S

Energy-saving efficiency

With a wider tip and tail from the Speedline sidecut, you'll get a stronger push — which means longer strides, improved steering ability, and a big boost to skiing efficiency.

One size, superior agility

Thanks to Redster Gen S technology, we've eliminated the need for varying sizes of skating skis. This innovative combination of new materials, our new Speedline sidecut, and the new Speedscale geometry offers increased precision, agility, and maneuverability on the track.

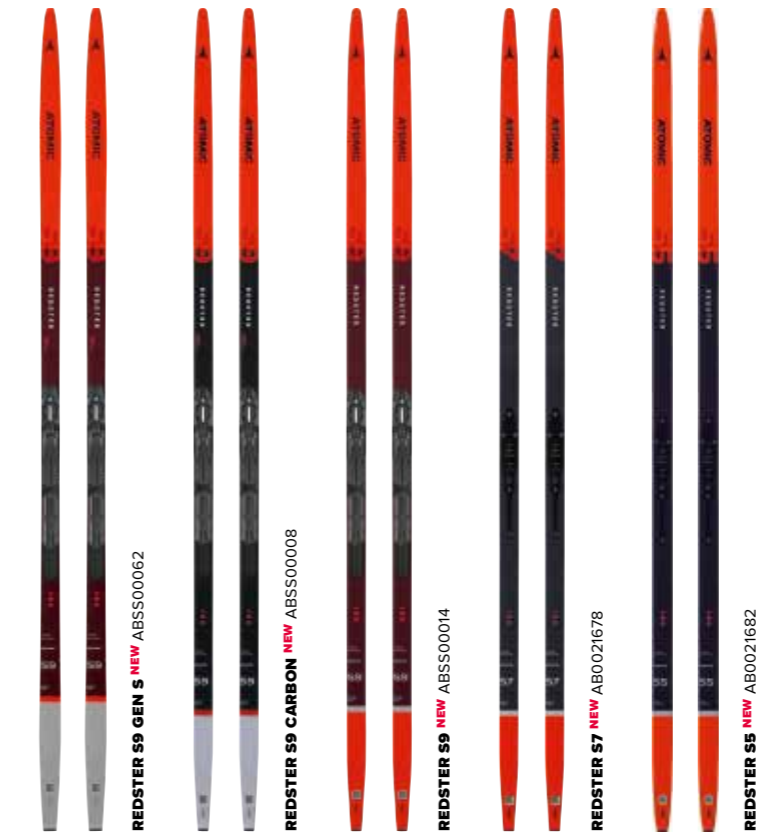

Race-winning acceleration

Speed is everything when fractions of a second count. Racewall — our new sidewall construction — removes the barrier between ski edge and snow, meaning more direct power transmission, more stability, and faster skiing.

PROLINK SHIFT-IN

Shift while you're in

The new Shift-In button means you can adjust your position while you're still in the binding. In another major improvement the button is integrated into the lever, for a remarkable improvement in swing weight and perfectly balanced skis.

Perfect your performance

Forwards for more grip. Backwards for better glide. Adapt your binding position to suit your terrain, snow and skiing level, and fine-tune during your session.

Bonded for ultimate power

For the first time the Shift-In plate is bonded to the ski, which results in the best power transmission and stability possible. Get the maximum performance from the power you put in.

SNOWCLOUD

For women by women

Snowcloud is our first dedicated women's apparel range. It's been created by our all-women design team who understand the demands of skiing but have also made an empowering, feel-good collection that flatters the body.

Performance meets style

Snowcloud has an elegant, timeless look with a mix of gloss and matt materials. But this is also high-performance Atomic skiwear: with technical details and a slim fit that's light, comfy, stretchy and figure-hugging.

Mix and match

Atomic red, relaxed pastel, cool monochrome or classic black: there's a Snowcloud for everyone. Skiers can mix and match any garment from the range, including a lightweight and warm Primaloft jacket, slim softshell pants and fitted, insulated 2l jacket and pants. The breathable fleece zip-neck works under all layers.

PERFORMANCE MEETS STYLE

Snowcloud combines an elegant, timeless look with high-performance Atomic skiwear technology.

2L STRETCH FABRIC

A lightweight stretch material with a premium feel. This fabric is water-repellent and has a good level of water-resistance, preventing damp and cold when skiing the slopes.

STANDARD 100 BY OEKO-TEX®

A consistent, independent testing and certification system for textile products, guaranteeing product safety, sustainable awareness and responsible use of chemicals.

ATOMIC THERMABODY INSULATION

An insulation made from synthetic non-woven polyester that's durable, resilient and extra warm without making your garment look bulky.

YKK VISLON® ZIPPER

Robust, waterproof zippers that withstand wear and tear but are easily unzipped in a rush.

DETACHABLE HOOD

A detachable hood that you can add on in bad weather and take off in good. Unlike a lot of detachable hoods, this one is seamless and looks completely integrated with your jacket when on.

DETACHABLE POWDER SKIRT

A detachable skirt made from ripstop fabric which you can zip in when you're in deeper snow. Super light and durable when worn, and easy to stow when not needed.

ZIP-UP SLEEVE

A new expandable sleeve constructed with pleated material held taut by a zip. Unzipping this allows you to easily extend the sleeve to tuck your gloves into the jacket, and ensures no little gaps where cold and snow can get in.

FELT PATCH BRANDING

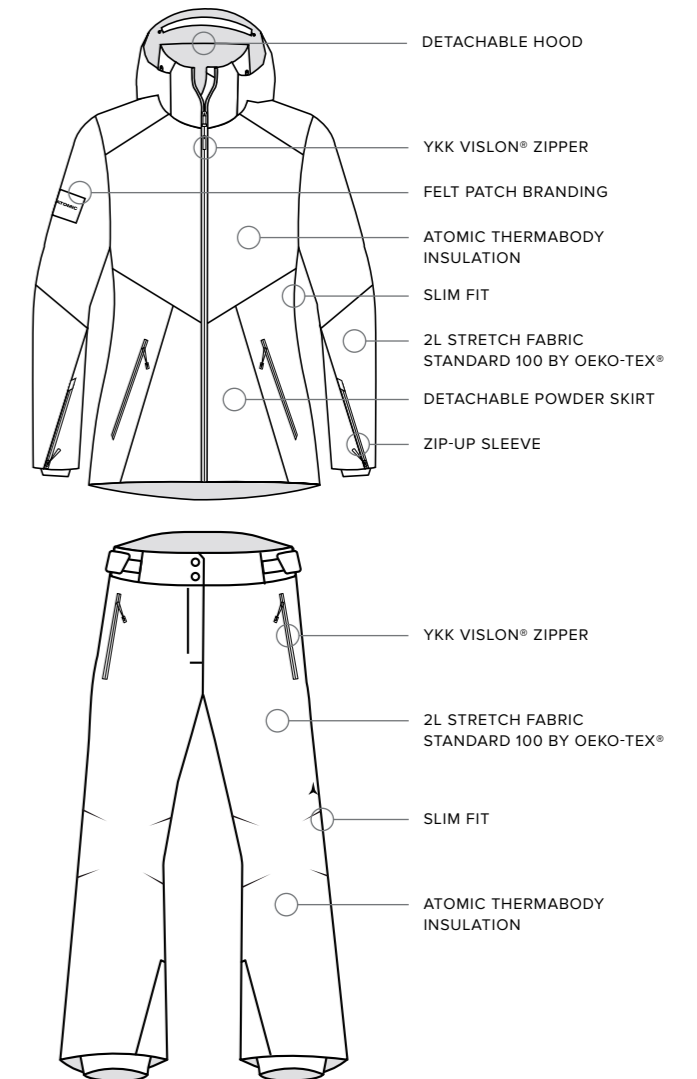

Our premium Atomic logo branding has a felt base and a raised 3D print of the logo that stands out in every sense!

SLIM FIT

A fit that's elegant, fitted and trim to the body, but with all the movement you need for skiing.

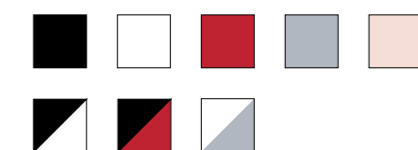

FOR WOMEN BY WOMEN

Snowcloud is our first dedicated women's apparel range. It's been created by our all-women design team who understand the demands of skiing but have also made an empowering, feel-good collection that flatters the body.

MIX AND MATCH

Atomic red, relaxed pastel, cool monochrome or classic black: there's a Snowcloud for everyone. Mix and match any garment from the range!

INSEAM PANT (from crotch to floor*)	76	77.5	79	80.5	82	84

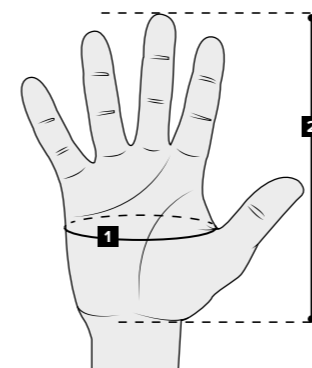

- 1 CHEST:** The circumference of your chest is measured under your armpits, around your shoulder blades, and back to the front.
- 2 WAIST:** Measure the circumference of your waist at your natural waistline, which is located above your belly button and below your rib cage.
- 3 HIP:** Hip is measured at your widest point around the hip.
- 4 SLEEVE LENGTH:** Measure from middle back to wrist (upper side of the sleeve).
- 5 INSEAM PANT:** Measure from the top of your leg to the end of your leg (inside of the leg).

GLOVES MEN & UNISEX (Sizing cm)

@WORKBOOK: THE DIGITAL CATALOG

Find the complete Atomic product range 2021/2022 on @Workbook. This huge step forward into the digital world brings a lot of advantages and user friendly working processes. Once you have downloaded the catalogs, you can use them everywhere offline on any device – on an iPad, at the office, on the computer, or at home on the phone.

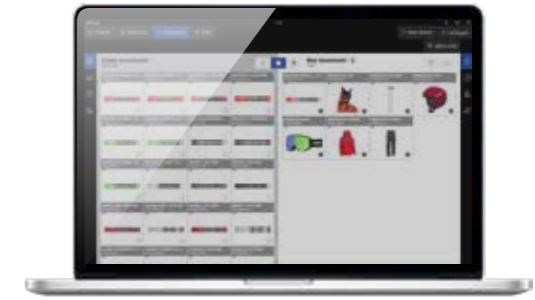

HOW TO GET @WORKBOOK

1. Go to www.aworkbook.com/software-downloads and download the software for your preferred platform.
2. Install Adobe AIR.
3. Click the sign-in icon. 
4. Enter your email address in the login window.
5. A new web page will open. Please enter your first and last name and click submit.
6. An email will be sent to you with a verification code.
7. Enter the received verification code and choose a password.
8. Create your @Workbook account.
9. Once you are connected a green line should appear next to the sign-in icon. Enter your reference (provided by your sales rep) on the bottom left, to join your country group.
10. Download the catalog.

ALWAYS UP TO DATE

All products are updated on a regular basis, therefore new products will be added auto-matically and dropped ones will be removed.

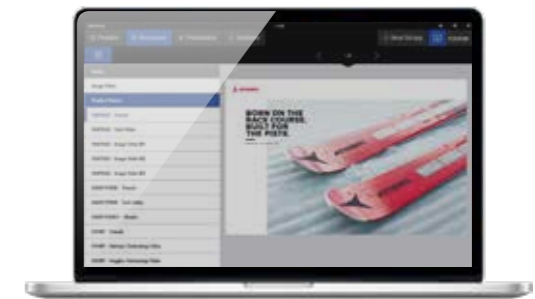

YOUR OWN ASSORTMENT

By working with a particular selection of Atomic products you can easily create assortments on the fly from any support, Mac, PC, Tablets, iPads, etc. Your individual selections can be exported as PDF or Excel file with different levels of product details – easy to mail, easy to print.

BE A PRODUCT EXPERT

Discovering more about Atomic products is now easier with listings of all the specifications of a product, access to a further range of images and links detailing the key features of a product. By selecting one of these will provide a detailed explanation of what technologies are used in the product or outline the main features with an illustration.

LEARN THE STORY BEHIND

Use the resource and presentation section to view the latest campaign visuals and videos which tell the story behind each initiative.
